# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

#### (1) BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements of First Interstate BancSystem, Inc., and its consolidated subsidiaries, including its wholly-owned subsidiary, First Interstate Bank ("FIB") (collectively, the "Company") contain all adjustments (all of which are of a normal recurring nature) necessary to present fairly the financial position of the Company at September 30, 2025 and December 31, 2024, the results of operations, changes in stockholders' equity, and cash flows for each of the three and the nine months ended September 30, 2025 and 2024, in conformity with U.S. generally accepted accounting principles ("GAAP"). The balance sheet information at December 31, 2024 is derived from audited consolidated financial statements. The unaudited consolidated financial statements have been prepared in conformity with the required interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X; and therefore, do not include all of the information and footnotes required by GAAP for a complete set of financial statements. Certain reclassifications, none of which were material, have been made to conform the Company's prior year financial statements to the financial statements as of September 30, 2025. These reclassifications did not change previously reported net income, financial condition, cash flows, or stockholders' equity.

The Company has identified one reporting unit and one operating segment, community banking, which encompasses commercial and consumer banking services to serve a similar base of clients utilizing company-wide offerings of similar products and services managed through similar processes and platforms offered to individuals, businesses, municipalities, and other entities, whose primary sources of revenue are interest income on loans, investment securities and other interest-earning assets and fee income earned on its products and services. Its expenses consist of interest expense on deposits and borrowed funds, provision for credit losses, other operating expenses and income taxes, as further described below. The Company manages its business activities on a consolidated basis.

The Company's chief operating decision maker ("CODM") is its Chief Executive Officer who is charged with management of the Company and is responsible for the evaluation of operating performance and decision making about the allocation of capital and resources.

The CODM regularly assesses performance of the single operating and reporting segment and decides how to allocate resources based on net income calculated on the same basis as is net income reported in the Company's consolidated statements of income. The CODM is also regularly provided with expense information at a level consistent with that disclosed in the Company's consolidated statements of income.

The Company's principal expenses include: (i) interest expense on deposit accounts and other borrowings; (ii) salaries and employee benefits; (iii) information technology and communication costs primarily associated with maintaining loan and deposit functions; (iv) furniture, equipment, and occupancy expenses for maintaining our facilities; (v) professional fees, including FDIC insurance assessments; (vi) income tax expense; (vii) provisions for credit losses; (viii) intangible amortization; (ix) other real estate owned expenses; and (x) other segment expenses including legal expenses, advertising and promotion, donations, credit card rewards expense, fees associated with originating and closing loans, insurance, and other expenses necessary to support our employees and service our clients. See the consolidated financial statements for other financial information regarding the Company's operating segment.

The accounting policies of the segment are the same as those described in "Note 1 - Summary of Significant Accounting Policies" of the Company's Annual Report on Form 10-K for the year ended December 31, 2024.

These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, which includes a description of significant accounting policies. Operating results for the three and the nine months ended September 30, 2025 are not necessarily indicative of the results that may be expected for the year ending December 31, 2025.

(Dollars in millions, except share and per share data)

#### (2) INVESTMENT SECURITIES

The amortized cost and the approximate fair values of investment securities are summarized as follows:

|  | 1  | Amortized  | Gross<br>Unrealized | Gross<br>Unrealized | Estimated<br>Fair |

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

The Company determines the allowance for credit losses on both available-for-sale and held-to-maturity investment securities by a discounted cash flow approach when needed, using each security's effective interest rate at the time of purchase or upon acquisition. The allowance for credit losses for available-for-sale investment securities is measured as the amount by which an investment security's amortized cost exceeds the net present value of expected future cash flows, however, the amount of credit losses is limited to the amount of a security's unrealized loss. The allowance for credit loss on held-to-maturity investment securities is representative of current expected credit losses that management expects to be incurred over the life of the investment and established through a charge to provision for credit losses in current period earnings. For held-to-maturity investment securities, the Company has the intent and ability to hold these investment securities to maturity.

The investment securities portfolio primarily contains securities that are guaranteed by a sovereign entity or are generally considered to have non-credit related risks, such as interest rate risk or liquidity factors. The Company considers whether the securities are issued by the federal government or its agencies and whether downgrades by bond rating agencies have occurred.

As of September 30, 2025 and December 31, 2024, the Company had 633 and 670 individual available-for-sale investment securities, respectively, that were in an unrealized loss position, which was related primarily to fluctuations in current interest rates. As of September 30, 2025, the Company does not intend to sell nor is it more likely than not the Company will be required to sell any available-for-sale securities with unrealized losses.

The Company had no allowance for credit losses on available-for-sale investment securities as of September 30, 2025 and December 31, 2024.

On a quarterly basis, the Company refreshes the credit quality indicator of each held-to-maturity security. As of September 30, 2025 and December 31, 2024, the held-to-maturity portfolio is primarily composed of investment grade or better securities. The Company had a \$0.7 million and a \$0.9 million allowance for credit losses for held-to-maturity corporate and state, county, and municipal investment securities as of September 30, 2025 and December 31, 2024, respectively.

As of September 30, 2025 and December 31, 2024, the Company had \$23.2 million and \$29.6 million, respectively, of accrued interest receivable from investment securities on the consolidated balance sheets. Accrued interest receivable is presented as a separate line item on the consolidated balance sheets and is not included in the carrying value of our securities.

During the three months ended September 30, 2025 and 2024, there were no gross realized gains or losses on the disposition of available-for-sale investment securities.

The following schedule represents the amortized cost of debt securities by contractual maturity except for maturities of mortgage-backed securities, which have been adjusted to reflect shorter maturities based upon estimated prepayments of principal.

As of September 30, 2025, the Company held investment securities callable within one year having amortized costs and estimated fair values of \$682.2 million and \$654.1 million, respectively. These investment securities are primarily included in the "after five year" categories in the table above.

As of September 30, 2025 and December 31, 2024, the Company had securities with carrying values of \$2,877.5 million and \$3,460.2 million, respectively, for investment securities pledged to secure public deposits, derivatives, and securities sold under repurchase agreements that had estimated fair values as of September 30, 2025 and December 31, 2024, of \$2,664.0 million and \$3,092.6 million, respectively. All securities sold under repurchase

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

agreements are with clients and mature on the next banking day. The Company retains possession of the underlying securities sold under repurchase agreements.

As of September 30, 2025 and December 31, 2024, the Company held \$106.8 million and \$177.4 million, respectively, in equity securities primarily in a combination of Federal Reserve Bank and Federal Home Loan Bank ("FHLB") stocks, which are restricted nonmarketable securities acquired to meet regulatory requirements and related to outstanding borrowings. These securities are carried at cost.

#### (3) LOANS HELD FOR SALE

Residential mortgage loans that the Company originated with the intent to sell are recorded at fair value. The following table presents (i) residential mortgage loans recorded at fair value and (ii) other loans held for sale at lower of cost or market by class of receivable related to the sale of the Arizona and Kansas branches (which was pending as of September 30, 2025), net of a \$6.1 million valuation allowance, in addition to the pending sale of approximately \$645.0 million in deposits, for the dates indicated:

| Total allowance for credit losses    | \$<br>227.7 \$       | 47.0  | \$ (56.4) \$                     | 7.1                     | \$ 225.4       |

<sup>(1)</sup> Amounts presented exclude the ACL related to unfunded commitments and investment securities. The allowance for credit losses related to unfunded commitments and investment securities are included in the "Financial Instruments with Off-Balance Sheet Risk" Note and "Investment Securities" Note, respectively.

#### **Collateral-Dependent Loans**

A collateral-dependent loan relies substantially on the operation or sale of the collateral securing the loan for repayment. A loan may become collateral-dependent when foreclosure is probable or the borrower is experiencing financial difficulty and its sources of repayment become inadequate over time.

<sup>(2)</sup> Loans, or portions thereof, are charged-off against the ACL when management believes the collectability of the principal is unlikely, or, with respect to consumer installment loans, according to an established delinquency schedule.

(Dollars in millions, except share and per share data)

The following tables present the principal balance of collateral-dependent loans by class of receivable as of the dates indicated:

Loans are considered past due if the required principal and interest payments have not been received 30 days or more past the contractual payment due date. Loans classified in the following table as 90 days or more past due continue to accrue interest. The following tables present the contractual aging of the Company's recorded principal balance of loans by class of receivable as of the dates indicated:

|                             | 30  | - 59   | 60 - 89  | 90 or more |             |             |                 |          |

<sup>(1)</sup> As of September 30, 2025 and December 31, 2024, none of our non-accrual loans were earning interest income. Additionally, \$2.0 million and \$3.5 million interest income was recognized on non-accrual loans during the three and the nine months ended September 30, 2025, respectively, and \$1.0 million and \$1.8 million interest income was recognized on non-accrual loans during the three and the nine months ended September 30, 2024, respectively. There were \$0.4 million and \$2.9 million in reversals of accrued interest during the three and the nine months ended September 30, 2025, respectively, and \$0.4 million and \$2.4 million in reversals of accrued interest during the three and the nine months ended September 30, 2024, respectively.

#### **Modifications to Borrowers Experiencing Financial Difficulty**

Modifications of loans are made in the ordinary course of business and are completed on a case-by-case basis through negotiation with the borrower in connection with the ongoing loan collection processes. Loan modifications are made to provide payment relief to borrowers experiencing financial difficulty.

From time to time, we may modify certain loans to borrowers who are experiencing financial difficulty. In some cases, these modifications may result in new loans. Loan modifications to borrowers experiencing financial difficulty may be in the form of principal forgiveness, an interest rate reduction, an other-than-insignificant payment delay, a term extension, or a combination thereof, among other things.

<sup>(2)</sup> As of September 30, 2025 and December 31, 2024, there were approximately \$101.0 million and \$56.9 million, respectively, of non-accrual loans for which there was no related allowance for credit loss, as these loans had sufficient collateral securing the loan for repayment.

<sup>(3)</sup> As of September 30, 2025, there were approximately \$13.0 million, \$5.5 million, and \$88.6 million of non-accrual loans that were 30-59 days past due, 60-89 days past due, and 90 days or more past due, respectively. As of December 31, 2024, there were approximately \$13.5 million, \$6.2 million, and \$40.5 million of non-accrual loans that were 30-59 days past due, 60-89 days past due, and 90 days or more past due, respectively.

(Dollars in millions, except share and per share data)

The following tables present the amortized cost basis of loans, by class and by type of modification, at September 30, 2025 and 2024 that were both experiencing financial difficulty and modified during the periods indicated. The percentage of the principal balance of loans that were modified to borrowers in financial distress as compared to the principal balance of each class of receivable is also presented below:

Term Extension and

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

The Company monitors the performance of loan modifications to borrowers experiencing financial difficulty to understand the effectiveness of its modification efforts. Of the accruing loans that were modified during the twelve-months ended September 30, 2025 and 2024, there were \$0.8 million and \$0.5 million of loans classified as past due 30 days or more, respectively, with the remaining accruing loans performing in accordance with the modified terms and classified as current at September 30, 2025 and 2024. Of the non-accrual loans that were modified during the twelve-months ended September 30, 2025 and 2024, there were \$10.5 million and \$9.2 million of loans classified as past due 30 days or more, respectively, with the remaining non-accrual loans performing in accordance with the modified terms and classified as current at September 30, 2025 and 2024.

There were no commitments to lend additional funds related to the loan modifications to borrowers experiencing financial difficulty during the three months ended September 30, 2025 and 2024.

There were \$2.1 million and \$1.3 million of payment defaults on these loans subsequent to their modifications during the twelve-months ended September 30, 2025 and 2024. The Company considers a payment default to occur when the loan is 90 days or more past due or the loan is placed on non-accrual status after the modification. The Company monitors the performance of modified loans on an ongoing basis. In the event of subsequent default, the allowance for credit losses continues to be reassessed based on an individual evaluation of each loan. The modifications made during the periods presented did not significantly impact the Company's determination of the allowance for credit losses.

#### **Credit Quality Indicators**

As part of the on-going and continuous monitoring of the credit quality of the Company's loan portfolio, management tracks internally assigned risk classifications of loans based on relevant information about the ability of borrowers to service their debt. The factors considered by the Company include, among other factors, the borrower's current financial information, historical payment experience, credit documentation, public information, and current economic trends. The Company analyzes loans individually to classify the credit risk of the loans. This analysis generally includes loans with an outstanding balance greater than \$1.0 million, which are generally considered non-homogeneous loans, such as commercial loans and commercial real estate loans. This analysis is performed no less than on an annual basis, depending upon the size of exposure and the contractual obligations governing the borrower's financial reporting frequency. Homogeneous loans, including small business loans, are typically monitored by payment performance. The Company internally risk rates its loans in accordance with a Uniform Classification System developed jointly by the various bank regulatory agencies. The Uniform Classification System defines three broad categories of criticized assets, which the Company uses as credit quality indicators in addition to the 6 Pass ratings in its 10-point rating scale:

Special Mention — includes loans that exhibit a potential weakness in financial condition, loan structure, or documentation that warrants management's close attention. If not promptly corrected, the potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard — includes loans that are inadequately protected by the current net worth and paying capacity of the borrower which have well-defined weaknesses that jeopardize the liquidation of the debt. Although the primary source of repayment for a substandard loan may not currently be sufficient, collateral or other sources of repayment are sufficient to satisfy the debt.

Doubtful — includes loans that exhibit pronounced weaknesses based on currently existing facts, conditions, and values to a point where collection or liquidation for full repayment is highly questionable and improbable. Doubtful loans are required to be placed on non-accrual status and are assigned specific loss exposure.

Loans not meeting the criteria above that are analyzed individually as part of the above-described process are considered pass-rated loans. A pass-rated loan can be assets where there is virtually no credit risk, such as cash secured loans with funds on deposit with the Bank. Pass-rated loans also include loans that are on our watch lists; these loans are currently performing but are subject to closer monitoring due to certain risk factors or emerging weaknesses that could, if not corrected, result in future deterioration of repayment capacity. These loans do not meet the criteria for classification as *Special Mention* or a criticized asset, but are included on the bank's internal watch list to ensure proactive management and early identification of potential credit issues.

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

The Company evaluates the credit quality and loan performance for the allowance for credit losses of the following class of receivables by origination year using the origination date or the loan's subsequent renewal or modification date based on the aforementioned risk scale as of and for the periods ended:

|                           |    |          |            | •                             |                |             |            |   |  |         |

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

The Company evaluates the credit quality, loan performance, and the allowance for credit losses of its residential and consumer loan portfolios based primarily on the aging status of the loan and borrower payment activity. Accordingly, loans on non-accrual status and loans past due 90 days or more and still accruing interest are considered nonperforming for purposes of credit quality evaluation. The following tables present the recorded investment of these loan portfolios based on the credit risk profile of loans that are performing and loans that are nonperforming as of the periods indicated:

|                                    |               |             | September :  | 30, 2025      |              |          |   |  |         |

In the normal course of business, there were no material purchases of portfolio loans and no material sales of loans held for investment during the three and the nine months ended September 30, 2025 or 2024.

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

#### (5) DERIVATIVES AND HEDGING ACTIVITIES

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through the management of its business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk primarily by managing the amount, sources, and duration of its assets and liabilities and derivative financial instruments. The Company enters into derivative financial instruments, such as interest rate swap contracts to manage or hedge exposures that arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates and interest rate exposures. The Company does not enter into interest rate swap agreements for trading or speculative purposes.

The Company sells residential mortgage loans on either a best efforts or mandatory delivery basis. The Company mitigates the effect of the interest rate risk inherent in providing interest rate lock commitments by entering into forward loan sales contracts. The forward loan sales contracts are recorded at fair value with changes in fair value recorded through earnings and are not designated as accounting hedges. Exclusive of the fair value component associated with the projected cash flows from the loan delivery to the investor, the changes in fair value related to movements in market rates of the interest rate lock commitments and the forward loan sales contracts generally move in opposite directions, and the net impact of changes in these valuations on net income during the loan commitment period is generally inconsequential. When the loan is funded to the borrower, the interest rate lock commitment expires, and the Company records a loan held for sale. The forward loan sales contract acts as a hedge against movements in the market interest rates from the time the Company enters into the interest rate lock commitment. The changes in measurement of the estimated fair values of the interest rate lock commitments and forward loan sales contracts are included in mortgage banking revenues in the accompanying consolidated statements of income. The Company charges a fee for these transactions, which is included in mortgage banking revenues on the consolidated statements of income which were not material for the periods ended September 30, 2025 and 2024.

The Company also enters into derivative contracts related to transactions in which the Company enters into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with a third-party financial institution. Because the Company acts as an intermediary for the client, changes in the fair value of the underlying derivative contracts primarily offset each other and do not significantly impact the Company's results of operations. The Company charges a fee for these transactions, which is included in other service charges, commissions, and fees on the consolidated statements of income which were not material for the periods ended September 30, 2025 and 2024.

#### Cash Flow Hedges of Interest Rate Risk

The Company's objectives in using interest rate derivatives are to add stability to interest income (expense) and to manage its exposure to interest rate movements. To accomplish these objectives, the Company primarily uses interest rate swaps and collars as part of its interest rate risk management strategy.

As of September 30, 2025, the Company does not have any active interest rate derivatives designated as cash flow hedges. Amounts previously deferred in AOCI will be reclassified to income over time as the previously hedged, forecasted transactions remain probable of occurring. The Company continues to monitor its interest rate risk exposure and may enter into new derivative contracts in the future as part of its ongoing risk management activities.

#### Fair Value Hedges of Interest Rate Risk

The Company is exposed to changes in the fair value of fixed-rate assets due to changes in benchmark interest rates. The Company uses interest rate swaps to manage its exposure to changes in fair value on these instruments attributable to changes in the designated benchmark interest rate. Interest rate swaps designated as fair value hedges involve the payment of fixed-rate amounts to a counterparty in exchange for the Company receiving variable-rate payments over the life of the agreements.

For derivatives designated and that qualify as fair value hedges, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in interest income. As of September 30, 2025, the Company does not have any active derivatives designated as fair value hedges.

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

#### **Derivatives Not Designated as Accounting Hedges**

Derivative instruments not designated as accounting hedges are not speculative and result from a service the Company provides to certain customers. The Company executes interest rate swaps with commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously economically hedged by offsetting derivatives that the Company executes with a third party, such that the Company minimizes its net risk exposure resulting from such transactions. As the interest rate derivatives associated with this program do not meet the strict hedge accounting requirements, changes in the fair value of both the customer derivatives and the offsetting derivatives are recognized in other income.

#### Risk Participation Agreements

The Company acquired, from Great Western Bank, risk participation agreements under which it assumed credit risk associated with a borrower's performance related to derivative contracts. The Company only entered into these credit risk participation agreements in instances in which the Company was also a party to the related loan participation agreements for such borrowers. The Company manages its credit risk under risk participation agreements by monitoring the creditworthiness of the borrower, based on its normal credit review process.

The following table summarizes the fair values of our derivative instruments on a gross and net basis for the periods indicated. The derivative asset and liability balances are presented on a gross basis, prior to the application of bilateral collateral and master netting agreements, but after the variation margin payments with central clearing organizations have been applied as settlement, as applicable. Total derivative assets and liabilities are adjusted to account for the impact of legally enforceable master netting agreements that allow us to settle all derivative contracts with a single counterparty on a net basis and to offset the net derivative position with the related cash collateral. Securities collateral related to legally enforceable master netting agreements is not offset on the consolidated balance sheets.

#### **Credit-risk-related Contingent Feature**

The Company has agreements with certain of its derivative counterparties that contain a provision where if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations. In addition, the Company could be declared in default on its derivative obligations if repayment of the underlying indebtedness is accelerated by the lender due to the Company's default on the indebtedness.

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

The Company has agreements with certain of its derivative counterparties that contain a provision where if the Company fails to maintain its status as a well / adequately capitalized institution, then the counterparty could terminate the derivative positions and the Bank would be required to settle its obligations. Similarly, the Bank could be required to settle its obligations under certain of its agreements if specific regulatory events occur, such as a publicly issued prompt corrective action directive, cease and desist order, or a capital maintenance agreement that required the Bank to maintain a specific capital level. If the Bank had breached any of these provisions at September 30, 2025 or December 31, 2024 it could have been required to settle its obligations under the agreements at the termination value.

As of September 30, 2025 and December 31, 2024, the fair value of derivatives in a net liability position that have contingent features described above was zero. As of September 30, 2025 and December 31, 2024, the Company has minimum collateral posting thresholds with certain of its derivative counterparties and has not posted excess collateral. At September 30, 2025 and December 31, 2024, the Company had not breached any of the settlement acceleration provisions.

#### 6) LONG-TERM DEBT AND OTHER BORROWED FUNDS

A summary of long-term debt follows:

|   | September 30, 2025 | December 31, 2024 |
|---|--------------------|-------------------|
| Parent Company:   |                    |                   |
| Fixed to floating subordinated notes, 5.25% fixed rate effective May 2020 through May 14, 2025. Effective May 15, 2025, floating Three-Month Term Secured Overnight Financing Rate plus 518.0 basis points. | \$ _               | \$ 99.1           |
| Fixed to floating subordinated notes, 7.625% fixed rate effective June 2025 through June 2030   | 122.2              | _                 |
| Subsidiaries:   |                    |                   |
| 0.00% FHLB borrowings maturing in August 2029   | 3.9                | 3.9               |
| 8.00% finance lease obligation with term ending October 31, 2029  | 0.7                | 0.8               |
| Note payable maturing March 31, 2038, interest only payable at 1.30% monthly until March 31, 2025 and then principal and interest at 3.25% until maturity   | _                  | 2.0               |
| 1.30% note payable maturing June 1, 2034, interest only payable monthly until March 31, 2025 and then principal and interest until maturity   | _                  | 0.6               |
| 1.12% note payable maturing December 31, 2045, interest only payable annually until December 31, 2028 and then principal and interest until maturity  | 6.8                | 6.8               |
| 1.35% note payable maturing December 31, 2046 interest only payable annually until December 31, 2025 and then principal and interest until maturity   | _                  | 6.4               |
| 1.26% note payable maturing December 31, 2051 interest only payable annually until December 31, 2031 and then principal and interest until maturity   | 12.6               | 12.6              |
| Total long-term debt  | \$ 146.2           | \$ 132.2          |

On August 15, 2025, the Company redeemed in full the outstanding \$100.0 million of aggregate principal amount of 5.25% fixed-to-floating rate subordinated notes due 2030 (the "2020 Subordinated Notes") set forth in the table above without any prepayment penalty, at a redemption price of 100% of the principal amount plus accrued and unpaid interest to, but excluding, August 15, 2025.

On June 10, 2025, the Company completed a public offering of \$125.0 million fixed-to-floating rate subordinated notes due June 15, 2035 (the "Notes"). The Company may elect to redeem the Notes, in whole or in part, on any early redemption date which is any interest payment date on or after June 15, 2030 at a redemption price equal to 100% of the principal amount plus any accrued and unpaid interest. The Company may also redeem the Notes, in whole but not in part, upon certain conditions as defined in the indenture governing the Notes. Any early redemption of the Notes will be subject to regulatory approval to the extent then required under applicable laws or regulations, including capital regulations. Unamortized debt issuance costs of \$2.8 million, as of September 30, 2025, are being amortized to maturity.

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

From and including the date of issuance to, but excluding, June 15, 2030, or earlier redemption date, the Notes will bear interest at an initial fixed rate of 7.625% per annum, payable semi-annually in arrears on June 15 and December 15 of each year, commencing on December 15, 2025. From and including June 15, 2030 to, but excluding, June 15, 2035, or earlier redemption date, the Notes will bear interest at a floating rate per annum equal to a benchmark rate, which is expected to be Three-Month Term Secured Overnight Financing Rate ("SOFR") (as defined in the indenture governing the Notes), plus 398.0 basis points, payable quarterly in arrears on March 15, June 15, September 15 and December 15 of each year, commencing on September 15, 2030. Notwithstanding the foregoing, if the benchmark rate is less than zero, then the benchmark rate shall be deemed to be zero.

At September 30, 2025, the Company had no outstanding FHLB borrowings as compared to \$1,567.5 million of outstanding FHLB fixed rate borrowings at an average rate of 4.77% at December 31, 2024. As of September 30, 2025 and December 31, 2024, the Company had no other material outstanding borrowings classified as other borrowed funds.

At September 30, 2025, the Company has remaining available lines of credit with the FHLB of approximately \$5,057.3 million, subject to collateral availability. The available line of credit and outstanding borrowings with the FHLB are collateralized by certain loans and securities with an advance equivalent collateral value of \$5,061.2 million.

#### (7) CAPITAL STOCK

The Company's common stock is traded on the NASDAQ stock market under the symbol "FIBK."

As of September 30, 2025, the Company is authorized to issue an aggregate of 150,100,000 shares of capital stock, of which 150,000,000 shares are designated as common stock, and 100,000 are designated as preferred stock. Our common stock is uncertificated and has one vote per share.

The Company had 103,967,257 shares and 104,585,964 shares of common stock outstanding as of September 30, 2025 and December 31, 2024, respectively, and no shares of preferred stock outstanding as of September 30, 2025 and December 31, 2024.

During the nine months ended September 30, 2025, the Company issued 39,058 restricted stock units to directors for their annual service on the Company's board of directors. The aggregate value of the restricted stock units issued to directors of \$1.1 million is amortized into stock-based compensation expense in the accompanying consolidated statements of changes in stockholders' equity over a one-year service-based period.

On August 28, 2025, the board of directors of the Company adopted a new stock repurchase program, pursuant to which the Company has been authorized to repurchase up to \$150.0 million of its issued and outstanding shares of common stock on or prior to March 31, 2027, which is the expiration date of the program. Any repurchased shares will be returned to authorized but unissued shares of common stock, as permitted under applicable Delaware law.

During the three and nine months ended September 30, 2025, 842,903 shares of common stock were repurchased under the new stock repurchase program at a total cost of \$27.5 million or at a weighted average price of \$32.58 per share. As of September 30, 2025, following these repurchases, approximately \$122.5 million remained available for future purchases under the program. The additional stock repurchases during the three and nine months ended September 30, 2025 and 2024, were redemptions of vested restricted shares tendered in lieu of cash for payment of income tax withholding amounts by participants in the Company's equity compensation plans.

#### (8) EARNINGS PER COMMON SHARE

Basic earnings per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period presented, excluding unvested restricted stock. Diluted earnings per share is calculated by dividing net income by the weighted average number of common shares determined for the basic earnings per share computation plus the dilutive effects of stock-based compensation using the treasury stock method.

(Dollars in millions, except share and per share data)

The following table sets forth the computation of basic and diluted earnings per share for the periods presented:

|  |    | Three Months Ended Se | ptember 30, | Nine Months Ended Se | ptember 30, |
|--|----|-----------------------|-------------|----------------------|-------------|
|  |    | 2025                  | 2024        | 2025                 | 2024        |
| Net income   | \$ | 71.4 \$               | 55.5        | \$<br>193.3 \$       | 173.9       |
| Weighted average common shares outstanding for basic earnings<br>per share computation       | S  | 103,153,579           | 102,970,851 | 103,169,158          | 102,917,610 |
| Dilutive effects of stock-based compensation   |    | 233,412               | 262,767     | 235,643              | 207,449     |
| Weighted average common shares outstanding for diluted earnings per common share computation |    | 103,386,991           | 103,233,618 | 103,404,801          | 103,125,059 |
| Basic earnings per common share  | \$ | 0.69 \$               | 0.54        | \$<br>1.87 \$        | 1.69        |
| Diluted earnings per common share  |    | 0.69                  | 0.54        | 1.87                 | 1.69        |
| Anti-dilutive unvested time restricted stock   |    | 4,135                 | 5,841       | 6,014                | 47,854      |

The Company had 768,247 and 773,563 shares of unvested restricted stock as of September 30, 2025 and 2024, respectively, that were not included in the computation of diluted earnings per common share because performance conditions for vesting had not been met.

#### (9) REGULATORY CAPITAL

As of September 30, 2025 and December 31, 2024, the Company exceeded all capital adequacy requirements to which it is subject. Actual capital amounts and ratios for the Company and its subsidiary Bank, as of September 30, 2025 and December 31, 2024 are presented in the following tables:

|  | <br>Actu      | ıal     | Minimum Required for<br>Capital Adequacy Purposes |         |   | For Capital A<br>Purposes Plu<br>Conservation | s Capi        | tal |        | Tell Capitalized rective Action ents <sup>(2)</sup> |         |         |

<sup>(1)</sup> The capital conservation buffer is an additional 2.5% of the amount necessary to meet the minimum risk-based capital requirements for total, tier 1, and common equity tier 1 risk-based capital.

#### (10) COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Company is involved in various claims and litigation. The Company establishes accruals for legal matters when potential losses associated with the actions become probable and the amount of loss can be reasonably estimated. There is no assurance that the ultimate resolution of these matters will not significantly exceed the amounts that the Company has accrued. Accruals for legal matters are based on management's best judgment after consultation with counsel and others. In the opinion of management, following consultation with legal counsel, the ultimate liability or disposition of all such claims and litigation is not expected to have a material adverse effect on the consolidated financial condition, results of operations, or liquidity of the Company.

As of September 30, 2025, the Company had commitments under construction contracts of \$8.6 million.

Based on the specific terms stated in the agreements, the Company did not have a significant amount of sold residential mortgage loans with recourse provisions still in effect as of September 30, 2025. The Company did not repurchase a significant amount of loans from secondary market investors under the terms of loan sales agreements during the period ended September 30, 2025. In the opinion of management, the risk of recourse and the subsequent requirement of loan repurchase to the Company is not significant, and accordingly no liabilities have been established related to such. In addition, the Company made various representations and warranties associated with the sale of loans. The Company has not incurred significant losses resulting from these provisions during the period ended September 30, 2025.

<sup>(2)</sup> The ratios to meet the requirements to be deemed "well-capitalized" are only applicable to FIB. However, the Company manages its capital position as if the requirements apply to the consolidated company and has presented the ratios as if they also applied on a consolidated basis.

(Dollars in millions, except share and per share data)

#### (11) FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

In the normal course of business, the Company is a party to financial instruments with off-balance sheet risk to meet the financing needs of its clients. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of amounts recorded in the consolidated balance sheets. Commitments to extend credit are agreements to lend to a client so long as there is no violation of any condition established in the commitment contract. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a client to a third party. The credit risk involved in issuing letters of credit is essentially the same as the credit risk involved in extending loan facilities to clients. The Company's policy for obtaining collateral, and determining the nature of such collateral, is essentially the same as in the Company's policies for making commitments to extend credit. The estimated fair value of the obligation undertaken by the Company in issuing standby letters of credit is included in accounts payable and accrued expenses in the Company's consolidated balance sheets.

The following table presents our financial instruments with off-balance sheet risk, as well as the activity in the allowance for off-balance sheet credit losses related to those financial instruments:

|  | Three Months End | ded September 30, | Nine Months Ended September 30, |           |    |        |  |  |

#### (13) FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants at the measurement date. There is a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The three levels of inputs to measure fair value are as follows:

- Level 1 Quoted prices in active markets for identical assets or liabilities
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of assets or liabilities

The methodologies used by the Company in determining the fair values of each class of financial instruments are based primarily on independent, market-based data to reflect a value that would be reasonably expected in an orderly transaction between market participants at the measurement date, and therefore, are classified within Level 2 of the valuation hierarchy. There have been no significant changes in the valuation techniques during the three and the nine months ended September 30, 2025 and 2024.

The Company's policy is to recognize transfers between levels as of the end of the reporting period. Transfers in and out of Level 1, Level 2, and Level 3 are recognized on the actual transfer date. There were no significant transfers between fair value hierarchy levels during the three and the nine months ended September 30, 2025 and 2024.

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

Further details on the methods used to estimate the fair value of each class of financial instruments above are discussed below:

Investment Debt Securities Available-for-Sale. The Company obtains fair value measurements for investment securities from an independent pricing service, and these securities are classified as level 2. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information, and the investment's terms and conditions, among others. Vendors chosen by the Company are widely recognized vendors whose evaluations support the pricing functions of financial institutions, investment and mutual funds, and portfolio managers. If needed, a broker may be utilized to determine the reported fair value of investment securities. The Company also compares the reasonableness of the pricing quarterly through a validation process involving additional independent third parties.

Loans Held for Sale. Fair value measurements for residential mortgage loans held for sale are obtained from an independent pricing service and are classified as level 2. The fair value measurements consider observable data that may include binding contracts or quotes or bids from third party investors as well as loan level pricing adjustments. Commercial and agricultural loans held for sale are derived from quotes or bids from third party investors.

Interest Rate Collars: The fair values of interest rate collars are obtained from an independent third party and are classified as level 2. The values are determined using the market standard methodology of discounting the future expected cash receipts that would occur if variable interest rates fell below (rise above) the strike rate of the floors (caps). The variable interest rates used in the calculation of projected receipts on the collars are based on an expectation of future interest rates derived from observable market interest rate curves and volatilities. The Company also compares the reasonableness of the pricing quarterly through a validation process involving additional independent third parties.

Interest Rate Swap Contracts. Fair values for derivative interest rate swap contracts are obtained from an independent third party and are classified as level 2. The values are based upon the estimated amounts to settle the contracts considering current interest rates and are calculated using discounted cash flows that are observable, or that can be corroborated by observable market data. The inputs used to determine fair value include the United States Dollar — Secured Overnight Financing Rate ("SOFR") and Prime forward curves to estimate variable rate cash inflows and SOFR to estimate the discount rate. The estimated variable rate cash inflows are compared to the fixed rate outflows and such difference is discounted to a present value to estimate the fair value of the interest rate swaps. The Company also compares the reasonableness of the pricing quarterly through a validation process involving additional independent third parties.

For purposes of potential valuation adjustments to our derivative positions, we evaluate both our credit risk and the credit risk of our counterparties. Accordingly, we have considered factors such as the likelihood of our default and the default of our counterparties, our net exposures and remaining contractual life, among other things, in determining if any fair value adjustments related to credit risk are required. The change in value of derivative assets and derivative liabilities attributable to credit risk was not significant during the reported periods.

Interest Rate Lock Commitments. Fair value measurements for interest rate lock commitments are obtained from an independent pricing service and are classified as level 2. The fair value measurements consider observable data that may include prices available from secondary market investors taking into consideration various characteristics of the loan, including the loan amount, interest rate, value of the servicing, and loan to value ratio, among other things. Observable data is then adjusted to reflect changes in interest rates, the Company's estimated pull-through rate, and estimated direct costs necessary to complete the commitment into a closed loan net of origination, and processing fees collected from the borrower.

Forward Loan Sales Contracts. The fair value measurements for forward loan sales contracts are obtained from an independent pricing service and are classified as level 2. The fair value measurements consider observable data that includes sales of similar loans.

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

Deferred Compensation Plan Assets and Liabilities. The fair values of deferred compensation plan assets and liabilities are based primarily on quoted market prices for identical instruments traded in active markets at the measurement date and are classified as level 1. These investments are in the same funds and purchased in the same amounts as the participants' selected investments, which represent the underlying liabilities to plan participants. Deferred compensation plan liabilities are recorded at amounts due to participants, based on the fair value of participants' selected investments.

Financial assets and financial liabilities measured at fair value on a recurring basis are as follows:

|  |    | _         | Fair Value Measurements at Reporting Date Using       |                  |  |    |  |  |

Additionally, from time to time, certain assets are measured at fair value on a non-recurring basis. Adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to credit deterioration. The following table presents information about the Company's assets and liabilities measured at fair value on a non-recurring basis with an adjustment during the period presented. The fair values may not be current as of the reporting date but represent fair values as of the most recent fair value change that occurred with the reporting period. Accordingly, carrying values may not equal the current fair value:

Collateral-dependent Loans. Collateral-dependent loans are reported at the fair value of the underlying collateral if repayment is expected solely from collateral. The collateral-dependent loans are reported at fair value through specific valuation allowance allocations. When it is determined that the fair value of a collateral-dependent loan is less than the recorded investment in the loan, an allowance for credit losses is recognized on the loan for the difference between the recorded investment and the fair value of the collateral less costs to sell. Collateral values are estimated using independent appraisals and management estimates of current market conditions. As of September 30, 2025 and December 31, 2024, the Company had collateral-dependent loans with a carrying value of \$147.6 million and \$97.6 million, respectively.

(Dollars in millions, except share and per share data)

Long-lived Assets to be Disposed of by Sale. Long-lived assets to be disposed of by sale are carried at the lower of carrying value or fair value less estimated costs to sell. The fair values of long-lived assets to be disposed of by sale are based upon observable market data and management estimates of current market conditions. As of September 30, 2025, the Company had long-lived assets to be disposed of by sale with carrying and fair values aggregating \$10.3 million. As of December 31, 2024, the Company had long-lived assets to be disposed of by sale with carrying and fair values aggregating \$0.8 million.

The following table presents additional quantitative information about assets measured at fair value on a non-recurring basis and for which the Company has utilized Level 3 inputs to determine fair values:

The Company is required to disclose the fair value of financial instruments for which it is practical to estimate fair value. The methodologies for estimating the fair value of financial instruments that are measured at fair value on a recurring or non-recurring basis are discussed above. The methodologies for estimating the fair value of other financial instruments are discussed below. For financial instruments bearing a variable interest rate where no credit risk exists, it is presumed that recorded book values are reasonable estimates of fair value.

Financial Assets. Carrying values of cash, cash equivalents, and accrued interest receivable approximate fair values due to the liquid and/or short-term nature of these instruments. Fair values for investment securities held-to-maturity are obtained from an independent pricing service, which considers observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, trading levels, trade execution data, market consensus prepayment speeds, credit information, and the investment's terms and conditions, among other things. Fair values of fixed rate loans and variable rate loans that reprice on an infrequent basis are estimated by discounting future cash flows using current interest rates at which similar loans with similar terms would be made to borrowers of similar credit quality using an exit price notion. Carrying values of variable rate loans that reprice frequently, and with no change in credit risk, approximate the fair values of these instruments. The estimated fair values for all loans are then reduced by the estimated life-of-the-loan aggregate credit losses in the loan portfolio.

Financial Liabilities. The fair values of demand deposits, savings accounts, securities sold under repurchase agreements, and accrued interest payable are the amounts that are payable on demand at the reporting date. The fair values of fixed-maturity certificates of deposit are estimated using external market rates that are currently offered for deposits that have similar remaining maturities. The fixed and floating rate subordinated debentures, floating rate subordinated term loan, other borrowed funds, fixed rate subordinated term debt, and capital lease obligation are estimated by discounting future cash flows using current rates for advances that have similar characteristics.

Commitments to Extend Credit and Standby Letters of Credit. The fair value of commitments to extend credit and standby letters of credit, based on fees currently charged to enter into similar agreements, is not significant.

(Dollars in millions, except share and per share data)

# (14) RECENT AUTHORITATIVE ACCOUNTING GUIDANCE

ASU 2023-06, "Disclosure Improvements—Codification Amendments in Response to the SEC's Disclosure Update and Simplification Initiative" In October 2023, the FASB issued ASU 2023-06, Disclosure Improvements—Codification Amendments in Response to the SEC's Disclosure Update and Simplification Initiative that amends the ASC to incorporate certain disclosure requirements from SEC Release No. 33-10532 - Disclosure Update and Simplification that was issued in 2018. The effective date for each amendment will be the date on which the SEC's removal of that related disclosure from Regulation S-X or Regulation S-K becomes effective, with early adoption prohibited. The Company does not anticipate the adoption of ASU 2023-06 will have a significant impact on the Company's financial position, results of operations, or liquidity.

ASU 2023-09, "Income Taxes (Topic 740): Improvements to Income Tax Disclosures" In December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures that require public business entities to annually disclose (1) specific categories in their rate reconciliation; (2) additional information for reconciling items that meet a quantitative threshold; (3) the amount of income taxes paid (net of refunds received) disaggregated by federal, state, and foreign taxes; (4) the amount of income taxes paid (net of refunds received) disaggregated by individual jurisdictions in which the income taxes paid that meet a quantitative threshold; (5) income (or loss) from continuing operations before income tax expense (or benefit) disaggregated between domestic and foreign; and (6) income tax expense (or benefit) from continuing operations disaggregated by federal, state, and foreign. The ASU eliminates the requirement to disclose the nature and estimate of the range of the reasonably possible change in the unrecognized tax benefits balance in the next 12 months and to disclose the cumulative amount of each type of temporary difference when a deferred tax liability is not recognized because of the exceptions to comprehensive recognition of deferred taxes related to subsidiaries and corporate joint ventures. For public business entities, the amendments are effective for annual periods beginning after December 15, 2024. The amendments should be applied on a prospective basis, but retrospective application is permitted. The adoption of ASU 2023-09 did not have a material impact on the Company's financial position, results of operations, or liquidity.

ASU 2024-03, "Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of income statement expenses" In November 2024, the FASB issued ASU 2024-03, Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of income statement expenses that require public business entities to disclose additional information about specific expense categories in the notes to financial statements at interim and annual reporting periods. The amendments in this Update do not change or remove current expense disclosure requirements. The amendments in this Update are effective for annual reporting periods beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted. The amendments in this Update should be applied either (1) prospectively to financial statements issued for reporting periods after the effective date of this Update or (2) retrospectively to any or all prior periods presented in the financial statements. The Company is currently evaluating the impact of the standard and does not anticipate it will have a significant impact on the Company's financial position, results of operations, or liquidity.

# (15) SUBSEQUENT EVENTS

Subsequent events have been evaluated for potential recognition and disclosure through the date the Company's financial statements were filed with the SEC. On October 28, 2025, the Company declared a quarterly dividend to common shareholders of \$0.47 per share, to be paid on November 20, 2025 to shareholders of record as of November 10, 2025.

On October 7, 2025, the Company redeemed in full the trust securities of HF Financial Capital Trust III ("Trust XI") at a redemption price of 100% of the principal amount of the issued and outstanding debt securities plus accrued and unpaid interest through October 6, 2025. The redemption included all of the outstanding debt securities (\$5.2 million aggregate principal amount) which obligated the issuer trust to concurrently redeem all of the outstanding trust securities (\$5.0 million aggregate principal amount of capital securities and \$0.2 million aggregate principal amount of common securities).

On October 8, 2025, the Company redeemed in full the trust securities of HF Trust IV ("Trust XII") at a redemption price of 100% of the principal amount of the issued and outstanding debt securities plus accrued and unpaid interest

# FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share and per share data)

through October 7, 2025. The redemption included all of the outstanding debt securities (\$7.2 million aggregate principal amount) which obligated the issuer trust to concurrently redeem all of the outstanding trust securities (\$7.0 million aggregate principal amount of capital securities and \$0.2 million aggregate principal amount of common securities).

On October 10, 2025, the Bank closed the previously disclosed transaction with Enterprise Bank & Trust ("Enterprise Bank"), a wholly-owned subsidiary of Enterprise Financial Services Corp, pursuant to which Enterprise Bank acquired twelve branches from the Bank, including approximately \$645 million in deposits and certain commercially-oriented loans with outstanding balances of \$305 million, and the owned real estate and fixed and other assets associated with the branches. The branches sold in the transaction included all of the Bank's Kansas and Arizona locations, with ten branches in Arizona and two branches in Kansas. The Company anticipates recognizing an approximately \$60 million pre-tax gain related to this transaction.

On October 16, 2025, the Bank entered into a Purchase and Assumption Agreement with Security First Bank ("Security First") pursuant to which Security First will acquire from the Bank the eleven Nebraska branches previously identified. The Purchase and Assumption Agreement provides for the transfer by the Bank to Security First of the facilities and other associated assets of the branches, approximately \$280 million in deposits, and loans with outstanding balances of roughly \$70 million. Consummation of the transaction is subject to regulatory approvals and other customary conditions to closing. It is currently anticipated that the closing of the transaction will take place in early 2026.

On October 30, 2025, the Company announced the expected closure of four additional branches located in Nebraska in the first quarter of 2026.

As of October 31, 2025, the Company purchased 1.1 million shares of common stock during October 2025, for a total repurchase, under the stock repurchase program since the program was adopted on August 28, 2025 of approximately 1.9 million shares for a total approximate cost of \$60.2 million.

No other undisclosed events requiring recognition or disclosure were identified.

#### Item 2.

# MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

When we refer to "we," "our," "us," "First Interstate," or the "Company" in this report, we mean First Interstate BancSystem, Inc. and our consolidated subsidiaries, including our wholly owned subsidiary, First Interstate Bank, unless the context indicates that we refer only to the parent company, First Interstate BancSystem, Inc. When we refer to the "Bank" or "FIB" in this report, we mean only First Interstate Bank.

The following discussion of our consolidated financial data reflects our historical results of operations and financial condition and should be read in conjunction with our financial statements and accompanying notes presented elsewhere in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2024, including the audited financial statements and related notes contained therein, as previously filed with the Securities and Exchange Commission, or SEC.

#### Cautionary Note Regarding Forward-Looking Statements and Factors that Could Affect Future Results

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act, and Rule 3b-6 promulgated thereunder, that involve inherent risks and uncertainties. Any statements about our plans, objectives, expectations, strategies, beliefs, or future performance, financial condition, results of operations, investment portfolio, market position, or events constitute forward-looking statements. Such statements are identified by words or phrases such as "believes," "expects," "anticipates," "plans," "trends," "objectives," "views," "continues," "projected," as well as the negative forms of those words or similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "seek," "might," "may," as well as the negative forms of those words or similar expressions. Forward-looking statements involve known and unknown risks, uncertainties, assumptions, estimates and other important factors that could cause actual results to differ materially from any results, performance or events expressed or implied by such forward-looking statements. A detailed discussion of risks that may cause actual results to differ materially from current expectations in the forward-looking statements is included below in this report under the caption "Risk Factors" and in our Annual Report on Form 10-K for the year ended December 31, 2024, under the captions "Cautionary Note Regarding Forward-Looking Statements" and "Risk Factors". These factors and the other risk factors described in our periodic and current reports filed with the SEC from time to time, however, are not necessarily all of the important factors that could cause our actual results, performance, or achievements to differ materially from those expressed in or implied by any of our forward-looking statements. Other unknown or unpredictable factors also could

All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements set forth above. Interested parties are urged to read in their entirety the referenced risk factors prior to making any investment decision with respect to the Company. Forward-looking statements speak only as of the date they are made, and we do not undertake or assume any obligation to update publicly any of these statements to reflect actual results, new information or future events, changes in assumptions or changes in other factors affecting forward-looking statements, except to the extent required by applicable laws. If we update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements.

# Non-GAAP Financial Measures

In addition to financial measures presented in accordance with generally accepted accounting principles ("GAAP") in the United States, this document contains non-GAAP financial measures where management believes it would be helpful to understand our results of operations or financial position. The Company's management believes that the non-GAAP financial measures provide additional intelligence about ongoing operations and enhance comparability of results of operations with prior periods by presenting financial results without the impact of items or events that may obscure trends in the Company's underlying performance. This information should be considered as supplemental in nature and should not be considered in isolation or as a substitute for the related financial information prepared in accordance with GAAP. Where non-GAAP financial measures are used, the comparable GAAP financial measure, as well as the reconciliation to the comparable GAAP financial measure, can be found herein.

Fully-Taxable Equivalent Basis. The Company adjusts its net interest income to include its interest income on a fully-taxable equivalent (FTE) basis and further adjusts to exclude purchase accounting interest accretion on acquired loans. Interest income, yields, and ratios on an FTE basis are considered non-GAAP financial measures. Net interest margin (FTE) is calculated as annualized net interest income on an FTE basis divided by average earning assets. Management believes net interest income on an FTE basis provides an insightful picture of the interest margin for comparison purposes. The FTE basis also allows management to assess the comparability of revenue arising from both taxable and tax-exempt sources. The FTE basis assumes a federal statutory tax rate of 21 percent. These measures are considered standard measures of comparison within the banking industry. We encourage readers to consider the Unaudited Consolidated Financial Statements and other financial information contained in this Form 10-O in their entirety, and not to rely on any single financial measure. See Non-GAAP Financial Measures included herein for a reconciliation to the most directly comparable GAAP financial measures.

Limitations associated with non-GAAP financial measures include the risks that persons might disagree as to the appropriateness of items included in these measures and that other companies might calculate these measures differently. These non-GAAP disclosures should not be considered an alternative to the Company's GAAP results.

# **Executive Overview**

We are a financial and bank holding company focused on community banking. Since our incorporation in Montana in 1971, we have grown both organically and through strategic acquisitions. As of November 6, 2025, we operated 289 banking offices, including branches and detached drive-up facilities, in communities across twelve states— Colorado, Idaho, Iowa, Minnesota, Missouri, Montana, Nebraska, North Dakota, Oregon, South Dakota, Washington, and Wyoming. Through our bank subsidiary, First Interstate Bank, we deliver a comprehensive range of banking products and services—including online and mobile banking—to individuals, businesses, government entities, and others throughout our market areas. We are proud to provide lending opportunities to clients that participate in a wide variety of industries, including:

- · Agriculture
- · Healthcare
- Construction
- · Hospitality

Education

· Governmental services

- Housing

- · Professional services
- Real Estate Development
- Retail

- · Technology
- Tourism
- · Wholesale trade

As of September 30, 2025, we had consolidated assets of \$27.3 billion, deposits of \$22.6 billion, net loans held for investment of \$15.6 billion, and total stockholders' equity of \$3.4 billion.

Our principal business activity is lending to, accepting deposits from, and conducting financial transactions for individuals, businesses, governmental entities, and other entities located in the communities we serve. We derive our income principally from interest charged on loans and, to a lesser extent, from interest and dividends earned on fixed income investments. We also derive income from noninterest sources such as: (i) fees received in connection with various lending and deposit services; (ii) wealth management services, such as trust, employee benefit, investment, and insurance services; (iii) mortgage loan originations, sales, and servicing; (iv) merchant and electronic banking services; and (v) from time-to-time, gains on sales of assets and securities.

Our principal expenses include: (i) interest expense on deposit accounts and other borrowings; (ii) salaries and employee benefits; (iii) information technology and communication costs primarily associated with maintaining loan and deposit functions; (iv) furniture, equipment, and occupancy expenses for maintaining our facilities; (v) professional fees, including FDIC insurance assessments; (vi) income tax expense; (vii) provisions for credit losses; (viii) intangible amortization; (ix) other real estate owned expenses; and (x) other segment expenses including legal expenses, advertising and promotion, donations, credit card rewards expense, fees associated with originating and closing loans, insurance, and other expenses necessary to support our employees and service our clients. From time to time, we have incurred, and may incur in the future, costs related to our strategic acquisitions, divestitures and other transactions.

Our loan portfolio consists of a mix of real estate, consumer, commercial, agricultural, and other loans, including fixed, adjustable, and variable rate loans. Our real estate loans comprise commercial real estate, construction (including residential, commercial, and land development construction loans), residential, agricultural, and other real estate loans. Fluctuations in the loan portfolio are directly related to the economies of the communities we serve. While each loan we originate must meet minimum underwriting standards we establish through our credit policies, our bankers are granted limited discretion to approve and price loans within pre-approved limits which assures that we are responsive to community needs in each market area and remain competitive. We fund our loan portfolio primarily with the core deposits from our clients. Historically, we have not relied on brokered deposits as a source of funding. We have also utilized wholesale funding sources to a limited extent.

#### **Recent Trends and Developments**

Our community banking footprint spans across the Rocky Mountain, Pacific Northwest, Midwest, and Southwest regions.

#### Indirect Loans

In January 2025, we announced our plans to stop originating indirect loans as of February 28, 2025. Under our indirect lending program, indirect loans were created when we purchased consumer loan contracts advanced for the purchase of automobiles, boats, recreational vehicles, and other consumer goods from the consumer product dealer network within the market areas we serve. At September 30, 2025, indirect loans represented approximately 3.4% of loan balances and 80.1% of our consumer loan portfolio.

# Sale of Arizona and Kansas Branches

On October 10, 2025, the Bank closed the previously disclosed transaction with Enterprise Bank & Trust ("Enterprise Bank"), a wholly-owned subsidiary of Enterprise Financial Services Corp, pursuant to which Enterprise Bank acquired twelve branches from the Bank, including approximately \$645 million in deposits and certain commercially-oriented loans with outstanding balances of \$305 million, and the owned real estate and fixed and other assets associated with the branches. The branches included all of the Bank's Kansas and Arizona locations, with ten branches in Arizona and two branches in Kansas. At September 30, 2025, \$305.0 million of loans were held-for-sale in connection with the then pending sale of the Arizona and Kansas branches. For more information, see "Note 3 - Loans Held For Sale" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

#### Consumer Credit Card Outsourcing

In June 2025, we completed the outsourcing of our consumer credit card portfolio resulting in the sale of \$74.2 million of consumer credit card loans and recognition of a \$4.3 million gain, net of the related consumer credit card rewards liability.

# 2020 Subordinated Notes Redemption

On August 15, 2025, the Company redeemed in full the outstanding \$100.0 million of aggregate principal amount of its 5.25% fixed-to-floating rate subordinated notes due 2030 (the "2020 Subordinated Notes") without any prepayment penalty, at a redemption price of 100% of the principal amount plus accrued and unpaid interest to, but excluding, August 15, 2025.

#### Redemption of Trust Preferred Securities

On October 7, 2025, the Company redeemed in full the trust securities of HF Financial Capital Trust III ("Trust XI") at a redemption price of 100% of the principal amount of the issued and outstanding debt securities plus accrued and unpaid interest through October 6, 2025. The redemption included all of the outstanding debt securities (\$5.2 million aggregate principal amount) which obligated the issuer trust to concurrently redeem all of the outstanding trust securities (\$5.0 million capital securities and \$0.2 million common securities).

On October 8, 2025, the Company redeemed in full the trust securities of HF Trust IV ("Trust XII") at a redemption price of 100% of the principal amount of the issued and outstanding debt securities plus accrued and unpaid interest through October 7, 2025. The redemption included all of the outstanding debt securities (\$7.2 million aggregate principal amount) which obligated the issuer trust to concurrently redeem all of the outstanding trust securities (\$7.0 million capital securities and \$0.2 million common securities).

# Pending Sale of Certain Nebraska Branches

As previously disclosed, on October 16, 2025, the Bank entered into a Purchase and Assumption Agreement with Security First Bank ("Security First") pursuant to which Security First will acquire eleven (11) Nebraska branches from the Bank. The Purchase and Assumption Agreement provides for the transfer by the Bank to Security First of the facilities and other associated assets of the branches, approximately \$280 million in deposits, and loans with outstanding balances of roughly \$70 million. Consummation of the transaction is subject to regulatory approvals and other customary conditions to closing. It is currently anticipated that the closing of the transaction will take place in early 2026.

# Planned Closure of Four Nebraska Branches

As previously announced, following a strategic review, the Company expects to close four additional branches in Nebraska in the first quarter of 2026. These branch closures are intended to enhance operational efficiency and better position the Company for long-term success. Subsequent to the pending sale of eleven Nebraska branches and the closure of these four branches the Company will have 29 branches remaining in Nebraska.

#### **Economic Conditions**

The Company has ample liquidity, and its capital ratios exceed all regulatory requirements to be deemed "well-capitalized" as of September 30, 2025. Our deposit base is diversified, including by depositor, which includes individuals, businesses across multiple industries, governmental units, and other entities, as well as geographically, across the communities we serve.

As of September 30, 2025, our FDIC insured deposits were 65.1% of total deposits, including accounts eligible for pass-through insurance. As of October 31, 2025, the Bank had available borrowing capacity of \$5.5 billion with the Federal Home Loan Bank ("FHLB") and \$2.7 billion with the Federal Reserve Bank ("FRB") based on pledged investment securities and loan collateral.

With general inflationary pressures easing since July 2023, the Federal Reserve had paused any further changes to short-term interest rates until September 2024 and then decreased them by a total of 100 basis points in 2024. In 2025, the Federal Reserve decreased rates by 25 basis points in September and an additional 25 basis points in October.

The Company's quarterly yield on interest earning assets decreased to 4.73% as of September 30, 2025 from 4.76% as of June 30, 2025, and decreased from 4.83% as of September 30, 2024.

The recent declines in short-term interest rates have benefited the Company's cost of funds, primarily resulting in reduced rates on variable rate debt and deposits. The Company's cost of funds decreased to 1.45% during the three months ended September 30, 2025 from 1.50% during the three months ended June 30, 2025, and decreased from 1.86% during the three months ended September 30, 2024. During the third quarter of 2025, the changes in the mix and cost of funds was partially offset by the change in the mix and yield on earning assets, resulting in an increase of the Company's net interest margin during the three months ended September 30, 2025 to 3.34% from 3.30% during the three months ended June 30, 2025 and from 3.01% for the three months ended September 30, 2024. The Company's FTE net interest margin, a non-GAAP financial measure, increased to 3.36% during the three months ended September 30, 2025, from 3.32% during the three months ended June 30, 2025, and increased from 3.04% during the three months ended September 30, 2024.

The Company expects to see continued volatility in the economic markets, which may include recessionary signs in the economy resulting from, among other things, uncertain conditions due to changes in U.S. policies like the implementation of new tariffs, retaliatory tariffs, and other trade policies. These uncertain conditions could have adverse impacts on the balance sheet and income statement of the Company for the remainder of the year.

A slowdown, downturn, or recession in the U.S. economy or changes in U.S. trade policies could impact the Company by impacting the level of deposits held by our clients, whether through a higher volume of withdrawals or through a lower volume of deposits. Client deposits are one of the Company's primary lending sources. The credit quality of the Company's loans may also be impacted if clients must weather adverse economic conditions which could result in an increase in credit losses or other related expenses. For example, we believe macroeconomic conditions contributed to slower lease-up in our multifamily portfolio, which resulted in an increase in criticized assets during the second quarter of 2025. In the third quarter of 2025, criticized assets improved as compared to the second quarter. For additional information regarding criticized assets, see "Note – Loans Held for Investment – Credit Quality Indicators" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

# **Primary Factors Used in Evaluating Our Business**

As a banking institution, we manage and evaluate our financial condition and our results of operations. We monitor and evaluate the levels and trends of the line items included in our balance sheet and statements of income, as well as the various financial ratios that are commonly used in our industry. We analyze these ratios and financial trends against both our own historical levels as well as the financial condition and performance of comparable banking institutions in our region and nationally.

As discussed in our Annual Report on Form 10-K for the year ended December 31, 2024, our financial performance is impacted by a number of external factors outside our control, as well as our ability to execute on the key components of our strategy for continued success and future growth. See Part II – Other Information, "Item 1A – Risk Factors" herein for additional information regarding risk factors that may negatively impact our expected results, performance, or achievements.

#### Critical Accounting Estimates and Significant Accounting Policies

Our consolidated financial statements are prepared in accordance with GAAP and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. The most significant accounting policies we follow are summarized in Note 1 of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2024, and are also referenced in "Note 1 – Basis of Presentation" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report. There have been no material changes during the third quarter of 2025 in our critical accounting estimates and policies from the critical accounting estimates and policies as described in our Annual Report on Form 10-K for the year ended December 31, 2024.

The preparation of financial statements in conformity with GAAP requires management to measure the Company's financial position and operating results primarily in terms of historic dollars. Changes in the relative value of money due to inflation or recession are generally not considered. We manage our interest rate risk in several ways. Refer to "Note – Derivatives and Hedging Activities" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report for further discussion on how we manage interest rate risk. There can be no assurance that we will not be materially adversely affected by future changes in interest rates, as interest rates are highly sensitive to many factors that are beyond our control.

## **Results of Operations**

The following discussion and analysis is intended to provide detail about the results of our operations and financial condition. More information regarding the results as of December 31, 2024 can be found in our Annual Report on Form 10-K for the year ended December 31, 2024.

#### Net Income

Net income increased \$15.9 million to \$71.4 million, or \$0.69 per diluted share, during the three months ended September 30, 2025, as compared to net income of \$55.5 million, or \$0.54 per diluted share, for the same period in 2024, which is primarily attributable to a \$19.8 million lower provision for credit losses and higher net interest income, partially offset by higher income tax expense. The net interest income increase was the result of lower interest expense on interest bearing liabilities during the 2025 period.

Net income increased \$19.4 million to \$193.3 million, or \$1.87 per diluted share, during the nine months ended September 30, 2025, as compared to net income of \$173.9 million, or \$1.69 per diluted share, for the same period in 2024, which is primarily attributable to higher net interest income and lower provision for credit losses, partially offset by lower noninterest income and higher income tax expense during the 2025 period.

## Net Interest Income

Net interest income, the largest source of our operating income, is derived from interest, dividends, and fees received on interest earning assets, less interest expense incurred on interest bearing liabilities. Interest earning assets primarily include loans and investment securities. Interest bearing liabilities include deposits, short-term borrowings, and various other forms of indebtedness. Net interest income is affected by the level of interest rates, changes in interest rates, the speed of changes to interest rates, and changes in the volume and composition of interest earning assets and interest-bearing liabilities. Changes in interest rate spread, which is the difference between interest earned on assets and interest paid on liabilities, has the most significant impact on net interest income. Other factors like volume of loans, investment securities, and other interest earning assets compared to the volume of interest-bearing deposits, short-term borrowings, and other indebtedness also cause changes in our net interest income between periods. Noninterest-bearing sources of funds, such as demand deposits and stockholders' equity, help to support earning assets.

For the periods indicated, the following table presents average balance sheet information, together with interest income and yields earned on average interest earning assets and interest expense and rates paid on average interest-bearing liabilities.

| Average Balance Sheets, Yields and Rates                         | Three Months Ended |            |                 |                    |            |                 |  |  |  |  |  |  |

<sup>(1)</sup> Average loan balances include loans held for sale and loans held for investment, net of deferred fees and costs, which include non-accrual loans. Interest income includes amortization of deferred loan fees net of deferred loan costs, which is not material.

Net interest income increased \$1.3 million during the three months ended September 30, 2025, as compared to the same period in 2024, primarily due to a decrease in interest expense resulting from decreased rates on other borrowed funds along with a decrease in average other borrowed funds balances, partially offset by lower interest income on investment securities as a result of a decrease in average investment security balances and as a result of a decrease in average loan balances.

Net interest income included interest accretion related to the fair value of acquired loans of \$3.5 million during the three months ended September 30, 2025, compared to interest accretion of \$4.4 million during the three months ended September 30, 2024.

<sup>(2)</sup> Includes average balance of unsettled trades on investment securities.

 $<sup>^{(3)}</sup>$  The Company adjusts interest income and average rates for tax exempt loans and securities to an FTE basis utilizing a 21% tax rate.

<sup>(4)</sup> Management believes fully taxable equivalent, or FTE, interest income is useful to investors in evaluating the Company's performance as a comparison of the returns between a tax-free investment and a taxable alternative. Net FTE interest income and net FTE interest margin are non-GAAP financial measures. See "Non-GAAP Reconciliations" included herein for a reconciliation to the most directly comparable GAAP financial measures.

<sup>&</sup>lt;sup>(5)</sup> Calculated by *dividing* total annualized interest on interest bearing liabilities *by* the sum of total interest-bearing liabilities plus noninterest bearing deposits.

<sup>(6)</sup> Dividends on FHLB and FRB stock.

Our net interest margin ratio increased 33 basis points to 3.34% for the three months ended September 30, 2025, as compared to 3.01% for the same period in 2024 and our net FTE interest margin ratio, a non-GAAP financial measure, increased 32 basis points for the three months ended September 30, 2025, as compared to the same period in 2024. Exclusive of the impact of interest accretion on acquired loans, the net FTE interest margin ratio increased 33 basis points to 3.30% during the three months ended September 30, 2025, as compared to 2.97% for the same period in 2024. The increases in the net interest margin ratio were primarily a result of lower interest expense resulting from decreased other borrowed funds balances.

<sup>(1)</sup> Average loan balances include loans held for sale and loans held for investment, net of deferred fees and costs, which include non-accrual loans. Interest income includes amortization of deferred loan fees net of deferred loan costs, which is not material.

<sup>(2)</sup> Includes average balance of unsettled trades on investment securities.

<sup>(3)</sup> The Company adjusts interest income and average rates for tax exempt loans and securities to an FTE basis utilizing a 21% tax rate.

<sup>(4)</sup> Management believes fully taxable equivalent, or FTE, interest income is useful to investors in evaluating the Company's performance as a comparison of the returns between a tax-free investment and a taxable alternative. Net FTE interest income and net FTE interest margin are non-GAAP financial measures. See "Non-GAAP Reconciliations" included herein for a reconciliation to the most directly comparable GAAP financial measures.

<sup>(5)</sup> Calculated by dividing total annualized interest on interest-bearing liabilities by the sum of total interest-bearing liabilities plus non-interest-bearing deposits.

<sup>&</sup>lt;sup>(6)</sup> Dividends on FHLB and FRB stock.

Net interest income increased \$11.7 million during the nine months ended September 30, 2025, as compared to the same period in 2024, primarily due to a decrease in interest expense resulting from decreased rates on other borrowed funds along with a decrease in average other borrowed funds balances, partially offset by lower interest income on investment securities as a result of a decrease in average investment security balances and as a result of a decrease in average loan balances.

Net interest income included interest accretion related to the fair value of acquired loans of \$12.4 million during the nine months ended September 30, 2025, compared to interest accretion of \$16.0 million during the nine months ended September 30, 2024.

Our net interest margin ratio increased 31 basis points to 3.27% for the nine months ended September 30, 2025, as compared to 2.96% for the same period in 2024 and our net FTE interest margin ratio, a non-GAAP financial measure, increased 31 basis points for the nine months ended September 30, 2025, as compared to the same period in 2024. Exclusive of the impact of interest accretion on acquired loans, the net FTE interest margin ratio increased 32 basis points to 3.23% during the nine months ended September 30, 2025, as compared to 2.91% for the same period in 2024. The increases in the net interest margin ratio were primarily a result of lower interest expense resulting from decreased other borrowed funds balances.

The table below sets forth a summary of the changes in interest income and interest expense resulting from estimated changes in average asset and liability balances (volume) and estimated changes in average interest rates (referred to as "rate") for the three and the nine months ended September 30, 2025 and 2024. Changes which are not due solely to volume or rate have been allocated to these categories based on the respective percent changes in average volume and average rate as they compare to each other.

# Provision for Credit Losses

Fluctuations in the provision for credit losses reflect charge-offs and recoveries as well as management's estimate of possible credit losses based upon the composition of our loan portfolio, evaluation of the borrowers' ability to repay, collateral value of underlying loans, loan loss trends, and estimated effects of current and forecasted economic conditions on our loans held for investment and investment securities portfolios.

The Company recorded a zero provision for credit losses, resulting from a reduction of credit losses of \$1.5 million on loans held for investment and a provision for credit losses for unfunded commitments of \$1.5 million during the three months ended September 30, 2025, as compared to a \$19.8 million provision for credit losses during same period in 2024. Net charge-offs were \$2.3 million or an annualized 0.06% of average loans outstanding during the three months ended September 30, 2025, as compared to net charge-offs of \$27.4 million, or an annualized 0.60% of average loans outstanding during the same period in 2024. Net loan charge-offs in the third quarter of 2025 were composed of charge-offs of \$6.7 million, which were partially offset by recoveries of \$4.4 million.

The provision for credit losses during the nine months ended September 30, 2025 of \$19.7 million included a provision for credit losses on loans held for investment of \$18.8 million, a provision for credit losses on unfunded commitments of \$1.1 million, and a reduction of credit losses on investment securities of \$0.2 million. This compares to a provision for credit losses of \$34.1 million during the same period in 2024. Net charge-offs were \$17.1 million or an annualized 0.13% of average loans outstanding during the nine months ended September 30, 2025, as compared to net charge-offs of \$49.3 million, or an annualized 0.36% of average loans outstanding during the same period in 2024. Net loan charge-offs during the nine months ended September 30, 2025 were composed of charge-offs of \$30.5 million, which were partially offset by recoveries of \$13.4 million.

For information regarding our non-performing loans, see "Financial Condition – Non-Performing Assets" included herein. For more information on our allowance for credit losses, see "Financial Condition – Allowance for Credit Losses" included herein.

#### Noninterest Income

Noninterest income also contributes to our operating results with fee-based revenues such as payment services, mortgage banking and wealth management revenues, service charges on deposit accounts, and other service charges, commissions and fees. The following table presents the composition of our noninterest income for the periods indicated:

| Noninterest Income                          | Th |      | Ende | d September |             |          | N  | ine Months En | d September |             |          |
|---|----|------|------|-------------|-------------|----------|----|---------------|-------------|-------------|----------|
| (Dollars in millions)                       |    | 2025 |      | 2024        | \$ Change   | % Change |    | 2025          | 2024        | \$ Change   | % Change |
| Payment services revenues                   | \$ | 16.8 | \$   | 18.7        | \$<br>(1.9) | (10.2)%  | \$ | 51.7          | \$<br>55.7  | \$<br>(4.0) | (7.2)%   |
| Mortgage banking revenues                   |    | 1.5  |      | 1.7         | (0.2)       | (11.8)   |    | 4.7           | 5.1         | (0.4)       | (7.8)    |
| Wealth management revenues                  |    | 10.4 |      | 9.6         | 0.8         | 8.3      |    | 29.9          | 28.2        | 1.7         | 6.0      |
| Service charges on deposit accounts         |    | 7.0  |      | 6.6         | 0.4         | 6.1      |    | 20.5          | 19.0        | 1.5         | 7.9      |
| Other service charges, commissions and fees |    | 2.1  |      | 2.2         | (0.1)       | (4.5)    |    | 6.5           | 6.5         | _           | _        |
| Other income                                |    | 5.9  |      | 7.6         | (1.7)       | (22.4)   |    | 13.5          | 16.6        | (3.1)       | (18.7)   |
| Total noninterest income                    | \$ | 43.7 | \$   | 46.4        | \$<br>(2.7) | (5.8)    | \$ | 126.8         | \$<br>131.1 | \$<br>(4.3) | (3.3)    |

Payment services revenues consist of interchange fees that merchants pay for processing electronic payment transactions and ATM service fees. Payment services revenues decreased \$1.9 million during the three months ended September 30, 2025, as compared to the same period in 2024. For the nine months ended September 30, 2025, payment services revenues decreased \$4.0 million, as compared to the same period in 2024, primarily due to a decrease in credit card interchange revenue and a decrease in debit card revenues.

Wealth management revenues primarily consist of annuity sales and investment, retirement, trust, and estate services. Wealth management revenues increased \$0.8 million during the three months ended September 30, 2025 compared to the same period in 2024. For the nine months ended September 30, 2025, wealth management revenues increased \$1.7 million, as compared to the same period in 2024, primarily driven by an increase in trust and estate fees.

Service charges on deposit accounts are primarily driven by service fees and overdraft charges on deposit accounts. Service charges on deposit accounts increased \$0.4 million during the three months ended September 30, 2025 compared to the same period in 2024. For the nine months ended September 30, 2025, service charges on deposit accounts increased \$1.5 million, as compared to the same period in 2024, primarily driven by an increase in ACH and wire services.

Other income primarily includes company-owned life insurance revenues, check printing income, and gains on sales of miscellaneous assets. Other income decreased \$1.7 million during the three months ended September 30, 2025 compared to the same period in 2024, primarily due to a gain on sale of one our branches during the same period in 2024. Other income decreased \$3.1 million during the nine months ended September 30, 2025, as compared to the same period in 2024, primarily due to the second quarter of 2025 valuation allowance for loans transferred from loans held for investment to held for sale related to the then pending sale of Arizona and Kansas branches, which transaction closed on October 10, 2025 subsequent to the third quarter of 2025, partially offset by a gain received net of the related credit card rewards liability for the sale of the consumer credit card portfolio and an increase in life insurance proceeds in the third quarter of of 2025, and due to a gain on sale of one of our branches during the same period in 2024.

#### Noninterest Expense

The following table presents the composition of our noninterest expense for the periods indicated:

| Noninterest Expense            | Thr |       | Ended<br>0, | d September |             |          | N  | ine Months E | nded<br>0, | l September |           |          |
|--------------------------------|-----|-------|-------------|-------------|-------------|----------|----|--------------|------------|-------------|-----------|----------|

| OREO expense, net of income    |     | _     |             | _           | _           | _        |    | 0.5          |            | 4.0         | (3.5)     | (87.5)   |
| Professional fees              |     | 6.1   |             | 4.2         | 1.9         | 45.2     |    | 17.3         |            | 16.1        | 1.2       | 7.5      |
| FDIC insurance premiums        |     | 3.7   |             | 5.2         | (1.5)       | (28.8)   |    | 12.0         |            | 19.2        | (7.2)     | (37.5)   |
| Other intangibles amortization |     | 3.4   |             | 3.6         | (0.2)       | (5.6)    |    | 10.2         |            | 11.0        | (0.8)     | (7.3)    |
| Other expenses                 |     | 26.9  |             | 24.2        | 2.7         | 11.2     |    | 79.5         |            | 74.5        | 5.0       | 6.7      |
| Total noninterest expense      | \$  | 157.9 | \$          | 159.4       | \$<br>(1.5) | (0.9)    | \$ | 473.6        | \$         | 476.5       | \$ (2.9)  | (0.6)    |

Noninterest expense decreased \$1.5 million during the three months ended September 30, 2025 compared to the same period in 2024 and decreased \$2.9 million during the nine months ended September 30, 2025 as compared to the same period in 2024.

Salaries and wages expense decreased \$4.7 million during the three months ended September 30, 2025 as compared to the same period in 2024, primarily due to a \$3.8 million accrual related to the Chief Executive Officer transition in the third quarter of 2024 and \$3.1 million of lower short-term incentive accruals, which were partially offset by higher salaries, during the third quarter of 2025. Salaries and wages expense decreased \$2.6 million during the nine months ended September 30, 2025 as compared to the same period in 2024, primarily due to a \$3.8 million accrual related to the Chief Executive Officer transition in the third quarter of 2024 and lower short-term incentive accruals in the second quarter of 2025, which were partially offset by higher salaries and deferred loan costs.

Employee benefits expense decreased \$1.5 million during the three months ended September 30, 2025 as compared to the same period in 2024, primarily due to lower medical costs. Employee benefits expense increased \$0.2 million during the nine months ended September 30, 2025 as compared to the same period in 2024.

Occupancy, net expense increased \$1.4 million during the three months ended September 30, 2025 and increased \$4.5 million during the nine months ended September 30, 2025, as compared to the same periods in 2024, primarily due to increases in janitorial, maintenance, repairs, and snow removal costs.

Other Real Estate Owned ("OREO") expense, net of income had no change during the three months ended September 30, 2025 and decreased \$3.5 million during the nine months ended September 30, 2025, as compared to the same periods in 2024. The decrease during the nine months ended September 30, 2025 was primarily due to a decrease in OREO valuation write-downs.

Professional fees increased \$1.9 million during the three months ended September 30, 2025 and increased \$1.2 million during the nine months ended September 30, 2025, as compared to the same periods in 2024, primarily due to increases in legal services, which were partially offset by lower audit and consulting services during the nine months ended September 30, 2025.

FDIC insurance premiums decreased \$1.5 million during the three months ended September 30, 2025 and decreased \$7.2 million during the nine months ended September 30, 2025, primarily resulting from lower assessment fees as a result of lower average assets compared to the same periods in 2024, which included a \$1.5 million special assessment accrual recorded during the first quarter of 2024.

Other expenses primarily include advertising and public relations costs; office supply, postage, freight, telephone, and travel expenses; donations expense; debit and credit card expenses; board of director fees; legal expenses; and other losses. Other expenses increased \$2.7 million during the three months ended September 30, 2025 and increased \$5.0 million during the nine months ended September 30, 2025, primarily resulting from increases in donation expense and the write-down of the fixed assets associated with the Arizona and Kansas branches pending disposition compared to the same periods in 2024.

# Income Tax Expense

On July 4, 2025, the One Big Beautiful Bill Act ("OBBBA") was signed into law and contains numerous tax provisions. The Company is currently evaluating the OBBBA and does not expect a material impact on the consolidated financial statements.

Our effective federal tax rate was 17.8% for the three months ended September 30, 2025 compared to 18.6% for the three months ended September 30, 2024, and was 18.3% for the nine months ended September 30, 2025 compared to 18.5% for the nine months ended September 30, 2024. Fluctuations in effective federal income tax rates are primarily driven by changes in actual and forecasted pre-tax income.

State income tax applies primarily to pretax earnings generated within Arizona, Colorado, Idaho, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, North Dakota, Oregon, and South Dakota. Our effective state tax rate was 5.0% for the three months ended September 30, 2025 compared to 5.2% for the three months ended September 30, 2024 and was 5.1% for the nine months ended September 30, 2025 compared to 5.2% for the nine months ended September 30, 2024.

## **Financial Condition**

#### Total Assets

Total assets decreased \$1,804.5 million, or 6.2%, to \$27,332.9 million as of September 30, 2025, from \$29,137.4 million as of December 31, 2024, primarily due to decreases in investment securities and loans. Significant fluctuations in balance sheet accounts are discussed below. More information regarding the results as of December 31, 2024 can be found in our Annual Report on Form 10-K for the year ended December 31, 2024.

#### Investment Securities

We manage our investment portfolio to obtain the highest yield possible while meeting our credit and interest rate risk tolerance and liquidity guidelines and satisfying the pledging requirements for deposits of state and political subdivisions and securities sold under repurchase agreements. Our portfolio principally comprises U.S. treasury notes, U.S. government agency, U.S. government agency commercial mortgage-backed securities, U.S. government residential mortgage-backed securities, U.S. government agency collateralized mortgage obligations, collateralized loan obligation, corporate securities, and tax-exempt municipal securities.

Debt securities rated in the highest category by nationally recognized rating agencies and debt securities backed by the U.S. Government and government sponsored agencies, both on a direct and indirect basis, represented approximately 94.5% and 93.9% of the investment portfolio's available-for-sale and held-to maturity segments, respectively, at September 30, 2025. All other held-to-maturity debt securities rated below AAA, not backed by the U.S. Government or government sponsored agencies, or which are not rated represented approximately 6.1% of total held-to maturity debt securities at September 30, 2025.

Investment securities decreased \$438.8 million, or 5.7%, to \$7,305.8 million, or 26.7% of total assets, as of September 30, 2025, from \$7,744.6 million, or 26.6% of total assets, as of December 31, 2024. The decrease was primarily resulting from called securities, pay-downs, and maturities, partially offset by a \$153.6 million increase in fair market values and \$803.5 million in purchases of investment securities during the period.

As of September 30, 2025 and December 31, 2024, the estimated duration of our investment portfolio was 3.5 and 3.7 years, respectively.

As of September 30, 2025 and December 31, 2024, we had \$5,797.6 million and \$6,296.7 million, respectively, of investment securities that had been in a continuous loss position for more than twelve months. Gross unrealized losses on these securities totaled \$495.6 million as of September 30, 2025, and were attributable to changes in interest rates. At September 30, 2025 and December 31, 2024, the Company had no allowance for credit losses on available-for-sale securities and an allowance for credit losses on held-to maturity securities classified as corporate and municipal securities of \$0.7 million and \$0.9 million, respectively.

Loans Held for Investment, Net of Deferred Fees and Costs

Loans held for investment, net of deferred fees and costs, decreased \$2,010.5 million to \$15,834.4 million as of September 30, 2025 as compared to \$17,844.9 million as of December 31, 2024.

The following table presents the composition and comparison of loans held for investment for the periods indicated:

|  | September 30, 2025 | December 31, 2024 | \$ Change | % Change |
|--|--------------------|-------------------|-----------|----------|
| Real estate:   |                    |                   |           |          |
| Commercial   | 8,496.4 \$         | 9,263.2 \$        | (766.8)   | (8.3)%   |
| Construction   | 960.8              | 1,244.6           | (283.8)   | (22.8)   |
| Residential  | 2,136.0            | 2,191.6           | (55.6)    | (2.5)    |
| Agricultural   | 623.0              | 701.1             | (78.1)    | (11.1)   |
| Total real estate  | 12,216.2           | 13,400.5          | (1,184.3) | (8.8)    |
| Consumer:  |                    |                   |           |          |
| Indirect   | 540.3              | 725.0             | (184.7)   | (25.5)   |
| Direct and advance lines                                       | 134.3              | 134.0             | 0.3       | 0.2      |
| Credit card  | _                  | 77.6              | (77.6)    | (100.0)  |
| Total consumer   | 674.6              | 936.6             | (262.0)   | (28.0)   |
| Commercial   | 2,447.4            | 2,829.4           | (382.0)   | (13.5)   |
| Agricultural   | 495.5              | 687.9             | (192.4)   | (28.0)   |
| Other, including overdrafts                                    | 10.2               | 1.6               | 8.6       | 537.5    |
| Deferred loan fees and costs                                   | (9.5)              | (11.1)            | 1.6       | (14.4)   |
| Loans held for investment, net of deferred loan fees and costs | 5 15,834.4 \$      | 17,844.9 \$       | (2,010.5) | (11.3)   |

The Company discontinued accepting applications to originate indirect loans during the first quarter of 2025, which resulted in \$66.8 million of continued amortization for the indirect portfolio in the third quarter of 2025. See "—Indirect Loans" above for additional information. The Company sold \$74.2 million of consumer credit card loans in the second quarter of 2025. See "—Consumer Credit Card Outsourcing" above for additional information. Additionally, as of September 30, 2025, the Company transferred \$305.0 million of loans held for investment to loans held for sale related to the then pending sale of the Arizona and Kansas branches, which closed on October 10, 2025. See "—Sale of Arizona and Kansas Branches" above for additional information regarding the transaction. The remaining decline in loan balances is due to paydowns and maturities.

Non-Performing Assets

Non-performing assets include non-performing loans and OREO.

Non-Performing Loans. Non-performing loans include non-accrual loans and loans contractually past due 90 days or more and still accruing interest.

Non-accrual loans. We generally place loans on non-accrual status when they become 90 days past due unless they are well secured and in the process of collection or if the collection of principal and interest is in doubt. When a loan is placed on non-accrual status, any interest previously accrued but not collected is reversed from income. Non-accrual loans increased approximately \$43.3 million, or 31.3%, to \$181.6 million as of September 30, 2025, from \$138.3 million as of December 31, 2024, primarily due to an increase in non-accrual commercial real estate of \$18.8 million and agricultural real estate of \$21.6 million during 2025. As of September 30, 2025 there were approximately \$101.0 million of non-accrual loans for which there was no related allowance for credit losses, as these loans had sufficient collateral securing the loan for repayment.

<u>Loans contractually past due 90 days or more and still accruing interest</u>. Loans past due 90 days or more accruing interest were \$0.6 million as of September 30, 2025 compared to \$3.0 million as of December 31, 2024.

Other Real Estate Owned (OREO). OREO consists of real property acquired through foreclosure on the collateral underlying defaulted loans. We record OREO at fair value less estimated selling costs. Any excess of loan carrying value over the fair value of the real estate at the time it is acquired, is recorded as a charge against the allowance for credit losses. Estimated losses that result from the ongoing periodic valuation of these properties are charged to earnings in the period in which they are identified. OREO decreased \$0.9 million, or 20.9%, to \$3.4 million as of September 30, 2025, from \$4.3 million as of December 31, 2024.

The following table sets forth information regarding non-performing assets as of the dates indicated:

# Non-Performing Assets

| (Dollars in millions)                                       | Sep | tember 30, 2025 | December 31, 2024 |
|---|-----|-----------------|-------------------|

# Allowance for Credit Losses

The Company performs a quarterly assessment of the appropriateness of its allowance for credit losses in accordance with GAAP. The allowance for credit losses is established through a provision for credit losses based on our evaluation of quantitative and qualitative risk factors in our loan portfolio at each balance sheet date. In determining the allowance for credit losses, we estimate losses on specific loans, or groups of loans, where the expected loss can be identified and reasonably determined over the life of the loans. The balance of the allowance for credit losses is based on internally assigned risk classifications of loans, historical loan loss rates, changes in the nature or tenure of the loan portfolio, overall portfolio quality, industry concentrations, delinquency trends, current environmental and economic factors, and the estimated impact of forecasted economic conditions on historical loan loss rates.

The allowance for credit losses is increased by provisions charged against earnings and net recoveries of charged-off loans and is reduced by negative provisions credited to earnings and net loan charge-offs. The allowance for credit losses consists of three elements:

(1) A specific valuation allowance associated with collateral-dependent and other individually evaluated loans. Specific valuation allowances are determined based on assessment of the fair value of the collateral underlying the loans as determined through independent appraisals, the present value of future cash flows, observable market prices, and any relevant qualitative or environmental factors impacting loans.

- (2) A collective valuation allowance based on loan loss experience and future expectations for similar loans with similar characteristics and trends. The Company applies open pool methodologies for all portfolio segments. The open pool methodology averages quarterly loss rates by modeling segment, calculated as quarter-to-date net charge off balance divided by the end of period balance. Loss rates are recalculated quarterly with recoveries captured in the quarter a loan was charged off, are averaged across a look back period from 2009 to the current period, and are annualized. Macroeconomic-conditioned historical loss rates are applied to loan-level cash flows. Expected future principal and interest cash flows are calculated using contractual repayment terms and prepayment, utilization, interest rate, and probability of default assumptions. Macroeconomic sensitivity models calculate segment-specific multipliers using third party forecast data. The multipliers condition the annual loss rates over the 2-year forecast period, followed by a 1-year straight-line reversion to the unadjusted historical average loss rates. The unadjusted loss rates then apply for the remaining life of the loan. Estimated losses are totaled and aggregated to the segment level.
- (3) A qualitative valuation allowance determined based on asset quality trends, industry concentrations, environmental risks, changes in portfolio composition, and other qualitative risk factors, both internal and external to the Company. Other qualitative factors, including changes in loan and lending policies, collateral quality, underwriting standards and personnel, credit review quality, and model imprecision, are also considered.

Based on the assessment of the appropriateness of the allowance for credit losses, the Company records provisions for credit losses to maintain the allowance for credit losses at appropriate levels.

Loans acquired in business combinations are initially recorded at fair value as adjusted for credit risk. For loans with no significant evidence of credit deterioration since origination, the difference between the fair value and the unpaid principal balance of the loan at the acquisition date is amortized into interest income using the effective interest method over the remaining period to contractual maturity. An allowance for credit losses is recorded for the expected credit losses over the life of the loan. Subsequent changes to the allowance for credit losses are recorded through provision expense using the same methodology as other loans held for investment.

For loans acquired in business combinations with evidence of deterioration in credit quality since origination, the Company determines the fair value of the loans by estimating the amount and timing of principal and interest cash flows initially expected to be collected on the loans and discounting those cash flows at an appropriate market rate of interest. An allowance for credit losses is recognized by estimating the expected credit losses of the purchased asset and recording an adjustment to the acquisition date fair value to establish the initial amortized cost basis of the asset. Differences between the established amortized cost basis, and the unpaid principal balance of the asset, is considered to be a non-credit discount/premium and is accreted/amortized into interest income using the level yield interest method. Subsequent changes to the allowance for credit losses are recorded through provision expense using the same methodology as other loans held for investment.

Loans, or portions thereof, are charged-off against the allowance for credit losses when management believes the collectability of the principal is unlikely, or, with respect to consumer installment loans, according to an established delinquency schedule. Generally, loans are charged-off when (1) there has been no material principal reduction within the previous 90 days and there is no pending sale of collateral or other assets, (2) there is no significant or pending event which will result in principal reduction within the upcoming 90 days, (3) it is clear that we will not be able to collect all or a portion of the loan, or (4) foreclosure or repossession actions are pending. Loan charge-offs do not directly correspond with the receipt of independent appraisals or the use of observable market data if the collateral value is determined to be sufficient to repay the principal balance of the loan.

If a collateral-dependent loan is adequately collateralized, a specific valuation allowance for credit losses is not recorded. As such, significant changes in collateral-dependent and non-performing loans do not necessarily correspond proportionally with changes in the specific valuation component of the allowance for credit losses. Additionally, the Company expects the timing of charge-offs will vary between quarters and will not necessarily correspond proportionally to changes in the allowance for credit losses or changes in non-performing or collateral-dependent loans due to timing differences among the initial identification of a collateral-dependent loan, recording of a specific valuation allowance for collateral-dependent loans, and any resulting charge-off of uncollectible principal.

Our allowance for credit losses was \$205.8 million, or 1.30% of loans held for investment as of September 30, 2025 compared to \$204.1 million, or 1.14% of loans held for investment, as of December 31, 2024. The increase reflected changes in the mix of loan balances, the attributes of the current portfolio, and changes in the general economic outlook. The Company's allowance for off-balance sheet credit losses was \$6.3 million as of September 30, 2025, compared to \$5.2 million as of December 31, 2024.

Although we have established our allowance for credit losses in accordance with GAAP in the United States and we believe that the allowance for credit losses is appropriate to provide for known and expected losses in the portfolio, future provisions will be subject to on-going evaluations of the risks in the loan portfolio. If the economy declines or asset quality deteriorates, material additional provisions could be required.

The following table sets forth information regarding our allowance for credit losses as of the dates and for the periods indicated:

| Allowance for Credit Losses  | Three Months Ended |                 |        |                 |        | Nine Months Ended |          |                 |    |                 |  |

# Total Liabilities

Total liabilities decreased \$1,949.2 million, or 7.5%, to \$23,884.2 million as of September 30, 2025, from \$25,833.4 million as of December 31, 2024, primarily due to decreases in deposits and other borrowed funds. Significant fluctuations in liability accounts are discussed below.

#### Deposits

Our deposits consist of noninterest bearing and interest bearing demand, savings, individual retirement, and time deposit accounts. Total deposits decreased \$410.6 million, or 1.8%, to \$22,605.0 million as of September 30, 2025, from \$23,015.6 million as of December 31, 2024, with decreases in all types of deposits except interest bearing savings and time, \$250 thousand and over deposits.

The following table summarizes our deposits as of the dates indicated:

#### **Deposits**

| (Dollars in millions)      | Sep | otember 30,<br>2025 | Percent<br>of Total | December 31,<br>2024 | Percent of Total |

<sup>(1)</sup> Included in "Time, other" are IntraFi Network Deposits, or Intrafi, deposits of \$13.3 million and \$12.5 million as of September 30, 2025 and December 31, 2024, respectively.

#### Deposit Insurance

The deposits of the Bank are insured up to the applicable limits by the Deposit Insurance Fund ("DIF") of the FDIC, generally up to \$250,000 per insured depositor. The Bank pays deposit insurance premiums based on assessment rates established by the FDIC. The estimated amount of deposits in excess of the FDIC insurance limit at September 30, 2025 was \$7.9 billion, or 34.9% of total deposits. Estimates of uninsured deposits are based on the methodologies and assumptions used in the Bank's call reports and do not necessarily reflect an evaluation of all scenarios that potentially would determine the availability of deposit insurance to customer accounts based on FDIC regulations.

# Other Borrowed Funds

Other borrowed funds is comprised of variable-rate, overnight and fixed-rate borrowings with remaining contractual tenors of up to one year through the Federal Home Loan Bank, to address short-term funding needs. Other borrowed funds decreased \$1,567.5 million, or 100.0%, to zero as of September 30, 2025 from \$1,567.5 million as of December 31, 2024. The decrease was funded by cash flows from paydowns and maturities of investment securities and loans.

# Long-Term Debt

Long-term debt increased \$14.0 million, or 10.6%, to \$146.2 million as of September 30, 2025 from \$132.2 million as of December 31, 2024, primarily as a result of the Company's issuance of \$125.0 million aggregate principal amount of 7.625% fixed-to-floating rate subordinated notes due 2035 (the "2025 Subordinated Notes") in the second quarter of 2025, which was partially offset by a reduction in debt related to the New Market Tax Credits that the Company consolidated through its controlling interest in variable interest entity investments. For additional information regarding the 2025 Subordinated Notes, see "Note – Long-Term Debt" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

# **Capital Resources and Liquidity Management**

Capital Resources. Stockholders' equity is influenced primarily by earnings, dividends, sales and redemptions of common stock, and changes in the unrealized holding gains or losses, net of taxes, on available-for-sale investment securities. Stockholders' equity increased \$144.7 million, or 4.4%, to \$3,448.7 million as of September 30, 2025, from \$3,304.0 million as of December 31, 2024, due to a decrease to the unrealized losses on available-for-sale securities through other comprehensive income and the retention of retained earnings, partially offset by cash dividends paid, stock repurchases of vested restricted shares tendered in lieu of cash for payment of income tax withholding amounts by participants, and stock repurchases as part of the stock repurchase program.

On August 28, 2025, the board of directors of the Company adopted a new stock repurchase program, pursuant to which the Company has been authorized to repurchase up to \$150.0 million worth of its issued and outstanding shares of common stock on or prior to March 31, 2027, which is the expiration date of the program. Any repurchased shares will be returned to authorized but unissued shares of common stock, as permitted under applicable Delaware law. See Part II – Other Information, "Item 1A – Risk Factors" for additional information.

During the three and nine months ended September 30, 2025, 842,903 shares of common stock were repurchased under the new stock repurchase program at a total cost of \$27.5 million or a weighted average price of \$32.58 per share. As of September 30, 2025, following these repurchases, approximately \$122.5 million remained available for future purchases under the program. From October 1, 2025 to October 31, 2025, the Company purchased an additional 1.1 million shares of common stock, for a total repurchase of approximately \$60.2 million or approximately 1.9 million shares.

On October 28, 2025, the Company's board of directors declared a dividend of \$0.47 per common share, payable on November 20, 2025, to common stockholders of record as of November 10, 2025. The dividend equates to a 6.0% annual yield based on the \$31.11 average closing price of the Company's common stock as reported on NASDAQ during the third quarter of 2025.

As a bank holding company, the Company must comply with the capital requirements established by the Federal Reserve, and our subsidiary Bank must comply with the capital requirements established by the FDIC. The current risk-based guidelines applicable to us and our Bank are based on the Basel III framework, as implemented by the federal bank regulators. As of September 30, 2025 and December 31, 2024, the Company had capital levels that, in all cases, exceeded the guidelines to be deemed "well-capitalized." For additional information regarding our capital levels, see "Note – Regulatory Capital" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

Liquidity. Liquidity measures our ability to meet current and future cash flow needs on a timely basis and at a reasonable cost. We manage our liquidity position to meet the daily cash flow needs of clients, while maintaining an appropriate balance between assets and liabilities to meet the return-on-investment objectives of our shareholders. Our liquidity position is supported by management of liquid assets and liabilities and access to alternative sources of funds. Liquid assets include cash, interest bearing deposits in banks, federal funds sold, available-for-sale investment securities, and maturing or prepaying balances in our held-to-maturity investment and loan portfolios. Liquid liabilities include core deposits, federal funds purchased, securities sold under repurchase agreements, and borrowings. Other sources of liquidity include the sale of loans, the ability to acquire additional national market funds through non-core deposits, the issuance of additional collateralized borrowings such as FHLB advances, the issuance of debt securities, additional borrowings through the Federal Reserve's discount window, and the issuance of preferred or common securities. Our short-term and long-term liquidity requirements are primarily to fund ongoing operations, including payment of interest on deposits and debt, extensions of credit to borrowers, capital expenditures, and shareholder dividends. These liquidity requirements are met primarily through cash flow from operations, redeployment of prepaying and maturing balances in our loan and investment portfolios, the issuance of securities, borrowings and other debt financing, and increases in client deposits.

For the nine months ended September 30, 2025, net cash provided by operating activities was \$238.3 million, net cash provided by investing activities was \$2,485.9 million and net cash used in financing activities was \$2,171.6 million. Major uses of cash were \$410.6 million in outflows of deposits, and \$1,567.5 million in repayment of other borrowed funds. Major sources of cash included \$1,608.3 million in net loan activity and \$1,396.2 million in investment security maturities and paydowns. Total cash and cash equivalents were \$1,449.2 million as of September 30, 2025, compared to \$896.6 million as of December 31, 2024. For additional information regarding our operating, investing, and financing cash flows, see the unaudited "Consolidated Statements of Cash Flows," included in Part I – Financial Information, "Item 1 – Financial Statements." For additional information regarding our deposits, see "–Financial Condition – Deposits," above.

As of September 30, 2025, the Company had \$125.0 million of aggregate principal amount of 2025 Subordinated Notes, and available borrowing capacity of \$5,057.3 million with the FHLB. The Company has unused federal fund lines of credit with third parties amounting to \$235.0 million, subject to funds availability. These lines are subject to cancellation

without notice. The Company also has an unused line of credit with the FRB for borrowings up to \$2,691.8 million secured by government and agency backed securities and a blanket pledge of agricultural and commercial loans.

The 2020 Subordinated Notes were scheduled to mature on May 15, 2030 and bore interest equal to a benchmark rate, which was Three-Month Term SOFR (as defined in the indenture governing the 2020 Subordinated Notes) plus a spread of 518.0 basis points, payable quarterly in arrears on February 15, May 15, August 15 and November 15 of each year, commencing on August 15, 2025. On August 15, 2025, we redeemed in full the 2020 Subordinated Notes, without any prepayment penalty, at a redemption price of 100% of the principal amount plus accrued and unpaid interest to, but excluding, August 15, 2025.

As a holding company, we are a corporation separate and apart from our subsidiary Bank and, therefore, we provide for our own liquidity. Our primary sources of funding include management fees and dividends declared and paid by the Bank and access to capital markets. There are statutory, regulatory, and debt covenant limitations that affect the ability of our Bank to pay dividends to us. Management believes that such limitations will not impact our ability to meet our ongoing short-term cash obligations.

The Company continuously monitors our liquidity position and adjustments are made to the balance between sources and uses of funds as deemed appropriate. We are not aware of any events that are reasonably likely to have a material adverse effect on our liquidity, capital resources, or operations. In addition, we are not aware of any regulatory recommendations regarding liquidity, which if implemented, would have a material adverse effect on us. The Bank satisfies incremental liquidity needs with either liquid assets or external funding sources. Available liquidity includes cash, FHLB advances and FRB borrowings through the discount window. The Bank has pledged its investment securities portfolio to access wholesale funding as needed and does not intend to sell or restructure securities at this time.

Through the Bank's relationship with the FHLB, the Bank owns \$10.7 million of FHLB stock and has access to additional liquidity and funding sources through FHLB advances. The Bank's borrowing capacity is dependent upon the amount of collateral the Bank places at the FHLB.

# **Recent Accounting Pronouncements**

See "Note – Recent Authoritative Accounting Guidance" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report for details of recently issued accounting pronouncements and their expected impact on our financial statements.

# Item 3.

# QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

This analysis should be read in conjunction with text under the caption "Quantitative and Qualitative Disclosures About Market Risk" in our Form 10-K, which text is incorporated herein by reference. Our analysis of market risk and market-sensitive financial information contains forward-looking statements and is subject to the disclosure at the beginning of "Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations" regarding such forward-looking information.

# **Asset Liability Management**

The goal of asset liability management is the prudent control of market risk, liquidity, and capital. Asset liability management is governed by policies, goals, and objectives adopted and reviewed by the Bank's board of directors. Development of asset liability management strategies and monitoring of interest rate risk are the responsibility of the Asset Liability Committee, or ALCO, which is composed of members of senior management.

#### Interest Rate Risk

Interest rate risk is the risk of loss of future earnings or long-term value due to changes in interest rates. Our primary source of earnings is net interest income, which is affected by the level of interest rates, changes in interest rates, the speed of changes in interest rates, the relationship between rates on interest bearing assets and liabilities, the impact of interest rate fluctuations on asset prepayments, and the mix of interest bearing assets and liabilities.

The ability to optimize net interest income is largely dependent upon the achievement of an interest rate spread that can be managed during periods of fluctuating interest rates. Interest sensitivity is a measure of the extent to which net interest income will be affected by market interest rates over a period.

## Net Interest Income Sensitivity

We believe net interest income sensitivity provides the best perspective of how day-to-day decisions affect our interest rate risk profile. We monitor net interest income sensitivity by utilizing an income simulation model to subject 12- and 24- month net interest income to various rate movements. Simulations modeled quarterly include scenarios where market rates change instantaneously up or down in a parallel or non-parallel manner. Estimates produced by our income simulation model are based on numerous assumptions including, but not limited to: (1) the timing of changes in interest rates, (2) shifts or rotations in the yield curve, (3) repricing characteristics for market rate sensitive instruments, (4) differing sensitivities of financial instruments due to differing underlying rate indices, (5) varying loan prepayment speeds for different interest rate scenarios, (6) the effect of interest rate limitations in our assets, such as caps and floors, and (7) overall growth and repayment rates and product mix of assets and liabilities. Because of limitations inherent in any approach used to measure interest rate risk, simulation results are not intended as a forecast of the actual effect of a change in market interest rates on our results, but rather to provide insight into our current interest rate exposure and execute appropriate asset/liability management strategies accordingly.

The following table presents the net interest income simulation model's projected change in net interest income over a one-year horizon due to a change in interest rates. The net interest income simulation assumes parallel shifts in the yield curve and a static balance sheet. The net interest income simulation also uses a "deposit beta" modeling assumption which is an estimate of the change in interest bearing deposit pricing for a given change in market interest rates. In up-rate scenarios, the deposit beta assumption is 31% with the pricing change occurring in the first month of the net interest income simulation horizon. In down-rate scenarios, the deposit beta assumption is 31% with the pricing change occurring in the first month of the net interest income simulation horizon. Actual changes to deposit pricing may vary significantly from this assumption due to management actions, customer behavior, and market forces, which may have significant impacts to our net interest income. The net interest income simulations at September 30, 2025 indicate a balanced repricing dynamic between interest earning assets and interest-bearing liabilities.

# Change in Interest Rate Percent Change in Net Interest Income (basis points) September 30, 2025 +200 0.25% +100 0.22

The preceding interest rate sensitivity analysis does not represent a forecast and should not be relied upon as being indicative of expected operating results.

The Company's objectives in using interest rate derivatives are to add stability to interest income (expense) and to manage its exposure to interest rate movements. To accomplish these objectives, the Company primarily uses interest rate swaps and collars as part of its interest rate risk management strategy.

As of September 30, 2025, the Company does not have any active interest rate derivatives designated as cash flow hedges. Amounts previously deferred in AOCI will be reclassified to income over time as the previously hedged, forecasted transactions remain probable of occurring. The Company continues to monitor its interest rate risk exposure and may enter into new derivative contracts in the future as part of its ongoing risk management activities.

Refer to "Note – Derivatives and Hedging Activities" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report for further discussion on how we manage interest rate risk.

# Item 4. CONTROLS AND PROCEDURES

#### **Evaluation of Disclosure Controls and Procedures**

Our management, under the supervision and with the participation of the Chief Executive Officer (who is our principal executive officer) and Chief Financial Officer (who is our principal financial officer), evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of September 30, 2025. The term "disclosure controls and procedures" means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of September 30, 2025, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods required by the SEC's rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

## **Changes in Internal Control Over Financial Reporting**

There were no changes in our internal control over financial reporting for the quarter ended September 30, 2025 that have materially affected, or are reasonably likely to materially affect, such control.

## **Limitations on the Effectiveness of Controls and Procedures**

The effectiveness of our disclosure controls and procedures and our internal control over financial reporting is subject to various inherent limitations, including cost limitations, judgments used in decision making, assumptions about the likelihood of future events, the soundness of our systems, the possibility of human error, and the risk of fraud. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions and the risk that the degree of compliance with policies or procedures may deteriorate over time. Because of these limitations, any system of disclosure controls and procedures or internal control over financial reporting may not be successful in preventing all errors or fraud or in making all material information known in a timely manner to the appropriate levels of management.

# PART II. OTHER INFORMATION

# Item 1. Legal Proceedings

In the normal course of business, we may be named or threatened to be named as a party in various lawsuits. We record accruals for outstanding legal matters when it is believed to be probable that a loss will be incurred and the amount can be reasonably estimated. Management, following consultation with legal counsel, does not expect the ultimate disposition of any or a combination of any such ongoing or anticipated matters to have a material, adverse effect on our business, financial condition, or operating results.

#### Item 1A. Risk Factors

Except as set forth below, there have been no material changes in risk factors described in our Annual Report on Form 10-K for the year ended December 31, 2024 during the period covered by this quarterly report.

We may not realize the anticipated benefits of our stock repurchase program, and the timing and level of shares repurchased of our common stock may have an adverse impact.

On August 28, 2025, we announced that our board of directors approved a stock repurchase program, pursuant to which we have been authorized to repurchase up to \$150 million worth of our issued and outstanding shares of common stock on or prior to March 31, 2027, which is the expiration date of the program. Under the repurchase program, we intend to repurchase our shares through open market purchases, private transactions, block trades, authorized Rule 10b5-1 trading plans (which, if adopted, would permit us to repurchase shares when we might otherwise be precluded from doing so under applicable securities laws), or otherwise in accordance with applicable federal securities laws, including pursuant to Rule 10b-18 under the Exchange Act. We would expect to enter into a Rule 10b5-1 plan only during an open trading window under our Insider Trading Policy.

The timing and amount of any purchases under the repurchase program will depend on a number of factors, such as the price of our common stock, economic and market conditions, the availability of alternative investment opportunities, our liquidity, corporate and regulatory requirements, and other factors deemed appropriate. If we do not purchase shares of our common stock under the repurchase program, our reputation, investor confidence, and the price of our common stock may be adversely impacted.

The existence of the repurchase program could cause the price of our common stock to be higher than it otherwise would be and potentially reduce the market liquidity for our common stock. Further, we cannot guarantee that any purchases under the repurchase program will enhance long-term stockholder value. For example, the price of our common stock may decline below the levels at which we purchase such shares, and short-term fluctuations in the price of our common stock could reduce the effectiveness of the repurchase program. Purchasing shares of our common stock under the repurchase program will also reduce the amount of cash we have available to fund capital expenditures, investments in strategic initiatives, other operating requirements, and further share repurchases, and we may fail to realize the anticipated benefits of the repurchase program.

# Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

- (a) There were no unregistered sales of equity securities during the three months ended September 30, 2025.
- (b) Not applicable.
- (c) The following table provides information with respect to purchases made of our common stock by or on behalf of us or any "affiliated purchasers" (as defined in Rule 10b-18(a)(3) under the Exchange Act), during the three months ended September 30, 2025.

| Total                                   | 842,933          | \$ 3          | 2.58 | 842,903                  | \$ 122,539,093                       |

<sup>(1)</sup> On August 28, 2025, the board of directors of the Company adopted a new stock repurchase program. Under the new stock repurchase program, the Company was provided authorization to repurchase up to \$150.0 million of its issued and outstanding shares of common stock on or prior to March 31, 2027, which is the expiration date of the program. Shares of common stock may be purchased through open market purchases, private transactions, block trades, authorized Rule 10b5-1 trading plans, or otherwise in accordance with applicable federal securities laws, including pursuant to Rule 10b-18 under the Exchange Act. Management's decision to repurchase shares of common stock will depend on a number of factors, such as general market and economic conditions, the trading price of the common stock, alternative uses for capital, the Company's financial performance, and corporate and regulatory requirements

# Item 3. Defaults upon Senior Securities

None.

# Item 4. Mine Safety Disclosures

Not applicable.

# Item 5. Other Information

Rule 10b5-1 Trading Plans

During the quarter ended September 30, 2025, none of the Company's directors or executive officers adopted, modified or terminated any contract, instruction or written plan for the purchase or sale of Company securities that was intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) or any "non-Rule 10b5-1 trading arrangement."

<sup>(2)</sup> Stock repurchases were redemptions of vested restricted shares tendered in lieu of cash for payment of income tax withholding amounts by participants of the Company's 2015 Equity and Incentive Plan.

# CERTIFICATION BY CHIEF EXECUTIVE OFFICER PURSUANT TO RULE 13a-14(a) AND RULE 15d-14(a) UNDER THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED

# I, James A. Reuter, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of First Interstate BancSystem, Inc.
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes, in accordance with generally accepted accounting principles;
  - c. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions);
  - a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

# **CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350**

The undersigned are the Chief Executive Officer and the Chief Financial Officer of First Interstate BancSystem, Inc. (the "Registrant"). This Certification is made pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. This Certification accompanies the Quarterly Report on Form 10-Q of the Registrant for the quarter ended September 30, 2025.

We certify that, based on our knowledge, such Quarterly Report on Form 10-Q fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 and that the information contained in the Form 10-Q fairly presents, in all material respects, the financial condition and results of operations of the Registrant.

This Certification is executed as of November 6, 2025.
