SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒

Non-accelerated filer ☐

Emerging growth company ☐

Accelerated filer ☐

Smaller reporting company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal controls over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes ☐ No ☒

As of June 30, 2025, (the last business day of the registrant's most recently completed second fiscal quarter) the aggregate market value of the voting stock held by nonaffiliates of the registrant was \$3,998,795,954. This excludes \$44,543,831 of market value representing the outstanding shares of the registrant owned by all directors and officers who may be deemed affiliates. This includes \$61,551,067 of market value representing 1.52% of the outstanding shares of the registrant held in a fiduciary capacity by the trust company subsidiary of the registrant.

As of January 30, 2026, 165,975,086 shares of common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the Annual Meeting of Shareholders to be held on April 28, 2026 are incorporated by reference in this Form 10-K into Part III.

Special Note Regarding Forward-Looking Statements

This document, including the documents that are incorporated by reference, contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Exchange Act. You can identify forward-looking statements by words such as "believe," "expect," "anticipate," "plan," "estimate," "should," "intend," "target," "outlook," "project," "guidance," "forecast," or similar expressions. You should read statements that contain these words carefully because they discuss our future expectations or state other "forward-looking" information. Such forward-looking statements may relate to our financial condition, results of operations, plans, objectives, future performance, or business and are based upon the beliefs and assumptions of our management and the information available to our management at the time these disclosures are prepared. These forward-looking statements involve risks and uncertainties that we may not be able to accurately predict or control and our actual results may differ materially from those we described in our forward-looking statements. Shareholders should be aware that the occurrence of the events discussed under the heading Risk Factors in this document, and in the information incorporated by reference herein, could have an adverse effect on our business, results of operations, and financial condition. These factors, many of which are beyond our control, include the following.

- Credit risks, including changes in economic conditions and risk relating to our ACL.
- Liquidity and interest rate risks, including the impact of capital market conditions and changes in monetary policy on our borrowings and net interest income.
- Operational risks, including processing, information systems, cybersecurity, vendor problems, business interruption, and fraud risks.
- Strategic and external risks, including economic, political, and competitive forces impacting our business.
- Risk relating to Associated's previously announced proposed acquisition of American National, including delays in or failure to complete the proposed transaction, or to realize its anticipated net benefits.
- Legal, compliance, and reputational risks, including regulatory and litigation risks.
- The risk that our analyses of these risks and forces could be incorrect and/or that the strategies developed to address them could be unsuccessful.

For a discussion of these and other risks that may cause actual results to differ from expectations, please refer to the Risk Factors Summary and Risk Factors sections of this document. The forward-looking statements contained or incorporated by reference in this document relate only to circumstances as of the date on which the statements are made. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Risk Factors Summary

Our business is subject to a number of risks, a summary of which is set forth below. These risks are discussed more fully in Part I, Item 1A, Risk Factors herein.

Credit Risks

- Changes and instability in economic conditions, geopolitical matters and financial markets could adversely impact our business, results of operations and financial condition.
- Changes in U.S. trade policies may adversely impact our business, financial condition, and results of operations.
- Our allowance for credit losses on loans may be insufficient.
- We are subject to lending concentration risks.
- CRE lending may expose us to increased lending risks.
- We depend on the accuracy and completeness of information in connection with our customers and counterparties.
- Lack of system integrity or credit quality related to funds settlement could result in a financial loss.
- We are subject to environmental liability risk associated with lending activities.

Liquidity and Interest Rate Risks

- Impairment of our access to liquidity could affect our ability to meet our obligations.
- The proportion of our uninsured deposits may expose the Bank to enhanced liquidity risk in times of financial distress.
- Adverse changes to our credit ratings could limit our access to funding and increase our borrowing costs.
- We are subject to interest rate risk.
- The impact of interest rates on our mortgage banking business can have a significant impact on revenues.
- Changes in interest rates could reduce the value of our investment securities holdings.
- Changes in interest rates could reduce the value of our residential mortgage-related securities and MSRs.

- We rely on dividends from our subsidiaries for most of our cash flow.

Operational Risks

- We face significant operational risks due to the high volume and the high dollar value nature of transactions we process.
- Unauthorized disclosure of sensitive or confidential client or customer information could severely harm our business.
- Information security risks for financial institutions like us continue to increase because of various factors.
- The integration of core systems and processes after acquisitions may create elevated risk of cyber incidents.
- Any failures or disruptions to our third parties' communications and information systems and networks could materially and adversely affect our business.
- Failure to meet industry standards regarding credit card-related services may significantly impact our ability to offer these services.
- Compliance with the evolving laws related to the handling of information about individuals involves significant expenditure and resources, and any failure to comply may result in significant liability, negative publicity, and/or an erosion of trust.
- The use of AI in connection with our business and operations contains inherent risks that may expose us to material harm and any actual or perceived failure to comply with evolving regulatory frameworks around the development and use of AI could adversely affect our business, results of operations, and financial condition.
- We are dependent upon third parties for certain information system, data management and processing services, and to provide key components of our business infrastructure.
- The potential for business interruption exists throughout our organization.
- Changes in the federal, state, or local tax laws may negatively impact our financial performance.
- Impairment of investment securities, goodwill, other intangible assets, or DTAs could require charges to earnings, which could result in a negative impact on our results of operations.
- Failure to appropriately administer or manage our investment management and asset servicing businesses properly could put the related earnings at risk.
- Climate-related risks could adversely affect our business and performance.
- Severe weather, natural disasters, public health issues, civil unrest, acts of war or terrorism, and other external events could significantly impact our ability to conduct business.

Strategic and External Risks

- Significant changes to the size, structure, powers and operations of the federal government may cause economic disruptions that could, in turn, adversely impact our business, results of operations and financial condition.
- Our financial condition and results of operations could be negatively affected if we fail to grow or fail to manage our growth effectively.
- We operate in a highly competitive industry and market area.
- Fiscal challenges facing the U.S. government could negatively impact financial markets which in turn could have an adverse effect on our financial position or results of operations.
- Consumers may decide not to use banks to complete their financial transactions.
- Our profitability depends significantly on economic conditions in the states within which we do business.
- The earnings of financial services companies are significantly affected by general business and economic conditions.
- New lines of business or new products and services may subject us to additional risk.
- Failure to keep pace with technological change could adversely affect our business.
- We may be adversely affected by risks associated with potential and completed acquisitions.
- Acquisitions may be delayed, impeded, or prohibited due to regulatory issues.
- We may not be able to successfully integrate American National or to realize the anticipated benefits of the acquisition.

Legal, Regulatory, Compliance and Reputational Risks

- We are subject to extensive government regulation and supervision.
- The Bank faces risks related to the adoption of future legislation and potential changes in federal regulatory agencies.
- Non-compliance with the USA PATRIOT Act, BSA or other laws and regulations could result in fines or sanctions.
- The failures of several banks in 2023 resulted in agency rulemaking activities and changes in agency policies and priorities that have subjected certain financial institutions to enhanced government regulation and supervision.
- Changes in requirements relating to the standard of conduct for broker-dealers under applicable federal and state law may adversely affect our business.

- Compliance with CFPB initiatives may impact the business operations for offering consumer financial products or services.
- The Bank is periodically examined for mortgage-related issues.
- We may experience unanticipated losses as a result of residential mortgage loan repurchase or reimbursement obligations under agreements with secondary market purchasers.
- Fee revenues from overdraft protection programs constitute a significant portion of our noninterest income and may become subject to increased supervisory scrutiny.
- We are subject to examinations and challenges by tax authorities.
- We are subject to claims and litigation pertaining to fiduciary responsibility.
- We may be a defendant in a variety of litigation and other actions.
- Negative publicity could damage our reputation.
- Ethics or conflict of interest issues could damage our reputation.

Risks Related to an Investment in Our Securities

- The price of our securities can be volatile.
- There may be future sales or other dilution of our equity, which may adversely affect the market price of our securities.
- We may reduce or eliminate dividends on our common stock.
- Common stock is equity and is subordinate to our existing and future indebtedness and preferred stock and effectively subordinated to all the indebtedness and other non-common equity claims against our subsidiaries.
- Our articles of incorporation, bylaws, and certain banking laws may have an anti-takeover effect.
- An investment in our common stock is not an insured deposit.

General Risk Factors

- Changes in our accounting policies or in accounting standards could materially affect how we report our financial results.
- Our internal controls may be ineffective.
- We may not be able to attract and retain skilled people.
- Loss of key colleagues may disrupt relationships with certain customers.

PART I

ITEM 1.

Business

General

Associated Banc-Corp is a bank holding company registered pursuant to the BHC Act. Our bank subsidiary, Associated Bank, traces its history back to the founding of the Bank of Neenah in 1861. We were incorporated in Wisconsin in 1964 and were inactive until 1969 when permission was received from the Federal Reserve to acquire three banks. At December 31, 2025, we owned one nationally chartered commercial bank headquartered in Green Bay, Wisconsin, which serves local communities across the upper Midwest, one nationally chartered trust company headquartered in Milwaukee, Wisconsin, and 12 limited purpose banking and nonbanking subsidiaries either located in or conducting business primarily in our four-state branch footprint (Wisconsin, Illinois, Minnesota, and Missouri) that are closely related or incidental to the business of banking or financial in nature. Measured by total assets reported at December 31, 2025, we are the largest bank holding company headquartered in Wisconsin.

Services

Through Associated Bank and various nonbanking subsidiaries, we provide a broad array of banking and nonbanking products and services to individuals and businesses through 184 banking branches as of December 31, 2025, serving more than 100 communities, primarily within our four-state branch footprint. Our business is primarily relationship-driven and is organized into three reportable segments: Corporate and Commercial Specialty; Community, Consumer, and Business; and Risk Management and Shared Services.

See Note 20 Segment Reporting of the notes to consolidated financial statements in Part II, Item 8, Financial Statements and Supplementary Data, for additional information concerning our reportable segments.

We are not dependent upon a single or a few customers, the loss of which would have a material adverse effect on us.

Human Capital Matters

We are very fortunate to have a team of approximately 4,000 colleagues at December 31, 2025 who are capable, determined and empowered to drive our company forward. None of our colleagues are represented by unions.

We believe attracting and retaining talent in a highly competitive candidate market fuels our ability to serve our customers and support our communities. We are focused on sourcing talent from all backgrounds through engagement with workforce development programs, partnerships with various organizations, and active campus recruitment. As a result, we were able to hire 675 external candidates in 2025. At the same time, in 2025, we had low voluntary turnover of 12% while 21% of colleagues advanced their careers at the Corporation through nearly 853 internal promotions or lateral moves. At December 31, 2025, the average tenure of our workforce was 8.8 years while the average tenure of our executive leadership team was 11.0 years.

Through internal and external training and development programs, we aim to help our colleagues improve their skills so they can achieve their career goals and transition to more challenging roles.

- Beginning in 2024, the Corporation initiated quarterly progress reviews for all colleagues designed to enhance colleague development, growth, and performance through consistent coaching and feedback.
- In 2024, we introduced significant training and resources for development and career planning to include new leadership development programs and workshops for both leaders and colleagues.
- During 2025, we completed over 280 individual career coaching sessions and offered nearly 70 hours of training to assist colleagues in creating meaningful performance and development objectives.

By strengthening our workforce and providing opportunities for colleagues to apply their talent and grow as professionals, we strive to foster pride in working for Associated and to be recognized as the employer of choice among Midwestern financial services firms.

Colleague engagement is a focus for our company. During 2025, 90% of our colleagues provided feedback through an annual workplace survey conducted by a third-party on key topics related to the overall health and culture of the organization. The survey respondent percentage is well above the average response rate for commercial banks. For the ninth year in a row, we received more than 8,000 colleague comments, including 9,500 in 2025, which we believe demonstrates that colleagues are interested in, and comfortable with, sharing candid feedback.

We are pleased to support total health and well-being through a variety of benefits, programs, activities, and educational opportunities throughout the year. Our dedicated Total Well-being team provides free and confidential health coaching while a 24/7/365 Employee Assistance Program (EAP) provides access to complimentary counseling services, financial coaching, and a variety of additional resources to support the unique needs of our colleagues and their families (e.g. elder, adult, child, family support and legal services). Additionally, our comprehensive Total Well-being platform provides all colleagues with an opportunity to earn incentives throughout the year for participating in activities, challenges, and educational opportunities. As of December 31, 2025:

- Nearly 2,700 colleagues and spouses participated in an annual wellness visit with a primary care provider.
- Nearly 1,884 colleagues received a well-being reimbursement for the purchase of items such as gym memberships, home fitness equipment, and/or fitness tracking devices. The total value for well-being reimbursements was over \$340,000.
- Over 1,454 colleagues earned incentives through our Total Well-being program totaling over \$180,000.

We regularly review our Total Rewards programs so that we are offering a total rewards package (including salary, incentives, benefits, and well-being opportunities) that we believe is fair, equitable, and competitive in our marketplace.

We believe our success begins and ends with people. For this reason, fostering a culture where people feel valued, respected, and comfortable sharing ideas and perspectives is a core focus of the Corporation. Our culture is anchored in the belief that we are better together, and great ideas can come from anywhere in the Corporation.

We are committed to nurturing an inclusive culture that is centered around providing equal opportunity to our colleagues (regardless of background), responding to community and customer needs, and producing exceptional value for our shareholders. Business lines are focused on fostering a culture of belonging and inclusion among our colleagues in support of equal opportunity. Our efforts are supported by the work of our seven CRGs. These groups, which are open to all employees,

are centered on development, colleague growth, and community involvement. Our CRG members contribute to discussions around workforce development, workplace culture, policies and programs, and marketplace practices.

- During 2025, CRGs hosted more than 100 events that focused on support of our business strategy, professional development, talent recruitment, and community involvement.

Our commitment to our communities goes beyond providing banking services. We use our expertise and financial resources to support communities in accordance with the CRA requirements. These initiatives and investments create opportunities for individuals, families, and businesses to fully participate in and share the rewards of building economic stability in our communities.

Competition

The financial services industry is highly competitive. We compete for loans, deposits, and financial services in all of our principal markets. We compete directly with other bank and nonbank institutions located within our markets, internet-based banks, out-of-market banks and bank holding companies that advertise or otherwise serve our markets, money market funds and other mutual funds, brokerage houses, and various other financial institutions. Additionally, we compete with insurance companies, leasing companies, regulated small loan companies, credit unions, governmental agencies, and commercial entities offering financial services products, including nonbank lenders and financial technology companies, including those related to cryptocurrencies (including stablecoins). Competition involves, among other things, efforts to retain current customers and to obtain new loans and deposits, the scope and types of services offered, interest rates paid on deposits and charged on loans, as well as other aspects of banking. We also face direct competition from subsidiaries of bank holding companies that have far greater assets and resources than ours.

Strategic Transactions

On November 30, 2025, the Corporation entered into a definitive agreement under which American National will merge into Associated Banc-Corp. Under the terms of the merger agreement, American National shareholders will receive 36.250 shares of Associated stock for each share of American National stock. The all-stock, fixed exchange ratio transaction is valued at approximately \$604 million based on Associated's closing stock price of \$26.29 as of November 28, 2025. The Board of Directors of both Associated and American National have unanimously approved the transaction. American National's two primary shareholders, who together own 99% of American National, have voted to approve the transaction and have entered into transfer, voting and registration rights agreements. The transaction is expected to close in the second quarter of 2026 subject to customary closing conditions including the receipt of regulatory approvals.

Supervision and Regulation

Overview

The Corporation and its banking and nonbanking subsidiaries are subject to extensive regulation and oversight both at the federal and state levels. The second Trump Administration has implemented significantly different policies from the Biden Administration, including new proposed regulations and rescissions or withdrawals of previous guidance, and sharply reduced the workforce at the federal banking agencies. The cumulative impact of these changes, and whether they will last over time, is unclear. The following is an overview of the statutory and regulatory framework that affects the business of the Corporation and our subsidiaries.

BHC Act Requirements

As a registered bank holding company under the BHC Act, we are regulated, supervised, and examined by the Federal Reserve. In connection with applicable requirements, bank holding companies file periodic reports and other information with the Federal Reserve. The BHC Act governs the activities that are permissible for bank holding companies and their affiliates and permits the Federal Reserve, in certain circumstances, to issue cease and desist orders and other enforcement actions against bank holding companies and their nonbanking affiliates to correct and curtail unsafe or unsound banking practices. Under the Dodd-Frank Act and longstanding Federal Reserve policy, bank holding companies are required to act as a source of financial strength to each of their banking subsidiaries pursuant to which such holding company may be required to commit financial resources to support such subsidiaries in circumstances when, absent such requirements, they might not otherwise do so. The BHC Act further regulates holding company activities, including requirements and limitations relating to capital, transactions with officers, directors and affiliates, securities issuances, dividend payments, inter-affiliate liabilities, extensions of credit, and expansion through mergers and acquisitions.

The BHC Act allows certain qualifying bank holding companies that elect treatment as “financial holding companies” to engage in activities that are financial in nature and that explicitly include the underwriting and sale of insurance. The Parent Company thus far has not elected to be treated as a financial holding company. Bank holding companies that have not elected such treatment generally must limit their activities to banking activities and activities that are closely related to banking.

Regulation of Associated Bank and Trust Company Subsidiaries

Associated Bank and our nationally-chartered trust company subsidiary are regulated, supervised and examined by the OCC. The OCC has primary supervisory and regulatory authority over the operations of Associated Bank and the Corporation's trust company subsidiary. As part of this authority, Associated Bank and our trust company subsidiary are required to file periodic reports with the OCC and are subject to regulation, supervision and examination by the OCC. To support its supervisory function, the OCC has the authority to assess and charge fees on all national banks according to a set fee schedule. For the assessment collection on September 30, 2025, the OCC reduced the marginal rates in the general assessment fee schedule for banks with assets above \$40 billion, such as Associated Bank, by 22 percent. On December 1, 2025, the OCC announced that it is maintaining the assessment rates adopted on September 30, 2025, for the 2026 calendar year.

Associated Bank, our only subsidiary that accepts insured deposits, is also subject to examination by the FDIC under certain conditions. Under the Dodd-Frank Act, the FDIC has backup enforcement authority over a depository institution holding company, such as the Parent Company, if the conduct or threatened conduct of such holding company poses a risk to the DIF, although such authority may not be used if the holding company is generally in sound condition and does not pose a foreseeable and material risk to the DIF.

We are subject to the enforcement and rule-making authority of the CFPB regarding consumer financial products. The CFPB has the authority to create and enforce consumer protection rules and regulations and has the power to examine us for compliance with such rules and regulations. The CFPB has the authority to prohibit “unfair, deceptive or abusive” acts and practices. The CFPB has examination and enforcement authority over all banks with more than \$10 billion in assets. For additional information, please refer to Item 1— Business — Supervision and Regulation — Consumer Financial Services Regulations.

Standards for Safety and Soundness

The federal banking agencies have adopted the Interagency Guidelines for Establishing Standards for Safety and Soundness (the “Guidelines”). The Guidelines establish certain safety and soundness standards for all depository institutions. The operational and managerial standards in the Guidelines relate to the following: (1) internal controls and information systems; (2) internal audit systems; (3) loan documentation; (4) credit underwriting; (5) interest rate exposure; (6) asset growth; (7) compensation, fees and benefits; (8) asset quality; and (9) earnings. Rather than providing specific rules, the Guidelines set forth basic compliance considerations and guidance with respect to a depository institution. Failure to meet the standards in the Guidelines, however, could result in a request by the OCC for a written compliance plan to demonstrate efforts to come into compliance with such Guidelines. Failure to provide and implement a plan requires the appropriate federal banking agency to issue an order to the institution requiring compliance.

Corporate and Risk Governance

Corporate and risk governance oversight is a core supervisory function of the federal banking agencies, including the OCC. We are required, as a supervisory matter, to implement an effective corporate and risk governance framework commensurate with our size, complexity and risk profile. Fundamental components of this framework include the authorities and responsibilities of directors and senior managers to govern the operations and structure of the Corporation and the Bank, as well as the implementation and management of systems and processes designed to identify, measure, monitor and control the risks to the organization, including strategic, compliance and operational risks.

National banks with at least \$50 billion in total assets are currently subject to heightened standards for, among other things, the implementation of risk governance frameworks addressing credit risk, interest rate risk, liquidity risk, price risk, operational risk, compliance risk, strategic risk, and reputation risks.

The heightened standards require those national banks to establish and adhere to a written governance framework in order to manage and control their risk-taking activities and to incorporate their risk appetite statement and concentration risk limits into capital and liquidity stress. On December 23, 2025, the OCC issued a notice of proposed rulemaking that would increase the threshold at which the heightened standards apply from \$50 billion to \$700 billion in total assets. The Bank is not presently subject to the OCC's heightened standards but, if our proposed acquisition of American National closes and causes the Bank's average total consolidated assets to exceed \$50 billion, would become subject to the OCC's heightened standards until the OCC's proposal to increase the threshold becomes effective.

Further, the federal banking agencies have in previous years increased their focus on banks' third-party risk management controls and practices. The federal banking agencies, including the OCC, adopted interagency guidance on risk management of third-party relationships. The guidance applies broadly to any business agreement between a banking organization and another entity, by contract or otherwise (including affiliated entities), and it requires banking organizations to analyze the risks associated with each third-party relationship and establish effective governance and risk management processes for all stages of a third-party relationship, including planning, due diligence and third-party selection, contract negotiation, ongoing monitoring, and termination.

On July 25, 2024, the federal banking agencies, including the OCC, issued a joint statement on banks' arrangements with third parties to deliver bank deposit products and services. The joint statement identifies potential risks related to arrangements between banks and third parties to deliver bank deposit products and services to customers and provides examples of risk management practices to manage such risks.

Banking Acquisitions

We are required to obtain prior Federal Reserve approval before acquiring more than 5 percent of the voting shares, or substantially all of the assets, of a bank holding company, bank or savings association. In addition, the prior approval of the OCC is required for a national bank to merge with another bank or purchase the assets or assume the deposits of another bank. In determining whether to approve a proposed bank acquisition, federal bank regulators will consider, among other factors, the effect of the acquisition on competition, the public benefits expected to be received from the acquisition, the projected capital ratios and levels on a post-acquisition basis, and the acquiring institution's record of addressing the credit needs of the communities it serves, including the needs of LMI neighborhoods, consistent with the safe and sound operation of the bank, under the CRA.

The standards by which bank and financial institution acquisitions are evaluated may be subject to change. In September 2024, the OCC adopted a final rule and policy statement regarding its review of BMA applications for OCC-supervised institutions, including the Bank. In May 2025, the OCC adopted a final rule that restored the ability for BMA applicants to file a streamlined application form for certain types of acquisitions and the expedited review process for BMA applications, which had been removed by the 2024 final rule, and rescinded the 2024 policy statement. The FDIC similarly adopted a final statement of policy in September 2024 but rescinded the 2024 statement of policy in May 2025. Concurrent with the FDIC and OCC issuances of revised policy statements in 2024, the DOJ withdrew from its 1995 Bank Merger Guidelines and announced that it would consider bank mergers under its 2023 Merger Guidelines, which are not industry specific, as well as under a separate, recently adopted bank merger addendum. Unlike the FDIC and OCC, the DOJ has not reinstated the guidance that was in effect prior to 2024.

Banking Subsidiary Dividends

The Parent Company is a legal entity separate and distinct from the Bank and other nonbanking subsidiaries. A substantial portion of our cash flow comes from dividends paid to us by Associated Bank. The OCC's prior approval of the payment of dividends by Associated Bank to the Parent Company is required only if the total of all dividends declared by the Bank in any calendar year exceeds the sum of the Bank's retained net income for that year and its retained net income for the preceding two calendar years, less any required transfers to surplus. Federal law prohibits national banks from paying dividends that would be greater than the bank's undivided profits after deducting statutory bad debt in excess of the bank's allowance for loan losses. In addition, under the FDICIA, an IDI, such as the Bank, is prohibited from making capital distributions, including the payment of dividends, if, after making such distribution, the institution would become "undercapitalized" as such term is used in the FDICIA.

Holding Company Dividends

In addition, the Corporation and the Bank are subject to various general regulatory policies and requirements relating to the payment of dividends, including requirements to maintain adequate capital above regulatory minimums. The appropriate federal regulatory authority is authorized to determine under certain circumstances relating to the financial condition of a bank or bank holding company that the payment of dividends would be an unsafe or unsound practice and to prohibit payment thereof. Under the Dodd-Frank Act and the requirements of the Federal Reserve, the Parent Company, as a bank holding company, is required to serve as a source of financial strength to the Bank and to commit resources to support the Bank. Consistent with its source of strength policy, the Federal Reserve has stated that, as a matter of prudent banking, a bank holding company should not maintain a level of cash dividends to its shareholders that places undue pressure on the capital of its bank subsidiaries, or that can be funded only through additional borrowings or other arrangements that may undermine the bank holding company's ability to serve as a source of strength. The appropriate federal regulatory authorities have indicated that paying dividends that

deplete a bank's capital base to an inadequate level would be an unsafe and unsound banking practice and that banking organizations should generally pay dividends only out of current operating earnings.

Capital Requirements

We are subject to various regulatory capital requirements both at the Parent Company and at the Bank level administered by the Federal Reserve and the OCC, respectively. Failure to meet minimum capital requirements could result in certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have an adverse material effect on our financial condition and results of operations. Under capital adequacy guidelines and the regulatory framework for prompt corrective action (described below), we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting policies. Our capital amounts and classification are subject to judgments by the regulators regarding qualitative components, risk weightings, and other factors.

The Federal Reserve, the OCC and the FDIC have adopted risk-based capital regulations implementing certain provisions of the Dodd-Frank Act and Basel III. In general, subject to certain exceptions as discussed further below, minimum capital standards established under the risk-based capital regulations include a CET1 capital to risk-weighted assets ratio of 4.5 percent, a Tier 1 capital to risk-weighted assets ratio of 6.0 percent, a total capital to risk-weighted assets ratio of 8.0 percent, and a Tier 1 capital to adjusted average total assets leverage ratio of 4.0 percent. In determining the amount of risk-weighted assets for purposes of calculating risk-based capital ratios, all assets, including certain off-balance sheet assets (for example, recourse obligations, direct credit substitutes and residual interests) are multiplied by a risk-weight factor assigned by the regulations based on the risks believed inherent in the type of asset. Higher levels of capital are required for asset categories believed to present greater risk. CET1 capital is generally defined as common shareholders' equity and retained earnings. Tier 1 capital is generally defined as CET1 and additional Tier 1 capital. Additional Tier 1 capital includes certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries. Total capital includes Tier 1 capital (CET1 capital plus additional Tier 1 capital) and Tier 2 capital. Tier 2 capital is comprised of capital instruments and related surplus, meeting specified requirements, and may include cumulative preferred stock and long-term perpetual preferred stock, mandatory convertible securities, intermediate preferred stock and subordinated debt. Also included in Tier 2 capital is the ACL limited to a maximum of 1.25 percent of risk-weighted assets.

Calculation of all types of regulatory capital is subject to deductions and adjustments specified in the regulations. In assessing an institution's capital adequacy, the OCC takes into consideration not only these numeric factors, but qualitative factors as well, and has the authority to establish higher capital requirements for individual institutions where deemed necessary.

In addition to establishing the minimum regulatory capital requirements, the capital regulations limit capital distributions and certain discretionary bonus payments to management if the institution does not hold a capital conservation buffer consisting of 2.5 percent of CET1 capital to risk-weighted assets above the amount necessary to meet its minimum risk-based capital requirements.

The federal banking agencies have provided certain forms of relief to banking organizations that are not subject to the capital regulation's advanced approaches, such as the Corporation. For instance, non-advanced approaches institutions are subject to simpler regulatory capital requirements for MSAs, certain DTAs arising from temporary differences, investments in the capital of unconsolidated financial institutions, and requirements for the amount of capital issued by a consolidated subsidiary of a banking organization and held by third parties (sometimes referred to as a minority interest) that is includable in regulatory capital.

Such institutions may deduct from CET1 capital any amount of MSAs, temporary difference DTAs, and investments in the capital of unconsolidated financial institutions that individually exceeds 25 percent of CET1 capital.

On July 27, 2023, the federal banking agencies issued a proposed rule to implement the final components of the Basel III standards set by the Basel Committee on Banking Supervision in 2017. In light of the adverse reaction to the proposal, the Federal Reserve announced that it would publish a re-proposal of its regulations finalizing the Basel III standards. That re-proposal is expected in early 2026. The extent to which the re-proposal would impact institutions of the Corporation's size is unknown since the original proposal applied to bank holding companies of \$100 billion or more.

We continue to exceed all capital requirements necessary to be deemed "well-capitalized" for all regulatory purposes under the capital regulations. For further detail on capital and capital ratios, see discussion under the Liquidity and Capital sections under Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and under Part II, Item 8, Financial Statements and Supplementary Data, Note 18 Regulatory Matters of the notes to consolidated financial statements.

Current Expected Credit Loss Treatment

Under the CECL model, we are required to present certain financial assets carried at amortized cost, such as loans held for investment and HTM securities, at the net amount expected to be collected. The measurement of expected credit losses is to be based on information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. The federal banking regulators have issued final rules providing financial institutions with the option to delay the estimated impact on regulatory capital stemming from the CECL model. As permitted under applicable regulations, the Corporation elected to delay the estimated impact of adopting CECL on its regulatory capital through December 31, 2021 and then phase in the estimated cumulative impact from January 1, 2022 through December 31, 2024. The deferral impacts began to phase in at 25% per year from January 1, 2022, were phased-in at 75% from January 1, 2024 and were fully phased-in from January 1, 2025.

Capital Planning and Stress Testing Requirements

As a result of the Economic Growth Act and related OCC rulemaking, the asset threshold for IDIs to conduct and report to their primary federal bank regulators company-run stress tests, as well as to comply with leverage limits, liquidity requirements, and resolution planning requirements, was raised from \$10 billion to \$250 billion in total consolidated assets and the Bank is no longer subject to Dodd-Frank Act stress testing requirements. The Economic Growth Act provided that bank holding companies under \$100 billion in assets were no longer subject to stress testing requirements. Moreover, Section 214 of the Economic Growth Act and its implementing regulation prohibit the federal banking agencies from requiring the Bank to assign a heightened risk weight to certain HVCRE ADC loans as previously required under the Basel III capital rules. Notwithstanding these regulatory amendments, the federal banking agencies indicated through interagency guidance that the capital planning and risk management practices of institutions with total assets less than \$100 billion would continue to be reviewed through the regular supervisory process. Although the Corporation will continue to monitor and stress test its capital consistent with the safety and soundness expectations of the federal regulators, the Corporation no longer publishes stress testing results as a result of the legislative and regulatory amendments.

Enforcement Powers of the Federal Banking Agencies; Prompt Corrective Action

The Federal Reserve, the OCC, and the CFPB have extensive supervisory authority over their regulated institutions, including, among other things, the power to compel higher reserves, the ability to assess civil money penalties, the ability to issue non-public memorandums of understanding, the ability to issue cease-and-desist or removal orders and the ability to initiate injunctive actions. In general, these enforcement actions may be initiated for violations of laws and regulations or for unsafe or unsound banking practices. Other actions or inactions by the Parent Company may provide the basis for enforcement action, including misleading or untimely reports.

Federal banking regulators are authorized and, under certain circumstances, required to take certain actions against banks that fail to meet their capital requirements. The federal banking agencies have additional enforcement authority with respect to undercapitalized depository institutions.

“Well-capitalized” institutions may generally operate without supervisory restriction. “Adequately capitalized” institutions cannot normally pay dividends or make any capital contributions that would leave them undercapitalized; they cannot pay a management fee to a controlling person if, after paying the fee, they would be undercapitalized; and they cannot accept, renew or roll over any brokered deposit unless the bank has applied for and been granted a waiver by the FDIC.

The federal banking agencies are required to take action to restrict the activities of an “undercapitalized,” “significantly undercapitalized,” or “critically undercapitalized” IDI. Any such bank must submit a capital restoration plan that is guaranteed by the parent holding company. Until such plan is approved, it may not increase its assets, acquire another institution, establish a branch or engage in any new activities, and generally may not make capital distributions. In certain situations, a federal banking agency may reclassify a well-capitalized institution as adequately capitalized and may require an adequately capitalized or undercapitalized institution to comply with supervisory actions as if the institution were in the next lower category.

Institutions must file a capital restoration plan with the OCC within 45 days of the date it receives a notice from the OCC that it is “undercapitalized,” “significantly undercapitalized,” or “critically undercapitalized.” Compliance with a capital restoration plan must be guaranteed by a parent holding company. In addition, the OCC is permitted to take any one of a number of discretionary supervisory actions, including but not limited to the issuance of a capital directive and the replacement of senior executive officers and directors.

Finally, bank regulatory agencies have the ability to impose higher than normal capital requirements known as individual minimum capital requirements for institutions with a high-risk profile.

At December 31, 2025, the Bank satisfied the capital requirements necessary to be deemed “well-capitalized.” In the event of a change to this status, the imposition of any of the measures described above could have a material adverse effect on the

Corporation and on its profitability and operations. The Corporation's shareholders do not have preemptive rights and, therefore, if the Corporation is directed by the OCC or the FDIC to issue additional shares of common stock, such issuance may result in dilution in shareholders' percentage of ownership of the Corporation.

Deposit Insurance Premiums

Associated Bank pays an insurance premium to the FDIC based upon its assessment rates on a quarterly basis. Deposits are insured up to applicable limits by the FDIC and such insurance is backed by the full faith and credit of the United States Government.

Under the Dodd-Frank Act, a permanent increase in deposit insurance was authorized to \$250,000 per depositor, per IDI for each account ownership category.

This insurance is funded through assessments on the Bank and other IDIs. Each bank's assessment base is determined based on its average consolidated total assets less average tangible equity, and there is a scorecard method for calculating assessments that combines CAMELS (an acronym that refers to the five components of a bank's condition that are addressed: capital adequacy, asset quality, management, earnings, and liquidity) ratings and specified forward-looking financial measures to determine each institution's risk to the DIF.

The FDIC has the flexibility to adopt actual rates that are higher or lower than the total base assessment rates adopted without notice and comment, if certain conditions are met.

In 2022, the FDIC adopted a final rule, applicable to all IDIs, to increase base deposit insurance assessment rate schedules uniformly by 2 bp beginning in the first quarterly assessment period of 2023. The increase was instituted to account for extraordinary growth in insured deposits during the first and second quarters of 2020, which caused a substantial decrease in the DIF reserve ratio. The new assessment rate schedules are expected to remain in effect until the DIF reserve ratio meets or exceeds 2 percent.

In 2023, the FDIC issued a final rule to implement a special assessment to recover the loss to the DIF associated with protecting uninsured depositors following the closure of SVB and SBNY. Under the final rule, the assessment base for an IDI is equal to the institution's estimated uninsured deposits as of December 31, 2022, adjusted to exclude the first \$5 billion in estimated uninsured deposits. The FDIC started collecting the special assessment at an annual rate of 13.4 bp beginning with the first quarterly assessment period of 2024. The FDIC anticipates collecting special assessments for a total of eight quarterly assessment periods. On December 16, 2025, the FDIC issued an interim final rule that would reduce the special assessment rate for the eighth collection quarter from 3.36 bp to 2.97 bp. Under the interim final rule, upon termination of the receiverships, the FDIC will either provide an offset to regular quarterly deposit insurance assessments for IDIs subject to the special assessment if the amount collected exceeds losses or collect from IDIs subject to the special assessment a one-time final shortfall special assessment if losses at the termination of the receiverships exceed the amount collected.

The FDIC is authorized to conduct examinations of and require reporting by FDIC-insured institutions. It is authorized to terminate a depository bank's deposit insurance upon a finding by the FDIC that the bank's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices or has violated any applicable rule, regulation, order or condition enacted or imposed by the bank's regulatory agency. The termination of deposit insurance for the Bank would have a material adverse effect on our earnings, operations and financial condition.

Historically, deposit insurance premiums we have paid to the FDIC have been deductible for federal income tax purposes; however, the Tax Act disallows the deduction of such premium payments for banking organizations with total consolidated assets of \$50 billion or more. For banks with less than \$50 billion in total consolidated assets, such as ours, the premium deduction is phased out based on the proportion of a bank's assets exceeding \$10 billion. The Corporation anticipates that the Bank's total consolidated assets will exceed \$50 billion upon the completion of its proposed acquisition of American National.

Brokered Deposits

The FDI Act and FDIC regulations limit the ability of an IDI, such as the Bank, to accept, renew or roll over brokered deposits unless the bank is well-capitalized under the prompt corrective action framework described above, or unless it is adequately capitalized and obtains a waiver from the FDIC. In addition, less than well-capitalized banks are subject to restrictions on the interest rates they may pay on deposits. The characterization of deposits as brokered may result in the imposition of higher deposit assessments on such deposits. The FDIC's regulations include a limited exception for reciprocal deposits for IDIs that have a composite condition of outstanding or good in the IDI's most recent examination and well-capitalized (or adequately capitalized and have obtained a waiver from the FDIC as mentioned above). Under the limited exception, IDIs that qualify, like the Bank, are able to exclude from treatment as "brokered" deposits up to the lesser of \$5 billion or 20 percent of the bank's

total liabilities in reciprocal deposits (which is defined as deposits received by a bank through a deposit placement network with the same maturity (if any) and in the same aggregate amount as deposits placed by the bank in other network member banks).

Transactions with Affiliates and Insiders

Transactions between the Bank and its related parties or any affiliate are governed by Sections 23A and 23B of the Federal Reserve Act. An affiliate is any company or entity, which controls, is controlled by or is under common control with the bank. In a holding company context, at a minimum, the parent holding company of a national bank, and any companies that are controlled by such parent holding company, are affiliates of the bank. Generally, Sections 23A and 23B (i) limit the extent to which an institution or its subsidiaries may engage in “covered transactions” with any one affiliate to an amount equal to 10 percent of such institution’s capital stock and surplus, and contain an aggregate limit on all such transactions with all affiliates to an amount equal to 20 percent of such capital stock and surplus, and (ii) require that all such transactions be on terms substantially the same, or at least as favorable, to the institution or subsidiary as those provided to a nonaffiliate. The term “covered transaction” includes the making of loans, purchase of assets, issuance of a guarantee and similar types of transactions. Certain types of covered transactions must be collateralized according to a schedule set forth in the statute based on the type of collateral.

Certain transactions with our directors, officers or controlling persons are subject to conflicts of interest regulations. Among other things, these regulations require that loans to such persons and their related interests be made on terms substantially the same as for loans to unaffiliated individuals and must not create an abnormal risk of repayment or other unfavorable features for the financial institution. See Note 3 Loans of the notes to consolidated financial statements in Part II, Item 8, Financial Statements and Supplementary Data, for additional information on loans to related parties.

Community Reinvestment Act Requirements

The Bank is subject to periodic CRA reviews by the OCC. The CRA does not establish specific lending requirements or programs for banks and does not limit the ability of such banks to develop products and services believed best-suited for a particular community. An institution’s CRA assessment may be used by its regulators in their evaluation of certain applications, including a merger, acquisition or the establishment of a branch office. An unsatisfactory rating may be used as the basis for denial of such an application. The Bank received an “Outstanding” CRA rating in its most recent evaluation.

On October 24, 2023, the federal banking agencies jointly issued a final rule to revise the existing CRA regulations. In July 2025, the federal banking agencies issued a joint notice of proposed rulemaking to rescind the October 2023 final rule and restore the CRA framework that existed previously, which has remained in effect due to a preliminary injunction that stayed implementation of the October 2023 rule.

Privacy, Data Protection, and Cybersecurity

The Corporation collects, shares, uses, stores and otherwise processes information that relates to individuals and/or constitutes “personal data,” “personal information,” “nonpublic personal information,” or similar terms under applicable data privacy laws. The Corporation and its service providers are subject to a number of U.S. federal, state, local and foreign laws and regulations, industry standards and other requirements relating to consumer privacy and data protection, including those that apply generally to the handling of personal information. Under privacy protection provisions of the GLBA and its implementing regulations and guidance, financial institutions, such as the Bank, are limited in their ability to disclose certain non-public information about consumers to nonaffiliated third parties. Such financial institutions are required by statute and regulation to notify consumers of their privacy policies and practices and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a nonaffiliated third party. In addition, such financial institutions must appropriately safeguard their customers’ nonpublic, personal information. Consumers and, in some instances, state and federal regulators, must be notified in the event of a data breach under applicable state laws and federal regulations. The Corporation had no material data breaches in 2025.

The changing privacy laws and regulations in the United States and elsewhere create new individual privacy rights and impose increased obligations on companies handling personal information, including the CCPA, as amended by the CPRA. While the CCPA does not apply to personal information collected, processed, sold or disclosed subject to the GLBA, the CCPA and other state laws apply to other personal information processed by the Corporation.

In addition, multiple states, Congress and regulators within and outside of the United States have adopted or are considering adopting similar laws or regulations which could create new individual privacy rights and impose additional obligations on the Corporation.

The federal banking agencies, including the OCC, have issued a rule imposing cybersecurity notification requirements for banking organizations and their service providers. Specifically, the rule requires banking organizations to notify their primary

federal regulator as soon as possible and no later than 36 hours after the discovery of a “computer-security incident” that rises to the level of a “notification incident,” as those terms are defined under the final rule.

The federal banking agencies have adopted guidelines for establishing information security standards and cybersecurity programs for implementing safeguards under the supervision of the board of directors. These guidelines, along with related regulatory materials, increasingly focus on risk management and processes related to information technology and the use of third parties in the provision of financial services. A financial institution should have a business continuity program to recover from a cyberattack and procedures for monitoring the security of third-party service providers that may have access to nonpublic data at the institution.

Further regulatory developments may impact the Corporation's data security- and privacy-related internal controls and risk profile. On October 22, 2024, the CFPB adopted a final rule regarding personal financial data rights that is designed to promote “open banking.” The final rule requires, among other things, that data providers, including any financial institution, make available to consumers and certain authorized third parties upon request certain covered transaction, account and payment information. However, in August 2025, the CFPB issued an advanced notice of proposed rulemaking to reconsider its final rule and, in October 2025, a district court issued a preliminary injunction preventing the CFPB from enforcing the final rule until the CFPB has completed its reconsideration of the rule.

The Corporation may be subject to rules and regulations promulgated under the authority of the Federal Trade Commission, which has the authority to regulate and enforce against unfair or deceptive acts or practices in or affecting commerce, including acts and practices with respect to data privacy and cybersecurity.

The Corporation is, or may become, subject to laws, regulations, and standards covering marketing, advertising and other activities conducted by telephone, email, mobile devices, and the internet, such as the TCPA, the CAN-SPAM Act, and similar state consumer protection and communication privacy laws, such as California's Invasion of Privacy Act.

The Corporation is subject to the FCRA, under which it is considered both a “furnisher” of consumer report information and a “user” of consumer reports provided by consumer reporting agencies. The FCRA regulates and protects consumer information collected by consumer reporting agencies and imposes specific obligations on “furnishers” and “users” of consumer report information. Such obligations include, among others, taking steps to ensure that consumer report information furnished to consumer reporting agencies is accurate and, as required, inaccurate or incomplete information is corrected or updated, restricting the sharing of information contained in a consumer report, notifying consumers when such reports are used to make an adverse decision or to close a consumer's account, and, in the context of completing employee background checks, providing a notice containing certain disclosures to the consumer and obtaining their consent. Under the regulations implementing the FCRA, “furnishers” of consumer report information are required to establish, implement and follow reasonable policies and procedures regarding the accuracy and integrity of information furnished to consumer reporting agencies.

Artificial Intelligence

CFPB and other federal regulatory guidance reiterates that creditors are not excused from the adverse action notice requirements under ECOA if they rely on complex algorithmic underwriting models. States have started to regulate the use of AI technologies. Of note, the California Privacy Protection Agency has finalized regulations under the CCPA regarding the use of automated decision making. California also enacted new laws that further regulate use of AI technologies and provide consumers with additional protections around companies' use of AI technologies, such as requiring companies to disclose certain uses of generative AI, and other states have also passed AI-focused legislation. In addition, the New York State Department of Financial Services issued an industry letter on combating cybersecurity risks associated with AI.

In July 2024, the federal banking agencies, including the OCC, the Federal Reserve, and the FDIC, issued a final rule that requires, among other things, financial institutions to ensure that their automated valuation models for property valuation follow certain quality control standards, including a requirement that such valuation models comply with nondiscrimination laws.

On January 23, 2025, President Trump issued an Executive Order aimed at reducing barriers to AI innovation in the U.S. economy. The Order requires relevant persons and bodies within the federal government to develop an AI action plan to carry out this objective and revokes an AI-related Executive Order issued in 2023 by President Biden, as well as all corresponding policies, regulations, orders, directives and other actions taken in response to such Order.

Bank Secrecy Act / Anti-Money Laundering

The BSA, as amended by the Patriot Act and the Anti-Money Laundering Act of 2020, requires financial institutions to develop policies, procedures, and practices to prevent and deter money laundering, mandates that every national bank have a written, board-approved program that is reasonably designed to assure and monitor compliance with the BSA. The program must, at a

minimum: (1) provide for a system of internal controls to assure ongoing compliance; (2) provide for independent testing for compliance; (3) designate an individual responsible for coordinating and monitoring day-to-day compliance; (4) provide training for appropriate personnel; and (5) provide for appropriate risk-based procedures for conducting customer due diligence. In addition, national banks are required to adopt a customer identification program as part of their BSA compliance program. National banks are required to file SARs when they detect certain known or suspected violations of federal law or suspicious transactions related to money laundering activity or a violation of the BSA, to file reports on cash transactions exceeding specified thresholds, and to respond to certain requests for information by regulatory authorities and law enforcement agencies. The regulations implementing the BSA require financial institutions to establish risk-based procedures for conducting ongoing customer due diligence and procedures for understanding the nature and purpose of customer relationships for the purpose of developing a customer risk profile. In addition, FinCEN has promulgated customer due diligence and customer identification rules that require banks to identify and verify the identity of the beneficial owners of all legal entity customers (other than those that are excluded) at the time a new account is opened (other than accounts that are exempted).

Interstate Branching

National and state-chartered banks may open an initial branch in a state other than its home state (e.g., a host state) by establishing a *de novo* branch at any location in such host state at which a bank chartered in such host state could establish a branch. Applications to establish such branches must still be filed with the appropriate primary federal regulator.

Volcker Rule

Banks and their affiliates are prohibited from engaging in proprietary trading and investing in, sponsoring and having certain relationships with private funds such as hedge funds or private equity funds that would be considered an investment company for purposes of the Volcker Rule. The compliance requirements under regulations implementing the Volcker Rule are tailored based on the size and scope of trading activities. Because total trading assets and liabilities are maintained under \$20 billion, the Corporation benefit from significantly reduced compliance obligations even though it remains subject to the modified rules and requirements related to covered funds.

Incentive Compensation Policies and Restrictions

The federal banking agencies have issued guidance on sound incentive compensation policies that applies to all banking organizations supervised by the agencies (thereby including both the Parent Company and the Bank). Pursuant to the guidance, to be consistent with safety and soundness principles, a banking organization's incentive compensation arrangements should: (1) provide employees with incentives that appropriately balance risk and reward; (2) be compatible with effective controls and risk management; and (3) be supported by strong corporate governance including active and effective oversight by the banking organization's board of directors. Monitoring methods and processes used by a banking organization should be commensurate with the size and complexity of the organization and its use of incentive compensation.

The Dodd-Frank Act required the federal banking agencies and the SEC to establish joint regulations or guidelines for financial institutions, such as the Bank, to prohibit incentive-based payment arrangements that encourage inappropriate risk taking by providing an executive officer, employee, director or principal shareholder with excessive compensation, fees, or benefits or that could lead to material financial loss to the entity. Despite numerous proposals, no regulation has been finalized.

Pursuant to SEC regulations, we adopted a "clawback" policy with respect to the recovery of incentive-based compensation paid to current or former executive officers in the event of material noncompliance with any financial reporting requirement under the securities laws. A copy of our clawback policy is attached as Exhibit 97 to this Annual Report on 10-K.

The Federal Reserve will review, as part of its standard, risk-focused examination process, the incentive compensation arrangements of financial institutions, such as the Corporation. These reviews will be tailored to each organization based on the scope and complexity of the organization's activities and the prevalence of incentive compensation arrangements. Deficiencies will be incorporated into the organization's supervisory ratings, which can affect the organization's ability to make acquisitions and take other actions. Enforcement actions may be taken against a banking organization if its incentive compensation arrangements, or related risk-management control or governance processes, pose a risk to the organization's safety and soundness and the organization is not taking prompt and effective measures to correct the deficiencies.

Consumer Financial Services Regulations

Federal and applicable state banking laws require us to take steps to protect consumers.

The CFPB is responsible for interpreting and enforcing federal consumer financial laws, as defined by the Dodd-Frank Act, that, among other things, govern the provision of deposit accounts along with mortgage origination and servicing. Some federal

consumer financial laws enforced by the CFPB include the ECOA, TILA, the Truth in Savings Act, the Home Mortgage Disclosure Act, RESPA, the Fair Debt Collection Practices Act, and the FCRA. The CFPB is authorized to prevent any institution under its authority from engaging in an unfair, deceptive, or abusive act or practice in connection with consumer financial products and services.

Under TILA as implemented by Regulation Z, mortgage lenders are required to make a reasonable and good faith determination based on verified and documented information that a consumer applying for a mortgage loan has a reasonable ability to repay the loan according to its terms. Mortgage lenders are required to determine consumers' ATR in one of two ways. The first alternative requires the mortgage lender to consider the following eight underwriting factors when making the credit decision: (1) current or reasonably expected income or assets; (2) current employment status; (3) the monthly payment on the covered transaction; (4) the monthly payment on any simultaneous loan; (5) the monthly payment for mortgage-related obligations; (6) current debt obligations, alimony, and child support; (7) the monthly DTI ratio or residual income; and (8) credit history. Alternatively, the mortgage lender can originate QMs, which generally are mortgage loans without negative amortization, interest-only payments, balloon payments, or terms exceeding 30 years. QMs are entitled by rule to a presumption that the creditor making the loan satisfied the ATR requirements provided certain requirements are met. The Corporation is predominantly an originator of compliant QMs. The CFPB has implemented the TILA-RESPA Integrated Disclosure rules, which harmonize disclosure and certain regulatory compliance requirements required under those two statutes with respect to residential mortgage loans.

The CFPB has the authority to take supervisory and enforcement action against banks under its jurisdiction that fail to comply with federal consumer financial laws. The Bank is subject to the CFPB's supervisory and enforcement authorities. The Dodd-Frank Act permits states to adopt stricter consumer protection laws and state attorneys general to enforce consumer protection rules issued by the CFPB. The Bank operates in a stringent consumer compliance environment and could incur additional costs related to consumer protection compliance, including but not limited to potential costs associated with CFPB examinations, regulatory and enforcement actions and consumer-oriented litigation. In previous years, the CFPB has been active in bringing enforcement actions to enforce consumer financial laws. The federal financial regulatory agencies, including the OCC, and states attorneys general also have been active in this area with respect to institutions over which they have jurisdiction. We have incurred and may in the future incur additional costs in complying with these requirements.

Other Regulations

The Bank is subject to a variety of other regulations with respect to the operation of its businesses, including but not limited to the Dodd-Frank Act, which among other restrictions placed limitations on the interchange fees charged for debit card transactions, TILA, Truth in Savings Act, ECOA, EFTA, Fair Housing Act, Home Mortgage Disclosure Act, Fair Debt Collection Practices Act, Expedited Funds Availability (Regulation CC), Reserve Requirements (Regulation D), Insider Transactions (Regulation O), Privacy of Consumer Information (Regulation P), Privacy of Consumer Financial Information and Safeguarding Personal Information (Regulation S-P), Margin Stock Loans (Regulation U), Right To Financial Privacy Act, Flood Disaster Protection Act, Homeowners Protection Act, Servicemembers Civil Relief Act, RESPA, Children's Online Privacy Protection Act, and the John Warner NDAA.

The laws and regulations to which we are subject are constantly under review by Congress, the federal regulatory agencies, and the state authorities. These laws and regulations could be changed in the future, which could affect our profitability, our ability to compete effectively, or the composition of the financial services industry in which we compete.

Other Regulatory Authorities

In addition to regulation, supervision and examination by federal banking agencies, the Corporation and certain of its subsidiaries, including those that engage in securities brokerage, dealing and investment advisory activities, are subject to other federal and applicable state securities and other laws and regulations, and to supervision and examination by other regulatory authorities including the SEC, FINRA, NYSE, DOL and others.

Separately, in June 2019, the SEC adopted Regulation Best Interest, which, among other things, establishes a standard of conduct for a broker-dealer to act in the best interest of a retail customer when making a recommendation of any securities transaction or investment strategy involving securities to such customer. The rule requires us to review and possibly modify our compliance activities, which is causing us to incur some additional costs. In addition, state laws that impose a fiduciary duty may require monitoring, as well as require that we undertake other compliance measures.

Government Monetary Policies and Economic Controls

Our earnings and growth, as well as the earnings and growth of the banking industry, are affected by the credit policies of monetary authorities, including the Federal Reserve. An important function of the Federal Reserve is to regulate the national

supply of bank credit in order to combat recession and curb inflationary pressures. Among the instruments of monetary policy used by the Federal Reserve to implement these objectives are open market operations in U.S. government securities, changes in reserve requirements against member bank deposits, and changes in the Federal Reserve discount rate. These instruments are used in varying combinations to influence overall growth of bank loans, investments, and deposits, and may also affect interest rates charged on loans or paid for deposits. The monetary policies of the Federal Reserve authorities have had a significant effect on the operating results of commercial banks in the past and are expected to continue to have such an effect in the future.

In view of changing conditions in the national economy and in money markets, as well as the effect of credit policies by monetary and fiscal authorities, including the Federal Reserve, it is difficult to predict the impact of possible future changes in interest rates, deposit levels, and loan demand, or their effect on our business and earnings or on the financial condition of our various customers.

Available Information

We file annual, quarterly, and current reports, proxy statements, and other information with the SEC. These filings are available to the public on the Internet at the SEC's web site at www.sec.gov.

Our principal internet address is www.associatedbank.com. We make available free of charge on or through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. In addition, shareholders may request a copy of any of our filings (excluding exhibits) at no cost by writing at Associated Banc-Corp, Attn: Investor Relations, 433 Main Street, Green Bay, WI 54301 or e-mailing us at investor.relations@associatedbank.com.

ITEM 1A.

Risk Factors

An investment in our common stock is subject to risks inherent to our business. The material risks and uncertainties that management believes affect us are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below, together with all of the other information included or incorporated by reference herein. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may impair our business operations. This report is qualified in its entirety by these risk factors. See also, Special Note Regarding Forward-Looking Statements and Risk Factors Summary.

If any of the events described in the risk factors should actually occur, our financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of our securities could decline significantly, and you could lose all or part of your investment.

Credit Risks

Changes and instability in economic conditions, geopolitical matters and financial markets, including a contraction of economic activity, could adversely impact our business, results of operations and financial condition.

Our success depends, to a certain extent, upon global, domestic and local economic and political conditions, as well as governmental monetary policies. Conditions such as changes in interest rates, money supply, levels of employment and other factors beyond our control may have a negative impact on economic activity. Any contraction of economic activity, including an economic recession, may adversely affect our asset quality, deposit levels and loan demand and, therefore, our earnings. In particular, interest rates are highly sensitive to many factors that are beyond our control, including global, domestic and local economic conditions and the policies of various governmental and regulatory agencies and, specifically, the Federal Reserve. Throughout 2022 and 2023, the FOMC raised the target range for the federal funds rate on eleven separate occasions, citing factors including the hardships caused by the ongoing Russia-Ukraine conflict, continued global supply chain disruptions and imbalances, and increased inflationary pressure. In the third and fourth quarters of 2024, however, the FOMC pivoted and lowered the federal funds rate from 5.50% to 4.50% based principally on reduced levels of inflation and labor market factors. The FOMC continued to lower the federal funds rate several times in 2025, with the federal funds rate reaching a target range of 3.50% to 3.75% at the FOMC's December 10, 2025 meeting. The FOMC maintained these rates at its January 28, 2026 meeting.

As of December 31, 2025, various economic indicators suggested that real GDP had expanded solidly throughout 2025. The unemployment rate had increased, on net, but remained low relative to historic norms. Consumer price inflation, as measured by the 12-month change in the price index for personal consumption expenditures, decreased compared to its peak level in

2023, approaching the Federal Reserve's two percent inflation objective. The U.S. economy had strong GDP growth, loosening of tight labor markets and slowed inflation in 2025.

While this positive growth may continue in 2026, external factors such as stricter immigration policies, tariffs, and other trade policies, sanctions, geopolitical tensions, high unemployment, civil unrest, and other political or trade-related policies affecting domestic and global markets may cause greater economic uncertainty. Such conditions may adversely affect our asset quality, deposit levels, loan demand and results of operations.

As a result of the economic and geopolitical factors discussed above, financial institutions face heightened credit risk, among other forms of risk. Of note, because we have a significant amount of real estate loans, decreases in real estate values could adversely affect the value of property used as collateral, which, in turn, can adversely affect the value of our loan and investment portfolios. Adverse economic developments, specifically including inflation-related impacts, may have a negative effect on the ability of our borrowers to make timely repayments of their loans or to finance future home purchases. The outlook for CRE is dependent on the economic environment and how major subsectors respond to the interest rate environment and continued higher prices for commodities, goods and services. Credit performance over the medium- and long-term is susceptible to economic and market forces and therefore forecasts remain uncertain; however, some degree of instability in the CRE markets is expected in the coming quarters as loans continue to be refinanced in markets with higher vacancy rates.

Changes in U.S. trade policies, including the imposition of tariffs and retaliatory tariffs, may adversely impact our business, financial condition, and results of operations.

The Trump Administration, during its second term beginning 2025, imposed tariffs against goods imported from U.S. trading partners, including Canada, Mexico and China. The tariffs have resulted in threats of retaliatory tariffs against U.S. goods, discussions with the countries which have delayed many of the U.S. imposed tariffs while discussions with each trading partner continue and litigation in the U.S. courts.

Tariffs and trade restrictions may cause the prices of our customers' products to increase, which could reduce demand for such products, or reduce our customers' margins, and adversely impact their revenues, financial results, and ability to service debt. This in turn could adversely affect our financial condition and results of operations. To the extent changes in the political environment have a negative impact on us or on the markets in which we operate our business, our results of operations and financial condition could be materially and adversely impacted in the future. At this time, it remains unclear what the U.S. government or foreign governments will or will not do in response to additional tariffs that may be imposed or international trade agreements and policies.

Our allowance for credit losses on loans may be insufficient.

All borrowers have the potential to default, and our remedies in the event of such default (such as seizure and/or sale of collateral, legal actions, and guarantees) may not fully satisfy the debt owed to us. We maintain an ACLL, which is a reserve established through a provision for credit losses charged to expense, that represents management's best estimate of probable credit losses over the life of the loan within the existing portfolio of loans. The ACLL, in the judgment of management, is necessary to reserve for estimated credit losses and risks inherent in the loan portfolio. The level of the ACLL reflects management's continuing evaluation of industry concentrations; specific credit risks; loan loss experience; current loan portfolio quality; present economic, political, and regulatory conditions; and unidentified losses inherent in the current loan portfolio. The determination of the appropriate level of the ACLL inherently involves a high degree of subjectivity and requires us to make significant estimates of current credit risks using existing qualitative and quantitative information, all of which may undergo material changes. Changes in economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem loans, and other factors, both within and outside of our control, may require an increase in the ACLL. Bank regulatory agencies periodically review our ACLL and may require an increase in the provision for credit losses or the recognition of additional loan charge offs, based on judgments different than those of management. An increase in the ACLL would result in a decrease in net income, and possibly risk-based capital, and could have a material adverse effect on our financial condition and results of operations.

We are subject to lending concentration risks.

As of December 31, 2025, 65% of our loan portfolio consisted of commercial and industrial, real estate construction, and CRE loans (collectively, "commercial loans"). Commercial loans are generally viewed as having more inherent risk of default than residential mortgage loans or other consumer loans. Further, the commercial loan balance per borrower is typically larger than that for residential mortgage loans and other consumer loans, implying higher potential losses on an individual loan basis. Because our loan portfolio contains a number of commercial loans with significant balances, the deterioration of one or a few of these loans could cause a significant increase in nonaccrual loans, which could have a material adverse effect on our financial condition and results of operations.

CRE lending may expose us to increased lending risks.

Our policy generally has been to originate CRE loans primarily in the states in which the Bank operates. At December 31, 2025, CRE loans, including owner occupied, investor, and real estate construction loans, totaled \$8.4 billion, or 27%, of our total loan portfolio and 183% of total risk-based capital. CRE loans generally involve a greater degree of credit risk than residential mortgage loans because they typically have larger balances and are more affected by adverse conditions in the economy. Because payments on loans secured by CRE depend upon the successful operation and management of the properties and the businesses that operate from within them, repayment of such loans can be affected by factors outside the borrower's control, such as adverse conditions in the real estate market or the economy or changes in government regulation.

Although CRE markets have shown signs of stabilization since 2024, the federal banking agencies have issued guidance on the sound risk management practices regarding CRE lending and regulatory scrutiny may increase depending on the concentration in CRE lending and changing economic conditions for the CRE markets. Our failure to adequately maintain appropriate risk management policies, procedures and controls could adversely affect our ability to increase this portfolio and could result in an increased rate of delinquencies in, and increased losses from, this portfolio as well as enhanced regulatory scrutiny and regulatory expectations for increased capital. At December 31, 2025, nonaccrual CRE loans totaled \$8.7 million, or less than 1% of our total portfolio of CRE loans.

We depend on the accuracy and completeness of information furnished by and on behalf of our customers and counterparties.

In deciding whether to extend credit or enter into other transactions, we rely on information furnished by or on behalf of customers and counterparties, including financial statements, credit reports, and other financial information. We may rely on representations of those customers, counterparties, or other third parties, such as independent auditors, as to the accuracy and completeness of that information. Reliance on inaccurate or misleading financial statements, credit reports, or other financial information could cause us to enter into unfavorable transactions, which could have a material adverse effect on our financial condition and results of operations.

Lack of system integrity or credit quality related to funds settlement could result in a financial loss.

We settle funds on behalf of financial institutions, other businesses and consumers and receive funds from clients, card issuers, payment networks and consumers on a daily basis for a variety of transaction types. Transactions we facilitate include wire transfers, debit card, credit card and electronic bill payment transactions, supporting consumers, financial institutions and other businesses. These payment activities rely upon the technology infrastructure that facilitates the verification of activity with counterparties and the facilitation of the payment. If the continuity of operations or integrity of processing were compromised, it could result in a financial loss to us. We may issue credit to consumers, financial institutions or other businesses as part of the funds settlement. A default on this credit by a counterparty could result in a financial loss to us.

We are subject to environmental liability risk associated with lending activities.

A significant portion of our loan portfolio is secured by real property. During the ordinary course of business, we may foreclose on and take title to properties securing certain loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, we may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require us to incur substantial expenses which may materially reduce the affected property's value or limit our ability to use or sell the affected property. Future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase our exposure to environmental liability. Although we have policies and procedures to perform an environmental review before lending against or initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The

remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on our financial condition and results of operations.

Liquidity and Interest Rate Risks

Impairment of our access to liquidity could affect our ability to meet our obligations.

The Corporation requires liquidity to meet its deposit and debt obligations as they come due. Access to liquidity could be impaired by an inability to access the capital markets or unforeseen outflows of deposits. Risk factors that could impair our ability to access capital markets include a downturn in our Midwest markets, difficult credit markets, credit rating downgrades, or regulatory actions against the Corporation. The Corporation's access to deposits can be impacted by the liquidity needs of our customers as a substantial portion of the Corporation's liabilities are demand while a substantial portion of the Corporation's assets are loans that cannot be sold in the same timeframe. Historically, the Corporation has been able to meet its cash flow needs as necessary. If a sufficiently large number of depositors sought to withdraw their deposits for whatever reason, the Corporation may be unable to obtain the necessary funding at favorable terms.

The proportion of our deposit account balances that exceed FDIC insurance limits may expose the Bank to enhanced liquidity risk in times of financial distress.

In the aftermath of the significant bank failures that occurred in 2023, the federal banking agencies have enhanced their scrutiny of banks' liquidity risk management.

In the event of financial distress, uninsured depositors historically have been more likely to withdraw their deposits. The Corporation had approximately \$17.0 billion of uninsured deposits at December 31, 2025. Estimated uninsured and uncollateralized deposits, excluding intercompany deposits, were \$9.4 billion or 26.5% of total deposits at December 31, 2025.

The ease and speed of the electronic withdrawals may accelerate this process. If a significant portion of our deposits were to be withdrawn within a short period such that additional sources of funding would be required to meet withdrawal demands, the Corporation may be unable to obtain funding at favorable terms, which may have an adverse effect on our net interest margin. Our ability to attract depositors during a time of actual or perceived distress or instability in the marketplace may be limited. Further, interest rates paid for borrowings generally exceed the interest rates paid on deposits. Because our AFS investment securities lose value when interest rates rise, after-tax proceeds resulting from the sale of such assets may be diminished during periods when interest rates are elevated. Under such circumstances, we may be required to access funding from sources such as the Federal Reserve's discount window and the FHLB system in order to manage our liquidity risk. For additional information regarding uninsured deposits and liquidity, see sections Deposits and Customer Funding and Liquidity of Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Adverse changes to our credit ratings could limit our access to funding and increase our borrowing costs.

Credit ratings are subject to review by rating agencies, which consider a number of factors, including our financial strength, performance, prospects and operations as well as factors not under our control. Other factors that influence our credit ratings include changes to the rating agencies' methodologies for our industry or certain security types; the rating agencies' assessment of the general operating environment for financial services companies; our relative positions in the markets in which we compete; our various risk exposures and risk management policies and activities; pending litigation and other contingencies; our reputation; our liquidity position, diversity of funding sources and funding costs; the current and expected level and volatility of our earnings; our capital position and capital management practices; our corporate governance; current or future regulatory and legislative initiatives; and the agencies' views on whether the U.S. government would provide meaningful support to the Corporation or its subsidiaries in a crisis. Rating agencies could make adjustments to our credit ratings at any time, and there can be no assurance that they will maintain our ratings at current levels or that downgrades will not occur.

In August 2023, Moody's and S&P Global Ratings each downgraded our long-term issuer credit ratings, and the ratings remained unchanged as of December 31, 2025. Any additional downgrade in our credit ratings could potentially adversely affect the cost and other terms upon which we are able to borrow or obtain funding, increase our cost of capital and/or limit our access to capital markets. Credit rating downgrades or negative watch warnings could negatively impact our reputation and the perception of the Corporation by lenders, investors and other third parties, which could impair our ability to compete in certain markets or engage in certain transactions. In particular, holders of deposits which exceed FDIC insurance limits may perceive such a downgrade or warning negatively and withdraw all or a portion of such deposits. While certain aspects of a credit rating downgrade are quantifiable, the impact that such a downgrade would have on our liquidity, business and results of operations in future periods is inherently uncertain and would depend on a number of interrelated factors, including, among other things, the

magnitude of the downgrade, the rating relative to peers, the rating assigned by the relevant agency pre-downgrade, individual client behavior and future mitigating actions we might take.

We are subject to interest rate risk.

Our earnings and cash flows are largely dependent upon our net interest income. Interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Federal Reserve. Changes in monetary policy, including changes in interest rates, could influence not only the interest we receive on loans and investments and the amount of interest we pay on deposits and borrowings, but such changes could affect (i) our ability to originate loans and obtain deposits; (ii) the fair value of our financial assets and liabilities; and (iii) the average duration of our mortgage portfolio and other interest-earning assets.

As of January 28, 2026, the date of the FOMC's most recent meeting, the target range for the federal funds rate was 3.50% to 3.75%, which is down from the peak of 5.25% to 5.50% prior to the FOMC meeting in September 2024. Despite direct pressure from the President and the anticipated change in the Chair of the Federal Reserve, it remains uncertain whether the FOMC will further reduce the target range for the federal funds rate to stimulate economic activity and promote job growth or leave the rate at its current level for an additional period of time. Earnings could be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings. The Corporation's interest rate risk profile is such that, generally, a higher yield curve adds to income while a lower yield curve has a negative impact on earnings. Our most significant interest rate risk may result from timing differences in the maturity and re-pricing characteristics of assets and liabilities, changes in the shape of the yield curve, and the potential exercise of explicit or embedded options.

Although management believes it has implemented effective asset and liability management strategies, including the use of derivatives as hedging instruments, to reduce the effects of changes in interest rates on our results of operations, any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on our financial condition and results of operations, and any related economic impact, especially domestically and in the regions in which we operate, may adversely affect our asset quality, deposit levels, loan demand and results of operations. Our interest rate risk modeling techniques and assumptions may not fully predict or capture the impact of actual interest rate changes on our balance sheet.

The impact of interest rates on our mortgage banking business can have a significant impact on revenues.

Changes in interest rates can impact our mortgage-related revenues. A decline in mortgage rates generally increases the demand for mortgage loans as borrowers refinance, but generally leads to accelerated payoffs. Conversely, in a constant or increasing rate environment, we would expect fewer loans to be refinanced and a decline in payoffs. Although we use models to assess the impact of interest rates on mortgage-related revenues, the estimates of revenues produced by these models are dependent on estimates and assumptions of future loan demand, prepayment speeds and other factors which may differ from actual subsequent experience.

Changes in interest rates could reduce the value of our investment securities holdings which would increase our accumulated other comprehensive loss and thereby negatively impact stockholders' equity.

The Corporation maintains an investment portfolio consisting of high-quality liquid fixed-income securities. The total carrying value of the AFS securities portfolio was \$5.4 billion as of December 31, 2025, and the estimated duration of the aggregate portfolio was approximately 3.2 years. The nature of fixed-income securities is such that changes in market interest rates impact the value of these assets.

Changes in interest rates could reduce the value of our residential mortgage-related securities and MSRs, which could negatively affect our earnings.

The Corporation earns revenue from the fees it receives for originating mortgage loans and for servicing mortgage loans. When rates rise, the demand for mortgage loans tends to fall, reducing the revenue the Corporation receives from loan originations. At the same time, revenue from MSRs can increase through increases in fair value. When rates fall, mortgage originations tend to increase and the value of MSRs tends to decline, with some offsetting revenue effect. Even though the origination of mortgage loans can act as a natural hedge, the hedge is not perfect, either in amount or timing. For example, the negative effect on revenue from a decrease in the fair value of MSRs is immediate, but any offsetting revenue benefit from more originations and the MSRs relating to the new loans would be recognized during the month of origination. It is possible that even if interest rates were to fall, mortgage originations may fall or any increase in mortgage originations may not be enough to offset the decrease in the MSRs value caused by the lower rates.

The Corporation typically uses derivatives and other instruments to hedge its mortgage banking interest rate risk. The Corporation generally does not hedge all of its risks and the fact that hedges are used does not mean they will be successful. Hedging is a complex process, requiring sophisticated models and constant monitoring. The Corporation could incur significant losses from its hedging activities. There may be periods where the Corporation elects not to use derivatives and other instruments to hedge mortgage banking interest rate risk, which could cause the Corporation to incur substantial losses.

We rely on dividends from our subsidiaries for most of our cash flow.

The Parent Company is a separate and distinct legal entity from its banking and other subsidiaries. A substantial portion of the Parent Company's cash flow comes from dividends from its subsidiaries. These dividends are the principal source of funds to pay dividends on the Parent Company's common and preferred stock, and to pay interest and principal on the Parent Company's debt. Various federal and/or applicable state laws and regulations limit the amount of dividends that the Bank and certain of our nonbanking subsidiaries may pay to us. Our right to participate in a distribution of assets upon a subsidiary's liquidation or reorganization is subject to the prior claims of the subsidiary's creditors. In the event the Bank subsidiary is unable to pay dividends to us, we may not be able to service debt, pay obligations, or pay dividends on our common and preferred stock. The inability to receive dividends from the Bank would have a material adverse effect on our business, financial condition, and results of operations.

Operational Risks

We face significant operational risks due to the high volume and the high dollar value nature of transactions we process.

We operate in many different businesses in diverse markets and rely on the ability of our employees and systems to process transactions. Operational risk is the risk of loss resulting from our operations, including but not limited to, the risk of fraud by employees or persons outside the Corporation, the execution of unauthorized transactions, errors relating to transaction processing and technology, breaches of our internal control systems or failures of those of our suppliers or counterparties, compliance failures, cyber-attacks or other security breaches, technology failures, or unforeseen problems encountered while implementing new computer systems or upgrades to existing systems, business continuation and disaster recovery issues, and other external events. In recent periods, the OCC has observed an increased incidence of check fraud, wire fraud, peer-to-peer payment fraud, and the use of AI technology to facilitate the perpetration of social engineering and impersonation schemes and identity theft. Insurance coverage may not be available for such losses, or where available, such losses may exceed insurance limits. This risk of loss includes the potential legal actions that could arise as a result of an operational deficiency or as a result of noncompliance with applicable regulatory standards, adverse business decisions or their implementation, and customer attrition due to potential negative publicity. The occurrence of any of these events could cause us to suffer financial loss, face regulatory action and suffer damage to our reputation.

Unauthorized disclosure of sensitive or confidential client or customer information (including personal information), whether through a cyber-attack, other breach of our computer systems or otherwise, could severely harm our business.

In the normal course of our business, we collect, share, use, store and otherwise process sensitive and confidential client and customer information, including personal information, on our behalf and on behalf of other third parties. Despite the security measures we have in place, our facilities, systems and networks may be vulnerable to cyber-attacks, security breaches, acts of vandalism, theft, computer viruses, malware, ransomware, denial of service attacks, phishing or other social engineering attacks, credential stuffing, account takeovers, misplaced or lost data, programming and/or human errors, software or hardware failures, or other similar events.

Information security risks for financial institutions like us continue to increase in part because of new technologies, the increased use of the internet and telecommunications technologies (including mobile devices and cloud computing) to conduct financial and other business transactions, political activism, and the increased sophistication and activities of organized crime, perpetrators of fraud, hackers, terrorists and others.

We rely on computer systems, hardware, software, technology infrastructure and online sites and networks for both internal and external operations that are critical to our business. Operational risk related to cyber-attacks is increasing as cyber-attacks evolve and have a greater and more pervasive economic impact. In addition to cyber-attacks or other security breaches involving the theft, loss, destruction, gathering, monitoring, dissemination, misappropriation, misuse, alteration, or unauthorized disclosure of or unauthorized access to sensitive and confidential information (including personal information), hackers have engaged in attacks against large financial institutions, designed to disrupt key business services, such as customer-facing web sites. Critical infrastructure sectors, including financial services, increasingly have been the targets of cyber-attacks, including attacks emanating from foreign countries. Cyber-attacks involving large financial institutions, including distributed

denial of service attacks designed to disrupt external customer-facing services, cyber-attacks carried out by terrorists, nation states, nation-state supported actors, organized criminal groups or “hacktivists”, and ransomware attacks designed to deny organizations access to key internal resources or systems or other critical data, as well as targeted social engineering and phishing email and text message attacks designed to allow unauthorized persons to obtain access to an institution’s information systems and data or that of its customers, are becoming more common and increasingly sophisticated.

Cyber-attacks continue to evolve and become more pervasive throughout the financial services sector. In particular, there has been an observed increase in the number of distributed denial of service and ransomware attacks against the financial sector, for which the increase is believed to be partially attributable to politically motivated attacks as well as financial demands coupled with extortion. Further, threat actors continue to exploit publicly known software vulnerabilities and weak authentication controls used by large numbers of banking organizations in order to conduct malicious cyber activities. These types of attacks have resulted in increased supply chain and third-party risk. Such cybersecurity threats may see their frequency increased, and effectiveness enhanced, by the use of AI.

Because the methods of cyber-attacks change frequently or, in some cases, are not recognized until launch, we are not able to anticipate or implement effective preventive measures against all possible security breaches and the probability of a successful attack cannot be predicted. Although we employ detection and response mechanisms designed to contain and mitigate security incidents, early detection may be thwarted by persistent sophisticated attacks and malware designed to avoid detection.

We face risks related to cyber-attacks and other security breaches in connection with card transactions that typically involve the transmission of sensitive information (including personal information) regarding our customers through various third parties. Some of these parties have in the past been the target of security breaches and cyber-attacks, and because the transactions involve third parties and environments that we do not control or secure, future security breaches or cyber-attacks affecting any of these third parties could impact us, and in some cases we may have exposure and suffer losses for breaches or attacks relating to them. We rely on numerous other third-party service providers to conduct other aspects of our business operations and face similar risks relating to them. We cannot be sure that such third-party information security protocols are sufficient to withstand a cyber-attack or other security breach.

Cybersecurity risks for financial institutions have evolved as a result of the increased interconnectedness of operating environments and the use of new technologies, devices and delivery channels to transmit data and conduct financial transactions. The adoption of new products, services and delivery channels contribute to a more complex operating environment, which enhances operational risk and presents the potential for additional structural vulnerabilities. As such, a single cyber-attack is now able to compromise hundreds of organizations and affect a significant number of consumers. The adoption of hybrid and remote work environments in the past several years presents institutions with additional cybersecurity vulnerabilities and risks.

The Corporation endeavors to regularly evaluate its systems and controls and implement upgrades as necessary. The additional cost to the Corporation of our cybersecurity monitoring and protection systems and controls includes the cost of hardware and software, third party technology providers, consulting and forensic testing firms, insurance premium costs and legal fees and the incremental cost of our personnel who focus a substantial portion of their responsibilities on cybersecurity.

Any attempted or successful cyber-attack or other security breach involving the theft, loss, destruction, gathering, monitoring, dissemination, misappropriation, misuse, alteration, or unauthorized disclosure of or unauthorized access to sensitive or confidential client or customer information (including personal information), confidential and proprietary information relating to our bank and operations, unauthorized access to our information systems or networks or that of our third-party service providers, or unauthorized access to other data that compromises our ability to function could severely damage our reputation, erode confidence in the security of our systems and networks, products and services, expose us to the risk of litigation and liability, disrupt our operations and have a material adverse effect on our business. Any attempted or successful cyber-attack may subject the Corporation to regulatory investigations, litigation (including class action litigation) or enforcement, or require the payment of regulatory fines or penalties or undertaking costly remediation efforts with respect to third parties affected by a cybersecurity incident, all or any of which could adversely affect the Corporation’s business, financial condition or results of operations and damage its reputation. Finally, we cannot guarantee that any costs and liabilities incurred in relation to an attack or incident will be covered by our existing insurance policies or that applicable insurance will be available to us in the future on economically reasonable terms or at all.

From time to time, the Corporation engages in acquisitions, including acquisitions of depository institutions. The integration of core systems and processes for such transactions often occurs after the closing, which may create elevated risk of cyber incidents.

The Corporation may be subject to the data risks and cybersecurity vulnerabilities of the acquired company until the Corporation has sufficient time to fully integrate the acquiree's customers and operations. Although the Corporation endeavors to conduct comprehensive due diligence of cybersecurity policies, procedures and controls of our acquisition counterparties, and the Corporation endeavors to maintain adequate policies, procedures, controls and information security protocols to facilitate a successful integration, there can be no assurance that such measures, controls and protocols are sufficient to withstand a cyber-attack or other security breach with respect to the companies we acquire, particularly during the period of time between closing and final integration.

We rely heavily on communications and information systems and networks to conduct our business. Any failures or disruptions to our third parties' communications and information systems and networks could materially and adversely affect our business.

Our business is dependent on our and third parties' information technology systems and networks. Any failure, interruption, or breach in security or operational integrity of our or our third-party service providers' communications and information systems or networks, including those caused by a cyber-attack, could result in failures or disruptions in our customer relationship management, general ledger, deposit, loan, and other systems.

Our computer, communications, data processing, networks, backup, business continuity or other operating, information or technology systems and networks, including those that we outsource to providers, may fail to operate properly or become disabled, overloaded or damaged as a result of a number of factors, including events that are wholly or partially beyond our control, which could have a negative effect on our ability to conduct our business activities.

While we have policies and procedures designed to prevent or limit the effect of the failure, interruption, or security breach of our or our third parties' communications and information systems and networks, we cannot completely ensure that any such failures, interruptions, or security breaches will not occur, nor can we ensure that our prevention procedures and information security program will function as designed and planned. Our business interruption insurance may be inadequate to compensate us for all losses that may occur as a result of any system, network or operational failure or disruption. The occurrence of any failures, interruptions, or security breaches of our or our third-party service providers' communications and information systems and networks, including those caused by a cyber-attack, could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

We are subject to certain industry standards regarding our credit card-related services. Failure to meet those standards may significantly impact our ability to offer these services.

We are subject to the PCI-DSS, issued by the Payment Card Industry Security Standards Council. PCI-DSS contains compliance guidelines with regard to our security surrounding the physical and electronic storage, processing and transmission of cardholder data. Compliance with PCI-DSS and implementing related procedures, technology and information security measures requires significant resources and ongoing attention. Costs and potential problems and interruptions associated with the implementation of new or upgraded systems and technology, such as those necessary to achieve compliance with PCI-DSS or with maintenance or adequate support of existing systems could disrupt or reduce the efficiency of our operations. Any material interruptions or failures in our payment-related systems or third parties that we rely upon could have a material adverse effect on our business, results of operations and financial condition. If there are amendments to PCI-DSS, the cost of compliance could increase, and we may suffer loss of critical data and interruptions or delays in our operations as a result. If we or our service providers are unable to comply with the standards imposed by PCI-DSS, we may be subject to fines and restrictions on our ability to offer certain services, which could materially and adversely affect our business.

Compliance with the rapidly evolving federal and state laws relating to the handling of information about individuals involves significant expenditure and resources, and any failure by us or our service providers to comply may result in significant liability, negative publicity, and/or an erosion of trust, which could materially adversely affect our business, results of operations, and financial condition.

We and our service providers are subject to a number of U.S. federal, state, and local laws and regulations, industry standards and other requirements relating to consumer privacy and data protection. For more information, see "Privacy, Data Protection, and Cybersecurity" in the Item 1, Business section above.

Both to comply with applicable existing law and to prepare for potential expansions in laws requiring protection of personal information, we must endeavor to maintain adequate privacy and security measures, which require significant investments in resources and ongoing attention.

We send marketing messages via email and occasionally make telephone calls and/or send SMS text messages to customers. The actual or perceived improper emailing of marketing communications, calling of customer phones and/or sending of text messages may subject us to potential risks, including liabilities or claims relating to consumer protection laws such as the TCPA and the CAN-SPAM Act. Numerous class-action suits under federal and state laws have been filed in recent years against companies who conduct telemarketing and/or SMS texting programs, and any future such litigation against us could be costly and time-consuming to defend. In particular, the TCPA imposes significant restrictions on the ability to make telephone calls or send text messages to mobile telephone numbers without the prior consent of the person being contacted. Federal or state regulatory authorities or private litigants may claim that the notices and disclosures we provide, form of consents we obtain or our outreach practices are not adequate or violate applicable law. This may in the future result in civil claims against us. Claims that we have violated the TCPA could be costly to litigate, whether or not they have merit, and could expose us to substantial statutory damages or costly settlements.

While we strive to ensure that all of our marketing communications comply with the requirements set forth in the CAN-SPAM Act, any violations could result in the FTC seeking civil penalties against us.

Moreover, we are considered both a “furnisher” of consumer report information and a “user” of consumer reports provided by consumer reporting agencies under the FCRA. Our failure to satisfy the obligations under the FCRA, as applicable, may expose us to supervisory scrutiny or litigation, each of which could have a material adverse effect on our financial condition and results of operations.

Our obligations related to privacy and security are quickly changing in an increasingly stringent fashion and may be subject to differing applications and interpretations, which may be inconsistent or in conflict among jurisdictions. Preparing for and complying with these obligations requires us to devote significant resources and may necessitate changes to our business practices. We enter into agreements with third parties regarding our collection, sharing, use, storage and other processing of personal information and publish public privacy policies and make other public statements about our privacy and security practices. Although we endeavor to comply with our privacy and security obligations, we may at times fail to do so or may be perceived to have failed to do so, including due to the errors or omissions of our personnel and third parties upon which we rely.

Any failure or perceived failure by us to comply with laws, regulations and other requirements relating to the privacy, security and handling of information could result in legal claims or proceedings (including class actions), regulatory investigations, enforcement actions, claims, fines, judgments, awards, penalties or sanctions. We could incur significant costs in investigating and defending such claims and, if found liable, pay significant damages or fines or be required to make changes to our business. These proceedings and any subsequent adverse outcomes may subject us to significant negative publicity and an erosion of trust. If any of these events were to occur, our business, results of operations, and financial condition could be materially adversely affected.

The use of AI in connection with our business and operations contains inherent risks that may expose us to material harm and any actual or perceived failure to comply with evolving regulatory frameworks around the development and use of AI could adversely affect our business, results of operations, and financial condition.

Our business increasingly relies on AI, machine learning and automated decision making to improve our services and our customers’ experience. The regulatory framework around the development and use of these emerging technologies is rapidly evolving, and many federal, state and foreign government bodies and agencies have introduced and/or are currently considering additional laws and regulations. The implementation standards and enforcement practices are likely to remain uncertain for the foreseeable future, and we cannot yet determine the impact future laws, regulations, standards, or perception of their requirements may have on our business.

If any of our employees or service providers use any third-party AI-powered software in connection with our business or the services they provide to us, it may lead to the inadvertent disclosure or incorporation of our confidential information into publicly available training sets, which may impact our ability to realize the benefit of, or adequately maintain, protect and enforce our intellectual property or confidential information, harming our competitive position and business. Any output created by us using AI tools may not be subject to copyright protection, which may adversely affect our intellectual property rights in, or ability to commercialize or use, any such content.

If we do not have sufficient rights to use the data or other material or content on which our AI solutions rely, or if we experience cybersecurity incidents in connection with our use of AI, we may incur liability through the violation of applicable laws and regulations, such as fair lending laws and regulations, third-party intellectual property, privacy or other rights, or contracts to which we are a party. We may not be able to sufficiently mitigate or detect any of the foregoing limitations or risks given our and other market participants' lack of experience with using AI, the pace of technological change, and rapid adoption of AI by our business partners and competitors. This exposes us to potential damage to our reputation, adverse impacts on our business operations, and violation of legal and regulatory obligations.

Any of the foregoing, together with developing guidance and/or decisions in this area, may affect our use of AI and our ability to provide and improve our services, require additional compliance measures and changes to our operations and processes, and result in increased compliance costs and potential increases in civil claims against us. Any actual or perceived failure to comply with evolving regulatory frameworks around the development and use of AI, machine learning and automated decision making or to address any ethical, reputational, technical, operational, legal, competitive or regulatory issues could adversely affect our business, results of operations, and financial condition.

We are dependent upon third parties for certain information system, data management and processing services, and to provide key components of our business infrastructure.

We outsource certain information system and data management and processing functions to third-party service providers to compete in a rapidly evolving financial marketplace. We may outsource to certain foreign-based service providers in the future. These third-party service providers are sources of operational and informational security risk to us, including risks associated with operational errors, information system interruptions or breaches, and unauthorized disclosures of sensitive or confidential client or customer information, including personal information. Any service relationships that we may have with foreign-based service providers would present additional risks, including, for example, country risk (e.g., risks relating to economic, social, and political conditions within the service provider's home country that may inhibit the ability of the service provider to provide us with services) and compliance risk (e.g., risks arising from the cross-border flow of information and services and the potential applicability of foreign laws and regulations). Concentration among larger third-party service providers servicing large segments of the banking industry can potentially affect wide segments of the financial industry. If third-party service providers encounter any of these issues, or if we have difficulty communicating with them, we could be exposed to disruption of operations, loss of service or connectivity to customers, reputational damage, and litigation risk that could have a material adverse effect on our results of operations or our business.

Third-party service providers provide key components of our business infrastructure, such as internet connections, network access and core application processing. While we have selected these third-party service providers in accordance with supervisory requirements, we do not control their actions. The actions of these third parties, including as a result of their not providing us their services for any reason or their performing their services poorly, could adversely affect our ability to deliver products and services to our customers and otherwise to conduct our business. Replacing these third-party service providers could entail significant delay and expense.

The potential for business interruption exists throughout our organization.

Integral to our performance is the continued efficacy of our technical systems, operational infrastructure, relationships with third parties and the vast array of associates and key executives in our day-to-day and ongoing operations. Failure by any or all of these resources subjects us to risks that may vary in size, scale and scope. This includes, but is not limited to, operational or technical failures, ineffectiveness or exposure due to interruption in third party support, problems arising from systems conversions, as well as the loss of key individuals or failure on the part of key individuals to perform properly. Although management has established policies and procedures to address such failures, the occurrence of any such event could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

Changes in the federal, state, or local tax laws may negatively impact our financial performance.

We are subject to changes in tax law that could increase our effective tax rates. These law changes may be retroactive to previous periods and as a result could negatively affect our current and future financial performance. For example, legislation enacted in 2017 resulted in a reduction in our federal corporate tax rate from 35% in 2017 to 21% in 2018, which had a favorable impact on our earnings and capital generation abilities. However, this legislation enacted limitations on certain deductions, such as the deduction of FDIC deposit insurance premiums, which partially offset the anticipated increase in net earnings from the lower tax rate. The current Administration may further reduce the federal corporate tax rate, but the extent and timing of any tax reform, as well as any corresponding effect on our business and financial results, are uncertain at this

time. On the other hand, any increase in the corporate tax rate or surcharges that may be adopted by Congress would adversely affect our results of operations in future periods.

The Bank's customers experienced and likely will continue to experience varying effects from both the individual and business tax provisions of the Tax Act. Certain provisions of the Tax Act were extended by the One Big Beautiful Bill Act. Future changes in tax law and such effects, whether positive or negative, may have a corresponding impact on our business and the economy as a whole.

Impairment of investment securities, goodwill, other intangible assets, or DTAs could require charges to earnings, which could result in a negative impact on our results of operations.

In assessing whether the impairment of investment securities is related to a deterioration in credit factors, management considers the length of time and extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability to retain our investment in the security for a period of time sufficient to allow for any anticipated recovery in fair value in the near term.

Under current accounting standards, goodwill is not amortized but, instead, is subject to impairment tests on at least an annual basis or more frequently if an event occurs or circumstances change that reduce the fair value of a reporting unit below its carrying amount. A decline in our stock price or occurrence of a triggering event following any of our quarterly earnings releases and prior to the filing of the periodic report for that period could, under certain circumstances, cause us to perform a goodwill impairment test and result in an impairment charge being recorded for that period which was not reflected in such earnings release. During 2025, the annual impairment test conducted in May, using a qualitative assessment, indicated that the estimated fair value of all of the Corporation's reporting units exceeded the carrying value. In the event that we conclude in a future assessment that all or a portion of our goodwill may be impaired, a non-cash charge for the amount of such impairment would be recorded to earnings. Such a charge would have no impact on tangible capital. At December 31, 2025, we had goodwill of \$1.1 billion, which represents approximately 22% of stockholders' equity.

In assessing the realizability of DTAs, management considers whether it is more likely than not that some portion or all of the DTAs will not be realized. Assessing the need for, or the sufficiency of, a valuation allowance requires management to evaluate all available evidence, both negative and positive, including the recent trend of quarterly earnings. Positive evidence necessary to overcome the negative evidence includes whether future taxable income in sufficient amounts and character within the carryback and carryforward periods is available under the tax law, including the use of tax planning strategies. When negative evidence (e.g., cumulative losses in recent years, history of operating loss or tax credit carryforwards expiring unused) exists, more positive evidence than negative evidence will be necessary.

The impact of each of these impairment matters could have a material adverse effect on our business, results of operations, and financial condition.

Failure to appropriately administer or manage our investment management and asset servicing businesses properly could put the related earnings at risk.

Revenues from our investment management and asset servicing businesses are significant to our earnings. Generating returns that satisfy clients in a variety of asset classes is important to maintaining existing business and attracting new business. Administering or managing assets in accordance with the terms of governing documents and applicable laws is also important to client satisfaction. Failure in either of the foregoing areas can expose us to liability, and result in a decrease in our revenues and earnings.

Climate-related risks could adversely affect our business and performance, including indirectly through impacts on our customers.

There continues to be a concern, including on the part of certain state regulators, regarding climate change and its impacts. Climate change could manifest as a financial risk to us either through changes in the physical climate or from the process of transitioning to a low-carbon economy. Both physical risks and transition risks associated with climate change could have negative impacts on the financial condition or creditworthiness of our customers, and on its exposure to those customers. Physical risks include the increased frequency or severity of acute weather events, such as floods, wildfires and tropical cyclones, and chronic shifts in the climate, such as persistent changes in precipitation levels, rising sea levels, or increases in average ambient temperature. Transition risks arise from societal adjustment to a low-carbon economy, such as changes in public policy, adoption of new technologies or changes in consumer preferences toward low-carbon goods and services. These risks could also be influenced by changes in the physical climate.

Concerns over the anticipated and unanticipated impacts of climate change (including physical risk and transition risk) have led and may continue to lead to governmental efforts to mitigate those impacts. The Corporation may be compelled to change or cease some of its business or operational practices or to incur additional capital, compliance, and other costs because of climate- or environmental-driven changes in applicable law or supervisory expectations or due to related political, social, market, or similar pressure. The Corporation and its customers may face cost increases, asset value reductions, operating process changes, and other issues. In addition, the Corporation could face reductions in creditworthiness on the part of some customers or in the value of asset securing loans. The Corporation's efforts to take these risks into account in making lending and other decisions may not be effective in protecting it from the negative impact of new laws and regulations or changes in consumer or business behavior.

Further, there is increased scrutiny of climate change-related and other ESG-related policies, goals and disclosures. The Corporation's stakeholders may disagree with these policies and goals, or conversely, believe that these policies and goals are insufficient, which may lead to a decrease in demand for our products and services or damage our reputation. For example, certain federal and state laws and regulations relating to climate or other ESG issues may include provisions that conflict with other laws and regulations, which may increase our costs or limit our ability to conduct business in certain jurisdictions. In particular, there is an increasing number of state-level anti-ESG initiatives in the United States that may conflict with other regulatory requirements or our various stakeholders' expectations. Such divergent, sometimes conflicting, views on such matters increase the risk that any action or lack thereof by the Corporation on such matters will be perceived negatively by some stakeholders. The Corporation may also incur additional costs and require additional resources as it evolves its strategy, practices and related disclosures with respect to these matters. In addition, there are and will continue to be challenges related to capturing, verifying, analyzing and disclosing climate-related data that is subject to measurement uncertainties.

Severe weather, natural disasters, public health issues, civil unrest, acts of war or terrorism, and other external events could significantly impact our ability to conduct business.

Such events could affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, adversely impact our employee base, cause significant property damage, result in loss of revenue, and/or cause us to incur additional expenses. Climate change and other environmental and social pressures are expected to increase the intensity and frequency of certain events, as well as contribute to chronic changes (such as changes to meteorological or hydrological patterns) that may adversely impact our operations. Although management has established disaster recovery policies and procedures, there is no guarantee these will be successful, and the occurrence of any such event could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

Strategic and External Risks

Significant changes to the size, structure, powers and operations of the federal government may cause economic disruptions that could, in turn, adversely impact our business, results of operations and financial condition.

The current Administration continues to implement significant changes to the size and scope of the federal government and reform its operations to achieve stated goals that include reducing the federal budget deficit and national debt, improving the efficiency of government operations, and promoting innovation and economic growth. To date, these efforts have been carried out through a mix of executive actions aimed at eliminating or modifying federal agency and federal program funding, reducing the size of the federal workforce, reducing or altering the scope of activities conducted by, and possibly eliminating, various federal agencies and bureaus, and encouraging the use of AI and other advanced technologies within the public and private sectors. These changes, if implemented and taken as a whole, may have varied effects on the economy that are difficult to predict. For instance, the delivery of government services and the distribution of federal program funds and benefits may be disrupted or, in some cases, eliminated as a result of fraud investigations, funding cuts or recasting of federal agency mandates.

Further, a substantial reduction of the federal workforce could adversely affect regional and local economies, both directly and indirectly, in geographies with significant concentrations of federal employees and contractors. It is possible that such comprehensive changes to the federal government may be materially adverse to the regional and local economies where we conduct business and to our customers, which, in turn, could be materially adverse to our business, financial condition and results of operations.

Our financial condition and results of operations could be negatively affected if we fail to grow or fail to manage our growth effectively.

Our business strategy includes significant growth plans. We intend to continue pursuing a profitable growth strategy. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by financial institutions in significant growth stages of development. Sustainable growth requires that we manage our risks by balancing loan and deposit growth at acceptable levels of risk, maintaining adequate liquidity and capital, hiring and retaining qualified employees, successfully managing the costs and implementation risks with respect to strategic projects and initiatives, and integrating acquisition targets and managing the costs. We may not be able to expand our market presence in our existing markets or successfully enter new markets, and any such expansion may adversely affect our results of operations. Failure to manage our growth effectively could have a material adverse effect on our business, future prospects, financial condition or results of operations and could adversely affect our ability to successfully implement our business strategy. If we grow more slowly than anticipated, our operating results could be materially adversely affected.

We operate in a highly competitive industry and market area.

We face substantial competition in all areas of our operations from a variety of different competitors, both within and beyond our principal markets, many of which are larger and may have more financial resources. Such competitors primarily include national, regional, and internet banks within the various markets in which we operate. We face competition from many other types of financial institutions, including, without limitation, savings and loans, credit unions, finance companies, brokerage firms, insurance companies, fintech companies, including those related to digital currencies or cryptocurrencies, and other financial intermediaries.

The financial services industry could become even more competitive as a result of legislative and regulatory changes and continued consolidation. In recent years, the OCC has accepted applications from financial technology companies to become special purpose national banks. These and similar developments at the state level are likely to result in even greater competition within all areas of our operations.

As customer preferences and expectations continue to evolve, technology has lowered barriers to entry and made it possible for nonbanks to offer products and services traditionally provided by banks, such as automatic transfer and automatic payment systems. Technology firms are engaging in joint ventures with banks to provide and/or expand financial service offerings with a technological sophistication and breadth of marketing that smaller institutions do not have. Many of our competitors have fewer regulatory constraints and may have lower cost structures.

Due to their size, many competitors may be able to achieve economies of scale and, as a result, may offer a broader range of products and services as well as better pricing for those products and services than we can.

Our ability to compete successfully depends on a number of factors, including, among other things:

- the ability to develop, maintain, and build upon long-term customer relationships based on top quality service, high ethical standards, and safe, sound assets;
- the ability to expand our market position;
- the scope, relevance, and pricing of products and services offered to meet customer needs and demands;
- the rate at which we introduce new products and services relative to our competitors;
- customer satisfaction with our level of service; and
- industry and general economic trends.

Failure to perform in any of these areas could significantly weaken our competitive position, which could adversely affect our growth and profitability, which, in turn, could have a material adverse effect on our financial condition and results of operations.

Fiscal challenges facing the U.S. government could negatively impact financial markets which in turn could have an adverse effect on our financial position or results of operations.

Federal budget deficit concerns and the potential for political conflict over legislation to fund U.S. government operations and raise the U.S. government's debt limit may increase the possibility of a default by the U.S. government on its debt obligations,

related credit-rating downgrades, or an economic recession in the United States. Many of our investment securities are issued by the U.S. government and government agencies and sponsored entities. As a result of uncertain domestic political conditions, including potential future federal government shutdowns, the possibility of the federal government defaulting on its obligations for a period of time due to debt ceiling limitations or other unresolved political issues, investments in financial instruments issued or guaranteed by the federal government pose liquidity risks. In connection with prior political disputes over U.S. fiscal and budgetary issues leading to the U.S. government shutdown in 2011, S&P lowered its long-term sovereign credit rating on the U.S. from AAA to AA+. In part due to repeated debt-limit political standoffs and last-minute resolutions, in 2023 Fitch downgraded the U.S. long-term foreign-currency issuer default rating to AA+ from AAA and in 2025 Moody's downgraded the U.S. long-term issuer and senior unsecured ratings to Aa1 from Aaa. A further downgrade, or a downgrade by other rating agencies, as well as sovereign debt issues facing the governments of other countries, could have a material adverse impact on financial markets and economic conditions in the U.S. and worldwide.

Consumers may decide not to use banks to complete their financial transactions.

Technology and other changes are allowing parties to complete financial transactions through alternative methods that historically have involved banks. For example, consumers can now maintain funds that would have historically been held as bank deposits in brokerage accounts, mutual funds or general-purpose reloadable prepaid cards. Consumers can complete transactions, such as paying bills and/or transferring funds directly without the assistance of banks. Transactions utilizing digital assets, including cryptocurrencies, stablecoins and other similar assets, have increased substantially over the course of the last several years. For example, the enactment of the Guiding and Establishing National Innovation for U.S. Stablecoins Act of 2025 (GENIUS Act) provides a legal framework for stablecoins to be issued in the United States, which may allow new and existing competitors to compete for funds that may have otherwise been deposited with banks, such as the Bank.

Certain characteristics of digital asset transactions, such as the speed with which such transactions can be conducted, the ability to transact without the involvement of regulated intermediaries, the ability to engage in transactions across multiple jurisdictions, and the anonymous nature of the transactions, are appealing to certain consumers notwithstanding the various risks posed by such transactions as illustrated by the current and ongoing market volatility. Accordingly, digital asset service providers, which at present are not subject to supervision and regulation comparable to that which is faced by banking organizations and other financial institutions, have become active competitors for our customers' banking business. The current Administration, through executive actions and public announcements, has established a more relaxed regulatory framework for cryptocurrencies, digital assets and financial technology firms, and created a more favorable environment for those asset classes and firms.

The process of eliminating banks as intermediaries, known as disintermediation, could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. On October 22, 2024, the CFPB adopted a final rule regarding personal financial data rights that is designed to promote "open banking." The final rule requires, among other things, that data providers, including any financial institution, make available to consumers and certain authorized third parties upon request certain covered transaction, account and payment information. However, in August 2025, the CFPB issued an advanced notice of proposed rulemaking to reconsider its final rule and, in October 2025, a district court issued a preliminary injunction preventing the CFPB from enforcing the final rule until the CFPB has completed its reconsideration of the rule. A final rule, if implemented, could lead to greater competition for products and services among banks and nonbanks alike. The loss of these revenue streams and the lower cost of deposits as a source of funds could have a material adverse effect on our financial condition and results of operations.

Our profitability depends significantly on economic conditions in the states within which we do business.

Our success depends on the general economic conditions of the local markets in which we operate, particularly Wisconsin, Illinois, and Minnesota. Local economic conditions have a significant impact on the demand for our products and services, as well as the ability of our customers to repay loans, on the value of the collateral securing loans, and the stability of our deposit funding sources. A significant decline in general local economic conditions caused by inflation, recession, unemployment, changes in securities markets, changes in housing market prices, or other factors could have a material adverse effect on our financial condition and results of operations.

The earnings of financial services companies are significantly affected by general business and economic conditions.

Our operations and profitability are impacted by general business and economic conditions in the United States and abroad. These conditions include short-term and long-term interest rates, inflation, money supply, political issues, ramifications of conflicts including the Russia-Ukraine conflict, Israeli-Palestinian conflict and other conflicts and government turmoil in the

Middle East, Europe and Latin America, legislative and regulatory changes, fluctuations in both debt and equity capital markets, broad trends in industry and finance, the strength of the United States economy, and uncertainty in financial markets globally, all of which are beyond our control. A deterioration in economic conditions, including those arising from government shutdowns, defaults, anticipated defaults or rating agency downgrades of sovereign debt (including debt of the U.S.), or increases in unemployment, could result in an increase in loan delinquencies and NPAs, decreases in loan collateral values, and a decrease in demand for our products and services, among other things, any of which could have a material adverse impact on our financial condition and results of operations.

New lines of business or new products and services may subject us to additional risk.

From time to time, we may implement new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved, and price and profitability targets may not prove feasible. External factors, such as competitive alternatives and shifting market preferences, may impact the successful implementation of a new line of business and/or a new product or service. Furthermore, strategic planning remains important as we adopt innovative products, services, and processes in response to the evolving demands for financial services and the entrance of new competitors, such as out-of-market banks and financial technology firms. Any new line of business and/or new product or service could have a significant impact on the effectiveness of our system of internal controls, so we must responsibly innovate in a manner that is consistent with sound risk management and is aligned with the Bank's overall business strategies. Failure to successfully manage these risks in the development and implementation of new lines of business and/or new products or services could have a material adverse effect on our business, results of operations and financial condition.

Failure to keep pace with technological change could adversely affect our business.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services, including, for example, the growing use of AI, machine learning and automated decision making, as well as blockchain technology to provide alternative high speed payment systems. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

We may be adversely affected by risks associated with potential and completed acquisitions.

As part of our growth strategy, from time to time we evaluate merger and acquisition opportunities and conduct due diligence activities related to possible transactions with other financial institutions and financial services companies, including our proposed acquisition of American National Corporation. As a result, negotiations may take place and future mergers or acquisitions involving cash, debt, or equity securities may occur at any time. We seek merger or acquisition partners that are culturally similar, have experienced management, and possess either significant market presence or have potential for improved profitability through financial management, economies of scale, or expanded services.

Acquiring other banks, businesses, or branches involves potential adverse impact to our financial results and various other risks commonly associated with acquisitions, including, among other things:

- incurring time and expense associated with identifying and evaluating potential acquisitions and negotiating potential transactions, and with integrating acquired businesses, resulting in the diversion of resources from the operation of our existing businesses;
- difficulty in estimating the value of target companies or assets and in evaluating credit, operations, management, and market risks associated with those companies or assets;
- payment of a premium over book and market values that may dilute our tangible book value and earnings per share in the short and long term;

- potential exposure to unknown or contingent liabilities of the target company, including, without limitation, liabilities for litigation, regulatory and compliance issues;
- exposure to potential asset quality issues of the target company;
- there may be volatility in reported income as goodwill impairment losses could occur irregularly and in varying amounts;
- difficulties, inefficiencies or cost overruns associated with the integration of the operations, personnel, technologies, services, and products of acquired companies with ours;
- inability to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits;
- potential disruption to our business;
- the possible loss of key employees and customers of the target company; and
- potential changes in banking or tax laws or regulations that may affect the target company.

Acquisitions involve operational risks and uncertainties, and acquired companies may have unknown or contingent liabilities, exposure to unexpected asset quality problems that require write-downs or write-offs (as well as restructuring and impairment or other charges), difficulty retaining key employees and customers and other issues that could negatively affect our business. We may not be able to realize any projected cost savings, synergies or other benefits associated with any such acquisition we complete. Acquisitions typically involve the payment of a premium over book and market values and, therefore, some dilution of our tangible book value and net income per common share may occur in connection with any future transaction. Failure to successfully integrate the entities we acquire into our existing operations could increase our operating costs significantly and have a material adverse effect on our business, financial condition, and results of operations.

We face significant competition from other financial services institutions, some of which may have greater financial resources than we do, when considering acquisition opportunities. Accordingly, attractive opportunities may not be available to us and there can be no assurance that we will be successful in identifying or completing future acquisitions.

Acquisitions may be delayed, impeded, or prohibited due to regulatory issues.

Acquisitions by the Corporation, particularly those of financial institutions such as our proposed acquisition of American National, are subject to approval by a variety of federal and state regulatory agencies. Regulatory approvals could be delayed, impeded, restrictively conditioned or denied due to existing or new regulatory issues the Corporation has, or may have, with regulatory agencies, including, without limitation, issues related to BSA compliance, CRA issues, fair lending laws, fair housing laws, consumer protection laws, unfair, deceptive, or abusive acts or practices regulations, and other similar laws and regulations. We may fail to pursue, evaluate or complete strategic and competitively significant acquisition opportunities as a result of our inability, or perceived or anticipated inability, to obtain regulatory approvals in a timely manner, under reasonable conditions or at all. The regulatory approvals may contain conditions on the completion of the merger that adversely affect our business following the closing, or which are not anticipated or cannot be met. Difficulties associated with potential acquisitions that may result from these factors could have a material adverse impact on our business, and, in turn, our financial condition and results of operations.

The standards by which bank and financial institution acquisitions will be evaluated may be subject to change. In 2024, the FDIC, the OCC and the DOJ announced changes to their bank merger review processes but, in May 2025, both the OCC and FDIC rescinded their 2024 policy statements, reinstating the guidance that was in effect prior to 2024. The DOJ withdrew from the 1995 Bank Merger Guidelines and announced that it would consider bank mergers under its 2023 Merger Guidelines, which includes a brief bank merger addendum.

Any enhanced regulatory scrutiny of bank mergers and acquisitions and revision of the framework for merger application review may adversely affect the marketplace for such transactions, could result in our acquisitions in future periods being delayed, impeded or restricted in certain respects and result in new rules that possibly limit the size of financial institutions we may be able to acquire in the future and alter the terms for such transactions.

We may not be able to successfully integrate American National or to realize the anticipated benefits of the acquisition.

Upon consummation of the acquisition of American National, we will begin the process of integrating its business with ours. A successful integration will depend substantially on the Corporation's ability to consolidate operations, corporate cultures,

systems and procedures and to eliminate redundancies and costs. We may not be able to combine our business with the business of American National without encountering difficulties that could adversely affect our ability to maintain relationships with existing clients, customers, depositors and employees, such as:

- the loss of key employees;
- the disruption of operations and business;
- inability to maintain and increase competitive presence;
- loan and deposit attrition, customer loss and revenue loss;
- possible inconsistencies in standards, control procedures and policies;
- additional costs or unexpected problems with operations, personnel, technology and credit;
- inconsistencies in standards, controls, procedures and policies; and/or
- problems with the assimilation of new operations, system, sites or personnel, which could divert resources from regular banking operations.

Any disruption to the businesses could cause customers to remove their accounts and move their business to a competing financial institution. Integration efforts between the two companies may also divert management attention and resources. Additionally, general market and economic conditions or governmental actions affecting the financial industry generally may inhibit our successful integration of American National.

Further, we entered into the merger agreement to acquire American National with the expectation that the acquisition will result in various benefits including, among other things, benefits relating to enhanced revenues, a strengthened market position for the combined company, cross selling opportunities, technological efficiencies, cost savings and operating efficiencies. Achieving the anticipated benefits of the transactions contemplated by the merger agreement is subject to a number of uncertainties, including whether we integrate American National in an efficient, effective and timely manner, and general competitive factors in the marketplace. Failure to achieve these anticipated benefits on the anticipated timeframe, or at all, could result in a reduction in the price of our common stock as well as in increased costs, decreases in the amount of expected revenues and diversion of management's time and energy and could materially and adversely affect our business, financial condition and operating results. Additionally, upon consummation of the transactions contemplated by the merger agreement, we will make fair value estimates of certain assets and liabilities in recording the acquisition. Actual values of these assets and liabilities could differ from our estimates, which could result in our not achieving the anticipated benefits of the transaction. Finally, any cost savings that are realized may be offset by losses in revenues or other charges to earnings.

Legal, Regulatory, Compliance and Reputational Risks

We are subject to extensive government regulation and supervision.

We are subject to extensive federal and applicable state regulation and supervision, primarily through the Bank and certain nonbank subsidiaries. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds, and the banking system as a whole, not shareholders. These regulations affect our lending practices, capital structure, investment practices, dividend policy, and growth, among other things. Congress and federal regulatory agencies continually review banking laws, regulations, and policies for possible changes, and changes are expected to continue under the current Administration. Changes to statutes, regulations, or regulatory policies, including changes in interpretation or implementation of statutes, regulations, or policies, could affect us in substantial and unpredictable ways. Such changes could subject us to additional costs, limit the types of financial services and products we may offer, and/or increase the ability of nonbanks to offer competing financial services and products, among other things. Failure to comply with laws, regulations, or policies could result in sanctions by regulatory agencies, civil money penalties, and/or reputation damage, which could have a material adverse effect on our business, financial condition, and results of operations. While we have policies and procedures designed to prevent these types of violations, there can be no assurance that such violations will not occur.

The Bank faces risks related to the adoption of future legislation and potential changes in federal regulatory agency leadership, policies, and priorities.

As a result of the 2024 Presidential and Congressional elections, Republicans are currently able to set the policy agenda both legislatively and in the regulatory agencies that have rulemaking and supervisory authority over the financial services industry

generally and the Bank. The Republican Party holds slim majorities in each of the Senate and the House of Representatives. Accordingly, the prospects for the enactment of major banking reform legislation under the current Congress are unclear at this time and could change as a result of the Congressional mid-term elections in 2026.

The turnover of the current Administration has resulted in changes in the leadership and senior staffs of the regulatory agencies and the Treasury Department. These changes have impacted the rulemaking, supervision, examination and enforcement priorities and policies of the agencies, including the reversal of a number of final and proposed rules and policy statements promulgated under the prior Administration. The potential impact of any changes in agency personnel, policies and priorities on the financial services sector, including the Bank, remain uncertain. It is possible the expected changes in regulation do not occur or are reversed by a subsequent Administration.

Non-compliance with the USA PATRIOT Act, BSA or other laws and regulations could result in fines or sanctions.

The USA PATRIOT Act and the BSA require financial institutions to develop risk-based compliance programs designed to prevent financial institutions from being used for money laundering, the funding of terrorist activities or other illicit finance activities. If such activities are detected, financial institutions are obligated to file suspicious activity reports with FinCEN. The BSA and its implementing regulations require covered financial institutions to establish procedures for identifying and verifying the identity of customers seeking to open new accounts. Failure to comply with the BSA and its implementing regulations could result in fines or sanctions. An increasing number of banking institutions have received large fines for non-compliance with the BSA and its implementing regulations. Although we have developed policies and procedures designed to assist in compliance with these laws and regulations, no assurance can be given that these policies and procedures will be effective in preventing violations of these laws and regulations.

The failures of several larger banks in 2023 triggered volatility in the banking sector and resulted in agency rulemaking activities and changes in agency policies and priorities that have subjected midsize and larger financial institutions, including the Corporation and the Bank, to enhanced government regulation and supervision.

After the significant bank failures that occurred in 2023, the federal banking agencies enhanced their scrutiny of the banks' risk management practices, including liquidity risk management. The agencies concluded that a significant contributing factor to the failures of such institutions was the concentration of uninsured deposits, coupled with inadequate prudential regulation and supervision of regional banking organizations, poor management and inadequate risk management practices.

Continued regulatory concern over possible future bank failures may lead to further governmental initiatives intended to prevent future bank failures and stem significant deposit outflows from the banking sector, including (i) legislation aimed at preventing similar future bank runs and failures and stabilizing confidence in the banking sector over the long term, (ii) agency rulemaking to modify and enhance relevant regulatory requirements, specifically with respect to liquidity risk management, deposit concentrations, capital adequacy, stress testing and contingency planning, and safe and sound banking practices, and (iii) enhancement of the agencies' supervision and examination policies and priorities. The prospects and timing of these regulatory changes under the current Administration and Congress are unclear. See Capital Requirements section under Part I, Item 1, Business — Supervision and Regulation for additional discussion of this topic.

Changes in requirements relating to the standard of conduct for broker-dealers under applicable federal and state law may adversely affect our business.

The SEC's Regulation Best Interest establishes a new standard of conduct for a broker-dealer to act in the best interest of a retail customer when making a recommendation of any securities transaction or investment strategy involving securities to such customer. The regulation required us to review and modify our compliance activities, including our policies, procedures, and controls, which caused us to incur additional costs. State laws that impose a fiduciary duty may require monitoring, as well as require that we undertake additional compliance measures. The Bank's insurance agency subsidiary is subject to regulation and supervision in the various states in which it operates. The administration by the SEC of Regulation Best Interest, as well as any new state laws that impose a fiduciary duty, may negatively impact our results of operations, as well as increase costs associated with legal, compliance, operations, and information technology.

The CFPB has reshaped the consumer financial laws through rulemaking and enforcement of the prohibitions against unfair, deceptive and abusive business practices. Compliance with such initiatives may impact the business operations of depository institutions offering consumer financial products or services, including the Bank.

The CFPB has broad rulemaking authority to administer and carry out federal consumer financial protection laws. In previous years, the CFPB has initiated enforcement actions against a variety of bank and non-bank market participants with respect to a

number of consumer financial products and services that have resulted in those participants expending significant time, money and resources to adjust to the initiatives being pursued by the CFPB.

Past CFPB enforcement actions may serve as precedent for how the CFPB interprets and enforces consumer protection laws, including practices or acts that are deemed to be unfair, deceptive or abusive, with respect to all supervised institutions, which may result in the imposition of higher standards of compliance with such laws. With the change in Administration, there have been, and likely will continue to be, changes in the funding, leadership and staff of the CFPB. This turnover has led to changes in agency policies, tactics and interpretations. The current Administration and Congress have sought, and may continue to seek, to limit the scope and reach of the CFPB's authority. The extent and timing of any such changes and any resulting impact on our business and financial results cannot be predicted at this time. It is also unclear whether these changes will be reversed, either by the courts or by a later Administration.

The Bank is periodically examined for mortgage-related issues, including mortgage loan and default services, fair lending, and mortgage banking.

Federal and state banking agencies closely examine the mortgage and mortgage servicing activities of depository financial institutions. Should any of these regulators have serious concerns with respect to our mortgage or mortgage servicing activities in this regard, the regulators' response to such concerns could result in material adverse effects on our growth strategy and profitability.

We may experience unanticipated losses as a result of residential mortgage loan repurchase or reimbursement obligations under agreements with secondary market purchasers.

We may be required to repurchase residential mortgage loans, or to reimburse the purchaser for losses with respect to residential mortgage loans, which have been sold to secondary market purchasers in the event there are breaches of certain representations and warranties contained within the sales agreements, such as representations and warranties related to credit information, loan documentation, collateral and insurability. Consequently, we are exposed to credit risk, and potentially funding risk, associated with sold loans. As a result, we have established reserves in our consolidated financial statements for potential losses related to the residential mortgage loans we have sold. The adequacy of the reserves and the ultimate amount of losses incurred will depend on, among other things, the actual future mortgage loan performance, the actual level of future repurchase and reimbursement requests, the actual success rate of claimants, actual recoveries on the collateral and macroeconomic conditions. Due to uncertainties relating to these factors, there can be no assurance that the reserves we establish will be adequate or that the total amount of losses incurred will not have a material adverse effect on our financial condition or results of operations.

Fee revenues from overdraft protection programs constitute a significant portion of our noninterest income and may become subject to increased supervisory scrutiny.

Revenues derived from transaction fees associated with overdraft protection programs offered to our customers represent a significant portion of our noninterest income. In 2025, the Corporation collected approximately \$16.1 million in overdraft transaction fees. Members of Congress and previous leadership of the CFPB and OCC have expressed a heightened interest in bank overdraft protection programs.

In 2023 and 2024, the CFPB brought enforcement actions against a number of financial institutions for overdraft practices that the CFPB alleged to be unlawful and ordered each of these institutions to pay a substantial civil money penalty in addition to customer restitution. The CFPB found that these institutions engaged in unlawful overdraft practices by, among other things, systematically and repeatedly charging fees to customers with insufficient funds in their accounts, imposing overdraft fees without adequate disclosures, charging overdraft fees without proper consent, and misleading customers about the terms and costs of overdraft coverage. The CFPB under the prior Administration published guidance and engaged in rulemaking that imposed limitations on overdraft fees and NSF fees, which were rescinded or repealed in 2025.

In response to this congressional and regulatory scrutiny, and in response to supervision and enforcement of overdraft protection practices, certain banking organizations have modified their overdraft protection programs, including by discontinuing the imposition of overdraft transaction fees. In 2022, the Corporation eliminated NSF fees, overdraft protection transfer fees, and continuous overdraft fees and reduced the daily limit of overdraft fee occurrences from four to two. We may further modify our overdraft program and practices in response to competitive pressures, supervisory guidance and observable trends from public enforcement actions.

We are subject to examinations and challenges by tax authorities.

We are subject to federal and applicable state income tax regulations. Income tax regulations are often complex and require interpretation. Changes in income tax regulations could negatively impact our results of operations. In the normal course of business, we are routinely subject to examinations and challenges from federal and applicable state tax authorities regarding the amount of taxes due in connection with investments we have made and the businesses in which we have engaged. Recently, federal and state taxing authorities have become increasingly aggressive in challenging tax positions taken by financial institutions. These tax positions may relate to tax compliance, sales and use, franchise, gross receipts, payroll, property and income tax issues, including tax base, apportionment and tax credit planning. The challenges made by tax authorities may result in adjustments to the timing or amount of taxable income or deductions or the allocation of income among tax jurisdictions. If any such challenges are made and are not resolved in our favor, they could have a material adverse effect on our financial condition and results of operations.

We are subject to claims and litigation pertaining to fiduciary responsibility.

From time to time, customers make claims and take legal action pertaining to the performance of our fiduciary responsibilities. Whether customer claims and legal action related to the performance of our fiduciary responsibilities are founded or unfounded, if such claims and legal actions are not resolved in a manner favorable to us, they may result in significant financial liability and/or adversely affect the market perception of us and our products and services, as well as impact customer demand for those products and services. Any financial liability or reputation damage could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

We may be a defendant in a variety of litigation and other actions, which may have a material adverse effect on our financial condition and results of operations.

We may be involved from time to time in a variety of litigation arising out of our business. Our insurance may not cover all claims that may be asserted against us, and any claims asserted against us, regardless of merit or eventual outcome, may harm our reputation. Should the ultimate judgments or settlements in any litigation exceed our insurance coverage, they could have a material adverse effect on our financial condition and results of operations for any period. We may not be able to obtain appropriate types or levels of insurance in the future, nor may we be able to obtain adequate replacement policies with acceptable terms, if at all.

Negative publicity could damage our reputation.

Reputation risk, or the risk to our earnings and capital from negative public opinion, is inherent in our business. Negative public opinion could adversely affect our ability to keep and attract customers and expose us to adverse legal and regulatory consequences. Negative public opinion could result from our actual or alleged conduct in any number of activities, including lending or foreclosure practices, corporate governance, regulatory compliance, mergers and acquisitions, and disclosure, sharing or inadequate protection of customer information, and from actions taken by government regulators and community organizations in response to that conduct. Because we conduct most of our business under the "Associated Bank" brand, negative public opinion about one business could affect our other businesses.

The speed with which information spreads through news, social media and other sources, including on the internet, means that negative information about the Corporation can rapidly have a broadly adverse impact on its reputation. This is true whether or not the information is accurate. Once information has gone viral, it can be difficult to counter it effectively, either by correcting inaccuracies or communicating remedial steps taken for actual issues. The potential impact of negative information going viral and the ease with which customers transact means that material reputational harm can result from a single discrete or isolated incident.

Ethics or conflict of interest issues could damage our reputation.

We have established a Code of Business Conduct and Ethics and Related Party Transaction Policies and Procedures to address the ethical conduct of business and to avoid potential conflicts of interest. Any system of controls, however well-designed and operated, is based, in part, on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of our related controls and procedures or failure to comply with the established Code of Business Conduct and Ethics and Related Party Transaction Policies and Procedures could have a material adverse effect on our reputation, business, results of operations, and/or financial condition.

Risks Related to an Investment in Our Securities

The price of our securities can be volatile.

Price volatility may make it more difficult for you to sell your securities when you want and at prices you find attractive. Our securities prices can fluctuate widely in response to a variety of factors including, among other things:

- actual or anticipated variations in quarterly results of operations or financial condition;
- operating results and stock price performance of other companies that investors deem comparable to us;
- news reports relating to trends, concerns, and other issues in the financial services industry;
- perceptions in the marketplace regarding us and/or our competitors;
- new technology used or services offered by competitors;
- significant acquisitions or business combinations, strategic partnerships, joint ventures, or capital commitments by or involving us or our competitors;
- failure to integrate acquisitions or realize anticipated benefits from acquisitions;
- changes in government regulations;
- changes in international trade policy and any resulting disputes or reprisals;
- geopolitical conditions, such as acts or threats of terrorism or military conflicts; and
- recommendations by securities analysts.

General market fluctuations, industry factors, and general economic and political conditions and events, such as economic slowdowns or recessions, interest rate changes, or credit loss trends, could cause our securities prices to decrease regardless of our operating results.

There may be future sales or other dilution of our equity, which may adversely affect the market price of our securities.

We are not restricted from issuing additional securities, including preferred stock, common stock and securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. The issuance of additional shares of common stock or the issuance of convertible securities would dilute the ownership interest of our existing common shareholders. The market price of our common stock could decline as a result of an equity offering, as well as other sales of a large block of shares of our common stock or similar securities in the market after an equity offering, or the perception that such sales could occur. Both we and our regulators perform a variety of analyses of our assets, including the preparation of stress case scenarios, and as a result of those assessments we could determine, or our regulators could require us, to raise additional capital.

We may reduce or eliminate dividends on our common stock.

Although we have historically paid a quarterly cash dividend to the holders of our common stock, holders of our common stock are not entitled to receive dividends. Downturns in the domestic and global economies could cause our board of directors to consider, among other things, the elimination of dividends paid on our common stock. This could adversely affect the market price of our common stock. Furthermore, as a bank holding company, our ability to pay dividends is subject to the guidelines of the Federal Reserve regarding capital adequacy and dividends. Dividends may be limited as a result of safety and soundness considerations.

Common stock is equity and is subordinate to our existing and future indebtedness and preferred stock and effectively subordinated to all the indebtedness and other non-common equity claims against our subsidiaries.

Shares of the common stock are equity interests in us and do not constitute indebtedness. As such, shares of the common stock will rank junior to all of our indebtedness and to other non-equity claims against us and our assets available to satisfy claims against us, including our liquidation. Holders of our common stock are subject to prior dividend and liquidation rights of holders of our outstanding preferred stock. Our board of directors is authorized to issue additional classes or series of preferred

stock without any action on the part of the holders of our common stock, and we are permitted to incur additional debt. Upon liquidation, lenders and holders of our debt securities and preferred stock would receive distributions of our available assets prior to holders of our common stock. Furthermore, our right to participate in a distribution of assets upon any of our subsidiaries' liquidation or reorganization is subject to the prior claims of that subsidiary's creditors, including holders of any preferred stock of that subsidiary.

Our articles of incorporation, bylaws, and certain banking laws may have an anti-takeover effect.

Provisions of our articles of incorporation and bylaws, and federal banking laws, including regulatory approval requirements, could make it more difficult for a third party to acquire us, even if doing so would be perceived to be beneficial to our shareholders. The combination of these provisions may prohibit a non-negotiated merger or other business combination, which, in turn, could adversely affect the market price of our common stock.

An investment in our common stock is not an insured deposit.

Our common stock is not a bank deposit and, therefore, is not insured against loss by the FDIC, any other DIF, or by any other public or private entity. An investment in our common stock is inherently risky for the reasons described in this "Risk Factors" section and elsewhere in this report and is subject to the same market forces that affect the price of common stock in any company. As a result, if you acquire our common stock, you may lose some or all of your investment.

General Risk Factors

Changes in our accounting policies or in accounting standards could materially affect how we report our financial results.

Our accounting policies are fundamental to understanding our financial results and condition. Some of these policies require the use of estimates and assumptions that may affect the value of our assets or liabilities and financial results. Some of our accounting policies are critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. If such estimates or assumptions underlying our financial statements are incorrect, we may experience material losses.

From time to time, the FASB and the SEC change the financial accounting and reporting standards or the interpretation of those standards that govern the preparation of our external financial statements. These changes are beyond our control, can be hard to predict and could materially impact how we report our results of operations and financial condition. We could be required to apply a new or revised standard retroactively, resulting in our restating prior period financial statements in material amounts.

Our internal controls may be ineffective.

Management regularly reviews and updates our internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well-designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the controls are met. Any failure or circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our business, results of operations, and financial condition.

We may not be able to attract and retain skilled people.

Our success depends, in large part, on our ability to attract and retain skilled people. Competition for the best people in most activities engaged in by us can be intense, and we may not be able to hire sufficiently skilled people or to retain them. The unexpected loss of services of one or more of our key personnel could have a material adverse impact on our business because of their skills, knowledge of our markets, years of industry experience, and the difficulty of promptly finding qualified replacement personnel.

Loss of key colleagues may disrupt relationships with certain customers.

Our business is primarily relationship-driven in that many of our key colleagues have extensive customer relationships. Loss of a key colleague with such customer relationships may lead to the loss of business if the customers were to follow that colleague to a competitor or otherwise choose to transition to another financial services provider. While we believe our relationship with

our key personnel is good, we cannot guarantee that all of our key personnel will remain with our organization. Loss of such key personnel could result in the loss of some of our customers.

ITEM 1C.	Cybersecurity
----------	---------------

Risk Management and Strategy

The Corporation recognizes the security of our banking operations is critical to protecting our customers, maintaining our reputation and preserving the value of the Corporation. The Corporation's Information Security Program establishes policies and procedures designed to measure the effectiveness and efficiency of information security controls related to both design and operations. The Corporation leverages the following guidelines and frameworks to develop and maintain the Information Security Program: FFIEC Information Security IT Examination Handbook, FFIEC Business Continuity Planning Handbook, Center for Internet Security Critical Security Controls, National Institute of Standards and Technology Cybersecurity Framework, National Institute of Standards and Technology Special Publication 800 Series, ISO-27000 Standard and GLBA 501(b). This does not imply that we meet any particular technical standards, specifications, or requirements, only that we use these guidelines and frameworks as a guide to help us identify, assess, and manage cybersecurity threats and incidents relevant to our business. In general, the Corporation seeks to address cybersecurity risks through an enterprise-wide, cross-functional approach in an effort to secure the confidentiality, security and availability of the information that the Corporation collects, shares, uses, stores and otherwise processes.

Among other things, the Information Security Program is focused on the following key areas:

- **Security Operation and Governance:** As discussed in more detail under the heading "Governance," senior management carries out this mandate through the Operational Risk and Enterprise Risk Management Committees. To maintain alignment and appropriate insight regarding information security activities, an Information Security Steering Committee provides general program insight.
- **Collaborative Approach:** The Corporation has implemented an enterprise-wide cross-functional approach to identifying, assessing and managing cybersecurity threats and incidents, while also implementing controls and procedures designed to escalate certain cybersecurity incidents so that decisions regarding the public disclosure and reporting of such incidents can be made by management in a timely manner.
- **Security Competencies:** The Information Security organization oversees a program of security competencies and tools designed to protect the confidentiality, integrity, and availability of the information that the Corporation collects, shares, uses, stores and otherwise processes. These assets represent a blend of various management (e.g., policies), operational (e.g., standards and processes), and technical (e.g., tools and configurations) controls.
- **Cyber Defense Center and the Incident Response Plan:** The Corporation has a Security Operations Center, known as the "Cyber Defense Center," which provides continual security monitoring 24 hours per day, seven days per week, where resources deliver threat analysis, vulnerability management, intrusion detection, intrusion hunting and red team exercises. The Corporation's Incident Response Plan helps reduce the risks related to cybersecurity threats and incidents by providing guidelines on responding to cybersecurity threats and incidents by focusing on a roadmap for coordinating personnel, policies, and procedures.
- **Third-Party Risk Management:** Management of the Corporation's third parties, including vendors and service providers, is conducted through a risk-based approach and the level of due diligence is driven from risk factors established by Corporate Risk Management.
- **Security Awareness and Education:** The Corporation provides annual, mandatory training for personnel regarding security awareness in an effort to equip the Corporation's personnel with the understanding of how to properly use and protect the computing resources entrusted to them, and to communicate the Corporation's information security policies, standards, processes and practices.

The Corporation leverages regular assessments designed to identify current and potential threats and vulnerabilities within the Corporation's environment, using vulnerability scanning tools, penetration testing, system management tools, and process and procedural reviews. The Corporation conducts a variety of assessments throughout the year, both internally and through third parties.

We have not identified risks from known cybersecurity threats, including as a result of any prior cybersecurity incidents, that have materially affected us, including our operations, business strategy, results of operations, or financial condition. We face risks from cybersecurity threats and incidents that, if realized, are reasonably likely to materially affect us, including our operations, business strategy, results of operations, or financial condition. See Item 1A, Risk Factors — Operational Risks for additional disclosures with regard to the possible impact of future cybersecurity threats or incidents.

Governance

The Board of Directors, through the ERC, provides direction and oversight of the enterprise-wide risk management framework of the Corporation, and cybersecurity represents a component of the Corporation's overall approach to enterprise-wide risk management. The ERC reviews and approves the Information Security Policy. The Board of Directors receives regular presentations which include updates on cybersecurity risks, including the threat environment, evolving standards, projects and initiatives, vulnerability assessments, third-party and independent reviews, technological trends and information security considerations arising with respect to the Corporation's peers and third parties. The Board of Directors also receives information regarding any cybersecurity threat or incident that meets established reporting thresholds, as well as ongoing updates regarding any such threat or incident until it has been addressed. On an annual basis, the full Board of Directors discusses the Corporation's approach to cybersecurity risk management with the Corporation's CISO.

The CISO, under the guidance of our CIO, CRO, Chief Executive Officer and General Counsel, works collaboratively across the Corporation to implement an information security program. To facilitate the success of the Corporation's cybersecurity risk management program, multidisciplinary teams throughout the Corporation are deployed to address cybersecurity threats and to respond to cybersecurity incidents. Through ongoing communications with these teams, the CISO and the 2nd Line Information Security Risk Management team monitor the prevention, detection, mitigation and remediation of cybersecurity threats and incidents in real time, and report such threats and incidents to the Corporate Crisis Management Team and ultimately the ERC when appropriate.

The CISO has served in various roles in Information Security for over 30 years, including Associated Bank for 10 years. The CISO holds an undergraduate degree in Information Security and has attained the Certified Information Systems Security Professional certification. The CIO holds an undergraduate degree in business management, with a minor in international business, and is currently pursuing a master's degree in finance and has served in various roles in information technology for over 40 years, including serving as either the Chief Technology Officer or CIO of four public companies. The CRO has over 30 years of banking experience, holds a degree in computer science, and earned the CERT Certificate in Cybersecurity Oversight from the National Association of Corporate Directors. The Corporation's Chief Executive Officer and General Counsel each hold degrees in their respective fields, and each has extensive experience managing risks at the Corporation and similar financial institutions, including risks arising from cybersecurity threats.

ITEM 2. Properties

The Corporation operated 2.3 million square feet of space spread across 211 facilities at December 31, 2025. Our corporate headquarters is located at 433 Main Street in Green Bay, Wisconsin and is approximately 118,000 square feet. The Corporation owns two dedicated operations centers, located in Green Bay and Stevens Point, Wisconsin, with approximately 91,000 and 96,000 square feet, respectively. The Corporation also owns a 28 story, 374,000 square foot office tower located at 111 E. Kilbourn Avenue in Milwaukee, Wisconsin, and an adjoining 37,000 square foot building at 815 Water Street, which serves as the headquarters for Associated Trust Company (both buildings are now part of the "Associated Bank River Center"). Associated Bank N.A. is headquartered in a 61,000 square foot building at 200 North Adams Street in Green Bay, Wisconsin. Based on gross square feet, at December 31, 2025, Associated Bank owned 91% of our total property portfolio.

At December 31, 2025, Associated Bank operated 184 banking branches serving over 100 different communities throughout Wisconsin, Illinois, Minnesota and Missouri. Most of the banking locations are freestanding buildings owned by us, with a drive thru and a parking lot; a smaller subset resides in supermarkets and office towers, which are generally leased. Associated Bank also operated loan production offices in Indiana, Kansas, Michigan, New York, Ohio and Texas.

ITEM 3. Legal Proceedings

The information required by this item is set forth in Part II, Item 8, Financial Statements and Supplementary Data, under Note 15 Commitments, Off-Balance Sheet Arrangements, and Legal Proceedings.

ITEM 4. Mine Safety Disclosures

Not applicable.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

The following is a list of names and ages of executive officers of Associated indicating all positions and offices held by each such person and each such person's principal occupation(s) or employment during the past five years. Officers are appointed annually by the Board of Directors at the meeting of directors immediately following the annual meeting of shareholders. There are no family relationships among these officers, nor any arrangement or understanding between any officer and any other person pursuant to which the officer was selected. No person other than those listed below has been chosen to become an executive officer of Associated. The information presented below is as of February 12, 2026.

Andrew J. Harmening - Age: 56

Andrew J. Harmening has been President, Chief Executive Officer of Associated and Associated Bank and member of the Board of Directors since April 2021. Prior to joining Associated, he served as senior executive vice president, consumer and business banking director for Huntington Bank from 2017 to 2021. Mr. Harmening also held several key consumer, small business and commercial banking positions at Bank of The West from 2005 to 2017.

Patrick E. Ahern - Age: 59

Patrick E. Ahern has been Executive Vice President and Chief Credit Officer of Associated and Associated Bank since February 2020 and was named Chicago Market President in October 2022. He served as Deputy Chief Credit Officer from October 2019 to February 2020. Mr. Ahern joined Associated as a Senior Vice President in 2010 to manage the CRE portfolio underwriting and administrative teams, before moving into the role Corporate Senior Credit Officer in 2018. He has more than 30 years of experience in CRE and corporate credit, including experience with LaSalle Bank and Bank of America.

Matthew R. Braeger - Age: 51

Matthew R. Braeger has been Executive Vice President and Chief Audit Executive of Associated and Associated Bank since February 2018. He served as Deputy Chief Audit Executive from October 2017 to February 2018. He joined Associated in April 2013 as Senior Vice President, Business Support Audit Director. Previously, he held audit management positions with Fiserv, Inc. and public accounting audit roles with Ernst & Young, LLP. Mr. Braeger has more than 25 years of auditing experience, primarily in banking technology and financial services.

Bryan J. Carson - Age: 55

Bryan J. Carson has been Executive Vice President, Chief Product and Marketing Officer of Associated and Associated Bank since July 2022. He served as Executive Vice President of Deposit Products, Customer Segmentation, and Branch & ATM Distribution at Huntington Bank from 2018 to 2022. Prior to that, he served as Chief Marketing Officer from 2015 to 2018 and Senior Vice President of Deposit Products & Pricing at Huntington Bank 2010 to 2015.

Dennis M. DeLoye - Age: 62

Dennis M. DeLoye has been Executive Vice President, Head of Community Markets and Regional President Northeast Wisconsin of Associated and Associated Bank since April 2022. Mr. DeLoye previously served as Executive Vice President, Deputy Head of Community Markets and Regional President Northeast Wisconsin from November 2021 to April 2022. DeLoye joined Associated in 2016, serving as Community Market President for the Central and Northern Wisconsin markets until November 2021.

Randall J. Erickson - Age: 66

Randall J. Erickson has been Executive Vice President, General Counsel and Corporate Secretary of Associated and Associated Bank since April 2012 and was Chief Risk Officer from May 2016 to February 2018. Prior to joining Associated, he served as senior vice president, chief administrative officer and general counsel of Milwaukee-based bank holding company Marshall & Ilsley Corporation from 2002 until it was acquired by BMO Financial in 2011. Upon leaving M&I, he became a member of Milwaukee law firm Godfrey & Kahn, S.C.'s securities practice group. He had been a partner at Godfrey & Kahn, S.C. from 1990 to 2002 prior to joining M&I as its general counsel. Mr. Erickson served as a director of Renaissance Learning, Inc., a publicly-held educational software company, from 2009 until it was acquired by Permira Funds in 2011.

Jayne C. Hladio - Age: 58

Jayne C. Hladio has been Executive Vice President, President of Private Wealth of Associated and Associated Bank since October 2023. Prior to joining Associated, she served as President of Midland Wealth Management and Midland Trust Co. for U.S. markets from May 2022 to September 2023. Prior to that, she served as Senior Vice President, National Wealth

Management Executive from June 2009 to June 2021 with U.S. Bank; Senior Vice President, Head of Consumer Banking Regional Executive Charter One (Citizens) Royal Bank of Scotland from October 2005 to January 2009; and Senior Vice President, Strategic Growth Executive, Retail / Affluent Wealth and Denovo Delivery at Fifth Third Bank September 1994 to October 2005.

Nicole M. Kitowski - Age: 50

Nicole M. Kitowski has been Executive Vice President and Chief Risk Officer of Associated and Associated Bank since February 2018. She joined Associated in 1992 and has held leadership roles in Consumer Banking, Operations and Technology, and Corporate Risk, including Deputy Chief Risk Officer from March 2016 to February 2018 and Corporate BSA, AML, OFAC Officer from June 2014 to March 2016.

Julio Manso - Age: 58

Julio Manso has been Executive Vice President, Chief Human Resources Officer of Associated and Associated Bank since June 2, 2025. Prior to joining Associated, he served as Executive Vice President of Human Resources, Consumer Bank, at KeyBank, N.A. from May 2022 to June 2025. He also served as Executive Vice President, Human Resources – Technology, Operations, Servicing and Digital from November 2020 to April 2023. Prior to that, he served as Managing Director, Human Resources, Head of Talent at Chase Consumer and Community Bank from April 2019 to October 2020.

Derek S. Meyer - Age: 59

Derek S. Meyer has been Executive Vice President, Chief Financial Officer of Associated and Associated Bank since August 1, 2022. Prior to joining Associated, Mr. Meyer served as the Executive Vice President, Corporate Treasurer of Huntington Bank from 2019 to June 2022. Mr. Meyer also served as Executive Vice President, Financial Planning & Analysis Director of Huntington Bank from February 2015 to 2019. During his 22 years at Huntington, he held various senior leadership roles and was responsible for crucial finance functions, including treasury, financial planning and analysis, stress testing, mergers and acquisition due diligence, regulatory matters and process and controls implementation.

Phillip Trier - Age: 47

Phillip Trier has been Executive Vice President, Head of Corporate and Commercial Banking of Associated and Associated Bank since November 2024. He joined Associated in December 2023 as Executive Vice President, Commercial Banking Group Leader. Prior to joining Associated, he spent 23 years at U.S. Bank where he held various positions of increasing responsibility. Most recently he served as the Midwest region executive where he was responsible for leading commercial banking across 11 states from April 2022 to November 2023. From 2017 to March 2022 he served as SVP, Commercial Banking Region Leader and Twin Cities Market President. In addition, he led several national industry verticals including title & escrow, HOA property management, alternative investment and fintech.

John A. Utz - Age: 57

John A. Utz has been Executive Vice President, Head of Specialized Industries and Milwaukee Market President of Associated and Associated Bank since December 2025. Previously, Mr. Utz served as Executive Vice President, Head of Specialized Industries and Capital Markets and Milwaukee Market President from November 2024 to December 2025, Head of Corporate Banking from September 2015 to November 2024, and was Head of Wealth Management from April 2020 to July 2021. He joined Associated in March 2010 with upwards of 20 years of banking experience, having previously served as President of Union Bank's UnionBanCal Equities and head of its Capital Markets division from September 2007 to March 2010, and as head of the National Banking and Asset Management teams from October 2002 to September 2007.

Gregory Warsek - Age: 61

Gregory Warsek has been Executive Vice President, Head of Commercial Real Estate and Facilities of Associated and Associated Bank since March 2025. Previously he served as Executive Vice President, Deputy Head of Commercial Real Estate and Facilities from November 2024 to March 2025. He joined Associated in February 2002 as Senior Vice President and Market Leader in Chicago for Commercial Real Estate. He held multiple leadership roles at Associated from February 2002 to November 2024 including, Executive Vice President, Group Leader, overseeing CRE offices from 2022 to 2024, Senior Vice President, Senior Regional Manager overseeing Chicago, Institutional and REIT teams from 2015 to 2022, and served as Senior Vice President, Regional Manager overseeing Chicago and St. Louis from 2004 to 2015.

Terry L. Williams - Age: 66

Terry L. Williams has been Executive Vice President, Chief Information Officer of Associated and Associated Bank since January 17, 2023. Prior to joining Associated, he served as Chief Information Officer and Chief Technology Officer for Belcan, LLC from 2016 to 2022. Prior to that, he served as Executive Vice President and General Manager Customer-Facing Solutions of Standard Register in 2014 and 2015.

Steven S. Zandpour - Age: 49

Steven S. Zandpour has been Executive Vice President, Head of Consumer and Business Banking at Associated and Associated Bank since July 2025. He previously served as Deputy Head of Consumer and Business Banking from January 2025 to July 2025 and joined Associated in January 2024 as Executive Vice President, Director of Consumer and Business Banking. Before joining Associated, he was Head of Specialty Sales at BMO U.S. from February 2019 to December 2023, leading Business Banking, Mortgage Sales, and Mass Affluent Banking for the U.S. footprint. Prior to that, he served as Regional President, Chicago at BMO U.S. from June 2016 to February 2019.

PART II

ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Information in response to this item is incorporated by reference to the discussion of dividend restrictions under Part I, Item 1, Business - Supervision and Regulation - Holding Company Dividends, and in Note 9 Stockholders' Equity of the notes to consolidated financial statements included under Part II, Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K. The Corporation's common stock is traded on the NYSE under the symbol ASB.

The number of shareholders of record of the Corporation's common stock, \$0.01 par value, as of January 30, 2026, was 5,760. Certain of the Corporation's shares are held in "nominee" or "street" name and the number of beneficial owners of such shares was 42,022.

Payment of future dividends is within the discretion of the Board of Directors and will depend, among other factors, on earnings, capital requirements, and the operating and financial condition of the Corporation. The Board of Directors makes the dividend determination on a quarterly basis.

During the fourth quarter of 2025, the Corporation repurchased \$0.5 million of common stock, all of which were repurchases related to tax withholding on equity compensation, with no open market repurchases during the quarter. The repurchase details are presented in the table below. For a detailed discussion of the common stock and depositary share purchases during 2025 and 2024, see Part II, Item 8, Note 9 Stockholders' Equity of the notes to consolidated financial statements.

Common Stock Purchases

	Total Number of Shares Purchased ^(a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs ^(b)
Period				
October 1, 2025 - October 31, 2025	6,050	\$ 25.42	—	
November 1, 2025 - November 30, 2025	10,873	25.22	—	
December 1, 2025 - December 31, 2025	1,847	26.56	—	
Total	18,770	\$ 25.42	—	1,516,479

(a) During the fourth quarter of 2025, all common shares repurchased were for minimum tax withholding settlements on equity compensation. These purchases do not count against the maximum value of shares remaining available for purchase under the Board of Directors' authorization.

(b) At December 31, 2025, there remained \$39.1 million authorized to be repurchased under the Board of Directors' 2021 \$100 million authorization. The maximum number of shares that may yet be purchased under this authorization is based on the closing share price on December 31, 2025.

Total Shareholder Return Performance Graph

Set forth below is a line graph (and the underlying data points) comparing the yearly percentage change in the cumulative total shareholder return (change in year-end stock price plus reinvested dividends) on the Corporation's common stock with the cumulative total return of the S&P 500 Index, the S&P 400 Regional Banks Sub-Industry Index, and the KBW Nasdaq Regional Banking Total Return Index for the period of five fiscal years commencing on January 1, 2021 and ending December 31, 2025. The S&P 400 Regional Banks Sub-Industry Index is comprised of stocks on the S&P Total Market Index that are classified in the regional banks sub-industry. The KBW Nasdaq Regional Banking Total Return Index is comprised of U.S. companies that do business as regional banks or thrifts. The graph assumes the respective values of the investment in the Corporation's common stock and each index were \$100 on December 31, 2020. Historical stock price performance shown on the graph is not necessarily indicative of the future price performance.

5 Year Trend

	2020	2021	2022	2023	2024	2025
Associated Banc-Corp	\$ 100.0	\$ 137.0	\$ 144.9	\$ 139.6	\$ 161.7	\$ 180.6

The Total Shareholder Return Performance Graph shall not be deemed incorporated by reference by any general statement incorporating by reference this Annual Report on Form 10-K into any filing under the Securities Act or under the Exchange Act, except to the extent the Corporation specifically incorporates this information by reference, and shall not otherwise be deemed filed under such Acts.

ITEM 6. [Reserved]

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion is management's analysis to assist in the understanding and evaluation of the consolidated financial condition and results of operations of the Corporation. It should be read in conjunction with the consolidated financial statements and footnotes and the selected financial data presented elsewhere in this report. Within the tables presented, certain columns and rows may not sum due to the use of rounded numbers for disclosure purposes.

The detailed financial discussion that follows focuses on 2025 results compared to 2024. For a discussion of 2024 results compared to 2023, see the Corporation's [Annual Report on Form 10-K for the year ended December 31, 2024](#).

Overview

The Corporation is a bank holding company headquartered in Wisconsin, providing a broad array of banking and nonbanking products and services to businesses and consumers primarily within our four-state footprint. The Corporation's primary sources of revenue, through the Bank, are net interest income (predominantly from loans and investment securities) and noninterest income (principally fees and other revenue from financial services provided to customers or ancillary services tied to loans and deposits).

Performance Summary

- Average loans of \$30.6 billion for the full year of 2025 increased \$892.7 million, or 3%, from 2024, driven primarily by increases in commercial and business lending and auto finance loans, partially offset by a decrease in residential mortgage lending due to the mortgage portfolio sale announced as part of the balance sheet repositioning in the fourth quarter of 2024.
- Average deposits of \$34.8 billion for the full year of 2025 increased \$1.5 billion, or 4%, from 2024, driven by increases in all deposit types, except money market and brokered CDs.
- Net interest income of \$1.2 billion in 2025 increased \$153.9 million, or 15%, from 2024. Net interest margin of 3.03% in 2025 increased 25 bp from 2.78% in 2024. The increases in net interest income and net interest margin were driven by decreases in interest expense for interest-bearing deposits and the balance sheet repositioning announced in the fourth quarter of 2024 which sold lower yielding residential mortgage loans and investment securities.
- Provision for credit losses was \$54.0 million in 2025, compared to \$85.0 million in 2024, driven by nominal credit movement coupled with general macroeconomic trends.
- Noninterest income of \$286.4 million in 2025 increased \$295.8 million from 2024, primarily driven by nonrecurring losses on the sale of mortgages and investments in 2024 associated with the balance sheet repositioning announced in the fourth quarter of 2024. Additional increases were due to increased capital markets revenue from an elevated level of activity in our syndications, interest rate swaps and foreign currency businesses. The increases were partially offset by the nonrecurring loss recognized related to the settlement of the mortgage loan sale in the first quarter of 2025 as part of the balance sheet repositioning announced in the fourth quarter of 2024.
- Noninterest expense of \$855.6 million in 2025 increased \$37.2 million, or 5%, from 2024, primarily driven by increases in personnel expense reflective of higher variable compensation, which is the result of strong execution against our strategic plan and increased healthcare costs, business development and advertising expense increase due to additional spend on advertising, legal and professional expenses due to increased consultant and IT staff augmentation expenditures, and other noninterest expense primarily due to OREO write downs in 2025. These increases were offset by a decrease in loss on prepayments of FHLB advances due to the nonrecurring fee incurred in 2024 due to the prepayment of long-term FHLB advances.

Table 1 Summary Results of Operations: Trends

(Dollars in thousands, except per share data)	Year Ended December 31,		
	2025	2024	2023

N/M = Not Meaningful

(a) Ratio is based upon basic earnings per common share.

(b) This is a non-GAAP financial measure. See Table 23 Non-GAAP Measures for a reconciliation to GAAP financial measures.

Income Statement Analysis

Net Interest Income

Net interest income is the primary source of the Corporation’s revenue. Net interest income is the difference between interest income on interest-earning assets, such as loans and investment securities, and the interest expense on interest-bearing deposits and other borrowings used to fund interest-earning and other assets or activities. Net interest income is affected by the amount and composition of earning assets and interest-bearing liabilities, as well as the sensitivity of the balance sheet to changes in interest rates, including characteristics such as the fixed or variable nature of the financial instruments, contractual maturities, re-pricing frequencies, loan prepayment behavior, and the use of interest rate derivative financial instruments.

Interest rate spread and net interest margin are utilized to measure and explain changes in net interest income. Interest rate spread is the difference between the yield on earning assets and the rate paid on interest-bearing liabilities that fund those assets. The net interest margin is expressed as the percentage of net interest income to average earning assets. The net interest margin exceeds the interest rate spread because net free funds, principally noninterest-bearing demand deposits and stockholders’ equity, also support earning assets. To compare tax-exempt asset yields to taxable yields, the yield on tax-exempt loans and investment securities is computed on a fully tax-equivalent basis. Net interest income, interest rate spread, and net interest margin are discussed on a fully tax-equivalent basis.

Table 2 provides average daily balances of earning assets and interest-bearing liabilities, the associated interest income and expense, and the corresponding interest rates earned and paid, as well as net interest income, interest rate spread, and net interest margin on a fully tax-equivalent basis for the years ended December 31, 2025, 2024, and 2023. Table 2 presents additional information to facilitate the review and discussion of fully tax-equivalent net interest income, interest rate spread, and net interest margin.

(a) Prior periods have been adjusted to conform with current period presentation.

(b) The yield on tax-exempt loans and securities is computed on a fully tax-equivalent basis using a tax rate of 21%.

(c) Loans held for sale have been included in the average balances.

Notable Contributions to the Change in 2025 Net Interest Income

- Fully tax-equivalent net interest income was up \$155.9 million and net interest income was up \$153.9 million, or 15%, compared to 2024. The average yield on earning assets decreased 16 bp compared to 2024 and the cost of interest-bearing liabilities decreased 53 bp from 2024. The increase in net interest income was driven, in part, by the actions taken by the

Corporation as part of the balance sheet repositioning announced in the fourth quarter of 2024 which sold off lower yielding investment securities and residential mortgages. Additionally, continued organic investment activity in the AFS portfolio during 2025 drove higher average investment balances contributing to interest income expansion. Finally, given that the Corporation is slightly asset sensitive, the Federal Reserve decreasing the federal funds target interest rate by 100 bp in the second half of 2024 and 75 bp in the second half of 2025 caused contraction in the interest income earned on loans; however, this contraction was more than offset by the repricing of deposits downward, in line with market rates, resulting in lower interest expense on interest-bearing deposits. See sections Interest Rate Risk and Quantitative and Qualitative Disclosures about Market Risk for a discussion of interest rate risk and market risk.

- Average earning assets increased \$2.0 billion, or 5% , from 2024. Average loans increased \$892.7 million, or 3%, compared to 2024, driven by increases in commercial and industrial loans, auto loans, and commercial real estate lending, partially offset by a decrease in residential mortgage as a result of our balance sheet repositioning announced in the fourth quarter of 2024. Average investments increased \$1.1 billion, or 13%, compared to 2024, due to organic investment activity.
- Average interest-bearing liabilities increased \$1.8 billion, or 6%, compared to 2024. Average interest-bearing deposits increased \$1.4 billion, or 5%, compared to 2024, driven by increases in most deposit types except brokered CDs and money market which decreased slightly. Average total short and long-term funding increased \$420.3 million, or 14%, from 2024, primarily driven by an increase in FHLB funding, partially offset by a decrease in other short-term funding related to the payoff of BTFP advances in October 2024. Average noninterest-bearing demand deposits increased \$42.8 million, or 1%, compared to 2024.

(a) The change in interest due to both rate and volume has been allocated in proportion to the relationship to the dollar amounts of the change in each.

(b) Prior periods have been adjusted to conform with current period presentation.

(c) The yield on tax-exempt loans and securities is computed on a fully tax-equivalent basis using a tax rate of 21%.

(d) Loans held for sale have been included in the average balances used in the analysis.

Provision for Credit Losses

The provision for credit losses is predominantly a function of the Corporation's reserving methodology and judgments as to other qualitative and quantitative factors used to determine the appropriate level of the ACLL, which focuses on changes in the size and character of the loan portfolio, changes in levels of individually evaluated and other nonaccrual loans, historical losses and delinquencies in each portfolio category, the risk inherent in specific loans, concentrations of loans to specific borrowers or industries, existing economic conditions and economic forecasts, the fair value of underlying collateral, and other factors which could affect potential credit losses. The forecast the Corporation used for December 31, 2025 was the Moody's baseline scenario from November 2025, which was reviewed against the December 2025 baseline scenario with no material updates made, over a two-year reasonable and supportable period with straight-line reversion to historical losses over the second year of the period. See additional discussion under the sections titled Loans, Credit Risk, Nonperforming Assets, and Allowance for Credit Losses on Loans.

(a) In millions. Excludes assets held in brokerage accounts.

Notable Contributions to the Change in 2025 Noninterest Income

- Capital markets increased \$10.0 million from 2024, primarily due to an elevated level of activity in our interest rate swap, syndications, and foreign currency businesses.
- Mortgage banking increased \$3.8 million from 2024, primarily as a result of increased gains on sales of mortgage loans originated for sale and MSR income impacts.
- Loss on mortgage portfolio sale decreased \$123.4 million from 2024 driven by a nonrecurring \$130.4 million loss on sale of mortgages recognized in 2024 following the balance sheet repositioning announced during the fourth quarter of 2024, and an additional \$7.0 million loss that was recognized in 2025 upon completion of the sale.
- Bank and corporate owned life insurance increased \$3.7 million 2024, driven by an increased number of claims.
- Asset gains (losses), net improved \$2.6 million from 2024, driven primarily by deferred compensation valuation adjustments given market conditions.
- Investment securities (losses) gains, net improved \$144.2 million from 2024, driven primarily by a nonrecurring \$148.2 million net loss on a sale of investments associated with the balance sheet repositioning announced during the fourth quarter of 2024.

(a) Average FTEs without overtime

Notable Contributions to the Change in 2025 Noninterest Expense

- Personnel expense increased \$33.8 million from 2024 largely driven by continued investment in our colleagues as we continue to execute on our growth strategy.
- Business development and advertising expense increased \$3.5 million from 2024 primarily due to additional spend on advertising including direct mail and television production.
- Legal and professional expenses increased \$2.3 million from 2024, primarily driven by increased consultant and IT staff augmentation expenses in the current year.
- The decrease in loss on prepayments of FHLB advances was due to the prepayment of \$600.0 million of long-term FHLB advances in the fourth quarter of 2024, for which the Corporation incurred a nonrecurring loss of \$14.2 million.
- Other noninterest expense increased \$8.3 million from 2024 primarily due to OREO write downs in 2025 as compared to a gain on the sale of OREO properties in 2024 and higher donation expenditures in 2025.

Income Taxes

The Corporation recognized income tax expense of \$103.1 million for 2025, compared to income tax expense of \$11.3 million for 2024. The Corporation's effective tax rate was 17.85% for 2025, compared to an effective tax rate of 8.41% for 2024. The increase in income tax expense and higher effective tax rate during 2025 were primarily due to a strategic reallocation of the investment portfolio and the adoption of a legal entity rationalization plan that resulted in the recognition of deferred tax benefits in 2024 and increased net income in 2025.

See Note 1 Summary of Significant Accounting Policies of the notes to consolidated financial statements for the Corporation's income tax accounting policy. Income tax expense recorded on the consolidated statements of income involves the interpretation and application of certain accounting pronouncements and federal and state tax laws and regulations. The Corporation is subject to examination by various taxing authorities. Examination by taxing authorities may impact the amount of tax expense and/or the reserve for uncertainty in income taxes if their interpretations differ from those of management, based on their judgments about information available to them at the time of their examinations. See Note 12 Income Taxes of the notes to consolidated financial statements for more information.

Balance Sheet Analysis

- At December 31, 2025, total assets were \$45.2 billion, up \$2.2 billion, or 5%, from December 31, 2024.
 - Interest bearing deposits in other financial institutions were \$1.1 billion at December 31, 2025, up \$690.5 million, or 152%, from December 31, 2024. Federal funds sold and securities purchased under agreement to resell were \$1.4 million at December 31, 2025, down \$20.6 million, or 94% from December 31, 2024. See Consolidated Statements of Cash Flows for detailed information.
 - AFS investment securities at fair value were \$5.4 billion at December 31, 2025, up \$816.1 million, or 18%, from December 31, 2024. Regulatory stocks were \$252.5 million at December 31, 2025, up \$72.8 million, or 41%, from December 31, 2024. See Note 2 Investment Securities of the notes to the consolidated financial statements for details on these changes.
 - Loans of \$31.2 billion at December 31, 2025 were up \$1.4 billion, or 5%, from December 31, 2024 primarily due to increases in commercial and business lending and auto finance loans, offset by a decrease in residential mortgage loans. See section Loans and Note 3 Loans of the notes to consolidated financial statements for additional details.
 - Residential loans held for sale were \$72.5 million at December 31, 2025, down \$574.2 million, or 89%, from December 31, 2024. The decrease from December 31, 2024 was a result of the mortgage portfolio sale announced as part of the balance sheet repositioning in the fourth quarter of 2024 and the sale closing in January 2025.
- At December 31, 2025, total liabilities were \$40.2 billion, up \$1.8 billion, or 5%, from December 31, 2024.
 - Short-term funding was \$307.9 million at December 31, 2025, down \$162.5 million, or 35%, from December 31, 2024. FHLB advances were \$3.3 billion at December 31, 2025, up \$1.4 billion, or 76%, from December 31, 2024. These changes were due to a mix shift in funding away from federal funds purchased to short-term FHLB advances. See Note 8 Short and Long-Term Funding of the notes to consolidated financial statements for additional details.
 - Other long-term funding was \$594.3 million at December 31, 2025, down \$243.4 million, or 29%, from December 31, 2024, primarily due to subordinated notes maturing in January 2025. See Note 8 Short and Long-Term Funding of the notes to consolidated financial statements for additional details.
 - Accrued expenses and other liabilities were \$463.1 million, down \$105.4 million, or 19%, from December 31, 2024, primarily due to decreases in derivative liabilities. See Note 13 Derivative and Hedging Activities of the notes to consolidated financial statements for additional details.
- At December 31, 2025, the loans to deposits ratio was 87.65%, up from 85.92% at December 31, 2024.

The Corporation has long-term guidelines relative to the proportion of Commercial and Business, CRE, and Consumer loans within the overall loan portfolio. Furthermore, certain sub-asset classes within the respective portfolios are further defined and dollar limitations are placed on these sub-portfolios. These guidelines and limits are reviewed quarterly and approved annually by the ERC. These guidelines and limits are designed to create balance and diversification within the loan portfolios.

In the first quarter of 2025, the Corporation completed a mortgage portfolio sale of \$722.9 million in residential mortgages at a loss of \$130.4 million as part of the balance sheet repositioning announced during the fourth quarter of 2024. The proceeds of this sale were used to pay down long-term FHLB advances and reinvest into higher yielding investment securities.

During the fourth quarter of 2023, the Corporation completed a mortgage portfolio sale of \$968.6 million of residential mortgages at a loss of \$136.2 million related to the balance sheet repositioning announced during the fourth quarter of 2023. The proceeds of this sale were used to pay down higher cost funding and increase liquidity capacity.

The Corporation's loan distribution and interest rate sensitivity as of December 31, 2025 are summarized in the following table:

Table 7 Loan Distribution and Interest Rate Sensitivity

(Dollars in thousands)	Within 1 Year ^(a)		1-5 Years		5-15 Years		Over 15 Years		Total		% of Total	
Fixed rate

(a) Demand loans, past due loans, overdrafts, and credit cards are reported in the "Within 1 Year" category.

At December 31, 2025, \$21.5 billion, or 69%, of the total loans outstanding and \$18.2 billion, or 90%, of the commercial loans outstanding were floating rate, adjustable rate, re-pricing within one year, or maturing within one year.

Credit Risk

An active credit risk management process is used for commercial loans to ensure that sound and consistent credit decisions are made. Credit risk is controlled by detailed underwriting procedures, comprehensive loan administration, and periodic review of borrowers' outstanding loans and commitments. Borrower relationships are formally reviewed and graded on an ongoing basis for early identification of potential problems. Further analysis by customer, industry, and geographic location are performed to monitor trends, financial performance, and concentrations. See Note 3 Loans of the notes to consolidated financial statements for additional information on managing overall credit quality.

The loan portfolio is widely diversified by types of borrowers, industry groups, and market areas primarily within the Corporation's lending footprint. Significant loan concentrations are considered to exist when there are amounts loaned to numerous borrowers engaged in similar activities that would cause them to be similarly impacted by economic or other conditions. At December 31, 2025, no significant concentrations existed in the Corporation's loan portfolio in excess of 10% of total loan exposure.

Commercial and business lending: The commercial and business lending classification primarily includes commercial loans to large corporations, middle market companies, small businesses, and ABL and equipment financing.

Table 8 Largest Commercial and Industrial Industry Group Exposures, by NAICS Subsector

December 31, 2025				
(Dollars in thousands)	NAICS Subsector	Outstanding Balance	Total Exposure	% of Total Loan Exposure
Utilities ^(a)	221	\$ 3,009,210	\$ 3,787,934	9 %
Real Estate ^(b)	531	2,183,905	3,757,948	9 %
Credit Intermediation and Related Activities ^(c)	522	671,604	1,331,594	3 %
Merchant Wholesalers, Durable Goods	423	713,836	1,212,061	3 %

(a) 68% of the total utilities exposure comes from renewable energy sources (wind, solar, hydroelectric, and geothermal).

(b) Includes REIT lines

(c) Includes mortgage warehouse lines

The remaining commercial and industrial portfolio is spread over a diverse range of industries, none of which exceed 2% of total loan exposure.

The CRE-owner occupied portfolio is spread over a diverse range of industries, none of which exceed 2% of total loan exposure.

The credit risk related to commercial and business lending is largely influenced by general economic conditions and the resulting impact on a borrower's operations or on the value of underlying collateral, if any.

Commercial real estate - investor: CRE-investor is comprised of loans secured by various non-owner occupied or investor income producing property types.

Table 9 Largest Commercial Real Estate - Investor Property Type Exposures

December 31, 2025	% of Total Loan Exposure	% of Total Commercial Real Estate - Investor Loan Exposure
Multi-Family	5 %	37 %
Industrial	3 %	27 %
Office	2 %	16 %

The remaining CRE-investor portfolio is spread over various other property types, none of which exceed 2% of total loan exposure.

Credit risk is managed in a similar manner to commercial and business lending by employing sound underwriting guidelines, lending primarily to borrowers in local markets and businesses, periodically evaluating the underlying collateral, and formally reviewing the borrower's financial soundness and relationship on an ongoing basis.

Real estate construction: Real estate construction loans are primarily short-term or interim loans that provide financing for the acquisition or development of commercial income properties, multi-family projects, or residential development, both single family and condominium. Real estate construction loans are made to developers and project managers who are generally well-known to the Corporation and have prior successful project experience. The credit risk associated with real estate construction loans is generally confined to specific geographic areas but is also influenced by general economic conditions. The Corporation controls the credit risk on these types of loans by making loans in familiar markets to developers, reviewing the merits of individual projects, controlling loan structure, and monitoring project progress and construction advances.

Table 10 Largest Real Estate Construction Property Type Exposures

December 31, 2025	% of Total Loan Exposure	% of Total Real Estate Construction Loan Exposure
Multi-Family	5 %	52 %

The remaining real estate construction portfolio is spread over various other property types, none of which exceed 2% of total loan exposure.

The Corporation's current lending standards for CRE and real estate construction lending are determined by property type and specifically address many criteria, including: maximum loan amounts, maximum LTV, requirements for pre-leasing and/or presales, minimum borrower equity, and maximum loan-to-cost. Currently, the maximum standard for LTV is 80%, with lower limits established for certain higher risk types, such as raw land that has a 50% LTV maximum. The Corporation's LTV guidelines are in compliance with regulatory supervisory limits. In most cases, for real estate construction loans, the loan

amounts include interest reserves, which are built into the loans and sized to fund loan payments through construction and lease up and/or sell out.

Residential mortgages: Residential mortgage loans are primarily first-lien home mortgages with a maximum loan-to-collateral value without credit enhancement (e.g., private mortgage insurance) of 80%. The residential mortgage portfolio is focused primarily in the Corporation's three-state branch footprint, with approximately 88% of the outstanding loan balances in the Corporation's branch footprint at December 31, 2025. The rates on adjustable rate mortgages adjust based upon the movement in the underlying index which is then added to a margin and rounded to the nearest 0.125%. That result is then subjected to any periodic caps to produce the borrower's interest rate for the coming term. Adjustable rate mortgages are typically offered with an initial fixed rate term of 5, 7 or 10 years.

The Corporation generally retains certain adjustable-rate residential real estate mortgages in its loan portfolio, including retail and private banking jumbo mortgages and CRA-related mortgages. As part of management's historical practice of originating and servicing residential mortgage loans, generally the Corporation's 30-year, agency conforming, fixed-rate residential real estate mortgage loans have been sold in the secondary market with servicing rights retained. Subject to management's analysis of the current interest rate environment, among other market factors, the Corporation may choose to retain mortgage loan production on its balance sheet.

The Corporation's underwriting and risk-based pricing guidelines for residential mortgage loans include minimum borrower FICO score and maximum LTV of the property securing the loan. Residential mortgage products generally are underwritten using FHLMC and FNMA secondary marketing guidelines.

Home equity: Home equity consists of both home equity lines of credit and closed-end home equity loans. The Corporation's credit risk monitoring guidelines for home equity are based on an ongoing review of loan delinquency status, as well as a quarterly review of FICO score deterioration and property devaluation. The Corporation does not routinely obtain appraisals on performing loans to update LTV ratios after origination; however, the Corporation monitors the local housing markets by reviewing the various home price indices and incorporates the impact of the changing market conditions in its ongoing credit monitoring process. For junior lien home equity loans, the Corporation is unable to track the performance of the first lien loan if it does not own or service the first lien loan. However, the Corporation obtains a refreshed FICO score on a quarterly basis and monitors this as part of its assessment of the home equity portfolio.

The Corporation's underwriting and risk-based pricing guidelines for home equity lines of credit and loans consist of a combination of both borrower FICO score and the original cumulative LTV against the property securing the loan. Currently, the Corporation's policy sets the maximum acceptable LTV at 90%. The Corporation's current home equity line of credit offering is priced based on floating rate indices and generally allows 10 years of interest-only payments followed by a 20-year amortization of the outstanding balance. The loans in the Corporation's portfolio generally have an original term of 20 years with principal and interest payments required.

Indirect Auto: The Corporation currently purchases retail auto sales contracts via a network of approved auto dealerships across 16 states throughout the Northeast, Mid-Atlantic, and Midwestern United States. The auto dealerships finance the sale of automobiles as the initial lender and then assign the contracts to the Corporation pursuant to dealer agreements. The Corporation's underwriting and pricing guidelines are based on a dual risk grade derived from a combination of FICO auto score and proprietary internal custom score. Minimum grade and FICO score standards ensure the credit risk is appropriately managed to the Corporation's risk appetite. Further, the grade influences loan-specific parameters such as vehicle age, term, LTV, loan amount, mileage, payment and debt service thresholds, and pricing. Maximum loan terms offered are 84 months on select grades with vehicle age, mileage, and other limitations in place to qualify. The program is designed to capture primarily prime and super prime contracts.

Other consumer: Other consumer consists of student loans, short-term personal installment loans, and credit cards. Credit risk for other consumer loans is influenced by general economic conditions, the characteristics of individual borrowers, and the nature of the loan collateral. Risks of loss are generally on smaller average balances per loan spread over many borrowers. Once charged off, there is usually less opportunity for recovery of these smaller consumer loans. Credit risk is primarily controlled by reviewing the creditworthiness of the borrowers, monitoring payment histories, and taking appropriate collateral and guarantee positions.

Nonperforming Assets

Management is committed to a proactive nonaccrual and problem loan identification philosophy. This philosophy is implemented through the ongoing monitoring and review of all pools of risk in the loan portfolio to ensure that problem loans are identified quickly and the risk of loss is minimized. Table 11 provides detailed information regarding NPAs, which include nonaccrual loans, OREO, and repossessed assets, and also includes information on accruing loans past due and restructured loans:

Table 11 Nonperforming Assets

Total accruing loans 30-89 days past due	\$ 58,302	\$ 76,801	\$ 61,825

(a) Primarily closed branches and other bank operated real estate facilities, pending disposition.

(b) Excluding guaranteed student loans.

Nonaccrual loans: Nonaccrual loans are considered to be one indicator of potential future loan losses. See management's accounting policy for nonaccrual loans in Note 1 Summary of Significant Accounting Policies and Note 3 Loans of the notes to consolidated financial statements for additional nonaccrual loan disclosures. See also sections Credit Risk and Allowance for Credit Losses on Loans.

Accruing loans past due 90 days or more: Loans past due 90 days or more but still accruing interest are classified as such where the underlying loans are both well-secured (the collateral value is sufficient to cover principal and accrued interest) and are in the process of collection.

Restructured loans: Loans are considered restructured loans if concessions have been granted to borrowers that are experiencing financial difficulty. See also Note 3 Loans of the notes to consolidated financial statements for additional restructured loans disclosures.

OREO: Management actively seeks to ensure OREO properties held are monitored to minimize the Corporation's risk of loss.

Allowance for Credit Losses on Loans

Credit risks within the loan portfolio are inherently different for each loan type. Credit risk is controlled and monitored through the use of lending standards, a thorough review of potential borrowers, and ongoing review of loan payment performance. Active asset quality administration, including early problem loan identification and timely resolution of problems, aids in the management of credit risk and the minimization of loan losses. Credit risk management for each loan type is discussed in the section entitled Credit Risk. See Note 3 Loans of the notes to consolidated financial statements for additional disclosures on the ACLL.

To assess the appropriateness of the ACLL, the Corporation focuses on the evaluation of many factors, including but not limited to: evaluation of facts and issues related to specific loans, management's ongoing review and grading of the loan portfolio, credit report refreshes, consideration of historical loan loss and delinquency experience on each portfolio category, trends in past due and nonaccrual loans, the risk characteristics of the various classifications of loan segments, changes in the size and character of the loan portfolio, concentrations of loans to specific borrowers or industries, existing economic conditions and economic forecasts, the fair value of underlying collateral, funding assumptions on lines, and other qualitative and quantitative factors which could affect potential credit losses. The forecast the Corporation used for December 31, 2025 was the Moody's baseline scenario from November 2025, which was reviewed against the December 2025 baseline scenario with no material updates made, over a two year reasonable and supportable period with straight-line reversion to historical losses over the second year of the period. Assessing these factors involves significant judgment. Because each of the criteria used is subject to change, the ACLL is not necessarily indicative of the trend of future credit losses on loans in any particular segment. Therefore, management considers the ACLL a critical accounting estimate, see section Critical Accounting Estimates for additional information on the ACLL. See section Nonperforming Assets for a detailed discussion on asset quality. See also Note 3 Loans of the notes to consolidated financial statements for additional ACLL disclosures. Table 6 provides information

on loan growth and period end loan composition, Table 11 provides additional information regarding NPAs, and Table 12 and Table 13 provide additional information regarding activity in the ACLL.

The loan segmentation used in calculating the ACLL at December 31, 2025 and December 31, 2024 was generally comparable. The methodology to calculate the ACLL consists of the following components: a valuation allowance estimate is established for commercial and consumer loans determined by the Corporation to be individually evaluated, using discounted cash flows, estimated fair value of underlying collateral, and/or other data available. Loans are segmented for criticized loan pools by loan type as well as for non-criticized loan pools by loan type, primarily based on risk rating rates after considering loan type, historical loss and delinquency experience, credit quality, and industry classifications. Loans that have been criticized are considered to have a higher risk of default than non-criticized loans, as circumstances were present to support the lower loan grade, warranting higher loss factors. Additionally, management allocates ACLL to absorb losses that may not be provided for by the other components due to qualitative factors evaluated by management, such as limitations within the credit risk grading process, known current economic or business conditions that may not yet show in trends, industry or other concentrations with current issues that impose higher inherent risks than are reflected in the loss factors, and other relevant considerations. The total allowance is available to absorb losses from any segment of the loan portfolio.

Notable Contributions to the Change in the Allowance for Credit Losses on Loans

- Total loans increased \$1.4 billion, or 5%, from December 31, 2024, driven by increases in commercial and industrial lending and auto finance, partially offset by a decrease in residential mortgage lending, mainly due to the Corporation's balance sheet repositioning in December 2024. See also Note 3 Loans of the notes to consolidated financial statements for additional information on loans.
- Total nonaccrual loans decreased \$22.8 million, or 19%, from December 31, 2024, primarily driven by decreases in nonaccrual loans within the Corporation's commercial and industrial portfolio and CRE-investor portfolio, partially offset by increases in nonaccrual loans within the auto finance portfolio and real estate construction portfolio. See also Note 3 Loans of the notes to consolidated financial statements and section Nonperforming Assets for additional disclosures on the changes in asset quality.
- For the year ended December 31, 2025, net charge offs decreased \$31.6 million, or 46%, from December 31, 2024, primarily driven by a decrease in net charge offs in the Corporation's commercial and industrial portfolio, partially offset by an increase in net charge offs in the CRE-investor portfolio. See Tables 12 and 13 for additional information regarding the activity in the ACLL.

Management believes the level of ACLL to be appropriate at December 31, 2025.

Consolidated net income and stockholders' equity could be affected if management's estimate of the ACLL is subsequently materially different, requiring additional or less provision for credit losses to be recorded. Management carefully considers numerous detailed and general factors, its assumptions, and the likelihood of materially different conditions that could alter its assumptions. While management uses currently available information to recognize losses on loans, future adjustments to the ACLL may be necessary based on newly received appraisals, updated commercial customer financial statements, rapidly deteriorating customer cash flow, and changes in economic conditions that affect our customers. Additionally, larger credit relationships do not inherently create more risk, but can create wider fluctuations in net charge offs and asset quality measures. As an integral part of their examination processes, various federal and state regulatory agencies also review the ACLL. These agencies may require additions to the ACLL or may require that certain loan balances be charged off or downgraded into criticized loan categories when their credit evaluations differ from those of management, based on their judgments about information available to them at the time of their examinations.

Investment Securities Portfolio

Management of the investment securities portfolio involves the maximization of income while actively monitoring the portfolio's liquidity, market risk, quality of the investment securities, and its role in balance sheet and capital management. The Corporation classifies its investment securities as AFS, HTM, or equity securities on the consolidated balance sheets at the time of purchase. Securities classified as AFS may be sold from time to time in order to help manage interest rate risk, liquidity, credit quality, capital levels, or to take advantage of relative value opportunities in the marketplace. Investment securities classified as AFS and equity are carried at fair value on the consolidated balance sheets, while investment securities classified as HTM are carried at amortized cost on the consolidated balance sheets.

The Corporation's investment securities portfolio contains the following types of securities:

U.S. Treasury securities: U.S. Treasury Securities, including Treasury bills, notes, and bonds, are debt obligations issued by the U.S. Department of the Treasury and are backed by the full faith and credit of the U.S. government.

Municipal securities: The municipal securities relate to various state and political subdivisions and school districts. The municipal securities portfolio is regularly assessed for credit quality and deterioration.

Residential and commercial mortgage-related securities: Residential and commercial mortgage-related securities include predominantly FNMA, FHLMC and GNMA MBS and CMOs. The Corporation also has private-label residential mortgage-related securities are the most senior AAA-rated tranche CMO securities issued by a non-agency sponsor and collateralized by Prime Jumbo residential mortgage loans. The fair value of these mortgage-related securities is subject to inherent risks, such as prepayment risk and interest rate changes.

FFELP asset backed securities: FFELP asset backed securities are collateralized with government guaranteed student loans.

SBA asset backed securities: SBA asset backed securities are securities whose underlying assets are loans from the SBA. These loans are backed by the U.S. government.

Other debt securities: Other debt securities are primarily comprised of debt securities that mature within 3 years and have a rating of A.

During the fourth quarter of 2024 as part of a balance sheet repositioning, the Corporation sold lower yielding AFS securities with a carrying value of \$1.1 billion at a net loss of \$148.2 million and reinvested the proceeds into higher yielding and lower risk-weighted GNMA securities.

During the fourth quarter of 2023 as part of a balance sheet repositioning, the Corporation sold lower yielding AFS securities with a carrying value of \$715.1 million at a net loss of \$64.9 million and reinvested the proceeds into higher yielding and lower risk-weighted GNMA securities.

At December 31, 2025, the Corporation's investment securities portfolio did not contain securities of any single non-government or non-GSE issuer that were payable from and secured by the same source of revenue or taxing authority where the aggregate carrying value of such securities exceeded 5% of stockholders' equity.

The Corporation did not recognize any credit-related write-downs to the allowance for credit losses on investments during 2025, 2024, or 2023. See Note 1 Summary of Significant Accounting Policies for management's accounting policy for investment securities and Note 2 Investment Securities of the notes to consolidated financial statements for additional investment securities disclosures.

(a) Expected maturities will differ from contractual maturities, as borrowers may have the right to call or repay obligations with or without call or prepayment penalties.

(b) Yields on tax-exempt securities are computed on a fully tax-equivalent basis using a tax rate of 21%.

In addition to the investment securities portfolio noted above, the Corporation also holds the following investments:

Equity Securities with Readily Determinable Fair Values: Equity securities with readily determinable fair values is primarily comprised of mutual funds.

Equity Securities without Readily Determinable Fair Values: Equity securities without readily determinable fair values primarily consists of an investment in a private loan fund, and historically, Visa Class B restricted shares which the Corporation sold all remaining shares during the first quarter of 2024.

Regulatory Stock: The Corporation is required to hold and maintain, for regulatory purposes, Federal Reserve Bank stock and FHLB stock as member banks of both the Federal Reserve System and the FHLB, and in amounts as required by these institutions.

See Note 2 Investment Securities of the notes to consolidated financial statements for additional information on the equity securities and regulatory stock.

Deposits and Customer Funding

The following table summarizes the composition of our deposits and customer funding:

Table 16 Period End Deposit and Customer Funding Composition^(a)

Time deposits of more than \$250,000	\$ 834,309		\$ 757,675		\$ 522,626	

(a) Prior periods have been adjusted to conform with current period presentation.

(b) Includes repurchase agreements.

(c) Total deposits excluding brokered CDs and network transaction deposits. This is a non-GAAP financial measure. See Table 23 Non-GAAP Measures for a reconciliation to GAAP financial measures.

- Total deposits, which are the Corporation's largest source of funds, increased \$904.2 million, or 3%, from December 31, 2024 driven by growth in all deposit types except interest-bearing demand and brokered CDs.
- Total uninsured deposits were \$17.0 billion, \$15.5 billion and \$14.8 billion at December 31, 2025, 2024 and 2023 respectively. The increase was primarily driven by increase in balances in business deposit accounts. Estimated uninsured and uncollateralized deposits, excluding intercompany deposits, were \$9.4 billion or 26.5% of total deposits at December 31, 2025, compared to \$8.0 billion or 23.0% at December 31, 2024 and \$7.6 billion or 22.7% at December 31, 2023.

Table 17 Maturity Distribution – Time Deposits of \$250,000 or More

(Dollars in thousands)	December 31, 2025
Three months or less	\$ 351,362
Over three months through six months	373,122
Over six months through twelve months	107,581
Over twelve months	2,244
Total	\$ 834,309

Selected period end deposit information is detailed in Note 7 Deposits of the notes to consolidated financial statements, including a maturity distribution of all time deposits at December 31, 2025. See Table 2 for additional information on average deposit balances and deposit rates.

Other Funding Sources

Short-Term Funding: Short-term funding is comprised of short-term FHLB advances (with original contractual maturities less than one year), federal funds purchased, securities sold under agreements to repurchase. Many short-term funding sources are secured with collateral, expected to be reissued, and, therefore, do not represent an immediate need for cash. The organization manages to a multitude of liquidity risk limits which consider availability of short-term funding sources across a spectrum of stress scenarios, among other risk-based assumptions. Short-term funding sources at December 31, 2025 were \$3.2 billion, an increase of \$1.4 billion, or 84%, from December 31, 2024, driven by a \$1.6 billion, or 128%, increase in short-term FHLB advances.

Long-Term Funding: Long-term funding is comprised of long-term FHLB advances (with original contractual maturities greater than one year), senior notes, subordinated notes, and finance leases. Long-term funding at December 31, 2025 was \$1.0 billion, a decrease of \$434.3 million, or 30%, from December 31, 2024, driven by a \$250.0 million, or 45%, decrease in subordinated notes, and a \$197.4 million, or 32%, decrease in long-term FHLB advances.

See Note 8 Short and Long-Term Funding of the notes to consolidated financial statements for additional information on short-term and long-term funding. See Table 2 for additional information on average funding and rates.

Liquidity

The objective of liquidity risk management is to ensure that the Corporation has the ability to generate sufficient cash or cash equivalents in a timely and cost-effective manner to satisfy the cash flow requirements of depositors and borrowers and to meet its other commitments as they become due. The Corporation's liquidity risk management process is designed to identify, measure, and manage the Corporation's funding and liquidity risk to meet its daily funding needs in the ordinary course of business, as well as to address expected and unexpected changes in its funding requirements. The Corporation engages in various activities to manage its liquidity risk, including diversifying its funding sources, stress testing, and holding readily-marketable assets which can be used as a source of liquidity, if needed.

The Corporation performs dynamic scenario analysis in accordance with industry best practices. Measures have been established to ensure the Corporation has sufficient high quality short-term liquidity to meet cash flow requirements under stressed scenarios. In addition, the Corporation also reviews static measures such as deposit funding as a percent of total assets and liquid asset levels. Strong capital ratios, credit quality, and core earnings are also essential to maintaining cost effective access to wholesale funding markets. At December 31, 2025, the Corporation was in compliance with its internal liquidity objectives and had sufficient asset-based liquidity to meet its obligations even under a stressed scenario.

The Corporation maintains diverse and readily available liquidity sources, including:

- Lines of credit with the Federal Reserve Bank and FHLB, which require eligible loan and investment collateral to be pledged. Based on the amount of collateral pledged, the FHLB established a collateral value from which the Bank may draw advances, and issue letters of credit in favor of public fund depositors, against the collateral. As of December 31, 2025, the Bank had \$6.2 billion available for future funding. The Federal Reserve Bank also establishes a collateral value of assets to support borrowings from the discount window. As of December 31, 2025, the Bank had \$6.4 billion available for discount window borrowings.
- Acquisition related equity issuances by the Parent Company; the Corporation has filed a shelf registration statement with the SEC under which the Parent Company may, from time to time, offer shares of the Corporation's common stock in connection with acquisitions of businesses, assets, or securities of other companies.
- Other issuances by the Parent Company; the Corporation maintains on file with the SEC a universal shelf registration statement, under which the Parent Company may offer the following securities, either separately or in units: debt securities, preferred stock, depositary shares, common stock, and warrants.
- Bank issuances; the Bank may also issue institutional CDs, network transaction deposits, and brokered CDs.
- Global Bank Note Program issuances; the Bank has implemented a program pursuant to which it may offer up to \$2.0 billion aggregate principal amount of its unsecured senior and subordinated notes.

The following table presents secured and total available liquidity sources, estimated uninsured and uncollateralized deposits (excluding intercompany deposits), and coverage of estimated uninsured and uncollateralized deposits.

(a) Estimated based on normal course of operations with indicated institution.

(b) Availability based on internal policy limitations. The Corporation includes outstanding deposits that have received a primary purpose exemption in the brokered deposit classification as they have similar funding characteristics and risk as brokered deposits.

(c) Estimated availability based on the Corporation's current internal funding considerations.

Based on contractual obligations and ongoing operations, the Corporation's sources of liquidity are sufficient to meet present and future liquidity needs. See Table 21 for information about the Corporation's contractual obligations and other commitments. See section Deposits and Customer Funding for information about uninsured deposits and concentrations.

Credit ratings impact the Corporation's ability to issue debt securities and the cost to borrow money. Adverse changes in credit ratings impact not only the ability to raise funds in the capital markets but also the cost of these funds. For additional information regarding risks related to adverse changes in our credit ratings, see Part I, Item 1A, Risk Factors.

For the year ended December 31, 2025, net cash provided by operating and financing activities was \$615.7 million and \$1.7 billion, respectively, while investing activities used net cash of \$1.6 billion, for a net increase in cash and cash equivalents of \$700.6 million since year-end 2024. During 2025, total assets increased to \$45.2 billion, up \$2.2 billion compared to year-end 2024, primarily due to increases in loans of \$1.4 billion, AFS investment securities at fair value of \$816.1 million, and interest-bearing deposits in other financial institutions of \$690.5 million offset by a decrease in residential loans held for sale of \$574.2 million. On the funding side, FHLB advances increased \$1.4 billion, and deposits increased \$904.2 million, mainly driven by increases in all deposit types except for brokered CDs which decreased \$481.2 million.

For the year ended December 31, 2024, net cash provided by operating and financing activities was \$580.2 million and \$1.7 billion, respectively, while investing activities used net cash of \$2.2 billion, for a net increase in cash and cash equivalents of \$95.8 million since year-end 2023. During 2024, total assets increased to \$43.0 billion, up \$2.0 billion compared to year-end 2023, primarily due to increases in AFS investment securities, at fair value of \$980.5 million, residential loans held for sale of \$613.7 million resulting from a nonrecurring mortgage portfolio sale related to the balance sheet repositioning announced in the fourth quarter of 2024 which closed in January 2025, and loans of \$552.4 million. On the funding side, deposits increased \$1.2 billion, mainly driven by increases in other time deposits, money market, savings, and interest-bearing demand of \$832.0 million, \$307.5 million, \$297.6 million, and \$280.8 million, respectively, partially offset by a decrease in noninterest-bearing demand of \$344.3 million. Additionally, other long-term funding increased \$296.4 million, primarily driven by the Corporation's issuance of senior notes in August 2024.

Quantitative and Qualitative Disclosures about Market Risk

Market risk and interest rate risk are managed centrally. Market risk is the potential for loss arising from adverse changes in the fair value of fixed-income securities, equity securities, other earning assets, and derivative financial instruments as a result of changes in interest rates or other factors. Interest rate risk is the potential for reduced net interest income resulting from adverse changes in the level of interest rates. As a financial institution that engages in transactions involving an array of financial products, the Corporation is exposed to both market risk and interest rate risk. In addition to market risk, interest rate risk is measured and managed through a number of methods. The Corporation uses financial modeling simulation techniques that measure the sensitivity of future earnings due to changing rate environments to measure interest rate risk.

Policies established by the Corporation's ALCO and approved by the Board of Directors are intended to limit these risks. The Board has delegated day-to-day responsibility for managing market and interest rate risk to ALCO. The primary objectives of market risk management are to minimize any adverse effect that changes in market risk factors may have on net interest income and to offset the risk of price changes for certain assets recorded at fair value.

Interest Rate Risk

The primary goal of interest rate risk management is to control exposure to interest rate risk within policy limits approved by the Board of Directors. These limits and guidelines reflect the Corporation's risk appetite for interest rate risk over both short-term and long-term horizons.

The major sources of the Corporation's non-trading interest rate risk are timing differences in the maturity and re-pricing characteristics of assets and liabilities, changes in the shape of the yield curve, and the potential exercise of explicit or embedded options. We measure these risks and their impact by identifying and quantifying exposures through the use of sophisticated simulation and valuation models which are employed by management to understand interest rate sensitive EAR and MVE at risk. The Corporation's interest rate risk profile is such that, generally, a higher yield curve adds to income while a lower yield curve has a negative impact on earnings. The Corporation's EAR profile is asset sensitive at December 31, 2025.

MVE and EAR are complementary interest rate risk metrics and should be viewed together. EAR sensitivity captures asset and liability re-pricing mismatches for the first year inclusive of forecast balance sheet changes and is considered a shorter-term measure, while MVE sensitivity captures mismatches within the period end balance sheets through the financial instruments' respective maturities and is considered a longer term measure.

A positive EAR sensitivity in a rising rate environment indicates that over the forecast horizon of one year, asset-based income will increase more quickly than liability-based expense due to the balance sheet composition. A negative MVE sensitivity in a rising rate environment indicates that the value of financial assets will decrease more than the value of financial liabilities.

One of the primary methods that we use to quantify and manage interest rate risk is simulation analysis, which we use to model net interest income and rate-sensitive noninterest items from the Corporation's balance sheet and derivative positions under various interest rate scenarios. As the future path of interest rates is not known with certainty, we use simulation analysis to project rate-sensitive income under many scenarios including implied forward and deliberately extreme and perhaps unlikely scenarios. The analyses may include rapid and gradual ramping of interest rates, rate shocks, basis risk analysis, and yield curve twists. Specific balance sheet management strategies are also analyzed to determine their impact on EAR.

Key assumptions in the simulation analysis (and in the valuation analysis discussed below) relate to the behavior of interest rates and pricing spreads, the changes in product balances, and the behavior of loan and deposit clients in different rate environments. This analysis incorporates several assumptions, the most material of which relate to the re-pricing characteristics and balance fluctuations of deposits with indeterminate or non-contractual maturities, and prepayment of loans and securities.

The sensitivity analysis included below is measured as a percentage change in EAR due to gradual moves in benchmark interest rates from a baseline scenario over 12 months. We evaluate the sensitivity using: (1) a dynamic forecast incorporating expected growth in the balance sheet, and (2) a static forecast where the current balance sheet is held constant.

While a gradual shift in interest rates was used in this analysis to provide an estimate of exposure under a probable scenario, an instantaneous shift in interest rates would have a more significant impact. No EAR breaches occurred during 2025.

Table 19 Estimated % Change in Rate Sensitive EAR Over 12 Months

	Dynamic Forecast December 31, 2025	Static Forecast December 31, 2025	Dynamic Forecast December 31, 2024	Static Forecast December 31, 2024
Gradual Rate Change				
100 bp increase in interest rates	1.5%	2.0%	1.0%	0.7%
200 bp increase in interest rates	2.8%	3.9%	2.0%	1.3%
100 bp decrease in interest rates	(0.8)%	(1.4)%	(0.5)%	(0.2)%
200 bp decrease in interest rates	(2.2)%	(3.4)%	(1.3)%	(0.8)%

We also perform valuation analysis, which we use for discerning levels of risk present in the balance sheet and derivative positions that might not be taken into account in the EAR simulation analysis. Whereas, EAR simulation highlights exposures over a relatively short time horizon, valuation analysis incorporates all cash flows over the estimated remaining life of all balance sheet and derivative positions. The valuation of the balance sheet, at a point in time, is defined as the discounted present value of all asset cash flows and derivative cash flows, minus the discounted present value of all liability cash flows, the net of which is referred to as MVE. The sensitivity of MVE to changes in the level of interest rates is a measure of the longer-term re-

pricing risk and options risk embedded in the balance sheet. Unlike the EAR simulation, MVE uses instantaneous changes in rates. Additionally, MVE values only the current balance sheet and does not incorporate the growth assumptions that are used in the EAR simulation. As with EAR simulations, assumptions about the timing and variability of balance sheet cash flows are critical in the MVE analysis. Particularly important are the assumptions driving prepayments and the expected changes in balances and pricing of the indeterminate deposit portfolios. At December 31, 2025, the MVE profile indicates a decrease in net balance sheet value due to instantaneous upward changes in rates and an increase in net balance sheet value due to instantaneous downward changes in rates.

Table 20 Market Value of Equity Sensitivity

	December 31, 2025	December 31, 2024
Instantaneous Rate Change		
100 bp increase in interest rates	(5.2)%	(9.1)%
200 bp increase in interest rates	(11.8)%	(18.5)%
100 bp decrease in interest rates	2.3 %	7.1 %
200 bp decrease in interest rates	1.4 %	12.6 %

Since MVE measures the discounted present value of cash flows over the estimated lives of instruments, the change in MVE does not directly correlate to the degree that earnings would be impacted over a shorter time horizon (i.e., the current year). Further, MVE does not take into account factors such as future balance sheet growth, changes in product mix, changes in yield curve relationships, and changes in product spreads that could mitigate the adverse impact of changes in interest rates.

The above EAR and MVE measures do not include all actions that management may undertake to manage this risk in response to anticipated changes in interest rates.

Contractual Obligations, Commitments, Off-Balance Sheet Arrangements, and Contingent Liabilities

The following table summarizes significant contractual obligations and other commitments at December 31, 2025, at those amounts contractually due to the recipient, including any unamortized premiums or discounts, hedge basis adjustments, or other similar carrying value adjustments.

Table 21 Contractual Obligations and Other Commitments

(Dollars in thousands)	Note Reference	One Year or Less	One to Three Years	Three to Five Years	Over Five Years	Total
Time deposits	7	\$ 7,772,473	\$ 52,886	\$ 10,947	\$ 5	\$ 7,836,311
Short-term funding	8	307,864	—	—	—	307,864
FHLB advances	8	3,059,532	203,610	4,427	525	3,268,094
Other long-term funding	8	—	—	298,369	295,907	594,276
Operating leases	6	5,304	9,707	6,915	17,203	39,129
Total		\$ 11,145,173	\$ 266,203	\$ 320,658	\$ 313,640	\$ 12,045,674

The Corporation also has obligations under its retirement plans, derivatives, and lending-related commitments as described in Note 11 Retirement Plans, Note 13 Derivative and Hedging Activities, and Note 15 Commitments, Off-Balance Sheet Arrangements, and Legal Proceedings of the notes to consolidated financial statements, respectively. Further discussion of the nature of each obligation is included in the referenced note to the consolidated financial statements.

Capital

Management actively reviews capital strategies for the Corporation and each of its subsidiaries in light of perceived business risks, future growth opportunities, industry standards, and compliance with regulatory requirements. The assessment of overall capital adequacy depends on a variety of factors, including asset quality, liquidity, stability of earnings, changing competitive forces, economic conditions in markets served, and strength of management. At December 31, 2025, the capital ratios of the Corporation and its banking subsidiaries were in excess of regulatory minimum requirements. The Corporation's capital ratios are summarized in the following table.

Compliance with regulatory minimum capital requirements is a tool used in assessing the Corporation's capital adequacy, but not determinative of how the Corporation would fare under extreme stress. Factors that may affect the adequacy of the Corporation's capital include the inherent limitations of fair value estimates and the assumptions thereof, the inherent limitations of the regulatory risk-weights assigned to various asset types, the inherent limitations of accounting classifications of certain investments and the effect on their measurement, external macroeconomic conditions and their effects on capital and

the Corporation's ability to raise capital or refinance capital commitments, and the extent of steps taken by state or federal government authorities in periods of extreme stress.

For additional information regarding the potential for additional regulation and supervision, see Part I, Item 1A, Risk Factors.

Table 22 Capital Ratios

(Dollars in thousands)	As of December 31,		
	2025	2024	2023

(a) The Federal Reserve establishes regulatory capital requirements, including well-capitalized standards, for the Corporation. These regulatory capital measurements are used by management, regulators, investors, and analysts to assess, monitor, and compare the quality and composition of the Corporation's capital with the capital of other financial services companies.

(b) This is a non-GAAP financial measure. See Table 23 Non-GAAP Measures for a reconciliation to GAAP financial measures.

See Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, for information on the shares repurchased during the fourth quarter of 2025.

See Note 9 Stockholders' Equity and Note 18 Regulatory Matters of the notes to consolidated financial statements for additional capital disclosures.

Less: Acquisition costs ^(c)	252	—	—
Total expense for adjusted efficiency ratio	\$ 846,576	\$ 787,647	\$ 774,274
Total revenue for efficiency ratios reconciliation^(a)			
Net interest income	\$ 1,201,145	\$ 1,047,248	\$ 1,039,573
Noninterest income (loss)	286,400	(9,407)	63,182
Less: Investment securities gains (losses), net	49	(144,147)	(58,903)
Fully tax-equivalent adjustment	16,899	14,919	19,168
Total revenue for fully tax-equivalent efficiency ratio	1,504,395	1,196,907	1,180,826
Less: Announced initiatives ^(b)	(6,976)	(130,406)	(136,239)
Total revenue for adjusted efficiency ratio	\$ 1,511,371	\$ 1,327,313	\$ 1,317,065

(a) Prior periods have been adjusted to conform with current period presentation.

(b) Announced initiatives include the loss on mortgage portfolio sale and loss on prepayment of FHLB advances as a result of balance sheet repositionings that the Corporation announced in the fourth quarter of 2024. The net loss on the sale of investments is already excluded from noninterest income within the efficiency ratio.

(c) During the fourth quarter of 2025, the Corporation entered into a definitive agreement to acquire American National. These costs, incurred in connection with the proposed acquisition, represent nonrecurring costs.

Segment Review

The reportable segments are Corporate and Commercial Specialty; Community, Consumer and Business; and Risk Management and Shared Services. The financial information of the Corporation's segments was compiled utilizing the accounting policies described in Note 1 Summary of Significant Accounting Policies and Note 20 Segment Reporting of the notes to consolidated financial statements.

Table 24 Selected Segment Financial Data

(Dollars in thousands)	Year Ended December 31,			% Change From	
	2025	2024	2023	2024 to 2025	2023 to 2024

N/M = Not Meaningful

Segment Review 2025 Compared to 2024

Corporate and Commercial Specialty

- Average earning assets and average loans both increased \$1.3 billion, from the year ended December 31, 2024, primarily as a result of growth within commercial and business lending.
- Provision for credit losses increased \$14.4 million from the year ended December 31, 2024, due to increased commercial loan balances coupled with general macroeconomic trends.

Community, Consumer, and Business

- Average earning assets and average loan balances decreased \$343.1 million and \$344.8 million, respectively, from the year ended December 31, 2024, primarily driven by the sale of residential mortgages as part of the balance sheet repositioning announced in the fourth quarter of 2024 which closed in January 2025 offset by growth in all other consumer loan categories.
- Average deposit balances increased \$1.0 billion from the year ended December 31, 2024, largely driven by increases in time, interest bearing and savings deposits.

Risk Management and Shared Services

- Total revenue increased \$440.5 million from the year ended December 31, 2024, driven by the nonrecurring losses incurred in 2024 due to the investment portfolio and mortgage sale actions taken as part of the balance sheet repositioning announced in the fourth quarter of 2024 and organic interest income expansion due to the continued investment in higher yielding AFS securities throughout 2025.
- Income tax benefit decreased \$93.6 million from the year ended December 31, 2024, due to the decrease in the net loss incurred in 2025 compared to 2024 and the strategic reallocation of the investment portfolio announced in the second quarter of 2024 creating additional benefit in 2024 which did not recur in 2025.
- Average earning assets increased \$1.1 billion from the year ended December 31, 2024, primarily due to increased investment in AFS investment securities.
- Average loan balances decreased \$55.7 million from the year ended December 31, 2024, attributable to lower balances in all loan categories.

Critical Accounting Estimates

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ significantly from those estimates. The determination of the ACLL is particularly susceptible to significant change.

The consolidated financial statements of the Corporation are prepared in conformity with U.S. GAAP and follow general practices within the industries in which it operates. This preparation requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, actual results could differ from the estimates, assumptions, and judgments reflected in the financial statements. Certain estimates inherently have a greater reliance on the use of assumptions and judgments and, as such, have a greater possibility of producing results that could be materially different than originally reported. Management believes the following estimate is both important to the portrayal of the Corporation's financial condition and results of operations and requires subjective or complex judgments and, therefore, management considers the following to be a critical accounting estimate. This critical accounting estimate is discussed directly with the Audit Committee of the Corporation's Board of Directors.

Allowance for Credit Losses on Loans: Management's evaluation process used to determine the appropriateness of the ACLL is subject to the use of estimates, assumptions, and judgments. The evaluation process combines many factors: management's ongoing review and grading of the loan portfolio using a dual risk rating system leveraging probability of default and loss given default, consideration of historical loan loss and delinquency experience, trends in past due and nonaccrual loans, risk characteristics of the various classifications of loans, concentrations of loans to specific borrowers or industries, existing economic conditions and forecasts, the fair value of underlying collateral, and other qualitative and quantitative factors which could affect future credit losses. The Corporation uses Moody's baseline economic forecast within its model. Because current economic conditions and forecasts can change and future events are inherently difficult to predict, the anticipated amount of estimated credit losses on loans, and therefore the appropriateness of the ACLL, could change significantly. It is difficult to estimate how potential changes in any one economic factor or input might affect the overall allowance because a wide variety of factors and inputs are considered in estimating the allowance and changes in those factors and inputs considered may not occur at the same rate and may not be consistent across all product types. Additionally, changes in factors and inputs may be directionally inconsistent, such that improvement in one factor may offset deterioration in others. As an integral part of their examination process, various regulatory agencies also review the ACLL. Such agencies may require additions to the ACLL or may require that certain loan balances be charged off or downgraded into criticized loan categories when their credit evaluations differ from those of management, based on their judgments about information available to them at the time of their examination. A large driver to the ACLL is the overall credit quality of the underlying credits. Deterioration or improvement in credit quality could have a significant impact on the overall level of ACLL. At December 31, 2025, a 10% change in loans classified as special mention or worse would result in a +/- 4 bp change in the ACLL to total loans ratio. The Corporation believes the level of the ACLL is appropriate. See Note 1 Summary of Significant Accounting Policies and Note 3 Loans of the notes to consolidated financial statements as well as the Allowance for Credit Losses on Loans section.

ITEM 7A.

Quantitative and Qualitative Disclosures About Market Risk

Information required by this item is set forth in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the captions Quantitative and Qualitative Disclosures about Market Risk and Interest Rate Risk.

Notes to Consolidated Financial Statements
As of and For the Years Ended December 31, 2025, 2024, and 2023

Note 1 Summary of Significant Accounting Policies

The accounting and reporting policies of the Corporation conform to U.S. GAAP and to general practice within the financial services industry. The following is a description of the more significant of those policies.

Business

Associated Banc-Corp is a bank holding company headquartered in Wisconsin. The Corporation provides a full range of banking and related financial services to consumer and commercial customers through its network of bank and nonbank subsidiaries. The Corporation is subject to competition from other financial and non-financial institutions that offer similar or competing products and services. The Corporation is regulated by federal and state agencies and is subject to periodic examinations by those agencies.

Basis of Financial Statement Presentation

The consolidated financial statements include the accounts of the Parent Company and its subsidiaries. Investments in unconsolidated entities (none of which are considered to be variable interest entities in which the Corporation is the primary beneficiary) are accounted for using the cost method of accounting when the Corporation has determined that the cost method is appropriate. Investments not meeting the criteria for cost method accounting are accounted for using the equity method of accounting. Investments in unconsolidated entities are included in tax credit and other investments on the consolidated balance sheets, and the Corporation's share of income or loss is recorded in other noninterest income, while distributions in excess of the investment are recorded in asset gains, net.

All significant intercompany balances and transactions have been eliminated in consolidation.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ significantly from those estimates. The determination of the ACLL is particularly susceptible to significant change. Management has evaluated subsequent events for potential recognition or disclosure. Within the tables presented, certain columns and rows may not sum due to the use of rounded numbers for disclosure purposes.

Investment Securities

Securities are classified as HTM, AFS, or equity investments on the consolidated balance sheets at the time of purchase. Investment securities classified as HTM, which management has the positive intent and ability to hold to maturity, are reported at amortized cost. Investment securities classified as AFS are intended to be held for an indefinite period of time. These securities are carried at fair value and unrealized gains and losses, net of related deferred income taxes, are included in stockholders' equity as a separate component of OCI. Investment securities classified as equity securities are carried at fair value with changes in fair value immediately reflected in the consolidated statements of income. Any decision to sell AFS securities would be based on various factors, including, but not limited to, asset/liability management strategies, changes in interest rates or prepayment risks, liquidity needs, or regulatory capital considerations. Realized gains or losses on investment security sales (using specific identification method) are included in investment securities gains (losses), net, on the consolidated statements of income. Premiums and discounts are amortized or accreted into interest income over the estimated life (earlier of call date, maturity, or estimated life) of the related security, using a prospective method that approximates level yield.

In certain situations, management may elect to transfer certain investment securities from the AFS classification to the HTM classification. In such cases, the investment securities are reclassified at fair value at the time of transfer. Any unrealized gain or loss included in accumulated other comprehensive income (loss) at the time of transfer is retained therein and amortized over the remaining life of the investment security.

Management measures expected credit losses on HTM securities on a collective basis by major security type. Accrued interest receivable on HTM securities is excluded from the estimate of credit losses. The estimate of expected credit losses considers historical credit loss information that is adjusted for current conditions and reasonable and supportable forecasts and is included in HTM investment securities, net, at amortized cost on the consolidated balance sheets.

For AFS securities, on a quarterly basis, the Corporation evaluates whether any decline in fair value has resulted from credit losses or other factors. A determination as to whether a security's decline in fair value is the result of credit risk takes into

consideration numerous factors and the relative significance of any single factor can vary by security. Some factors the Corporation may consider in this impairment analysis include the extent to which the security has been in an unrealized loss position, the change in security rating, financial condition and near-term prospects of the issuer, as well as security and industry specific economic conditions.

In making this assessment, management considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses on investments is recorded for the credit loss, limited by the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an allowance for credit losses on investments is recognized in OCI.

Changes in the allowance for credit losses on investments are recorded as provision for, or reversal of, credit loss expense. Losses are charged against the allowance when management believes the AFS security is uncollectible or when either of the criteria regarding intent or requirement to sell is met. Accrued interest receivable on AFS securities is excluded from the estimate of credit losses.

Regulatory Stocks

The Corporation is required to maintain Federal Reserve Bank stock and FHLB stock as a member of both the Federal Reserve System and the FHLB, and in amounts as required by these institutions. These securities are “restricted” in that they can only be sold back to the respective institutions or another member institution at par. Therefore, they are less liquid than other marketable equity securities and their fair value is equal to amortized cost.

Loans Held for Sale

Residential Loans Held for Sale: Residential loans held for sale, which consist generally of current production of certain fixed-rate, first-lien residential mortgage loans, are carried at estimated fair value. Management has elected the fair value option to account for all newly originated mortgage loans held for sale, which results in the financial impact of changing market conditions being reflected currently in earnings as opposed to being dependent on the timing of sales. Therefore, the continually adjusted values better reflect the price the Corporation expects to receive from the sale of such loans. The estimated fair value is based on what secondary markets are currently offering for portfolios with similar characteristics.

Commercial Loans Held for Sale: Commercial loans held for sale are carried at LOCOM. The estimated fair value is based on a discounted cash flow analysis.

Loans

Management has the ability and intention to hold certain loans for the foreseeable future, until maturity, or pay-off. These loans are reported at their outstanding principal balances, net of any deferred fees and costs on originated loans. Origination fee income received on loans and amounts representing the estimated direct costs of origination are deferred and amortized to interest income over the life of the loan using the effective interest method. An ACLL is established for estimated credit losses in the loan portfolio. See Allowance for Credit Losses on Loans below for further policy discussion.

Nonaccrual Loans: Management considers a loan to be nonaccrual when it believes it will be unable to collect all amounts due according to the original contractual terms of the note agreement, including both principal and interest.

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are generally placed on nonaccrual status when contractually past due 90 days or more as to interest or principal payments, unless the loan is well-secured and in the process of collection. The accrual of interest income for commercial loans is discontinued when there is a clear indication that the borrower’s cash flow may not be sufficient to meet payments as they become due. The accrual of interest income for consumer loans is discontinued when loans reach specific delinquency levels.

Additionally, whenever management becomes aware of facts or circumstances that may adversely impact the collectability of principal or interest on loans, it is management’s practice to place such loans on a nonaccrual status immediately, rather than delaying such action until the loans become 90 days past due. When a loan is placed on nonaccrual status, previously accrued and uncollected interest is reversed, amortization of related deferred loan fees or costs is suspended, and income is recorded only to the extent that interest payments are subsequently received in cash and a determination has been made that the principal

and interest of the loan is collectible. If collectability of the principal and interest is in doubt, payments received are applied to loan principal.

The determination as to the ultimate collectability of the loan's remaining recorded investment must be supported by a current, well-documented credit evaluation of the borrower's financial condition and prospects for repayment, including consideration of the borrower's sustained historical repayment performance and other relevant factors. A nonaccrual loan is returned to accrual status when all delinquent principal and interest payments become current in accordance with the terms of the loan agreement, the borrower has demonstrated a period of sustained repayment performance, and the ultimate collectability of the total contractual principal and interest is no longer in doubt. A sustained period of repayment performance generally would be a minimum of six months.

Restructured Loans: Loans are considered restructured loans if concessions have been granted to borrowers that are experiencing financial difficulty. The concessions granted generally involve the modification of terms of the loan, such as changes in payment schedule or interest rate, which generally would not otherwise be considered. Restructured loans can involve loans remaining on nonaccrual, moving to nonaccrual, or continuing on accrual status, depending on the individual facts and circumstances of the borrower. Nonaccrual restructured loans are included and treated with all other nonaccrual loans. Performance prior to the restructuring or significant events that coincide with the restructuring are considered in assessing whether the borrower can meet the new terms and whether the loan should be returned to or maintained on accrual status. If the borrower's ability to meet the revised payment schedule is not reasonably assured, the loan remains on nonaccrual status.

Allowance for Credit Losses on Loans: The allowance for loan losses is a reserve for estimated lifetime credit losses in the loan portfolio at the balance sheet date. The expected lifetime credit losses are the product of multiplying the Corporation's estimate of probability of default, loss given default, and the individual loan level exposure at default on an undiscounted basis. The Corporation estimates the lifetime expected loss using prepayment and economic assumptions over the projected lifetime cash flow of these loans. Actual credit losses, net of recoveries, are deducted from the allowance for loan losses. A provision for credit losses, which is a charge against earnings, is recorded to bring the allowance for loan losses to a level that, in management's judgment, is appropriate to absorb the expected lifetime losses in the loan portfolio.

The Corporation applies a methodology that is designed to assess the appropriateness of the allowance for loan losses within the Corporation's loan segmentation. The methodology also focuses on the evaluation of several factors, including but not limited to: evaluation of facts and issues related to specific loans, management's ongoing review and grading of the loan portfolio using a dual risk rating system consisting of probability of default and loss given default models, which are based on loan grades for commercial loans and credit reports for consumer loans applied based on portfolio segmentation leveraging industry breakouts in commercial and industrial and property types in CRE for commercial loans and loan types for consumer loans, consideration of historical loan loss and delinquency experience on each portfolio category, trends in past due and nonaccrual loans, the level of potential problem loans, the risk characteristics of the various classifications of loans, changes in the size and character of the loan portfolio, concentrations of loans to specific borrowers or industries, existing economic conditions and economic forecasts, the fair value of underlying collateral, and other qualitative and quantitative factors which could affect potential credit losses.

The Corporation typically utilizes the Moody's Baseline economic forecast in the allowance model and applies that forecast over a reasonable and supportable period with reversion to historical losses. For additional detail on the reasonable and supportable period and reversion inputs, see Note 3. The Corporation estimates the lifetime expected loss using prepayment assumptions over the projected lifetime cash flows of the loan. Because each of the criteria used is subject to change, the analysis of the allowance for loan losses is not necessarily indicative of the trend of future loan losses in any particular loan category. The total allowance for loan losses is available to absorb losses from any segment of the loan portfolio.

Commercial loan relationships over \$0.5 million that have nonaccrual status or that otherwise do not share similar risk characteristics with other loans, including those for which a debt restructuring is probable, are evaluated individually for expected credit losses. Accrued interest receivable on loans is excluded from the estimate of credit losses. The ACLL attributable to the loan is allocated based on management's estimate of the borrower's ability to repay the loan given the availability of collateral, other sources of cash flows, as well as evaluation of legal options available to the Corporation. The amount of expected loan loss is measured based upon the present value of expected future cash flows discounted at the loan's effective interest rate, the fair value of the underlying collateral less applicable selling costs, or the observable market price of the loan. If foreclosure is probable or the loan is collateral dependent, impairment is measured using the fair value of the loan's collateral, less costs to sell. Large groups of homogeneous loans, such as residential mortgage, home equity, auto finance, and other consumer, are collectively evaluated for impairment.

The allowance for unfunded commitments leverages the same methodology utilized to measure the allowance for loan losses. The Corporation estimates expected credit losses over the contractual period in which the Corporation is exposed to credit risk via a contractual obligation to extend credit, unless that obligation is unconditionally cancellable by the Corporation. The

estimate includes consideration of the likelihood that funding will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life.

A portion of the ACLL is comprised of adjustments for qualitative factors not reflected in the quantitative model.

While management uses currently available information to recognize losses on loans, future adjustments to the ACLL may be necessary based on newly received appraisals, updated commercial customer financial statements, rapidly deteriorating cash flow, and changes in economic conditions that affect our customers.

OREO

OREO is included in other assets on the consolidated balance sheets and is comprised of property acquired through a foreclosure proceeding or acceptance of a deed-in-lieu of foreclosure, and loans classified as in-substance foreclosure. OREO is recorded at the lower of the book value or fair value of the underlying property collateral, less estimated selling costs. This fair value becomes the new cost basis for the foreclosed asset. The initial write-down, if any, will be recorded as a charge off against the allowance for loan losses. Any subsequent write-downs to reflect current fair value, as well as gains and losses on disposition and revenues and expenses incurred in maintaining such properties, are expensed as incurred. OREO also includes bank premises formerly but no longer used for banking, property originally acquired for future expansion but no longer intended to be used for that purpose, and property currently held for sale. Banking premises are transferred at the lower of carrying value or fair value, less estimated selling costs and any write-down is expensed as incurred.

Premises and Equipment and Software

Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are computed on the straight-line method over the estimated useful lives of the related assets or the lease term. Maintenance and repairs are charged to expense as incurred, while additions or major improvements are capitalized and depreciated over the estimated useful lives. Leasehold improvements are amortized on a straight-line basis over the lesser of the lease term, including extension options which the Corporation has determined are reasonably certain to be exercised, or the estimated useful lives of the improvements. Software, included in other assets on the consolidated balance sheets, is amortized on a straight-line basis over the contract terms or the estimated useful life of the software.

Goodwill and Intangible Assets

Goodwill and Other Intangible Assets: The excess of the cost of an acquisition over the fair value of the net assets acquired consists primarily of goodwill and CDIs. CDIs have estimated finite lives and are amortized on a straight-line basis to expense over a 10-year period. The Corporation reviews long-lived assets and certain identifiable intangibles for impairment at least annually, or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable, in which case an impairment charge would be recorded.

Goodwill is evaluated for impairment on an annual basis, or whenever events or changes in circumstances indicate the fair value of a reporting unit is below its carrying amount. The impairment testing process is conducted by assigning net assets and goodwill to each reporting unit. An initial qualitative evaluation is made to assess the likelihood of impairment and determine whether further quantitative testing to calculate the fair value is necessary. When the qualitative evaluation indicates that impairment is more likely than not, quantitative testing is required whereby the fair value of each reporting unit is calculated and compared to the recorded book value, "step one." If the calculated fair value of the reporting unit exceeds its carrying value, goodwill is not considered impaired. If the carrying value of a reporting unit exceeds its calculated fair value, an impairment charge is assessed, limited to the amount of goodwill allocated to that reporting unit.

Mortgage Servicing Rights: The Corporation sells residential mortgage loans in the secondary market and typically retains the right to service the loans sold. Upon sale of loans, MSR assets are capitalized and recorded at the current fair value of future net cash flows expected to be realized for performing servicing activities. The Corporation has made the irrevocable election to account for its MSRs asset under the fair value measurement method. Under this methodology, changes in the fair value are recognized in earnings as they occur through mortgage banking, net on the consolidated statements of income. MSRs are not traded in active markets. A cash flow model is used to determine fair value.

Income Taxes

Amounts provided for income tax expense are based on income reported for financial statement purposes and do not necessarily represent amounts currently payable under tax laws. Deferred income taxes, which arise principally from temporary differences between the amounts reported in the financial statements and the tax bases of assets and liabilities, are included in the amounts provided for income taxes. In assessing the realizability of DTAs, management considers whether it is more likely than not that

some portion or all of the DTAs will not be realized. The ultimate realization of DTAs is dependent upon the generation of future taxable income and tax planning strategies which will create taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, the amount of taxes paid in available carryback years, projected future taxable income, and, if necessary, tax planning strategies in making this assessment.

The Corporation files a consolidated federal income tax return and separate or combined state income tax returns. Accordingly, amounts equal to tax benefits of those subsidiaries having taxable federal or state losses or credits are offset by other subsidiaries that incur federal or state tax liabilities.

It is the Corporation's policy to provide for uncertainty in income taxes as a part of income tax expense based upon management's assessment of whether a tax benefit is more likely than not to be sustained upon examination by tax authorities. To the extent the Corporation prevails in matters for which a liability for an unrecognized tax benefit was established or is required to pay amounts in excess of the liability established, the Corporation's effective tax rate in a given financial statement period may be impacted.

Derivative and Hedging Activities

Derivative instruments are recorded in the consolidated balance sheets as either an asset or a liability and measured at fair value. Accounting for changes in fair value of derivatives depends on whether the derivative is designated and qualifies in a hedging relationship. At inception, the Corporation designates the derivative contract as either a fair value hedge (i.e., a hedge of the fair value of a recognized asset or liability), a cash flow hedge (i.e., a hedge of the variability of cash flows to be received or paid related to a recognized asset or liability), or a non-designated hedge.

Changes in the fair value of a derivative that has been designated and qualifies as a fair value hedge, along with the changes in the fair value of the hedged asset or liability that is attributable to the hedged risk, are recorded in current period earnings. Changes in the fair value of a derivative that has been designated and qualifies as a cash flow hedge are recorded in other comprehensive income, net of income taxes, and reclassified into earnings in the period during which the hedged item affects earnings. Changes in the fair value of derivatives which do not qualify for hedge accounting are reported in current period earnings.

For those derivatives to which hedge accounting is applied, the Corporation formally documents the hedging relationship, the risk management objective, and strategy for undertaking the hedge. This documentation identifies the hedging instrument, the hedged item or transaction, the nature of the hedged risk, and, unless the hedge meets all of the criteria to assume there is no ineffectiveness, the method that will be used to assess the effectiveness of the hedging instrument. The Corporation typically assesses effectiveness using statistical regression at inception and on an ongoing basis, the shortcut method, or the critical terms match method. Shortcut method and critical terms match method assume perfect hedge effectiveness and eliminate the quantitative aspect of assessing hedge effectiveness.

Hedge accounting is discontinued prospectively when:

- The derivative is no longer effective or expected to be effective in offsetting changes in the fair value, cash flows, or changes in net investment of a hedged item (including firm commitments or forecasted transactions);
- The derivative expires, is sold, terminated, or exercised;
- The forecasted transaction is no longer probable of occurring by the end of the originally specified time period;
- The hedged firm commitment no longer meets the definition of a firm commitment; or
- the designation of the derivative as a hedging instrument is removed.

When hedge accounting is discontinued and the derivative no longer qualifies as an effective fair value or cash flow hedge, the derivative continues to be carried on the balance sheet at fair value and changes in fair value will be recorded in current period earnings unless re-designated.

Like other financial instruments, derivatives contain an element of credit risk, which is the possibility that the Corporation will incur a loss because the counterparty fails to meet its contractual obligations. Notional values of interest rate swaps and other off-balance sheet financial instruments significantly exceed the credit risk associated with these instruments and represent contractual balances on which calculations of amounts to be exchanged are based. Credit exposure is limited to the sum of the aggregate fair value of positions that have become favorable to the Corporation, including any accrued interest receivable due from counterparties. Potential credit losses are mitigated by derivatives through central clearing parties, careful evaluation of

counterparty credit standing, selection of counterparties from a limited group of high quality institutions, collateral agreements, and other contract provisions. The corporation considers the value of collateral held and collateral provided in determining the net carrying value of derivatives.

Legal Proceedings

On at least a quarterly basis, the Corporation assesses its liabilities and contingencies in connection with all pending or threatened claims and litigation, utilizing the most recent information available. On a matter by matter basis, an accrual for loss is established for those matters which the Corporation believes it is probable that a loss may be incurred and that the amount of such loss can be reasonably estimated. Once established, each accrual is adjusted as appropriate to reflect any subsequent developments. Accordingly, management's estimate will change from time to time, and actual losses may be more or less than the current estimate. For matters where a loss is not probable, or the amount of the loss cannot be estimated, no accrual is established.

Securities Sold Under Agreement to Repurchase

The Corporation enters into agreements under which it sells securities subject to an obligation to repurchase the same or similar securities. Under these arrangements, the Corporation may transfer legal control over the assets but still retain effective control through an agreement that both entitles and obligates the Corporation to repurchase the assets. These repurchase agreements are accounted for as collateralized financing arrangements, i.e., secured borrowings whereby the collateral would be used to settle the fair value of the repurchase agreement should the Corporation be in default, e.g., fails to make an interest payment to the counterparty, and not as a sale and subsequent repurchase of securities, i.e., there is no offsetting or netting of the investment securities assets with the repurchase agreement liabilities. The obligation to repurchase the securities is reflected as a liability within federal funds purchased and securities sold under agreements to repurchase on the Corporation's consolidated balance sheets, while the securities underlying the repurchase agreements remain in the respective investment securities asset accounts. See Note 8 for additional information on repurchase agreements.

Retirement Plans

The funded status of the retirement plans is recognized as an asset or liability on the consolidated balance sheets and changes in that funded status are recognized in the year in which the changes occur through OCI. Plan assets and benefit obligations are measured as of fiscal year end. The measurement of the projected benefit obligation and pension expense involve actuarial valuation methods and the use of various actuarial and economic assumptions. The Corporation monitors the assumptions and updates them periodically. Due to the long-term nature of the pension plan obligation, actual results may differ significantly from estimations. Such differences are adjusted over time as the assumptions are replaced by facts and values are recalculated.

Stock-Based Compensation

The fair value of restricted common stock awards is their fair market value on the date of grant. Performance awards are based on one or more performance measures as selected by the Compensation & Benefits Committee in its discretion, with vesting ranging from a minimum of 0% to a maximum of 150% of the target award. Performance awards are valued utilizing a Monte Carlo simulation model to estimate fair value of the awards at the grant date. The fair values of stock options and restricted stock awards are amortized as compensation expense on a straight-line basis over the vesting period of the grants. Expenses related to stock options and restricted stock awards are fully recognized on the date the colleague meets the definition of normal or early retirement as outlined in the relevant plan document. Compensation expense recognized is included in personnel expense on the consolidated statements of income.

Comprehensive Income

Comprehensive income includes all changes in stockholders' equity during a period, except those resulting from transactions with stockholders. In addition to net income, other components of the Corporation's comprehensive income include the after tax effect of changes in net unrealized gain/loss on AFS securities, changes in unrealized gain/loss on cash flow hedge derivatives, and changes in net actuarial gain/loss on defined benefit pension and postretirement plans. Comprehensive income is reported on the accompanying consolidated statements of changes in stockholders' equity and consolidated statements of comprehensive income.

Fair Value Measurements

Fair value represents the estimated price at which an orderly transaction to sell an asset or to transfer a liability would take place between market participants at the measurement date under current market conditions (i.e., an exit price concept). As there is no active market for many of the Corporation's financial instruments, estimates are made using discounted cash flow or other

valuation techniques. Inputs into the valuation methods are subjective in nature, involve uncertainties, and require significant judgment and therefore cannot be determined with precision. Accordingly, the derived fair value estimates presented herein are not necessarily indicative of the amounts the Corporation could realize in a current market exchange. Assets and liabilities are categorized into three levels based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy in which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Corporation’s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. Below is a brief description of each fair value level.

- Level 1 — Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Corporation has the ability to access.
- Level 2 — Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals.
- Level 3 — Level 3 inputs are unobservable inputs for the asset or liability, which are typically based on an entity’s own assumptions, as there is little, if any, related market activity.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash and cash equivalents are considered to include cash and due from banks, interest-bearing deposits in other financial institutions, and federal funds sold and securities purchased under agreements to resell. The Corporation does not have any restricted cash as a result of the Federal Reserve reducing the required reserve ratio to zero.

Earnings Per Common Share

Earnings per common share are calculated utilizing the two-class method. Basic earnings per common share are calculated by dividing the sum of distributed earnings to common shareholders and undistributed earnings allocated to common shareholders by the weighted average number of common shares outstanding. Diluted earnings per common share are calculated by dividing the sum of distributed earnings to common shareholders and undistributed earnings allocated to common shareholders by the weighted average number of common shares outstanding adjusted for the dilutive effect of common stock awards (outstanding stock options and unvested restricted stock awards).

New Accounting Pronouncements Adopted

Standard	Description	Date of adoption	Effect on financial statements
ASU 2023-09 Income Taxes (Topic 740): Improvements to Income Tax Disclosures	The amendments in this update address investor requests for more transparency about income tax information through improvements to income tax disclosures primarily related to the rate reconciliation and income taxes paid information. This update also includes certain other amendments to improve the effectiveness of income tax disclosures. The amendments in this update are effective for fiscal years beginning after December 15, 2024 and are to be applied on a prospective basis. Early adoption is permitted.	Fiscal year 2025	The Corporation has implemented the enhanced disclosure requirements in 2025 and retrospectively applied them to the prior periods presented. Refer to Note 12 for additional information.

Future Accounting Pronouncements

The expected impact of applicable material accounting pronouncements recently issued or proposed but not yet required to be adopted are discussed in the table below. To the extent that the adoption of new accounting standards materially affects the Corporation's financial condition, results of operations, liquidity or disclosures, the impacts are discussed in the applicable sections of this financial review.

Standard	Description	Date of adoption	Effect on financial statements
ASU 2024-03 Income Statement-Reporting Comprehensive Income-Expense Disaggregation Disclosures (Subtopic 220-40)	The amendments in this update require a public business entity to disclose specific information about certain costs and expenses in the notes to its financial statements for interim and annual reporting periods. The objective of the disclosure requirements is to provide disaggregated information about a public business entity's expenses to help investors (a) better understand the entity's performance, (b) better assess the entity's prospects for future cash flows, and (c) compare an entity's performance over time and with that of other entities. The amendments in this update are effective for annual reporting periods beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted.	Fiscal year 2027 and interim periods thereafter	The Corporation is currently evaluating the impact on its disclosures.
ASU 2025-06 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40)	The amendments in this update simplify the capitalization guidance by removing all references to prescriptive and sequential software development stages to align with the shift to incremental and iterative software development methods.	Interim period ending March 31, 2028 and subsequent periods	The Corporation is currently evaluating the impact on its disclosures.
ASU 2025-08 Financial Instruments-Credit Losses (Topic 326)	The amendments in this update expand the gross-up approach for initial recognition and measurement of acquired financial assets to purchased seasoned loans.	Interim period ending March 31, 2027 and subsequent periods	The Corporation is currently evaluating the impact on its financial statements.

Note 2 Investment Securities

Investment securities are designated as AFS, HTM, or equity on the consolidated balance sheets. The amortized cost and fair values of AFS and HTM securities at December 31, 2025 were as follows:

(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
AFS investment securities				
Obligations of state and political subdivisions (municipal securities)	\$ 3,063	\$ 1	\$ (20)	3,044
Residential mortgage-related securities:				
FNMA/FHLMC	134,142	1,214	(5,493)	129,863
GNMA	5,000,015	40,067	(253)	5,039,829
Commercial mortgage-related securities:				
FNMA/FHLMC	17,959	—	(1,001)	16,958
GNMA	113,374	—	(3,818)	109,556
Asset backed securities:

SBA	283	—	(14)	269
Other debt securities	3,000	—	(2)	2,998
Total AFS investment securities	<u>\$ 5,367,813</u>	<u>\$ 41,301</u>	<u>\$ (11,551)</u>	<u>5,397,563</u>
HTM investment securities				
U.S. Treasury securities	\$ 996	\$ 19	\$ —	1,015
Obligations of state and political subdivisions (municipal securities)	1,628,088	3,070	(123,856)	1,507,302
Residential mortgage-related securities:				
FNMA/FHLMC	823,630	165	(127,333)	696,462
GNMA	39,123	82	(2,321)	36,884
Private-label	302,817	—	(43,990)	258,827
Commercial mortgage-related securities:				
FNMA/FHLMC	763,370	—	(113,004)	650,366
GNMA	44,552	152	(4,566)	40,138
Total HTM investment securities	<u>\$ 3,602,576</u>	<u>\$ 3,488</u>	<u>\$ (415,070)</u>	<u>3,190,994</u>

The amortized cost and fair values of AFS and HTM securities at December 31, 2024 were as follows:

(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
AFS investment securities				
Obligations of state and political subdivisions (municipal securities)	\$ 3,063	\$ —	\$ (58)	\$ 3,005
Residential mortgage-related securities:				
FNMA/FHLMC	120,272	190	(9,534)	110,928
GNMA	4,236,199	5,379	(13,851)	4,227,727
Commercial mortgage-related securities:				
FNMA/FHLMC	18,332	—	(1,332)	17,000
GNMA	116,275	—	(4,800)	111,475
Asset backed securities:				
FFELP	108,319	123	(604)	107,839
SBA	495	—	(24)	471
Other debt securities	3,000	—	(11)	2,989
Total AFS investment securities	\$ 4,605,954	\$ 5,693	\$ (30,213)	\$ 4,581,434
HTM investment securities				
U.S. Treasury securities	\$ 1,000	\$ —	\$ (1)	\$ 999
Obligations of state and political subdivisions (municipal securities)	1,659,722	1,122	(174,202)	1,486,642
Residential mortgage-related securities:				
FNMA/FHLMC	885,476	22,934	(186,464)	721,946
GNMA	43,693	9	(3,774)	39,927
Private-label	324,182	8,135	(65,963)	266,353
Commercial mortgage-related securities:				
FNMA/FHLMC	772,456	10,217	(159,078)	623,595
GNMA	52,219	236	(6,424)	46,032
Total HTM investment securities	\$ 3,738,747	\$ 42,653	\$ (595,906)	\$ 3,185,494

Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The expected maturities of AFS and HTM securities at December 31, 2025, are shown below:

(in thousands)	AFS		HTM	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 1,000	\$ 1,000	\$ 4,214	\$ 4,215
Due after one year through five years	4,430	4,422	99,077	99,036
Due after five years through ten years	—	—	218,537	218,398
Due after ten years	633	620	1,307,256	1,186,668
Total municipal, U.S. Treasury and other debt securities	6,063	6,042	1,629,084	1,508,317
Residential mortgage-related securities:				
FNMA/FHLMC	134,142	129,863	823,630	696,462
GNMA	5,000,015	5,039,829	39,123	36,884
Private-label	—	—	302,817	258,827
Commercial mortgage-related securities:				
FNMA/FHLMC	17,959	16,958	763,370	650,366
GNMA	113,374	109,556	44,552	40,138
Asset backed securities:				
FFELP	95,977	95,046	—	—
SBA	283	269	—	—
Total investment securities	\$ 5,367,813	\$ 5,397,563	\$ 3,602,576	\$ 3,190,994
Ratio of fair value to amortized cost		100.6 %		88.6 %

The following table summarizes gross realized gains and losses on AFS securities, the gain or loss on sale and fair value adjustment of equity securities, and proceeds from the sale of AFS investment securities for each of the three years ended December 31 shown below:

(in thousands)	2025	2024	2023
Gross realized gains on AFS securities	\$ —	\$ —	\$ 83
Gross realized losses on AFS securities	—	(148,380)	(65,022)
Gain on sale of equity securities	—	4,054	76
Fair value adjustment of equity securities	49	179	5,960
Investment securities (losses) gains, net	\$ 49	\$ (144,147)	\$ (58,903)
Proceeds from sales of AFS investment securities	\$ —	\$ 1,141,231	\$ 715,066

During the fourth quarter of 2024, the Corporation sold lower yielding AFS securities with a carrying value of \$1.1 billion at a net loss of \$148.2 million and reinvested the proceeds into higher yielding and lower risk-weighted GNMA securities. Additionally, during the first quarter of 2024, the Corporation sold its remaining Visa Class B restricted shares at a gain of \$4.1 million.

During the fourth quarter of 2023, the Corporation sold lower yielding AFS securities with a carrying value of \$715.1 million at a net loss of \$64.9 million and reinvested the proceeds into higher yielding and lower risk-weighted GNMA securities. Additionally, during the fourth quarter of 2023, the Corporation sold 1,000 shares of its Visa Class B restricted shares and wrote up its remaining shares based on that market price, resulting in a gain of \$5.9 million.

Investment securities with a carrying value of \$1.2 billion at December 31, 2025 and \$1.5 billion at December 31, 2024 were pledged as required to secure certain deposits or for other purposes.

Accrued interest receivable on HTM securities totaled \$17.7 million and \$18.1 million at December 31, 2025 and December 31, 2024, respectively. Accrued interest receivable on AFS securities totaled \$23.0 million and \$21.4 million at December 31, 2025 and December 31, 2024, respectively. Accrued interest receivable on both HTM and AFS securities is included in interest receivable on the consolidated balance sheets.

The Corporation holds U.S. Treasury, municipal, and mortgage-related securities issued by the U.S. government or a GSE which are backed by the full faith and credit of the U.S. government. The Corporation also holds private-label residential mortgage-related securities that have credit enhancement which, as of December 31, 2025, covers the first 16% of losses. As a result, no allowance for credit losses has been recorded related to these securities.

The allowance for credit losses on HTM securities was \$0.1 million and \$0.1 million at December 31, 2025 and December 31, 2024, attributable entirely to the Corporation's municipal securities, included in HTM investment securities, net, at amortized cost on the consolidated balance sheets.

The following represents gross unrealized losses and the related fair value of AFS and HTM securities, aggregated by investment category and length of time individual securities have been in a continuous unrealized loss position, at December 31, 2025:

On a quarterly basis, the Corporation refreshes the credit quality of each HTM security. The Company monitors the credit quality of HTM securities through credit ratings provided by S&P and Moody's. Investment grade securities are rated BBB- or higher by S&P, or Baa3 or higher by Moody's, and are generally considered by the rating agencies and market participants to be of low credit risk. As of December 31, 2025 and December 31, 2024, the Corporation's HTM portfolio contained all investment grade securities except for securities that were not rated which were individually reviewed noting no credit quality issues.

Based on the Corporation's evaluation, management does not believe any unrealized losses at December 31, 2025 represent credit deterioration as these unrealized losses are primarily attributable to changes in interest rates and the current market conditions. As of December 31, 2025, the Corporation does not intend to sell, nor does it believe that it will be required to sell, the securities in an unrealized loss position before recovery of their amortized cost basis.

Regulatory stocks

The Corporation had FHLB stock of \$154.4 million and \$91.5 million at December 31, 2025 and December 31, 2024, respectively. The Corporation had Federal Reserve Bank stock of \$98.1 million and \$88.1 million at December 31, 2025 and December 31, 2024, respectively.

Accrued interest receivable on FHLB stock totaled \$2.8 million and \$1.8 million at December 31, 2025 and December 31, 2024. There was no accrued interest receivable on Federal Reserve Bank stock at both December 31, 2025 and December 31, 2024. Accrued interest receivable on both FHLB stock and Federal Reserve Bank stock is included in interest receivable on the consolidated balance sheets.

Equity Securities

Equity securities with readily determinable fair values: The Corporation's portfolio of equity securities with readily determinable fair values is primarily comprised of mutual funds. The Corporation had equity securities with readily determinable fair values of \$11.1 million at December 31, 2025 and \$10.7 million at December 31, 2024.

Equity securities without readily determinable fair values: The Corporation's portfolio of equity securities without readily determinable fair values consists of an investment in a private loan fund. The Corporation had equity securities without readily determinable fair values carried at \$15.0 million at December 31, 2025 and \$12.6 million at December 31, 2024. During the first quarter of 2024, the Corporation sold all of its remaining Visa Class B restricted shares.

Note 3 Loans

The period end loan composition was as follows:

(in thousands)	December 31, 2025	December 31, 2024
Commercial and industrial	\$ 11,799,757	\$ 10,573,741
Commercial real estate - owner occupied	1,186,324	1,143,741

Total loans	\$ 31,163,614	\$ 29,768,586

Accrued interest receivable on loans totaled \$117.6 million at December 31, 2025, and \$126.1 million at December 31, 2024, and is included in interest receivable on the consolidated balance sheets. The amount of accrued interest reversed totaled \$3.4 million for the year ended December 31, 2025, \$2.4 million for the year ended December 31, 2024, and \$1.8 million for the year ended December 31, 2023.

The Corporation has granted loans to its directors, executive officers, or their related interests. These loans were made on substantially the same terms, including rates and collateral, as those prevailing at the time for comparable transactions with other unrelated customers, and do not involve more than a normal risk of collection. These loans to related parties are summarized below:

(in thousands)	2025	2024
Balance at beginning of year	\$ 21,280	\$ 5,406
New loans	2,181	17,395
Repayments	(3,163)	(2,359)
Change due to status of executive officers and directors	(15,167)	838
Balance at end of year	\$ 5,131	\$ 21,280

The following table presents loans by credit quality indicator by origination year at December 31, 2025:

Factors that are important to managing overall credit quality are sound loan underwriting and administration, systematic monitoring of existing loans and commitments, effective loan review on an ongoing basis, early identification of potential problems, and appropriate policies for ACLL, nonaccrual loans, and charge offs. See Note 1 for the Corporation's accounting policy for loans.

For commercial loans, management has determined the pass credit quality indicator to include credits exhibiting acceptable financial statements, cash flow, and leverage. If any risk exists, it is mitigated by the loan structure, collateral, monitoring, or control. For consumer loans, performing loans include credits performing in accordance with the original contractual terms.

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Special mention credits have potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the credit or in the credit position at some future date. Accruing loan modifications could be pass or special mention, depending on the risk rating on the loan. Substandard loans are considered inadequately protected by the current sound worth and paying capacity of the obligor or the collateral pledged, if any. These loans have a well-defined weakness, or weaknesses, which may jeopardize liquidation of the debt, and are characterized by the distinct possibility the Corporation will sustain some loss if the deficiencies are not corrected. Commercial loan relationships over \$0.5 million in nonaccrual status, or that otherwise do not share similar risk characteristics with other loans, including those for which a debt restructuring is probable, are evaluated individually for expected credit losses. Commercial loans classified as special mention, substandard, and nonaccrual are reviewed at a minimum

on a quarterly basis, while pass credits, which are performing rated credits, are generally reviewed on an annual basis or more frequently if the loan renewal is less than one year or if otherwise warranted.

The recorded investment of consumer loans secured by residential real estate properties for which foreclosure proceedings are in process totaled \$20.1 million at December 31, 2025 and \$22.9 million at December 31, 2024.

The following table presents loans by past due status at December 31, 2025:

Home equity	276	244	339
Total loans modified	\$ 5,261	\$ 3,093	\$ 1,204

The following tables summarize, by loan portfolio, the financial effect of the Corporation's loan modifications on the modified loans:

Loan Type	Interest Rate Concession		
	Financial Effect, Weighted Average Contractual Interest Rate (Decrease) Increase ^(a)		
	Twelve Months Ended December 31,		
	2025	2024	2023
Commercial and industrial	(24)%	(18)%	(19)%
Residential mortgage	1 %	2 %	1 %
Auto finance	— %	(7)%	(9)%
Home equity	(2)%	(3)%	— %
Other consumer	(21)%	(21)%	(21)%
Weighted average of total loans modified	(6)%	(8)%	(11)%

(a) Some interest rate concessions may involve an increase in rate that was lower in comparison to prevailing market rates.

Loan Type	Term Extension		
	Financial Effect, Weighted Average Term Increase ^(a)		
	Twelve Months Ended December 31,		
	2025	2024	2023
Residential mortgage	137 months	108 months	65 months
Home equity	78 months	63 months	85 months
Weighted average of total loans modified	134 months	105 months	71 months

(a) During the twelve months ended December 31, 2025, December 31, 2024, and December 31, 2023 term extensions changed the weighted average term on modified loans from 285 to 419 months, 282 to 386 months, and 175 to 245 months, respectively.

The Corporation closely monitors the performance of loans that are modified to borrowers experiencing financial difficulty to understand the effectiveness of its modification efforts. The following table depicts the performance of loans that have been modified in the twelve months ended December 31, 2025:

(in thousands)	Payment Status (Amortized Cost Basis)		
	Current	30-89 Days Past Due	90+ Days Past Due
Commercial and industrial	\$ 458	\$ —	\$ —
Residential mortgage	5,370	872	267
Home equity	106	170	—
Other consumer	2,271	—	—
Total loans modified	\$ 8,205	\$ 1,042	\$ 267

The following table depicts the performance of loans that have been modified in the twelve months ended December 31, 2024:

(in thousands)	Payment Status (Amortized Cost Basis)		
	Current	30-89 Days Past Due	90+ Days Past Due
Commercial and industrial	\$ 475	\$ —	\$ —
Residential mortgage	2,355	453	336
Auto finance	5	3	2
Home equity	244	—	—
Other consumer	2,239	—	—
Total loans modified	\$ 5,318	\$ 456	\$ 338

The following table depicts the performance of loans that have been modified in the twelve months ended December 31, 2023:

(in thousands)	Payment Status (Amortized Cost Basis)		
	Current	30-89 Days Past Due	90+ Days Past Due
Commercial and industrial	\$ 306	\$ —	\$ —
Residential mortgage	773	56	245
Auto finance	218	36	—
Home equity	310	123	9
Other consumer	1,449	—	—
Total loans modified	\$ 3,056	\$ 215	\$ 253

The following table provides the amortized cost of loan modifications by loan portfolio and type of concession for loans that were modified in the previous twelve months had a payment default, as of December 31, 2025:

(in thousands)	Amortized Cost of Loan Modifications that Subsequently Defaulted		
	Interest Rate Concession	Term Extension	Combination Interest Rate Reduction and Term Extension
Residential mortgage	\$ —	\$ —	213
Home equity	—	—	45
Total loans modified	\$ —	\$ —	258

The following table provides the amortized cost of loan modifications by loan portfolio and type of concession that were modified in the previous twelve months and subsequently had a payment default, as of December 31, 2024:

(in thousands)	Amortized Cost of Loan Modifications that Subsequently Defaulted		
	Interest Rate Concession	Term Extension	Combination Interest Rate Reduction and Term Extension
Residential mortgage	\$ —	\$ —	151
Auto finance	2	—	—
Home equity	—	—	186
Total loans modified	\$ 2	\$ —	337

The following table provides the amortized cost of loan modifications by loan portfolio and type of concession that were modified in the previous twelve months and subsequently had a payment default, as of December 31, 2023:

(in thousands)	Amortized Cost of Loan Modifications that Subsequently Defaulted			
	Interest Rate Concession		Combination Interest Rate Reduction and Term Extension	
Residential mortgage	\$	—	\$ 208	\$ 248
Home equity		—		27
Total loans modified	\$	—	\$ 208	\$ 275

The nature and extent of the impairment of modified loans, including those which have experienced a subsequent payment default, are considered in the determination of an appropriate level of the ACLL.

Allowance for Credit Losses on Loans

The ACLL is comprised of the allowance for loan losses and the allowance for unfunded commitments. The level of the ACLL represents management's estimate of an amount appropriate to provide for expected lifetime credit losses in the loan portfolio at the balance sheet date. The expected lifetime credit losses are the product of multiplying the Corporation's estimates of probability of default, loss given default, and the individual loan level exposure at default on an undiscounted basis. A main factor in the determination of the ACLL is the economic forecast. The forecast the Corporation used for December 31, 2025 was the Moody's baseline scenario from November 2025, which was reviewed against the December 2025 baseline scenario with no material updates made, over a two year reasonable and supportable period with straight-line reversion to the historical losses over the second year of the period. See Note 1 for the Corporation's accounting policy on the ACLL. The allowance for unfunded commitments is maintained at a level believed by management to be sufficient to absorb expected lifetime losses related to unfunded credit facilities (including unfunded loan commitments and letters of credit). See Note 15 for additional information on the change in the allowance for unfunded commitments.

The following table presents a summary of the changes in the ACLL by portfolio segment for the year ended December 31, 2025:

(in thousands)	Dec 31, 2024	Charge Offs	Recoveries	Net Charge Offs	Provision for Credit Losses	Dec 31, 2025	ACLL / Loans
Allowance for loan losses

Note 4 Goodwill and Other Intangible Assets

Goodwill

The Corporation conducted its most recent annual impairment testing in May 2025, utilizing a qualitative assessment. Based on this assessment, management concluded that it is more likely than not that the estimated fair value exceeded the carrying value (including goodwill) for each reporting unit. Therefore, a step one quantitative analysis was not required. There have been no events since the May 2025 impairment test that have changed the Corporation's impairment assessment conclusion. There were no impairment charges recorded in 2025, 2024, or 2023.

The Corporation had goodwill of \$1.1 billion at both December 31, 2025 and 2024.

Core Deposit Intangibles

The Corporation has CDIs which are amortized. Changes in the gross carrying amount, accumulated amortization, and net book value for CDIs were as follows:

(in thousands)	2025		2024		2023
Core deposit intangibles					
Gross carrying amount at the beginning of the year	\$	88,109	\$	88,109	\$ 88,109
Accumulated amortization		(65,260)		(56,449)	(47,638)
Net book value	\$	22,849	\$	31,660	\$ 40,471
Amortization during the year	\$	8,811	\$	8,811	\$ 8,811

Mortgage Servicing Rights

A summary of changes in the balance of the MSRs asset under the fair value measurement method is as follows:

(in thousands)	2025		2024	
Mortgage servicing rights				
Mortgage servicing rights at beginning of period	\$	87,683	\$	84,390
Additions		8,716		6,707
Decay		(8,621)		(8,060)
Valuation:				
Changes in fair value of asset		(1,441)		4,646
Mortgage servicing rights at end of period	\$	86,337	\$	87,683
Portfolio of residential mortgage loans serviced for others (“servicing portfolio”)	\$	6,191,012	\$	6,285,018
Mortgage servicing rights to servicing portfolio		1.39 %		1.40 %

The projections of amortization expense for CDIs and decay for MSRs are based on existing asset balances, the current interest rate environment, and prepayment speeds as of December 31, 2025. The actual expense the Corporation recognizes in any given period may be significantly different depending upon acquisition or sale activities, changes in interest rates, prepayment speeds, market conditions, regulatory requirements, and events or circumstances that indicate the carrying amount of an asset may not be recoverable. The following table shows the estimated future yearly amortization expense for CDIs and decay for MSRs:

(in thousands)	Core Deposit Intangibles		Mortgage Servicing Rights	
2026	\$	8,811	\$	10,559
2027		8,811		11,814
2028		3,485		11,616
2029		1,681		10,645
2030		61		9,440
Beyond 2030		—		32,263
Total estimated amortization expense and MSRs decay ^(a)	\$	22,849	\$	86,337

(a) Includes the decrease in value due to passage of time, including the impact from both regularly scheduled principal payments and partial loan paydowns.

Note 5 Premises and Equipment

See Note 1 for the Corporation's accounting policy for premises and equipment. A summary of the Corporation's premises and equipment is as follows:

(\$ in thousands)	Estimated Useful Lives	December 31, 2025	December 31, 2024
Land	—	\$ 64,447	\$ 63,642
Land improvements	3 – 20 years	25,183	22,911
Buildings and improvements	5 – 40 years	433,010	415,690
Computers and related equipment	4 – 8 years	62,050	60,198
Furniture, fixtures, and other equipment	3 – 20 years	120,301	116,482
Operating leases	—	64,251	56,818
Leasehold improvements	2 – 20 years	52,506	46,192
Total premises and equipment		821,748	781,932
Less: Accumulated depreciation		440,124	402,840
Total premises and equipment, net		\$ 381,624	\$ 379,093

Depreciation and amortization of premises and equipment totaled \$30.2 million for 2025, \$29.0 million for 2024, and \$30.0 million for 2023.

Note 6 Leases

The Corporation has operating leases for retail and corporate offices, land, and equipment. The Corporation also has a finance lease for retail and corporate offices.

These leases have original terms of 1 year or longer with remaining maturities up to 37 years, some of which include options to extend the lease term. An analysis of the lease options has been completed and any purchase options or optional periods that the Corporation is reasonably likely to extend have been included in the capitalization.

The discount rate used to capitalize the operating leases is the FHLB borrowing rate on the date of lease commencement. When determining the rate to discount specific lease obligations, the repayment period and term are considered.

Operating and finance lease costs and cash flows resulting from these leases are presented below:

(in thousands)	Twelve Months Ended December 31,		
	2025	2024	2023
Operating lease costs	\$ 6,938	\$ 6,414	\$ 6,281
Operating lease cash flows	6,851	6,617	7,171

The right-of-use asset and lease liability by lease classifications on the consolidated balance sheets were as follows:

(in thousands)	Consolidated Balance Sheets Category	December 31, 2025	December 31, 2024
Operating lease right-of-use asset	Premises and equipment	\$ 36,647	\$ 33,202
Operating lease liability	Accrued expenses and other liabilities	39,129	35,596

The lease payment obligations, weighted-average remaining lease term, and weighted-average original discount rate were as follows:

(in thousands)	December 31, 2025			December 31, 2024		
	Lease Payments	Weighted-average Lease Term (in years)	Weighted-average Discount Rate	Lease Payments	Weighted-average Lease Term (in years)	Weighted-average Discount Rate
Operating leases						
Retail and corporate offices	\$ 44,505	8.82	4.41 %	\$ 39,072	8.30	4.26 %
Land	3,165	6.16	3.82 %	3,228	6.63	3.52 %
Equipment	—	0.00	— %	204	1.50	4.62 %
Total operating leases	\$ 47,670	8.63	4.37 %	\$ 42,505	8.13	4.20 %

Contractual lease payment obligations for each of the next five years and thereafter, in addition to a reconciliation to the Corporation's lease liability, were as follows:

(in thousands)	Total Leases	
2026	\$	6,878
2027		6,483
2028		5,752
2029		4,511
2030		4,258
Beyond 2030		19,788
Total lease payments	\$	47,670
Less: interest		8,541
Present value of lease payments	\$	39,129

At December 31, 2025 and 2024, additional operating leases, primarily retail and corporate offices, that had not yet commenced totaled \$6.1 million and \$2.1 million, respectively. The leases that had not yet commenced as of December 31, 2025 will commence between April 2026 and January 2027 with lease terms of 5 year to 11 years.

The Corporation conducts a portion of its business through certain facilities and equipment under non-cancelable operating leases. The Corporation also leases a subdivision of some of its facilities and receives rental income from such lease agreements, included within occupancy expense on the consolidated statements of income. The approximate minimum annual rental payments and rental receipts under non-cancelable agreements and leases are as follows:

(in thousands)	Payments		Receipts	
2026	\$	6,693	\$	4,101
2027		6,112		3,478
2028		5,393		2,763
2029		4,157		2,712
2030		4,171		2,744
Beyond 2030		19,975		12,851
Total	\$	46,501	\$	28,649

Total rental expense from leases, net of lease income, totaled \$2.4 million in 2025, \$2.5 million in 2024, and \$2.5 million in 2023.

Note 7 Deposits

The distribution of deposits is as follows:

(in thousands)	December 31, 2025		December 31, 2024	
Noninterest-bearing demand	\$	6,126,632	\$	5,775,657
Savings		5,471,870		5,133,295
Interest-bearing demand		7,823,362		7,994,475
Money market		6,139,438		6,009,793
Network transaction deposits		2,154,995		1,758,388
Brokered CDs		3,795,133		4,276,309
Other time deposits		4,041,178		3,700,518
Total deposits	\$	35,552,608	\$	34,648,434

Time deposits in excess of \$250,000 were \$834.3 million and \$757.7 million at December 31, 2025 and 2024, respectively.

Aggregate annual maturities of all time deposits at December 31, 2025, are as follows:

Maturities During Year Ending December 31,	(in thousands)
2026	\$ 7,772,473
2027	43,062
2028	9,824
2029	5,927
2030	5,020
Thereafter	5
Total	<u>\$ 7,836,311</u>

Note 8 Short and Long-Term Funding

The following table presents the components of short-term funding (funding with original contractual maturities of one year or less), and long-term funding (funding with original contractual maturities greater than one year):

(in thousands)	December 31, 2025	December 31, 2024
Short-term funding		
Federal funds purchased	\$ 260,070	\$ 370,325
Securities sold under agreements to repurchase	47,794	100,044
Federal funds purchased and securities sold under agreements to repurchase	<u>\$ 307,864</u>	<u>\$ 470,369</u>
Long-term funding		
Corporation senior notes, at par	\$ 300,000	\$ 300,000
Corporation subordinated notes, at par	300,000	550,000

FHLB advances fair value hedge ^(a)	(1,278)	(7,744)
Total FHLB advances	<u>\$ 3,268,094</u>	<u>\$ 1,853,807</u>
Total short and long-term funding	<u>\$ 4,170,234</u>	<u>\$ 3,161,811</u>

(a) For additional information on the fair value hedges, see Note 13.

Securities Sold Under Agreements to Repurchase

The Corporation enters into agreements under which it sells securities subject to an obligation to repurchase the same or similar securities. Under these arrangements, the Corporation may transfer legal control over the assets but still retain effective control through an agreement that both entitles and obligates the Corporation to repurchase the assets. The obligation to repurchase the securities is reflected as a liability on the Corporation's consolidated balance sheets, while the securities underlying the repurchase agreements remain in the respective investment securities asset accounts (i.e., there is no offsetting or netting of the investment securities assets with the repurchase agreement liabilities).

The Corporation utilizes repurchase agreements to facilitate the needs of its customers. The fair value of securities pledged to secure repurchase agreements may decline. At December 31, 2025, the Corporation had pledged securities valued at 283% of the gross outstanding balance of repurchase agreements to manage this risk.

The remaining contractual maturity of the securities sold under agreements to repurchase on the consolidated balance sheets is presented in the following table:

(in thousands)	Overnight and Continuous	
	December 31, 2025	December 31, 2024
Repurchase agreements		
Agency mortgage-related securities	\$ 47,794	\$ 100,044

Long-Term Funding

Senior Notes

In August 2024, the Corporation issued \$300.0 million in aggregate principal amount of 6.455% Fixed Rate / Floating Rate Senior Notes due August 29, 2030. During the period from, and including, August 29, 2024, to, but excluding, August 29, 2029, the senior notes will have a fixed coupon interest rate of 6.455% per annum, payable semi-annually in arrears. During the period from, and including, August 29, 2029, to, but excluding, the maturity date, the senior notes will have a floating rate per annum equal to Compounded SOFR, as defined in the Global Note issued in connection with the senior notes, plus 3.030%, payable quarterly in arrears. Prior to August 29, 2029, the Corporation may, at its option, redeem the senior notes, in whole or in part, at any time and from time to time, by paying the redemption price, as defined in the Global Note issued in connection with the senior notes, plus accrued and unpaid interest thereon, if any, to, but excluding, the redemption date. On August 29, 2029, the Corporation may at its option, redeem the senior notes, in whole, but not in part, by paying the aggregate principal amount of the notes to be redeemed plus accrued and unpaid interest thereon, if any, to, but excluding, the redemption date. At any time and from time to time on or after July 30, 2030 (30 days prior to the maturity date), the Corporation may, at its option, redeem the senior notes in whole or in part by paying the aggregate principal amount of the senior notes to be redeemed plus accrued and unpaid interest thereon, if any, to, but excluding, the redemption date. The senior notes were issued at a discount.

Subordinated Notes

In February 2023, the Corporation issued \$300.0 million of 10-year subordinated notes, due March 1, 2033 and redeemable in whole or in part at the Corporation's option (i) on the reset date of March 1, 2028 and any interest payment date thereafter, (ii) at any time on or after the three month period prior to the maturity date, and (iii) upon the occurrence of a Regulatory Capital Treatment Event, as defined in the Global Note issued in connection with the subordinated notes. The subordinated notes have a fixed coupon interest rate of 6.625% until the reset date, after which the rate will be equal to the Five-Year U.S. Treasury Rate as of the reset date plus 2.812% per annum. The notes were issued at a discount.

In January 2025, \$250.0 million of 10-year subordinated notes issued in November 2014 by the Corporation matured and were repaid.

FHLB Advances

Under agreements with the FHLB of Chicago, FHLB advances are secured by pledging qualifying collateral of the subsidiary bank (such as residential mortgage loans, residential mortgage loans held for sale, home equity loans, CRE loans, and investment securities). At December 31, 2025, the Corporation had \$11.4 billion of total collateral capacity, primarily supported by pledged consumer and CRE loans and investment securities. The FHLB advances had maturity or call dates ranging from 2026 through 2031 and had a weighted average interest rate of 3.77% as of December 31, 2025. The Corporation prepaid \$600.0 million in long-term FHLB advances during the fourth quarter of 2024, incurring a prepayment fee of \$14.0 million.

The table below summarizes the expected maturities of the Corporation's long-term funding at December 31, 2025:

(\$ in thousands)	Long Term Funding	
Year		
2026	\$	204,283
2027		2,244
2028		201,366
2029		3,235
2030		299,560
Beyond 2030		296,432
Total long-term funding	\$	1,007,120

Note 9 Stockholders' Equity

Preferred Equity: In September 2018, the Corporation issued 4.0 million depositary shares, each representing a 1/40th interest in a share of the Corporation's 5.875% Non-Cumulative Perpetual Preferred Stock, Series E, liquidation preference \$1,000 per share. Dividends on the Series E Preferred Stock are payable quarterly in arrears only when, as and if declared by the Board of Directors at a rate per annum equal to 5.875%. Shares of the Series E Preferred Stock have priority over the Corporation's common stock with regard to the payment of dividends and distributions upon liquidation, dissolution or winding up. As such, the Corporation may not pay dividends on or repurchase, redeem, or otherwise acquire for consideration shares of its common stock unless dividends for the Series E Preferred Stock have been declared for that period, and sufficient funds have been set aside to make payment. The Series E Preferred Stock may be redeemed by the Corporation at its option (i) either in whole or in part, from time to time, on any dividend payment date on or after the dividend payment date occurring on December 15, 2023, or (ii) in whole but not in part, at any time within 90 days following certain regulatory capital treatment events, in each case at a redemption price of \$1,000 per share (equivalent to \$25 per depositary share), plus any applicable dividends. Except in certain limited circumstances, the Series E Preferred Stock does not have any voting rights.

In June 2020, the Corporation issued 4.0 million depositary shares, each representing a 1/40th interest in a share of the Corporation's 5.625% Non-Cumulative Perpetual Preferred Stock, Series F, liquidation preference \$1,000 per share. Dividends on the Series F Preferred Stock are payable quarterly in arrears only when, as and if declared by the Board of Directors at a rate per annum equal to 5.625%. Shares of the Series F Preferred Stock have priority over the Corporation's common stock with regard to the payment of dividends and distributions upon liquidation, dissolution or winding up. As such, the Corporation may not pay dividends on or repurchase, redeem, or otherwise acquire for consideration shares of its common stock unless dividends for the Series F Preferred Stock have been declared for that period, and sufficient funds have been set aside to make payment. The Series F Preferred Stock may be redeemed by the Corporation at its option (i) either in whole or in part, from time to time, on any dividend payment date on or after the dividend payment date occurring on September 15, 2025, or (ii) in whole but not in part, at any time within 90 days following certain regulatory capital treatment events, in each case at a redemption price of \$1,000 per share (equivalent to \$25 per depositary share), plus any applicable dividends. Except in certain limited circumstances, the Series F Preferred Stock does not have any voting rights.

Common Stock Issuance: On November 18, 2024, the Corporation completed its underwritten public offering of 13.8 million shares of common stock at a price to the public of \$25.00 per share. The net proceeds to the Company from the offering were \$331.0 million, after deducting underwriting discounts, commissions, and offering expenses payable by the Corporation.

Subsidiary Equity: At December 31, 2025, subsidiary equity equaled \$4.8 billion. See Note 18 for additional information on regulatory requirements for the Bank.

Common Stock Repurchases: The Corporation repurchased 900,000 shares for \$22.3 million (or an average cost per common share of \$24.77) during 2025 and repurchased 900,000 shares for \$18.3 million (or an average cost per common share of \$20.32) during 2024.

As of December 31, 2025, \$39.1 million remained available to repurchase shares of common stock under previously approved Board of Director authorizations. Any repurchase of shares under this authorization will be based on market and investment opportunities, capital levels, growth prospects, and any necessary regulatory approvals and other regulatory constraints. Such repurchases may occur from time to time in open market purchases, block transactions, private transactions, accelerated share repurchase programs, or similar facilities.

The Corporation also repurchased shares in satisfaction of minimum tax withholding obligations in connection with settlements of equity compensation totaling \$6.7 million (279,717 shares at an average cost per common share of \$24.07) during 2025, compared to \$6.2 million (302,077 shares at an average cost per common share of \$20.64) during 2024.

Other Comprehensive Income (Loss): See the Consolidated Statements of Comprehensive Income for a summary of activity in other comprehensive income (loss) and see Note 21 for a summary of the components of accumulated other comprehensive income (loss).

Note 10 Stock-Based Compensation

Stock-Based Compensation Plan

In February 2025, the Board of Directors, with subsequent approval of the Corporation's shareholders, approved the adoption of the 2025 Equity Incentive Plan. Shares available for issuance under the 2020 Incentive Plan were rolled into the 2025 Equity Incentive Plan. As of December 31, 2025, 3.1 million shares remained available for issuance under the 2025 Plan.

The Corporation also issued restricted stock awards under the 2025 Plan and previously under the 2020 Plan. The shares of restricted stock are restricted as to transfer, but are not restricted as to dividend or voting rights. Restricted stock units receive dividend equivalents but do not have voting rights. The transfer restrictions lapse over three or four years, depending upon whether the awards are performance-based or service-based. Performance-based awards are based on one or more performance measures as selected by the Compensation & Benefits Committee in its discretion, and service-based awards are contingent upon continued employment or meeting the requirements for retirement. Performance-based restricted stock awards granted during 2024 and 2025 will cliff-vest after the three year performance period has ended. Service-based restricted stock awards granted during 2024 and 2025 will generally vest ratably over a period of four years.

The 2020 and 2025 Plans provide that restricted stock awards and stock options will immediately become fully vested upon retirement from the Corporation of retirement eligible colleagues or early retirement and death or disability. See Note 1 for the Corporation's accounting policy for stock-based compensation.

A summary of the Corporation's stock option activity for the year ended December 31, 2025 is presented below:

Stock Options	Shares ^(a)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value ^(a)
Outstanding at December 31, 2024	1,778	\$ 22.36	3.41 years	\$ 3,693
Exercised	263	20.32		
Forfeited or expired	55	22.86		
Outstanding at December 31, 2025	1,460	\$ 22.71	2.52 years	\$ 4,483
Options exercisable at December 31, 2025	1,460	\$ 22.71	2.52 years	\$ 4,483

(a) In thousands

Intrinsic value represents the amount by which the fair market value of the underlying stock exceeds the exercise price of the stock option. For the years ended December 31, 2025, 2024, and 2023, the intrinsic value of stock options exercised was \$1.5 million, \$9.9 million, and \$0.5 million, respectively. All stock options were vested as of December 31, 2024. The total fair value of stock options vested was \$0.5 million for the year ended December 31, 2024, and \$0.9 million for the year ended December 31, 2023.

The Corporation has issued time-based and performance-based restricted stock awards under the 2020 and 2025 Incentive Compensation Plans. Performance awards are based on performance goals determined by the Compensation and Benefits Committee of the Corporation's Board of Directors, with vesting ranging from a minimum of 0% to a maximum of 150% of the target award. Performance awards are valued utilizing a Monte Carlo simulation model to estimate fair value of the awards at the grant date.

The following table summarizes information about the Corporation's restricted stock awards activity for the year ended December 31, 2025:

Restricted Stock	Shares ^(a)	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2024	2,310	\$ 21.25
Granted	891	24.20
Vested	761	22.17
Forfeited	68	22.95
Outstanding at December 31, 2025	2,372	\$ 22.02

(a) In thousands

The Corporation amortizes the expense related to restricted stock awards as compensation expense over the vesting period specified in the grant's award agreement. Expense for restricted stock awards of \$18.1 million was recorded for the year ended December 31, 2025, \$18.9 million for the year ended December 31, 2024, and \$17.3 million for the year ended December 31, 2023. Included in compensation expense for 2025 was \$5.7 million of expense for the accelerated vesting of restricted stock awards granted to retirement eligible colleagues. The Corporation had \$18.2 million of unrecognized compensation costs related to restricted stock awards at December 31, 2025 that are expected to be recognized over the remaining requisite service periods that extend through the first quarter of 2029.

The Corporation has the ability to issue shares from treasury or new shares upon the exercise of stock options or the granting of restricted stock awards. As described in Note 9, the Board of Directors has authorized management to repurchase shares of the Corporation's common stock, to be made available for issuance in connection with the Corporation's employee incentive plans and for other corporate purposes. The repurchase of shares, if any, will be based on market and investment opportunities,

capital levels, growth prospects, and regulatory constraints. Such repurchases may occur from time to time in open market purchases, block transactions, private transactions, accelerated share repurchase programs, or similar facilities.

Note 11 Retirement Plans

The Corporation has a noncontributory defined benefit RAP, covering substantially all employees who meet participation requirements. The benefit allocations are based primarily on years of service and the employee's compensation paid. Employees of acquired entities generally participate in the RAP after consummation of the business combinations. Any retirement plans of acquired entities are typically merged into the RAP after completion of the mergers, and credit is usually given to employees for years of service at the acquired institution for vesting and eligibility purposes.

The Corporation also provides legacy healthcare access to a limited group of retired employees from a previous acquisition in the Postretirement Plan. There are no other active retiree healthcare plans.

The funded status and amounts recognized on the 2025 and 2024 consolidated balance sheets for the RAP and Postretirement Plan were as follows:

(in thousands)	RAP 2025	Postretirement Plan 2025	RAP 2024	Postretirement Plan 2024
Change in fair value of plan assets				
Fair value of plan assets at beginning of year	\$ 478,970	\$ —	\$ 453,457	\$ —
Actual return on plan assets	55,988	—	43,676	—
Employer contributions	—	190	—	183
Benefits paid	(17,379)	(190)	(18,163)	(183)
Fair value of plan assets at end of year ^(a)	\$ 517,579	\$ —	\$ 478,970	\$ —
Change in benefit obligation				
Net benefit obligation at beginning of year	\$ 213,365	\$ 2,043	\$ 211,353	\$ 1,425
Service cost	3,007	—	3,027	—
Interest cost	11,540	105	11,173	73

Total recognized in OCI	\$ 6,225	\$ 110	\$ 2,169	\$ (624)

The components of net periodic pension benefit cost for the RAP were as follows:

(in thousands)	2025	2024	2023
Service cost	\$ 3,007	\$ 3,027	\$ 3,189
Interest cost	11,540	11,173	10,887
Expected return on plan assets	(39,267)	(34,599)	(32,862)
Amortization of prior service cost	(177)	(215)	(250)
Amortization of actuarial loss	—	—	—
Total net periodic pension benefit income	\$ (24,897)	\$ (20,614)	\$ (19,037)

The components of net periodic benefit cost for the Postretirement Plan were as follows:

(in thousands)	2025	2024	2023
Interest cost	\$ 105	\$ 73	\$ 78
Amortization of prior service cost	(75)	(75)	(75)
Amortization of actuarial loss (gain)	16	(28)	(29)
Total net periodic benefit cost (income)	\$ 46	\$ (31)	\$ (26)

The components of net periodic pension cost and net periodic benefit cost, other than the service cost component, are included in the other noninterest expense caption of the consolidated statements of income. The service cost components are included in the personnel noninterest expense caption of the consolidated statements of income.

	RAP 2025	Postretirement Plan 2025	RAP 2024	Postretirement Plan 2024
Weighted average assumptions used to determine benefit obligations				
Discount rate	5.30 %	5.30 %	5.40 %	5.40 %
Rate of increase in compensation levels	3.00 %	N/A	2.50 %	N/A
Interest crediting rate	3.75 %	N/A	3.81 %	N/A
Weighted average assumptions used to determine net periodic benefit costs				
Discount rate	5.70 %	5.40 %	5.40 %	5.40 %
Rate of increase in compensation levels	2.50 %	N/A	2.50 %	N/A
Expected long-term rate of return on plan assets	8.20 %	N/A	7.40 %	N/A

The expected long-term rate of return on plan assets was estimated based on the RAP's current mix of the plan assets and a forward looking capital markets model which estimates long-term future returns. This model estimates expected long-term, forward-looking, annual returns and expected annual volatilities for different asset classes and correlations between each asset class pair using current yields for investment grade fixed income securities and risk premiums for riskier asset classes. The actual rates of return for the RAP assets were 12.54% and 10.16% for 2025 and 2024, respectively.

The RAP's investments are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risks associated with certain investments and the level of uncertainty related to changes in the value of the investments, it is at least reasonably possible that changes in risks in the near term could materially affect the amounts reported. The investment objective for the RAP is to ensure there are sufficient assets to pay pension obligations when they come due while mitigating risks and providing prudent governance. The RAP has a diversified portfolio designed to provide liquidity, current income, and growth of income and principal, with anticipated asset allocation ranges of: equity securities 50 to 70%, fixed-income securities 30 to 50%, alternative securities 0 to 15%, and other cash equivalents 0 to 5%. Based on changes in economic and market conditions, the Corporation could be outside of the allocation ranges for brief periods of time. The asset allocation for the RAP as of the December 31, 2025 and 2024 measurement dates, respectively, by asset category were as follows:

Asset Category	2025	2024
Equity securities	56 %	55 %
Fixed-income securities	35 %	35 %
Group annuity contracts	8 %	8 %
Other	1 %	2 %
Total	100 %	100 %

The RAP assets include cash equivalents, such as money market accounts, mutual funds, common / collective trust funds (which include investments in equity and bond securities), and a group annuity contract. Money market accounts are stated at cost plus accrued interest, mutual funds are valued at quoted market prices, investments in common / collective trust funds are

valued at the amount at which units in the funds can be withdrawn, and the group annuity contract is valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations and considering the credit worthiness of the issuer.

Based on these inputs, the following tables summarize the fair value of the RAP's investments:

(in thousands)	December 31, 2025			
	Fair Value	Level 1	Level 2	Level 3
RAP investments				
Money market account	\$ 2,661	\$ 2,661	\$ —	\$ —
Common /collective trust funds	197,772	197,772	—	—
Mutual funds	277,577	277,577	—	—
Group annuity contract	39,569	—	—	39,569
Total RAP investments	\$ 517,579	\$ 478,010	\$ —	\$ 39,569

(in thousands)	December 31, 2024			
	Fair Value	Level 1	Level 2	Level 3
RAP investments				
Money market account	\$ 7,892	\$ 7,892	\$ —	\$ —
Common /collective trust funds	183,059	183,059	—	—
Mutual funds	247,602	247,602	—	—
Group annuity contract	40,416	—	—	40,416
Total RAP investments	\$ 478,970	\$ 438,554	\$ —	\$ 40,416

The following presents a summary of the changes in the fair value of the RAP's Level 3 asset during the periods indicated.

Fair Value Reconciliation of Level 3 RAP Investments		2025	2024
Fair value of group annuity contract at beginning of period		\$ 40,416	\$ 43,687
Return on plan assets		1,645	(731)
Benefits paid		(2,492)	(2,539)
Fair value of group annuity contract at end of period		\$ 39,569	\$ 40,416

The Corporation's RAP funding policy is to pay at least the minimum amount required by federal law and regulations, with consideration given to the maximum funding amounts allowed. The Corporation regularly reviews the funding of its RAP. There were no contributions to the RAP during 2025 and 2024.

The projected benefit payments were calculated using the same assumptions as those used to calculate the benefit obligations listed above. The projected benefit payments for the RAP and Postretirement Plan at December 31, 2025, reflecting expected future services, were as follows:

(in thousands)	RAP	Postretirement Plan
Estimated future benefit payments		
2026	\$ 22,872	\$ 190
2027	21,660	185
2028	21,472	179
2029	21,555	173
2030	21,226	166
2031-2035	85,207	711

The health care trend rate is an assumption as to how much the Postretirement Plan's medical costs will change each year in the future. There are no remaining participants under age 65 in the Postretirement Plan. The actual change in 2025 health care premium rates for post-65 coverage was a decrease of 47.66%. The health care trend rate assumption for post-65 coverage assumes a 5.80% rate of increase for 2026, declining to an ultimate trend rate of 5% by the year 2030.

The Corporation also has a 401(k) and Employee Stock Ownership Plan (the "401(k) plan"). The Corporation's contribution is determined by the Compensation and Benefits Committee of the Board of Directors. Total expenses related to contributions to the 401(k) plan were \$17.5 million, \$17.2 million, and \$15.6 million for 2025, 2024, and 2023, respectively.

Note 12 Income Taxes

The current and deferred amounts of income tax expense (benefit) were as follows:

(in thousands)	Years Ended December 31,		
	2025	2024	2023
Current			
Federal	\$ 62,599	\$ 38,353	\$ 29,319
State	19,289	9,436	5,283
Total current	81,888	47,789	34,602
Deferred			
Federal	25,320	(30,701)	(8,371)
State	(4,075)	(5,775)	(3,135)
Total deferred	21,245	(36,475)	(11,506)
Total income tax expense	\$ 103,133	\$ 11,314	\$ 23,097
Total federal	\$ 87,919	\$ 7,652	\$ 20,948
Total state	15,214	3,661	2,148
Total income tax expense	\$ 103,133	\$ 11,314	\$ 23,097

Income taxes paid (refunded) are as follows:

(in thousands)	Years Ended December 31,		
	2025	2024	2023
Federal	\$ (3,266)	\$ 6,607	\$ 42,500
State	4,787	11,142	26,917
Total	\$ 1,521	\$ 17,749	\$ 69,417

Income taxes paid (net of refunds) exceeds 5% of total income taxes paid (net of refunds) for the year in the following jurisdictions:

(in thousands)	Years Ended December 31,		
	2025	2024	2023
Federal	\$ (3,266)	\$ 6,607	\$ 42,500
State

Wisconsin	(2,718)	1,942	10,450
Ohio	*	1,607	*

*Did not exceed 5% of total income taxes paid (net of refunds).

Temporary differences between the amounts reported on the financial statements and the tax bases of assets and liabilities resulted in deferred taxes. DTAs and liabilities, included in other assets and accrued expenses and other liabilities on the consolidated balance sheets, respectively, were as follows:

(in thousands)	December 31, 2025		December 31, 2024	
Deferred tax assets				
Allowance for loan losses	\$	95,867	\$	89,295
Allowance for other losses		10,576		9,840
Accrued liabilities		33,931		26,109
Deferred compensation		34,086		30,404
Federal tax credits carryforward		—		18,160
Benefit of state tax losses and credit carryforwards		5,760		4,187
Capital loss		15,923		29,325
Nonaccrual interest		1,840		1,269
Partnerships		38,390		37,781
Lease liability		9,921		8,881
Basis difference from equity securities and other investments		4,302		—
Net unrealized losses on AFS securities		3,510		16,228
Net unrealized losses on pension and postretirement benefits		5,879		7,995
Other		8,510		3,353
Total deferred tax assets	\$	268,495	\$	282,828
Valuation allowance for deferred tax assets		(15,923)		(32,702)
Total deferred tax assets after valuation allowance	\$	252,572	\$	250,126
Deferred tax liabilities				
Prepaid expenses	\$	102,491	\$	83,251
Goodwill		22,862		22,376
Mortgage banking activities		21,778		21,877
Deferred loan fee income		8,270		7,836
Lease financing		64,171		13,213
Bank premises and equipment		3,029		30,534
Purchase accounting		4,374		6,246
Basis difference from equity securities and other investments		—		3,104
Total deferred tax liabilities	\$	226,975	\$	188,437
Net deferred tax assets	\$	25,597	\$	61,689

At December 31, 2025, the valuation allowance for DTAs was related to capital loss carryovers. The changes in the valuation allowance inclusive of state valuation allowances were as follows:

(in thousands)	2025		2024	
Valuation allowance for deferred tax assets, beginning of year	\$	(32,702)	\$	—
Decrease (increase) in current year		16,779		(32,702)
Valuation allowance for deferred tax assets, end of year	\$	(15,923)	\$	(32,702)

At December 31, 2025, the Corporation had state net operating loss carryforwards of \$133.9 million (of which \$2.0 million was acquired from various acquisitions) that will begin expiring in 2029.

The effective income tax rate differs from the statutory federal tax rate. The major reasons for this difference were as follows:

(Dollars in thousands)	2025		2024		2023	
	Dollar	Percent	Dollar	Percent	Dollar	Percent
Federal income tax rate at statutory rate	\$ 121,361	21.0 %	\$ 28,236	21.0 %	\$ 43,271	21.0 %
Increases (decreases) resulting from:						
State income taxes (net of federal benefit) ^(a)	10,105	1.9 %	(1,276)	(0.9)%	(2,232)	(1.1)%
Tax effect of tax credits and benefits, net of related expenses						
Partnerships	(5,904)	(1.0)%	(7,400)	(5.5)%	(7,248)	(3.5)%
Research credits	(992)	(0.2)%	(1,044)	(0.8)%	(1,574)	(0.8)%
Other tax credits	—	— %	—	— %	(194)	(0.1)%
Nontaxable and nondeductible items						
Tax-exempt interest and dividends	(13,030)	(2.3)%	(13,921)	(10.4)%	(15,321)	(7.4)%
Bank owned life insurance	(3,611)	(0.6)%	(2,830)	(2.1)%	(2,149)	(1.0)%
Net (benefit) tax from stock-based compensation	(292)	(0.1)%	(208)	(0.2)%	7	— %
Net benefit of portfolio reallocation and legal entity rationalization plan ^(b)	—	— %	(29,109)	(21.6)%	—	— %
FDIC premium	6,760	1.2 %	6,500	4.8 %	6,220	3.0 %
Dividends	(318)	(0.1)%	(336)	(0.2)%	(334)	(0.2)%
Other	1,943	0.3 %	3,610	2.7 %	2,177	1.1 %
Changes in valuation allowance	(14,337)	(2.5)%	27,525	20.5 %	—	— %
Changes in unrecognized tax benefits	1,017	0.2 %	545	0.4 %	(6)	— %
Other adjustments	431	0.1 %	1,022	0.7 %	480	0.2 %
Effective income tax	\$ 103,133	17.9 %	\$ 11,314	8.4 %	\$ 23,097	11.2 %

(a) State taxes from Illinois and Minnesota made up the majority (greater than 50%) of the tax effect in this category during 2025 and from Wisconsin and Illinois during 2024 and 2023.

(b) Related to the previously announced strategic reallocation of the investment portfolio and adoption of a legal entity rationalization plan in the second quarter of 2024.

Savings banks acquired by the Corporation in 1997 and 2004 qualified under provisions of the Internal Revenue Code that permitted them to deduct from taxable income an allowance for bad debts that differed from the provision for such losses charged to income for financial reporting purposes. Accordingly, no provision for income taxes has been made for \$100 million of retained income at December 31, 2025. If income taxes had been provided, the deferred tax liability would have been \$25.4 million. Management does not expect this amount to become taxable in the future; therefore, no provision for income taxes has been made.

The Corporation and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various state jurisdictions. The Corporation's federal income tax returns are open and subject to examination from the 2022 tax return year and forward. The years open to examination by state and local government authorities varies by jurisdiction.

A reconciliation of the beginning and ending amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was as follows:

(in thousands)	2025	2024
Balance at beginning of year	\$ 2,772	\$ 2,227
Changes for tax positions related to prior years	234	83
Changes for tax positions related to current year	783	462
Balance at end of year	\$ 3,789	\$ 2,772

The Corporation recognizes interest and penalties accrued related to unrecognized tax benefits in the income tax expense line on the consolidated statements of income. Interest and penalty benefits, as well as accrued interest and penalties, were immaterial at both December 31, 2025 and 2024. At December 31, 2025 and 2024, the Corporation believes it has appropriately accounted for any unrecognized tax benefits. Management does not anticipate significant adjustments to the total amount of unrecognized tax benefits within the next twelve months.

Note 13 Derivative and Hedging Activities

The Corporation enters into derivative financial instruments to manage exposures that arise from business activities that result in the payment of future known and uncertain cash amounts, the value of which are determined by interest and currency rates as well as other economic conditions.

The contract or notional amount of a derivative is used to determine, along with the other terms of the derivative, the amounts to be exchanged between the counterparties. The Corporation is exposed to credit risk in the event of nonperformance by

counterparties to financial instruments. To mitigate the counterparty risk, contracts generally contain language outlining collateral pledging requirements for each counterparty. For non-centrally cleared derivatives, collateral must be posted when the market value exceeds certain mutually agreed upon threshold limits. Securities and cash are often pledged as collateral. The Corporation pledged \$79.4 million and \$81.4 million of investment securities as collateral at December 31, 2025 and 2024, respectively. Cash is often pledged as collateral for derivatives that are not centrally cleared. The Corporation's required cash collateral was \$11.8 million at December 31, 2025, compared to \$0.3 million at December 31, 2024. See Note 17 for fair value information and disclosures and see Note 1 for the Corporation's accounting policy for derivative and hedging activities.

Fair Value Hedges

Fair value hedges of interest rate risk: The Corporation is exposed to changes in the fair value of its fixed-rate debt due to changes in benchmark interest rates. The Corporation uses interest rate swaps to manage its exposure to changes in fair value on these instruments attributable to changes in the designated benchmark interest rates. Interest rate swaps designated as fair value hedges involve receiving payment of fixed-rate amounts from a counterparty in exchange for the Corporation paying variable-rate payments over the life of the agreements without the exchange of the underlying notional amount.

Fair value hedges of foreign currency exchange rate risk: The Corporation is exposed to changes in the fair value of its foreign currency denominated loans due to changes in foreign currency exchange rates. The Corporation uses foreign currency exchange forward contracts to manage its exposure to changes in fair value on these foreign currency denominated loans.

Cash Flow Hedges

The Corporation's objectives in using interest rate derivatives are to add stability to interest income and to manage its exposure to interest rate movements. To accomplish this objective, the Corporation uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve receiving fixed-rate amounts from a counterparty in exchange for the Corporation making variable-rate payments over the life of the agreements without the exchange of the underlying notional amount. These items, along with the net interest from the derivative, are reported in the same income statement line as the interest income from the floating-rate assets.

Non-Designated Hedges

Derivatives to Accommodate Customer Needs

Derivatives not designated as hedges may be used to manage the Corporation's exposure to interest or foreign exchange rate movements, or to provide a service to customers, but do not meet the requirements for hedge accounting under U.S. GAAP. Derivatives not designated as hedges are not entered into for speculative purposes. The Corporation executes interest rate swaps or forward currency exchange forwards with commercial lending customers to facilitate their respective risk management strategies. These derivative contracts with customers are simultaneously offset by derivative contracts that the Corporation executes with a third party, such that the Corporation minimizes its net risk exposure resulting from such transactions. As these interest rate swaps and foreign currency exchange forwards do not meet the hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings in capital markets, net.

The Corporation also enters into credit risk participation agreements with financial institution counterparties for interest rate swaps related to loans as either a participant or a lead bank. The risk participation agreements entered into by the Corporation as a participant bank provide credit protection to the financial institution counterparty should the borrower fail to perform on its interest rate derivative contract with that financial institution.

Mortgage Derivatives

Interest rate lock commitments to originate residential mortgage loans held for sale and forward commitments to sell residential mortgage loans are considered derivative instruments, and the fair values of these commitments are recorded in other assets and accrued expenses and other liabilities on the consolidated balance sheets with the changes in fair value recorded as a component of mortgage banking, net on the consolidated statements of income.

Interest rate-related instruments for MSR hedge: The fair value of the Corporation's MSRs asset changes in response to changes in primary mortgage loan rates and other assumptions. To mitigate the earnings volatility caused by changes in the fair value of MSRs, the Corporation designates certain financial instruments as an economic hedge. Changes in the fair value of these instruments are generally expected to partially offset changes in the fair value of MSRs and are recorded in other assets and accrued expenses and other liabilities on the consolidated balance sheets with the changes in fair value recorded as a component of mortgage banking, net on the consolidated statements of income.

The following table presents the total notional amounts and gross fair values of the Corporation's derivatives, as well as the balance sheet netting adjustments as of December 31, 2025 and December 31, 2024. The derivative assets and liabilities are presented on a gross basis prior to the application of bilateral collateral and master netting agreements, but after the variation margin payments with central clearing organizations have been applied as settlement, as applicable. Total derivative assets and liabilities are adjusted to take into consideration the effects of legally enforceable master netting agreements and cash collateral received or paid as of December 31, 2025 and December 31, 2024. The resulting net derivative asset and liability fair values are included in other assets and accrued expenses and other liabilities, respectively, on the consolidated balance sheets.

(in thousands)	December 31, 2025				December 31, 2024			
	Asset		Liability		Asset		Liability	
	Notional Amount	Fair Value	Notional Amount	Fair Value	Notional Amount	Fair Value	Notional Amount	Fair Value
Designated as hedging instruments:								
Interest rate-related instruments ^(a)	\$ 2,425,000	\$ 10,517	\$ 25,000	\$ 1	\$ 1,950,000	\$ 2,960	\$ 1,150,000	\$ 2,976
Foreign currency exchange forwards	280,159	757	38,384	194	127,518	2,457	216,665	563
Total designated as hedging instruments		11,274		195		5,418		3,539
Not designated as hedging instruments:								
Interest rate-related and other instruments	4,775,818	66,787	7,072,274	108,631	3,858,867	88,541	6,992,894	170,928
Foreign currency exchange forwards	48,904	1,731	43,787	1,517	68,028	4,315	74,199	4,106
Mortgage banking ^(b)	39,998	814	107,000	444	28,580	580	85,000	—
Total not designated as hedging instruments		69,332		110,592		93,436		175,034
Gross derivatives before netting		80,606		110,787		98,854		178,573
Less: Legally enforceable master netting agreements		12,839		12,839		12,667		12,667
Less: Cash collateral pledged/received		10,343		8,334		35,190		250
Total derivative instruments, after netting		\$ 57,424		\$ 89,614		\$ 50,997		\$ 165,656

(a) The notional amounts of the interest rate-related instruments designated as hedging instruments include forward starting interest rate swaps. As of December 31, 2025, the Corporation did not have any forward starting interest rate-related swaps. As of December 31, 2024 such swaps with effective dates ranging from February 1, 2025 to March 1, 2025 had an asset notional amount and fair value of \$100.0 million and \$0.3 million, respectively, and a liability notional amount and fair value of \$300.0 million and \$1.4 million, respectively.

(b) The mortgage derivative asset includes interest rate lock commitments, while the mortgage derivative liability includes forward commitments. Given the fair value position as of December 31, 2025, the fair value of the mortgage derivative asset included \$0.8 million of interest rate lock commitments and the derivative liability included \$0.4 million of forward commitments. As of December 31, 2024, the fair value of the mortgage derivative asset included \$0.3 million of interest rate lock commitments and \$0.3 million of forward commitments.

The following table presents amounts that were recorded on the consolidated balance sheets related to cumulative basis adjustments for fair value hedges:

(in thousands)	Line Item in the Consolidated Balance Sheets in Which the Hedged Item is Included			
	Carrying Amount of the Hedged Assets/(Liabilities) ^(a)		Cumulative Amount of Fair Value Hedging Adjustment Included in the Carrying Amount of the Hedged Assets/(Liabilities)	
	December 31, 2025		December 31, 2024	
Other long-term funding	\$ (301,760)	\$ (1,760)	\$ (296,004)	\$ 3,996
FHLB Advances	(198,722)	1,278	(592,256)	7,744
Total	\$ (500,482)	\$ (482)	\$ (888,260)	\$ 11,740

(a) Excludes hedged items where only foreign currency risk is the designated hedged risk. At December 31, 2025 and 2024, the carrying amount excluded for foreign currency denominated loans was \$318.5 million and \$344.2 million, respectively.

The Corporation terminated its \$500.0 million fair value hedge during the fourth quarter of 2019. At December 31, 2025, the amortized cost basis of the closed portfolios which had previously been used in the terminated hedging relationship was \$193.9 million and is included in loans on the consolidated balance sheets. This amount includes \$0.7 million of hedging adjustments on the discontinued hedging relationships, which are not presented in the table above.

The tables below identify the effect of fair value and cash flow hedge accounting on the Corporation's consolidated statements of income:

(in thousands)	Location and Amount Recognized on the Consolidated Statements of Income in Fair Value and Cash Flow Hedging Relationships						
	For the Years Ended December 31,						
	2025		2024		2023		(Loss) on Mortgage Portfolio Sale
	Interest Income	Interest (Expense)	Interest Income	Interest (Expense)	Interest Income	Interest (Expense)	
Total amounts of income/expense presented on the consolidated statements of income in which the effects of the fair value or cash flow hedges are recorded ^(a)	\$ (4,287)	\$ (6,379)	\$ (16,695)	\$ (19,189)	\$ (14,176)	\$ (17,536)	(125)
The effects of fair value and cash flow hedging: Impact on fair value hedging relationships in Subtopic 815-20							
Interest contracts:

Hedged items	9,299	(31,226)	9,322
Derivatives designated as hedging instruments	(9,298)	31,223	(9,322)

The following table presents the effect of cash flow hedge accounting on accumulated other comprehensive income (loss):

(in thousands)	For the Years Ended December 31,		
	2025	2024	2023
Interest rate-related instruments designated as cash flow hedging instruments			
Amount of income (loss) recognized in OCI on cash flow hedge derivative ^(a)	\$ 7,243	\$ (21,537)	(13,254)
Amount of loss reclassified from accumulated other comprehensive income (loss) into interest income ^(a)	4,172	16,478	13,930

(a) The entirety of gains (losses) recognized in OCI as well as those reclassified from accumulated other comprehensive income (loss) into interest income were included components in the assessment of hedge effectiveness.

Amounts reported in accumulated other comprehensive income (loss) related to cash flow hedge derivatives are reclassified to interest income as interest payments are made on the hedged variable interest rate assets. The Corporation estimates that \$7.2 million will be reclassified as an increase to interest income over the next 12 months. This amount could differ from amounts actually recognized due to changes in interest rates, hedge de-designations, or the addition of other hedges subsequent to December 31, 2025. The maximum length of time over which the Corporation is hedging its exposure to the variability in future cash flows is 24 months as of December 31, 2025.

The table below identifies the effect of derivatives not designated as hedging instruments on the Corporation's consolidated statements of income:

(in thousands)	Consolidated Statements of Income Category of Gain / (Loss) Recognized in Income	For the Years Ended December 31,		
		2025	2024	2023

Note 14 Balance Sheet Offsetting

Interest Rate-Related Instruments and Foreign Exchange Forwards (“Interest and Foreign Exchange Agreements”)

The Corporation is permitted to present derivative receivables and derivative payables with the same counterparty and the related cash collateral receivables and payables on a net basis on the consolidated balance sheets when a legally enforceable master netting agreement exists. The Corporation has elected to net such balances where it has determined that the specified conditions are met.

The Corporation uses master netting agreements to mitigate counterparty credit risk in these transactions, including derivative contracts. A master netting agreement is a single agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or securities transfer, or failure to deliver collateral or margin when due).

Typical master netting agreements for these types of transactions also contain a collateral/margin agreement that provides for a security interest in, or title transfer of, securities or cash collateral/margin to the party that has the right to demand margin (the "demanding party"). The collateral/margin agreement typically requires a party to transfer collateral/margin to the demanding party with a value equal to the amount of the margin deficit on a net basis across all transactions governed by the master netting agreement, less any threshold. The collateral/margin agreement grants to the demanding party, upon default by the counterparty, the right to offset any amounts payable by the counterparty against any posted collateral or the cash equivalent of any posted collateral/margin. It also grants to the demanding party the right to liquidate collateral/margin and to apply the proceeds to an amount payable by the counterparty.

See Note 13 for additional information on the Corporation’s derivative and hedging activities.

The following tables present the interest rate and foreign exchange assets and liabilities subject to an enforceable master netting arrangement. The interest rate and foreign exchange agreements the Corporation has with its commercial customers are not subject to an enforceable master netting arrangement and are therefore excluded from these tables:

(in thousands)	Gross Amounts Subject to Master Netting Arrangements Offset on the Consolidated Balance Sheets				Gross Amounts Not Offset on the Consolidated Balance Sheets

Note 15 Commitments, Off-Balance Sheet Arrangements, and Legal Proceedings

The Corporation utilizes a variety of financial instruments in the normal course of business to meet the financial needs of its customers and to manage its own exposure to fluctuations in interest rates. These financial instruments include lending-related and other commitments (see below) as well as derivative instruments (see Note 13). The following is a summary of lending-related commitments:

(in thousands)	December 31, 2025	December 31, 2024
Commitments to extend credit ^(a) , excluding commitments to originate residential mortgage loans held for sale ^(b)	\$ 11,872,816	\$ 11,173,438
Commercial letters of credit ^(a)	425	875
Standby letters of credit ^(c)	222,047	253,709

(a) These off-balance sheet financial instruments are exercisable at the market rate prevailing at the date the underlying transaction will be completed and, thus, are deemed to have no current fair value, or the fair value is based on fees currently charged to enter into similar agreements and was not material at December 31, 2025 or 2024.

(b) Interest rate lock commitments to originate residential mortgage loans held for sale are considered derivative instruments and are disclosed in Note 13.

(c) Standby letters of credit are presented excluding participations. The Corporation has established a liability of \$2.2 million at December 31, 2025 and and \$2.5 million at December 31, 2024, as an estimate of the fair value of these financial instruments.

Lending-related Commitments

As a financial services provider, the Corporation routinely enters into commitments to extend credit. Such commitments are subject to the same credit policies and approval process accorded to loans made by the Corporation, with each customer's creditworthiness evaluated on a case-by-case basis. The commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. The Corporation's exposure to credit loss in the event of nonperformance by the other party to these financial instruments is represented by the contractual amount of those instruments. The amount of collateral obtained, if deemed necessary by the Corporation upon extension of credit, is based on management's credit evaluation of the customer. Since a significant portion of commitments to extend credit are subject to specific restrictive loan covenants or may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements. An allowance for unfunded commitments is maintained at a level believed by management to be sufficient to absorb expected lifetime losses related to unfunded commitments (including unfunded loan commitments and letters of credit).

The following table presents a summary of the changes in the allowance for unfunded commitments:

(in thousands)	Year Ended December 31, 2025	Year Ended December 31, 2024
Allowance for unfunded commitments		
Balance at beginning of period	\$ 38,776	\$ 34,776
Provision for unfunded commitments	2,500	4,000
Balance at end of period	\$ 41,276	\$ 38,776

Lending-related commitments include commitments to extend credit, commitments to originate residential mortgage loans held for sale, commercial letters of credit, and standby letters of credit. Commitments to extend credit are legally binding agreements to lend to customers at predetermined interest rates, as long as there is no violation of any condition established in the contracts. Interest rate lock commitments to originate residential mortgage loans held for sale and forward commitments to sell residential mortgage loans are considered derivative instruments, and the fair value of these commitments is recorded in other assets and accrued expenses and other liabilities on the consolidated balance sheets. The Corporation's derivative and hedging activity is further described in Note 13. Commercial and standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Commercial letters of credit are issued specifically to facilitate commerce and typically result in the commitment being drawn on when the underlying transaction is consummated between the customer and the third party, while standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party.

Other Commitments

The Corporation invests in qualified affordable housing projects, historic projects, new market projects, and opportunity zone funds for the purpose of community reinvestment and obtaining tax credits and other tax benefits. Return on the Corporation's investment in these projects and funds comes in the form of the tax credits and tax losses that pass through to the Corporation. The aggregate carrying value of these investments at December 31, 2025, was \$174.3 million, compared to \$204.8 million at December 31, 2024, included in tax credit and other investments on the consolidated balance sheets.

Under the proportional amortization method, the Corporation amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits. The Corporation recognized additional income tax expense attributable to the amortization of investments in qualified affordable housing projects of \$35.5 million, \$34.8 million, and \$34.1 million during the years ended

December 31, 2025, 2024, and 2023, respectively. The Corporation's remaining investment in qualified affordable housing projects accounted for under the proportional amortization method totaled \$172.2 million at December 31, 2025 and \$202.8 million at December 31, 2024.

The Corporation's unfunded contributions relating to investments in qualified affordable housing and historic projects are recorded in accrued expenses and other liabilities on the consolidated balance sheets. The Corporation's remaining unfunded contributions totaled \$22.8 million and \$29.7 million at December 31, 2025 and 2024, respectively.

During the years ended December 31, 2025, 2024 and 2023, the Corporation did not record any impairment related to qualified affordable housing investments.

The Corporation has principal investment commitments to provide capital-based financing to private companies through either direct investment in specific companies or through investment funds and partnerships. The timing of future cash requirements to fund such principal investment commitments is generally dependent on the investment cycle, whereby privately held companies are funded by private equity investors and ultimately sold, merged, or taken public through an initial offering, which can vary based on overall market conditions, as well as the nature and type of industry in which the companies operate. The timing of future cash requirements to fund these pools is dependent upon loan demand, which can vary over time. The aggregate carrying value of these investments was \$62.3 million and \$54.1 million at December 31, 2025 and 2024, respectively, included in tax credit and other investments on the consolidated balance sheets.

Legal Proceedings

The Corporation is party to various pending and threatened claims and legal proceedings arising in the normal course of business activities, some of which involve claims for substantial amounts. Although there can be no assurance as to the ultimate outcomes, the Corporation believes it has meritorious defenses to the claims asserted against it in its currently outstanding matters and intends to continue to defend itself vigorously with respect to such legal proceedings. The Corporation will consider settlement of cases when, in management's judgment, it is in the best interests of the Corporation and its shareholders.

Management believes that the legal proceedings currently pending against it should not have a material adverse effect on the Corporation's consolidated financial condition. However, in light of the uncertainties involved in such proceedings, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves the Corporation has currently accrued or that a matter will not have material reputational or other qualitative consequences. As a result, the outcome of a particular matter may be material to the Corporation's operating results for a particular period, depending on, among other factors, the size of the loss or liability imposed and the level of the Corporation's income for that period.

Mortgage Repurchase Reserve

The Corporation sells residential mortgage loans to investors in the normal course of business. Residential mortgage loans sold to others are predominantly conventional residential first lien mortgages originated under the Corporation's usual underwriting procedures, and are most often sold on a nonrecourse basis, primarily to the GSEs. The Corporation's agreements to sell residential mortgage loans in the normal course of business usually require certain representations and warranties on the underlying loans sold, related to credit information, loan documentation, collateral, and insurability. Subsequent to being sold, if a material underwriting deficiency or documentation defect is discovered, the Corporation may be obligated to repurchase the loan or reimburse the GSEs for losses incurred (collectively, "make whole requests"). The make whole requests and any related risk of loss under the representations and warranties are largely driven by borrower performance. The Corporation also sells qualifying residential mortgage loans guaranteed by U.S. government agencies into GNMA pools.

As a result of make whole requests, the Corporation has repurchased loans with aggregate principal balances of \$3.5 million and \$3.2 million for the years ended December 31, 2025 and 2024, respectively. There were no loss reimbursement and settlement claims paid for the years ended December 31, 2025, or 2024. Make whole requests since January 1, 2024 generally arose from loans originated since January 1, 2022 with such balances totaling \$3.9 billion at the time of sale, consisting primarily of loans sold to GSEs. As of December 31, 2025, \$1.8 billion of those loans originated since January 1, 2022 remain outstanding.

The balance in the mortgage repurchase reserve at the balance sheet date reflects the estimated amount of potential loss the Corporation could incur from repurchasing a loan, as well as loss reimbursements, indemnifications, and other settlement resolutions. The mortgage repurchase reserve, included in accrued expenses and other liabilities on the consolidated balance sheets, was \$0.3 million at December 31, 2025 and \$0.6 million at December 31, 2024.

The Corporation may also sell residential mortgage loans with limited recourse (limited in that the recourse period ends prior to the loan's maturity, usually after certain time and/or loan paydown criteria have been met), whereby repurchase could be

required if the loan had defined delinquency issues during the limited recourse periods. At December 31, 2025 and December 31, 2024, there were \$11.4 million and \$13.7 million, respectively, of residential mortgage loans sold with such recourse risk. There have been limited instances and immaterial historical losses on repurchases for recourse under the limited recourse criteria.

The Corporation has a subordinate position to the FHLB in the credit risk on residential mortgage loans it sold to the FHLB Mortgage Partnership Finance Traditional program in exchange for a monthly credit enhancement fee. At December 31, 2025 and December 31, 2024, there were \$273.4 million and \$133.8 million, respectively, of such residential mortgage loans with credit risk recourse, upon which there have been immaterial historical losses to the Corporation.

Note 16 Parent Company Only Financial Information

Presented below are condensed financial statements for the Parent Company:

Balance Sheets

(in thousands)	December 31,	
	2025	2024
Assets		
Cash and due from banks	\$ 32,616	\$ 36,158
Interest-bearing deposits in other financial institutions	50,325	212,943

Cash and cash equivalents at end of year	\$ 82,941	\$ 249,101	\$ 42,901

Note 17 Fair Value Measurements

Fair value represents the estimated price at which an orderly transaction to sell an asset or to transfer a liability would take place between market participants at the measurement date under current market conditions (i.e., an exit price concept). See Note 1 for the Corporation's accounting policy for fair value measurements.

Following is a description of the valuation methodologies with significant inputs used for the Corporation's instruments measured on a recurring basis at fair value, including the general classification of such instruments pursuant to the valuation hierarchy.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

AFS Investment Securities: Where quoted prices are available in an active market, investment securities are classified in Level 1 of the fair value hierarchy. If quoted market prices are not available for the specific security, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics, or discounted cash flows, with consideration given to the nature of the quote and the relationship of recently evidenced market activity to the fair value estimate, and are classified in Level 2 of the fair value hierarchy. Lastly, in certain cases where there is limited activity or less transparency around inputs to the estimated fair value, securities are classified within Level 3 of the fair value hierarchy. To validate the fair value estimates, assumptions, and controls, the Corporation looks to transactions for similar instruments and utilizes independent pricing provided by third party vendors or brokers and relevant market indices. While none of these sources are solely indicative of fair value, they serve as directional indicators for the appropriateness of the Corporation's fair value estimates. The Corporation has determined that the fair value measures of its AFS investment securities are classified predominantly within Level 2 of the fair value hierarchy. See Note 2 for additional disclosure regarding the Corporation's AFS investment securities.

Equity Securities with Readily Determinable Fair Values: The Corporation's portfolio of equity securities with readily determinable fair values is primarily comprised of mutual funds. Since quoted prices for the Corporation's equity securities are readily available in an active market, they are classified within Level 1 of the fair value hierarchy. See Note 2 for additional disclosure regarding the Corporation's equity securities.

Residential Loans Held For Sale: Residential loans held for sale, which consist generally of current production of certain fixed-rate, first-lien residential mortgage loans, are carried at estimated fair value. As of December 31, 2024, this balance also includes residential mortgages included in the mortgage portfolio sale as part of the balance sheet repositioning announced in the fourth quarter of 2024. Management has elected the fair value option to account for all newly originated mortgage loans held for sale, which results in the financial impact of changing market conditions being reflected currently in earnings as opposed to being dependent upon the timing of sales. Therefore, the continually adjusted values better reflect the price the Corporation expects to receive from the sale of such loans. The estimated fair value is based on what secondary markets are currently offering for portfolios with similar characteristics, which the Corporation classifies as a Level 2 fair value measurement.

Derivative Financial Instruments (Interest Rate-Related Instruments - Both Designated and Not Designated as Hedging Instruments): The Corporation uses interest rate-related instruments (swaps and caps) to hedge its exposure to changes in fair value of its fixed-rate debt and mortgage servicing rights as well as to hedge its exposure to variability in cash flows on its floating rate assets, both due to changes in benchmark interest rates. Additionally, the Corporation also offers interest rate-related instruments (swaps and caps) to service its customers' needs, for which the Corporation simultaneously enters into offsetting derivative financial instruments (i.e., mirror interest rate-related instruments) with third parties to manage its interest rate risk associated with these financial instruments. The valuation of the Corporation's derivative financial instruments is determined using discounted cash flow analysis on the expected cash flows of each derivative and also includes a nonperformance/credit risk component (credit valuation adjustment). See Note 13 for additional disclosure regarding the Corporation's interest rate-related instruments.

The discounted cash flow analysis component in the fair value measurement reflects the contractual terms of the derivative financial instruments, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. More specifically, the fair values of interest rate swaps are determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) with the variable cash payments (or receipts) based on an expectation of future interest rates (forward curves) derived from observable market interest rate curves. Likewise, the fair values of interest rate options (i.e., interest rate caps) are determined using the market standard methodology of discounting the future expected cash receipts that would occur if variable interest rates fall below (or rise above) the strike rate of the floors (or caps), with the variable interest rates used in the calculation of projected receipts on the floor (or cap) based on an expectation of future interest rates derived from observable market interest rate curves and volatilities.

The Corporation also incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative financial instruments for the effect of nonperformance risk, the Corporation has considered the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts, and guarantees.

While the Corporation has determined that the majority of the inputs used to value its interest rate-related derivative financial instruments fall within Level 2 of the fair value hierarchy, the credit valuation adjustments utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. The Corporation has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions as of December 31, 2025 and 2024, and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivative financial instruments for interest rate-related instruments. Therefore, the Corporation has determined that the fair value measures of its derivative financial instruments for interest rate-related instruments in their entirety are classified within Level 2 of the fair value hierarchy.

Derivative Financial Instruments (Foreign Currency Exchange Forwards - Both Designated and Not Designated as Hedging Instruments): The Corporation provides foreign currency exchange services to customers. In addition, the Corporation may enter into a foreign currency exchange forward to mitigate the exchange rate risk attached to the cash flows of a loan or as an offsetting contract to a forward entered into as a service to its customer. The valuation of the Corporation's foreign currency exchange forwards is determined using quoted prices of foreign currency exchange forwards with similar characteristics, with consideration given to the nature of the quote and the relationship of recently evidenced market activity to the fair value estimate, and is classified within Level 2 of the fair value hierarchy. See Note 13 for additional disclosures regarding the Corporation's foreign currency exchange forwards.

For Level 3 assets and liabilities measured at fair value on a recurring basis as of December 31, 2025, the Corporation utilized the following valuation techniques and significant unobservable inputs:

Mortgage Servicing Rights: MSRs are not traded in active markets. A cash flow model is used to determine fair value. Key assumptions and estimates, including projected prepayment speeds, assumed servicing costs, ancillary income, costs to service delinquent loans, costs of foreclosure, and discount rates with option-adjusted spreads, used by this model are based on current

market sources. Assumptions used to value MSRs are considered significant unobservable inputs. A separate third-party model is used to estimate prepayment speeds based on interest rates, housing turnover rates, estimated loan curtailment, anticipated defaults, and other relevant factors. Fair value estimates from outside sources are received periodically to corroborate the results of the valuation model. Due to the nature of the valuation inputs, MSRs are classified within Level 3 of the fair value hierarchy. See Note 4 for additional disclosure regarding the Corporation's MSRs.

Derivative Financial Instruments (Mortgage Derivative — Interest Rate Lock Commitments to Originate Residential Mortgage Loans Held For Sale): The fair value is determined by the change in value from each loan's rate lock date to the expected rate lock expiration date based on the underlying loan attributes, estimated closing ratios, and investor price matrix determined to be reasonably applicable to each loan commitment. The closing ratio calculation takes into consideration historical experience and loan-level attributes, particularly the change in the current interest rates from the time of initial rate lock. The closing ratio is periodically reviewed for reasonableness and reported to the Associated Mortgage Risk Management Committee.

Derivative Financial Instruments (Mortgage Derivative—Forward Commitments to Sell Mortgage Loans): Mortgage derivatives include forward commitments to deliver closed-end residential mortgage loans into conforming Agency MBS or conforming Cash Forward sales. The fair value of such instruments is determined by the difference of current market prices for such traded instruments or available from forward cash delivery commitments and the original traded price for such commitments.

The Corporation also relies on an internal valuation model to estimate the fair value of its forward commitments to sell residential mortgage loans (i.e., an estimate of what the Corporation would receive or pay to terminate the forward delivery contract based on market prices for similar financial instruments), which includes matching specific terms and maturities of the forward commitments against applicable investor pricing available. While there are Level 2 and 3 inputs used in the valuation models, the Corporation has determined that the majority of the inputs significant in the valuation of both of the mortgage derivatives fall within Level 3 of the fair value hierarchy. See Note 13 for additional disclosure regarding the Corporation's mortgage derivatives.

The tables below present the Corporation's financial instruments measured at fair value on a recurring basis and carrying amounts and estimated fair values of certain financial instruments, aggregated by the level in the fair value hierarchy within which those measurements fall:

The table below presents a rollforward of the consolidated balance sheets amounts for the Corporation's mortgage derivatives measured at fair value on a recurring basis and classified within Level 3 of the fair value hierarchy:

(in thousands)	Interest rate lock commitments to originate residential mortgage loans held for sale	Forward commitments to sell residential mortgage loans
Balance December 31, 2023	\$ 439	\$ 673
New production	11,771	(4,000)
Closed loans / settlements	(8,816)	3,512
Other	(3,068)	(438)
Change in mortgage derivative	(113)	(927)
Balance December 31, 2024	\$ 327	\$ (254)
New production	13,435	(3,998)
Closed loans / settlements	(13,690)	2,738
Other	742	1,958
Change in mortgage derivative	487	698
Balance December 31, 2025	\$ 814	\$ 444

Refer to Note 4 for a rollforward of the consolidated balance sheets amounts for the Corporation's mortgage servicing rights measured at fair value on a recurring basis and classified within Level 3 of the fair value hierarchy.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Following is a description of the valuation methodologies used for the Corporation's more significant instruments measured on a nonrecurring basis at LOCOM, including the general classification of such instruments pursuant to the valuation hierarchy.

Commercial Loans Held For Sale: The estimated fair value is based on a discounted cash flow analysis, which the Corporation classifies as a Level 2 nonrecurring fair value measurement.

OREO: Certain OREO, upon initial recognition, was re-measured and reported at fair value through a charge off to the allowance for loan losses based upon the estimated fair value of the OREO, less estimated selling costs. The fair value of OREO, upon initial recognition or subsequent impairment, was estimated using appraised values, which the Corporation classifies as a Level 2 nonrecurring fair value measurement.

For Level 3 assets and liabilities measured at fair value on a nonrecurring basis as of December 31, 2025, the Corporation utilized the following valuation techniques and significant unobservable inputs:

Individually Evaluated Loans: The Corporation individually evaluates loans when a commercial loan relationship over \$0.5 million is in nonaccrual status or when it otherwise does not share similar risk characteristics with other loans, including those for which a debt restructuring is probable. See Note 3 for additional information regarding the Corporation's individually evaluated loans.

Equity Securities Without Readily Determinable Fair Values: The Corporation measures equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer, with such changes recognized in earnings. Included in equity securities without readily determinable fair values were Visa Class B restricted shares carried at fair value, of which the Corporation sold all remaining shares during the first quarter of 2024.

In its determination of the new carrying values upon observable price changes, the Corporation will adjust the prices if deemed necessary to arrive at the Corporation's estimated fair values. Such adjustments may include adjustments to reflect the different rights and obligations of similar securities and other adjustments. See Note 2 for additional disclosure regarding the Corporation's equity securities without readily determinable fair values.

The following table presents a rollforward of the fair value of Level 3 equity securities that are measured under the measurement alternative, and the related adjustments recorded during the periods presented for those securities with observable price changes:

(in thousands)		
Fair value as of December 31, 2023	\$	24,769
Gains recognized in investment securities gains, net		4,054
Purchases		22
Sales		(28,772)
Fair value as of December 31, 2024	\$	72
Purchases		14
Sales		(23)
Transfers out of level 3		(63)
Fair value as of December 31, 2025	\$	—

The table below presents the Corporation's assets measured at fair value on a nonrecurring basis, aggregated by the level in the fair value hierarchy within which those measurements fall:

(in thousands)	Fair Value Hierarchy	Fair Value	
		December 31, 2025	December 31, 2024
Assets			
Individually evaluated loans	Level 3	\$ 18,659	\$ 31,483
OREO ^(a)	Level 2	770	276

(a) If the fair value of the collateral exceeds the carrying amount of the asset, no charge off or adjustment is necessary, the asset is not considered to be carried at fair value, and is therefore not included in the table.

The table below presents the unobservable inputs that are readily quantifiable pertaining to Level 3 measurements:

December 31, 2025	Valuation Technique	Significant Unobservable Input	Range of Inputs		Weighted Average Input Applied
Mortgage servicing rights	Discounted cash flow	Option adjusted spread	5%	- 8%	5%
Mortgage servicing rights	Discounted cash flow	Constant prepayment rate	—%	- 100%	9%
Individually evaluated loans	Discounted cash flow	Discount factor	45%	- 45%	45%
Individually evaluated loans	Market approach	Appraisal / Cost to sell	10%	- 90%	69%
Interest rate lock commitments to originate residential mortgage loans held for sale	Discounted cash flow	Closing ratio	67%	- 100%	93%

Note 18 Regulatory Matters

Regulatory Capital Requirements

The Corporation and its subsidiary bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Corporation's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation must

meet specific capital guidelines that involve quantitative measures of the Corporation's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Corporation's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Corporation to maintain minimum amounts and ratios (set forth in the table below) of total and CET1 capital to risk-weighted assets, and of tier 1 capital to average assets. Management believes, as of December 31, 2025 and 2024, that the Corporation meets all capital adequacy requirements to which it is subject.

For additional information on the capital requirements applicable for the Corporation and the Bank, please see Part I, Item 1.

As of December 31, 2025 and 2024, the most recent notifications from the OCC and the FDIC categorized the subsidiary bank as well-capitalized under the regulatory framework for prompt corrective action. To be categorized as well-capitalized, the subsidiary bank must maintain minimum ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category. The actual capital amounts and ratios of the Corporation and its significant subsidiary are presented below. No deductions from capital were made for interest rate risk in 2025 or 2024.

Note 19 Earnings Per Common Share

See Note 1 for the Corporation's accounting policy on earnings per common share. Presented below are the calculations for basic and diluted earnings per common share:

(in thousands, except per share data)	For the Years Ended December 31,		
	2025	2024	2023
Net income	\$ 474,777	\$ 123,145	\$ 182,956
Preferred stock dividends	(11,500)	(11,500)	(11,500)
Net income available to common equity	\$ 463,277	\$ 111,645	\$ 171,456
Common shareholder dividends	\$ (154,993)	\$ (138,508)	\$ (128,748)
Unvested share-based payment awards	(780)	(689)	(785)
Undistributed earnings	\$ 307,504	\$ (27,552)	\$ 41,922
Undistributed earnings allocated to common shareholders	\$ 306,008	\$ (27,552)	\$ 41,675
Undistributed earnings allocated to unvested share-based payment awards	1,496	—	247
Undistributed earnings	\$ 307,504	\$ (27,552)	\$ 41,922
Basic			
Distributed earnings to common shareholders	\$ 154,993	\$ 138,508	\$ 128,748
Undistributed earnings allocated to common shareholders	306,008	(27,552)	41,675
Total common shareholders earnings, basic	\$ 461,001	\$ 110,956	\$ 170,424
Diluted			
Distributed earnings to common shareholders	\$ 154,993	\$ 138,508	\$ 128,748
Undistributed earnings allocated to common shareholders	306,008	(27,552)	41,675
Total common shareholders earnings, diluted	\$ 461,001	\$ 110,956	\$ 170,424
Weighted average common shares outstanding	165,079	151,933	149,968
Effect of dilutive common stock awards	1,534	1,415	892
Diluted weighted average common shares outstanding	166,613	153,347	150,860
Basic earnings per common share	\$ 2.79	\$ 0.73	\$ 1.14
Diluted earnings per common share	\$ 2.77	\$ 0.72	\$ 1.13

Excluded from the earnings per common share calculations were 0.8 million anti-dilutive common stock options for the year ended December 31, 2025, and 1.8 million and 3.4 million anti-dilutive common stock options were excluded from the earnings per common share calculations for the years ended December 31, 2024 and 2023, respectively.

Note 20 Segment Reporting

The Corporation is managed through operating segments based on our internal structure and management process, which is how we assess performance and allocate resources to the segments. Certain operating segments have been aggregated into our three reportable segments where the nature of the products and services, the type of customer, and the distribution of those products and services are similar. The three reportable segments are Corporate and Commercial Specialty; Community, Consumer, and Business; and Risk Management and Shared Services. A description of the products and services and the related customers for each reportable segment is as follows:

Corporate and Commercial Specialty: The Corporate and Commercial Specialty segment serves a wide range of customers including larger businesses, developers, not-for-profits, municipalities, and financial institutions by providing lending and deposit solutions as well as the support to deliver, fund, and manage such banking solutions. Within this segment we provide the following products and services: (1) lending solutions, such as commercial loans and lines of credit, CRE financing, construction loans, letters of credit, leasing, ABL & equipment finance, and, for our larger clients, loan syndications; (2) deposit and cash management solutions such as commercial checking and interest-bearing deposit products, cash vault and night depository services, liquidity solutions, payables and receivables solutions, and information services; and (3) specialized financial services such as interest rate risk management, and foreign exchange solutions.

Community, Consumer and Business: The Community, Consumer and Business segment serves individuals and businesses by providing lending and deposit solutions and a variety of investment, fiduciary, and retirement planning products and services. Within this segment we provide the following products and services: (1) lending solutions such as residential mortgages, home equity loans and lines of credit, personal and installment loans, auto finance loans, business loans, and

business lines of credit; (2) deposit and transactional solutions such as checking, credit and debit cards, online banking and bill pay, and money transfer services; (3) fiduciary services such as administration of pension, profit-sharing and other employee benefit plans, fiduciary and corporate agency services, and institutional asset management; and (4) investable funds solutions such as savings; money market deposit accounts; IRA accounts; CDs; fixed and variable annuities; full-service, discount and online investment brokerage; investment advisory services; and trust and investment management accounts.

Risk Management and Shared Services: The Risk Management and Shared Services segment includes key shared operational functions and also includes residual revenue and expenses, representing the difference between actual amounts incurred and the amounts allocated to operating segments, including interest rate risk residuals (FTP mismatches) and credit risk and provision residuals (long-term credit charge mismatches).

Effective beginning the fourth quarter of 2024, the Corporation made the change to move the private wealth operating segment from the Corporate and Commercial Specialty segment to the Community, Consumer and Business segment given its continued alignment with the products, services, and customers of that segment. This impacted the composition of the reportable segments and the Corporation has recast the impacted items of reportable segment information for the earlier presented periods.

The financial information of the Corporation's segments disclosed below has been compiled utilizing the accounting policies described in Note 1, with certain exceptions based on internal management accounting policies. The significant exceptions are as follows:

The Corporation allocates certain net interest income, the provision for credit losses, certain noninterest expenses, and income taxes to each operating segment. Allocation methodologies are subject to periodic adjustment as the internal management accounting system is revised, the interest rate environment evolves, and business or product lines within the segments change. Also, because the development and application of these methodologies is a dynamic process, the financial results presented may be periodically reviewed. There were no significant changes in the current year to the methods for allocations to the segments from the prior periods.

The Corporation allocates certain net interest income using an internal FTP methodology that charges users of funds (assets, primarily loans) and credits providers of funds (liabilities, primarily deposits) based on the maturity, prepayment, and/or re-pricing characteristics of the assets and liabilities. This allocation is reflected as net intersegment interest income (expense) in the accompanying tables.

The provision for credit losses is allocated to segments based on the expected long-term annual net charge off rates attributable to the credit risk of loans managed by the segment during the period. In contrast, the level of the consolidated provision for credit losses is determined based on an ACLL model using methodologies described in Note 1.

The net effect of the above allocations is recorded within the Risk Management and Shared Services segment to ensure consolidated totals reflect the Corporation's consolidated financial information.

Indirect expenses incurred by certain centralized support areas (including facilities, information technology services and applications, management expenses, and FDIC expense) are allocated to segments based on actual usage (for example, volume measurements or FTEs) and other criteria. Certain types of administrative expense and bank-wide expense accruals (including, when applicable, amortization of CDIs and other intangible assets associated with acquisitions, acquisition-related costs, and asset gains on disposed business units) are generally not allocated and remain in the Risk Management and Shared Services segment. This allocation is reflected as allocated indirect expense in the accompanying tables.

Income tax expense (benefit) is allocated to segments based on the Corporation's estimated effective tax rate, with certain segments adjusted for any tax-exempt income or non-deductible expenses.

Financial information about the Corporation's segments is presented below:

(a) Unusual items including a \$136.2 million loss on mortgage portfolio sale and a \$64.9 million loss on investment securities as a result of the balance sheet repositioning announced in the fourth quarter of 2023 are included within the noninterest income (expense) caption and a \$30.6 million FDIC special assessment is included in the FDIC assessment caption.

(b) A portion of total depreciation expense of \$0.2 million, \$8.0 million, and \$38.9 million for the Corporate and Commercial Specialty, Community Consumer and Business, and Risk Management and Shared Services segments, respectively, is included in this expense caption.

Expenses included within the other noninterest expense line of the segment information above relate to the remaining segment expenses including office expense and card issuance costs. None of the individual expense categories rise to the level of significance for the segment; however, they are utilized in determining the profit or loss measure for each segment.

The management accounting policies and processes utilized in compiling segment financial information are highly subjective and, unlike financial accounting, are not based on authoritative guidance similar to U.S. GAAP. As a result, reportable segments and the financial information of the reported segments are not necessarily comparable with similar information reported by other financial institutions. Furthermore, the information presented is not indicative of how the segments would perform if they operated as independent entities.

The chief operating decision maker for each of the segments is the President and Chief Executive Officer of the Corporation. For the Corporate and Commercial Specialty and Community, Consumer and Business segments, the chief operating decision maker utilizes net interest income, net income and average total loans and deposits in allocating resources for each segment predominantly in the annual budget and forecasting process. The chief operating decision maker considers budget-to-actual variances on a monthly basis for both profit measures when making decisions about allocating capital and personnel to the segments. Based on the reviews of these two segments and other company-wide initiatives, the chief operating decision maker is informed about allocation of resources to the Risk Management and Shared Services segment.

Note 21 Accumulated Other Comprehensive Income (Loss)

The following table summarizes the components of accumulated other comprehensive income (loss), including changes during the years presented as well as any reclassifications out of accumulated other comprehensive income (loss):

Note 22 Revenue from Contracts with Customers

Revenue from contracts with customers is recognized when obligations under the terms of a contract with the Corporation's customer are satisfied. Revenue is measured as the amount of consideration we expect to receive in exchange for transferring goods or providing services. We do not have any material significant payment terms as payment is received at or shortly after the satisfaction of the performance obligation.

The Corporation's disaggregated revenue by major source is presented below:

For the Year Ended December 31, 2025					
(in thousands)	Corporate and Commercial Specialty	Community, Consumer and Business	Risk Management and Shared Services	Consolidated Corporation

Noninterest income (loss) (out-of-scope of Topic 606)	39,407	20,702	(183,486)	(123,377)	
Total noninterest income (loss)	\$ 51,905	\$ 193,948	\$ (182,671)	\$ 63,182	

(a) Certain card based fees are out-of-scope of Topic 606.

Below is a listing of performance obligations for the Corporation's main revenue streams:

Revenue Stream	Noninterest Income In-Scope of Topic 606
Service charges and deposit account fees	Service charges and deposit account fees consist of monthly service fees (i.e. business analyzed fees and consumer service charges) and other deposit account related fees. The Corporation's performance obligation for monthly service fees is generally satisfied, and the related revenue recognized, over the period in which the service is provided. Other deposit account related fees are largely transactional-based, and therefore, the Corporation's performance obligation is satisfied, and related revenue recognized, at a point in time. Payment for service charges and deposit account fees is primarily received immediately or in the following month through a direct charge to customers' accounts.
Card-based fees ^(a)	Card-based fees are primarily comprised of debit and credit card income, ATM fees, and merchant services income. Debit and credit card income is primarily comprised of interchange fees earned whenever the Corporation's debit and credit cards are processed through card payment networks. ATM and merchant fees are largely transactional-based, and therefore, the Corporation's performance obligation is satisfied, and related revenue recognized, at a point in time. Payment is typically received immediately or in the following month.
Trust and asset management fees ^(b)	Trust and asset management income is primarily comprised of fees earned from the management and administration of trusts and other customer assets. The Corporation's performance obligation is generally satisfied over time and the resulting fees are recognized monthly, based upon the month-end market value of the assets under management and the applicable fee rate. Payment is generally received a few days after month end through a direct charge to the customers' accounts. The Corporation's performance obligation for these transactional-based services is generally satisfied, and related revenue recognized, at a point in time (i.e., as incurred). Payment is received shortly after services are rendered.
Brokerage and advisory fees ^(b)	Brokerage and advisory fees primarily consist of investment advisory, brokerage, retirement services, and annuities. The Corporation's performance obligation for investment advisory services and retirement services is generally satisfied, and the related revenue recognized, over the period in which the services are provided. The performance obligation for annuities is satisfied upon sale of the annuity, and therefore, the related revenue is primarily recognized at the time of sale. Payment for these services is typically received immediately or in advance of the service.

(a) Certain card-based fees are out-of-scope of Topic 606.

(b) Trust and asset management fees and brokerage and advisory fees are included in wealth management fees.

Note 23 Recent Developments

On January 27, 2026, the Corporation's Board of Directors declared a regular quarterly cash dividend of \$0.24 per common share, payable on March 16, 2026 to shareholders of record at the close of business on March 2, 2026. The Board of Directors also declared a regular quarterly cash dividend of \$0.3671875 per depositary share on Associated's 5.875% Series E Perpetual Preferred Stock, payable on March 16, 2026 to shareholders of record at the close of business on March 2, 2026. The Board of Directors also declared a regular quarterly cash dividend of \$0.3515625 per depositary share on Associated's 5.625% Series F Perpetual Preferred Stock, payable on March 16, 2026 to shareholders of record at the close of business on March 2, 2026. Finally, the Board of Directors authorized the repurchase of up to \$100 million of the Corporation's common stock. This repurchase authorization is in addition to the authority remaining under the previous program.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Associated Banc-Corp:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Associated Banc-Corp and subsidiaries (the Company) as of December 31, 2025 and 2024, the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2025, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2025, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 12, 2026 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

Assessment of the allowance for credit losses related to loans, excluding individually analyzed loans

As discussed in Notes 1 and 3 to the consolidated financial statements, the Company's allowance for credit losses related to loans, excluding loans individually analyzed, is comprised of the allowance for loan losses and the allowance for unfunded commitments (collective ACLL) and was \$416.4 million of a total allowance for credit losses of \$419.3 million as of December 31, 2025 (the December 31, 2025 collective ACLL). The level of the December 31, 2025 collective ACLL represents management's estimate of an amount appropriate to provide for expected lifetime credit losses. The expected lifetime credit losses are the product of multiplying the Company's estimates of probability of default (PD), loss given default (LGD), and the individual loan level exposure at default (EAD) on an undiscounted basis. The Company estimates the lifetime expected loss using prepayment assumptions over the projected lifetime cash flow of the loans. The Company uses PD and LGD models, which are based on loan grades for commercial loans and credit reports for consumer loans, which are applied based on portfolio segmentation leveraging industry breakouts in Commercial and Industrial and property types in Commercial Real Estate for commercial loans and loan types for consumer loans, and incorporate a single economic forecast scenario over a reasonable and supportable forecast period. After the reasonable and supportable forecast period, the Company reverts, on a straight-line basis over one year, to its historical loss rates for the remaining life of the loans. A portion of the December 31, 2025 collective ACLL is comprised of adjustments for qualitative factors not reflected in the quantitative model.

We identified the assessment of the December 31, 2025 collective ACLL as a critical audit matter. A high degree of audit effort, including specialized skills and knowledge, and subjective and complex auditor judgment was involved in the assessment of the December 31, 2025 collective ACLL. Specifically, the assessment encompassed the evaluation of the December 31, 2025 collective ACLL methodology, including the methods and models used to estimate (1) PD and LGD and their significant assumptions, including the loan grades for commercial loans, credit reports for consumer loans, historical loan losses and delinquency experience, the economic forecast scenario, and how loans with similar risk characteristics are segmented, (2) the method used to calculate the prepayment assumptions, (3) the determination of the reasonable and supportable forecast period and reversion to historical losses and (4) the qualitative factors. The assessment also included an evaluation of the conceptual soundness and performance of the PD and LGD models and of the mathematical accuracy of certain December 31, 2025 collective ACLL calculations.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the critical audit matter. This included controls related to the:

- development and approval of the collective ACLL methodology
- continued use and appropriateness of changes made to PD and LGD models
- identification and determination of the significant assumptions used in the PD and LGD models, including the loan grades for commercial loans, credit reports for consumer loans, historical loan losses and delinquency experience, and how loans with similar risk characteristics are segmented
- identification and determination of the prepayment assumptions used in the collective ACLL methodology
- development of the qualitative factors
- performance monitoring of the PD and LGD models for the December 31, 2025 collective ACL
- analysis of the collective ACLL results, trends and ratios and
- calculation of the collective ACLL.

We evaluated the Company's process to develop the December 31, 2025 collective ACLL estimate by testing certain sources of data, factors, and assumptions that the Company used, and considered the relevance and reliability of such data, factors, and assumptions, and tested the mathematical accuracy of certain calculations of the December 31, 2025 collective ACLL. In addition, we involved credit risk professionals with specialized skills and knowledge, who assisted in:

- evaluating the Company's collective ACLL methodology for compliance with U.S. generally accepted accounting principles
- evaluating judgments made by the Company relative to the assessment and performance testing of the PD and LGD models by comparing them to relevant Company-specific metrics and trends and the applicable industry and regulatory practices
- evaluating the conceptual soundness of the methodology used to develop the key assumptions for the PD and LGD including loan grades for commercial loans, credit reports for consumer loans, and the historical loan losses and delinquency experience by inspecting the model documentation to determine whether the models are suitable for their intended use
- evaluating the appropriateness of the model methodology utilized to incorporate a reasonable and supportable forecast and reversion methodology by inspecting the model documentation and by comparing it to relevant industry practices
- evaluating the selection of the economic forecast scenario through comparison to publicly available forecasts
- determining whether the loan portfolio is segmented by similar risk characteristics by comparing to the Company's business environment and relevant industry practices
- evaluating the methodology used to develop the qualitative factors and the effect of those factors on the collective ACLL compared with relevant credit risk factors and consistency with credit trends and identified limitations of the underlying quantitative models and
- evaluating individual loan grades for a selection of commercial loan relationships by evaluating the financial performance of the borrower, sources of repayment, and any relevant guarantees or underlying collateral values.

KPMG LLP

We have served as the Company's auditor since 1983.

Chicago, Illinois
February 12, 2026

ITEM 9.	Changes in and Disagreements with Accountants on Accounting and Financial Disclosure
----------------	---

None.

ITEM 9A.	Controls and Procedures
-----------------	--------------------------------

The Corporation maintains disclosure controls and procedures as required under Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Corporation's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of December 31, 2025, the Corporation's management carried out an evaluation, under the supervision and with the participation of the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures. Based on the foregoing, its Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures were effective as of December 31, 2025. No changes were made to the Corporation's internal control over financial reporting (as defined in Rule 13a-15(f) and Rule 15d-15(f) promulgated under the Exchange Act) during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Management's Annual Report on Internal Control Over Financial Reporting

Management of Associated Banc-Corp is responsible for establishing and maintaining adequate internal control over financial reporting. The Corporation's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Corporation's financial statements for external purposes in accordance with GAAP. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act.

As of December 31, 2025, management assessed the effectiveness of the Corporation's internal control over financial reporting based on criteria for effective internal control over financial reporting established in Internal Control — Integrated Framework (2013), issued by the Committee of Sponsoring Organization of the Treadway Commission (COSO). Based on this assessment, management has determined that the Corporation's internal control over financial reporting as of December 31, 2025, was effective.

KPMG LLP, the independent registered public accounting firm that audited the consolidated financial statements of the Corporation included in this Annual Report on Form 10-K, has issued an attestation report on the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2025. The report, which expresses an unqualified opinion on the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2025, is included below under the heading Report of Independent Registered Public Accounting Firm.

To the Stockholders and Board of Directors
Associated Banc-Corp:

Opinion on Internal Control Over Financial Reporting

We have audited Associated Banc-Corp and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2025 and 2024, the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2025, and the related notes (collectively, the consolidated financial statements), and our report dated February 12, 2026 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company;

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ASSOCIATED BANC-CORP**DESCRIPTION OF SECURITIES REGISTERED PURSUANT TO SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934****Description of Common Stock**

Associated Banc-Corp (“we,” “our,” “us”) has one class of common stock, the Associated Banc-Corp common stock. Of the 250,000,000 shares of our common stock with a par value of \$0.01 per share authorized, 165,979,940 shares were outstanding as of December 31, 2025, exclusive of shares held in treasury.

The following summary of the material terms and rights of our common stock is not complete. You should refer to the applicable provision of our Amended and Restated Articles of Incorporation, as amended, for a complete statement of the terms and rights of our common stock.

Dividend Rights

Holders of our common stock are entitled to receive dividends when, as, and if declared by our board of directors out of our assets legally available for payment, subject to the rights of holders of our Series E and Series F Preferred Stock and any other Series of preferred stock that may be designated, issued and outstanding from time to time, if and to the extent so provided under the terms of such series. No share of our common stock is entitled to any preferential treatment with respect to dividends.

Voting Rights

Each holder of our common stock will be entitled at each shareholders’ meeting, with regard to each matter to be voted on, to cast one vote, in person or by proxy, for each share of our common stock registered in his or her name on our stock transfer books. Subject to the rights, if any, of the holders of any Series of preferred stock under their respective certificates of designations and applicable law, all voting rights are vested in the holders of shares of our common stock. Voting rights are not cumulative, which means that holders of more than 50% of the shares voting for the election of directors can elect 100% of the directors, and the holders of the remaining shares will not be able to elect any directors.

Rights Upon Liquidation

Subject to and to the extent of the rights of holders of any of our preferred stock which may be designated, issued and outstanding from time to time, in the event of our liquidation, dissolution or winding up, whether voluntary or involuntary, the holders of our common stock will be entitled to receive all of our assets remaining for distribution to our shareholders, on a pro rata basis.

Miscellaneous

Shares of our common stock are not convertible into shares of any other class of capital stock. Shares of our common stock are not and will not be entitled to any preemptive or subscription rights. The issued and outstanding shares of our common stock are fully paid and nonassessable. The transfer agent, registrar, and dividend disbursement agent for our common stock shall be named in the applicable prospectus supplement.

Description of Preferred Stock

Under our Amended and Restated Articles of Incorporation, as amended, our board of directors is authorized, without further shareholder action, to issue up to 750,000 shares of preferred stock, \$1.00 par value per share, in one or more series, and to determine the preferences, limitations and relative rights of each series. As of December 31, 2025, there were authorized (i) 100,000 shares of our 5.875% Non-Cumulative Perpetual Preferred Stock, Series E, with a liquidation preference of \$1,000 per share, all of which were outstanding and (ii) 100,000 shares of our 5.625% Non-Cumulative Perpetual Preferred

Stock, Series F, with a liquidation preference of \$1,000 per share, all of which were outstanding. We may amend our Amended and Restated Articles of Incorporation, as amended, to increase the number of authorized shares of preferred stock in a manner permitted by our Amended and Restated Articles of Incorporation and the Wisconsin Business Corporation Law.

All of our outstanding shares of preferred stock are represented by depositary shares registered pursuant to Section 12(b) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Each Series of depositary shares is described under “Description of Depositary Shares,” below.

Under regulations adopted by the Federal Reserve Board, if the holders of any Series of our preferred stock become entitled to vote for the election of directors because dividends on that Series are in arrears, that Series may then be deemed a “class of voting securities.” In such a case, a holder of 25% or more of the series, or a holder of 5% or more if that holder would also be considered to exercise a “controlling influence” over Associated Banc-Corp, may then be subject to regulation as a bank holding company in accordance with the Bank Holding Company Act of 1956. In addition, (1) any other bank holding company may be required to obtain the prior approval of the Federal Reserve Board to acquire or retain 5% or more of that series, and (2) any person other than a bank holding company may be required to obtain the approval of the Federal Reserve Board to acquire or retain 10% or more of that series.

The following summary is not complete. You should also refer to our Amended and Restated Articles of Incorporation, as amended, and to our Articles of Amendment relating to the Series of the preferred stock being offered for the complete terms of that Series of preferred stock.

5.875% Non-Cumulative Perpetual Preferred Stock, Series E

As of December 31, 2025, there were 100,000 shares of our 5.875% Non-Cumulative Perpetual Preferred Stock, Series E, par value of \$1.00 per share, with a liquidation preference of \$1,000 per share (the “Series E Preferred Stock” or the “Series E Shares”) issued and outstanding. The depositary is the sole holder of the Series E Preferred Stock, as described under “Depositary Shares Representing the Series E and Series F Shares” below, and all references to the holders of the Series E Shares shall mean the depositary. However, the holders of the depositary shares representing the Series E Shares are entitled, through the depositary, to exercise the rights and preferences of the holders of the Series E Shares, as described under “Depositary Shares Representing the Series E and Series F Shares.” This summary of the Series E Preferred Stock does not purport to be complete in all respects. This summary is subject to and qualified in its entirety by reference to our Amended and Restated Articles of Incorporation, as amended, including the Articles of Amendment with respect to the designation of the Series E Preferred Stock.

Each holder of Series E Shares is entitled to receive cash dividends when, as and if declared out of assets legally available for payment in respect of the Series E Shares by our Board of Directors or a duly authorized committee of the Board in their sole discretion. Dividends will be non-cumulative. If we do not declare dividends or do not pay dividends in full on the Series E Shares on any date on which dividends are due, then these undeclared and unpaid dividends will not cumulate, accrue or be payable.

The Series E Shares have a fixed liquidation preference of \$1,000 per share (equivalent to \$25 per depositary share). If we liquidate, dissolve or wind up our business and affairs, holders of Series E Shares will be entitled to receive, out of our assets that are available for distribution to shareholders, an amount per Series E Share equal to the liquidation preference per Share plus an amount with respect to dividends as and to the extent described below under “—Liquidation Rights.”

The Series E Shares are not convertible into, or exchangeable for, shares of our common stock or any other class or Series of our stock or other securities. The Series E Shares are not subject to any sinking fund or any other obligation of us to redeem or repurchase the Series E Shares.

Ranking

The Series E Shares rank, as to the payment of dividends and the amounts to be paid upon liquidation, dissolution or winding up, senior to our common stock and any other class or Series of shares ranking junior to the Series E Shares. The Series E Shares rank equally with our 5.625% Non-Cumulative

Perpetual Preferred Stock, Series F, and at least equally with any other Series of preferred stock ranking equal to the Series E Shares as to payment of dividends or the amounts to be paid upon liquidation, dissolution or winding up, as applicable.

During any Dividend Period (as defined below), so long as any Series E Shares remain outstanding, unless (a) the full dividends for the then-current Dividend Period on all outstanding Series E Shares have been paid, or declared and funds set aside therefor and (b) we are not in default on our obligation to redeem any Series E Shares that have been called for redemption as described below under “—Redemption”:

- no dividend whatsoever may be paid or declared on our common stock or other junior stock, other than a dividend payable solely in junior stock; and
- no common stock or other junior stock may be purchased, redeemed or otherwise acquired for consideration by us.

On any Dividend Payment Date (as defined below) for which full dividends are not paid, or declared and funds set aside therefor, upon the Series E Shares and other equity securities designated as ranking on parity with the Series E Shares as to payment of dividends (“dividend parity stock”), all dividends paid or declared for payment on that Dividend Payment Date with respect to the Series E Shares and the dividend parity stock shall be shared:

- first, ratably by the holders of any such shares, if any, who have the right to receive dividends with respect to Dividend Periods prior to the then-current Dividend Period, in proportion to the respective amounts of the declared and unpaid dividends and the undeclared and unpaid dividends relating to prior Dividend Periods; and
- thereafter by the holders of the Series E Shares and dividend parity stock on a pro rata basis.

We have agreed, in the articles of amendment to our amended and restated articles of incorporation establishing the terms of the Series E Shares, not to issue preferred stock having dividend payment dates that are not also Dividend Payment Dates for the Series E Shares.

Subject to the foregoing, such dividends (payable in cash, stock or otherwise) as may be determined by our board of directors (or a duly authorized committee of the board) may be declared and paid on our common stock and any other stock ranking equally with or junior to the Series E Shares from time to time out of any funds legally available for such payment, and the Series E Shares shall not be entitled to participate in any such dividend.

Dividends

General

Dividends on the Series E Shares are not mandatory. Holders of Series E Shares, in preference to the holders of our common stock and of any other shares of our stock ranking junior to the Series E Shares as to payment of dividends, will be entitled to receive, only when, as and if declared by our board of directors or a duly authorized committee of the board, and only out of assets legally available for the payment of dividends under Wisconsin law, non-cumulative cash dividends at a rate per annum equal to 5.875%, applied to the stated liquidation preference of \$1,000 per share (equivalent to \$25 per depositary share). Dividends on the Series E Shares are payable quarterly in arrears on the 15th day of March, June, September and December of each year, (each, a “Dividend Payment Date”), with respect to the Dividend Period, or portion thereof, ending on the day preceding the respective Dividend Payment Date. A “Dividend Period” means each period commencing on (and including) a Dividend Payment Date and continuing to (but not including) the next succeeding Dividend Payment Date, except that the first Dividend Period for the initial issuance of Series E Shares commenced upon (and included) the date of original issuance of the Series E Shares. If additional Series E Shares are issued at a future date, the first Dividend Period for such Series E Shares will commence upon (and include) (i) the date of issue, if issued on a Dividend Payment Date, or (ii) otherwise, the most recent Dividend Payment Date preceding the date of issue of such share.

Dividends will be paid to holders of record on the 15th calendar date (whether or not a Business Day) before such Dividend Payment Date or such other record date not more than 60 days nor less than 10 days preceding such Dividend Payment Date and fixed for that purpose by our board of directors or a committee thereof in advance of payment of each particular dividend. The corresponding record dates for the depositary shares are the same as the record dates for the Series E Shares. As used in this section, “Business Day” means each weekday on which banking institutions in the City of New York are not authorized or obligated by law, regulation or executive order to close.

The dividend payable per Series E Share for any Dividend Period is computed on the basis of a 360-day year consisting of twelve 30-day months. If a Dividend Payment Date is not a Business Day, the applicable dividend will be paid on the first Business Day following that day without adjustment.

Dividends on shares of the Series E Preferred Stock are not cumulative and are not mandatory. If our board of directors (or a duly authorized committee of the board) does not declare a dividend on the Series E Preferred Stock in respect of a Dividend Period, then no dividend will be deemed to have accrued for such Dividend Period, be payable on the related Dividend Payment Date, or accumulate, and we will have no obligation to pay any dividend accrued for such Dividend Period, whether or not our board of directors (or a duly authorized committee of the board) declares a dividend on the Series E Preferred Stock or any other Series of our preferred stock or on our common stock for any future Dividend Period. References to the “accrual” (or similar terms) of dividends herein refer only to the determination of the amount of such dividend and do not imply that any right to a dividend arises prior to the date on which a dividend is declared.

We are subject to various general regulatory policies and requirements relating to the payment of dividends, including requirements to maintain adequate capital above regulatory minimums, and dividends on the Series E Shares will not be declared, paid or set aside for payment to the extent such act would cause us to fail to comply with laws or regulations applicable thereto, including applicable capital adequacy rules and regulations. The Federal Reserve (including any successor bank regulatory authority that may become our Appropriate Federal Banking Agency), as defined below, is authorized to determine, under certain circumstances relating to the financial condition of a bank holding company, such as us, that the payment of dividends would be an unsafe or unsound practice and to prohibit payment thereof. In addition, we are subject to Wisconsin state laws relating to the payment of dividends.

Redemption

Optional Redemption

The Series E Shares are not subject to any mandatory redemption, sinking fund or other similar provisions. However, the Series E Shares may be redeemed on or after December 15, 2023 (“Optional Redemption”). On that date or on any Dividend Payment Date thereafter, the Series E Shares may be redeemed from time to time, in whole or in part, at our option, subject to the approval of the Appropriate Federal Banking Agency, at the cash redemption price provided below. Dividends will not accrue on those Series E Shares on and after the redemption date. Neither the holders of Series E Shares nor the holders of the related depositary shares have the right to require the redemption or repurchase of the Series E Shares.

Redemption Following a Regulatory Capital Event

We may redeem the Series E Shares at any time within 90 days following a regulatory capital treatment event, in whole but not in part, at our option, subject to the approval of the Federal Reserve or other Appropriate Federal Banking Agency, at the cash redemption price provided below (“Regulatory Event Redemption”). A “regulatory capital treatment event” means our good faith determination that, as a result of (i) any amendment to, or change in, the laws or regulations of the United States (including, for the avoidance of doubt, any agency or instrumentality of the United States, including the Federal Reserve and other federal bank regulatory agencies) or any political subdivision of or in the United States that is enacted or becomes effective after the initial issuance of the Series E Shares (the “Issue Date”); (ii) any proposed change in those laws or regulations that is announced after the Issue Date; or (iii) any official administrative decision or judicial decision or administrative action or other official pronouncement

interpreting or applying those laws or regulations that is announced after the Issue Date, there is more than an insubstantial risk that we will not be entitled to treat the stated liquidation preference value of the Series E Shares then outstanding as “Tier 1 Capital” (or its equivalent) for purposes of the capital adequacy rules or regulations of the Federal Reserve (or, as and if applicable, the capital adequacy rules or regulations of any successor Appropriate Federal Banking Agency), as then in effect and applicable, for as long as any Series E Shares is outstanding. Dividends will not accrue on those Series E Shares on and after the redemption date. “Appropriate Federal Banking Agency” means the “appropriate federal banking agency” with respect to us as defined in Section (3)(q) of the Federal Deposit Insurance Act.

Redemption Price

The redemption price for any redemption of Series E Shares, whether an Optional Redemption or Regulatory Event Redemption, will be equal to \$1,000 per Series E Share (equivalent to \$25 per depository share) plus (a) in the case of an Optional Redemption, the sum of any declared and unpaid dividends for any prior Dividend Periods to the redemption date, without accumulation of any undeclared dividends, or (b) in the case of a Regulatory Event Redemption, the sum of any declared and unpaid dividends for any prior Dividend Periods and accrued but unpaid and undeclared dividends for the then-current Dividend Period to but excluding the date of redemption. Any declared but unpaid dividends payable on a redemption date that occurs subsequent to the dividend record date for a Dividend Period will not be paid to the holder entitled to receive the redemption price on the redemption date, but rather will be paid to the holder of record of the redeemed shares on such dividend record date relating to the Dividend Payment Date.

Redemption Procedures

If Series E Shares are to be redeemed, we will provide notice by first class mail, postage prepaid, addressed to the holders of record of the Series E Shares to be redeemed, mailed not less than 30 days and not more than 60 days before the date fixed for redemption thereof (provided, however, that if the Series E Shares or the depository shares representing the Series E Shares are held in book-entry form through The Depository Trust Company, or “DTC,” we may give this notice in any manner permitted by DTC). Any notice mailed or otherwise given as provided in this paragraph will be conclusively presumed to have been duly given, whether or not the holder receives this notice, and failure duly to give this notice by mail or otherwise, or any defect in this notice or in the mailing or provision of this notice, to any holder of Series E Shares designated for redemption will not affect the redemption of any other Series E Shares. Each notice of redemption will include a statement setting forth:

- the redemption date;
- the number of Series E Shares to be redeemed and, if less than all the Series E Shares held by the holder are to be redeemed, the number of Series E Shares to be redeemed from the holder;
- the redemption price; and
- the place or places where the Series E Shares are to be surrendered for payment of the redemption price.

If notice of redemption of any Series E Shares has been duly given and if the funds necessary for the redemption have been set aside by us for the benefit of the holders of any Series E Shares so called for redemption, then, on and after the redemption date, those Series E Shares will no longer be deemed outstanding and all rights of the holders of those Series E Shares (including the right to receive any dividends) will terminate, except the right to receive the redemption price.

In the case of any redemption of only part of the Series E Shares at the time outstanding, the Series E Shares to be redeemed will be selected either *pro rata* or by lot. Subject to the provisions described in this section, the board of directors will have the full power and authority to prescribe the terms and conditions upon which Series E Shares shall be redeemed from time to time.

Under the Federal Reserve’s current risk-based capital rules applicable to bank holding companies, any redemption of the Series E Shares is subject to prior approval by the Federal Reserve.

Any redemption of the Series E Shares is subject to our receipt of any required prior approval by the Federal Reserve and to the satisfaction of any conditions set forth in the capital rules or regulations of the Federal Reserve applicable to the redemption of the Series E Shares.

Neither the holders of the Series E Shares nor the holders of the related depositary shares have the right to require the redemption or repurchase of the Series E Shares.

Liquidation Rights

In the event that we liquidate, dissolve or wind up our business and affairs, either voluntarily or involuntarily, holders of Series E Shares will be entitled to receive an amount per Share (the “Series E Total Liquidation Amount”) equal to a stated amount of \$1,000 per Series E Share (equivalent to \$25 per depositary share) plus (i) the sum of any declared and unpaid dividends for Dividend Periods prior to the dividend period in which the liquidation distribution is made and declared and, (ii) if applicable, a portion of any declared and unpaid dividends for the then-current Dividend Period in which the liquidation distribution is made, pro-rated for the number of days in such Dividend Period prior to the date of such liquidation distribution. Holders of the Series E Shares will be entitled to receive the Series E Total Liquidation Amount out of our assets that are available for distribution to shareholders, after payment or provision for payment of our debts and other liabilities but before any distribution of assets is made to holders of our common stock or any other class or Series of shares ranking junior to the Series E Shares with respect to that distribution.

If our assets are not sufficient to pay the Series E Total Liquidation Amount in full to all holders of Series E Shares and all holders of any shares of our stock having the same rank as the Series E Shares with respect to any such distribution, the amounts paid to the holders of Series E Shares and such other shares will be paid *pro rata* in accordance with the respective Series E Total Liquidation Amount to which those holders are entitled. If the Series E Total Liquidation Amount per Series E Share has been paid in full to all holders of Series E Shares and the liquidation preference of any other shares having the same rank as the Series E Shares has been paid in full, the holders of our common stock or any other shares ranking, as to such distribution, junior to the Series E Shares will be entitled to receive all of our remaining assets according to their respective rights and preferences.

For purposes of the liquidation rights, neither the sale, conveyance, lease, exchange or transfer (for cash, shares of stock, securities or other consideration) of all or substantially all of our property and assets, nor the consolidation or merger by us with or into any other entity or by another entity with or into us will constitute a liquidation, dissolution or winding up of our business or affairs.

Because we are a holding company, our rights and the rights of our creditors and our shareholders, including the holders of the Series E Shares, to participate in the assets of any of our subsidiaries upon that subsidiary’s liquidation or recapitalization may be subject to the prior claims of that subsidiary’s creditors, except to the extent that we are a creditor with recognized claims against the subsidiary.

Voting Rights

The holders of Series E Shares will not have any voting rights and will not be entitled to elect any directors, except as indicated below or otherwise specifically required by law. Each holder of Series E Shares will have one vote per Series E Share (or one vote per 40 depositary shares) on any matter on which holders of Series E Shares are entitled to vote, including any action by written consent.

Under regulations adopted by the Federal Reserve, if the holders of shares of any Series of our preferred stock, including the Series E Shares, become entitled to vote for the election of directors, such Series may then be deemed a “class of voting securities” and a holder of 25% or more of such Series (or a holder of 5% or more if the holder otherwise exercises a “controlling influence”) may then be subject to regulation as a bank holding company in accordance with the Bank Holding Company Act. In addition, at such time as such Series is deemed a class of voting securities, (i) any other bank holding company may be required to obtain the approval of the Federal Reserve to acquire or retain 5% or more of such series,

and (ii) any person other than a bank holding company may be required to file with the Federal Reserve under the Change in Bank Control Act, a federal law, to acquire or retain 10% or more of such series.

Right to Elect Two Directors Upon Non-Payment of Dividends

If and whenever the dividends on the Series E Shares and any other class or Series of our stock that ranks on parity with Series E Shares as to payment of dividends and that has voting rights equivalent to those described in this paragraph (“voting parity stock”) have not been declared and paid (i) in the case of the Series E Shares and any voting parity stock bearing non-cumulative dividends, in full for at least six quarterly dividend periods or their equivalent (whether or not consecutive) or (ii) in the case of voting parity stock bearing cumulative dividends, in an aggregate amount equal to full dividends for at least six quarterly dividend periods or their equivalent (whether or not consecutive), the authorized number of our directors then constituting our board of directors will automatically be increased by two. Holders of Series E Shares, together with the holders of all other affected classes and Series of voting parity stock, voting as a single class, will be entitled to elect the two additional members of our board of directors (the “Preferred Stock Directors”) at any annual meeting of shareholders or any special meeting of the holders of Series E Shares and any voting parity stock for which dividends have not been paid, called as provided below, but only if the election of any Preferred Stock Directors would not cause us to violate the corporate governance requirement of the New York Stock Exchange (or any other exchange on which our securities may be listed) that listed companies must have a majority of independent directors. In addition, our board of directors shall at no time have more than two Preferred Stock Directors.

At any time after this voting power has vested as described above, our Secretary may, and upon the written request of holders of record of at least 20% of the outstanding Series E Shares and voting parity stock (addressed to the Secretary at our principal office) must, call a special meeting of the holders of Series E Shares and voting parity stock for the election of the Preferred Stock Directors. Notice for a special meeting will be given in a similar manner to that provided in our by-laws for a special meeting of the shareholders, which we will provide upon request, or as required by law. If our Secretary is required to call a meeting but does not do so within 20 days after receipt of any such request, then any holder of Series E Shares may (at our expense) call such meeting, upon notice as provided in this section, and for that purpose will have access to our stock books.

The Preferred Stock Directors elected at any such special meeting will hold office until the next annual meeting of our shareholders unless they have been previously terminated as described below. In case any vacancy occurs among the Preferred Stock Directors, a successor will be elected by our board of directors to serve until the next annual meeting of the shareholders upon the nomination of the then remaining Preferred Stock Director or, if no Preferred Stock Director remains in office, by the vote of the holders of record of a majority of the outstanding Series E Shares and voting parity stock, voting as a single class. The Preferred Stock Directors shall each be entitled to one vote per director on any matter.

Whenever full dividends have been paid on the Series E Shares and any non-cumulative voting parity stock for at least one year and all dividends on any cumulative voting parity stock have been paid in full, then the right of the holders of Series E Shares to elect the Preferred Stock Directors will cease (but subject always to the same provisions for the vesting of these voting rights in the case of any similar non-payment of dividends in respect of future Dividend Periods), the terms of office of all Preferred Stock Directors will immediately terminate and the number of directors constituting our board of directors will be reduced accordingly.

Other Voting Rights

So long as any Series E Shares remain outstanding, the affirmative vote of the holders of at least two-thirds of the Series E Shares outstanding at the time, given in person or by proxy, either in writing or at a meeting (voting separately as a class), will be required to:

- authorize or create, or increase the authorized or issued amount of, any class or Series of capital stock ranking senior to the Series E Shares with respect to payment of dividends or the distribution of assets upon liquidation, dissolution or winding up, or reclassify any authorized shares of capital stock into Series E Shares; or

- amend, alter or repeal the provisions of our amended and restated articles of incorporation, whether by merger, consolidation or otherwise, so as to materially and adversely affect any right, preference, privilege or voting power of the Series E Shares or the holders thereof;

provided, however, that with respect to the occurrence of any event set forth in the second bullet point above, so long as any Series E Shares remain outstanding with the terms thereof materially unchanged or new shares of the surviving corporation or entity are issued with the same terms as the Series E Shares, in each case taking into account that upon the occurrence of this event we may not be the surviving entity, the occurrence of any such event shall not be deemed to materially and adversely affect any right, preference, privilege or voting power of the Series E Shares or the holders thereof, and provided, further, that any increase in the amount of our authorized common stock or preferred stock or the creation or issuance of any other Series of common stock or other equity securities ranking on a parity with or junior to the Series E Shares with respect to payment of dividends (whether such dividends are cumulative or non-cumulative) or the distribution of assets upon liquidation, dissolution or winding up and any change to the number of directors or number of classes of directors shall not be deemed to materially and adversely affect such rights, preferences, privileges or voting powers.

Under the Wisconsin Business Corporation Law, the vote of the holders of a majority of the outstanding Series E Shares, voting as a separate voting group, is required for:

- certain amendments to the articles of incorporation impacting the Series E Shares;
- the approval of any dividend payable in Series E Shares to holders of shares of another class or Series of our stock;
- the approval of any proposed share exchange that includes Series E Shares; or
- the approval of any plan of merger if the plan of merger contains a provision that, if contained in a proposed amendment to the articles of incorporation, would require shareholder action on the proposed amendment.

Further, in the case of any merger where we are the surviving corporation, the right of holders of the Series E Shares to vote separately as a group on a plan of merger does not apply if:

- the articles of incorporation of the surviving corporation will not differ, with certain exceptions, from our articles of incorporation as in effect prior to the merger;
- each shareholder of the surviving corporation whose shares were outstanding immediately before the effective date of the merger will hold the same number of shares, with identical designations, preferences, limitation, and relative rights, immediately after the merger; and
- the number of voting shares outstanding immediately after the merger, plus the number of voting shares issuable as a result of the merger, either by the conversion of securities issued pursuant to the merger or the exercise of rights or warrants issued pursuant to the merger, will not exceed by more than 20% the total number of voting shares of the surviving corporation outstanding immediately after the merger.

The foregoing voting provisions will not apply if, at or prior to the time when the act with respect to which the vote would otherwise be required, all outstanding Series E Shares shall have been redeemed or called for redemption upon proper notice and sufficient funds shall have been set aside by us for the benefit of the holders of Series E Shares to effect the redemption.

Depository, Transfer Agent, Registrar and Paying Agent

Equiniti Trust Company is the depository, transfer agent, registrar and paying agent for the Series E Shares.

5.625% Non-Cumulative Perpetual Preferred Stock, Series F

As of December 31, 2025, there were 100,000 shares of our 5.625% Non-Cumulative Perpetual Preferred Stock, Series F, par value of \$1.00 per share, with a liquidation preference of \$1,000 per share

(the “Series F Preferred Stock” or the “Series F Shares”) issued and outstanding. The depositary is the sole holder of the Series E Preferred Stock, as described under “Depositary Shares Representing the Series E and Series F Shares” below, and all references to the holders of the Series F Shares shall mean the depositary. However, the holders of the depositary shares representing the Series F Shares are entitled, through the depositary, to exercise the rights and preferences of the holders of the Series F Shares, as described under “Depositary Shares Representing the Series E and Series F Shares.” This summary of the Series F Preferred Stock does not purport to be complete in all respects. This summary is subject to and qualified in its entirety by reference to our Amended and Restated Articles of Incorporation, as amended, including the Articles of Amendment with respect to the designation of the Series F Preferred Stock.

Each holder of Series F Shares is entitled to receive cash dividends when, as and if declared out of assets legally available for payment in respect of the Series F Shares by our Board of Directors or a duly authorized committee of the Board in their sole discretion. Dividends will be non-cumulative. If we do not declare dividends or do not pay dividends in full on the Series F Shares on any date on which dividends are due, then these undeclared and unpaid dividends will not cumulate, accrue or be payable.

The Series F Shares have a fixed liquidation preference of \$1,000 per share (equivalent to \$25 per depositary share). If we liquidate, dissolve or wind up our business and affairs, holders of Series F Shares will be entitled to receive, out of our assets that are available for distribution to shareholders, an amount per Series F Share equal to the liquidation preference per Share plus an amount with respect to dividends as and to the extent described below under “—Liquidation Rights.”

The Series F Shares are not convertible into, or exchangeable for, shares of our common stock or any other class or Series of our stock or other securities. The Series F Shares are not subject to any sinking fund or any other obligation of us to redeem or repurchase the Series F Shares.

Ranking

The Series F Shares rank, as to the payment of dividends and the amounts to be paid upon liquidation, dissolution or winding up, senior to our common stock and any other class or Series of shares ranking junior to the Series F Shares. The Series F Shares rank equally with our 5.875% Non-Cumulative Perpetual Preferred Stock, Series E, and at least equally with any other Series of preferred stock ranking equal to the Series E Shares as to payment of dividends or the amounts to be paid upon liquidation, dissolution or winding up, as applicable.

During any Dividend Period (as defined below), so long as any Series F Shares remain outstanding, unless (a) the full dividends for the then-current Dividend Period on all outstanding Shares have been paid, or declared and funds set aside therefor and (b) we are not in default on our obligation to redeem any Series F Shares that have been called for redemption as described below under “—Redemption”:

- no dividend whatsoever may be paid or declared on our common stock or other junior stock, other than a dividend payable solely in junior stock; and
- no common stock or other junior stock may be purchased, redeemed or otherwise acquired for consideration by us.

On any Dividend Payment Date (as defined below) for which full dividends are not paid, or declared and funds set aside therefor, upon the Series F Shares and other equity securities designated as ranking on parity with the Series F Shares as to payment of dividends (“dividend parity stock”), all dividends paid or declared for payment on that Dividend Payment Date with respect to the Series F Shares and the dividend parity stock shall be shared:

- first, ratably by the holders of any such shares, if any, who have the right to receive dividends with respect to Dividend Periods prior to the then-current Dividend Period, in proportion to the respective amounts of the declared and unpaid dividends and the undeclared and unpaid dividends relating to prior Dividend Periods; and

- thereafter by the holders of the Series F Shares and dividend parity stock on a pro rata basis.

We have agreed, in the articles of amendment to our amended and restated articles of incorporation establishing the terms of the Series F Shares, not to issue preferred stock having dividend payment dates that are not also Dividend Payment Dates for the Series F Shares.

Subject to the foregoing, such dividends (payable in cash, stock or otherwise) as may be determined by our board of directors (or a duly authorized committee of the board) may be declared and paid on our common stock and any other stock ranking equally with or junior to the Series F Shares from time to time out of any funds legally available for such payment, and the Series F Shares shall not be entitled to participate in any such dividend.

Dividends

General

Dividends on the Series F Shares are not mandatory. Holders of Series F Shares, in preference to the holders of our common stock and of any other shares of our stock ranking junior to the Series F Shares as to payment of dividends, will be entitled to receive, only when, as and if declared by our board of directors or a duly authorized committee of the board, and only out of assets legally available for the payment of dividends under Wisconsin law, non-cumulative cash dividends at a rate per annum equal to 5.625%, applied to the stated liquidation preference of \$1,000 per share (equivalent to \$25 per depositary share). Dividends on the Series F Shares are payable quarterly in arrears on the 15th day of March, June, September and December of each year (each, a “Dividend Payment Date”), with respect to the Dividend Period, or portion thereof, ending on the day preceding the respective Dividend Payment Date. A “Dividend Period” means each period commencing on (and including) a Dividend Payment Date and continuing to (but not including) the next succeeding Dividend Payment Date, except that the first Dividend Period for the initial issuance of Series F Shares commenced upon (and included) the date of original issuance of the Series F Shares. If additional Series F Shares are issued at a future date, the first Dividend Period for such Series F Shares will commence upon (and include) (i) the date of issue, if issued on a Dividend Payment Date, or (ii) otherwise, the most recent Dividend Payment Date preceding the date of issue of such share. We will not issue such additional depositary shares unless such shares are fungible for U.S. federal income tax purposes with the Series F Shares.

Dividends will be paid to holders of record on the 15th calendar date (whether or not a Business Day) before such Dividend Payment Date or such other record date not more than 60 days nor less than 10 days preceding such Dividend Payment Date and fixed for that purpose by our board of directors or a committee thereof in advance of payment of each particular dividend. The corresponding record dates for the depositary shares are the same as the record dates for the Series F Shares.

The dividend payable per Series F Share for any Dividend Period are computed on the basis of a 360-day year consisting of twelve 30-day months. If a Dividend Payment Date is not a Business Day, the applicable dividend will be paid on the first Business Day following that day without adjustment. As used in this section, “Business Day” means each weekday on which banking institutions in the City of New York are not authorized or obligated by law, regulation or executive order to close.

Dividends on shares of the Series F Preferred Stock are not cumulative and are not mandatory. If our board of directors (or a duly authorized committee of the board) does not declare a dividend on the Series F Preferred Stock in respect of a Dividend Period, then no dividend will be deemed to have accrued for such Dividend Period, be payable on the related Dividend Payment Date, or accumulate, and we will have no obligation to pay any dividend accrued for such Dividend Period, whether or not our board of directors (or a duly authorized committee of the board) declares a dividend on the Series F Preferred Stock or any other Series of our preferred stock or on our common stock for any future Dividend Period. References to the “accrual” (or similar terms) of dividends herein refer only to the determination of the amount of such dividend and do not imply that any right to a dividend arises prior to the date on which a dividend is declared.

We are subject to various general regulatory policies and requirements relating to the payment of dividends, including requirements to maintain adequate capital above regulatory minimums, and dividends on the Series F Shares will not be declared, paid or set aside for payment to the extent such act would cause us to fail to comply with laws or regulations applicable thereto, including applicable capital adequacy rules and regulations. The Federal Reserve (including any successor bank regulatory authority that may become our Appropriate Federal Banking Agency), as defined below, is authorized to determine, under certain circumstances relating to the financial condition of a bank holding company, such as us, that the payment of dividends would be an unsafe or unsound practice and to prohibit payment thereof. In addition, we are subject to Wisconsin state laws relating to the payment of dividends.

Redemption

Optional Redemption

The Series F Shares are not subject to any mandatory redemption, sinking fund or other similar provisions. However, the Series F Shares may be redeemed on or after September 15, 2025 (“Optional Redemption”). On that date or on any Dividend Payment Date thereafter, the Series F Shares may be redeemed from time to time, in whole or in part, at our option, subject to the approval of the Appropriate Federal Banking Agency, at the cash redemption price provided below. Dividends will not accrue on those Series F Shares on and after the redemption date. Neither the holders of Series F Shares nor the holders of the related depositary shares have the right to require the redemption or repurchase of the Series F Shares.

Redemption Following a Regulatory Capital Event

We may redeem the Series F Shares at any time within 90 days following a regulatory capital treatment event, in whole but not in part, at our option, subject to the approval of the Federal Reserve or other Appropriate Federal Banking Agency, at the cash redemption price provided below (“Regulatory Event Redemption”). A “regulatory capital treatment event” means our good faith determination that, as a result of (i) any amendment to, or change in, the laws or regulations of the United States (including, for the avoidance of doubt, any agency or instrumentality of the United States, including the Federal Reserve and other federal bank regulatory agencies) or any political subdivision of or in the United States that is enacted or becomes effective after the initial issuance of the Series F Shares (the “Issue Date”); (ii) any proposed change in those laws or regulations that is announced after the Issue Date; or (iii) any official administrative decision or judicial decision or administrative action or other official pronouncement interpreting or applying those laws or regulations that is announced after the Issue Date, there is more than an insubstantial risk that we will not be entitled to treat the stated liquidation preference value of the Series F Shares then outstanding as “Tier 1 Capital” (or its equivalent) for purposes of the capital adequacy rules or regulations of the Federal Reserve (or, as and if applicable, the capital adequacy rules or regulations of any successor Appropriate Federal Banking Agency), as then in effect and applicable, for as long as any Series F Share is outstanding. Dividends will not accrue on those Series F Shares on and after the redemption date. “Appropriate Federal Banking Agency” means the “appropriate federal banking agency” with respect to us as defined in Section (3)(q) of the Federal Deposit Insurance Act.

Redemption Price

The redemption price for any redemption of Series F Shares, whether an Optional Redemption or Regulatory Event Redemption, will be equal to \$1,000 per Series F Share (equivalent to \$25 per depositary share) plus (a) in the case of an Optional Redemption, the sum of any declared and unpaid dividends for any prior Dividend Periods to the redemption date, without accumulation of any undeclared dividends, or (b) in the case of a Regulatory Event Redemption, the sum of any declared and unpaid dividends for any prior Dividend Periods and accrued but unpaid and undeclared dividends for the then-current Dividend Period to but excluding the date of redemption. Any declared but unpaid dividends payable on a redemption date that occurs subsequent to the dividend record date for a Dividend Period will not be paid to the holder entitled to receive the redemption price on the redemption date, but rather will be paid to the holder of record of the redeemed shares on such dividend record date relating to the Dividend Payment Date.

Redemption Procedures

If Series F Shares are to be redeemed, we will provide notice by first class mail, postage prepaid, addressed to the holders of record of the Series F Shares to be redeemed, mailed not less than 30 days and not more than 60 days before the date fixed for redemption thereof (provided, however, that if the Series F Shares or the depositary shares representing the Series F Shares are held in book-entry form through The Depository Trust Company, or “DTC,” we may give this notice in any manner permitted by DTC). Any notice mailed or otherwise given as provided in this paragraph will be conclusively presumed to have been duly given, whether or not the holder receives this notice, and failure duly to give this notice by mail or otherwise, or any defect in this notice or in the mailing or provision of this notice, to any holder of Series F Shares designated for redemption will not affect the redemption of any other Series F Shares. Each notice of redemption will include a statement setting forth:

- the redemption date;
- the number of Series F Shares to be redeemed and, if less than all the Series F Shares held by the holder are to be redeemed, the number of Series F Shares to be redeemed from the holder;
- the redemption price; and
- the place or places where the Series F Shares are to be surrendered for payment of the redemption price.

If notice of redemption of any Series F Shares has been duly given and if the funds necessary for the redemption have been set aside by us for the benefit of the holders of any Series F Shares so called for redemption, then, on and after the redemption date, those Series F Shares will no longer be deemed outstanding and all rights of the holders of those Series F Shares (including the right to receive any dividends) will terminate, except the right to receive the redemption price.

In the case of any redemption of only part of the Series F Shares at the time outstanding, the Series F Shares to be redeemed will be selected either *pro rata* or by lot. Subject to the provisions described in this section, the board of directors will have the full power and authority to prescribe the terms and conditions upon which Series F Shares shall be redeemed from time to time.

Under the Federal Reserve’s current risk-based capital rules applicable to bank holding companies, any redemption of the Series F Shares is subject to prior approval by the Federal Reserve. Any redemption of the Series F Shares is subject to our receipt of any required prior approval by the Federal Reserve and to the satisfaction of any conditions set forth in the capital rules or regulations of the Federal Reserve applicable to the redemption of the Series F Shares.

Neither the holders of the Series F Shares nor the holders of the related depositary shares have the right to require the redemption or repurchase of the Series F Shares.

Liquidation Rights

In the event that we liquidate, dissolve or wind up our business and affairs, either voluntarily or involuntarily, holders of Series F Shares will be entitled to receive an amount per Share (the “Series F Total Liquidation Amount”) equal to a stated amount of \$1,000 per Series F Share (equivalent to \$25 per depositary share) plus (i) the sum of any declared and unpaid dividends for Dividend Periods prior to the dividend period in which the liquidation distribution is made and declared and, (ii) if applicable, a portion of any declared and unpaid dividends for the then-current Dividend Period in which the liquidation distribution is made, pro-rated for the number of days in such Dividend Period prior to the date of such liquidation distribution. Holders of the Series F Shares will be entitled to receive the Series F Total Liquidation Amount out of our assets that are available for distribution to shareholders, after payment or provision for payment of our debts and other liabilities but before any distribution of assets is made to holders of our common stock or any other class or Series of shares ranking junior to the Series F Shares with respect to that distribution.

If our assets are not sufficient to pay the Series F Total Liquidation Amount in full to all holders of Series F Shares and all holders of any shares of our stock having the same rank as the Series F Shares with respect to any such distribution, the amounts paid to the holders of Series F Shares and such other shares will be paid *pro rata* in accordance with the respective Series Total Liquidation Amount to which those holders are entitled. If the Series F Total Liquidation Amount per Series F Share has been paid in full to all holders of Series F Shares and the liquidation preference of any other shares having the same rank as the Series F Shares has been paid in full, the holders of our common stock or any other shares ranking, as to such distribution, junior to the Series F Shares will be entitled to receive all of our remaining assets according to their respective rights and preferences.

For purposes of the liquidation rights, neither the sale, conveyance, lease, exchange or transfer (for cash, shares of stock, securities or other consideration) of all or substantially all of our property and assets, nor the consolidation or merger by us with or into any other entity or by another entity with or into us will constitute a liquidation, dissolution or winding up of our business or affairs.

Because we are a holding company, our rights and the rights of our creditors and our shareholders, including the holders of the Series F Shares, to participate in the assets of any of our subsidiaries upon that subsidiary's liquidation or recapitalization may be subject to the prior claims of that subsidiary's creditors, except to the extent that we are a creditor with recognized claims against the subsidiary.

Voting Rights

The holders of Series F Shares will not have any voting rights and will not be entitled to elect any directors, except as indicated below or otherwise specifically required by law. Each holder of Series F Shares will have one vote per Series F Share (or one vote per 40 depositary shares) on any matter on which holders of Series F Shares are entitled to vote, including any action by written consent.

Under regulations adopted by the Federal Reserve, if the holders of shares of any Series of our preferred stock, including the Series F Shares, become entitled to vote for the election of directors, such Series may then be deemed a "class of voting securities" and a holder of 25% or more of such Series (or a holder of 5% or more if the holder otherwise exercises a "controlling influence") may then be subject to regulation as a bank holding company in accordance with the Bank Holding Company Act. In addition, at such time as such Series is deemed a class of voting securities, (i) any other bank holding company may be required to obtain the approval of the Federal Reserve to acquire or retain 5% or more of such series, and (ii) any person other than a bank holding company may be required to file with the Federal Reserve under the Change in Bank Control Act, a federal law, to acquire or retain 10% or more of such series.

Right to Elect Two Directors Upon Non-Payment of Dividends

If and whenever the dividends on the Series F Shares and any other class or Series of our stock that ranks on parity with Series F Shares as to payment of dividends and that has voting rights equivalent to those described in this paragraph ("voting parity stock") have not been declared and paid (i) in the case of the Series F Shares and any voting parity stock bearing non-cumulative dividends, in full for at least six quarterly dividend periods or their equivalent (whether or not consecutive) or (ii) in the case of voting parity stock bearing cumulative dividends, in an aggregate amount equal to full dividends for at least six quarterly dividend periods or their equivalent (whether or not consecutive), the authorized number of our directors then constituting our board of directors will automatically be increased by two. Holders of Series F Shares, together with the holders of all other affected classes and Series of voting parity stock, voting as a single class, will be entitled to elect the two additional members of our board of directors (the "Preferred Stock Directors") at any annual meeting of shareholders or any special meeting of the holders of Series F Shares and any voting parity stock for which dividends have not been paid, called as provided below, but only if the election of any Preferred Stock Directors would not cause us to violate the corporate governance requirement of the New York Stock Exchange (or any other exchange on which our securities may be listed) that listed companies must have a majority of independent directors. In addition, our board of directors shall at no time have more than two Preferred Stock Directors.

At any time after this voting power has vested as described above, our Secretary may, and upon the written request of holders of record of at least 20% of the outstanding Series F Shares and voting parity stock (addressed to the Secretary at our principal office) must, call a special meeting of the holders of Series F Shares and voting parity stock for the election of the Preferred Stock Directors. Notice for a special meeting will be given in a similar manner to that provided in our by-laws for a special meeting of the shareholders, which we will provide upon request, or as required by law. If our Secretary is required to call a meeting but does not do so within 20 days after receipt of any such request, then any holder of Series F Shares may (at our expense) call such meeting, upon notice as provided in this section, and for that purpose will have access to our stock books.

The Preferred Stock Directors elected at any such special meeting will hold office until the next annual meeting of our shareholders unless they have been previously terminated as described below. In case any vacancy occurs among the Preferred Stock Directors, a successor will be elected by our board of directors to serve until the next annual meeting of the shareholders upon the nomination of the then remaining Preferred Stock Director or, if no Preferred Stock Director remains in office, by the vote of the holders of record of a majority of the outstanding Series F Shares and voting parity stock, voting as a single class. The Preferred Stock Directors shall each be entitled to one vote per director on any matter.

Whenever full dividends have been paid on the Series F Shares and any non-cumulative voting parity stock for at least one year and all dividends on any cumulative voting parity stock have been paid in full, then the right of the holders of Series F Shares to elect the Preferred Stock Directors will cease (but subject always to the same provisions for the vesting of these voting rights in the case of any similar non-payment of dividends in respect of future Dividend Periods), the terms of office of all Preferred Stock Directors will immediately terminate and the number of directors constituting our board of directors will be reduced accordingly.

Other Voting Rights

So long as any Series F Shares remain outstanding, the affirmative vote of the holders of at least two-thirds of the Series F Shares outstanding at the time, given in person or by proxy, either in writing or at a meeting (voting separately as a class), will be required to:

- authorize or create, or increase the authorized or issued amount of, any class or Series of capital stock ranking senior to the Series F Shares with respect to payment of dividends or the distribution of assets upon liquidation, dissolution or winding up, or reclassify any authorized shares of capital stock into Series F Shares; or
- amend, alter or repeal the provisions of our amended and restated articles of incorporation, whether by merger, consolidation or otherwise, so as to materially and adversely affect any right, preference, privilege or voting power of the Series F Shares or the holders thereof;

provided, however, that with respect to the occurrence of any event set forth in the second bullet point above, so long as any Series F Shares remain outstanding with the terms thereof materially unchanged or new shares of the surviving corporation or entity are issued with the same terms as the Series F Shares, in each case taking into account that upon the occurrence of this event we may not be the surviving entity, the occurrence of any such event shall not be deemed to materially and adversely affect any right, preference, privilege or voting power of the Series F Shares or the holders thereof, and provided, further, that any increase in the amount of our authorized common stock or preferred stock or the creation or issuance of any other Series of common stock or other equity securities ranking on a parity with or junior to the Series F Shares with respect to payment of dividends (whether such dividends are cumulative or non-cumulative) or the distribution of assets upon liquidation, dissolution or winding up and any change to the number of directors or number of classes of directors shall not be deemed to materially and adversely affect such rights, preferences, privileges or voting powers.

Under the Wisconsin Business Corporation Law, the vote of the holders of a majority of the outstanding Series F Shares, voting as a separate voting group, is required for:

- certain amendments to the articles of incorporation impacting the Series F Shares;
- the approval of any dividend payable in Series F Shares to holders of shares of another class or Series of our stock;
- the approval of any proposed share exchange that includes Series F Shares; or
- the approval of any plan of merger if the plan of merger contains a provision that, if contained in a proposed amendment to the articles of incorporation, would require shareholder action on the proposed amendment.

Further, in the case of any merger where we are the surviving corporation, the right of holders of the Series F Shares to vote separately as a group on a plan of merger does not apply if:

- the articles of incorporation of the surviving corporation will not differ, with certain exceptions, from our articles of incorporation as in effect prior to the merger;
- each shareholder of the surviving corporation whose shares were outstanding immediately before the effective date of the merger will hold the same number of shares, with identical designations, preferences, limitation, and relative rights, immediately after the merger; and
- the number of voting shares outstanding immediately after the merger, plus the number of voting shares issuable as a result of the merger, either by the conversion of securities issued pursuant to the merger or the exercise of rights or warrants issued pursuant to the merger, will not exceed by more than 20% the total number of voting shares of the surviving corporation outstanding immediately after the merger.

The foregoing voting provisions will not apply if, at or prior to the time when the act with respect to which the vote would otherwise be required, all outstanding Series F Shares shall have been redeemed or called for redemption upon proper notice and sufficient funds shall have been set aside by us for the benefit of the holders of Series F Shares to effect the redemption.

Depository, Transfer Agent, Registrar and Paying Agent

Equiniti Trust Company is the depository, transfer agent, registrar and paying agent for the Series F Shares.

Description of Depositary Shares

This section describes the general terms and provisions of the depository shares, which are registered pursuant to Section 12(b) of the Exchange Act. The following summary is not complete. You should read the forms of deposit agreement and depository receipt relating to a Series of preferred stock for additional information.

Depository Shares Representing the Series E and Series F Shares

As of December 31, 2025, there were 4,000,000 depository shares, each representing a 1/40th ownership interest in a Series E Share, issued and outstanding, and 4,000,000 depository shares, each representing a 1/40th ownership interest in a Series F Share, issued and outstanding. We deposited the underlying Series E Shares and Series F Shares with a depository, in each case pursuant to a deposit agreement among us, Equiniti Trust Company, acting as depository, and the holders from time to time of the depository receipts evidencing the respective depository shares.

Subject to the terms of the respective deposit agreements, each holder of a depository share is entitled, through the depository, in proportion to the applicable fraction of a Series E Share, or Series F Share as the case may be, represented by that depository share, to all the rights and preferences of the

Series E Shares, or Series F Shares, represented thereby (including dividend, voting, redemption and liquidation rights). This description is subject to and qualified in its entirety by reference to our Amended and Restated Articles of Incorporation, including our Articles of Amendment with respect to the Series E Shares, and Series F Shares, which have been filed as exhibits to our SEC filings.

Dividends and Other Distributions

The depositary will distribute all cash dividends or other cash distributions received with respect to the preferred stock to the record holders of depositary shares representing the shares of preferred stock. These distributions will be in proportion to the number of depositary shares owned by the holders on the relevant record date. The depositary will not distribute amounts less than one cent. The depositary will distribute any balance with the next sum received for distribution to record holders of depositary shares.

If there is a distribution other than in cash, the depositary will distribute property to the holders of depositary shares, unless the depositary determines that it is not feasible to make the distribution. If this occurs, the depositary may, with our approval, sell the property and distribute the net proceeds from the sale to the holders of depositary shares.

Redemption of Depositary Shares

If the Series of the preferred stock underlying the depositary shares is subject to redemption, all or a part of the depositary shares will be redeemed from the redemption proceeds of that Series of the preferred stock held by the depositary. The depositary will mail notice of redemption between 30 to 60 days prior to the date fixed for redemption to the record holders of the depositary shares to be redeemed at their addresses appearing in the depositary's records. The redemption price per depositary share will bear the same relationship to the redemption price per share of preferred stock that the depositary share bears to the underlying preferred stock. Whenever we redeem preferred stock held by the depositary, the depositary will redeem, as of the same redemption date, the number of depositary shares representing the preferred stock redeemed. If less than all the depositary shares are to be redeemed, the depositary shares to be redeemed will be selected by lot or pro rata as determined by the depositary.

After the date fixed for redemption, the depositary shares called for redemption will no longer be outstanding. When the depositary shares are no longer outstanding, all rights of the holders will cease, except the right to receive money or other property that the holders of the depositary shares were entitled to receive upon the redemption. Payments will be made when holders surrender their depositary receipts to the depositary.

Voting Preferred Stock

When the depositary receives notice of any meeting at which the holders of the preferred stock may vote, the depositary will mail information about the meeting contained in the notice, and any accompanying proxy materials, to the record holders of the depositary shares relating to the preferred stock. Each record holder of such depositary shares on the record date, which will be the same date as the record date for the preferred stock, will be entitled to instruct the depositary with regard to how the preferred stock underlying the holder's depositary shares should be voted.

The depositary will try, if practical, to vote the number of shares of preferred stock underlying the depositary shares according to the instructions received. We will agree to take all action requested by and deemed necessary by the depositary to enable the depositary to vote the preferred stock in that manner. The depositary will not vote any preferred stock for which it does not receive specific instructions from the holders of the depositary shares relating to such preferred stock, unless otherwise indicated in the applicable prospectus supplement.

Amendment and Termination of the Deposit Agreement

The form of depositary receipt evidencing the depositary shares and any provision of the deposit agreement may be amended by agreement between us and the depositary at any time. Any amendment that materially and adversely alters the rights of the existing holders of depositary shares, however, will

be effective only if approved by the record holders of at least a majority of the depositary shares then outstanding. A deposit agreement may be terminated by us or the depositary only if:

- all outstanding depositary shares relating to the deposit agreement have been redeemed or reacquired by us;
- all preferred stock of the relevant Series has been withdrawn; or
- there has been a final distribution on the preferred stock of the relevant Series in connection with our liquidation, dissolution, or winding-up of our business and the distribution has been distributed to the holders of the related depositary shares.

Charges of Depositary

We will pay all transfer and other taxes and governmental charges arising solely from the existence of the depositary arrangements. We will pay associated charges of the depositary for the initial deposit of the preferred stock and any redemption of the preferred stock. Holders of depositary shares will pay transfer and other taxes and governmental charges and any other charges that are stated to be their responsibility under the deposit agreement.

Miscellaneous

We will forward to the depositary, for distribution to the holders of depositary shares, all reports and communications that we must furnish to the holders of the preferred stock.

If the depositary is prevented or delayed by law or any circumstance beyond its control in performing its obligations under the deposit agreement, neither the depositary nor we will be liable. Our obligations and the depositary's obligations under the deposit agreement will be limited to performance in good faith of duties set forth in the deposit agreement. Neither the depositary nor we will be obligated to prosecute or defend any legal proceeding connected with any depositary shares or preferred stock unless satisfactory indemnity is furnished to us and/or the depositary. We and the depositary may rely upon documents believed to be genuine, written advice of counsel or accountants, or information provided by persons presenting preferred stock for deposit, holders of depositary shares or other persons believed to be competent.

Resignation and Removal of Depositary

The depositary may resign at any time by delivering notice to us. We may also remove the depositary at any time. Resignations or removals will take effect when a successor depositary is appointed and it accepts the appointment. The successor depositary must be appointed within 60 days after delivery of the notice of resignation or removal and must be a bank or trust company having its principal office in the U.S., and it must have a combined capital and surplus of at least \$50 million.

Description of 6.625% Fixed-Rate Reset Subordinated Note Due 2033

As of December 31, 2025, there was an aggregate principal amount of \$300,000,000 of our 6.625% Fixed-Rate Reset Subordinated Note Due 2033 (the "Subordinate Notes") issued and outstanding. The Subordinated Notes are a series of our subordinated debt securities issued under our subordinated debt securities indenture dated as of November 13, 2014 between Associated Banc-Corp and The Bank of New York Mellon Trust Company, N.A., as trustee (the "Indenture"). The following summary of the material terms of the Subordinated Notes is not complete. You should also refer to the Indenture for the complete terms of the Subordinated Note.

General

The Subordinated Notes are limited to an aggregate principal amount of \$300,000,000. The Subordinated Notes are not convertible into or exchangeable for shares of our common stock, our preferred stock or any other securities.

The Subordinated Notes are unsecured and subordinate and junior in right of payment to all senior indebtedness, and in certain events of insolvency, to other general obligations, as described below. The Subordinated Notes are effectively subordinated to any secured debt of ours to the extent of the value of the collateral securing such indebtedness. As of December 31, 2025, we had no outstanding secured indebtedness. The Subordinated Notes are not guaranteed by any of our subsidiaries. As of December 31, 2025, we also had outstanding \$300,000,000 in aggregate principal amount of 6.455% Fixed / Floating Rate Senior Notes due 2030.

We are a bank holding company that conducts substantially all of our operations through subsidiaries. As a result, claims of the holders of the Subordinated Notes are structurally subordinated in right of payment to claims of creditors of our subsidiaries, except to the extent that we may be recognized, and receive payment, as a creditor of those subsidiaries. Claims of our subsidiaries' creditors, other than Associated Banc-Corp, include substantial amounts of long-term debt, deposit liabilities, federal funds purchased, securities sold under repurchase agreements, commercial paper and other short-term borrowings. As of December 31, 2025, our subsidiaries had, in the aggregate, outstanding debt and other liabilities, including deposits, of approximately \$39.6 billion (excluding intercompany liabilities). All of such debt and other liabilities would rank structurally senior to the Subordinated Notes in case of liquidation or otherwise.

We may, from time to time, without notice or consent from the holders of the Subordinated Notes, incur additional indebtedness that ranks senior to, equally or subordinate in right of payment to the Subordinated Notes.

The Subordinated Notes are not deposits or other obligations of a bank or savings association and are not insured or guaranteed by the FDIC or any other governmental agency.

The Subordinated Notes are issued in registered book-entry form without coupons in denominations of \$25 and integral multiples of \$25 in excess thereof.

As of December 31, 2025, the Subordinated Notes are listed and traded on the New York Stock Exchange under the ticker symbol "ASBA".

Payment of Principal and Interest

Payment of the full principal amount of the Subordinated Notes is due on March 1, 2033.

The Subordinated Notes bear interest (i) during the period from and including February 10, 2023 (the "Issue Date"), to, but excluding, March 1, 2028 (the "Reset Date"), or to, but excluding, the date of earlier redemption, at a fixed rate of 6.625% per annum (the "Initial Fixed Rate") and (ii) during the period from and including the Reset Date to, but excluding, the maturity date, or to, but excluding, the date of earlier redemption, at a rate per annum that will be the Five-year U.S. Treasury Rate as of the day falling two business days prior to the Reset Date (the "Reset Determination Date"), plus 2.812% per annum (the "Spread"). The Reset Date will not be adjusted for business days. The interest rate on the Subordinated Notes is in no event higher than the maximum rate permitted by New York law as the same may be modified by United States law of general application.

Interest on the Subordinated Notes began to accrue on February 10, 2023. We pay interest on the Subordinated Notes quarterly in arrears on March 1, June 1, September 1 and December 1 of each year, beginning June 1, 2023 and ending on the maturity date. Interest is paid to the person in whose name such note is registered at the close of business on the fifteenth day of February, May, August and November (whether or not a business day) of each year; *provided* that that interest payable on the maturity of the

principal of the Subordinated Notes or (subject to the exceptions described under the heading “— Optional Redemption by Us”) any redemption date is paid to the person to whom principal is paid. Interest on the Subordinated Notes is paid on the basis of a 360-day year comprised of twelve 30-day months.

If any interest payment date, redemption date or any maturity date for the Subordinated Notes falls on a day which is not a business day, the related payment of principal or interest on the Subordinated Notes is made on the next day that is a business day with the same force and effect as if made on the date such payment was due, and no interest will accrue on the amount payable for the period from and after such interest payment date or maturity date, as the case may be. A “business day” means any day that is not a Saturday or Sunday, and that is not a day on which banking institutions in the State of New York are authorized or obligated by law or executive order to close.

The “Five-year U.S. Treasury Rate” means, as of the Reset Determination Date, (i) an interest rate (expressed as a decimal) determined to be the per annum rate equal to the arithmetic mean of the five most recent daily yields to maturity (or, if fewer than five daily yields appear, such number of daily yields to maturity appearing) for U.S. Treasury securities adjusted to constant maturity, for five-year maturities, and trading in the public securities markets as published under the caption “Treasury Constant Maturities — Nominal” (or any successor caption or heading) in the most recent H.15 (the “Initial Base Rate”) or (ii) if there are no such published yields on actively traded U.S. Treasury securities adjusted to constant maturity, for five-year maturities, and trading in the public securities markets, then the rate will be determined by interpolation between the arithmetic mean of the five most recent daily yields to maturity (or, if fewer than five daily yields appear, such number of daily yields to maturity appearing), adjusted for constant maturity, for each of the two series of U.S. Treasury securities trading in the public securities market as published under the caption “Treasury Constant Maturities — Nominal” (or any successor caption or heading), (a) one maturing as close as possible to, but earlier than, the maturity date for the Subordinated Notes, and (b) the other maturing as close as possible to, but later than, the maturity date for the Subordinated Notes, in each case as published in the most recent H.15.

Notwithstanding the foregoing, if we, in our sole discretion, determine on or prior to the Reset Determination Date that the Five-Year U.S. Treasury Rate cannot be determined in the manner described in the immediately preceding paragraph (a “Benchmark Substitution Event”), we may, in our sole discretion, designate an unaffiliated agent or advisor, which may include an unaffiliated underwriter for the offering of the Subordinated Notes or any affiliate of any such underwriter (the “Designee”), to determine whether there is an industry-accepted successor rate to the Initial Base Rate. If the Designee determines that there is such an industry-accepted successor rate, then the “Five-Year U.S. Treasury Rate” shall be such successor rate and, in that case, the Designee may then determine and adjust the business day convention, the definition of business day and the Reset Determination Date to be used and any other relevant methodology for determining or otherwise calculating such successor rate, including any adjustment factor needed to make such successor rate comparable to the Initial Base Rate in each case, in a manner that is consistent with industry-accepted practices for the use of such successor rate (the “Adjustments”). If we, in our sole discretion, determine that the Five-Year U.S. Treasury Rate cannot be determined in the manner described in the immediately preceding paragraph and we, in our sole discretion, do not designate a Designee or if the Designee determines that there is no industry-accepted successor rate to the Initial Base Rate, then the Five-year U.S. Treasury Rate on the Reset Determination Date will be 3.813%, which is the Initial Fixed Rate minus the Spread.

For the avoidance of doubt, any determination by us or a Designee pursuant to the preceding paragraph (including, without limitation, with respect to any Benchmark Substitution Event or any Adjustments) will not be subject to, and will become effective without, the consent of the holders of the Subordinated Notes or any other party.

“H.15” means the daily statistical release designated as such, or any successor publication, published by the Federal Reserve System (the “FRB”), and “most recent H.15” means the H.15 published closest in time but prior to the close of business on the Reset Determination Date.

Unless we have delivered notice of redemption of all outstanding notes, with such redemption to occur on the Reset Date, we will appoint a calculation agent with respect to the Subordinated Notes prior to the Reset Determination Date. The Five-year U.S. Treasury Rate will be determined by the calculation

agent on the Reset Determination Date. Promptly upon such determination, the calculation agent will notify Associated Banc-Corp of the interest rate from and after the Reset Date. Associated Banc-Corp shall then promptly notify the trustee in writing of such interest rate. We or an affiliate of ours may assume the duties of the calculation agent. Any determination, decision or election that may be made by the calculation agent pursuant to the terms of the Subordinated Notes, including any determination with respect to a rate, will be conclusive and binding absent manifest error, may be made in the calculation agent's sole discretion, and, notwithstanding anything to the contrary in the documentation relating to the Subordinated Notes, shall become effective without consent from any other party. The calculation agent's determination of any interest rate will be on file at our principal offices, will be made available to any holder of the Subordinated Notes upon request and will be final and binding in the absence of manifest error. The trustee or any paying agent will have no obligation to be named as calculation agent nor for making any determinations to be made by the calculation agent as described above or for determining whether manifest error has occurred.

Optional Redemption by Us

We have the option to redeem the Subordinated Notes (i) in whole or in part on the Reset Date, and on any interest payment date thereafter, (ii) in whole or in part, at any time and from time to time, on or after December 1, 2032 (three months prior to the maturity date), or (iii) in whole, but not in part, upon the occurrence of a Regulatory Capital Treatment Event (as defined herein), in each case at a redemption price equal to 100% of the principal amount of the Subordinated Notes being redeemed, plus accrued and unpaid interest thereon, if any, to, but excluding, the redemption date.

If we redeem the Subordinated Notes at our option, notwithstanding the foregoing, installments of interest on the Subordinated Notes that are due and payable on any interest payment date falling on or prior to a redemption date for the Subordinated Notes will be payable on that interest payment date to the registered holders thereof as of the close of business on the relevant record date according to the terms of the Subordinated Notes and the Indenture.

A "Regulatory Capital Treatment Event" means the good faith determination by us that, as a result of (i) any amendment to, or change in, the laws, rules or regulations of the United States (including, for the avoidance of doubt, any agency or instrumentality of the United States, including the FRB and other appropriate federal bank regulatory agencies) or any political subdivision of or in the United States that is enacted or becomes effective after the initial issuance of the Subordinated Notes, (ii) any proposed change in those laws, rules or regulations that is announced or becomes effective after the initial issuance of the Subordinated Notes, or (iii) any official administrative decision or judicial decision or administrative action or other official pronouncement interpreting or applying those laws, rules or regulations or policies with respect thereto that is announced after the initial issuance of the Subordinated Notes, there is more than an insubstantial risk that we will not be entitled to treat the Subordinated Notes then outstanding as "tier 2 capital" (or its equivalent) for purposes of the capital adequacy rules of the FRB (or, as and if applicable, the capital adequacy rules or regulations of any successor appropriate federal banking agency) as then in effect and applicable, for so long as any note is outstanding, to at least the same extent as of the date of original issuance of the Subordinated Notes. "Appropriate federal banking agency" means the "appropriate federal banking agency" with respect to us as that term is defined in Section 3(q) of the Federal Deposit Insurance Act or any successor provision.

We must give the holders of the Subordinated Notes to be redeemed notice of the redemption not less than 10 days or more than 60 days before the redemption date. If we elect to redeem fewer than all the Subordinated Notes, the trustee will select the particular notes to be redeemed on a pro rata basis, by-lot or by such other method of selection, if any, that the trustee deems fair and appropriate.

Any exercise by us of our redemption rights described above is subject to our having first received approval of the FRB for such redemption.

The Subordinated Notes are not subject to any sinking fund. The Subordinated Notes are not mandatorily redeemable at the option of the holders.

Subordination

The Subordinated Notes are subordinate and junior in right of payment to all senior indebtedness and effectively subordinated to all existing and future debt and other liabilities of our subsidiaries and, upon the occurrence of certain events of insolvency, will be subordinated to the prior payment in full of our general obligations.

The Indenture defines “senior indebtedness” as:

1. the principal of (and premium, if any) and interest in respect of indebtedness of the Company for purchased or borrowed money, whether or not evidenced by securities, notes, debentures, bonds or other similar instruments issued by the Company;
2. all capital lease obligations of the Company;
3. all obligations of the Company issued or assumed as the deferred purchase price of property, all conditional sale obligations of the Company and all obligations of the Company under any conditional sale or title retention agreement, but excluding trade accounts payable in the ordinary course of business;
4. all obligations of the Company in respect of any letters of credit, bankers acceptances, security purchase facilities and similar credit transactions;
5. all obligations of the Company in respect of interest rate swap, cap or other agreements, interest rate future or options contracts, currency swap agreements, currency future or option contracts and other similar agreements;
6. all obligations of the type referred to in the preceding five clauses of other persons for the payment of which the Company is responsible or liable as obligor, guarantor or otherwise;
7. all obligations of the type referred to in the preceding six clauses of other persons secured by any lien on any property or asset of the Company whether or not such obligation is assumed by the Company; and
8. any deferrals, renewals or extensions of any such senior indebtedness;

provided, however, that senior indebtedness does not include:

1. any notes issued under the Indenture, including the Subordinated Notes (collectively, “Subordinated Securities”);
2. any indebtedness that by its terms is subordinated to, or ranks on an equal basis with, Subordinated Securities; and
3. any indebtedness between or among the Company and its affiliates, including all other debt securities and guarantees in respect of debt securities issued to any trust, or a trustee of such trust, partnership or other entity affiliated with the Company which is a financing vehicle of the Company in connection with the issuance by such financing vehicle of capital securities or other securities guaranteed by the Company pursuant to an instrument that ranks on an equal basis with or junior in respect of payment to Subordinated Securities.

The Indenture defines “general obligations” as all obligations of the Company to make payment on account of claims of general creditors, other than (A) obligations on account of senior indebtedness and (B) obligations on account of Subordinated Securities issued under the Indenture and indebtedness for money borrowed ranking *pari passu* with or subordinate to Subordinated Securities issued under the Indenture.

If the FRB (or other Federal banking supervisor that is at the time of determination the Company’s primary Federal banking supervisor) shall promulgate any rule or issue any interpretation defining or describing the term “general creditor” or “general creditors” or “senior indebtedness” for purposes of its criteria for the inclusion of subordinated debt of a bank holding company (including a financial holding company, if applicable) in capital, or otherwise defining or describing the obligations to which subordinated debt of a bank holding company (including a financial holding company, if applicable) must be subordinated to be included in capital, to include any obligations not included in the definition of “senior indebtedness” under the Indenture, the term “general obligations” will mean such

obligations as defined or described in the first such rule or interpretation, other than obligations described in clauses (A) and (B) above.

If the maturity of any Subordinated Securities, including the Subordinated Notes, is accelerated, the holders of all senior indebtedness outstanding at the time of such acceleration will first be entitled to receive payment in full of all amounts due thereon before the holders of Subordinated Securities, including the Subordinated Notes, will be entitled to receive any payment upon the principal of (or premium, if any) or interest, if any, on the Subordinated Securities.

No payments on account of principal (or premium, if any) or interest, if any, in respect of the Subordinated Notes may be made if there shall have occurred and be continuing:

1. a default in the payment of principal of (or premium, if any) or interest on senior indebtedness;
2. an event of default with respect to any senior indebtedness resulting in the acceleration of the maturity thereof; or
3. if any judicial proceeding shall be pending with respect to any such default.

In addition, upon our dissolution, winding-up, liquidation, or reorganization:

1. we must pay to the holders of senior indebtedness the full amounts of principal of, premium, if any, and interest, if any, on the senior indebtedness before any payment or distribution is made on the Subordinated Notes, and
2. if, after we have made those payments on the senior indebtedness, amounts are available for payment on the Subordinated Notes and creditors who hold general obligations have not received their full payments,

then we will first use amounts available for payment on the Subordinated Notes to pay in full all other general obligations before we may make any payment on the Subordinated Notes.

Events of Default

An event of default under the Indenture, as applied to the Subordinated Notes, occurs only upon certain events in bankruptcy, insolvency or reorganization involving us. If an event of default with respect to the Subordinated Notes occurs and is continuing, either the trustee or the holders of not less than 25% in principal amount of the outstanding notes may declare the principal amount of the Subordinated Notes to be due and payable immediately. Subject to certain conditions, the holders of a majority in principal amount of the outstanding notes may rescind and annul the declaration. Holders of the Subordinated Notes may not accelerate the maturity of the Subordinated Notes, except upon an event of default.

In addition, the Indenture also provides for defaults. A “default” under the Indenture, as applied to the Subordinated Notes includes:

1. our failure to pay principal of, or any premium on, any Subordinated Security when the payment is due;
2. our failure to pay any interest on any Subordinated Security when the interest payment is due, and continuance of this default for 30 days;
3. our default in the performance, or breach, of any of our covenants or warranties in the Indenture, other than a covenant or warranty included in the Indenture solely for the benefit of a different series of subordinated debt securities, which has continued for 60 days after we have been given written notice of the default as provided in the Indenture;
4. any event of default under the Indenture; and
5. any other default regarding the Subordinated Notes.

Neither the trustee nor holders of the Subordinated Notes have any right to accelerate the payment of the principal amount of the Subordinated Notes upon the occurrence of a default. However, if there is a default in payment of principal or interest (not cured within 30 days) under the Subordinated Notes and upon demand of the trustee, we will be required to pay the principal amount and interest, if

any, then due and payable on the Subordinated Notes to the trustee for the benefit of the holders of the outstanding notes.

Defeasance and Covenant Defeasance

The Indenture contains a provision that permits us to elect:

1. defeasance, which would discharge us from all of our obligations (subject to limited exceptions) with respect to the Subordinated Notes; and/or
2. covenant defeasance, which would release us from our obligations under specified covenants and the consequences of the occurrence of an event of default resulting from a breach of these covenants.

To make either of the above elections, we must deposit in trust with the trustee money and/or U.S. government obligations which, through the payment of principal and interest in accordance with their terms, will provide sufficient money, without reinvestment, to repay in full the Subordinated Notes.

In the Indenture, “U.S. government obligations” are:

1. direct obligations of the U.S. or of an agency or instrumentality of the U.S., in either case that is guaranteed as a full faith and credit obligation of the U.S. and that is not callable or redeemable by us; and
2. certain depositary receipts with respect to an obligation referred to immediately above.

As a condition to defeasance or covenant defeasance, we must deliver to the trustee an opinion of counsel that the holders of the Subordinated Notes will not recognize income, gain, or loss for federal income tax purposes as a result of the defeasance or covenant defeasance and will be subject to federal income tax on the same amount, in the same manner and at the same times as would have been the case if defeasance or covenant defeasance had not occurred. That opinion, in the case of defeasance, but not covenant defeasance, must refer to and be based upon a ruling received by us from the Internal Revenue Service or published as a revenue ruling or upon a change in applicable federal income tax law.

If we exercise our covenant defeasance option with respect to the Subordinated Notes, then even if there were a default under the related covenant, payment of the Subordinated Notes could not be accelerated. We may exercise our defeasance option with respect to the Subordinated Notes even if we previously had exercised our covenant defeasance option. If we exercise our defeasance option, payment of the Subordinated Notes may not be accelerated because of any event of default. If we exercise our covenant defeasance option and acceleration were to occur, the realizable value at the acceleration date of the money and U.S. government obligations in the defeasance trust could be less than the principal and interest then due on the Subordinated Notes. This is because the required deposit of money and/or U.S. government obligations in the defeasance trust is based upon scheduled cash flows rather than market value, which will vary depending upon interest rates and other factors.

Modification and Waiver

The Indenture provides that we, together with the trustee, may enter into supplemental indentures without the consent of any holders of the Subordinated Notes to, among other things:

1. evidence the assumption by another person of our obligations;
2. add covenants for the benefit of the holders;
3. add any additional events of default;
4. add to or change the Indenture to permit or facilitate the issuance of Subordinated Securities in bearer form or to permit or facilitate the issue of Subordinated Securities in uncertificated form;
5. secure the Subordinated Securities;
6. evidence the acceptance of appointment by a successor trustee;
7. cure any ambiguity or correct any inconsistency in the Indenture; or
8. make other changes, provided that any such action does not adversely affect the interests of the holders in any material respect.

Other amendments and modifications of the Indenture may be made with the consent of the holders of not less than a majority of the aggregate principal amount of outstanding Subordinated Securities of each series affected by the supplemental indenture. No modification or amendment may, however, without the consent of each holder of outstanding Subordinated Securities of each series affected by the supplemental indenture:

1. change the stated maturity of the principal of, or any installment of principal or interest on the Subordinated Notes;
2. reduce the principal amount of (or premium, if any) or the interest rate on the Subordinated Notes or the principal amount due upon acceleration of a note;
3. change the place or currency of payment of principal of (or premium, if any), or the interest on the Subordinated Notes;
4. impair the right to sue for the enforcement of any such payment on or with respect to the Subordinated Notes;
5. reduce the percentage of holders of the Subordinated Notes necessary to modify or amend the Indenture; or
6. modify the foregoing requirements or reduce the percentage of outstanding Subordinated Securities necessary to waive compliance with certain covenants in the Indenture or for waiver of certain defaults.

The Indenture provides that in determining whether the holders of the requisite principal amount of the outstanding Subordinated Securities have given, made or taken any request, demand, authorization, direction, notice, consent or waiver under the Indenture, Subordinated Securities owned by Associated Banc-Corp or any affiliate of Associated Banc-Corp shall be disregarded and deemed not to be outstanding. Additionally, no modification or amendment to the Indenture may, without the consent of the holder of each outstanding subordinated note affected:

1. modify the subordination provisions of the Subordinated Securities of any series in a manner adverse to the holders of the Subordinated Notes; or
2. adversely affect the right to convert any Subordinated Security.

Consolidation, Merger, and Sale of Assets

We may, without the consent of the holders of any Subordinated Securities, including the Subordinated Notes, consolidate or merge with any other person or transfer or lease all or substantially all of our assets to another person or permit another corporation to merge into Associated Banc-Corp, as long as:

1. the successor is a corporation, banking association, partnership or trust organized and validly existing under the laws of the United States, any state or the District of Columbia;
2. the successor (if not Associated Banc-Corp) expressly assumes, by supplemental indenture, all of our obligations on the Subordinated Securities, including the Subordinated Notes, and under the Indenture;
3. immediately after giving effect to the transaction, no event of default, and no event which, after notice or lapse of time or both, would become an event of default, shall have occurred and be continuing; and
4. we deliver to the trustee an officer's certificate and an opinion of counsel, each stating that such consolidation, merger, conveyance, transfer or lease of our properties and assets complies with the Indenture and that all conditions precedent to such transaction have been complied with.

Governing Law

The Indenture and the Subordinated Notes are governed by, and construed in accordance with, the laws of the State of New York.

The Trustee

The Bank of New York Mellon Trust Company, N.A. is the trustee under the Indenture relating to the Subordinated Notes. The trustee has all of the duties and responsibilities specified under the Trust Indenture Act of 1939, as amended. The trustee is not obligated to exercise any of its rights or powers

under the Indenture at the request or direction of any holders of the Subordinated Notes unless the holders have offered to the trustee security or indemnity reasonably satisfactory to the trustee. We and some of our subsidiaries maintain deposits and conduct other banking transactions with the trustee in the ordinary course of business.

The Bank of New York Mellon Trust Company, N.A., serves as trustee under the Indenture and under our senior debt securities indenture, dated as of March 14, 2011, between Associated Banc-Corp and The Bank of New York Mellon Trust Company, N.A., as trustee, relating to our senior notes. If an event of default occurs, the trustee may be considered to have a conflicting interest with respect to the Subordinated Notes for purposes of the Trust Indenture Act of 1939, as amended. In that case, the trustee may be required to resign as trustee under the Indenture relating to the Subordinated Notes and we would be required to appoint a successor trustee.

Insider Trading Policy

Purpose

This Insider Trading Policy (the “Policy”) provides guidelines with respect to transactions in the securities of Associated Banc-Corp (the “Company”) and the handling of confidential information about the Company and the companies with which the Company does business. The Company’s Board of Directors has adopted this Policy to promote compliance with federal and state securities laws that prohibit certain persons who are aware of material nonpublic information about a company from: (i) engaging in transactions in securities of that company; or (ii) providing material nonpublic information to other persons who may trade on the basis of that information.

Persons Subject to the Policy

This Policy applies to all officers of the Company and its subsidiaries, all members of the Company’s Board of Directors and all employees of the Company and its subsidiaries. The Company may also determine that other persons should be subject to the Policy, such as contractors or consultants who have access to material nonpublic information. This Policy also applies to family members, other members of a person’s household and entities controlled by a person covered by the Policy, as described below.

Transactions Subject to the Policy

The Policy applies to transactions in the Company’s securities (collectively referred to in this Policy as “Company Securities”), including the Company’s common stock, options to purchase common stock, or any other type of securities that the Company may issue, including (but not limited to) preferred stock, convertible debentures and warrants, as well as derivative securities that are not issued by the Company, such as exchange-traded put or call options or swaps relating to the Company’s Securities. Transactions subject to this Policy include purchases, sales, and bona fide gifts of Company Securities.

Individual Responsibility

Persons subject to this Policy have ethical and legal obligations to maintain the confidentiality of information about the Company and to not engage in transactions in Company Securities while in possession of material nonpublic information. Persons subject to this Policy must not engage in illegal trading and must avoid the appearance of improper trading. Each individual is responsible for making sure that he or she complies with this Policy, and that any family member, household member or entity whose transactions are subject to this Policy, as discussed below, also comply with this Policy. In all cases, the responsibility for determining whether an

individual is in possession of material nonpublic information rests with that individual, and any action on the part of the Company, the Compliance Officer or any other employee or director pursuant to this Policy (or otherwise) does not in any way constitute legal advice or insulate an individual from liability under applicable securities laws. You could be subject to severe legal penalties and disciplinary action by the Company for any conduct prohibited by the Policy or applicable securities laws, as described below in more detail under the heading “Consequences of Violations.”

Administration of the Policy

The Company’s General Counsel shall serve as the Compliance Officer for the purposes of this Policy, and in his absence, another employee designated by the Compliance Officer shall be responsible for administration of this Policy. All determinations and interpretations by the Compliance Officer shall be final and not subject to further review.

Statement of Policy

It is the policy of the Company that no director, officer or other employee of the Company (or any other person designated by this Policy or by the Compliance Officer as subject to this Policy) who is aware of material nonpublic information relating to the Company may, directly, or indirectly through family members or other persons or entities:

1. Engage in transactions in Company Securities, except as otherwise specified in this Policy under the headings “Transactions Under Company Plans,” “Transactions in Mutual Funds” and “Rule 10b5-1 Plans;”
2. Recommend that others engage in transactions in any Company Securities;
3. Disclose material nonpublic information to persons within the Company whose jobs do not require them to have that information, or outside of the Company to other persons, including, but not limited to, family, friends, business associates, investors and expert consulting firms, unless any such disclosure is made in accordance with the Company’s policies regarding the protection or authorized external disclosure of information regarding the Company; or
4. Assist anyone engaged in the above activities.

In addition, it is the policy of the Company that no director, officer or other employee of the Company (or any other person designated as subject to this Policy) who, in the course of working for the Company, learns of material nonpublic information about a company (1) with which the Company does business, such as the Company’s distributors, vendors, customers and suppliers, or (2) that is involved in a potential transaction or business relationship with Company, may engage in transactions in that company’s securities until the information becomes public or is no longer material.

It is also the policy of the Company that the Company will not engage in transactions in Company Securities while aware of material nonpublic information relating to the Company or Company Securities.

There are no exceptions to this Policy, except as specifically noted herein. Transactions that may be necessary or justifiable for independent reasons (such as the need to raise money for an emergency expenditure), or small transactions, are not excepted from this Policy. The securities laws do not recognize any mitigating circumstances, and, in any event, even the appearance of an improper transaction must be avoided to preserve the Company's reputation for adhering to the highest standards of conduct.

Definition of Material Nonpublic Information

Material Information. Information is considered "material" if a reasonable investor would consider that information important in making a decision to buy, hold or sell securities. Any information that could be expected to affect the Company's stock price, whether it is positive or negative, should be considered material. There is no bright-line standard for assessing materiality; rather, materiality is based on an assessment of all of the facts and circumstances, and is often evaluated by enforcement authorities with the benefit of hindsight.

When Information is Considered Public. Information that has not been disclosed to the public is generally considered to be nonpublic information. In order to establish that the information has been disclosed to the public, it may be necessary to demonstrate that the information has been widely disseminated. Information generally would be considered widely disseminated if it has been disclosed through a newswire services or public disclosure documents filed with the SEC. By contrast, information would likely not be considered widely disseminated if it is available only to the Company's employees, or if it is only available to a select group of analysts, brokers and institutional investors.

Once information is widely disseminated, it is still necessary to afford the investing public with sufficient time to absorb the information. As a general rule, information should not be considered fully absorbed by the marketplace until the second business day after the day on which the information is released. Depending on the particular circumstances, the Company may determine that a longer or shorter period should apply to the release of specific material nonpublic information.

Transactions by Family Members and Others

This Policy applies to your family members who reside with you (including a spouse, a child, a child away at college, stepchildren, grandchildren, parents, stepparents, grandparents, siblings and in-laws), anyone else who lives in your household, and any family members who do not live in your household but whose transactions in Company Securities are directed by you or are subject to your influence or control, such as parents or children who consult with you before they trade in Company Securities (collectively referred to as "Family Members"). You are responsible for the transactions of these other persons and therefore should make them aware of the need to confer with you before they trade in Company Securities, and you should treat all such transactions for the purposes of this Policy and applicable securities laws as if the transactions were for your own account. This Policy does not, however, apply to personal securities transactions of Family Members where the purchase or sale decision is made by a third party not controlled by, influenced by or related to you or your Family Members.

Transactions by Entities that You Influence or Control

This Policy applies to any entities that you influence or control, including any corporations, partnerships or trusts (collectively referred to as “Controlled Entities”), and transactions by these Controlled Entities should be treated for the purposes of this Policy and applicable securities laws as if they were for your own account.

Transactions Under Company Plans

This Policy does not apply in the case of the following transactions, except as specifically noted:

Stock Option Exercises. This Policy does not apply to the exercise of an employee stock option acquired pursuant to the Company’s plans, or to the exercise of a tax withholding right pursuant to which a person has elected to have the Company withhold shares subject to an option to satisfy tax withholding requirements. This Policy does apply, however, to any sale of stock as part of a broker-assisted cashless exercise of an option, or any other market sale for the purpose of generating the cash needed to pay the exercise price of an option.

Restricted Stock Awards. This Policy does not apply to the vesting of restricted stock, or the exercise of a tax withholding right pursuant to which you elect to have the Company withhold shares of stock to satisfy tax withholding requirements upon the vesting of any restricted stock. The Policy does apply, however, to any market sale of restricted stock.

401(k) Plan. This Policy does not apply to purchases of Company Securities in the Company’s 401(k) plan resulting from your periodic contribution of money to the plan pursuant to your payroll deduction election. This Policy does apply, however, to certain elections you may make under the 401(k) plan, including: (a) an election to increase or decrease the percentage of your periodic contributions that will be allocated to the Company stock fund; (b) an election to make an intra-plan transfer of an existing account balance into or out of the Company stock fund; (c) an election to borrow money against your 401(k) plan account if the loan will result in a liquidation of some or all of your Company stock fund balance; and (d) an election to pre-pay a plan loan if the pre-payment will result in allocation of loan proceeds to the Company stock fund.

Employee Stock Purchase Plan. This Policy does not apply to purchases of Company Securities in the employee stock purchase plan resulting from your periodic contribution of money to the plan pursuant to the election you made at the time of your enrollment in the plan. This Policy also does not apply to purchases of Company Securities resulting from lump sum contributions to the plan, provided that you elected to participate by lump sum payment at the beginning of the applicable enrollment period. This Policy does apply, however, to your election to participate in the plan for any enrollment period, and to your sales of Company Securities purchased pursuant to the plan.

Dividend Reinvestment Plan. This Policy does not apply to purchases of Company Securities under the Company’s dividend reinvestment plan resulting from your reinvestment of dividends paid on Company Securities. This Policy does apply, however, to voluntary purchases of Company Securities resulting from additional contributions you choose to make to the dividend reinvestment plan, and to your election to participate in the plan or increase your level of participation in the plan. This Policy also applies to your sale of any Company Securities purchased pursuant to the plan.

Other Similar Transactions. Any other purchase of Company Securities from the Company or sales of Company Securities to the Company are not subject to this Policy.

Transactions in Mutual Funds

Transactions in mutual funds that are invested in Company Securities are not transactions subject to this Policy.

Special and Prohibited Transactions

The Company has determined that there is a heightened legal risk and/or the appearance of improper or inappropriate conduct if the persons subject to this Policy engage in certain types of transactions. It therefore is the Company's policy that any persons covered by this Policy may not engage in any of the following transactions, or should otherwise consider the Company's preferences as described below:

Short Sales. Short sales of Company Securities (*i.e.*, the sale of a security that the seller does not own) may evidence an expectation on the part of the seller that the securities will decline in value, and therefore have the potential to signal to the market that the seller lacks confidence in the Company's prospects. In addition, short sales may reduce a seller's incentive to seek to improve the Company's performance. For these reasons, short sales of Company Securities are prohibited by members of the Executive Group. In addition, Section 16(c) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") prohibits officers and directors from engaging in short sales.

Publicly-Traded Options. Given the relatively short term of publicly-traded options, transactions in options may create the appearance that a member of the Executive Group is trading based on material nonpublic information and focus a member of the Executive Group's attention on short-term performance at the expense of the Company's long-term objectives. Accordingly, transactions in put options, call options or other derivative securities, on an exchange or in any other organized market, are prohibited by this Policy for members of the Executive Group.

Hedging Transactions. Hedging or monetization transactions can be accomplished through a number of possible mechanisms, including through the use of financial instruments such as prepaid variable forwards, equity swaps, collars and exchange funds. Such hedging transactions may permit a member of the Executive Group to continue to own Company Securities obtained through employee benefit plans or otherwise, but without the full risks and rewards of ownership. When that occurs, the insider may no longer have the same objectives as the Company's other shareholders. Therefore, members of the Executive Group are prohibited from engaging in any such transactions.

Margin Accounts and Pledged Securities. Securities held in a margin account as collateral for a margin loan may be sold by the broker without the customer's consent if the customer fails to meet a margin call. Similarly, securities pledged (or hypothecated) as collateral for a loan may be sold in foreclosure if the borrower defaults on the loan. Because a margin sale or foreclosure sale may occur at a time when the pledgor is aware of material nonpublic information or otherwise is not permitted to trade in Company Securities, members of the Executive Group are

prohibited from holding Company Securities in a margin account or otherwise pledging Company Securities as collateral for a loan. Any Executive Group member who has pledged Company Securities must terminate such pledge no later than the date on which such person becomes subject to this prohibition.

Standing and Limit Orders. Standing and limit orders (except standing and limit orders under approved Rule 10b5-1 Plans, as described below) create heightened risks for insider trading violations similar to the use of margin accounts. There is no control over the timing of purchases or sales that result from standing instructions to a broker, and as a result the broker could execute a transaction when a member of the Executive Group is in possession of material nonpublic information. The Company therefore discourages placing standing or limit orders on Company Securities. If a member of the Executive Group determines that they must use a standing order or limit order, the order should be limited to short duration and should otherwise comply with the restrictions and procedures outlined below under the heading “Additional Procedures.”

Additional Procedures

The Company has established additional procedures in order to assist the Company in the administration of this Policy, to facilitate compliance with laws prohibiting insider trading while in possession of material nonpublic information, and to avoid the appearance of any impropriety. These additional procedures are applicable only to those individuals described below.

The Compliance Officer of the Company shall notify those persons considered to be members of the Company’s executive group (the “Executive Group”) of such status. The Executive Group shall consist of directors and executive officers of the Company and those employees who (i) are routinely in possession of annual and quarterly financial information for the Company prior to its release to the public, or (ii) are characterized as key policy-making officers of the Company by the Compliance Officer.

Pre-Clearance Procedures. The Executive Group, as well as the Family Members and Controlled Entities of such persons, may not engage in any transaction in Company Securities without first obtaining pre-clearance of the transaction from the Compliance Officer. A request for pre-clearance should be submitted to the Compliance Officer at least one business day in advance of the proposed transaction. The Compliance Officer is under no obligation to approve a transaction submitted for pre-clearance, and may determine not to permit the transaction. If a person seeks pre-clearance and permission to engage in the transaction is denied, then he or she should refrain from initiating any transaction in Company Securities, and should not inform any other person of the restriction.

When a request for pre-clearance is made, the requestor should carefully consider whether he or she may be aware of any material nonpublic information about the Company, and should describe fully those circumstances to the Compliance Officer. The requestor should also indicate whether he or she has effected any “opposite-way” transactions within the past six months.

Quarterly Trading Restrictions. The Executive Group, as well as their Family Members, and Controlled Entities, may not conduct any transactions involving the Company’s Securities (other than as specified by this Policy), during a “Restricted Period” beginning after the close of business on the fourteenth day of the third month of the calendar quarter and ending prior to the open of business on the third trading day following the date of the public release of the Company’s quarterly financial information (i.e., the Company’s quarterly earnings release).

Under certain very limited circumstances, a person subject to this restriction may be permitted to trade during a Restricted Period, but only if the Compliance Officer concludes that the person does not in fact possess material nonpublic information. Persons wishing to trade during a Restricted Period must contact the Compliance Officer for approval at least one business day in advance of any proposed transaction involving Company Securities.

Event-Specific Restricted Periods. From time to time, an event may occur that is material to the Company and is known by only a few directors, officers and/or employees. So long as the event remains material and nonpublic, the persons designated by the Compliance Officer may not trade Company Securities. In addition, the Company's financial results may be sufficiently material in a particular fiscal quarter that, in the judgment of the Compliance Officer, designated persons should refrain from trading in Company Securities even sooner than the typical Restricted Period described above. In that situation, the Compliance Officer may notify these persons that they should not trade in the Company's Securities, without disclosing the reason for the restriction. The existence of an event-specific restricted period or extension of a Restricted Period will not be announced to the Company as a whole, and should not be communicated to any other person. Even if the Compliance Officer has not designated you as a person who should not trade due to an event-specific restricted period, you should not trade while aware of material nonpublic information. Exceptions will not be granted during an event-specific restricted period.

Exceptions. The quarterly trading restrictions and event-driven trading restrictions do not apply to those transactions to which this Policy does not apply, as described above under the headings "Transactions Under Company Plans" and "Transactions in Mutual Funds." Further, the requirement for pre-clearance, the quarterly trading restrictions and event-driven trading restrictions do not apply to transactions conducted pursuant to approved Rule 10b5-1 plans, as described below.

Rule 10b5-1 Plans

Rule 10b5-1 under the Exchange Act provides a defense from insider trading liability under Rule 10b-5. In order to be eligible to rely on this defense, a person subject to this Policy must enter into a Rule 10b5-1 plan for transactions in Company Securities that meets certain conditions specified in the Rule (a "Rule 10b5-1 Plan") and must be in accordance with the Company's "Guidelines for Rule 10b5-1 Plans." If the plan meets the requirements of Rule 10b5-1, Company Securities may be purchased or sold without regard to certain insider trading restrictions. To comply with the Policy, a Rule 10b5-1 Plan must be approved in advance by the Compliance Officer. In general, a Rule 10b5-1 Plan must be entered into at a time when the person entering into the plan is not aware of material nonpublic information.

To comply with the Policy, a Rule 10b5-1 Plan must be approved by the Compliance Officer and meet the requirements of Rule 10b5-1 and the Company's "Guidelines for Rule 10b5-1 Plans," which may be obtained from the Compliance Officer. In general, a Rule 10b5-1 Plan must be entered into at a time when the person entering into the plan is not aware of material nonpublic information. Once the plan is adopted, the person must not exercise any influence over the amount of securities to be traded, the price at which they are to be traded or the date of the trade. The plan must either specify the amount, pricing and timing of transactions in advance or delegate discretion on these matters to an independent third party. The plan must include a

cooling-off period before trading can commence that, for directors or officers, ends on the later of 90 days after the adoption of the Rule 10b5-1 plan or two business days following the disclosure of the Company's financial results in an SEC periodic report for the fiscal quarter in which the plan was adopted (but in any event, the required cooling-off period is subject to a maximum of 120 days after adoption of the plan), and for persons other than directors or officers, 30 days following the adoption or modification of a Rule 10b5-1 plan. A person may not enter into overlapping Rule 10b5-1 plans (subject to certain exceptions) and may only enter into one single-trade Rule 10b5-1 plan during any 12-month period (subject to certain exceptions). Directors and officers must include a representation in their Rule 10b5-1 plan certifying that: (i) they are not aware of any material nonpublic information; and (ii) they are adopting the plan in good faith and not as part of a plan or scheme to evade the prohibitions in Rule 10b-5. All persons entering into a Rule 10b5-1 plan must act in good faith with respect to that plan.

Any Rule 10b5-1 Plan must be submitted for approval at least one week prior to the entry into such plan. No further pre-approval of transactions conducted pursuant to the Rule 10b5-1 Plan will be required.

Post-Termination Transactions

This Policy continues to apply to transactions in Company Securities even after termination of service to the Company. If an individual is in possession of material nonpublic information when his or her service terminates, that individual may not engage in transactions in Company Securities until that information has become public or is no longer material. The pre-clearance procedures specified under the heading "Additional Procedures" above, however, will cease to apply to transactions in Company Securities upon the expiration of any restricted period or other Company-imposed trading restrictions applicable at the time of the termination of service.

Consequences of Violations

The purchase or sale of securities while aware of material nonpublic information, or the disclosure of material nonpublic information to others who then trade in the Company's Securities, is prohibited by the federal and state laws. Insider trading violations are pursued vigorously by the SEC, U.S. Attorneys and state enforcement authorities. Punishment for insider trading violations is severe, and could include significant fines and imprisonment. While the regulatory authorities concentrate their efforts on the individuals who trade, or who tip inside information to others who trade, the federal securities laws also impose potential liability on companies and other "controlling persons" if they fail to take reasonable steps to prevent insider trading by company personnel.

In addition, an individual's failure to comply with this Policy may subject the individual to Company imposed sanctions, including dismissal for cause, whether or not the employee's failure to comply results in a violation of law. Needless to say, a violation of law, or even an SEC investigation that does not result in prosecution, can tarnish a person's reputation and irreparably damage a career.

Company Assistance

Any person who has a question about this Policy or its application to any proposed transaction, may obtain additional guidance from the Compliance Officer.

Corporate Governance and Social Responsibility Committee Approval: October 24, 2025

Guidelines for Rule 10b5-1 Plans

Rule 10b5-1 under the Exchange Act provides a defense from insider trading liability under Rule 10b-5. In order to be eligible to rely on this defense, a person subject to the Insider Trading Policy of Associated Banc-Corp (the “Policy”) must enter into a Rule 10b5-1 plan for transactions in Company Securities that meets certain conditions specified in the Rule (a “Rule 10b5-1 Plan”). Capitalized terms used in these guidelines but not defined shall have the meaning ascribed to such terms in the Policy.

If the plan meets the requirements of Rule 10b5-1, transactions in Company Securities may occur without regard to certain insider trading restrictions. In general, a Rule 10b5-1 Plan must be entered into at a time when the person entering into the plan is not aware of material nonpublic information. Once the plan is adopted, the person must not exercise any influence over the amount of securities to be traded, the price at which they are to be traded or the date of the trade. The plan must either specify the amount, pricing and timing of transactions in advance or delegate discretion on these matters to an independent third party.

A Rule 10b5-1 plan must include a cooling-off period before trading can commence that, for directors or officers, ends on the later of 90 days after the adoption of the Rule 10b5-1 plan or two business days following the disclosure of the Company’s financial results in an SEC periodic report for the fiscal quarter in which the plan was adopted (but in any event, the required cooling-off period is subject to a maximum of 120 days after adoption of the plan), and for persons other than directors or officers, 30 days following the adoption or modification of a Rule 10b5-1 plan. A person may not enter into overlapping Rule 10b5-1 plans (subject to certain exceptions) and may only enter into one single-trade Rule 10b5-1 plan during any 12-month period (subject to certain exceptions). Directors and officers must include a representation in their Rule 10b5-1 plan certifying that: (i) they are not aware of any material nonpublic information; and (ii) they are adopting the plan in good faith and not as part of a plan or scheme to evade the prohibitions in Rule 10b-5. All persons entering into a Rule 10b5-1 plan must act in good faith with respect to that plan.

As specified in the Policy, a Rule 10b5-1 Plan must be approved by the Compliance Officer and meet the requirements of Rule 10b5-1 and these guidelines. Any Rule 10b5-1 Plan must be submitted for approval one week prior to the entry into the Rule 10b5-1 Plan. No further pre-approval of transactions conducted pursuant to the Rule 10b5-1 Plan will be required.

The following guidelines apply to all Rule 10b5-1 Plans:

- You may not enter into, modify or terminate a Rule 10b5-1 Plan during a Restricted Period, and event-specific restricted period or otherwise while you are aware of material nonpublic information.
- All Rule 10b5-1 Plans must have a duration of at least 6 months and no more than 2 years.
- For officers and directors, no transaction may take place under a Rule 10b5-1 Plan until the later of (a) 90 days after adoption or modification (as specified in Rule 10b5-1) of the Rule 10b5-1 Plan or (b) two business days following the disclosure of the Company’s financial results in a Form 10-Q or Form 10-K for the fiscal quarter (the Company’s fourth fiscal quarter in the case of a Form 10-K) in which the Rule 10b5-1 Plan was

adopted or modified (as specified in Rule 10b5-1). In any event, the cooling-off period is subject to a maximum of 120 days after adoption of the plan.

- For persons other than officers and directors, no transaction may take place under a Rule 10b5-1 Plan until 30 days following the adoption or modification (as specified in Rule 10b5-1) of a Rule 10b5-1 Plan.
- Subject to certain limited exceptions specified in Rule 10b5-1, you may not enter into more than one Rule 10b5-1 Plan at the same time.
- Subject to certain limited exceptions specified in Rule 10b5-1, you are limited to only one Rule 10b5-1 designed to effect an open market purchase or sale of the total amount of securities subject to the Rule 10b-1 Plan as a single transaction in any 12-month period.
- You must act in good faith with respect to a Rule 10b5-1 Plan. A Rule 10b5-1 Plan cannot be entered into as part of a plan or scheme to evade the prohibition of Rule 10b5-1. Therefore, although modifications to an existing Rule 10b5-1 Plan are not prohibited, a Rule 10b5-1 Plan should be adopted with the intention that it will not be amended or terminated prior to its expiration.
- Officer and directors must include a representation to the Company at the time of adoption or modification of a Rule 10b5-1 Plan that (i) the person is not aware of material nonpublic information about the Company or Company Securities and (ii) the person is adopting the plan in good faith and not as part of plan or scheme to evade the prohibitions of Rule 10b-5.

The Company and the Company's officers and directors must make certain disclosures in SEC filings concerning Rule 10b5-1 Plans. Officers and directors of the Company must undertake to provide any information requested by the Company regarding Rule 10b5-1 Plans for the purpose of providing the required disclosures or any other disclosures that the Company deems to be appropriate under the circumstances.

Each director, officer and other Section 16 insider understands that the approval or adoption of a pre-planned selling program in no way reduces or eliminates such person's obligations under Section 16 of the Exchange Act, including such person's disclosure and short-swing trading liabilities thereunder. If any questions arise, such person should consult the Compliance Officer.

POWER OF ATTORNEY FOR ANNUAL REPORT ON FORM 10-K

Each of the undersigned directors of Associated Banc-Corp (the “Corporation”) hereby designates and appoints Randall J. Erickson and Laura Skilton Verhoff, and each of them, the undersigned’s true and lawful attorney-in-fact and agent, with full power of substitution and resubstitution, for the undersigned and in the undersigned’s name, place and stead to sign for the undersigned and in the undersigned’s name in the capacity as a director of the Corporation in the Corporation’s Annual Report on Form 10-K for the year ended December 31, 2025, and to file the same, with all exhibits thereto, other documents in connection therewith, and any amendments to any of the foregoing, with the Securities and Exchange Commission and any other regulatory authority, granting unto said attorney-in-fact and agent full power and authority to do and perform each and every act and thing requisite and necessary to be done in and about the premises, as fully and to all intents and purposes as the undersigned might or could do in person, hereby ratifying and confirming all that said attorney-in-fact and agent, or the undersigned’s substitute, may lawfully do or cause to be done by virtue hereof.

IN WITNESS WHEREOF, the undersigned have each executed this Power of Attorney for Annual Report on Form 10-K, on one or more counterparts, as of the 27th day of January 2026.

**CERTIFICATION UNDER SECTION 302 OF THE
SARBANES-OXLEY ACT OF 2002**

CERTIFICATIONS

I, Andrew J. Harmening, certify that:

1. I have reviewed this annual report on Form 10-K of Associated Banc-Corp;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
