Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The aggregate market value of stock held by non-affiliates as of June 30, 2017, was \$1,678 million based upon \$29.11 per share, the closing price for such date on the New York Stock Exchange.

On January 31, 2018, the registrant had 70,176,391 shares of Class A common stock and 24,054,845 shares of Class B common stock outstanding.

#### DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive Proxy Statement for the 2018 Annual Meeting of Stockholders are incorporated herein by reference in Part III of this Annual Report on Form 10-K to the extent stated herein. Such Proxy Statement will be filed with the Securities and Exchange Commission within 120 days of the registrant's fiscal year ended December 31, 2017.

### Special Note Regarding Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Exchange Act"), and Section 21E of the Securities Exchange Act of 1934, as amended, which statements involve substantial risks and uncertainties. Forward-looking statements generally relate to future events or our future financial or operating performance. In some cases, you can identify forward-looking statements because they contain words such as "may," "will," "should," "expects," "plans," "anticipates," "could," "intends," "target," "projects," "contemplates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of these words or other similar terms or expressions that concern our expectations, strategy, plans or intentions. Forward-looking statements contained in this Annual Report on Form 10-K include, but are not limited to, statements about:

- our future financial performance, including our revenue, cost of revenue, gross margin and operating expenses, ability to generate positive cash flow and ability to achieve and sustain profitability;
- the impact and expected results from changes in our relationship with our larger customers;
- the sufficiency of our cash and cash equivalents to meet our liquidity needs;
- anticipated technology trends, such as the use of and demand for cloud communications;
- our ability to continue to build and maintain credibility with the global software developer community;
- our ability to attract and retain customers to use our products;
- our ability to attract and retain enterprises and international organizations as customers for our products;
- our ability to form and expand partnerships with independent software vendors and system integrators;
- the evolution of technology affecting our products and markets;
- our ability to introduce new products and enhance existing products;
- our ability to optimize our network service provider coverage and connectivity;
- our ability to pass on our savings associated with our platform optimization efforts to our customers;
- our ability to successfully enter into new markets and manage our international expansion;
- the attraction and retention of qualified employees and key personnel;
- our ability to effectively manage our growth and future expenses and maintain our corporate culture;
- our anticipated investments in sales and marketing and research and development;
- our ability to maintain, protect and enhance our intellectual property;
- our ability to successfully defend litigation brought against us; and
- our ability to comply with modified or new laws and regulations applying to our business, including GDPR and other privacy regulations that may be implemented in the future.

We caution you that the foregoing list may not contain all of the forward-looking statements made in this Annual Report on Form 10-K.

[Table of Contents](#)

You should not rely upon forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this Annual Report on Form 10-K primarily on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, results of operations and prospects. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties and other factors described in Part I, Item 1A, "Risk Factors" and elsewhere in this Annual Report on Form 10-K. Moreover, we operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time and it is not possible for us to predict all risks and uncertainties that could have an impact on the forward-looking statements contained in this Annual Report on Form 10-K. We cannot assure you that the results, events and circumstances reflected in the forward-looking statements will be achieved or occur, and actual results, events or circumstances could differ materially from those described in the forward-looking statements.

The forward-looking statements made in this Annual Report on Form 10-K relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statements made in this Annual Report on Form 10-K to reflect events or circumstances after the date of this Annual Report on Form 10-K or to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make.

## PART I

### Item 1. *Business*

#### Overview

Software developers are reinventing nearly every aspect of business today. Yet as developers, we repeatedly encountered an area where we could not innovate—communications. Because communication is a fundamental human activity and vital to building great businesses, we wanted to incorporate communications into our software applications, but the barriers to innovation were too high. Twilio was started to solve this problem.

We believe the future of communications will be written in software, by the developers of the world—our customers. By empowering them, our mission is to fuel the future of communications.

Cloud platforms are a new category of software that enable developers to build and manage applications without the complexity of creating and maintaining the underlying infrastructure. These platforms have arisen to enable a fast pace of innovation across a range of categories, such as computing and storage. We are the leader in the Cloud Communications Platform category. We enable developers to build, scale and operate real-time communications within software applications.

Our platform consists of three layers: our Engagement Cloud, Programmable Communications Cloud and Super Network. Our Engagement Cloud software is a set of Application Programming Interfaces ("APIs") that handles the higher-level communication logic needed for nearly every type of customer engagement. These APIs are focused on the business challenges that a developer is looking to address, allowing our customers to more quickly and easily build better ways to engage with their customers throughout their journey. Our Programmable Communications Cloud software is a set of APIs that enables developers to embed voice, messaging and video capabilities into their applications. The Programmable Communications Cloud is designed to support almost all the fundamental ways humans communicate, unlocking innovators to address just about any communication market. The Super Network is our software layer that allows our customers' software to communicate with connected devices globally. It interconnects with communications networks around the world and continually analyzes data to optimize the quality and cost of communications that flow through our platform. The Super Network also contains a set of API's giving our customers access to more foundational components of our platform, like phone numbers.

We had 48,979 Active Customer Accounts as of December 31, 2017, representing organizations big and small, old and young, across nearly every industry, with one thing in common: they are competing by using the power of software to build differentiation through communications. With our platform, our customers are disrupting existing industries and creating new ones. For example, our customers' software applications use our platform to notify a diner when a table is ready, provide enhanced application security through two-factor authentication, connect potential buyers to real estate agents, and power large, omni-channel contact centers. The range of applications that developers build with the Twilio platform has proven to be nearly limitless.

Our goal is for Twilio to be in the toolkit of every software developer in the world. Because big ideas often start small, we encourage developers to experiment and iterate on our platform. We love when developers explore what they can do with Twilio, because one day they may have a business problem that they will use our products to solve.

As our customers succeed, we share in their success through our usage-based revenue model. Our revenue grows as customers increase their usage of a product, extend their usage of a product to new applications or adopt a new product. We believe the most useful indicator of this increased activity from our existing customer accounts is our Dollar-Based Net Expansion Rate, which was 128% and 161% for the years ended December 31, 2017 and 2016, respectively. See Part II, Item 7,

"Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Business Metrics—Dollar-Based Net Expansion Rate."

## **Our Platform Approach**

Twilio's mission is to fuel the future of communications. We enable developers to build, scale and operate real-time communications within software applications.

We believe every application can be enhanced through the power of communication. Over time, we believe that all of our communications that do not occur in person will be integrated into software applications. Our platform approach enables developers to build this future.

Using our software, developers are able to incorporate communications into applications that span a range of industries and functionalities. Our Solution Partner customers, which embed our products in the solutions they sell to other businesses, are also able to leverage our products to deliver their applications.

### *Common Use Cases*

- **Anonymous Communications.** Enabling users to have a trusted means of communications where they prefer not to share private information like their telephone number. Examples include conversations between drivers and riders or texting after meeting through a dating website.
- **Alerts and Notifications.** Alerting a user that an event has occurred, such as when a table is ready, a flight is delayed or a package is shipped.
- **Contact Center.** Improving customer support of powering customer care teams with voice, messaging and video capabilities that integrate with other systems to add context, such as a caller's support ticket history or present location.
- **Call Tracking.** Using phone numbers to provide detailed analytics on phone calls to measure the effectiveness of marketing campaigns or lead generation activities in a manner similar to how web analytics track and measure online activity.
- **Mobile Marketing.** Integrating messaging with marketing automation technology, allowing organizations to deliver targeted and timely contextualized communications to consumers.
- **User Security.** Verifying user identity through two-factor authentication prior to log-in or validating transactions within an application's workflow. This adds an additional layer of security to any application.
- **Twilio For Good.** Partnering with nonprofit organizations through Twilio.org, to use the power of communications to help solve social challenges, such as an SMS hotline to fight human trafficking, an emergency volunteer dispatch system and appointment reminders for medical visits in developing nations.

## **Our Platform**

### *Engagement Cloud*

While developers can build a broad range of applications on our platform, certain use cases are more common. Our Engagement Cloud APIs build upon our Programmable Communications Cloud to offer more fully implemented functionality for a specific purpose, such as two-factor authentication or skills-based routing in a contact center, thereby saving developers significant time in building their applications.

Part of our core strategy is to provide a broad set of lower level building blocks (i.e. the products in our Programmable Communications Cloud and Super Network) that can be used to build virtually any use case. By doing this, we allow developers' creativity to flourish across the widest set of use cases—some of which haven't even been invented yet. As we observe what use cases are most common, and the work flows our customers find most challenging, we create the products in our Engagement Cloud to bring these learnings to a broader audience.

The higher level APIs we have created in this layer of our platform are focused on addressing a massive opportunity to recreate and modernize the field of customer engagement. The means by which most companies engage with their customers is archaic and disjointed, made more glaring by the pace of development in other areas of communication. Our products in the Engagement Cloud combine the flexibility provided by our platform model along with the learnings we've gained over the past ten years focused on driving success at tens of thousands of customers.

### ***Programmable Communications Cloud***

Our Programmable Communications Cloud provides a range of products that enables developers to embed voice, messaging and video capabilities into their applications. Our easy-to-use developer APIs provide a programmatic channel to access our software. Developers can utilize our intuitive programming language, TwiML, to specify application functions such as <Dial>, <Record> and <Play>, leveraging our software to manage the complexity of executing the specified functions.

Our Programmable Communications Cloud consists of software products that can be used individually or in combination to build rich contextual communications within applications. We do not aim to provide complete business solutions, rather our Programmable Communications Cloud offers flexible building blocks that enable our customers to build what they need. Our Programmable Communications Cloud includes:

- **Programmable Voice.** Our Programmable Voice software products allow developers to build solutions to make and receive phone calls globally, and to incorporate advanced voice functionality such as text-to-speech, conferencing, recording and transcription. Programmable Voice, through our advanced call control software, allows developers to build customized applications that address use cases such as contact centers, call tracking and analytics solutions and anonymized communications.
- **Programmable Messaging.** Our Programmable Messaging software products allow developers to build solutions to send and receive text messages globally, and incorporate advanced messaging functionality such as emoji, picture messaging and localized languages. Our customers use Programmable Messaging, through software controls, to power use cases, such as appointment reminders, delivery notifications, order confirmations and customer care.
- **Programmable Video.** Our Programmable Video software products enable developers to build next-generation mobile and web applications with embedded video, including for use cases such as customer care, collaboration and physician consultations.

### ***Super Network***

Our Programmable Communications Cloud is built on top of our global software layer, which we call our Super Network. Our Super Network interfaces intelligently with communications networks globally. We use software to construct a high performance network that continuously optimizes quality and deliverability for our customers. Our Super Network breaks down the geopolitical boundaries and scale limitations of physical network infrastructure and provides our customers that use our Programmable Communications Cloud and Engagement Cloud offering access to over 180 countries.

The Super Network also contains a set of API's giving our customers access to more foundational components of our platform, such as phone numbers.

We have strategically built out our global infrastructure and operate in 27 cloud data centers in nine geographically distinct regions. These data centers serve as interconnection points with network service providers and customers alike, giving us a truly global reach and a redundant means to connect businesses with billions of customers all over the world. Our provider relationships and deployed infrastructure have allowed us to catalogue the many different communications standards that exist today and offer them up to businesses as one consolidated platform with simple, easy-to-use APIs. We are continually adding new network service provider relationships as we scale, and we are not dependent upon any single network service provider to conduct our business.

The strength of Twilio's Super Network comes from the software intelligence we've embedded throughout our communications network. By leveraging our software expertise we eliminate the traditional complexities and uncertainties of telecommunications and deliver a consistent and high quality communications platform for our customers. This allows customers to spend less time focusing on mastering the highly specialized and complex telecommunications industry and more time focusing on building best-in-class customer engagement experiences. Our proprietary technology selects which network service providers to use and routes the communications in order to optimize the quality and cost of the communications across our product offerings.

Our Super Network analyzes massive volumes of data from our traffic, the applications that power it, and the underlying provider networks in order to optimize our customers' communications for quality and cost. As such, with every new message and call, our Super Network becomes more robust, intelligent and efficient, enabling us to provide better performance and deliverability for our customers. Our Super Network's sophistication becomes increasingly difficult for others to replicate over time as it is continually learning, improving and scaling.

### ***Our Business Model for Innovators***

Our goal is to include Twilio in the toolkit of every developer in the world. Because big ideas often start small, developers need the freedom and tools to experiment and iterate on their ideas.

In order to empower developers to experiment, our developer-first business model is low friction, eliminating the upfront costs, time and complexity that typically hinder innovation. We call this approach our Business Model for Innovators, which empowers developers by reducing friction and upfront costs, encouraging experimentation, and enabling developers to grow as customers as their ideas succeed. Developers can begin building with a free trial. They have access to self-service documentation and free customer support to guide them through the process. Once developers determine that our software meets their needs, they can flexibly increase consumption and pay based on usage. In short, we acquire developers like consumers and enable them to spend like enterprises.

### **Our Growth Strategy**

We are the leader in the Cloud Communications Platform category based on revenue, market share and reputation, and intend to continue to set the pace for innovation. We will continue to invest aggressively in our platform approach, which prioritizes increasing our reach and scale. We intend to pursue the following growth strategies:

- **Continue Significant Investment in our Technology Platform.** We will continue to invest in building new software capabilities and extending our platform to bring the power of contextual communications to a broader range of applications, geographies and customers. We have a substantial research and development team, comprising approximately 50% of our headcount as of December 31, 2017.

- **Grow Our Developer Community and Accelerate Adoption.** We will continue to enhance our relationships with developers globally and seek to increase the number of developers on our platform. As of December 31, 2017, we had 48,979 Active Customer Accounts and well over one million registered developer accounts registered on our platform. In addition to adding new developers, we believe there is significant opportunity for revenue growth from developers who have already registered accounts with us but who have not yet built their software applications with us, or whose applications are in their infancy and will grow with Twilio into an Active Customer Account.
- **Increase Our International Presence.** Our platform operates in over 180 countries today, making it as simple to communicate from São Paulo as it is from San Francisco. Customers outside the United States are increasingly adopting our platform, and for the years ended December 31, 2016 and 2017, revenue from international customer accounts accounted for 16% and 23% of our total revenue, respectively. We are investing to meet the requirements of a broader range of global developers and enterprises. We plan to grow internationally by continuing to expand our operations outside of the United States and collaborating with international strategic partners.
- **Expand Focus on Enterprises.** We plan to drive greater awareness and adoption of Twilio from enterprises across industries. We intend to further increase our investment in sales and marketing to meet evolving enterprise needs globally, in addition to extending our enterprise-focused use cases and platform capabilities, like our Twilio Enterprise Plan. Additionally, we believe there is significant opportunity to expand our relationships with existing enterprise customers.
- **Further Enable Solution Partner Customers.** We have relationships with a number of Solution Partner customers that embed our products in the solutions that they sell to other businesses. We intend to expand our relationships with existing Solution Partner customers and to add new Solution Partner customers. We plan to invest in a range of initiatives to encourage increased collaboration with, and generation of revenue from, Solution Partner customers.
- **Expand ISV Development Platform and SI Partnerships.** We have started developing relationships with independent software vendor ("ISV") development platforms and system integrators ("SIs"). ISV development platforms integrate Twilio to extend the functionality of their platforms, which expands our reach to a broader range of customers. SIs provide consulting and development services for organizations that have limited software development expertise to build our platform into their software applications. We generate revenue through our relationships with ISV development platforms and SIs when our products are used within the software or applications into which they are integrated by ISV development platforms and SIs. We do not share usage-based revenue with ISV development platforms or SIs, nor do we pay them to include our products in their offerings. We intend to continue to invest in and develop the ecosystem for our solutions in partnership with ISV development platforms and SIs to accelerate awareness and adoption of our platform.
- **Selectively Pursue Acquisitions and Strategic Investments.** We may selectively pursue acquisitions and strategic investments in businesses and technologies that strengthen our platform. In February 2015, we acquired Authy, a leading provider of authentication-as-a-service for large-scale applications. With the integration of Authy, we now provide a cloud-based API to seamlessly embed two-factor authentication and phone verification into any application. In November 2016, we acquired the proprietary Web Real-Time-Communication ("WebRTC") media processing technologies built by the team behind the Kurento Open Source Project. The Kurento Media Server capabilities, including large group communications, transcoding, recording and advanced media processing, has been integrated into Twilio Programmable Video. In

February 2017, we acquired Beepsend, AB, a messaging provider based in Sweden specializing in messaging and SMS solutions.

## Our Values and Leadership Principles

Our core values, called our "Nine Values," are at the center of everything that we do. As a company built by developers for developers, these values guide us to work in a way that exemplifies many attributes of the developer ethos. These are not mere words on the wall. We introduce these values to new hires upon joining our company, and we continually weave these values into everything we do. Our values provide a guide for the way our teams work, communicate, set goals and make decisions.

### TWILIO'S NINE VALUES

Live the spirit  
of challenge

Empower  
others

Start  
with why

Create  
experiences

No  
shenanigans

Be humble

Think at scale

Draw the owl

Be frugal

We believe leadership is a behavior, not a position. In addition to our values, we have articulated the leadership traits we all strive to achieve. Our leadership principles apply to every Twilion, not just

managers or executives, and provide a personal growth path for employees in their journeys to become better leaders.

## TWILIO'S LEADERSHIP PRINCIPLES

### TWILIO LEADERS...

wear the customer's shoes

leave teams as their legacies

have a point of view

seek progress over perfection

make colleagues better

are intellectually honest

are adaptable

are relentless about success

The combination of our Nine Values and our leadership principles has created a blueprint for how Twilions worldwide interact with customers and with each other, and for how they respond to new challenges and opportunities.

#### Twilio.org

We believe we can create greater social good through better communications. Through Twilio.org, which is a part of our company and not a separate legal entity, we donate and discount our products to nonprofits, who use our products to engage their audience, expand their reach and focus on making a meaningful change in the world. Twilio.org's mission is to send a billion messages for good. To that end, in 2015, we reserved 1% of our common stock to fund operations of Twilio.org. In our follow-on public offering in October 2016, we sold 100,000 shares of Class A common stock and raised \$3.9 million to fund and support the operations of Twilio.org. In December 2016, Twilio.org donated the full \$3.9 million proceeds into an independent Donor Advised Fund ("DAF") to further our philanthropic goals. In November 2017, Twilio.org donated 45,383 shares of Class A common stock with a fair value of \$1.2 million into the same DAF. Both donations were treated as charitable contributions in our consolidated statements of operations included elsewhere in this Annual Report on Form 10-K. As of December 31, 2017, the total remaining shares reserved for Twilio.org was 635,014.

#### Our Products

##### *Engagement Cloud*

While developers can build a broad range of applications on our platform, certain use cases are more common. Our Engagement Cloud APIs build upon our Programmable Communications Cloud to offer more fully implemented functionality for a specific purpose, such as two-factor authentication or skills-based routing in a contact center, thereby saving developers significant time in building their applications.

### *Account Security*

Identity and communications are closely linked, and this is a critical business need for our customers. Using our two-factor authentication APIs, developers can add an extra layer of security to their applications with second-factor passwords sent to a user's phone via SMS, voice or push notifications. Our Account Security products include:

- **Authy.** Provides user authentication codes through a variety of formats based on the developer's needs. Authentication codes can be delivered through the Authy app on registered mobile phones, desktop, or smart devices or via SMS and voice automated phone calls. In addition, authentication can be determined through a push notification on registered smartphones
- **Lookup.** Allows developers to validate number format, device type, and provider prior to sending messages or initiating calls.
- **Verify.** Allows developers to deliver a one-time passcode through SMS or voice to verify that a user is in possession of the device being registered

### *TaskRouter*

A software product that enables intelligent multi-task routing in contact centers to optimize workflows, such as routing a call to an available agent. A task can be a phone call, SMS, chat message, lead, support ticket or even machine learning from a connected device.

We charge on a per-use basis for most of our Engagement Cloud APIs.

### *Programmable Communications Cloud*

Our Programmable Communications Cloud consists of software for voice, messaging, video and authentication that empowers developers to build applications that can communicate with connected devices globally. We do not aim to provide complete business solutions, rather our Programmable Communications Cloud offers flexible building blocks that enable our customers to build what they need.

### *Programmable Voice*

Our Programmable Voice software products allow developers to build solutions to make and receive phone calls globally, and to incorporate advanced voice functionality such as text-to-speech, conferencing, recording and transcription. Programmable Voice, through our advanced call control software, allows developers to build customized applications that address use cases such as contact centers, call tracking and analytics solutions and anonymized communications. Our voice software works over both the traditional public switch telephone network, and over Internet Protocol. Programmable Voice includes:

- **Twilio Voice.** Initiate, receive and manage phone calls globally, end to end through traditional voice technology or between web browsers and landlines or mobile phones. Voice calling can also be integrated natively in Apple iOS and Google Android apps.
- **Call Recording.** Securely record, store, transcribe and retrieve voice calls in the cloud.
- **Global Conference.** Integrate audio conferencing that intelligently routes calls through cloud data centers in the closest of seven geographic regions to reduce latency. Scales from Basic, for a limited number of participants, to Epic, for an unlimited number of participants.

We charge on a per-minute basis for most of our Programmable Voice products.

### ***Programmable Messaging***

Our Programmable Messaging software products allow developers to build solutions to send and receive text messages globally, and incorporate advanced messaging functionality such as emoji, picture messaging and localized languages. Our customers use Programmable Messaging, through software controls, to power use cases, such as appointment reminders, delivery notifications, order confirmations and customer care. We offer messaging over long-code numbers, short-code numbers, messaging apps such as Facebook Messenger and over IP through our Android, iOS and JavaScript software development kits. Programmable Messaging includes:

- **Twilio SMS.** Programmatically send, receive and track SMS messages around the world, supporting localized languages in nearly every market.
- **Twilio MMS.** Exchange picture messages and more over U.S. and Canadian phone numbers from customer applications with built-in image transcoding and media storage.
- **Copilot.** Intelligent software layer that handles tasks, such as dynamically sending messages from a phone number that best matches the geographic location of the recipient based on a global pool of numbers.
- **Programmable Chat.** Deploy contextual, in-app messaging at global scale.
- **Channels.** Programmatically send, receive and track messages to messaging apps such as Facebook Messenger and Viber globally.
- **Toll-Free SMS.** Send and receive text messages with the same toll-free number used for voice calls in the United States and Canada.

We charge on a per-message basis for most of our Programmable Messaging products.

### ***Programmable Video***

Programmable Video provides developers with the building blocks to add voice and video to web and mobile applications. Developers can address multiple use cases such as remote customer care, multi-party collaboration, video consultations and more by leveraging Programmable Video's global cloud infrastructure and powerful SDKs to build on WebRTC. Programmable Video includes:

- **Twilio Video.** Create rich, multi-party video experiences in web and mobile applications with features such as one-to-one and multi-party video calling, cloud based recordings, screen sharing etc.
- **Network Traversal.** Provide low-latency, cost-effective and reliable Session Traversal Utilities for Network Address Translation (STUN) and Traversal Using Relay for Network Address Translation (TURN) capabilities distributed across five continents. This functionality allows developers to initiate peer-to-peer video sessions across any internet-connected device globally.

We charge on a per-connected-endpoint, per-active-endpoint and per-gigabit basis for our Programmable Video products.

### ***Super Network***

Our Programmable Communications Cloud is built on top of our global software layer, which we call our Super Network. Our Super Network interfaces intelligently with communications networks globally. We do not own any physical network infrastructure. We use software to build a high performance network that optimizes performance for our customers. The Super Network also contains a set of API's giving our customers access to more foundational components of our platform, like phone numbers and Session Initiation Protocol ("SIP") Trunking.

- **Instant Phone Number Provisioning.** Acquire local, national, mobile and toll-free phone numbers on demand in over 100 countries and connect them into the customers' applications.
- **Short Codes.** A five to seven digit phone number in the United States, Canada and the United Kingdom used to send and receive a high-volume of messages per second.
- **Elastic SIP Trunking.** Connect legacy voice applications to our Super Network over IP infrastructure with globally-available phone numbers and pay-as-you-go pricing.
- **Interconnect.** Connect privately to Twilio to enable enterprise grade security and quality of service for Twilio Voice and Elastic SIP Trunking.

We charge on a per-minute or per-phone-number basis for most of our Super Network products.

## **Our Employees**

As of December 31, 2017, we had a total of 996 employees, including 215 employees located outside of the United States. None of our employees are represented by a labor union or covered by a collective bargaining agreement. We have not experienced any work stoppages, and we consider our relations with our employees to be good.

## **Research and Development**

Our research and development efforts are focused on ensuring that our platform is resilient and available to our customers at any time, and on enhancing our existing products and developing new products.

Our research and development organization is built around small development teams. Our small development teams foster greater agility, which enables us to develop new, innovative products and make rapid changes to our infrastructure that increase resiliency and operational efficiency. Our development teams designed, built and continue to expand our Engagement Cloud, Programmable Communications Cloud and Super Network.

As of December 31, 2017, we had 497 employees in our research and development organization. We intend to continue to invest in our research and development capabilities to extend our platform and bring the power of contextual communications to a broader range of applications, geographies and customers. Our research and development expenses for the years ended December 31, 2017, 2016 and 2015 were \$120.7 million, \$77.9 million and \$42.6 million, respectively.

## **Sales and Marketing**

Our sales and marketing teams work together closely to drive awareness and adoption of our platform, accelerate customer acquisition and generate revenue from customers.

Our go-to-market model is primarily focused on reaching and serving the needs of developers. We are a pioneer of developer evangelism and education and have cultivated a large global developer community. We reach developers through community events and conferences, including our SIGNAL developer conference, to demonstrate how every developer can create differentiated applications incorporating communications using our products.

Once developers are introduced to our platform, we provide them with a low-friction trial experience. By accessing our easy-to-configure APIs, extensive self-service documentation and customer support team, developers can build our products into their applications and then test such applications during an initial free trial period that we provide. Once they have decided to use our products beyond the initial free trial period, customers provide their credit card information and only pay for the actual usage of our products. Our self-serve pricing matrix is publicly available and it allows for customers to

receive automatic tiered discounts as their usage of our products increases. As customers' use of our products grows larger, some enter into negotiated contracts with terms that dictate pricing, and typically include some level of minimum revenue commitments. Historically, we have acquired the substantial majority of our customers through this self-service model. As customers expand their usage of our platform, our relationships with them often evolve to include business leaders within their organizations. Once our customers reach a certain spending level with us, we support them with account managers or customer success advocates to ensure their satisfaction and expand their usage of our products.

When potential customers do not have the available developer resources to build their own applications, we refer them to our Solution Partners, who embed our products in the solutions that they sell to other businesses, such as contact centers and sales force and marketing automation.

We also supplement our self-service model with a sales effort aimed at engaging larger potential customers, strategic leads and existing customers through a direct sales approach. We have supplemented this sales effort with our Twilio Enterprise Plan, which provides capabilities for advanced security, access management and granular administration. Our sales organization targets technical leaders and business leaders who are seeking to leverage software to drive competitive differentiation. As we educate these leaders on the benefits of developing applications incorporating our products to differentiate their business, they often consult with their developers regarding implementation. We believe that developers are often advocates for our products as a result of our developer-focused approach. Our sales organization includes sales development, inside sales, field sales and sales engineering personnel.

As of December 31, 2017, we had 358 employees in our sales and marketing organization.

## **Customer Support**

We have designed our products and platform to be self-service and require minimal customer support. To enable seamless self-service, we provide all of our users with helper libraries, comprehensive documentation, how-to's and tutorials. We supplement and enhance these tools with the participation of our engaged developer community. In addition, we provide support options to address the individualized needs of our customers. All developers get free email-based support with API status notifications. Our developers also engage with the broader Twilio community to resolve certain issues.

We also offer three paid tiers of email and phone support with increasing levels of availability and guaranteed response times. Our highest tier personalized plan is intended for our largest customers and includes guaranteed response times that vary based on the priority of the request, a dedicated support engineer, a duty manager and quarterly status review. Our support model is global, with 24x7 coverage and support offices located in the United States, the United Kingdom, Estonia and Singapore. We currently derive an insignificant amount of revenue from fees charged for customer support.

## **Competition**

The market for Cloud Communications Platform is rapidly evolving and increasingly competitive. We believe that the principal competitive factors in our market are:

- completeness of offering;
- credibility with developers;
- global reach;
- ease of integration and programmability;
- product features;

- platform scalability, reliability, security and performance;
- brand awareness and reputation;
- the strength of sales and marketing efforts;
- customer support; and
- the cost of deploying and using our products.

We believe that we compete favorably on the basis of the factors listed above. We believe that none of our competitors currently competes directly with us across all of our product offerings.

Our competitors fall into four primary categories:

- legacy on-premise vendors, such as Avaya and Cisco;
- regional network service providers that offer limited developer functionality on top of their own physical infrastructure;
- smaller software companies that compete with portions of our product line; and
- software-as-a-service "SaaS" companies that offer prepackaged applications for a narrow set of use cases.

Some of our competitors have greater financial, technical and other resources, greater name recognition, larger sales and marketing budgets and larger intellectual property portfolios. As a result, certain of our competitors may be able to respond more quickly and effectively than we can to new or changing opportunities, technologies, standards or customer requirements. In addition, some competitors may offer products or services that address one or a limited number of functions at lower prices, with greater depth than our products or geographies where we do not operate. With the introduction of new products and services and new market entrants, we expect competition to intensify in the future. Moreover, as we expand the scope of our platform, we may face additional competition.

### **Intellectual Property**

We rely on a combination of patent, copyright, trademark and trade secret laws in the United States and other jurisdictions, as well as license agreements and other contractual protections, to protect our proprietary technology. We also rely on a number of registered and unregistered trademarks to protect our brand.

As of December 31, 2017, in the United States, we had been issued 77 patents, which expire between 2029 and 2036, and had 42 patent applications pending for examination and three pending provisional applications. As of such date, we also had seven issued patents and seven patent applications pending for examination in foreign jurisdictions, all of which are related to U.S. patents and patent applications. In addition, as of December 31, 2017, we had 14 trademarks registered in the United States and 61 trademarks registered in foreign jurisdictions.

We further seek to protect our intellectual property rights by implementing a policy that requires our employees and independent contractors involved in development of intellectual property on our behalf to enter into agreements acknowledging that all works or other intellectual property generated or conceived by them on our behalf are our property, and assigning to us any rights, including intellectual property rights, that they may claim or otherwise have in those works or property, to the extent allowable under applicable law.

Despite our efforts to protect our technology and proprietary rights through intellectual property rights, licenses and other contractual protections, unauthorized parties may still copy or otherwise obtain and use our software and other technology. In addition, we intend to continue to expand our

international operations, and effective intellectual property, copyright, trademark and trade secret protection may not be available or may be limited in foreign countries. Any significant impairment of our intellectual property rights could harm our business or our ability to compete. Further, companies in the communications and technology industries may own large numbers of patents, copyrights and trademarks and may frequently threaten litigation, or file suit against us based on allegations of infringement or other violations of intellectual property rights. We currently are subject to, and expect to face in the future, allegations that we have infringed the intellectual property rights of third parties, including our competitors and non-practicing entities.

## **Regulatory**

We are subject to a number of U.S. federal and state and foreign laws and regulations that involve matters central to our business. These laws and regulations may involve privacy, data protection, intellectual property, competition, consumer protection, export taxation or other subjects. Many of the laws and regulations to which we are subject are still evolving and being tested in courts and could be interpreted in ways that could harm our business. In addition, the application and interpretation of these laws and regulations often are uncertain, particularly in the new and rapidly evolving industry in which we operate. Because global laws and regulations have continued to develop and evolve rapidly, it is possible that we or our products or our platform may not be, or may not have been, compliant with each such applicable law or regulation.

For example, the GDPR, which will take full effect on May 25, 2018, enhances data protection obligations for businesses and requires service providers (data processors) processing personal data on behalf of customers to cooperate with European data protection authorities, implement security measures and keep records of personal data processing activities. Noncompliance with the GDPR can trigger fines equal to the greater of €20 million or 4% of global annual revenue. Given the breadth and depth of changes in data protection obligations, preparing to meet the requirements of GDPR before its effective date has required significant time and resources, including a review of our technology and systems currently in use against the requirements of GDPR. We have taken steps to prepare for complying with GDPR, including integrating GDPR-compliant privacy protections into our products and platform, commercial agreements and record-keeping practices to help us and our customers meet the compliance obligations of GDPR. However, additional EU laws and regulations (and member states' implementations thereof) further govern the protection of consumers and of electronic communications. If our efforts to comply with GDPR or other applicable EU laws and regulations are not successful, we may be subject to penalties and fines that would adversely impact our business and results of operations, and our ability to conduct business in the EU could be significantly impaired.

In addition, the Telephone Consumer Protection Act of 1991 ("TCPA"), restricts telemarketing and the use of automatic text messages without proper consent. The scope and interpretation of the laws that are or may be applicable to the delivery of text messages are continuously evolving and developing. If we do not comply with these laws, or regulations or if we become liable under these laws or regulations due to the failure of our customers to comply with these laws by obtaining proper consent, we could face direct liability.

## **Corporate Information**

Twilio Inc. was incorporated in Delaware in March 2008. Our principal executive offices are located at 375 Beale Street, Third Floor, San Francisco, California 94105, and our telephone number is (415) 390-2337. Our website address is [www.twilio.com](http://www.twilio.com). Information contained on, or that can be accessed through, our website does not constitute part of this Annual Report on Form 10-K.

[Table of Contents](#)

Twilio, the Twilio logo and other trademarks or service marks of Twilio appearing in this Annual Report on Form 10-K are the property of Twilio. Trade names, trademarks and service marks of other companies appearing in this Annual Report on Form 10-K are the property of their respective holders

**Information about Geographic Revenue**

Information about geographic revenue is set forth in Note 9 of our Notes to our Consolidated Financial Statements included in Part II, Item 8, "Financial Statements and Supplementary Data" of this Annual Report on Form 10-K.

**Available Information**

The following filings are available through our investor relations website after we file them with the Securities and Exchange Commission ("SEC"): Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and our Proxy Statement for our annual meeting of stockholders. These filings are also available for download free of charge on our investor relations website. Our investor relations website is located at <http://investors.twilio.com/>. You may obtain copies of this information by mail from the Public Reference Section of the SEC, 100 F Street, N.E., Room 1580, Washington, D.C. 20549. The SEC also maintains an Internet website that contains reports, proxy statements and other information about issuers, like us, that file electronically with the SEC. The address of that website is [www.sec.gov](http://www.sec.gov).

We webcast our earnings calls and certain events we participate in or host with members of the investment community on our investor relations website. Additionally, we provide notifications of news or announcements regarding our financial performance, including SEC filings, investor events, press and earnings releases, and blogs as part of our investor relations website. Further corporate governance information, including our corporate governance guidelines and code of business conduct and ethics, is also available on our investor relations website under the heading "Corporate Governance." The contents of our websites are not intended to be incorporated by reference into this Annual Report on Form 10-K or in any other report or document we file with the SEC, and any references to our websites are intended to be inactive textual references only.

**Item 1A. Risk Factors**

*A description of the risks and uncertainties associated with our business is set forth below. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Annual Report on Form 10-K, including Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our condensed consolidated financial statements and related notes appearing elsewhere in this Annual Report on Form 10-K. The risks and uncertainties described below may not be the only ones we face. If any of the risks actually occur, our business, financial condition, results of operations and prospects could be materially and adversely affected. In that event, the market price of our Class A common stock could decline.*

**Risks Related to Our Business and Our Industry**

***The market for our products and platform is new and unproven, may decline or experience limited growth and is dependent in part on developers continuing to adopt our platform and use our products.***

We were founded in 2008, and we have been developing and providing a cloud-based platform that enables developers and organizations to integrate voice, messaging and video communications capabilities into their software applications. This market is relatively new and unproven and is subject to a number of risks and uncertainties. We believe that our revenue currently constitutes a significant portion of the total revenue in this market, and therefore, we believe that our future success will depend in large part on the growth, if any, of this market. The utilization of APIs by developers and organizations to build communications functionality into their applications is still relatively new, and developers and organizations may not recognize the need for, or benefits of, our products and platform. Moreover, if they do not recognize the need for and benefits of our products and platform, they may decide to adopt alternative products and services to satisfy some portion of their business needs. In order to grow our business and extend our market position, we intend to focus on educating developers and other potential customers about the benefits of our products and platform, expanding the functionality of our products and bringing new technologies to market to increase market acceptance and use of our platform. Our ability to expand the market that our products and platform address depends upon a number of factors, including the cost, performance and perceived value associated with such products and platform. The market for our products and platform could fail to grow significantly or there could be a reduction in demand for our products as a result of a lack of developer acceptance, technological challenges, competing products and services, decreases in spending by current and prospective customers, weakening economic conditions and other causes. If our market does not experience significant growth or demand for our products decreases, then our business, results of operations and financial condition could be adversely affected.

***We have a history of losses and we are uncertain about our future profitability.***

We have incurred net losses in each year since our inception, including net losses of \$63.7 million, \$41.3 million and \$35.5 million in 2017, 2016 and 2015, respectively. We had an accumulated deficit of \$250.4 million as of December 31, 2017. We expect to continue to expend substantial financial and other resources on, among other things:

- investments in our engineering team, the development of new products, features and functionality and enhancements to our platform;
- sales and marketing, including the continued expansion of our direct sales organization and marketing programs, especially for enterprises and for organizations outside of the United States, and expanding our programs directed at increasing our brand awareness among current and new developers;
- expansion of our operations and infrastructure, both domestically and internationally; and

- general administration, including legal, accounting and other expenses related to being a public company.

These investments may not result in increased revenue or growth of our business. We also expect that our revenue growth rate will decline over time. Accordingly, we may not be able to generate sufficient revenue to offset our expected cost increases and achieve and sustain profitability. If we fail to achieve and sustain profitability, then our business, results of operations and financial condition would be adversely affected.

***We have experienced rapid growth and expect our growth to continue, and if we fail to effectively manage our growth, then our business, results of operations and financial condition could be adversely affected.***

We have experienced substantial growth in our business since inception. For example, our headcount has grown from 730 employees on December 31, 2016 to 996 employees on December 31, 2017. In addition, we are rapidly expanding our international operations. Our international headcount grew from 125 employees as of December 31, 2016 to 215 employees as of December 31, 2017, and we established operations in one new country within that same period. We expect to continue to expand our international operations in the future. We have also experienced significant growth in the number of customers, usage and amount of data that our platform and associated infrastructure support. This growth has placed and may continue to place significant demands on our corporate culture, operational infrastructure and management.

We believe that our corporate culture has been a critical component of our success. We have invested substantial time and resources in building our team and nurturing our culture. As we expand our business and mature as a public company, we may find it difficult to maintain our corporate culture while managing this growth. Any failure to manage our anticipated growth and organizational changes in a manner that preserves the key aspects of our culture could hurt our chance for future success, including our ability to recruit and retain personnel, and effectively focus on and pursue our corporate objectives. This, in turn, could adversely affect our business, results of operations and financial condition.

In addition, in order to successfully manage our rapid growth, our organizational structure has become more complex. In order to manage these increasing complexities, we will need to continue to scale and adapt our operational, financial and management controls, as well as our reporting systems and procedures. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and management resources before our revenue increases and without any assurances that our revenue will increase.

Finally, continued growth could strain our ability to maintain reliable service levels for our customers. If we fail to achieve the necessary level of efficiency in our organization as we grow, then our business, results of operations and financial condition could be adversely affected.

***Our quarterly results may fluctuate, and if we fail to meet securities analysts' and investors' expectations, then the trading price of our Class A common stock and the value of your investment could decline substantially.***

Our results of operations, including the levels of our revenue, cost of revenue, gross margin and operating expenses, have fluctuated from quarter to quarter in the past and may continue to vary significantly in the future. These fluctuations are a result of a variety of factors, many of which are outside of our control, may be difficult to predict and may or may not fully reflect the underlying performance of our business. If our quarterly results of operations fall below the expectations of investors or securities analysts, then the trading price of our Class A common stock could decline

substantially. Some of the important factors that may cause our results of operations to fluctuate from quarter to quarter include:

- our ability to retain and increase revenue from existing customers and attract new customers;
- fluctuations in the amount of revenue from our Variable Customer Accounts and our larger Base Customer Accounts;
- our ability to attract and retain enterprises and international organizations as customers;
- our ability to introduce new products and enhance existing products;
- competition and the actions of our competitors, including pricing changes and the introduction of new products, services and geographies;
- the number of new employees;
- changes in network service provider fees that we pay in connection with the delivery of communications on our platform;
- changes in cloud infrastructure fees that we pay in connection with the operation of our platform;
- changes in our pricing as a result of our optimization efforts or otherwise;
- reductions in pricing as a result of negotiations with our larger customers;
- the rate of expansion and productivity of our sales force, including our enterprise sales force, which has been a focus of our recent expansion efforts;
- change in the mix of products that our customers use;
- change in the revenue mix of U.S. and international products;
- changes in laws, regulations or regulatory enforcement, in the United States or internationally, that impact our ability to market, sell or deliver our products;
- the amount and timing of operating costs and capital expenditures related to the operations and expansion of our business, including investments in our international expansion;
- significant security breaches of, technical difficulties with, or interruptions to, the delivery and use of our products on our platform;
- the timing of customer payments and any difficulty in collecting accounts receivable from customers;
- general economic conditions that may adversely affect a prospective customer's ability or willingness to adopt our products, delay a prospective customer's adoption decision, reduce the revenue that we generate from the use of our products or affect customer retention;
- changes in foreign currency exchange rates;
- extraordinary expenses such as litigation or other dispute-related settlement payments;
- sales tax and other tax determinations by authorities in the jurisdictions in which we conduct business;
- the impact of new accounting pronouncements;
- expenses in connection with mergers, acquisitions or other strategic transactions; and
- fluctuations in stock-based compensation expense.

The occurrence of one or more of the foregoing and other factors may cause our results of operations to vary significantly. As such, we believe that quarter-to-quarter comparisons of our results of operations may not be meaningful and should not be relied upon as an indication of future performance. In addition, a significant percentage of our operating expenses is fixed in nature and is based on forecasted revenue trends. Accordingly, in the event of a revenue shortfall, we may not be able to mitigate the negative impact on our income (loss) and margins in the short term. If we fail to meet or exceed the expectations of investors or securities analysts, then the trading price of our Class A common stock could fall substantially, and we could face costly lawsuits, including securities class action suits.

Additionally, certain large scale events, such as major elections and sporting events, can significantly impact usage levels on our platform, which could cause fluctuations in our results of operations. We expect that significantly increased usage of all communications platforms, including ours, during certain seasonal and one-time events could impact delivery and quality of our products during those events. We also experienced increased expenses in the second quarter of 2017 due to our developer conference, SIGNAL, which we plan to host in the fourth quarter of 2018 and plan to host annually. Such annual and one-time events may cause fluctuations in our results of operations and may impact both our revenue and operating expenses.

***If we are not able to maintain and enhance our brand and increase market awareness of our company and products, then our business, results of operations and financial condition may be adversely affected.***

We believe that maintaining and enhancing the "Twilio" brand identity and increasing market awareness of our company and products, particularly among developers, is critical to achieving widespread acceptance of our platform, to strengthen our relationships with our existing customers and to our ability to attract new customers. The successful promotion of our brand will depend largely on our continued marketing efforts, our ability to continue to offer high quality products, our ability to be thought leaders in the cloud communications market and our ability to successfully differentiate our products and platform from competing products and services. Our brand promotion and thought leadership activities may not be successful or yield increased revenue. In addition, independent industry analysts often provide reviews of our products and competing products and services, which may significantly influence the perception of our products in the marketplace. If these reviews are negative or not as strong as reviews of our competitors' products and services, then our brand may be harmed.

From time to time, our customers have complained about our products, such as complaints about our pricing and customer support. If we do not handle customer complaints effectively, then our brand and reputation may suffer, our customers may lose confidence in us and they may reduce or cease their use of our products. In addition, many of our customers post and discuss on social media about Internet-based products and services, including our products and platform. Our success depends, in part, on our ability to generate positive customer feedback and minimize negative feedback on social media channels where existing and potential customers seek and share information. If actions we take or changes we make to our products or platform upset these customers, then their online commentary could negatively affect our brand and reputation. Complaints or negative publicity about us, our products or our platform could materially and adversely impact our ability to attract and retain customers, our business, results of operations and financial condition.

The promotion of our brand also requires us to make substantial expenditures, and we anticipate that these expenditures will increase as our market becomes more competitive and as we expand into new markets. To the extent that these activities increase revenue, this revenue still may not be enough to offset the increased expenses we incur. If we do not successfully maintain and enhance our brand, then our business may not grow, we may see our pricing power reduced relative to competitors and we may lose customers, all of which would adversely affect our business, results of operations and financial condition.

***Our business depends on customers increasing their use of our products, and any loss of customers or decline in their use of our products could materially and adversely affect our business, results of operations and financial condition.***

Our ability to grow and generate incremental revenue depends, in part, on our ability to maintain and grow our relationships with existing customers and to have them increase their usage of our platform. If our customers do not increase their use of our products, then our revenue may decline and our results of operations may be harmed. For example, Uber, our largest Base Customer, decreased its usage of our products throughout 2017, which will result in decreased revenues from this customer versus recent historical periods. Customers are charged based on the usage of our products. Most of our customers do not have long-term contractual financial commitments to us and, therefore, most of our customers may reduce or cease their use of our products at any time without penalty or termination charges. Customers may terminate or reduce their use of our products for any number of reasons, including if they are not satisfied with our products, the value proposition of our products or our ability to meet their needs and expectations. We cannot accurately predict customers' usage levels and the loss of customers or reductions in their usage levels of our products may each have a negative impact on our business, results of operations and financial condition and may cause our Dollar-Based Net Expansion Rate to decline in the future if customers are not satisfied with our products, the value proposition of our products or our ability to meet their needs and expectations. If a significant number of customers cease using, or reduce their usage of our products, then we may be required to spend significantly more on sales and marketing than we currently plan to spend in order to maintain or increase revenue from customers. Such additional sales and marketing expenditures could adversely affect our business, results of operations and financial condition.

***If we are unable to attract new customers in a cost-effective manner, then our business, results of operations and financial condition would be adversely affected.***

In order to grow our business, we must continue to attract new customers in a cost-effective manner. We use a variety of marketing channels to promote our products and platform, such as developer events and developer evangelism, as well as search engine marketing and optimization. We periodically adjust the mix of our other marketing programs such as regional customer events, email campaigns, billboard advertising and public relations initiatives. If the costs of the marketing channels we use increase dramatically, then we may choose to use alternative and less expensive channels, which may not be as effective as the channels we currently use. As we add to or change the mix of our marketing strategies, we may need to expand into more expensive channels than those we are currently in, which could adversely affect our business, results of operations and financial condition. We will incur marketing expenses before we are able to recognize any revenue that the marketing initiatives may generate, and these expenses may not result in increased revenue or brand awareness. We have made in the past, and may make in the future, significant expenditures and investments in new marketing campaigns, and we cannot guarantee that any such investments will lead to the cost-effective acquisition of additional customers. If we are unable to maintain effective marketing programs, then our ability to attract new customers could be materially and adversely affected, our advertising and marketing expenses could increase substantially and our results of operations may suffer.

***If we do not develop enhancements to our products and introduce new products that achieve market acceptance, our business, results of operations and financial condition could be adversely affected.***

Our ability to attract new customers and increase revenue from existing customers depends in part on our ability to enhance and improve our existing products, increase adoption and usage of our products and introduce new products. The success of any enhancements or new products depends on several factors, including timely completion, adequate quality testing, actual performance quality, market-accepted pricing levels and overall market acceptance. Enhancements and new products that we

develop may not be introduced in a timely or cost-effective manner, may contain errors or defects, may have interoperability difficulties with our platform or other products or may not achieve the broad market acceptance necessary to generate significant revenue. Furthermore, our ability to increase the usage of our products depends, in part, on the development of new use cases for our products, which is typically driven by our developer community and may be outside of our control. We also have invested, and may continue to invest, in the acquisition of complementary businesses, technologies, services, products and other assets that expand the products that we can offer our customers. We may make these investments without being certain that they will result in products or enhancements that will be accepted by existing or prospective customers. Our ability to generate usage of additional products by our customers may also require increasingly sophisticated and more costly sales efforts and result in a longer sales cycle. If we are unable to successfully enhance our existing products to meet evolving customer requirements, increase adoption and usage of our products, develop new products, or if our efforts to increase the usage of our products are more expensive than we expect, then our business, results of operations and financial condition would be adversely affected.

***If we are unable to increase adoption of our products by enterprises, our business, results of operations and financial condition may be adversely affected.***

Historically, we have relied on the adoption of our products by software developers through our self-service model for a significant majority of our revenue, and we currently generate only a small portion of our revenue from enterprise customers. Our ability to increase our customer base, especially among enterprises, and achieve broader market acceptance of our products will depend, in part, on our ability to effectively organize, focus and train our sales and marketing personnel. We have limited experience selling to enterprises and only recently established an enterprise-focused sales force.

Our ability to convince enterprises to adopt our products will depend, in part, on our ability to attract and retain sales personnel with experience selling to enterprises. We believe that there is significant competition for experienced sales professionals with the skills and technical knowledge that we require. Our ability to achieve significant revenue growth in the future will depend, in part, on our ability to recruit, train and retain a sufficient number of experienced sales professionals, particularly those with experience selling to enterprises. In addition, even if we are successful in hiring qualified sales personnel, new hires require significant training and experience before they achieve full productivity, particularly for sales efforts targeted at enterprises and new territories. Our recent hires and planned hires may not become as productive as quickly as we expect and we may be unable to hire or retain sufficient numbers of qualified individuals in the future in the markets where we do business. Because we do not have a long history of targeting our sales efforts at enterprises, we cannot predict whether, or to what extent, our sales will increase as we organize and train our sales force or how long it will take for sales personnel to become productive.

As we seek to increase the adoption of our products by enterprises, we expect to incur higher costs and longer sales cycles. In this market segment, the decision to adopt our products may require the approval of multiple technical and business decision makers, including security, compliance, procurement, operations and IT. In addition, while enterprise customers may quickly deploy our products on a limited basis, before they will commit to deploying our products at scale, they often require extensive education about our products and significant customer support time, engage in protracted pricing negotiations and seek to secure readily available development resources. In addition, sales cycles for enterprises are inherently more complex and less predictable than the sales through our self-service model, and some enterprise customers may not use our products enough to generate revenue that justifies the cost to obtain such customers. In addition, these complex and resource intensive sales efforts could place additional strain on our product and engineering resources. Further, enterprises, including some of our customers, may choose to develop their own solutions that do not include our products. They also may demand reductions in pricing as their usage of our products

increases, which could have an adverse impact on our gross margin. As a result of our limited experience selling and marketing to enterprises, our efforts to sell to these potential customers may not be successful. If we are unable to increase the revenue that we derive from enterprises, then our business, results of operations and financial condition may be adversely affected.

***If we are unable to expand our relationships with existing Solution Partner customers and add new Solution Partner customers, our business, results of operations and financial condition could be adversely affected.***

We believe that the continued growth of our business depends in part upon developing and expanding strategic relationships with Solution Partner customers. Solution Partner customers embed our software products in their solutions, such as software applications for contact centers and sales force and marketing automation, and then sell such solutions to other businesses. When potential customers do not have the available developer resources to build their own applications, we refer them to our network of Solution Partner customers.

As part of our growth strategy, we intend to expand our relationships with existing Solution Partner customers and add new Solution Partner customers. If we fail to expand our relationships with existing Solution Partner customers or establish relationships with new Solution Partner customers in a timely and cost-effective manner, or at all, then our business, results of operations and financial condition could be adversely affected. Additionally, even if we are successful at building these relationships but there are problems or issues with integrating our products into the solutions of these customers, our reputation and ability to grow our business may be harmed.

***We rely upon Amazon Web Services to operate our platform, and any disruption of or interference with our use of Amazon Web Services would adversely affect our business, results of operations and financial condition.***

We outsource substantially all of our cloud infrastructure to Amazon Web Services ("AWS"), which hosts our products and platform. Our customers need to be able to access our platform at any time, without interruption or degradation of performance. AWS runs its own platform that we access, and we are, therefore, vulnerable to service interruptions at AWS. We have experienced, and expect that in the future we may experience interruptions, delays and outages in service and availability due to a variety of factors, including infrastructure changes, human or software errors, website hosting disruptions and capacity constraints. Capacity constraints could be due to a number of potential causes, including technical failures, natural disasters, fraud or security attacks. For instance, in September 2015, AWS suffered a significant outage that had a widespread impact on the ability of our customers to use several of our products. In addition, if our security, or that of AWS, is compromised, or our products or platform are unavailable or our users are unable to use our products within a reasonable amount of time or at all, then our business, results of operations and financial condition could be adversely affected. In some instances, we may not be able to identify the cause or causes of these performance problems within a period of time acceptable to our customers. It may become increasingly difficult to maintain and improve our platform performance, especially during peak usage times, as our products become more complex and the usage of our products increases. To the extent that we do not effectively address capacity constraints, either through AWS or alternative providers of cloud infrastructure, our business, results of operations and financial condition may be adversely affected. In addition, any changes in service levels from AWS may adversely affect our ability to meet our customers' requirements.

The substantial majority of the services we use from AWS are for cloud-based server capacity and, to a lesser extent, storage and other optimization offerings. AWS enables us to order and reserve server capacity in varying amounts and sizes distributed across multiple regions. We access AWS infrastructure through standard IP connectivity. AWS provides us with computing and storage capacity pursuant to an agreement that continues until terminated by either party. AWS may terminate the agreement by providing 30 days prior written notice, and it may in some cases terminate the agreement immediately for cause upon notice. Although we expect that we could receive similar services from other third parties, if any of our arrangements with AWS are terminated, we could experience interruptions on our platform and in our ability to make our products available to customers, as well as delays and additional expenses in arranging alternative cloud infrastructure services.

Any of the above circumstances or events may harm our reputation, cause customers to stop using our products, impair our ability to increase revenue from existing customers, impair our ability to grow our customer base, subject us to financial penalties and liabilities under our service level agreements and otherwise harm our business, results of operations and financial condition.

***To deliver our products, we rely on network service providers for our network service.***

We currently interconnect with network service providers around the world to enable the use by our customers of our products over their networks. We expect that we will continue to rely heavily on network service providers for these services going forward. Our reliance on network service providers has reduced our operating flexibility, ability to make timely service changes and control quality of service. In addition, the fees that we are charged by network service providers may change daily or weekly, while we do not typically change our customers' pricing as rapidly. Furthermore, many of these network service providers do not have long-term committed contracts with us and may terminate their agreements with us without notice or restriction. If a significant portion of our network service providers stop providing us with access to their infrastructure, fail to provide these services to us on a cost-effective basis, cease operations, or otherwise terminate these services, the delay caused by qualifying and switching to other network service providers could be time consuming and costly and could adversely affect our business, results of operations and financial condition.

Further, if problems occur with our network service providers, it may cause errors or poor quality communications with our products, and we could encounter difficulty identifying the source of the problem. The occurrence of errors or poor quality communications on our products, whether caused by our platform or a network service provider, may result in the loss of our existing customers or the delay of adoption of our products by potential customers and may adversely affect our business, results of operations and financial condition.

***Our future success depends in part on our ability to drive the adoption of our products by international customers.***

In 2017, 2016 and 2015, we derived 23%, 16% and 14% of our revenue, respectively, from customer accounts located outside the United States. The future success of our business will depend, in part, on our ability to expand our customer base worldwide. While we have been rapidly expanding our sales efforts internationally, our experience in selling our products outside of the United States is limited. Furthermore, our developer-first business model may not be successful or have the same traction outside the United States. As a result, our investment in marketing our products to these potential customers may not be successful. If we are unable to increase the revenue that we derive from international customers, then our business, results of operations and financial condition may be adversely affected.

***We are in the process of expanding our international operations, which exposes us to significant risks.***

We are continuing to expand our international operations to increase our revenue from customers outside of the United States as part of our growth strategy. Between December 31, 2016 and December 31, 2017, our international headcount grew from 125 employees to 215 employees, and we opened one new office outside of the United States. We expect to open additional foreign offices and hire employees to work at these offices in order to reach new customers and gain access to additional technical talent. Operating in international markets requires significant resources and management attention and will subject us to regulatory, economic and political risks in addition to those we already face in the United States. Because of our limited experience with international operations or with developing and managing sales in international markets, our international expansion efforts may not be successful.

In addition, we will face risks in doing business internationally that could adversely affect our business, including:

- exposure to political developments in the United Kingdom ("U.K."), including the planned departure of the U.K. from the European Union (EU) in March 2019, which has created an uncertain political and economic environment, instability for businesses and volatility in global financial markets;
- the difficulty of managing and staffing international operations and the increased operations, travel, infrastructure and legal compliance costs associated with numerous international locations;
- our ability to effectively price our products in competitive international markets;
- new and different sources of competition;
- our ability to comply with the General Data Protection Regulation ("GDPR"), which will go into effect on May 25, 2018;
- potentially greater difficulty collecting accounts receivable and longer payment cycles;
- higher or more variable network service provider fees outside of the United States;
- the need to adapt and localize our products for specific countries;
- the need to offer customer support in various languages;
- difficulties in understanding and complying with local laws, regulations and customs in foreign jurisdictions;
- difficulties with differing technical and environmental standards, data privacy and telecommunications regulations and certification requirements outside the United States, which could prevent customers from deploying our products or limit their usage;
- export controls and economic sanctions administered by the Department of Commerce Bureau of Industry and Security and the Treasury Department's Office of Foreign Assets Control;
- compliance with various anti-bribery and anti-corruption laws such as the Foreign Corrupt Practices Act and United Kingdom Bribery Act of 2010;
- tariffs and other non-tariff barriers, such as quotas and local content rules;
- more limited protection for intellectual property rights in some countries;
- adverse tax consequences;
- fluctuations in currency exchange rates, which could increase the price of our products outside of the United States, increase the expenses of our international operations and expose us to foreign currency exchange rate risk;
- currency control regulations, which might restrict or prohibit our conversion of other currencies into U.S. dollars;
- restrictions on the transfer of funds;
- deterioration of political relations between the United States and other countries; and
- political or social unrest or economic instability in a specific country or region in which we operate, which could have an adverse impact on our operations in that location.

Also, due to costs from our international expansion efforts and network service provider fees outside of the United States, which generally are higher than domestic rates, our gross margin for

international customers is typically lower than our gross margin for domestic customers. As a result, our gross margin may be impacted and fluctuate as we expand our operations and customer base worldwide.

Our failure to manage any of these risks successfully could harm our international operations, and adversely affect our business, results of operations and financial condition.

***We currently generate significant revenue from our largest customers, and the loss or decline in revenue from any of these customers could harm our business, results of operations and financial condition.***

In 2017, 2016 and 2015, our 10 largest Active Customer Accounts generated an aggregate of 19%, 30% and 32% of our revenue, respectively. In addition, a significant portion of our revenue comes from two customers, one of which is a Variable Customer Account.

In 2017, 2016 and 2015, WhatsApp, a Variable Customer, accounted for 6%, 9% and 17% of our revenue, respectively. WhatsApp uses our Programmable Voice products and Programmable Messaging products in its applications to verify new and existing users on its service. Our Variable Customer Accounts, including WhatsApp, do not have long-term contracts with us and may reduce or fully terminate their usage of our products at any time without notice, penalty or termination charges. In addition, the usage of our products by WhatsApp and other Variable Customer Accounts may change significantly between periods.

In 2017, 2016 and 2015, a second customer, Uber, a Base Customer, accounted for 8%, 14% and 9% of our revenue, respectively. Uber uses our Programmable Messaging products and Programmable Voice products. Uber, or any other one of our Base Customers, could significantly reduce their usage of our products without notice or penalty. Uber decreased its usage of our products throughout 2017 and may continue to do so in the future.

In the event that our large customers do not continue to use our products, use fewer of our products, or use our products in a more limited capacity, or not at all, our business, results of operations and financial condition could be adversely affected.

***The market in which we participate is intensely competitive, and if we do not compete effectively, our business, results of operations and financial condition could be harmed.***

The market for cloud communications is rapidly evolving, significantly fragmented and highly competitive, with relatively low barriers to entry in some segments. The principal competitive factors in our market include completeness of offering, credibility with developers, global reach, ease of integration and programmability, product features, platform scalability, reliability, security and performance, brand awareness and reputation, the strength of sales and marketing efforts, customer support, as well as the cost of deploying and using our products. Our competitors fall into four primary categories:

- legacy on-premise vendors, such as Avaya and Cisco;
- regional network service providers that offer limited developer functionality on top of their own physical infrastructure;
- smaller software companies that compete with portions of our product line; and
- SaaS companies that offer prepackaged applications for a narrow set of use cases.

Some of our competitors and potential competitors are larger and have greater name recognition, longer operating histories, more established customer relationships, larger budgets and significantly greater resources than we do. In addition, they have the operating flexibility to bundle competing products and services at little or no perceived incremental cost, including offering them at a lower price

as part of a larger sales transaction. As a result, our competitors may be able to respond more quickly and effectively than we can to new or changing opportunities, technologies, standards or customer requirements. In addition, some competitors may offer products or services that address one or a limited number of functions at lower prices, with greater depth than our products or in different geographies. Our current and potential competitors may develop and market new products and services with comparable functionality to our products, and this could lead to us having to decrease prices in order to remain competitive. Customers utilize our products in many ways and use varying levels of functionality that our products offer or are capable of supporting or enabling within their applications. Customers that use many of the features of our products or use our products to support or enable core functionality for their applications may have difficulty or find it impractical to replace our products with a competitor's products or services, while customers that use only limited functionality may be able to more easily replace our products with competitive offerings. Our customers also may choose to build some of the functionality our products provide, which may limit or eliminate their demand for our products.

With the introduction of new products and services and new market entrants, we expect competition to intensify in the future. In addition, some of our customers may choose to use our products and our competitors' products at the same time. Further, customers and consumers may choose to adopt other forms of electronic communications or alternative communication platforms.

Moreover, as we expand the scope of our products, we may face additional competition. If one or more of our competitors were to merge or partner with another of our competitors, the change in the competitive landscape could also adversely affect our ability to compete effectively. In addition, some of our competitors have lower list prices than us, which may be attractive to certain customers even if those products have different or lesser functionality. If we are unable to maintain our current pricing due to competitive pressures, our margins will be reduced and our business, results of operations and financial condition would be adversely affected. In addition, pricing pressures and increased competition generally could result in reduced revenue, reduced margins, increased losses or the failure of our products to achieve or maintain widespread market acceptance, any of which could harm our business, results of operations and financial condition.

***We have a limited operating history, which makes it difficult to evaluate our current business and future prospects and increases the risk of your investment.***

We were founded and launched our first product in 2008. As a result of our limited operating history, our ability to forecast our future results of operations is limited and subject to a number of uncertainties, including our ability to plan for future growth. Our historical revenue growth should not be considered indicative of our future performance. We have encountered and will encounter risks and uncertainties frequently experienced by growing companies in rapidly changing industries, such as:

- market acceptance of our products and platform;
- adding new customers, particularly enterprises;
- retention of customers;
- the successful expansion of our business, particularly in markets outside of the United States;
- competition;
- our ability to control costs, particularly our operating expenses;
- network outages or security breaches and any associated expenses;
- foreign currency exchange rate fluctuations;

- executing acquisitions and integrating the acquired businesses, technologies, services, products and other assets; and
- general economic and political conditions.

If we do not address these risks successfully, our business, results of operations and financial condition could be adversely affected.

***We have limited experience with respect to determining the optimal prices for our products.***

We charge our customers based on their use of our products. We expect that we may need to change our pricing from time to time. In the past we have sometimes reduced our prices either for individual customers in connection with long-term agreements or for a particular product. One of the challenges to our pricing is that the fees that we pay to network service providers over whose networks we transmit communications can vary daily or weekly and are affected by volume and other factors that may be outside of our control and difficult to predict. This can result in us incurring increased costs that we may be unable or unwilling to pass through to our customers, which could adversely impact our business, results of operations and financial condition.

Further, as competitors introduce new products or services that compete with ours or reduce their prices, we may be unable to attract new customers or retain existing customers based on our historical pricing. As we expand internationally, we also must determine the appropriate price to enable us to compete effectively internationally. Moreover, enterprises, which are a primary focus for our direct sales efforts, may demand substantial price concessions. In addition, if the mix of products sold changes, including for a shift to IP-based products, then we may need to, or choose to, revise our pricing. As a result, in the future we may be required or choose to reduce our prices or change our pricing model, which could adversely affect our business, results of operations and financial condition.

***We typically provide monthly uptime service level commitments of up to 99.95% under our agreements with customers. If we fail to meet these contractual commitments, then our business, results of operations and financial condition could be adversely affected.***

Our agreements with customers typically provide for service level commitments. If we suffer extended periods of downtime for our products or platform and we are unable to meet these commitments, then we are contractually obligated to provide a service credit, which is typically 10% of the customer's amounts due for the month in question. In addition, the performance and availability of AWS, which provides our cloud infrastructures is outside of our control and, therefore, we are not in full control of whether we meet our service level commitments. As a result, our business, results of operations and financial condition could be adversely affected if we suffer unscheduled downtime that exceeds the service level commitments we have made to our customers. Any extended service outages could adversely affect our business and reputation.

***Breaches of our networks or systems, or those of AWS or our network service providers, could degrade our ability to conduct our business, compromise the integrity of our products and platform, result in significant data losses and the theft of our intellectual property, damage our reputation, expose us to liability to third parties and require us to incur significant additional costs to maintain the security of our networks and data.***

We depend upon our IT systems to conduct virtually all of our business operations, ranging from our internal operations and research and development activities to our marketing and sales efforts and communications with our customers and business partners. Individuals or entities may attempt to penetrate our network security, or that of our platform, and to cause harm to our business operations, including by misappropriating our proprietary information or that of our customers, employees and business partners or to cause interruptions of our products and platform. Because the techniques used by such individuals or entities to access, disrupt or sabotage devices, systems and networks change

frequently and may not be recognized until launched against a target, we may be unable to anticipate these techniques, and we may not become aware in a timely manner of such a security breach, which could exacerbate any damage we experience. Additionally, we depend upon our employees and contractors to appropriately handle confidential and sensitive data, including customer data, and to deploy our IT resources in a safe and secure manner that does not expose our network systems to security breaches or the loss of data. Any data security incidents, including internal malfeasance by our employees, unauthorized access or usage, virus or similar breach or disruption of us or our service providers, such as AWS or network service providers, could result in loss of confidential information, damage to our reputation, loss of customers, litigation, regulatory investigations, fines, penalties and other liabilities. Accordingly, if our cybersecurity measures or those of AWS or our network service providers, fail to protect against unauthorized access, attacks (which may include sophisticated cyberattacks) or the mishandling of data by our employees and contractors, then our reputation, business, results of operations and financial condition could be adversely affected.

***Defects or errors in our products could diminish demand for our products, harm our business and results of operations and subject us to liability.***

Our customers use our products for important aspects of their businesses, and any errors, defects or disruptions to our products and any other performance problems with our products could damage our customers' businesses and, in turn, hurt our brand and reputation. We provide regular updates to our products, which have in the past contained, and may in the future contain, undetected errors, failures, vulnerabilities and bugs when first introduced or released. Real or perceived errors, failures or bugs in our products could result in negative publicity, loss of or delay in market acceptance of our platform, loss of competitive position, lower customer retention or claims by customers for losses sustained by them. In such an event, we may be required, or may choose, for customer relations or other reasons, to expend additional resources in order to help correct the problem. In addition, we may not carry insurance sufficient to compensate us for any losses that may result from claims arising from defects or disruptions in our products. As a result, our reputation and our brand could be harmed, and our business, results of operations and financial condition may be adversely affected.

***If we fail to adapt and respond effectively to rapidly changing technology, evolving industry standards, changing regulations, and changing customer needs, requirements or preferences, our products may become less competitive.***

The market for communications in general, and cloud communications in particular, is subject to rapid technological change, evolving industry standards, changing regulations, as well as changing customer needs, requirements and preferences. The success of our business will depend, in part, on our ability to adapt and respond effectively to these changes on a timely basis. If we are unable to develop new products that satisfy our customers and provide enhancements and new features for our existing products that keep pace with rapid technological and industry change, our business, results of operations and financial condition could be adversely affected. If new technologies emerge that are able to deliver competitive products and services at lower prices, more efficiently, more conveniently or more securely, such technologies could adversely impact our ability to compete effectively.

Our platform must integrate with a variety of network, hardware, mobile and software platforms and technologies, and we need to continuously modify and enhance our products and platform to adapt to changes and innovation in these technologies. If customers adopt new software platforms or infrastructure, we may be required to develop new versions of our products to work with those new platforms or infrastructure. This development effort may require significant resources, which would adversely affect our business, results of operations and financial condition. Any failure of our products and platform to operate effectively with evolving or new platforms and technologies could reduce the demand for our products. If we are unable to respond to these changes in a cost-effective manner, our

products may become less marketable and less competitive or obsolete, and our business, results of operations and financial condition could be adversely affected.

***Our reliance on SaaS technologies from third parties may adversely affect our business, results of operations and financial condition.***

We rely heavily on hosted SaaS technologies from third parties in order to operate critical internal functions of our business, including enterprise resource planning, customer support and customer relations management services. If these services become unavailable due to extended outages or interruptions, or because they are no longer available on commercially reasonable terms or prices, our expenses could increase. As a result, our ability to manage our operations could be interrupted and our processes for managing our sales process and supporting our customers could be impaired until equivalent services, if available, are identified, obtained and implemented, all of which could adversely affect our business, results of operations and financial condition.

***If we are unable to develop and maintain successful relationships with independent software vendors and system integrators, our business, results of operations and financial condition could be adversely affected.***

We believe that continued growth of our business depends in part upon identifying, developing and maintaining strategic relationships with independent software vendor development platforms and system integrators. As part of our growth strategy, we plan to further develop product partnerships with ISV development platforms to embed our products as additional distribution channels and also intend to further develop partnerships and specific solution areas with systems integrators. If we fail to establish these relationships in a timely and cost-effective manner, or at all, then our business, results of operations and financial condition could be adversely affected. Additionally, even if we are successful at developing these relationships but there are problems or issues with the integrations or enterprises are not willing to purchase through ISV development platforms, our reputation and ability to grow our business may be adversely affected.

***Any failure to offer high quality customer support may adversely affect our relationships with our customers and prospective customers, and adversely affect our business, results of operations and financial condition.***

Many of our customers depend on our customer support team to assist them in deploying our products effectively to help them to resolve post-deployment issues quickly and to provide ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from adopting our products. We may be unable to respond quickly enough to accommodate short-term increases in demand for customer support. We also may be unable to modify the nature, scope and delivery of our customer support to compete with changes in the support services provided by our competitors. Increased demand for customer support, without corresponding revenue, could increase costs and adversely affect our business, results of operations and financial condition. Our sales are highly dependent on our business reputation and on positive recommendations from developers. Any failure to maintain high quality customer support, or a market perception that we do not maintain high quality customer support, could adversely affect our reputation, business, results of operations and financial condition.

***We have been sued, and may, in the future, be sued by third parties for alleged infringement of their proprietary rights, which could adversely affect our business, results of operations and financial condition.***

There is considerable patent and other intellectual property development activity in our industry. Our future success depends, in part, on not infringing the intellectual property rights of others. Our competitors or other third parties have claimed and may, in the future, claim that we are infringing upon their intellectual property rights, and we may be found to be infringing upon such rights. For

example, on April 30, 2015, Telesign Corporation ("Telesign"), filed a lawsuit against us in the United States District Court, Central District of California ("Telesign I"). Telesign alleges that we are infringing three U.S. patents that it holds: U.S. Patent No. 8,462,920 ("920"), U.S. Patent No. 8,687,038 ("038") and U.S. Patent No. 7,945,034 ("034"). The patent infringement allegations in the lawsuit relate to our Account Security products, our two-factor authentication use case and an API tool to find information about a phone number. Subsequently, on March 28, 2016, Telesign filed a second lawsuit against us in the United States District Court, Central District of California ("Telesign II"), alleging infringement of U.S. Patent No. 9,300,792 ("792") held by Telesign. The '792 patent is in the same patent family as the '920 and '038 patents asserted in Telesign I, and the infringement allegations in Telesign II relate to our Account Security products and our two-factor authentication use case. With respect to each of the patents asserted in Telesign I and Telesign II, the complaints seek, among other things, to enjoin us from allegedly infringing these patents along with damages for lost profits. See the section titled "Item 3. Legal Proceedings." We intend to vigorously defend ourselves against these lawsuits and believe we have meritorious defenses to each matter in which we are a defendant. However, litigation is inherently uncertain, and any judgment or injunctive relief entered against us or any adverse settlement could negatively affect our business, results of operations and financial condition. In addition, litigation can involve significant management time and attention and be expensive, regardless of outcome. During the course of these lawsuits, there may be announcements of the results of hearings and motions and other interim developments related to the litigation. If securities analysts or investors regard these announcements as negative, the trading price of our Class A common stock may decline.

In the future, we may receive claims from third parties, including our competitors, that our products or platform and underlying technology infringe or violate a third party's intellectual property rights, and we may be found to be infringing upon such rights. We may be unaware of the intellectual property rights of others that may cover some or all of our technology. Any claims or litigation could cause us to incur significant expenses and, if successfully asserted against us, could require that we pay substantial damages or ongoing royalty payments, prevent us from offering our products, or require that we comply with other unfavorable terms. We may also be obligated to indemnify our customers or business partners in connection with any such litigation and to obtain licenses or modify our products or platform, which could further exhaust our resources. Even if we were to prevail in the event of claims or litigation against us, any claim or litigation regarding intellectual property could be costly and time-consuming and divert the attention of our management and other employees from our business. Patent infringement, trademark infringement, trade secret misappropriation and other intellectual property claims and proceedings brought against us, whether successful or not, could harm our brand, business, results of operations and financial condition.

***Indemnity provisions in various agreements potentially expose us to substantial liability for intellectual property infringement and other losses.***

Our agreements with customers and other third parties typically include indemnification or other provisions under which we agree to indemnify or otherwise be liable to them for losses suffered or incurred as a result of claims of intellectual property infringement, damages caused by us to property or persons or other liabilities relating to or arising from our products or platform or other acts or omissions. The term of these contractual provisions often survives termination or expiration of the applicable agreement. Large indemnity payments or damage claims from contractual breach could harm our business, results of operations and financial condition. Although typically we contractually limit our liability with respect to such obligations, we may still incur substantial liability related to them. Any dispute with a customer with respect to such obligations could have adverse effects on our relationship with that customer and other current and prospective customers, demand for our products and adversely affect our business, results of operations and financial condition.

***We could incur substantial costs in protecting or defending our intellectual property rights, and any failure to protect our intellectual property could adversely affect our business, results of operations and financial condition.***

Our success depends, in part, on our ability to protect our brand and the proprietary methods and technologies that we develop under patent and other intellectual property laws of the United States and foreign jurisdictions so that we can prevent others from using our inventions and proprietary information. As of December 31, 2017, in the United States, we had been issued 77 patents, which expire between 2029 and 2036, and had 42 patent applications pending for examination and three pending provisional applications. As of such date, we also had seven issued patents and seven patent applications pending for examination in foreign jurisdictions, all of which are related to U.S. patents and patent applications. There can be no assurance that additional patents will be issued or that any patents that have been issued or that may be issued in the future will provide significant protection for our intellectual property. As of December 31, 2017, we had 14 registered trademarks in the United States and 61 registered trademarks in foreign jurisdictions. If we fail to protect our intellectual property rights adequately, our competitors might gain access to our technology and our business, results of operations and financial condition may be adversely affected.

There can be no assurance that the particular forms of intellectual property protection that we seek, including business decisions about when to file patent applications and trademark applications, will be adequate to protect our business. We could be required to spend significant resources to monitor and protect our intellectual property rights. Litigation may be necessary in the future to enforce our intellectual property rights, determine the validity and scope of our proprietary rights or those of others, or defend against claims of infringement or invalidity. Such litigation could be costly, time-consuming and distracting to management, result in a diversion of significant resources, the narrowing or invalidation of portions of our intellectual property and have an adverse effect on our business, results of operations and financial condition. Our efforts to enforce our intellectual property rights may be met with defenses, counterclaims and countersuits attacking the validity and enforceability of our intellectual property rights or alleging that we infringe the counterclaimant's own intellectual property. Any of our patents, copyrights, trademarks or other intellectual property rights could be challenged by others or invalidated through administrative process or litigation.

We also rely, in part, on confidentiality agreements with our business partners, employees, consultants, advisors, customers and others in our efforts to protect our proprietary technology, processes and methods. These agreements may not effectively prevent disclosure of our confidential information, and it may be possible for unauthorized parties to copy our software or other proprietary technology or information, or to develop similar software independently without our having an adequate remedy for unauthorized use or disclosure of our confidential information. In addition, others may independently discover our trade secrets and proprietary information, and in these cases we would not be able to assert any trade secret rights against those parties. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights, and failure to obtain or maintain trade secret protection could adversely affect our competitive business position.

In addition, the laws of some countries do not protect intellectual property and other proprietary rights to the same extent as the laws of the United States. To the extent we expand our international activities, our exposure to unauthorized copying, transfer and use of our proprietary technology or information may increase.

We cannot be certain that our means of protecting our intellectual property and proprietary rights will be adequate or that our competitors will not independently develop similar technology. If we fail to meaningfully protect our intellectual property and proprietary rights, our business, results of operations and financial condition could be adversely affected.

***Our use of open source software could negatively affect our ability to sell our products and subject us to possible litigation.***

Our products and platform incorporate open source software, and we expect to continue to incorporate open source software in our products and platform in the future. Few of the licenses applicable to open source software have been interpreted by courts, and there is a risk that these licenses could be construed in a manner that could impose unanticipated conditions or restrictions on our ability to commercialize our products and platform. Moreover, although we have implemented policies to regulate the use and incorporation of open source software into our products and platform, we cannot be certain that we have not incorporated open source software in our products or platform in a manner that is inconsistent with such policies. If we fail to comply with open source licenses, we may be subject to certain requirements, including requirements that we offer our products that incorporate the open source software for no cost, that we make available source code for modifications or derivative works we create based upon, incorporating or using the open source software and that we license such modifications or derivative works under the terms of applicable open source licenses. If an author or other third party that distributes such open source software were to allege that we had not complied with the conditions of one or more of these licenses, we could be required to incur significant legal expenses defending against such allegations and could be subject to significant damages, enjoined from generating revenue from customers using products that contained the open source software and required to comply with onerous conditions or restrictions on these products. In any of these events, we and our customers could be required to seek licenses from third parties in order to continue offering our products and platform and to re-engineer our products or platform or discontinue offering our products to customers in the event re-engineering cannot be accomplished on a timely basis. Any of the foregoing could require us to devote additional research and development resources to re-engineer our products or platform, could result in customer dissatisfaction and may adversely affect our business, results of operations and financial condition.

***We may acquire or invest in companies, which may divert our management's attention and result in debt or dilution to our stockholders. We may be unable to integrate acquired businesses and technologies successfully or achieve the expected benefits of such acquisitions.***

We may evaluate and consider potential strategic transactions, including acquisitions of, or investments in, businesses, technologies, services, products and other assets in the future. We also may enter into relationships with other businesses to expand our products and platform, which could involve preferred or exclusive licenses, additional channels of distribution, discount pricing or investments in other companies.

Any acquisition, investment or business relationship may result in unforeseen operating difficulties and expenditures. In particular, we may encounter difficulties assimilating or integrating the businesses, technologies, products, personnel or operations of the acquired companies, particularly if the key personnel of the acquired company choose not to work for us, their products or services are not easily adapted to work with our platform, or we have difficulty retaining the customers of any acquired business due to changes in ownership, management or otherwise. Acquisitions also may disrupt our business, divert our resources or require significant management attention that would otherwise be available for development of our existing business. Moreover, the anticipated benefits of any acquisition, investment or business relationship may not be realized or we may be exposed to unknown risks or liabilities.

Negotiating these transactions can be time consuming, difficult and expensive, and our ability to complete these transactions may often be subject to approvals that are beyond our control.

Consequently, these transactions, even if announced, may not be completed. For one or more of those transactions, we may:

- issue additional equity securities that would dilute our existing stockholders;
- use cash that we may need in the future to operate our business;
- incur large charges or substantial liabilities;
- incur debt on terms unfavorable to us or that we are unable to repay;
- encounter difficulties retaining key employees of the acquired company or integrating diverse software codes or business cultures; or
- become subject to adverse tax consequences, substantial depreciation, or deferred compensation charges.

The occurrence of any of these foregoing could adversely affect our business, results of operations and financial condition.

***We depend largely on the continued services of our senior management and other key employees, the loss of any of whom could adversely affect our business, results of operations and financial condition.***

Our future performance depends on the continued services and contributions of our senior management and other key employees to execute on our business plan, to develop our products and platform, to deliver our products to customers, to attract and retain customers and to identify and pursue opportunities. The loss of services of senior management or other key employees could significantly delay or prevent the achievement of our development and strategic objectives. In particular, we depend to a considerable degree on the vision, skills, experience and effort of our co-founder and Chief Executive Officer, Jeff Lawson. None of our executive officers or other senior management personnel is bound by a written employment agreement and any of them may terminate employment with us at any time with no advance notice. On February 13, 2018, we announced that our Chief Financial Officer, Lee Kirkpatrick, will be leaving our company. Though Mr. Kirkpatrick has indicated that he will remain with us until his replacement has been hired, we could experience a delay or disruption in the achievement of our business objectives while we search for and onboard a new Chief Financial Officer and during the period the new Chief Financial Officer gets up to speed on our business and financial and accounting systems. The replacement of any other of our senior management personnel would likely involve significant time and costs, and such loss could significantly delay or prevent the achievement of our business objectives. The loss of the services of other of our senior management or other key employees for any reason could adversely affect our business, results of operations and financial condition.

***If we are unable to hire, retain and motivate qualified personnel, our business will suffer.***

Our future success depends, in part, on our ability to continue to attract and retain highly skilled personnel. We believe that there is, and will continue to be, intense competition for highly skilled management, technical, sales and other personnel with experience in our industry in the San Francisco Bay Area, where our headquarters are located, and in other locations where we maintain offices. We must provide competitive compensation packages and a high quality work environment to hire, retain and motivate employees. If we are unable to retain and motivate our existing employees and attract qualified personnel to fill key positions, such as the Chief Financial Officer role, we may be unable to manage our business effectively, including the development, marketing and sale of our products, which could adversely affect our business, results of operations and financial condition. To the extent we hire personnel from competitors, we also may be subject to allegations that they have been improperly solicited or divulged proprietary or other confidential information.

Volatility in, or lack of performance of, our stock price may also affect our ability to attract and retain key personnel. Many of our key personnel are, or will soon be, vested in a substantial number of shares of Class A common stock or stock options. Employees may be more likely to terminate their employment with us if the shares they own or the shares underlying their vested options have significantly appreciated in value relative to the original purchase prices of the shares or the exercise prices of the options, or, conversely, if the exercise prices of the options that they hold are significantly above the trading price of our Class A common stock. If we are unable to retain our employees, our business, results of operations and financial condition could be adversely affected.

***Our products and platform and our business are subject to a variety of U.S. and international laws and regulations, including those regarding privacy, data protection and information security, and our customers may be subject to regulations related to the handling and transfer of certain types of sensitive and confidential information. Any failure of our products to comply with or enable our customers and channel partners to comply with applicable laws and regulations would harm our business, results of operations and financial condition.***

We and our customers that use our products may be subject to privacy- and data protection-related laws and regulations that impose obligations in connection with the collection, processing and use of personal data, financial data, health or other similar data. The U.S. federal and various state and foreign governments have adopted or proposed limitations on, or requirements regarding, the collection, distribution, use, security and storage of personally identifiable information of individuals. The U.S. Federal Trade Commission and numerous state attorneys general are applying federal and state consumer protection laws to impose standards on the online collection, use and dissemination of data, and to the security measures applied to such data.

Similarly, many foreign countries and governmental bodies, including the EU member states, have laws and regulations concerning the collection and use of personally identifiable information obtained from individuals located in the EU or by businesses operating within their jurisdiction, which are often more restrictive than those in the United States. Laws and regulations in these jurisdictions apply broadly to the collection, use, storage, disclosure and security of personally identifiable information that identifies or may be used to identify an individual, such as names, telephone numbers, email addresses and, in some jurisdictions, IP addresses and other online identifiers.

For example, in April 2016 the European Union ("EU") adopted the General Data Protection Regulation ("GDPR"), which will take full effect on May 25, 2018. The GDPR enhances data protection obligations for businesses and requires service providers (data processors) processing personal data on behalf of customers to cooperate with European data protection authorities, implement security measures and keep records of personal data processing activities. Noncompliance with the GDPR can trigger fines equal to or greater of €20 million or 4% of global annual revenues. Given the breadth and depth of changes in data protection obligations, preparing to meet the requirements of GDPR before its effective date has required significant time and resources, including a review of our technology and systems currently in use against the requirements of GDPR. There are also additional EU laws and regulations (and member states implementations thereof) which govern the protection of consumers and of electronic communications. If our efforts to comply with GDPR or other applicable EU laws and regulations are not successful, we may be subject to penalties and fines that would adversely impact our business and results of operations, and our ability to conduct business in the EU could be significantly impaired.

We have in the past relied on the EU-U.S. and the Swiss-U.S. Privacy Shield frameworks approved by the European Commission in July 2016 and the Swiss Government in January 2017, respectively, which were designed to allow U.S. corporations to self-certify to the U.S. Department of Commerce and publicly commit to comply with the Privacy Shield requirements to freely import personal data from the EU and Switzerland. However, ongoing legal challenges to these frameworks has resulted in

some uncertainty as to their validity. We anticipate engaging in efforts to legitimize data transfers from the European Economic Area, but we may experience hesitancy, reluctance, or refusal by European or multinational customers to continue to use our services due to the potential risk exposure to such customers as a result of the ECJ ruling. We and our customers are at risk of enforcement actions taken by an EU data protection authority until such point in time that we are able to ensure that all data transfers to us from the European Economic Area are legitimized. In addition, as the United Kingdom transitions out of the EU, we may encounter additional complexity with respect to data privacy and data transfers from the U.K.

Additionally, although we endeavor to have our products and platform comply with applicable laws and regulations, these and other obligations may be modified, they may be interpreted and applied in an inconsistent manner from one jurisdiction to another, and they may conflict with one another, other regulatory requirements, contractual commitments or our internal practices

We also may be bound by contractual obligations relating to our collection, use and disclosure of personal, financial and other data or may find it necessary or desirable to join industry or other self-regulatory bodies or other privacy- or data protection-related organizations that require compliance with their rules pertaining to privacy and data protection.

We expect that there will continue to be new proposed laws, rules of self-regulatory bodies, regulations and industry standards concerning privacy, data protection and information security in the United States, the European Union and other jurisdictions, and we cannot yet determine the impact such future laws, rules, regulations and standards may have on our business. Moreover, existing U.S. federal and various state and foreign privacy- and data protection-related laws and regulations are evolving and subject to potentially differing interpretations, and various legislative and regulatory bodies may expand current or enact new laws and regulations regarding privacy- and data protection-related matters. Because global laws, regulations and industry standards concerning privacy and data security have continued to develop and evolve rapidly, it is possible that we or our products or platform may not be, or may not have been, compliant with each such applicable law, regulation and industry standard and compliance with such new laws or to changes to existing laws may impact our business and practices, require us to expend significant resources to adapt to these changes, or to stop offering our products in certain countries. These developments could adversely affect our business, results of operations and financial condition.

Any failure or perceived failure by us, our products or our platform to comply with new or existing U.S., EU or other foreign privacy or data security laws, regulations, policies, industry standards or legal obligations, or any security incident that results in the unauthorized access to, or acquisition, release or transfer of, personally identifiable information or other customer data may result in governmental investigations, inquiries, enforcement actions and prosecutions, private litigation, fines and penalties, adverse publicity or potential loss of business. For example, on February 18, 2016, a putative class action complaint was filed in the Alameda County Superior Court in California. The complaint alleges that our products permit the interception, recording and disclosure of communications at a customer's request and in violation of the California Invasion of Privacy Act. This litigation, or any other such actions in the future and related penalties could divert management's attention and resources, adversely affect our brand, business, results of operations and financial condition.

***Changes in laws and regulations related to the Internet or changes in the Internet infrastructure itself may diminish the demand for our products, and could adversely affect our business, results of operations and financial condition.***

The future success of our business depends upon the continued use of the Internet as a primary medium for commerce, communications and business applications. Federal, state or foreign government bodies or agencies have in the past adopted, and may in the future adopt, laws or regulations affecting

the use of the Internet as a commercial medium. Changes in these laws or regulations could require us to modify our products and platform in order to comply with these changes. In addition, government agencies or private organizations have imposed and may impose additional taxes, fees or other charges for accessing the Internet or commerce conducted via the Internet. These laws or charges could limit the growth of Internet-related commerce or communications generally, or result in reductions in the demand for Internet-based products and services such as our products and platform. In addition, the use of the Internet as a business tool could be adversely affected due to delays in the development or adoption of new standards and protocols to handle increased demands of Internet activity, security, reliability, cost, ease-of-use, accessibility and quality of service. The performance of the Internet and its acceptance as a business tool has been adversely affected by "viruses", "worms", and similar malicious programs. If the use of the Internet is reduced as a result of these or other issues, then demand for our products could decline, which could adversely affect our business, results of operations and financial condition.

***Certain of our products are subject to telecommunications-related regulations, and future legislative or regulatory actions could adversely affect our business, results of operations and financial condition.***

As a provider of communications products, we are subject to existing or potential FCC regulations relating to privacy, Telecommunications Relay Service fund contributions and other requirements. FCC classification of our Internet voice communications products as telecommunications services could result in additional federal and state regulatory obligations. If we do not comply with FCC rules and regulations, we could be subject to FCC enforcement actions, fines, loss of licenses and possibly restrictions on our ability to operate or offer certain of our products. Any enforcement action by the FCC, which may be a public process, would hurt our reputation in the industry, possibly impair our ability to sell our products to customers and could adversely affect our business, results of operations and financial condition.

Our products are subject to a number of FCC regulations and laws that are administered by the FCC. Among others, we must comply (in whole or in part) with:

- the Communications Act of 1934, as amended, which regulates communications services and the provision of such services;
- the TCPA, which limits the use of automatic dialing systems, artificial or prerecorded voice messages, SMS text messages and fax machines;
- the Communications Assistance for Law Enforcement Act ("CALEA"), which requires covered entities to assist law enforcement in undertaking electronic surveillance;
- requirements to safeguard the privacy of certain customer information;
- payment of annual FCC regulatory fees based on our interstate and international revenues;
- rules pertaining to access to our services by people with disabilities and contributions to the Telecommunications Relay Services fund; and
- FCC rules regarding the use of customer proprietary network information.

If we do not comply with any current or future rules or regulations that apply to our business, we could be subject to substantial fines and penalties, and we may have to restructure our offerings, exit certain markets or raise the price of our products. In addition, any uncertainty regarding whether particular regulations apply to our business, and how they apply, could increase our costs or limit our ability to grow. Any of the foregoing could adversely affect our business, results of operations and financial condition.

As we continue to expand internationally, we have become subject to telecommunications laws and regulations in the foreign countries where we offer our products. Internationally, we currently offer our products in over 180 countries.

Our international operations are subject to country-specific governmental regulation and related actions that have increased and may continue to increase our costs or impact our products and platform or prevent us from offering or providing our products in certain countries. Certain of our products may be used by customers located in countries where voice and other forms of IP communications may be illegal or require special licensing or in countries on a U.S. embargo list. Even where our products are reportedly illegal or become illegal or where users are located in an embargoed country, users in those countries may be able to continue to use our products in those countries notwithstanding the illegality or embargo. We may be subject to penalties or governmental action if consumers continue to use our products in countries where it is illegal to do so, and any such penalties or governmental action may be costly and may harm our business and damage our brand and reputation. We may be required to incur additional expenses to meet applicable international regulatory requirements or be required to discontinue those services if required by law or if we cannot or will not meet those requirements.

***If we are unable to effectively process local number and toll-free number portability provisioning in a timely manner or to obtain or retain direct inward dialing numbers and local or toll-free numbers, our business and results of operations may be adversely affected.***

We support local number and toll-free number portability, which allows our customers to transfer their existing phone numbers to us and thereby retain their existing phone numbers when subscribing to our voice products. Transferring existing numbers is a manual process that can take up to 15 business days or longer to complete. A new customer of our voice products must maintain both our voice product and the customer's existing phone service during the number transferring process. Any delay that we experience in transferring these numbers typically results from the fact that we depend on network service providers to transfer these numbers, a process that we do not control, and these network service providers may refuse or substantially delay the transfer of these numbers to us. Local number portability is considered an important feature by many potential customers, and if we fail to reduce any related delays, then we may experience increased difficulty in acquiring new customers.

In addition, our future success depends in part on our ability to procure large quantities of local and toll-free direct inward dialing numbers ("DIDs"), in the United States and foreign countries at a reasonable cost and without restrictions. Our ability to procure, distribute and retain DIDs depends on factors outside of our control, such as applicable regulations, the practices of network service providers that provide DIDs, such as offering DIDs with conditional minimum volume call level requirements, the cost of these DIDs and the level of overall competitive demand for new DIDs. Due to their limited availability, there are certain popular area code prefixes that we generally cannot obtain. Our inability to acquire or retain DIDs for our operations would make our voice and messaging products less attractive to potential customers in the affected local geographic areas. In addition, future growth in our customer base, together with growth in the customer bases of other providers of cloud communications, has increased, which increases our dependence on needing sufficiently large quantities of DIDs. It may become increasingly difficult to source larger quantities of DIDs as we scale and we may need to pay higher costs for DIDs, and DIDs may become subject to more stringent usage conditions. Any of the foregoing could adversely affect our business, results of operations and financial condition.

***We face a risk of litigation resulting from customer misuse of our software to send unauthorized text messages in violation of the Telephone Consumer Protection Act.***

The actual or perceived improper sending of text messages may subject us to potential risks, including liabilities or claims relating to consumer protection laws. For example, the Telephone Consumer Protection Act of 1991 restricts telemarketing and the use of automatic SMS text messages without proper consent. This has resulted in civil claims against our company and requests for information through third-party subpoenas. The scope and interpretation of the laws that are or may be applicable to the delivery of text messages are continuously evolving and developing. If we do not comply with these laws or regulations or if we become liable under these laws or regulations due to the failure of our customers to comply with these laws by obtaining proper consent, we could face direct liability.

***We may be subject to governmental export controls and economic sanctions regulations that could impair our ability to compete in international markets due to licensing requirements and could subject us to liability if we are not in compliance with applicable laws.***

Certain of our products and services may be subject to export control and economic sanctions regulations, including the U.S. Export Administration Regulations, U.S. Customs regulations and various economic and trade sanctions regulations administered by the U.S. Treasury Department's Office of Foreign Assets Controls. Exports of our products and the provision of our services must be made in compliance with these laws and regulations. Although we take precautions to prevent our products from being provided in violation of such laws, we are aware of previous exports of certain of our products to a small number of persons and organizations that are the subject of U.S. sanctions or located in countries or regions subject to U.S. sanctions. If we fail to comply with these laws and regulations, we and certain of our employees could be subject to substantial civil or criminal penalties, including: the possible loss of export privileges; fines, which may be imposed on us and responsible employees or managers; and, in extreme cases, the incarceration of responsible employees or managers. Obtaining the necessary authorizations, including any required license, for a particular deployment may be time-consuming, is not guaranteed and may result in the delay or loss of sales opportunities. In addition, changes in our products or services, or changes in applicable export or economic sanctions regulations may create delays in the introduction and deployment of our products and services in international markets, or, in some cases, prevent the export of our products or provision of our services to certain countries or end users. Any change in export or economic sanctions regulations, shift in the enforcement or scope of existing regulations, or change in the countries, governments, persons or technologies targeted by such regulations, could also result in decreased use of our products and services, or in our decreased ability to export our products or provide our services to existing or prospective customers with international operations. Any decreased use of our products and services or limitation on our ability to export our products and provide our services could adversely affect our business, results of operations and financial condition.

Further, we incorporate encryption technology into certain of our products. Various countries regulate the import of certain encryption technology, including through import permitting and licensing requirements, and have enacted laws that could limit our customers' ability to import our products into those countries. Encryption products and the underlying technology may also be subject to export control restrictions. Governmental regulation of encryption technology and regulation of exports of encryption products, or our failure to obtain required approval for our products, when applicable, could harm our international sales and adversely affect our revenue. Compliance with applicable regulatory requirements regarding the export of our products and provision of our services, including with respect to new releases of our products and services, may create delays in the introduction of our products and services in international markets, prevent our customers with international operations from deploying our products and using our services throughout their globally-distributed systems or, in some cases, prevent the export of our products or provision of our services to some countries altogether.

***We may have additional tax liabilities, which could harm our business, results of operations and financial condition.***

Significant judgments and estimates are required in determining our provision for income taxes and other tax liabilities. Our tax expense may be impacted, for example, if tax laws change or are clarified to our detriment or if tax authorities successfully challenge the tax positions that we take, such as, for example, positions relating to the arms-length pricing standards for our intercompany transactions and our state sales and use tax positions. In determining the adequacy of income taxes, we assess the likelihood of adverse outcomes that could result if our tax positions were challenged by the Internal Revenue Service ("IRS"), and other tax authorities. Should the IRS or other tax authorities assess additional taxes as a result of examinations, we may be required to record charges to operations that could adversely affect our results of operations and financial condition. We are currently in discussions with certain states regarding prior state sales taxes that we may owe. We have reserved \$20.9 million on our December 31, 2017 balance sheet for these tax payments. The actual exposure could differ materially from our current estimates, and if the actual payments we make to these and other states exceed the accrual in our balance sheet, our results of operations would be harmed.

***We could be subject to liability for historical and future sales, use and similar taxes, which could adversely affect our results of operations.***

We conduct operations in many tax jurisdictions throughout the United States. In many of these jurisdictions, non-income-based taxes, such as sales and use and telecommunications taxes, are assessed on our operations. We are subject to indirect taxes, and may be subject to certain other taxes, in some of these jurisdictions. Historically, we have not billed or collected these taxes and, in accordance with generally accepted accounting principles in the United States ("U.S. GAAP"), we have recorded a provision for our tax exposure in these jurisdictions when it is both probable that a liability has been incurred and the amount of the exposure can be reasonably estimated. These estimates include several key assumptions, including, but not limited to, the taxability of our products, the jurisdictions in which we believe we have nexus, and the sourcing of revenues to those jurisdictions. In the event these jurisdictions challenge our assumptions and analysis, our actual exposure could differ materially from our current estimates.

We may be subject to scrutiny from state tax authorities in various jurisdictions and may have additional exposure related to our historical operations. Furthermore, certain jurisdictions in which we do not collect such taxes may assert that such taxes are applicable, which could result in tax assessments, penalties and interest, and we may be required to collect such taxes in the future. Such tax assessments, penalties and interest or future requirements may adversely affect our business, results of operations and financial condition.

Effective March 2017, we began collecting telecommunications-based taxes from our customers in certain jurisdictions. Since then, we have added more jurisdictions where we collect these taxes and we expect to continue expanding the number of jurisdictions in which we will collect these taxes in the future. Some customers may question the incremental tax charges and some may seek to negotiate lower pricing from us, which could adversely affect our business, results of operations and financial condition.

***Our global operations and structure subject us to potentially adverse tax consequences.***

We generally conduct our global operations through subsidiaries and report our taxable income in various jurisdictions worldwide based upon our business operations in those jurisdictions. In particular, our intercompany relationships are subject to complex transfer pricing regulations administered by taxing authorities in various jurisdictions. Also, our tax expense could be affected depending on the applicability of withholding and other taxes (including withholding and indirect taxes on software

licenses and related intercompany transactions) under the tax laws of certain jurisdictions in which we have business operations. The relevant revenue and taxing authorities may disagree with positions we have taken generally, or our determinations as to the value of assets sold or acquired or income and expenses attributable to specific jurisdictions. If such a disagreement were to occur, and our position were not sustained, we could be required to pay additional taxes, interest and penalties, which could result in one-time tax charges, higher effective tax rates, reduced cash flows and lower overall profitability of our operations.

Certain government agencies in jurisdictions where we and our affiliates do business have had an extended focus on issues related to the taxation of multinational companies. In addition, the Organization for Economic Co-operation and Development is conducting a project focused on base erosion and profit shifting in international structures, which seeks to establish certain international standards for taxing the worldwide income of multinational companies. As a result of these developments, the tax laws of certain countries in which we and our affiliates do business could change on a prospective or retroactive basis, and any such changes could increase our liabilities for taxes, interest and penalties, and therefore could harm our business, cash flows, results of operations and financial position.

***Changes in the U.S. taxation of international business activities or the adoption of other tax reform policies could materially impact our business, results of operations and financial condition.***

Changes to U.S. tax laws that may be enacted in the future could impact the tax treatment of our foreign earnings. Due to the expansion of our international business activities, any changes in the U.S. taxation of such activities may increase our worldwide effective tax rate and adversely affect our business, results of operations and financial condition.

***If we experience excessive credit card or fraudulent activity, we could incur substantial costs.***

Most of our customers authorize us to bill their credit card accounts directly for service fees that we charge. If people pay for our services with stolen credit cards, we could incur substantial third-party vendor costs for which we may not be reimbursed. Further, our customers provide us with credit card billing information online, and we do not review the physical credit cards used in these transactions, which increases our risk of exposure to fraudulent activity. We also incur charges, which we refer to as chargebacks, from the credit card companies from claims that the customer did not authorize the credit card transaction to purchase our services. If the number of unauthorized credit card transactions becomes excessive, we could be assessed substantial fines for excess chargebacks and we could lose the right to accept credit cards for payment.

Our products may also be subject to fraudulent usage, including but not limited to revenue share fraud, domestic traffic pumping, subscription fraud, premium text message scams and other fraudulent schemes. Although our customers are required to set passwords or personal identification numbers to protect their accounts, third parties have in the past been, and may in the future be, able to access and use their accounts through fraudulent means. Furthermore, spammers attempt to use our products to send targeted and untargeted spam messages. We cannot be certain that our efforts to defeat spamming attacks will be successful in eliminating all spam messages from being sent using our platform. In addition, a cybersecurity breach of our customers' systems could result in exposure of their authentication credentials, unauthorized access to their accounts or fraudulent calls on their accounts, any of which could adversely affect our business, results of operations and financial condition.

***Unfavorable conditions in our industry or the global economy or reductions in spending on information technology and communications could adversely affect our business, results of operations and financial condition.***

Our results of operations may vary based on the impact of changes in our industry or the global economy on our customers. Our results of operations depend in part on demand for information technology and cloud communications. In addition, our revenue is dependent on the usage of our products, which in turn is influenced by the scale of business that our customers are conducting. To the extent that weak economic conditions result in a reduced volume of business for, and communications by, our customers and prospective customers, demand for, and use of, our products may decline. Furthermore, weak economic conditions may make it more difficult to collect on outstanding accounts receivable. Additionally, historically, we have generated the substantial majority of our revenue from small and medium-sized businesses, and we expect this to continue for the foreseeable future. Small and medium-sized business may be affected by economic downturns to a greater extent than enterprises, and typically have more limited financial resources, including capital borrowing capacity, than enterprises. If our customers reduce their use of our products, or prospective customers delay adoption or elect not to adopt our products, as a result of a weak economy, this could adversely affect our business, results of operations and financial condition.

***We may require additional capital to support our business, and this capital might not be available on acceptable terms, if at all.***

We intend to continue to make investments to support our business and may require additional funds. In particular, we may seek additional funds to develop new products and enhance our platform and existing products, expand our operations, including our sales and marketing organizations and our presence outside of the United States, improve our infrastructure or acquire complementary businesses, technologies, services, products and other assets. In addition, we may use a portion of our cash to satisfy tax withholding and remittance obligations related to outstanding restricted stock units. Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional funds through future issuances of equity or convertible debt securities, our stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our Class A and Class B common stock. Any debt financing that we may secure in the future could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities. We may not be able to obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth, scale our infrastructure, develop product enhancements and to respond to business challenges could be significantly impaired, and our business, results of operations and financial condition may be adversely affected.

***We face exposure to foreign currency exchange rate fluctuations, and such fluctuations could adversely affect our business, results of operations and financial condition.***

As our international operations expand, our exposure to the effects of fluctuations in currency exchange rates grows. While we have primarily transacted with customers and business partners in U.S. dollars, we have transacted with customers in Japan in Japanese Yen and in Europe in Euros and Swedish Kronas. We expect to significantly expand the number of transactions with customers that are denominated in foreign currencies in the future as we continue to expand our business internationally. We also incur expenses for some of our network service provider costs outside of the United States in local currencies and for employee compensation and other operating expenses at our non-U.S. locations

in the local currency for such locations. Fluctuations in the exchange rates between the U.S. dollar and other currencies could result in an increase to the U.S. dollar equivalent of such expenses.

In addition, our international subsidiaries maintain net assets that are denominated in currencies other than the functional operating currencies of these entities. As we continue to expand our international operations, we become more exposed to the effects of fluctuations in currency exchange rates. Accordingly, changes in the value of foreign currencies relative to the U.S. dollar can affect our results of operations due to transactional and translational remeasurements. As a result of such foreign currency exchange rate fluctuations, it could be more difficult to detect underlying trends in our business and results of operations. In addition, to the extent that fluctuations in currency exchange rates cause our results of operations to differ from our expectations or the expectations of our investors and securities analysts who follow our stock, the trading price of our Class A common stock could be adversely affected.

We do not currently maintain a program to hedge transactional exposures in foreign currencies. However, in the future, we may use derivative instruments, such as foreign currency forward and option contracts, to hedge certain exposures to fluctuations in foreign currency exchange rates. The use of such hedging activities may not offset any or more than a portion of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place. Moreover, the use of hedging instruments may introduce additional risks if we are unable to structure effective hedges with such instruments.

***Our ability to use our net operating losses to offset future taxable income may be subject to certain limitations.***

As of December 31, 2017, we had federal and state net operating loss carryforwards ("NOLs"), of \$229.3 million and \$159.6 million, respectively, due to prior period losses. In general, under Section 382 of the Internal Revenue Code of 1986, as amended ("Code"), a corporation that undergoes an "ownership change" (generally defined as a greater than 50-percentage-point cumulative change (by value) in the equity ownership of certain stockholders over a rolling three-year period) is subject to limitations on its ability to utilize its pre-change NOLs to offset post-change taxable income. Our existing NOLs may be subject to limitations arising from previous ownership changes, and if we undergo an ownership change in the future, our ability to utilize NOLs could be further limited by Section 382 of the Code. Future changes in our stock ownership, some of which may be outside of our control, could result in an ownership change under Section 382 of the Code.

On December 22, 2017, the U.S. government enacted new tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"). The Tax Act makes broad and complex changes to the U.S. tax code including changes to the uses and limitations of net operating losses. For example, while the Tax Act allows for federal net operating losses incurred in tax years beginning prior to December 31, 2017 to be carried forward indefinitely, the Tax Act also imposes an 80% limitation on the use of net operating losses that are generated in tax years beginning after December 31, 2017. Furthermore, our ability to utilize our net operating losses is conditioned upon our maintaining profitability in the future and generating U.S. federal taxable income. Since we do not know whether or when we will generate the U.S. federal taxable income necessary to utilize our remaining net operating losses, these net operating loss carryforwards could expire unused.

***If our estimates or judgments relating to our critical accounting policies prove to be incorrect, our results of operations could be adversely affected.***

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, as provided Part II,

Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations." The results of these estimates form the basis for making judgments about the carrying values of assets, liabilities and equity, and the amount of revenue and expenses that are not readily apparent from other sources. Significant assumptions and estimates used in preparing our consolidated financial statements include those related to revenue recognition, capitalized internal-use software development costs, legal contingencies, non-income taxes, business combination and valuation of goodwill and purchased intangible assets and stock-based compensation. Our results of operations may be adversely affected if our assumptions change or if actual circumstances differ from those in our assumptions, which could cause our results of operations to fall below the expectations of securities analysts and investors, resulting in a decline in the trading price of our Class A common stock.

***Changes in financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and affect our results of operations.***

A change in accounting standards or practices may have a significant effect on our results of operations and may even affect our reporting of transactions completed before the change is effective. New accounting pronouncements and varying interpretations of accounting pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business.

For example, in May 2014 the Financial Accounting Standards Board issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers (Topic 606) (ASU 2014-09)* that became effective on January 1, 2018. Based on our preliminary assessment, we do not believe there will be material changes to our revenue recognition and we are still in process of assessing the impact of adoption of the new standard on our accounting for sales commissions. Refer to Note 2 in the notes to our consolidated financial statements included elsewhere in this Annual Report on Form 10-K for additional information on the new guidance and its potential impact on us. Adoption of this standard and any difficulties in implementation of changes in accounting principles, including the ability to modify our accounting systems, could cause us to fail to meet our financial reporting obligations, which could result in regulatory discipline and harm investors' confidence in us.

***We have identified a material weakness in our internal controls related to the tracking of qualifying internal use software development costs eligible for capitalization; our failure to remediate the identified deficiency may cause us not to be able to accurately or timely report our financial condition or results of operations. If one or more of our internal controls over financial reporting are not effective, it could adversely affect investor confidence in us and our reputation, business or stock price.***

In reviewing the accounting for our software development activities, our management has concluded that our internal controls did not effectively track and categorize software development costs between period expenses and capitalization as a fixed asset in accordance with GAAP. As described under "Item 9A—Controls and Procedures," our management has concluded that the identified deficiencies constitute a material weakness in our internal control over financial reporting. Notwithstanding the foregoing, our management has concluded that the consolidated financial statements included in this Annual Report on Form 10-K fairly present, in all material respects, our financial position, results of operations and cash flows for the periods presented in this Annual Report on Form 10-K in conformity with GAAP.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or interim consolidated financial statements will not be prevented or detected on a timely basis. Although we plan to remediate the identified deficiencies as quickly as possible, we cannot, at this time, estimate when such remediation may occur, and our initiatives may not prove successful.

We cannot guarantee that we will not identify additional deficiencies in our internal control over financial reporting in the future. If we are unable to remediate the deficiencies or identify additional deficiencies in the future, our ability to record, process and report financial information accurately, and to prepare financial statements within the time periods specified by the rules and forms of the SEC, could be adversely affected. The occurrence of or failure to remediate a material weakness may adversely affect our reputation and business and the market price of our common stock and any other securities we may issue.

***If our goodwill or intangible assets become impaired, we may be required to record a significant charge to earnings.***

We review our intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Goodwill is required to be tested for impairment at least annually. As of December 31, 2017, we carried a net \$35.9 million of goodwill and intangible assets related to acquired businesses. An adverse change in market conditions, particularly if such change has the effect of changing one of our critical assumptions or estimates, could result in a change to the estimation of fair value that could result in an impairment charge to our goodwill or intangible assets. Any such charges may adversely affect our results of operations.

***Our business is subject to the risks of earthquakes, fire, floods and other natural catastrophic events, and to interruption by man-made problems such as power disruptions, computer viruses, data security breaches or terrorism.***

Our corporate headquarters are located in the San Francisco Bay Area, a region known for seismic activity. A significant natural disaster, such as an earthquake, fire or flood, occurring at our headquarters, at one of our other facilities or where a business partner is located could adversely affect our business, results of operations and financial condition. Further, if a natural disaster or man-made problem were to affect our network service providers or Internet service providers, this could adversely affect the ability of our customers to use our products and platform. In addition, natural disasters and acts of terrorism could cause disruptions in our or our customers' businesses, national economies or the world economy as a whole. We also rely on our network and third-party infrastructure and enterprise applications and internal technology systems for our engineering, sales and marketing, and operations activities. Although we maintain incident management and disaster response plans, in the event of a major disruption caused by a natural disaster or man-made problem, we may be unable to continue our operations and may endure system interruptions, reputational harm, delays in our development activities, lengthy interruptions in service, breaches of data security and loss of critical data, any of which could adversely affect our business, results of operations and financial condition.

In addition, computer malware, viruses and computer hacking, fraudulent use attempts and phishing attacks have become more prevalent in our industry, have occurred on our platform in the past and may occur on our platform in the future. Though it is difficult to determine what, if any, harm may directly result from any specific interruption or attack, any failure to maintain performance, reliability, security and availability of our products and technical infrastructure to the satisfaction of our users may harm our reputation and our ability to retain existing users and attract new users.

#### **Risks Related to Ownership of Our Class A Common Stock**

***The trading price of our Class A common stock has been volatile and may continue to be volatile, and you could lose all or part of your investment.***

Prior to our initial public offering in June 2016, there was no public market for shares of our Class A common stock. On June 23, 2016, we sold shares of our Class A common stock to the public at \$15.00 per share. From June 23, 2016, the date that our Class A common stock started trading on

## [Table of Contents](#)

the New York Stock Exchange, through January 31, 2018, the trading price of our Class A common stock has ranged from \$22.80 per share to \$70.96 per share. The trading price of our Class A common stock may continue to fluctuate significantly in response to numerous factors, many of which are beyond our control, including:

- price and volume fluctuations in the overall stock market from time to time;
- volatility in the trading prices and trading volumes of technology stocks;
- changes in operating performance and stock market valuations of other technology companies generally, or those in our industry in particular;
- sales of shares of our Class A common stock by us or our stockholders;
- failure of securities analysts to maintain coverage of us, changes in financial estimates by securities analysts who follow our company, or our failure to meet these estimates or the expectations of investors;
- the financial projections we may provide to the public, any changes in those projections or our failure to meet those projections;
- announcements by us or our competitors of new products or services;
- the public's reaction to our press releases, other public announcements and filings with the SEC;
- rumors and market speculation involving us or other companies in our industry;
- actual or anticipated changes in our results of operations or fluctuations in our results of operations;
- actual or anticipated developments in our business, our competitors' businesses or the competitive landscape generally;
- litigation involving us, our industry or both, or investigations by regulators into our operations or those of our competitors;
- developments or disputes concerning our intellectual property or other proprietary rights;
- announced or completed acquisitions of businesses, products, services or technologies by us or our competitors;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- changes in accounting standards, policies, guidelines, interpretations or principles;
- any significant change in our management; and
- general economic conditions and slow or negative growth of our markets.

In addition, in the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. This litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

***Substantial future sales of shares of our Class A common stock could cause the market price of our Class A common stock to decline.***

The market price of our Class A common stock could decline as a result of substantial sales of our Class A common stock, particularly sales by our directors, executive officers and significant

stockholders, or the perception in the market that holders of a large number of shares intend to sell their shares.

Additionally, the shares of Class A common stock subject to outstanding options and restricted stock unit awards under our equity incentive plans and the shares reserved for future issuance under our equity incentive plans will become eligible for sale in the public market upon issuance, subject to applicable insider trading policies. Certain holders of our Class A common stock have rights, subject to some conditions, to require us to file registration statements covering their shares or to include their shares in registration statements that we may file for our stockholders or ourselves.

***The dual class structure of our common stock has the effect of concentrating voting control with those stockholders who held our capital stock prior to the completion of our initial public offering, including our directors, executive officers and their respective affiliates. This limits or precludes your ability to influence corporate matters, including the election of directors, amendments of our organizational documents and any merger, consolidation, sale of all or substantially all of our assets, or other major corporate transaction requiring stockholder approval.***

Our Class B common stock has 10 votes per share, and our Class A common stock has one vote per share. As of December 31, 2017, our directors, executive officers and their respective affiliates, held in the aggregate 54.5% of the voting power of our capital stock. Because of the 10-to-one voting ratio between our Class B common stock and Class A common stock, the holders of our Class B common stock collectively will continue to control a majority of the combined voting power of our common stock and therefore be able to control all matters submitted to our stockholders for approval until the earlier of (i) June 28, 2023, or (ii) the date the holders of two-thirds of our Class B common stock elect to convert the Class B common stock to Class A common stock. This concentrated control limits or precludes your ability to influence corporate matters for the foreseeable future, including the election of directors, amendments of our organizational documents, and any merger, consolidation, sale of all or substantially all of our assets, or other major corporate transaction requiring stockholder approval. In addition, this may prevent or discourage unsolicited acquisition proposals or offers for our capital stock that you may feel are in your best interest as one of our stockholders.

Future transfers by holders of Class B common stock will generally result in those shares converting to Class A common stock, subject to limited exceptions, such as certain transfers effected for estate planning purposes. The conversion of Class B common stock to Class A common stock will have the effect, over time, of increasing the relative voting power of those holders of Class B common stock who retain their shares in the long term.

***If securities or industry analysts cease publishing research or reports about us, our business or our market, or if they change their recommendations regarding our Class A common stock adversely, the trading price of our Class A common stock and trading volume could decline.***

The trading market for our Class A common stock is influenced by the research and reports that securities or industry analysts may publish about us, our business, our market or our competitors. If any of the analysts who cover us change their recommendation regarding our Class A common stock adversely, or provide more favorable relative recommendations about our competitors, the trading price of our Class A common stock would likely decline. If any analyst who covers us were to cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause the trading price of our Class A common stock or trading volume to decline.

***Anti-takeover provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws, as well as provisions of Delaware law, could impair a takeover attempt.***

Our amended and restated certificate of incorporation, amended and restated bylaws and Delaware law contain provisions which could have the effect of rendering more difficult, delaying, or preventing an acquisition deemed undesirable by our board of directors. Among other things, our amended and restated certificate of incorporation and amended and restated bylaws include provisions:

- authorizing "blank check" preferred stock, which could be issued by our board of directors without stockholder approval and may contain voting, liquidation, dividend and other rights superior to our Class A and Class B common stock;
- limiting the liability of, and providing indemnification to, our directors and officers;
- limiting the ability of our stockholders to call and bring business before special meetings;
- providing for a dual class common stock structure in which holders of our Class B common stock have the ability to control the outcome of matters requiring stockholder approval, even if they own significantly less than a majority of the outstanding shares of our Class A and Class B common stock, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or its assets;
- providing that our board of directors is classified into three classes of directors with staggered three-year terms;
- prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders;
- requiring advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and for nominations of candidates for election to our board of directors; and
- controlling the procedures for the conduct and scheduling of board of directors and stockholder meetings.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation law, which prevents certain stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of at least two-thirds of our outstanding common stock not held by such 15% or greater stockholder.

Any provision of our amended and restated certificate of incorporation, amended and restated bylaws or Delaware law that has the effect of delaying, preventing or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock and could also affect the price that some investors are willing to pay for our Class A common stock.

***We do not expect to declare any dividends in the foreseeable future.***

We do not anticipate declaring any cash dividends to holders of our common stock in the foreseeable future. Consequently, investors may need to rely on sales of their Class A common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment. Investors seeking cash dividends should not purchase our Class A common stock.

**Item 1B. Unresolved Staff Comments**

None.

**Item 2. Properties**

Our headquarters is located in San Francisco, California, where we lease approximately 90,000 square feet of office space under a lease that expires in 2024. The lease payments range from \$0.4 million per month in the first 60 months to \$0.5 million per month thereafter. The lease included a tenant improvement allowance to cover construction of certain leasehold improvements for up to \$8.3 million. All of this amount had been collected from the landlord as of December 31, 2017. We secured our lease obligation with a \$7.4 million letter of credit, which we designated as restricted cash on our balance sheet as of December 31, 2016. As of December 31, 2017, the letter of credit and the restricted cash were reduced to \$5.5 million, as stipulated in the lease agreement and upon satisfaction of required conditions.

In addition to our headquarters, we lease space in Mountain View, Tallinn, Bogota, Madrid and Malmo as additional research and development offices. We also lease space for additional sales and marketing offices in New York, Dublin, London, Munich, Hong Kong and Singapore. Our Dublin office is our international headquarters.

We lease all of our facilities and do not own any real property. We intend to procure additional space in the future as we continue to add employees and expand geographically. We believe our facilities are adequate and suitable for our current needs and that, should it be needed, suitable additional or alternative space will be available to accommodate our operations.

**Item 3. Legal Proceedings**

On April 30, 2015, Telesign Corporation ("Telesign"), filed a lawsuit against us in the United States District Court, Central District of California ("Telesign I"). Telesign alleges that we are infringing three U.S. patents that it holds: U.S. Patent No. 8,462,920 ("920"), U.S. Patent No. 8,687,038 ("038") and U.S. Patent No. 7,945,034 ("034"). The patent infringement allegations in the lawsuit relate to our Account Security products, our two-factor authentication use case and an API tool to find information about a phone number. We petitioned the U.S. Patent and Trademark Office for *inter partes* review of the patents at issue. On July 8, 2016, the PTO denied our petition for *inter partes* review of the '920 and '038 patents and on June 26, 2017, it upheld the patentability of the '034 patent, adopting Telesign's narrow construction of its patent.

On March 28, 2016, Telesign filed a second lawsuit against us in the United States District Court, Central District of California ("Telesign II"), alleging infringement of U.S. Patent No. 9,300,792 ("792") held by Telesign. The '792 patent is in the same patent family as the '920 and '038 patents asserted in Telesign I. On March 8, 2017, in response to a petition by the Company, the PTO issued an order instituting the *inter partes* review for the '792 patent. A final written decision is expected by March 2018. On March 15, 2017, Twilio filed a motion to consolidate and stay related cases pending the conclusion of the '792 patent *inter partes* review, which the court granted. With respect to each of the patents asserted in Telesign I and Telesign II, the complaints seek, among other things, to enjoin us from allegedly infringing the patents along with damages for lost profits.

On December 1, 2016, we filed a patent infringement lawsuit against Telesign in the United States District Court, Northern District of California, alleging indirect infringement of United States Patent No. 8,306,021 ("021"), United States Patent No. 8,837,465 ("465"), United States Patent No. 8,755,376 ("376"), United States Patent No. 8,736,051 ("051"), United States Patent No. 8,737,962 ("962"), United States Patent No. 9,270,833 ("833"), and United States Patent No. 9,226,217 ("217"). Telesign filed a motion to dismiss the complaint on January 25, 2017. In two

orders, issued on March 31, 2017 and April 17, 2017, the court granted Telesign's motion to dismiss with respect to the '962, '833, '051 and '217 patents, but denied Telesign's motion to dismiss as to the '021, '465 and '376 patents. This litigation is currently ongoing.

On February 18, 2016, a putative class action complaint was filed in the Alameda County Superior Court in California, entitled Angela Flowers v. Twilio Inc. The complaint alleges that our products permit the interception, recording and disclosure of communications at a customer's request and are in violation of the California Invasion of Privacy Act. The complaint seeks injunctive relief as well as monetary damages. On May 27, 2016, we filed a demurrer to the complaint. On August 2, 2016, the court issued an order denying the demurrer in part and granted it in part, with leave to amend by August 18, 2016 to address any claims under California's Unfair Competition Law. The plaintiff opted not to amend the complaint. Following a period of discovery, the plaintiff filed a motion for class certification on September 20, 2017. On January 2, 2018, the court issued an order granting in part and denying in part the plaintiff's class certification motion. The court certified two classes of individuals who, during specified time periods, allegedly sent or received certain communications involving the accounts of three of our customers that were recorded. The court has not yet set a schedule for notice to potential class members, additional discovery, summary judgment motions, or trial.

We intend to vigorously defend ourselves against these lawsuits and believe we have meritorious defenses to each matter in which we are a defendant. However, litigation is inherently uncertain, and any judgment or injunctive relief entered against us or any adverse settlement could negatively affect our business, results of operations and financial condition.

In addition to the litigation discussed above, from time to time, we may be subject to legal actions and claims in the ordinary course of business. We have received, and may in the future continue to receive, claims from third parties asserting, among other things, infringement of their intellectual property rights. Future litigation may be necessary to defend ourselves, our partners and our customers by determining the scope, enforceability and validity of third-party proprietary rights, or to establish our proprietary rights. The results of any current or future litigation cannot be predicted with certainty, and regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources, and other factors.

**Item 4. *Mine Safety Disclosures.***

Not applicable.

**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Market Price of Our Class A Common Stock**

Our Class A common stock has been listed on the New York Stock Exchange under the symbol "TWLO" since June 23, 2016. Prior to that date, there was no public trading market for our Class A common stock. The following table sets forth for the periods indicated the high and low sale prices per share of our Class A common stock as reported on the New York Stock Exchange:

	<u>Low</u>	<u>High</u>
Fiscal Year 2017		
First Quarter	\$ 25.98	\$ 34.95
Second Quarter	\$ 22.80	\$ 34.45
Third Quarter	\$ 26.86	\$ 34.74
Fourth Quarter	\$ 23.54	\$ 33.07
Fiscal Year 2016		
Second Quarter (from June 23, 2016)	\$ 23.66	\$ 41.89
Third Quarter	\$ 33.07	\$ 70.96
Fourth Quarter	\$ 28.37	\$ 66.64

As of January 31, 2018, we had 128 holders of record of our Class A and Class B common stock. The actual number of stockholders is greater than this number of record holders and includes stockholders who are beneficial owners but whose shares are held in street name by brokers and other nominees.

**Dividend Policy**

We have never declared or paid any cash dividends on our capital stock. We intend to retain any future earnings and do not expect to pay any dividends in the foreseeable future.

**Stock Performance Graph**

*This performance graph shall not be deemed "soliciting material" or to be "filed" with the SEC for purposes of Section 18 of the Exchange Act, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any filing of Twilio Inc. under the Securities Act or the Exchange Act*

We have presented below the cumulative total return to our stockholders between June 23, 2016 (the date our Class A common stock commenced trading on the NYSE) through December 31, 2017 in comparison to the S&P 500 Index and S&P 500 Information Technology Index. All values assume a \$100 initial investment and data for the S&P 500 Index and S&P 500 Information Technology Index

assume reinvestment of dividends. The comparisons are based on historical data and are not indicative of, nor intended to forecast, the future performance of our Class A common stock.

**Recent Sales of Unregistered Securities and Use of Proceeds from Registered Securities**

**(a) Sales of Unregistered Securities**

In November 2017, Twilio.org donated 45,383 shares of unregistered Class A common stock to an independent DAF to further our philanthropic goals. The shares are "restricted securities" for purposes of Rule 144 under the Securities Act and the fair market value of these shares on the date of the donation was \$1.2 million. This amount is recorded as charitable contribution in the consolidated statement of operations included elsewhere in this Annual Report on Form 10-K.

**(b) Use of Proceeds**

In June 2016, we closed our initial public offering ("IPO"), in which we sold 11,500,000 shares of Class A common stock at a price to the public of \$15.00 per share, including shares sold in connection with the exercise of the underwriters' option to purchase additional shares. The offer and sale of all of the shares in the IPO were registered under the Securities Act pursuant to a registration statement on Form S-1 (File No. 333-211634), which was declared effective by the SEC on June 22, 2016. We raised \$155.5 million in net proceeds after deducting underwriting discounts and commissions of \$12.1 million and offering expenses of \$4.9 million. No payments were made by us to directors, officers or persons owning 10 percent or more of our capital stock or to their associates, or to our affiliates, other than payments in the ordinary course of business to officers for salaries. There has been no material change

in the planned use of proceeds from our IPO as described in our final prospectus filed with the SEC on June 23, 2016 pursuant to Rule 424(b). We invested the funds received in accordance with our board-approved investment policy, which provides for investments in obligations of the U.S. government, money market instruments, registered money market funds and corporate bonds. The managing underwriters of our IPO were Goldman, Sachs & Co. and J.P. Morgan Securities LLC.

In October 2016, we closed our follow-on public offering, in which we sold 1,691,222 shares of Class A common stock at a price to the public of \$40.00 per share, including shares sold in connection with the exercise of the underwriters' option to purchase additional shares. The offer and sale of all of the shares in the follow-on offering were registered under the Securities Act pursuant to a registration statement on Form S-1 (File No. 333-214034), which was declared effective by the SEC on October 20, 2016. We raised \$64.4 million in net proceeds after deducting underwriting discounts and commissions and offering expenses paid and payable by us. No payments were made by us to directors, officers or persons owning 10 percent or more of our capital stock or to their associates, or to our affiliates, other than payments in the ordinary course of business to officers for salaries. There has been no material change in the planned use of proceeds from our follow-on offering as described in our final prospectus filed with the SEC on October 21, 2016 pursuant to Rule 424(b). We invested the funds received in accordance with our board-approved investment policy, which provides for investments in obligations of the U.S. government, money market instruments, registered money market funds and corporate bonds. The managing underwriters of our follow-on offering were Goldman, Sachs & Co. and J.P. Morgan Securities LLC.

*(c) Issuer Purchases of Equity Securities*

None.

**Item 6. Selected Financial and Other Data**

We have derived the selected consolidated statements of operations data for the years ended December 31, 2017, 2016 and 2015 and the balance sheet data as of December 31, 2017 and 2016 from our audited consolidated financial statements included elsewhere in this Annual Report on Form 10-K. The selected consolidated statements of operations data for the years ended December 31, 2014 and 2013 and the consolidated balance sheet data as of December 31, 2015, 2014 and 2013 are derived from audited consolidated financial statements not included in this Annual Report on Form 10-K. Our historical results are not necessarily indicative of the results that may be expected in the future. The following selected consolidated financial and other data should be read in conjunction with Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations", and our consolidated financial statements and the related notes appearing in Item 8, "Financial Statements and

Supplementary Data", of this Annual Report on Form 10-K to fully understand factors that may affect the comparability of the information presented below.

**Non-GAAP Financial Measures**

We use the following non-GAAP financial information, collectively, to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that non-GAAP financial information, when taken collectively, may be helpful to investors because it provides consistency and comparability with past financial performance, facilitates period-to-period comparisons of results of operations, and assists in comparisons with other companies, many of which use similar non-GAAP financial information to supplement their GAAP results. Non-GAAP financial information is presented for supplemental informational purposes only, and should not be considered a substitute for financial information presented in accordance with generally accepted accounting principles, and may be different from similarly-titled non-GAAP measures used by other companies. Whenever we use a non-GAAP financial measure, a reconciliation is provided to the most closely applicable financial measure stated in accordance with generally accepted accounting principles. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures.

**Non-GAAP Gross Profit and Non-GAAP Gross Margin.** For the periods presented, we define non-GAAP gross profit and non-GAAP gross margin as GAAP gross profit and GAAP gross margin, respectively, adjusted to exclude stock-based compensation and amortization of acquired intangibles.

	Year Ended December 31,

## **Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

*The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this Annual Report on Form 10-K. In addition to historical financial information, the following discussion contains forward-looking statements that are based upon current plans, expectations and beliefs that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under Part I, Item 1A, "Risk Factors" in this Annual Report on Form 10-K. Our fiscal year ends on December 31.*

### **Overview**

We are the leader in the Cloud Communications Platform category. We enable developers to build, scale and operate real-time communications within their software applications via our simple-to-use Application Programming Interfaces ("APIs"). The power, flexibility, and reliability offered by our software building blocks empowers companies of virtually every shape and size to build world-class engagement into their customer experience.

Our platform consists of three layers: our Engagement Cloud, Programmable Communications Cloud and Super Network. Our Engagement Cloud software is a set of APIs that handles the higher level communication logic needed for nearly every type of customer engagement. These APIs are focused on the business challenges that a developer is looking to address, allowing our customers to more quickly and easily build better ways to engage with their customers throughout their journey. Our Programmable Communications Cloud software is a set of APIs that enables developers to embed voice, messaging and video capabilities into their applications. The Programmable Communications Cloud is designed to support almost all the fundamental ways humans communicate, unlocking innovators to address just about any communication market. The Super Network is our software layer that allows our customers' software to communicate with connected devices globally. It interconnects with communications networks around the world and continually analyzes data to optimize the quality and cost of communications that flow through our platform. The Super Network also contains a set of APIs that gives our customers access to more foundational components of our platform, like phone numbers.

As of December 31, 2017, our customers' applications that are embedded with our products could reach users via voice, messaging and video in nearly every country in the world, and our platform offered customers local telephone numbers in over 100 countries and text-to-speech functionality in 26 languages. We support our global business through 27 cloud data centers in nine regions around the world and have developed contractual relationships with network service providers globally.

Our business model is primarily focused on reaching and serving the needs of software developers, who we believe are becoming increasingly influential in technology decisions in a wide variety of companies. We call this approach our Business Model for Innovators, which empowers developers by reducing friction and upfront costs, encouraging experimentation, and enabling developers to grow as customers as their ideas succeed. We established and maintain our leadership position by engaging directly with, and cultivating, our developer community, which has led to the rapid adoption of our platform. We reach developers through community events and conferences, including our SIGNAL developer conferences, to demonstrate how every developer can create differentiated applications incorporating communications using our products.

Once developers are introduced to our platform, we provide them with a low friction trial experience. By accessing our easy-to-adopt APIs, extensive self-service documentation and customer support team, developers build our products into their applications and then test such applications through free trials. Once they have decided to use our products beyond the initial free trial period,

customers provide their credit card information and only pay for the actual usage of our products. Historically, we have acquired the substantial majority of our customers through this self-service model. As customers expand their usage of our platform, our relationships with them often evolve to include business leaders within their organizations. Once our customers reach a certain spending level with us, we support them with account executives or customer success advocates within our sales organization to ensure their satisfaction and expand their usage of our products.

When potential customers do not have the available developer resources to build their own applications, we refer them to our network of Solution Partners, who embed our products in their solutions, such as software for contact centers, sales force automation and marketing automation that they sell to other businesses.

We supplement our self-service model with a sales effort aimed at engaging larger potential customers, strategic leads and existing customers through a direct sales approach. We augment this sales effort with the Twilio Enterprise Plan, which provides capabilities for advanced security, access management and granular administration, and is targeted at the needs of enterprise scale customers. Our sales organization works with technical and business leaders who are seeking to leverage software to drive competitive differentiation. As we educate these leaders on the benefits of developing applications that incorporate our products to differentiate their business, they often consult with their developers regarding implementation. We believe that developers are often advocates for our products as a result of our developer-focused approach. Our sales organization includes sales development, inside sales, field sales, sales engineering and customer success personnel.

We generate the substantial majority of our revenue from customers based on their usage of our software products that they have incorporated into their applications. In addition, customers typically purchase one or more telephone numbers from us, for which we charge a monthly flat fee per number. Some customers also choose to purchase various levels of premium customer support for a monthly fee. Customers that register in our self-service model typically pay upfront via credit card and draw down their balance as they purchase or use our products. Most of our customers draw down their balance in the same month they pay up front and, as a result, our deferred revenue at any particular time is not a meaningful indicator of future revenue. As our customers' usage grows, some of our customers enter into contracts and are invoiced monthly in arrears. Many of these customer contracts have terms of 12 months and typically include some level of minimum revenue commitment. Most customers with minimum revenue commitment contracts generate a significant amount of revenue in excess of their minimum revenue commitment in any period. Historically, the aggregate minimum commitment revenue from customers with whom we have contracts has constituted a minority of our revenue in any period, and we expect this to continue in the future.

Our developer-focused products are delivered to customers and users through our Super Network, which uses software to optimize communications on our platform. We interconnect with communications networks globally to deliver our products, and therefore we have arrangements with network service providers in many regions throughout the world. Historically, a substantial majority of our cost of revenue has been network service provider fees. We continue to optimize our network service provider coverage and connectivity through continuous improvements in routing and sourcing in order to lower the usage expenses we incur for network service provider fees. As we benefit from our platform optimization efforts, we sometimes pass these savings on to customers in the form of lower usage prices on our products in an effort to drive increased usage and expand the reach and scale of our platform. In the near term, we intend to operate our business to expand the reach and scale of our platform and to grow our revenue, rather than to maximize our gross margins.

We have achieved significant growth in recent periods. For the years ended December 31, 2017, 2016 and 2015, our revenue was \$399.0 million, \$277.3 million and \$166.9 million, respectively. In 2017, 2016 and 2015, our 10 largest Active Customer Accounts generated an aggregate of 19%, 30% and

32%, respectively. For the years ended December 31, 2017, 2016 and 2015, among our 10 largest Active Customer Accounts we had three, three and two Variable Customer Accounts, respectively, representing 8%, 11% and 17%, respectively. For the years ended December 31, 2017, 2016 and 2015, our Base Revenue was \$365.5 million, \$245.5 million and \$136.9 million, respectively. We incurred a net loss of \$63.7 million, \$41.3 million and \$35.5 million, for the years ended December 31, 2017, 2016 and 2015, respectively. See the section titled "—Key Business Metrics—Base Revenue" for a discussion of Base Revenue.

### Key Business Metrics

	Year Ended December 31,		
	2017	2016	2015
Number of Active Customer Accounts ( <i>as of end date of period</i> )	48,979	36,606	25,347
Base Revenue ( <i>in thousands</i> )	\$ 365,490	\$ 245,548	\$ 136,851
<i>Base Revenue Growth Rate</i>	49%	79%	81%
Dollar-Based Net Expansion Rate	128%	161%	155%

**Number of Active Customer Accounts.** We believe that the number of our Active Customer Accounts is an important indicator of the growth of our business, the market acceptance of our platform and future revenue trends. We define an Active Customer Account at the end of any period as an individual account, as identified by a unique account identifier, for which we have recognized at least \$5 of revenue in the last month of the period. We believe that the use of our platform by our customers at or above the \$5 per month threshold is a stronger indicator of potential future engagement than trial usage of our platform or usage at levels below \$5 per month. A single organization may constitute multiple unique Active Customer Accounts if it has multiple account identifiers, each of which is treated as a separate Active Customer Account.

In the years ended December 31, 2017, 2016 and 2015, revenue from Active Customer Accounts represented over 99% of total revenue in each period.

**Base Revenue.** We monitor Base Revenue as one of the more reliable indicators of future revenue trends. Base Revenue consists of all revenue other than revenue from large Active Customer Accounts that have never entered into 12-month minimum revenue commitment contracts with us, which we refer to as Variable Customer Accounts. While almost all of our customer accounts exhibit some level of variability in the usage of our products, based on our experience, we believe that Variable Customer Accounts are more likely to have significant fluctuations in usage of our products from period to period, and therefore that revenue from Variable Customer Accounts may also fluctuate significantly from period to period. This behavior is best evidenced by the decision of such customers not to enter into contracts with us that contain minimum revenue commitments, even though they may spend significant amounts on the use of our products and they may be foregoing more favorable terms often available to customers that enter into committed contracts with us. This variability adversely affects our ability to rely upon revenue from Variable Customer Accounts when analyzing expected trends in future revenue.

For historical periods through March 31, 2016, we defined a Variable Customer Account as an Active Customer Account that (i) had never signed a minimum revenue commitment contract with us for a term of at least 12 months and (ii) had met or exceeded 1% of our revenue in any quarter in the periods presented through March 31, 2016. To allow for consistent period-to-period comparisons, in the event a customer account qualified as a Variable Customer Account as of March 31, 2016, or a previously Variable Customer Account ceased to be an Active Customer Account as of such date, we included such customer account as a Variable Customer Account in all periods presented. For reporting

periods starting with the three months ended June 30, 2016, we define a Variable Customer Account as a customer account that (a) has been categorized as a Variable Customer Account in any prior quarter, as well as (b) any new customer account that (i) is with a customer that has never signed a minimum revenue commitment contract with us for a term of at least 12 months and (ii) meets or exceeds 1% of our revenue in a quarter. Once a customer account is deemed to be a Variable Customer Account in any period, it remains a Variable Customer Account in subsequent periods unless such customer enters into a minimum revenue commitment contract with us for a term of at least 12 months.

In the years ended December 31, 2017, 2016 and 2015, we had six, eight and nine Variable Customer Accounts, which represented 8%, 11% and 18% , respectively, of our total revenue.

**Dollar-Based Net Expansion Rate.** Our ability to drive growth and generate incremental revenue depends, in part, on our ability to maintain and grow our relationships with existing Active Customer Accounts and to increase their use of the platform. An important way in which we track our performance in this area is by measuring the Dollar-Based Net Expansion Rate for our Active Customer Accounts, other than our Variable Customer Accounts. Our Dollar-Based Net Expansion Rate increases when such Active Customer Accounts increase usage of a product, extend usage of a product to new applications or adopt a new product. Our Dollar-Based Net Expansion Rate decreases when such Active Customer Accounts cease or reduce usage of a product or when we lower usage prices on a product. As our customers grow their businesses and extend the use of our platform, they sometimes create multiple customer accounts with us for operational or other reasons. As such, for reporting periods starting with the three months ended December 31, 2016, when we identify a significant customer organization (defined as a single customer organization generating more than 1% of our revenue in a quarterly reporting period) that has created a new Active Customer Account, this new Active Customer Account is tied to, and revenue from this new Active Customer Account is included with, the original Active Customer Account for the purposes of calculating this metric. We believe measuring our Dollar-Based Net Expansion Rate on revenue generated from our Active Customer Accounts, other than our Variable Customer Accounts, provides a more meaningful indication of the performance of our efforts to increase revenue from existing customers.

Our Dollar-Based Net Expansion Rate compares the revenue from Active Customer Accounts, other than Variable Customer Accounts, in a quarter to the same quarter in the prior year. To calculate the Dollar-Based Net Expansion Rate, we first identify the cohort of Active Customer Accounts, other than Variable Customer Accounts, that were Active Customer Accounts in the same quarter of the prior year. The Dollar-Based Net Expansion Rate is the quotient obtained by dividing the revenue generated from that cohort in a quarter, by the revenue generated from that same cohort in the corresponding quarter in the prior year. When we calculate Dollar-Based Net Expansion Rate for periods longer than one quarter, we use the average of the applicable quarterly Dollar-Based Net Expansion Rates for each of the quarters in such period.

#### ***Net Loss Carryforwards***

At December 31, 2017, we had federal and state net operating loss carryforwards of approximately \$229.3 million and \$159.6 million, respectively, and federal and state tax credits of approximately \$12.6 million and \$11.0 million, respectively. If not utilized, the federal and state loss carryforwards will expire at various dates beginning in 2029 and 2026, respectively, and the federal tax credits will expire at various dates beginning in 2029. The state tax credits can be carried forward indefinitely. At present, we believe that it is more likely than not that the federal and state net operating loss and credit carryforwards will not be realized. Accordingly, a full valuation allowance has been established for these tax attributes, as well as the rest of the federal and state deferred tax assets.

### ***Acquisitions***

In February 2017, we acquired Beepsend, AB, a messaging provider based in Sweden, specializing in messaging and SMS solutions. The purchase price was \$23.0 million in cash, of which \$5.0 million was placed into escrow. The escrow continues for 18 months after the transaction closing date and may be extended under certain circumstances. Additionally, \$2.0 million of the purchase price was deposited into a separate escrow that will be released to certain employees in February 2018 and 2019, provided certain conditions are met.

In November 2016, we acquired certain assets of Tikal Technologies S.L., a Spanish corporation, behind its Kurento Open Source Project, consisting of proprietary WebRTC media processing technologies, certain licenses, patents and trademarks and employee relationships behind the WebRTC technology. The purchase price consisted of \$8.5 million in cash, of which \$1.5 million was placed into escrow. The escrow continues for 24 months and 10 days from the acquisition date and may be extended under certain circumstances.

### ***Stock Repurchase***

On August 21, 2015, we repurchased an aggregate of 365,916 shares of Series A preferred stock and Series B preferred stock from certain preferred stockholders, and repurchased an aggregate of 1,869,156 shares of common stock from certain current and former employees, for \$22.8 million in cash, which transaction we refer to as the 2015 Repurchase. The 2015 Repurchase was conducted at a price in excess of the fair value of our common stock at the date of repurchase. No special rights or privileges were conveyed to the employees and former employees. However, not all employees were invited to participate in the 2015 Repurchase. We recorded a compensation expense in the amount of \$2.0 million, which represented the excess of the common stock repurchase price above the fair value of the common stock on the date of repurchase. The excess of the preferred stock repurchase price above the carrying value of the preferred stock was recorded as a deemed dividend in the year ended December 31, 2015. We retired the shares repurchased in the 2015 Repurchase as of August 21, 2015.

## **Key Components of Statements of Operations**

**Revenue.** We derive our revenue primarily from usage-based fees earned from customers using the software products within our Engagement Cloud and Programmable Communications Cloud. These usage-based software products include offerings, such as Programmable Voice, Programmable Messaging and Programmable Video. Some examples of the usage-based fees for which we charge include minutes of call duration activity for our Programmable Voice products, number of text messages sent or received using our Programmable Messaging products and number of authentications for our Account Security products. In 2017, 2016 and 2015, we generated 83%, 83% and 79% of our revenue, respectively, from usage-based fees. We also earn monthly flat fees from certain fee-based products, such as telephone numbers and customer support.

Customers typically pay upfront via credit card in monthly prepaid amounts and draw down their balances as they purchase or use our products. As customers grow their usage of our products they automatically receive tiered usage discounts. Our larger customers often enter into contracts, for at least 12 months, which contain minimum revenue commitments, which may contain more favorable pricing. Customers on such contracts typically are invoiced monthly in arrears for products used.

Amounts that have been charged via credit card or invoiced are recorded in accounts receivable and in revenue or deferred revenue, depending on whether the revenue recognition criteria have been met. Given that our credit card prepayment amounts tend to be approximately equal to our credit card consumption amounts in each period, and that we do not have many invoiced customers on pre-payment contract terms, our deferred revenue at any particular time is not a meaningful indicator of future revenue.

We define U.S. revenue as revenue from customers with IP addresses at the time of registration in the United States, and we define international revenue as revenue from customers with IP addresses at the time of registration outside of the United States.

**Cost of Revenue and Gross Margin.** Cost of revenue consists primarily of fees paid to network service providers. Cost of revenue also includes cloud infrastructure fees, personnel costs, such as salaries and stock-based compensation for our customer support employees, and non-personnel costs, such as amortization of capitalized internal use software development costs. Our arrangements with network service providers require us to pay fees based on the volume of phone calls initiated or text messages sent, as well as the number of telephone numbers acquired by us to service our customers. Our arrangements with our cloud infrastructure provider require us to pay fees based on our server capacity consumption.

Our gross margin has been and will continue to be affected by a number of factors, including the timing and extent of our investments in our operations, our ability to manage our network service provider and cloud infrastructure-related fees, the mix of U.S. revenue compared to international revenue, the timing of amortization of capitalized software development costs and the extent to which we periodically choose to pass on our cost savings from platform optimization efforts to our customers in the form of lower usage prices.

**Operating Expenses.** The most significant components of operating expenses are personnel costs, which consist of salaries, benefits, bonuses, stock-based compensation and compensation expenses related to stock repurchases from employees. We also incur other non-personnel costs related to our general overhead expenses. We expect that our operating costs will increase in absolute dollars.

**Research and Development.** Research and development expenses consist primarily of personnel costs, outsourced engineering services, cloud infrastructure fees for staging and development, amortization of capitalized internal use software development costs and an allocation of our general overhead expenses. We capitalize the portion of our software development costs that meets the criteria for capitalization.

We continue to focus our research and development efforts on adding new features and products, including new use cases, improving our platform and increasing the functionality of our existing products.

**Sales and Marketing.** Sales and marketing expenses consist primarily of personnel costs, including commissions for our sales employees. Sales and marketing expenses also include expenditures related to advertising, marketing, our brand awareness activities and developer evangelism, costs related to our SIGNAL developer conferences, credit card processing fees, professional services fees and an allocation of our general overhead expenses.

We focus our sales and marketing efforts on generating awareness of our company, platform and products through our developer evangelist team and self-service model, creating sales leads and establishing and promoting our brand, both domestically and internationally. We plan to continue investing in sales and marketing by increasing our sales and marketing headcount, supplementing our self-service model with an enterprise sales approach, expanding our sales channels, driving our go-to-market strategies, building our brand awareness and sponsoring additional marketing events.

**General and Administrative.** General and administrative expenses consist primarily of personnel costs for our accounting, finance, legal, human resources and administrative support personnel and executives. General and administrative expenses also include costs related to business acquisitions, legal and other professional services fees, sales and other taxes, depreciation and amortization and an allocation of our general overhead expenses. We expect that we will incur costs associated with

supporting the growth of our business and to meet the increased compliance requirements associated with both our international expansion and our transition to, and operation as, a public company.

Our general and administrative expenses include a significant amount of sales and other taxes to which we are subject based on the manner we sell and deliver our products. Prior to March 2017, we did not collect such taxes from our customers and recorded such taxes as general and administrative expenses. Effective March 2017, we began collecting these taxes from customers in certain jurisdictions and added more jurisdictions throughout 2017 where we are now collecting these taxes. We continue expanding the number of jurisdictions where we will be collecting these taxes in the future. We expect that these expenses will decline in future years as we continue collecting these taxes from our customers in more jurisdictions, which would reduce our rate of ongoing accrual.

**Provision for Income Taxes.** Our income tax provision or benefit for interim periods is determined using an estimate of our annual effective tax rate, adjusted for discrete items occurring in the quarter. The primary difference between our effective tax rate and the federal statutory rate relates to the net operating losses in jurisdictions with a valuation allowance or a zero tax rate.

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"). The Tax Act makes broad and complex changes to the U.S. tax code including, but not limited to, (1) reducing the U.S. federal corporate tax rate from 35 percent to 21 percent; (2) requiring companies to pay a one-time transition tax on certain unrepatriated earnings of foreign subsidiaries; (3) generally eliminating U.S. federal income taxes on dividends from foreign subsidiaries; (4) requiring a current inclusion in U.S. federal taxable income of certain earnings of controlled foreign corporations; (5) eliminating the corporate alternative minimum tax ("AMT") and changing how existing AMT credits can be realized; (6) creating the base erosion anti-abuse tax ("BEAT"), a new minimum tax; (7) creating a new limitation on deductible interest expense; and (8) changing rules related to uses and limitations of net operating loss carryforwards created in tax years beginning after December 31, 2017.

We remeasured certain deferred tax assets and liabilities based on rates at which they are expected to reverse in the future, which is generally 21%. The rate reduction would generally take effect on January 1, 2018. Consequently, any changes in the U.S. corporate income tax rate will impact the carrying value of our deferred tax assets. Under the new corporate income tax rate of 21%, U.S. federal and state deferred tax assets will decrease by approximately \$28 million and the valuation allowance will decrease by approximately \$28 million. Due to the valuation allowance on the deferred tax assets, the provisional amount recorded related to the remeasurement was zero.

## Results of Operations

The following tables set forth our results of operations for the periods presented and as a percentage of our total revenue for those periods. The period-to-period comparison of our historical results are not necessarily indicative of the results that may be expected in the future.

**Comparison of the Fiscal Years Ended December 31, 2017, 2016 and 2015****Revenue**

	Year Ended December 31,			2016 to 2017 Change	2015 to 2016 Change		
	2017	2016	2015				
	(Dollars in thousands)						
Base revenue	\$ 365,490	\$ 245,548	\$ 136,851	\$ 119,942	49%	\$ 108,697	79%
Variable revenue	33,530	31,787	30,068	1,743	5%	1,719	6%
Total revenue	\$ 399,020	\$ 277,335	\$ 166,919	\$ 121,685	44%	\$ 110,416	66%

**2017 Compared to 2016**

In 2017, Base Revenue increased by \$120.0 million, or 49%, compared to 2016, and represented 92% and 89% of total revenue in 2017 and 2016, respectively. This increase was primarily attributable to an increase in the usage of all our products, particularly our Programmable Messaging products and Programmable Voice products, and the adoption of additional products by our existing customers. This increase was partially offset by pricing decreases that we have implemented over time in the form of lower usage prices, in an effort to increase the reach and scale of our platform. The changes in usage and price in 2017 were reflected in our Dollar-Based Net Expansion Rate of 128%. The increase in usage was also attributable to a 34% increase in the number of Active Customer Accounts, from 36,606 as of December 31, 2016 to 48,979 as of December 31, 2017. Revenue from Uber, our largest Base Customer, decreased in 2017, due to a combination of product usage decreases and certain price adjustments that were made by us as a result of Uber's high volume growth. Accordingly, we expect the year-over-year decline in our revenue from Uber to continue to negatively impact our revenue growth rates and our Dollar-Based Net Expansion Rate for upcoming periods.

In 2017, Variable Revenue increased by \$1.7 million, or 5%, compared to 2016, and represented 8% and 11% of total revenue in 2017 and 2016, respectively. This increase was primarily attributable to the increase in the usage of products by our existing Variable Customer Accounts, partially offset by the decrease in number of Variable Customer Accounts from eight to six.

U.S. revenue and international revenue represented \$308.6 million, or 77%, and \$90.4 million, or 23%, respectively, of total revenue in 2017, compared to \$233.9 million, or 84%, and \$43.4 million, or 16%, respectively, of total revenue in 2016. The increase in international revenue was attributable to the growth in usage of our products, particularly our Programmable Messaging products and Programmable Voice products, by our existing international Active Customer Accounts; a 39% increase in the number of international Active Customer Accounts, excluding the impact from our Beepsend acquisition, driven in part by our focus on expanding our sales to customers outside of the United States; and our recent acquisition. We opened one new office outside of the United States in 2017.

**2016 Compared to 2015**

In 2016, Base Revenue increased by \$108.7 million, or 79%, compared to 2015, and represented 89% and 82% of total revenue in 2016 and 2015, respectively. This increase was primarily attributable to an increase in the usage of all our products, particularly our Programmable Messaging products and Programmable Voice products, and the adoption of additional products by our existing customers. This increase was partially offset by pricing decreases that we have implemented over time for our customers in the form of lower usage prices in an effort to increase the reach and scale of our platform. The changes in usage and price in 2016 were reflected in our Dollar-Based Net Expansion Rate of 161%. The increase in usage was also attributable to a 44% increase in the number of Active Customer Accounts, from 25,347 as of December 31, 2015 to 36,606 as of December 31, 2016.

[Table of Contents](#)

In 2016, Variable Revenue increased by \$1.7 million, or 6%, compared to 2015, and represented 11% and 18% of total revenue in 2016 and 2015, respectively. This increase was primarily attributable to the increase in the usage of products by our existing Variable Customer Accounts, partially offset by the decrease in number of Variable Customer Accounts from nine to eight.

U.S. revenue and international revenue represented \$233.9 million, or 84%, and \$43.4 million, or 16%, respectively, of total revenue in 2016, compared to \$143.1 million, or 86%, and \$23.8 million, or 14%, respectively, of total revenue in 2015. The increase in international revenue in absolute dollars and as a percentage of total revenue was attributable to the growth in usage of our products, particularly our Programmable Messaging products and Programmable Voice products, by our existing international Active Customer Accounts, and to a 61% increase in the number of international Active Customer Accounts, driven in part by our focus on expanding our sales to customers outside of the United States. We opened one office outside of the United States in 2016.

### **Cost of Revenue and Gross Margin**

	Year Ended December 31,			2016 to 2017 Change	2015 to 2016 Change
	2017	2016	2015		
	(Dollars in thousands)				
Cost of revenue	\$ 182,895	\$ 120,520	\$ 74,454	\$ 62,375	52%
Gross margin	54%	57%	55%		

#### *2017 Compared to 2016*

In 2017, cost of revenue increased by \$62.4 million, or 52%, compared to 2016. The increase in cost of revenue was primarily attributable to a \$51.3 million increase in network service providers' costs, a \$4.8 million increase in cloud infrastructure fees to support the growth in usage of our products and a \$5.5 million increase in amortization expense for internal use software.

In 2017, gross margin declined primarily as a result of an increasing mix of international product usage and certain price adjustments that were made by us as a result of Uber's high volume growth.

#### *2016 Compared to 2015*

In 2016, cost of revenue increased by \$46.1 million, or 62%, compared to 2015. The increase in cost of revenue was primarily attributable to a \$40.0 million increase in network service providers' costs, a \$2.8 million increase in cloud infrastructure fees to support the growth in usage of our products and a \$1.9 million increase in amortization expense for internal use software.

In 2016, gross margin improved primarily as a result of cost savings from our continued platform optimization efforts, along with changes in our product and geographic mix.

### **Operating Expenses**

	Year Ended December 31,			2016 to 2017 Change	2015 to 2016 Change
	2017	2016	2015		
	(Dollars in thousands)				
Research and development	\$ 120,739	\$ 77,926	\$ 42,559	\$ 42,813	55%
Sales and marketing	100,669	65,267	49,308	35,402	54%
General and administrative	59,619	51,077	35,991	8,542	17%
Charitable contribution	1,172	3,860	—	(2,688)	(70)%
Total operating expenses	\$ 282,199	\$ 198,130	\$ 127,858	\$ 84,069	42%

*2017 Compared to 2016*

In 2017, research and development expenses increased by \$42.8 million, or 55%, compared to 2016. The increase was primarily attributable to a \$30.3 million increase in personnel costs, net of a \$7.7 million increase in capitalized software development costs, largely as a result of a 37% average increase of our research and development headcount, as we continued to focus on enhancing our existing products and introducing new products, as well as enhancing product management and other technical functions. The increase was also due in part to a \$3.0 million increase in software subscription expense, a \$2.7 million increase in cloud infrastructure fees to support the staging and development of our products, a \$1.5 million increase in outsourced engineering services, a \$1.4 million increase in amortization expense related to our internal-use software and the intangible assets acquired through business combinations, a \$0.7 million increase related to employee travel and a \$0.7 million increase in professional fees.

In 2017, sales and marketing expenses increased by \$35.4 million, or 54%, compared to 2016. The increase was primarily attributable to a \$25.5 million increase in personnel costs, largely as a result of a 42% average increase in sales and marketing headcount as we continued to expand our sales efforts in the United States and internationally, a \$1.9 million increase in credit card processing fees due to increased volumes, a \$1.4 million increase in advertising expenses, a \$1.2 million increase in professional services fees, a \$1.2 million increase in employee travel expenses, a \$1.1 million increase in software subscription expense, a \$1.2 million increase in depreciation and amortization and a \$0.4 million increase related to our SIGNAL developer conferences.

In 2017, general and administrative expenses increased by \$8.5 million, or 17%, compared to 2016. The increase was primarily attributable to a \$16.1 million increase in personnel costs, largely as a result of a 33% average increase in general and administrative headcount to support the growth of our business domestically and internationally, a \$4.3 million increase in professional services fees primarily related to our operations as a public company and our on-going litigation matters, a \$2.6 million increase in facilities and insurance costs, a \$0.5 million increase related to software licenses. These increases were partially offset by the release of \$12.6 million tax liability upon certain obligation settlements and estimate revisions, discussed in detail in Note 10 (d) of the consolidated financial statements included elsewhere in this Annual Report on Form 10-K, and a \$3.4 million decrease in the state and other taxes expense as we began collecting those taxes in certain jurisdictions starting in March 2017, which allowed us to reduce the ongoing rate of accrual.

In 2017, Twilio.org donated 45,383 shares of Class A common stock with a value of \$1.2 million to an independent Donor Advised Fund to further our philanthropic goals.

*2016 Compared to 2015*

In 2016, research and development expenses increased by \$35.4 million, or 83%, compared to 2015. The increase was primarily attributable to a \$27.3 million increase in personnel costs, net of a \$4.4 million increase in capitalized software development costs, largely as a result of a 61% average increase of our research and development headcount, as we continued to focus on enhancing our existing products and introducing new products, as well as enhancing product management and other technical functions. The increase was also due in part to a \$1.9 million increase related to the facilities rent expense in connection with our new office lease in San Francisco, California, a \$1.7 million increase in cloud infrastructure fees to support the staging and development of our products, a \$1.2 million increase in amortization expense related to our internal-use software and the intangible assets acquired through business combinations and a \$1.2 million increase in software subscription expense. These increases were partially offset by a \$0.8 million decrease in compensation expense related to the 2015 Repurchase, which was not incurred in 2016.

In 2016, sales and marketing expenses increased by \$16.0 million, or 32%, compared to 2015. The increase was primarily attributable to a \$9.4 million increase in personnel costs, largely as a result of a 35% average increase in sales and marketing headcount as we continued to expand our sales efforts in the United States and internationally, a \$1.6 million increase in credit card processing fees due to increased volumes, a \$0.8 million increase in the software subscription expense, a \$0.8 million increase in the facilities rent expense primarily due to our new office lease in San Francisco, California, a \$0.7 million increase related to our SIGNAL developer conferences, a \$0.6 million increase in advertising expenses, a \$0.6 million increase in professional services fees and a \$0.6 million increase in employee travel expenses.

In 2016, general and administrative expenses increased by \$15.1 million, or 42%, compared to 2015. The increase was primarily attributable to a \$7.7 million increase in personnel costs, largely as a result of a 41% average increase in general and administrative headcount to support the growth of our business and becoming a publicly-traded company, a \$4.9 million increase in sales and other taxes, a \$1.4 million increase in depreciation, amortization and facilities rent primarily due to our new office lease in San Francisco, California and a \$0.9 million increase in professional service fees unrelated to business combinations. These increases were partially offset by a \$1.1 million decrease in compensation expense related to the 2015 Repurchase, which was not incurred in 2016, a \$0.8 million decrease related to the partial reversal of previously recorded tax liability upon settlement of the obligation and a \$0.7 million decrease in professional services fees related to business combinations.

In 2016, of the net proceeds we received in our follow-on public offering, \$3.9 million was reserved to fund and support the operations of Twilio.org. In December 2016, Twilio.org donated the full \$3.9 million proceeds into an independent Donor Advised Fund to further our philanthropic goals.

### **Quarterly Results of Operations**

The following tables set forth our unaudited quarterly statements of operations data for each of the eight quarters ended December 31, 2017, as well as the percentage that each line item represents of our revenue for each quarter presented. The information for each quarter has been prepared on a basis consistent with our audited consolidated financial statements included elsewhere in this Annual Report on Form 10-K, and reflect, in the opinion of management, all adjustments of a normal, recurring nature that are necessary for a fair presentation of the financial information contained in those statements. Our historical results are not necessarily indicative of the results that may be

expected in the future. The following quarterly financial data should be read in conjunction with our audited consolidated financial statements included elsewhere in this Annual Report on Form 10-K.

### Quarterly Trends in Revenue and Gross Margin

Our quarterly revenue increased in each period presented primarily due to an increase in the usage of products as well as the adoption of additional products by our existing customers as evidenced by our Dollar-Based Net Expansion Rates, and an increase in our new customers. Our gross margin improved starting with the second quarter of 2016 due to continued platform optimization, further improved in the fourth quarter of 2016 primarily as a result of cost savings from our continued platform optimization efforts, along with changes in our product and geographic mix. In the first half of 2017, an increasing mix of international product usage offset the continued platform optimization and drove a modest decline in gross margin percentage. The trends continued in the second half of 2017, and further gross margin declines were driven by certain price adjustments that were made by us as a result of Uber's high volume growth.

### Quarterly Trends in Operating Expenses

Our operating expenses have generally increased sequentially as a result of our growth, primarily related to increased personnel costs to support our expanded operations, our continued investment in our products, our operations as a public company and ongoing litigations.

The sales and marketing expenses included \$3.2 million and \$3.0 million of expenses related to our SIGNAL developer conference in the second quarter of 2017 and 2016, respectively.

In 2016 and the first quarter of 2017, our general and administrative expenses included a significant amount of sales and other taxes to which we are subject. Prior to March 2017, we had not billed nor collected these taxes from our customers, and, accordingly, recorded a provision for these taxes, based on several key assumptions, when our liability was probable and the amount could be reasonably estimated. Starting in March 2017, we began collecting these taxes in certain jurisdictions and have been increasing the number of jurisdictions where these taxes are now being collected by us. In the second quarter of 2017, we revised certain key assumptions driving prior estimates based on settlements reached with various states indicating that certain revisions to these assumptions were appropriate in that period. These revisions resulted in a reversal of \$12.2 million of previously accrued liability, which caused a significant decrease in our general and administrative expenses in the second quarter 2017 and resulted in a reduced rate of ongoing accrual in the third and fourth quarters of 2017.

## Liquidity and Capital Resources

To date, our principal sources of liquidity have been the net proceeds of \$155.5 million and \$64.4 million, after deducting underwriting discounts and offering expenses paid or payable by us, from our initial public offering in June 2016 and our follow-on public offering in October 2016, respectively; the net proceeds we received through private sales of equity securities, as well as the payments received from customers using our products. From our inception through March 31, 2016, we completed several rounds of equity financing through the sale of our convertible preferred stock for total net proceeds of \$237.1 million. We believe that our cash, cash equivalents and marketable securities balances, as well as the cash flows generated by our operations will be sufficient to satisfy our anticipated cash needs for working capital and capital expenditures for at least the next 12 months. However, our belief may prove to be incorrect, and we could utilize our available financial resources sooner than we currently expect. Our future capital requirements and the adequacy of available funds will depend on many factors, including those set forth in Part I, Item 1A, "Risk Factors." We may be required to seek additional equity or debt financing in order to meet these future capital requirements. In the event that additional financing is required from outside sources, we may not be able to raise it on terms acceptable to us, or at all. If we are unable to raise additional capital when desired, our business, results of operations and financial condition would be adversely affected.

### *Credit Facility*

In March 2015, we entered into a \$15.0 million revolving line of credit with Silicon Valley Bank which expired in March 2017 and was not renewed. We never borrowed under this credit facility.

### *Cash Flows*

The following table summarizes our cash flows for the periods indicated (in thousands):

	<u>Year Ended December 31,</u>		
	<u>2017</u>	<u>2016</u>	<u>2015</u>
Cash provided by (used in) operating activities	\$ (3,260)	\$ 10,091	\$ (18,762)
Cash used in investing activities	(223,630)	(42,425)	(12,379)
Cash provided by financing activities	36,437	229,164	107,349
Effect of exchange rate changes on cash and cash equivalents	74	—	—
Net increase (decrease) in cash and cash equivalents	<u>\$ (190,379)</u>	<u>\$ 196,830</u>	<u>\$ 76,208</u>

### *Cash Flows from Operating Activities*

In 2017, cash used in operating activities consisted primarily of our net loss of \$63.7 million adjusted for non-cash items, including \$49.6 million of stock-based compensation expense, \$18.8 million of depreciation and amortization expense, \$1.2 million of charitable donations and \$10.2 million of cumulative changes in operating assets and liabilities. With respect to changes in operating assets and liabilities, accounts payable and other current liabilities increased \$2.1 million and deferred revenue increased \$3.6 million due to increases in transaction volumes, which were partially offset by the \$13.4 million release of tax liability upon certain obligation settlements and estimate revisions, discussed in detail in Note 10 (d) of the consolidated financial statements included elsewhere in this Annual Report on Form 10-K. Accounts receivable and prepaid expenses increased \$13.2 million, which resulted primarily from the timing of cash receipts from certain of our larger customers, pre-payments for cloud infrastructure fees and certain operating expenses.

In 2016, cash provided by operating activities consisted primarily of our net loss of \$41.3 million adjusted for non-cash items, including \$24.2 million of stock-based compensation expense, \$8.3 million

of depreciation and amortization expense and \$16.9 million of cumulative changes in operating assets and liabilities. With respect to changes in operating assets and liabilities, accounts payable and other liabilities increased \$25.9 million and deferred revenue increased \$4.1 million, which were primarily due to increases in transaction volumes and additional accruals of sales and other taxes. Other long-term liabilities increased \$9.1 million, primarily due to the increase in the deferred rent balance related to our new office lease in San Francisco, California. This was partially offset by an increase in accounts receivable and prepaid expenses of \$22.0 million, which primarily resulted from the growth of our business and the timing of cash receipts from certain of our larger customers, pre-payments for cloud infrastructure fees and certain operating expenses, and a \$5.7 million net increase related to the tenant improvement allowance under our new San Francisco, California office lease, after collecting \$2.6 million from the landlord in the fourth quarter of 2016.

In 2015, cash used in operating activities consisted primarily of our net loss of \$35.5 million adjusted for non-cash items, including \$8.9 million of stock-based compensation expense, \$4.2 million of depreciation and amortization expense and \$2.9 million of cumulative changes in operating assets and liabilities. With respect to changes in operating assets and liabilities, accounts payable and other liabilities increased \$13.9 million and deferred revenue increased \$2.0 million, which were primarily due to increases in transaction volumes and additional accruals of sales and other taxes. This was partially offset by an increase in accounts receivable and prepaid expenses of \$12.6 million, which primarily resulted from the growth of our business and the timing of cash receipts from certain of our larger customers, as well as pre-payments for cloud infrastructure fees and certain operating expenses.

#### *Cash Flows from Investing Activities*

In 2017, cash used in investing activities was \$223.6 million, primarily consisting of \$177.3 million of purchases of marketable securities, net of maturities, a \$22.6 million payment for the acquisition of Beepsend, net of cash acquired, \$17.3 million related to capitalized software development costs and \$9.2 million purchases of property and equipment primarily related to the leasehold improvements under our new office lease. These outflows were partially offset by a \$3.1 million release of restricted cash as a result of contractual arrangements and satisfaction of certain conditions.

In 2016, cash used in investing activities was \$42.4 million, primarily consisting of \$14.2 million of payments related to purchases of property and equipment as we continued to expand our offices and grow our headcount to support the growth of our business, \$11.5 million of payments for capitalized software development as we continued to build new products and enhance our existing products, an \$8.5 million payment related to the Kurento WebRTC acquisition and a \$7.4 million increase in restricted cash related to our new office lease in San Francisco, California.

In 2015, cash used in investing activities was \$12.4 million, primarily consisting of \$8.4 million of payments for capitalized software development as we continued to build new products and enhance our existing products, \$1.8 million of payments related to the acquisition of Authy, net of \$1.2 million of cash acquired, and \$1.7 million of payments related to purchases of property and equipment as we continued to expand our offices and grow our headcount to support the growth of our business.

#### *Cash Flows from Financing Activities*

In 2017, cash provided by financing activities was \$36.4 million, primarily consisting of \$25.6 million proceeds from stock options exercises by our employees and \$11.9 million proceeds from shares issued under our employee stock purchase plan.

In 2016, cash provided by financing activities was \$229.2 million, primarily consisting of \$225.7 million of aggregate proceeds raised in our initial public offering and follow-on public offering, net of underwriting discounts, and \$9.1 million of proceeds from stock options exercises by our

employees. These cash inflows were partially offset by \$4.6 million of costs paid in connection with our public offerings.

In 2015, cash provided by financing activities was \$107.3 million, primarily consisting of \$125.4 million proceeds from our sales of Series E convertible preferred stock, net of issuance expenses, and \$3.4 million proceeds from stock option exercises by our employees. This was partially offset by the \$20.8 million of payments made in connection with our 2015 Repurchase and \$0.7 million of payments for deferred offering costs.

### Off-Balance Sheet Arrangements

We have not entered into any off-balance sheet arrangements and do not have any holdings in variable interest entities.

### Contractual Obligations and Other Commitments

The following table summarizes our non-cancelable contractual obligations as of December 31, 2017:

	<u>Less Than 1 Year</u>	<u>1 to 3 Years</u>	<u>3 to 5 Years</u>	<u>5 Years or More</u>	<u>Total</u>
	(In thousands)				
As of December 31, 2017:					
Operating leases <sup>(1)</sup>	\$ 7,884	\$ 14,777	\$ 12,897	\$ 10,189	\$ 45,747
Purchase obligations <sup>(2)</sup>	22,414	25,673	23	—	48,110
Total	<u>\$ 30,298</u>	<u>\$ 40,450</u>	<u>\$ 12,920</u>	<u>\$ 10,189</u>	<u>\$ 93,857</u>

- (1) Operating leases represent total future minimum rent payments under non-cancelable operating lease agreements.
- (2) Purchase obligations represent total future minimum payments under contracts with our cloud infrastructure provider, network service providers and other vendors. Purchase obligations exclude agreements that are cancelable without penalty. Unrecognized tax benefits are not included in the table above because any amounts expected to be settled in cash are not material.

### Segment Information

We have one business activity and operate in one reportable segment.

### Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles in U.S. GAAP. Preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable. In many instances, we could have reasonably used different accounting estimates and in other instances changes in the accounting estimates are reasonably likely to occur from period to period. Actual results could differ significantly from our estimates. To the extent that there are material differences between these estimates and actual results, our future financial statement presentation, financial condition, results of operations and cash flows will be affected. We believe that the accounting policies discussed below are critical to understanding our historical and future performance, as these policies relate to the more significant areas involving our judgments and estimates.

### ***Revenue Recognition***

We recognize revenue when persuasive evidence of an arrangement exists, delivery has occurred, the price to the buyer is fixed or determinable and collection is reasonably assured. We consider a signed contract or other similar documentation reflecting the terms and conditions under which products will be provided to be persuasive evidence of an arrangement. Collectability is assessed based on a number of factors, including payment history and the creditworthiness of a customer. If it is determined that collection is not reasonably assured, revenue is not recognized until collection becomes reasonably assured, which is generally upon receipt of cash.

Usage-based fees are recognized as products are delivered. Term-based fees are recorded on a straight-line basis over the contractual term of the arrangement beginning on the date when the product is made available to the customer, provided all other revenue recognition criteria are met.

Our arrangements do not contain general rights of return. However, credits to customers may be issued on a case-by-case basis. Our contracts do not provide customers with the right to take possession of our software supporting the applications. Amounts that have been invoiced are recorded in accounts receivable and in revenue or deferred revenue, depending on whether the revenue recognition criteria have been met.

We carry a reserve for sales credits that we calculate based on historical trends and any specific risks identified in processing transactions. Changes in the reserve are recorded against total revenue.

Sales and other taxes collected from customers to be remitted to government authorities are excluded from revenue.

### ***Stock-Based Compensation***

We account for stock-based compensation in accordance with the authoritative guidance on stock compensation. Under the fair value recognition provisions of this guidance, stock-based compensation is measured at the grant date based on the fair value of the award and is recognized as expense, over the requisite service period, which is generally the vesting period of the respective award. Under the old guidance, the stock-based compensation was recorded net of estimated forfeitures.

In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-09, "*Compensation—Stock Compensation (Topic 718): Improvements to Employee Share -Based Payment Accounting*." This new guidance is intended to simplify several areas of accounting for stock-based compensation arrangements, including accounting for forfeitures, the income tax impact and classification on the statement of cash flows. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and early adoption is permitted. We early adopted this guidance in the quarter ended December 31, 2016. The new guidance allows entities to account for forfeitures as they occur. We elected to account for forfeitures as they occur and adopted this provision on a modified retrospective basis. The \$0.1 million of cumulative prior years' impact as well as the impact on the first three quarters of 2016 of \$75,000 was recognized as an increase to stock-based compensation during the quarter ended December 31, 2016, as the impact on prior periods was insignificant. Further, recognition of the previously unrecognized excess tax benefits resulted in the recognition of a tax benefit of \$62,000 in our consolidated statement of operations in the fourth quarter of 2016. Adoption of all other changes in the new guidance did not have a significant impact on our consolidated financial statements.

Prior to our initial public offering ("IPO") in June 2016, we granted restricted stock units ("Pre-IPO RSUs") under our 2008 Stock Option Plan (the "2008 Plan") to our employees that vested upon the satisfaction of both a service condition and a liquidity condition. The service condition for the majority of these awards will be satisfied over four years. The liquidity condition was satisfied upon occurrence of our IPO in June 2016. RSUs granted on or after the completion of our IPO ("Post-IPO

RSUs") are under our 2016 Stock Options Incentive Plan (the "2016 Plan") and vest upon the satisfaction of a time based service condition. The compensation expense related to these grants is based on the grant date fair value of the RSUs and is recognized on a ratable basis over the applicable service period. The majority of Post-IPO RSUs are earned over a service period of two to four years.

Determining the fair value of stock-based awards at the grant date requires judgment. We use the Black-Scholes option-pricing model to determine the fair value of stock options and purchase rights under our 2016 Employee Stock Purchase Plan (the "2016 ESPP") granted to our employees and directors. The grant date fair value of restricted stock units is determined using the fair value of our common stock on the date of grant. Prior to our initial public offering, the fair value of our Class A common stock was determined by the estimated fair value at the time of grant. After our initial public offering, we use the market closing price of our Class A common stock as reported on the New York Stock Exchange for the fair value.

The determination of the grant date fair value of options using an option-pricing model is affected by our estimated Class A common stock fair value as well as assumptions regarding a number of other variables. These variables include our expected stock price volatility over the expected term of the options, stock option exercise and cancellation behaviors, risk-free interest rates, and expected dividends, which are estimated as follows:

- *Expected term.* The expected term represents the period that the stock-based awards are expected to be outstanding. We use the simplified calculation of expected term, as we do not have sufficient historical data to use any other method to estimate expected term.
- *Expected volatility.* The expected volatility is derived from an average of the historical volatilities of the common stock of several entities with characteristics similar to ours, such as the size, and operational and economic similarities to our principle business operations. We use this method because we have limited information on the volatility of our Class A common stock because of our short trading history.
- *Risk-free interest rate.* The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant for zero coupon U.S. Treasury notes with maturities approximately equal to the expected term of the stock-based awards.
- *Expected dividend.* The expected dividend is assumed to be zero as we have never paid dividends and have no current plans to pay any dividends on our common stock.

In February 2017, we granted performance-based stock options that vest upon satisfaction of certain performance conditions. These stock options were valued using the Monte-Carlo simulation model.

The following table summarizes the assumptions used in the Black Scholes option-pricing model to determine the fair value of our stock options, as follows:

	Year Ended December 31,		
	2017	2016	2015
<b>Employee Stock Options</b>			
Fair value of common stock	\$23.60 - \$31.96	\$10.09 - \$15.00	\$7.07 - \$10.09
Expected term (in years)	6.08	6.08	6.08
Expected volatility	44.3% - 47.6%	51.4% - 53.0%	47.8% - 54.9%
Risk-free interest rate	1.9% - 2.3%	1.3% - 1.5%	1.4% - 2.0%
Dividend rate	0%	0%	0%
<b>Employee Stock Purchase Plan</b>			
Expected term (in years)	0.5	0.90	—
Expected volatility	33.2% - 33.9%	52%	—
Risk-free interest rate	1.1% - 1.4%	0.6%	—
Dividend rate	0%	0%	—

The following assumptions were used in the Monte Carlo simulation model to estimate the fair value and the derived service period of the performance options:

Asset volatility	40%
Equity volatility	45%
Discount rate	14%
Stock price at grant date	\$ 31.72

**Internal-Use Software Development Costs**

We capitalize certain costs related to the development of our platform and other software applications for internal use. In accordance with authoritative guidance, we begin to capitalize our costs to develop software when preliminary development efforts are successfully completed, management has authorized and committed project funding, and it is probable that the project will be completed and the software will be used as intended. We stop capitalizing these costs when the software is substantially complete and ready for its intended use, including the completion of all significant testing. These costs are amortized on a straight-line basis over the estimated useful life of the related asset, generally estimated to be three years. We also capitalize costs related to specific upgrades and enhancements when it is probable the expenditure will result in additional functionality and expense costs incurred for maintenance and minor upgrades and enhancements. Costs incurred prior to meeting these criteria together with costs incurred for training and maintenance are expensed as incurred and recorded within product development expenses in our consolidated statements of operations. We exercise judgment in determining the point at which various projects may be capitalized, in assessing the ongoing value of the capitalized costs and in determining the estimated useful lives over which the costs are amortized. To the extent that we change the manner in which we develop and test new features and functionalities related to our platform, assess the ongoing value of capitalized assets or determine the estimated useful lives over which the costs are amortized, the amount of internal-use software development costs we capitalize and amortize could change in future periods.

### ***Contingencies***

We conduct operations in many tax jurisdictions throughout the United States. In many of these jurisdictions, non-income-based taxes, such as sales and use and telecommunications taxes are assessed on our operations. We are subject to indirect taxes, and may be subject to certain other taxes, in some of these jurisdictions. Prior to March 2017, we did not bill nor collect these taxes from our customers and, in accordance with U.S. GAAP, we recorded a provision for the tax exposure in these jurisdictions when it was both probable that a liability had been incurred and the amount of the exposure could be reasonably estimated. These estimates included several key assumptions including, but not limited to, the taxability of our services, the jurisdictions in which we believed we had nexus, and the sourcing of revenues to those jurisdictions.

Effective March 2017, we began collecting these taxes from customers in certain jurisdictions and since then, we have expanded the number of jurisdictions where these taxes are being collected. We expect to continue to expand the number of jurisdictions where these taxes will be collected in the future. Simultaneously, we have been and continue to be in discussions with certain states regarding prior state sales and other taxes, if any, that we may owe.

During 2017, we revised our estimates of our tax exposure based on settlements reached with various states, which indicated that certain revisions to our key assumptions including, but not limited to, the sourcing of revenue and the taxability of our services were appropriate in the current period. In the year ended December 31, 2017, the total impact of these changes on the net loss attributable to common stockholders was a reduction of \$13.4 million. As of December 31, 2017, the total liability related to these taxes was \$20.9 million.

In the event other jurisdictions challenge our assumptions and analysis, the actual exposure could differ materially from the current estimates.

### **Recent Accounting Pronouncements Not Yet Adopted**

See Note 2(aa) to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K for a discussion of recent accounting pronouncements not yet adopted.

### **Item 7A. Quantitative and Qualitative Disclosures about Market Risk**

We are exposed to certain market risks in the ordinary course of our business. These risks primarily include interest rate sensitivities as follows:

#### ***Interest Rate Risk***

We had cash and cash equivalents of \$115.3 million and marketable securities of \$175.6 million as of December 31, 2017. Cash and cash equivalents consist of bank deposits and money market funds. Marketable securities consist of U.S. treasury securities and high credit quality corporate debt securities. The cash and cash equivalents and marketable securities are held for working capital purposes. Such interest-earning instruments carry a degree of interest rate risk. To date, fluctuations in interest income have not been significant. The primary objective of our investment activities is to preserve principal while maximizing income without significantly increasing risk. We do not enter into investments for trading or speculative purposes and have not used any derivative financial instruments to manage our interest rate risk exposure. Due to the short-term nature of our investments, we have not been exposed to, nor do we anticipate being exposed to, material risks due to changes in interest rates. A hypothetical 10% change in interest rates during any of the periods presented would not have had a material impact on our consolidated financial statements.

***Currency Exchange Risks***

The functional currency of our foreign subsidiaries is the U.S. dollar and the Euro. Therefore, we are exposed to foreign exchange rate fluctuations as we convert the financial statements of our foreign subsidiaries into U.S. dollars. The local currencies of our foreign subsidiaries are the British pound, the Euro, the Colombian peso, the Singapore dollar, the Hong Kong dollar and the Swedish Krona. Our subsidiaries remeasure monetary assets and liabilities at period-end exchange rates, while non-monetary items are remeasured at historical rates. Revenue and expense accounts are remeasured at the average exchange rate in effect during the year. If there is a change in foreign currency exchange rates, the conversion of our foreign subsidiaries' financial statements into U.S. dollars would result in a realized gain or loss which is recorded in our consolidated statements of operations. We do not currently engage in any hedging activity to reduce our potential exposure to currency fluctuations, although we may choose to do so in the future. A hypothetical 10% change in foreign exchange rates during any of the periods presented would not have had a material impact on our consolidated financial statements.

**Report of Independent Registered Public Accounting Firm**

To the Stockholders and Board of Directors  
Twilio Inc.:

**Opinion on the Consolidated Financial Statements**

We have audited the accompanying consolidated balance sheets of Twilio Inc. and subsidiaries (the Company) as of December 31, 2017 and 2016, the related consolidated statements of operations, comprehensive loss, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 1, 2018 expressed an adverse opinion on the effectiveness of the Company's internal control over financial reporting.

**Basis for Opinion**

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company's auditor since 2013.

San Francisco, California  
March 1, 2018

**Report of Independent Registered Public Accounting Firm**

To the Stockholders and Board of Directors  
Twilio Inc.:

*Opinion on Internal Control Over Financial Reporting*

We have audited Twilio Inc. and subsidiaries (the Company) internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, because of the effect of the material weakness, described below, on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2017 and 2016, the related consolidated statements of operations, comprehensive loss, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes (collectively, the consolidated financial statements), and our report dated March 1, 2018 expressed an unqualified opinion on those consolidated financial statements.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness related to obtaining or generating relevant quality information to support the design and functioning of control activities over the accounting for capitalized software has been identified and included in management's assessment. The material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2017 consolidated financial statements, and this report does not affect our report on those consolidated financial statements.

*Basis for Opinion*

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

*Definition and Limitations of Internal Control Over Financial Reporting*

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## TWILIO INC.

### Notes to Consolidated Financial Statements

#### 1. Organization and Description of Business

Twilio Inc. (the "Company") was incorporated in the state of Delaware on March 13, 2008. The Company is the leader in the Cloud Communications Platform category and enables developers to build, scale and operate real-time communications within their software applications via simple-to-use Application Programming Interfaces, or API. The power, flexibility, and reliability offered by the Company's software building blocks empower entities of virtually every shape and size to build world-class engagement into their customer experience.

The Company's headquarters are located in San Francisco, California and the Company has subsidiaries in the United Kingdom, Estonia, Ireland, Colombia, Germany, Hong Kong, Singapore, Bermuda, Spain, Sweden and Australia.

##### *Initial Public Offering*

In June 2016, the Company completed an initial public offering ("IPO") in which the Company sold 11,500,000 shares of its newly authorized Class A common stock, which included 1,500,000 shares sold pursuant to the exercise by the underwriters of an option to purchase additional shares, at the public offering price of \$15.00 per share. The Company received net proceeds of \$155.5 million, after deducting underwriting discounts and offering expenses paid by the Company, from the sale of its shares in the IPO. Immediately prior to the completion of the IPO, all shares of common stock then outstanding were reclassified as shares of Class B common stock and all shares of convertible preferred stock then outstanding were converted into 54,508,441 shares of common stock on a one-to-one basis, and then reclassified as shares of Class B common stock. See Note 11 for further discussion of Class A and B common stock.

##### *Follow-on Public Offering*

In October 2016, the Company completed a follow-on public offering ("FPO") in which the Company sold 1,691,222 shares of its Class A common stock, which included 1,050,000 shares sold pursuant to the exercise by the underwriters of an option to purchase additional shares, at a public offering price of \$40.00 per share. In addition, another 6,358,778 shares of the Company's Class A common stock were sold by the selling stockholders of the Company, which included 906,364 shares sold pursuant to the exercise of employee stock options by certain selling stockholders. The Company received aggregate proceeds of \$64.4 million, after deducting underwriting discounts and offering expenses paid and payable by the Company. The Company did not receive any of the net proceeds from the sales of shares by the selling stockholders.

#### 2. Summary of Significant Accounting Policies

##### *(a) Basis of Presentation*

The Company's consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP").

##### *(b) Principles of Consolidation*

The consolidated financial statements include the Company and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

(c) *Use of Estimates*

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates are used for, but not limited to, revenue allowances and returns; valuation of the Company's stock and stock-based awards; recoverability of long-lived and intangible assets; capitalization and useful life of the Company's capitalized internal-use software development costs; fair value of acquired intangible assets and goodwill; accruals and contingencies. Estimates are based on historical experience and on various assumptions that the Company believes are reasonable under current circumstances. However, future events are subject to change and best estimates and judgments may require further adjustments; therefore, actual results could differ materially from those estimates. Management periodically evaluates such estimates and they are adjusted prospectively based upon such periodic evaluation.

(d) *Concentration of Credit Risk*

Financial instruments that potentially expose the Company to a concentration of credit risk consist primarily of cash, cash equivalents, marketable securities, restricted cash and accounts receivable. The Company maintains cash, cash equivalents, restricted cash and marketable securities with financial institutions that management believes are financially sound and have minimal credit risk exposure although the balances will exceed insured limits.

The Company sells its services to a wide variety of customers. If the financial condition or results of operations of any significant customers deteriorate substantially, operating results could be adversely affected. To reduce credit risk, management performs ongoing credit evaluations of the financial condition of significant customers. The Company does not require collateral from its credit customers and maintains reserves for estimated credit losses on customer accounts when considered necessary. Actual credit losses may differ from the Company's estimates. During the year ended December 31, 2017, there was no customer organization that accounted for more than 10% of the Company's total revenue. During the year ended December 31, 2016, one customer organization represented approximately 14% of the Company's total revenue. During the year ended December 31, 2015, a different customer organization represented approximately 17% of the Company's total revenue.

As of December 31, 2017, no customer organizations represented more than 10% of the Company's gross accounts receivable. As of December 31, 2016, one customer organization represented approximately 16% of the Company's gross accounts receivable.

(e) *Revenue Recognition*

The Company derives its revenue primarily from usage-based fees earned from customers accessing the Company's enterprise cloud computing services invoiced or paid monthly. The Company provides services to its customers under pay-as-you-go contracts and term-based contracts ranging in duration from one month to 48 months. Customers that pay via credit card are either billed in advance or as they use service. Larger customers are billed in arrears via invoices for services used. Certain customers have contracts that provide for a minimum monthly commitment and some customers have contracts that provide for a commitment that may be of a quarterly, annual or other specific durations.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**2. Summary of Significant Accounting Policies (Continued)**

The Company recognizes revenue from these transactions when all of the following criteria are satisfied:

- there is persuasive evidence of an arrangement;
- the service has been or is being provided to the customer;
- the amount of the fees to be paid by the customer is fixed or determinable; and
- collectability of the fees is reasonably assured.

Term-based contracts revenue is recognized on a straight-line basis over the contractual term of the arrangement beginning on the date that the service is made available to the customer, provided that all other revenue recognition criteria have been met. Usage-based fees are recognized as delivered.

The Company's arrangements do not contain general rights of return. However, credits may be issued to customers on a case-by-case basis. The contracts do not provide customers with the right to take possession of the software supporting the applications. Amounts that have been invoiced are recorded in accounts receivable and in revenue or deferred revenue, depending on whether the revenue recognition criteria have been met.

The reserve for sales credits was \$1.8 million and \$0.5 million as of December 31, 2017 and 2016, respectively, and is included in accounts receivable, net in the accompanying consolidated balance sheets. The reserve for sales credits is calculated based on historical trends and any specific risks identified in processing transactions. Changes in the reserve are recorded against revenue.

The Company collects various taxes and fees as an agent in connection with the sale of its services and remits these amounts to the respective taxing authorities. These taxes and fees have been presented on a net basis in the consolidated statements of operations and are recorded as a component of accrued liabilities in the accompanying consolidated balance sheets until remitted to the respective taxing authority.

**(f) Cost of Revenue**

Cost of revenue consists primarily of costs of communications services purchased from network service providers. Cost of revenue also includes fees to support the Company's cloud infrastructure, personnel costs, such as salaries and stock-based compensation for the customer care and support services employees, and non-personnel costs, such as amortization of capitalized internal-use software development costs.

**(g) Research and Development Expenses**

Research and development expenses consist primarily of personnel costs, cloud infrastructure fees for staging and development, outsourced engineering services, amortization of capitalized internal-use software development costs and an allocation of general overhead expenses. The Company capitalizes the portion of its software development costs that meets the criteria for capitalization.

**(h) Internal-Use Software Development Costs**

Certain costs of platform and other software applications developed for internal use are capitalized. The Company capitalizes qualifying internal-use software development costs that are

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**2. Summary of Significant Accounting Policies (Continued)**

incurred during the application development stage. Capitalization of costs begins when two criteria are met: (i) the preliminary project stage is completed and (ii) it is probable that the software will be completed and used for its intended function. Capitalization ceases when the software is substantially complete and ready for its intended use, including the completion of all significant testing. The Company also capitalizes costs related to specific upgrades and enhancements when it is probable the expenditures will result in additional functionality and expenses costs incurred for maintenance and minor upgrades and enhancements. Costs related to preliminary project activities and post-implementation operating activities are also expensed as incurred.

Capitalized costs of platform and other software applications are included in property and equipment. These costs are amortized over the estimated useful life of the software on a straight-line basis over three years. Management evaluates the useful life of these assets on an annual basis and tests for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets. The amortization of costs related to the platform applications is included in cost of revenue, while the amortization of costs related to other software applications developed for internal use is included in research and development expenses.

*(i) Advertising Costs*

Advertising costs are expensed as incurred and were \$4.9 million, \$3.5 million and \$2.9 million in the years ended December 31, 2017, 2016 and 2015, respectively. Advertising costs are included in sales and marketing expenses in the accompanying consolidated statements of operations.

*(j) Stock-Based Compensation*

All stock-based compensation to employees, including the purchase rights issued under the Company's 2016 Employee Stock Purchase Plan (the "ESPP"), is measured on the grant date based on the fair value of the awards on the date of grant. This cost is recognized as an expense following the ratable attribution method, over the requisite service period, for stock options, and the straight-line attribution method, over the offering period, for the purchase rights issued under the ESPP. The Company uses the Black-Scholes option pricing model to measure the fair value of its stock options and the purchase rights issued under the ESPP. The fair value of the restricted stock units is determined using the fair value of the Company's Class A common stock on the date of grant. Prior to adoption of ASU 2016-09, the stock-based compensation was recorded net of estimated forfeitures.

In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-09, " *Compensation—Stock Compensation (Topic 718): Improvements to Employee Share -Based Payment Accounting* ." This new guidance was intended to simplify several areas of accounting for stock-based compensation arrangements, including the income tax impact, classification on the statement of cash flows and forfeitures. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and early adoption is permitted. The Company early adopted this guidance in the quarter ended December 31, 2016. The new guidance allows entities to account for forfeitures as they occur. The Company elected to account for forfeitures as they occur and adopted this provision on a modified retrospective basis. The \$0.1 million of cumulative prior years' impact as well as the impact on the first three quarters of 2016 of \$75,000 was recognized as an increase to stock-based compensation during the quarter ended

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

December 31, 2016, as the impact on prior periods was insignificant. Adoption of all other changes in the new guidance did not have a significant impact on the Company's consolidated financial statements.

Prior to the IPO, the fair value of the Company's common stock was determined by the estimated fair value of the Company's common stock at the time of grant. After the IPO, the Company uses the market closing price of its Class A common stock as reported on the New York Stock Exchange for the fair value.

Compensation expense for stock options granted to nonemployees is calculated using the Black-Scholes option pricing model and is recognized in expense over the service period. Compensation expense for nonemployee stock options subject to vesting is revalued at each reporting date until the stock options are vested.

The Black-Scholes option pricing model requires the use of complex assumptions, which determine the fair value of stock-based awards. These assumptions include:

- *Fair value of the common stock.* Prior to the Company's IPO, the board of directors considered numerous objective and subjective factors to determine the fair value of the Company's common stock at each meeting at which awards are approved. The factors included, but were not limited to: (i) contemporaneous valuations of the Company's common stock by an unrelated third party; (ii) the prices at which the Company sold shares of its convertible preferred stock to outside investors in arms-length transactions; (iii) the rights, preferences and privileges of the Company's convertible preferred stock relative to those of its common stock; (iv) the Company's results of operations, financial position and capital resources; (v) current business conditions and projections; (vi) the lack of marketability of the Company's common stock; (vii) the hiring of key personnel and the experience of management; (viii) the introduction of new products; (ix) the risk inherent in the development and expansion of the Company's products; (x) the Company's stage of development and material risks related to its business; (xi) the fact that the option grants involve illiquid securities in a private company; and (xii) the likelihood of achieving a liquidity event, such as an initial public offering or sale of the Company, in light of prevailing market conditions;
- *Expected term.* The expected term represents the period that the stock-based awards are expected to be outstanding. The Company uses the simplified calculation of expected term, as the Company does not have sufficient historical data to use any other method to estimate expected term;
- *Expected volatility.* The expected volatility is derived from an average of the historical volatilities of the common stock of several entities with characteristics similar to those of the Company, such as the size and operational and economic similarities to the Company's principal business operations;
- *Risk-free interest rate.* The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant for zero coupon U.S. Treasury notes with maturities approximately equal the expected term of the stock-based awards; and
- *Expected dividend.* The expected dividend is assumed to be zero as the Company has never paid dividends and has no current plans to pay any dividends on its common stock.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**2. Summary of Significant Accounting Policies (Continued)**

If any of the assumptions used in the Black-Scholes model changes, stock-based compensation for future options may differ materially compared to that associated with previous grants.

**(k) Income Taxes**

The Company accounts for income taxes in accordance with authoritative guidance which requires the use of the asset and liability approach. Deferred tax assets and liabilities are recognized for future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, as well as net operating loss and tax credit carry-forwards. Deferred tax amounts are determined by using the enacted tax rates expected to be in effect when the temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance reduces the deferred tax assets to the amount that is more likely than not to be realized.

The Company recognizes the effect of uncertain income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs.

The Company records interest and penalties related to uncertain tax positions in the provision for income taxes in the consolidated statements of operations.

**(l) Foreign Currency Translation**

The functional currency of the Company's foreign subsidiaries is generally the U.S. dollar. Accordingly, the subsidiaries remeasure monetary assets and liabilities at period-end exchange rates, while non-monetary items are remeasured at historical rates. Revenue and expense accounts are remeasured at the average exchange rate in effect during the year. Remeasurement adjustments are recognized in the consolidated statements of operations as other income or expense in the year of occurrence. Foreign currency transaction gains and losses were insignificant for all periods presented.

For those entities where the functional currency is a foreign currency, adjustments resulting from translating the financial statements into U.S. dollars are recorded as a component of accumulated other comprehensive income (loss) in stockholders' equity. Monetary assets and liabilities denominated in a foreign currency are translated into US dollars at the exchange rate on the balance sheet date. Revenue and expenses are translated at the weighted average exchange rates during the period. Equity transactions are translated using historical exchange rates. Foreign currency transaction gains and losses are included in other income (expense), net in the consolidated statements of operations.

**(m) Comprehensive Income (Loss)**

Comprehensive income (loss) refers to net income (loss) and other revenue, expenses, gains and losses that, under generally accepted accounting principles, are recorded as an element of stockholders' equity but are excluded from the calculation of net income (loss).

For the years ended December 31, 2016 and 2015, the Company's operations did not give rise to any material items includable in comprehensive income (loss), which were not already in net income

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**2. Summary of Significant Accounting Policies (Continued)**

(loss). Accordingly, for those periods, the Company's comprehensive income (loss) is the same as its net income (loss).

**(n) Net Loss Per Share Attributable to Common Stockholders**

The Company calculates its basic and diluted net loss per share attributable to common stockholders in conformity with the two-class method required for companies with participating securities. All series of convertible preferred stock are considered to be participating securities as the holders of the preferred stock are entitled to receive a non-cumulative dividend on a pro rata *pari passu* basis in the event that a dividend is declared or paid on common stock. Shares of common stock issued upon early exercise of stock options that are subject to repurchase are also considered to be participating securities, because holders of such shares have non-forfeitable dividend rights in the event a dividend is declared or paid on common stock. Under the two-class method, in periods when the Company has net income, net income attributable to common stockholders is determined by allocating undistributed earnings, calculated as net income less current period convertible preferred stock non-cumulative dividends, between common stock and the convertible preferred stock. In computing diluted net income attributable to common stockholders, undistributed earnings are re-allocated to reflect the potential impact of dilutive securities. The Company's basic net loss per share attributable to common stockholders is calculated by dividing the net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding for the period. The diluted net loss per share attributable to common stockholders is computed by giving effect to all potential dilutive common stock equivalents outstanding for the period. The dilutive effect of these potential common shares is reflected in diluted earnings per share by application of the treasury stock method. For purposes of this calculation, convertible preferred stock, options to purchase common stock, unvested restricted stock units, common stock issued subject to future vesting, any shares of stock committed under the ESPP, any shares of stock held in escrow and any shares of stock reserved for future donations are considered common stock equivalents but have been excluded from the calculation of diluted net loss per share attributable to common stockholders as their effect is antidilutive.

Since the Company's IPO in 2016, Class A and Class B common stock are the only outstanding equity of the Company. The rights of the holders of Class A and Class B common stock are identical, except with respect to voting and conversion. Each share of Class A common stock is entitled to one vote per share and each share of Class B common stock is entitled to 10 votes per share. Shares of Class B common stock may be converted into Class A common stock at any time at the option of the stockholder on a one-for-one basis, and are automatically converted into Class A common stock upon sale or transfer, subject to certain limited exceptions. Shares of Class A common stock are not convertible.

**(o) Cash and Cash Equivalents**

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. Cash equivalents consist of funds deposited into money market funds. All credit and debit card transactions that process as of the last day of each month and settle within the first few days of the subsequent month are also classified as cash and cash equivalents as of the end of the month in which they were processed.

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

## 2. Summary of Significant Accounting Policies (Continued)

*(p) Restricted Cash*

Restricted cash consists of cash deposited into a savings account with a financial institution as collateral for the Company's obligations under its facility leases of premises located in San Francisco, California. The facility lease for the Company's old office space expired in January 2017 and the facility lease for the Company's new office space expires in October 2024. The restricted cash balances as of December 31, 2017 and December 31, 2016 were \$5.5 million and \$8.6 million, respectively.

*(q) Accounts Receivable and Allowance for Doubtful Accounts*

Accounts receivable are recorded net of the allowance for doubtful accounts and the reserve for sales credits. The allowance for doubtful accounts is estimated based on the Company's assessment of its ability to collect on customer accounts receivable. The Company regularly reviews the allowance by considering certain factors such as historical experience, credit quality, age of accounts receivable balances and other known conditions that may affect a customer's ability to pay. In cases where the Company is aware of circumstances that may impair a specific customer's ability to meet their financial obligations, a specific allowance is recorded against amounts due from the customer which reduces the net recognized receivable to the amount the Company reasonably believe will be collected. The Company writes-off accounts receivable against the allowance when a determination is made that the balance is uncollectible and collection of the receivable is no longer being actively pursued. The allowance for doubtful accounts was \$1.0 million and \$1.1 million as of December 31, 2017 and 2016, respectively.

*(r) Costs Related to the Public Offerings*

Costs related to the public offerings, which consist of direct incremental legal, printing and accounting fees, are deferred until the offering is completed. Upon completion of the offering, these costs are offset against the offering proceeds within the consolidated statements of stockholders' equity. As of December 31, 2016, the Company recorded in its consolidated statement of stockholders' equity \$5.7 million in total offering costs, of which \$4.9 million and \$0.8 million related to the IPO and the FPO, respectively.

*(s) Property and Equipment*

Property and equipment is stated at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful life of the related asset. Maintenance and repairs are charged to expenses as incurred.

The useful lives of property and equipment are as follows:

Capitalized software development costs	3 years
Office equipment	3 years
Furniture and fixtures	5 years
Software	3 years
Leasehold improvements	5 years or remaining lease term

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

## 2. Summary of Significant Accounting Policies (Continued)

*(t) Intangible Assets*

Intangible assets recorded by the Company are costs directly associated with securing legal registration of patents and trademarks, acquiring domain names and the fair value of identifiable intangible assets acquired in business combinations.

Intangible assets with determinable economic lives are carried at cost, less accumulated amortization. Amortization is computed over the estimated useful life of each asset on a straight-line basis. The Company determines the useful lives of identifiable intangible assets after considering the specific facts and circumstances related to each intangible asset. Factors the Company considers when determining useful lives include the contractual term of any agreement related to the asset, the historical performance of the asset, the Company's long-term strategy for using the asset, any laws or other local regulations which could impact the useful life of the asset and other economic factors, including competition and specific market conditions. Intangible assets without determinable economic lives are carried at cost, not amortized and reviewed for impairment at least annually.

The useful lives of the intangible assets are as follows:

Developed technology	3 - 4 years
Customer relationships	5 - 8 years
Supplier relationships	5 years
Trade names	2 years
Patents	20 years
Trademarks	Indefinite
Domain names	Indefinite

*(u) Goodwill*

Goodwill represents excess of the aggregate purchase price over the fair value of net identifiable assets acquired in a business combination. Goodwill is not amortized and is tested for impairment at least annually or whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The Company has determined that it operates as one reporting unit and has selected November 30 as the date to perform its annual impairment test. In the valuation of goodwill, management must make assumptions regarding estimated future cash flows to be derived from the Company's business. If these estimates or their related assumptions change in the future, the Company may be required to record impairment for these assets. Management may first evaluate qualitative factors to assess if it is more likely than not that the fair value of a reporting unit is less than its carrying amount and to determine if a two-step impairment test is necessary. Management may choose to proceed directly to the two-step evaluation, bypassing the initial qualitative assessment. The first step of the impairment test involves comparing the fair value of the reporting unit to its net book value, including goodwill. If the net book value exceeds its fair value, then the Company would perform the second step of the goodwill impairment test to determine the amount of the impairment loss. The impairment loss would be calculated by comparing the implied fair value of the goodwill to its net book value. In calculating the implied fair value of goodwill, the fair value of the entity would be allocated to all of the other assets and liabilities based on their fair values. The excess of the fair value of the entity over the amount assigned to other assets and liabilities is the implied fair value of goodwill. An

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**2. Summary of Significant Accounting Policies (Continued)**

impairment loss would be recognized when the carrying amount of goodwill exceeds its implied fair value. No goodwill impairment charges have been recorded for any period presented.

**(v) Impairment of Long-Lived Assets**

The Company evaluates long-lived assets, including property and equipment and intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets held and used is measured by a comparison of the carrying amount of an asset or an asset group to estimated undiscounted future net cash flows expected to be generated by the asset or asset group. If such evaluation indicates that the carrying amount of the asset or the asset group is not recoverable, any impairment loss would be equal to the amount the carrying value exceeds the fair value. There was no impairment during the years ended December 31, 2017, 2016 and 2015. The value of the internally-developed software written-off due to abandonment was \$0.6 million, \$0.7 million and \$0.1 million in the years ended December 31, 2017, 2016 and 2015, respectively.

**(w) Deferred Revenue**

Deferred revenue consists of cash deposits from customers to be applied against future usage and customer billings in advance of revenues being recognized from the Company's contracts. Deferred revenue is generally expected to be recognized during the succeeding 12-month period and is thus recorded as a current liability. Deferred revenue is refunded in cash upon termination of customer accounts.

**(x) Business Combinations**

The Company recognizes identifiable assets acquired and liabilities assumed at their acquisition date fair values. Goodwill is measured as the excess of the consideration transferred over the fair value of assets acquired and liabilities assumed on the acquisition date. While the Company uses its best estimates and assumptions as part of the purchase price allocation process to accurately value assets acquired and liabilities assumed, these estimates are inherently uncertain and subject to refinement. The authoritative guidance allows a measurement period of up to one year from the date of acquisition to make adjustments to the preliminary allocation of the purchase price. As a result, during the measurement period the Company may record adjustments to the fair values of assets acquired and liabilities assumed, with the corresponding offset to goodwill to the extent that it identifies adjustments to the preliminary purchase price allocation. Upon conclusion of the measurement period or final determination of the values of the assets acquired and liabilities assumed, whichever comes first, any subsequent adjustments will be recorded to the consolidated statement of operations.

**(y) Segment Information**

The Company's Chief Executive Officer is the chief operating decision maker, who reviews the Company's financial information presented on a consolidated basis for purposes of allocating resources and evaluating the Company's financial performance. Accordingly, the Company has determined that it operates in a single reporting segment.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

(z) *Fair Value of Financial Instruments*

The Company applies fair value accounting for all financial instruments on a recurring basis. The Company's financial instruments, which include cash, cash equivalents, accounts receivable and accounts payable are recorded at their carrying amounts, which approximate their fair values due to their short-term nature. Restricted cash is long-term in nature and consists of cash in a savings account, hence its carrying amount approximates its fair value. Marketable securities consist of U.S. treasury securities and high credit quality corporate debt securities. All marketable securities are considered to be available-for-sale and recorded at their estimated fair values. Unrealized gains and losses for available-for-sale securities are recorded in other comprehensive income (loss). In valuing these items, the Company uses inputs and assumptions that market participants would use to determine their fair value, utilizing valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

Impairments are considered to be other than temporary if they are related to deterioration in credit risk or if it is likely that the security will be sold before the recovery of its cost basis. Realized gains and losses and declines in value deemed to be other than temporary are determined based on the specific identification method and are reported in other income (expense), net.

The accounting guidance for fair value provides a framework for measuring fair value, clarifies the definition of fair value, and expands disclosures regarding fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the reporting date. The accounting guidance establishes a three-tiered hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value as follows:

- Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities accessible to the reporting entity at the measurement date.
- Level 2 Inputs: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3 Inputs: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at measurement date.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

(aa) *Recent Accounting Pronouncements Not Yet Adopted*

In May 2017, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Updates ("ASU") 2017-09, " *Compensation-Stock Compensation (Topic 718), Scope of Modification Accounting* ", which clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as modifications. The guidance is effective prospectively for interim and annual periods beginning after December 15, 2017 and early adoption is permitted. The Company will adopt this guidance upon its effective date. The Company does not expect the adoption of this guidance to have a material impact on the Company's financial position, results of operations or cash flows.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**2. Summary of Significant Accounting Policies (Continued)**

In January 2017, the FASB issued ASU 2017-04, "*Simplifying the Test for Goodwill Impairment*", which removes the second step of the goodwill impairment test that requires a hypothetical purchase price allocation. A goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. This guidance is effective prospectively for interim and annual reporting periods beginning after December 15, 2019. The Company will adopt this guidance upon its effective date. The Company does not expect the adoption of this guidance to have a material impact on the Company's financial position, results of operations or cash flows.

In January 2017, the FASB issued ASU 2017-01, "*Business Combinations (Topic 805) Clarifying the Definition of a Business*", which amends the guidance of FASB Accounting Standards Codification Topic 805, "*Business Combinations*", adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions or disposals of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation. This guidance is effective for annual and interim periods beginning after December 15, 2017, and early adoption is permitted under certain circumstances. The Company will adopt this guidance upon its effective date and implement it next time there is a potential business combination.

In November 2016, the FASB issued ASU 2016-18, "*Restricted Cash*", which requires a statement of cash flows to explain the change during the period in the total of cash, cash equivalents and amounts generally described as restricted cash and restricted cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. This guidance is effective for annual and interim periods beginning after December 15, 2017, and early adoption is permitted. The Company will adopt this guidance upon its effective date and its impact will be a function of the amounts of restricted cash the Company has at that time and the movements therein.

In October 2016, the FASB issued ASU 2016-16, "*Intra-Entity Transfers Other Than Inventory*", which requires entities to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. This guidance is effective for annual and interim periods beginning after December 15, 2017, and early adoption is permitted. The Company will adopt this guidance upon its effective date. The Company does not expect the adoption of this guidance to have any material impact on the Company's financial position, results of operations or cash flows.

In June 2016, the FASB issued ASU No. 2016-13, "*Financial Instruments—Credit Losses: Measurement of Credit Losses on Financial Instruments*", which changes the impairment model for most financial assets. The new model uses a forward-looking expected loss method, which will generally result in earlier recognition of allowances for losses. ASU 2016-13 is effective for annual and interim periods beginning after December 15, 2019 and early adoption is permitted for annual and interim periods beginning after December 15, 2018. The Company is evaluating the impact of this guidance on its consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU No. 2016-02, "*Leases* ." The standard will affect all entities that lease assets and will require lessees to recognize a lease liability and a right-of-use asset for all leases (except for short-term leases that have a duration of less than one year) as of the date on which the lessor makes the underlying asset available to the lessee. For lessors, accounting for leases is substantially the same as in prior periods. For public companies, the new standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**2. Summary of Significant Accounting Policies (Continued)**

adoption is permitted. For leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, lessees and lessors must apply a modified retrospective transition approach. While the Company expects the adoption of this standard to result in an increase to the reported assets and liabilities, the Company has not yet determined the full impact that the adoption of this standard will have on its consolidated financial statements and related disclosures.

In May 2014, the FASB issued ASU 2014-09, " *Revenue from Contracts with Customers* ". This new guidance will replace most existing U.S. GAAP guidance on this topic. The new revenue recognition standard provides a unified model to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU 2015-14 which deferred, by one year, the effective date for the new revenue reporting standard for entities reporting under U.S. GAAP. In accordance with the deferral, this guidance will be effective for the Company beginning January 1, 2018 and can be applied either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. Early adoption is permitted beginning January 1, 2017. In March 2016, the FASB issued ASU 2016-08, " *Revenue from Contracts with Customers, Principal versus Agent Considerations (Reporting Revenue Gross versus Net)* " clarifying the implementation guidance on principal versus agent considerations. Specifically, an entity is required to determine whether the nature of a promise is to provide the specified good or service itself (that is, the entity is a principal) or to arrange for the good or service to be provided to the customer by the other party (that is, the entity is an agent). The determination influences the timing and amount of revenue recognition. In April 2016, the FASB issued ASU 2016-10, " *Revenue from Contracts with Customers, Identifying Performance Obligations and Licensing* ", clarifying the implementation guidance on identifying performance obligations and licensing. Specifically, the amendments reduce the cost and complexity of identifying promised goods or services and improve the guidance for determining whether promises are separately identifiable. The amendments also provide implementation guidance on determining whether an entity's promise to grant a license provides a customer with either a right to use the entity's intellectual property (which is satisfied at a point in time) or a right to access the entity's intellectual property (which is satisfied over time). In May 2016, the FASB issued ASU 2016-12 " *Revenue from Contracts with Customers (Topic 606), Narrow-Scope Improvements and Practical Expedients* ", which amends the guidance on transition, collectability, noncash consideration and the presentation of sales and other similar taxes. ASU 2016-12 clarifies that, for a contract to be considered completed at transition, all (or substantially all) of the revenue must have been recognized under legacy GAAP. In addition, ASU 2016-12 clarifies how an entity should evaluate the collectability threshold and when an entity can recognize nonrefundable consideration received as revenue if an arrangement does not meet the standard's contract criteria. In September 2017, the FASB issued ASU 2017-13, " *Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842)* ". These amendments provide additional clarification and implementation guidance on the previously issued ASUs. These amendments do not change the core principles of the guidance stated in ASU 2014-09, instead they are intended to clarify and improve operability of certain topics included within the revenue standard. In November 2017, the FASB issued ASU 2017-14, which includes amendments to certain SEC paragraphs within the FASB Accounting Standards Codification (Codification). ASU 2017-14 amends the Codification to incorporate SEC Staff Accounting Bulletin (SAB) No. 116 and SEC Interpretive Release on Vaccines for Federal Government Stockpiles (SEC

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

Release No. 33-10403) that bring existing SEC staff guidance into conformity with the FASB's adoption of and amendments to ASC Topic 606, Revenue from Contracts with Customers. The effective date and transition requirements for ASU 2016-08, ASU 2016-10, ASU 2016-12, ASU 2017-13 and ASU 2017-14 are the same as the effective date and transition requirements for ASU 2014-09. The Company has evaluated the potential changes from the adoption of the new standard on its financial statements and disclosures, and is in the process of implementing appropriate changes to its business processes, systems and controls to support revenue recognition and disclosures under the new standard. Based on this evaluation, the Company will adopt the requirements of the new standard in the first quarter of 2018, using the modified retrospective transition method with a cumulative catch adjustment to retained earnings as of January 1, 2018. Under the new standard, based on the Company's preliminary assessment, the Company does not believe there will be material changes to its revenue recognition and the expectation is that the majority of the Company's revenue will continue to be recognized according to the usage by its customers, in the period in which that usage occurs.

The Company is also assessing the impact of adoption of the new standard on its accounting for sales commissions. The Company's current accounting policy requires capitalization and amortization of the deferred commissions. Under the new standard, the amounts capitalized will be recognized as amortization over the expected customer life. The Company's preliminary assessment of its analyses of the amortizable life of the deferred commissions under the new guidance at three years. Further review of certain commission plans is yet to be completed to finalize the impact on the consolidated statements of financial position, results of operations and cash flows.

There will not be any significant tax impact to the Company's consolidated statements of operations and consolidated balance sheet relating to the adoption of the new standard as there will be a full valuation allowance due to the Company's history of continued losses.

3. Fair Value Measurements

The following tables provide the assets measured at fair value on a recurring basis as of December 31, 2017 and 2016 (in thousands):

	Amortized Cost or Carrying Value	Net Unrealized Losses	Fair Value Hierarchy as of December 31, 2017			Aggregate Fair Value
			Level 1	Level 2	Level 3	
<b>Financial Assets:</b>						
Cash and cash equivalents:						
Money market funds	\$ 95,432	\$ —	\$ 95,432	\$ —	\$ —	\$ 95,432
Total included in cash and cash equivalents	95,432	—	95,432	—	—	95,432
Marketable securities:						
U.S. Treasury securities	59,962	(216)	59,746	—	—	59,746
Corporate debt securities	116,223	(382)	—	115,841	—	115,841
Total marketable securities	176,185	(598)	59,746	115,841	—	175,587
Total financial assets	\$ 271,617	\$ (598)	\$ 155,178	\$ 115,841	\$ —	\$ 271,019

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

3. Fair Value Measurements (Continued)

There were no marketable securities as of December 31, 2016.

	Total Carrying Value	As of December 31, 2016			
		Level 1	Level 2	Level 3	Total
<b>Financial Assets:</b>					
Money market funds (included in cash and cash equivalents)	\$ 274,135	\$ 274,135	\$ —	\$ —	\$ 274,135
Total financial assets	\$ 274,135	\$ 274,135	\$ —	\$ —	\$ 274,135

As the Company views these securities as available to support current operations, it has classified all available-for-sale securities as short term. The following table summarizes the contractual maturities of marketable securities as of December 31, 2017 (in thousands):

	Amortized Cost	Aggregate Fair Value
<b>Financial Assets:</b>		
Less than one year	\$ 108,584	\$ 108,360
One to two years	67,601	67,227
Total	\$ 176,185	\$ 175,587

For fixed income securities that had unrealized losses as of December 31, 2017, the Company has determined that no other-than-temporary impairment existed. As of December 31, 2017, all securities in an unrealized loss position have been in an unrealized loss position for less than one year. Interest earned on marketable securities in the year ended December 31, 2017 was \$2.6 million and is recorded as other income (expense), net, in the accompanying consolidated statement of operations.

4. Property and Equipment

Property and equipment consisted of the following (in thousands):

	As of December 31,	
	2017	2016
Capitalized internal-use software development costs	\$ 49,177	\$ 28,661
Leasehold improvements	14,246	14,063
Office equipment	9,652	5,729
Furniture and fixtures	1,976	1,576
Software	1,675	968
Total property and equipment	76,726	50,997
Less: accumulated depreciation and amortization	(26,185)	(13,445)
Total property and equipment, net	\$ 50,541	\$ 37,552

Depreciation and amortization expense was \$13.1 million, \$7.4 million and \$3.7 million for the years ended December 31, 2017, 2016 and 2015, respectively.

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**4. Property and Equipment (Continued)**

The Company capitalized \$21.5 million, \$13.5 million and \$9.4 million in internal-use software development costs in the years ended December 31, 2017, 2016 and 2015, respectively, of which \$4.2 million, \$2.0 million and \$1.0 million, respectively, was stock-based compensation expense. Amortization of capitalized software development costs was \$8.4 million, \$5.5 million and \$2.8 million in the years ended December 31, 2017, 2016 and 2015, respectively. The amortization expense was allocated as follows (in thousands):

	Year Ended December 31,		
	2017	2016	2015
Cost of revenue	\$ 4,788	\$ 3,304	\$ 1,793
Research and development	3,619	2,182	1,045
Total	<u>\$ 8,407</u>	<u>\$ 5,486</u>	<u>\$ 2,838</u>

**5. Business Combinations*****Beepsend, AB***

In February 2017, the Company completed its acquisition of Beepsend AB, a messaging provider based in Sweden, specializing in messaging and SMS solutions, for a total purchase price of \$23.0 million, paid in cash, of which \$5.0 million was held in escrow. The escrow will continue for 18 months after the transaction closing date and may be extended under certain circumstances.

Additionally, the Company deposited \$2.0 million into a separate escrow account that will be released to certain employees on the first and second anniversaries of the closing date, provided the underlying service conditions are met. This amount is recorded as prepaid compensation in the accompanying consolidated balance sheet and is amortized into expense as the services are rendered.

The acquisition was accounted for as a business combination and, accordingly, the total purchase price was allocated to the preliminary net tangible and intangible assets and liabilities based on their preliminary fair values on the acquisition date. The prepaid compensation subject to service conditions is accounted for as a post-acquisition compensation expense and recorded as research and development expense in the accompanying consolidated statement of operations. During the measurement period in 2017, the Company recorded a net adjustments of \$0.1 million to the preliminary purchase price allocation. As of December 31, 2017 the purchase price allocation is final.

The acquired entity's results of operations have been included in the consolidated financial statements of the Company from the date of acquisition.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

5. Business Combinations (Continued)

The following table presents the purchase price allocation, as adjusted, recorded in the Company's consolidated balance sheet (in thousands):

	<u>Total</u>
Net tangible liabilities	\$ (3,575)
Goodwill <sup>(1)</sup>	12,837
Intangible assets <sup>(2)</sup>	13,700
Total purchase price	<u>\$ 22,962</u>

- (1) Goodwill represents the excess of purchase price over the fair value of identifiable tangible and intangible assets acquired and liabilities assumed. The goodwill in this transaction is primarily attributable to the future cash flows to be realized from the acquired technology platform, existing customer and supplier relationships as well as operational synergies. Goodwill is deductible for tax purposes.
- (2) Identifiable finite-lived intangible assets were comprised of the following:

	<u>Total</u>	<u>Estimated life (in years)</u>
Developed technology	\$ 5,000	4
Customer relationships	6,100	7 - 8
Supplier relationships	2,600	5
Total intangible assets acquired	<u>\$ 13,700</u>	

The Company acquired a net deferred tax liability of \$2.6 million in this business combination that is included in the long-term liabilities in the accompanying consolidated balance sheet.

The estimated fair value of the intangible assets acquired was determined by the Company, and the Company considered or relied in part upon a valuation report of a third-party expert. The Company used income approaches to estimate the fair values of the identifiable intangible assets. Specifically, the developed technology asset class was valued using the-relief-from royalty method, while the customer relationships asset class was valued using a multi-period excess earnings method and the supplier relationships asset class was valued using an incremental cash flow method.

The Company incurred costs related to this acquisition of \$0.7 million, of which \$0.3 million and \$0.4 million were incurred during fiscal years 2017 and 2016, respectively. All acquisition related costs were expensed as incurred and have been recorded in general and administrative expenses in the accompanying consolidated statements of operations.

Pro forma results of operations for this acquisition are not presented as the financial impact to the Company's consolidated financial statements is immaterial.

***Kurento Open Source Project***

In November 2016, the Company acquired certain assets from Tikal Technologies S.L., a Spanish corporation, behind the Kurento Open Source Project. The acquired assets consisted of (a) proprietary

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**5. Business Combinations (Continued)**

WebRTC media processing technologies, (b) certain licenses, patents and trademarks and (c) certain employee relationships behind the WebRTC technology. The purchase price consisted of \$8.5 million in cash, of which \$1.5 million was placed into escrow to indemnify the Company against breaches of general representations, warranties, claims and tax compliance matters. The escrow is effective for 24 months and 10 days from the acquisition date and may be extended under certain circumstances.

The acquisition was accounted for as a business combination and, accordingly, the total purchase price was allocated to the identifiable intangibles assets acquired based on their respective fair values on the acquisition date. The excess of the purchase price over the fair values of the identifiable assets acquired was recorded as goodwill. The Company considered or relied in part upon a valuation report of a third-party expert.

The following table presents the final purchase price allocation recorded in the Company's consolidated balance sheet (in thousands):

	<u>Total</u>
Intangible assets <sup>(1)</sup>	\$ 8,100
Goodwill <sup>(2)</sup>	400
Total purchase price	<u>\$ 8,500</u>

(1) The intangible assets consist of developed technology with the estimated useful life of 3 years on the date of acquisition.

(2) The goodwill in this transaction is primarily attributable to the future cash flows to be realized from the acquired technology and the future development initiatives of the acquired workforce. The goodwill is deductible for tax purposes.

The Company incurred cost related to this acquisition of \$0.1 million that were expensed as incurred and have been recorded in general and administrative expenses in the accompanying consolidated statement of operations.

***Athy, Inc.***

In February 2015, the Company completed its acquisition of Athy, Inc. ("Athy"), a Delaware corporation with operations in Bogota, Colombia and San Francisco, California. Athy had developed a two-factor authentication online security solution. The Company's purchase price of \$6.1 million for all of the outstanding shares of capital stock of Athy consisted of \$3.0 million in cash and \$3.1 million representing the fair value of 389,733 shares of the Company's Series T convertible preferred stock, of which 180,000 shares were placed in escrow. The escrow was effective until the first anniversary of the closing date, and has continued beyond that date as a result of certain circumstances. As of December 31, 2017, the Company has not released any shares out of the escrow. Additionally, the Company issued 507,885 shares of its Series T convertible preferred stock, which converted into shares of Class B common stock immediately prior to the closing of the IPO, to a former shareholder of Athy that had a fair value of \$4.0 million and were subject to a service condition over a period of three years, as amended. In August 2016, the unvested shares were reduced by 127,054 shares due to the non-fulfillment of certain conditions of the merger agreement. In December 2016, all remaining unvested shares vested.

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**5. Business Combinations (Continued)**

The acquisition was accounted for as a business combination and, accordingly, the total purchase price was allocated to the identifiable tangible and intangible assets acquired and the liabilities assumed based on their respective fair values on the acquisition date. The cost of shares subject to vesting and performance conditions was accounted for as a post-acquisition compensation expense and recorded as research and development expense in the accompanying consolidated statements of operations. The Company recorded \$2.4 million and \$0.6 million of stock-based compensation expense related to these shares in the years ended December 31, 2016 and 2015, respectively.

Athy's results of operations have been included in the consolidated financial statements of the Company from the date of acquisition.

This transaction was intended to qualify as a tax-free reorganization under Section 368(a) of the IRS Code.

The fair value of the Series T convertible preferred stock was determined by the board of directors of the Company with input from a third-party valuation consultant.

The following table presents the final purchase price allocation recorded in the Company's consolidated balance sheet (in thousands):

	<b>Total</b>
Net tangible assets	\$ 1,165
Goodwill <sup>(1)</sup>	3,165
Intangible assets <sup>(2)</sup>	1,760
Total purchase price	<u>\$ 6,090</u>
The Company acquired a net deferred tax liability of \$0.1 million in this business combination.	

- (1) Goodwill represents the excess of purchase price over the fair value of identifiable tangible and intangible assets acquired and liabilities assumed. The goodwill in this transaction is primarily attributable to the future cash flows to be realized from the acquired technology platform, existing customer base and the future development initiatives of the assembled workforce. Goodwill is not deductible for tax purposes.
- (2) Identifiable finite-lived intangible assets were comprised of the following:

	Total	Estimated life (in years)
Developed technology	\$ 1,300	3
Customer relationships	400	5
Trade name	60	2
Total intangible assets acquired	<u>\$ 1,760</u>	

The estimated fair value of the intangible assets acquired was determined by the Company, and the Company considered or relied in part upon a valuation report of a third-party expert. The Company used an income approach to measure the fair values of the developed technology and trade names based on the relief-from-royalty method. The Company used an income approach to measure

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**5. Business Combinations (Continued)**

the fair value of the customer relationships based on the multi-period excess earnings method, whereby the fair value is estimated based upon the present value of cash flows that the applicable asset is expected to generate.

The Company incurred costs related to this acquisition of \$1.5 million, of which \$1.2 million and \$0.3 million were incurred during the years ended December 31, 2015 and 2014, respectively. All acquisition related costs were expensed as incurred and have been recorded in general and administrative expenses in the accompanying consolidated statements of operations.

Pro forma results of operations for this acquisition are not presented as the financial impact to the Company's consolidated financial statements is immaterial.

**6. Goodwill and Intangible Assets***Goodwill*

Goodwill balance as of December 31, 2017 and 2016 was as follows (in thousands):

	<b>Total</b>
Balance as of December 31, 2015	\$ 3,165
Goodwill recorded in connection with 2016 acquisition	400
Balance as of December 31, 2016	3,565
Goodwill recorded in connection with 2017 acquisition	12,688
Measurement period adjustment	149
Effect of exchange rate	1,449
Balance as of December 31, 2017	<u>\$ 17,851</u>

*Intangible assets*

Intangible assets consisted of the following (in thousands):

	<b>As of December 31, 2017</b>		
	<b>Gross</b>	<b>Accumulated Amortization</b>	<b>Net</b>
<b>Amortizable intangible assets:</b>			
Developed technology	\$ 14,941	\$ (5,476)	\$ 9,465

## Notes to Consolidated Financial Statements (Continued)

## 9. Revenue by Geographic Area

Revenue by geographic area is based on the IP address at the time of registration. The following table sets forth revenue by geographic area (in thousands):

	Year Ended December 31,		
	2017	2016	2015
Revenue by geographic area:			
United States	\$ 308,612	\$ 233,922	\$ 143,145
International	90,408	43,413	23,774
Total	<u>\$ 399,020</u>	<u>\$ 277,335</u>	<u>\$ 166,919</u>
Percentage of revenue by geographic area:			
United States	77%	84%	86%
International	23%	16%	14%

Long-lived assets outside the United States were not significant.

## 10. Commitments and Contingencies

*(a) Lease Commitments*

The Company entered into various non-cancelable operating lease agreements for its facilities that expire over the next six years. Certain operating leases contain provisions under which monthly rent escalates over time. When lease agreements contain escalating rent clauses or free rent periods, the Company recognizes rent expense on a straight-line basis over the term of the lease.

In January 2016, the Company entered into a lease agreement ("Lease"), as subsequently amended, for approximately 90,000 square feet of new office space at 375 Beale Street in San Francisco, California, that houses its principal executive office. The term of the Lease is approximately 96 months following the commencement in October 2016, and the lease payments range from \$0.4 million per month in the first 60 months to \$0.5 million per month thereafter. The Lease included a tenant improvement allowance to cover construction of certain leasehold improvements for up to \$8.3 million. All applicable amounts were collected from the landlord as of December 31, 2017. Based on the terms of the landlord incentive and involvement of the Company in the construction process, the leasehold improvements were determined to be property of the Company. The Company secured its lease obligation with a \$7.4 million letter of credit, which was designated as restricted cash on its balance sheet as of December 31, 2016. As of December 31, 2017, the letter of credit and the restricted cash were reduced to \$5.5 million, as stipulated in the lease agreement.

Rent expense was \$8.1 million, \$7.3 million and \$4.1 million for the years ended December 31, 2017, 2016 and 2015, respectively.

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

## 10. Commitments and Contingencies (Continued)

Future minimum lease payments under non-cancelable operating leases were as follows (in thousands):

<u>Year Ending December 31:</u>	<u>As of December 31, 2017</u>
2018	\$ 7,884
2019	7,676
2020	7,101
2021	7,033
2022	5,864
Thereafter	10,189
Total minimum lease payments	<u>\$ 45,747</u>

Additionally, the Company has noncancellable contractual commitments with its cloud infrastructure provider, network service providers and other vendors that are non-cancellable and expire within one to four years. Future minimum payments under these noncancellable purchase commitments were as follows (in thousands). Unrecognized tax benefits are not included in these amounts because any amounts expected to be settled in cash are not material:

<u>Year Ending December 31:</u>	<u>As of December 31, 2017</u>
2018	\$ 22,414
2019	25,526
2020	147
2021	23
Total payments	<u>\$ 48,110</u>

**(b) Legal Matters**

On April 30, 2015, Telesign Corporation, or Telesign, filed a lawsuit against the Company in the United States District Court, Central District of California ("Telesign I"). Telesign alleges that the Company is infringing three U.S. patents that it holds: U.S. Patent No. 8,462,920 ("920"), U.S. Patent No. 8,687,038 ("038") and U.S. Patent No. 7,945,034 ("034"). The patent infringement allegations in the lawsuit relate to the Company's Account Security products, its two-factor authentication use case and an API tool to find information about a phone number. The Company petitioned the U.S. Patent and Trademark Office ("U.S. PTO") for *inter partes* review of the patents at issue. On July 8, 2016, PTO denied the Company's petition for *inter partes* review of the '920 and '038 patents, and on June 26, 2017, it upheld the patentability of the '034 patent, adopting Telesign's narrow construction of its patent.

On March 28, 2016, Telesign filed a second lawsuit against the Company in the United States District Court, Central District of California ("Telesign II"), alleging infringement of U.S. Patent No. 9,300,792 ("792") held by Telesign. The '792 patent is in the same patent family as the '920 and '038 patents asserted in Telesign I. On March 8, 2017, in response to a petition by the Company, the

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**10. Commitments and Contingencies (Continued)**

PTO issued an order instituting the *inter partes* review for the '792 patent. A final written decision is expected by March 2018. On March 15, 2017, Twilio filed a motion to consolidate and stay related cases pending the conclusion of the '792 patent *inter partes* review, which the court granted. With respect to each of the patents asserted in Telesign I and Telesign II, the complaints seek, among other things, to enjoin the Company from allegedly infringing the patents, along with damages for lost profits.

On December 1, 2016, the Company filed a patent infringement lawsuit against Telesign in the United States District Court, Northern District of California, alleging indirect infringement of United States Patent No. 8,306,021, United States Patent No. 8,837,465, United States Patent No. 8,755,376, United States Patent No. 8,736,051, United States Patent No. 8,737,962, United States Patent No. 9,270,833, and United States Patent No. 9,226,217. Telesign filed a motion to dismiss the complaint on January 25, 2017. In two orders, issued on March 31, 2017 and April 17, 2017, the Court granted Telesign's motion to dismiss with respect to the '962, '833, '051 and '217 patents, but denied Telesign's motion to dismiss as to the '021, '465 and '376 patents. This litigation is currently ongoing.

On February 18, 2016, a putative class action complaint was filed in the Alameda County Superior Court in California, entitled Angela Flowers v. Twilio Inc. The complaint alleges that the Company's products permit the interception, recording and disclosure of communications at a customer's request and are in violation of the California Invasion of Privacy Act. The complaint seeks injunctive relief as well as monetary damages. On May 27, 2016, the Company filed a demurrer to the complaint. On August 2, 2016, the court issued an order denying the demurrer in part and granted it in part, with leave to amend by August 18, 2016 to address any claims under California's Unfair Competition Law. The plaintiff opted not to amend the complaint. Following a period of discovery, the plaintiff filed a motion for class certification on September 20, 2017. On January 2, 2018, the court issued an order granting in part and denying in part the plaintiff's class certification motion. The court certified two classes of individuals who, during specified time periods, allegedly sent or received certain communications involving the accounts of three of the Company's customers that were recorded. The court has not yet set a schedule for notice to potential class members, additional discovery, summary judgment motions, or trial.

The Company intends to vigorously defend itself against these lawsuits and believes it has meritorious defenses to each matter in which it is a defendant. It is too early in these matters to reasonably predict the probability of the outcomes or to estimate ranges of possible losses.

In addition to the litigation matters discussed above, from time to time, the Company is a party to legal action and subject to claims that arise in the ordinary course of business. The claims are investigated as they arise and loss estimates are accrued, when probable and reasonably estimable. While it is not feasible to predict or determine the ultimate outcome of these matters, the Company believes that these legal proceedings will not have a material adverse effect on its financial position or results of operations.

Legal fees and other costs related to litigation and other legal proceedings are expensed as incurred and are included in general and administrative expenses in the accompanying consolidated statements of operations.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

10. Commitments and Contingencies (Continued)

(c) *Indemnification Agreements*

The Company has signed indemnification agreements with all of its board members and executive officers. The agreements indemnify the board members and executive officers from claims and expenses on actions brought against the individuals separately or jointly with the Company for certain indemnifiable events. Indemnifiable Events generally mean any event or occurrence related to the fact that the board member or the executive officer was or is acting in his or her capacity as a board member or an executive officer for the Company or was or is acting or representing the interests of the Company.

In the ordinary course of business, the Company enters into contractual arrangements under which it agrees to provide indemnification of varying scope and terms to business partners and other parties with respect to certain matters, including, but not limited to, losses arising out of the breach of such agreements, intellectual property infringement claims made by third parties and other liabilities relating to or arising from the Company's various products, or its acts or omissions. In these circumstances, payment may be conditional on the other party making a claim pursuant to the procedures specified in the particular contract. Further, the Company's obligations under these agreements may be limited in terms of time and/or amount, and in some instances, the Company may have recourse against third parties for certain payments. The terms of such obligations may vary.

As of December 31, 2017 and 2016, no amounts were accrued.

(d) *Other Taxes*

The Company conducts operations in many tax jurisdictions throughout the United States. In many of these jurisdictions, non-income-based taxes, such as sales and use and telecommunications taxes are assessed on the Company's operations. Prior to March 2017, the Company had not billed nor collected these taxes from its customers and, in accordance with U.S. GAAP, recorded a provision for its tax exposure in these jurisdictions when it was both probable that a liability had been incurred and the amount of the exposure could be reasonably estimated. These estimates included several key assumptions including, but not limited to, the taxability of the Company's services, the jurisdictions in which its management believes it has nexus, and the sourcing of revenues to those jurisdictions. Starting in March 2017, the Company began collecting these taxes from customers in certain jurisdictions, and since then, has expanded the number of jurisdictions where these taxes are being collected. The Company expects to continue to expand the number of jurisdictions where these taxes will be collected in the future. Simultaneously, the Company was and continues to be in discussions with certain states regarding its prior state sales and other taxes, if any, that the Company may owe.

During 2017, the Company revised its estimates of its tax exposure based on settlements reached with various states indicating that certain revisions to the key assumptions including, but not limited to, the sourcing of revenue and the taxability of the Company's services were appropriate in the current period. In the year ended December 31, 2017, the total impact of these changes on the net loss attributable to common stockholders was a reduction of \$13.4 million. As of December 31, 2017 and 2016, the liability recorded for these taxes was \$20.9 million and \$28.8 million, respectively.

In the event other jurisdictions challenge management's assumptions and analysis, the actual exposure could differ materially from the current estimates.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

11. Stockholders' Equity

(a) *Convertible Preferred Stock*

As of December 31, 2015, the Company had outstanding Series A, B, C, D, E and T convertible preferred stock (individually referred to as "Series A, B, C, D, E or T" or collectively "Preferred Stock") as follows (in thousands, except share data).

Immediately prior to the completion of the IPO, all shares of convertible preferred stock then outstanding were automatically converted into 54,508,441 shares of common stock on a one-to-one basis, and then reclassified as shares of Class B common stock.

	As of December 31, 2015			
	Shares Authorized	Shares Issued and Outstanding	Aggregate Liquidation preference	Proceeds, Net of Issuance Costs
Series A	13,173,240	13,076,491	\$ 4,590	\$ 4,592
Series B	11,416,062	11,146,895	11,717	11,658
Series C	8,452,864	8,452,864	25,250	25,196
Series D	9,440,324	9,440,324	70,000	69,930
Series E	11,494,249	11,494,249	130,000	125,448
Series T	5,000,000	897,618(1)	9	—(2)
Total	58,976,739	54,508,441	\$ 241,566	\$ 236,824

- (1) The outstanding shares include 687,885 shares held in escrow as of December 31, 2015 related to the Authy acquisition. Of these shares, 507,885 shares were subject to graded vesting over a period of three years, as amended, and had a fair value of \$4.0 million. A total of 127,054 shares were subject to certain performance conditions and were returned to the issuer in the third quarter 2016 due to the non-fulfillment of certain conditions of the merger agreement. All remaining unvested shares vested in the fourth quarter of 2016.
- (2) 389,733 shares were issued as part of the purchase price for Authy acquisition and had a fair value of \$3.1 million on the acquisition closing date.

The holders of the Company's Preferred Stock had the following rights, preferences and privileges:

**Conversion**

At any time following the date of issuance, each share of Preferred Stock is convertible, at the option of its holder, into the number of shares of common stock which results from dividing the applicable original issue price per share for each series by the applicable conversion price per share for such series, on the date of conversion. As of December 31, 2015, the initial conversion prices per share of all series of preferred stock were equal to the original issue prices of each series and therefore the conversion ratio was 1:1.

Each share of preferred stock shall be automatically converted into shares of common stock immediately upon the earlier of (i) the consummation of a firmly underwritten public offering pursuant to the Securities Act of 1933, as amended, the public offering price of which is not less than \$50.0 million in aggregate; or (ii) the date specified by the written consent of holders of a majority of the outstanding shares of preferred stock, voting together as a class of shares on an as-converted basis. In addition, the conversion of each of the Series B, Series C, Series D and Series E preferred stock in

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**11. Stockholders' Equity (Continued)**

connection with a Liquidation Event defined below requires the written consent of a majority of such series, if the proceeds payable to each of these series is less than the respective original issuance price.

A Liquidation Event includes (i) a sale, lease or other disposition of all or substantially all of the Company's assets, (ii) a merger or consolidation of the Company into another entity (except where the merger results in the holders of the Company's stock prior to merger continuing to hold at least 50% of the voting power of the capital stock of the Company or the surviving or acquiring entity), (iii) the transfer of the Company's securities to a person, or a group of affiliated persons, if, after such a transfer, such person or group of persons holds 50% or more of the outstanding voting stock of the Company, (iv) the grant of an exclusive, irrecoverable license to all or substantially all of the Company's intellectual property or (v) a liquidation, dissolution or winding up of the Company.

In the event the Company issues any additional stock, as defined in the Company's Certificate of Incorporation, after the preferred stock original issue date, without consideration or for a consideration per share less than the conversion price applicable to a series of preferred stock in effect immediately prior to such issuance, the conversion price for such series in effect immediately prior to each such issuance shall be adjusted according to a formula set forth in the Company's Certificate of Incorporation.

***Voting***

The holders of Preferred Stock and the holders of common stock vote together and not as separate classes, except in cases specifically provided for in the Certificate of Incorporation or as provided by law.

The holders of each share of Preferred Stock has the right to one vote for each share of common stock into which such Preferred Stock could be converted, and, with respect to such vote, holders of Preferred Stock have full voting rights and powers equal to the voting rights and powers of the holders of common stock, with the exception of voting for the election of directors referred to below.

As long as a majority of the shares of Series A preferred stock originally issued remain outstanding, the holders of such shares, voting as a separate class, shall be entitled to elect one director. As long as a majority of the shares of Series B preferred stock originally issued remain outstanding, the holders of such shares, voting as a separate class, shall be entitled to elect one director. As long as at least 2,000,000 shares of Series D preferred stock are outstanding, the holders of such shares, voting as a separate class, shall be entitled to elect one director. The holders of common stock, voting as a separate class, shall be entitled to elect two directors. The holders of shares of Preferred Stock and common stock, voting together as a single class on an as-converted basis, shall be entitled to elect the remaining directors of the Company.

***Dividends***

The holders of convertible preferred stock are entitled to receive, when and if declared by the board of directors, out of any assets legally available therefor, any dividends as may be declared from time to time by the board of directors. No dividend may be declared or paid on the common stock unless any and all such dividends are distributed among all holders of common stock and preferred stock on a pro rata *pari passu* basis in proportion to the number of shares of common stock that would be held by each such holder if all shares of preferred stock were converted to common stock at the

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**11. Stockholders' Equity (Continued)**

effective conversion rate. The right to receive dividends on shares of preferred stock is non-cumulative. No dividends had been declared or paid by the Company as of December 31, 2015 and through the Company's IPO.

***Liquidation Preference***

In the event of any Liquidation Event of the Company, the holders of Series A, Series B, Series C, Series D and Series E preferred stock ("senior preferred stock") shall be entitled to receive, in preference to any distribution of the proceeds to the holders of Series T preferred stock or common stock, an amount per share equal to the sum of the applicable original issue price for each series of preferred stock (as adjusted for stock splits and combinations as described in the Certificate of Incorporation), plus declared but unpaid dividends on such share. Upon completion of this distribution, the holders of Series T preferred stock shall be entitled to receive in preference to any distribution of the proceeds to the holders of common stock an amount per share equal to the sum of the applicable original issue price for Series T preferred stock, plus declared but unpaid dividends on such share. If the proceeds thus distributed among the holders of the preferred stock are insufficient to permit payment to such holders of the full preferential amounts, then the entire proceeds available for distribution shall be distributed ratably first among the holders of the senior preferred stock in proportion to the full preferential amount that each holder is otherwise entitled to. The original issue price per share of Series A, Series B, Series C, Series D, Series E and Series T convertible preferred stock is equal to \$0.35, \$1.05, \$2.99, \$7.42, \$11.31 and \$0.01, respectively.

Upon completion of the distribution referred to above, all the remaining proceeds available for distribution shall be distributed to the holders of the Company's common stock pro rata based on the number of common stock held by each.

The Company classified the Preferred Stock within shareholders' equity since the shares are not redeemable, and the holders of the Preferred Stock cannot effect a deemed liquidation of the Company outside of the Company control.

**(b) Preferred Stock**

As of December 31, 2017 and 2016, the Company had authorized 100,000,000 shares of preferred stock, par value \$0.001, of which no shares were issued and outstanding.

**(c) Common Stock**

As of December 31, 2017 and 2016, the Company had authorized 1,000,000,000 shares of Class A common stock and 100,000,000 shares of Class B common stock, each par value \$0.001 per share. As of December 31, 2017, 69,906,550 shares of Class A common stock and 24,063,246 shares of Class B common stock were issued and outstanding. As of December 31, 2016, 49,996,410 shares of Class A common stock and 37,252,138 shares of Class B common stock were issued and outstanding. Holders of Class A and Class B common stock are entitled to one vote per share and 10 votes per share, respectively, and the shares of Class A common stock and Class B common stock are identical, except for voting and conversion rights. The outstanding Class B common stock in both periods included 180,000 shares related to the Authy acquisition that were held in escrow.

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

## 11. Stockholders' Equity (Continued)

The Company had reserved shares of common stock for issuance as follows:

	As of December 31,	
	2017	2016
Stock options issued and outstanding	10,710,427	14,649,276
Nonvested restricted stock units issued and outstanding	5,665,459	2,034,217
Class A common stock reserved for Twilio.org	635,014	680,397
Stock-based awards available for grant under 2016 Plan	10,200,189	10,143,743
Class A common stock reserved for issuance under 2016 ESPP	235,372	597,038
Total	<u>27,446,461</u>	<u>28,104,671</u>

*(d) Stock Repurchases*

Following the closing of the Series E convertible preferred stock financing, on August 21, 2015, the Company repurchased an aggregate of 365,916 shares of Series A preferred stock and Series B preferred stock from certain preferred stockholders, and repurchased an aggregate of 1,869,156 shares of common stock from certain current and former employees for \$22.8 million in cash, which transaction is referred to as the 2015 Repurchase. The 2015 Repurchase was conducted at a price in excess of the fair value of the Company's common stock at the date of repurchase. No special rights or privileges were conveyed to the employees and former employees. However, not all employees were invited to participate in the 2015 Repurchase. The Company recorded a compensation expense in the amount of \$2.0 million for the year ended December 31, 2015, which was the excess of the common stock repurchase price above the fair value of the common stock on the date of repurchase. Of this expense, \$0.8 million, \$0.1 million and \$1.1 million were classified as research and development, sales and marketing and general and administrative expenses, respectively, in the accompanying consolidated statement of operations. The excess of the preferred stock repurchase price above the carrying value of the preferred stock was recorded as a deemed dividend in the year ended December 31, 2015. The Company retired the shares repurchased in the 2015 Repurchase as of August 21, 2015.

*(e) Twilio.org*

On September 2, 2015, the Company's board of directors approved the establishment of Twilio.org with 888,022 shares of the Company's common stock, which at the time represented 1% of the Company's outstanding capital stock on as-converted basis, reserved to fund Twilio.org's activities. Through Twilio.org, which is a part of the Company and not a separate legal entity, the Company donates and discounts its products to nonprofits, who use the Company's products to engage their audience, expand their reach and focus on making a meaningful change in the world. On May 13, 2016, the Company's board of directors authorized a reduction of 107,625 shares reserved to offset equity grants to Twilio.org employees. On October 20, 2016, the Company completed its follow-on public offering. Of the net proceeds the Company received in the offering, \$3.9 million was reserved to fund and support the operations of Twilio.org and the number of shares of Class A common stock reserved for Twilio.org was reduced by 100,000. In December 2016, Twilio.org donated the full \$3.9 million proceeds into an independent Donor Advised Fund to further the philanthropic goals of the Company. In November 2017, Twilio.org donated 45,383 shares of Class A common stock with a fair value of \$1.2 million into the same Donor Advised Fund. Both donations were recorded as charitable contributions in the accompanying consolidated statements of operations. As of December 31, 2017, the total remaining shares reserved for Twilio.org was 635,014.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**12. Stock-Based Compensation**

***2008 Stock Option Plan***

The Company maintained a stock plan, the 2008 Stock Option Plan, as amended and restated (the "2008 Plan"), which allowed the Company to grant incentive ("ISO"), non-statutory ("NSO") stock options and restricted stock units ("RSU") to its employees, directors and consultants to participate in the Company's future performance through stock-based awards at the discretion of the board of directors. Under the 2008 Plan, options to purchase the Company's common stock could not be granted at a price less than fair value in the case of ISOs and NSOs. Fair value was determined by the board of directors, in good faith, with input from valuation consultants. On June 22, 2016, the plan was terminated in connection with the Company's IPO. Accordingly, no shares are available for future issuance under the 2008 Plan. The 2008 Plan continues to govern outstanding equity awards granted thereunder. The Company's right of first refusal for outstanding equity awards granted under the 2008 Plan terminated upon completion of the IPO. Options granted include provisions for early exercisability.

***2016 Stock Option Plan***

The Company's 2016 Stock Option and Incentive Plan (the "2016 Plan") became effective on June 21, 2016. The 2016 Plan provides for the grant of ISOs, NSOs, restricted stock, RSUs, stock appreciation rights, unrestricted stock awards, performance share awards, dividend equivalent rights and cash-based awards to employees, directors and consultants of the Company. A total of 11,500,000 shares of the Company's Class A common stock were initially reserved for issuance under the 2016 Plan. These available shares automatically increase each January 1, beginning on January 1, 2017, by 5% of the number of shares of the Company's Class A and Class B common stock outstanding on the immediately preceding December 31, or such lesser number of shares as determined by the Company's compensation committee. On January 1, 2017, the shares available for grant under the 2016 Plan were automatically increased by 4,362,427 shares.

Under the 2016 Plan, the stock options are granted at a price per share not less than 100% of the fair market value per share of the underlying common stock on the date of grant. Under both plans, stock options generally expire 10 years from the date of grant and vest over periods determined by the board of directors. The vesting period for new-hire options and restricted stock units is generally a four-year term from the date of grant, at a rate of 25% after one year, then monthly or quarterly, respectively, on a straight-line basis thereafter. In July 2017, the Company began granting restricted stock units to existing employees that vest in equal quarterly installments over a four year service period.

***2016 Employee Stock Purchase Plan***

The Company's Employee Stock Purchase Plan ("2016 ESPP") became effective on June 21, 2016. A total of 2,400,000 shares of the Company's Class A common stock were initially reserved for issuance under the 2016 ESPP. These available shares will automatically increase each January 1, beginning on January 1, 2017, by the lesser of 1,800,000 shares of the common stock, 1% of the number of shares of the Company's Class A and Class B common stock outstanding on the immediately preceding December 31 or such lesser number of shares as determined by the Company's compensation committee. On January 1, 2017, the shares available for grant under the 2016 Plan were automatically increased by 872,485 shares.

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**12. Stock-Based Compensation (Continued)**

The 2016 ESPP allows eligible employees to purchase shares of the Company's Class A common stock at a discount of up to 15% through payroll deductions of their eligible compensation, subject to any plan limitations. Except for the initial offering period, the 2016 ESPP provides for separate six-month offering periods beginning in May and November of each fiscal year, starting in May 2017.

On each purchase date, eligible employees will purchase the Company's stock at a price per share equal to 85% of the lesser of (i) the fair market value of the Company's Class A common stock on the offering date or (ii) the fair market value of the Company's Class A common stock on the purchase date.

In the year ended December 31, 2017, 794,142 shares of Class A common stock were purchased under the 2016 ESPP and 235,372 shares are expected to be purchased in the second quarter of 2018. As of December 31, 2017, total unrecognized compensation cost related to the 2016 ESPP was \$1.1 million, which will be amortized over a weighted-average period of 0.4 years. No ESPP shares were purchased in the year ended December 31, 2016.

Stock options activity under the 2008 Plan and 2016 Plan was as follows:

*Stock Options*

	Number of options outstanding	Weighted- average exercise price (per share)	Weighted- average remaining contractual term (in years)	Aggregate intrinsic value (in thousands)
Outstanding options as of December 31, 2016	14,649,276	\$ 6.14	7.52	\$ 332,716
Granted	1,526,450	30.66		
Exercised	(5,194,905)	4.93		
Forfeited and cancelled	(825,394)	7.76		
Outstanding options as of December 31, 2017	<u>10,155,427</u>	\$ 10.31	7.12	\$ 145,763
Options vested and exercisable as of December 31, 2017	<u>5,278,003</u>	\$ 5.53	6.28	\$ 95,354

Aggregate intrinsic value represents the difference between the Company's estimated fair value of its common stock and the exercise price of outstanding "in-the-money" options. Prior to the IPO, the fair value of the Company's common stock was estimated by the Company's board of directors. After the IPO, the fair value of the Company's common stock is the Company's Class A common stock price as reported on the New York Stock Exchange. The aggregate intrinsic value of stock options exercised was \$132.0 million, \$54.4 million and \$10.1 million, during the years ended December 31, 2017, 2016 and 2015, respectively.

The total estimated grant date fair value of options vested was \$15.8 million, \$15.3 million and \$8.2 million during the years ended December 31, 2017, 2016 and 2015, respectively. The weighted-average grant-date fair value of options granted was \$13.33, \$5.52 and \$4.30 during the years ended December 31, 2017, 2016 and 2015, respectively.

**TWILIO INC.**

**Notes to Consolidated Financial Statements (Continued)**

**12. Stock-Based Compensation (Continued)**

On February 28, 2017, the Company granted a total of 555,000 shares of performance-based stock options in three distinct awards to an employee with grant date fair values of \$13.48, \$10.26 and \$8.41 per share for a total grant value of \$5.9 million. The first half of each award vests upon satisfaction of a performance condition and the remainder vests thereafter in equal monthly installments over a 24-month period. The achievement window expires after 4.3 years from the date of grant and the stock options expire seven years after the date of grant. The stock options are amortized over a derived service period, as adjusted, of 3.4 years, 4.6 years and 5.3 years, respectively. The stock options value and the derived service period were estimated using the Monte-Carlo simulation model. The following table summarizes the details of the performance options:

	Number of options outstanding	Weighted- average exercise price (per share)	Weighted- average remaining contractual term (in years)	Aggregate intrinsic value (in thousands)
Outstanding options as of December 31, 2016	—	\$ —	—	\$ —
Granted	555,000	31.72		
Exercised	—	—		
Forfeited and cancelled	—	—		
Outstanding options as of December 31, 2017	<u>555,000</u>	\$ 31.72	6.0	\$ —
Options vested and exercisable as of December 30, 2017	<u>—</u>	\$ —	—	\$ —

As of December 31, 2017, total unrecognized compensation cost related to nonvested stock options was \$34.8 million, which will be amortized on a ratable basis over a weighted-average period of 2.12 years.

***Restricted Stock Units***

	Number of options outstanding	Weighted- average grant date fair value (per share)	Aggregate intrinsic value (in thousands)
Nonvested RSUs as of December 31, 2016	2,034,217	\$ 32.66	\$ 58,687
Granted	4,826,508	28.05	
Vested	(711,371)	30.29	
Forfeited and cancelled	(483,895)	29.53	
Nonvested RSUs as of December 31, 2017	<u>5,665,459</u>	\$ 29.29	\$ 133,648

Prior to the completion of the Company's IPO, the Company granted RSUs ("Pre-IPO RSUs") under its 2008 Plan to its employees that vested upon the satisfaction of both a time-based service condition and a liquidity condition. The time-based service condition for the majority of these awards will be satisfied over a period of four years. The liquidity condition was satisfied upon occurrence of the Company's IPO in June 2016. RSUs granted on or after the completion of the Company's IPO ("Post-IPO RSUs") are granted under the 2016 Plan and are subject to a time-based vesting condition only. The compensation expense related to these grants is based on the grant date fair value of the RSUs and is recognized on a ratable basis over the applicable service period. The majority of Post-IPO RSUs are earned over a service period of two to four years.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

12. Stock-Based Compensation (Continued)

As of December 31, 2017, total unrecognized compensation cost related to nonvested RSUs was \$148.0 million, which will be amortized over a weighted-average period of 3.3 years.

*Equity Awards Granted to Nonemployees*

As of December 30, 2017, there were no nonemployee awards outstanding.

In September 2016, the Company granted 30,255 restricted stock units to a nonemployee. The award fully vested in August 2017. Total stock-based compensation expense recorded for this award during the years ended December 31, 2017 and 2016, was \$0.4 million and \$0.6 million, respectively.

In December 2015, the Company granted 30,000 stock options to another nonemployee. On January 1, 2017 due to the employee status change, the grant was converted into a standard award and the fair value accounting stopped. Total stock-based compensation expense recorded for this award in the year ended December 31, 2016, was \$0.3 million.

*Early Exercise of Nonvested Options*

Under the 2008 Plan, employees have an option to exercise their stock options prior to vesting. The Company has the right to repurchase, at the original issuance price, any unvested (but issued) common shares upon termination of service of an employee, either voluntarily or involuntarily. The consideration received for an early exercise of a stock option is considered to be a deposit of the exercise price and the related amount is recorded as a liability. The liability is reclassified into stockholders' equity as the stock options vest. As of December 31, 2017 and 2016, the Company recorded a liability of \$0.03 million and \$0.3 million for 5,214 and 49,580 unvested shares, respectively, that were early exercised by employees and were subject to repurchase at the respective period end. These amounts are reflected in current and non-current liabilities on the Company's consolidated balance sheets.

*Valuation Assumptions*

The fair value of employee stock options was estimated on the date of grant using the following assumptions in the Black-Scholes option pricing model:

	Year Ended December 31,		
	2017	2016	2015
<b><i>Employee Stock Options</i></b>			
Fair value of common stock	\$23.60 - \$31.96	\$10.09 - \$15.00	\$7.07 - \$10.09
Expected term (in years)	6.08	6.08	6.08
Expected volatility	44.3% - 47.6%	51.4% - 53.0%	47.8% - 54.9%
Risk-free interest rate	1.9% - 2.3%	1.3% - 1.5%	1.4% - 2.0%
Dividend rate	0%	0%	0%
<b><i>Employee Stock Purchase Plan</i></b>			
Expected term (in years)	0.5	0.90	—
Expected volatility	33.2% - 33.9%	52%	—
Risk-free interest rate	1.1% - 1.4%	0.6%	—
Dividend rate	0%	0%	—

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**12. Stock-Based Compensation (Continued)**

The following assumptions were used in the Monte Carlo simulation model to estimate the fair value and the derived service period of the performance options:

Asset volatility	40%
Equity volatility	45%
Discount rate	14%
Stock price at grant date	\$ 31.72

**Stock-Based Compensation Expense**

The Company recorded the total stock-based compensation expense as follows (in thousands):

	Year Ended December 31,		
	2017	2016	2015
Cost of revenue	\$ 650	\$ 291	\$ 65
Research and development	22,808	12,946	4,046
Sales and marketing	9,822	4,972	2,389
General and administrative	16,339	6,016	2,377
Total	<u>\$ 49,619</u>	<u>\$ 24,225</u>	<u>\$ 8,877</u>

**13. Net Loss Per Share Attributable to Common Stockholders**

The following table sets forth the calculation of basic and diluted net loss per share attributable to common stockholders during the periods presented (in thousands, except per share data):

	Year Ended December 31,		
	2017	2016	2015
Net loss attributable to common stockholders	<u>\$ (63,708)</u>	<u>\$ (41,324)</u>	<u>\$ (38,896)</u>
Weighted-average shares used to compute net loss per share attributable to common stockholders, basic and diluted	<u>91,224,607</u>	<u>53,116,675</u>	<u>17,746,526</u>
Net loss per share attributable to common stockholders, basic and diluted	<u>\$ (0.70)</u>	<u>\$ (0.78)</u>	<u>\$ (2.19)</u>

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

13. Net Loss Per Share Attributable to Common Stockholders (Continued)

The following outstanding shares of common stock equivalents were excluded from the calculation of the diluted net loss per share attributable to common stockholders because their effect would have been anti-dilutive:

	Year Ended December 31,		
	2017	2016	2015
Convertible preferred stock outstanding	—	—	54,508,441(1)
Stock options issued and outstanding	10,710,427	14,649,276	16,883,837
Nonvested restricted stock units issued and outstanding	5,665,459	2,034,217	71,000
Class A common stock reserved for Twilio.org	635,014	680,397	888,022
Class A common stock committed under 2016 ESPP	235,372	597,038	—
Unvested shares subject to repurchase	5,214	49,580	52,407
<b>Total</b>	<b>17,251,486</b>	<b>18,010,508</b>	<b>72,403,707</b>

(1) Includes 687,885 shares as of December 31, 2015 of Series T convertible preferred stock related to the Authy acquisition held in escrow.

14. Income Taxes

The following table presents domestic and foreign components of loss before income taxes for the periods presented (in thousands):

	Year Ended December 31,		
	2017	2016	2015
United States	\$ (46,737)	\$ (14,002)	\$ (23,962)

Change in federal statutory rate	(45)	—	—
Other	(1)	(2)	(2)
Effective tax rate	<u>(1)%</u>	<u>(1)%</u>	<u>—%</u>

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The following table presents the significant components of the Company's deferred tax assets and liabilities (in thousands):

	As of December 31,		
	2017	2016	2015
<b>Deferred tax assets:</b>			
Net operating loss carryforwards	\$ 56,138	\$ 31,090	\$ 27,401
Accrued and prepaid expenses	9,140	16,698	7,603
Stock-based compensation	7,131	5,368	1,433
Research and development credits	16,212	7,807	6,022
Charitable contributions	1,233	1,458	—
Other	472	—	—
Gross deferred tax assets	90,326	62,421	42,459
Valuation allowance	(78,900)	(49,601)	(35,613)
Net deferred tax assets	11,426	12,820	6,846
<b>Deferred tax liabilities:</b>			
Capitalized software	(7,664)	(7,086)	(4,084)
Prepaid expenses	(1,015)	(452)	(2,035)

Net deferred tax asset (liability)	<u>\$ (2,452)</u>	<u>\$ (2)</u>	<u>\$ 27</u>

## TWILIO INC.

## Notes to Consolidated Financial Statements (Continued)

**14. Income Taxes (Continued)**

As of December 31, 2017, the Company had approximately \$229.3 million in federal net operating loss carryforwards and \$12.6 million in federal tax credits. If not utilized, the federal net operating loss and tax credit carryforwards will expire at various dates beginning in 2029.

As of December 31, 2017, the Company had approximately \$159.6 million in state net operating loss carryforwards and \$11.0 million in state tax credits. If not utilized, the state net operating loss carryforwards will expire at various dates beginning in 2026. The California state tax credits can be carried forward indefinitely.

A limitation may apply to the use of the net operating loss and credit carryforwards, under provisions of the Internal Revenue Code of 1986, as amended, and similar state tax provisions that are applicable if the Company experiences an "ownership change." An ownership change may occur, for example, as a result of issuance of new equity. Should these limitations apply, the carryforwards would be subject to an annual limitation, resulting in a potential reduction in the gross deferred tax assets before considering the valuation allowance.

The Company's accounting for deferred taxes involves the evaluation of a number of factors concerning the realizability of its net deferred tax assets. The Company primarily considered such factors as its history of operating losses, the nature of the Company's deferred tax assets, and the timing, likelihood and amount, if any, of future taxable income during the periods in which those temporary differences and carryforwards become deductible. At present, the Company does not believe that it is more likely than not that the net deferred tax assets will be realized, accordingly, a full valuation allowance has been established. The valuation allowance increased by approximately \$29.3 million and \$14.0 million during the years ended December 31, 2017 and 2016, respectively.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

	Year Ended December 31,		
	2017	2016	2015
Unrecognized tax benefit, beginning of year	\$ 12,275	\$ 1,679	\$ 1,024
Gross increases for tax positions of prior years	493	1,996	—
Gross decrease for tax positions of prior years	(6,331)	—	—
Gross increases for tax positions of current years	3,008	8,600	655
Unrecognized tax benefit, end of year	<u>\$ 9,445</u>	<u>\$ 12,275</u>	<u>\$ 1,679</u>

As of December 31, 2017, the Company had approximately \$9.4 million of unrecognized tax benefits. If the \$9.4 million is recognized, \$0.4 million would affect the effective tax rate. The remaining amount would be offset by the reversal of related deferred tax assets which are subject to a full valuation allowance.

The Company recognizes interest and penalties, if any, related to uncertain tax positions in its income tax provision. As of December 31, 2017, the Company has accumulated \$35,000 in both interest and penalties related to uncertain tax positions.

The Company does not anticipate any significant changes within 12 months of December 31, 2017, in its uncertain tax positions that would be material to the consolidated financial statements taken as a

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**14. Income Taxes (Continued)**

whole because nearly all of the unrecognized tax benefit has been offset by a deferred tax asset, which has been reduced by a valuation allowance.

The Company files U.S. federal income tax returns as well as income tax returns in many U.S. states and foreign jurisdictions. As of December 31, 2017, the tax years 2008 through the current period remain open to examination by the major jurisdictions in which the Company is subject to tax. Fiscal years outside the normal statute of limitation remain open to audit by tax authorities due to tax attributes generated in those early years, which have been carried forward and may be audited in subsequent years when utilized. The Company is not currently subject to U.S. federal, state and local, or non-U.S. income tax examinations by any tax authorities.

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act ("Tax Act"). The Tax Act makes broad and complex changes to the U.S. tax code including, but not limited to, (1) reducing the U.S. federal corporate tax rate from 35% to 21%; (2) requiring companies to pay a one-time transition tax on certain unrepatriated earnings of foreign subsidiaries; (3) generally eliminating U.S. federal income taxes on dividends from foreign subsidiaries; (4) requiring current inclusion in U.S. federal taxable income of certain earnings of controlled foreign corporations; (5) eliminating the corporate alternative minimum tax (AMT) and changing how existing AMT credits can be realized; (6) creating the base erosion anti-abuse tax (BEAT), a new minimum tax; (7) creating a new limitation on deductible interest expense; and (8) changing rules related to uses and limitations of net operating loss carryforwards created in tax years beginning after December 31, 2017.

We remeasured certain deferred tax assets and liabilities based on rates at which they are expected to reverse in the future, which is generally 21%. The rate reduction would generally take effect on January 1, 2018. Consequently, any changes in the US corporate income tax rate will impact the carrying value of our deferred tax assets. Under the new corporate income tax rate of 21%, U.S. federal and state deferred tax assets will decrease by approximately \$28.0 million and the valuation allowance will decrease by approximately \$28.0 million. Due to the valuation allowance on the deferred tax assets, the provisional amount recorded related to the remeasurement was zero.

The SEC staff issued SAB 118, which provides guidance on accounting for the tax effects of the Tax Act. SAB 118 provides a measurement period that should not extend beyond one year from the Tax Act enactment date for companies to complete the accounting under ASC 740. In accordance with SAB 118, a company must reflect the income tax effects of those aspects of the Act for which the accounting under ASC 740 is complete. To the extent that a company's accounting for certain income tax effects of the Tax Act is incomplete but it is able to determine a reasonable estimate, it must record a provisional estimate in the financial statements. If a company cannot determine a provisional estimate to be included in the financial statements, it should continue to apply ASC 740 on the basis of the provisions of the tax laws that were in effect immediately before the enactment of the Tax Act.

Our accounting for the following element of the Tax Act is complete.

Reduction of U.S. federal corporate tax rate: The Act reduces the corporate tax rate to 21%, effective January 1, 2018. Consequently, we have recorded a decrease to our federal and state deferred tax assets of \$28.0 million, with a corresponding net adjustment to valuation allowance of \$28.0 million for the year ended December 31, 2017.

TWILIO INC.

Notes to Consolidated Financial Statements (Continued)

**14. Income Taxes (Continued)**

Our accounting for the following elements of the Tax Act is incomplete, and we were not yet able to make reasonable estimates of the effects. Therefore, no provisional adjustments were recorded.

**Indefinite reinvestment assertion:** Although the mandatory deemed repatriation tax has removed U.S. federal taxes on distributions to the U.S., the Company continues to evaluate the expected manner of recovery to determine whether or not to continue to assert indefinite reinvestment on a part or all the foreign undistributed earnings. This requires the Company to re-evaluate its reinvestment policies in light of the 2017 Act and calculate the tax cost that is incremental to the deemed repatriation tax, (e.g. foreign withholding, state income taxes of repatriating cash to the U.S. While the provisional tax expense for the year ended December 31, 2017 is based upon an assumption that foreign undistributed earnings are indefinitely reinvested, the Company's plan may change upon the completion of the analysis of the impact of the 2017 Act and completion of the calculation of the incremental tax effects on the repatriation of foreign undistributed earnings. In the event the Company determines not to continue to assert the permanent reinvestment of part or all of foreign undistributed earnings, such a determination could result in the accrual and payment of additional foreign, state and local taxes.

**Global intangible low taxed income (GILTI):** The Tax Act creates a new requirement that certain income (i.e., GILTI) earned by controlled foreign corporations (CFCs) must be included currently in the gross income of the CFCs' U.S. shareholder. GILTI is the excess of the shareholder's "net CFC tested income" over the net deemed tangible income return, which is currently defined as the excess of (1) 10% of the aggregate of the U.S. shareholder's pro rata share of the qualified business asset investment of each CFC with respect to which it is a U.S. shareholder over (2) the amount of certain interest expense taken into account in the determination of net CFC-tested income.

Because of the complexity of the new GILTI tax rules, we are continuing to evaluate this provision of the Tax Act and the application of ASC 740. Under U.S. GAAP, we are allowed to make an accounting policy choice of either (1) treating taxes due on future U.S. inclusions in taxable income related to GILTI as a current-period expense when incurred (the "period cost method") or (2) factoring such amounts into a company's measurement of its deferred taxes (the "deferred method"). Our selection of an accounting policy with respect to the new GILTI tax rules will depend, in part, on analyzing our global income to determine whether we expect to have future U.S. inclusions in taxable income related to GILTI and, if so, what the impact is expected to be. Because whether we expect to have future U.S. inclusions in taxable income related to GILTI depends on not only our current structure and estimated future results of global operations but also our intent and ability to modify our structure and/or our business, we are not yet able to reasonably estimate the effect of this provision of the Tax Act. Therefore, we have not made any adjustments related to potential GILTI tax in our financial statements and have not made a policy decision regarding whether to record deferred taxes on GILTI.

**15. Employee Benefit Plan**

The Company sponsors a 401(k) defined contribution plan covering all employees. There were no employer contributions to the plan in the years ended December 31, 2015. The employer contribution to the plan in the year ended December 31, 2017 and 2016 was \$1.8 million and \$1.1 million, respectively.

**TWILIO INC.**

**Notes to Consolidated Financial Statements (Continued)**

**16. Transactions With Investors**

In 2015, two of the Company's vendors participated in the Company's Series E convertible preferred stock financing and owned approximately 1.9% and 1.0%, respectively, of the Company's capital stock, on an as-if converted basis, as of December 31, 2017; 2.0% and 1.0%, respectively, of the Company's capital stock, on as-if converted basis, as of December 31, 2016; and 2.5% and 1.2%, respectively, of the Company's outstanding capital stock as of December 31, 2015.

During the years ended December 31, 2017, 2016 and 2015, the amounts of software services the Company purchased from the first vendor were \$20.4 million, \$14.5 million and \$11.1 million, respectively. The amounts due to this vendor as of December 31, 2017 and 2016 were \$0.2 million and none, respectively. The amount due from this vendor as of December 31, 2017 and 2016 were \$1.2 million and \$0.3 million, respectively. In October 2016, the Company entered into a three-year agreement with this vendor to purchase services for an aggregate purchase commitment amount of \$57.7 million over the course of the three-year contractual period.

The amount of services the Company purchased from the second vendor was \$0.8 million in the year ended December 31, 2017, and \$0.5 million for each of the years ended December 31, 2016 and 2015. The amounts due to this vendor as of December 31, 2017 and 2016 were insignificant. The amounts due from this vendor as of December 31, 2017 and 2016 were none and \$1.0 million, respectively.

\*\*\*\*\*

**Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

None.

**Item 9A. *Controls and Procedures***

**(a) Evaluation of Disclosure Controls and Procedures**

Our management, with the participation of our principal executive officer and principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act), as of the end of the period covered by this Annual Report on Form 10-K. Based on such evaluation, our principal executive officer and principal financial officer have concluded that as of December 31, 2017, our disclosure controls and procedures were not effective as a result of the material weakness in our internal control over financial reporting related to accounting for capitalized software development costs as described below. Notwithstanding the foregoing, our management has concluded that the consolidated financial statements included in this Annual Report on Form 10-K fairly present, in all material respects, our financial position, results of operations and cash flows for the periods presented in this Annual Report on Form 10-K in conformity with GAAP.

**(b) Management's Annual Report on Internal Control Over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Internal control over financial reporting is a process designed under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer and oversight of the board of directors, our management conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2017 based upon the framework in "Internal Control—Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, management concluded that our internal control over financial reporting was not effective due to the material weakness in controls related to the accounting for capitalized software described below.

The Company did not obtain or generate sufficient relevant quality information to support the design and functioning of control activities over the accounting for capitalized software development costs. Specifically, the Company's process level control over internal use software development costs did not effectively track and categorize software development costs incurred during the application development stage to quantify amounts that should be capitalized as a long-lived asset, rather than expensed as research and development expenses. Additionally, the review control of the capitalized software development costs was not operating at a sufficient level of precision to identify potential material misstatements.

These control deficiencies did not result in a material misstatement to the Company's research and development expenses and long-lived assets as of and for the year ended December 31, 2017. These

control deficiencies create a reasonable possibility that a material misstatement in the annual or interim consolidated financial statements will not be prevented or detected on a timely basis.

KPMG, LLP, an independent registered public accounting firm, has audited the consolidated financial statements included in this Annual Report on Form 10-K and, as part of the audit, has issued an adverse opinion on the effectiveness of our internal control over financial reporting as of December 31, 2017, which is included on page 86 in this Form 10-K.

**(c) Changes in Internal Control**

Except for the material weakness discussed above, there were no changes in our internal control over financial reporting in connection with the evaluation required by Rules 13a-15 (d) and 15d-15 (d) of the Exchange Act that occurred during the quarter ended December 31, 2017 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**(d) Inherent Limitations on Effectiveness of Controls**

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

**(e) Plan for Remediation of a Material Weakness in Internal Control over Accounting for Capitalized Software**

Our management will strengthen the design of control activities around the determination of software development costs that meet the criteria for capitalization, including guidelines for how to conduct and document management reviews of conclusions over software development activities that are to be capitalized and will establish controls to obtain or generate relevant, quality information to support the functioning of these control activities.

These actions are subject to ongoing review by our management, as well as oversight by our board of directors. Although we plan to complete this remediation process as quickly as possible, we cannot, at this time, estimate when such remediation may occur, and our initiatives may not prove successful in remediating this material weakness.

**Item 9B. Other Information**

Not applicable.

**Part III**

**Item 10. *Directors, Executive Officers and Corporate Governance***

The information required by this item is incorporated by reference to our Proxy Statement relating to our 2018 Annual Meeting of Stockholders. The Proxy Statement will be filed with the Securities and Exchange Commission within 120 days of the fiscal year ended December 31, 2017.

***Codes of Business Conduct and Ethics***

Our board of directors has adopted a Code of Business Conduct and Ethics that applies to all officers, directors and employees, which is available on our website at (investors.twilio.com) under "Governance Documents". We intend to satisfy the disclosure requirement under Item 5.05 of Form 8-K regarding amendments to, or waiver from, a provision of our Code of Business Conduct and Ethics and by posting such information on the website address and location specified above.

**Item 11. *Executive Compensation***

The information required by this item is incorporated by reference to our Proxy Statement relating to our 2018 Annual Meeting of Stockholders. The Proxy Statement will be filed with the Securities and Exchange Commission within 120 days of the fiscal year ended December 31, 2017.

**Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters***

The information required by this item is incorporated by reference to our Proxy Statement relating to our 2018 Annual Meeting of Stockholders. The Proxy Statement will be filed with the Securities and Exchange Commission within 120 days of the fiscal year ended December 31, 2017.

**Item 13. *Certain Relationships and Related Transactions and Director Independence***

The information required by this item is incorporated by reference to our Proxy Statement relating to our 2018 Annual Meeting of Stockholders. The Proxy Statement will be filed with the Securities and Exchange Commission within 120 days of the fiscal year ended December 31, 2017.

**Item 14. *Principal Accountant Fees and Services***

The information required by this item is incorporated by reference to our Proxy Statement relating to our 2018 Annual Meeting of Stockholders. The Proxy Statement will be filed with the Securities and Exchange Commission within 120 days of the fiscal year ended December 31, 2017.

**Consent of Independent Registered Public Accounting Firm**

The Board of Directors  
Twilio Inc.:

We consent to the incorporation by reference in the registration statement (No. 333-212191) on Form S-8 of Twilio Inc. of our reports dated March 1, 2018, with respect to the consolidated balance sheets of Twilio Inc. as of December 31, 2017 and 2016, and the related consolidated statements of operations, comprehensive loss, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes (collectively, the "consolidated financial statements"), and the effectiveness of internal control over financial reporting as of December 31, 2017, which reports appear in the December 31, 2017 annual report on Form 10-K of Twilio Inc..

Our report dated March 1, 2018, on the effectiveness of internal control over financial reporting as of December 31, 2017, expresses our opinion that Twilio Inc. did not maintain effective internal control over financial reporting as of December 31, 2017 because of the effect of a material weakness on the achievement of the objectives of the control criteria and contains an explanatory paragraph that states a material weakness related to obtaining or generating relevant quality information to support the design and functioning of control activities over the accounting for capitalized software costs, has been identified and included in management's assessment.

**CERTIFICATION PURSUANT TO RULE 13a-14(a) OR 15d-14(a) OF  
THE SECURITIES EXCHANGE ACT OF 1934,  
AS ADOPTED PURSUANT TO SECTION 302 OF  
THE SARBANES-OXLEY ACT OF 2002**

I, Jeffrey Lawson, certify that:

1. I have reviewed this Annual Report on Form 10-K of Twilio Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

PURSUANT TO  
18 U.S.C. SECTION 1350,  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

Pursuant to the requirement set forth in Rule 13a-14(b) of the Securities Exchange Act of 1934, as amended, (the "Exchange Act") and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. §1350), Jeffrey Lawson, Chief Executive Officer of Twilio Inc. (the "Company"), and Lee Kirkpatrick, Chief Financial Officer of the Company, each hereby certifies that, to the best of his knowledge:

1. The Company's Annual Report on Form 10-K for the year ended December 31, 2017, to which this Certification is attached as Exhibit 32.1 (the "Periodic Report"), fully complies with the requirements of Section 13(a) or Section 15(d) of the Exchange Act; and
2. The information contained in the Periodic Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
