### Recent Developments

- **Maintained dividend:** Declared common stock dividend of \$0.75 per share (\$3.00 annualized) for the fourth quarter 2019, in line with the previous 17 quarterly dividends

“We took steps throughout 2019 to enhance our liquidity and reduce our weighted average cost of capital, which also had the effect of lowering our interest cost and increasing interest income,” said CorEnergy Chief Executive Officer Dave Schulte. “These actions better position us for potential growth transactions, even as producers are finding fewer financing options in the traditional capital markets. We are presently evaluating prospective assets as companies across the energy sector are increasingly turning to alternative financing sources.”

### Dividend Declaration

**Common Stock:** A fourth quarter 2019 dividend of \$0.75 per share (or \$3.00 per share annualized) was declared for CorEnergy’s common stock. The dividend is payable on February 28, 2020, to stockholders of record on February 14, 2020.

**Preferred Stock:** For the Company’s 7.375% Series A Cumulative Redeemable Preferred Stock, a cash dividend of \$0.4609375 per depositary share was declared. The preferred stock dividend, which equates to an annual dividend payment of \$1.84375 per depositary share, is payable on February 28, 2020, to stockholders of record on February 14, 2020.

## **Notes**

<sup>1</sup>NAREIT FFO represents net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, impairment losses of depreciable properties, real estate-related depreciation and amortization (excluding amortization of deferred financing costs or loan origination costs) and other adjustments for unconsolidated partnerships and non-controlling interests. Adjustments for non-controlling interests are calculated on the same basis. FFO as we have presented it here, is derived by further adjusting NAREIT FFO for distributions received from investment securities, income tax expense (benefit) from investment securities, net distributions and other income and net realized and unrealized gain or loss on other equity securities. CorEnergy defines AFFO as FFO Adjusted for Securities Investment plus (gain) loss on extinguishment of debt, provision for loan (gain) loss, net of tax, transaction costs, amortization of debt issuance costs, amortization of deferred lease costs, accretion of asset retirement obligation, amortization of above market leases, income tax expense (benefit) unrelated to securities investments, non-cash costs associated with derivative instruments, (gain) loss on the settlement of ARO, and certain costs of a nonrecurring nature, less maintenance, capital expenditures (if any), amortization of debt premium, and other adjustments as deemed appropriate by Management. Reconciliations of NAREIT FFO, FFO Adjusted for Securities Investments and AFFO to Net Income (Loss) Attributable to CorEnergy Stockholders are included in the additional financial information attached to this press release.

(1) The year ended December 31, 2019 diluted per share calculations exclude dilutive adjustments for convertible note interest expense, discount amortization and deferred debt issuance amortization because such impact is antidilutive. The three months ended December 31, 2019 and 2018, as well as the year ended December 31, 2018, include these dilutive adjustments. For periods presented without per share dilution, the number of weighted average diluted shares is equal to the number of weighted average basic shares presented.

(2) Diluted per share calculations include a dilutive adjustment for convertible note interest expense.
