Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2016 to December 31, 2016.

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Integer Holdings Corporation (“the Company”) is filing this Specialized Disclosure Form (“Form SD”) pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, as amended, for the reporting period from January 1, 2016 to December 31, 2016.

In accordance with Rule 13p-1, the Company has filed this Form SD and the associated Conflict Minerals Report for the calendar year ended December 31, 2016 filed herewith as Exhibit 1.01. Both of these reports are available on the Company’s website at investor.integer.net (under the “Investor Relations” caption and “SEC Filings” subcaption).

Item 1.02 Exhibit

A copy of the Company’s Conflict Minerals Report is filed as Exhibit 1.01 to this Form SD.

Section 2 – Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report:

Exhibit 1.01 – Conflict Minerals Report for the period January 1, 2016 to December 31, 2016.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 31, 2017

INTEGER HOLDINGS CORPORATION

Gary J. Haire

Executive Vice President and Chief Financial Officer

Integer Holdings Corporation
Conflict Minerals Report
For the Year Ended December 31, 2016

Overview

This Conflict Minerals Report (this “Report”) of Integer Holdings Corporation (“Integer,” “the Company,” “we,” or “our”) has been prepared by us on a consolidated basis for the reporting period from January 1, 2016 to December 31, 2016 (the “Reporting Period”) pursuant to Rule 13p-1 and Form SD (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended.

Conflict minerals are defined as columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted), or their derivatives, which are limited to tantalum, tin and tungsten and gold (collectively referred to as “3TG”) for the purposes of this assessment. The “Covered Countries” for the purposes of the Rule are the Democratic Republic of the Congo (“DRC”), Angola, Burundi, Central African Republic, the Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia.

If a registrant knows or has reason to believe that any of the conflict minerals necessary to the functionality or production of their products may have originated in the Covered Countries, then the registrant must exercise due diligence on the conflict minerals’ source and chain of custody and submit a Conflict Minerals Report to the Securities and Exchange Commission (“SEC”) that includes a description of those due diligence measures.

Integer determined that during the Reporting Period it has manufactured or contracted to manufacture products containing 3TG and that the use of these minerals is necessary to the functionality or production of many of its products (the “Covered Products”). In order to conform to the Rule, the Company then performed a risk-based assessment to determine if the necessary conflict minerals in the products the Company manufactured or contracted to manufacture directly or indirectly financed or benefited armed groups in one or more of the Covered Countries. This risk-based assessment is discussed in further detail in the following sections.

Forward-Looking Statements

This Report contains forward-looking statements, which are based on our current expectations and involve numerous risks and uncertainties that may cause these forward-looking statements to be inaccurate. These statements include statements regarding our goals for future improvements to our due diligence process and to mitigate the risks associated with the sourcing of our conflict minerals. All forward-looking statements involve risk and uncertainty. Risks that may cause these forward-looking statements to be inaccurate include: failure to carry out these plans in a timely manner or at all; lack of cooperation or progress by our suppliers, and their respective suppliers and smelters; lack of progress by smelter or refiner validation programs for conflict minerals (including the possibility of inaccurate information, fraud and other irregularities) or that these plans may not be effective. In addition, you should also consider the important factors described in reports and documents that we file from time to time with the SEC, including the factors described under the sections titled “Risk Factors” in the Company’s most recently submitted Quarterly or Annual Reports. Except as required by law, we disclaim any obligation to update information contained in these forward-looking statements whether as a result of new information, future events, or otherwise.

Section 1: Company Overview

Integer, headquartered in Frisco, Texas, is among the world’s largest medical device outsource manufacturing companies, serving the cardiac, neuromodulation, orthopedics, vascular and advanced surgical markets. We also serve the non-medical power solutions market. We provide innovative, high quality medical technologies that enhance the lives of patients worldwide. In addition, we develop batteries for high-end niche applications in energy, military, and environmental markets.

Integer’s product lines and their respective products for the Reporting Period included:

- Cardio & Vascular products that include introducers, steerable sheaths, guidewires, catheters, and stimulation therapy components, subassemblies and finished devices that deliver therapies for various markets such as coronary and neurovascular disease, peripheral vascular disease, interventional radiology, vascular access, atrial fibrillation, and interventional cardiology, plus products for medical imaging and pharmaceutical delivery.
 - Cardiac & Neuromodulation products that include batteries, capacitors, filtered and unfiltered feed-throughs, engineered components, implantable stimulation leads, and enclosures used in implantable medical devices.
-

- Advanced Surgical, Orthopedics & Portable Medical products that include components, sub-assemblies, finished devices, implants, instruments and delivery systems for a range of surgical technologies to the advanced surgical market, including laparoscopy, orthopedics and general surgery, biopsy and drug delivery, joint preservation and reconstruction, arthroscopy, and engineered tubing solutions. Products also include life-saving and life-enhancing applications comprising of automated external defibrillators, portable oxygen concentrators, ventilators, and powered surgical tools.
- Electrochem products that include primary (lithium) cells, and primary and secondary battery packs for applications in the energy, military and environmental markets.

Section 2: Reasonable Country of Origin Inquiry

In accordance with the Rule, after the Company's initial determination that conflict minerals were necessary to the functionality of many products, the Company conducted a reasonable country of origin inquiry ("RCOI") to determine whether the Company had reason to believe that any of the conflict minerals necessary to the functionality or production of its products may have originated in the Covered Countries. Integer's RCOI consisted of surveying suppliers that directly supply 3TG, or component parts containing 3TG, to Integer ("Tier 1 Suppliers"). An assessment process was undertaken by the Company to identify the Tier 1 Suppliers that supplied 3TG, or component parts containing 3TG, to Integer during the Reporting Period, which included a review by engineering and supply chain teams of the bills of material for each of our Covered Products (the "Supplier Assessment") produced at their respective locations. For certain distributors that are within the Company's Tier 1 Supplier chain, the Company reached out to the manufacturers that supplied the 3TG contained within our Covered Products received from the distributor ("Tier 2 Suppliers"). After completion of the Supplier Assessment, our supplier survey list was established. Tier 1 and Tier 2 Suppliers of 3TG or component parts that contained or potentially contained 3TG were included in our supplier survey list.

As a first step to engaging with our supply chain, the Company sent a notification to Tier 1 and Tier 2 Suppliers during 2016 informing them about the Rule and asking them to complete the conflict minerals survey, based on the Conflict Minerals Reporting Template developed by the Conflict-Free Sourcing Initiative ("CFSI"). In 2016, Integer purchased and implemented electronic software from a third-party vendor to survey and collect all conflict minerals surveys from our suppliers. The third-party vendor reviewed all responses for completeness, corresponded with suppliers to ensure timely and accurate submissions and consolidated all information, including smelter lists.

The Company surveyed 400 Tier 1 and Tier 2 Suppliers identified during the Supplier Assessment. Every survey received was reviewed and based upon the response, and in accordance with the Rule, the Company undertook further due diligence efforts with regards to Covered Products to determine whether the 3TG in those products originated in the Covered Countries from sources that directly or indirectly finance or benefit armed groups in the Covered Countries. These due diligence efforts are described below.

Section 3: Due Diligence Design and Performance

(A) Due Diligence Design

The Company designed its due diligence measures to be in conformity with the internationally recognized due diligence framework as set forth in the Organization for Economic Cooperation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD, 2013) and related supplements for 3TG ("OECD Framework").

(B) Due Diligence Measures Undertaken

The Company's due diligence efforts for the Reporting Period included the following:

- The Company has established a management system for addressing the issue of conflict minerals in its products. The management system includes a Conflict Minerals Policy, which is posted on our website at <https://integer.net/wp-content/uploads/2015/12/POL-000067-EHSS-Conflict-Minerals.pdf>. Our policy (i) supports transparency in the Company's supply chain, (ii) encourages our suppliers to comply with the Dodd-Frank Act and make efforts to identify and eliminate the use of conflict minerals sourced from the DRC and surrounding areas unless verified as DRC Conflict Free by a third party audit, (iii) requires suppliers to conduct the necessary RCOI and due diligence for, and provide us with, proper verification of the country of origin and the source of the materials used in the products they supply to Integer, and (iv) expects our suppliers to utilize conflict-free smelter and refinery programs that are available. In addition, the policy expects Integer's suppliers to conduct business operations in an ethical manner and comply with all applicable laws related to environmental responsibility, workplace health and safety, and human resources.
-

- In addition to the Company's Conflict Minerals Policy and related goals, our management system includes the establishment of a cross-functional conflict minerals steering committee comprised of representatives from the Company's Supply Chain and Operational Excellence Group, Corporate Compliance Office, and Finance Department, which is overseen by our Chief Financial Officer. The Operational Excellence Group, with assistance from site engineering teams, is responsible for performing a review of the Covered Products, conducting the RCOI, and performing the due diligence review. The Corporate Compliance Office and Finance Department are responsible for reporting and general oversight. The conflict minerals steering committee also provides updates to the Company's Audit Committee with regards to the measures undertaken by management.
- The Company surveyed 400 of its Tier 1 and Tier 2 Suppliers and received 307 completed responses, representing a 77% response rate. We evaluated the survey responses for consistency of data provided, including whether those responses were complete and to identify any contradictions or inconsistencies found in those responses.
- For those suppliers who provided smelter or refiner information for 3TG, the Company analyzed those smelters to determine if they were in fact smelters, if the smelter was part of the Company's supply chain, and compared those smelters to the list of facilities that have received a "conflict free" designation from the Conflict Free Smelter Program ("CFSP") developed by the EICC/GeSI or other independent third party audit programs. Based upon the information provided by the Company's suppliers and its own due diligence efforts, the Company was unable to determine conclusively the countries of origin of the Conflict Minerals used in its products. The Company was unable to make such determination, in part, because not all supplier surveys were returned, the responses received were incomplete or not conclusive, and/or the smelter or refiner information provided by the suppliers reflected all smelters or refiners that the supplier conducted business with at some point during the year rather than smelters or refiners specific to 3TG or component parts containing 3TG sold to Integer. As a result, the Company was unable to conclusively identify those smelters or refiners that were directly related to the Company's supply chain for the 2016 calendar year.
- The smelter and refiner information provided at Annex I includes only those smelters and refiners provided by our suppliers that the Company was able to verify to the CFSP or the U.S. Department of Commerce Reporting Requirements under Section 1502(d)(3)(C) of the Dodd-Frank Act World-Wide Conflict Mineral Processing Facilities lists. The information listed does not include all the smelters or refiners provided by our suppliers as the list was modified to remove unknown or duplicate smelters and refiners. All of the the smelters and refiners listed at Annex I appear on the CFSI smelter list.
- Integer invested in a third party electronic solution to survey, review and consolidate conflict minerals information, with the goal of improving accuracy and timeliness.
- Due to the multiple layers within the Company's supply chain, the Company is removed from direct interaction with the sources of ore from which conflict minerals are produced and the smelters and refiners that process those ores. We must therefore rely on our suppliers to provide information regarding the origin of the conflict minerals that are included in our Covered Products. Additionally, we believe that the smelters and refiners of the necessary conflict minerals are best suited to identify the sources of those minerals. As a result, our due diligence efforts relied on the CFSP and our Tier 1 and Tier 2 Suppliers.

Section 4: Independent Private Sector Audit

As permitted by applicable guidance of the SEC, our due diligence practices have not been subject to an independent private sector audit within the meaning of the Rule.

Section 5: Results of Assessment

Based on the Company's due diligence efforts for the Reporting Period, the Company does not have sufficient information to determine the mines and the country of origin of all of the conflict minerals in its Covered Products or the facilities used to process the conflict minerals, including whether the conflict minerals were from recycled or scrap sources. A description of the Company's efforts to determine the mine(s) or country of origin are included in the due diligence measures described above. The smelters and refiners included in our suppliers' responses that we were able to reasonably identify as an operational smelter and refiner are included in Annex I. This list has been modified to remove unknown or duplicate smelters and refiners.

Section 6: Continuous Improvement Efforts to Mitigate Risk

The Company took the following steps, among others, to mature its conflict minerals program including its RCOI and due diligence measures, in accordance with OECD Guidance and to further mitigate the risk that the conflict minerals contained in its products finance or benefit armed groups in the Covered Countries:

- Acquired and implemented a third-party designed IT system to assist with and improve our supplier survey and due diligence processes;
- Expanded its due diligence efforts to include, and surveyed suppliers of, companies acquired during 2014 (Centro de Construcción de Cardioestimuladores del Uruguay) and 2015 (Lake Region Medical Holdings, Inc.);
- Engaged with suppliers to increase the response rate and improve the quality of supplier responses;
- Worked with suppliers who did not respond to the Company's 2016 survey to stress the importance of this initiative and encourage their participation in the future;
- Encouraged suppliers of 3TG or whose products contain 3TG to establish policies, due diligence frameworks, and management systems consistent with the OECD Framework. Integer continued to investigate changes to the terms of existing suppliers' agreements and reviewed the conflict minerals policy statements for new suppliers.

The Company expects to take the following steps as part of its continuous improvement efforts:

- Work to further mature the Company's conflict minerals program and build transparency over its supply chain in accordance with the OECD Guidance;
 - Enhance the third-party designed IT system to increase response rates as well as further refine our smelter identification;
 - Revise Integer's Conflict Minerals Policy to achieve a more robust process, including setting forth specific supplier responsibilities;
 - Engage Tier 1 Suppliers to ensure they receive training on our revised Conflict Minerals Policy;
 - Include terms and conditions in new or renewed contracts requiring suppliers to respond to our inquiries regarding conflict minerals in a timely manner;
 - Continue to evaluate annually the Company's suppliers in order to determine those suppliers that are in-scope and should be surveyed as part of the Company's conflict minerals program; and
 - Continue to drive our suppliers to obtain current, accurate, and complete information from their supply chain about their smelters and refiners of conflict minerals.
-

ANNEX I
Smelters and Refiners
