(Des Moines, Iowa) - Principal Financial Group<sup>®</sup> (Nasdaq: PFG) today announced results for second quarter 2019.

- **Net income attributable to PFG for second quarter 2019 of \$386.3 million**, compared to \$456.6 million for second quarter 2018. Net income per diluted share of \$1.37 for second quarter 2019 compared to \$1.58 in the prior year quarter. Second quarter 2018 net income benefited from a \$99.5 million after-tax gain related to a sale of an equity method investment.
- **Non-GAAP operating earnings for second quarter 2019 of \$427.1 million**, compared to \$391.4 million for second quarter 2018. Non-GAAP operating earnings per diluted share of \$1.52 for second quarter 2019 compared to \$1.35 for second quarter 2018.
- **Quarterly common stock dividend of \$0.55 per share** for third quarter 2019 was authorized by the company's Board of Directors, bringing the trailing twelve-month dividend to \$2.17 per share, a 6 percent increase compared to the prior year trailing twelve-month period. The dividend will be payable on Sept. 27, 2019, to shareholders of record as of Sept. 5, 2019.

"I'm pleased with our results for the quarter and first six months of the year," said Dan Houston, chairman, president and CEO of Principal. "We delivered \$427 million of non-GAAP operating earnings in the second quarter, an increase of 9 percent compared to the prior year quarter, despite ongoing revenue pressures and meaningful investments for long-term growth. Compared to year-end 2018, we've increased assets under management by nearly \$70 billion, or 11 percent."

"We continue to create long-term shareholder value through our balanced approach to capital deployment," added Houston. "In the first half of the year, we returned \$430 million to shareholders through common stock dividends and share repurchases. Additionally, during the second quarter we committed \$1.2 billion to acquire the Wells Fargo Institutional Retirement & Trust business. The acquisition, which closed on July 1st, enables us to further capitalize on one of the largest opportunities in financial services - the U.S. retirement savings and retirement income markets. It essentially doubles the size of our U.S. retirement business, but more importantly, it improves our ability to serve customers, reinforces our commitment to the retirement industry, and enables us to create new value in the marketplace by combining the strengths of both business models a teams."

<sup>1</sup> Use of non-GAAP financial measures is discussed in this release after segment results. Non-GAAP operating earnings for total company is after tax.

<sup>8</sup> The company has provided reconciliations of the non-GAAP measures to the most directly comparable U.S. GAAP measures at the end of the release. The company has determined this measure is more representative of underlying operating revenues growth for PGI as it removes commissions that are collected through fee revenue and passed through expenses with no impact to pre-tax operating earnings.

understanding and evaluating the company's financial condition and results of operations. They are not, however, a substitute for U.S. GAAP financial measures. Therefore, the company has provided reconciliations of the non-GAAP measures to the most directly comparable U.S. GAAP measure at the end of the release. The company adjusts U.S. GAAP measures for items not directly related to ongoing operations. However, it is possible these adjusting items have occurred in the past and could recur in future reporting periods. Management also uses non-GAAP measures for goal setting, as a basis for determining employee and senior management awards and compensation and evaluating performance on a basis comparable to that used by investors and securities analysts.

**\*U.S. GAAP (GAAP) net income attributable to PFG versus non-GAAP operating earnings**

Management uses non-GAAP operating earnings, which is a financial measure that excludes the effect of net realized capital gains and losses, as adjusted, and other after-tax adjustments the company believes are not indicative of overall operating trends, for goal setting, as a basis for determining employee and senior management awards and compensation, and evaluating performance on a basis comparable to that used by investors and securities analysts. Note: it is possible these adjusting items have occurred in the past and could recur in future reporting periods. While these items may be significant components in understanding and assessing our consolidated financial performance, management believes the presentation of non-GAAP operating earnings enhances the understanding of results of operations by highlighting earnings attributable to the normal, ongoing operations of the company's businesses.
