Dear Fellow Netflix, Inc. Shareowner:

Support Shareowner Proposal #5 Requesting Proxy Access

The California Public Employees' Retirement System (CalPERS) and the New York City Pension Funds request shareowners vote "FOR" proposal #5 – a non-binding proposal to give shareowners effective access to the director nomination process – at the Netflix, Inc. annual meeting on June 6, 2018. Similar proposals have received support from a majority of the voting shares in 2015, 2016 and 2017, but the board remains opposed to the request even after strong shareowner support for multiple years. Together, our funds have \$544 billion in assets and are substantial long-term shareowners of Netflix, Inc. with approximately 1,495,000 shares.

Proxy Access is a Fundamental Shareowner Right – Provides Accountability in the Boardroom

We believe providing access to a company's proxy by giving shareowners the ability to nominate directors to the board is one of the most important rights for owners of a company. Without effective proxy access, the director election process simply offers little more than a ratification of management's slate of nominees. Therefore, we believe long-term shareowners should have meaningful access to this process on the terms specified in the proposal #5. The proposed thresholds include:

- Beneficial ownership of at least 3 percent of the outstanding stock;
- Three years of continuous ownership; and
- Ability to nominate up to 25 percent of the board.

Proposed Terms Based on SEC Proxy Access Rulemaking in 2010

Before adopting its now vacated proxy access rule in 2010, the SEC undertook a detailed analysis, both internally and through the public comment process. The SEC determined that a 3 percent ownership threshold was appropriate, stating, "The ownership threshold we are establishing should not expose issuers to excessively frequent and costly election contests conducted through use of Rule 14a-11, but it is also not so high as to make use of the rule unduly inaccessible as a practical matter." The proposed holding period and slate size limitation in proposal #5 are also consistent with the former SEC rule.

Trends Show U.S. Companies and Shareowners Are Embracing Proxy Access

Prior to 2015 only 10 U.S. companies had a 3 percent proxy access bylaw in place – that number has sharply increased to approximately 456 companies (representing over 66% of the S&P 500) as of February 28, 2018. The growing number of companies spans across various industries and size ranges – examples include Apple, Microsoft, Johnson & Johnson, General Electric, Amazon, Wells Fargo, AT&T, Coca-Cola, Pfizer, Exxon Mobil and Chevron. These companies are adopting the governance best practice, thereby rejecting the assertion that proxy access is costly, distracting, and favored mainly by special interest groups.

The rapid uptake in proxy access reflects widespread support among investors. From January 1, 2015 through February 28, 2018, approximately 112 proxy access shareowner proposals have received majority vote, with an average support level of 65%. Further, these trends have led many companies to adopt proxy access without the need for a shareowner vote. Due to this increased adoption of proxy access, the Council of Institutional Investors has developed a "Proxy Access: Best Practices" ¹ guide to provide a framework for companies to adopt a shareowner-supportable proxy access bylaw provision and recently released "Proxy Access by Private Ordering" ² to provide a summary of prevailing practices.

CFA Institute Concludes Proxy Access Would Benefit the Markets and Boardroom

A report published by the CFA Institute found that giving investors access to the proxy to nominate directors would benefit shareowners and the capital markets.³ The specific report findings include:

- Proxy access has the potential to enhance board performance and raise US market capitalization.
- Proxy access reform will not hinder board performance.
- Proxy access is used infrequently and with little disruption in other markets around the world

Support Proxy Access and Director Accountability – Vote “FOR” Shareowner Proposal #5

We believe proxy access is fundamental to a sustainable system of governance that fosters director accountability and long-term value creation. Fully accountable governance structures should be in place to offer shareowners effective access to the director nomination process. Please vote “FOR” proxy access proposal #5.

Vote “FOR” Shareowner Proposal #9 Requesting Majority Vote for Director Elections

As firm supporters of majority vote CalPERS and New York City Pension Funds will be supporting proposal #9 requesting Netflix take the necessary steps to institute a majority vote standard in uncontested director elections.

Should you have any questions please feel free to contact Todd Mattley, CalPERS Associate Investment Officer at INVO_GE_Corporate_Governance_Engagements@calpers.ca.gov or 916-795-0565.

Thank you for your support.

Sincerely,

Simiso Nzima
Investment Director, Global Equity
