News Release

Chubb Reports Third Quarter Per Share Net Income and Record Core Operating Income of \$4.95 Each, Up 161.9% and 58.1%, Respectively; Consolidated Net Premiums Written of \$13.1 Billion, Up 9.1%, with Global P&C Up 12.3%; P&C Combined Ratio of 88.4%; Year-to-Date Net Income Per Share of \$13.79, Up 48.9%, and Record Core Operating Income Per Share of \$14.27, Up 27.5%

- Net income and core operating income were each \$2.04 billion, up 157.8% and 55.4%, respectively. For the nine months, net income was \$5.73 billion, up 45.5%, and core operating income was a record \$5.93 billion, up 24.7%.
- P&C net premiums written in the quarter were up 8.4%. Global P&C, which excludes Agriculture, was up 12.3%, with commercial insurance up 10.3% and consumer insurance up 17.6%. North America was up 8.9%, including growth of 9.6% in personal insurance and 8.7% in commercial insurance with P&C lines up 10.5% and financial lines up 1.1%. Overseas General was up 21.4%, with growth of 28.4% in consumer insurance and 17.0% in commercial insurance. The consolidation of Huatai P&C contributed 2.2 percentage points and 7.5 percentage points to Global P&C and Overseas General net premiums written growth, respectively.
- Agriculture net premiums written declined 11.7%, primarily reflecting the timing of premium recognition this year versus last year. For the nine months, Agriculture net premiums written increased 2.3%.
- P&C underwriting income in the quarter was \$1.31 billion, up 83.8%, with a combined ratio of 88.4%. P&C current accident year underwriting income excluding catastrophe losses was a record \$1.78 billion, with a combined ratio of 84.3%.
- Global P&C underwriting income, which excludes Agriculture, was \$1.20 billion, up 117.2%, with a combined ratio of 87.6%. Global P&C current accident year underwriting income excluding catastrophe losses was a record \$1.66 billion, with a combined ratio of 83.0%.
- Agriculture underwriting income was \$105 million, with a combined ratio of 93.2% in the quarter, bringing the year-to-date combined ratio to 91.7%. The combined ratio in the quarter increased 2.6 percentage points, as the company trued up its loss estimates to reflect its projected profit and loss for the current crop year. Estimated development for the current crop year was recognized this quarter compared to the fourth quarter in the prior year.
- Life Insurance net premiums written increased 14.9%. International life insurance net premiums written were \$1.21 billion, up 19.7%. Life Insurance segment income was \$288 million. The consolidation of Huatai Life contributed 14.8 percentage points growth to International Life net premiums written.
- Pre-tax net investment income in the quarter was \$1.31 billion, up 34.2%, and adjusted net investment income was \$1.41 billion, up 34.2%. Both were records.
- Annualized return on equity (ROE) was 15.5% and annualized core operating ROE was 13.5%. Annualized core operating return on tangible equity (ROTE) was 21.2%.

Chubb®, Chubb logo® and Chubb. Insured.SM are trademarks of Chubb.

Effective July 1, 2023, the company increased its aggregate ownership interest in Huatai Group (Huatai) to 69.6% and applied consolidation accounting beginning in the third quarter. In this release, business activity for, and the financial position of, Huatai is reported at 100%, as required, except for core operating income, net income, book value, tangible book value, ROE, per share data, and certain other key metrics, which include only the company's ownership interest and exclude the non-controlling interest. For a summary of the financial impact of Huatai, refer to page 37 in the Q3 2023 Chubb Limited Financial Supplement.

ZURICH – October 24, 2023 – Chubb Limited (NYSE: CB) today reported net income and core operating income for the quarter ended September 30, 2023 of \$2.04 billion each, or \$4.95 per share. Book value per share and tangible book value per share decreased 0.3% and 10.2%, respectively, from June 30, 2023, and now stand at \$128.37 and \$70.89, respectively. Book value benefited from a one-time after-tax net realized and unrealized gain of \$727 million, principally reflecting the discontinuation of the equity method of accounting upon the consolidation of Huatai. Book value was unfavorably impacted by after-tax net realized and unrealized losses of \$2.18 billion in the company's investment portfolio, principally due to the mark-to-market impact of rising interest rates in the fixed income portfolio. In addition, tangible book value included the adverse impact of \$3.17 billion after-tax for Chubb's portion of goodwill and other intangible assets related to the consolidation of Huatai. Book value per share and tangible book value per share excluding AOCI increased 2.6% and decreased 4.2%, respectively, from June 30, 2023.

For the nine months ended September 30, 2023 and 2022, the tax expenses (benefits) related to the table above were \$(164) million and \$(110) million, respectively, for adjusted net realized gains and losses; and \$1.36 billion and \$1.03 billion, respectively, for core operating income.

Evan G. Greenberg, Chairman and Chief Executive Officer of Chubb Limited, commented: "We had another outstanding quarter which contributed to a record nine months. Our performance in the quarter included double-digit Global P&C premium revenue growth, world-class P&C underwriting results, record net investment income, and strong life operating income. Over \$2 billion of core operating income led to per-share earnings growth of 58.1% for the quarter and 27.5% for the year. Annualized core operating ROE was 13.5%, with a return on tangible equity of 21.2%. In the quarter, we increased our ownership in Huatai Group, now at 72%, and consolidated results, which were accretive to EPS and ROE.

"P&C underwriting income of \$1.3 billion this quarter was up almost 84%. Our underwriting results were driven by strong P&C earned premium growth, excellent current accident year underwriting margins inclusive of catastrophe losses, and favorable prior period reserve development in both North America and Overseas General. The published calendar year combined ratio was 88.4% while the Global P&C current accident year combined ratio excluding CATs was 83%.

Chubb®, Chubb logo® and Chubb. Insured. SM are trademarks of Chubb.

"Adjusted net investment income of \$1.4 billion was up \$361 million, or 34%, over prior year. Our investment income continues to grow quickly as we reinvest our strong cash flow at higher rates and compound income in our predominantly fixed-income, relatively short-duration portfolio. Our operating cash flow this quarter was a record \$4.7 billion.

"Global P&C premium growth was 12.3%, with commercial lines up 10.3% and consumer lines up 17.6%. In North America commercial, property and casualty premiums were up 10.5% while financial lines were up 1%. Our very large U.S. middle market business had its best growth of the year at 16.3%. Our market-leading high-net-worth personal lines business had another outstanding quarter with growth of 9.6%. Our Overseas General division had a great quarter with premiums up 21.4%, including double-digit growth in Europe, Asia Pacific, and Latin America. Huatai contributed 7.5 percentage points to Overseas General's growth. In our Asia-focused international life business, premiums were up nearly 20%, including the impact of Huatai.

"In aggregate, rates and price increases in our commercial P&C lines of business remained strong in the quarter globally. Pricing was up 13.9% in North America and 11.7% in our international business. Financial lines pricing was down in North America and up modestly overseas. In North America and Overseas General, P&C pricing exceeded loss cost trends, which were stable in the quarter. We are vigilant and disciplined and are staying on top of loss cost inflation.

"We are confident in our ability to continue growing revenue and operating earnings, which in turn drive EPS, through the three engines of P&C underwriting income, investment income, and life income."

Chubb®, Chubb logo® and Chubb. Insured.SM are trademarks of Chubb.

Operating highlights for the quarter ended September 30, 2023 were as follows:

| Chubb Limited | | | A | As Adjusted | | | |
|--|----|--------|----|----------------|--------|--|--|
| | | Q3 | | Q3 | | | |
| (in millions of U.S. dollars except for percentages) | | 2023 | | 2022 | Change | | |

| Net premiums written (increase of 8.4% in constant dollars) | \$ | 13,104 | \$ | 12,012 | 9.1% | | |
| <u>P&C</u> | | | | | | | |
| Net premiums written (increase of 7.6% in constant dollars) | \$ | 11,652 | \$ | 10,747 | 8.4% | | |
| Underwriting income | \$ | 1,305 | \$ | 710 | 83.8% | | |
| Combined ratio | | 88.4% | | 93.1% | | | |
| Current accident year underwriting income excluding catastrophe losses | \$ | 1,775 | \$ | 1,646 | 7.8% | | |
| Current accident year combined ratio excluding catastrophe losses | | 84.3% | | 84.0% | | | |
| Global P&C (excludes Agriculture) | | | | | | | |
| Net premiums written (increase of 11.2% in constant dollars) | \$ | 10,131 | \$ | 9,024 | 12.3% | | |
| Underwriting income | \$ | 1,200 | \$ | 552 | 117.2% | | |
| Combined ratio | | 87.6% | | 93.6% | | | |
| Current accident year underwriting income excluding catastrophe losses | \$ | 1,661 | \$ | 1,448 | 14.6% | | |
| Current accident year combined ratio excluding catastrophe losses | | 83.0% | | 83.2% | | | |
| Life Insurance | | | | | | | |
| Net premiums written (increase of 15.2% in constant dollars) | \$ | 1,452 | \$ | 1,265 | 14.9% | | |
| Segment income (increase of 14.7% in constant dollars) | \$ | 288 | \$ | 252 | 14.8% | | |

- Consolidated net premiums earned increased 9.9%, or 9.0% in constant dollars. P&C net premiums earned increased 9.2%, or 8.1% in constant dollars.
- Operating cash flow was a record \$4.68 billion for the quarter.
- Total pre-tax and after-tax P&C catastrophe losses, net of reinsurance and including reinstatement premiums, were \$670 million (6.0 percentage points of the combined ratio) and \$544 million, respectively, compared with \$1.16 billion (11.3 percentage points of the combined ratio) and \$949 million, respectively, last year.
- Total pre-tax and after-tax favorable prior period development were \$200 million and \$116 million, respectively, compared with \$222 million and \$162 million, respectively, last year.
- Total capital returned to shareholders in the quarter was \$958 million, including share repurchases of \$606 million at an average purchase price of \$205.44 per share, and dividends of \$352 million.
- On October 1, 2023, the company increased its ownership in Huatai with the closing of an incremental 2.5% interest, bringing its total aggregate interest in Huatai to 72.1%. The company expects the ownership to increase further during the fourth quarter.

 ${\tt Chubb @}, {\tt Chubb logo @}$ and ${\tt Chubb}.$ Insured. ${\tt SM}$ are trademarks of Chubb.

- In the third quarter, Huatai contributed 2.9 percentage points to consolidated net premiums written growth. Huatai was accretive to third quarter 2023 results as follows: \$0.12, or 2.5%, to core operating income per share; 1.3 percentage points to book value per share and 0.3 percentage points to core operating return on equity.
- On July 1, 2023, the consolidation of Huatai added \$5.05 billion pre-tax to goodwill and other intangible assets, of which \$3.52 billion pre-tax, or \$3.23 billion after tax, is attributable to Chubb which resulted in dilution of tangible book value per share excluding AOCI of 7.5 percentage points. The company expects to earn back goodwill and other intangible assets in less than five months.

Details of financial results by business segment are available in the Chubb Limited Financial Supplement. Key segment items for the quarter ended September 30, 2023 are presented below:

| | | | A | As djusted | |
|---|----|-------|----|---------------|---------|

| Combined ratio | | 90.3% | | 90.1% | |
| Current accident year combined ratio excluding catastrophe losses | | 78.9% | | 79.5% | |
| North America Agricultural Insurance | | | | | |
| Net premiums written | \$ | 1,521 | \$ | 1,723 | (11.7)% |
| Combined ratio | | 93.2% | | 90.6% | |
| Current accident year combined ratio excluding catastrophe losses | | 92.7% | | 88.2% | |
| Overseas General Insurance | | | | | |
| Net premiums written (increase of 17.3% in constant dollars) | \$ | 3,211 | \$ | 2,645 | 21.4% |
| Commercial P&C (increase of 14.6% in constant dollars) | \$ | 1,901 | \$ | 1,625 | 17.0% |
| Consumer P&C (increase of 21.4% in constant dollars) | \$ | 1,310 | \$ | 1,020 | 28.4% |
| Combined ratio | | 87.0% | | 88.5% | |
| Current accident year combined ratio excluding catastrophe losses | | 84.8% | | 85.1% | |
| Life Insurance | | | | | |
| Net premiums written (increase of 15.2% in constant dollars) | \$ | 1,452 | \$ | 1,265 | 14.9% |
| Segment income (increase of 14.7% in constant dollars) | \$ | 288 | \$ | 252 | 14.8% |

- North America Commercial P&C Insurance: Net premiums written increased 8.7% with P&C lines up 10.5% and financial lines were up 1.1%. The combined ratio decreased 6.7 percentage points, primarily reflecting lower catastrophe losses. The current accident year combined ratio excluding catastrophe losses was flat year-over-year, reflecting a 0.4 percentage point decrease in the loss ratio and a 0.4 percentage point increase in the expense ratio primarily from higher pension expenses reflecting financial market conditions at the time of valuation late in 2022.
- North America Personal P&C Insurance: The combined ratio increased 0.2 percentage points, primarily reflecting higher catastrophe losses and lower favorable prior period development. The current accident year combined ratio excluding catastrophe losses decreased 0.6 percentage point, including a 1.2 percentage point decrease in the loss ratio and a 0.6 percentage point increase in the expense ratio. The increase in the expense ratio is primarily from higher pension expenses as noted above.
- Overseas General Insurance: The combined ratio decreased 1.5 percentage points reflecting higher favorable prior period development in the quarter. The current accident year combined ratio excluding catastrophe losses decreased 0.3 percentage point, including a 1.1 percentage point decrease in the expense ratio and a 0.8 percentage point increase in the loss ratio in part from both mix of business and higher losses in automobile.
- Life Insurance: Segment income was \$288 million, up 14.8%, including earnings from Huatai and higher net investment income.

All comparisons are with the same period last year unless otherwise specifically stated.

Please refer to the Chubb Limited Financial Supplement, dated September 30, 2023, which is posted on the company's investor relations website, <u>investors.chubb.com</u>, in the Financials section for more detailed information on individual segment performance, together with additional disclosure on reinsurance recoverable, loss reserves, investment portfolio, and debt and capital.

Chubb Limited will hold its third quarter earnings conference call on Wednesday, October 25, 2023 beginning at 8:30 a.m. Eastern. The earnings conference call will be available via live webcast at investors.chubb.com or by dialing 877-400-4403 (within the United States) or 332-251-2601 (international), passcode 1641662. Please refer to the Chubb website under Events and Presentations for details. A replay will be available after the call at the same location. To listen to the replay, please click here to register and receive dial-in numbers.

"As Adjusted": Effective January 1, 2023, the company adopted the Long-Duration Targeted Improvements (LDTI) U.S. GAAP guidance, which principally impacted the Life Insurance segment. LDTI requires more frequent updating of assumptions and a standardized discount rate for long-duration contracts, a requirement to use the fair value measurement model for policies with market risk benefits, and amortization of deferred acquisition costs on a constant level basis. Under LDTI, the company's reinsurance programs covering variable annuity guarantees (principally guaranteed minimum death benefits and guaranteed minimum income benefits) meet the definition of market-risk benefits (MRB) and are measured at fair value and are now reported within "Market risk benefits" in the financial statements. The impact to 2022 results was immaterial.

About Chubb

Chubb is the world's largest publicly traded property and casualty insurance company. With operations in 54 countries and territories, Chubb provides commercial and personal property and casualty insurance, personal accident and supplemental health insurance, reinsurance and life insurance to a diverse group of clients. Regulation G - Non-GAAP Financial Measures

In presenting our results, we included and discussed certain non-GAAP measures. These non-GAAP measures, which may be defined differently by other companies, are important for an understanding of our overall results of operations and financial condition. However, they should not be viewed as a substitute for measures determined in accordance with generally accepted accounting principles (GAAP).

Throughout this document there are various measures presented on a <u>constant-dollar basis</u> (i.e., excludes the impact of foreign exchange). We believe it is useful to evaluate the trends in our results exclusive of the effect of fluctuations in exchange rates between the U.S. dollar and the currencies in which our international business is transacted, as these exchange rates could fluctuate significantly between periods and distort the analysis of trends. The impact is determined by assuming constant foreign exchange rates between periods by translating prior period results using the same local currency exchange rates as the comparable current period.

Adjusted net investment income is net investment income excluding the amortization of the fair value adjustment on acquired invested assets from certain acquisitions of \$9 million and \$6 million in Q3 2023 and Q3 2022, respectively, and including investment income of \$92 million and \$69 million in Q3 2023 and Q3 2022, respectively, from partially owned investment companies (private equity partnerships) where our ownership interest is in excess of 3% that are accounted for under the equity method. The amortization of the fair value adjustment on acquired invested assets was \$14 million and \$36 million for the nine months ended September 30, 2023 and 2022, respectively, and the investment income from private equity partnerships was \$276 million and \$180 million for the nine months ended September 30, 2023 and 2022, respectively. The mark-to-market movement on these private equity partnerships are included in adjusted net realized gains (losses) as described below. We believe this measure is meaningful as it highlights the underlying performance of our invested assets and portfolio management in support of our lines of business.

Adjusted net realized gains (losses), net of tax, includes net realized gains (losses) and net realized gains (losses) recorded in other income (expense) related to unconsolidated subsidiaries, and excludes realized gains and losses on crop derivatives. These derivatives were purchased to provide economic benefit, in a manner similar to reinsurance protection, in the event that a significant decline in commodity pricing impacts underwriting results. We view gains and losses on these derivatives as part of the results of our underwriting operations, and therefore realized gains (losses) from these derivatives are reclassified to adjusted losses and loss expenses.

<u>P&C underwriting income</u> is calculated by subtracting adjusted losses and loss expenses, adjusted policy benefits, policy acquisition costs and administrative expenses from net premiums earned by our P&C operations. We use underwriting income (loss) and operating ratios to monitor the results of our operations without the impact of certain factors, including net investment income, other income (expense), interest expense, amortization expense of purchased intangibles, income tax expense and adjusted net realized gains (losses).

<u>P&C</u> current accident year underwriting income excluding catastrophe losses is P&C underwriting income adjusted to exclude catastrophe losses and prior period development (PPD). We believe it is useful to exclude catastrophe losses, as they are not predictable as to timing and amount, and PPD as these unexpected loss developments on historical reserves are not indicative of our current underwriting performance. We believe the use of these measures enhances the understanding of our results of operations by highlighting the underlying profitability of our insurance business.

Core operating income, net of tax, relates only to Chubb income, which excludes noncontrolling interests. It excludes from Chubb net income attributable to Chubb the after-tax impact of adjusted net realized gains (losses), market risk benefit gains (losses), Cigna integration expenses, the amortization of fair value adjustment of acquired invested assets and long-term debt related to certain acquisitions. We believe this presentation enhances the understanding of our results of operations by highlighting the underlying profitability of our insurance business. We exclude adjusted net realized gains (losses) because the amount of these gains (losses) are heavily influenced by, and fluctuate in part according to, the availability of market opportunities. We exclude the amortization of fair value adjustments on purchased invested assets and long-term debt related to certain acquisitions due to the size and complexity of these acquisitions. We also exclude Cigna integration expenses, which are incurred by the overall company and are included in

Chubb®, Chubb logo® and Chubb. Insured.SM are trademarks of Chubb.

Corporate. These expenses include legal and professional fees and all other costs directly related to the integration activities of the Cigna acquisition. The costs are not related to the on-going activities of the individual segments and are therefore also excluded from our definition of segment income. We believe these integration expenses are not indicative of our underlying profitability, and excluding these integration expenses facilitates the comparison of our financial results to our historical operating results. References to core operating income measures mean net of tax, whether or not noted.

Core operating return on equity (ROE) and Core operating return on tangible equity (ROTE) are annualized non-GAAP financial measures. The numerator includes core operating income (loss), net of tax. The denominator includes the average Chubb shareholders' equity for the period adjusted to exclude unrealized gains (losses) on investments, current discount rate on future policy benefits (FPB), and instrument-specific credit risk on MRB, net of tax. For the ROTE calculation, the denominator is also adjusted to exclude Chubb goodwill and other intangible assets, net of tax. These measures enhance the understanding of the return on shareholders' equity by highlighting the underlying profitability relative to shareholders' equity and tangible equity excluding the effect of unrealized gains and losses on our investments that are heavily influenced by available market opportunities. We believe ROTE is meaningful because it measures the performance of our operations without the impact of goodwill and other intangible assets.

<u>P&C combined ratio</u> is the sum of the loss and loss expense ratio, acquisition cost ratio and the administrative expense ratio excluding the life business and including the realized gains and losses on the crop derivatives, as noted above.

<u>P&C</u> current accident year combined ratio excluding catastrophe losses excludes the impact of P&C catastrophe losses and PPD from the P&C combined ratio. We believe this measure provides a better evaluation of our underwriting performance and enhances the understanding of the trends in our property and casualty business that may be obscured by these items.

Global P&C performance metrics comprise consolidated operating results (including corporate) and exclude the operating results of the company's Life Insurance and North America Agricultural Insurance segments. The agriculture insurance business is a different business in that it is a public sector and private sector partnership in which insurance rates, premium growth, and risk-sharing is not market-driven like the remainder of the company's P&C insurance business. We believe that these measures are useful and meaningful to investors as they are used by management to assess the company's global P&C operations which are the most economically similar. We exclude the North America Agricultural Insurance and Life Insurance segments because the results of these businesses do not always correlate with the results of our global P&C operations.

<u>Tangible book value per common share</u> is Chubb shareholders' equity less goodwill and other intangible assets, net of tax, divided by the shares outstanding. We believe that goodwill and other intangible assets are not indicative of our underlying insurance results or trends and make book value comparisons to less acquisitive peer companies less meaningful.

Book value per share and tangible book value per share excluding accumulated other comprehensive income (loss) (AOCI), excludes AOCI from the numerator because it eliminates the effect of items that can fluctuate significantly from period to period, primarily based on changes in interest rates and foreign currency movement, to highlight underlying growth in book and tangible book value.

See the reconciliation of Non-GAAP Financial Measures on pages 29-35 in the Financial Supplement. These measures should not be viewed as a substitute for measures determined in accordance with GAAP, including premium, net income, book value, return on equity, and net investment income.

Chubb Limited Financial Supplement for the Quarter Ended September 30, 2023

Investor Contact

Karen Beyer: (212) 827-4445 email: investorrelations@chubb.com

This report is for informational purposes only. It should be read in conjunction with documents filed by Chubb Limited with the Securities and Exchange Commission, including the most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q.

Cautionary Statement Regarding Forward-Looking Statements

Any forward-looking statements made in this financial supplement reflect Chubb Limited's current views with respect to future events and financial performance and are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements involve risks and uncertainties which may cause actual results to differ materially from such statements. For example, forward-looking statements related to financial performance, including exposures, reserves and recoverables, could be affected by the frequency and severity of unpredictable catastrophic events, actual loss experience, uncertainties in the reserving or settlement process, currency exchange fluctuations, new theories of liability, judicial, legislative, regulatory and other governmental developments, litigation tactics and developments, investigation developments among reinsurers.

Our forward-looking statements could also be affected by, among other things, competition, pricing and policy term trends, market acceptance, changes in demand, actual market developments, rating agency action, possible terrorism or the outbreak and effects of war, and such other factors identified in our filings with the Securities and Exchange Commission. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the dates on which they are made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

New U.S. GAAP Accounting Standard Adopted in 2023

Effective January 1, 2023, the company adopted the Long-Duration Targeted Improvements (LDTI) U.S. GAAP guidance, which principally impacted the Life Insurance segment. Financial data for the prior reporting periods in this report are adjusted, as applicable, and are presented in accordance with the new guidance.

As Adjusted results: results for prior periods presented in this report are in accordance with the new guidance.

Refer to page 36 in this financial supplement for more details.

Consol Bal Sheet Page 5

⁽¹⁾ The held-to-maturity portfolio was reclassified as available-for-sale effective June 30, 2023 to increase flexibility to execute on the company's investment strategy.
(2) Q3 2023 includes embedded goodwill of \$1.3 billion related to Huatai previously reported within Investments in partially-owned insurance companies on the Consolidated Balance Sheets as disclosed in the 2022 Form 10-K. This embedded goodwill increased to \$2.0 billion at June 30, 2023, reflecting the additional shares that closed in the first half of 2023.
(3) Refer to page 28 in this financial supplement for more details.

(1) Q3 2023 net premiums written declined 11.7%, primarily reflecting the timing of premium recognition this year versus last year. The loss ratio in the quarter increased as the company trued-up its loss estimates to reflect its projections for the current crop year. Estimated development for the current crop year was recognized this quarter compared to the fourth quarter in the prior year.

⁽¹⁾ Includes net realized gains (losses) related to unconsolidated entities.
(2) Other primarily includes proceeds from exercise of stock options and stock compensation, offset by the value of any share cancellations for restricted stock vesting taxes.

Chubb Limited Non-GAAP Financial Measures

(Unaudited)

Regulation G - Non-GAAP Financial Measures

In presenting our results, we included and discussed certain non-GAAP measures. These non-GAAP measures, which may be defined differently by other companies, are important for an understanding of our overall results of operations and financial condition. However, they should not be viewed as a substitute for measures determined in accordance with generally accepted accounting principles (GAAP).

Throughout this document there are various measures presented on a constant-dollar basis (i.e., excludes the impact of foreign exchange). We believe it is useful to evaluate the trends in our results exclusive of the effect of fluctuations in exchange rates between the U.S. dollar and the currencies in which our international business is transacted, as these exchange rates could fluctuate significantly between periods and distort the analysis of trends. The impact is determined by assuming constant foreign exchange rates between periods by translating prior period results using the same local currency exchange rates as the comparable current period.

P&C underwriting income (loss) excludes the Life Insurance segment and is calculated by subtracting adjusted losses and loss expenses, adjusted policy benefits, policy acquisition costs and administrative expenses from net premiums earned. We use underwriting income (loss) and operating ratios to monitor the results of our operations without the impact of certain factors, including net investment income, other income (expense), interest expense, amortization expense, expense, adjusted net realized agains (losses), and market rise heaft gains (losses).

P&C CAY underwriting income excluding catastrophe losses (Cats) is P&C underwriting income (loss) adjusted to exclude P&C Cats and prior period development (PPD). We believe it is useful to exclude Cats, as they are not predictable as to timing and amount, and PPD as these unexpected loss developments on historical reserves are not indicative of our current underwriting performance. We believe the use of these measures enhances the understanding of our results of operations by highlighting the underlying profitability of our insurance business.

Adjusted losses and loss expenses include realized gains and losses on crop derivatives. These derivatives were purchased to provide economic benefit, in a manner similar to reinsurance protection, in the event that a significant decline in commodity pricing impacts underwriting results. We view gains and losses on these derivatives as part of the results of our underwriting operations, and therefore realized gains (losses) from these derivatives are reclassified to adjusted losses and loss expenses.

Adjusted policy benefits includes gains and losses from fair value changes in separate account assets, as well as the offsetting movement in separate account liabilities, for purposes of reporting Life Insurance underwriting income. The gains and losses from fair value changes in separate account assets that do not qualify for separate account reporting under GAAP have been reclassified from Other (income) expense. We view gains and losses from fair value changes in both separate account assets and liabilities as part of the results of our underwriting operations, and therefore these gains and losses are reclassified to adjusted policy benefits.

Adjusted net investment income is net investment income excluding the amortization of the fair value adjustment on acquired invested assets from certain acquisitions, and including investment income from partially-owned investment companies (private equity partnerships) where our ownership interest is in excess of 3% that are accounted for under the equity method. The mark-to-market movement on these private equity partnerships are included in adjusted net realized gains (losses) as described below. We believe this measure is meaningful as it highlights the underlying performance of our invested assets and portfolio management in support of our lines of business.

Adjusted net realized gains (losses), net of tax, includes net realized gains (losses) and net realized gains (losses) recorded in other income (expense) related to unconsolidated subsidiaries, and excludes realized gains and losses on crop derivatives.

Adjusted interest expense is interest expense excluding the amortization of the fair value adjustment on acquired long-term debt, related to the Chubb Corp acquisition due to the size and complexity of this acquisition.

Other income (expense) - operating excludes from consolidated Other income (expense) the portion of net realized gains and losses related to unconsolidated entities, other income (expense) from private equity partnerships, and gains and losses from fair value changes in separate account assets that do not qualify for separate account reporting under GAAP. Net realized gains (losses) related to unconsolidated entities is excluded from core operating income (loss) in order to enhance the understanding of our results of underwriting operations as they are heavily influenced by, and fluctuate in part according to, market conditions. Other income (expense) from private equity partnerships and net realized gains and losses related to unconsolidated entities are recorded to Other income (expense) in our income statement on a GAAP basis.

P&C combined ratio excludes the Life Insurance segment. P&C loss and loss expense ratio and P&C combined ratio include adjusted losses and loss expenses and adjusted policy benefits in the ratio numerator. P&C expense ratio and P&C combined ratio include policy acquisition costs and administrative expenses in the ratio numerator. A reconciliation of combined ratio to P&C combined ratio is provided on pages 32-35.

CAY P&C combined ratio excluding catastrophe losses excludes Cats and PPD from the P&C combined ratio. We exclude Cats as they are not predictable as to timing and amount and PPD as these unexpected loss developments on historical reserves are not indicative of our current underwriting performance. The combined ratio numerator is adjusted to exclude Cats, net premiums earned adjustments on PPD, prior period expense adjustments and reinstatement premiums on PPD, and the denominator is adjusted to exclude net premiums earned adjustments on PPD and reinstatement premiums on Cats and PPD. In periods where there are adjustments on loss sensitive policies, these adjustments are excluded from PPD and net premiums earned when calculating the ratios. We believe this measure provides a better evaluation of our underwriting performance and enhances the understanding of the trends in our P&C business that may be obscured by these items. This measure is commonly reported among our peer companies and allows for a better comparison.

Expense ratio excluding accident and health (A&H) excludes the impact of our A&H business from our expense ratio. The expense ratio for the A&H business is typically higher than our traditional P&C business, and we believe that this measure provides better companison to our peer companies that may not have a significant A&H block of business.

Global P&C performance metrics comprise consolidated operating results (including corporate) and exclude the operating results of the company's Life Insurance and North America Agricultural Insurance segments. The agricultural insurance business is a different business in that it is a public sector and private sector partnership in which insurance rates, premium growth, and insk-sharing is not market-driven like the remainder of the company's P&C insurance business. We believe that these measures are useful and meaningful to investors as they are used by management to assess the company's global P&C operations which are the most economically similar. We exclude the North America Agricultural Insurance and Life Insurance segments because the results of these businesses do not always correlate with the results of our global P&C operations.

Core operating income, net of tax, relates only to Chubb income, which excludes noncontrolling interests. It excludes from Chubb net income attributable to Chubb the after-tax impact of adjusted net realized gains (losses), market risk benefit gains (losses), Cigna integration expenses, the amortization of fair value adjustment of acquired invested assets and long-term debt related to certain acquisitions. We believe this presentation enhances the understanding of our results of operations by inhighlighting the underlying profitability of our insurance business. We exclude adjusted net realized gains (losses) because the amount of these gains (losses) are heavily influenced by, and fluctuate in part according to, the availability of market opportunities. We exclude the amortization of fair value adjustments on purchased invested assets and long-term debt related to certain acquisitions due to the size and complexity of these acquisitions. We also exclude Gigna integration expenses, which are incurred by the overall company and are included in Corporate. These expenses include legal and professional fees and all other costs directly related to the integration activities of the Cigna acquisition. The costs are not related to the ongoing activities of the individual segments and are therefore also excluded from our definition of segment income. We believe these integration expenses are not indicative of our underlying profitability, and excluding these integration expenses facilitates the comparison of our financial results to our historical operating results. References to core operating income measures mean net of tax, whether or not noted.

Chubb core operating effective tax rate is income tax expense (benefit) excluding tax expense (benefit) on adjusted net realized gains (losses), tax benefit on amortization of fair value of acquired invested assets and debt, and tax benefit on Cigna integration expenses, all attributable to Chubb, divided by Chubb, income before tax, excluding adjusted net realized gains (losses) before tax, market risk benefit gains (losses) before tax, amortization of fair value of acquired invested assets and debt before tax, and Cigna integration expenses, all attributable to Chubb, before tax. We believe the use of this measure is meaningful to show the tax on the underlying performance of our insurance business, by excluding the taxes on adjusted net realized gains (losses), market risk benefit gains (losses), amortization of the fair value adjustments related to purchased invested assets and long-term debt and Cigna integration expenses. Refer to the definition of core operating income (loss), net of tax above for more information on these adjustments.

Tangible book value per common share is Chubb shareholders' equity less Chubb goodwill and other intangible assets, net of tax, divided by the shares outstanding. We believe that goodwill and other intangible assets are not indicative of our underlying insurance results or trends and make book value comparisons to less acquisitive peer companies less meaningful. Book value per share and tangible book value per share excluding accumulated other comprehensive income (loss) (AOCI), excludes AOCI from the numerator because it eliminates the effect of items that can fluctuate significantly from period to period, primarily based on changes in interest rates and foreign currency movement, to highlight underlying growth in book and tangible book value.

International life insurance net premiums written and deposits collected includes deposits collected on universal life and investment contracts (life deposits). Life deposits are not reflected as revenues in our consolidated statements of operations in accordance with GAAP. However, we include life deposits in presenting growth in our life insurance business because new life deposits are an important component of production and key to our efforts to grow our business.

⁽¹⁾ Realized gains (losses) on partially-owned entities, which are investments where we hold more than an insignificant percentage of the investee's shares. The net income or loss is included in other income (expense).

(2) Life Insurance underlying income (loss) is calculated by subtracting losses and loss expenses, policy benefits, policy acquisition costs and administrative expenses from net premiums earned related to the Life Insurance segment.

Non-GAAP Financial Measures - 3

(in millions of U.S. dollars, except share, per share data, and ratios)

(Unaudited)

Regulation G - Non-GAAP Financial Measures (continued)

Core operating ROE and Core operating ROTE

Core operating return on equity (ROE) and Core operating return on tangible equity (ROTE) are annualized non-GAAP financial measures. The numerator includes core operating income (loss), net of tax. The denominator includes the average Chubb shareholders' equity for the period adjusted to exclude unrealized gains (losses) on investments, current discount rate on future policy benefits (FPB), and instrument-specific credit risk benefits (MRB), all net of tax and attributable to Chubb. For the ROTE calculation, the denominator is also adjusted to exclude Chubb goodwill and other intangible assets, net of tax. These measures enhance the understanding of the return on shareholders' equity by highlighting the underlying profitability relative to shareholders' equity and tangible equity excluding the effect of these items as these are heavily influenced by changes in market conditions. We believe ROTE is meaningful because it measures the performance of our operations without the impact of goodwill and other intangible assets.

Regulation G - Non-GAAP Financial Measures (continued)

P&C combined ratio
The P&C combined ratio includes the impact of realized gains and losses on crop derivatives. These derivatives were purchased to provide economic benefit, in a manner similar to reinsurance protection, in the event that a significant decline in commodity pricing will impact underwriting results. We view gains and losses on these derivatives as part of the results of our underwriting operations.

The following tables present the calculation of combined ratio, as reported, for each segment to P&C combined ratio, adjusted for catastrophe losses (Cats) and prior period development (PPD).

Accounting Adoption

(in millions of U.S. dollars, except per share data) (Unaudited)

New U.S. GAAP Accounting Standard Adopted in 2023

The company adopted the Long Duration Targeted Improvements (LDTI) standard applicable to its long-duration contracts, as required, on January 1, 2023, with a transition date of January 1, 2021. The company applied the modified retrospective transition method relating to its future policy benefits liabilities, and the associated deferred policy acquisition costs (DAC), and applied the retrospective basis to its liabilities for market risk benefits (MRB).

This financial supplement adjusts previously reported financial information for the quarters and years ended 2021 and 2022 for the implementation of LDTI. This guidance primarily impacted the company's Life Insurance segment results, with key impacts to book value and net income reflecting the following provisions of the guidance:

- 1. Future policy benefits (FPB) an annual review of cash flow assumptions used to measure the FPB, and periodic updates for historical experience, with updates recorded within the income statement. Additionally, FPBs are discounted using an upper-medium grade fixed income instrument yield, updated quarterly, with related changes in discounting the liability recognized in other comprehensive income (OCI);
- 2. Market risk benefits (MRB) Under LDTI, the company's reinsurance programs covering variable annuity guarantees (principally guaranteed minimum death benefits and guaranteed minimum income benefits) meet the definition of market-risk benefits (MRB). MRBs are required to be carried at fair value and the changes in fair value are presented separately within the income statement, with the exception of changes in fair value due to the company's own credit (or non-performance) risk, which are recognized in OCI; and
- 3. Deferred policy acquisition costs (DAC) DAC is amortized on a constant-level basis, independent of profitability on the underlying business.

As Adjusted results: results for prior periods presented in this report are in accordance with the new guidance.

The following tables presents a summary of the impact of LDTI on our previously reported results:

Consolidation of Huatai Group Effective July 1, 2023

Effective July 1, 2023, the company increased its aggregate ownership interest in Huatai Insurance Group Co., Ltd. (Huatai Group) to approximately 69.6%, resulting in a majority controlling interest. Accordingly, the company applied consolidation accounting commencing in the third quarter of 2023, which requires that 100% of the business activity for, and the financial position of, Huatai Group be reported on Chubb's consolidated financial statements. The results representing the portion of Huatai Group owned by investors other than Chubb (representing approximately 31.4% of Huatai Group) are presented as noncontrolling interests on Chubb's consolidated financial statements.

The results of Huatai Group subsidiaries will be reported as follows:

Overseas General: P&C business
Life Insurance: life and asset management businesses

Corporate: real estate business and holding company activity

Metrics in this report with "Chubb" means excluding noncontrolling interests in Huatai Group (example, Chubb book value and Chubb net income). Note that the company reports its key metrics exclusive of noncontrolling interests as this reflects Chubb's financial condition and results of operations. The following measures are presented as attributable to Chubb, whether or not noted: core operating income, basic and diluted earnings per share on a net income and core operating income basis, book and tangible book value and adjusted book value per common share metrics, ROE and adjusted ROE metrics, and effective and core operating effective tax rate. In addition, goodwill and other intangible assets, used in the calculation of tangible book value per common share, reflects the portion of goodwill and other intangible assets attributable to Chubb. The following presents the impact of Huatai including the net realized and unrealized gain of \$727 million upon the consolidation of Huatai.

⁽¹⁾ Includes embedded goodwill of \$1.3 billion related to Huatai previously reported within Investments in partially-owned insurance companies on the Consolidated Balance Sheets as disclosed in the 2022 Form 10-K. This embedded goodwill increased to \$2.0 billion at June 30, 2023, reflecting the additional shares that closed in the first half of 2023.
(2) Huatai's investment portfolio totaling \$12.7 billion at 9/30/2023, comprised \$7.7 billion in fixed maturities, \$2.3 billion in equity securities and \$2.4 billion of private debt held-for-investment. Of the \$12.7 billion, \$6.4 billion is attributable to Chubb, with the remaining attributable to noncontrolling interest holders.

Appendix Page 37

Chubb Limited Glossary

Chubb Limited Consolidated comprises all segments including Corporate.

P&C combined ratio: The sum of the loss and loss expense ratio, policy acquisition cost ratio and the administrative expense ratio excluding the life insurance segment and including the realized gains and losses on the crop derivatives.

Book value per common share: Chubb shareholders' equity divided by the shares outstanding.

Tangible book value per common share: Chubb shareholders' equity less goodwill and other intangible assets, net of tax, divided by the shares outstanding.

Average market yield of fixed maturities: Weighted average yield to maturity of our fixed income portfolio based on the market prices of the holdings as of that date.

Average yield on invested assets: Adjusted net investment income divided by average cost of fixed maturities and other investments, and average market value of equity securities.

Total capitalization: The sum of the short-term debt, long-term debt, trust preferreds, and Chubb shareholders' equity.

Cigna integration expenses: Cigna integration expenses comprise legal and professional fees and all other costs directly related to the integration activities primarily of the Cigna acquisition. Cigna integration expenses are incurred by the overall company and are therefore included in Corporate. These costs are not related to the on-going business activities of the segments and are therefore excluded from our definition of segment income.

Catastrophe losses (Cats): We generally define catastrophe loss events consistent with the definition of the Property Claims Service (PCS) for events in the U.S. and Canada. PCS defines a catastrophe as an event that causes damage of \$25 million or more in insured losses and affects a significant number of insureds, including from pandemics such as COVID-19. For events outside of the U.S. and Canada, we generally use a similar definition. Catastrophe loss events are events that occurred in the current calendar year only. Changes in catastrophe loss estimates in the current calendar year that relate to loss events that occurred in previous calendar years are considered prior period development.

Prior period development (PPD) arises from changes to loss estimates recognized in the current year that relate to loss events that occurred in previous calendar years and excludes the effect of losses from the development of earned premium from previous accident years.

Reinstatement premiums are additional premiums paid on certain reinsurance agreements in order to reinstate coverage that had been exhausted by loss occurrences. The reinstatement premium amount is typically a pro rata portion of the original ceded premium paid based on how much of the reinsurance limit had been exhausted.

Net premiums earned adjustments within prior period development are adjustments to the initial premium earned on retrospectively rated policies based on actual claim experience that develops after the policy period ends. The premium adjustments correlate to the prior period loss development on these same policies and are fully earned in the period the adjustments are recorded.

Prior period expense adjustments typically relate to either profit commission reserves or policyholder dividend reserves based on actual claim experience that develops after the policy period ends. The expense adjustments correlate to the prior period loss development on these same policies.

Segment income (loss) includes underwriting income (loss), adjusted net investment income, other income (expense) – operating, and amortization expense of purchased intangibles.

Non-premium revenues and expenses included in Other income and expense, principally pertain to the management of third-party assets by Huatai Asset Management Co., Ltd. (HAM) and Huatai Baoxing, which are unrelated to Huatai Group's core insurance operations. These revenues and expenses are recognized in the period in which the services are performed.

NM: Not meaningful.
