Q2 2020 Consolidated Performance Overview

For Q2 2020, the Company was able to operate and serve our customers' equipment and immediate liquidity needs through our platform of auction technology solutions and online auction capabilities. In addition to running our IronPlanet weekly featured online auction, our online Marketplace-E solution and GovPlanet online auctions, we modified our live operations in March 2020 which transitioned all our traditional live on site industrial auctions to online bidding. In addition, as implemented in the first quarter, we are using our Time Auctioned Lots (TAL) solution for selected International and on-the-farm agriculture events.

GTV remained flat at \$1.5 billion in Q2 2020 with significant variability by region where US and Canada had higher activity, but International was lower due to the severe impact of the COVID-19 pandemic in that region. Total GTV increased due to record online performance driven from strong execution by the US region and the US strategic accounts sales teams, year-over-year growth performance at our Fort Worth auction, and auction calendar shifts in response to COVID-19. These shifts included the addition of the Montreal, Canada and Los Angeles, US auctions from Q1 2020 to Q2 2020, which were partially offset by the postponement of the Polotitlan, Mexico, and Ocana, Spain auctions from Q2 2020 to Q3 2020. This increase was offset by the non-repeat of a large dispersal of pipeline equipment as part of the \$94 million Columbus, Ohio auction held in June 2019, and lower International performance mainly due to the severe impact of the COVID-19 pandemic in this region. In addition, GTV related to government surplus contracts were lower due to government shutdowns in response to COVID-19.

Total revenue decreased 1% to \$389.0 million in Q2 2020.

Service revenue was flat year-over-year at \$234.1 million with commissions revenue lower by 7% on flat Service GTV primarily due to softer commission rate performance from a higher proportion of GTV sourced from strategic accounts, and lower rates from our government operations. Total fees were up 9% on flat total GTV driven primarily by the mix of small values lots, the harmonization of buyer fees and higher fees from services within our US operations, which was partially offset by fees waived for Canadian on-the-farm auctions as part of our COVID-19 pandemic response.

Inventory sales revenue decreased 2% primarily related to a non-recurring large dispersal of pipeline equipment as part of the \$94 million Columbus, Ohio auction in June 2019, and selling through certain non-repeating large inventory deals from Europe and Asia in Q2 2019. We also earned lower inventory revenue through our government surplus contracts due to government shutdowns in response to COVID-19. This decrease was partially offset by strong year-over-year performance in the US and Canada regions.

Costs of services decreased 22% to \$39.4 million. In response to the COVID-19 pandemic, we transitioned our live on site auctions to online bidding, utilized TAL solutions for selected International and on-the-farm agricultural events, and implemented travel restrictions. These operational changes resulted in significant temporary cost reductions in employee compensation and travel, advertising, and promotion expenses. In addition, we incurred lower net fees related to referral payments.

Cost of inventory decreased 4% to \$143.1 million, primarily in line with lower activity in inventory sales revenue. Cost of inventory sold decreased at a higher rate than the decrease of inventory sales revenue, indicating an increase in the revenue margin. The margin also improved as a result of equipment sold at a lower price performance in the prior year within the International region, which was not repeated in Q2 2020.

Selling, general and administrative (“SG&A”) expenses increased 3% to \$100.6 million primarily due to higher incentive expense, including a one-time incentive accrual to employees who have been instrumental during the COVID-19 pandemic to continue keeping our operations running and servicing our customers. These increases were partially offset by lower SG&A expenses related to lower travel, advertising, and promotion costs as we implemented travel restrictions.

Foreign exchange had an unfavourable impact on total revenue and a favourable impact on expenses. These impacts were primarily due to the fluctuations in the Euro, Canadian dollar, and Australian dollar exchange rates relative to the U.S. dollar.

Net income attributable to stockholders decreased 2% to \$53.0 million, primarily related to the increase in the effective tax rate, partially offset by a higher operating income and lower interest expense.

Primarily for the same reasons noted above, **diluted EPS attributable to stockholders** was flat at \$0.49 per share for Q2 2020 and Q2 2019. **Diluted adjusted EPS attributable to stockholders*** increased 10% to \$0.54 per share in Q2 2020, after adjusting for a \$6.2 million income tax expense in Q2 2020 related to an unfavourable adjustment to reflect final regulations published regarding hybrid financing arrangements.

Non-GAAP Measures

This news release references to non-GAAP measures. Non-GAAP measures do not have a standardized meaning and are, therefore, unlikely to be comparable to similar measures presented by other companies. The presentation of this financial information, which is not prepared under any comprehensive set of accounting rules or principles, is not intended to be considered in isolation of, or as a substitute for, the financial information prepared and presented in accordance with generally accepted accounting principles.

Adjusted Net Income Attributable to Stockholders* and Diluted Adjusted EPS Attributable to Stockholders* Reconciliation

The Company believes that adjusted net income attributable to stockholders* provides useful information about the growth or decline of the net income attributable to stockholders for the relevant financial period and eliminates the financial impact of adjusting items the Company does not consider to be part of the normal operating results. Diluted Adjusted EPS attributable to stockholders* eliminates the financial impact of adjusting items which are after-tax effects of significant non-recurring items that the Company does not consider to be part of the normal operating results, such as acquisition-related costs, management reorganization costs, and certain other items, which the Company refers to as 'adjusting items'.

The following table reconciles adjusted net income attributable to stockholders* and diluted adjusted EPS attributable to stockholders* to net income attributable to stockholders and diluted EPS attributable to stockholders, which are the most directly comparable GAAP measures in the consolidated income statements.

- (2) Adjusted net income attributable to stockholders* represents net income attributable to stockholders excluding the effects of adjusting items.
- (3) Diluted adjusted EPS attributable to stockholders* is calculated by dividing adjusted net income attributable to stockholders*, net of the effect of dilutive securities, by the weighted average number of dilutive shares outstanding.

Adjusted EBITDA*

The Company believes that adjusted EBITDA* provides useful information about the growth or decline of our net income when compared between different financial periods.

The following table reconciles adjusted EBITDA* to net income, which is the most directly comparable GAAP measures in, or calculated from, our consolidated income statements:

(in U.S. \$000's, except percentages)	Three months ended June 30,			Six months ended June 30,

- (1) Please refer to page 11 for a summary of adjusting items during the three and six months ended June 30, 2020 and June 30, 2019.
- (2) Adjusted EBITDA* is calculated by adding back depreciation and amortization expenses, interest expense, and income tax expense, and subtracting interest income from net income excluding the pre-tax effects of adjusting items.

Adjusted Net Debt* and Adjusted Net Debt/Adjusted EBITDA* Reconciliation

The Company believes that comparing adjusted net debt/adjusted EBITDA* on a trailing 12-month basis for different financial periods provides useful information about the performance of the Company's operations as an indicator of the amount of time it would take the Company to settle both the short and long-term debt. The Company does not consider this to be a measure of liquidity, which is the ability to settle only short-term obligations, but rather a measure of how well the Company funds liquidity.

The following table reconciles adjusted net debt* to debt, adjusted EBITDA* to net income, and adjusted net debt*/adjusted EBITDA* to debt/net income, respectively, which are the most directly comparable GAAP measures in, or calculated from, our consolidated financial statements.

(in U.S. \$millions, except percentages)	As at and for the 12 months ended June 30,

- (1) Please refer to page 11 for a summary of adjusting items for the trailing 12-months ended June 30, 2020 and June 30, 2019.
- (2) Adjusted EBITDA* is calculated by adding back depreciation and amortization expenses, interest expense, and income tax expense, and subtracting interest income from net income excluding the pre-tax effects of adjusting items.
- (3) Adjusted net debt* is calculated by subtracting cash and cash equivalents from short and long-term debt.
- (4) Adjusted net debt*/adjusted EBITDA* is calculated by dividing adjusted net debt* by adjusted EBITDA*.

Operating Free Cash Flow* (“OFCF”) Reconciliation

The Company believes OFCF*, when compared on a trailing 12-month basis to different financial periods provides an effective measure of the cash generated by the business and provides useful information regarding cash flows remaining for discretionary return to stockholders, mergers and acquisitions, or debt reduction. The balance sheet scorecard includes OFCF* as a performance metric. OFCF* is also an element of the performance criteria for certain annual short-term and long-term incentive awards.

The following table reconciles OFCF* to cash provided by operating activities, which is the most directly comparable GAAP measure in, or calculated from, the consolidated statements of cash flows:

(in U.S. \$millions, except percentages)	12 months ended June 30,		
	2020	2019	% Change 2020 over 2019
Cash provided by operating activities	\$ 370.8	\$ 196.8	88 %
Property, plant and equipment additions	15.1	15.7	(4)%
Intangible asset additions	28.5	26.1	9 %
Proceeds on disposition of property plant and equipment	(21.5)	(9.5)	126 %
Net capital spending	\$ 22.1	\$ 32.3	(32)%
OFCF*	\$ 348.7	\$ 164.5	112 %

(1) OFCF* is calculated by subtracting net capital spending from cash provided by operating activities.
