UNITED STATES SECURITIES AND EXCHANGE COMMISSION Washington, D.C. 20549

Report of Foreign Private Issuer

Pursuant to Rule 13a-16 or 15d-16 of the Securities Exchange Act of 1934

Date: December 5, 2007
Commission File Number 001-31528

IAMGOLD Corporation

(Translation of registrant's name into English)

**401 Bay Street Suite 3200, PO Box 153
Toronto, Ontario, Canada M5H 2Y4
Tel: (416) 360-4710**

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F Form 40-
F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82- _____

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

PRESS RELEASE

No. 31/07

IAMGOLD INTERCEPTS WESTWOOD MINERALIZATION AT DEPTH

Toronto, Ontario, December 5, 2007 – IAMGOLD Corporation (“IAMGOLD” or “the Company”) is pleased to announce results from 5 drill holes of the ongoing drill program at the Westwood project, an advanced stage exploration project located within the Company’s Doyon mine property in the Abitibi region of Northern Quebec.

These results include intercepts of the Zone 2 extension at a vertical depth of approximately 2.3 kilometers in hole R14281B-07, which is 800 metres deeper than mineralization previously intersected. This hole was specifically planned to test the depth potential and includes 10.0 metres averaging 11.5 grams per tonne (g/t) gold and 5.0 metres averaging 23.0 g/t gold. These results are significant given the depth of the known 3.3 million ounce resource previously delimited which is less than 1.5 kilometres.

The first hole east of the Bousquet Fault, hole R14404-07 also intercepted the Zone 2, a 3.0 metre intercept averaging 10.2 g/t gold and narrow massive sulphide mineralization, a 2.0 metre intercept of 3.6 g/t gold, 5.0% zinc, within the Westwood horizon.

These higher grade intercepts and intercepts at depth may have significant impact on the strike length and have potential to substantially increase the total Westwood resource.

“These results are some of the best to date on the Westwood project. With the increasing gold grades at this depth we are very encouraged that Westwood could become a world class deposit,” commented Joseph Conway, President & CEO. “The acceleration of this project in 2007 will continue in 2008 and the results to date continue to confirm that Westwood will be IAMGOLD’s future in Northern Quebec.”

Significant intersections from this drilling campaign can be found in Table 1 with a longitudinal section of Zone 2 shown in Figure 1. These holes represent 7,050 metres of drilling since September 1, 2007 for a total of 25,000 metres of drilling this year.

In January 2008, valuation drilling on Zone 2 will begin. This will involve the drilling of a 400 metre by 400 metre block or panel, to demonstrate the continuity of the deposit. In addition, work will continue on the southern exploration drift toward the mineralized zones, which will be reached in the first quarter of 2008. More information is shown on Figure 2.

Table 1: RECENT DRILLING RESULTS FROM WESTWOOD EXPLORATION PROGRAM

(Intersections where gold values are >35 g/t are highlighted)

Qualified Person / Quality Control Notes

The drilling program was carried out by IAMGOLD employees, under the supervision of Ms. Nicole Houle, Geologist – Doyon Division. Ms. Houle is a qualified person (as defined by National Instrument 43-101) with more than 20 years of experience in mine and exploration geology. IAMGOLD has established an Analytical Quality Assurance Program to control and assure the analytical quality of assays in its gold exploration. This program includes the systematic addition of blank samples, reject and pulp duplicates and internal material references (the “standards”) to each batch of samples sent for analysis. Blank samples are used to check for possible contamination in laboratories, field duplicates allow the quantification of overall precision while standards determine the analytical accuracy. Samples were sent for assaying to Doyon’s internal laboratory as a primary laboratory. Samples were assayed by fire-assay according to industry standards.

Cautionary Note to U.S. Investors

This press release includes certain “Forward-Looking Statements” within the meaning of section 21E of the United States Securities Exchange Act of 1934, as amended. All statements, other than statements of historical fact, included herein, including without limitation, statements regarding potential mineralization and reserves, exploration results and future plans and objectives of IAMGOLD, are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from IAMGOLD’s expectations are disclosed under the heading “Risk Factors” and elsewhere in IAMGOLD documents filed from time-to-time with the Toronto Stock Exchange, the United States Securities and Exchange Commission and other regulatory authorities.
