OUTLOOK

For fiscal 2023, the United States Department of Agriculture (USDA) indicates domestic protein production (beef, pork, chicken and turkey) should increase slightly compared to fiscal 2022 levels. The following is a summary of the updated outlook for each of our segments, as well as an outlook for revenues, capital expenditures, net interest expense, liquidity and tax rate for fiscal 2023. Certain of the outlook numbers include adjusted operating margin (a non-GAAP metric) for each segment. The Company is not able to reconcile its full-year fiscal 2023 projected adjusted results to its fiscal 2023 projected GAAP results because certain information necessary to calculate such measures on a GAAP basis is unavailable or dependent on the timing of future events outside of our control. Therefore, because of the uncertainty and variability of the nature of and the amount of any potential applicable future adjustments, which could be significant, the Company is unable to provide a reconciliation for these forward-looking non-GAAP measures without unreasonable effort. Adjusted operating margin should not be considered a substitute for operating margin or any other measures of financial performance reported in accordance with GAAP. Investors should rely primarily on the Company's GAAP results and use non-GAAP financial measures only supplementally in making investment decisions.

Beginning in fiscal 2022, we launched a new productivity program, which is designed to drive a better, faster and more agile organization that is supported by a culture of continuous improvement and faster decision making. We targeted an aggregate \$1 billion in productivity savings by the end of fiscal 2024 relative to a fiscal 2021 cost baseline. We realized more than \$700 million of productivity savings in fiscal 2022, which partially offset the impacts of inflationary market conditions, and we have surpassed our aggregate \$1 billion target as of the end of the second quarter of fiscal 2023, more than a year ahead of our plan.

Beef

USDA projects domestic production will decrease approximately 4% in fiscal 2023 as compared to fiscal 2022. We anticipate an adjusted operating margin of (1)% to 1% in fiscal 2023 as margins are expected to decrease.

Pork

USDA projects domestic production will be relatively flat in fiscal 2023 as compared to fiscal 2022. We anticipate adjusted operating margin of (2)% to 0% in fiscal 2023.

Chicken

USDA projects chicken production will increase approximately 3% in fiscal 2023 as compared to fiscal 2022. We anticipate an adjusted operating margin of (1)% to 1% for fiscal 2023.

Prepared Foods

We anticipate an adjusted operating margin of 8% to 10% in fiscal 2023 driven by volume growth, productivity and disciplined revenue management.

International/Other

We anticipate improved results from our foreign operations in fiscal 2023.

Revenue

We expect sales to be \$53 billion to \$54 billion in fiscal 2023.

Capital Expenditures

We expect capital expenditures of approximately \$2.3 billion for fiscal 2023. Capital expenditures include spending for capacity expansion and utilization, automation to alleviate labor challenges and brand and product innovation.

Net Interest Expense

We expect net interest expense to approximate \$340 million for fiscal 2023.

Liquidity

We expect total liquidity, which was approximately \$2.2 billion at April 1, 2023, to remain above our minimum liquidity target of \$1.0 billion. On May 3, 2023 we entered into \$1.75 billion of new term loan facilities.

Tax Rate

We currently expect our adjusted effective tax rate to be around 22% for fiscal 2023.

⁴ Removal of accelerated depreciation of \$10 million related to restructuring and related charges and \$9 million related to the plant closures for the six months ended April 1, 2023 as it is already included in depreciation expense.

EBITDA is defined as net income before interest, income taxes, depreciation and amortization. Net debt to EBITDA (Adjusted EBITDA) represents the ratio of our debt, net of cash, cash equivalents and short-term investments, to EBITDA (and to Adjusted EBITDA). EBITDA, Adjusted EBITDA, net debt to EBITDA and net debt to Adjusted EBITDA are presented as supplemental financial measurements in the evaluation of our business. Adjusted EBITDA is a tool intended to assist our management and investors in comparing our performance on a consistent basis for purposes of business decision-making by removing the impact of certain items that management believes do not directly reflect our core operations on an ongoing basis.

We believe the presentation of these financial measures helps management and investors to assess our operating performance from period to period, including our ability to generate earnings sufficient to service our debt, enhances understanding of our financial performance and highlights operational trends. These measures are widely used by investors and rating agencies in the valuation, comparison, rating and investment recommendations of companies; however, the measurements of EBITDA (and Adjusted EBITDA) and net debt to EBITDA (and to Adjusted EBITDA) may not be comparable to those of other companies, which may limit their usefulness as comparative measures. EBITDA (and Adjusted EBITDA) and net debt to EBITDA (and to Adjusted EBITDA) are not measures required by or calculated in accordance with GAAP and should not be considered as substitutes for net income or any other measure of financial performance reported in accordance with GAAP or as a measure of operating cash flow or liquidity. EBITDA (and Adjusted EBITDA) is a useful tool for assessing, but is not a reliable indicator of, our ability to generate cash to service our debt obligations because certain of the items added to net income to determine EBITDA (and Adjusted EBITDA) involve outlays of cash. As a result, actual cash available to service our debt obligations will be different from EBITDA (and Adjusted EBITDA). Investors should rely primarily on our GAAP results and use non-GAAP financial measures only supplementally in making investment decisions.

Adjusted net income (loss) per share attributable to Tyson (Adjusted EPS) is presented as a supplementary measure of our financial performance that is not required by, or presented in accordance with, GAAP. We use Adjusted EPS as an internal performance measurement and as one criterion for evaluating our performance relative to that of our peers. We believe Adjusted EPS is meaningful to our investors to enhance their understanding of our financial performance and is frequently used by securities analysts, investors and other interested parties to compare our performance with the performance of other companies that report Adjusted EPS. Further, we believe that Adjusted EPS is a useful measure because it improves comparability of results of operations from period to period. Adjusted EPS should not be considered a substitute for net income (loss) per share attributable to Tyson or any other measure of financial performance reported in accordance with GAAP. Investors should rely primarily on our GAAP results and use non-GAAP financial measures only supplementally in making investment decisions. Our calculation of Adjusted EPS may not be comparable to similarly titled measures reported by other companies.

Adjusted operating income (loss) is presented as a supplementary measure of our operating performance that is not required by, or presented in accordance with, GAAP. We use adjusted operating income (loss) as an internal performance measurement and as one criterion for evaluating our performance relative to that of our peers. We believe adjusted operating income (loss) is meaningful to our investors to enhance their understanding of our operating performance and is frequently used by securities analysts, investors and other interested parties to compare our performance with the performance of other companies that report adjusted operating income (loss). Further, we believe that adjusted operating income (loss) is a useful measure because it improves comparability of results of operations from period to period. Adjusted operating income (loss) should not be considered as a substitute for operating income (loss) or any other measure of operating performance reported in accordance with GAAP. Investors should rely primarily on our GAAP results and use non-GAAP financial measures only supplementally in making investment decisions. Our calculation of adjusted operating income (loss) may not be comparable to similarly titled measures reported by other companies.

Forward-Looking Statements

Certain information in this release constitutes forward-looking statements as contemplated by the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include, but are not limited to, current views and estimates of our outlook for fiscal 2023, other future economic circumstances, industry conditions in domestic and international markets, our performance and financial results (e.g., debt levels, return on invested capital, value-added product growth, capital expenditures, tax rates, access to foreign markets and dividend policy). These forward-looking statements are subject to a number of factors and uncertainties that could cause our actual results and experiences to differ materially from anticipated results and expectations expressed in such forward-looking statements. We wish to caution readers not to place undue reliance on any forward-looking statements, which are expressly qualified in their entirety by this cautionary statement and speak only as of the date made. We undertake no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise. Among the factors that may cause actual results and experiences to differ from anticipated results and expectations expressed in such forward-looking statements are the following: (i) the COVID-19 pandemic and associated responses thereto have had an adverse impact on our business and operations, and the extent that the COVID-19 pandemic continues to impact us will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the COVID-19 related impacts on the market, including production delays, labor shortages and increases in costs and inflation; (ii) the effectiveness of our financial excellence programs; (iii) access to foreign markets together with foreign economic conditions, including currency fluctuations, import/export restrictions and foreign politics; (iv) cyberattacks, other cyber incidents, security breaches or other disruptions of our information technology systems; (v) risks associated with our failure to consummate favorable acquisition transactions or integrate certain acquisitions' operations; (vi) the Tyson Limited Partnership's ability to exercise significant control over the Company; (vii) fluctuations in the cost and availability of inputs and raw materials, such as live cattle, live swine, feed grains (including corn and soybean meal) and energy; (viii) market conditions for finished products, including competition from other global and domestic food processors, supply and pricing of competing products and alternative proteins and demand for alternative proteins; (ix) outbreak of a livestock disease (such as African swine fever (ASF), avian influenza (AI) or bovine spongiform encephalopathy (BSE)), which could have an adverse effect on livestock we own, the availability of livestock we purchase, consumer perception of certain protein products or our ability to conduct our operations; (x) changes in consumer preference and diets and our ability to identify and react to consumer trends; (xi) effectiveness of advertising and marketing programs; (xii) significant marketing plan changes by large customers or loss of one or more large customers; (xiii) our ability to leverage brand value propositions; (xiv) changes in availability and relative costs of labor and contract farmers and our ability to maintain good relationships with team members, labor unions, contract farmers and independent producers providing us livestock, including as a result of our plan to relocate certain corporate team members to our world headquarters in Springdale, Arkansas; (xv) issues related to food safety, including costs resulting from product recalls, regulatory compliance and any related claims or litigation; (xvi) the effect of climate change and any legal or regulatory response thereto; (xvii) compliance with and changes to regulations and laws (both domestic and foreign), including changes in accounting standards, tax laws, environmental laws, agricultural laws and occupational, health and safety laws; (xviii) adverse results from litigation; (xix) risks associated with leverage, including cost increases due to rising interest rates or changes in debt ratings or outlook; (xx) impairment in the carrying value of our goodwill or indefinite life intangible assets; (xxi) our participation in a multiemployer pension plan; (xxii) volatility in capital markets or interest rates; (xxiii) risks associated with our commodity purchasing activities; (xxiv) the effect of, or changes in, general economic conditions; (xxv) impacts on our operations caused by factors and forces beyond our control, such as natural disasters, fire, bioterrorism, pandemics, armed conflicts or extreme weather; (xxvi) failure to maximize or assert our intellectual property rights; (xxvii) effects related to changes in tax rates, valuation of deferred tax assets and liabilities, or tax laws and their interpretation; and (xxviii) the other risks and uncertainties detailed from time to time in our filings with the Securities and Exchange Commission, including those included under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our most recent Annual Report on Form 10-K and Quarterly reports on Form 10-Q.
