ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended February 29, 2024

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ____ to ____

Commission file number 001-31420

CARMAX, INC.

(Exact name of registrant as specified in its charter)

Virginia
(State or other jurisdiction of incorporation)
12800 Tuckahoe Creek Parkway
Richmond, Virginia
(Address of Principal Executive Offices)

54-1821055
(I.R.S. Employer Identification No.)
23238
(Zip Code)

(804) 747-0422
Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Common Stock

Trading Symbol(s)
KMX

Name of each exchange on which registered
New York Stock Exchange

Securities registered pursuant to section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports); and (2) has been subject to such filing requirements for the past 90 days.
Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management’s assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant’s executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant’s common stock held by non-affiliates as of August 31, 2023, computed by reference to the closing price of the registrant’s common stock on the New York Stock Exchange on that date, was \$12,959,000,271.

On April 11, 2024, there were 157,387,560 outstanding shares of CarMax, Inc. common stock.

FORWARD-LOOKING AND CAUTIONARY STATEMENTS

This Annual Report on Form 10-K and, in particular, the description of our business set forth in Item 1 and our Management’s Discussion and Analysis of Financial Condition and Results of Operations set forth in Item 7 contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (“Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (“Exchange Act”), including statements regarding:

- Our projected future sales and market share growth, comparable store sales growth, margins, tax rates, earnings, CarMax Auto Finance income and earnings per share.
- Our business strategies.
- Our expectations for strategic investments.
- Our expectations of factors that could affect CarMax Auto Finance income.
- Our expected future expenditures, cash needs, and financing sources.
- Our expected capital structure, stock repurchases and indebtedness.
- The projected number, timing and cost of new location openings.
- Our gross profit margin, inventory levels and ability to leverage selling, general and administrative and other fixed costs.
- Our sales and marketing plans.
- The capabilities of our proprietary information technology systems and other systems.
- Our assessment of the potential outcome and financial impact of litigation and the potential impact of unasserted claims.
- Our assessment of competitors and potential competitors.
- Our expectations for growth in our markets and business sectors.
- Our assessment of the effect of recent regulations, legislation and accounting pronouncements.

In addition, any statements contained in or incorporated by reference into this report that are not statements of historical fact should be considered forward-looking statements. You can identify these forward-looking statements by the use of words such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “outlook,” “plan,” “positioned,” “predict,” “should,” “target,” “will” and other similar expressions, whether in the negative or affirmative. We cannot guarantee that we will achieve the plans, intentions or expectations disclosed in the forward-looking statements. There are a number of important risks and uncertainties that could cause actual results to differ materially from those indicated by our forward-looking statements. These risks and uncertainties include, without limitation, those set forth in Item 1A under the heading “Risk Factors.” We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made. We disclaim any intent or obligation to update any forward-looking statements made in this report.

Item 1. Business.

BUSINESS OVERVIEW

CarMax Background

CarMax, Inc. delivers an unrivaled customer experience by offering a broad selection of quality used vehicles and related products and services at competitive, no-haggle prices using a customer-friendly sales process. We are the nation's largest retailer of used cars, and we sold 765,572 used vehicles at retail during the fiscal year ended February 29, 2024. We are also one of the nation's largest operators of wholesale vehicle auctions, with 546,331 vehicles sold during fiscal 2024, and one of the nation's largest providers of used vehicle financing, servicing approximately 1.1 million customer accounts in our \$17.39 billion portfolio of managed receivables as of February 29, 2024. Our omni-channel platform, which gives us the largest addressable market in the used car industry, empowers our retail customers to buy a car on their terms – online, in-store or an integrated combination of both.

CarMax was incorporated under the laws of the Commonwealth of Virginia in 1996. CarMax, Inc. is a holding company and our operations are conducted through our subsidiaries. Under the ownership of Circuit City Stores, Inc. ("Circuit City"), we began operations in 1993 with the opening of our first CarMax store in Richmond, Virginia. On October 1, 2002, the CarMax business was separated from Circuit City through a tax-free transaction, becoming an independent, publicly traded company. As of February 29, 2024, we operated 245 used car stores in 109 U.S. television markets. Our home office is located at 12800 Tuckahoe Creek Parkway, Richmond, Virginia.

On June 1, 2021, we completed the acquisition of Edmunds Holding Company ("Edmunds"), one of the most well established and trusted online guides for automotive information and a recognized leader in digital car shopping innovations. With this acquisition, CarMax has enhanced its digital capabilities and further strengthened its role and reach across the used auto ecosystem while adding exceptional technology and creative talent.

CarMax Business

We operate in two reportable segments: CarMax Sales Operations and CarMax Auto Finance ("CAF"). Our CarMax Sales Operations segment consists of all aspects of our auto merchandising and service operations, excluding financing provided by CAF. Our CAF segment consists solely of our own finance operation that provides financing to customers buying retail vehicles from CarMax. Our consolidated financial statements include the financial results related to our Edmunds business, which does not meet the definition of a reportable segment.

CarMax Sales Operations. Our CarMax Sales Operations segment sells used vehicles, purchases used vehicles from customers and other sources, sells related products and services, and arranges financing options for customers, all for competitive, no-haggle prices. We enable our customers to separately evaluate each component of the sales process based on comprehensive information about the terms and associated prices of each component. Customers can accept or decline any individual element of the offer without affecting the price or terms of any other component of the offer.

Purchasing a Vehicle:

The vehicle purchase process at CarMax differs fundamentally from the traditional auto retail experience. Our no-haggle pricing removes a frequent customer frustration with the purchase process and allows customers to shop for vehicles the same way they shop for other consumer products. Our omni-channel platform further empowers our customers to buy a car on their own terms – online, in-store or an integrated combination of both.

Our omni-channel platform provides multiple ways for our customers to interact with us, including completely online. A customer may interact with our customer experience consultants via phone, text messages or chat. These employees are paid a fixed hourly rate and receive incentive bonuses based on their ability to effectively progress the customer through their car-buying journey. Customers may also interact in-person with our sales consultants who are generally paid commissions on a fixed dollars-per-unit standard, thereby earning the same commission regardless of the vehicle being sold, the amount a customer finances or the related interest rate. These pay structures align our associates' interests with those of our customers, in contrast to other dealerships where sales and finance personnel may receive higher commissions for negotiating higher prices and interest rates, or steering customers to vehicles with higher gross profits.

We recondition every used vehicle we retail to meet our CarMax Quality Certified standards, and each vehicle must pass an inspection before being offered for sale. We stand behind every used vehicle we sell with our Love Your Car Guarantee. This guarantee gives customers the ability to take 24-hour test drives before committing to purchase as well as provides a 30-day/1,500 mile money-back guarantee and a 90-day/4,000-mile limited warranty. In May 2024, we will replace our 30-day

money-back guarantee with a 10-day money-back guarantee. Our CarMax Quality Certified standards were developed internally by CarMax and are not affiliated with any third party or original equipment manufacturer program.

We maximize customer choice by offering a large selection of inventory on our lots and by making our nationwide inventory available for viewing on carmax.com as well as our mobile app. As of February 29, 2024, we had approximately 64,000 saleable retail vehicles in our inventory. Vehicles in-transit or on customer hold are not visible on our website. Upon request by a customer, we will transfer virtually any used vehicle in our inventory. This gives CarMax customers access to a much larger selection of vehicles than any traditional auto retailer. In fiscal 2024, approximately 36% of our vehicles sold were transferred at customer request.

Selling us a Vehicle:

We have separated the practice of trading in a used vehicle in conjunction with the purchase of another vehicle into two distinct and independent transactions. We will appraise a customer's vehicle in-person free of charge and make a written, guaranteed offer to buy that vehicle regardless of whether the owner is purchasing a vehicle from us. This no-haggle offer is good for seven days. We also provide online instant appraisal offers, which quickly give customers an offer on their vehicle. The success of these offerings strengthens our leadership position as the largest used vehicle buyer from consumers in the U.S.

Vehicle purchases are also made through MaxOffer, our digital appraisal product for dealers. We leverage the Edmunds sales team to open new markets and sign-up new dealers for MaxOffer.

In fiscal 2024, we purchased approximately 1.1 million vehicles from consumers and dealers.

Based on age, mileage or condition, approximately half of the vehicles acquired through our appraisal processes meet our retail standards. Those vehicles that do not meet our retail standards are sold to licensed dealers through our wholesale auctions. Unlike many other auto auctions, we own all the vehicles that we sell in our auctions, which allows us to maintain a high auction sales rate. This high sales rate, combined with dealer-friendly practices, makes our auctions an attractive source of vehicles for licensed dealers. We continue to further enhance our auction products to improve dealer experiences. For fiscal 2024, our average auction sales rate was approximately 97%.

Financing a Vehicle:

The availability of financing is a critical component of the vehicle purchase process, and having an array of finance sources increases approvals, expands access to financing for our customers and mitigates risk to CarMax. Our finance program accommodates customers across a wide range of the credit spectrum through both CAF and third-party providers. We believe that our processes and systems, transparency of pricing, and vehicle quality, as well as the integrity of the information collected at the time the customer applies for credit, enable CAF and our third-party providers to make underwriting decisions in a unique and advantageous environment distinct from the traditional auto retail environment. All finance offers, whether from CAF or our third-party providers, are backed by a 3-day payoff option, which allows customers to refinance their loan with another finance provider within three business days at no charge.

We offer pre-qualification and finance-based shopping products nationwide, which are supported by CAF and multiple third-party providers. These products enable customers to request pre-qualification online with no impact to credit scores and receive their decisions and terms within minutes, empowering them to conveniently shop with their personalized, pre-qualification terms across our nationwide inventory. These products seamlessly provide consumers with the information and capabilities they need to shop for financing that best meets their budget and needs, further differentiating CarMax's customer-centric financing experience. Over 80% of our customers use our online finance-based shopping tool as they begin the credit process. We have also established an online checkout and purchasing experience, which integrates our financing process, allowing eligible customers to apply and accept finance offers online without the assistance of an associate. We continue to enhance and further expand these products and experiences.

Related Products and Services:

We provide customers with a range of other related products and services, including extended protection plan ("EPP") products and vehicle repair service. EPP products include extended service plans ("ESPs") and guaranteed asset protection ("GAP"), which is designed to cover the unpaid balance on an auto loan in the event of a total loss of the vehicle or unrecovered theft. Our ESP customers have access to vehicle repair service at each CarMax store and at thousands of independent and franchised service providers. We believe that the broad scope of our ESPs helps promote customer satisfaction and loyalty, and thus increases the likelihood of repeat and referral business. In fiscal 2024, approximately 58% of the customers who purchased a retail used vehicle also purchased an ESP and approximately 16% purchased GAP.

CarMax Auto Finance. CAF provides financing solely to customers buying retail vehicles from CarMax. CAF allows us to manage our reliance on third-party finance providers and to leverage knowledge of our business to provide qualifying customers a competitive financing option. CAF utilizes proprietary scoring models based upon the credit history and other credit data of the customer along with CAF's historical experience to predict the likelihood of customer repayment. Because CAF offers financing solely to CarMax customers, our scoring models are optimized for the CarMax channel. We believe CAF enables us to capture additional profits, cash flows and sales. After the effect of 3-day payoffs and vehicle returns, CAF financed 42.9% of our retail used vehicle unit sales in fiscal 2024.

CAF also services all auto loans it originates and is responsible for providing billing statements, collecting payments, maintaining contact with delinquent customers, and arranging for the repossession of vehicles securing defaulted loans.

Competition

CarMax Sales Operations. The U.S. used car marketplace is highly fragmented, and we face competition from franchised dealers, who sell both new and used vehicles; online and mobile sales platforms; independent used car dealers; and private parties. According to industry sources, as of December 31, 2023, there were over 18,000 franchised dealers in the U.S., who sell the majority of late-model used vehicles. Competition in our industry has evolved with the adoption of online platforms and marketing tools, all of which facilitate increased competition.

Based on industry data, there were approximately 37 million used cars sold in the U.S. in calendar 2023, of which approximately 19 million were estimated to be age 0- to 10-year old vehicles. While we are the largest retailer of used vehicles in the U.S., in calendar 2023, we estimate we sold approximately 3.7% of the age 0- to 10-year old vehicles sold on a nationwide basis, a decrease from 4.0% in calendar 2022. Market share performance in calendar 2023 was negatively impacted by sharp vehicle depreciation in the used car industry and our focus on profitable market share. Our market share is generally correlated to the length of time we have operated in a given market.

We believe that our principal competitive advantages in used vehicle retailing include our ability to provide a high degree of customer satisfaction with the car-buying experience by virtue of our competitive, no-haggle prices and our customer-friendly sales process; our breadth of selection of the most popular makes and models available; the quality of our vehicles; our proprietary information systems; the transparency and availability of CAF and third-party financing; the locations of our retail stores; and our commitment to evolving our car-buying experience to meet customers' changing expectations. We believe our omni-channel platform reinforces our competitive advantages as it empowers customers to buy a car on their own terms, whether online, in-store or through an integrated combination of online and in-store experiences. Our diversified business model, combined with our exceptional associates and unparalleled omni-channel experience, is a unique advantage in the used car industry that firmly positions us to drive profitable market share gains while creating shareholder value over the long-term.

In addition, we believe our willingness to appraise and purchase a customer's vehicle, whether or not the customer is buying a car from us, provides a competitive sourcing advantage for retail vehicles. Our high volume of appraisal purchases, which has increased further with the rollout of our instant appraisal offers and MaxOffer, supplies not only a large portion of our retail inventory, but also provides the scale that enables us to conduct our own wholesale auctions to dispose of vehicles that do not meet our retail standards.

Our wholesale auctions compete with other automotive in-person and online auctions. These competitors auction vehicles of all ages, while CarMax's auctions predominantly sell older, higher mileage vehicles. Our wholesale auctions were primarily conducted virtually during fiscal 2024.

CarMax Auto Finance. CAF operates and is a significant participant in the auto finance sector of the consumer finance market. This sector is primarily comprised of banks, captive finance divisions of new car manufacturers, credit unions and independent finance companies. According to industry sources, this sector represented more than \$1.6 trillion in outstanding receivables as of December 31, 2023. CAF's primary competitors are banks and credit unions that offer direct financing to customers purchasing used cars.

We believe that CAF's principal competitive advantage is its strategic position as the primary finance source for CarMax customers, and that CAF's primary driver for growth is the growth in CarMax's retail used unit sales. We periodically test different credit offers and closely monitor acceptance rates and the effect on sales to assess market competitiveness. We also monitor 3-day payoffs, as the percentage of customers exercising this option can be an indication of the competitiveness of our offer.

Products and Services

Retail Merchandising. We offer customers a broad selection of makes and models of used vehicles, including domestic, imported and luxury vehicles, as well as hybrid and electric vehicles (“EV”), at competitive prices. Our focus is vehicles that are 0 to 10 years old; over the past three fiscal years, these vehicles generally ranged in price from \$14,000 to \$49,000. The mix of our used vehicle inventory by make, model and age will vary from time to time, depending on consumer preferences, seasonality and market pricing and availability.

Wholesale Auctions. The typical vehicle sold at our wholesale auctions is approximately 10 years old and has more than 100,000 miles. We provide condition disclosures on each vehicle, including those for vehicles with major mechanical issues, possible frame or flood damage, branded titles, salvage history and unknown true mileage. Professional, licensed auctioneers conduct our auctions. Dealers pay a fee to us based on the sales price of the vehicles they purchase. Our auctions are generally held on a weekly or bi-weekly basis.

Extended Protection Plans. In conjunction with the sale of a vehicle, we offer customers EPP products. We receive revenue for selling these plans on behalf of unrelated third parties, who are the primary obligors. We have no contractual liability to customers for claims under these agreements. The ESPs we currently offer on all used retail vehicles provide coverage up to 60 months (subject to mileage limitations). GAP covers the customer for the term of their finance contract. The EPPs that we sell have been designed to our specifications and are administered by the third parties through private-label arrangements. Periodically, we may receive profit-sharing revenues based upon the performance of the ESP policies administered by third parties. As of February 29, 2024, our third-party ESP providers included Assurant, Inc., CNA National Warranty Corporation and Fidelity Warranty Services, Inc. Our third-party GAP provider as of February 29, 2024 was Safe-Guard Products International LLC.

Reconditioning and Service. An integral part of our used car consumer offer is the reconditioning process designed to make sure every car meets our internal standards before it can become a CarMax Quality Certified vehicle. This process includes an inspection of the engine and all major systems. Based on this inspection, we determine the reconditioning necessary to bring the vehicle up to our internal quality standards. Many of our stores depend upon nearby, typically larger, CarMax stores for reconditioning, which increases efficiency and reduces overhead. We perform most routine mechanical and minor body repairs in-house; however, for some reconditioning services, including, but not limited to, services related to manufacturer’s warranties, we engage third parties specializing in those services. CarMax does not have manufacturer authorization to complete recall-related repairs, and some vehicles CarMax sells may have unrepaired safety recalls. However, safety recall information, as reported by the National Highway Traffic Safety Administration, is available on our website, and we review any unrepaired safety recall information with our used vehicle customers before purchase.

All CarMax used car stores provide vehicle repair service, including repairs of vehicles covered by the ESPs we sell. Additionally, we have partnered with third-party auto service and repair providers. Through these partnerships, our customers have access to a nationwide network of trusted, quality and fair-priced service and repair locations.

Customer Credit. We offer financing alternatives for retail customers across a wide range of the credit spectrum through CAF and arrangements with several financial institutions. Vehicles are financed using retail installment contracts secured by the vehicle. As of February 29, 2024, our network of third-party finance providers included Ally Financial, American Credit Acceptance, Capital One Auto Finance, Chase Auto Finance, Exeter Finance Corp., Santander Consumer USA and Westlake Financial Services. We have no recourse liability for credit losses on retail installment contracts arranged and held by third-party providers, and we periodically test additional third-party providers.

Generally, credit applications submitted by customers to CarMax are initially reviewed by CAF using our proprietary underwriting standards. Based on that review, CAF makes financing offers designed to create a loan portfolio that meets our targeted risk profile in the aggregate. Applications that CAF declines or approves with conditions are generally evaluated by other third-party finance providers. Third-party providers generally either pay us or are paid a fixed, pre-negotiated fee per contract. We refer to the providers who generally pay us a fee or to whom no fee is paid as Tier 2 providers, and we refer to providers to whom we pay a fee as Tier 3 providers. We are willing to pay a fee to Tier 3 providers because we believe their participation provides us with incremental sales by enabling customers to secure financing that they may not otherwise be able to obtain. All fees either received or paid are pre-negotiated at a fixed amount and do not vary based on the amount financed, the interest rate, the term of the loan or the loan-to-value ratio. CAF also provides financing for a small percentage of customers who would typically be financed by a Tier 2 or Tier 3 provider.

We do not offer financing to dealers purchasing vehicles at our wholesale auctions. However, we have made arrangements to have third-party financing available to our auction customers.

Suppliers for Used Vehicles

We acquire a significant percentage of our retail used vehicle inventory directly from consumers through our in-store and online appraisal processes, as well as through local, regional and online auctions. We also acquire used vehicle inventory from wholesalers, franchised and independent dealers and fleet owners, such as leasing companies and rental companies. Instant offer, our online consumer-facing appraisal tool, as well as MaxOffer, our digital appraisal product for dealers, have significantly driven the increase in our vehicle purchases. The buy rate for customers who engage with us after first receiving an online instant appraisal offer is typically higher than through our traditional appraisal lane. The used vehicle inventory we acquire directly from consumers through our appraisal process helps provide an inventory of makes and models that reflects consumer preferences in each market.

The supply of late-model used vehicles is influenced by a variety of factors, including the total number of vehicles in operation; the volume of new vehicle sales, which in turn generate used car trade-ins; and the number of used vehicles sold or remarketed through retail channels, wholesale transactions and at automotive auctions. According to industry sources, there were approximately 289 million light vehicles in operation in the U.S. as of December 31, 2023. During calendar year 2023, it is estimated that approximately 15 million new cars and 37 million used cars were sold at retail, many of which were accompanied by trade-ins, and approximately 10 million wholesale vehicles were sold at auctions and through other channels.

Based on the large number of vehicles remarketed each year, consumer acceptance of our appraisal process, our experience and success in acquiring vehicles from auctions and other sources, and the large size of the U.S. auction market relative to our needs, we believe that sources of used vehicles will continue to be sufficient to meet our current and future needs.

Seasonality

Historically, our business has been seasonal. Our stores typically experience their strongest traffic and sales in the spring and summer, with an increase in traffic and sales in February and March, coinciding with federal income tax refunds.

Technology

We leverage a combination of cloud-based solutions and proprietary technologies to run our operations. We have a strong software engineering discipline and we have adopted Agile, DevOps, Lean and other leading digital delivery practices. Technology teams are tightly integrated with the rest of the business and are embedded within our cross-functional "Product" teams. Our Product teams use a "test and learn" approach to iterate and deploy new technology-enabled experiences to our associates and customers. We use advanced data science, artificial intelligence and machine learning capabilities to optimize our business and the customer experience. Our business is supported by digital and mobile technologies that provide enhanced customer experience while enabling highly integrated automation of all operating functions, including credit processing and supply chain management. Buyers and sales consultants are equipped with mobile and centralized tools that allow them to access real-time information to better serve our customers. Our proprietary digital technology provides our management with real-time information about many aspects of our omni-channel operations, such as inventory management, pricing, vehicle transfers, wholesale auctions and sales consultant productivity. Real-time access to a complete view of our customer interactions from omni-channel allows our associates to provide a tailored and differentiated experience to our customers. In addition, through our systematic integrations with our third-party finance partners, we are able to provide our finance-based shopping experience. We continue to build our technologies to expand our reach and integrate CarMax into a broader ecosystem of partnerships.

Our proprietary centralized inventory management and pricing system tracks each vehicle throughout the sales process and allows us to buy the mix of makes, models, age, mileage and price points tailored to customer buying preferences at each CarMax location. Leveraging our thirty years of experience buying and selling millions of used vehicles, our system generates recommended initial retail price points, as well as retail price markdowns for specific vehicles based on algorithms that account for factors including sales history, consumer interest and seasonal patterns. We believe this systematic approach to vehicle pricing allows us to optimize inventory turns, which reduces the depreciation risk inherent in used cars and helps us to achieve our targeted gross profit dollars per unit. Because of the pricing discipline afforded by our inventory management and pricing system, generally 99% of our entire used car inventory offered at retail is sold at retail.

Marketing and Advertising

Our marketing strategies are focused on driving customer growth through building awareness and affinity for the brand and acquiring in-market shoppers and sellers. These strategies are implemented through a broad range of media including, but not limited to, traditional broadcast, digital, search, social, out-of-home, sports sponsorships and newer influencer and activation programs. Our website and related mobile app received an average of 34 million monthly visits during fiscal 2024 and are a critical part of the customer's journey, allowing them to learn about CarMax, explore our full inventory in real time, initiate vehicle transfers, apply for financing pre-qualification, receive an appraisal offer and even buy a car fully online. Our survey

data indicates that during fiscal 2024, approximately 95% of customers who purchased a vehicle from us had first visited us online. In addition, approximately 70% of our customers leveraged some or all of our digital capabilities to complete their transactions in fiscal 2024. We believe consumers in the used car industry will increasingly prefer to have the ability to shop and transact digitally.

In fiscal 2024, we continued building the CarMax brand through new creative campaigns promoting our omni-channel platform as well as brand reassurance messaging, highlighting our money back guarantee and up-front pricing. We launched a new campaign with the NBA/WNBA alongside the announcement of CarMax as the newest WNBA Changemaker. In addition, we launched our Never Settle campaign, encouraging customers to never settle for less than the CarMax experience when buying or selling a car. We also continued our multi-year partnership with the NWSL. As part of this partnership, CarMax is the presenting sponsor of the NWSL Shield, awarded to the club with the best regular season record.

Human Capital Resources

CarMax's purpose, to drive integrity by being honest and transparent in every interaction, is brought to life each day by our associates' commitment to living our core values. We recognize that our associates are the key to our success, and we are proud to provide an award-winning workplace where we value the diversity and contribution of all associates and foster a culture where associates can achieve their career goals. Our associates are further guided by the policies and procedures we have in place to ensure everyone is treated with respect and has opportunities to reach their full potential.

On February 29, 2024, we had a total of 29,836 full- and part-time associates, of which 970 work in our CAF segment and 473 work for our Edmunds business. We had 25,122 hourly and salaried associates, as well as 3,077 in-store sales associates, 1,525 sales associates in our Customer Experience Centers ("CECs") and 112 Edmunds sales associates. Our in-store sales associates predominantly work on a commission basis while our CEC sales associates are hourly employees who are incentive eligible. We employ additional associates during peak selling seasons. No associate is subject to a collective bargaining agreement. We annually review our pay in each geographic market to ensure we are providing a fair and competitive wage. As of February 29, 2024, all our associates were paid above the applicable minimum wage. We offer a broad range of benefits to our associates, including health benefits for full-time associates.

Throughout the implementation of our omni-channel car buying experience, the shape of our workforce has evolved and the number of technology, product and data science associates has increased. As of February 29, 2024, we had 1,469 technology, product and data science associates. In response, we created a rotational program for college technology hires and implemented a technology and data science reskilling program. All roles working on our innovation efforts are eligible for equity or equity-based grants through our standard compensation plan, which serve as a meaningful engagement and retention tool. We believe this evolution in our workforce has been and will continue to be critical to the development of our technology platforms and strategic initiatives.

Our commitment to our associates is reflected in our fair and broad-based compensation packages and benefit programs, our continuous investment in talent acquisition, engagement, and development activities, and our comprehensive safety and security program. We review pay equity annually based on objective factors such as position, tenure, and location. If we find discrepancies that cannot be explained by these objective factors, we make appropriate adjustments. Our commitment is to provide equal pay for comparable work regardless of gender, age, race or ethnicity.

We have been recognized for 20 consecutive years as one of Fortune magazine's 100 Best Companies to Work For® and have also been recognized as one of Training magazine's "Training APEX Award" recipients for 17 years in a row. These awards reflect our ability to provide associates with the tools and environment they need to succeed and grow in their careers. We have an Associate Experience Team and a cross-functional Associate Experience Advisory Group dedicated to ensuring an inclusive and engaging workplace. We also continued to measure engagement via biannual associate voice surveys, and across the company, teams created focused plans to continually improve engagement based on survey results. Our goal is to achieve world-class associate engagement and responding to associate feedback enables us to focus on the issues that matter to our associates.

Diversity and Inclusion. The CarMax culture of diversity and inclusion is built on a foundation of integrity and respect, and we value the diverse backgrounds and perspectives our associates bring to locations across the country. Our commitment to diversity and inclusion is based on a company vision to ensure everyone, everywhere has the opportunity to reach their full potential.

Our diversity and inclusion governance model includes a council as well as an executive steering committee, of which the CEO is a member. We also have a Corporate Social Responsibility ("CSR") team, led by our Vice President, CSR. The CSR team includes, in part, the Community Relations, Diversity and Inclusion and Internal Communications teams.

We have a company-wide associate training program on diversity and inclusion. This program includes required trainings for all associates, with a completion rate of over 90% in fiscal 2024. Our board of directors participated in this training as well, with a 100% completion rate in fiscal 2024. The program also includes additional self-service training and learning materials as well as leader perspective videos and discussion guides to aid team conversations.

We remain committed to fostering a work environment that celebrates diversity and operates in an all-inclusive manner for associates, and which authentically reflects our value of putting people first. We celebrate and champion a broad diversity of individuals, perspectives, and ideas, which we believe meaningfully strengthens our ability to innovate and continue expanding the value we provide customers.

Foundational principles are formalized in both our diversity and inclusion framework and our commitment to diversity policy. Our vision is to provide everyone, everywhere with the same opportunities to reach their full potential. This commitment extends to every facet of our business interactions, from associates within CarMax to job applicants, customers, vendors, shareholders, and business partners, to ensure everyone is treated fairly and impartially.

We consider a wide set of different suppliers when conducting business, including small, local businesses. These businesses are vital to their respective communities and help CarMax build resiliency in every area we operate. Accordingly, we have revamped our external supplier inclusion webpage, where potential suppliers can register with CarMax, enabling us to better identify suppliers for specific procurement opportunities. Maintaining a diversified supplier base remains essential to CarMax's strategy of mitigating sourcing risks and remaining resilient.

We plan to publish our 2024 Responsibility Report in May 2024, where we will further describe our broader environmental, social and governance efforts.

Intellectual Property

Our brand image is a critical element of our business strategy. We rely on trademarks, domain names and copyrights to protect core aspects of CarMax's look and feel. Innovation and technology also play an increasingly vital role in all aspects of the business. We actively pursue appropriate intellectual property protection for our state-of-the-art work by filing patent applications in areas ranging from vehicle reconditioning and digital merchandising to image capture, online shopping innovations and search engine optimization.

Laws and Regulations

Vehicle Dealer and Other Laws and Regulations. We operate in a highly regulated industry. In every state in which we operate, we must obtain licenses and permits to conduct business, including dealer, service, sales, transportation and finance licenses issued by state and local regulatory authorities. A wide range of federal, state and local laws and regulations govern the manner in which we conduct business, including logistics, advertising, sales, financing and employment practices. These laws include consumer protection laws and privacy laws, as well as other laws and regulations applicable to motor vehicle dealers. These laws also include federal and state wage-hour, anti-discrimination and other employment practices laws. Our financing activities with customers are subject to federal truth-in-lending, consumer leasing, equal credit opportunity and fair credit reporting laws and regulations, as well as state and local motor vehicle finance, collection, repossession and installment finance laws. Our activities are subject to oversight by the Federal Trade Commission and other federal and state regulators, and our financing activities are also subject to enforcement by the Consumer Financial Protection Bureau ("CFPB").

The CFPB has supervisory authority over large nonbank auto finance companies, including CAF. The CFPB uses this authority to conduct supervisory examinations to ensure compliance with various federal consumer protection laws.

Claims arising out of actual or alleged violations of law could be asserted against us by individuals or governmental authorities and could expose us to significant damages or other penalties, including revocation or suspension of the licenses necessary to conduct business and fines.

We may also be subject, from time to time, to laws, regulations, and other governmental actions instituted in response to public health emergencies. Among other things, these actions have required and may continue to require, in many localities, store occupancy restrictions, store closures and restrictions on in-person wholesale auctions.

Environmental Laws and Regulations. We are subject to a variety of federal, state and local laws and regulations that pertain to the environment. Our business involves the use, handling and disposal of hazardous materials and wastes, including motor oil, gasoline, solvents, lubricants, paints and other substances. We are subject to compliance with regulations concerning, among other things, the operation of underground and above-ground gasoline storage tanks, gasoline dispensing equipment, above-ground oil tanks and automotive paint booths.

AVAILABILITY OF REPORTS AND OTHER INFORMATION

The following items are available free of charge on our website through the “Financials” link on our investor relations home page at investors.carmax.com, shortly after we file them with, or furnish them to, the U.S. Securities and Exchange Commission (the “SEC”): annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements on Schedule 14A, and any amendments to those reports. The following documents are also available free of charge on our website: Corporate Governance Guidelines, Code of Business Conduct, and the charters of the Audit, Nominating and Governance, Compensation and Personnel, and Technology and Innovation Committees. We publish any changes to these documents on our website. We also promptly disclose reportable waivers of the Code of Business Conduct on our website. The contents of our website are not, however, part of this report.

Printed copies of these documents are also available to any shareholder, without charge, upon written request to our corporate secretary at the address set forth on the cover page of this report.

Item 1A. Risk Factors.

We are subject to a variety of risks, the most significant of which are described below. Our business, sales, results of operations and financial condition could be materially adversely affected by any of these risks.

BUSINESS RISKS

We operate in a highly competitive industry. Failure to develop and execute strategies to remain the nation’s preferred retailer of used vehicles and to adapt to the increasing use of digital and online tools to market, buy, sell and finance used vehicles could adversely affect our business, sales and results of operations.

Automotive retailing is a highly competitive and highly fragmented business. Our competition includes publicly and privately owned new and used car dealers and online and mobile sales platforms, as well as millions of private individuals. Competitors buy and sell the same or similar makes of vehicles that we offer in the same or similar markets at competitive prices. New car dealers leverage their franchise relationships with automotive manufacturers to brand certain used cars as “certified pre-owned,” which could provide those competitors with an advantage over CarMax.

Retail Competition. Some of our competitors have replicated or attempted to replicate portions of the consumer offer that we pioneered when we opened our first used car store in 1993, including our use of competitive, no-haggle prices and our commitment to buy a customer’s vehicle even if they do not purchase one from us.

Competitors using online focused business models, both for direct sales and consumer-to-consumer facilitation, could materially impact our business model. Increased online used vehicle offerings and the growing consumer trend of buying vehicles online could make it more difficult for us to differentiate our customer offering from competitors’ offerings, could result in lower-than-expected retail margins, and could have a material adverse effect on our business, sales and results of operations. Further, existing e-commerce businesses have and could continue to enter the online new and used vehicle markets, including companies with significantly more resources than CarMax that might be able to provide customers access to a greater inventory of vehicles while delivering a superior online experience. If we fail to respond effectively to our existing and potential retail competitors, it could have a material adverse effect on our business, sales and results of operations.

Online Facilitation. In addition, our competitive standing is affected by companies, including search engines and online car marketplaces, that are not direct competitors but that may direct online traffic to the websites of competing automotive retailers. The increasing activities of these companies could make it more difficult for carmax.com to attract traffic. These companies could also make it more difficult for CarMax to otherwise market its vehicles online.

The increasing use of digital and online tools to facilitate consumers’ sales or trade-ins of their current vehicles could have a material adverse effect on our ability to source vehicles through our appraisal process, which in turn could have a material adverse effect on our vehicle acquisition costs and results of operations. For example, online appraisal tools are available to consumers that generate offers and facilitate purchases by dealers other than CarMax.

In addition, there are companies that sell software and data solutions to new and used car dealers to enable those dealers to, among other things, more efficiently source and price inventory. Although these companies do not compete with CarMax, the increasing use of such products by dealers who compete with CarMax could reduce the relative competitive advantage of CarMax’s internally developed proprietary systems.

If we fail to respond effectively to competitive pressures or to changes in the used vehicle marketplace, it could have a material adverse effect on our business, sales and results of operations.

CAF Competition. Our CAF segment is subject to competition from various financial institutions, including banks and credit unions, which provide vehicle financing to consumers. If we were unable to continue providing competitive finance offers to our customers through CAF, it could result in a greater percentage of sales financed through our third-party finance providers, which are generally less profitable to CarMax, or through other outside financing sources. Moreover, if CAF competitors are able to attract potential customers before they visit CarMax, whether through competitive finance offers or ease of customer experience, they may be directed to retail options other than CarMax. Accordingly, if CAF was unable to continue making competitive finance offers to our customers, or our finance competitors are able to successfully attract and redirect a disproportionate number of our potential customers, it could have a material adverse effect on our business, sales and results of operations.

Evolving Marketplace. The marketplace for used vehicles may be impacted by the significant, and likely accelerating, changes to the broader automotive industry. Increasing demand for EVs is driving the need to adapt our business to source, recondition and service EVs. Technological changes, including the development of autonomous vehicles, new products and services, new business models, including subscription models, and new methods of travel could reduce automotive retail demand or disrupt our current business model. If we fail to respond effectively to the evolving marketplace, it could have a material adverse effect on our business, sales and results of operations.

The automotive retail industry in general and our business in particular are sensitive to economic conditions. These conditions could adversely affect our business, sales, results of operations and financial condition.

We are subject to national and regional U.S. economic conditions. These conditions include, but are not limited to, recession, inflation, interest rates, unemployment levels, the state of the housing market, gasoline prices, consumer credit availability, consumer credit delinquency and loss rates, personal discretionary spending levels, and consumer sentiment about the economy in general. These conditions and the economy in general have, and in the future may, be affected by significant national or international events such as a global health crisis (including the COVID-19 pandemic) or current geopolitical conditions (including the Israel-Hamas War and the Russia-Ukraine War). When these economic conditions worsen or stagnate, it can have a material adverse effect on consumer demand for vehicles generally, demand from particular consumer categories or demand for particular vehicle types. It can also negatively impact availability of credit to finance vehicle purchases for all or certain categories of consumers. This could result in challenges to vehicle affordability, lower sales, decreased margins on units sold, and decreased profits for our CAF segment. For example, vehicle affordability challenges that stem from widespread inflationary pressures, higher interest rates, tightened lending standards and prolonged low consumer confidence are the primary drivers behind the overall decrease in demand for used vehicles. Worsening or stagnating economic conditions can also have a material adverse effect on the supply of late-model used vehicles, as automotive manufacturers produce fewer new vehicles and consumers retain their current vehicles for longer periods of time. This could result in increased costs to acquire used vehicle inventory and decreased margins on units sold.

Any significant change or deterioration in economic conditions could have a material adverse effect on our business, sales, results of operations and financial condition.

Our business is dependent upon capital to operate, fund growth and support the activities of our CAF segment. Changes in capital and credit markets could adversely affect our business, sales, results of operations and financial condition.

Changes in the availability or cost of capital and working capital financing, including the long-term financing to support the expansion of our store base and sales growth in existing stores, could adversely affect sales, operating strategies and store growth. Although, in recent years, internally generated cash flows have generally been sufficient to maintain our operations and fund our growth, there can be no assurance that we will continue to generate sufficient cash for these purposes. Failure to do so—or our decision to put our cash to other uses—would make us more dependent on external sources of financing to fund our growth.

Changes in the availability or cost of the long-term financing to support the origination of auto loans receivable through CAF could adversely affect sales and results of operations. We use a securitization program to fund the majority of the auto loans receivable originated by CAF. Changes in the condition of the asset-backed securitization market could lead us to incur higher costs to access funds in this market or require us to seek alternative means to finance CAF's loan originations. If this market ceased to exist and there were no immediate alternative funding sources available, we might be forced to curtail our lending practices for some period of time. The impact of reducing or curtailing CAF's loan originations could have a material adverse effect on our business, sales and results of operations.

Our revolving credit facility, term loans, senior unsecured notes and certain securitization and sale-leaseback agreements contain covenants and event-of-default or other performance triggers. Any failure to comply with these covenants or performance triggers could have a material adverse effect on our business, results of operations and financial condition.

Disruptions in the capital and credit markets could adversely affect our ability to draw on our revolving credit facility or access our deposits generally. If our ability to secure funds from the facility or our deposits were significantly impaired, our access to working capital would be impacted, our ability to maintain appropriate inventory levels could be affected and these conditions—especially if coupled with a failure to generate significant cash flows—could have a material adverse effect on our business, sales, results of operations and financial condition.

CarMax was founded on the fundamental principle of integrity. Failure to maintain a reputation of integrity and to otherwise maintain and enhance our brand could adversely affect our business, sales and results of operations.

Our reputation as a company that is founded on the fundamental principle of integrity is critical to our success. Our reputation as a retailer offering competitive, no-haggle prices, a broad selection of CarMax Quality Certified used vehicles and superior customer service is also critical to our success. If we fail to maintain the high standards on which our reputation is built, or if an event occurs that damages this reputation, it could adversely affect consumer demand and have a material adverse effect on our business, sales and results of operations. Such an event could include an isolated incident at a single store, particularly if such incident results in adverse publicity, governmental investigations, or litigation and could involve, among other things, our sales process, our provision of financing, our reconditioning process, our treatment of customers or associates, our use of artificial intelligence, cultural brand positioning, or real or perceived vehicle quality and related injury. Even the perception of a decrease in the quality of our brand could impact results.

The use of social media has increased the speed with which information and opinions can be shared and thus the speed with which reputation can be affected. We monitor social media and attempt to address customer concerns, provide accurate information and protect our reputation, but there can be no guarantee that our efforts will succeed. If we fail to correct or mitigate misinformation or negative information, including information spread through social media or traditional media channels, about the vehicles we offer, our customer experience, or any aspect of our brand, it could have a material adverse effect on our business, sales and results of operations.

Our business is sensitive to changes in the prices of new and used vehicles.

Any significant changes in retail prices for new and used vehicles could have a material adverse effect on our sales and results of operations. For example, if retail prices for used vehicles rise relative to retail prices for new vehicles, it could make buying a new vehicle more attractive to our customers than buying a used vehicle, which could have a material adverse effect on sales and results of operations and could result in decreased used margins. Manufacturer incentives could contribute to narrowing this price gap. In addition, any significant changes in retail or wholesale prices for used vehicles could have a material adverse effect on our results of operations by reducing margins.

Our business is dependent upon access to vehicle inventory and the parts used to recondition such inventory. A failure to expeditiously liquidate that inventory—or obstacles to acquiring inventory, including parts—whether because of supply, competition, or other factors could have a material adverse effect on our business, sales and results of operations.

Used vehicle inventory is subject to depreciation risk. CarMax has experienced, and may continue to experience, steep market depreciation of its vehicle inventory due to changes in economic conditions, which could result in reduced retail and wholesale margins. The inability to liquidate excess inventory at prices that allow us to meet margin targets or to recover our costs could have a material adverse effect on our results of operations.

A reduction in the availability of, or access to, sources of inventory, including parts used to recondition inventory, also could have a material adverse effect on our business, sales and results of operations.

We source a significant percentage of our vehicles through our appraisal process, which includes our online instant appraisal offers, and these vehicles are generally more profitable for CarMax. Accordingly, if we fail to adjust appraisal offers to stay in line with broader market trade-in offer trends, or fail to recognize those trends, it could adversely affect our ability to acquire inventory. It could also force us to purchase a greater percentage of our inventory from third-party auctions, which is generally less profitable for CarMax. Our ability to source vehicles through our appraisal process could also be affected by competition, both from new and used car dealers directly and through third parties driving appraisal traffic to those dealers. See the risk factor above titled “*We operate in a highly competitive industry*” for discussion of this risk. Our ability to source vehicles from

third-party auctions could be affected by an increase in the number of closed auctions that are open only to new car dealers who have franchise relationships with automotive manufacturers.

Our failure to realize the benefits associated with our omni-channel platform could have a material adverse effect on our business, sales and results of operations.

We have made a considerable investment in our omni-channel platform and a failure to capture the benefits that we expect from the platform and our continued investments in enhancements to the platform could have a material adverse effect on our business, sales and results of operations. We must anticipate and meet our customers' expectations in an evolving retail industry. Our business, sales and results of operations may be negatively affected if we fail to provide a high quality and consistent customer experience, regardless of sales channel, if our omni-channel platform does not meet customer expectations, or if we are unable to attract, retain and manage the personnel at various levels who have the necessary skills and experience we need to implement our omni-channel initiatives.

Our failure to manage our growth and the related challenges could have a material adverse effect on our business, sales and results of operations.

Our growth is dependent on the success of our omni-channel platform, opening stores in new and existing markets, continued sales growth and the build-out of our offsite production and auction facilities. These enhancements and expansions place significant demands on our management team, our associates and our information systems. If we fail to effectively or efficiently manage our growth, it could have a material adverse effect on our business, sales and results of operations. Sales growth requires that we continue to effectively execute our business strategies and implement new and ongoing initiatives to elevate the experience of our customers. See the risk factor above titled "Our failure to realize the benefits associated with our omni-channel platform could have a material adverse effect on our business, sales and results of operations" for more discussion of this risk. The expansion of our store base and implementation of new initiatives also requires us to recruit and retain the associates necessary to support that expansion. See the risk factor below titled "Our success depends upon the continued contributions of our associates" for discussion of this risk. The expansion of our business also requires real estate. Our inability to acquire or lease suitable real estate at favorable terms could limit our expansion and could have a material adverse effect on our business and results of operations.

Our success depends upon the continued contributions of our associates.

Our associates are the driving force behind our success. We believe that one of the things that distinguishes CarMax is a culture centered on valuing our associates. Adapting to new dynamics, we provide flexible, hybrid and remote work arrangements for certain associates, which may impact associate engagement, integration of new associates and overall company culture. A failure to maintain our culture could have a material adverse effect on our business, sales and results of operations.

In addition, managing our response to a changing economic environment as well as our strategic initiatives require management, employees and contractors to adapt and learn new skills and capabilities. A failure to maintain an adaptable and responsive culture or to continue developing and retaining the associates that drive our success could have a material adverse effect on our business, sales and results of operations.

We have experienced, and could experience in the future, a shortage of associates for retail and operational positions, which could have an impact on our ability to conduct our business and maintain qualified talent in key areas. Further, there has been a general increase in domestic workers organizing to form or join a union. If we are unable to maintain positive associate relations, or if, despite our efforts, we become subject to successful unionization efforts, it could increase costs, limit our ability to respond to competitive threats and have a material adverse effect on our business, sales and results of operations.

Our ongoing success also depends upon the continued contributions of our store, CEC, region and corporate management teams. Consequently, the loss of the services of any of these associates could have a material adverse effect on our business, sales and results of operations. In addition, an inability to build our management bench strength to support store growth could have a material adverse effect on our business, sales and results of operations.

We may experience greater credit losses in CAF's portfolio of auto loans receivable than anticipated.

We are exposed to the risk that our customers who finance their purchases through CAF will be unable or unwilling to repay their loans according to their terms and that the vehicle collateral securing the payment of their loans may not be sufficient to

ensure full repayment. Credit losses are inherent in CAF's business and could have a material adverse effect on our results of operations.

We make various assumptions and judgments about CAF's portfolio of auto loans receivable and provide an allowance for loan losses based on a number of factors. Although management will establish an allowance for loan losses it believes is appropriate, this allowance may not be adequate. For example, when economic conditions deteriorate unexpectedly, additional loan losses not incorporated in the existing allowance for loan losses may occur. Losses in excess of the existing allowance for loan losses could have a material adverse effect on our business, results of operations and financial condition.

Our failure to realize the benefits associated with our strategic investments, including actual or potential acquisitions, could have a material adverse effect on our business, sales and results of operations and we may incur impairment losses on our strategic investments in equity securities.

From time to time, CarMax makes strategic investments, including acquisitions, and we currently hold non-controlling equity investments in several companies. We may encounter difficulties in managing our strategic investments and in assimilating new capabilities or acquisitions to meet the future needs of our business. Furthermore, we may not realize all the anticipated benefits of these investments, or the realized benefits may be significantly delayed. While our evaluation of any potential transaction includes business, legal, and financial due diligence with the goal of identifying and evaluating the material risks involved, our due diligence reviews may not identify all of the issues necessary to accurately estimate the cost and potential benefits and risks of a particular investment.

Additionally, under U.S. generally accepted accounting principles ("GAAP"), if any investment's fair value declines below its carrying value, we will need to record an impairment loss in the applicable fiscal period. As a result, we may incur expenses related to the impairment of existing or future equity investments. Any such impairment charge could have a material adverse effect on our business, financial condition and results of operations.

We rely on third-party finance providers to finance a significant portion of our customers' vehicle purchases. Accordingly, our sales and results of operations are partially dependent on the actions of these third parties.

We provide financing to qualified retail customers through CAF and several third-party finance providers. We also have arrangements with third parties who provide financing to some of our auction customers. If one or more of these third-party providers cease to provide financing to our customers, provide financing to fewer customers or no longer provide financing on competitive terms, it could have a material adverse effect on our business, sales and results of operations. Additionally, if we were unable to replace the current third-party providers upon the occurrence of one or more of the foregoing events, it could also have a material adverse effect on our business, sales and results of operations.

We rely on third-party providers to supply EPP products to our customers. Accordingly, our sales and results of operations are partially dependent on the actions of these third-parties.

We receive revenue for selling EPP products on behalf of unrelated third-parties, who are the primary obligors. If one or more of these third-party providers cease to provide EPP products, make changes to their products or no longer provide their products on competitive terms, it could have a material adverse effect on our business, sales and results of operations. Additionally, if we were unable to replace the current third-party providers upon the occurrence of one or more of the foregoing events, it could also have a material adverse effect on our business, sales and results of operations.

We rely on third-party vendors for key components of our business.

Many components of our business, including data management, key operational processes and critical customer systems, are provided by third parties. We carefully select our third-party vendors, but we do not control their actions. If our vendors fail to perform as we expect or conduct operations that are inconsistent with our values, our operations and reputation could suffer if the failure harms the vendors' ability to serve us and our customers. One or more of these third-party vendors may experience financial distress, technology challenges, cybersecurity incidents, staffing shortages or liquidity challenges, file for bankruptcy protection, go out of business, or suffer disruptions in their business. The use of third-party vendors represents an inherent risk to our company that could have a material adverse effect on our business, sales and results of operations.

Our business is sensitive to conditions affecting automotive manufacturers, including manufacturer recalls.

Adverse conditions, such as the 2023 United Auto Workers strike, affecting one or more automotive manufacturers could have a material adverse effect on our sales and results of operations and could impact the supply of vehicles, including the supply of late-model used vehicles. In addition, manufacturer recalls are a common occurrence. Because we do not have manufacturer authorization to complete recall-related repairs, some vehicles we sell may have unrepaired safety recalls. Such recalls, and our lack of authorization to make recall-related repairs, could adversely affect used vehicle sales or valuations, could cause us to temporarily remove vehicles from inventory, could force us to incur increased costs and could expose us to litigation and adverse publicity related to the sale of recalled vehicles, which could have a material adverse effect on our business, sales and results of operations.

Our results of operations and financial condition are subject to management's accounting judgments and estimates, as well as changes in accounting policies.

The preparation of our financial statements requires us to make estimates and assumptions affecting the reported amounts of CarMax's assets, liabilities, revenues, expenses and earnings. If these estimates or assumptions are incorrect, it could have a material adverse effect on our results of operations or financial condition. We have identified several accounting policies as being "critical" to the fair presentation of our financial condition and results of operations because they involve major aspects of our business and require us to make judgments about matters that are inherently uncertain. These policies are described in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and the notes to consolidated financial statements included in Item 8. Consolidated Financial Statements and Supplementary Data.

The implementation of new accounting requirements or other changes to GAAP could have a material adverse effect on our reported results of operations and financial condition.

We may not be able to adequately protect our intellectual property, which could adversely affect our business, sales, results of operations and financial condition.

Protecting our intellectual property (including patents, trademarks, copyrights, confidential information and trade secrets) is integral to our business. The failure to protect our intellectual property, including from unauthorized uses, can erode consumer trust and our brand value and have a material adverse effect on our business.

Our business is sensitive to weather events.

The occurrence of severe weather events, such as rain, flooding, hail, snow, wind, storms, hurricanes, extended periods of unusually cold weather or natural disasters, could cause store closures or affect the timing of consumer demand, either of which could adversely affect consumer traffic and could have a material adverse effect on our sales and results of operations in a given period. Further, as the Earth's climate changes, extreme weather events could become more frequent or more intense, which could have a material adverse effect on our sales and results of operations.

We have communicated certain environmental goals that are subject to related disclosure requirements. Failure to meet environmental goals or satisfy disclosure requirements could adversely affect our business, sales, results of operations and financial condition.

We have communicated certain environmental goals in our public disclosures which may be difficult to achieve. The accuracy, adequacy or completeness of the disclosures may subject us to scrutiny. Further, statements about our environmental goals, and progress toward those goals, may be based on standards for measuring progress that are still developing, and such statements may be subject to evolving, forthcoming and altogether new disclosure requirements. If we are unable to achieve progress with respect to our environmental goals, accomplish our environmental goals or satisfy evolving shareholder expectations or industry standards, we could suffer reputational harm. Our environmental data, processes, and disclosure may be incomplete or inaccurate, which may result in civil penalties and have a material adverse effect on our business, sales and results of operations.

We are subject to local conditions in the geographic areas in which we are concentrated.

Our performance is subject to local economic, competitive and other conditions prevailing in geographic areas where we operate. Since a large portion of our sales is generated in the Southeastern U.S., California, Texas and Washington, D.C./Baltimore, our results of operations depend substantially on general economic conditions and consumer spending habits in these

markets. In the event that any of these geographic areas experience a downturn in economic conditions, weather events or other region-specific incidents, it could have a material adverse effect on our business, sales and results of operations.

TECHNOLOGY AND DATA PRIVACY RISKS

We collect sensitive confidential information from our customers. A breach of this confidentiality, whether due to a cybersecurity or other incident, could result in harm to our customers and damage to our brand.

We collect, process and retain sensitive and confidential customer information in the normal course of business and may share that information with our third-party service providers. This information includes the information customers provide when purchasing a vehicle and applying for vehicle financing. We also collect, process and retain sensitive and confidential associate information in the normal course of business and may share that information with our third-party service providers. Although we have taken measures designed to safeguard such information and have received assurances from our third-party providers, our facilities and systems, and those of third-party providers, could be vulnerable to external or internal security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming or human errors or other similar events.

The security measures we have implemented to protect against cybersecurity incidents may not always prevent or mitigate the impact of a cybersecurity incident and there can be no assurance that future efforts to prevent or mitigate a cybersecurity incident will be effective either. Numerous national retailers have disclosed security breaches involving sophisticated cyber-attacks, including ransomware, that were not recognized or detected until after such retailers had been affected, notwithstanding the preventive measures such retailers had in place. Further, the rapid evolution and increased adoption of artificial intelligence technologies may increase our level of cybersecurity risk. Any security breach involving the misappropriation, loss or other unauthorized disclosure of confidential customer or associate information, whether experienced by us or by our third-party service providers, and whether due to an external cybersecurity incident, a programming error, or other cause, could damage our reputation, expose us to mitigation costs and the risks of private litigation and government enforcement, disrupt our business and otherwise have a material adverse effect on our business, sales and results of operations. In addition, our failure to respond quickly and appropriately to such a security breach could exacerbate the consequences of the breach.

We are subject to numerous and rapidly changing federal, state, and local laws and regulations regarding privacy, cybersecurity, and the collection, use, and disclosure of sensitive confidential information. If we fail to comply with these laws and regulations or future applicable laws and regulations, we could suffer reputational harm and disruption to our business, and be subject to significant litigation, monetary damages, regulatory enforcement actions, or fines. See the risk factor below titled *"We operate in a highly regulated industry and are subject to a wide range of federal, state and local laws and regulations. Changes in these laws and regulations, or our failure to comply, could have a material adverse effect on our business, sales, results of operations and financial condition"* for the risks associated with failure to comply with these laws and regulations.

We rely on sophisticated information systems to run our business. The failure of these systems, or the inability to enhance our capabilities, could have a material adverse effect on our business, sales and results of operations.

Our business is dependent upon the integrity and efficient operation of our information systems. In particular, we rely on our information systems to manage sales, inventory, our customer-facing websites and applications (carmax.com, carmaxautofinance.com, the CarMax mobile app, and carmaxauctions.com), consumer financing, customer information and other data. The failure of these systems to perform as designed, the failure to maintain or update these systems as necessary, or the inability to enhance our data management and information technology capabilities, could disrupt our business operations and have a material adverse effect on our sales and results of operations.

Despite our ongoing efforts to maintain and enhance the integrity and security of these systems, we have been and could be subjected to attacks by hackers, including denial-of-service attacks directed at our websites or other system breaches or malfunctions due to associate error or misconduct or other disruptions. Such incidents could disrupt our business and have a material adverse effect on sales and results of operations. See the risk factor above titled *"We collect sensitive confidential information from our customers"* for the risks associated with a breach of confidential customer or associate information.

REGULATORY AND LITIGATION RISKS

We operate in a highly regulated industry and are subject to a wide range of federal, state and local laws and regulations. Changes in these laws and regulations, or our failure to comply, could have a material adverse effect on our business, sales, results of operations and financial condition.

We are subject to a wide range of federal, state and local laws and regulations, as well as changes in these laws and regulations and the manner in which they are interpreted or applied. Our sale of used vehicles and related products is subject to state and local licensing requirements, federal and state laws regulating marketing and advertising, and state laws regulating sales and services. Our provision of vehicle financing is subject to federal and state laws regulating the provision of consumer finance. Our facilities and business operations are subject to laws and regulations relating to environmental protection and health and safety. In addition to these laws and regulations that apply specifically to our business, we are also subject to laws and regulations affecting public companies and large employers generally, including privacy laws and federal employment practices, securities and tax laws, and sustainability and responses to climate change. For additional discussion of these laws and regulations, see the section of this Form 10-K titled “*Business – Laws and Regulations.*”

The violation of any of these laws or regulations could result in administrative, civil or criminal penalties or in a cease-and-desist order against our business operations, any of which could damage our reputation and have a material adverse effect on our business, sales and results of operations. We have incurred and will continue to incur capital and operating expenses and other costs to comply with these laws and regulations.

We are subject to evolving regulations, disclosure requirements, and expectations relating to environmental, social and governance matters. Failure to satisfy these regulations, requirements, and expectations could adversely affect our business, sales, results of operations and financial condition.

We are subject to an increasing number of regulations and disclosure requirements relating to environmental, social and governance (“ESG”) matters, including environmental and climate change laws. Regulators, shareholders, associates and other stakeholders are increasingly focused on ESG matters and related disclosures. We have incurred and will continue to incur operating expenses and other costs to comply with the evolving set of regulations and disclosure requirements and respond to shareholder expectations related to ESG matters. Compliance with ESG-related regulations and disclosure requirements, including an evolving set of environmental and climate change laws, and shareholder expectations can be costly, challenging and time-consuming. The violation of regulations or disclosure requirements related to ESG matters (or the disclosures themselves) could result in civil penalties, significant expenses, or damage to our reputation, which could have a material adverse effect on our business, sales and results of operations.

We are subject to various legal proceedings. If the outcomes of these proceedings are adverse to CarMax, it could have a material adverse effect on our business, results of operations and financial condition.

We are subject to various litigation matters from time to time, which could have a material adverse effect on our business, results of operations and financial condition. Claims arising out of actual or alleged violations of law could be asserted against us by individuals, either individually or through class claims, or by governmental entities in civil or criminal investigations and proceedings. These claims could be asserted under a variety of laws including, but not limited to, consumer finance laws, consumer protection laws, intellectual property laws, privacy laws, labor and employment laws, securities laws, employee benefit laws, tax laws and environmental laws. These actions could expose us to adverse publicity and to substantial monetary damages and legal defense costs, injunctive relief and criminal and civil fines and penalties including, but not limited to, suspension or revocation of licenses to conduct business.

GENERAL RISKS

The market price of our common stock may be volatile and could expose us to securities class action litigation.

The price of our common stock may be subject to wide fluctuations based upon our operating results, general economic and market conditions, general trends and prospects for our industry, announcements by our competitors, our ability to achieve any long-term targets or performance metrics and other factors. In addition, the market price of our common stock may also be affected by whether we meet analysts’ expectations. Failure to meet such expectations could have a material adverse effect on the price of our common stock. Following periods of volatility in the market price of a company’s securities, securities class action litigation is more likely. If litigation were instituted against us, it could result in substantial costs and a diversion of our attention and resources, which could have a material adverse effect on our business.

Item 1B. Unresolved Staff Comments.

None.

Item 1C. Cybersecurity.

CarMax's cybersecurity program is designed to help ensure the proper assessment, identification, and management of the company's risks from cybersecurity threats and is integrated into our overall risk management system. The company's cybersecurity program is staffed by well-trained and experienced cybersecurity professionals and includes technology controls, proactive identification of data security vulnerabilities, and quarterly, or as needed, reporting by management to the Technology and Innovation Committee of the Board of Directors (the "Board").

CarMax's cybersecurity team manages the company's Incident Response Plan, which establishes a comprehensive system and process for tracking and logging cybersecurity occurrences, reviewing the occurrences to determine whether remediation or escalation is appropriate and escalating certain occurrences to the company's Chief Information Security Officer (the "CISO") for further review and assessment. CarMax has an established review and escalation process for assessing cybersecurity occurrences and, if necessary, escalating cybersecurity incidents to members of our senior management team.

We monitor industry trends to prioritize and mitigate cybersecurity risk for our customers, associates and business, and to remain apprised of industry developments and emerging threats. CarMax engages in testing to improve our cybersecurity approach internally and with third-party vendors and conducts exercises based on current threat intelligence. Additionally, all CarMax associates are required to complete the company's cybersecurity training program on an annual basis.

The company engages a third-party with extensive experience in cybersecurity to periodically perform a maturity analysis of CarMax's cybersecurity program as compared to peer companies. We conduct annual tabletop exercises, guided by a third-party cybersecurity firm, with key members of our cybersecurity and legal teams to assess the company's readiness and capabilities to respond to a cyber-attack. At least annually, we also conduct third-party penetration tests to enhance the security of our digital systems, and we employ network scanning to help us identify any newly developed vulnerabilities or threats. Our third-party intake process incorporates cybersecurity risk into the assessment of our third-party vendors when we engage a new vendor or experience a change in relationship with an existing vendor. Further, CarMax's cybersecurity team conducts reviews of the company's third-party vendors depending on the vendor's risk profile as determined by the company's cybersecurity team.

The company's cybersecurity program is led and overseen by our Chief Information and Technology Officer (the "CITO") and our CISO. The CITO joined CarMax in 2012, reports to our Chief Executive Officer and has served in various technology leadership roles in startup organizations and Fortune 500 companies across the retail, travel, hospitality, finance, and technology industries for over 20 years. The company's CISO reports to the CITO, joined CarMax in 2015 and has served in various roles in information technology for over 20 years, including prior service as the vice president of information security, risk and compliance for a Fortune 500 company.

The Board's Technology and Innovation Committee assists in the Board's oversight of the company's cybersecurity risk. The Committee monitors and oversees the company's exposure to cybersecurity occurrences as well as the company's approach to managing cybersecurity risk, including how to reasonably control and monitor cybersecurity risks and effectively assign management oversight and responsibility. CarMax's management team, including the CITO and the CISO, provide quarterly updates to the Committee regarding the cybersecurity landscape and the company's security posture in the context of external cybersecurity occurrences as well as updates on the latest issues related to cybersecurity risk as needed.

The company has not experienced any material cybersecurity incidents or incurred any material expenses resulting from a cybersecurity breach; however, we cannot provide assurance that our business strategy, results of operations and financial condition will not be materially affected in the future by such risks or any future material incidents. For a discussion of whether and how any risks from cybersecurity threats are reasonably likely to materially affect us, including our business strategy, results of operations or financial condition, refer to the risk factors captioned "We rely on third-party vendors for key components of our business" and "We collect sensitive confidential information from our customers. A breach of this confidentiality, whether due to a cybersecurity or other incident, could result in harm to our customers and damage to our brand" set forth under the heading "Risk Factors" included in Part I, Item 1A of this Form 10-K.

Item 2. Properties.

We conduct our retail vehicle operations primarily in two formats – production and non-production stores. Production stores are those locations at which vehicle reconditioning is performed. Production stores have more service bays and require additional space for reconditioning activities and, therefore, are generally larger than non-production stores. In determining whether to construct a production or a non-production store on a given site, we take several factors into account, including the anticipated long-term regional reconditioning needs and the available acreage of the sites in that market. As a result, some stores that are constructed to accommodate reconditioning activities may initially be operated as non-production stores until we expand our presence in that market. We also have production and non-production stores that operate in Metropolitan Statistical Areas (“MSAs”) of less than 600,000 people, which we define as small markets. Some of these stores also have a smaller footprint compared with our stores in larger markets.

USED CAR STORES BY FORMAT AS OF FEBRUARY 29, 2024

	Production Stores	Non-production Stores
Store count	110	135
Store location size	generally 10 - 25 acres	generally 4 - 12 acres
Stores located in small MSAs	14	43

USED CAR STORES BY STATE AS OF FEBRUARY 29, 2024

State	Count	State	Count
Alabama	5	Missouri	4
Arizona	5	Nebraska	1
California	32	Nevada	4
Colorado	6	New Hampshire	1
Connecticut	3	New Jersey	5
Delaware	1	New Mexico	2
Florida	24	New York	5
Georgia	11	North Carolina	13
Idaho	1	Ohio	6
Illinois	11	Oklahoma	3
Indiana	4	Oregon	3
Iowa	1	Pennsylvania	5
Kansas	2	Rhode Island	1
Kentucky	2	South Carolina	4
Louisiana	5	Tennessee	10
Maine	1	Texas	25
Maryland	7	Utah	1
Massachusetts	4	Virginia	12
Michigan	1	Washington	5
Minnesota	2	Wisconsin	4
Mississippi	3	Total	245

Of the 245 used car stores open as of February 29, 2024, 162 were located on owned sites and 83 were located on leased sites. The leases are classified as follows:

Land-only leases	27
Land and building leases	56
Total leased sites	83

During fiscal 2024, we opened our first stand-alone reconditioning center in Carrollton, Georgia. This facility is used to recondition used vehicles to be sold to customers at our stores in the Atlanta region, with the ability to move vehicles nationwide.

As of February 29, 2024, we leased our CAF office building in Atlanta, Georgia, as well as office buildings for our customer experience centers in Atlanta, Georgia; Kansas City, Missouri; and Phoenix, Arizona. We also lease other ancillary properties to support our corporate and store operations. We own our home office building in Richmond, Virginia and land associated with planned future locations.

Item 3. Legal Proceedings.

Information in response to this Item is included in Note 18 to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K and is incorporated herein by reference.

Item 4. Mine Safety Disclosures.

None.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

The following table identifies our current executive officers. We are not aware of any family relationships among any of our executive officers or between any of our executive officers and any directors. All executive officers are elected annually and serve for one year or until their successors are elected and qualify. The next election of officers will occur in June 2024.

<u>Name</u>	<u>Age</u>	<u>Office</u>
William D. Nash.....	54	President, Chief Executive Officer and Director
Diane L. Cafritz.....	53	Executive Vice President, Human Resources, General Counsel and Chief Compliance Officer
James Lyski.....	61	Executive Vice President, Chief Innovation and Strategy Officer
Enrique N. Mayor-Mora.....	55	Executive Vice President, Chief Financial Officer
Shamim Mohammad.....	55	Executive Vice President, Chief Information and Technology Officer
C. Joseph Wilson.....	51	Executive Vice President, Chief Operating Officer
Jon G. Daniels.....	52	Senior Vice President, CarMax Auto Finance
Darren C. Newberry.....	54	Senior Vice President, Store and CEC Execution

Mr. Nash joined CarMax in 1997 as auction manager. In 2007, he was promoted to vice president and later, senior vice president of merchandising, a position he held until 2011, when he was named senior vice president, human resources and administrative services. In 2012, he was promoted to executive vice president, human resources and administrative services. In February 2016, he was promoted to president, and in September 2016, he was promoted to chief executive officer and named to the board of directors. Prior to joining CarMax, Mr. Nash worked at Circuit City.

Ms. Cafritz joined CarMax in 2003 as assistant general counsel. She was promoted to associate general counsel, director in 2005, deputy general counsel, assistant vice president in 2010, and vice president in 2014. During her tenure in the CarMax legal department, Ms. Cafritz managed commercial and consumer litigation, was responsible for operational regulatory guidance and led CarMax's government affairs program. In 2017, Ms. Cafritz was named senior vice president and chief human resources officer, and in 2021, she was named senior vice president, general counsel, chief compliance officer and chief human resources officer. In 2022, Ms. Cafritz was promoted to executive vice president, general counsel, chief compliance officer and chief human resources officer, and in 2023, she was named executive vice president, human resources, general counsel and chief compliance officer. Prior to joining CarMax, Ms. Cafritz was a partner at McDermott, Will & Emery.

Mr. Lyski joined CarMax in August 2014 as senior vice president and chief marketing officer. In 2017, he was promoted to executive vice president and chief marketing officer. In 2023, he transitioned to executive vice president and chief innovation and strategy officer. Prior to joining CarMax, he served as chief marketing officer of The Scotts Miracle-Gro Company from 2011 to 2014 and as chief marketing officer at Nationwide Mutual Insurance Company from 2006 to 2010. In addition, Mr. Lyski has held marketing leadership positions at Cigna Healthcare Inc. and FedEx Corporation.

Mr. Mayor-Mora joined CarMax in 2011 as vice president, finance before assuming the role of vice president and treasurer in 2016. Mr. Mayor-Mora was promoted to senior vice president and chief financial officer in 2019, and in 2022, he was promoted to executive vice president and chief financial officer. Prior to joining CarMax, he served as vice president of financial planning and analysis and investor relations at Denny's Corporation from 2005 to 2011. He also served in financial positions of increasing responsibility at Gap, Inc. from 2001 to 2005.

Mr. Mohammad joined CarMax in 2012 as vice president of application development and IT planning. In 2014, he was promoted to senior vice president and chief information officer. In 2018, he was named senior vice president and chief information and technology officer and in 2021, he was promoted to executive vice president and chief information and technology officer. Prior to joining CarMax, Mr. Mohammad was vice president of information technology at BJ's Wholesale Club from 2006 to 2012 and held various technology leadership positions at Blockbuster and TravelCLICK. In 2022, he was appointed as an independent member of the Board of Directors of United Natural Foods, Inc.

Mr. Wilson joined CarMax in 1995 as a buyer-in-training at the Raleigh, North Carolina store, where he was subsequently promoted to buyer and then senior buyer. Mr. Wilson later served as purchasing manager at two CarMax stores in southern Florida before being promoted to regional vice president of merchandising. He was promoted to assistant vice president, auction services and merchandising development in 2008, vice president, auction services and merchandising development in 2013, and then vice president, merchandising operations in 2016. In 2017, Mr. Wilson was promoted to senior vice president, store strategy and logistics, and in 2022, he was promoted to executive vice president and chief operating officer.

Mr. Daniels joined CarMax in 2008 as vice president, risk and analytics. In 2014, he was promoted to senior vice president, CarMax Auto Finance. Prior to joining CarMax, Mr. Daniels served as group director, credit risk management of HSBC and vice president of Metris.

Mr. Newberry joined CarMax in March 2004 as location general manager-in-training in the Los Angeles region and was promoted to location general manager of the Duarte, California store in 2006. He was subsequently promoted to positions of increasing responsibility, including regional vice president general manager in 2013 and vice president, regional sales in 2016. In 2017, he was promoted to senior vice president, store operations, and in 2022, he was named senior vice president, store and customer experience center ("CEC") execution. Prior to joining CarMax, Mr. Newberry served as a store manager and area manager for Bed, Bath and Beyond from 1994 to 2004.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is listed and traded on the New York Stock Exchange under the ticker symbol KMX. We are authorized to issue up to 350,000,000 shares of common stock and up to 20,000,000 shares of preferred stock. As of February 29, 2024, there were 157,611,939 shares of CarMax common stock outstanding and we had approximately 2,600 shareholders of record. As of that date, there were no preferred shares outstanding.

We have not paid any dividends on our common stock and do not plan to pay dividends on our common stock for the foreseeable future.

During fiscal 2024, we did not sell any CarMax equity securities in transactions that were not registered under the Securities Act.

Issuer Purchases of Equity Securities

The following table provides information relating to the company's repurchase of common stock during the fourth quarter of fiscal 2024. The table does not include transactions related to employee equity awards or the exercise of employee stock options.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Programs ⁽¹⁾
December 1-31, 2023	223,500	\$ 71.53	223,500	\$ 2,393,424,937
January 1-31, 2024	246,100	\$ 70.92	246,100	\$ 2,375,971,797
February 1-29, 2024	216,000	\$ 73.26	216,000	\$ 2,360,147,191
Total	685,600		685,600	

⁽¹⁾ On October 23, 2018, the board authorized the repurchase of up to \$2 billion of our common stock with no expiration date. In April 2022, the board increased our share repurchase authorization by \$2 billion. Purchases may be made in open market or privately negotiated transactions at management's discretion and the timing and amount of repurchases are determined based on share price, market conditions, legal requirements and other factors. Shares repurchased are deemed authorized but unissued shares of common stock.

Performance Graph

The following graph compares the cumulative total shareholder return (stock price appreciation plus dividends, as applicable) on our common stock for the last five fiscal years with the cumulative total return of the S&P 500 Index and the S&P 500 Retailing Index. The graph assumes an original investment of \$100 in CarMax common stock and in each index on February 28, 2019, and the reinvestment of all dividends, as applicable.

	As of February 29 or 28					
	2019	2020	2021	2022	2023	2024
CarMax	\$ 100.00	\$ 140.60	\$ 192.45	\$ 176.05	\$ 111.16	\$ 127.18
S&P 500 Index	\$ 100.00	\$ 108.19	\$ 142.05	\$ 165.33	\$ 152.61	\$ 199.08
S&P 500 Retailing Index	\$ 100.00	\$ 111.77	\$ 165.42	\$ 177.05	\$ 139.12	\$ 214.62

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is provided as a supplement to, and should be read in conjunction with, our audited consolidated financial statements and the accompanying notes presented in Item 8. Consolidated Financial Statements and Supplementary Data. Note references are to the notes to consolidated financial statements included in Item 8. Certain prior year amounts have been reclassified to conform to the current year's presentation. All references to net earnings per share are to diluted net earnings per share. Amounts and percentages may not total due to rounding.

OVERVIEW

See Part I, Item 1 for a detailed description and discussion of the company's business.

CarMax is the nation's largest retailer of used vehicles. We operate in two reportable segments: CarMax Sales Operations and CarMax Auto Finance ("CAF"). Our CarMax Sales Operations segment consists of all aspects of our auto merchandising and service operations, excluding financing provided by CAF. Our CAF segment consists solely of our own finance operation that provides financing to customers buying retail vehicles from CarMax. Our consolidated financial statements include the financial results related to our Edmunds Holding Company ("Edmunds") business, which does not meet the definition of a reportable segment. For purposes of our MD&A discussion, amounts related to that business are discussed in combination with our CarMax Sales Operations segment. Separate discussion of these amounts is not considered meaningful for the purpose of gaining an understanding of our business, as the significant drivers of these operations in total are consistent with those of our CarMax Sales Operations segment. Where appropriate, specific amounts related to non-reportable segments have been disclosed for informational purposes.

CarMax Sales Operations

Our sales operations segment consists of retail sales of used vehicles and related products and services, such as wholesale vehicle sales; the sale of extended protection plan ("EPP") products, which include extended service plans ("ESPs") and guaranteed asset protection ("GAP"); and vehicle repair service. We offer competitive, no-haggle prices; a broad selection of CarMax Quality Certified used vehicles; value-added EPP products; and superior customer service. Our omni-channel platform, which gives us the largest addressable market in the used car industry, empowers our retail customers to buy a car on their terms – online, in-store or an integrated combination of both.

Our customers finance the majority of the retail vehicles purchased from us, and availability of on-the-spot financing is a critical component of the sales process. We provide financing to qualified retail customers through CAF and our arrangements with industry-leading third-party finance providers. All of the finance offers, whether by CAF or our third-party providers, are backed by a 3-day payoff option.

As of February 29, 2024, we operated 245 used car stores in 109 U.S. television markets.

CarMax Auto Finance

In addition to third-party finance providers, we provide vehicle financing through CAF, which offers financing solely to customers buying retail vehicles from CarMax. CAF allows us to manage our reliance on third-party finance providers and to leverage knowledge of our business to provide qualifying customers a competitive financing option. As a result, we believe CAF enables us to capture additional profits, cash flows and sales. CAF income primarily reflects the interest and fee income generated by the auto loans receivable less the interest expense associated with the debt issued to fund these receivables, a provision for estimated loan losses and direct expenses. CAF income does not include any allocation of indirect costs. After the effect of 3-day payoffs and vehicle returns, CAF financed 42.9% of our retail used vehicle unit sales in fiscal 2024. As of February 29, 2024, CAF serviced approximately 1.1 million customer accounts in its \$17.39 billion portfolio of managed receivables.

Management regularly analyzes CAF's operating results by assessing the competitiveness of our consumer offer, profitability, the performance of the auto loans receivable, including trends in credit losses and delinquencies, and CAF direct expenses.

Revenues and Profitability

The sources of revenue and gross profit from the CarMax Sales Operations segment and other non-reportable segments for fiscal 2024 are as follows:

A high-level summary of our financial results for fiscal 2024 as compared to fiscal 2023 is as follows ⁽¹⁾:

(Dollars in millions except per share or per unit data)

	2024	Change from 2023
Income statement information		
Net sales and operating revenues	\$ 26,536.0	(10.6)%
Gross profit	\$ 2,713.2	(3.1)%
CAF income	\$ 568.3	(14.3)%
Selling, general and administrative expenses	\$ 2,286.4	(8.1)%
Net earnings	\$ 479.2	(1.1)%
Unit sales information		
Used unit sales	765,572	(5.2)%
Change in used unit sales in comparable stores	(6.7)%	N/A
Wholesale unit sales	546,331	(6.6)%
Per unit information		
Used gross profit per unit	\$ 2,288	— %
Wholesale gross profit per unit	\$ 1,019	1.1 %
SG&A as a % of gross profit	84.3 %	(4.5)%
Per share information		
Net earnings per diluted share	\$ 3.02	(0.3)%
Online sales metrics		
Online retail sales ⁽²⁾	14 %	2 %
Omni sales ⁽³⁾	55 %	2 %
Revenue from online transactions ⁽⁴⁾	31 %	1 %

⁽¹⁾ Where applicable, amounts are net of intercompany eliminations.

⁽²⁾ An online retail sale is defined as a sale where the customer completes all four of the following activities remotely: reserving the vehicle; financing the vehicle, if needed; trading-in or opting out of a trade-in; and creating an online sales order.

⁽³⁾ An omni sale is defined as a sale where customers complete at least one, but not all, of the four activities listed above online.

⁽⁴⁾ Revenue from online transactions is defined as revenue from retail sales that qualify as an online retail sale, as well as any related EPP and third-party finance contribution, wholesale sales where the winning bid was taken from an online bid and all revenue earned by Edmunds.

Net earnings per diluted share during fiscal 2024 included a benefit of \$0.32 in connection with the receipt of settlement proceeds in a class action lawsuit related to the economic loss associated with vehicles containing Takata airbags.

Refer to “Results of Operations” for further details on our revenues and profitability. A discussion regarding Results of Operations and Financial Condition for fiscal 2023 as compared to fiscal 2022 is included in Part II, Item 7 of our Annual Report on Form 10-K for the fiscal year ended February 28, 2023, filed with the SEC on April 13, 2023.

Liquidity

Our primary ongoing sources of liquidity include funds provided by operations, proceeds from non-recourse funding vehicles, and borrowings under our revolving credit facility or through other financing sources. In addition to funding our operations, this liquidity has been used to fund the repurchase of common stock under our share repurchase program and our capital expenditures.

Our current capital allocation strategy is to focus on our core business. Given our recent performance and continued market uncertainties, we are taking a conservative approach to our capital structure in order to maintain the flexibility that allows us to efficiently access the capital markets for both CAF and CarMax as a whole. We have taken steps to better align our expenses to sales as well as slowed the rate of our store growth. We resumed our share repurchases during the third quarter of fiscal 2024 after a pause initiated during the third quarter of the prior fiscal year. For fiscal 2025, we intend to modestly accelerate the pace of our share repurchases above the pace that we implemented in the third quarter of fiscal 2024. We believe we have the appropriate liquidity, access to capital and financial strength to support our operations and continue investing in our strategic initiatives for the next twelve months and thereafter for the foreseeable future.

Strategic Update and Future Outlook

Our omni-channel experience provides a common platform across all of CarMax that leverages our scale, nationwide footprint and infrastructure and empowers our customers to buy a vehicle on their terms, whether online, in-store or through an integrated combination of online and in-store experiences. While we expect our online and omni sales to grow over time, our goal is to provide the best experience whether in-store, online or a combination of the two. As a result, online, omni and in-person sales can vary from quarter to quarter depending on consumer preferences and how they choose to interact with us. We believe consumers in the used car industry will increasingly prefer to have the ability to shop and transact digitally. Approximately 70% of our customers leveraged some or all of our digital capabilities to complete their transactions during the current fiscal year, compared to approximately 40% when we completed our initial omni-channel roll-out at the end of fiscal 2020.

Our diversified business model, combined with our exceptional associates, national scale and unparalleled omni-channel experience, is a unique advantage in the used car industry that firmly positions us to drive profitable market share gains while creating shareholder value over the long-term. We continue to enhance our omni-channel capabilities, prioritize projects designed to optimize experiences for our associates and customers and drive operating efficiencies. Examples of the progress we made during fiscal 2024 include the following:

- Leveraged data science, automation, and artificial intelligence to make it even easier for retail customers to complete key transaction steps, such as vehicle transfers, on their own. We also enhanced digital checkout functionality for appraisal customers, enabling them to submit their documents remotely and unlocking their ability to participate in our 30-minute Express Drop Off experience, whether they receive their offer online or in-store.
- Expanded capabilities for Skye, our 24/7 virtual assistant, to include managing finance applications, vehicle transfers, appointment reservations and appraisal offers. Customer adoption of Skye has been strong, and this has not only created efficiencies but also widened bandwidth for our associates.
- Modernized our wholesale auction platform to offer new services, including single sign-on across all of our systems, artificial intelligence enhanced condition reports, early bidding capabilities and automated bills of sale. Additionally, we streamlined MaxOffer by rolling out our instant offer experience to all participating dealers.
- Added all of our lenders to our finance based shopping platform, expanding the options available to our customers.
- Launched several research and buy tools through Edmunds in support of their goal to be the leader in electric vehicles (“EV”) research.

We expect the impact of our omni-channel capabilities will continue to grow as consumers demand a more personalized car-buying experience. In fiscal 2025, we expect to continue to enhance our offerings in order to enable us to grow sales, profitable market share and buys while driving operational efficiencies. Examples of our initiatives for fiscal 2025 include the following:

- Launching an evolved hub within retail customers’ MyCarMax accounts that will make it even easier to seamlessly go back and forth between assisted help and self-progression. Customers will be able to see the steps they have taken on

their shopping journey, whether on their own or with help from a CEC or store associate.

- Continuing to digitize work in order to build a leaner and higher value assistance model for our CECs and to support higher transaction volume. We plan to further integrate Skye into key communication channels and improve its ability to serve as the initial point of contact across many points in customers' shopping journeys and seamlessly transition customers to a CEC associate via the customer's channel of choice.
- Focusing on bringing even more wholesale vehicles into our ecosystem, leveraging our partnership with Edmunds to acquire vehicles from dealers.
- Optimizing our pre-qualification product by integrating our Instant Offer tool into the process. Additionally, we will remain opportunistic in CAF's participation across the credit spectrum and pursue opportunities that enable us to provide outstanding offers for consumers while driving sales and economics for the business.

We purchased approximately 234,000 vehicles from consumers and dealers during the fourth quarter of fiscal 2024, down 10.8% from the prior year quarter. Approximately 21,000 vehicles were purchased through dealers, up 44.8% from the prior year quarter. We leverage the Edmunds sales team to open new markets and sign up new dealers for MaxOffer. We recently launched an appraisal tool for dealer websites that makes instant offers based on our algorithms, which are redeemable via MaxOffer. For fiscal 2024, our self-sufficiency rate remained above 70%. The success of our online instant appraisal offer continues to strengthen our leadership position as the largest used vehicle buyer from consumers.

Our SG&A expenses in fiscal 2024 decreased from the prior year, even when excluding the benefits of this year's legal settlement. We levered SG&A as a percentage of gross profit despite a 3.1% reduction in gross profit from the prior fiscal year. While SG&A as a percent of gross profit can fluctuate from quarter to quarter depending on variability in gross profit, our initial goal on the path to strengthening our SG&A to gross profit leverage over time is to achieve a rate in the mid-70% range on an annual basis. Achieving this annual rate will require continued efficiency gains in our operating model, gross profit growth and healthier consumer demand. In fiscal 2025, we expect to require low-single-digit gross profit growth to lever SG&A.

Other steps we have taken to support our business for both the short- and long-term include focusing on production efficiencies to align saleable inventory to sales, growing CAF's penetration while raising CAF's consumer rates and tightening CAF's underwriting standards, and slowing our planned store growth to provide more capital flexibility. We resumed our share repurchases during the third quarter of fiscal 2024 after a pause initiated during the third quarter of the prior fiscal year.

We expect our diversified model, the scale of our operations, our investments and omni-channel strategy to provide a solid foundation for further growth. We have adjusted our long-term targets, which were disclosed in our Annual Report on Form 10-K for fiscal 2022, as follows:

- We are maintaining our goal to sell more than 2 million combined retail and wholesale units annually; however, we are extending the timeframe to between fiscal 2026 and fiscal 2030 due to uncertainty in the timing of market recovery and as we continue to focus on profitable market share growth. We intend to update the timeframe to achieve this goal when we have greater visibility into the industry's pace of recovery.
- Given higher average selling prices, we expect to achieve the \$33 billion in annual revenue target sooner than units.
- Similarly, we also expect to achieve more than 5% nationwide market share of age 0- to 10-year old used vehicles sooner than units, but given the recent volatility in vehicle values, we will provide an updated timeframe for our expected achievement at the end of fiscal 2025.

The achievement of these targets is dependent on macroeconomic factors that could result in ongoing volatility in consumer demand.

In calendar 2023, we estimate we sold approximately 3.7% of the age 0- to 10-year old vehicles sold on a nationwide basis, a decrease from 4.0% in calendar 2022. Market share performance in calendar 2023 was negatively impacted by sharp vehicle depreciation in the used car industry and our focus on profitable market share. Based on external data, we gained market share from December 2023 to January 2024, the latest period for which title data is available. Our strategy to increase our market share includes focusing on:

- Delivering a customer-driven, omni-channel buying and selling experience that is a unique and powerful integration of our in-store and online capabilities.
- Utilizing advertising to drive customer growth, educate customers about our omni-channel platform and to differentiate and elevate our brand.
- Hiring, developing and retaining an engaged and skilled workforce.
- Leveraging data and advanced analytics to continuously improve the customer experience as well as our processes and

systems.

- Improving efficiency in our stores and CECs and our logistics and reconditioning operations to reduce waste.
- Opening stores in new markets and expanding our presence in existing markets.
- Becoming the leading retailer of used EVs in the market. In support of this goal, Edmunds has launched several research and buying tools, which include providing data on the health and range of EV batteries as well as an evaluation of potential federal and state tax credits and incentives. This will support our business and help CarMax be part of the solution to reduce emissions.

As of February 29, 2024, we had used car stores located in 109 U.S. television markets, which covered approximately 85% of the U.S. population. The format and operating models utilized in our stores are continuously evaluated and may change or evolve over time based upon market and consumer expectations. During fiscal 2024, we opened five stores and our first stand-alone reconditioning center in the Atlanta metro market. During fiscal 2025, we anticipate opening five stores, one stand-alone reconditioning center and one stand-alone auction facility.

While we execute both our short- and long-term strategy, there are trends and factors that could impact our strategic approach or our results in the short and medium term. For additional information about risks and uncertainties facing our company, see “Risk Factors,” included in Part I, Item 1A of this Form 10-K.

CRITICAL ACCOUNTING ESTIMATES

Our results of operations and financial condition as reflected in the consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles. Preparation of financial statements requires management to make estimates and assumptions affecting the reported amounts of assets, liabilities, revenues, expenses and the disclosures of contingent assets and liabilities. We use our historical experience and other relevant factors when developing our estimates and assumptions. We regularly evaluate these estimates and assumptions. Note 1 includes a discussion of significant accounting policies. The accounting policy discussed below is the one we consider critical to an understanding of our consolidated financial statements because its application places the most significant demands on our judgment. Our financial results might have been different if different assumptions had been used or other conditions had prevailed.

Allowance for Loan Losses

The allowance for loan losses represents the net credit losses expected over the remaining contractual life of our managed receivables. Because net loss performance can vary substantially over time, estimating net losses requires assumptions about matters that are uncertain.

The allowance for loan losses is determined using a net loss timing curve method (“method”), primarily based on the composition of the portfolio of managed receivables and historical gross loss and recovery trends. Due to the fact that losses for receivables with less than 18 months of performance history can be volatile, our net loss estimate weights both historical losses by credit grade at origination and actual loss data on the receivables to-date, along with forward loss curves, in estimating future performance. Once the receivables have 18 months of performance history, the net loss estimate reflects actual loss experience of those receivables to date, along with forward loss curves, to predict future performance. The forward loss curves are constructed using historical performance data and show the average timing of losses over the course of a receivable’s life. The net loss estimate is calculated by applying the loss rates developed using the methods described above to the amortized cost basis of the managed receivables.

The output of the method is adjusted to take into account reasonable and supportable forecasts about the future. Specifically, the change in U.S. unemployment rates and the National Automobile Dealers Association used vehicle price index are used to predict changes in gross loss and recovery rate, respectively. An economic adjustment factor, based upon a single macroeconomic scenario, is developed to capture the relationship between changes in these indices and changes in gross loss and recovery rates. This factor is applied to the output of the method for the reasonable and supportable forecast period of two years. After the end of this two-year period, we revert to historical experience on a straightline basis over a period of 12 months. We periodically consider whether the use of alternative metrics would result in improved model performance and revise the model when appropriate. We also consider whether qualitative adjustments are necessary for factors that are not reflected in the quantitative methods but impact the measurement of estimated credit losses. Such adjustments include the uncertainty of the impacts of recent economic trends on customer behavior. The change in the allowance for loan losses is recognized through an adjustment to the provision for loan losses.

Determining the appropriateness of the allowance for loan losses requires management to exercise judgment about matters that are inherently uncertain, including the timing and distribution of net losses that could materially affect the allowance for loan losses and, therefore, net earnings. To the extent that actual performance differs from our estimates, additional provision for

credit losses may be required that would reduce net earnings. A 10% change in the estimated loss rates would have changed the allowance for loan losses by approximately \$48.3 million as of February 29, 2024.

See Notes 1(H) and 4 for additional information on the allowance for loan losses.

RESULTS OF OPERATIONS – CARMAX SALES OPERATIONS AND OTHER NON-REPORTABLE SEGMENTS

NET SALES AND OPERATING REVENUES

(In millions)	Years Ended February 29 or 28

Other ⁽⁵⁾	28.3	26.1	23.6
Total	100.0 %	100.0 %	100.0 %

⁽¹⁾ Calculated as used vehicle units financed for respective channel as a percentage of total used units sold.

⁽²⁾ Includes CAF's Tier 2 and Tier 3 loan originations, which represent less than 2% of total used units sold.

⁽³⁾ Third-party finance providers who generally pay us a fee or to whom no fee is paid.

⁽⁴⁾ Third-party finance providers to whom we pay a fee.

⁽⁵⁾ Represents customers arranging their own financing and customers that do not require financing.

CHANGE IN USED CAR STORE BASE

	Years Ended February 29 or 28		
	2024	2023	2022
Used car stores, beginning of year	240	230	220
Store openings	5	10	10
Used car stores, end of year	245	240	230

During fiscal 2024, we opened 5 stores in existing television markets (Winchester, VA; Algonquin, IL; Victorville, CA; Green Brook, NJ; and Smithtown, NY).

Used Vehicle Sales

Fiscal 2024 Versus Fiscal 2023. The 9.2% decrease in used vehicle revenues in fiscal 2024 was primarily driven by a 5.2% decrease in used unit sales and a 4.3% decrease in average retail selling price, or approximately \$1,200. The decrease in used units included a 6.7% decrease in comparable store used unit sales. Online retail sales, as defined previously, accounted for 14% of used unit sales in fiscal 2024, compared with 12% in fiscal 2023.

During fiscal 2024, we believe persistent vehicle affordability challenges continued to impact our used unit sales performance, as headwinds remained due to widespread inflationary pressures, higher interest rates, tightened lending standards and prolonged low consumer confidence. While comparable store used unit sales declined 6.7% compared to the prior year, each quarter of the current fiscal year had year-over-year sequential improvement. For the first quarter of fiscal 2025, through mid-April, comparable store used unit sales experienced a mid single-digit decline.

The decrease in average retail selling price in fiscal 2024 reflected lower vehicle acquisition costs as well as shifts in the mix of our sales by vehicle age.

Wholesale Vehicle Sales

Vehicles sold at our wholesale auctions are, on average, approximately 10 years old with more than 100,000 miles and are primarily comprised of vehicles purchased through our appraisal process that do not meet our retail standards. Our wholesale auction prices usually reflect trends in the general wholesale market for the types of vehicles we sell, although they can also be affected by changes in vehicle mix or the average age, mileage or condition of the vehicles being sold.

Fiscal 2024 Versus Fiscal 2023. The 16.9% decrease in wholesale vehicle revenues in fiscal 2024 was primarily due to an 11.8% decrease in average selling price, or approximately \$1,200, and a 6.6% decrease in unit sales.

The decrease in average selling price in fiscal 2024 was primarily due to shifts in the mix of our sales by vehicle age as well as decreased acquisition costs resulting from steep market depreciation.

Other Sales and Revenues

Other sales and revenues include revenue from the sale of ESPs and GAP (collectively reported in EPP revenues, net of a reserve for estimated contract cancellations), net third-party finance (fees)/income, advertising and subscription revenues earned by our Edmunds business, and other revenues, which are predominantly comprised of service department sales. The fees we pay to the Tier 3 providers are reflected as an offset to finance fee revenues received from the Tier 2 providers. The mix of our retail vehicles financed by CAF, Tier 2 and Tier 3 providers, or customers that arrange their own financing, may vary from quarter to quarter depending on several factors, including the credit quality of applicants, changes in providers' credit decisioning and external market conditions. Changes in originations by one tier of credit providers may also affect the originations made by providers in other tiers.

Fiscal 2024 Versus Fiscal 2023. Other sales and revenues decreased 3.5% in fiscal 2024, reflecting a decline in EPP revenue and an unfavorable change in net third-party finance (fees)/income. EPP revenues decreased 4.9%, largely reflecting the decline in our retail unit sales, a decrease in profit sharing revenue recognized in the current year and decreased penetration, partially offset by increased margins and a favorable year-over-year return reserve adjustment. The change in net third-party finance (fees)/income was the result of lower Tier 2 volume, for which we generally receive a fee.

During the the fourth quarter of fiscal 2024, we raised MaxCare margins per contract sold, resulting in a slight decrease in EPP penetration while driving overall profitability. Our expectation is that this action will drive approximately \$20 per retail unit of incremental EPP margin in fiscal 2025.

GROSS PROFIT

(In millions)	Years Ended February 29 or 28 ⁽¹⁾						
	2024		Change	2023		Change	2022
Used vehicle gross profit	\$	1,752.0	(5.2)%	\$	1,848.2	(9.3)%	\$ 2,038.4
Wholesale vehicle gross profit		556.8	(5.6)%		589.8	(22.9)%	764.5
Other gross profit		404.4	11.7 %		362.2	(25.2)%	484.6
Total	\$	2,713.2	(3.1)%	\$	2,800.2	(14.8)%	\$ 3,287.5

⁽¹⁾ Amounts are net of intercompany eliminations.

GROSS PROFIT PER UNIT

	Years Ended February 29 or 28 ⁽¹⁾							
	2024		2023		2022			
	\$ per unit ⁽²⁾	% ⁽³⁾	\$ per unit ⁽²⁾	% ⁽³⁾	\$ per unit ⁽²⁾	% ⁽³⁾		
Used vehicle gross profit	\$	2,288	8.4	\$	2,288	8.0	\$ 2,205	8.3
Wholesale vehicle gross profit	\$	1,019	11.2	\$	1,008	9.8	\$ 1,083	11.3
Other gross profit	\$	528	63.4	\$	448	54.8	\$ 524	69.3

⁽¹⁾ Amounts are net of intercompany eliminations. Those eliminations had the effect of increasing used vehicle gross profit per unit and wholesale vehicle gross profit per unit and decreasing other gross profit per unit by immaterial amounts.

⁽²⁾ Calculated as category gross profit divided by its respective units sold, except the other category, which is divided by total used units sold.

⁽³⁾ Calculated as a percentage of its respective sales or revenue.

Used Vehicle Gross Profit

We target a dollar range of gross profit per used unit sold. The gross profit dollar target for an individual vehicle is based on a variety of factors, including its probability of sale and its mileage relative to its age; however, it is not primarily based on the vehicle's selling price. Our ability to quickly adjust appraisal offers to be consistent with the broader market trade-in trends and the pace of our inventory turns reduce our exposure to the inherent continual fluctuation in used vehicle values and contribute to our ability to manage gross profit dollars per unit. Gross profit per used unit is consistent across our omni-channel platform.

We systematically adjust individual vehicle prices based on proprietary pricing algorithms in order to appropriately balance sales trends, inventory turns and gross profit achievement. Other factors that may influence gross profit include the wholesale and retail vehicle pricing environments, vehicle reconditioning and logistics costs, and the percentage of vehicles sourced directly from consumers and dealers through our appraisal process. Vehicles purchased directly from consumers and dealers generally have a lower cost per unit compared with vehicles purchased at auction or through other channels, which may generate more gross profit per unit. In any given period, our gross profit may also be impacted by the age mix of vehicles sold, as older vehicles are generally more profitable. We monitor macroeconomic factors and pricing elasticity and adjust our pricing accordingly to optimize unit sales and profitability while also maintaining a competitively priced inventory.

Fiscal 2024 Versus Fiscal 2023. Used vehicle gross profit decreased 5.2% in fiscal 2024, driven by the 5.2% decrease in total used unit sales. Used vehicle gross profit per unit in fiscal 2024 was consistent with the prior fiscal year. We continue to focus on striking the right balance between covering cost increases, maintaining margin and passing along efficiencies to consumers to support vehicle affordability.

Wholesale Vehicle Gross Profit

Our wholesale gross profit per unit reflects the demand for older, higher mileage vehicles, which are the mainstay of our auctions, as well as strong dealer attendance and resulting high dealer-to-car ratios at our auctions. The frequency of our auctions, which are generally held weekly or bi-weekly, minimizes the depreciation risk on these vehicles. Our ability to adjust appraisal offers in response to the wholesale pricing environment is a key factor that influences wholesale gross profit.

Fiscal 2024 Versus Fiscal 2023. Wholesale vehicle gross profit decreased 5.6% in fiscal 2024, driven by the 6.6% decrease in wholesale unit sales. Wholesale vehicle gross profit per unit in fiscal 2024 was in line with the prior fiscal year.

Other Gross Profit

Other gross profit includes profits related to EPP revenues, net third-party finance (fees)/income, advertising and subscription profits earned by our Edmunds business, and other revenues. Other revenues are predominantly comprised of service department operations, including used vehicle reconditioning. We have no cost of sales related to EPP revenues or net third-party finance (fees)/income, as these represent revenues paid to us by certain third-party providers. Third-party finance income is reported net of the fees we pay to third-party Tier 3 finance providers. Accordingly, changes in the relative mix of the components of other gross profit can affect the composition and amount of other gross profit.

Fiscal 2024 Versus Fiscal 2023. Other gross profit increased 11.7% in fiscal 2024, primarily driven by a \$75.3 million improvement in service department margins, partially offset by a decrease in EPP revenues and an unfavorable change in net third-party finance (fees)/income, as discussed above. The increase in service department profits was driven by efficiency and cost coverage measures that we have put in place. We expect to continue to see significant year-over-year favorability in service department profits in fiscal 2025. The extent of the improvement will be governed by sales performance given the leverage/deleverage nature of service.

COMPONENTS OF SG&A EXPENSES AS A PERCENTAGE OF TOTAL SG&A EXPENSES

COMPONENTS OF SG&A EXPENSES COMPARED WITH PRIOR PERIODS ⁽¹⁾

(In millions except per unit data)	Years Ended February 29 or 28				
	2024	Change	2023	Change	2022
Compensation and benefits:					
Compensation and benefits, excluding share-based compensation expense	\$ 1,226.8	(4.3)%	\$ 1,282.4	4.7 %	\$ 1,224.4
Share-based compensation expense	114.1	36.4 %	83.6	(18.0)%	102.0
Total compensation and benefits ⁽²⁾	\$ 1,340.9	(1.8)%	\$ 1,366.0	3.0 %	\$ 1,326.4
Store occupancy costs	271.4	1.5 %	267.3	16.3 %	229.9
Advertising expense	264.4	(8.4)%	288.5	(11.5)%	325.9
Other overhead costs ⁽³⁾	409.7	(27.6)%	565.6	27.6 %	443.0
Total SG&A expenses	\$ 2,286.4	(8.1)%	\$ 2,487.4	7.0 %	\$ 2,325.2
SG&A as a % of gross profit	84.3 %	(4.5)%	88.8 %	18.1 %	70.7 %

⁽¹⁾ Amounts are net of intercompany eliminations.

⁽²⁾ Excludes compensation and benefits related to reconditioning and vehicle repair service, which are included in cost of sales. See Note 13 for details of share-based compensation expense by grant type.

⁽³⁾ Includes IT expenses, non-CAF bad debt, insurance, travel, charitable contributions, preopening and relocation costs and other administrative expenses.

Fiscal 2024 Versus Fiscal 2023 (Decrease of \$201.0 million or 8.1%). Factors contributing to the net decrease include the following:

- \$155.9 million decrease in other overhead costs, which included a \$67.2 million benefit in connection with the receipt of settlement proceeds in a class action lawsuit related to the economic loss associated with vehicles containing Takata airbags. Other overhead costs were also positively impacted by improvements in non-CAF uncollectable receivables that reflect improved execution at our stores and home office as well as external partners, a reduction in technology spend and favorability in staffing-related costs.
- \$55.6 million decrease in compensation and benefits, excluding share-based compensation expense, driven by our continued focus in our stores and CECs on driving efficiency gains and aligning staffing levels to sales.
- \$24.1 million decrease in advertising expense driven by our deliberate efforts to reduce marketing spend to align with sales. Advertising expense on a per retail unit basis was relatively consistent with the prior year. For fiscal 2025, we expect the full year spend on a per total unit basis to be consistent with fiscal 2024 at approximately \$200.
- \$30.5 million increase in stock-based compensation expense, primarily related to cash-settled restricted stock units, as the expense associated with these units was primarily driven by the change in the company's stock price during the relevant periods.

We anticipate that SG&A will be pressured in the first quarter of fiscal 2025 due to the receipt of \$59 million in settlement proceeds during the first quarter of fiscal 2024 as well as the impact of stock-based compensation for certain retirement-eligible executives and the lapping of favorable reserve adjustments related to non-CAF uncollectable receivables, which amounts to approximately \$25 million combined.

Interest Expense

Interest expense includes the interest related to short- and long-term debt, financing obligations and finance lease obligations. It does not include interest on the non-recourse notes payable, which is reflected within CAF income.

Fiscal 2024 Versus Fiscal 2023. Interest expense of \$124.8 million in fiscal 2024 was relatively consistent compared with \$120.4 million in fiscal 2023.

Other Income

Other income of \$10.3 million in fiscal 2024 was relatively consistent compared with \$9.4 million in fiscal 2023.

Income Taxes

The effective income tax rate was 25.3% in fiscal 2024 compared with 23.9% in fiscal 2023. The increase in the effective income tax rate was primarily driven by an increase in our state effective tax rate and a decrease in tax credits.

RESULTS OF OPERATIONS – CARMAX AUTO FINANCE

CAF income primarily reflects interest and fee income generated by CAF's portfolio of auto loans receivable less the interest expense associated with the debt issued to fund these receivables, a provision for estimated loan losses and direct CAF expenses. Total interest margin reflects the spread between interest and fees charged to consumers and our funding costs. Changes in the interest margin on new originations affect CAF income over time. Increases in interest rates, which affect CAF's funding costs, or other competitive pressures on consumer rates, could result in compression in the interest margin on new originations. Changes in the allowance for loan losses as a percentage of ending managed receivables reflect the effect of changes in loss and delinquency experience and economic factors on our outlook for net losses expected to occur over the remaining contractual life of the loans receivable as well as changes in the mix of credit quality originated.

CAF's managed portfolio is composed primarily of loans originated over the past several years. Trends in receivable growth and interest margins primarily reflect the cumulative effect of changes in the business over a multi-year period. Historically, we have sought to originate loans in our core portfolio, which excludes Tier 2 and Tier 3 originations, with an underlying risk profile that we believe will, in the aggregate, result in cumulative net losses in the 2% to 2.5% range (excluding CECL-required recovery costs) over the life of the loans. Actual loss performance of the loans may fall outside of this range based on various factors, including intentional changes in the risk profile of originations, economic conditions and wholesale recovery rates. Current period originations reflect current trends in both our retail sales and the CAF business, including the volume of loans originated, current interest rates charged to consumers, loan terms and average credit scores. Loans originated in a given fiscal period impact CAF income over time, as we recognize income over the life of the underlying auto loan.

CAF also originates a small portion of auto loans to customers who typically would be financed by our Tier 2 and Tier 3 finance providers, in order to better understand the performance of these loans, mitigate risk and add incremental profits. Historically, CAF has targeted originating approximately 5% of the total Tier 3 loan volume, which we increased to 10% during fiscal 2022 and throughout most of fiscal 2023. In response to the current environment, CAF adjusted its underwriting standards, including, towards the end of the fourth quarter of fiscal 2023, reducing its targeted percentage of Tier 3 volume from 10% to 5%. During the second quarter of fiscal 2024, CAF further adjusted its targeted percentage of Tier 3 volume to less than 5%. Within the Tier 2 space, CAF continues to originate loans on a test basis and we slightly increased our investment in this space starting in the second quarter of fiscal 2024. Any future adjustments in Tier 2 and Tier 3 will consider the broader lending environment, which includes funding availability, along with the long-term sustainability of the change. These loans have higher loss and delinquency rates than the remainder of the CAF portfolio, as well as higher contract rates.

CAF income does not include any allocation of indirect costs. Although CAF benefits from certain indirect overhead expenditures, we have not allocated indirect costs to CAF to avoid making subjective allocation decisions. Examples of indirect costs not allocated to CAF include retail store expenses and corporate expenses.

See Note 3 for additional information on CAF income and Note 4 for information on auto loans receivable, including credit quality.

Weighted average term (in months)	65.4	66.0	66.6

⁽¹⁾ Vehicle units financed as a percentage of total used units sold.

⁽²⁾ The credit scores represent FICO® scores and reflect only receivables with obligors that have a FICO® score at the time of application. The FICO® score with respect to any receivable with co-obligors is calculated as the average of each obligor's FICO® score at the time of application. FICO® scores are not a significant factor in our primary scoring model, which relies on information from credit bureaus and other application information as discussed in Note 4. FICO® is a federally registered servicemark of Fair Isaac Corporation.

⁽³⁾ LTV represents the ratio of the amount financed to the total collateral value, which is measured as the vehicle selling price plus applicable taxes, title and fees.

LOAN PERFORMANCE INFORMATION

(In millions)	As of and for the Years Ended February 29 or 28		
	2024	2023	2022
Total ending managed receivables	\$ 17,391.8	\$ 16,767.9	\$ 15,652.3
Total average managed receivables	\$ 17,313.2	\$ 16,304.3	\$ 14,934.0
Allowance for loan losses	\$ 482.8	\$ 507.2	\$ 433.0
Allowance for loan losses as a percentage of ending managed receivables	2.78 %	3.02 %	2.77 %
Net credit losses on managed receivables	\$ 334.9	\$ 242.8	\$ 119.8
Net credit losses as a percentage of total average managed receivables	1.93 %	1.49 %	0.80 %
Past due accounts as a percentage of ending managed receivables	5.44 %	5.00 %	4.02 %
Average recovery rate ⁽¹⁾	53.0 %	64.2 %	70.8 %

⁽¹⁾ The average recovery rate represents the average percentage of the outstanding principal balance we receive when a vehicle is repossessed and liquidated, generally at our wholesale auctions. While in any individual period conditions may vary, over the past 10 fiscal years, the annual recovery rate has ranged from a low of 46% to a high of 71%, and it is primarily affected by the wholesale market environment.

Fiscal 2024 Versus Fiscal 2023.

- CAF income decreased \$95.1 million, or 14.3%, reflecting a decrease in the net interest margin percentage, partially offset by an increase in average managed receivables and a decrease in the provision for loan losses.
- Total interest margin decreased as a percentage of average managed receivables to 6.0% in fiscal 2024 compared with 6.9% in fiscal 2023. The decrease was primarily driven by higher funding costs as well as an unfavorable impact of swaps not designated as hedges for accounting purposes, partially offset by higher customer rates. While total interest margin decreased year-over-year, it was relatively consistent each quarter throughout fiscal 2024.
- Provision for Loan Losses
 - The current year provision of \$310.5 million decreased slightly from the prior year provision of \$317.0 million.
 - The allowance for loan losses as a percentage of ending managed receivables was 2.78% as of February 29, 2024 compared with 3.02% as of February 28, 2023. The decrease in the allowance percentage from the prior year primarily reflects CAF's tightened underwriting standards in response to the current environment, partially offset by CAF's continued investment in the Tier 2 business as well as unfavorable loss performance.
- Loan Performance
 - The decline in net loan originations in fiscal 2024 resulted from decreases in used unit sales and the average amount financed, partially offset by an increase in the net penetration rate.
 - CAF net penetration for fiscal 2024 increased compared to the prior fiscal year, primarily reflecting changes in the underlying credit mix of customers applying for financing.
 - The weighted average contract rate increased to 11.2% in fiscal 2024, compared with 9.7% in the prior year. The increase was primarily due to higher rates charged to customers in response to the current interest rate environment.
 - The increase in past due accounts as a percentage of ending managed receivables for fiscal 2024 reflects an increase in delinquencies as well as our expansion of Tier 2 originations within CAF's portfolio. The increase in delinquencies primarily reflects customer hardship in the current economic environment.

PLANNED FUTURE ACTIVITIES

We anticipate opening a total of seven locations in fiscal 2025, including five stores, one stand-alone reconditioning center and one stand-alone auction facility. We currently estimate capital expenditures will total between \$500 million and \$550 million in fiscal 2025. Capital expenditures were \$465.3 million in fiscal 2024. The year-over-year increase in planned spending is primarily related to the timing of spend for new stores. Planned capital spending in fiscal 2025 largely consists of spending to support our future long-term growth in stand-alone reconditioning and auction facilities, as well as our new stores.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note 1(X) to the consolidated financial statements for information on recent accounting pronouncements applicable to CarMax.

FINANCIAL CONDITION

Liquidity and Capital Resources

Our primary ongoing cash requirements are to fund our existing operations, store expansion and improvement, CAF and strategic growth initiatives. Since fiscal 2013, we have also elected to use cash for our share repurchase program. Our primary ongoing sources of liquidity include funds provided by operations, proceeds from non-recourse funding vehicles and borrowings under our revolving credit facility or through other financing sources.

Our current capital allocation strategy is to focus on our core business. Given our recent performance and continued market uncertainties, we are taking a conservative approach to our capital structure in order to maintain the flexibility that allows us to efficiently access the capital markets for both CAF and CarMax as a whole. We have taken steps to better align our expenses to sales as well as slowed the rate of our store growth. We resumed our share repurchases during the third quarter of fiscal 2024 after a pause initiated during the third quarter of the prior fiscal year. For fiscal 2025, we intend to modestly accelerate the pace of our share repurchases above the pace that we implemented in the third quarter of fiscal 2024. We believe we have the appropriate liquidity, access to capital and financial strength to support our operations and continue investing in our strategic initiatives for the next twelve months and thereafter for the foreseeable future.

We are party to contractual obligations involving commitments to make payments to third parties. These obligations impact our liquidity and capital resource needs. Our contractual obligations primarily consist of long-term debt and related interest payments, leases, purchase obligations and commitments, income taxes and defined benefit retirement plans. See Notes 12 and 16 for amounts outstanding as of February 29, 2024 related to debt and leases, respectively.

Our contractual obligations related to income taxes represent the net unrecognized tax benefits related to uncertain tax positions. See Note 10 for information related to income taxes. Our contractual obligations related to defined benefit retirement plans represent the funded status recognized as of February 29, 2024. See Note 11 for information related to these plans.

Purchase obligations and commitments consist of certain enforceable and legally binding obligations related to real estate purchases, third-party outsourcing services and advertising. As of February 29, 2024, our purchase obligations and commitments were approximately \$428.2 million, of which \$213.3 million are due in fiscal 2025. The majority of the remaining purchase obligations and commitments are due within the next three years.

We have historically managed leverage based on a number of factors, including internal financial forecasts, consideration of CAF's operational and capital needs, external peer benchmarking, requirements of our debt agreements and macroeconomic conditions. Generally, we expect to use our revolving credit facility and other financing sources, together with stock repurchases, to maintain a leverage profile that ensures operating flexibility while supporting continued investment in the business.

Operating Activities. During fiscal 2024, net cash provided by operating activities totaled \$458.6 million compared with \$1.28 billion in fiscal 2023.

As of February 29, 2024, total inventory was \$3.68 billion, representing a decrease of \$48.1 million, or 1.3%, compared with the balance as of the start of the fiscal year. The decrease was primarily due to a decline in the average carrying cost of inventory driven by the net impacts of depreciation during the current fiscal year and shifts in the mix of vehicle units from non-saleable to saleable due to operational efficiencies.

Our operating cash flows are significantly impacted by changes in auto loans receivable, which increased \$980.6 million in fiscal 2024 compared with \$1.37 billion in fiscal 2023. The majority of the changes in auto loans receivable are accompanied by changes in non-recourse notes payable, which are issued to fund auto loans originated by CAF. Net issuances of non-recourse notes payable were \$506.9 million in fiscal 2024 compared with \$893.3 million in fiscal 2023 and are separately reflected as cash from financing activities. Due to the presentation differences between auto loans receivable and non-recourse notes payable on the consolidated statements of cash flows, fluctuations in these amounts can have a significant impact on our operating and financing cash flows without affecting our overall liquidity, working capital or cash flows.

The change in net cash provided by operating activities for fiscal 2024 compared with fiscal 2023 reflected the decrease in inventory, as discussed above, combined with the prior year decrease in inventory, partially offset by the changes in auto loans receivable, as well as the net impact of volume and timing-related changes in accounts receivable and accounts payable.

Investing Activities. Net cash used in investing activities totaled \$467.0 million in fiscal 2024 compared with \$425.8 million in fiscal 2023. Capital expenditures were \$465.3 million in fiscal 2024 versus \$422.7 million in fiscal 2023. Capital expenditures primarily included land purchases and construction costs to support our growth capacity initiatives and new store openings as well as investments in technology. We maintain a multi-year pipeline of sites to support our store and capacity growth, so portions of capital spending in one year may relate to locations that we open in subsequent fiscal years.

Financing Activities. Net cash provided by financing activities was \$307.8 million in fiscal 2024, compared with net cash used in financing activities of \$710.2 million in fiscal 2023. Included in these amounts were net issuances of non-recourse notes payable of \$506.9 million in fiscal 2024 compared with \$893.3 million in the prior year. Non-recourse notes payable are typically used to fund changes in auto loans receivable (see "Operating Activities").

During fiscal 2024, cash provided by financing activities was impacted by stock repurchases of \$94.1 million as well as net payments on our long-term debt of \$111.5 million. During fiscal 2023, cash used in financing activities was impacted by stock repurchases of \$333.9 million as well as net payments on our long-term debt of \$1.25 billion.

TOTAL DEBT AND CASH AND CASH EQUIVALENTS*(In thousands)*

Debt Description ⁽¹⁾	Maturity Date	As of February 29 or 28	
		2024	2023
Revolving credit facility ⁽²⁾	June 2028	\$ —	\$ —
Term loan ⁽²⁾	June 2024	300,000	300,000
Term loan ⁽²⁾	October 2026	699,633	699,493
3.86% Senior notes	April 2023	—	100,000
4.17% Senior notes	April 2026	200,000	200,000
4.27% Senior notes	April 2028	200,000	200,000
Financing obligations	Various dates through February 2059	516,544	522,526
Non-recourse notes payable	Various dates through December 2030	16,866,972	16,360,092
Total debt ⁽³⁾		\$ 18,783,149	\$ 18,382,111
Cash and cash equivalents		\$ 574,142	\$ 314,758

⁽¹⁾ Interest is payable monthly, with the exception of our senior notes, which are payable semi-annually.

⁽²⁾ Borrowings accrue interest at variable rates based on SOFR, the federal funds rate, or the prime rate, depending on the type of borrowing.

⁽³⁾ Total debt excludes unamortized debt issuance costs. See Note 12 for additional information.

Borrowings under our \$2.00 billion unsecured revolving credit facility are available for working capital and general corporate purposes, and the unused portion is fully available to us. The credit facility, term loans and senior note agreements contain representations and warranties, conditions and covenants. If these requirements are not met, all amounts outstanding or otherwise owed could become due and payable immediately and other limitations could be placed on our ability to use any available borrowing capacity. As of February 29, 2024, we were in compliance with these financial covenants.

See Note 12 for additional information on our revolving credit facility, term loans, senior notes and financing obligations.

CAF auto loans receivable are primarily funded through our warehouse facilities and asset-backed term funding transactions. These non-recourse funding vehicles are structured to legally isolate the auto loans receivable, and we would not expect to be able to access the assets of our non-recourse funding vehicles, even in insolvency, receivership or conservatorship proceedings. Similarly, the investors in the non-recourse notes payable have no recourse to our assets beyond the related receivables, the amounts on deposit in reserve accounts and the restricted cash from collections on auto loans receivable. We do, however, continue to have the rights associated with the interest we retain in these non-recourse funding vehicles.

As of February 29, 2024, \$13.13 billion and \$3.74 billion of non-recourse notes payable were outstanding related to asset-backed term funding transactions and our warehouse facilities, respectively. During fiscal 2024, we funded a total of \$6.63 billion in asset-backed term funding transactions. As of February 29, 2024, we had \$2.06 billion of unused capacity in our warehouse facilities.

We have periodically increased our warehouse facility limit over time, as our store base, sales and CAF loan originations have grown. See Notes 1(F) and 12 for additional information on the warehouse facilities.

We generally repurchase the receivables funded through our warehouse facilities when we enter into an asset-backed term funding transaction. If our counterparties were to refuse to permit these repurchases it could impact our ability to execute on our funding program. Additionally, the agreements related to the warehouse facilities include various representations and warranties, as well as covenants and performance triggers related to events of default. If these requirements are not met, we could be unable to continue to fund receivables through the warehouse facilities. In addition, warehouse facility investors could charge us a higher rate of interest and could have us replaced as servicer. Further, we could be required to deposit collections on the related receivables with the warehouse facility agents on a daily basis and deliver executed lockbox agreements to the warehouse facility agents.

The timing and amount of stock repurchases are determined based on stock price, market conditions, legal requirements and other factors. Shares repurchased are deemed authorized but unissued shares of common stock. As of February 29, 2024, a total of \$4 billion of board authorizations for repurchases was outstanding, with no expiration date, of which \$2.36 billion remained available for repurchase. During the third quarter of fiscal 2024, we resumed our share repurchases after a pause initiated during the third quarter of the prior fiscal year. See Note 13 for more information on share repurchase activity.

Fair Value Measurements. We recognize money market securities, mutual fund investments, certain equity investments and derivative instruments at fair value. See Note 6 for more information on fair value measurements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Interest Rate Exposure - Non-Recourse Notes Payable

As of February 29, 2024 and February 28, 2023, all loans in our portfolio of managed receivables were fixed-rate installment contracts. Financing for these receivables was achieved primarily through non-recourse funding vehicles that, in turn, issued both fixed- and variable-rate notes. Non-recourse funding vehicles include warehouse facilities and asset-backed term funding transactions.

Borrowings under our warehouse facilities are variable-rate debt and are secured by auto loans receivable. The receivables are funded through the warehouse facilities until we elect to fund them through an asset-backed term funding transaction, which issue notes payable that accrue interest predominantly at fixed rates.

Interest rate risk related to variable-rate debt is primarily mitigated by entering into derivative instruments. Our derivative instruments are used to manage differences in the amount of our known or expected cash receipts and our known or expected cash payments principally related to the funding of our auto loans receivable. Disruptions in the credit markets or unexpected changes in prepayment activity could impact the effectiveness of our hedging strategies. Generally, changes in interest rates associated with underlying swaps will not have a material impact on earnings; however, they could have a material impact on cash and cash flows.

Absent any additional actions by the company to further mitigate risk, a 100-basis point increase in market interest rates associated with non-recourse funding vehicles would have decreased our fiscal 2024 net earnings per share by approximately \$0.19.

Credit risk is the exposure to nonperformance of another party to an agreement. We mitigate credit risk by dealing with highly rated bank counterparties. The market and credit risks associated with derivative instruments are similar to those relating to other types of financial instruments. See Notes 5 and 6 for additional information on derivative instruments and hedging activities.

COMPOSITION OF NON-RECOURSE NOTES PAYABLE

<i>(In millions)</i>	As of February 29 or 28	
	2024	2023
Fixed-rate	\$ 10,437.1	\$ 10,416.4
Variable-rate ⁽¹⁾	6,429.9	5,943.7
Total	\$ 16,867.0	\$ 16,360.1

⁽¹⁾ Variable-rate debt includes borrowings under our warehouse facilities as well as the variable portion of borrowings under our asset-backed term funding transactions. See Note 12.

Interest Rate Exposure - Other Debt

We have interest rate risk from changing interest rates related to borrowings under our revolving credit facility. We also have interest rate risk from changing interest rates related to borrowings under our term loans; however, a portion of the variable-rate risk is mitigated by derivative instruments. Substantially all of these borrowings are variable-rate debt based on SOFR. A 100-basis point increase in market interest rates would have decreased our fiscal 2024 net earnings per share by approximately \$0.02.

Other Market Exposures

Our pension plan has interest rate risk related to its projected benefit obligation (“PBO”). Due to the relatively young overall age of the plan’s participants, a 100-basis point change in the discount rate has approximately a 15% effect on the PBO balance. A 100-basis point decrease in the discount rate would have decreased our fiscal 2024 net earnings per share by less than \$0.01. See Note 11 for more information on our benefit plans.

As our cash-settled restricted stock units are liability awards, the related compensation expense is sensitive to changes in the company’s stock price. The mark-to-market effect on the liability depends on each award’s grant price and previously

recognized expense. At February 29, 2024, a 10% increase in the company's stock price would have affected fiscal 2024 net earnings per share by approximately \$0.02.

Item 8. Consolidated Financial Statements and Supplementary Data.

**MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL
OVER FINANCIAL REPORTING**

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the company. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework and criteria established in *Internal Control—Integrated Framework (2013)*, issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management has concluded that our internal control over financial reporting was effective as of February 29, 2024.

KPMG LLP, the company's independent registered public accounting firm, has issued a report on our internal control over financial reporting. Their report is included herein.

WILLIAM D. NASH
PRESIDENT AND CHIEF EXECUTIVE OFFICER

ENRIQUE N. MAYOR-MORA
EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

**REPORT OF INDEPENDENT REGISTERED
PUBLIC ACCOUNTING FIRM**

To the Shareholders and Board of Directors
CarMax, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of CarMax, Inc. and subsidiaries (the Company) as of February 29, 2024 and February 28, 2023, the related consolidated statements of earnings, comprehensive income, cash flows, and shareholders' equity for each of the years in the three-year period ended February 29, 2024, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of February 29, 2024 and February 28, 2023, and the results of its operations and its cash flows for each of the years in the three-year period ended February 29, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of February 29, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated April 15, 2024 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Assessment of the allowance for loan losses on core managed receivables

As discussed in Notes 1(H) and 4 to the consolidated financial statements, the Company maintained an allowance for loan losses on core managed receivables for the net credit losses expected over the remaining contractual life of the managed receivables. The balance of the allowance for loan losses on core managed receivables at February 29, 2024 was \$389.7 million. The Company estimates the allowance for loan losses using the net loss timing curve method, primarily based on the composition of the portfolio of managed receivables and historical gross loss and recovery trends. The net loss estimate for core managed receivables with less than 18 months of performance history weights both the historical losses by credit grade at origination and actual loss data on the receivables to-date, along with forward loss curves, in estimating future performance. Once the receivables have 18 months of performance history, the net loss estimate for core managed receivables reflects actual loss experience of those receivables to date, along with forward loss curves. The output of the net loss timing curve is adjusted to take into account reasonable and supportable macroeconomic forecasts about the future. An economic adjustment factor,

based upon a single macroeconomic scenario, is developed to capture the relationship between changes in this forecast and changes in gross loss and recovery rates. This factor is applied to the output of the net loss timing curve for the reasonable and supportable forecast period, after which the Company reverts to historical experience on a straight-line basis. In addition, the Company assesses the need to make qualitative adjustments to the output of the net loss timing curve method as necessary for factors not reflected in the quantitative methods.

We identified the assessment of the allowance for loan losses on core managed receivables as a critical audit matter. A high degree of audit effort, including specialized skills and knowledge, and complex auditor judgment was involved in the assessment due to significant measurement uncertainty. The assessment involved evaluating the allowance for loan losses methodology, including the net loss timing curve and its key assumptions, which consisted of the historical observation periods, forward loss curves, the weighting of actual loss data versus historical losses by credit grade performance used for receivables with less than 18 months of performance history, and an economic adjustment factor for the reasonable and supportable forecast period. Our assessment also included an evaluation of the qualitative adjustments and the conceptual soundness and mathematical accuracy of the net loss timing curve.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the measurement of the allowance for loan losses on core managed receivables, including controls over the (1) development and approval of the allowance for loan losses methodology, (2) the identification and determination of the key assumptions and qualitative adjustments, and (3) design and mathematical accuracy of the net loss timing curve. We evaluated the Company's process to develop the allowance for loan losses on core managed receivables and involved credit risk professionals with specialized skills and knowledge, who assisted in:

- evaluating the Company's allowance for loan losses methodology for compliance with U.S. generally accepted accounting principles
- evaluating the conceptual soundness and mathematical accuracy of the net loss timing curve
- evaluating the methodology, including key assumptions, used to develop the economic adjustment factor and the reasonable and supportable period by comparing them to the Company's business environment, relevant industry practices, and portfolio risk characteristics and trends
- assessing the other key assumptions used in the net loss timing curve by comparing to historical loss performance and the credit composition of the existing loan portfolio
- evaluating the methodology used to develop the qualitative adjustments compared with relevant credit risk factors and consistency with trends and identified limitations of the underlying net loss timing curve.

**REPORT OF INDEPENDENT REGISTERED
PUBLIC ACCOUNTING FIRM**

To the Shareholders and Board of Directors
CarMax, Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited CarMax, Inc. and subsidiaries' (the Company) internal control over financial reporting as of February 29, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of February 29, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of February 29, 2024 and February 28, 2023, the related consolidated statements of earnings, comprehensive income, cash flows and shareholders' equity, for each of the years in the three-year period ended February 29, 2024, and the related notes (collectively, the consolidated financial statements), and our report dated April 15, 2024 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(A) Business and Background

CarMax, Inc. (“we,” “our,” “us,” “CarMax” and “the company”), including its wholly owned subsidiaries, is the nation’s largest retailer of used vehicles. We operate in two reportable segments: CarMax Sales Operations and CarMax Auto Finance (“CAF”). Our CarMax Sales Operations segment consists of all aspects of our auto merchandising and service operations, excluding financing provided by CAF. Our CAF segment consists solely of our own finance operation that provides financing to customers buying retail vehicles from CarMax. On June 1, 2021, we completed the acquisition of Edmunds Holding Company (“Edmunds”), which does not meet the quantitative thresholds to be considered a reportable segment. See Note 19 for additional information on our reportable segments.

We deliver an unrivaled customer experience by offering a broad selection of quality used vehicles and related products and services at competitive, no-haggle prices using a customer-friendly sales process. Our omni-channel platform, which gives us the largest addressable market in the used car industry, empowers our retail customers to buy a car on their terms – online, in-store or an integrated combination of both. We offer customers a range of related products and services, including the appraisal and purchase of vehicles directly from consumers; the financing of retail vehicle purchases through CAF and third-party finance providers; the sale of extended protection plan (“EPP”) products, which include extended service plans (“ESPs”) and guaranteed asset protection (“GAP”); and vehicle repair service. Vehicles purchased through the appraisal process that do not meet our retail standards are sold to licensed dealers through on-site or virtual wholesale auctions.

(B) Basis of Presentation and Use of Estimates

The consolidated financial statements include the accounts of CarMax and our wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates. Certain prior year amounts have been reclassified to conform to the current year’s presentation. Amounts and percentages may not total due to rounding.

(C) Cash and Cash Equivalents

Cash equivalents consisting of highly liquid investments with original maturities of three months or less were \$484.3 million as of February 29, 2024 and \$229.5 million as of February 28, 2023.

(D) Restricted Cash from Collections on Auto Loans Receivable

Cash equivalents, totaling \$506.6 million as of February 29, 2024 and \$470.9 million as of February 28, 2023, consisted of collections of principal, interest and fee payments on auto loans receivable that are restricted for payment to holders of non-recourse notes payable pursuant to the applicable agreements.

(E) Accounts Receivable, Net

Accounts receivable, net of an allowance for doubtful accounts, includes certain amounts due from third-party finance providers and customers, and other miscellaneous receivables. The allowance for doubtful accounts is estimated based on historical experience and trends.

(F) Financing and Securitization Transactions

We maintain a revolving funding program composed of three warehouse facilities (“warehouse facilities”) that we use to fund auto loans receivable originated by CAF. We typically elect to fund these receivables through an asset-backed term funding transaction, such as a term securitization or alternative funding arrangement, at a later date. We sell the auto loans receivable to one of three wholly owned, bankruptcy-remote, special purpose entities that transfer an undivided percentage ownership interest in the receivables, but not the receivables themselves, to entities formed by third-party investors. These entities issue asset-backed commercial paper or utilize other funding sources supported by the transferred receivables, and the proceeds are used to finance the related receivables.

We typically use term securitizations to provide long-term funding for most of the auto loans receivable initially funded through the warehouse facilities. In these transactions, a pool of auto loans receivable is sold to a bankruptcy-remote, special purpose entity that, in turn, transfers the receivables to a special purpose securitization trust. The securitization trust issues asset-backed securities, secured or otherwise supported by the transferred receivables, and the proceeds from the sale of the asset-backed securities are used to finance the securitized receivables.

We are required to evaluate term securitization trusts for consolidation. In our capacity as servicer, we have the power to direct the activities of the trusts that most significantly impact the economic performance of the trusts. In addition, we have the obligation to absorb losses (subject to limitations) and the rights to receive any returns of the trusts, which could be significant. Accordingly, we are the primary beneficiary of the trusts and are required to consolidate them.

We recognize transfers of auto loans receivable into the warehouse facilities and asset-backed term funding transactions, including term securitizations (together, “non-recourse funding vehicles”), as secured borrowings, which result in recording the auto loans receivable and the related non-recourse notes payable on our consolidated balance sheets.

These receivables can only be used as collateral to settle obligations of the related non-recourse funding vehicles. The non-recourse funding vehicles and investors have no recourse to our assets beyond the related receivables, the amounts on deposit in reserve accounts and the restricted cash from collections on auto loans receivable. We have not provided financial or other support to the non-recourse funding vehicles that was not previously contractually required, and there are no additional arrangements, guarantees or other commitments that could require us to provide financial support to the non-recourse funding vehicles.

See Notes 4 and 12 for additional information on auto loans receivable and non-recourse notes payable.

(G) Inventory

Inventory is primarily comprised of vehicles held for sale or currently undergoing reconditioning and is stated at the lower of cost or net realizable value (“NRV”). Vehicle inventory cost is determined by specific identification. Parts, labor and overhead costs associated with reconditioning vehicles, as well as transportation and other incremental expenses associated with acquiring and reconditioning vehicles, are included in inventory.

(H) Auto Loans Receivable, Net

Auto loans receivable include amounts due from customers related to retail vehicle sales financed through CAF and are presented net of an allowance for loan losses. The allowance for loan losses represents the net credit losses expected over the remaining contractual life of our managed receivables. See Note 4 for additional information on our significant accounting policies related to auto loans receivable and the allowance for loan losses.

(I) Property and Equipment

Property and equipment is stated at cost less accumulated depreciation and amortization. Depreciation and amortization are calculated using the straight-line method over the shorter of the asset’s estimated useful life or the lease term, if applicable. Costs incurred during new store construction are capitalized as construction-in-progress and reclassified to the appropriate fixed asset categories when the store is completed.

Estimated Useful Lives

	Life
Buildings	25 years
Leasehold improvements	10 – 15 years
Furniture, fixtures and equipment	3 – 15 years
Software	5 years

We review long-lived assets for impairment when events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. We recognize impairment when the sum of undiscounted estimated future cash flows expected to result from the use of the asset is less than the carrying value of the asset. See Note 7 for additional information on property and equipment.

(J) Other Assets

Restricted Cash on Deposit in Reserve Accounts. The restricted cash on deposit in reserve accounts is for the benefit of holders of non-recourse notes payable, and these funds are not expected to be available to the company or its creditors. In the event that the cash generated by the related receivables in a given period was insufficient to pay the interest, principal and other required payments, the balances on deposit in the reserve accounts would be used to pay those amounts. Restricted cash on deposit in reserve accounts is invested in money market securities or bank deposit accounts and was \$118.2 million as of February 29, 2024 and \$113.7 million as of February 28, 2023.

Other Investments. Other investments includes restricted money market securities primarily held to satisfy certain insurance program requirements, investments held in a rabbi trust established to fund informally our executive deferred compensation plan and investments in equity securities. Money market securities and mutual funds are reported at fair value, and investments in equity securities are reported at cost less any impairment and adjusted for any observable changes in price. Gains and losses on these securities are reflected as a component of other income. Other investments totaled \$137.3 million as of February 29, 2024 and \$133.2 million as of February 28, 2023.

(K) Financing Obligations

We generally account for sale-leaseback transactions as financing obligations. Accordingly, we record certain of the assets subject to these transactions on our consolidated balance sheets in property and equipment and the related sales proceeds as financing obligations in long-term debt. Depreciation is recognized on the assets over their estimated useful lives, generally 25 years. A portion of the periodic lease payments is recognized as interest expense and the remainder reduces the obligation. In the event the sale-leasebacks are modified or extended beyond their original term, the related obligation is increased based on the present value of the revised future minimum lease payments on the date of the modification, with a corresponding increase to the net carrying amount of the assets subject to these transactions. See Note 12 for additional information on financing obligations.

(L) Accrued Expenses

As of February 29, 2024 and February 28, 2023, accrued expenses and other current liabilities included accrued compensation and benefits of \$192.4 million and \$159.3 million, respectively; loss reserves for general liability and workers' compensation insurance of \$51.9 million and \$47.5 million, respectively; our vehicle return reserves of \$97.8 million and \$95.9 million, respectively; and the current portion of cancellation reserves. See Note 9 for additional information on cancellation reserves.

(M) Defined Benefit Plan Obligations

The recognized funded status of defined benefit retirement plan obligations is included both in accrued expenses and other current liabilities and in other liabilities. The current portion represents benefits expected to be paid from our benefit restoration plan over the next 12 months. The defined benefit retirement plan obligations are determined using a number of actuarial assumptions. Key assumptions used in measuring the plan obligations include the discount rate, rate of return on plan assets and mortality rate. See Note 11 for additional information on our benefit plans.

(N) Insurance Liabilities

Insurance liabilities are included in accrued expenses and other current liabilities. We use a combination of insurance and self-insurance for a number of risks including workers' compensation, general liability and employee-related health care costs, a portion of which is paid by associates. Estimated insurance liabilities are determined by considering historical claims experience, demographic factors and other actuarial assumptions.

(O) Revenue Recognition

Our revenue consists primarily of used and wholesale vehicle sales, as well as sales from EPP products, advertising and subscription revenues earned by our Edmunds business and vehicle repair service revenues. See Note 2 for additional information on our significant accounting policies related to revenue recognition.

(P) Cost of Sales

Cost of sales includes the cost to acquire vehicles and the reconditioning and transportation costs associated with preparing the vehicles for resale. It also includes payroll, fringe benefits, and parts, labor and overhead costs associated with reconditioning and vehicle repair services. The gross profit earned by our service department for used vehicle reconditioning service is a reduction of cost of sales. We maintain a reserve to eliminate the internal profit on vehicles that have not been sold.

(Q) Selling, General and Administrative Expenses

Selling, general and administrative ("SG&A") expenses primarily include compensation and benefits, other than payroll related to reconditioning and vehicle repair services; rent and other occupancy costs; advertising; and other, including IT expenses, non-CAF bad debt, insurance, travel, charitable contributions, preopening and relocation costs, and other administrative expenses.

(R) Advertising Expenses

Advertising costs are expensed as incurred and substantially all are included in SG&A expenses. Total advertising expenses were \$265.6 million in fiscal 2024, \$295.6 million in fiscal 2023 and \$332.2 million in fiscal 2022.

(S) Location Opening Expenses

Costs related to location openings, including preopening costs, are expensed as incurred and are included in SG&A expenses.

(T) Share-Based Compensation

Share-based compensation represents the cost related to share-based awards granted to employees and non-employee directors. We measure share-based compensation cost at the grant date, based on the estimated fair value of the award, and we recognize the cost on a straight-line basis, net of estimated forfeitures, over the grantee's requisite service period, which is generally the vesting period of the award. We estimate the fair value of stock options using a binomial valuation model. Key assumptions used in estimating the fair value of options are dividend yield, expected volatility, risk-free interest rate and expected term. The fair values of restricted stock, stock-settled performance stock units and stock-settled deferred stock units are based on the closing prices on the date of the grant. The fair value of stock-settled market stock units is determined using a Monte-Carlo simulation based on the expected market price of our common stock on the vesting date and the expected number of converted common shares. Cash-settled restricted stock units are liability awards with fair value measurement based on the closing price of CarMax common stock as of the end of each reporting period. Share-based compensation expense is recorded in either cost of sales, CAF income or SG&A expenses based on the recipients' respective function.

We record deferred tax assets for awards that result in deductions on our income tax returns, based on the amount of compensation expense recognized and the statutory tax rate in the jurisdiction in which we will receive a deduction. Differences between the deferred tax assets recognized for financial reporting purposes and the actual tax deduction reported on the income tax return are recorded in income tax expense. See Note 13 for additional information on stock-based compensation.

(U) Derivative Instruments and Hedging Activities

We enter into derivative instruments to manage certain risks arising from both our business operations and economic conditions that result in the future known receipt or payment of uncertain cash amounts, the values of which are impacted by interest rates. We recognize the derivatives at fair value on the consolidated balance sheets, and where applicable, such contracts covered by master netting agreements are reported net. Gross positive fair values are netted with gross negative fair values by counterparty. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether we have elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. We may enter into derivative contracts that are intended to economically hedge certain risks, even though hedge accounting may not apply or we do not elect to apply hedge accounting. See Note 5 for additional information on derivative instruments and hedging activities.

(V) Income Taxes

We file a consolidated federal income tax return. Deferred income taxes reflect the impact of temporary differences between the amounts of assets and liabilities recognized for financial reporting purposes and the amounts recognized for income tax purposes, measured by applying currently enacted tax laws. A deferred tax asset is recognized if it is more likely than not that a benefit will be realized. Changes in tax laws and tax rates are reflected in the income tax provision in the period in which the changes are enacted. We evaluate the need to record valuation allowances that would reduce deferred tax assets to the amount that will more likely than not be realized. When assessing the need for valuation allowances, we consider available loss carrybacks, tax planning strategies, future reversals of existing temporary differences and future taxable income.

We recognize the tax benefit from an uncertain tax position only if it is more likely than not that the position will be sustained upon review by tax authorities. Benefits recognized from tax positions are measured at the highest tax benefit that is greater than 50% likely of being realized upon settlement. To the extent that the final tax outcome of these matters is different from the amounts recorded, the differences impact income tax expense in the period in which the determination is made. Interest and penalties related to income tax matters are included in SG&A expenses. See Note 10 for additional information on income taxes.

(W) Net Earnings Per Share

Basic net earnings per share is computed by dividing net earnings available for basic common shares by the weighted average number of shares of common stock outstanding. Diluted net earnings per share is computed by dividing net earnings available for diluted common shares by the sum of the weighted average number of shares of common stock outstanding and dilutive potential common stock. Diluted net earnings per share is calculated using the "if-converted" treasury stock method. See Note 14 for additional information on net earnings per share.

(X) Recent Accounting Pronouncements**Adopted in the Current Period**

In October 2021, the Financial Accounting Standards Board ("FASB") issued an accounting pronouncement (ASU 2021-08) related to accounting for acquired revenue contracts with customers in a business combination. The amendments in this update address diversity in practice and inconsistency related to recognition of an acquired contract liability and the effect of payment terms on subsequent revenue recognition for the acquirer. This update is effective for fiscal years beginning after December 15,

2022, including interim periods within those fiscal years. We adopted this pronouncement for our fiscal year beginning March 1, 2023, and it did not have a material effect on our consolidated financial statements.

In March 2022, the FASB issued an accounting pronouncement (ASU 2022-01) related to the portfolio layer method of hedge accounting. The amendments in this update clarify the accounting and promote consistency in reporting for hedges where the portfolio layer method is applied. This update is effective for fiscal years beginning after December 15, 2022, and interim periods within those fiscal years. We adopted this pronouncement for our fiscal year beginning March 1, 2023, and it did not have a material effect on our consolidated financial statements.

In March 2022, the FASB issued an accounting pronouncement (ASU 2022-02) related to troubled debt restructurings (“TDRs”) and vintage disclosures for financing receivables. The amendments in this update eliminate the accounting guidance for TDRs by creditors while enhancing disclosure requirements for certain loan refinancing and restructurings by creditors made to borrowers experiencing financial difficulty. The amendments also require disclosure of current-period gross charge-offs by year of origination for financing receivables. The amendments in this update are effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. We adopted this pronouncement for our fiscal year beginning March 1, 2023, and made the necessary updates to our vintage disclosures. Aside from these disclosure changes, the amendments did not have a material effect on our consolidated financial statements.

In September 2022, the FASB issued an accounting pronouncement (ASU 2022-04) related to disclosure requirements for buyers in supplier finance programs. The amendments in the update require that buyers disclose qualitative and quantitative information about their supplier finance programs. Interim and annual requirements include disclosure of outstanding amounts under the obligations as of the end of the reporting period, and annual requirements include a rollforward of those obligations for the annual reporting period, as well as a description of payment and other key terms of the programs. This update is effective for annual periods beginning after December 15, 2022, and interim periods within those fiscal years, except for the requirement to disclose rollforward information, which is effective for fiscal years beginning after December 15, 2023. We adopted this pronouncement for our fiscal year beginning March 1, 2023, and it did not have a material effect on our consolidated financial statements.

Effective in Future Periods

In October 2023, the FASB issued an accounting pronouncement (ASU 2023-06) related to disclosure or presentation requirements for various subtopics in the FASB’s Accounting Standards Codification (“Codification”). The amendments in the update are intended to align the requirements in the Codification with the U.S. Securities and Exchange Commission’s (“SEC”) regulations and facilitate the application of GAAP for all entities. The effective date for each amendment is the date on which the SEC removal of the related disclosure requirement from Regulation S-X or Regulation S-K becomes effective, or if the SEC has not removed the requirements by June 30, 2027, this amendment will be removed from the Codification and will not become effective for any entity. Early adoption is prohibited. We do not expect this update to have a material impact on our consolidated financial statements.

In November 2023, the FASB issued an accounting pronouncement (ASU 2023-07) related to the disclosure of incremental segment information on an annual and interim basis. This update is effective for annual periods beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024, and requires retrospective application to all prior periods presented in the financial statements. We plan to adopt this pronouncement beginning with our fiscal year ended February 28, 2025, and we do not expect it to have a material effect on our consolidated financial statements.

In December 2023, the FASB issued an accounting pronouncement (ASU 2023-09) related to income tax disclosures. The amendments in this update are intended to enhance the transparency and decision usefulness of income tax disclosures primarily through changes to the rate reconciliation and income taxes paid information. This update is effective for annual periods beginning after December 15, 2024, though early adoption is permitted. We plan to adopt this pronouncement for our fiscal year beginning March 1, 2025, and we do not expect it to have a material effect on our consolidated financial statements.

In March 2024, the SEC issued final rules to enhance public company disclosures related to the risks and impacts of climate-related matters, and in April 2024, the SEC voluntarily stayed the new rules as a result of pending legal challenges. The new rules, if adopted, include a requirement to disclose climate-related risks and the material impacts that severe weather events and other natural conditions have had, or are reasonably likely to have, on the company. The rules also require disclosures related to management and the board of directors’ governance over such risks. The new disclosure rules, absent the results of pending legal challenges, are currently expected to be effective for our Form 10-K for the year-ended February 28, 2026, except for those relating to greenhouse gas emissions, which are expected to be effective for our Form 10-K for the year-ended February 28, 2027. We are in the process of evaluating the impacts of these new rules.

2. REVENUE

We recognize revenue when control of the good or service has been transferred to the customer, generally either at the time of sale or upon delivery to a customer. Our contracts have a fixed contract price and revenue is measured as the amount of consideration we expect to receive in exchange for transferring goods or providing services. We collect sales taxes and other taxes from customers on behalf of governmental authorities at the time of sale. These taxes are accounted for on a net basis and are not included in net sales and operating revenues or cost of sales. We generally expense sales commissions when incurred because the amortization period would have been less than one year. These costs are recorded within selling, general and administrative expenses. We do not have any significant payment terms as payment is received at or shortly after the point of sale.

Disaggregation of Revenue

(In millions)	Years Ended February 29 or 28		
	2024	2023	2022
Used vehicle sales	\$ 20,922.3	\$ 23,034.3	\$ 24,437.1
Wholesale vehicle sales	4,975.8	5,989.8	6,763.8
Other sales and revenues:			
Extended protection plan revenues	401.8	422.3	478.4
Third-party finance (fees)/income, net	(5.8)	7.0	1.5
Advertising & subscription revenues ⁽¹⁾	135.8	133.3	101.8
Service revenues	85.1	82.3	81.8
Other	21.1	15.9	36.0
Total other sales and revenues	638.0	660.8	699.5
Total net sales and operating revenues	\$ 26,536.0	\$ 29,684.9	\$ 31,900.4

⁽¹⁾ Excludes intersegment sales and operating revenues that have been eliminated in consolidation. See Note 19 for further details.

Used Vehicle Sales. Revenue from the sale of used vehicles is recognized upon transfer of control of the vehicle to the customer. As part of our customer service strategy, we guarantee the retail vehicles we sell with a 30-day/1,500 mile, money-back guarantee. In May 2024, we will replace our 30-day money-back guarantee with a 10-day money-back guarantee. We record a reserve for estimated returns based on historical experience and trends. The reserve for estimated returns is presented gross on the consolidated balance sheets, with a return asset recorded in other current assets and a refund liability recorded in accrued expenses and other current liabilities. We also guarantee the used vehicles we sell with a 90-day/4,000-mile limited warranty. These warranties are deemed assurance-type warranties and are accounted for as warranty obligations. See Note 18 for additional information on this warranty and its related obligation.

Wholesale Vehicle Sales. Wholesale vehicles are sold at our auctions, and revenue from the sale of these vehicles is recognized upon transfer of control of the vehicle to the customer. Dealers also pay a fee to us based on the sale price of the vehicles they purchase. This fee is recognized as revenue at the time of sale. While we provide condition disclosures on each wholesale vehicle sold, the vehicles are subject to a limited right of return. We record a reserve for estimated returns based on historical experience and trends. The reserve for estimated returns is presented gross on the consolidated balance sheets, with a return asset recorded in other current assets and a refund liability recorded in accrued expenses and other current liabilities.

EPP Revenues. We also sell ESP and GAP products on behalf of unrelated third parties, who are primarily responsible for fulfilling the contract, to customers who purchase a retail vehicle. The ESPs we currently offer on all used vehicles provide coverage up to 60 months (subject to mileage limitations), while GAP covers the customer for the term of their finance contract. We recognize revenue, on a net basis, at the time of sale. We also record a reserve, or refund liability, for estimated contract cancellations. The reserve for cancellations is evaluated for each product and is based on forecasted forward cancellation curves utilizing historical experience, recent trends and credit mix of the customer base. Our risk related to contract cancellations is limited to the revenue that we receive. Cancellations fluctuate depending on the volume of EPP sales, customer financing default or prepayment rates, and shifts in customer behavior, including those related to changes in the coverage or term of the product. The current portion of estimated cancellation reserves is recognized as a component of accrued expenses and other current liabilities with the remaining amount recognized in other liabilities. See Note 9 for additional information on cancellation reserves.

We are contractually entitled to receive profit-sharing revenues based on the performance of the ESPs administered by third parties. These revenues are a form of variable consideration included in EPP revenues to the extent that it is probable that it will not result in a significant revenue reversal. An estimate of the amount to which we expect to be entitled is determined upon satisfying the performance obligation of selling the ESP. This estimate is subject to various constraints; primarily, factors that are outside of the company's influence or control. We have determined that these constraints generally preclude any profit-sharing revenues from being recognized before they are paid. As of February 29, 2024 and February 28, 2023, no current or long-term contract asset was recognized related to cumulative profit-sharing payments to which we expect to be entitled. The estimate of the amount to which we expect to be entitled is reassessed each reporting period and any changes are reflected in other sales and revenues on our consolidated statements of earnings and other assets on our consolidated balance sheets.

Third-Party Finance (Fees)/Income. Customers applying for financing who are not approved or are conditionally approved by CAF are generally evaluated by other third-party finance providers. These providers generally either pay us or are paid a fixed, pre-negotiated fee per contract. We recognize these fees at the time of sale.

Advertising and Subscription Revenues. Advertising and subscription revenues consist of revenues earned by our Edmunds business. Advertising revenues are derived from advertising contracts with automotive manufacturers based on fixed fees per impression and fees for certain activities completed by customers on the manufacturers' websites. These fees are recognized in the period the impressions are delivered or certain activities occurred. Subscription revenues are derived from packages sold to automotive dealers that include car leads, inventory listings and enhanced placement in Edmunds' dealer locator and are recognized over the period that the services are made available to the dealers. Subscription revenues also include a digital marketing subscription service, which allows dealers to gain exposure on third party partner websites. Revenues for this service are recognized on a net basis.

Service Revenues. Service revenue consists of labor and parts income related to vehicle repair service, including repairs of vehicles covered under an ESP we sell or warranty program. Service revenue is recognized at the time the work is completed.

Other Revenues. Other revenues include miscellaneous goods and services, which are immaterial to our consolidated financial statements.

3. CARMAX AUTO FINANCE

CAF provides financing to qualified retail customers purchasing vehicles from CarMax. CAF provides us the opportunity to capture additional profits, cash flows and sales while managing our reliance on third-party finance sources. Management regularly analyzes CAF's operating results by assessing profitability, the performance of the auto loans receivable, including trends in credit losses and delinquencies, and CAF direct expenses. This information is used to assess CAF's performance and make operating decisions, including resource allocation.

We typically use securitizations or other funding arrangements to fund loans originated by CAF, as discussed in Note 1(F). CAF income primarily reflects the interest and fee income generated by the auto loans receivable less the interest expense associated with the debt issued to fund these receivables, a provision for estimated loan losses and direct CAF expenses.

CAF income does not include any allocation of indirect costs. Although CAF benefits from certain indirect overhead expenditures, we have not allocated indirect costs to CAF to avoid making subjective allocation decisions. Examples of indirect costs not allocated to CAF include retail store expenses and corporate expenses. In addition, except for auto loans receivable, which are disclosed in Note 4, CAF assets are not separately reported nor do we allocate assets to CAF because such allocation would not be useful to management in making operating decisions.

Components of CAF Income

(In millions)	Years Ended February 29 or 28					
	2024	% ⁽¹⁾	2023	% ⁽¹⁾	2022	% ⁽¹⁾
Interest margin:						
Interest and fee income	\$ 1,677.4	9.7	\$ 1,441.5	8.8	\$ 1,296.8	8.7
Interest expense	(638.7)	(3.7)	(310.3)	(1.9)	(228.8)	(1.5)
Total interest margin	1,038.7	6.0	1,131.2	6.9	1,068.0	7.2
Provision for loan losses	(310.5)	(1.8)	(317.0)	(1.9)	(141.7)	(0.9)
Total interest margin after provision for loan losses	728.2	4.2	814.2	5.0	926.3	6.2
Direct expenses:						
Payroll and fringe benefit expense	(66.5)	(0.4)	(62.8)	(0.4)	(50.5)	(0.3)
Depreciation and amortization	(16.5)	(0.1)	(15.5)	(0.1)	(6.6)	—
Other direct expenses	(76.9)	(0.4)	(72.4)	(0.4)	(67.7)	(0.5)
Total direct expenses	(159.9)	(0.9)	(150.8)	(0.9)	(124.8)	(0.8)
CarMax Auto Finance income	\$ 568.3	3.3	\$ 663.4	4.1	\$ 801.5	5.4
Total average managed receivables	\$ 17,313.2		\$ 16,304.3		\$ 14,934.0	

⁽¹⁾ Percent of total average managed receivables.

4. AUTO LOANS RECEIVABLE

Auto loans receivable include amounts due from customers related to retail vehicle sales financed through CAF and are presented net of an allowance for estimated loan losses. These auto loans represent a large group of smaller-balance homogeneous loans, which we consider to be part of one class of financing receivable and one portfolio segment for purposes of determining our allowance for loan losses. We generally use warehouse facilities to fund auto loans receivable originated by CAF until we elect to fund them through an asset-backed term funding transaction, such as a term securitization or alternative funding arrangement. We recognize transfers of auto loans receivable into the warehouse facilities and asset-backed term funding transactions (together, “non-recourse funding vehicles”) as secured borrowings, which result in recording the auto loans receivable and the related non-recourse notes payable on our consolidated balance sheets. The majority of the auto loans receivable serve as collateral for the related non-recourse notes payable of \$16.87 billion as of February 29, 2024, and \$16.36 billion as of February 28, 2023. See Notes 1(F) and 12 for additional information on securitizations and non-recourse notes payable.

Interest income and expenses related to auto loans are included in CAF income. Interest income on auto loans receivable is recognized when earned based on contractual loan terms. All loans continue to accrue interest until repayment or charge-off. When a charge-off occurs, accrued interest is written off by reversing interest income. Direct costs associated with loan originations are not considered material, and thus, are expensed as incurred. See Note 3 for additional information on CAF income.

Auto Loans Receivable, Net

(In millions)	As of February 29 or 28	
	2024	2023
Asset-backed term funding	\$ 12,638.2	\$ 12,242.8
Warehouse facilities	3,744.6	3,649.9
Overcollateralization ⁽¹⁾	790.9	739.9
Other managed receivables ⁽²⁾	218.1	135.3
Total ending managed receivables	17,391.8	16,767.9
Accrued interest and fees	90.9	78.0
Other	11.9	3.1
Less: allowance for loan losses	(482.8)	(507.2)
Auto loans receivable, net	\$ 17,011.8	\$ 16,341.8

⁽¹⁾ Represents receivables restricted as excess collateral for the non-recourse funding vehicles.

⁽²⁾ Other managed receivables includes receivables not funded through the non-recourse funding vehicles.

Credit Quality. When customers apply for financing, CAF's proprietary scoring models utilize the customers' credit history and certain application information to evaluate and rank their risk. We obtain credit histories and other credit data that includes information such as number, age, type of and payment history for prior or existing credit accounts. The application information that is used includes income, collateral value and down payment. The scoring models yield credit grades that represent the relative likelihood of repayment. Customers with the highest probability of repayment are A-grade customers. Customers assigned a lower grade are determined to have a lower probability of repayment. For loans that are approved, the credit grade influences the terms of the agreement, such as the required loan-to-value ratio and interest rate. After origination, credit grades are generally not updated.

CAF uses a combination of the initial credit grades and historical performance to monitor the credit quality of the auto loans receivable on an ongoing basis. We validate the accuracy of the scoring models periodically. Loan performance is reviewed on a recurring basis to identify whether the assigned grades adequately reflect the customers' likelihood of repayment.

⁽²⁾ Percent of total ending managed receivables.

⁽³⁾ Represents CAF's Tier 1 originations.

⁽⁴⁾ Represents CAF's Tier 2 and Tier 3 originations.

Allowance for Loan Losses. The allowance for loan losses at February 29, 2024 represents the net credit losses expected over the remaining contractual life of our managed receivables. The allowance for loan losses is determined using a net loss timing curve method ("method"), primarily based on the composition of the portfolio of managed receivables and historical gross loss and recovery trends. Due to the fact that losses for receivables with less than 18 months of performance history can be volatile, our net loss estimate weights both historical losses by credit grade at origination and actual loss data on the receivables to-date, along with forward loss curves, in estimating future performance. Once the receivables have 18 months of performance history, the net loss estimate reflects actual loss experience of those receivables to date, along with forward loss curves, to predict future performance. The forward loss curves are constructed using historical performance data and show the average timing of losses over the course of a receivable's life. The net loss estimate is calculated by applying the loss rates developed using the methods described above to the amortized cost basis of the managed receivables at inception of the loan.

The output of the method is adjusted to take into account reasonable and supportable forecasts about the future. Specifically, the change in U.S. unemployment rates and the National Automobile Dealers Association used vehicle price index are used to predict changes in gross loss and recovery rates, respectively. An economic adjustment factor, based upon a single macroeconomic scenario, is developed to capture the relationship between changes in these forecasts and changes in gross loss and recovery rates. This factor is applied to the output of the method for the reasonable and supportable forecast period of two years. After the end of this two-year period, we revert to historical experience on a straight-line basis over a period of 12 months. We periodically consider whether the use of alternative metrics would result in improved model performance and revise the models when appropriate. We also consider whether qualitative adjustments are necessary for factors that are not reflected in the quantitative methods but impact the measurement of estimated credit losses. Such adjustments include the uncertainty of the impacts of recent economic trends on customer behavior. The change in the allowance for loan losses is recognized through an adjustment to the provision for loan losses.

Allowance for Loan Losses

(In millions)	As of February 29, 2024				% ⁽¹⁾
	Core	Other	Total		
Balance as of beginning of year	\$ 401.5	\$ 105.7	\$ 507.2		3.02
Charge-offs	(471.6)	(89.9)	(561.5)		
Recoveries ⁽²⁾	197.3	29.3	226.6		
Provision for loan losses	262.5	48.0	310.5		
Balance as of end of year	\$ 389.7	\$ 93.1	\$ 482.8		2.78

(In millions)	As of February 28, 2023				% ⁽¹⁾
	Core	Other	Total		
Balance as of beginning of year	\$ 377.5	\$ 55.5	\$ 433.0		2.77
Charge-offs	(348.1)	(54.4)	(402.5)		
Recoveries ⁽²⁾	142.5	17.2	159.7		
Provision for loan losses	229.6	87.4	317.0		
Balance as of end of year	\$ 401.5	\$ 105.7	\$ 507.2		3.02

⁽¹⁾ Percent of total ending managed receivables.

⁽²⁾ Net of costs incurred to recover vehicle.

During fiscal 2024, the allowance for loan losses as a percent of total ending managed receivables decreased by 24 basis points. The decrease was primarily driven by the impact of our tightened underwriting standards in response to the current environment, partially offset by unfavorable loss performance as well as our continued investment in the Tier 2 business. The increase in net charge-offs primarily reflects continued customer hardship in the current economic environment. The allowance for loan losses as of February 29, 2024 reflects our best estimate of expected future losses based on recent trends in delinquencies, loss performance, recovery rates and the economic environment.

Past Due Receivables. An account is considered delinquent when the related customer fails to make a substantial portion of a scheduled payment on or before the due date. In general, accounts are charged-off on the last business day of the month during which the earliest of the following occurs: the receivable is 120 days or more delinquent as of the last business day of the month, the related vehicle is repossessed and liquidated, or the receivable is otherwise deemed uncollectable. For purposes of determining impairment, auto loans are evaluated collectively, as they represent a large group of smaller-balance homogeneous loans, and therefore, are not individually evaluated for impairment.

Past Due Receivables

⁽¹⁾ Percent of total ending managed receivables.

5. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We use derivatives to manage certain risks arising from both our business operations and economic conditions, particularly with regard to issuances of debt. Primary exposures include SOFR and other rates used as benchmarks in our securitizations and other debt financing. We enter into derivative instruments to manage exposures related to the future known receipt or payment of uncertain cash amounts, the values of which are impacted by interest rates, and generally designate these derivative instruments as cash flow hedges for accounting purposes. In certain cases, we may choose not to designate a derivative instrument as a cash flow hedge for accounting purposes due to uncertainty around the probability that future hedged transactions will occur. Our derivative instruments are used to manage (i) differences in the amount of our known or expected cash receipts and our known or expected cash payments principally related to the funding of our auto loans receivable, and (ii) exposure to variable interest rates associated with our term loans.

For the derivatives associated with our non-recourse funding vehicles that are designated as cash flow hedges, the changes in fair value are initially recorded in accumulated other comprehensive income ("AOCI"). For the majority of these derivatives, the amounts are subsequently reclassified into CAF income in the period that the hedged forecasted transaction affects earnings, which occurs as interest expense is recognized on those future issuances of debt. During the next 12 months, we estimate that an additional \$48.5 million will be reclassified from AOCI as an increase to CAF income. Changes in fair value related to derivatives that have not been designated as cash flow hedges for accounting purposes are recognized in the income statement in the period in which the change occurs. For the years ended February 29, 2024 and February 28, 2023, we recognized expense of \$20.8 million and income of \$24.5 million, respectively, in CAF income representing these changes in fair value.

As of February 29, 2024 and February 28, 2023, we had interest rate swaps outstanding with a combined notional amount of \$5.21 billion and \$4.49 billion, respectively, that were designated as cash flow hedges of interest rate risk. As of February 29, 2024 and February 28, 2023, we had interest rate swaps with a combined notional amount of \$0.70 billion and \$1.14 billion, respectively, outstanding that were not designated as cash flow hedges for accounting purposes.

See Note 6 for discussion of fair values of financial instruments and Note 15 for the effect on comprehensive income.

6. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal market or, if none exists, the most advantageous market, for the specific asset or liability at the measurement date (referred to as the "exit price"). The fair value should be based on assumptions that market participants would use, including a consideration of nonperformance risk.

We assess the inputs used to measure fair value using the three-tier hierarchy. The hierarchy indicates the extent to which inputs used in measuring fair value are observable in the market.

- Level 1** Inputs include unadjusted quoted prices in active markets for identical assets or liabilities that we can access at the measurement date.
- Level 2** Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets in active markets, quoted prices from identical or similar assets in inactive markets, observable inputs, such as interest rates and yield curves, and assumptions about risk.
- Level 3** Inputs that are significant to the measurement that are not observable in the market and include management's judgments about the assumptions market participants would use in pricing the asset or liability (including assumptions about risk).

Our fair value processes include controls that are designed to ensure that fair values are appropriate. Such controls include model validation, review of key model inputs, analysis of period-over-period fluctuations and reviews by senior management.

Valuation Methodologies

Money Market Securities. Money market securities are cash equivalents, which are included in cash and cash equivalents, restricted cash from collections on auto loans receivable and other assets. They consist of highly liquid investments with original maturities of three months or less and are classified as Level 1.

Mutual Fund Investments. Mutual fund investments consist of publicly traded mutual funds that primarily include diversified equity investments in large-, mid- and small-cap domestic and international companies or investment grade debt securities. The

investments, which are included in other assets, are held in a rabbi trust established to fund informally our executive deferred compensation plan and are classified as Level 1.

Derivative Instruments. The fair values of our derivative instruments are included in either other current assets, other assets, accounts payable or other liabilities. Our derivatives are not exchange-traded and are over-the-counter customized derivative instruments. All of our derivative exposures are with highly rated bank counterparties.

We measure derivative fair values assuming that the unit of account is an individual derivative instrument and that derivatives are sold or transferred on a stand-alone basis. We estimate the fair value of our derivatives using quotes determined by the derivative counterparties and third-party valuation services. Quotes from third-party valuation services and quotes received from bank counterparties project future cash flows and discount the future amounts to a present value using market-based expectations for interest rates and the contractual terms of the derivative instruments. The models do not require significant judgment and model inputs can typically be observed in a liquid market; however, because the models include inputs other than quoted prices in active markets, all derivatives are classified as Level 2.

Our derivative fair value measurements consider assumptions about counterparty and our own nonperformance risk. We monitor counterparty and our own nonperformance risk and, in the event that we determine that a party is unlikely to perform under terms of the contract, we would adjust the derivative fair value to reflect the nonperformance risk.

Items Measured at Fair Value on a Recurring Basis

<i>(In thousands)</i>	As of February 29, 2024		
	Level 1	Level 2	Total

Fair Value of Financial Instruments

The carrying value of our cash and cash equivalents, accounts receivable, other restricted cash deposits and accounts payable approximates fair value due to the short-term nature and/or variable rates associated with these financial instruments. Auto loans receivable are presented net of an allowance for estimated loan losses, which we believe approximates fair value. We believe that the carrying value of our revolving credit facility and term loans approximates fair value due to the variable rates associated with these obligations. The fair value of our senior unsecured notes, which are not carried at fair value on our consolidated balance sheets, was determined using Level 2 inputs based on quoted market prices. The carrying value and fair value of the senior unsecured notes as of February 29, 2024 and February 28, 2023, respectively, are as follows:

<i>(In thousands)</i>	As of February 29, 2024		As of February 28, 2023	
Carrying value	\$	400,000	\$	500,000
Fair value	\$	380,249	\$	473,749

7. PROPERTY AND EQUIPMENT

<i>(In thousands)</i>	As of February 29 or 28	
	2024	2023
Land	\$ 990,225	\$ 947,734
Land held for development ⁽¹⁾	193,923	62,770
Buildings	2,612,746	2,454,937
Leasehold improvements	361,850	356,974
Furniture, fixtures and equipment	586,813	559,927
Construction in progress	117,352	156,925
Software	385,867	314,454
Finance leases	230,537	192,117
Total property and equipment	5,479,313	5,045,838
Less: accumulated depreciation and amortization	(1,813,783)	(1,614,924)
Property and equipment, net	\$ 3,665,530	\$ 3,430,914

⁽¹⁾ Land held for development represents land owned for potential location growth.

Depreciation expense was \$261.4 million in fiscal 2024, \$244.4 million in fiscal 2023 and \$215.3 million in fiscal 2022.

8. GOODWILL AND INTANGIBLE ASSETS

Goodwill

We test goodwill for impairment annually as of December 1, or whenever events or circumstances indicate that the carrying value may not be recoverable. Goodwill is tested for impairment at the reporting unit level, which are determined in accordance with the provisions of ASC 350, *Intangibles – Goodwill and Other*. The goodwill acquired as part of the Edmunds acquisition was allocated to two of our reporting units – CarMax Sales Operations and Edmunds – with carrying values of \$98.9 million and \$42.4 million, respectively. No impairment was recognized in fiscal 2024 or fiscal 2023.

Intangibles

<i>(In thousands)</i>	As of February 29, 2024		
	Gross Carrying Amount	Accumulated Amortization	Net Amount
Intangible assets not subject to amortization:			
Trade name	\$ 31,900	\$ —	\$ 31,900
Intangible assets subject to amortization:			
Internally developed software	52,900	(20,782)	32,118
Customer relationships	133,200	(21,547)	111,653
Total intangible assets	\$ 218,000	\$ (42,329)	\$ 175,671

	As of February 28, 2023		
	Gross Carrying Amount	Accumulated Amortization	Net Amount
Intangible assets not subject to amortization:			
Trade name	\$ 31,900	\$ —	\$ 31,900
Intangible assets subject to amortization:			
Internally developed software	52,900	(13,225)	39,675
Customer relationships	133,200	(13,712)	119,488
Total intangible assets	\$ 218,000	\$ (26,937)	\$ 191,063

The intangible assets above relate to the acquisition of Edmunds on June 1, 2021.

Amortization expense of intangible assets was \$15.4 million in both fiscal 2024 and fiscal 2023.

We estimate that amortization expense related to intangible assets will be \$15.4 million in each of the next four fiscal years and \$9.7 million in the subsequent fiscal year.

9. CANCELLATION RESERVES

We recognize revenue for EPP products, on a net basis, at the time of sale. We also record a reserve, or refund liability, for estimated contract cancellations. Cancellations of these services may result from early termination by the customer, or default or prepayment on the finance contract. The reserve for cancellations is evaluated for each product and is based on forecasted forward cancellation curves utilizing historical experience, recent trends and credit mix of the customer base.

Cancellation Reserves

<i>(In millions)</i>	As of February 29 or 28	
	2024	2023
Balance as of beginning of year	\$ 139.2	\$ 144.7
Cancellations	(91.2)	(103.6)
Provision for future cancellations	80.3	98.1
Balance as of end of year	\$ 128.3	\$ 139.2

The current portion of estimated cancellation reserves is recognized as a component of accrued expenses and other current liabilities with the remaining amount recognized in other liabilities. As of February 29, 2024 and February 28, 2023, the current portion of cancellation reserves was \$69.7 million and \$76.1 million, respectively.

10. INCOME TAXES

Income Tax Provision

<i>(In thousands)</i>	Years Ended February 29 or 28		
	2024	2023	2022
Current:			
Federal	\$ 140,480	\$ 128,994	\$ 264,194
State	26,711	29,598	61,855
Total	167,191	158,592	326,049
Deferred:			
Federal	(6,542)	(1,118)	10,560
State	1,742	(5,432)	4,440
Total	(4,800)	(6,550)	15,000
Income tax provision	\$ 162,391	\$ 152,042	\$ 341,049

Effective Income Tax Rate Reconciliation

	Years Ended February 29 or 28		
	2024	2023	2022
Federal statutory income tax rate	21.0 %	21.0 %	21.0 %
State and local income taxes, net of federal benefit	3.9	3.4	3.7
Share-based compensation	0.2	—	(1.8)
Nondeductible and other items	1.7	1.5	0.7
Credits	(1.5)	(2.0)	(0.7)
Effective income tax rate	25.3 %	23.9 %	22.9 %

Temporary Differences Resulting in Deferred Tax Assets and Liabilities

<i>(In thousands)</i>	As of February 29 or 28	
	2024	2023
Deferred tax assets:		
Accrued expenses and other	\$ 93,690	\$ 102,611
Allowance for loan losses	117,618	123,636
Prepaid expenses	2,902	3,484
Net operating loss carryforwards and other tax attributes	29,670	35,184
Operating lease liabilities	139,124	146,006
Share-based compensation	43,689	37,165
Capital loss carry forward	701	847
Total deferred tax assets	427,394	448,933
Less: valuation allowance	(701)	(1,305)
Total deferred tax assets after valuation allowance	426,693	447,628
Deferred tax liabilities:		
Intangibles	43,060	47,072
Property and equipment	101,796	113,015
Operating lease assets	130,181	137,617
Inventory	18,933	14,512
Derivatives	33,933	54,672
Total deferred tax liabilities	327,903	366,888
Net deferred tax asset	\$ 98,790	\$ 80,740

As of the fiscal year ended February 29, 2024, CarMax's net operating loss carryforwards and other tax attributes include a deferred tax asset of \$0.9 million related to U.S. federal net operating loss carryforwards that have no expiration; a deferred tax asset of \$12.6 million related to U.S. federal tax credit carryforwards, which expire between 2024 and 2041; a deferred tax asset of \$3.0 million, related to state net operating loss carryforwards, which generally expire between 2024 and 2038; and a deferred tax asset of \$12.5 million related to state tax credit carryforwards that have no expiration.

Except for amounts for which a valuation allowance has been provided, we believe it is more likely than not that the results of future operations and the reversals of existing deferred taxable temporary differences will generate sufficient taxable income to realize the deferred tax assets. The valuation allowance as of February 29, 2024 relates to capital loss carryforwards that are not more likely than not to be utilized prior to their expiration.

Reconciliation of Unrecognized Tax Benefits

<i>(In thousands)</i>	Years Ended February 29 or 28					
	2024		2023		2022	
Balance at beginning of year	\$	27,092	\$	24,765	\$	28,997
Increases for tax positions of prior years		397		114		432
Decreases for tax positions of prior years		(172)		(19)		(5,056)
Increases based on tax positions related to the current year		3,627		3,813		2,657
Settlements		(386)		(79)		(391)
Lapse of statute		(1,741)		(1,502)		(1,874)
Balance at end of year	\$	28,817	\$	27,092	\$	24,765

As of February 29, 2024, we had \$28.8 million of gross unrecognized tax benefits, \$12.1 million of which, if recognized, would affect our effective tax rate. Within the next 12 months it is reasonably possible that statutes will expire, and the previously unrecognized tax benefit related to the prepayment of services provided by related entities will be recognized. Recognition of this benefit will decrease the gross unrecognized tax benefit by approximately \$14.0 million and would not materially impact our effective tax rate. Additionally, it is reasonably possible that other unrecognized tax benefits will increase or decrease during the next 12 months. As of February 28, 2023, we had \$27.1 million of gross unrecognized tax benefits, \$10.6 million of which, if recognized, would affect our effective tax rate. As of February 28, 2022, we had \$24.8 million of gross unrecognized tax benefits, \$8.5 million of which, if recognized, would affect our effective tax rate.

Our continuing practice is to recognize interest and penalties related to income tax matters in SG&A expenses. Our accrual for interest and penalties was \$5.3 million, \$4.0 million and \$3.4 million as of February 29, 2024, February 28, 2023 and February 28, 2022, respectively.

The Inflation Reduction Act of 2022 included a 15% corporate alternative minimum tax ("CAMT") on adjusted financial statement income ("AFSI") of corporations with average AFSI exceeding \$1 billion over a three-year period. The CAMT is effective for tax periods beginning with fiscal 2024; however, we do not expect to have a CAMT liability.

CarMax is subject to U.S. federal income tax as well as income tax of multiple states and local jurisdictions. With a few insignificant exceptions, we are no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years prior to fiscal 2020.

11. BENEFIT PLANS

(A) Retirement Benefit Plans

We have two frozen noncontributory defined benefit plans: our pension plan (the "pension plan") and our unfunded, nonqualified plan (the "restoration plan"), which restores retirement benefits for certain associates who are affected by Internal Revenue Code limitations on benefits provided under the pension plan. No additional benefits have accrued under these plans since they were frozen; however, we have a continuing obligation to fund the pension plan and will continue to recognize net periodic pension expense for both plans for benefits earned prior to being frozen. We use a fiscal year end measurement date for both the pension plan and the restoration plan.

Benefit Plan Information

<i>(In thousands)</i>	As of February 29 or 28					
	Pension Plan		Restoration Plan		Total	
	2024	2023	2024	2023	2024	2023

Net amount recognized	\$ (5,818)	\$ (19,291)	\$ (8,677)	\$ (9,043)	\$ (14,495)	\$ (28,334)

(In thousands)	Pension Plan			Restoration Plan			Total		
	2024	2023	2022	2024	2023	2022	2024	2023	2022
Total net pension (benefit) expense	\$(3,842)	\$ (3,443)	\$ (2,493)	\$ 452	\$ 429	\$ 425	\$ (3,390)	\$ (3,014)	\$ (2,068)
Total net actuarial gain ⁽¹⁾	\$(9,114)	\$ (33,110)	\$ (21,941)	\$ (175)	\$ (1,726)	\$ (576)	\$ (9,289)	\$ (34,836)	\$ (22,517)

⁽¹⁾ Changes recognized in Accumulated Other Comprehensive Income.

The projected benefit obligation (“PBO”) will change primarily due to interest cost and total net actuarial (gain) loss, and plan assets will change primarily as a result of the actual return on plan assets. Benefit payments, which reduce the PBO and plan assets, were not material in fiscal 2024 or 2023. There were no employer contributions in fiscal 2024 and 2023. The net actuarial gain in a fiscal year is recognized in accumulated other comprehensive income and may later be recognized as a component of future pension expense. In fiscal 2025, we anticipate that \$0.4 million in estimated actuarial losses of the pension plan will be amortized from accumulated other comprehensive income. Estimated actuarial losses to be amortized from accumulated other comprehensive income for the restoration plan are not expected to be significant.

Benefit Obligations. The accumulated benefit obligation (“ABO”) and PBO represent the obligations of the benefit plans for past service as of the measurement date. ABO is the present value of benefits earned to date with benefits computed based on current service and compensation levels. PBO is ABO increased to reflect expected future service and increased compensation levels. As a result of the freeze of plan benefits under our pension and restoration plans, the ABO and PBO balances are equal to one another at all subsequent dates.

Funding Policy. For the pension plan, we contribute amounts sufficient to meet minimum funding requirements as set forth in the employee benefit and tax laws, plus any additional amounts as we may determine to be appropriate. We expect to make \$0.3 million in contributions to the pension plan in fiscal 2025. We expect the pension plan to make benefit payments of approximately \$7.5 million for each of the next three fiscal years, and \$8.8 million for each of the subsequent two fiscal years. For the non-funded restoration plan, we contribute an amount equal to the benefit payments, which we expect to be approximately \$0.6 million for each of the next five fiscal years.

Assumptions Used to Determine Benefit Obligations

	As of February 29 or 28					
	Pension Plan			Restoration Plan		
	2024	2023	2022	2024	2023	2022
Discount rate	5.35 %		5.20 %	5.35 %		5.20 %

Assumptions Used to Determine Net Pension Expense

	As of February 29 or 28					
	Pension Plan			Restoration Plan		
	2024	2023	2022	2024	2023	2022
Discount rate	5.20 %	3.45 %	2.95 %	5.20 %	3.45 %	2.95 %
Expected rate of return on plan assets	7.25 %	7.50 %	7.50 %	— %	— %	— %

Assumptions. Underlying both the calculation of the PBO and the net pension expense are actuarial calculations of each plan’s liability. These calculations use participant-specific information such as salary, age and years of service, as well as certain assumptions, the most significant being the discount rate, rate of return on plan assets and mortality rate. We evaluate these assumptions at least once a year and make changes as necessary.

The discount rate used for retirement benefit plan accounting reflects the yields available on high-quality, fixed income debt instruments. For our plans, we review high quality corporate bond indices in addition to a hypothetical portfolio of corporate bonds with maturities that approximate the expected timing of the anticipated benefit payments.

To determine the expected long-term return on plan assets, we consider the current and anticipated asset allocations, as well as historical and estimated returns on various categories of plan assets. We apply the estimated rate of return to a market-related value of assets, which reduces the underlying variability in the asset values. The use of expected long-term rates of return on pension plan assets could result in recognized asset returns that are greater or less than the actual returns of those pension plan assets in any given year. Over time, however, the expected long-term returns are anticipated to approximate the actual long-term returns, and therefore, result in a pattern of income and expense recognition that more closely matches the pattern of the services provided by the employees. Differences between actual and expected returns, which are a component of unrecognized actuarial gains/losses, are recognized over the average life expectancy of all plan participants.

Fair Value of Plan Assets

<i>(In thousands)</i>	As of February 29 or 28	
	2024	2023
Mutual funds (Level 1):		
Equity securities – international	\$ 13,900	\$ 17,578
Collective funds (NAV):		
Short-term investments	1,676	1,856
Equity securities	67,602	86,010
Fixed income securities	119,204	84,557
Interest receivable	—	6
Total	\$ 202,382	\$ 190,007

Plan Assets. Our pension plan assets are held in trust and a fiduciary committee sets the investment policies and strategies. Long-term strategic investment objectives include achieving reasonable returns while prudently balancing risk and return, and controlling costs. We currently target allocating approximately 40% of plan assets to equity and equity-related instruments and approximately 60% to fixed income securities. In fiscal 2023, we targeted allocating 55% of the plan assets to equity and equity-related instruments and 45% to fixed income securities and, prior to fiscal 2023, we targeted allocating approximately 75% of the plan assets to equity and equity-related instruments and approximately 25% to fixed income securities. Equity securities are currently composed of both collective funds and mutual funds that include highly diversified investments in large-, mid- and small-cap companies located in the United States and internationally. The fixed income securities are currently composed of collective funds that include investments in debt securities, corporate bonds, mortgage-backed securities and other debt obligations primarily in the United States. We do not expect any plan assets to be returned to us during fiscal 2025.

The fair values of the plan's assets are provided by the plan's trustee and the investment managers. Within the fair value hierarchy (see Note 6), the mutual funds are classified as Level 1 as quoted active market prices for identical assets are used to measure fair value. The collective funds are public investment vehicles valued using a net asset value ("NAV") and, therefore, are outside of the fair value hierarchy. The collective funds may be liquidated with minimal restrictions.

(B) Retirement Savings 401(k) Plan

We sponsor a 401(k) plan for all associates meeting certain eligibility criteria. The plan contains a company matching contribution as well as an additional discretionary company-funded contribution to those associates meeting certain age and service requirements. The total cost for company contributions was \$68.1 million in fiscal 2024, \$64.0 million in fiscal 2023 and \$63.8 million in fiscal 2022.

(C) Retirement Restoration Plan

We sponsor a non-qualified retirement plan for certain senior executives who are affected by Internal Revenue Code limitations on benefits provided under the Retirement Savings 401(k) Plan. Under this plan, these associates may continue to defer portions of their compensation for retirement savings. We match the associates' contributions at the same rate provided under the 401(k) plan, and also may provide an annual discretionary company-funded contribution under the same terms of the 401(k) plan. This plan is unfunded with lump sum payments to be made upon the associate's retirement. The total cost for this plan was not significant in fiscal 2024, fiscal 2023 and fiscal 2022.

(D) Executive Deferred Compensation Plan

We sponsor an unfunded nonqualified deferred compensation plan to permit certain eligible associates to defer receipt of a portion of their compensation to a future date. This plan also includes a restorative company contribution designed to compensate the plan participants for any loss of company contributions under the Retirement Savings 401(k) Plan and the

Retirement Restoration Plan due to a reduction in their eligible compensation resulting from deferrals into the Executive Deferred Compensation Plan. The total cost for this plan was not significant in fiscal 2024, fiscal 2023 and fiscal 2022.

12. DEBT

(In thousands)

Debt Description ⁽¹⁾	Maturity Date	As of February 29 or 28	
		2024	2023
Revolving credit facility ⁽²⁾	June 2028	\$ —	\$ —
Term loan ⁽²⁾	June 2024	300,000	300,000
Term loan ⁽²⁾	October 2026	699,633	699,493
3.86% Senior notes	April 2023	—	100,000
4.17% Senior notes	April 2026	200,000	200,000
4.27% Senior notes	April 2028	200,000	200,000

Total debt		18,783,149	18,382,111
Less: current portion		(797,449)	(579,468)
Less: unamortized debt issuance costs		(26,044)	(27,506)
Long-term debt, net		\$ 17,959,656	\$ 17,775,137

⁽¹⁾ Interest is payable monthly, with the exception of our senior notes, which are payable semi-annually.

⁽²⁾ Borrowings accrue interest at variable rates based on SOFR, the federal funds rate, or the prime rate, depending on the type of borrowing.

Revolving Credit Facility. Borrowings under our \$2.00 billion unsecured revolving credit facility (the “credit facility”) are available for working capital and general corporate purposes. We pay a commitment fee on the unused portions of the available funds. Borrowings under the credit facility are either due “on demand” or at maturity depending on the type of borrowing. Borrowings with “on demand” repayment terms are presented as short-term debt while amounts due at maturity are presented as long-term debt. As of February 29, 2024, the unused capacity of \$2.00 billion was fully available to us.

The weighted average interest rate on outstanding short-term and long-term debt was 3.99% in fiscal 2024, 2.87% in fiscal 2023 and 1.97% in fiscal 2022.

Term Loans. Borrowings under our \$300 million and \$700 million term loans are available for working capital and general corporate purposes. The interest rate on our term loans was 6.31% in fiscal 2024, 5.47% in fiscal 2023 and 1.01% in fiscal 2022. The \$300 million term loan matures in June 2024 and was therefore classified as current. The \$700 million term loan was classified as long-term debt as no repayments are scheduled to be made within the next 12 months.

Senior Notes. The 3.86% senior notes matured during the first quarter of fiscal 2024. Borrowings under our unsecured senior notes totaling \$400 million are available for working capital and general corporate purposes. As of February 29, 2024, all notes were classified as long-term as no repayments are scheduled to be made within the next 12 months.

Financing Obligations. Financing obligations relate to stores subject to sale-leaseback transactions that do not qualify for sale accounting. The financing obligations were structured at varying interest rates and generally have initial lease terms ranging from 15 to 20 years with payments made monthly. We have not entered into any new sale-leaseback transactions since fiscal 2009. In the event the agreements are modified or extended beyond their original term, the related obligation is adjusted based on the present value of the revised future payments, with a corresponding change to the assets subject to these transactions. Upon modification, the amortization of the obligation is reset, resulting in more of the payments being applied to interest expense in the initial years following the modification.

Future maturities of financing obligations were as follows:

<i>(In thousands)</i>	As of February 29, 2024	
Fiscal 2025	\$	55,315
Fiscal 2026		60,223
Fiscal 2027		50,872
Fiscal 2028		50,464
Fiscal 2029		52,277
Thereafter		716,725
Total payments		985,876
Less: interest		(469,332)
Present value of financing obligations	\$	516,544

Non-Recourse Notes Payable. The non-recourse notes payable relate to auto loans receivable funded through non-recourse funding vehicles. The timing of principal payments on the non-recourse notes payable is based on the timing of principal collections and defaults on the related auto loans receivable. The current portion of non-recourse notes payable represents principal payments that are due to be distributed in the following period.

Notes payable related to our asset-backed term funding transactions accrue interest predominantly at fixed rates and have scheduled maturities through December 2030, but may mature earlier, depending upon the repayment rate of the underlying auto loans receivable.

Information on our funding vehicles of non-recourse notes payable as of February 29, 2024 are as follows:

<i>(In billions)</i>	Capacity	
Warehouse facilities:		
March 2024 expiration	\$	2.80
August 2024 expiration		2.30
December 2024 expiration		0.70
Combined warehouse facility limit	\$	5.80
Unused capacity	\$	2.06
Non-recourse notes payable outstanding:		
Warehouse facilities	\$	3.74
Asset-backed term funding transactions		13.13
Non-recourse notes payable	\$	16.87

We generally enter into warehouse facility agreements for one-year terms and typically renew the agreements annually. In March 2024, we extended the \$2.8 billion facility with an expiration date of March 2025 and increased the capacity by \$300 million to \$3.1 billion. The return requirements of warehouse facility investors could fluctuate significantly depending on market conditions. At renewal, the cost, structure and capacity of the facilities could change. These changes could have a significant impact on our funding costs.

See Notes 1(F) and 4 for additional information on the related auto loans receivable.

Capitalized Interest. We capitalize interest in connection with the construction of certain facilities. For fiscal 2024, fiscal 2023 and fiscal 2022, we capitalized interest of \$6.2 million, \$5.6 million, and \$5.9 million, respectively.

Financial Covenants. The credit facility, term loans and senior note agreements contain representations and warranties, conditions and covenants. We must also meet financial covenants in conjunction with certain financing obligations. The agreements governing our non-recourse funding vehicles contain representations and warranties, as well as financial covenants

and performance triggers related to events of default. As of February 29, 2024, we were in compliance with these financial covenants and our non-recourse funding vehicles were in compliance with these performance triggers.

13. STOCK AND STOCK-BASED INCENTIVE PLANS

(A) Preferred Stock

Under the terms of our Articles of Incorporation, the board of directors (“board”) may determine the rights, preferences and terms of our authorized but unissued shares of preferred stock. We have authorized 20,000,000 shares of preferred stock, \$20 par value. No shares of preferred stock are currently outstanding.

(B) Share Repurchase Program

During the third quarter of fiscal 2024, we resumed our share repurchase program after having paused it during the third quarter of the prior fiscal year. As of February 29, 2024, a total of \$4 billion of board authorizations for repurchases of our common stock was outstanding, with no expiration date, of which \$2.36 billion remained available for repurchase.

Common Stock Repurchases

	Years Ended February 29 or 28		
	2024	2023	2022
Number of shares repurchased <i>(in thousands)</i>	1,334.1	3,403.9	4,475.2
Average cost per share	\$ 68.33	\$ 94.95	\$ 125.49
Available for repurchase, as of end of year <i>(in millions)</i>	\$ 2,360.1	\$ 2,451.3	\$ 774.5

(C) Stock Incentive Plans

We maintain long-term incentive plans for management, certain employees and the nonemployee members of our board. The plans allow for the granting of equity-based compensation awards, including nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock awards, stock- and cash-settled restricted stock units, stock grants or a combination of awards. To date, we have not awarded any incentive stock options.

As of February 29, 2024, a total of 62,850,000 shares of our common stock had been authorized to be issued under the long-term incentive plans. The number of unissued common shares reserved for future grants under the long-term incentive plans was 6,398,083 as of that date.

The majority of associates who receive share-based compensation awards primarily receive cash-settled restricted stock units. Senior management and other key associates receive awards of nonqualified stock options, stock-settled restricted stock units and/or restricted stock awards. Nonemployee directors are eligible to receive awards of nonqualified stock options, stock grants, stock-settled restricted stock units and/or restricted stock awards. Excluding stock grants and stock-settled deferred stock units, all share-based compensation awards, including any associated dividend rights, are subject to forfeiture.

Nonqualified Stock Options. Nonqualified stock options are awards that allow the recipient to purchase shares of our common stock at a fixed price. Stock options are granted at an exercise price equal to the fair market value of our common stock on the grant date. The stock options generally vest annually in equal amounts over four years. These options expire seven years after the date of the grant.

Cash-Settled Restricted Stock Units. Also referred to as restricted stock units, or RSUs, these are awards that entitle the holder to a cash payment equal to the fair market value of a share of our common stock for each unit granted. For grants prior to fiscal 2021, conversion generally occurs at the end of a three-year vesting period. Conversion generally occurs annually in equal amounts over three years. However, the cash payment per RSU will not be greater than 200% or less than 75% of the fair market value of a share of our common stock on the grant date. The initial grant date fair values are based on the closing prices of our common stock on the grant dates. RSUs are liability-classified awards and do not have voting rights.

Stock-Settled Market Stock Units. Also referred to as market stock units, or MSUs, these are restricted stock unit awards with market conditions granted to eligible key associates that are converted into between zero and two shares of common stock for each unit granted. Conversion generally occurs at the end of a three-year vesting period. The conversion ratio is calculated by dividing the average closing price of our stock during the final 40 trading days of the three-year vesting period by our stock price on the grant date, with the resulting quotient capped at two. This quotient is then multiplied by the number of MSUs granted to yield the number of shares awarded. The grant date fair values are determined using a Monte-Carlo simulation and

are based on the expected market price of our common stock on the vesting date and the expected number of converted common shares. MSUs do not have voting rights.

Other Share-Based Incentives

Stock-Settled Performance Stock Units. Also referred to as performance stock units, or PSUs, these are restricted stock unit awards with performance conditions granted to eligible key associates that are converted into between zero and two shares of common stock for each unit granted. Conversion generally occurs at the end of a three-year vesting period. Beginning with the fiscal 2022 grants, the conversion ratio is based on the company reaching certain performance target levels set by the board at the beginning of each one-year period, with the resulting quotients subject to meeting a minimum 25% threshold and capped at 200%. These quotients are then multiplied by the number of PSUs granted to yield the number of shares awarded.

For the first year of the fiscal 2022 awards, these targets were based on annual pretax diluted earnings per share excluding any unrealized gains or losses on equity investments in private companies; the board certified a performance adjustment factor of 200%. For the second and third-year periods of the fiscal 2022 awards, the first and second-year periods of the fiscal 2023 awards and the first-year period of the fiscal 2024 awards, the performance targets are based on annual pretax diluted earnings per share, excluding any unrealized gains or losses on equity investments in private companies, and market share. For the second-year period of the fiscal 2022 awards and the first-year period of the fiscal 2023 awards, the board certified a performance adjustment factor of 4%. For the third-year period of the fiscal 2023 awards and the second- and third-year periods of the fiscal 2024 awards, the remaining awarded 65,077 PSUs do not qualify as grants under ASC 718 as mutual understanding of the target performance levels are either not fully set or have not been set.

PSUs do not have voting rights. The grant date fair values are based on the closing prices of our common stock on the grant dates. As of February 29, 2024, 97,584 units were outstanding at a weighted average grant date fair value per share of \$87.61.

Stock-Settled Deferred Stock Units. Also referred to as deferred stock units, or DSUs, these are restricted stock unit awards granted to non-employee members of our board of directors that are converted into one share of common stock for each unit granted. Conversion occurs at the end of the one-year vesting period unless the director has exercised the option to defer conversion until separation of service to the company. The grant date fair values are based on the closing prices of our common stock on the grant dates. DSUs have no voting rights. As of February 29, 2024, 97,001 units were outstanding at a weighted average grant date fair value of \$89.80.

Restricted Stock Awards. Restricted stock awards, or RSAs, are awards of our common stock that are subject to specified restrictions that generally lapse after a one- to three-year period from the date of the grant. The grant date fair values are based on the closing prices of our common stock on the grant dates. Participants holding restricted stock are entitled to vote on matters submitted to holders of our common stock for a vote. As of February 29, 2024, there were no shares outstanding.

Employee Stock Purchase Plan. We sponsor an employee stock purchase plan for all associates meeting certain eligibility criteria. We have authorized up to 8,000,000 shares of common stock with a total of 1,749,564 shares remaining available for issuance under the plan as of February 29, 2024. Associate contributions are limited to 10% of eligible compensation, up to a maximum of \$10,000 per year. For each \$1.00 contributed to the plan by associates, we match \$0.15. Shares are acquired through open-market purchases. We purchased 264,628 shares at an average price per share of \$73.74 during fiscal 2024, 251,651 shares at an average price per share of \$81.40 during fiscal 2023 and 160,093 shares at an average price per share of \$125.22 during fiscal 2022.

(D) Share-Based Compensation

Composition of Share-Based Compensation Expense

<i>(In thousands)</i>	Years Ended February 29 or 28					
	2024		2023		2022

Unrecognized Share-Based Compensation Expense – By Grant Type

<i>(Costs in millions)</i>	As of February 29, 2024	
	Unrecognized Compensation Costs	Weighted Average Remaining Recognition Life (Years)
Nonqualified stock options	\$ 42.1	1.6
Stock-settled market stock units	15.6	1.5
Stock-settled performance stock units	0.5	1.0
Total	\$ 58.2	1.5

We recognize compensation expense for stock options, MSUs, PSUs, DSUs and RSAs on a straight-line basis (net of estimated forfeitures) over the requisite service period, which is generally the vesting period of the award. The PSU expense is adjusted for any change in management's assessment of the performance target level that is probable of being achieved. The variable expense associated with RSUs is recognized over their vesting period (net of estimated forfeitures) and is calculated based on the closing price of our common stock on the last trading day of each reporting period.

The total costs for matching contributions for our employee stock purchase plan are included in share-based compensation expense. There were no capitalized share-based compensation costs as of or for the years ended February 29, 2024, February 28, 2023 or February 28, 2022.

Stock Option Activity

<i>(Shares and intrinsic value in thousands)</i>	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding as of February 28, 2023	6,776	\$ 82.28		
Options granted	1,554	70.55		
Options exercised	(752)	59.56		
Options forfeited or expired	(185)	85.95		
Outstanding as of February 29, 2024	7,393	\$ 82.03	3.7	\$ 42,459
Exercisable as of February 29, 2024	4,323	\$ 79.97	2.6	\$ 27,379

Stock Option Information

	Years Ended February 29 or 28					
	2024		2023		2022	
Options granted		1,554,029		1,301,862		922,475
Weighted average grant date fair value per share	\$	29.11	\$	33.24	\$	42.31
Cash received from options exercised (<i>in millions</i>)	\$	44.8	\$	17.1	\$	79.8
Intrinsic value of options exercised (<i>in millions</i>)	\$	15.0	\$	7.3	\$	95.2
Realized tax benefits (<i>in millions</i>)	\$	3.6	\$	1.8	\$	20.6

For stock options, the fair value of each award is estimated as of the date of grant using a binomial valuation model. In computing the value of the option, the binomial model considers characteristics of fair-value option pricing that are not available for consideration under a closed-form valuation model (for example, the Black-Scholes model), such as the contractual term of the option, the probability that the option will be exercised prior to the end of its contractual life and the probability of termination or retirement of the option holder. For this reason, we believe that the binomial model provides a fair value that is more representative of actual experience and future expected experience than the value calculated using a closed-form model. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by the recipients of share-based awards.

Assumptions Used to Estimate Option Values

	Years Ended February 29 or 28					
	2024		2023		2022	
Dividend yield		0.0 %		0.0 %		0.0 %
Expected volatility factor ⁽¹⁾	39.2 % -	45.9 %	38.7 % -	53.6 %	31.8 % -	37.6 %

Reclassification of hedge (gains) losses, net of tax	(39,121)	(20,312)	12,397
Net change in cash flow hedge unrecognized gains, net of tax	(46,064)	115,880	52,608
Total other comprehensive (loss) income, net of tax	\$ (38,590)	\$ 144,291	\$ 72,269

Changes in the funded status of our retirement plans and changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognized in accumulated other comprehensive income (loss). The cumulative balances are net of deferred taxes of \$19.3 million as of February 29, 2024 and \$32.6 million as of February 28, 2023.

16. LEASE COMMITMENTS

Our leases primarily consist of operating and finance leases related to retail stores, office space, land and equipment. We also have stores subject to sale-leaseback transactions that do not qualify for sale accounting and are accounted for as financing obligations. For more information on these financing obligations see Note 12.

The initial term for real property leases is typically 5 to 20 years. For equipment leases, the initial term generally ranges from 3 to 8 years. Most leases include one or more options to renew, with renewal terms that can extend the lease term from 1 to 20 years or more. We include options to renew (or terminate) in our lease term, and as part of our right-of-use ("ROU") assets and lease liabilities, when it is reasonably certain that we will exercise that option.

ROU assets and the related lease liabilities are initially measured at the present value of future lease payments over the lease term. As most of our leases do not provide an implicit rate, we use our collateralized incremental borrowing rate based on the information available at the commencement date in determining the present value of future payments. We include variable lease payments in the initial measurement of ROU assets and lease liabilities only to the extent they depend on an index or rate. Changes in such indices or rates are accounted for in the period the change occurs, and do not result in the remeasurement of the ROU asset or liability. We are also responsible for payment of certain real estate taxes, insurance and other expenses on our leases. These amounts are generally considered to be variable and are not included in the measurement of the ROU asset and lease liability. We generally account for non-lease components, such as maintenance, separately from lease components. For certain equipment leases, we apply a portfolio approach to account for the lease assets and liabilities.

Our lease agreements do not contain any material residual value guarantees or material restrictive covenants. Leases with a term of 12 months or less are not recorded on the balance sheet; we recognize lease expense for these leases on a straight-line basis over the lease term.

The components of lease expense were as follows:

<i>(In thousands)</i>	Years Ended February 29 or 28					
	2024		2023		2022	
Operating lease cost ⁽¹⁾	\$	89,801	\$	90,925	\$	75,629
Finance lease cost:						
Depreciation of lease assets		20,010		16,039		13,230
Interest on lease liabilities		25,724		21,969		17,015
Total finance lease cost		45,734		38,008		30,245
Total lease cost	\$	135,535	\$	128,933	\$	105,874

⁽¹⁾ Includes short-term leases and variable lease costs, which are immaterial.

Supplemental balance sheet information related to leases was as follows:

<i>(In thousands)</i>	Classification	As of February 29 or 28			
		2024		2023	
Assets:					
Operating lease assets	Operating lease assets	\$	520,717	\$	545,677
Finance lease assets	Property and equipment, net ⁽¹⁾		174,998		145,372
Total lease assets		\$	695,715	\$	691,049
Liabilities:					
Current:					
Operating leases	Current portion of operating lease liabilities	\$	57,161	\$	53,287
Finance leases	Accrued expenses and other current liabilities		20,877		18,788
Long-term:					
Operating leases	Operating lease liabilities, excluding current portion		496,210		523,828
Finance leases	Other liabilities		198,759		165,135
Total lease liabilities		\$	773,007	\$	761,038

⁽¹⁾ Finance lease assets are recorded net of accumulated depreciation of \$55.5 million as of February 29, 2024 and \$46.7 million as of February 28, 2023.

Lease term and discount rate information related to leases was as follows:

Lease Term and Discount Rate	As of February 29 or 28		
	2024	2023	
Weighted Average Remaining Lease Term <i>(in years)</i>			
Operating leases		16.07	16.35
Finance leases		11.43	10.84
Weighted Average Discount Rate			
Operating leases		5.05 %	4.91 %
Finance leases		17.16 %	19.34 %

Supplemental cash flow information related to leases was as follows:

<i>(In thousands)</i>	Years Ended February 29 or 28		
	2024	2023	2022
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash flows from operating leases	\$ 88,704	\$ 89,321	\$ 72,371
Operating cash flows from finance leases	\$ 24,782	\$ 19,371	\$ 11,194
Financing cash flows from finance leases	\$ 16,674	\$ 12,200	\$ 11,923
Lease assets obtained in exchange for lease obligations:			
Operating leases	\$ 30,746	\$ 58,121	\$ 50,911
Finance leases	\$ 51,660	\$ 37,931	\$ 32,052

Maturities of lease liabilities were as follows:

<i>(In thousands)</i>	As of February 29, 2024	
	Operating Leases ⁽¹⁾	Finance Leases ⁽¹⁾
Fiscal 2025	\$ 83,110	\$ 45,669
Fiscal 2026	77,748	47,724
Fiscal 2027	71,393	43,914
Fiscal 2028	67,246	37,051
Fiscal 2029	45,400	29,808
Thereafter	517,307	229,689
Total lease payments	862,204	433,855
Less: interest	(308,833)	(214,219)
Present value of lease liabilities	\$ 553,371	\$ 219,636

⁽¹⁾ Lease payments exclude \$5.1 million of legally binding minimum lease payments for leases signed but not yet commenced.

17. SUPPLEMENTAL CASH FLOW INFORMATION

Supplemental disclosures of cash flow information:

<i>(In thousands)</i>	Years Ended February 29 or 28		
	2024	2023	2022
Cash paid for interest	\$ 123,545	\$ 122,147	\$ 91,686
Cash paid for income taxes	\$ 164,612	\$ 152,626	\$ 373,234
Non-cash investing and financing activities:			
(Decrease) increase in accrued capital expenditures	\$ (17,535)	\$ 7,557	\$ 14,837
Increase in financing obligations	\$ 4,527	\$ 7,863	\$ —

See Note 16 for supplemental cash flow information related to leases.

18. COMMITMENTS AND CONTINGENCIES

(A) Litigation

CarMax entities are defendants in a proceeding asserting wage and hour claims with respect to non-exempt CarMax employees in California. The asserted claims include failure to provide meal periods and rest breaks; pay statutory or contractual wages; reimburse for work-related expenses; and Private Attorneys General Act (“PAGA”) claims. On July 9, 2021, Daniel Bendure v. CarMax Auto Superstores California, LLC et al., a putative class action, was filed in the Superior Court of California, County of San Bernardino. The Bendure lawsuit seeks civil penalties for violation of the Labor Code, attorneys’ fees, costs, restitution of unpaid wages, interest, injunctive and equitable relief, general damages, and special damages. Bendure subsequently decided not to proceed with an individual or putative class claim, but rather filed and served a PAGA-only complaint in the Superior Court of California for the County of San Bernardino on December 7, 2021, based on the same allegations pled in the original complaint.

The California Supreme Court held in *Adolph v. Uber* that an employee who signs an arbitration agreement, as Bendure has, may still pursue a representative PAGA action in court if the employee is successful in his individual PAGA action in arbitration. In light of this decision, Bendure filed a demand on October 16, 2023 for an individual arbitration. This arbitration is scheduled for July 23, 2024.

We are unable to make a reasonable estimate of the amount or range of loss that could result from an unfavorable outcome in this matter.

The company is a class member in a consolidated and settled class action lawsuit (In re: Takata Airbag Product Liability Litigation (U.S. District Court, Southern District of Florida)) against Toyota, Mazda, Subaru, BMW, Honda, Nissan, Ford and Volkswagen related to the economic loss associated with defective Takata airbags installed as original equipment in certain model vehicles from model years 2000-2019. In April 2020, CarMax received \$40.3 million in net recoveries from the Toyota, Mazda, Subaru, BMW, Honda and Nissan settlement funds. In January 2022, CarMax received \$3.8 million in net recoveries from the Ford settlement funds. On April 21, 2023, CarMax received \$59.3 million in net recoveries from residual undisbursed funds in the Toyota, Mazda, Subaru, BMW, Honda and Nissan settlements. On August 9, 2023, CarMax received \$7.9 million in additional residual funds in the BMW, Mazda, and Nissan settlements. CarMax remains a class member for residual funds in the Ford settlement. The Volkswagen settlement has not yet been resolved. We are unable to make a reasonable estimate of the amount or range of gain that could result from CarMax's participation in the Ford residual or Volkswagen matters.

We are involved in various other legal proceedings in the normal course of business. Based upon our evaluation of information currently available, we believe that the ultimate resolution of any such proceedings will not have a material adverse effect, either individually or in the aggregate, on our financial condition, results of operations or cash flows.

(B) Other Matters

In accordance with the terms of real estate lease agreements, we generally agree to indemnify the lessor from certain liabilities arising as a result of the use of the leased premises, including environmental liabilities and repairs to leased property upon termination of the lease. Additionally, in accordance with the terms of agreements entered into for the sale of properties, we generally agree to indemnify the buyer from certain liabilities and costs arising subsequent to the date of the sale, including environmental liabilities and liabilities resulting from the breach of representations or warranties made in accordance with the agreements. We do not have any known material environmental commitments, contingencies or other indemnification issues arising from these arrangements.

As part of our customer service strategy, we guarantee the used vehicles we retail with a 90-day/4,000 mile limited warranty. A vehicle in need of repair within this period will be repaired free of charge. As a result, each vehicle sold has an implied liability associated with it. Accordingly, based on historical trends, we record a provision for estimated future repairs during the guarantee period for each vehicle sold. The liability for this guarantee was \$30.9 million as of February 29, 2024 and \$27.1 million as of February 28, 2023, and is included in accrued expenses and other current liabilities.

At various times we may have certain purchase obligations that are enforceable and legally binding primarily related to real estate purchases, advertising and third-party outsourcing services. As of February 29, 2024, we have material purchase obligations of \$428.2 million, of which \$213.3 million are expected to be fulfilled in fiscal 2025.

19. SEGMENT INFORMATION

We operate in two reportable segments: CarMax Sales Operations and CAF. Our CarMax Sales Operations segment consists of all aspects of our auto merchandising and service operations, excluding financing provided by CAF. Our CAF segment consists solely of our own finance operation that provides financing to customers buying retail vehicles from CarMax.

We also have a non-reportable operating segment related to our Edmunds business, which is reflected as "Other" in the segment tables below. Revenue generated by Edmunds primarily represents advertising and subscription revenues as discussed in Note 2. Edmunds also generates intersegment revenue as a result of transactions between Edmunds and CarMax Sales Operations, which represent arm's length transactions at prevailing market prices. Such amounts are eliminated in consolidation.

The performance of our CarMax Sales Operations segment is reviewed by our chief operating decision maker at the gross profit level, the components of which are presented in the tables below. Required segment information related to our CAF segment is presented in Note 3. Additionally, asset information by segment is not utilized for purposes of assessing performance or allocating resources and, as a result, such information has not been presented.

Segment Information

(In thousands)	Year Ended February 29, 2024				Total
	CarMax Sales Operations	Other	Eliminations		
Sales and operating revenues	\$ 26,400,256	\$ 135,784	\$ —	\$ —	26,536,040
Intersegment sales and operating revenues	—	34,779	(34,779)	—	—
Total sales and operating revenues	\$ 26,400,256	\$ 170,563	\$ (34,779)	\$ —	26,536,040

Gross profit	\$ 2,615,286	\$ 102,544	\$ (4,621)	\$ —	2,713,209
Reconciliation to Consolidated Earnings Before Taxes:					
CAF Income					568,271
Selling, general and administrative expenses					(2,286,378)
Depreciation and amortization ⁽²⁾					(239,028)
Interest expense					(124,750)
Other income (expense)					10,271
Earnings before income taxes				\$	641,595

(In thousands)	Year Ended February 28, 2023				Total
	CarMax Sales Operations	Other	Eliminations		
Sales and operating revenues	\$ 29,551,617	\$ 133,256	\$ —	\$ —	29,684,873
Intersegment sales and operating revenues	—	28,038	(28,038)	—	—
Total sales and operating revenues	\$ 29,551,617	\$ 161,294	\$ (28,038)	\$ —	29,684,873
Depreciation and amortization ⁽¹⁾	\$ 1,499	\$ 14,263	\$ —	\$ —	15,762
Gross profit	\$ 2,704,398	\$ 101,138	\$ (5,333)	\$ —	2,800,203
Reconciliation to Consolidated Earnings Before Taxes:					
CAF Income					663,404
Selling, general and administrative expenses					(2,487,357)
Depreciation and amortization ⁽²⁾					(228,449)
Interest expense					(120,398)
Other income (expense)					9,401
Earnings before income taxes				\$	636,804

⁽¹⁾ Represents only the portion of depreciation and amortization recorded within Cost of sales, and thus included in the calculation of Gross profit.

⁽²⁾ Exclusive of depreciation and amortization recorded within Cost of sales.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (“Exchange Act”)) that are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Our disclosure controls and procedures are also designed to ensure that this information is accumulated and communicated to management, including the chief executive officer (“CEO”) and the chief financial officer (“CFO”), as appropriate to allow timely decisions regarding required disclosure.

As of February 29, 2024, we evaluated the effectiveness of the design and operation of our disclosure controls. This evaluation was performed under the supervision and with the participation of management, including the CEO and CFO. Based upon that evaluation, the CEO and CFO concluded that our disclosure controls were effective as of the end of the period.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the quarter ended February 29, 2024 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management’s Report on Internal Control over Financial Reporting

“Management’s Annual Report on Internal Control over Financial Reporting” is included in Item 8. Consolidated Financial Statements and Supplementary Data, of this Form 10-K and is incorporated herein by reference.

Item 9B. Other Information.

None.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.

Not applicable.

PART III

With the exception of the information incorporated by reference from our 2024 Proxy Statement in Items 10, 11, 12, 13 and 14 of Part III of this Annual Report on Form 10-K, our 2024 Proxy Statement is not to be deemed filed as a part of this Form 10-K.

Item 10. Directors, Executive Officers and Corporate Governance.

The information concerning our executive officers required by this Item is incorporated by reference to the section titled “Executive Officers of the Company” included in Part I of this Annual Report on Form 10-K.

The information concerning our directors required by this Item is incorporated by reference to the section titled “Proposal One: Election of Directors” in our 2024 Proxy Statement.

The information concerning the audit committee of our board of directors and the audit committee financial expert required by this Item is incorporated by reference to the information included in the sub-section titled “Corporate Governance – Board Committees” in our 2024 Proxy Statement.

The information concerning our code of ethics (“Code of Business Conduct”) for senior management required by this Item is incorporated by reference to the sub-section titled “Corporate Governance – Overview” in our 2024 Proxy Statement.

Item 11. Executive Compensation.

The information required by this Item is incorporated by reference to the sections titled “Compensation Discussion and Analysis,” “Compensation and Personnel Committee Report” and “Compensation Tables” in our 2024 Proxy Statement (provided that the Pay Versus Performance disclosure shall not be deemed to be incorporated by reference herein). Additional information required by this Item is incorporated by reference to the section titled “Director Compensation” in our 2024 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information required by this Item concerning equity compensation plans is incorporated by reference to the section titled “CarMax Share Ownership” in our 2024 Proxy Statement.

The information required by this Item concerning security ownership of certain beneficial owners and management is incorporated by reference to the section titled “CarMax Share Ownership” in our 2024 Proxy Statement.

Item 13. Certain Relationships and Related Transactions and Director Independence.

The information required by this Item is incorporated by reference to the sub-section titled “Corporate Governance – Related Person Transactions” in our 2024 Proxy Statement.

The information required by this Item concerning director independence is incorporated by reference to the sub-section titled “Corporate Governance – Independence” in our 2024 Proxy Statement.

Item 14. Principal Accountant Fees and Services.

The information required by this Item is incorporated by reference to the section titled “Auditor Fees and Pre-Approval Policy” in our 2024 Proxy Statement.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

The following documents are filed as part of this report:

- 1. Financial Statements.** All financial statements as set forth under Item 8 of this Form 10-K.
- 2. Financial Statement Schedules.** Schedules have been omitted because they are not applicable, are not required or the information required to be set forth therein is included in the Consolidated Financial Statements and Notes thereto.
- 3. Exhibits:**
 - [3.1](#) CarMax, Inc. Amended and Restated Articles of Incorporation, effective June 24, 2013, filed as Exhibit 3.1 to CarMax's Current Report on Form 8-K, filed June 28, 2013 (File No. 1-31420), is incorporated by this reference.
 - [3.2](#) CarMax, Inc. Bylaws, as Amended and Restated October 24, 2023, filed as Exhibit 3.1 to CarMax's Current Report on Form 8-K, filed October 26, 2023 (File No. 1-31420), is incorporated by this reference.
 - [4.1](#) Description of Securities Registered Pursuant to Section 12 of the Securities Exchange Act of 1934, filed as Exhibit 4.1 to CarMax's Annual Report on Form 10-K, filed April 21, 2020 (File No. 1-31420), is incorporated by this reference.
 - [10.1](#) Amended and Restated Credit Agreement, dated as of June 21, 2023, among CarMax Auto Superstores, Inc., CarMax, Inc., certain subsidiaries of CarMax named therein, Bank of America, N.A., as a lender and as administrative agent, and the other lending institutions named therein, filed as Exhibit 10.1 to CarMax's Quarterly Report on Form 10-Q, filed June 26, 2023 (File No. 1-31420), is incorporated by this reference.
 - [10.2](#) CarMax, Inc. Benefit Restoration Plan, as amended and restated, effective June 30, 2011, filed as Exhibit 10.1 to CarMax's Current Report on Form 8-K, filed June 30, 2011 (File No. 1-31420), is incorporated by this reference. *
 - [10.3](#) CarMax, Inc. Executive Deferred Compensation Plan, as amended and restated, effective June 30, 2011, filed as Exhibit 10.3 to CarMax's Current Report on Form 8-K, filed June 30, 2011 (File No. 1-31420), is incorporated by this reference. *
 - [10.4](#) CarMax, Inc. Retirement Restoration Plan, as amended and restated, effective January 1, 2017, filed as Exhibit 10.6 to CarMax's Quarterly Report on Form 10-Q, filed July 7, 2016 (File No. 1-31420), is incorporated by this reference. *
 - [10.5](#) CarMax, Inc. Annual Performance-Based Bonus Plan, dated April 24, 2018, filed as Exhibit 10.46 to CarMax's Annual Report on Form 10-K, filed April 24, 2018 (File No. 1-31420), is incorporated by this reference. *
 - [10.6](#) CarMax, Inc. 2002 Stock Incentive Plan, as amended and restated June 25, 2019, filed as Exhibit 10.1 to CarMax's Current Report on Form 8-K, filed June 26, 2019 (File No. 1-31420), is incorporated by this reference. *
 - [10.7](#) CarMax, Inc. 2002 Stock Incentive Plan, as amended and restated June 23, 2020, filed as Exhibit 10.1 to CarMax's Current Report on Form 8-K, filed June 25, 2020 (File No. 1-31420), is incorporated by this reference. *
 - [10.8](#) CarMax, Inc. 2002 Stock Incentive Plan, as amended and restated June 27, 2023, filed as Exhibit 10.1 to CarMax's Current Report on Form 8-K, filed on June 28, 2023 (File No. 1-31420), is incorporated by this reference. *

CARMAX, INC.
NOTICE OF MARKET STOCK UNIT GRANT

[Date]

Dear _____:

The Board of Directors of CarMax, Inc. (the "Company") wants to provide you with an opportunity to share in the success of our Company. Accordingly, I am pleased to inform you that, as of _____ (the "Grant Date"), the Compensation and Personnel Committee of the Board of Directors of the Company (the "Committee") exercised its authority pursuant to the CarMax, Inc. 2002 Stock Incentive Plan, as amended and restated (the "Plan") and granted you Market Stock Units of the Company (the "Market Stock Units") as set forth herein.

The Market Stock Units are a form of Restricted Stock Units under the Plan and are subject to the provisions of the Plan. The Committee administers the Plan. The terms of the Plan are incorporated into this Notice of Market Stock Unit Grant (the "Notice of Grant") and in the case of any conflict between the Plan and this Notice of Grant, the terms of the Plan shall control. All capitalized terms not defined herein shall have the meaning given to them in the Plan. Please refer to the Plan for certain conditions not set forth in this Notice of Grant. Additionally, a copy of a Prospectus for the Plan, which describes material terms of the Plan, can be found on The CarMax Way. Copies of the Prospectus, the Plan and the Company's most recently filed annual report to shareholders on Form 10-K are available from the Company's corporate secretary at (804) 747-0422.

Number of Market Stock Units: _____
Grant Date Fair Market Value: _____

A. Vesting of Market Stock Units

Except as otherwise provided in this Notice of Grant, all the Market Stock Units will vest and become nonforfeitable on _____ (the "Specified Date") or such earlier date as may be provided in this Notice of Grant or the Plan (collectively, the "Vesting Date") provided you continue to be employed by the Company or one of its Subsidiaries from the Grant Date until the Vesting Date. No Market Stock Units may vest after the Specified Date and all unvested Market Stock Units remaining after the Specified Date will terminate and be completely forfeited. If prior to any Vesting Date, your employment with the Company and its Subsidiaries terminates for any reason other than those described in Sections B.1, B.2 or B.3, then any unvested Market Stock Units (and any related dividend equivalent rights) subject to this Notice of Grant shall terminate and be completely forfeited on the date of such termination of your employment. To the extent that you do not vest in any Market Stock Units, all interest in such units, the related shares of Company Stock, and any related dividend equivalent rights shall be forfeited. You shall have no right or interest in any Market Stock Unit or related share of Company Stock that is forfeited. Prior to payment, the Market Stock Units are not transferable by you by means of sale, assignment, exchange, pledge or otherwise.

B. Additional Vesting and Forfeiture Provisions

1. Termination Without Cause or for Good Reason. If (a) the Company terminates your employment with the Company and its Subsidiaries for any reason other than Cause (as defined in Section B.4), or (b) you have an effective severance or employment agreement with the Company or one of its

Subsidiaries and you terminate your employment for "Good Reason"(as defined in such agreement), if applicable, then:

(x) if your employment terminates on or after the Grant Date but prior to the first anniversary of the Grant Date, all of your Market Stock Units will be immediately forfeited, effective as of the date of your termination;

(y) if your employment terminates on or after the first anniversary of the Grant Date but prior to the second anniversary of the Grant Date, one-third of your Market Stock Units will become immediately vested and nonforfeitable and your remaining Market Stock Units will be immediately forfeited, effective as of the date of your termination; and

(z) if your employment terminates on or after the second anniversary of the Grant Date but prior to the Vesting Date, then two-thirds of your Market Stock Units will become immediately vested and nonforfeitable and your remaining Market Stock Units will be immediately forfeited, effective as of the date of your termination.

2. Death or Disability. If your employment by the Company and its Subsidiaries terminates because you die or become Disabled, all Market Stock Units will become immediately vested and nonforfeitable, effective as of the date of the termination of your employment.
3. Retirement. If (a) your employment with the Company and its Subsidiaries terminates, (b) such termination is not for Cause, not due to your death or Disability and not otherwise covered by Section B.1, and (c) as of the date of the termination you have: (i) attained 55 years of age and completed ten years or more of continuous employment with the Company or its Subsidiaries; (ii) attained 62 years of age and completed seven years or more of continuous employment with the Company or its Subsidiaries; or (iii) attained 65 years of age and completed five years or more of continuous employment with the Company or its Subsidiaries; then all Market Stock Units will become immediately vested and nonforfeitable, effective as of the date of the termination of your employment.
4. Termination For Cause. Upon termination of your employment with the Company or one of its Subsidiaries for Cause, and notwithstanding anything in Section B to the contrary, your Market Stock Units will immediately and automatically without any action on the part of you or the Company, be forfeited, effective as of the date of your termination. For purposes of this Notice of Grant, "Cause" shall mean the following: (a) if you have an effective severance or employment agreement with the Company or one of its Subsidiaries with a definition of "Cause," then "Cause" shall have the meaning set forth in your employment or severance agreement; or (b) if you do not have an effective severance or employment agreement with the Company or one of its Subsidiaries with a definition of "Cause," then "Cause" shall mean that the Company or one of its Subsidiaries has any reason to believe any of the following: (i) you have committed fraud, misappropriation of funds or property, embezzlement or other similar acts of dishonesty; (ii) you have been convicted of a felony or other crime involving moral turpitude (or pled nolo contendere thereto); (iii) you have used, possessed or distributed any illegal drug; (iv) you have committed any misconduct that may subject the Company or one of its Subsidiaries to criminal or civil liability; (v) you have breached your duty of loyalty to the Company or one of its Subsidiaries, including, without limitation, the misappropriation of any of the Company's or its Subsidiaries' corporate opportunities; (vi) you have committed a serious violation or violations of any Company policy or procedure; (vii) you refuse to follow the lawful instructions of any Company management; (viii) you have committed any material misrepresentation in the employment application process; (ix) you have committed deliberate actions, including neglect or failure to perform the job, which are contrary to the best interest of the Company or one of its Subsidiaries; or (x) you have continually failed to perform substantially your duties with the Company or one of its Subsidiaries.
5. Change in Full-Time Employment Status. In the event that your employment with the Company or one of its Subsidiaries changes from full-time to part-time for any reason, and notwithstanding the

terms of Section B.3, your Market Stock Units will be immediately forfeited, effective as of the date of the change. Employees on authorized leave (as determined under the Company's or its Subsidiary's authorized leave policy) will not be considered as having terminated merely by reason of the leave.

C. Payment for Market Stock Units

1. Payment Schedule. Payment for your Market Stock Units shall be made in shares of Company Stock upon the earlier to occur of the two payment dates set forth below (the earlier date shall be the "Payment Date").
 - a) Specified Date. One hundred percent (100%) of the unpaid Market Stock Units (and related dividend equivalent rights), if vested, shall be paid upon the Specified Date.
 - b) Separation from Service. One hundred percent (100%) of the unpaid Market Stock Units (and related dividend equivalent rights), if vested, shall be paid upon your "Separation from Service" (as defined in Code section 409A) due to the Company involuntarily terminating your employment other than for Cause or due to you terminating your employment for Good Reason, if applicable (collectively, an "Involuntary Separation").

In the event payment is made pursuant to your Involuntary Separation, such payment shall be made within 60 days following your Involuntary Separation. Notwithstanding anything herein to the contrary, distributions may not be made to an individual who is a Key Employee (as defined below) as of his or her Involuntary Separation before the date which is six (6) months after the date of the Key Employee's Involuntary Separation (the "Key Employee Delay Period"). Any payments that would otherwise be made during this period of delay shall be accumulated and paid in the calendar month following the last day of the Key Employee Delay Period. For purposes of this award, Key Employee means an employee who, as of December 31st of a calendar year, meets the requirements of Code section 409A(a)(2)(B)(i) to be treated as a "specified employee" of the Company, i.e., a key employee (as defined in Code section 416(i)(1)(A)(i), (ii) or (iii) applied in accordance with the regulations thereunder and disregarding Code section 416(i)(5)). If you meet the criteria in the preceding sentence, you will be considered a Key Employee for purposes of the Plan and this award for the 12-month period commencing on the next following April 1.

D. Number of Shares of Company Stock To Be Paid

Except as set forth in Section D.5 below, the number of shares of Company Stock that will be paid in accordance with Section C shall be determined on the applicable Payment Date in accordance with the following formula:

$$\begin{aligned} & \text{(Number of vested Market Share Units payable on the Payment Date)} \\ & \qquad \qquad \qquad \text{multiplied by} \\ & \text{((the Payment Date Fair Market Value) divided by (the Grant Date Fair Market Value)).} \end{aligned}$$

For purposes of the formula set forth above:

1. Grant Date Fair Market Value. The Grant Date Fair Market Value, which is set forth on page one of this Notice of Grant, shall be equal to the [●].
2. Payment Date Fair Market Value. The Payment Date Fair Market Value shall be equal to the average of the closing price of the Company Stock occurring on the New York Stock Exchange the 40 trading dates immediately preceding the Payment Date.
3. Maximum Cap. Notwithstanding the calculation set forth in the preceding paragraph, the Payment Date Fair Market Value shall be capped at two times the Grant Date Fair Market Value.

4. Expiration upon Payment. Upon each issuance or transfer of shares of Company Stock in accordance with this Notice of Grant, the portion of the Market Stock Units attributable to such issuance or transfer shall be extinguished and such number of Market Stock Units will not be considered to be held by you for any purpose.
5. Number of Shares of Company Stock to be Paid Following a Change of Control. Notwithstanding anything herein to the contrary, if the Payment Date occurs on or after the date of a Change of Control, then the number of shares of Company Stock that will be paid shall be the greater of: (a) the number of Market Stock Units or (b) the number of shares determined according to the above formula; provided, however, that the Payment Date Fair Market Value shall be equal to the closing price of the Company Stock immediately preceding the consummation of the Change of Control, subject to the limitation in Section D.3.

E. No Shareholder Rights

The Market Stock Units shall not represent an equity security of the Company and shall not carry any voting or dividend rights. However, you will have the right to receive payments equivalent to dividends as set forth below. You are an unsecured general creditor of the Company with respect to any payment relating to vested Market Stock Units.

F. Dividend Equivalent Rights

You shall accumulate dividend equivalent rights on each Market Stock Unit in an amount equal to the dividends paid, if any, with respect to a share of Company Stock on each date that a dividend is paid on the Company Stock from the Grant Date to the Payment Date. The dividend equivalent rights shall be converted into additional Market Stock Units based on the Fair Market Value of a share of Company Stock on the date the dividend is paid and shall accumulate and be paid in additional shares of Company Stock when the payment for the corresponding Market Stock Unit is made. Such additional Market Stock Units shall be subject to the same forfeiture restrictions as apply to the Market Stock Unit to which they relate and shall be converted into shares of Company Stock using the same formula, Grant Date Fair Market Value and Payment Date Fair Market Value set forth above.

G. Tax Withholding

The Company or its Subsidiary may withhold from your Market Stock Units or payments under Section C the amount of taxes required by any federal, state, or local government to be withheld or otherwise deducted and paid with respect to the vesting and payment of your Market Stock Units ("Tax Withholdings"), including without limitation, the Federal Insurance Contributions Act ("FICA") tax imposed and the income tax withholding related to such FICA amounts. At its discretion, the Company or its Subsidiary may require you to reimburse it for any Tax Withholdings and withhold any payments, in whole or in part, until the Company or its Subsidiary is so reimbursed. The Company or its Subsidiary shall also have the unrestricted right to withhold from any other cash amounts due (or to become due) from the Company or its Subsidiary to you, including from your wages or commissions, an amount equal to any Tax Withholdings. The Company or its Subsidiary shall report the payment of any Tax Withholdings and other related information to the appropriate governmental agencies as required under applicable laws.

H. Change of Capital Structure

If the number of outstanding shares of the Company Stock is increased or decreased as a result of a stock dividend, stock split, subdivision or consolidation of shares, or other similar change in capitalization, the number of Market Stock Units, the Grant Date Fair Market Value, and the Payment Date Fair Market Value will automatically be adjusted, as provided in the Plan and as the Committee shall determine to be equitably required so as to preserve the value of the Market Stock Units that existed immediately before the change; provided, however, that the Company will not be required to issue any fractional shares as a result of such adjustment.

I. Miscellaneous

The grant of these Market Stock Units does not obligate the Company or any of its Subsidiaries to continue your employment. If there is any litigation involving Market Stock Units, each party will bear its own expenses, including all legal fees, except that in the event of an action brought by you under this Notice of Grant following a Change of Control, then insofar as such action is not deemed to be frivolous by the arbitrator, the Company shall bear all expenses related to the arbitration, including all legal fees incurred by you. The Committee shall have the authority to interpret and administer this Notice of Grant.

J. 409A Compliance

The Market Stock Units are intended to comply with Code section 409A and official guidance issued thereunder. Notwithstanding anything herein to the contrary, this Notice of Grant shall be interpreted, operated and administered in a manner consistent with this intention.

K. Acceptance

By accepting this grant on-line, this Notice of Grant, together with the Plan, will become the entire agreement between you and the Company with respect to the subject matter hereof, and will be governed by and construed and enforced in accordance with the laws of the Commonwealth of Virginia without regard to conflict of law provisions in any jurisdiction. This Notice of Grant supersedes all prior discussions, negotiations, understandings, commitments and agreements with respect to such matters. By accepting this grant online, you agree that you are in compliance with, and will abide by, the Company's "Policy Against Insider Trading" which can be found on The CarMax Way. You also agree not to sell Company Stock at a time when other applicable laws prohibit a sale. This restriction will apply as long as you are an employee, consultant or director of the Company or one of its Subsidiaries.

Sincerely,

[Name, Title]

CARMAX, INC.
NOTICE OF PERFORMANCE STOCK UNIT GRANT

[Date]

Dear _____:

The Board of Directors of CarMax, Inc. (the "Company") wants to provide you with an opportunity to share in the success of our Company. Accordingly, I am pleased to inform you that, as of _____ (the "Grant Date"), the Compensation and Personnel Committee of the Board of Directors of the Company (the "Committee") exercised its authority pursuant to the CarMax, Inc. 2002 Stock Incentive Plan, as amended and restated (the "Plan") and granted you Performance Stock Units of the Company (the "Performance Stock Units") as set forth herein.

The Performance Stock Units are a form of Restricted Stock Units that are being awarded pursuant to Section 6 of the Plan and are subject to the provisions of the Plan. The Committee administers the Plan. The terms of the Plan are incorporated into this Notice of Performance Stock Unit Grant (the "Notice of Grant") and in the case of any conflict between the Plan and this Notice of Grant, the terms of the Plan shall control. All capitalized terms not defined herein shall have the meaning given to them in the Plan. Please refer to the Plan for certain conditions not set forth in this Notice of Grant. Additionally, a copy of a Prospectus for the Plan, which describes material terms of the Plan, can be found on The CarMax Way. Copies of the Prospectus, the Plan and the Company's most recently filed annual report to shareholders on Form 10-K are available from the Company's corporate secretary at (804) 747-0422.

For purposes of this Notice of Grant, the term "Performance Term" shall mean the period commencing on _____ and ending on _____.

Number of Performance Stock Units: _____

A. Vesting

Except as otherwise provided in this Notice of Grant, all of the Performance Stock Units earned pursuant to the Performance Calculation, as set forth and defined in Exhibit 1, will vest and become nonforfeitable, if at all, on _____ (the "Vesting Date"), provided you continue to be employed by the Company or one of its Subsidiaries from the Grant Date until the Vesting Date.

No Performance Stock Units may vest after the Vesting Date and all unvested Performance Stock Units on the Vesting Date will terminate and be completely forfeited.

If prior to the Vesting Date, your employment with the Company and its Subsidiaries terminates for any reason other than those described in Sections B.1, B.2 or B.3, then the Performance Stock Units subject to this Notice of Grant shall terminate and be completely forfeited on the date of such termination of your employment. To the extent that you do not vest in any Performance Stock Units, all interest in such units and the related shares of Company Stock shall be forfeited. You shall have no right or interest in any Performance Stock Unit or related share of Company Stock that is forfeited. Prior to payment, the Performance Stock Units are not transferable by you by means of sale, assignment, exchange, pledge or otherwise.

B. Additional Vesting and Forfeiture Provisions

1. Termination Without Cause or for Good Reason. If prior to the Vesting Date: (a) the Company terminates your employment with the Company and its Subsidiaries for any reason other than for Cause (as defined in Section B.4), or (b) you have an effective severance or employment agreement with the Company or one of its Subsidiaries and you terminate your employment for "Good Reason" (as defined in such agreement), if applicable, then:
 - (x) if your employment terminates on or after the Grant Date but prior to the first anniversary of the Grant Date, all of your Performance Stock Units will be immediately forfeited, effective as of the date of your termination;
 - (y) if your employment terminates on or after the first anniversary of the Grant Date but prior to the second anniversary of the Grant Date, one-third of your Performance Stock Units (as determined pursuant to the Performance Calculation) will become immediately vested and nonforfeitable, and your remaining Performance Stock Units will be immediately forfeited, effective as of the date of your termination; and
 - (z) if your employment terminates on or after the second anniversary of the Grant Date but prior to the Vesting Date, two-thirds of your Performance Stock Units (as determined pursuant to the Performance Calculation) will become immediately vested and nonforfeitable, and your remaining Performance Stock Units will be immediately forfeited, effective as of the date of your termination.
2. Death or Disability. If you die or become Disabled prior to the Vesting Date, the number of Performance Stock Units set forth above will become immediately vested and nonforfeitable, effective as of the date of your death or Disability.
3. Retirement. If prior to the Vesting Date: (a) your employment with the Company and its Subsidiaries terminates, (b) such termination is not for Cause, not due to your death or Disability, and not otherwise covered by Section B.1, and (c) as of the date of the termination you have: (i) attained 55 years of age and completed ten years or more of continuous employment with the Company or its Subsidiaries; (ii) attained 62 years of age and completed seven years or more of continuous employment with the Company or its Subsidiaries; or (iii) attained 65 years of age and completed five years or more of continuous employment with the Company or its Subsidiaries; then all of your Performance Stock Units will become immediately vested and nonforfeitable, and will be paid on the Vesting Date subject to the Performance Calculation.
4. Termination For Cause. Upon termination of your employment with the Company or one of its Subsidiaries for Cause, and notwithstanding anything in Section B to the contrary, your Performance Stock Units will immediately and automatically without any action on the part of you or the Company, be forfeited, effective as of the date of your termination. For purposes of this Notice of Grant, "Cause" shall mean the following: (a) if you have an effective severance or employment agreement with the Company or one of its Subsidiaries with a definition of "Cause," then "Cause" shall have the meaning set forth in your employment or severance agreement; or (b) if you do not have an effective severance or employment agreement with the Company or one of its Subsidiaries with a definition of "Cause," then "Cause" shall mean that the Company or one of its Subsidiaries has any reason to believe any of the following: (i) you have committed fraud, misappropriation of funds or property, embezzlement or other similar acts of dishonesty; (ii) you have been convicted of a felony or other crime involving moral turpitude (or pled nolo contendere thereto); (iii) you have used, possessed or distributed any illegal drug; (iv) you have committed any misconduct that may subject the Company or one of its Subsidiaries to criminal or civil liability; (v) you have breached your duty of loyalty to the Company or one of its Subsidiaries, including, without limitation, the misappropriation of any of the Company's or its Subsidiaries' corporate opportunities; (vi) you have committed a serious violation or violations of any Company policy or procedure; (vii) you refuse to follow the lawful instructions of any Company management; (viii) you have committed

any material misrepresentation in the employment application process; (ix) you have committed deliberate actions, including neglect or failure to perform the job, which are contrary to the best interest of the Company or one of its Subsidiaries; or (x) you have continually failed to perform substantially your duties with the Company or one of its Subsidiaries.

5. Change in Full-Time Employment Status. In the event that your employment with the Company or one of its Subsidiaries changes from full-time to part-time for any reason prior to the Vesting Date, and notwithstanding the terms of Section B.3, your Performance Stock Units will be immediately forfeited, effective as of the date of the change. Employees on authorized leave (as determined under the Company's or its Subsidiary's authorized leave policy) will not be considered as having terminated merely by reason of the leave.

C. Payment

1. Payment Schedule. Payment for your vested Performance Stock Units shall be made in the number of shares of Company Stock, if any, determined in accordance with Exhibit 1, following the earliest to occur of the following events (the "Payment Date"): (a) the Vesting Date, (b) the date of your death, or (c) the date you become Disabled. Such payment shall be made within 60 days following the Payment Date.
2. Expiration upon Payment. Upon each issuance or transfer of shares of Company Stock in accordance with this Notice of Grant, the portion of the Performance Stock Units attributable to such issuance or transfer shall be extinguished and such number of Performance Stock Units will not be considered to be held by you for any purpose.

D. No Shareholder Rights

The Performance Stock Units shall not represent an equity security of the Company and shall not carry any voting or dividend rights. However, you will have the right to receive payments equivalent to dividends as set forth below. You are an unsecured general creditor of the Company with respect to any payment relating to vested Performance Stock Units.

E. Dividend Equivalent Rights

You shall accumulate dividend equivalent rights on each Performance Stock Unit in an amount equal to the dividends paid, if any, with respect to a share of Company Stock on each date that a dividend is paid on the Company Stock from the Grant Date to the Payment Date. The dividend equivalent rights shall be converted into additional Performance Stock Units based on the Fair Market Value of a share of Company Stock on the date the dividend is paid and shall accumulate and be paid in additional shares of Company Stock if and when the payment for the corresponding Performance Stock Unit is made. Such additional Performance Stock Units shall be subject to the same Performance Calculation and forfeiture restrictions as apply to the Performance Stock Unit to which they relate and shall be converted into shares of Company Stock using the same Performance Calculation, as applicable.

F. Tax Withholding

The Company or its Subsidiary may withhold from your Performance Stock Units or payments under Section C the amount of taxes required by any federal, state, or local government to be withheld or otherwise deducted and paid with respect to the vesting and payment of your Performance Stock Units ("Tax Withholdings"), including without limitation, the Federal Insurance Contributions Act ("FICA") tax imposed and the income tax withholding related to such FICA amounts. At its discretion, the Company or its Subsidiary may require you to pay any Tax Withholdings and withhold any payments, in whole or in part, until the Company or its Subsidiary is so paid. The Company or its Subsidiary shall also have the unrestricted right to withhold from any other cash amounts due (or to become due) from the Company or its Subsidiary to you, including from your wages or commissions, an amount equal to any Tax Withholdings.

The Company or its Subsidiary shall report the payment of any Tax Withholdings and other related information to the appropriate governmental agencies as required under applicable laws.

G. Change of Capital Structure

If the number of outstanding shares of the Company Stock is increased or decreased as a result of a stock dividend, stock split, subdivision or consolidation of shares, or other similar change in capitalization, the number of Performance Stock Units will automatically be adjusted, as provided in the Plan and as the Committee shall determine to be equitably required so as to preserve the value of the Performance Stock Units that existed immediately before the change; provided, however, that the Company will not be required to issue any fractional shares as a result of such adjustment.

H. Miscellaneous

The grant of these Performance Stock Units does not obligate the Company or any of its Subsidiaries to continue your employment. If there is any litigation involving the Performance Stock Units, each party will bear its own expenses, including all legal fees, except that in the event of an action brought by you under this Notice of Grant following a Change of Control, then insofar as such action is not deemed to be frivolous by the arbitrator or court, the Company shall bear all expenses related to the arbitration or litigation, including all legal fees incurred by you. The Committee shall have the authority to interpret and administer this Notice of Grant.

I. 409A Compliance

The Performance Stock Units are intended to comply with Code section 409A and official guidance issued thereunder. Notwithstanding anything herein to the contrary, this Notice of Grant shall be interpreted, operated and administered in a manner consistent with this intention. Notwithstanding anything in the Plan or this Notice of Grant to the contrary, if at the time of your termination of employment with the Company you are "specified employee" as defined in Code section 409A, and the deferral of the commencement of any payment to you hereunder as a result of such termination of employment is necessary in order to prevent any accelerated or additional tax under Code section 409A, then the commencement of the payment of any such amounts shall be deferred until the earlier of the first business day to occur following the date that is six (6) months following your "separation from service" (within the meaning of such term under Code section 409A) with the Company or your death.

J. Acceptance

By accepting this grant on-line, this Notice of Grant, together with the Plan, will become the entire agreement between you and the Company with respect to the subject matter hereof, and will be governed by and construed and enforced in accordance with the laws of the Commonwealth of Virginia without regard to conflict of law provisions in any jurisdiction. This Notice of Grant supersedes all prior discussions, negotiations, understandings, commitments and agreements with respect to such matters. By accepting this grant online, you agree that you are in compliance with, and will abide by, the Company's "Policy Against Insider Trading" which can be found on The CarMax Way. You also agree not to sell Company Stock at a time when other applicable laws prohibit a sale. This restriction will apply as long as you are an employee, consultant or director of the Company or one of its Subsidiaries.

Sincerely,

[Insert Name]
[Insert Title]

EXHIBIT 1
Performance Calculation

1. Performance Calculation. Except as set forth in Sections 3 and 4 below, the number of shares of Company Stock that will be paid shall be determined on the applicable Payment Date in accordance with the following performance calculation (the "Performance Calculation"):

(The Performance Share Units awarded)
multiplied by
(the Performance-Based Multiplier)

2. PSU Performance-Based Multiplier. For purposes of the Performance Calculation, the PSU Performance-Based Multiplier for the Performance Term shall be a number between ___ and ___. The number of Performance Share Units that may be earned for the Performance Term shall be determined by the Committee based upon the Performance-Based Multiplier and the attainment of performance targets based on such criteria as are determined by the Committee. The Committee may in its discretion determine a threshold level of Company performance required for the Performance Term, such that if the actual Company performance is equal to or below such threshold, the number of shares of Company Stock that will be paid shall be zero.
3. Payment on Death or Disability. Notwithstanding anything to the contrary, if payment is triggered upon your death or you becoming Disabled, then the number of shares of Company Stock that will be paid shall equal the number of vested Performance Stock Units.
4. Payment On or After a Change of Control. Notwithstanding anything to the contrary, if payment is triggered for any reason on or after the date of a Change of Control, then the number of shares of Company Stock that will be paid shall equal the number of vested Performance Stock Units.
5. Committee Certification. Prior to any payments (other than those under Sections 3 and 4) being made, the Committee will determine whether, and to what extent, the Performance Calculation for the Performance Term has been achieved. Such determination shall be final, conclusive and binding on you, and on all other persons, to the maximum extent permitted by law. The Committee may adjust the Performance Calculation, as it deems appropriate.

Certification of the Chief Executive Officer
Pursuant to Rule 13a-14(a)

I, William D. Nash, certify that:

1. I have reviewed this annual report on Form 10-K of CarMax, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Certification of the Chief Executive Officer
Pursuant to 18 U.S.C. Section 1350

In connection with the CarMax, Inc. (the "company") Annual Report on Form 10-K for the year ended February 29, 2024, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, William D. Nash, President and Chief Executive Officer of the company, certify pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to my knowledge:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the company as of, and for, the periods presented in the Report.

CARMAX, INC.**CLAWBACK POLICY**

The Board of Directors (the “Board”) of CarMax, Inc. (the “Company”) believes it is appropriate for the Company to adopt this Clawback Policy (the “Policy”) to be applied to the Executive Officers of the Company and adopts this Policy to be effective as of the Effective Date.

1. Definitions

For purposes of this Policy, the following definitions shall apply:

- a) “Committee” means the Compensation and Personnel Committee of the Board.
- b) “Company Group” means the Company and each of its Subsidiaries, as applicable.
- c) “Covered Compensation” means any Incentive-Based Compensation granted, vested or paid to a person who served as an Executive Officer at any time during the performance period for the Incentive-Based Compensation and that was Received (i) on or after the effective date of the applicable NYSE listing standards, (ii) after the person became an Executive Officer and (iii) at a time that the Company had a class of securities listed on a national securities exchange or a national securities association.
- d) “Effective Date” means December 1, 2023.
- e) “Erroneously Awarded Compensation” means the amount of Covered Compensation granted, vested or paid to a person during the fiscal period when the applicable Financial Reporting Measure relating to such Covered Compensation was attained that exceeds the amount of Covered Compensation that otherwise would have been granted, vested or paid to the person had such amount been determined based on the applicable Restatement, computed without regard to any taxes paid (i.e., on a pre-tax basis). For Covered Compensation based on stock price or total shareholder return, where the amount of Erroneously Awarded Compensation is not subject to mathematical recalculation directly from the information in a Restatement, the Committee will determine the amount of such Covered Compensation that constitutes Erroneously Awarded Compensation, if any, based on a reasonable estimate of the effect of the Restatement on the stock price or total shareholder return upon which the Covered Compensation was granted, vested or paid and the Committee shall maintain documentation of such determination and provide such documentation to the NYSE.
- f) “Exchange Act” means the Securities Exchange Act of 1934.
- g) “Executive Officer” means each “officer” of the Company as defined under Rule 16a-1(f) under Section 16 of the Exchange Act, which shall be deemed to include any individuals identified by the Company as executive officers pursuant to Item 401(b) of Regulation S-K under the Exchange Act. Both current and former Executive Officers are subject to the Policy in accordance with its terms.

- h) “Financial Reporting Measure” means (i) any measure that is determined and presented in accordance with the accounting principles used in preparing the Company’s financial statements, and any measures derived wholly or in part from such measures and may consist of GAAP or non-GAAP financial measures (as defined under Regulation G of the Exchange Act and Item 10 of Regulation S-K under the Exchange Act), (ii) stock price or (iii) total shareholder return. Financial Reporting Measures may or may not be filed with the SEC and may be presented outside the Company’s financial statements, such as in Managements’ Discussion and Analysis of Financial Conditions and Result of Operations or in the performance graph required under Item 201(e) of Regulation S-K under the Exchange Act.
- i) “Home Country” means the Company’s jurisdiction of incorporation.
- j) “Incentive-Based Compensation” means any compensation that is granted, earned or vested based wholly or in part upon the attainment of a Financial Reporting Measure.
- k) “Lookback Period” means the three completed fiscal years (plus any transition period of less than nine months that is within or immediately following the three completed fiscal years and that results from a change in the Company’s fiscal year) immediately preceding the date on which the Company is required to prepare a Restatement for a given reporting period, with such date being the earlier of: (i) the date the Board, a committee of the Board, or the officer or officers of the Company authorized to take such action if Board action is not required, concludes, or reasonably should have concluded, that the Company is required to prepare an Restatement, or (ii) the date a court, regulator or other legally authorized body directs the Company to prepare a Restatement. Recovery of any Erroneously Awarded Compensation under the Policy is not dependent on if or when the Restatement is actually filed.
- l) “NYSE” means the New York Stock Exchange.
- m) “Received”: Incentive-Based Compensation is deemed “Received” in the Company’s fiscal period during which the Financial Reporting Measure specified in or otherwise relating to the Incentive-Based Compensation award is attained, even if the grant, vesting or payment of the Incentive-Based Compensation occurs after the end of that period.
- n) “Restatement” means a required accounting restatement of any Company financial statement due to the material noncompliance of the Company with any financial reporting requirement under the securities laws, including (i) to correct an error in previously issued financial statements that is material to the previously issued financial statements (commonly referred to as a “Big R” restatement) or (ii) to correct an error in previously issued financial statements that is not material to the previously issued financial statements but that would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period (commonly referred to as a “little r” restatement). Changes to the Company’s financial statements that do not represent error corrections under the then-current relevant accounting standards will not constitute Restatements. Recovery of any Erroneously Awarded Compensation under the Policy is not dependent on fraud or misconduct by any person in connection with the Restatement.
- o) “SEC” means the United States Securities and Exchange Commission.

- p) “Subsidiary” means any domestic or foreign corporation, partnership, association, joint stock company, joint venture, trust or unincorporated organization “affiliated” with the Company, that is, directly or indirectly, through one or more intermediaries, “controlling”, “controlled by” or “under common control with”, the Company. “Control” for this purpose means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of such person, whether through the ownership of voting securities, contract or otherwise.

2. Recoupment of Erroneously Awarded Compensation

In the event of a Restatement, any Erroneously Awarded Compensation Received during the Lookback Period prior to the Restatement (a) that is then-outstanding but has not yet been paid shall be automatically and immediately forfeited and (b) that has been paid to any person shall be subject to reasonably prompt repayment to the Company Group in accordance with Section 3 of this Policy. The Committee must pursue (and shall not have the discretion to waive) the forfeiture and/or repayment of such Erroneously Awarded Compensation in accordance with Section 3 of this Policy, except as provided below.

Notwithstanding the foregoing, the Committee may determine not to pursue the forfeiture and/or recovery of Erroneously Awarded Compensation from any person if the Committee determines that such forfeiture and/or recovery would be impracticable due to any of the following circumstances: (i) the direct expense paid to a third party (for example, reasonable legal expenses and consulting fees) to assist in enforcing the Policy would exceed the amount to be recovered (following reasonable attempts by the Company Group to recover such Erroneously Awarded Compensation, the documentation of such attempts, and the provision of such documentation to the NYSE), (ii) pursuing such recovery would violate the Company’s Home Country laws adopted prior to November 28, 2022 (provided that the Company obtains an opinion of Home Country counsel acceptable to the NYSE that recovery would result in such a violation and provides such opinion to the NYSE), or (iii) recovery would likely cause any otherwise tax-qualified retirement plan, under which benefits are broadly available to employees of Company Group, to fail to meet the requirements of 26 U.S.C. 401(a)(13) or 26 U.S.C. 411(a) and regulations thereunder.

3. Means of Repayment

In the event that the Committee determines that any person shall repay any Erroneously Awarded Compensation, the Committee shall provide written notice to such person by email or certified mail to the physical address on file with the Company Group for such person, and the person shall satisfy such repayment in a manner and on such terms as required by the Committee, and the Company Group shall be entitled to set off the repayment amount against any amount owed to the person by the Company Group, to require the forfeiture of any award granted by the Company Group to the person, or to take any and all necessary actions to reasonably promptly recoup the repayment amount from the person, in each case, to the fullest extent permitted under applicable law, including without limitation, Section 409A of the Internal Revenue Code and the regulations and guidance thereunder. If the Committee does not specify a repayment timing in the written notice described above, the applicable person shall be required to repay the Erroneously Awarded Compensation to the Company Group by wire, cash or cashier’s check no later than thirty (30) days after receipt of such notice.

4. No Indemnification

No person shall be indemnified, insured or reimbursed by the Company Group in respect of any loss of compensation by such person in accordance with this Policy, and no person shall be paid or reimbursed by the Company Group for any premiums paid by such person for any third-party insurance policy covering potential recovery obligations under this Policy. For this purpose, “indemnification” includes any modification to current compensation arrangements or other means that would amount to *de facto* indemnification (for example, providing the person a new cash award which would be cancelled to effect the recovery of any Erroneously Awarded Compensation). In no event shall the Company Group be required to award any person an additional payment if any Restatement would result in a higher incentive compensation payment.

5. Miscellaneous

This Policy generally will be administered and interpreted by the Committee. Any determination by the Committee with respect to this Policy shall be final, conclusive and binding on all interested parties. The determinations of the Committee under this Policy need not be uniform with respect to all persons, and may be made selectively amongst persons, whether or not such persons are similarly situated.

This Policy is intended to satisfy the requirements of Section 954 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, as it may be amended from time to time, and any related rules or regulations promulgated by the SEC or the NYSE, including any additional or new requirements that become effective after the Effective Date which upon effectiveness shall be deemed to automatically amend this Policy to the extent necessary to comply with such additional or new requirements.

The provisions in this Policy are intended to be applied to the fullest extent of the law. To the extent that any provision of this Policy is found to be unenforceable or invalid under any applicable law, such provision will be applied to the maximum extent permitted and shall automatically be deemed amended in a manner consistent with its objectives to the extent necessary to conform to applicable law. The invalidity or unenforceability of any provision of this Policy shall not affect the validity or enforceability of any other provision of this Policy. Recoupment of Erroneously Awarded Compensation under this Policy is not dependent upon the Company Group satisfying any conditions in this Policy, including any requirements to provide applicable documentation to the NYSE.

The rights of the Company Group under this Policy to seek forfeiture or reimbursement is in addition to, and not in lieu of, any rights of recoupment, or remedies or rights other than recoupment, that may be available to the Company Group pursuant to the terms of any law, government regulation or stock exchange listing requirement or any other policy, code of conduct, employee handbook, employment agreement, equity award agreement, or other plan or agreement of the Company Group.

6. Amendment and Termination

To the extent permitted by, and in a manner consistent with applicable law, including SEC and NYSE rules, the Committee may terminate, suspend or amend this Policy at any time in its discretion.

7. Successors

This Policy shall be binding and enforceable against all persons and their respective beneficiaries, heirs, executors, administrators or other legal representatives with respect to any Covered Compensation granted, vested or paid to or administered by such persons or entities.

Approved on October 24, 2023.
