

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 8-K

CURRENT REPORT

Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported) October 10, 2023

Public Service Enterprise Group Incorporated

(Exact name of registrant as specified in its charter)

New Jersey
(State or other jurisdiction of
incorporation)

001-09120
(Commission File Number)

22-2625848
(I.R.S. Employer
Identification Number)

80 Park Plaza
Newark, New Jersey 07102
(Address of principal executive offices) (Zip Code)
973 430-7000
(Registrant's telephone number, including area code)

Public Service Electric and Gas Company

(Exact name of registrant as specified in its charter)

New Jersey
(State or other jurisdiction of
incorporation)

001-00973
(Commission File Number)

22-1212800
(I.R.S. Employer
Identification Number)

80 Park Plaza
Newark, New Jersey 07102
(Address of principal executive offices) (Zip Code)
973 430-7000
(Registrant's telephone number, including area code)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol(s)	Name of Each Exchange On Which Registered
Public Service Enterprise Group Incorporated Common Stock without par value	PEG	New York Stock Exchange
Public Service Electric and Gas Company 8.00% First and Refunding Mortgage Bonds, due 2037	PEG37D	New York Stock Exchange
5.00% First and Refunding Mortgage Bonds, due 2037	PEG37J	New York Stock Exchange

Indicate by check mark whether any of the registrants is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if such registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

The information contained in Item 7.01 Regulation FD Disclosure in this combined Form 8-K is separately furnished, as noted, by Public Service Enterprise Group Incorporated (PSEG) and Public Service Electric and Gas Company (PSE&G). Information contained herein relating to any individual company is provided by such company on its own behalf and in connection with its respective Form 8-K. PSE&G makes representations only as to itself and makes no other representations whatsoever as to any other company.

Item 7.01 Regulation FD Disclosure

PSEG and PSE&G

On October 10 and 11, 2023, PSEG is scheduled to participate in a series of investor meetings. A copy of the discussion materials being used at these meetings is furnished as Exhibit 99 to this Form 8-K.

Item 9.01 Financial Statements and Exhibits

Exhibit 104 Cover Page Interactive Data File (embedded within the Inline XBRL document).

PSEG Investor Update

*Leading toward a
sustainable future*

October 2023

EXHIBIT 99

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- any inability to successfully develop, obtain regulatory approval for, or construct transmission and distribution, and our nuclear generation projects;
- the physical, financial and transition risks related to climate change, including risks relating to potentially increased legislative and regulatory burdens, changing customer preferences and lawsuits;
- any equipment failures, accidents, critical operating technology or business system failures, severe weather events, acts of war, terrorism or other acts of violence, sabotage, physical attacks or security breaches, cyberattacks or other incidents that may impact our ability to provide safe and reliable service to our customers;
- any inability to recover the carrying amount of our long-lived assets;
- disruptions or cost increases in our supply chain, including labor shortages;
- any inability to maintain sufficient liquidity or access sufficient capital on commercially reasonable terms;
- the impact of cybersecurity attacks or intrusions or other disruptions to our information technology, operational or other systems;
- a material shift away from natural gas toward increased electrification and a reduction in the use of natural gas;
- failure to attract and retain a qualified workforce;
- inflation, including increases in the costs of equipment, materials, fuel and labor;
- the impact of our covenants in our debt instruments and credit agreements on our business;
- adverse performance of our defined benefit plan trust funds and Nuclear Decommissioning Trust Fund and increases in funding requirements and pension costs;
- fluctuations in, or third party default risk in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;

- our ability to obtain adequate nuclear fuel supply;
- changes in technology related to energy generation, distribution and consumption and changes in customer usage patterns;
- third-party credit risk relating to and purchase of nuclear fuel;
- any inability to meet our commitments under forward sale obligations and Regional Transmission Organization rules;
- reliance on transmission facilities to maintain adequate transmission capacity for our nuclear generation fleet;
- the impact of changes in state and federal legislation and regulations on our business, including PSEG's ability to recover costs and earn returns on authorized investments;
- PSEG's proposed investment programs may not be fully approved by regulators and its capital investment may be lower than planned;
- our ability to advocate for and our receipt of appropriate regulatory guidance to ensure long-term support for our nuclear fleet;
- adverse changes in and non-compliance with energy industry laws, policies, regulations and standards, including market structures and transmission planning and transmission returns;
- risks associated with our ownership and operation of nuclear facilities, including increased nuclear fuel storage costs, regulatory risks, such as compliance with the Atomic Energy Act and trade control, environmental and other regulations, as well as financial, environmental and health and safety risks;
- changes in federal and state environmental laws and regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits and siting approvals; and
- changes in tax laws and regulations.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income/(Loss) reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income/(Loss). Non-GAAP Operating Earnings exclude the impact of gains (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of non-GAAP Operating Earnings is intended to complement, and should not be considered an alternative to, the presentation of Net Income/(Loss), which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings as presented in this release may not be comparable to similarly titled measures used by other companies.

PSEG also includes forward-looking estimates of non-GAAP Operating Earnings, non-GAAP Earnings Before Interest, Tax, Depreciation and Amortization (EBITDA) and non-GAAP Funds From Operations (FFO), including the non-GAAP ratio FFO/Debt, in this

presentation. Non-GAAP EBITDA excludes the same items as our non-GAAP Operating Earnings measure, as well as income tax expense (except for production tax credits (PTCs)), interest expense and depreciation and amortization. Non-GAAP FFO reflects cash from operations excluding working capital and adjusts for certain items including taxes on asset sales, cost of removal and energy efficiency investments. Non-GAAP Debt consists of long-term debt, short-term debt and other imputed debt primarily related to an unfunded pension obligation. Non-GAAP EBITDA and non-GAAP FFO, as referenced in this presentation, may not be comparable to similarly titled measures used by other companies. Given the forward-looking nature of non-GAAP Operating Earnings, non-GAAP Adjusted EBITDA and non-GAAP FFO estimates and our inability to project certain reconciling items that would be excluded from the most directly comparable GAAP measures – such as MTM and NDT gains (losses), with respect non-GAAP Operating Earnings and non-GAAP EBITDA; working capital (including accounts receivable/payable, cash collateral), adjustments to Net Income (including changes in regulatory assets/liabilities, deferred taxes) with respect to non-GAAP FFO and non-GAAP debt and imputed debt (including unfunded pension obligation) with respect to non-GAAP debt - due to the volatility, complexity and low visibility of these items, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. These items are uncertain, depend on various factors, and may have a material impact on our future GAAP results. Guidance included herein is as of August 1, 2023.

From time to time, PSEG and PSE&G release important information via postings on their corporate Investor Relations website at <https://investor.pseg.com>. Investors and other interested parties are encouraged to visit the Investor Relations website to review new postings. PSEG 2023: Increased Strategic Clarity

* PSEG Power & Other includes PSEG Nuclear, Gas Operations, PSEG Long Island, Offshore wind lease area and potential transmission investments, potential Hydrogen investments, Parent and other.

PSEG's Powering Progress Vision: Powering a future where people use less energy, and it's cleaner, safer and delivered more reliably than ever

- **Operational Excellence:** Best-in-class utility and strong nuclear performance
- **Financial Strength:** Solid balance sheet to fund our growth objectives
 - No new equity required to support 5-year capital plan
 - Solid investment grade ratings supported by credit metrics that allow for incremental investment
 - PTC provides long-term certainty and downside price protection for Nuclear
 - Cost control supports customer affordability with one of the lowest gas bills and below average electric bills vs. regional peers
- **Disciplined Investment:** >90% of capital allocation to PSE&G, aligned with clean energy policies
 - Investments to modernize utility infrastructure – Energy Strong, “Last Mile” reliability, GSMP
 - Investments to support decarbonization – Energy Efficiency, EV, AMI, Solar and other

...which produces a strong business mix and platform for predictable growth

***PSEG Financial Outlook:* More Predictability from an Improved Business Profile**

Well Positioned for the Future

Exited Merchant Fossil Generation	<ul style="list-style-type: none"> ✓ Eliminates market price volatility on earnings, proceeds used to pay down debt, return capital to shareholders
Exited Offshore Wind Generation	<ul style="list-style-type: none"> ✓ Completed sale of 25% equity stake in Ocean Wind 1, recouping full investment ✓ Evaluating options to monetize our 50% stake in Garden State Offshore Energy acreage
Decision to Retain Nuclear Assets	<ul style="list-style-type: none"> ✓ PTC provides downside price protection through 2032 ✓ Enhances PSEG Power & Other cash flow visibility and predictability
Progress on Reducing Pension Variability	<ul style="list-style-type: none"> ✓ BPU pension accounting order helps reduce volatility in PSE&G earnings ✓ Recent "lift-out" of ~\$1 billion of PSEG Power & Other pension obligations
PSE&G Transmission Formula Rate	<ul style="list-style-type: none"> ✓ Provides timely recovery of capital investments
PSE&G Conservation Incentive Program	<ul style="list-style-type: none"> ✓ Decoupling of volumes from revenues supportive of widespread adoption of EE investments
PSE&G's Robust Capital Program	<ul style="list-style-type: none"> ✓ Long-term visibility from infrastructure replacement and support of NJ's decarbonization efforts
PSEG Financial Strength	<ul style="list-style-type: none"> ✓ Solid balance sheet enables funding of 5-year capital investment program without new equity
PSEG Compelling Risk-Adjusted Return Opportunity	<ul style="list-style-type: none"> ✓ Continued opportunity for consistent and sustainable dividend growth ✓ Supports our long-term earnings growth outlook of 5%-7% through 2027

PSEG 2023: Growth Opportunities Aligned with Clean Energy Policies

Significant events (i.e., the Northeast Blackout of 2003 and Superstorm Sandy) have driven policy changes and led to investment opportunities

Future investment will address growing demand for electrification and need for an even more reliable grid, all aligned with New Jersey and federal energy policies

Key State Policies

- BPU recently issued 2nd triennial Energy Efficiency framework
- Recent NJ Executive Orders Advance 100% Clean Energy by 2035, Prioritizes Electrification of Building Sector, and Initiates Stakeholder Proceeding on Future of Natural Gas Utilities
- BPU Order for Energy Efficiency Adoption (2020)
- NJ Energy Master Plan (2020)
- NJ Clean Energy Act (2018)
- NJ Zero Emissions Certificate Law (2018)

Key Federal Policies

- Inflation Reduction Act (2022)
- Infrastructure Investment and Jobs Act (2021)
- PIPES Act (2020) Supports Replacement of Aged Gas Pipeline Infrastructure

PSEG Opportunities

- "Last Mile" distribution system investments increase reliability and prepare for electrification
- GSMP targets methane leaks and infrastructure replacement
- EE programs reduce usage, emissions and customer bills
- EV programs address the #1 source of emissions in NJ
- PTC helps preserve NJ nuclear units; offers opportunities to invest in uprates, fuel-cycle extension and license extension; incremental opportunities in hydrogen and non-fossil fuel delivery
- Investment upside from NJ Governor's Executive Orders

PSEG 2023: Key Assets and Leadership

PSE&G – Best-in-Class Regulated Electric & Gas T&D Utility

- Top decile safety performance
- Most Reliable Electric Utility in Mid-Atlantic Metropolitan Service Area for 21 consecutive years
- #1 in Customer Satisfaction with both Residential Electric and Natural Gas Service in the East among Large Utilities by J.D. Power in 2022*
- Robust pipeline of regulated investment opportunities
- Affordability through below average residential electric bills in the region and among the lowest residential gas customer bills in region
- EEI Edison Award for our industry-leading efforts to protect New Jersey communities and customers from extreme weather conditions
- Award-winning Solar, Energy Efficiency, and EV programs

PSEG Power & Other

- Solid nuclear operations with exemplary ratings on all units, gas operations benefiting PSE&G customers, and PSEG Long Island
- Nuclear fleet consisting of 3,766 MW carbon-free, base load assets with a PTC stabilized revenue stream and opportunities for low-cost uprates and other enhancements
- Supporting revenues from Gas Operations, PSEG Long Island, and other investments offset Parent interest

PSEG's Workforce of 12,500 Engaged Associates Led by an Experienced Management Team with Continuity

- CEO, CFO, GC, Presidents of PSE&G and PSEG Nuclear have an average of > 25 years of service with PSEG in a variety of roles
- Strong union partnerships with our six unions and the ~7,700 employees they represent:
 - Recently reached new four-year labor agreements with all of our unions representing employees in New Jersey
 - Negotiating PSEG Long Island labor agreement in advance of Q4 2023 contract expiration

* PSE&G Company received the highest score in the East Large segment of the J.D. Power 2022 U.S. Electric Utility Residential Customer Satisfaction Study of customers' satisfaction with electric utility residential services and the J.D. Power 2022 U.S. Gas Utility Residential Customer Satisfaction Study of customers' satisfaction nationally among gas residential customers. Visit [jdpower.com/awards](https://www.jdpower.com/awards) for more details.

PSEG 2023: Financial Strength to Achieve Strategic Plan

Long-Term Growth Outlook of 5%-7% for 2023-2027

- Primary contributor is PSE&G's 5%-7% Net Income growth rate over this 5-year period
- Nuclear revenues at PTC threshold level offer stability that supports long-term growth outlook
- Addresses cost updates to pension, interest and inflation

Robust Utility Capital Investment Plan of \$15.5B-\$18B for 2023-2027

- Continuation of current investments focused on system modernization, "Last Mile" reliability and clean energy programs
- Long runway of system infrastructure investments, decarbonization and electrification opportunities

Solid Balance Sheet

- Supports 5-year capital plan with no new equity or required asset sales, and potential for incremental investments
- Solid investment grade credit ratings with improved business mix

2023 Indicative Shareholder Dividend Increased by 5.6% over 2022*

- Opportunity for consistent, sustainable growth

Compelling Growth Profile of PSE&G, Complemented by PSEG Power & Other's Nuclear PTC Enhanced Outlook

*All future decisions and declarations regarding dividends on the common stock are subject to approval by the Board of Directors.

PSEG Provides Compelling Value for Our Customers

We continuously target top quartile performance to deliver better service, at lower cost

- Delivering Highest Customer Reliability at Lowest Cost: Achieving low SAIDI outage scores with Lowest Distribution O&M spend
- Lowest Cost, but More Leaks/Mile than Peers: Age of cast iron system drives need for GSMP program

- Achieving Highest Customer Satisfaction at Lowest Cost: For Overall Residential Customer Satisfaction
- Lowest A&G Cost/Customer vs. Peers

* Peers and Overall Residential Customer Satisfaction from the East Large segment of the J.D. Power 2022 U.S. Electric Utility Residential Customer Satisfaction Study of customers' satisfaction with electric utility residential services and the J.D. Power 2022 U.S. Gas Utility Residential Customer Satisfaction of customers' satisfaction with natural gas residential services. Excludes PSEG Long Island for Electric and Eversource Energy and National Grid for Gas.

Electric Peers subset of SNL Energy Electric and Diversified Utilities with > 500,000 customers operating in CT, DE, MD, NY, NJ or PA
Gas Peers LDCs operating in CT, MD, NJ, NY or PA with > 500,000 customers

Note: Data and analytics for O&M and A&G Cost provided by S&P Global Market Intelligence. Leaks/Mile from PHMSA annual data. Data from 2022.

PSEG Provides a Compelling Value for Our Communities

Substantial investment in NJ economy

Continued growth in spending with diverse businesses

Corporate Citizenship & Economic Development

- Recognized as One of America's Most Responsible Companies (*Newsweek 2023*)
- Choose NJ – Chair of leading NJ economic development group
- Clean Energy Jobs Program – Ahead of schedule with more than 2,300 hires ⁽¹⁾ with a focus on diversity, equity and inclusion, in collaboration with NJ's Council on the Green Economy
- PSEG's Corporate Citizenship priorities of environmental sustainability, social justice and equity focus on creating a positive impact on the communities we serve
- With over \$10M funded annually, the PSEG Foundation and Corporate Social Responsibility support a framework of social value through strategic partnerships and activities, charitable giving as well as in-kind donations, and a robust employee-giving program
- Over 6,000 employees volunteered over 30,000 hours with hundreds of local organizations in 2022, including >80% of executives serving on boards of 59 non-profit organizations
- Offshore Wind Port – Provided land as well as development and permitting support

(1) As of June 30, 2023

PSEG Provides a Compelling Value for the Environment

Environmental Targets

- Carbon-free generation and net-zero for operations (Scope 1 and 2 emissions) by 2030
- Methane emissions – 22% reduction from 2018 through GSMP
- Energy Efficiency – PSE&G on path to achieve EE savings targets established by the BPU
- Electrifying transportation – Clean Energy Future–EV and the IAP focus on make-ready investments; targeting PSE&G fleet transition to electric by 2030
- PSEG has made a submission to the Science Based Targets initiative encompassing Scopes 1, 2 and 3 emissions; our submission is under review as part of SBTi's validation process

 **Half** of our 5-year capital spending plans address greenhouse gas emission reductions, climate and storm adaptation, preparing the grid for clean energy transition and electrifying transportation

Dow Jones Sustainability North America Index – 15th year in a row

Carbon-Free Generation

- Preserved New Jersey's carbon-free, base load nuclear generation resource
- Retired coal generation
- Sold PSEG Fossil generating assets including Kalaeloa

PSEG Sustainability and ESG Summary

PSEG Leadership

- PSE&G's Clean Energy Future programs approved to invest \$2B to decarbonize the NJ economy via Energy Efficiency, EV infrastructure, and AMI
- Accelerated PSEG's climate vision for Net Zero GHG emissions to 2030 for scopes 1 & 2
- PSEG has made a submission to the Science Based Targets initiative
- PSEG generating fleet is a Top 10 U.S. producer of carbon-free energy and is coal-free
- ~\$1B of regulated solar investments
- PSE&G has issued \$1.4 billion of Green Bonds and PSEG sub-limit of master credit facility includes sustainability-linked pricing mechanism
- [Link to PSEG Sustainability and ESG Disclosures including Reports and Sustainable Financing Framework*](#)

Policies & Goals

- PSEG is a vocal advocate for an economy-wide price on carbon and preservation of our existing carbon-free nuclear generating fleet
- Committed to rigorous oversight of political contributions and transparency in disclosure
- PSEG oversight of sustainability and climate initiatives by Board of Directors' Governance, Nominating and Sustainability Committee
- Human Rights Policy
- LGBTQ+ Inclusion Pledge
- PSEG's ESG goals and business strategy are aligned with many of the U.N.'s SDGs

Recognition & Memberships

- Named to Forbes List for America's Best Employers for Diversity for 2023
- Named to JUST Capital's 2023 list of America's 100 Most JUST Companies
- MSCI has assigned PSEG its highest corporate ESG rating of AAA
- PSE&G was recognized with the PA Consulting ReliabilityOne® Award for Outstanding Reliability Performance in the Mid-Atlantic Metropolitan Service Area for the 21st consecutive year
- Named to the Dow Jones Sustainability North America Index for 15 years in a row

**These reports and disclosures should not be deemed incorporated into or part of these slides. Scope 1 are direct emissions from power generation, vehicle fleets and methane, SF₆ and refrigerant leaks; Scope 2 are indirect emissions from operations from purchased energy of electric and gas and line losses; Scope 3 are indirect emissions from our value chain.*

PSEG Provides a Compelling Value for Our Investors

Investment Proposition	Return Opportunity
EPS Growth Rate Outlook 2023E-2027E	5% – 7%
Dividend Yield	3% – 4%
Total Potential Shareholder Return	8% – 11%

Opportunity for Multiple Expansion to Further Enhance Return Opportunity

We intend to continue improving our relative valuation through a better business mix and visible earnings growth:

- Regulated investment opportunities in decarbonization of NJ economy and electrification of transportation and buildings
- Broader opportunities in transmission due to recent DOE study and PJM fast track proceeding
- Unique asset class of carbon-free baseload nuclear fleet with PTC stabilized price beginning in 2024
- De-risked long-term growth outlook from visible, LT investments

Public Service Electric & Gas

PSE&G – A Single State, Dual Jurisdiction Utility

- Electric and Gas Distribution
- Utility Provider of Energy Efficiency and Renewable Energy Programs
- Electric Transmission
- Appliance Service Provider

As of YE 2022	Electric	Gas
Total Customers	2.3 Million	1.9 Million
5-YR Annual Growth*	0.9%	0.7%
Total Sales	40,816 GWh	2,567M Therms**
Sales Mix		
Residential	34%	59%
Commercial	57%	37%
Industrial	9%	4%

*Annual customer growth uses 2017 as base year.

**Gas Firm sales only.

*** Excludes CWIP. Year-end CWIP 2022 balance was ~\$1.3B.

Top-Tier Safety and Reliability Performance Metrics Driven by Nonstop Focus on Continuous Improvement

Top decile performance in OSHA recordable incidence

Sustained top decile performance in electric reliability results

Open year-end gas leaks reduced by 57% from 2017

■ Top Decile
 ■ 1st Quartile
 ■ 2nd Quartile
 ■ 3rd Quartile
 ● PSE&G

Open Leaks, OSHA and SAIDI compared to their respective national panels.

PSE&G's Residential Electric bills are lower than regional average and Residential Gas bills are among the lowest in the region

Based upon a calculation of monthly bills for an electric customer using 500 kilowatt-hours and a gas customer using 100 therms using rates as of June 1, 2023. Rates sourced from public company documents.

PSE&G Combined Bills Under 3% of Median NJ Income, Favorable “Share of Wallet” vs. Lower-Cost Regions

Affordability of the combined bill has improved by ~40% since 2009 for median and low-income customers

NJ 2022 electric residential rate year-over-year increase is 4th lowest among 50 states and Washington, D.C. ⁽²⁾

Recent changes to low-income support programs (LIHEAP, USF and Lifeline) have increased customer eligibility

(1) Based on a typical residential electric customer using 740 kilowatt-hours per summer month and 6,920 kilowatt-hours on an annual basis using rates as of June 1 for each year and a typical residential gas heating customer using 172 therms per winter month and 1,040 therms on an annual basis using rates as of January 1 of each year, February 1 for 2023.

(2) Source: Data provided by S&P Global Market Intelligence.

Notes: NJ Median income source: <https://fred.stlouisfed.org/series/MEHOINUSNJAG646N>. 2022E and 2023E are not available, therefore assume 3% annual increase per year over 2021. Income level of USF, the lowest threshold of the three low-income programs, is 175% of the Federal Poverty Line. Assumes the customer also qualifies for LIHEAP and Lifeline. 2022 results were adjusted to normal levels of customer assistance, which was elevated in 2022 due to funds received through the American Recovery Plan.

PSE&G's 5-Year Capital Investment Plan of \$15.5B-\$18B is Driven by System Modernization and NJ's Decarbonization and Energy Policy Goals

Includes AFUDC. CEF-EC/AMI is included in Electric LDC.

*The low end of the range includes extensions of GSMP and CEF-EE at current annual spending levels plus inflation. The hashed portion of the chart represents incremental investment that may occur for programs related to gas and electric modernization, energy efficiency, energy storage, electric vehicles and solar.

PSE&G's 10-Year Capital Plan Focuses on System Modernization, Climate Mitigation and Adaptation

PSE&G's Capital Spending Program
2023E-2032E
Range \$34B-\$40B

Investment in the 10-year Period Primarily Driven by:

- **Transmission:** 69kV upgrades to support future electrification
- **Electric Distribution:** System modernization and upgrades to replace "Last Mile", aging station equipment, and support for electrification
- **Gas Distribution:** Complete replacement of aged cast iron and unprotected steel mains and services by 2032, reducing methane leaks and completing system modernization
- **Clean Energy:** Programs to meet NJ clean energy targets and help customers save money

*Supporting state energy policy focusing on electrification of transportation and buildings offers **additional investment opportunity***

Includes AFUDC. CEF-EC/AMI is included in Electric LDC.
Note: The low end of the range includes extensions of GSMP and CEF-EE at current annual spending levels plus inflation. The hashed portion of the chart represents incremental investment that may occur for programs related to gas and electric modernization, energy efficiency, energy storage, electric vehicles and solar.

Transmission Investment Is Focused on 69kV Upgrades to Support Future Electrification Efforts

- Transitioning from large end-of-life projects to 69kV conversion/expansion and new stations to improve reliability, address aging system and load growth including future electrification efforts
- Lifecycle investments focused on overhead conductor and pipe cable replacements and upgrades
- Generation topology changes due to retiring plants and interconnections/upgrades for OSW transmission and other renewables
- Broader opportunities in transmission due to recent DOE study and PJM fast track proceeding
- Annual formula rate incorporates forward test year, eliminates investment and cost recovery lag, which provides predictable earnings growth

Electric Distribution Investment Is Focused on System Modernization Providing Long Runway of Investment Opportunities and Maintains Our Best-in-Class Reliability

We will build on the success of programs like Energy Strong and Infrastructure Advancement Program to meet current and future needs of our customers, including investments for:

- **“Last Mile”** – Modernize circuits via targeted replacement of a myriad of asset types to support reliability, hardening and future electrification
- **Station Upgrades** – Modernize or eliminate aging electric distribution substations and switchgear to support EV/DER growth and address expanded security requirements

- **Community Needs** – Expertise in tailoring station design to harmonize with our communities
- **Technology** – AMI, new enhanced capacitor banks and other technology to enable capabilities for remote monitoring and system control to support EV/DER integration, urban networks and cost reductions

Gas Distribution Investment Is Focused on Infrastructure Replacement Accelerating Emission Reduction Benefits

Pending NJBPU review and potential approval on October 11th:

- GSMP II extension proposed settlement,
 - ~\$900 million, 2-year extension (January 2024 – December 2025)
 - ~\$750 million accelerated clause-based recovery and \$150 million stipulated base
 - Replacement of a minimum of 400 miles of main
 - Sustains the thousands of jobs and skilled workforce created under GSMP II
- GSMP III filing, including RNG and Hydrogen projects:
 - Held in abeyance; parties to reconvene by no later than January 31, 2025
 - If approved, would commence in January 2026

PSE&G's Award-Winning Clean Energy Future Programs Are Delivering Benefits to Customers, and Rate Base Growth

ENERGY EFFICIENCY BPU approved ~\$1.3B investment since September 2020 Programs for Residential and C&I Customers including low-income, multi-family, small business and local government	ENERGY CLOUD "AMI" BPU approved \$707M investment* in January 2021 "Smart meters," new software and product solutions to improve PSE&G processes and better manage the electric grid	ELECTRIC VEHICLES BPU approved \$166M investment in January 2021 Residential Smart Charging, Level 2 Mixed-Use Charging, and Public DC Fast Charging (Make-Ready)
<ul style="list-style-type: none"> Program on target including nine-month extension through June 2024 of \$280 million (\$320 million requested), increasing run rate, BPU issued EE framework for second triennial program that will be basis for Q4 2023 filing Has won 27 awards, including two for creating clean energy jobs in NJ 	<ul style="list-style-type: none"> Program on target, ~1 million meters in service to date ⁽¹⁾ and full deployment on schedule for ~ year-end 2024 Foundation for better customer service by providing customers granular usage information, automated reconnections and faster outage detection 	<ul style="list-style-type: none"> Program on target, enrollment increasing quickly due to education, outreach and supply chain improvements with 8,850 chargers in the application queue and 6,200 chargers energized to date ⁽¹⁾ Won Plug-In America Utility Award, and in 2022 and EVgo Charging Hero award in 2023 BPU to address Medium and Heavy-Duty EVs in conjunction with ongoing stakeholder process

PSE&G's Clean Energy Jobs Program has supported more than 2,300 unemployed and underemployed people from low-to-moderate income areas secure clean energy careers⁽¹⁾

⁽¹⁾ As of June 30, 2023

Incremental to PSE&G's 10-Year Plan Are Opportunities Linked to New Jersey's Accelerated Electrification Goals

Governor Murphy's February 2023 Executive Orders

- **100% clean energy by 2035**
- **Electrifying transportation** – No internal combustion engine vehicles sold after 2035 and increased incentives for Medium and Heavy-Duty EV adoption
- **Building electrification** – 400,000 homes and 20,000 commercial properties and 10% of low-to-moderate income properties by 2030
- **Initiated 18-month stakeholder process** to achieve 2021 reduced gas emission goal by 2030

Incremental investments to support NJ's increasing targets to decarbonize the economy

- **Incremental clean energy investments** (Solar, EE, EV, Battery storage)
- **Enhanced "Last Mile" reliability** work to support accelerated EV adoption and electrification
- **Supports accelerated replacement of aging gas mains** prone to leaks and breaks
- **Potential investments for low carbon fuels** to integrate into gas distribution system

... representing a \$3B-\$7B incremental investment opportunity through 2032

PSE&G's Rate Base Growth Delivers Improved Reliability, Enhanced Resiliency, Increased Customer Satisfaction, and Lower Emissions

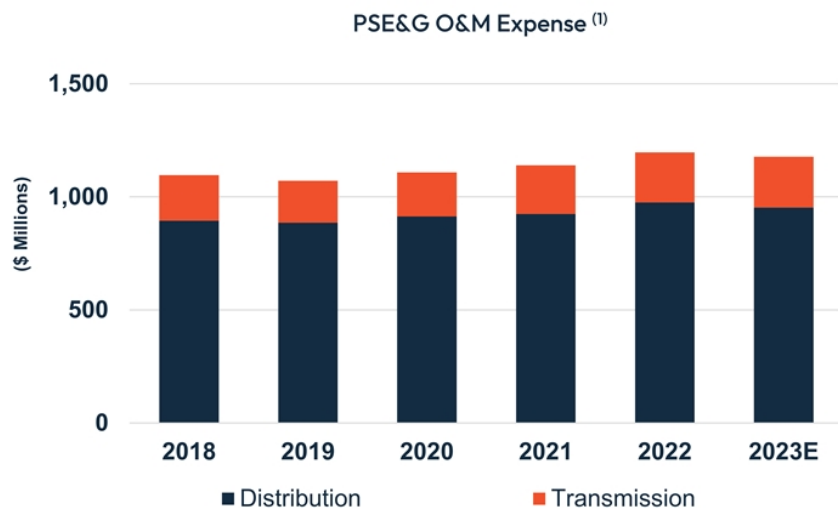

Strong pipeline of opportunities will allow for continued rate base growth comparable to current growth rates

The hashed portion of 2032E rate base includes the high-end of our 10-year capital spending program, as well as incremental investment opportunity from NJ's accelerated electrification goals

Chart excludes CWIP. Year-end 2022 CWIP balance was ~\$1.3B.

*The low end of the range includes extension of GSMP and CEF-EE at current annual spending levels plus inflation. The hashed portion of the chart represents incremental investment that may occur for programs related to gas and electric modernization, energy efficiency, energy storage, electric vehicles, solar and State energy policy goals.

Effective Cost Control to Mitigate Inflation Impacts and Preserve Customer Affordability Keeps O&M CAGR ~1%

- Demonstrated ability to control O&M
- 2023 cost reductions more than offset inflation and partially addresses the impact of Pension and OPEB
- Our focus on cost control provides headroom for recovery of capital investment, as \$1 of O&M offsets the impact of ~\$10 of capital investment on customer bills
- Implementation of AMI and productivity efforts are expected to continue to control O&M costs for the next several years

(1) Excludes certain regulatory balance account items.

PSE&G Dual Jurisdiction Regulation Provides for a Mixture of Investment and Cost Recovery Mechanisms

Transmission

- Federal Regulatory Entity: Federal Energy Regulatory Commission
- Annual Formula Rate filing provides for contemporaneous recovery with forward-looking test year
- Current Transmission ROE: 10.4% inclusive of 50 basis point RTO adder
 - Equity Ratio: ~55%
 - YE 2022 Transmission Rate Base: ~\$12B (~45%)

Distribution

- State Regulatory Entity: NJ Board of Public Utilities
- Timely recovery of investment programs:
 - Contemporaneous recovery of EE and Solar programs
 - Clause investment recovered via periodic filings for historic spending on Infrastructure Investment Programs (GSMP, Energy Strong, IAP)
 - Rate case recovery: Base spending, stipulated base
- Current Distribution ROE: 9.6% for all programs
 - Equity Ratio: 54%
 - YE 2022 Distribution Rate Base: ~\$14B (55%)
- 4Q 2023 base rate filing is first since 2018, and will address recent investments, with cost control that helps keep bills affordable
 - Test Year – Mid-2023 through mid-2024
 - Request recovery of base distribution investments ~\$3B including Board approved stipulated base spend
- Cost control and other factors mitigate other rate increases
 - O&M control limits customer bill impact from last rate case and keeps costs below peers
 - Pension/OPEB expectations comparable to 2018 levels; seek to further reduce volatility
 - Weighted average cost of debt is flat compared to 2018 due to favorable refinancing and long-dated maturities
 - COVID and storm deferral recovery can be offset by completion of Superstorm Sandy recovery

Key Takeaways: Best-in-Class Operations with Important System Investment Needs Driving a Predictable Earnings Growth Platform

Operational Excellence: Delivering top-tier safety, reliability and customer service, while maintaining customer bill affordability

Financial Strength: Strong track record of growth continues

- Distribution base rate case in 2024 driven by capital recovery, while continuing to keep customer bills affordable
- Conservation Incentive Program decouples revenues, enabling broad EE adoption
- Cost control supports customer affordability with one of the lowest gas bills and below average electric bills vs. regional peers
- Investment recovery mechanisms help minimize regulatory lag

Disciplined Investment: Programs driven by infrastructure modernization and decarbonization

- \$15.5B-\$18B capital investment program drives rate base growth of 6%-7.5% over the 2023-2027 period
- On schedule and on budget to deliver largest single-year capital spending program of \$3.5 billion in 2023
- Investments aligned with NJ climate policies, with upside to address Governor Murphy's recent Executive Orders
- Gas business capital investments driven by replacement of aged pipe prone to leaks
- Technology investments will improve the customer experience and reliability while continuing to control O&M

PSEG Power & Other

PSEG Power & Other

A more stable, predictable business that generates significant free cash flow to support PSEG's investment program

PSEG Decision to Retain Nuclear Based on Several Drivers

Decision to Retain Nuclear Units Clarified with Passage of the IRA, and Anticipated Start of PTC in 2024

Key Strategic Drivers:

- Unique asset class of existing, low-cost, carbon-free, 24x7 base load generation, providing reliable energy integral to meeting New Jersey's clean energy targets
- Significant free cash flow supports PSEG as it allocates capital for PSE&G's growth

Key Financial Drivers:

- Predictable earnings from PTC through 2032 provides escalating support for energy prices
- Prices above PTC threshold will provide upside opportunity
- Low-cost, high-value growth opportunities at nuclear, and prospects for growth in developing hydrogen hubs

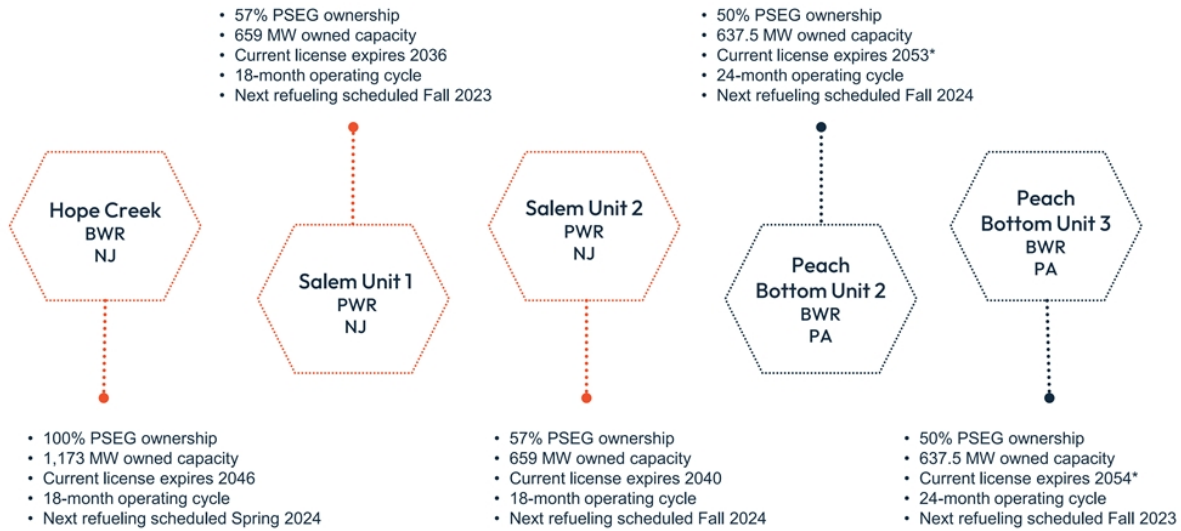

Key Operational Drivers:

- Demonstrated operational excellence and equipment reliability, providing improved predictability
- Safety is always our highest priority

PSEG Nuclear – Key Fleet Data

2022 Fleet Average Capacity Factor 92.2%

* Both Peach Bottom units have received subsequent license renewals for an additional 20 years from the NRC. However, the NRC is revisiting the environmental review and the license expiration dates were reverted back to 2033 and 2034 pending this review.

Nuclear Is Critical to the Energy Transition

Nuclear is a unique asset class providing reliable 24x7, carbon-free energy and price stabilization

PSEG Nuclear provides ~40% of New Jersey’s energy and ~85% of New Jersey’s clean energy

- New Jersey’s energy goals can only be met through preserving our nuclear assets through an extended license life
- Integrated Energy Plan supporting NJ’s EMP concluded that retaining nuclear is the least-cost scenario for achieving NJ’s goals

PSEG Nuclear is important to New Jersey’s economy

- Supports an annual payroll of more than \$175 million
- Purchases more than \$60 million a year in New Jersey goods and services

PSEG Nuclear is a leading employer in Salem County and Southern NJ

- 4,530 in-state direct and secondary jobs, including 3,990 jobs in Salem County
- 1,639 full-time employees — 70% of employees live in South Jersey
- 1,000 additional contractors twice a year to support refueling outages and maintenance

NJ Electric Generation by Fuel Source 2022*

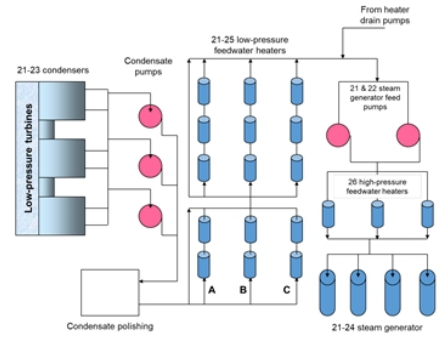

*Source: Form EIA-923 (Electricity Data Browser as of Oct 4, 2023.)

PSEG Nuclear Has Compelling Growth Opportunities: Salem Capacity Uprate

- ~45-60 MW PSEG-share (4%-5%) thermal increase targeted
- Lowers \$/MWh generating cost (same O&M, more MWh)
- Targeting in service in 2027-2029
- Low-cost investment — Capital is ~\$100M PSEG-share for upgrades on the secondary side of the plant (shown to right); no upgrades to reactor equipment expected, no incremental O&M
- Opportunity for a larger uprate will be evaluated
- Compelling value:
 - Incremental PTC benefit — Expected to qualify for the incremental clean energy production credit, providing 10 years of \$27/MWh¹ incremental value to market
 - Average annual net income for first five full years ~\$15M-\$25M

Simplified Drawing of Secondary Side of Plant

¹Amounts reflect 2023 dollars, subject to IRS inflation adjustment factor.

Additional PSEG Nuclear Growth Opportunities

Transition from 18-month to 24-month Refueling Cycles

- An extended fuel cycle eliminates refueling outages over the life of the plant, reducing O&M by eliminating one refueling outage every 6 years (~\$50M O&M) and increasing generation ~25 days every six years (~\$30M) to end of extended life (avoids 6 refueling outages)*
- Hope Creek: Authorized funding required to transition fuel cycle starting with Fall 2025 outage
- Salem: Monitoring NRC approval of new fuel type that would enable transitioning to 24-month cycles

License Extensions — Salem and Hope Creek

- 20-year extensions to 2056 (Salem Unit 1), 2060 (Salem Unit 2) and 2066 (Hope Creek)
- \$95M total PSEG-share investment (includes ~\$40M capex for equipment replacement), ~\$10M–\$15M through 2027
- Scoping study underway, Salem 1 & 2 license extension request submittal 2026, NRC approval anticipated 2028, Hope Creek to follow sequentially

*Amounts reflect 2023 dollars.

Hydrogen Opportunities

Federal Government Created Programs to Incentivize the Development of a Hydrogen Economy to Drive Decarbonization Efforts Toward Some of the Hardest Sectors to Abate

- Infrastructure Investment and Jobs Act, 2021 — Up to \$8 billion to be awarded to at least 4 hydrogen hubs across the country
- Inflation Reduction Act, 2022 — Creation of hydrogen PTC and ITC, dependent upon carbon intensity of hydrogen production process

PSEG is Actively Evaluating Hydrogen-Related Opportunities

- Participating in two hydrogen hubs in the Northeast and mid-Atlantic
- Evaluating multiple roles
 - Owner and operator of hydrogen production facilities powered by carbon-free, nuclear power
 - Seller of RECs and/or nuclear power to third party hydrogen producers
 - End-user of hydrogen blended into selected segments of PSE&G's gas distribution system

PSEG Power & Other — Other Businesses

Gas Operations — the Next Largest Component of PSEG Power & Other

- Broad portfolio of pipeline and storage contracts providing access to low-cost gas and optionality
- Serves Basic Gas Supply Service (BGSS) to PSE&G customers
- Multiple value streams from gas commodity and pipeline capacity sales to third parties and margins on gas sales to certain customer classes
- Lowest-cost gas supplier in New Jersey with 75% of off-system sales margins credited to customers

Other Components

PSEG Long Island — Two Categories of Services

- Operating Services Agreement to manage T&D utility
- Fuel & Energy Management Contracts

Offshore Wind

- Ocean Wind 1 — Completed sale of our 25% equity stake to Ørsted
- GSOE Lease Area — Evaluating options to monetize our interests in acreage
- Transmission (Offshore) — Pursue multiple solutions to support NJ's offshore wind transmission goals, beginning with second State Agreement Approach solicitation expected to take place in 2024

Competitive PJM Transmission

- Exploring bids into PJM competitive windows

Key Takeaways: Increasing Predictability

- **Operational Excellence:** Solid nuclear operations with exemplary ratings on all units, gas operations benefiting PSE&G customers, and PSEG Long Island
- **Financial Strength:**
 - Nuclear long-term price stability through PTC threshold into the next decade
 - Nuclear operations generate significant free cash flow to support PSEG's growth objectives
 - Other businesses, while smaller components, provide stable value
- **Disciplined Investment:**
 - The PTC is a game-changer, providing LT price stability, driving our strategic decision to retain our nuclear assets
 - Enables investment opportunities in power uprates, fuel cycle optimization, license extensions and hydrogen

Transformed business with the sale of fossil generating assets and exit from offshore wind generation, and decision to retain PSEG's nuclear assets following IRA

Financial Review & Outlook

PSEG's Long-term Growth Outlook Driven by PSE&G's Regulated Earnings

Starting in 2024, Nuclear PTC Adds Stability and Visibility to PSEG Power & Other

Illustrative Drivers of PSEG Power & Other

- +
 - At the PTC threshold, average annual nuclear EBITDA is estimated in the range of ~\$500M in 2024, growing to ~\$600M in 2027, as PTC adjusts annually for inflation after 2024
- +
 - Remaining components of PSEG Power & Other expected to generate average annual EBITDA estimated at ~\$225M over the same period
- - Annual depreciation is expected to average ~\$135M over the same period
 - Annual interest expense is estimated ~\$250M, growing to ~\$325M in 2027, as we refinance at higher rates

Illustrative EBITDA Contributions for PSEG Power & Other

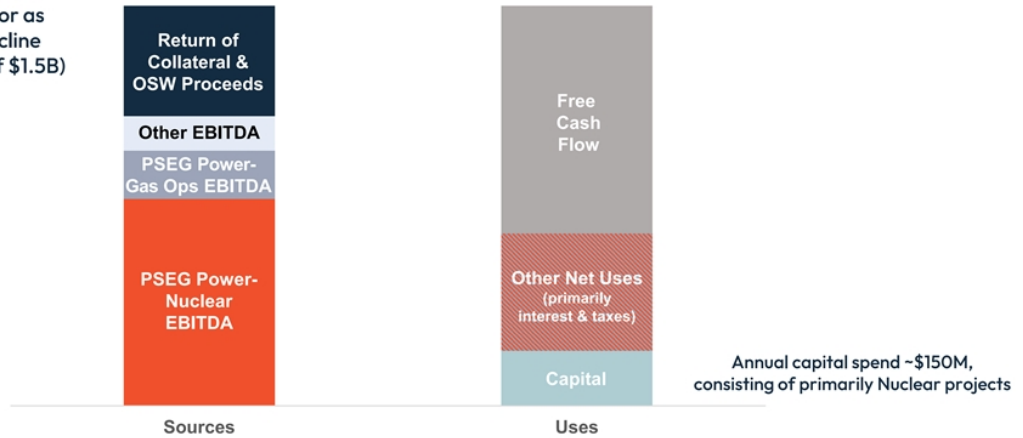

This predictability and visibility drives our strategic decision to retain nuclear

Note – Illustrative representation of Nuclear EBITDA in years with PTC. Assumes PTC threshold of \$43.75/MWh in 2024 with escalation of 3% per year, rising to \$48.88/MWh for 2027, calculated in accordance with Internal Revenue Code Section 45U.

PSEG Power & Other Provides Significant Cash Flow, Including Nuclear PTC Starting in 2024

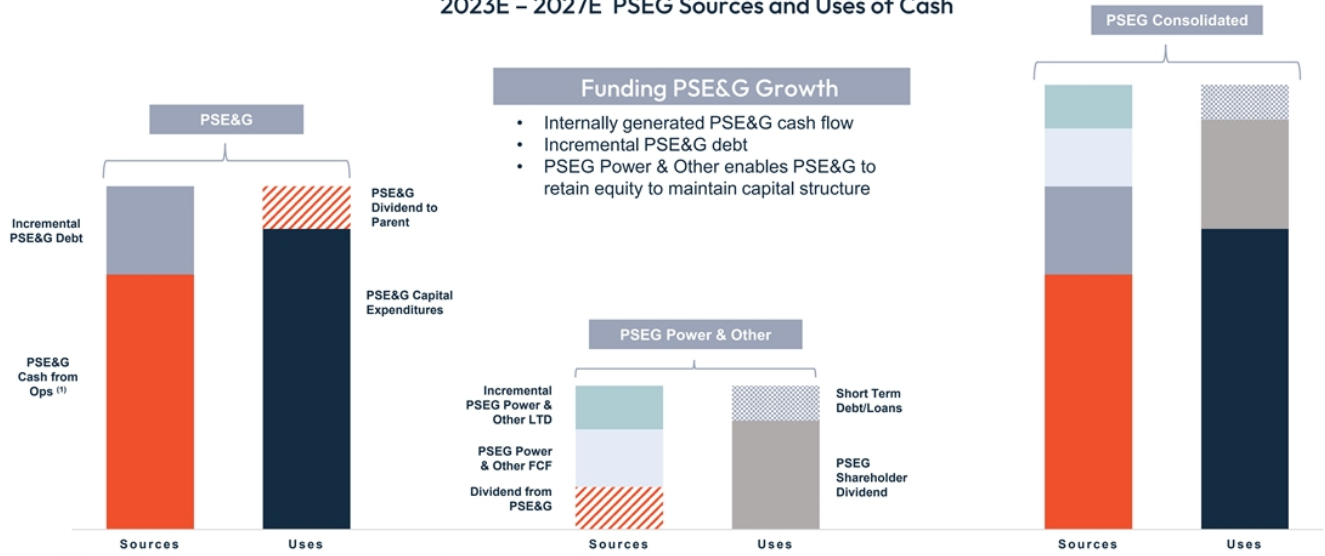

2023E – 2027E PSEG Power & Other Cash Flow

Collateral rolls off as hedges satisfied, or as market prices decline (2022 YE balance of \$1.5B)

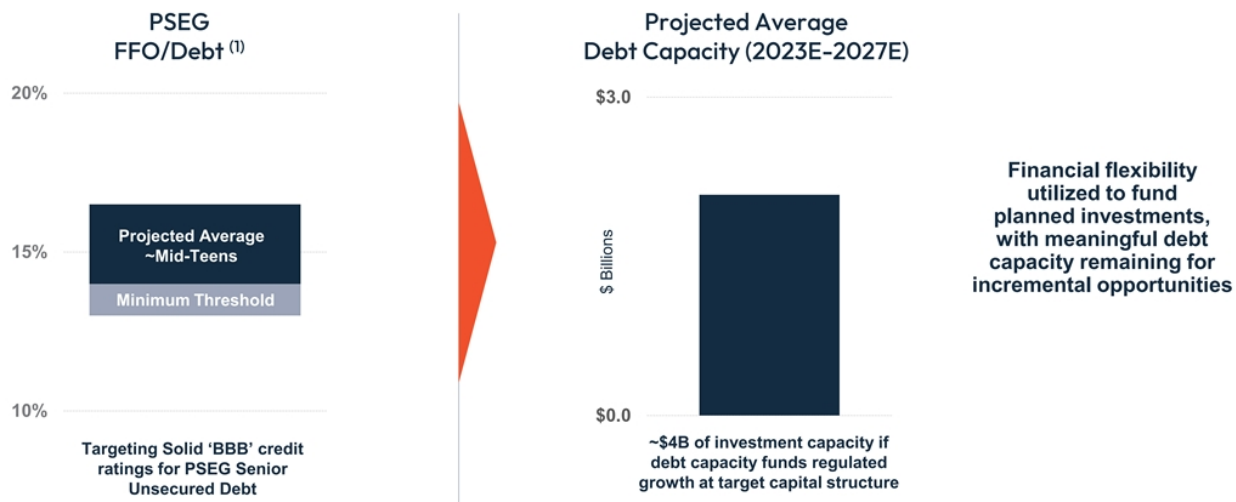

No New Equity Needed through 2027 to Fund PSE&G Capital Program

2023E – 2027E PSEG Sources and Uses of Cash

(1) PSE&G Cash from Operations is adjusted for cost of removal and Energy Efficiency spending, which are included in Capital Expenditures.

Our Business Profile Supports Solid BBB Credit Ratings and Meaningful Debt Capacity

(1) FFO/Debt is an internal estimate of a non-GAAP measure. FFO reflects cash from operations excluding working capital and adjusts for certain items including taxes on asset sales, cost of removal and energy efficiency investments. Debt consists of long-term debt, short-term debt and other imputed debt primarily related to an unfunded pension obligation.

PSEG’s 2023 Indicative Annual Dividend Increase Supported by Predictable Earnings

Annual PSEG Dividend per Share

- Opportunity for consistent and sustainable dividend growth
- Dividend coverage by PSE&G earnings exceeds 130%

*Indicative annual 2023 PSEG common dividend rate per share.

**Payout Ratios reflect the dividend rate divided by non-GAAP Operating Earnings. See Slide A for Items excluded from Net Income/(Loss) to reconcile to Operating Earnings (non-GAAP) for PSEG.
Note: All future decisions and declarations regarding dividends on the common stock are subject to approval by the Board of Directors.

Meeting Takeaways: A Strong Business Mix and Platform for Predictable Growth

- **5%-7% long-term earnings growth rate for 2023-2027 driven by PSE&G rate base growth and PTC threshold for Nuclear**
- **Best-in-class, customer-centric regulated Utility with robust 5-year capex of \$15.5B–\$18B**
 - Focused on infrastructure modernization and decarbonization of NJ economy
 - Investment opportunities aligned with New Jersey and federal Clean Energy policies
 - Customer affordability with lower prices than the average among regional peers
 - Constructive NJ regulatory environment
- **Exited offshore wind generation, continuing to pursue offshore transmission projects**
- **Retaining Nuclear fleet with PTC stabilized, predictable cash flows and multiple growth paths with modest investment**
 - Predictability – Long-term growth outlook through 2027 based on PTC threshold, with upside for potential market price increases
 - Opportunities - Increase capacity via uprates, extend fuel cycles, seek license extensions and potential hydrogen opportunities
- **Effective cost control to mitigate macro-inflationary concerns, reduce volatility and maintain customer affordability**
- **2023 indicative annual common dividend* of \$2.28 per share represents a 5.6% increase over 2022**
- **Sustainability recognized in top-tier ESG scores for climate leadership and commitment to ethical business practices**
- **Strong management track record of delivering on commitments, including meeting earnings guidance 18 years in a row**

* All future decisions and declarations regarding dividends on the common stock are subject to approval by the Board of Directors.

Appendix

PSE&G Recognized for Excellence

PSE&G was honored on numerous fronts for best-in-class operations

- 2022 PSE&G ranked #1 in Customer Satisfaction with both Residential Electric and Natural Gas Service in the East among Large Utilities by J.D. Power*
- 2022 PA Consulting ReliabilityOne® Award for Outstanding Reliability Performance in the Mid-Atlantic Metropolitan Service Area for the 21st consecutive year
- 2022 EEI Edison Award, the electric utility industry's highest honor
- Escalent's 2022 Cogent Most Trusted Utility Brands – Residential & Business

* PSE&G Company received the highest score in the East Large segment of the J.D. Power 2022 U.S. Electric Utility Residential Customer Satisfaction Study of customers' satisfaction with electric utility residential services and the J.D. Power 2022 U.S. Gas Utility Residential Customer Satisfaction Study of customers' satisfaction nationally among gas residential customers. Visit [jdpower.com/awards](https://www.jdpower.com/awards) for more details.

The PSE&G logo is at the top left. Below it are two silver J.D. Power award trophies with gold accents, each featuring the J.D. Power logo and the text "HIGHEST CUSTOMER SATISFACTION". The trophies are set against a dark background with a bokeh light effect at the bottom.

Highest in Customer Satisfaction with **both** Residential Electric **and** Natural Gas Service in the East among Large Utilities.

Twice as nice!

51

PSEG Provides Compelling Careers for Our Employees

PSEG 12,500 Employees

- Strong union partnerships with our six unions and the ~7,700 employees they represent:
 - Recently reached new four-year labor agreements with all of our unions representing employees in New Jersey
 - Negotiating PSEG Long Island labor agreement in advance of Q4 2023 contract expiration
- For 2022, our voluntary turnover rate excluding retirements was ~3%
- DEI – 28% are racially/ethnically diverse, 18% are women
 - Representation of racially/ethnically diverse employees has increased 1.5% in the past two years; exceeds median industry benchmark by ~10%
 - Hired approximately 1,750 employees in 2022
 - 40% were racially/ethnically diverse, a 10% improvement over 2021
 - 23% were women, a 4% improvement over 2021
 - Numerous DEI recognitions

2022 DEI Recognitions

- America's Best Employers for Diversity
- America's Best Large Employers
- America's Best Employers for Women
- America's Best Employer by State
- America's Most JUST Companies
- Bloomberg Gender–Equality Index
- Bronze Military Friendly Employers
- Campus Forward Award
- Corporate Equality Index
- Disability Equality Index
- Leading Disability Employer
- No. 1 Utility in 100 Best Corporate Citizens

PSEG has Demonstrated Success in Controlling O&M, Keeping CAGR ~(-3%)

(1) Excludes Nuclear ARO, early retirement of Hudson/Mercer coal plants, Bethlehem Energy Center goodwill write-off, write-offs related to Strategic Alternatives and certain regulatory balance account and pass-through items. Excludes PSEG Fossil and PSEG Power Ventures as of 2022.

2023 Pension Update

PSEG (\$ Millions)	2022	2021
Discount Rate	5.20%	2.94%
Expected Rate of Return on Plan Assets (EROA)	7.2%	7.7%
Fair Value of Plan Assets at Beginning of Year	\$6,906	\$6,368
Actual Return on Plan Assets	(\$1,606)	\$886
Fair Value of Plan Assets at Year-End	\$4,911	\$6,906
Benefit Obligation at Year-End	\$5,628	\$7,240
Funded Status at Year-End	87%	95%
Net Actuarial Loss at Year-End	\$2,151	\$1,643

- Focused on increasing the predictability of future earnings by mitigating pension impacts
- In February, the BPU approved an order authorizing PSE&G to modify its method for pension accounting for ratemaking purposes, which mitigates variability in the calculation of PSE&G's pension expense for calendar year 2023 and beyond; as of June 30, 2023, PSE&G has deferred \$30 million as a Regulatory Asset under this methodology
- In August, PSEG closed on its previously announced pension "lift-out", transferring approximately \$1 billion of pension obligations and associated plan assets, which will help to further increase the predictability of financial results
- Post the "lift-out" transaction, strong funding ratio maintained

PSEG Power & Other

Nuclear Generation Measures

	Six Months Ended June 30,		Year Ended December 31,	
	2022	2023	2021	2022
Capacity Factor	94.9%	95.8%	91.9%	92.2%
Fuel Cost (\$ millions)	\$93	\$94	\$188	\$183
Generation (GWh)	15,957	16,133	31,158	31,265
Fuel Cost (\$/MWh)	\$5.83	\$5.83	\$6.03	\$5.85
2021 Refueling Outages:	Spring – HC		Fall – S2, PB3	
2022 Refueling Outages:	Spring – S1		Fall – HC, PB2	
2023 Refueling Outages:	Spring – S2		Fall – S1, PB3	

PJM Capacity Auction Results

2023 Delivery Period	PSEG's Average Prices (\$/MW-Day)	PSEG's Cleared Capacity (MW)
Jan – May	\$97	3,300
Jun – Dec	\$50	3,700

Carbon-Free Contracted Energy Sales*

Baseload Nuclear	2023E	2024E
Volume TWh	30 – 32	30 - 32
% Hedged	95-100%	75-80%
Price \$/MWh	\$31	\$38

Other Financial Considerations

- Majority of higher average annual hedged prices vs. 2022 realized in Q1
- Progress continues to transition PSEG's 100%-owned Hope Creek unit from 18-month to 24-month fuel cycles as early as 2025

* Numbers reflect management's view of hedged percentages and prices as of December 31, 2022 for 2023E and June 30, 2023 for 2024E. Prices for 2023E reflect revenues of full requirement load deals based on contract price including renewable energy credits and ancillary, but excluding capacity and transmission components. Prices for 2024E reflect energy revenues only. Hedged positions include MTM accounting treatment and options.

Note: Generation indicates period net generation; Average Prices and Cleared Capacity reflect base and incremental auctions.

PSEG maintains a solid financial position

- a) Effective January 1, 2018, unrealized gains (losses) on equity securities are recorded in Net Income (Loss) instead of Other Comprehensive Income (Loss).
- b) Includes the financial impact from positions with forward delivery months.
- c) Six months ended June 30, 2022 and full year 2022 includes the results for fossil generation sold in February 2022. 2021 amounts include a pre-tax loss of \$298 million for the make-whole premium paid upon the early redemption of PSEG Power's debt and other non-cash debt extinguishment costs.
- d) Income tax effect calculated at 28.11% statutory rate for 2018 through 2023 and 40.85% statutory rate for prior years, except for qualified NDT related activity, which records an additional 20% trust tax on income (loss) from qualified NDT Funds, the additional investment tax credit recapture related to the sale of PSEG Solar Source in 2021, and lease related activity.
- e) Approximately three million potentially dilutive shares were excluded from fully diluted average shares outstanding used to calculate the diluted GAAP loss per share for the year ended December 31, 2021 as their impact was antidilutive to GAAP results. For non-GAAP per share calculations, we used fully diluted average shares outstanding of 507 million for the year ended December 31, 2021, including the three million potentially dilutive shares as they were dilutive to non-GAAP results. As a result of the use of different denominators for non-GAAP Operating Earnings and GAAP Net Loss, a reconciling line item, "Share Differential," has been added to the year ended December 31, 2021 results to reconcile the two EPS calculations.

Please see Slide 3 for an explanation of PSEG's use of Operating Earnings as a non-GAAP financial measure and how it differs from Net Income/(Loss).

Reconciliation of Non-GAAP Operating Earnings

PSE&G Operating Earnings (non-GAAP) Reconciliation
