Ford Takes Next Steps to Transform European Business; Aligns Organization and Product Portfolio to Rapidly Changing Industry and Market Conditions

- Ford Europe is preparing its organization and product line-up to compete and win in a highly competitive region that is facing significant economic and geo-political headwinds

- The company is taking action to restructure its business in Europe, creating a leaner, more competitive cost structure, including the elimination of 3,800 jobs over the next three years

- Plans will enable a future for Ford in Europe defined by a new line-up of iconic vehicles inspired by Ford’s American heritage and differentiated through software and services

- Strategy to offer an all-electric fleet in Europe by 2035 is unchanged. Production of Ford’s first European-built electric passenger vehicle is set to start later this year

COLOGNE, GERMANY, Feb. 14, 2023 – Ford in Europe today announced it is taking the next steps in the transformation of its business, responding to rapidly changing market conditions and a growing field of electric vehicle competitors entering the market.

The company today outlined actions that will revitalize its business in Europe and will enable Ford to profitably compete with a new line-up of iconic passenger vehicles, while also extending Ford Pro’s position as the best-selling brand in the commercial vehicle sector.

“We are completely reinventing the Ford brand in Europe. Unapologetically American, outstanding design and connected services that will differentiate Ford and delight our customers in Europe”, said Martin Sander, General Manager of Ford Model e in Europe, “We are ready to compete and win in Europe. Our first European-built electric passenger vehicle is being introduced this spring and will surely turn heads.”

The actions announced today align Ford’s product development organization and administrative functions in Europe, with a smaller, more focused, and increasingly electric product portfolio. The plans include the elimination of approximately 3,800 jobs, creating a leaner, more competitive cost structure for Ford in Europe. Ford will now engage in consultation with its social partners across Europe with the intent to achieve the reductions through voluntary separation programs.

“Paving the way to a sustainably profitable future for Ford in Europe requires broad-based actions and changes in the way we develop, build, and sell Ford vehicles. This will impact the organizational structure, talent, and skills we will need in the future,” said Martin Sander, General Manager of Ford Model e in Europe.
By 2025, Ford plans to resize its European engineering footprint, resulting in 2,800 fewer jobs. These changes are driven by the transition to fully electric powertrains and reduced vehicle complexity. Ford will maintain an engineering organization of approximately 3,400 roles in Europe, focused on vehicle design and development, as well as the creation of connected services.

Additionally, a leaner cost structure will be created for Ford’s administrative, marketing, sales and distribution functions in Europe, which includes the elimination of approximately 1,000 positions.

“These are difficult decisions, not taken lightly. We recognize the uncertainty it creates for our team, and I assure them we will be offering them our full support in the months ahead. We will engage in consultations with our social partners so we can move forward together on building a thriving future for our business in Europe,” Sander said.

Meeting customer expectations in a connected world

Ford’s transformation is designed to continue to deliver on our customers’ expectations of outstanding vehicle design and quality and increasingly serve customers with connected vehicle technology and services.

Ford is the number one commercial vehicle brand in Europe, leading the industry for the past eight years. To meet the evolving needs of commercial customers around the globe, Ford has established a global commercial vehicle Centre of Excellence in Dunton, UK, focused on helping businesses accelerate productivity and sustainability with a range of world-class all-electric vehicles supported by Ford Pro’s ecosystem of software and services.

Ford in Europe will also continue to invest in the design and development of electric passenger vehicles, meeting consumer demand while at the same time targeting carbon neutrality across its European facilities, logistics and key suppliers by 2035.

“We are committed to our customers in Europe. Ford is focused on delivering an exceptional customer ownership experience, with outstanding digital services and connectivity, ensuring their daily mobility needs are exceeded,” said Sander.

Background:

Globally Ford is investing over $50 billion in EVs through 2026, this includes various European manufacturing announcements made in 2022:

In December 2022, we announced a further £125 million investment into the Halewood Plant, UK, taking total investment to almost £380 million. Link

In July 2022, Ford Otosan took over ownership of Ford’s manufacturing operations in Craiova, Romania, boosting electric and commercial vehicle capacity. Link

In June 2022, we announced that our plant in Valencia, Spain, is best positioned to produce passenger vehicles based on a next-generation electric vehicle architecture. Link

In April 2022, Ford Otosan, Ford’s JV in Türkiye started production of the new E-Transit Link, and production of the all-new Transit and Tourneo Custom including all-electric versions will start this year. Link.

In March 2022, we announced a $2 billion investment into the Cologne site, where the first EVs will roll off the production line later this year. Link

# # #

Ford, a global American brand woven into the fabric of Europe for more than 100 years, is committed to freedom of movement that goes hand-in-hand with looking after the planet and each other. The company’s Ford+ plan, with Model e, Ford Pro and the Ford Blue business units is accelerating its European transformation to an all-electric and carbon neutral future by 2035. The company is driving forward with bold, new EVs, each one designed with European drivers in mind and innovating with services to help people connect, communities grow, and businesses thrive. Selling and servicing Ford vehicles in 50 individual European markets, operations also include the Ford Motor Credit Company, Ford Customer Service Division and 14 manufacturing facilities (eight wholly owned and six unconsolidated joint venture facilities) with four centres based in Cologne, Germany; Valencia, Spain and at our joint venture in Craiova, Romania and Kocaeli, Türkiye. Ford employs approximately 34,000 people at its wholly owned facilities and consolidated joint ventures and approximately 54,000 people including unconsolidated businesses across Europe. More information about the company, its products and Ford Credit is available at corporate.ford.com.
