☒ Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2024.

Section 1 – Conflict Minerals Disclosure

ITEM 1.01 – Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

As used herein, except as otherwise indicated, references to “AstroNova,” “we,” “us,” “our,” or the “Company” in this Form SD refer to AstroNova, Inc. and its consolidated subsidiaries.

AstroNova has implemented a conflict minerals policy in order to address the proper sourcing of conflict minerals necessary to the functionality or production of our products. In September of 2013, we adopted the following policy with respect to conflict minerals.

1. Support the aims and objective of the U.S. legislation on the supply of “conflict minerals”
2. Do not knowingly procure specified metals that originate from facilities in the “Conflict Region”
3. Ensure compliance with these requirements, and ask our suppliers to undertake reasonable due diligence with their supply chains to assure that specified metals are being sourced only from:
 - Mines and smelters outside the “Conflict Region” or
 - Mines and smelters which have been certified by an independent third party as “conflict free” if sourced within the “Conflict Region”

The term “conflict minerals” refers to gold, as well as tin, tantalum, and tungsten, which are the derivatives of cassiterite, columbite-tantalite, and wolframite, regardless of where they are sourced, processed or sold. The “Conflict Region” is the Democratic Republic of Congo (DRC) and surrounding countries.

To put our commitment to this policy in action, we first conducted a detailed review of our purchases of materials necessary to the functionality or production of products we manufactured in 2024 to determine whether we purchase any conflict minerals.

We use gold, tin and tantalum in our products, as they were present in electronic components supplied to us for use in the manufacture of our products during calendar year 2024. Because of this, we conduct a reasonable country of origin inquiry, which is designed to determine whether any of our necessary conflict minerals originated or may have originated in the Conflict Region or come from recycled or scrap sources. Our supply chain is complex, and there are many indirect suppliers in the supply chain between us and the mines or locations of origin of our necessary conflict minerals. We do not purchase any conflict minerals directly from miners, smelters or refiners. Therefore, we must rely on our direct and indirect suppliers to provide information about the origin of our necessary conflict minerals in our products.

As part of our reasonable country of origin inquiry, we require that all of our vendors certify to us in connection with each of our purchases that any conflict minerals in the products they supply to us did not originate in the Conflict Region. Based on this reasonable country of origin inquiry, we have no reason to believe that our necessary conflict minerals may have originated in the Democratic Republic of Congo or any adjoining country.

This information is publicly available at <http://www.astronovainc.com>.

ITEM 1.02 – Exhibit

Not required.

Section 2 Item 2.01 Exhibits

None

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

AstroNova, Inc.
