-

Section 1 – Conflict Minerals Disclosure**Item 1.01 Conflict Minerals Disclosure and Report**

As provided for in Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD, a Conflict Minerals Report is provided as an exhibit to this Form SD and is available on the Investors page of our Internet website at: <http://www.michaelkors.com>.

The information contained on our website is not incorporated by reference into this Form SD or our Conflict Minerals Report and should not be considered part of this Form SD or the Conflict Minerals Report.

Item 1.02 Exhibit

The Conflict Minerals Report described in Item 1.01 is filed as Exhibit 1.01 to this Form SD.

Section 2 – Exhibits**Item 2.01 Exhibits**

Exhibit 1.01 – Conflict Minerals Report for the calendar year ended December 31, 2017.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

MICHAEL KORS HOLDINGS LIMITED
(Registrant)

By: /s/ Krista A. McDonough

May 31, 2018

Name: Krista A. McDonough

Title: Senior Vice President, General Counsel

EXHIBIT INDEX

Exhibit

Description

1.01 Conflict Minerals Report for the calendar year ended December 31, 2017.

Conflict Minerals Report

Michael Kors Holdings Limited has included this Conflict Minerals Report as an exhibit to its Form SD in respect of calendar 2017 as provided for in Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD (collectively, the “Conflict Minerals Rule”). The date of filing of this Conflict Minerals Report is May 31, 2018.

Unless the context indicates otherwise, the terms “we,” “its,” “us,” “our” and the “Company” refer to Michael Kors Holdings Limited and its consolidated subsidiaries. As used herein, “Conflict Minerals” or “3TG” are cassiterite (tin), columbite-tantalite (tantalum), gold and wolframite (tungsten), without regard to the location of origin of the minerals or derivative metals.

Forward-Looking Statements

The statements in this document that refer to plans and expectations for future periods are forward-looking statements within the meaning of federal securities laws. These forward-looking statements are based on management’s current expectations. Words such as “expects,” “anticipates,” “plans,” “believes,” “estimates,” “may,” “will,” “should” and variations of such words and similar expressions are intended to identify such forward-looking statements. Examples of forward-looking statements include, but are not limited to, statements concerning the additional steps that we intend to take to mitigate the risk that our necessary 3TG benefit armed groups. You should not place undue reliance on such statements. These forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company’s control, which could cause the Company’s actual results to differ materially from those indicated in these forward-looking statements. These risks and uncertainties may include, but are not limited to, the continued implementation of satisfactory traceability and other compliance measures by our direct and indirect suppliers, on a timely basis or at all, whether smelters and refiners and other market participants responsibly source 3TG and political and regulatory developments, whether in the Democratic Republic of the Congo (“DRC”) region, the United States or elsewhere. The Company undertakes no obligation to update or revise any forward-looking statements to reflect subsequent events or circumstances, except as required by applicable laws or regulations.

Applicability of the Conflict Minerals Rule to Our Company

We are a global fashion luxury group, consisting of iconic brands that are industry leaders in design, style and craftsmanship. Our Michael Kors and Jimmy Choo brands cover the full spectrum of fashion luxury categories including women’s and men’s accessories, footwear and apparel as well as wearable technology, watches, jewelry, eyewear and a full line of fragrance products. We believe that we are subject to the Conflict Minerals Rule because some of the products that we contract to manufacture may contain 3TG that are necessary to the functionality or production of such products. In November 2017, we completed the acquisition of Jimmy Choo Group Limited and its subsidiaries (“Jimmy Choo”). Under the Conflict Minerals Rule, we are permitted to exclude Jimmy Choo products from this Conflict Minerals Report and accordingly Jimmy Choo products are not considered in-scope for purposes of this Conflict Minerals Report. In-scope product information in respect of calendar 2017 is provided under “Product Information” below.

Through the efforts described in this Conflict Minerals Report, we seek to ensure that our sourcing practices are consistent with our Conflict Minerals Policy, which is described below. We do not directly manufacture products. We contract to manufacture products, and, therefore, we do not directly source 3TG from mines, smelters or refiners, and are many levels removed from these market participants. The efforts undertaken to identify the origin of 3TG in our products reflect our circumstances and position in the supply chain, and we work with our direct suppliers so that they may provide us with accurate information about the origin of necessary 3TG minerals in the products that we contract to manufacture.

Our Conflict Minerals Policy

We are opposed to human rights abuses such as those that are occurring in connection with the mining of certain minerals from locations in the DRC. We also take our obligations under U.S. Securities and Exchange Commission regulations and the laws in countries in which we operate seriously, including our compliance obligations under the Conflict Minerals Rule. In addition, we are committed to principles of ethical business practice and recognition of the dignity of others, including the responsible sourcing of 3TG, and we expect that our suppliers share this commitment.

In furtherance of the foregoing, we have adopted and communicated to our suppliers and the public a company policy (the “Conflict Minerals Policy”) for determining the use and origin of 3TG in our supply chain. Our Conflict Minerals Policy is available on the Investor Relations page of our website at: <http://investors.michaelkors.com/resources/conflict-minerals/default.aspx>. The information contained on our website is not incorporated by reference into this Conflict Minerals Report or the Form SD and should not be considered part of this Conflict Minerals Report or the Form SD.

The Conflict Minerals Policy includes, but is not limited to, our expectations that our suppliers:

1. put in place procedures for the traceability of 3TG;
2. cooperate with our 3TG due diligence process, including by providing us, from time to time, with written certifications and other information concerning the origin of 3TG included in products and/or components supplied to us;
3. maintain reviewable records supporting the source of 3TG;
4. adopt policies and procedures with respect to 3TG consistent with our Conflict Minerals Policy and the Organisation for Economic Co-operation and Development’s Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, including the Supplement on Tin, Tantalum and Tungsten and the Supplement on Gold (collectively, the “OECD Guidance”), including the adoption of a risk mitigation strategy to respond to identified risks in the supply chain, and communicate such policies and procedures to their personnel and direct and indirect suppliers; and
5. require their direct and indirect suppliers to adopt policies and procedures that are consistent with our Conflict Minerals Policy.

We do not support the embargoing of 3TG from the DRC region, but rather encourage our suppliers to continue to source responsibly from the region.

Reasonable Country of Origin Inquiry

As required by the Conflict Minerals Rule, for calendar 2017, we conducted a “reasonable country of origin inquiry” (“RCOI”). We designed our RCOI in good faith to determine the origin of 3TG that are necessary to the functionality or production of products that we contract to manufacture. The results of our RCOI are discussed on Annex A to this Conflict Minerals Report. To the extent applicable, for our RCOI, we utilized the same processes and procedures as for our due diligence, particularly Steps 1 and 2 of the OECD Guidance design framework, which are described below in this Conflict Minerals Report.

Our outreach included 219 suppliers (the “Suppliers”). We determined which of our products were in-scope or potentially in-scope for purposes of the Conflict Minerals Rule through product specifications, visual inspection, supplier inquiries and other information known to us. We also considered the degree of influence that we exercised over the materials, parts and components of the products.

Pursuant to the Conflict Minerals Rule, based on the results of our RCOI, we conducted due diligence for calendar 2017. These due diligence efforts are discussed below.

Due Diligence Program Design and Execution

Design Framework

We designed our due diligence measures relating to 3TG to conform with, in all material respects, the criteria set forth in the OECD Guidance.

The OECD Guidance has established a five-step framework for due diligence as a basis for responsible global supply chain management of minerals from conflict-affected and high-risk areas. Selected elements of our compliance program are discussed below. However, these are not all of the discrete elements of the program that we have put in place to provide for the responsible sourcing of 3TG contained in our products. The headings below conform to the headings used in the OECD Guidance for each of the five steps.

1. OECD Guidance Step One: "Establish strong company management systems"

- a. We have a Conflict Minerals Policy, as described earlier in this Conflict Minerals Report. The Conflict Minerals Policy is communicated internally by email and Intranet. The Conflict Minerals Policy also is communicated by email to suppliers and is posted on our website.
- b. We have a team of senior staff under the General Counsel charged with managing our 3TG compliance program. The following functional areas are represented on the working group: Internal Audit; Legal; Production/Licensing; and Trade and Customs. Appropriate members of these functional areas are educated on the Conflict Minerals Rule, the OECD Guidance, our compliance plan and the procedures for reviewing and validating supplier responses to our inquiries.
- c. We have a Standard Operating Procedure that contains standard processes, timelines and communications for our compliance with the Conflict Minerals Rule.
- d. We utilize the Conflict Minerals Reporting Template (the "CMRT") developed by the Responsible Minerals Initiative (the "RMI;" formerly known as the Conflict-Free Sourcing Initiative) to identify smelters and refiners in our supply chain.
- e. Supplier requests for a completed CMRT are accompanied by the Conflict Minerals Policy or include a link to the policy.
- f. We consider on an ongoing basis whether suppliers may benefit from receiving training or orientation materials concerning the Conflict Minerals Rule, the OECD Guidance, the Conflict Minerals Policy and/or our survey process. If so, we arrange for the supplier to receive those materials and/or recommend training or informational resources to the supplier.
- g. We maintain records relating to 3TG due diligence, including records of due diligence processes, findings and resulting decisions, in an electronic database. Our policy is to maintain these records for at least five years.
- h. We have an anonymous email mailbox for employees, suppliers and other interested parties to report violations of our Conflict Minerals Policy. The email address is conflictmineralscompliance@michaelkors.com. We also have a confidential hotline through which parties may report violations. The country-specific hotline telephone numbers are set forth in the Annex to our Code of Business Conduct and Ethics available on the Investor Relations page of our website at <http://investors.michaelkors.com/corporate-governance/Code-of-Conduct/default.aspx>. The foregoing serve as our grievance mechanism.

2. OECD Guidance Step Two: "Identify and assess risk in the supply chain"

- a. We requested by email that the Suppliers provide us with information, through the completion of a CMRT, concerning the usage and source of 3TG in their products as well as their related compliance efforts. We followed up by email or phone with all Suppliers that did not respond to the request within the specified time frame. We sent requests to 219 Suppliers to provide us with a completed CMRT. We requested that the Suppliers furnish us with a completed template at the product level. We received responses from approximately 77% of the Suppliers.

- b. We reviewed the completed responses received from the Suppliers for completeness, accuracy, reasonableness, credibility and “red flags” using written guidelines that we have developed. We followed up by email or phone with the Suppliers that submitted a response that was rejected under our written guidelines, requesting the Supplier submit an updated or corrected CMRT.
 - c. Smelter and refiner information provided by the Suppliers was reviewed against the Smelter Look-up tab list of the CMRT. To the extent that a smelter or refiner identified by a Supplier was not on that list, we took additional steps to attempt to determine whether the listed entity is a smelter or refiner.
 - d. Smelter and refiner information also was reviewed against the lists of Conformant and Active (both as later defined) smelters and refiners published by the RMI. To the extent that a smelter or refiner identified by a Supplier was not listed as Conformant by the RMI, we requested further information from the Supplier or consulted publicly available information to determine whether the smelter or refiner obtained 3TG from sources that directly or indirectly financed or benefitted armed groups in the DRC or an adjoining country.
3. OECD Guidance Step Three: “Design and implement a strategy to respond to identified risks”
- a. Our 3TG compliance team reported the findings of its supply chain risk assessment to our General Counsel.
 - b. If our due diligence does not result in a reasonable belief that the applicable 3TG originated outside of the DRC region or came from recycled or scrap sources, we assess the risk that the 3TG may benefit armed groups in the DRC region.
 - c. Under our written procedures, risk mitigation measures include escalation of the supplier inquiry process, working with the supplier to establish a corrective action plan and possible termination of the supplier relationship.
 - d. We annually assess whether our 3TG processes conform to our applicable written procedures and assess the compliance program against other specified measures and metrics.
4. OECD Guidance Step Four: “Carry out independent third-party audit of supply chain due diligence at identified points in the supply chain”
- To that extent that smelters or refiners of 3TG in our supply chain are identified to us, we utilize and rely on information made available by the RMI concerning independent third-party audits of smelters and refiners to assess smelter and refiner due diligence and to determine whether the smelter or refiner is Conformant.
5. OECD Guidance Step 5: “Report on supply chain due diligence”
- We file a Form SD and a Conflict Minerals Report with the U.S. Securities and Exchange Commission and make these documents available on our website.

Product Information; Identified Smelters and Refiners

For calendar 2017, the following categories of products were potentially in-scope: women’s and men’s accessories, including handbags and small leather goods, footwear, apparel, including womenswear, menswear, swimwear and outerwear, as well as wearable technology, watches, jewelry and eyewear, in each case, that may include tin, tantalum, tungsten and/or gold.

For a further discussion of our products, see our Annual Report on Form 10-K for the fiscal year ended March 31, 2018 (the “Annual Report”). The information contained in our Annual Report is not incorporated by reference into our Form SD or this Conflict Minerals Report and should not be considered part of this report or the Form SD.

We endeavored to determine the mine or location of origin of the 3TG contained in our in-scope products by requesting that the Suppliers provide us with a completed CMRT at the product level and through the other measures described in this Conflict Minerals Report.

In connection with our RCOI or due diligence, as applicable, the Suppliers identified to us the facilities listed on Appendix A as potentially having processed the necessary 3TG contained in our potentially in-scope products for 2017. Due to our position in the supply chain, we rely on our suppliers for accurate smelter and refiner information. Our due diligence measures can not provide absolute certainty regarding the source and chain of custody of the necessary 3TG contained in our 2017 potentially in-scope products.

The table below presents a summary of the smelter and refiner information contained in Annex A. Of the 280 smelters and refiners identified to us by our Suppliers, most were identified only by a single Supplier that manufactures watches and jewelry for us. That Supplier indicated that it provided smelter and refiner information specific to the products manufactured for us, rather than all of its manufactured products. However, we have not been able to confirm that all of the smelters and refiners identified by this Supplier actually processed the 3TG in our products, and given the large number of identified smelters and refiners, we believe that the smelter and refiner list provided by the Supplier is likely over-inclusive. Please see the notes accompanying Annex A for additional information relevant to the table below.

	Conformant	Active	On Smelter Look-up Tab List Only
Tantalum	38	0	2
Tin	71	0	7
Tungsten	39	0	4
Gold	95	0	24

Additional Risk Mitigation Efforts

We intend to take the following additional steps in respect of calendar 2018 to mitigate the risk that our necessary in-scope 3TG benefit armed groups:

1. Use the most recent version of the CMRT for our supplier outreach.
2. Encourage Suppliers that provided company level information for calendar 2017 to provide product level information for calendar 2018 through ongoing outreach with these Suppliers.
4. Engage with Suppliers that provided incomplete responses or that did not provide responses for calendar 2017 to provide requested information for calendar 2018.
5. Provide additional materials, informational resources, and/or training to selected suppliers.
6. Monitor and encourage the continuing development and progress of traceability measures at Suppliers that indicated for calendar 2017 that the source of 3TG was unknown or undeterminable.
7. Communicate to new potentially in-scope suppliers our sourcing expectations, including through the dissemination of the Conflict Minerals Policy to them. In addition, as new in-scope suppliers are added, work with these suppliers to ensure that they understand the requirements of our Conflict Minerals Policy, the Conflict Minerals Rule and the OECD Guidance.

-
8. Participate in selected industry initiatives to identify smelters and refiners in the supply chain.

All of the foregoing steps are in addition to the steps that we took in respect of our calendar 2017 inquiry, which we intend to continue to take in respect of our calendar 2018 inquiry to the extent applicable.

Annex A

Capitalized terms used and not otherwise defined in this Annex have the meanings indicated in our Conflict Minerals Report.

In connection with our RCOI or due diligence, as applicable, our Suppliers identified to us the smelters and refiners listed below as potentially having processed the necessary 3TG contained in our potentially in-scope products in 2017. As noted earlier in this Conflict Minerals Report, most of the 280 smelters and refiners listed below were identified only by a single Supplier that manufactures watches and jewelry for us. That Supplier indicated that it reported at a product level.

We note the following in connection with the information in the table:

- (a) Not all of the included smelters and refiners may have processed the necessary 3TG contained in our in-scope products. Some Suppliers may have reported smelters and refiners that were not in our supply chain due to over-inclusiveness in the information received from their suppliers or for other reasons. In addition, the smelters and refiners reflected above may not include all of the smelters and refiners in our supply chain, since some Suppliers did not identify all of the smelters and refiners used to process the necessary 3TG content contained in our in-scope products and because not all Suppliers responded to our inquiries.
- (b) All information in the table is as of May 22, 2018.
- (c) “Conformant” means that a smelter or refiner was listed as conformant with the RMI’s Responsible Minerals Assurance Process’s (“RMAP”) assessment protocols, including through mutual recognition. Smelters and refiners that are listed as “Re-audit in process” by the RMAP are considered to be Conformant by the RMAP. Included smelters and refiners were not necessarily Conformant for all or part of 2017 and may not continue to be Conformant for any future period.
- (d) While none of the smelter or refiner is listed as Active, “Active” is a RMAP designation that means that the smelter or refiner is a participant in the RMAP and has committed to undergo an audit or is participating in a cross-recognized certification program.
- (e) “On Smelter Look-up Tab List Only” means the smelter or refiner is not listed as “Conformant” or “Active.”
- (f) The compliance status reflected in the table is based solely on information made publicly available by the RMI, without independent verification by us.
- (g) Country location is the location of the smelter or refiner.

Country of Origin Information

The countries of origin of the 3TG processed by the Conformant smelters and refiners listed above may have included countries in each of the categories listed below. The countries below are sorted by risk level.

L1 – Countries that are not identified as conflict regions or plausible areas of smuggling or export from the DRC and its adjoining countries: Argentina, Australia, Austria, Benin, Bolivia, Brazil, Burkina Faso, Cambodia, Canada, Chile, China, Colombia, Ecuador, Eritrea, Ethiopia, France, Germany, Ghana, Guatemala, Guinea, Guyana, Honduras, India, Indonesia, Japan, Kazakhstan, Laos, Madagascar, Malaysia, Mali, Mexico, Mongolia, Myanmar, Namibia, Nicaragua, Nigeria, Panama, Peru, Portugal, Russia, Senegal, Sierra Leone, Spain, Thailand, Togo, United Kingdom, United States of America, Uzbekistan, Vietnam and Zimbabwe.

L2 – Countries that are known or plausible countries for smuggling, export out of region or transit of materials containing 3TG: Mozambique and South Africa.

L3 – The DRC and its adjoining countries: Burundi, Rwanda and Uganda.

DRC – Democratic Republic of the Congo.

In addition, some of the listed Conformant smelters and refiners may have processed 3TG originating from recycled or scrap sources.

For 2017, we were not able to determine the country of origin of the 3TG processed by any of the smelters or refiners listed as “On Smelter Look-up Tab List Only.”
