Registrant's telephone number, including area code: **(212) 309-8200**

N/A

(Former name or former address, if changed since last report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02 Results of Operations and Financial Condition

On August 1, 2018, Voya Financial, Inc. (“Voya Financial”) reported its financial results for the three months and six months ended June 30, 2018. A copy of the press release containing this information is furnished as Exhibit 99.1 hereto and is incorporated by reference in this item 2.02.

As previously announced, Voya Financial will host a conference call on Thursday, August 2, 2018 at 8:00 am ET to discuss its second-quarter 2018 results. The call can be accessed via Voya Financial’s investor relations website at <http://investors.voya.com>. The call will be accompanied by a slide presentation, which will be accessible via Voya Financial’s investor relations website at <http://investors.voya.com> beginning at 7:30 am ET on Thursday, August 2, 2018. In addition, more detailed financial information can be found in Voya Financial’s Quarterly Investor Supplement for the quarter ended June 30, 2018, available on Voya Financial’s investor relations website at <http://investors.voya.com>. The Quarterly Investor Supplement for the quarter ended June 30, 2018 is furnished herewith as Exhibit 99.2 and is incorporated by reference in this item 2.02.

As provided in General Instruction B.2 of Form 8-K, the information and exhibits provided pursuant to this Item 2.02 shall not be deemed to be “filed” for purposes of the Securities Exchange Act of 1934, as amended, nor shall they be deemed to be incorporated by reference in any filing under the Securities Act of 1933, as amended, except as shall be expressly set for by specific reference in such filing.

Item 7.01 Regulation FD Disclosure

On August 1, 2018, Voya Financial made available selected slides that discuss certain expectations regarding its performance for the quarter ended June 30, 2018. These slides are available on Voya Financial’s investor relations website at <http://investors.voya.com>.

As provided in General Instruction B.2 of Form 8-K, the information provided pursuant to this Item 7.01 shall not be deemed to be “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor shall it be deemed to be incorporated by reference in any filing under the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such a filing.

Item 9.01 Financial Statements and Exhibits

Voya Financial Announces Second-Quarter 2018 Results

- **Second-quarter 2018 net income available to common shareholders of \$0.96 per diluted share**
- **Second-quarter 2018 adjusted operating earnings¹ of \$1.13 per diluted share, after-tax, reflecting:**
 - \$(0.13) per diluted share, after-tax, of unfavorable deferred acquisition costs and value of business acquired (“DAC/VOBA”) and other intangibles unlocking, and
 - \$0.06 per diluted share, after-tax and DAC/VOBA, of prepayment fees and alternative investment income above the company’s long-term expectations.
- **Second-quarter 2018 adjusted operating earnings (excluding DAC/VOBA and other intangibles unlocking)¹ up 20% compared with the second quarter of 2017**
- **Company completes annuities transaction, reducing market and insurance risk and positioning Voya to expand its higher-growth, higher-return, capital-light businesses**
- **Continued progress on \$1.5 billion share repurchase plan:**
 - \$500 million of shares repurchased in the second quarter to achieve the previously announced plan to repurchase \$1 billion of shares by June 30
 - \$500 million of share repurchases planned for the second half of 2018
- **Strong excess capital of \$699 million as of June 30, 2018²**

NEW YORK, Aug. 1, 2018 — Voya Financial, Inc. (NYSE: VOYA) today announced financial results for the second quarter of 2018.

“Our second-quarter results demonstrate our commitment to growth, operational excellence and continued good stewardship of shareholder capital,” said Rodney O. Martin, Jr., chairman and CEO, Voya Financial, Inc. “A top priority for us this year was closing the transaction to sell the majority of our annuities businesses. Through this transaction, which we completed on June 1, we have significantly reduced market and insurance risk — transforming Voya into a simpler, more focused company with higher-growth, higher-return, capital-light businesses. At the same time, we continue to execute on our other 2018 priorities, which include several cost-saving, capital and growth initiatives. Our commitment to achieving these priorities is demonstrated in our financial results this quarter.

¹ This press release includes certain non-GAAP financial measures. More information on these measures and reconciliations to the most comparable U.S. GAAP measures can be found in the “Use of Non-GAAP Financial Measures” section of this release and in the company’s Quarterly Investor Supplement.

² Excess capital as of June 30, 2018 of \$699 million is that which is above the company’s holding company liquidity target of \$200 million and estimated statutory surplus in excess of a 425% combined risk-based capital (RBC) ratio.

“Excluding DAC/VOBA and other intangibles unlocking, our adjusted operating earnings grew 20% compared with the second quarter of 2017. We are executing on our plans to achieve \$1.30 to \$1.40 per share of adjusted operating earnings and our targeted cost savings of \$110 to \$130 million by the end of the second quarter of 2019.

“During the second quarter, we delivered on our plan to repurchase \$1 billion of Voya shares by June 30, 2018. We intend to buy back an additional \$500 million of our common stock by the end of 2018 as we continue to generate greater value for Voya’s shareholders. As a more focused, simpler company, we are now better positioned to drive greater customer and shareholder value and achieve our vision to be America’s Retirement Company,” added Martin.

SECOND-QUARTER 2018 SUMMARY

	For the three months ended			
	June 30, 2018		June 30, 2017	
	(\$ in millions)	(per share)	(\$ in millions)	(per share)
Net income available to common shareholders	\$166	\$0.96	\$167	\$0.89
Adjusted operating earnings, after-tax	\$195	\$1.13	\$73	\$0.39
Book value		\$52.22		\$74.30
Book value, excluding AOCI ³		\$46.40		\$59.80
Weighted avg common shares outstanding (in millions):				
Basic	167		186	
Diluted	173		188	

Second-quarter 2018 net income available to common shareholders was \$166 million, or \$0.96 per diluted share, compared with \$167 million, or \$0.89 per diluted share in the second quarter of 2017. The increase is largely due to higher income from continuing operations.

Second-quarter 2018 adjusted operating earnings were \$195 million, or \$1.13 per diluted share, after-tax, up from \$73 million, or \$0.39 per diluted share, after-tax, in the second quarter of 2017. The increase was largely due to second-quarter 2017 results having higher negative DAC/VOBA and other intangibles unlocking, driven by changes in guaranteed minimum interest rate ("GMIR") provisions for certain retirement plan contracts. In addition, fee income increased, and expenses declined year over year.

³ This press release includes certain non-GAAP financial measures. More information on these measures and reconciliations to the most comparable U.S. GAAP measures can be found in the "Use of Non-GAAP Financial Measures" section of this release and in the company's Quarterly Investor Supplement.

BUSINESS HIGHLIGHTS

- Retirement Full Service net flows of \$127 million; record Retirement adjusted operating earnings (excluding DAC/VOBA and other intangibles unlocking) of \$167 million
- Investment Management sourced net flows of \$1.2 billion
- Employee Benefits in-force premium year-over-year growth driven by a strong increase in the Voluntary business
- Individual Life mortality results slightly favorable to expectations

SEGMENT DISCUSSIONS

The following segment discussions compare the second quarter of 2018 with the second quarter of 2017, unless otherwise noted. All figures are presented before income taxes.

Retirement

Retirement adjusted operating earnings were \$169 million, up from \$33 million. Second-quarter 2018 results reflect \$3 million of positive DAC/VOBA and other intangibles unlocking. Conversely, the second quarter of 2017 had \$114 million of negative DAC/VOBA and other intangibles unlocking primarily due to changes in GMIR provisions for certain retirement plan contracts.

Key earnings drivers included:

- Investment spread revenues
 - Prepayment fee and alternative investment income was, in aggregate, \$6 million above long-term expectations (before the effect of income taxes and DAC).
 - Excluding alternative investment income and prepayment fees, investment spread revenues increased \$1 million.
- Fee-based revenues net of asset-based commissions increased \$18 million due to higher average AUM attributable to equity market and business growth as well as the benefit of fees from the movement of certain investment-only products from Corporate to Retirement.
- Expenses increased primarily as a result of the movement of certain investment-only products and strategic investment spending from Corporate to Retirement, offset in part by continued expense management in the business.

Retirement Net Flows				
(\$ in millions)	2Q 2018	1Q 2018	2Q 2017	
Full Service	\$ 127	\$ 47	\$ 914	
Stable Value and Pension Risk Transfer	(260)	(341)	(559)	
Retail Wealth Management	(1)	(68)	(75)	
Total	\$ (134)	\$ (362)	\$ 280	

During the second quarter of 2018, full service net inflows were more than offset by stable value net outflows.

Retirement AUM was \$146 billion, up from \$144 billion as of March 31, 2018. Retirement AUM increased from \$130 billion as of June 30, 2017, primarily due to equity market and business growth as well as the transfer of certain investment-only products from Corporate to Retirement in the first quarter of 2018.

Investment Management

Investment Management adjusted operating earnings were \$52 million compared with \$85 million. Key earnings drivers included:

- Investment capital revenues declined \$31 million as the second quarter of 2017 benefited from a recovery of carried interest; alternative investment income was positive in the second quarter of 2018 and modestly below long-term expectations (before the effect of income taxes).
- Fee-based revenues declined \$2 million – strong third-party management fees driven by positive net flows were more than offset by lower fees due to smaller average AUM as a result of the company's sale of the majority of its annuities businesses and the second quarter of 2017 benefiting from higher performance fees.

Investment Management Net Flows				
(\$ in billions)		2Q 2018	1Q 2018	2Q 2017
Investment Management Sourced	\$	1.2	\$ 0.1	\$ 2.4
Affiliate Sourced		(0.4)	(0.5)	(0.5)
Variable Annuities		(0.6)	(0.7)	(0.7)
Total	\$	0.1	\$ (1.2)	\$ 1.2

During the second quarter of 2018, Investment Management sourced net inflows were driven by institutional net flows primarily reflecting the issuance of three collateralized loan obligations during the quarter.

Third-party sales (which exclude general account assets of Voya Financial's insurance company subsidiaries) were \$5.7 billion, compared with \$4.7 billion in the first quarter of 2018 and \$6.4 billion in the second quarter of 2017. Third-party AUM totaled \$152 billion as of June 30, 2018, up from \$141 billion as of March 31, 2018, and up from \$135 billion as of June 30, 2017. The increase was largely due to positive net flows and the addition of \$9.7 billion of AUM retained from Voya's general account assets in connection with Voya's sale of the majority of its annuities businesses.

Employee Benefits

Employee Benefits adjusted operating earnings were \$35 million, up from \$27 million. Key earnings drivers included:

- Underwriting results improved primarily due to higher volumes in Voluntary and better claim experience in Stop Loss and partially offset by lower results in Group Life.
- Administrative expenses increased slightly due to growth in the in force.
- Investment spread revenues
 - Prepayment fee and alternative investment income were, in aggregate, \$1 million above long-term expectations (before the effect of income taxes and DAC).

- Excluding alternative investment income and prepayment fees, investment spread revenues were flat.

The loss ratio for Group Life was 81.5%, compared with 70.5% in the second quarter of 2017. The loss ratio for Stop Loss was 81.7%, compared with 85.6% during the same period last year. The annual loss ratios for Stop Loss and Group Life are expected to be between the company's targeted annual range of 77-80%.

Employee Benefits Annualized In-Force Premiums					
(\$ in millions)	2Q 2018		1Q 2018		2Q 2017
Group Life, Disability and Other	\$	664	\$	663	\$ 620
Stop Loss		938		925	992
Voluntary		312		303	262
Total	\$	1,914	\$	1,891	\$ 1,874

Compared with the second quarter of 2017, total Employee Benefits sales increased 3%, and in-force premiums increased 2%, reflecting strong growth in Voluntary premiums and continued pricing discipline in Stop Loss.

Individual Life

Individual Life adjusted operating earnings were \$41 million compared with \$62 million. Second-quarter 2018 results were lower due to \$30 million of higher negative DAC/VOBA and other intangibles unlocking driven by changes in reinsurance and unfavorable mortality experience on interest-sensitive products.

Key earnings drivers included:

- Investment spread revenues
 - Prepayment fee and alternative investment income were, in aggregate, \$7 million above long-term expectations (before the effect of income taxes and DAC); total investment spread was \$13 million favorable compared with the second quarter of 2017.
 - Excluding alternative investment income and prepayment fees, investment spread revenues increased slightly.
- Underwriting results (including DAC/VOBA and other intangibles amortization) were lower as net mortality — while slightly favorable to expectations — was unfavorable compared with the second quarter of 2017 due to higher frequency and severity on the combined interest and non-interest sensitive blocks and partially offset by favorable intangibles amortization.

Total Individual Life sales, which primarily consist of indexed life insurance, were \$18 million compared with \$19 million.

Corporate

Corporate adjusted operating losses were \$59 million, compared with losses of \$100 million. The improvement was largely due to the reallocation of strategic investment spending into the business segments and a \$10 million one-time favorable reserve refinement associated with the legacy annuities.

Loss on Sale

For the three months ended June 30, 2018, the company recorded a favorable adjustment of \$56 million, after-tax, to the previously estimated loss on the sale of the majority of its variable and fixed annuities business.

Share Repurchases

In the second quarter of 2018, Voya repurchased 9,617,162 shares of its common stock at an average price per share of \$51.99 for an aggregate purchase price of approximately \$500 million. Voya had approximately \$511 million remaining under its share repurchase authorization as of June 30, 2018.

Supplementary Financial Information

More detailed financial information can be found in the company's Quarterly Investor Supplement, which is available on Voya's investor relations website, investors.voya.com.

Earnings Call and Slide Presentation

Voya will host a conference call on Thursday, Aug. 2, 2018, at 8 a.m. ET, to discuss the company's second-quarter 2018 results. The call and slide presentation can be accessed via the company's investor relations website at investors.voya.com. A replay of the call will be available on the company's investor relations website at investors.voya.com starting at 1 p.m. ET on Aug. 2, 2018.

Use of Non-GAAP Financial Measures

Adjusted operating earnings before income taxes is a measure used to evaluate segment performance. We believe that adjusted operating earnings before income taxes provides a meaningful measure of Voya's business and segment performances and enhances the understanding of our financial results by focusing on the operating performance and trends of the underlying business segments and excluding items that tend to be highly variable from period to period based on capital market conditions and/or other factors. We use the same accounting policies and procedures to measure segment adjusted operating earnings before income taxes as we do for the directly comparable U.S. GAAP measure Income (loss) from continuing operations before income taxes.

Adjusted operating earnings before income taxes does not replace Income (loss) from continuing operations before income taxes as the comparable U.S. GAAP measure of our consolidated results of operations. Therefore, we believe that it is useful to evaluate both Income (loss) from continuing operations before income taxes and Adjusted operating earnings before income taxes when reviewing our financial and operating performance. Each segment's adjusted operating earnings before income taxes is calculated by adjusting Income (loss) from continuing operations before income taxes for the following items:

- Net investment gains (losses), net of related amortization of DAC, VOBA, sales inducements and unearned revenue, which are significantly influenced by economic and market conditions, including interest rates and credit spreads, and are not indicative of normal operations. Net investment gains (losses) include gains (losses) on the sale of securities, impairments, changes in the fair value of investments using the fair value option ("FVO") unrelated to the implied loan-backed security income recognition for certain mortgage-backed obligations and changes in the fair value of derivative instruments, excluding realized gains (losses) associated with swap settlements and accrued interest;
- Net guaranteed benefit hedging gains (losses), which are significantly influenced by economic and market conditions and are not indicative of normal operations, include changes in the fair value of derivatives related to guaranteed benefits, net of related reserve increases (decreases) and net of related amortization of DAC, VOBA and sales inducements, less the estimated cost of these benefits. The estimated cost, which is reflected in operating results, reflects the expected cost of these benefits if markets perform in line with our long-term expectations and includes the cost of hedging. Other derivative and reserve changes related to guaranteed benefits are excluded from operating results, including the impacts related to changes in nonperformance spread;
- Income (loss) related to businesses exited through reinsurance or divestment that do not qualify as discontinued operations, which includes gains and (losses) associated with transactions to exit blocks of business (including net investment gains (losses) on securities sold and expenses directly related to these transactions) and residual run-off activity; these gains and (losses) are often related to infrequent events and do not reflect performance of operating segments. Excluding this activity better reveals trends in our core business, which would be obscured by including the effects of business exited, and more closely aligns Adjusted operating earnings before income taxes with how we manage our segments;
- Income (loss) attributable to noncontrolling interest, which represents the interest of shareholders, other than those of Voya Financial, Inc., in consolidated entities. Income (loss) attributable to noncontrolling interest represents such shareholders' interests in the gains and (losses) of those entities, or the attribution of results from consolidated VIEs or VOEs to which we are not economically entitled;
- Income (loss) related to early extinguishment of debt, which includes losses incurred as a result of transactions where we repurchase outstanding principal amounts of debt; these losses are excluded from Adjusted operating earnings before income taxes since the outcome of decisions to restructure debt are not indicative of normal operations;
- Impairment of goodwill, value of management contract rights and value of customer relationships acquired, which includes losses as a result of impairment analysis; these represent losses related to infrequent events and do not reflect normal, cash-settled expenses;
- Immediate recognition of net actuarial gains (losses) related to our pension and other postretirement benefit obligations and gains (losses) from plan amendments and curtailments, which includes actuarial gains and losses as a result of differences between actual and expected experience on pension plan assets or projected benefit obligation during a given period. We immediately recognize actuarial gains and (losses) related to pension and other postretirement benefit obligations and gains and losses from plan adjustments and curtailments. These amounts do not reflect normal, cash-settled expenses and are not indicative of current Operating expense fundamentals; and
- Other items not indicative of normal operations or performance of our segments or may be related to infrequent events including capital or organizational restructurings including certain costs related to debt and equity

offerings as well as stock and/or cash based deal contingent awards; expenses associated with the rebranding of Voya Financial, Inc.; severance and other third-party expenses associated with the 2016 Restructuring. These items vary widely in timing, scope and frequency between periods as well as between companies to which we are compared. Accordingly, we adjust for these items as we believe that these items distort the ability to make a meaningful evaluation of the current and future performance of our segments. Additionally, with respect to restructuring, these costs represent changes in operations rather than investments in the future capabilities of our operating businesses.

Adjusted operating earnings before income taxes for Corporate in the prior period includes Net investment gains (losses) and Net guaranteed benefit hedging gains (losses) associated with the retained CBVA and annuities businesses that are not components of discontinued operations. These retained amounts are insignificant and do not distort the ability to make a meaningful evaluation of the trends of Corporate activities.

Income (loss) related to businesses exited through reinsurance or divestment (including net investment gains (losses) on securities sold and expenses directly related to these transactions) is excluded from the results of operations from adjusted operating earnings before income taxes. When we present the adjustments to income (loss) from continuing operations before income taxes on a consolidated basis, each adjustment excludes the relative portions attributable to businesses exited through reinsurance or divestment.

The most directly comparable U.S. GAAP measure to adjusted operating earnings before income taxes is income (loss) from continuing operations before income taxes. For a reconciliation of income (loss) from continuing operations before income taxes to adjusted operating earnings before income taxes, see the tables that accompany this release, as well as our Quarterly Investor Supplement.

Adjusted operating earnings - excluding unlocking is also a non-GAAP financial measure. This measure excludes from adjusted operating earnings before income taxes the following items:

- DAC/VOBA and other intangibles unlocking; and
- The net gains included in adjusted operating earnings from a distribution of cash and securities in conjunction with a Lehman Brothers bankruptcy settlement ("Lehman Recovery"), and losses as a result of the decision to dispose of certain Low Income Housing Tax Credit partnerships ("LIHTC") as a mean of exiting this asset class. Because DAC/VOBA and other intangibles unlocking can be volatile, excluding the effect of this item can improve period to period comparability. The net gain from the Lehman Recovery and loss from the disposition of LIHTC partnerships affected run-rate results and we believe that this effect is not reflective of our ongoing performance.

In addition to net income (loss) per share, we report adjusted operating earnings per share (diluted) because we believe that adjusted operating earnings before income taxes provides a meaningful measure of its business and segment performances and enhances the understanding of our financial results by focusing on the operating performance and trends of the underlying business segments and excluding items that tend to be highly variable from period to period based on capital market conditions and/or other factors.

In addition to book value per share including accumulated other comprehensive income (AOCI), we also report book value per share excluding AOCI and shareholders' equity excluding AOCI. Included in AOCI are investment portfolio unrealized gains or losses. In the ordinary course of business we do not plan to sell most investments for the sole purpose of realizing gains or losses, and book value per share excluding AOCI and shareholders' equity excluding AOCI provide a measure consistent with that view. The adjusted debt to capital calculation excludes AOCI and includes a 25% equity treatment afforded to subordinated debt.

In our Investment Management business, adjusted operating margin excluding Investment Capital results is reported because results from Investment Capital can be volatile and excluding the effect of this item can improve period-to-period comparability.

For a reconciliation of these non-GAAP measures to the most directly comparable U.S. GAAP measures, refer to the tables that accompany this release, as well as our Quarterly Investor Supplement.

We also analyze our segment performance based on the sources of earnings. We believe this supplemental information is useful in order to gain a better understanding of our adjusted operating earnings before income taxes

for the following reasons: (1) we analyze our business using this information and (2) this presentation can be helpful for investors to understand the main drivers of adjusted operating earnings (loss) before income taxes. The sources of earnings are defined as such:

- Investment spread and other investment income consists of net investment income and net realized investment gains (losses) associated with swap settlements and accrued interest, less interest credited to policyholder reserves.
- Fee based margin consists primarily of fees earned on assets under management ("AUM"), assets under administration ("AUA"), and transaction based recordkeeping fees.
- Net underwriting gain (loss) and other revenue contains the following: the difference between fees charged for insurance risks and incurred benefits, including mortality, morbidity, and surrender results, contractual charges for universal life and annuity contracts, the change in the unearned revenue reserve for universal life contracts, and that portion of traditional life insurance premiums intended to cover expenses and profits. Certain contract charges for universal life insurance are not recognized in income immediately, but are deferred as unearned revenues and are amortized into income in a manner similar to the amortization of DAC.
- Administrative expenses are general expenses, net of amounts capitalized as acquisition expenses and exclude commission expenses and fees on letters of credit.
- Trail commissions are commissions paid that are not deferred and thus recorded directly to expense.
- For a detail explanation of DAC/VOBA and other intangibles amortization/unlocking see Management's Discussion and Analysis of Financial Condition and Results of Operations - Unlocking of DAC/VOBA and other Contract Owner/Policyholder Intangibles in our Annual Report on Form 10-K for the twelve-month period ended Dec. 31, 2017, which the company filed with the Securities and Exchange Commission on Feb. 23, 2018 and in our Quarterly Report on Form 10-Q for the three-month period ended June 30, 2018, which the company expects to file with the Securities and Exchange Commission on or before Aug. 8, 2018.

More details on these sources of earnings can be found in Voya Financial's Quarterly Investor Supplement, which is available on Voya Financial's investor relations website, investors.voya.com.

Forward-Looking and Other Cautionary Statements

This press release contains forward-looking statements. Forward-looking statements include statements relating to future developments in our business or expectations for our future financial performance and any statement not involving a historical fact. Forward-looking statements use words such as "anticipate," "believe," "estimate," "expect," "intend," "plan," and other words and terms of similar meaning in connection with a discussion of future operating or financial performance. Actual results, performance or events may differ materially from those projected in any forward-looking statement due to, among other things, (i) general economic conditions, particularly economic conditions in our core markets, (ii) performance of financial markets, including emerging markets, (iii) the frequency and severity of insured loss events, (iv) mortality and morbidity levels, (v) persistency and lapse levels, (vi) interest rates, (vii) currency exchange rates, (viii) general competitive factors, (ix) changes in laws and regulations, such as those relating to Federal taxation, state insurance regulations and NAIC regulations and guidelines, including those affecting reserve requirements for variable annuity policies and the use of and possible application of NAIC accreditation standards to captive reinsurance entities, those made pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act, and the U.S. Department of Labor's final rules and exemptions pertaining to the fiduciary status of providers of investment advice, or any amendments thereto, (x) changes in the policies of governments and/or regulatory authorities, and (xi) our ability to successfully manage the separation of Venerable, including the transition services, on the expected timeline and economic terms. Factors that may cause actual results to differ from those in any forward-looking statement also include those described under "Risk Factors" and "Management's Discussion and Analysis of Results of Operations and Financial Condition - Trends and Uncertainties" in our Annual Report on Form 10-K for the year ended Dec. 31, 2017, which the company filed with the Securities and Exchange Commission on Feb. 23, 2018 and in our Quarterly Report on Form 10-Q for the three-month period ended June 30, 2018, which the company expects to file with the Securities and Exchange Commission on or before Aug. 8, 2018.

	Fully Diluted weighted average shares outstanding	173
Dilutive effect of the exercise or issuance of stock based awards	—	—
Weighted average common shares outstanding - diluted (adjusted operating)	173	188

⁽¹⁾ Voya Financial assumes a 32% tax rate on adjusted operating earnings and all components of adjusted operating earnings described as "after tax" for 2017. For 2018, the adjusted operating effective tax rate is based on the actual income tax expense for the current period related to Income (loss) from continuing operations, less estimated taxes on non-operating items assuming a 21% corporate tax rate and other non-operating impacts such as those related to restructuring and the Tax Cuts and Jobs Act. A 35% tax rate is applied to all non-operating items in 2017 and 21% in 2018. The 32% tax rate for 2017 adjusted operating earnings and components reflects the estimated benefit of the dividend received deduction related to the company's Retirement, Investment Management, Employee Benefits and Individual Life segments.

⁽²⁾ "Other adjustments" consists of net guaranteed benefit hedging gains (losses) and related charges and adjustments; income (loss) from business exited; immediate recognition of net actuarial gains (losses) related to pension and other post-retirement benefit obligations and gains (losses) from

plan amendments and curtailments; expenses associated with the rebranding of Voya Financial from ING U.S.; and restructuring expenses (severance, lease write-offs, etc.).

Explanatory Note on Non-GAAP Financial Information

On June 1, 2018, we closed a transaction that resulted in the disposition of substantially all of our Closed Block Variable Annuity ("CBVA") and annuities businesses (the "Transaction"). As a result, the assets and liabilities of the businesses sold were classified as held for sale in prior periods and the results of operations have been classified as discontinued operations for all periods presented in this Quarterly Investor Supplement. Pursuant to the Transaction, we evaluated our segments and determined that the retained CBVA and annuities policies that are not components of the disposed businesses described above ("Retained Business") have insignificant impacts to Adjusted operating earnings before taxes. As such, we have recorded the results of these retained businesses in Corporate.

Adjusted Operating Earnings Before Income Taxes

Adjusted operating earnings before income taxes is a measure used to evaluate segment performance. We believe that Adjusted operating earnings before income taxes provides a meaningful measure of its business and segment performances and enhances the understanding of our financial results by focusing on the operating performance and trends of the underlying business segments and excluding items that tend to be highly variable from period to period based on capital market conditions and/or other factors. We use the same accounting policies and procedures to measure segment Adjusted operating earnings before income taxes as we do for the directly comparable U.S. GAAP measure Income (loss) from continuing operations before income taxes.

Adjusted operating earnings before income taxes does not replace Income (loss) from continuing operations before income taxes as the comparable U.S. GAAP measure of our consolidated results of operations. Therefore, we believe that it is useful to evaluate both Income (loss) from continuing operations before income taxes and Adjusted operating earnings before income taxes when reviewing our financial and operating performance. Each segment's Adjusted operating earnings before income taxes is calculated by adjusting Income (loss) from continuing operations before income taxes for the following items:

- Net investment gains (losses), net of related amortization of DAC, VOBA, sales inducements and unearned revenue, which are significantly influenced by economic and market conditions, including interest rates and credit spreads, and are not indicative of normal operations. Net investment gains (losses) include gains (losses) on the sale of securities, impairments, changes in the fair value of investments using the FVO unrelated to the implied loan-backed security income recognition for certain mortgage-backed obligations and changes in the fair value of derivative instruments, excluding realized gains (losses) associated with swap settlements and accrued interest;
- Net guaranteed benefit hedging gains (losses), which are significantly influenced by economic and market conditions and are not indicative of normal operations, include changes in the fair value of derivatives related to guaranteed benefits, net of related reserve increases (decreases) and net of related amortization of DAC, VOBA and sales inducements, less the estimated cost of these benefits. The estimated cost, which is reflected in operating results, reflects the expected cost of these benefits if markets perform in line with our long-term expectations and includes the cost of hedging. Other derivative and reserve changes related to guaranteed benefits are excluded from operating results, including the impacts related to changes in nonperformance spread;
- Income (loss) related to businesses exited through reinsurance or divestment that do not qualify as discontinued operations, which includes gains and (losses) associated with transactions to exit blocks of business (including net investment gains (losses) on securities sold and expenses directly related to these transactions) and residual run-off activity; these gains and (losses) are often related to infrequent events and do not reflect performance of operating segments. Excluding this activity better reveals trends in our core business, which would be obscured by including the effects of business exited, and more closely aligns Adjusted operating earnings before income taxes with how we manages our segments;
- Income (loss) attributable to noncontrolling interest, which represents the interest of shareholders, other than those of Voya Financial, Inc., in the gains and (losses) of consolidated entities, or the attribution of results from consolidated VIEs or VOs to which we are not economically entitled;
- Income (loss) related to early extinguishment of debt, which includes losses incurred as a result of transactions where we repurchase outstanding principal amounts of debt; these losses are excluded from Adjusted operating earnings before income taxes since the outcome of decisions to restructure debt are not indicative of normal operations;
- Impairment of goodwill, value of management contract rights and value of customer relationships acquired, which includes losses as a result of impairment analysis; these represent losses related to infrequent events and do not reflect normal, cash-settled expenses;
- Immediate recognition of net actuarial gains (losses) related to our pension and other postretirement benefit obligations and gains (losses) from plan amendments and curtailments, which includes actuarial gains and losses as a result of differences between actual and expected experience on pension plan assets or projected benefit obligation during a given period. We immediately recognize actuarial gains and (losses) related to pension and other postretirement benefit obligations and gains and losses from plan adjustments and curtailments. These amounts do not reflect normal, cash-settled expenses and are not indicative of current Operating expense fundamentals; and
- Other items not indicative of normal operations or performance of our segments or may be related to infrequent events including capital or organizational restructurings including certain costs related to debt and equity offerings as well as stock and/or cash based deal contingent awards; expenses associated with the rebranding of Voya Financial, Inc.; severance and other third-party expenses associated with restructuring. These items vary widely in timing, scope and frequency between periods as well as between companies to which we are compared. Accordingly, we adjust for these items as we believe that these items distort the ability to make a meaningful evaluation of the current and future performance of our segments. Additionally, with respect to restructuring, these costs represent changes in operations rather than investments in the future capabilities of our operating businesses.

Adjusted operating earnings before income taxes for Corporate includes Net investment gains (losses) and Net guaranteed benefit hedging gains (losses) associated with the Retained Business in periods prior to 2018. These retained amounts are insignificant and do not distort the ability to make a meaningful evaluation of the trends of Corporate activities.

Explanatory Note on Non-GAAP Financial Information

Income (loss) related to businesses exited through reinsurance or divestment (including net investment gains (losses) on securities sold and expenses directly related to these transactions) is excluded from the results of operations from Adjusted operating earnings before income taxes. When we present the adjustments to Income (loss) from continuing operations before income taxes on a consolidated basis, each adjustment excludes the relative portions attributable to businesses exited through reinsurance or divestment.

The most directly comparable U.S. GAAP measure to Adjusted operating earnings before income taxes is Income (loss) from continuing operations before income taxes. For a reconciliation of Adjusted operating earnings before income taxes to Income (loss) from continuing operations before income taxes, refer to the "Reconciliations" section in this document.

Adjusted Operating Earnings - excluding Unlocking

Adjusted operating earnings - excluding unlocking is also a non-GAAP financial measure. This measure excludes from Adjusted operating earnings before income taxes the following items:

- DAC/VOBA and other intangibles unlocking; and
- The net gains included in Adjusted operating earnings from a distribution of cash and securities in conjunction with a Lehman Brothers bankruptcy settlement ("Lehman Recovery"), and losses as a result of the decision to dispose of certain Low Income Housing Tax Credit partnerships ("LIHTC") as a mean of exiting this asset class.

Because DAC/VOBA and other intangibles unlocking can be volatile, excluding the effect of this item can improve period to period comparability. The net gain from the Lehman Brothers bankruptcy settlement and loss from the disposition of low-income housing tax credit partnerships affected run-rate results and we believe that this effect is not reflective of our ongoing performance.

Adjusted Operating Earnings per Share (Diluted); Shareholders' Equity/Book Value per Share, Excluding AOCI

In addition to Net income (loss) per share, we report Adjusted operating earnings per share (diluted) because we believe that Adjusted operating earnings before income taxes provides a meaningful measure of its business and segment performances and enhances the understanding of our financial results by focusing on the operating performance and trends of the underlying business segments and excluding items that tend to be highly variable from period to period based on capital market conditions and/or other factors.

In addition to book value per share including Accumulated other comprehensive income (AOCI), we also report book value per share excluding AOCI and shareholders' equity excluding AOCI. Included in AOCI are investment portfolio unrealized gains or losses. In the ordinary course of business we do not plan to sell most investments for the sole purpose of realizing gains or losses, and book value per share excluding AOCI and shareholders' equity excluding AOCI provide a measure consistent with that view. The Adjusted debt to capital excludes AOCI and includes a 25% equity treatment afforded to subordinated debt.

For a reconciliation of these non-GAAP measures to the most directly comparable U.S. GAAP measures, refer to the "Reconciliation of Adjusted Operating Earning Per Share; Book Value Per Share, Excluding AOCI" page of this document.

Adjusted Return on Capital

We report Adjusted return on capital ("ROC") because we believe this measure is a useful indicator of how effectively we use capital resources allocated to our segments apart from corporate and closed block activities, which include our Retirement, Investment Management, Individual Life and Employee Benefits segments. Capital is allocated to each of our segments in proportion to each segment's target statutory capital, plus an allocation of the differences between statutory capital and total Voya Financial, Inc. shareholders' equity on a GAAP basis (excluding AOCI), based on each segment's portion of these differences. Statutory surplus in excess of target statutory capital and certain corporate assets and liabilities, such as certain deferred tax assets and liabilities for unfunded pension plans, are allocated to Corporate.

Adjusted Operating Effective Tax Rate

The Adjusted operating effective tax rate for 2018 is based on the income tax expense for the current period related to Income (loss) from continuing operations, less estimated taxes on non-operating items assuming a 21% corporate tax rate, and other non-operating impacts such as those related to restructuring and the Tax Cuts and Jobs Act. Voya assumes a 21% tax rate on all components of Adjusted operating earnings described as "after-tax". For purposes of calculating segment Adjusted ROC, we assume a 21% tax rate on segment Adjusted operating earnings, excluding unlocking, less the estimated benefit of the dividends received deduction in our Retirement segment. For periods before 2018, we assumed a 32% tax rate on Adjusted operating earnings and all components of Adjusted operating earnings described as after-tax, which reflects the estimated benefit of the dividends received deduction related to our segments.

Stranded Costs

As a result of the Transaction, the revenues and expenses of the businesses held for sale have been classified as discontinued operations. Expenses classified within discontinued operations include only direct operating expenses incurred by the businesses sold that 1) are identifiable as costs of the businesses sold, and 2) we will not continue to incur after the close of the Transaction. Consequently, indirect costs, such as those related to corporate and shared service functions that were previously allocated to the businesses held for sale, are excluded from discontinued operations. In addition, certain direct costs related to the businesses sold, for which we will continue to perform transition services and be reimbursed in a transaction services agreement, are excluded from discontinued operations. Both types of costs ("Stranded Costs") are included in Adjusted operating earnings and Income (loss) from continuing operations for all periods presented. We do not believe these Stranded Costs are representative of the future run-rate of expenses for our continuing operations, therefore they are currently allocated to Corporate. We will undertake efforts to eliminate some or all of the Stranded Costs through a cost reduction strategy.

Explanatory Note on Non-GAAP Financial Information

Adjusted Operating Revenues

Adjusted operating revenues is a measure of our segment revenues and a non-GAAP financial measure. Each segment's Adjusted operating revenues are calculated by adjusting Total revenues for the following items:

- Net realized investment gains (losses) and related charges and adjustments, which are significantly influenced by economic and market conditions, including interest rates and credit spreads and are not indicative of normal operations. Net investment gains (losses) include gains (losses) on the sale of securities, impairments, changes in the fair value of investments using the FVO unrelated to the implied loan-backed security income recognition for certain mortgage-backed obligations and changes in the fair value of derivative instruments, excluding realized gains (losses) associated with swap settlements and accrued interest. These are net of related amortization of unearned revenue;
- Gain (loss) on change in fair value of derivatives related to guaranteed benefits, which is significantly influenced by economic and market conditions and not indicative of normal operations, includes changes in the fair value of derivatives related to guaranteed benefits, less the estimated cost of these benefits. The estimated cost, which is reflected in operating results, reflects the expected cost of these benefits if markets perform in line with our long-term expectations and includes the cost of hedging. Other derivative and reserve changes related to guaranteed benefits are excluded from operating revenues, including the impacts related to changes in nonperformance spread;
- Revenues related to businesses exited through reinsurance or divestment that do not qualify as discontinued operations, which includes revenues associated with transactions to exit blocks of business (including net investment gains (losses) on securities sold related to these transactions) and residual run-off activity; these gains and (losses) are often related to infrequent events and do not reflect performance of operating segments. Excluding this activity better reveals trends in our core business, which would be obscured by including the effects of business exited, and more closely aligns Operating revenues with how we manages our segments;
- Revenues attributable to noncontrolling interest, which represents the interests of shareholders, other than those of Voya Financial, Inc., in consolidated entities. Revenues attributable to noncontrolling interest represents such shareholders' interests in the gains and losses of those entities, or the attribution of results from consolidated VIEs or VOs to which we are not economically entitled; and
- Other adjustments to total revenues primarily reflect fee income earned by our broker-dealers for sales of non-proprietary products, which are reflected net of commission expense in our segments' operating revenues, other items where the income is passed on to third parties and the elimination of intercompany investment expenses included in operating revenues.

Adjusted operating revenues for Corporate includes Net investment gains (losses) and Gains (losses) on change in fair value of derivatives related to guaranteed benefits associated with the Retained Business in the periods prior to 2018. These retained amounts are insignificant and do not distort the ability to make a meaningful evaluation of the trends of Corporate activities.

The most directly comparable U.S. GAAP measure to Adjusted operating revenues is Total revenues. For a reconciliation of Adjusted operating revenues to Total revenues, refer to the "Reconciliations" section in this document.

Sources of Earnings

We analyze our segment performance based on the sources of earnings. We believe this supplemental information is useful in order to gain a better understanding of our Adjusted operating earnings before income taxes for the following reasons: (1) we analyze our business using this information and (2) this presentation can be helpful for investors to understand the main drivers of Adjusted operating earnings (loss) before income taxes. The sources of earnings are defined as such:

- Investment spread and other investment income consists of net investment income and net realized investment gains (losses) associated with swap settlements and accrued interest, less interest credited to policyholder reserves.
- Fee based margin consists primarily of fees earned on assets under management ("AUM"), assets under administration ("AUA"), and transaction based recordkeeping fees.
- Net underwriting gain (loss) and other revenue contains the following: the difference between fees charged for insurance risks and incurred benefits, including mortality, morbidity, and surrender results, contractual charges for universal life and annuity contracts, the change in the unearned revenue reserve for universal life contracts, and that portion of traditional life insurance premiums intended to cover expenses and profits. Certain contract charges for universal life insurance are not recognized in income immediately, but are deferred as unearned revenues and are amortized into income in a manner similar to the amortization of DAC.
- Administrative expenses are general expenses, net of amounts capitalized as acquisition expenses and exclude commission expenses and fees on letters of credit.
- Trail commissions are commissions paid that are not deferred and thus recorded directly to expense.
- For a detail explanation of DAC/VOBA and other intangibles amortization/unlocking see "Unlocking of DAC/VOBA and other Contract Owner/Policyholder Intangibles" in our SEC filings.

⁽¹⁾ Beginning in the second quarter of 2017, we solicited customer consents to execute a change to reduce the guaranteed minimum interest rate ("GMIR") applicable to future deposits and transfers into fixed investment option for certain retirement plan contracts with above-market GMIRs. This change, which reduces our exposure to low interest rates on new deposits, transfers and in certain plans existing fixed account assets, resulted in unfavorable unlocking for the Retirement segment of \$43 million, \$92 million and \$128 million, for the three months ended 3/31/2018, 9/30/2017 and 6/30/2017, respectively.

⁽²⁾ Includes Employee Benefits, Investment Management and closed blocks, including remaining annuities businesses.

⁽¹⁾ During the first quarter of 2018, results from certain investment-only products were moved from Corporate to the Retirement segment.

⁽²⁾ Beginning in the second quarter of 2017, we solicited customer consents to execute a change to reduce the guaranteed minimum interest rate ("GMIR") applicable to future deposits and transfers into fixed investment option for certain retirement plan contracts with above-market GMIRs. This change, which reduces our exposure to low interest rates on new deposits, transfers and in certain plans existing fixed account assets, resulted in unfavorable unlocking for the Retirement segment of \$43 million, \$92 million and \$128 million, for the three months ended 3/31/2018, 9/30/2017 and 6/30/2017, respectively.

⁽³⁾ Adjusted Return on Capital calculated using trailing twelve months.

⁽⁴⁾ Includes investment income on assets backing surplus that has been allocated from the corporate segment and income from policy loans.

⁽⁵⁾ Includes Recordkeeping and Stable Value where Voya is not the Investment Manager.

⁽¹⁾ Where Voya is the Investment Manager. Stable Value assets move from AUM to AJA when Voya no longer serves as Investment Manager but continues to provide a book value guarantee.

⁽²⁾ During the Q1 2018, results from certain investment-only products were moved from Corporate to the Retirement segment. In addition, an adjustment in Q2 2018 reflects certain stable value assets that were previously reported as AJA.

⁽³⁾ Excludes Recordkeeping and Stable Value where Voya is not the Investment Manager.

Investment Management Sources of Adjusted Operating Earnings

(in millions USD)	Three Months Ended					Year-to-Date	
	6/30/2018	3/31/2018	12/31/2017	9/30/2017	6/30/2017	6/30/2018	6/30/2017
Sources of operating earnings before income taxes:							
Investment capital and other investment income ⁽¹⁾	5	11	8	5	36	16	44
Fee based margin	166	174	177	166	168	340	331
Administrative expenses	(119)	(124)	(125)	(117)	(119)	(243)	(241)
Adjusted operating earnings before income taxes	52	61	60	54	85	113	134
Fee based margin							
Investment advisory and administrative revenue	161	165	164	160	157	326	308
Other fee based margin	5	9	13	6	11	14	23
Fee based margin	166	174	177	166	168	340	331

⁽¹⁾ Includes performance fees related to sponsored private equity funds ("carried interest") that are subject to later reversal based on subsequent fund performance, to the extent that cumulative rates of investment return fall below specified investment hurdle rates. Should the market value of a portfolio increase in future periods, reversals of carried interest could be fully or partially recovered. For the three months ended 6/30/2018, our carried interest total net results were immaterial. For the three months ended 12/31/2017, 9/30/2017 and 6/30/2017, our carried interest net results included a gain (loss) of \$9 million, \$(2) million, and \$28 million, respectively, including the recovery of \$25 million of carried interest reversed in prior periods.

(1) Adjustments include the elimination of intercompany transactions between the Company and its consolidated investment entities, primarily the elimination of the Company's equity at risk recorded as investments by the Company (before consolidation) against either equity (private equity and real estate partnership funds) or senior and subordinated debt (CLOs) of the funds.

(2) Fixed Maturity Securities includes fixed maturities, available for sale, fixed maturities at fair value using the fair value option and securities pledged to creditors.

(3) Subprime asset-backed securities are included as a component of Non-Agency RMBS under this presentation.

(4) ARO ratings do not directly translate into NAIC ratings.

(5) Includes fixed maturities securities related to businesses exited through reinsurance where assets are retained on the Company's balance sheet.

⁽¹⁾ Investment results related to businesses exited through reinsurance are excluded.

⁽²⁾ Operating income from CMO-B portfolio assets, including derivatives, is included in fixed maturity securities.

⁽³⁾ Fair value adjustments include adjustments related to CMO-B assets carried at fair value, among other income sources.

⁽⁴⁾ Income related to reinsurance transactions, in which investment results are passed directly to the reinsurers pursuant to contracted terms of the reinsurance agreement.

⁽⁵⁾ Includes i) the impact of consolidation of investment entities into the Consolidated Statements of Operations, net of the elimination of the Company's management fees expensed by the funds and recorded as operating revenues (before consolidation) by the Company, ii) the elimination of intersegment expenses, primarily consisting of asset-based management and administration fees charged by our Investment Management Segment, iii) and other intersegment eliminations.

Alternative Investment Income

(in millions USD)	Three Months Ended					Year-to-Date	
	6/30/2018	3/31/2018	12/31/2017	9/30/2017	6/30/2017	6/30/2018	6/30/2017

Alternative investment income	16	9	10	8	8	25	13

The table above excludes alternative investments and income that are a component of Assets held for sale and Income (loss) from discontinued operations, net of tax, respectively, and alternative investments and income in Corporate.

⁽¹⁾ Includes performance fees related to sponsored private equity funds ("carried interest") that are subject to later reversal based on subsequent fund performance, to the extent that cumulative rates of investment return fall below specified investment hurdle rates. Should the market value of a portfolio increase in future periods, reversals of carried interest could be fully or partially recovered. For the three months ended 6/30/2018, our carried interest total net results were immaterial. For the three months ended 12/31/2017, 9/30/2017 and 6/30/2017, our carried interest net results included a gain (loss) of \$9 million, \$(2) million, and \$28 million, respectively, including the recovery of \$25 million of carried interest reversed in prior periods.
