Forward Looking Statements

This presentation contains forward-looking statements based on current expectations, including statements regarding our earnings guidance and financial outlook and goals. These forward-looking statements are often identified by words such as "estimate," "predict," "may," "believe," "plan," "expect," "require," "intend," "assume," "project," "anticipate," "goal," "seek," "strategy," "likely," "should," "will," "could," and similar words. Because actual results may differ materially from expectations, we caution you not to place undue reliance on these statements. A number of factors could cause future results to differ materially from historical results, or from outcomes currently expected or sought by Pinnacle West or APS. These factors include, but are not limited to: our ability to achieve timely and adequate rate recovery of our costs through our regulated rates and adjutor recovery mechanisms, including returns on and of debt and equity capital investment; the impacts of federal, state, and local laws, judicial decisions, statutes, regulations, and FERC, NRC, EPA, ACC, and other agency requirements, including as they are changed by legislative and regulatory action as well as executive orders, such as those relating to tax, environment, energy, nuclear plants, and deregulation of the retail electric market; our operation of Palo Verde is subject to substantial regulatory oversight and potentially significant liabilities and capital expenditures; we are subject to numerous environmental laws and changes to existing laws, or new laws, may increase our costs and impact our business; the potential effects of climate change on our electric system, including as a result of weather extremes, such as prolonged drought and high temperature variations in the area where APS conducts its business, as well as the impacts of policy and regulatory changes introduced to address climate change; co-owners of our jointly owned generation and transmission facilities may have unaligned goals; the willingness or ability of counterparties, participants, and landowners to meet contractual or other obligations or extend the rights for continued generation and transmission operations; deregulation of the electric industry and other factors, such as large customers developing large, utility scale generation to serve their energy needs, may result in increased competition; variations in demand for electricity, including those due to weather, seasonality (including large increases in ambient temperatures), the general economy or social conditions, customer and sales growth (or decline), data center growth (or lack thereof), including to support the AI industry, the effects of energy conservation measures and DG, and technological advancements; wildfires, including those arising as a result of climate change, extreme weather events, or the expansion of the wildland urban interface; generation, transmission, and distribution facilities and system operating costs, conditions, performance, and outages; our ability and efforts to meet current and anticipated future needs for generation and transmission and distribution facilities in our region at reliable levels, including factors affecting our ability to acquire and develop new resources to serve this load as well as difficulties in accurately forecasting load growth, particularly from high load energy users; availability of fuel and water supplies as well as the volatility and costs of fuel and purchased power; the direct or indirect effect on our facilities or business from cybersecurity threats or intrusions, data security breaches, terrorist attack, physical attack, severe storms, or other catastrophic events, such as fires, explosions, pandemic health events, or similar occurrences; risks inherent in the operation of nuclear facilities, including spent fuel disposal uncertainty; the development of new technologies and the impact they have on the retail and wholesale electricity market and the impacts of our adoption or failure to adopt such technologies; the availability and retention of qualified personnel and the need to negotiate collective bargaining agreements with union employees; the cost of debt, including increased cost as a result of rising interest rates, and equity capital and our ability to access capital markets when required as well as the impacts a credit rating downgrade would have on us; the investment performance of the assets of our nuclear decommissioning trust, captive insurance cell, coal mine reclamation escrow, pension, and other postretirement benefit plans, and the resulting impact on future funding requirements; Pinnacle West's cash flow depends on the performance of APS and its ability to make dividends and distributions; potential shortfalls in insurance coverage; Pinnacle West's ability to meet its debt service obligation could be adversely affected because its debt securities are structurally subordinated to the debt securities and obligations of its subsidiaries; the liquidity of wholesale power markets and the use of derivative contracts in our business; policy changes in Arizona or other states through ballot initiatives or referenda may increase our cost or operations or affect our business plans; general economic conditions, such as tariffs, inflation, and other supply chain constraints, as well as uncertainties associated with the current and future economic environment and conditions in Arizona; and disruptions in financial markets could adversely affect our cost of and access to credit and capital markets. These and other factors are discussed in the most recent Pinnacle West/APS Form 10-K and Form 10Q along with other public filings with the Securities and Exchange Commission, which you should review carefully before placing any reliance on our financial statements, disclosures or earnings outlook. Neither Pinnacle West nor APS assumes any obligation to update these statements, even if our internal estimates change, except as required by law.

In this presentation, references to net income and earnings per share (EPS) refer to amounts attributable to common shareholders.

PINNACLE WEST
CAPITAL CORPORATION

We have an improved regulatory environment

Improvements at the Arizona Corporation Commission

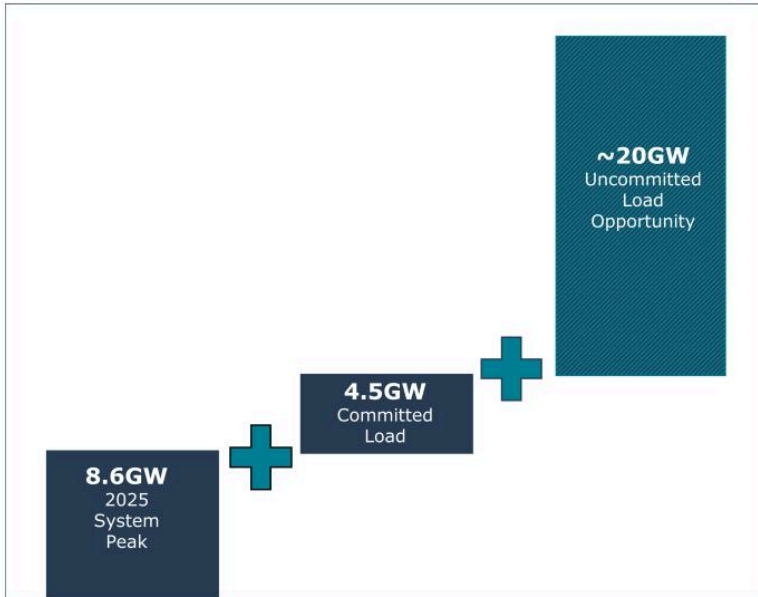

- Balanced, constructive and more consistent outcomes, including improved ROE to APS
- Approval of Formula Rate Policy Statement
- Reaffirmation of Rate Case Settlement Policy
- Continued support of adjustor mechanisms to improve cost recovery

Commitments by the Company

- Sustain investment in customer experience improvements
- Continue to find alignment with regulators and work with stakeholders on common issues
- Advocate for reduced regulatory lag
- Focus on customer affordability

Significant investment opportunity to serve increased demand

There is significant additional load we need to be ready to serve

Which is requiring us to invest

New gas generation:

- Announced new gas generation build of up to 2 GWs
- Anchor shipper on new gas pipeline, expected to be in service by late 2029

Palo Verde generating station:

- Approximately \$200 million incremental investment made during Q3 2025 on buyout option for nearly 100 MW of nuclear capacity previously under sale-leaseback
- Increased investment in Palo Verde capital program of ~\$500M over the next 10 years
- Filed intent to renew operating licenses through mid-2060s with Nuclear Regulatory Commission

Strategic transmission:

- Several major transmission investments to support new resources and the overall system buildout
- Additional investment in large transmission projects to enable access to out of state generation and additional markets

Transmission expansion could drive significant capital investment

Cumulative Transmission CapEx

\$6 billion + of investment

Major Transmission Projects in Development		
Project	Miles/kV	Est. in-service
Helios to Milligan	~23 mi/230kV	2027
Pinnacle Peak to Ocotillo	~50 mi/230kV	2030
Cotton Transmission Corridor: Panda to Freedom Lines #2 & #1 Jojoba to Rudd	~80 mi/230kV ~29 mi/500kV	2030/2031 2031
Proposed Transmission for New Gas	TBD	2030

- ### Transmission Investment Strategy
- Investments in Extra High Voltage (EHV) transmission to support reliability, resiliency, and integration of new resources
 - Over 600 miles of 345kV and above and over 300 miles of 230kV lines in planning period
 - Investments in large transmission projects to enable access to out of state generation and additional markets
 - Constructive and timely recovery through annual FERC Formula rate with wheeling revenue benefiting retail customers

Maintaining Affordability

- **Disciplined cost management:** Process improvements and preventative maintenance to reduce operating costs
- **Customer growth:** Long-term goal of declining O&M per MWh as service territory grows
- **Customer Programs:** Innovative customer programs to help customers save energy and money
- **Balanced long-term capital plan:** Infrastructure investments designed to maintain reliability yet minimize annual customer impact
- **Stakeholder engagement:** Working with partners to ensure reliability, affordability, and recovery through appropriate rate design

Future Financial Outlook

PINNACLE WEST
CAPITAL CORPORATION

Our investor goals going forward

1. Long-term EPS growth of 5%-7% off original 2024 midpoint, supporting competitive total shareholder return
2. Optimized capital plan to reliably serve growing service territory, driving strong rate base growth
3. Managing a healthy capital structure with accretive equity to support investment
4. Declining O&M per MWh with focus on customer affordability
5. Competitive shareholder dividend
6. Solid balance sheet and credit ratings

EPS Growth off original 2024 midpoint¹

¹ Long-term EPS growth target based on the Company's current weather normalized compound annual growth rate projections from 2024-2028.

Potential drivers for more consistent and timely cost recovery

- Reduction of regulatory lag including formula rates
- Rate case cadence and potential settlement of future rate cases
- Continued support of adjustor mechanisms
- Continued economic development driving sales and customer growth
- Continued cost management

Capital plan to support reliability and continued growth within our service territory
