Item 8.01 Other Events.

On December 13, 2020, our SXM-7 satellite was successfully launched. In-orbit testing of SXM-7 began on January 4, 2021.

During in-orbit testing of SXM-7, events occurred which have caused failures of certain SXM-7 payload units. An evaluation of SXM-7 is underway. The full extent of the damage to SXM-7 is not yet known.

We do not expect our satellite radio service to be impacted by these adverse SXM-7 events. Our XM-3 and XM-4 satellites continue to operate and are expected to support our satellite radio service for several years. In addition, our XM-5 satellite remains available as an in-orbit spare. Construction of our SXM-8 satellite is underway and that satellite is expected to be launched into a geostationary orbit later this year.

We have purchased insurance policies covering SXM-7 through launch and the first year of in-orbit operation. The aggregate coverage under those insurance policies is \$225 million. We have notified the underwriters of these policies of a potential claim with respect to SXM-7.
