Annex - Financial derivate instruments

Ticker: VLRS

Consolidated
Quarter: 3 Year: 2017

Management's discussion about derivative financial instrument policies explaining whether these policies allow them to be used only for hedging or other purposes such as trading.

The Company's activities are exposed to different financial risks resulting from exogenous variables that are not under its control, but whose effects can be potentially adverse. The Company's global risk management program is focused on existing uncertainty in the financial markets and is intended to minimize potential adverse effects on net earnings and working capital requirements. Volaris uses derivative financial instruments to mitigate part of these risks and does not acquire financial derivative instruments for speculative or trading purposes.

The Company has a Risk Management team which identifies and evaluates the exposure to different financial risks. It is also in charge of designing strategies to mitigate them. Accordingly, it has a Hedging Policy in place and procedures related thereto, on which those strategies are based. All policies, procedures and strategies are approved by different administrative entities based on the Corporate Governance.

The Hedging Policy establishes that derivative financial instrument transactions will be approved and implemented/monitored by certain committees. Compliance with the Hedging Policy and its procedures are subject to internal and external audits.

The Hedging Policy holds a conservative position regarding derivative financial instruments, since it only allows the company to enter into positions that are correlated with the primary position to be hedged (in accordance with International Financial Reporting Standards "IFRS", under which the Company prepares its financial information). The Company's objective is to apply hedge accounting treatment to all derivative financial instruments.

Volaris aims to transfer a portion of market risk to its financial counterparties through the use of derivative financial instruments, described as follows:

1. Fuel price fluctuation risk: Volaris' contractual agreements with its fuel suppliers are linked to the market price index of the underlying asset; therefore, it is exposed to an increase in such price. Volaris enters into derivative financial instruments to hedge against significant increases in the fuel price. The instruments are traded on over-the-counter ("OTC") markets, with approved counterparties and limits by the Hedging Policy. As of the date of this report, the Company uses Asian call options, being U.S. Gulf Coast Jet Fuel 54 the underlying asset. Asian instruments consider the monthly average price of the underlying, hence it matches the outflows of Volaris main fuel supplier. All derivative financial instruments qualified as hedge accounting.
 2. Foreign currency risk: The Company's exposure to the risk fluctuations in foreign exchange rates is mainly related to the Company's activities (considering revenues and/or expenses are denominated in a currency other than the Company's functional currency). Such exposure arises from expenses that are linked or/and denominated in U.S. dollars. To mitigate this risk, the Hedging Policy allows the Company to use foreign exchange derivative financial instruments. As of the date of this report, the Company holds FX plain vanilla forwards.
 3. Interest rate variation risk: The Company's exposure to the risk of changes in market interest rates is related primarily to the Company's flight equipment operating lease agreements and long-term debt obligations with floating interest rates. The Company enters into derivative financial instruments to hedge a portion of that exposure. As of the date of this report, the Company does not have any position.
-

Outstanding derivative financial instruments may require collateral to guarantee a portion of the mark-to-market prior to maturity. The amount of collateral delivered in pledge, is presented as part of non-current assets under guarantee deposits. It is assessed and adjusted accordingly on daily basis.

Trading markets and eligible counterparties

The Company only operates in over the counter ("OTC") markets. To minimize counterparty risk, the Company enters into ISDA agreements with counterparties with recognized financial capacity; therefore, significant risks of default on any of them are not foreseen. As of September 30, 2017, the Company has 7 ISDAs in place with different financial institutions and is active with 6 of them.

Those agreements have a Credit Support Annex ("CSA") section, which sets credit conditions and guidelines for margin calls that are stipulated therein, including minimum amounts and rounding off. Hedging positions are distributed among different counterparties with the purpose of diversifying our exposure, and thus, optimizing financial conditions of different CSA thresholds. Moreover, the Company has internal resources to meet the requirements related to derivative financial instruments.

Generic description of the valuation techniques, distinguishing instruments that are valued at cost or fair value, as well as valuation methods and techniques.

The designation of calculation agents is documented at the ISDAs whereby Volaris operates. The Company uses the valuations provided by the financial institutions of each derivative financial instrument. Afterwards, that fair value is compared with internally developed valuation techniques that use valid and recognized methodologies based on the assets listed on its respective market and using Bloomberg as the main source of information for the levels.

In accordance with International Financial Reporting Standards ("IFRS"), the Company prepares its financial statements, Volaris performs prospective effectiveness tests, as well as hedging records in which derivative financial instruments are classified in accordance with the type of underlying asset (monitored and updated constantly). As of the date of this report, all of the Company's financial derivative instruments are considered effective and, therefore, are recorded under hedge accounting assumptions.

Management discussion on internal and external sources of liquidity that could be used to meet the requirements related to derivative financial instruments

The Company only operates with financial counterparties with which it has an ISDA agreement. Those agreements have a Credit Support Annex ("CSA") section, which sets credit conditions and guidelines for margin calls that are stipulated therein, including minimum amounts and rounding off. Hedging positions are distributed among different counterparties with the purpose of diversifying our exposure, and thus, optimizing financial conditions of different CSA thresholds. Moreover, the Company has internal resources to meet the requirements related to derivative financial instruments.

Explanation of changes in exposure to the main risks identified and in managing them, as well as contingencies and events known or expected by management that can affect future reports.

The Company's activities are exposed to several market risks, such as fuel price, exchange rates and interest rates. During the third quarter of 2017, there was no evidence of significant changes that could modify the exposure to the risks described above, a situation that can change in the future.

Quantitative information

As of the date of this report, all the derivative financial instruments held by the Company qualified as hedge accounting; for this reason, the changes in their fair value will only be the result of changes in the price levels of the underlying asset, and it will not modify the objective of the hedge for which it was initially entered for.

Notes - List of accounting policies

Basis of preparation

Statement of compliance

The unaudited interim condensed consolidated financial statements, which include the consolidated statements of financial position as of September 30, 2017 and December 31, 2016 (audited), and the related consolidated statements of operations, comprehensive income, changes in equity and cash flows for each of the nine months period ended September 30, 2017 and 2016, have been prepared in accordance with International Accounting Standard (“IAS”) 34 *Interim Financial Reporting* and using the same accounting policies applied in preparing the annual financial statements, except as explained below.

The unaudited interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Company’s annual consolidated financial statements as of December 31, 2016 and 2015, and for the three years period ended December 31, 2016.

Basis of measurement and presentation

The accompanying consolidated financial statements have been prepared under the historical-cost convention, except for derivative financial instruments that are measured at fair value and investments in marketable securities measured at fair value through profit and loss (“FVTPL”). The preparation of the consolidated financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the amounts reported in the accompanying consolidated financial statements and notes. Actual results could differ from those estimates.

a) Basis of consolidation

The financial statements of the subsidiaries are prepared for the same reporting period as the parent Company, using consistent accounting policies.

Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Company controls an investee if, and only if, the Company has:

- (i) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee).
- (ii) Exposure, or rights, to variable returns from its involvement with the investee.
- (iii) The ability to use its power over the investee to affect its returns.

When the Company has less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (i) The contractual arrangement with the other vote holders of the investee.
- (ii) Rights arising from other contractual arrangements.
- (iii) The Company’s voting rights and potential voting rights.

The Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Company gains control until the date the Company ceases to control the subsidiary.

All intercompany balances, transactions, unrealized gains and losses resulting from intercompany transactions are eliminated in full.

On consolidation, the assets and liabilities of foreign operations are translated into Mexican pesos at the rate of exchange prevailing at the reporting date and their statements of profit or loss are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on translation for consolidation are recognized in other comprehensive income ("OCI"). On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is recognized in profit or loss.

b) Revenue recognition

Passenger revenues:

Revenues from the air transportation of passengers are recognized at the earlier of when the service is provided or when the non-refundable ticket expires at the date of the scheduled travel.

Ticket sales for future flights are initially recognized as liabilities under the caption unearned transportation revenue and, once the transportation service is provided by the Company or when the non-refundable ticket expires at the date of the scheduled travel, the earned revenue is recognized as passenger ticket revenues and the unearned transportation revenue is reduced by the same amount. All of the Company's tickets are non-refundable and are subject to change upon a payment of a fee. Additionally, the Company does not operate a frequent flier program.

Non-ticket revenues:

The most significant non-ticket revenues include revenues generated from: (i) air travel-related services (ii) revenues from non-air travel-related services and (iii) cargo services. Air travel-related services include but are not limited to fees charged for excess baggage, bookings through the call center or third-party agencies, advanced seat selection, itinerary changes, charters and airport passenger facility charges for no-show tickets. They are recognized as revenue when the related service is provided by the Company.

Revenues from non-air travel-related services include commissions charged to third parties for the sale of hotel rooms, trip insurance and rental cars. They are recognized as revenue at the time the service is provided. Additionally, services not directly related to air transportation include Volaris' sale of VClub membership and the sale of advertising spaces to third parties. VClub membership fees are recognized as revenues over the term of the membership. Revenue from the sale of advertising spaces is recognized over the period in which the space is provided.

Revenues from cargo services are recognized when the cargo transportation is provided (upon delivery of the cargo to destination).

c) Cash and cash equivalents

Cash and cash equivalents are represented by bank deposits and highly liquid investments with maturities of 90 days or less at the original purchase date.

For the purpose of the consolidated statements of cash flows, cash and cash equivalents consist of cash and short-term investments as defined above.

d) Financial instruments

For the purpose of the consolidated statements of cash flows, cash and cash equivalents consist of cash and short-term investments as defined above.

Adoption of IFRS 9 (2013)

On October 1, 2014 the Company elected to early adopt IFRS 9 (2013) *Financial Instruments*, which comprises aspects related to classification and measurement of financial assets and financial liabilities, as well as hedge accounting treatment. This early adoption of IFRS 9 (2013) did not require retrospective adjustments to the Company.

Under IFRS 9 (2013), the FVTPL category used under IAS 39 remains permissible, although new categories of financial assets are introduced. These new categories are based on the characteristics of the instruments and the business model under which these are held, to either be measured at fair value or at amortized cost.

For financial liabilities, categories provided under IAS 39 are kept. As a result, there was no difference in valuation and recognition of the financial assets under IFRS 9 (2013), since those financial assets categorized under IAS 39 as FVTPL remain in that same category under IFRS 9 (2013). In the case of trade receivables, these were not affected in terms of valuation model by this version of IFRS 9 (2013), since they are carried at amortized cost and continued to be accounted for as such.

Also, the hedge accounting section of IFRS 9 (2013) requires for options that qualify and are formally designated as hedging instruments, the intrinsic value of the option to be defined as the hedging instrument, thus allowing for the exclusion of changes in fair value attributable to extrinsic value (time value and volatility), to be accounted, under the transaction-related method, separately as a cost of hedging that needs to be initially recognized in OCI and accumulated in a separate component of equity, since the hedged item is a portion of the forecasted jet fuel consumption. The extrinsic value is recognized in the consolidated statement of operations when the hedged item is recognized in income.

IFRS 9 requires the Company to record expected credit losses on all trade receivables, either on a 12 month or lifetime basis. The Company recorded lifetime expected losses on all trade receivables.

e) Financial assets

Classification of financial assets

The Company determines the classification and measurement of financial assets, in accordance with the new categories introduced by IFRS 9 (2013), which are based on both: the characteristics of the contractual cash flows of these assets and the business model objective for holding them.

Financial assets include those carried at FVTPL, whose objective to hold them is for trading purposes (short-term investments), or at amortized cost, for accounts receivables held to collect the contractual cash flows, which are characterized by solely payments of principal and interest ("SPPI"). Derivative financial instruments are also considered financial assets when these represent contractual rights to receive cash or another financial asset.

Initial recognition

All the Company's financial assets are initially recognized at fair value, including derivative financial instruments.

Subsequent measurement

The subsequent measurement of financial assets depends on their initial classification, as is described below:

1. Financial assets at FVTPL which include financial assets held for trading.
2. Financial assets at amortized cost, whose characteristics meet the SPPI criterion and were originated to be held to collect principal and interest in accordance with the Company's business model.
3. Derivative financial instruments are designated for hedging purposes under the cash flow hedge ("CFH") accounting model and are measured at fair value.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- a) The rights to receive cash flows from the asset have expired;
- b) The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (i) the Company has transferred substantially all the risks and rewards of the asset, or (ii) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset; or
- c) When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the asset is recognized to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

ii) Impairment of financial assets

The Company assesses, at each reporting date, whether there is objective evidence that a financial asset or a group of financial assets is impaired. Receivables are evaluated by the Company based on parameters such as interest rates, specific country risk factors, individual creditworthiness of the customer, the risk characteristic of the financial project and indications that the debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

For trade receivables, the Company assesses whether objective evidence of impairment exists individually for receivables that are individually significant. If there is objective evidence that an impairment loss is expected, the amount of the loss is measured as the present value of estimated future cash flows (future expected credit losses that have not yet been incurred).

Based on this evaluation, allowances are taken into account for the expected losses of these receivables.

iii) Financial liabilities

Classification of financial liabilities

Financial liabilities under IFRS 9 (2013) are classified at amortized cost or at FVTPL.

Derivative financial instruments are also considered financial liabilities when these represent contractual obligations to deliver cash or another financial asset.

Initial recognition

The Company determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognized initially at fair value.

The Company's financial liabilities include accounts payable to suppliers, unearned transportation revenue, other accounts payable, financial debt and financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification as described below:

Financial liabilities at amortized cost

Accounts payable are subsequently measured at amortized cost and do not bear interest or result in gains and losses due to their short-term nature.

After initial recognition at fair value (consideration received), interest bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on issuance and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the consolidated statements of operations. This amortized cost category generally applies to interest-bearing loans and borrowings.

Financial liabilities at FVTPL

FVTPL include financial liabilities designated upon initial recognition at fair value through profit or loss. Financial liabilities under the fair value option are classified as held for trading, if they are acquired for the purpose of selling them in the near future. This category includes derivative financial instruments that are not designated as hedging instruments in hedge relationships as defined by IFRS 9 (2013). During the years ended December 31, 2016, 2015 and 2014 the Company has not designated any financial liability as at FVTPL.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statements of operations.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is:

- (i) A currently enforceable legal right to offset the recognized amounts, and
- (ii) An intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

f) Other accounts receivable

Other accounts receivables are due primarily from major credit card processors associated with the sales of tickets and are stated at cost less allowances made for doubtful accounts, which approximates fair value given their short-term nature.

g) Inventories

Inventories consist primarily of flight equipment expendable parts, materials and supplies, and are initially recorded at acquisition cost. Inventories are carried at the lower of cost and their net realization value. The cost is determined on the basis of the method of specific identification, and expensed when used in operations.

h) Intangible assets

Cost related to the purchase or development of computer software that is separable from an item of related hardware is capitalized separately and amortized over the period in which it will generate benefits not exceeding five years on a straight-line basis. The Company annually reviews the estimated useful lives and salvage values of intangible assets and any changes are accounted for prospectively.

The Company records impairment charges on intangible assets used in operations when events and circumstances indicate that the assets or related cash generating unit may be impaired and the carrying amount of a long-lived asset or cash generating unit exceeds its recoverable amount, which is the higher of (i) its fair value less cost to sell, and (ii) its value in use.

The value in use calculation is based on a discounted cash flow model, using our projections of operating results for the near future. The recoverable amount of long-lived assets is sensitive to the uncertainties inherent in the preparation of projections and the discount rate used in the calculation.

i) Guarantee deposits

Guarantee deposits consist primarily of aircraft maintenance deposits paid to lessors, deposits for rent of flight equipment and other guarantee deposits. Aircraft and engine deposits are held by lessors in U.S. dollars and are presented as current assets and non-current assets, based on the recovery dates of each deposit established in the related agreements.

Aircraft maintenance deposits paid to lessors

Most of the Company's lease agreements require the Company to pay maintenance deposits to aircraft lessors to be held as collateral in advance of the Company's performance of major maintenance activities. These lease agreements provide that maintenance deposits are reimbursable to the Company upon completion of the maintenance event in an amount equal to the lesser of (i) the amount of the maintenance deposits held by the lessor associated with the specific maintenance event, or (ii) the qualifying costs related to the specific maintenance event.

Substantially all of these maintenance deposits are calculated based on a utilization measure of the leased aircrafts and engines, such as flight hours or cycles, and are used solely to collateralize the lessor for maintenance time run off the aircraft and engines until the completion of the maintenance of the aircraft and engines.

Maintenance deposits expected to be recovered from lessors are reflected as guarantee deposits in the accompanying consolidated statement of financial position. The portion of prepaid maintenance deposits that is deemed unlikely to be recovered, primarily relating to the rate differential between the maintenance deposits and the expected cost for the next related maintenance event that the deposits serve to collateralize, is recognized as supplemental rent in the consolidated statements of operations. Thus, any excess of the required deposit over the expected cost of the major maintenance event is recognized as supplemental rent in the consolidated statements of operations starting from the period the determination is made.

Any usage-based maintenance deposits to be paid to the lessor, related with a major maintenance event that (i) is not expected to be performed before the expiration of the lease agreement, (ii) is nonrefundable to the Company and (iii) is not substantively related to the maintenance of the leased asset, is accounted for as contingent rent in the consolidated statements of operations. The Company records lease payment as contingent rent when it becomes probable and reasonably estimable that the maintenance deposits payments will not be refunded.

During the year ended December 31, 2016, the Company added seventeen new aircraft to its fleet. The lease agreements of some of these aircraft do not require the obligation to pay maintenance deposits to lessors in advance in order to ensure major maintenance activities, so the Company does not record guarantee deposits regarding these aircraft. However, some of these agreements provide the obligation to make a maintenance adjustment payment to the lessors at the end of the contract period. This adjustment covers maintenance events that are not expected to be made before the termination of the contract. The Company recognizes this cost as a contingent rent during the lease term of the related aircraft, in the consolidated statement of operations.

The Company makes certain assumptions at the inception of the lease and at each consolidated statement of financial position date to determine the recoverability of maintenance deposits. These assumptions are based on various factors such as the estimated time between the maintenance events, the date the aircraft is due to be returned to the lessor, and the number of flight hours the aircraft and engines is estimated to be utilized before it is returned to the lessor.

In the event that lease extensions are negotiated, any extension benefit is recognized as a deferred lease incentive. The aggregate benefit of extension is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

During the years ended December 31, 2016 and 2015, the Company extended the lease term of two and three aircraft agreements, respectively. These extensions made available to the Company maintenance deposits that were recognized in prior periods in the consolidated statements of operations as contingent rent. The maintenance event for which the maintenance deposits were previously expensed was scheduled to occur after the original lease term and as such the contingent rental payments were expensed. However, when the leases were amended the maintenance deposits amounts became probable of recovery due to the longer lease term and as such they are being recognized as an asset.

The effect of these lease extensions were recognized as a guarantee deposit and a deferred lease incentive in the consolidated statements of financial position at the time of lease extension.

Because the lease extension benefits are considered lease incentives, the benefits are deferred in the caption other liabilities and are being recognized on a straight-line basis over the remaining revised lease terms.

j) Aircraft and engine maintenance

The Company is required to conduct diverse levels of aircraft maintenance. Maintenance requirements depend on the type of aircraft, age and the route network over which it operates.

Fleet maintenance requirements may involve short cycle engineering checks, for example, component checks, monthly checks, annual airframe checks and periodic major maintenance and engine checks.

Aircraft maintenance and repair consists of routine and non-routine works, divided into three general categories: (i) routine maintenance, (ii) major maintenance and (iii) component service.

(i) Routine maintenance requirements consists of scheduled maintenance checks on the Company's aircraft, including pre-flight, daily, weekly and overnight checks, any diagnostics and routine repairs and any unscheduled tasks performed as required. This type of maintenance events is currently serviced by the Company mechanics and are primarily completed at the main airports that the Company currently serves. All other maintenance activities are sub-contracted to qualified maintenance business partner, repair and overhaul organizations. Routine maintenance also includes scheduled tasks that can take from seven to 14 days to accomplish and typically are required approximately every 22 months. All routine maintenance costs are expensed as incurred.

(ii) Major maintenance consist of a series of more complex tasks that can take up to eight weeks to accomplish and typically are required approximately every five to six years.

Major maintenance is accounted for under the deferral method, whereby the cost of major maintenance and major overhaul and repair is capitalized (leasehold improvements to flight equipment) and amortized over the shorter of the period to the next major maintenance event or the remaining contractual lease term. The next major maintenance event is estimated based on assumptions including estimated usage. The United States Federal Aviation Administration ("FAA") and the Mexican Civil Aeronautic Authority (*Dirección General de Aeronáutica Civil* , or "DGAC") mandate maintenance intervals and average removal times as suggested by the manufacturer.

These assumptions may change based on changes in the utilization of aircraft, changes in government regulations and suggested manufacturer maintenance intervals. In addition, these assumptions can be affected by unplanned incidents that could damage an airframe, engine, or major component to a level that would require a heavy maintenance event prior to a scheduled maintenance event. To the extent the planned usage increases, the estimated life would decrease before the next maintenance event, resulting in additional expense over a shorter period.

(iii) The Company has a power-by-the hour agreement for component services, which guarantees the availability of aircraft parts for the Company's fleet when they are required. It also provides aircraft parts that are included in the redelivery conditions of the contract (hard time) without constituting an additional cost at the time of redelivery. The monthly maintenance cost associated with this agreement is recognized as incurred in the consolidated statements of operations.

The Company has an engine flight hour agreement that guarantees a cost per overhaul, provides miscellaneous engines coverage, caps the cost of foreign objects damage events, ensures there is protection from annual escalations, and grants an annual credit for scrapped components. The cost associated with the miscellaneous engines coverage is recorded as incurred in the consolidated statements of operations.

k) Rotable spare parts, furniture and equipment, net

Rotable spare parts, furniture and equipment, are recorded at cost and are depreciated to estimated residual values over their estimated useful lives using the straight-line method.

Aircraft spare engines have significant parts with different useful lives; therefore, they are accounted for as separate items (major components) of rotatable spare parts.

Pre-delivery payments refer to prepayments made to aircraft and engine manufacturers during the manufacturing stage of the aircraft.

The borrowing costs related to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset.

Depreciation rates are as follows:

	Annual depreciation rate
Aircraft parts and rotatable spare parts	8.3-16.7%
Aircraft spare engines	4.0-8.3%
Standardization	Remaining contractual lease term
Computer equipment	25%
Communications equipment	10%
Office furniture and equipment	10%
Electric power equipment	10%
Workshop machinery and equipment	10%
Service carts on board	20%
Leasehold improvements to flight equipment	The shorter of: (i) remaining contractual lease term, or (ii) the next major maintenance event

The Company reviews annually the useful lives and salvage values of these assets and any changes are accounted for prospectively.

The Company records impairment charges on rotatable spare parts, furniture and equipment used in operations when events and circumstances indicate that the assets may be impaired or when the carrying amount of a long-lived asset or related cash generating unit exceeds its recoverable amount, which is the higher of (i) its fair value less cost to sell and (ii) its value in use.

The value in use calculation is based on a discounted cash flow model, using our projections of operating results for the near future. The recoverable amount of long-lived assets is sensitive to the uncertainties inherent in the preparation of projections and the discount rate used in the calculation.

l) Foreign currency transactions and exchange differences

The Company's consolidated financial statements are presented in Mexican peso, which is the reporting and functional currency of the parent company. For each subsidiary, the Company determines the functional currency and items included in the financial statements of each entity are measured using the currency of the primary economic environment in which the entity operates ("the functional currency").

The financial statements of foreign subsidiaries prepared under IFRS and denominated in their respective local currencies, are translated into the functional currency as follows:

Transactions in foreign currencies are translated into the respective functional currencies at the exchange rates at the dates of the transactions.

All monetary assets and liabilities were translated at the exchange rate at the consolidated statement of financial position date.

All non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

Equity accounts are translated at the prevailing exchange rate at the time the capital contributions were made and the profits were generated.

Revenues, costs and expenses are translated at the average exchange rate during the applicable period.

The financial statements of foreign subsidiaries prepared under IFRS and denominated in their respective functional currencies are translated into Mexican pesos as follows:

The exchange rates used to translate the above amounts to Mexican pesos at September 30, 2017 and December 31, 2016 were Ps.18.1979 and Ps.20.6640, respectively, per U.S. dollar.

Foreign currency differences arising on translation into functional currency are recognized in the consolidated statement of operations. Furthermore, foreign currency differences arising on translation into presentation currency are allocated in OCI.

m) Liabilities and provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

For the operating leases, the Company is contractually obligated to return the leased aircraft in a specific condition. The Company accrues for restitution costs related to aircraft held under operating leases throughout the term of the lease, based upon the estimated cost of satisfying the return condition criteria for each aircraft. These return obligations are related to the costs to be incurred in the reconfiguration of aircraft (interior and exterior), painting, carpeting and other costs, which are estimated based on current cost adjusted for inflation. The return obligation is estimated at the inception of each leasing arrangement and recognized over the term of the lease.

The Company records aircraft lease return obligation reserves based on the best estimate of the return obligation costs under each aircraft lease agreement.

The aircraft lease agreements of the Company also require that the aircraft and engines be returned to lessors under specific conditions of maintenance. The costs of return, which in no case are related to scheduled major maintenance, are estimated and recognized ratably as a provision from the time it becomes likely such costs will be incurred and can be estimated reliably. These return costs are recognized on a straight-line basis as a component of supplemental rent and the provision is included as part of other liabilities, through the remaining lease term. The Company estimates the provision related to airframe, engine overhaul and limited life parts using certain assumptions including the projected usage of the aircraft and the expected costs of maintenance tasks to be performed.

n) Employee benefits

i) Personnel vacations

The Company and its subsidiaries in Mexico and Central America recognize a reserve for the costs of paid absences, such as vacation time, based on the accrual method.

ii) Termination benefits

The Company recognizes a liability and expense for termination benefits at the earlier of the following dates:

- a) When it can no longer withdraw the offer of those benefits; and
- b) When it recognizes costs for a restructuring that is within the scope of IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, and involves the payment of termination benefits.

The Company is demonstrably committed to a termination when, and only when, it has a detailed formal plan for the termination and is without realistic possibility of withdrawal.

iii) Seniority premiums

In accordance with Mexican Labor Law, the Company provides seniority premium benefits to the employees which rendered services to its Mexican subsidiaries under certain circumstances. These benefits consist of a one-time payment equivalent to 12 days' wages for each year of service (at the employee's most recent salary, but not to exceed twice the legal minimum wage), payable to all employees with 15 or more years of service, as well as to certain employees terminated involuntarily prior to the vesting of their seniority premium benefit.

Obligations relating to seniority premiums other than those arising from restructurings, are recognized based upon actuarial calculations and are determined using the projected unit credit method.

Remeasurement gains and losses are recognized in full in the period in which they occur in OCI. Such remeasurement gains and losses are not reclassified to profit or loss in subsequent periods.

The defined benefit asset or liability comprises the present value of the defined benefit obligation using a discount rate based on government bonds (*Certificados de la Tesorería de la Federación* , or “CETES” in Mexico), less the fair value of plan assets out of which the obligations are to be settled.

For entities in Costa Rica and Guatemala; there is no obligation to pay seniority premium benefits.

iv) Incentives

The Company has a quarterly incentive plan for certain personnel whereby cash bonuses are awarded for meeting certain performance targets. These incentives are payable shortly after the end of each quarter and are accounted for as a short-term benefit under IAS 19, *Employee Benefits* . A provision is recognized based on the estimated amount of the incentive payment.

During the year ended December 31, 2015, the Company adopted a new short-term benefit plan for certain key personnel whereby cash bonuses are awarded when certain Company’s performance targets are met. These incentives are payable shortly after the end of each year and also are accounted for as a short-term benefit under IAS 19, *Employee Benefits* . A provision is recognized based on the estimated amount of the incentive payment.

v) Long-term retention plan (“LTRP”)

During 2010, the Company adopted an employee LTRP, the purpose of which is to retain high performing employees within the organization by paying incentives contingent on meeting certain Company’s performance targets. Incentives under this plan were payable in three equal annual installments, following the provisions for other long-term benefits under IAS 19.

During 2014, this plan was restructured and it was renamed Long-term incentive plan (“LTIP”). This new plan consists of a share purchase plan (equity-settled) and a share appreciation rights “SARs” plan (cash settled).

See below for accounting for share-based payments.

vi) Share-based payments

a) LTIP

In April and October 2016, extensions to the LTIP (equity and cash settled) were approved at the Annual Ordinary Shareholder’s Meeting. These extensions were approved on the same terms as the original LTIP plan.

- Share purchase plan (equity-settled)

Certain key employees of the Company receive additional benefits through a share purchase plan denominated in Restricted Stock Units (“RSUs”), which has been classified as an equity-settled share-based payment. The cost of the equity-settled share purchase plan is measured at the grant date, taking into account the terms and conditions on which the share options were granted. The equity-settled compensation cost is recognized in the consolidated statement of operations under the caption of salaries and benefits, over the requisite service period.

- SARs plan (cash settled)

The Company granted SARs to key employees, which entitle them to a cash payment after a service period. The amount of the cash payment is determined based on the increase in the share price of the Company between the grant date and the time of exercise. The liability for the SARs is measured, initially and at the end of each reporting period until settled, at the fair value of the SARs, taking into account the terms and conditions on which the SARs were granted. The compensation cost is recognized in the consolidated statement of operations under the caption of salaries and benefits, over the requisite service period.

b) Management incentive plan (“MIP”)

- MIP I

Certain key employees of the Company receive additional benefits through a share purchase plan, which has been classified as an equity-settled share-based payment. The equity-settled compensation cost is recognized in the consolidated statement of operations under the caption of salaries and benefits, over the requisite service period.

- MIP II

On February 19, 2016, the Board of Directors of the Company authorized an extension to the MIP for certain key employees, this plan was named MIP II. In accordance with this plan, the Company granted SARs to key employees, which entitle them to a cash payment after a service period. The amount of the cash payment is determined based on the increase in the share price of the Company between the grant date and the time of exercise. The liability for the SARs is measured initially and at the end of each reporting period until settled at the fair value of the SARs, taking into account the terms and conditions on which the SARs were granted. The compensation cost is recognized in the consolidated statement of operations under the caption of salaries and benefits, over the requisite service period.

vii) Employee profit sharing

For the years ended December 2016, 2015 and 2014, the Mexican Income Tax Law (“MITL”), establishes that the base for computing current year employee profit sharing shall be the taxpayer’s taxable income of the year for income tax purposes, including certain adjustments established in the Income Tax Law, at the rate of 10%. The cost of employee profit sharing earned for the current-year is presented as an expense in the consolidated statements of operations. Subsidiaries in Central America do not have such profit sharing benefit, as it is not required by local regulation.

o) Leases

The determination of whether an arrangement is, or contains a lease, is based on the substance of the arrangement at inception date, whether fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset, even if that right is not explicitly specified in an arrangement.

Property and equipment lease agreements are recognized as finance leases if the risks and benefits incidental to ownership of the leased assets have been transferred to the Company when (i) the ownership of the leased asset is transferred to the Company upon termination of the lease; (ii) the agreement includes an option to purchase the asset at a reduced price; (iii) the term of the lease is for the major part of the economic life of the leased asset; (iv) the present value of minimum lease payments is at least substantially all of the fair value of the leased asset; or (v) the leased asset is of a specialized nature for the Company.

When the risks and benefits incidental to the ownership of the leased asset remain mostly with the lessor, they are classified as operating leases and rental payments are charged to results of operations on a straight-line over the term of the lease.

The Company's lease contracts for aircraft, engines and components parts are classified as operating leases.

Sale and leaseback

The Company enters into sale and leaseback agreements whereby an aircraft or engine is sold to a lessor upon delivery and the lessor agrees to lease such aircraft or engine back to the Company. Leases under sale and leaseback agreements meet the conditions for treatment as operating leases.

Profit or loss related to a sale transaction followed by an operating lease, is accounted for as follows:

- (i) Profit or loss is recognized immediately when it is clear that the transaction is established at fair value.
- (ii) If the sale price is at or below fair value, any profit or loss is recognized immediately. However, if the loss is compensated for by future lease payments at below market price, such loss is recognized as an asset in the consolidated statements of financial position, and amortized to the consolidated statements of operations in proportion to the lease payments over the contractual lease term.
- (iii) If the sale price is above fair value, the excess of the price above the fair value is deferred and amortized to the consolidated statements of operations over the asset's expected lease term, including probable renewals, with the amortization recorded as a reduction of rent expense.

p) Taxes and fees payable

The Company is required to collect certain taxes and fees from customers on behalf of government agencies and airports and to remit these to the applicable governmental entity or airport on a periodic basis. These taxes and fees include federal transportation taxes, federal security charges, airport passenger facility charges, and foreign arrival and departure fees. These charges are collected from customers at the time they purchase their tickets, but are not included in passenger revenue. The Company records a liability upon collection from the customer and discharges the liability when payments are remitted to the applicable governmental entity or airport.

q) Income taxes

Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the income statement. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except, in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carry-forward of unused tax credits and any available tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and available tax losses can be utilized, except, in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profits will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction in OCI.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The charge for income taxes incurred is computed based on tax laws approved in Mexico, Costa Rica and Guatemala at the date of the consolidated statement of financial position.

r) Derivative financial instruments and hedge accounting

The Company mitigates certain financial risks, such as volatility in the price of jet fuel, adverse changes in interest rates and exchange rate fluctuations, through a risk management program that includes the use of derivative financial instruments.

In accordance with IFRS 9 (2013), derivative financial instruments are recognized in the consolidated statement of financial position at fair value. At inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which it wishes to apply hedge accounting; as well as, the risk management objective and strategy for undertaking the hedge. The documentation includes the hedging strategy and objective, identification of the hedging instrument, the hedged item or transaction, the nature of the risks being hedged and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk(s).

Only if such hedges are expected to be effective in achieving offsetting changes in fair value or cash flows of the hedge item(s) and are assessed on an ongoing basis to determine that they actually have been effective throughout the financial reporting periods for which they were designated, hedge accounting treatment can be used.

Under the CFH accounting model, the effective portion of the hedging instrument's changes in fair value is recognized in OCI, while the ineffective portion is recognized in current year earnings. During the years ended December 31, 2016 and 2015, there was no ineffectiveness with respect to derivative financial instruments. The amounts recognized in OCI are transferred to earnings in the period in which the hedged transaction affects earnings.

The realized gain or loss of derivative financial instruments that qualify as CFH is recorded in the same caption of the hedged item in the consolidated statement of operations.

Accounting for the time value of options

The Company accounts for the time value of options in accordance with IFRS 9 (2013), which requires all derivative financial instruments to be initially recognized at fair value. Subsequent measurement for options purchased and designated as CFH requires that the option's changes in fair value be segregated into its intrinsic value (which will be considered the hedging instrument's effective portion in OCI) and its correspondent changes in extrinsic value (time value and volatility). The extrinsic value changes will be considered as a cost of hedging (recognized in OCI in a separate component of equity) and accounted for in income when the hedged items also is recognized in income.

Outstanding derivative financial instruments may require collateral to guarantee a portion of the unsettled loss prior to maturity. The amount of collateral delivered in pledge, is presented as part of non-current assets under the caption guarantee deposits, and the amount of the collateral is reviewed and adjusted on a daily basis based on the fair value of the derivative position.

s) Financial instruments – Disclosures

IFRS 7 requires a three-level hierarchy for fair value measurement disclosures and requires entities to provide additional disclosures about the relative reliability of fair value measurements.

t) Treasury shares

The Company's equity instruments that are reacquired (treasury shares), are recognized at cost and deducted from equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of treasury shares. Any difference between the carrying amount and the consideration received, if reissued, is recognized in additional paid in capital.

Share-based payment options exercised during the reporting period are settled with treasury shares.

u) Operating segments

The Company is managed as a single business unit that provides air transportation and related services, accordingly it has only one operating segment.

The Company has two geographic areas identified as domestic (Mexico) and international (United States of America and Central America).

v) Current versus non-current classification

The Company presents assets and liabilities in the consolidated statement of financial position based on current/non-current classification. An asset is current when it is: (i) expected to be realized or intended to be sold or consumed in normal operating cycle, (ii) expected to be realized within twelve months after the reporting period, or, (iii) cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period. All other assets are classified as non-current.

A liability is current when: (i) it is expected to be settled in normal operating cycle, (ii) it is due to be settled within twelve months after the reporting period, or, (iii) there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. The Company classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as noncurrent assets and liabilities.

w) Convenience translation

U.S. dollar amounts at September 30, 2017 shown in the unaudited interim condensed consolidated financial statements have been included solely for the convenience of the reader and are translated from Mexican pesos, using an exchange rate of Ps.18.1979 per U.S. dollar, as reported by the Mexican Central Bank (Banco de México) as the rate for the payment of obligations denominated in foreign currency payable in Mexico in effect on September 30, 2017. Such translation should not be construed as a representation that the peso amounts have been or could be converted into U.S. dollars at this or any other rate. The referred information in U.S. dollars is solely for information purposes and does not represent the amounts are in accordance with IFRS or the equivalent in U.S. dollars in which the transactions were conducted or in which the amounts presented in Mexican pesos can be translated or realized.

Notes - Interim financial reporting

**CONTROLADORA VUELA COMPAÑÍA DE AVIACIÓN, S.A.B. DE C.V. AND
SUBSIDIARIES
(d.b.a. VOLARIS)**

Notes to the Unaudited Interim Condensed Consolidated Financial Statements

At September 30, 2017 and December 31, 2016

(In thousands of Mexican pesos and thousands of U.S. dollars,
except when indicated otherwise)

1. Description of the business and summary of significant accounting policies

Controladora Vuela Compañía de Aviación, S.A.B. de C.V. ("Controladora" or the "Company") was incorporated in Mexico in accordance with Mexican Corporate laws on October 27, 2005.

Controladora is domiciled in Mexico City at Av. Antonio Dovali Jaime No. 70, 13th Floor, Tower B, Colonia Zedec Santa Fe, Mexico City.

The Company, through its subsidiary Concesionaria Vuela Compañía de Aviación, S.A.P.I. de C.V. ("Concesionaria"), has a concession to provide air transportation services for passengers, cargo and mail throughout Mexico and abroad.

Concesionaria's concession was granted by the Mexican federal government through the Mexican Communications and Transportation Ministry (*Secretaría de Comunicaciones y Transportes* or "*SCT*") on May 9, 2005 initially for a period of five years and was extended on February 17, 2010 for an additional period of ten years.

Concesionaria made its first commercial flight as a low-cost airline on March 13, 2006. The Company operates under the trade name of "Volaris". On September 11, 2013, Controladora Vuela Compañía de Aviación, S.A.P.I. de C.V. changed its corporate name to Controladora Vuela Compañía de Aviación, S.A.B. de C.V.

On September 23, 2013, the Company completed its dual listing Initial Public Offering ("IPO") on the New York Stock Exchange ("NYSE") and on the Mexican Stock Exchange (*Bolsa Mexicana de Valores*, or "*BMV*"), and on September 18, 2013 its shares started trading under the ticker symbol "VLRS" and "VOLAR", respectively.

On November 16, 2015, certain shareholders of the Company completed a secondary follow-on equity offering on the NYSE.

On November 10, 2016, the Company, through its subsidiary Vuela Aviación, S.A. ("Volaris Costa Rica"), obtained from the Costa Rican civil aviation authorities an air operator certificate to provide air transportation services for passengers, cargo and mail, in scheduled and non-scheduled flights for an initial period of five years.

The accompanying unaudited interim condensed consolidated financial statements and notes were authorized for their issuance by the Company's Chief Executive Officer, Enrique Beltranena, and Chief Financial Officer, Fernando Suárez, on October 24, 2017. Subsequent events have been considered through that date.

Relevant events

Operations in Central America

On December 1, 2016, the Company's subsidiary Vuela Aviación, started operations in Costa Rica.

Secondary follow-on equity offering

On November 16, 2015; the Company completed a secondary follow-on equity offering, in which certain shareholders sold 108,900,000 of the Company's Ordinary Participation Certificates (*Certificados de Participación Ordinarios or "CPOs"*), in the form of American Depositary Shares, or "ADSs", in the United States and other countries outside Mexico. No CPOs or ADSs were sold by the Company and the selling shareholders received all of the proceeds from this offering.

2. Basis of preparation

The unaudited interim condensed consolidated financial statements, which include the consolidated statements of financial position as of September 30, 2017 and December 31, 2016 (audited), and the related consolidated statements of operations, comprehensive income, changes in equity and cash flows for each of the nine months period ended September 30, 2017 and 2016, have been prepared in accordance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* and using the same accounting policies applied in preparing the annual financial statements, except as explained below .

The unaudited interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Company's annual consolidated financial statements as of December 31, 2016 and 2015, and for the three years period ended December 31, 2016.

Basis of consolidation

The accompanying unaudited interim condensed consolidated financial statements comprise the financial statements of the Company and its subsidiaries. At September 30, 2017 and December 31, 2016, for accounting purposes the companies included in the unaudited interim condensed consolidated financial statements are as follows:

Name	Activities	Principal	Country	% Equity interest	
				September 30, 2017	December 31, 2016
Concesionaria	Air transportation services for passengers, cargo and mail throughout Mexico and abroad		Mexico	100%	100%
Volaris Costa Rica	Air transportation services for passengers, cargo and mail in Costa Rica and abroad		Costa Rica	100%	100%
Vuela, S.A. ("Vuela")*	Air transportation services for passengers, cargo and mail in Guatemala and abroad		Guatemala	100%	100%
Comercializadora Volaris, S.A. de C.V.	Merchandising of services		Mexico	100%	100%
Servicios Earhart, S.A.	Recruitment and payroll		Guatemala	100%	100%
Servicios Corporativos Volaris, S.A. de C.V. ("Servicios Corporativos")	Recruitment and payroll		Mexico	100%	100%
Servicios Administrativos Volaris, S.A. de C.V. ("Servicios Administrativos")	Recruitment and payroll		Mexico	100%	100%
Operaciones Volaris, S.A. de C.V. ("Servicios Operativos") (1)	Purchase and sale of goods and services		Mexico	100%	100%
Deutsche Bank México, S.A., Trust 1710	Pre-delivery payments financing		Mexico	100%	100%
Deutsche Bank México, S.A., Trust 1711	Pre-delivery payments financing		Mexico	100%	100%
Irrevocable Administrative Trust number F/307750 "Administrative Trust"	Share administration trust		Mexico	100%	100%
Irrevocable Administrative Trust number F/745291	Share administration trust		Mexico	100%	100%

*The Company has not started operations in Guatemala.

(1) With effect from August 3, 2016, the name of the Company was changed from Servicios Operativos Terrestres Volaris, S.A. de C.V. to Operaciones Volaris, S.A. de C.V.

New and amended standards and interpretations

The accounting policies adopted in the preparation of the unaudited interim condensed consolidated financial statements are consistent with those followed in the preparation of the Company's annual consolidated financial statements for the year ended December 31, 2016, except for the adoption of new standards and interpretations effective as of January 1, 2017. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The nature and the effect of these changes are disclosed below. Although these new standards and amendments applied for the first time in 2017, they did not have a material impact on the unaudited interim condensed consolidated financial statements of the Company. The nature and the impact of each new standard or amendment is described below:

Amendments to IAS 7 – Statement of cash flows: Disclosure Initiative

The amendments require entities to provide disclosures about changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). On initial application of the amendment, entities are not required to provide comparative information for preceding periods. The Company is not required to provide additional disclosures in its unaudited interim condensed consolidated financial statements, but will disclose additional information in its annual consolidated financial statements for the year ended December 31, 2017.

Amendments to IAS 12 – Income Taxes: Recognition of Deferred Tax Assets for Unrecognized Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference.

Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognized in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.

The application of these amendments have no effect on the Company's financial position and performance as the Company has no deductible temporary differences or assets that are in the scope of the amendments.

IFRS 9 (2014) Financial Instruments

The Company adopted IFRS 9 (2013) in connection with its 2014 unaudited interim condensed consolidated financial statements. IFRS 9 (2014) requires entities to apply an expected credit loss (ECL) model that replaces the IAS 39's incurred loss model. The ECL model applies to debt instruments accounted for at amortized cost or at fair value through OCI, most loan commitments, financial guarantee contracts, contract assets under IFRS 15 *Revenue from Contracts with Customers* and lease receivables under IAS 17 *Leases* or IFRS 16 *Leases*.

IFRS 9 (2014) is effective for annual periods beginning on or after January 1, 2018.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a new five-step model that will apply to revenue arising from contracts with customers, which may require more judgement and estimates than with the revenue recognition process that are required under the existing IAS 18 *Revenue Recognition*. Under IFRS 15, revenue is accounted for an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or providing services to a customer. The principles in IFRS 15 provide a more structured approach to measuring and recognizing revenue.

The new revenue standard will supersede all current revenue recognition requirements under IFRS. The standard permits two adoption methods: retrospectively to each reporting period presented (full retrospective method), or retrospectively with the cumulative effect recognized at the date of initial application (the cumulative catch-up transition method). IFRS 15 is required to be adopted for annual periods beginning on or after January 1, 2018. Early adoption is permitted.

The Company plans to adopt the new standard on the required effective date, and currently anticipates utilizing the full retrospective method, in order to provide for comparative results in all periods presented.

While the Company is still evaluating the impact of the new standard, it expects the new standard to impact the timing of recognition of certain air travel-related services and non air-travel related services which under current accounting are recognized when the service is provided. Under the new standard, such services will likely be recognized when the air travel service is provided.

IFRS 15 provides presentation and disclosure requirements, which are more detailed than under current IFRS. The presentation requirements represent a significant change from current practice and increase the volume of disclosures required in the Company's unaudited interim condensed consolidated financial statements. Many of the disclosure requirements in IFRS 15 are completely new. In 2017, the Company will develop and start testing of appropriate systems, internal controls, policies and procedures necessary to collect and disclose the required information.

Furthermore, the Company will monitor and assess any further developments issued by the IASB and the transition resource group. The Company continues to monitor and assess the potential impact of changes to IFRS 15 and related implementation guidance as they become available.

IFRS 16 Leases

IFRS 16 was issued in January 2016; and it replaces IAS 17 *Leases*, IFRIC 4 *Determining Whether an Arrangement Contains a Lease*, SIC-15 *Operating Leases-Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17.

The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset).

Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

IFRS 16 also requires lessees to make more extensive disclosures than under IAS 17.

IFRS 16 is effective for annual periods beginning on or after January 1, 2019. Early application is permitted, but not before an entity applies IFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

The Company is in process to complete an IFRS 16 assessment. The adoption of this standard will have a significant impact on the accounting for leased aircraft, engines and other lease agreements, requiring the presentation of those leases with durations of greater than twelve months on the unaudited interim condensed consolidated statement of financial position. The Company anticipates adopting the new standard using the full retrospective method, see Note 12 for more information on the Company's lease agreements.

Annual Improvements 2012-2014 Cycle

These improvements are effective for annual periods beginning on or after 1 January 2016. They include:

IAS 19 Employee Benefits

The amendment clarifies that market depth of high quality corporate bonds is assessed based on the currency in which the obligation is denominated, rather than the country where the obligation is located. When there is no deep market for high quality corporate bonds in that currency, government bond rates must be used. This amendment is applied prospectively. The adoption of this amendment to IAS 19 did not have any impact on the unaudited interim condensed consolidated financial statements, since the discount rates of the Company's obligations for seniority premiums in Mexico are already determined using government bonds (*Certificados de la Tesorería de la Federación*, or "CETES" in Mexico).

IAS 34 Interim Financial Reporting

The amendment clarifies that the required interim disclosures must either be in the unaudited interim condensed consolidated financial statements or incorporated by cross-reference between the unaudited interim condensed consolidated financial statements and wherever they are included within the interim financial report. The other information within the interim financial report must be available to users on the same terms as the unaudited interim condensed consolidated financial statements and at the same time. This amendment must be applied retrospectively.

These amendments are not expected to have any impact on the Company.

Amendments to IAS 1 Disclosure Initiative

The amendments to IAS 1 *Presentation of Financial Statements* clarify, rather than significantly change, existing IAS 1 requirements. The amendments clarify: (a) the materiality requirements in IAS 1; (b) that specific line items in the statement(s) of profit or loss and OCI and the statement of financial position may be disaggregated; (c) that entities have flexibility as to the order in which they present the notes to financial statements; and (d) that the share of OCI of associates and joint ventures accounted for using the equity method must be presented in aggregate as a single line item, and classified between those items that will or will not be subsequently reclassified to profit or loss.

Furthermore, the amendments clarify the requirements that apply when additional subtotals are presented in the statement of financial position and the statements of profit or loss and OCI.

The adoption of this amendment did not have any significant impact on the presentation and disclosures in these unaudited interim condensed consolidated financial statements.

Amendments to IFRS 2 Classification and Measurement of Share-based Payment Transactions

In June 2016, the IASB issued amendments to IFRS 2 *Share-based Payment* that address three main areas: the effects of vesting conditions on the measurement of a cash-settled; share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash-settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. The amendments are effective for annual periods beginning on or after 1 January 2018, with early application permitted. The Company is assessing the potential effect of the amendments on its unaudited interim condensed consolidated financial statements.

3. Significant accounting judgments, estimates and assumptions

The preparation of these unaudited interim condensed consolidated financial statements in accordance with IAS 34 requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities at the date of the Company's unaudited interim condensed consolidated financial statements.

4. Convenience translation

U.S. dollar amounts at September 30, 2017 shown in the unaudited interim condensed consolidated financial statements have been included solely for the convenience of the reader and are translated from Mexican pesos, using an exchange rate of Ps.18.1979 per U.S. dollar, as reported by the Mexican Central Bank (Banco de México) as the rate for the payment of obligations denominated in foreign currency payable in Mexico in effect on September 30, 2017. Such translation should not be construed as a representation that the peso amounts have been or could be converted into U.S. dollars at this or any other rate. The referred information in U.S. dollars is solely for information purposes and does not represent the amounts are in accordance with IFRS or the equivalent in U.S. dollars in which the transactions were conducted or in which the amounts presented in Mexican pesos can be translated or realized.

5. Seasonality of operations

The results of operations for any interim period are not necessarily indicative of those for the entire year because the business is subject to seasonal fluctuations. The Company expect demand to be greater during the summer in the northern hemisphere, in December and around Easter, which can fall either in the first or second quarter, compared to the rest of the year. The Company and subsidiaries generally experience their lowest levels of passenger traffic in February, September and October, given their proportion of fixed costs, seasonality can affect their profitability from quarter to quarter. This information is provided to allow for a better understanding of the results, however management has concluded that this does not constitute "highly seasonal" as considered by IAS 34.

6. Risk management

Financial risk management

The Company's activities are exposed to different financial risks derived from exogenous variables which are not under its control but whose effects might be potentially adverse such as: (i) market risk, (ii) credit risk, and (iii) liquidity risk. The Company's global risk management program is focused on uncertainty in the financial markets and tries to minimize the potential adverse effects on the net earnings and working capital requirements. The Company uses derivative financial instruments to hedge part of these risks. The Company does not enter into derivatives for trading or speculative purposes.

The sources of these financial risks exposures are included in both "on balance sheet" exposures, such as recognized financial assets and liabilities, as well as in "off-balance sheet" contractual agreements and on highly expected forecasted transactions. These on and off-balance sheet exposures, depending on their profiles, do represent potential cash flow variability exposure, in terms of receiving less inflows or facing the need to meet outflows which are higher than expected, therefore increase the working capital requirements.

Also, since adverse movements erode the value of recognized financial assets and liabilities, as well some other off-balance sheet financial exposures such as operating leases, there is a need for value preservation, by transforming the profiles of these fair value exposures.

The Company has a Finance and Risk Management team, which identifies and measures financial risk exposures, in order to design the strategies to mitigate or transform the profile of certain risk exposures, which are taken up to the corporate governance level for approval.

Market risk

a) Jet fuel price risk

Since the contractual agreements with jet fuel suppliers include reference to jet fuel index, the Company is exposed to fuel price risk which might have an impact on the forecasted consumption volumes. The Company's jet fuel risk management policy aims to provide the Company with protection against increases in jet fuel prices. In an effort to achieve the aforesaid, the risk management policy allows the use of derivative financial instruments available on over the counter ("OTC") markets with approved counterparties and within approved limits. Aircraft jet fuel consumed in the nine months ended September 30, 2017 and 2016 represented 29% and 27%, of the Company's operating expenses, respectively. Additionally, the aircraft jet fuel consumed in the three months ended September 30, 2017 and 2016 represented 29% and 28%, of the Company's operating expenses, respectively.

During the nine months period ended September 30, 2017 and 2016, the Company entered into US Gulf Coast Jet fuel 54 Asian call options designated to hedge 61.1 and 134.3 million gallons, respectively. Such hedges represent a portion of the projected consumption for the next nine months.

During the three months period ended September 30, 2017, the Company did not enter into US Gulf Coast Jet fuel 54 Asian call options. During the three months period ended September 30, 2016, the Company entered into US Gulf Coast Jet fuel 54 Asian call options designated to hedge 32.1 million gallons, such hedges represent a portion of the projected consumption for the next nine months.

The Company decided to early adopt IFRS 9 (2013), beginning on October 1, 2014, which allows the Company to separate the intrinsic value from the extrinsic value of an option contract; as such, the change in the intrinsic value can be designated as hedge accounting. Because the extrinsic value (time & volatility value) of the Asian call options is related to a "transaction related hedged item," it is required to be segregated and accounted for as a "cost of hedging" in OCI and accrued as a separate component of stockholders' equity until the related hedged item matures and therefore impacts profit and loss.

The underlying (jet fuel GC54) of the options held by the Company is a consumption asset (energy commodity), which is not in the Company's inventory. Instead, it is directly consumed by the Company's fleet at different airport terminals. Therefore, although a consumption asset is involved, its initial recognition does not generate a book adjustment in the Company's inventories. Rather, it is initially accounted for in the Company's OCI and a reclassification adjustment is made from OCI towards the profit and loss and recognized in the same period or periods during which the hedged item is expected to be allocated to profit and loss. Furthermore, the Company hedges its forecasted jet fuel consumption month after month, which is congruent with the maturity date of the monthly serial Asian call options.

As of September 30, 2017 and December 31, 2016, the fair value of the outstanding US Gulf Coast Jet Fuel Asian call options was a gain of Ps.404,128 and Ps.867,809, respectively, and is presented as part of the financial assets in the consolidated statement of financial position.

The amount of cost of hedging derived from the extrinsic value changes of these options as of September 30, 2017 recognized in OCI totals Ps.3,337 (the positive cost of hedging as of December 31, 2016 totals Ps.218,038), and will be recycled to the fuel cost throughout 2017 and until 2018, as these options expire on a monthly basis.

During the three months period ended September 30, 2017 and 2016, the net positive cost of these options recycled to the fuel cost was Ps.2,596 and Ps.87,004, respectively.

During the nine months period ended September 30, 2017 and 2016, the net cost of these options recycled to the fuel cost was Ps.129,886 and Ps.305,166, respectively.

The following table includes the notional amounts and strike prices of the derivative financial instruments outstanding as of the end of the period:

Position as of September 30, 2017					
Jet fuel Asian call option contracts maturities					
Jet fuel risk	4Q17	2017 Total	1H18	2H18	2018 Total
Notional volume in gallons (thousands)*	31,643	31,643	69,518	61,863	131,381
Strike price agreed rate per gallon (U.S. dollars)**	1.4014	1.4014	1.6861	1.8106	1.7447
Approximate percentage of hedge (of expected consumption value)	57%	57%	50%	40%	45%

* US Gulf Coast Jet 54 as underlying asset

** Weighted average

Position as of December 31, 2016						
Jet fuel Asian call option contracts maturities

* US Gulf Coast Jet 54 as underlying asset

** Weighted average

b) Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows will fluctuate due to changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities; when revenue or expense is denominated in a different currency from the Company's functional currency (including the amounts payable arising from U.S. dollar denominated expenses and U.S. dollars linked expenses and payments). To mitigate this risk, the Company may use foreign exchange derivative financial instruments.

The Company's revenue is mostly generated in Mexican peso, however, for the nine months ended September 30, 2017 and 2016, the U.S. dollar denominated revenues from operations in the United States of America and Central America accounted 28% and 32%, respectively.

For the three months ended September 30, 2017 and 2016, the U.S. dollar denominated revenues from operations in the United States of America and Central America accounted 30% and 29%, respectively.

The Company's U.S. dollar denominated cash collections as of September 30, 2017 and December 31, 2016 accounted for 41% and 38%, respectively.

The Company's foreign exchange on and off-balance sheet exposure as of September 30, 2017 and December 31, 2016 is as set forth below:

	Thousands of U.S. dollars	
	September 30, 2017	December 31, 2016
Assets:		
Cash and cash equivalents	US\$ 245,634	US\$ 297,565
Other accounts receivable	11,525	11,619
Aircraft maintenance deposits paid to lessors	369,983	343,787
Deposits for rental of flight equipment	27,981	30,025
Derivative financial instruments	22,207	41,996
Total assets	677,330	724,992
Liabilities:		
Financial debt	110,622	76,789
Foreign suppliers	50,899	56,109
Taxes and fees payable	7,412	6,874
Derivative financial instruments	362	684
Total liabilities	169,295	140,456
Net foreign currency position	US\$ 508,035	US\$ 584,536

The exchange rates used to translate the above amounts to Mexican pesos at September 30, 2017 and December 31, 2016 were Ps.18.1979 and Ps.20.6640, respectively, per U.S. dollar.

	Thousands of U.S. dollars	
	2017	2016
Off-balance sheet transactions exposure:		
Aircraft and engine operating lease payments (Note 12)	US\$ 1,611,169	US\$ 1,727,644
Aircraft and engine commitments (Note 16)	266,819	315,326
Total foreign currency	US\$ 1,877,988	US\$ 2,042,970

During the three months period ended September 30, 2017, the Company did not enter into foreign exchange rate derivatives financial instruments

For the three months ended September 30, 2017, the loss on the foreign currency forward contracts was Ps. 9,224, which was recognized as part of rental expense in the consolidated statements of operations

As of September 30, 2017, the unrealized loss of Ps. 6,591 relating to the foreign currency forward contracts is included in OCI.

As of December 31, 2016, the Company did not enter into foreign exchange rate derivatives financial instruments.

c) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations and flight equipment operating lease agreements with floating interest rates.

The Company's results are affected by fluctuations in certain benchmark market interest rates due to the impact that such changes may have on operational lease payments indexed to the *London Inter Bank Offered Rate* ("LIBOR"). The Company uses derivative financial instruments to reduce its exposure to fluctuations in market interest rates and accounts for these instruments as an accounting hedge. In most cases, when a derivative can be tailored within the terms and it perfectly matches the cash flows of a leasing agreement, it may be designated as a CFH and the effective portion of fair value variations are recorded in equity until the date the cash flow of the hedged lease payment is recognized in unaudited interim condensed consolidated statements of operations.

As of December 31, 2016, the Company had outstanding hedging contracts in the form of interest rate swaps with a notional amount of US\$70,000 and fair value of Ps.14,144, recorded in liabilities. All of the Company's position matured on April 30, 2017.

d) Liquidity risk

Liquidity risk represents the risk that the Company has insufficient funds to meet its obligations.

Because of the cyclical nature of the business, the operations, and its investment and financing needs related to the acquisition of new aircraft and renewal of its fleet, the Company requires liquid funds to meet its obligations.

The Company attempts to manage its cash and cash equivalents and its financial assets, relating the term of investments with those of its obligations. Its policy is that the average term of its investments may not exceed the average term of its obligations. This cash and cash equivalents position is invested in highly-liquid short-term instruments through financial entities.

The Company has future obligations related to maturities of bank borrowings and derivative contracts. The Company's off-balance sheet exposure represents the future obligations related to operating lease contracts and aircraft purchase contracts. The Company concluded that it has a low concentration of risk since it has access to alternate sources of funding.

The table below presents the Company's contractual principal payments required on its financial liabilities and the derivative financial instruments fair value:

	September 30, 2017		
	Within one year	One to five years	Total
Interest-bearing borrowings:			
Pre-delivery payments facilities (Note 8)	Ps. 1,102,566	Ps. 900,257	Ps. 2,002,823
Working capital facilities (Note 8)	377,487	-	377,487
Derivative financial instruments:			
Foreign currency forward contracts	6,591	-	6,591
Total	Ps. 1,486,644	Ps. 900,257	Ps. 2,386,901

	December 31, 2016		
	Within one year	One to five years	Total
Interest-bearing borrowings:			
Pre-delivery payments facilities (Note 8)	Ps. 328,845	Ps. 943,046	Ps. 1,271,891
Short-term working capital facilities (Note 8)	716,290	-	716,290
Derivative financial instruments:			
Interest rate swaps contracts	14,144	-	14,144
Total	Ps. 1,059,279	Ps. 943,046	Ps. 2,002,325

e) Credit risk

Credit risk is the risk that any counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily for trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments including derivatives.

Financial instruments that expose the Company to credit risk involve mainly cash equivalents and accounts receivable. Credit risk on cash equivalents relate to amounts invested with major financial institutions.

Credit risk on accounts receivable relates primarily to amounts receivable from the major international credit card companies.

The Company has a high receivable turnover; hence management believes credit risk is minimal due to the nature of its businesses, which have a large portion of their sales settled in credit cards.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

Some of the outstanding derivative financial instruments expose the Company to credit loss in the event of nonperformance by the counterparties to the agreements. However, the Company does not expect any of its counterparties to fail to meet their obligations. The amount of such credit exposure is generally the unrealized gain, if any, in such contracts. To manage credit risk, the Company selects counterparties based on credit assessments, limits overall exposure to any single counterparty and monitors the market position with each counterparty. The Company does not purchase or hold derivative financial instruments for trading purposes. At September 30, 2017, the Company concluded that its credit risk related to its outstanding derivative financial instruments is low, since it has no significant concentration with any single counterparty and it only enters into derivative financial instruments with banks with high credit-rating assigned by international credit-rating agencies.

f) Capital management

Management believes that the resources available to the Company are sufficient for its present requirements and will be sufficient to meet its anticipated requirements for capital expenditures and other cash requirements for the 2017 fiscal year.

The primary objective of the Company's capital management is to ensure that it maintains healthy capital ratios to support its business and maximize the shareholder's value. No changes were made in the objectives, policies or processes for managing capital during the nine months ended September 30, 2017. The Company is not subject to any externally imposed capital requirement, other than the legal reserve.

7. Fair value measurements

The only financial assets and liabilities recognized at fair value on a recurring basis are the derivative financial instruments.

Fair value is the price that would be received from sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (i) In the principal market for the asset or liability, or
- (ii) In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is assessed using the course of thought which market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The assessment of a non-financial asset's fair value considers the market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted (unadjusted) prices in active markets for identical assets or liabilities.
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Set out below, is a comparison by class of the carrying amounts and fair values of the Company's financial instruments, other than those for which carrying amounts are reasonable approximations of fair values:

	Carrying amount		Fair value	
	September 30, 2017	December 31, 2016	September 30, 2017	December 31, 2016
Assets				
Derivative financial instruments	Ps. 404,128	Ps. 867,809	Ps. 404,128	Ps. 867,809
Liabilities				
Financial debt*	(2,380,310)	(1,988,181)	(2,070,473)	(1,331,931)
Derivative financial instruments:

Foreign currency forward contracts	OCI	3,974	-
Total		Ps. 249,736	Ps. (502)

8. Financial assets and liabilities

At September 30, 2017 and December 31, 2016, the Company's financial assets are represented by cash and cash equivalents, trade and other accounts receivable, accounts receivable with carrying amounts that approximate their fair value.

a) Financial assets

	September 30, 2017	December 31, 2016
Derivative financial instruments designated as cash flow hedges (effective portion recognized within OCI)		
Jet fuel Asian call options	Ps. 404,128	Ps. 867,809
Total financial assets	Ps. 404,128	Ps. 867,809
Presented on the consolidated statements of financial position as follows:		
Current	Ps. 367,984	Ps. 543,528
Non-current	Ps. 36,144	Ps. 324,281

b) Financial debt

(i) At September 30, 2017 and December 31, 2016, the Company's short-term and long-term debt consists of the following:

	September 30, 2017	December 31, 2016
I. Revolving line of credit with Banco Santander México, S.A., Institución de Banca Múltiple, Grupo Financiero Santander ("Santander") and Banco Nacional de Comercio Exterior, S.N.C. ("Bancomext"), in U.S. dollars, to finance pre-delivery payments, maturing on May 31, 2021, bearing annual interest rate at the three-month LIBOR plus a spread according to the contractual conditions of each disbursement in a range of 1.99 to 2.25 percentage points.	Ps. 2,002,823	Ps. 1,271,891
II. In December 2016, the Company entered into a short-term working capital facility with Banco Nacional de México S.A. ("Citibanamex") in Mexican pesos, bearing annual interest rate at TIIE 28 days plus 0.80 points.	377,487	406,330
III. In December 2016, the Company entered into a short-term working capital facility, with Bank of America México S.A. Institución de Banca Múltiple ("Bank of America") in U.S. dollars, bearing annual interest rate at the one-month LIBOR plus 1.60 points, which the Company terminated in March 2017.	-	309,960
IV. Accrued interest	11,192	6,102
	2,391,502	1,994,283
Less: Short-term maturities	1,491,246	1,051,237
Long-term	Ps. 900,256	Ps. 943,046

(ii) The following table provides a summary of the Company's contractual payments of financial debt and accrued interest at September 30, 2017:

	Within one year	October 2018 - September 2019	October 2019 - September 2020	October 2020 - September 2021	Total
Finance debt:					
Santander/Bancomext	Ps. 1,112,830	Ps. 726,301	Ps. 139,164	Ps. 34,791	Ps. 2,013,086
Citibanamex	378,416	-	-	-	378,416
Total	Ps. 1,491,246	Ps. 726,301	Ps. 139,164	Ps. 34,791	Ps. 2,391,502

The "Santander/Bancomext" loan agreement provides for certain covenants, including limits to the ability to, among others:

- i) Incur debt above a specified debt basket unless certain financial ratios are met.
- ii) Create liens.
- iii) Merge with or acquire any other entity without the previous authorization of the Banks.
- iv) Dispose of certain assets.
- v) Declare and pay dividends, or make any distribution on the Company's share capital unless certain financial ratios are met.

At September 30, 2017 and December 31, 2016, the Company was in compliance with the covenants under the above-mentioned loan agreement.

For purposes of financing the pre-delivery payments, Mexican trust structures were created whereby, the Company assigned its rights and obligations under the Airbus Purchase Agreement with Airbus S.A.S. ("Airbus"), including its obligation to make pre-delivery payments to the Mexican trusts, and the Company guaranteed the obligations of the Mexican trusts under the financing agreement (Deutsche Bank Mexico, S.A. Trust 1710 and 1711).

c) **Financial liabilities**

	September 30,		December 31,
	2017		2016
Derivative financial instruments designated as CFH (effective portion recognized within OCI):			
Interest rate swap contracts	Ps. -	Ps.	14,144
Foreign currency forward contracts	6,591		-
Total financial liabilities	Ps. 6,591	Ps.	14,144
Presented on the consolidated statements of financial position as follows:			
Current	Ps. 6,591	Ps.	14,144
Non-current	Ps. -	Ps.	-

9. Related parties

- a) An analysis of balances due from/to related parties at September 30, 2017 and December 31, 2016 is provided below. All companies are considered affiliates, since the Company's primary shareholders or directors are also direct or indirect shareholders of the related parties:

	Type of transactions	Country of origin	September 30, 2017	December 31, 2016	Terms
Due to:					
One Link, S.A. de C.V. ("One Link")	Call center fees	El Salvador	Ps. 54,827	Ps. 33,775	30 days
Aeromantenimiento, S.A. ("Aeroman")	Aircraft and engine maintenance	El Salvador	12,943	30,627	30 days
Human Capital International HCI, S.A. de C.V. ("Human Capital")	Professional services	Mexico	23	-	30 days
SearchForce, Inc. ("SearchForce")	Internet services	Mexico	-	620	30 days
			Ps. 67,793	Ps. 65,022	

As of September 30, 2017 and December 31, 2016, the Company did not recognize any impairment of receivables relating to amounts owed by related parties. This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

- b) During the three months ended September 30, 2017 and 2016, the Company had the following transactions with related parties:

Related party transactions	Country of origin	2017	2016
Expenses:			
Maintenance	El Salvador	Ps. 47,375	Ps. 73,027
Fees	Mexico/El Salvador	53,868	45,448
Other	Mexico/El Salvador/Guatemala	3,849	2,475

During the nine months ended September 30, 2017 and 2016, the Company had the following transactions with related parties:

Related party transactions	Country of origin	2017	2016
Expenses:			
Maintenance	El Salvador	Ps. 178,155	Ps. 210,547
Fees	Mexico/El Salvador	150,553	125,084
Other	Mexico/El Salvador/Guatemala	7,801	5,303

c) Servprot

Servprot S.A. de C.V. ("Servprot") is a related party because Enrique Beltranena, the Company's Chief Executive Officer, and Rodolfo Montemayor, a member of the board of directors, are shareholders of such company. Servprot provides security services for Mr. Beltranena and his family, as well as for Mr. Montemayor.

During the three months ended September 30, 2017 and 2016 the Company expensed Ps.551 and Ps.555, respectively for this concept.

During the nine months ended September 30, 2017 and 2016 the Company expensed Ps.1,393 and Ps.1,174, respectively for this concept.

d) Aeroman

Aeroman is a related party because Roberto José Kriete Ávila, a member of the Company's board of directors, and members of his immediate family are shareholders of Aeroman. We entered into an aircraft repair and maintenance service agreement with Aeroman on March 6, 2007. This agreement provides that we have to use Aeroman, exclusively for aircraft repair and maintenance services, subject to availability. Under this agreement, Aeroman provides inspection, maintenance, repair and overhaul services for aircraft. The Company makes payments under this agreement depending on the services performed. This agreement is for a 10 year term.

As of September 30, 2017 and December 31, 2016, the balances due under the agreement with Aeroman were Ps.12,943 and Ps.30,627, respectively.

For the three months ended September 30, 2017 and 2016, the Company incurred expenses under this agreement of Ps.48,646 and Ps.74,214, respectively.

For the nine months ended September 30, 2017 and 2016, the Company incurred expenses under this agreement of Ps.180,989 and Ps.213,139, respectively.

e) Human Capital International

The Company entered into a professional services agreement with Human Capital International HCI, S.A. de C.V., or Human Capital International, on February 25, 2015, for the selection and hiring of executives. Rodolfo Montemayor Garza, a member of the Company's board of directors, is a founder and chairman of the board of directors of Human Capital International.

As of December 31, 2017, the balance due under this agreement was Ps.23.

For the three months period ended September 30, 2017 and 2016, the Company accrued an expense under this agreement of Ps.20 and Ps.1,015, respectively.

For the nine months period ended September 30, 2017 and 2016, the Company accrued an expense under this agreement of Ps.816 and Ps.2,888, respectively.

f) One Link

One Link is a related party because Marcho Baldochi, an alternate member of the board; is a director of the Company.

As of September 30, 2017 and December 31, 2016, the balance in this agreement was Ps.54,827 and Ps.33,775, respectively.

The Company accrued an expense under this agreement of Ps.53,297 and Ps.43,878 for the three months period ended September 30, 2017 and 2016, respectively.

The Company accrued an expense under this agreement of Ps.148,079 and Ps.121,022 for the nine months period ended September 30, 2017 and 2016, respectively.

g) SearchForce

SearchForce is a related party because William Dean Donovan, an alternate member of the board, is a director of the Company.

As of December 31, 2016, the balance due under this agreement was Ps.620.

For the three months period ended September 30, 2017, the Company accrued an expense under this agreement of Ps.528. For the three months period ended September 30, 2016, there was no expense under this agreement.

For the nine months period ended September 30, 2017 and 2016, the Company accrued an expense under this agreement of Ps.1,946 and Ps.844, respectively.

h) Aviateca, S.A.

Aviateca is a related party because it is a subsidiary of Avianca in which Roberto Kriete, a member of the board of the company, is a director too.

For the three months period ended September 30, 2017, the Company accrued an expense under this agreement of Ps.1,405. For the three months period ended September 30, 2016, there was no expense under this agreement.

For the nine months period ended September 30, 2017, the Company accrued an expense under this agreement of Ps.1,405. For the nine months period ended September 30, 2016, there was no expense under this agreement.

i) Directors and officers

During the three months ended September 30, 2017 and 2016, all of the Company's senior managers received an aggregate compensation of short and long-term benefits of Ps.21,183 and Ps.17,294, respectively.

During the nine months ended September 30, 2017 and 2016, all of the Company's senior managers received an aggregate compensation of short and long-term benefits of Ps.87,893 and Ps.93,256, respectively.

For the nine months ended September 30, 2017 and 2016 the cost of the share-based payments transactions (MIP and LTIP) were Ps.9,913 and Ps.4,371, respectively. Cash-settled payments transactions SARs were Ps.4,186 and Ps.65,998, respectively.

During the three months ended September 30, 2017 and 2016, the chairman and the independent members of the Company's board of directors received an aggregate compensation of approximately Ps.2,190 and Ps.1,974, respectively, and the rest of the directors received a compensation of Ps.2,701 and Ps.1,980, respectively.

During the nine months ended September 30, 2017 and 2016, the chairman and the independent members of the Company's board of directors received an aggregate compensation of approximately Ps.6,295 and Ps.5,296, respectively, and the rest of the directors received a compensation of Ps.6,091 and Ps.5,093, respectively.

10. Rotable spare parts, furniture and equipment, net

a) Acquisitions and disposals

During the nine months ended September 30, 2017 and for the year ended December 31, 2016, the Company acquired rotable spare parts, furniture and equipment by an amount of Ps.1,430,003 and Ps.735,556, respectively.

Rotable spare parts, furniture and equipment by an amount of Ps.101,260 were disposed during the nine months ended September 30, 2017. Additionally, the Company did not receive reimbursements of pre-delivery payments for aircraft acquisition during this period.

b) Depreciation expense

Depreciation expense for the nine months ended September 30, 2017 and 2016 was Ps.380,847 and Ps.368,324, respectively. Depreciation expense for the three months ended September 30, 2017 and 2016 was Ps.132,949 and Ps.129,204, respectively. Depreciation charges for the year are recognized as a component of operating expenses in the unaudited interim condensed consolidated statements of operations.

11. Intangible assets, net**a) Acquisitions**

During the nine months period ended September 30, 2017 and for the year ended December 31, 2016, the Company acquired intangible assets by an amount of Ps.79,863 and Ps.53,361, respectively.

b) Amortization expense

Software amortization expense for the nine months ended September 30, 2017 and 2016 was Ps.36,768 and Ps.26,005, respectively. Software amortization expense for the three months ended September 30, 2017 and 2016 was Ps.16,941 and Ps.7,219, respectively. These amounts were recognized in depreciation and amortization in the unaudited interim condensed consolidated statements of operations.

12. Operating leases

The most significant operating leases are as follows:

Aircraft and engine rent. At September 30, 2017, the Company leases 67 aircraft (69 as of December 31, 2016) and 8 spare engines under operating leases (11 as of December 31, 2016) that have maximum terms through 2031. Rents are guaranteed by deposits in cash or letters of credit. The aircraft lease agreements contain certain covenants to which the Company is bound. The most significant covenants include the following:

- (i) Maintain the records, licenses and authorizations required by the competent aviation authorities and make the corresponding payments.
 - (ii) Provide maintenance services to the equipment based on the approved maintenance program.
 - (iii) Maintain insurance policies on the equipment for the amounts and risks stipulated in each agreement.
 - (iv) Periodic submission of financial and operating information to the lessors.
 - (v) Comply with the technical conditions relative to the return of aircraft.
-

As of September 30, 2017 and December 31, 2016, the Company was in compliance with the covenants under the above mentioned aircraft lease agreements.

Composition of the fleet, operating leases*:

Aircraft Type	Model	At September 30, 2017	At December 31, 2016
A319	132	6	6
A319	133	6	9
A320	233	39	39
A320	232	4	4
A320NEO	271N	2	1
A321	231	10	10
		67	69

Engine Type	Model	At September 30, 2017	At December 31, 2016
V2500	V2527M-A5	3	3
V2500	V2527E-A5	3	4
V2500	V2527-A5	2	4
		8	11

* Certain of the Company's aircraft and engine lease agreements include an option to extend the lease term period. Terms and conditions are subject to market conditions at the time of renewal.

During the nine months ended September 30, 2017, the Company incorporated the second A320NEO aircraft to its fleet. Also the Company returned three aircraft to the lessors and extended the lease term of one A319CEO aircraft (effective from 2018) and one spare engine (effective from July 2017).

During the year ended December 31, 2016, the Company incorporated 17 aircraft to its fleet (eight of them based on the terms of the Airbus purchase agreement and nine from a lessor's aircraft order book). These new aircraft lease agreements were accounted for as operating leases. Also, the Company returned four aircraft to their respective lessors. All the aircraft incorporated through the lessor's aircraft order book were not subject to sale and leaseback transactions.

Additionally, during 2016 the Company extended the lease term of two aircraft and entered into certain agreements with different lessors to lease five aircraft spare engines which were already been received during the same period. Such leases were accounted as operating leases and were not subject to sale and leaseback transactions.

On September 19, 2016, the Company received its first A320NEO.

During the year ended December 31, 2015, the Company incorporated seven aircraft to its fleet (five of them based on the terms of the Airbus purchase agreement and two from a lessor's aircraft order book), and returned one aircraft to a lessor. These new aircraft lease agreements were accounted for as operating leases. Additionally, during August 2015 the Company extended the lease term of three A319CEO, one effective from 2015 and the other two effective from 2016.

As of September 30, 2017 and December 31, 2016, all of the Company's aircraft and spare engines lease agreements were accounted for as operating leases.

Provided below is an analysis of future minimum aircraft and engine rent payments in U.S. dollars and its equivalent to Mexican pesos:

	Aircraft operating leases		Engine operating leases	
	in U.S. dollars	in Mexican pesos (1)	in U.S. dollars	in Mexican pesos (1)
2017	US\$ 57,631	Ps. 1,048,763	US\$ 1,358	Ps. 24,713
2018	236,198	4,298,308	4,336	78,906
2019	221,656	4,033,674	3,986	72,537
2020	217,049	3,949,836	3,366	61,254
2021 and thereafter	878,635	15,989,312	7,833	142,544
Total	US\$ 1,611,169	Ps. 29,319,893	US\$ 20,879	Ps. 379,954

(1) Exchange rate used as of September 30, 2017 of Ps.18.1979.

Such amounts are determined based on stipulated rent contained within the agreements without considering renewals and on the prevailing exchange rate and interest rates as of September 30, 2017.

During the nine months ended September 30, 2017, the Company did not enter into sale and leaseback transactions.

During the three months ended September 30, 2016, the Company entered into sale and leaseback transactions, resulting in a gain of Ps.166,567, this gain was recorded under the caption other income in the consolidated statement of operations.

During the nine months ended September 30, 2016, the Company entered into sale and leaseback transactions, resulting in a gain of Ps.361,411, this gain was recorded under the caption other income in the consolidated statement of operations.

During the year ended December 31, 2011, the Company entered into sale and leaseback transactions, which resulted in a loss of Ps.30,706. This loss was deferred on the consolidated statements of financial position and is being amortized over the contractual lease term. As of September 30, 2017 and December 31, 2016, the current portion of the loss on sale amounts to Ps.3,047 and Ps.3,047, respectively, which are recorded in the caption of prepaid expenses and other current assets, and the non-current portion amounts to Ps.12,936 and Ps.14,460, respectively, which are recorded in the caption of other assets.

For the three months ended September 30, 2017 and 2016, the Company amortized a loss of Ps.762, and Ps.762, respectively, as additional aircraft rental expense.

For the nine months ended September 30, 2017 and 2016, the Company amortized a loss of Ps.1,524, and Ps.1,524, respectively, as additional aircraft rental expense.

13. Current and non-current liabilities

At September 30, 2017, the Company had the following other obligations of the current and non-current liabilities, including, unearned transportation revenue, related parties, accrued liabilities, employee benefits and other liabilities:

Domestic currency

	Liabilities in Domestic Currency				
	Time interval				
	Until 1 year	Until 2 years	Until 3 Years	Until 4 years	Until 5 years or more
Liabilities	Ps. 3,813,691	Ps. 72,636	Ps. 27,938	Ps. 20,097	Ps. 18,047

Foreign currency

	Liabilities in Foreign Currency				
	Time interval				
	Until 1 year	Until 2 years	Until 3 years	Until 4 years	Until 5 years or more
Liabilities	Ps. 851,974	Ps. -	Ps. 7,992	Ps. 1,512	Ps. 173,228

14. Equity

As of September 30, 2017, the total number of authorized shares was 1,011,876,677; represented by common registered shares, issued and with no par value, fully subscribed and paid, comprised as follows:

	Shares		
	Fixed Class I	Variable Class II	Total shares
Series A shares	3,224	877,852,982	877,856,206
Series B shares	20,956	133,999,515	134,020,471
	24,180	1,011,852,497	1,011,876,677
Treasury shares	-	(13,055,905)	(13,055,905)
	24,180	998,796,592	998,820,772

All shares representing the Company's capital stock, either Series A shares or Series B shares, grant the holders the same economic rights and there are no preferences and/or restrictions attaching to any class of shares on the distribution of dividends and the repayment of capital. Holders of the Company's Series A common stock and Series B common stock are entitled to dividends when, and if, declared by a shareholder resolution. The Company's revolving line of credit with Santander and Bancomext limits the Company's ability to declare and pay dividends in the event that the Company fails to comply with the payment terms thereunder.

During the nine months ended September 30, 2017 and for the year ended December 31, 2016, the Company did not declare any dividends.

a) Earnings per share

Basic earnings per share ("EPS") amounts are calculated by dividing the net income for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit or loss attributable to ordinary equity holders of the parent (after adjusting for interest on the convertible preference shares, if any), by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares (to the extent that their effect is dilutive).

The following tables show the calculations of the basic and diluted earnings per share for the three months ended September 30, 2017 and 2016:

	2017		2016
Net income for the period	Ps. 730,627	Ps.	1,009,675
Weighted average number of shares outstanding (in thousands):			
Basic	1,011,877		1,011,877
Diluted	1,011,877		1,011,877
EPS:			
Basic	0.722		0.998
Diluted	0.722		0.998

The following tables show the calculations of the basic and diluted earnings per share for the nine months ended September 30, 2017 and 2016:

	2017		2016
Net (loss) income for the period	Ps. (1,150,075)	Ps.	2,546,144
Weighted average number of shares outstanding (in thousands):			
Basic	1,011,877		1,011,877
Diluted	1,011,877		1,011,877
EPS:			
Basic	(1.136)		2.516
Diluted	(1.136)		2.516

15. Income tax

The Company calculates the period income tax expense using the tax rate that would be applicable to the expected total annual earnings. The major components of income tax expense in the unaudited interim condensed statement of operations are:

Consolidated statement of operations

	For the three months ended September 30,	
	2017	2016
Current tax expense	Ps. -	Ps. (369,184)
Deferred income tax expense	(38,824)	(63,935)
Total income tax expense on profits	Ps. (38,824)	Ps. (433,119)

	For the nine months ended September 30,	
	2017	2016
Current tax expense	Ps. -	Ps. (1,030,101)
Deferred income tax benefit	516,686	(61,501)
Total income tax benefit (expense) on profits	Ps. 516,686	Ps. 1,091,602

The Company's effective tax rate during the nine months ended September 30, 2017 and 2016 was 31% and 30%, respectively.

Revenues are allocated by geographic segments based upon the origin of each flight. The Company does not have material non-current assets located in foreign countries.

The breakdown of our non-ticket revenues for the three months period ended September 30, 2017 and 2016 is as follows:

	<u>2017</u>	<u>2016</u>
Non-ticket revenues		
Air travel-related services	Ps. 1,606,505	Ps. 1,341,172
Non-air travel-related services	164,579	144,084
Cargo	38,030	39,837
Total non-ticket revenues	Ps. 1,809,114	Ps. 1,525,093

The breakdown of our non-ticket revenues for the nine months period ended September 30, 2017 and 2016 is as follows:

	<u>2017</u>	<u>2016</u>
Non-ticket revenues		
Air travel-related services	Ps. 4,603,079	Ps. 3,652,270
Non-air travel-related services	449,178	341,990
Cargo	117,663	123,660
Total non-ticket revenues	Ps. 5,169,920	Ps. 4,117,920

18. Subsequent events

Subsequent to September 30, 2017 and through October 24, 2017:

- a) On October 10, 2017, the Company incorporated one A320NEO aircraft to its fleet.
-

Volaris Reports Third Quarter 2017 Results: 11% Net Margin

Mexico City, Mexico, October 25, 2017 – Volaris* (NYSE: VLRS and BMV: VOLAR), the ultra-low-cost airline serving Mexico, the United States and Central America, today announced its financial results for the third quarter 2017.

The following financial information, unless otherwise indicated, is presented in accordance with International Financial Reporting Standards (IFRS).

Third Quarter 2017 Highlights

- Total operating revenues were Ps.6,582 million for the third quarter, a decrease of 2.2% year over year, notwithstanding the negative impact of the natural disasters and a soft fare environment during the quarter.
- Non-ticket revenues now represent 27% of the total operating revenues, increasing 5 percentage points year over year, partially compensating the average fare decline. Non-ticket revenues were Ps.1,809 million for the third quarter, an increase of 18.6% year over year. Non-ticket revenues per passenger were Ps.434 for the third quarter, increasing 12.8% year over year.
- Total operating revenues per available seat mile (TRASM), had a sequential improvement of 6.8% quarter over quarter, reaching Ps.137.7 cents for the third quarter, and a decrease of 11.2% year over year.
- Operating expenses per available seat mile (CASM) decreased 5.0% year over year, to Ps.124.4 cents for the third quarter; with an average exchange rate of Ps.17.82, a year over year decrease of 4.8%, and despite an average economic fuel cost per gallon of Ps.31.8, representing an increase of 3.0% year over year.
- Operating expenses excluding fuel, per available seat mile (CASM ex fuel) decreased 6.2% year over year, to Ps.88.9 cents for the third quarter.
- Operating income was Ps.634 million, representing 9.6% of operating margin for the third quarter, a 9.0 percentage points higher than the previous quarter, and 5.9 percentage points lower year over year.
- Net income was Ps.731 million (Ps.0.72 per share / US\$0.40 per ADS) for the third quarter, with a net margin of 11.1%.
- As of September 30, 2017, cash and cash equivalents were Ps.5,373 million.

Volaris' CEO Enrique Beltranena commented: "During the third quarter, demand and traffic patterns, despite a competitive fare environment, had been sequentially improving, but in September, natural disasters in Mexico and in the region temporarily interrupted such recovery. We continued to drive non-ticket revenue growth, managed capacity prudently and reinforced our cost control discipline, reversing the negative cost trend. These actions positions Volaris with a defendable and resilient business model in a challenging environment."

Resilient Macroeconomics and Exchange Rate Appreciation Partially Offset Fuel Price Pressures

- **Stable macroeconomics and domestic consumer demand:** The macroeconomic indicators in Mexico continued to be solid, with same store sales increasing 5.6% ¹ during September, remittances increasing 9% ² year over year in July and August, and the Mexican General Economic Activity Indicator (IGAE) increased 2.2% ³ year over year in August of 2017
- **Air traffic volume increase:** The Mexican DGAC reported overall passenger volume growth for Mexican carriers of 7.4% year over year in July and August; domestic overall passenger volume increased 6.1%, while international overall passenger volume increased 12.0%.
- **Exchange rate volatility:** The Mexican peso appreciated 4.8% year over year against the U.S. dollar, from an average exchange rate of Ps.18.72 pesos per US dollar in the third quarter 2016 to Ps.17.82 pesos per U.S. dollar during the third quarter 2017.
- **Higher fuel prices:** The average economic fuel cost per gallon increased 3.0%, year over year, to Ps.31.8 per gallon (US\$1.75) in the third quarter 2017.
- **Natural disasters:** During the month, Hurricanes Irma and Maria, tropical storms Max and Lidia in the Pacific, and two earthquakes that impacted 11 states in Mexico, affected operations with approximately 50 flights cancelled in eight airports, also triggering a decline in bookings for the period. Volaris worked in coordination with the federal, state, and local authorities to assist people that were stranded. We also helped our customers with free of charge changes in itineraries.

Strengthened ULCC Model with Further Non-Ticket Revenue Growth

- **Passenger traffic stimulation:** Volaris booked 4.2 million passengers in the third quarter of 2017, up 5.2% year over year. Volaris traffic (measured in terms of revenue passenger miles, or RPMs) increased 7.9% for the same period. System load factor during the quarter decreased 1.7 percentage points year over year to 86.2%.
- **Competitive market environment pressured yields partially offset by non-ticket revenue:** For the third quarter of 2017, yield and TRASM decreased 15.0% and 11.2% year over year, respectively. During the third quarter, domestic capacity, in terms of ASMs, increased 9.3% year over year, while international capacity increased 11.7% year over year.

¹ Source: *Asociación Nacional de Tiendas de Autoservicio y Departamentales, A. C. (ANTAD)*

² Source: *Banco de México (BANXICO)*

³ Source: *Instituto Nacional de Estadística y Geografía (INEGI)*

- **Non-ticket revenue growth:** Non-ticket revenues and non-ticket revenues per passenger for the third quarter of 2017 increased 18.6% and 12.8% year over year, respectively. Non-ticket revenue generation continues to grow with improved revenues from first checked bag fees for international flights, and better uptakes of ancillary combos. We also increased our commission revenues from travel related products, such as a new hotel selection step in the purchasing process, cruise packages and car rentals. Non-ticket revenues now represent 27% of the total operating revenues for the quarter.
- **New routes:** In the third quarter 2017, Volaris began operations in two new international routes (Mexico City – San Antonio, Texas and Mexico City – San Jose, Costa Rica).

Tight Cost Controls, Despite Fuel Price Pressure

CASM and CASM ex fuel for the third quarter were Ps. 124.4 (US 6.8 cents) and Ps.88.9 cents (US 4.9 cents), respectively. These represented decreases of 5.0% and 6.2%, respectively; mainly driven by tightening cost controls and average exchange rate appreciation of 4.8%. At the end of the third quarter, the Mexican peso also depreciated 1.7% with respect to the end of previous quarter, leading to a net exchange rate gain of Ps.125 million as result of our U.S. dollar net monetary asset position.

Youngest and Most Fuel-efficient Fleet in Mexico

During the third quarter 2017, the Company incorporated the second A320NEO to its fleet. As of September 30, 2017, Volaris' fleet was composed of 67 aircraft (12 A319s, 45 A320s and 10 A321s), with an average age of 4.6 years, the youngest fleet among Mexican carriers. At the end of the third quarter 2017, Volaris' fleet had an average of 180 seats, 64% of which were in sharklet-equipped aircraft.

Solid Balance Sheet and Good Liquidity

As of September 30, 2017, cash and cash equivalents were Ps.5,373 million, representing 22% of last twelve month operating revenues. Volaris registered negative net debt (or a positive net cash position) of Ps.2,981 million and total equity of Ps.9,502 million.

Active in Fuel Risk Management

Volaris' fuel risk management program provided protection from fuel prices increases, with 59% of its third quarter fuel consumption hedged, at an average strike price of US\$1.44 per gallon, and resulting in a positive net settlement of Ps.2,6 million for the quarter. This hedged portion, combined with the 41% unhedged consumption, resulted in a blended average economic fuel cost of US\$1.75 per gallon.

Central America Operations

On September 21, 2017 Volaris Costa Rica obtained approval from U.S. Department of Transportation to operate from Central America to the U.S., subject to operations and maintenance certifications by the Federal Aviation Administration.

Investors are urged to carefully read the Company's periodic reports filed with or furnished to the Securities and Exchange Commission, for additional information regarding the Company.

About Volaris:

*Controladora Vuela Compañía de Aviación, S.A.B. de C.V. ("Volaris" or the "Company") (NYSE: VLRS and BMV: VOLAR), is an ultra-low-cost carrier, with point-to-point operations, serving Mexico, the United States and Central America. Volaris offers low base fares to build its market, providing quality service and extensive customer choice. Since beginning operations in March 2006, Volaris has increased its routes from five to more than 164 and its fleet from four to 69 aircraft. Volaris offers more than 306 daily flight segments on routes that connect 40 cities in Mexico and 28 cities in the United States and Central America with the youngest fleet in Mexico. Volaris targets passengers who are visiting friends and relatives, cost-conscious business people and leisure travelers in Mexico and to select destinations in the United States and Central America. Volaris has received the ESR Award for Social Corporate Responsibility for eight consecutive years. For more information, please visit: www.volaris.com

Forward-looking Statements:

Statements in this release contain various forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which represent the Company's expectations or beliefs concerning future events. When used in this release, the words "expects," "estimates," "plans," "anticipates," "indicates," "believes," "forecast," "guidance," "outlook," "may," "will," "should," "seeks," "targets" and similar expressions are intended to identify forward-looking statements. Similarly, statements that describe the Company's objectives, plans or goals, or actions the Company may take in the future, are forward-looking statements. Forward-looking statements include, without limitation, statements regarding the Company's intentions and expectations regarding the delivery schedule of aircraft on order, announced new service routes and customer savings programs. All forward-looking statements in this release are based upon information available to the Company on the date of this release. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise. Forward-looking statements are subject to a number of factors that could cause the Company's actual results to differ materially from the Company's expectations, including the competitive environment in the airline industry; the Company's ability to keep costs low; changes in fuel costs; the impact of worldwide economic conditions on customer travel behavior; the Company's ability to generate non-ticket revenues; and government regulation. Additional information concerning these and other factors is contained in the Company's Securities and Exchange Commission filings.
