Meeting the \$10 Billion Asset Threshold Challenge

WELL-PREPARED TO CROSS \$10 BILLION AND HAVE OFFSET INCREMENTAL COSTS THROUGH ACQUISITIONS

Crossing \$10 Billion Asset Threshold

Seacoast estimates that the aggregate after-tax cost of crossing \$10 billion in 2023 will be ~\$7.6 million:

- ~\$4.5 million from the Durbin Amendment impact on Seacoast, impacting the second half of 2023
- ~\$1.1 million from the Durbin Amendment impact on Apollo and Drummond, impacting the second half of 2023
- ~\$2.0 million from higher FDIC expense and reduction of Federal Reserve dividend, impacting the full year 2023

Acquisitions of Sabal Palm Bank, Florida Business Bank, and Apollo Bank fully offset the EPS dilution expected from the impact of crossing \$10 billion in assets

- Yield on securities expanded 11 basis points to 1.68% and yield on non-PPP loans expanded six basis points to 4.24%.
- Cost of deposits remained flat at six basis points.
- Investment in commercial banking talent over the prior year supported disciplined organic loan growth of 7% on an annualized basis.
- Commercial loan originations increased 83% from the first quarter of 2021 to \$373 million. The late stage pipeline exiting the quarter is \$620 million, setting the stage for continued growth in the coming quarter.
- Continued strong asset quality trends, with nonperforming loans declining to 0.41% of total loans. \$5.1 million of provision build upon closing of two acquisitions.
- Strong deposit growth, with organic deposits increasing 25% on an annualized basis.
- Building long-term shareholder value through long-term growth in tangible book value per share, ending the period at \$17.12, an increase of 3% over the prior year. Excluding the decrease in fair value of AFS debt securities, tangible book value per share would have been \$18.19, or an increase of 9% year-over-year.
- Established market presence in Naples, Sarasota, and Jacksonville, and announced the upcoming acquisition of Apollo Bancshares, Inc., which brings five locations in Miami-Dade County. This expansion across some of the best banking markets in the United States will lead to strong franchise value creation in the coming years.
- Increased quarterly dividend from \$0.13 to \$0.17 given balance sheet strength and continued strong outlook for capital generation.

The acquisitions of Sabal Palm Bank and Florida Business Bank resulted in an initial provision for credit losses of \$5.1 million impacting the first quarter 2022.

The total allowance for credit losses of \$89.8 million as of March 31, 2022 represents management's estimate of lifetime expected credit losses. The remaining unrecognized discount on acquired loans of \$24.1 million will be earned as an adjustment to yield over the life of the loans. Additionally, a reserve for potential credit losses on lending-related commitments of \$2.4 million is reflected within Other Liabilities.

Long Term Growth in Shareholder Value

- The decline in tangible book value per share during the first quarter of 2022 was primarily attributed to the decrease in fair value of debt securities driven by the change in the rate environment. Excluding the decrease in fair value of debt securities, tangible book value per share would have been \$18.19, or an increase of 9% year-over-year.
- The decline in tangible book value per share during the first quarter of 2020 was primarily attributed to the Day-1 impact of the adoption of CECL.
- Initiated a quarterly cash dividend of \$0.13 in the second quarter of 2021. In the second quarter of 2022, the dividend increases to \$0.17 per share.

Explanation of Certain Unaudited Non-GAAP Financial Measures

This presentation contains financial information determined by methods other than Generally Accepted Accounting Principles ("GAAP"). The financial highlights provide reconciliations between GAAP and adjusted financial measures including net income, noninterest income, noninterest expense, tax adjustments and other financial ratios. Management uses these non-GAAP financial measures in its analysis of the Company's performance and believes these presentations provide useful supplemental information, and a clearer understanding of the Company's performance. The Company believes the non-GAAP measures enhance investors' understanding of the Company's business and performance and if not provided would be requested by the investor community.

These measures are also useful in understanding performance trends and facilitate comparisons with the performance of other financial institutions. The limitations associated with operating measures are the risk that persons might disagree as to the appropriateness of items comprising these measures and that different companies might define or calculate these measures differently. The Company provides reconciliations between GAAP and these non-GAAP measures. These disclosures should not be considered an alternative to GAAP.
