- 10.4% increase in net sales (7.7% on a constant currency basis) of Titleist golf clubs as a result of continued strong demand for the new 2016 model 716 irons, Vokey wedges and Scotty Cameron putters
- 5.5% decrease in net sales (6.5% on a constant currency basis) of Titleist golf balls as a result of the off-course U.S. retail channel disruption caused by the bankruptcy of Sports Authority and the reorganization efforts of Golfsmith and the fact that our Pro V1 and Pro V1x balls are in the second year of their 2-year product cycle

Consolidated net sales in the United States decreased by 0.7%, impacted by soft market conditions in the United States and the reorganization efforts of Golfsmith. Net income (loss) attributable to Acushnet increased by \$7.8 million to a loss of \$6.2 million primarily as a result of higher income from operations principally due to higher gross profit in FootJoy golf wear and Titleist golf clubs offset by lower gross profit in Titleist golf balls, and lower SG&A expenses.

Use of Non-GAAP Financial Measures

This release includes the non-GAAP financial measures of net sales in constant currency and Adjusted EBITDA. These non-GAAP financial measures are not measures of financial performance in accordance with GAAP and may exclude items that are significant in understanding and assessing the Company's financial results. Therefore, these measures should not be considered in isolation or as an alternative to net sales, net income, cash flows from operations or other measures of profitability, liquidity or performance under GAAP. You should be aware that the Company's presentation of these measures may not be comparable to similarly-titled measures used by other companies.

We use net sales on a constant currency basis to evaluate the sales performance of our business in period over period comparisons and for forecasting our business going forward. Constant currency information allows us to estimate what our sales performance would have been without changes in foreign currency exchange rates. This information is calculated by taking the current period local currency sales and translating them into U.S. dollars based upon the foreign currency exchange rates for the applicable comparable prior period. This constant currency information should not be considered in isolation or as a substitute for any measure derived in accordance with GAAP. Our presentation of constant currency information may not be consistent with the manner in which similar measures are derived or used by other companies.

Adjusted EBITDA represents net income (loss) attributable to Acushnet Holdings Corp. plus income tax expense, interest expense, depreciation and amortization, the expenses relating to the Acushnet Company Equity Appreciation Rights Plan, as amended (the "EAR Plan"), share-based compensation expense, a one-time executive bonus, restructuring charges, plant start-up costs, certain transaction fees, indemnification expense (income) from our former owner Beam Suntory, Inc. (formerly known as Fortune Brands, Inc.) ("Beam"), gains (losses) on the fair value of our common stock warrants, certain other non-cash gains, net and the net income relating to noncontrolling interests in our FootJoy golf shoe joint venture. We define Adjusted EBITDA in a manner consistent with the term "Consolidated EBITDA" as it is defined in our credit agreement. Consolidated EBITDA is used in our credit agreement at the Acushnet Company level for purposes of certain material terms, including (i) determining the applicable margin used to determine the interest rate per annum of outstanding borrowings and commitment fees for revolving commitments, (ii) calculating certain financial ratios used in financial maintenance covenants that require compliance on a quarterly basis, (iii) determining our ability to incur additional term loans or increases to our new revolving credit facility and (iv) determining the availability of certain baskets and the ability to enter into certain transactions.

We present Adjusted EBITDA as a supplemental measure because it excludes the impact of certain items that (i) we do not consider indicative of our ongoing operating performance, (ii) that relate to our acquisition of Acushnet Company, our operating subsidiary, from Beam on July 29, 2011 (the "Acquisition") or (iii) that relate to our historical capital structure that will no

longer be relevant after the closing of this offering. Management uses Adjusted EBITDA to evaluate the effectiveness of our business strategies, assess our consolidated operating performance and make decisions regarding pricing of our products, go to market execution and costs to incur across our business. Adjusted EBITDA is also used as a financial performance measure for purposes of determining the vesting of equity awards that were granted under our Acushnet Holdings Corp. 2015 Omnibus Incentive Plan.

We also believe Adjusted EBITDA provides useful information to investors regarding (i) our consolidated operating performance, (ii) our capacity to service debt, (iii) the applicable margin used to determine the interest rate per annum of outstanding borrowings and commitment fees for revolving commitments and (iv) our capacity to incur additional debt and utilize certain baskets and enter into transactions that may otherwise be restricted by our credit agreement. By presenting Adjusted EBITDA, we provide a basis for comparison of our business operations between different periods by excluding items that we do not believe are indicative of our core operating performance.

Adjusted EBITDA is not a measurement of financial performance under GAAP. It should not be considered an alternative to net income (loss) attributable to Acushnet Holdings Corp. as a measure of our operating performance or any other measure of performance derived in accordance with GAAP. In addition, Adjusted EBITDA should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items, or affected by similar non-recurring items. Adjusted EBITDA has limitations as an analytical tool, and you should not consider such measure either in isolation or as a substitute for analyzing our results as reported under GAAP. Our definition and calculation of Adjusted EBITDA is not necessarily comparable to other similarly titled measures used by other companies due to different methods of calculation.

The following table presents reconciliations of net income (loss) attributable to Acushnet to Adjusted EBITDA for the periods presented:
