## **Item 2.05. Costs Associated with Exit or Disposal Activities.**

On September 6, 2007, Nelnet, Inc. (the “Company”) announced via press release a strategic initiative to create efficiencies and lower costs in advance of the anticipated passage of federal legislation impacting the student loan programs in which the Company participates. Recently the U.S. House of Representatives passed the College Cost Reduction Act of 2007 and the U.S. Senate passed the Higher Education Access Act of 2007. Yesterday, Congress released a conference agreement on H.R. 2669, known as the College Cost Reduction and Access Act. The conference agreement contains provisions with significant implications for participants in the Federal Family Education Loan Program (“FFEL Program”). Among other things, the agreement includes the following provisions:

- reducing special allowance payments to lenders;
- reducing default insurance rates and elimination of the Exceptional Performer program;
- increasing lender origination fees; and
- increasing annual and aggregate loan limits for certain Stafford loans.

The College Cost Reduction and Access Act has not been enacted into law. The impact of this agreement is difficult to predict; however, if the proposed federal government spending cuts and increased fees for FFEL Program participants are enacted, the Company’s revenues would be negatively impacted.

As previously disclosed, management continues to estimate the timing and impact of legislative changes to the Company’s operations based on information in the conference agreement passed by Congress. Management believes the legislative changes will be effective October 1, 2007, the beginning of the next federal fiscal year.

In anticipation of the federally driven cuts to the student loan programs, management is initiating a variety of strategies to modify its student loan business model, including lowering the cost of student loan acquisition, creating efficiencies in its asset generation business, and decreasing operating expenses partially through a reduction in workforce and realignment of operating facilities. These strategies will result in the net reduction of approximately 400 positions in the Company’s overall workforce from its current level of approximately 3,300 associates. In addition, the Company is simplifying its operating structure to leverage its larger facilities and technology by closing five small origination offices and downsizing its presence in Indianapolis. Subject to completion of the necessary legal notices and requirements, implementation of the plan will begin immediately and is expected to be substantially complete during the fourth quarter of 2007.

The Company estimates that the total after-tax charge to earnings associated with these strategic decisions will range between \$12 million and \$14 million, consisting of \$4 million to \$5 million in severance costs, \$2 million to \$3 million in contract termination costs, and approximately \$6 million in non-cash charges primarily related to the impairment of property and equipment. The Company anticipates that the after-tax charges to earnings will be incurred in 2007, of which approximately 70% to 80% will be incurred in the third quarter.

---

As a result of these strategic initiatives, the Company expects to reduce operating expenses by \$25 million to \$35 million (before tax) annually beginning in 2008.

The Company expects to incur additional charges at the time the proposed federal legislation is enacted into law. Management will evaluate the carrying amount of goodwill and certain intangible assets, primarily assigned to its Asset Generation and Management operating segment, as a result of the changes in the student loan business environment. Goodwill and intangible assets such as loan origination rights, trade names, and covenants not to compete are expected to be impaired based on the legislative changes and the student loan business model modifications the Company plans to implement as a result of the legislative changes. Based on the proposed legislation as it exists today, management expects the Company to incur total after-tax non-cash impairment charges between \$22 million and \$27 million on such assets.

At the time the legislation becomes final, the Company expects to also recognize a provision for loan losses related to the increase in risk share due to the anticipated elimination of the Exceptional Performer program. Assuming the elimination of the Exceptional Performer program and a default insurance rate of 97 percent, this after-tax provision is expected to be between \$10 million and \$11 million.

A copy of the Company's press release announcing the strategic initiatives is attached as Exhibit 99.1 to this report.

Information contained or incorporated in this report may be considered forward looking in nature and is subject to various risks, uncertainties, and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated, or expected. Among the key factors that may have a direct bearing on the Company's operating results, performance, or financial condition expressed or implied by the forward-looking statements are the pending and uncertain nature of the reported federal legislation expected to significantly affect student loan programs, the uncertain nature of estimated expenses that may be incurred and cost savings that may result from the strategic initiatives, changes in terms of student loans and the educational credit marketplace, changes in the demand for educational financing or in financing preferences of educational institutions, students, and their families, or changes in the general interest rate environment and in the securitization markets for education loans.

#### **Item 2.06. Material Impairments.**

The discussion of the financial impact as a result of the Company's strategic initiatives to create efficiencies and lower costs in advance of the anticipated passage of federal legislation under Item 2.05 above contains a discussion of impairments of certain assets that are expected to be recognized by the Company during the third quarter 2007. Such discussion is incorporated under this Item 2.06 by reference.

---

## Item 8.01. Other Events.

The Company has significant financing needs that it meets through the capital markets, including the debt and secondary markets. These markets are currently experiencing unprecedented disruptions, which could have an adverse impact on the Company's earnings and financial condition, particularly in the short term.

Current conditions in the debt markets include reduced liquidity and increased credit risk premiums for most market participants. These conditions can increase the cost and reduce the availability of debt in the capital markets. The Company attempts to mitigate the impact of debt market disruptions by obtaining adequate committed and uncommitted facilities from a variety of reliable sources.

On August 10, 2007 through August 28, 2007, the Company increased its warehouse capacity as a result of these disruptions in the capital markets. To date, the Company has increased its committed multi-seller warehouse capacity to \$7.45 billion, of which \$4.80 billion is outstanding. The Company has \$2.65 billion remaining in available capacity under this facility.

The Company continues to work on obtaining other sources of liquidity. There can be no assurance, however, that the Company will be successful in these efforts, that such facilities will be adequate, or that the cost of debt will allow the Company to operate at profitable levels. Since the Company is dependent on the availability of credit to finance its operations, disruptions in the debt markets or a reduction in its credit ratings could have an adverse impact on the Company's earnings and financial condition, particularly in the short term.

The secondary markets are also currently experiencing unprecedented disruptions resulting from reduced investor demand for student loan asset-backed securities and increased investor yield requirements for those securities. These conditions may continue or worsen in the future. While management of the Company believes the Company's capital and liquidity positions are currently strong and the Company has sufficient capacity to continue to grow its student loan portfolio, the Company's ability to acquire and hold student loans is not unlimited. As a result, a prolonged period of secondary market illiquidity may affect the Company's loan acquisition volumes and could have an adverse impact on the Company's future earnings and financial condition.

The Company's primary market risk exposure arises from fluctuations in its borrowing and lending rates, the spread between which could be impacted by shifts in market interest rates. Over the last several weeks, similar to all companies that access the debt and liquidity markets, the Company has experienced an increase in interest rates on its outstanding warehouse facilities as well as reset rates on its longer term financings. The disruption in the credit markets that is causing an increase in borrowing rates is expected to cause compression in the Company's student loan spread — specifically in the third and fourth quarters of 2007.

### Nelnet Announces Strategic Initiative to Position Company for Long-Term Success

Expects to reduce operating expenses by \$25 million to \$35 million annually beginning in 2008

LINCOLN, Neb., September 6, 2007 – Nelnet (NYSE: NNI) today announced a strategic initiative to create efficiencies and lower costs in advance of the anticipated passage of federal legislation impacting the student loan programs and to position the company for continued long-term success. Under the initiative, Nelnet is reducing its workforce and simplifying its operating structure.

“Severe cuts to the student loan programs are changing our approach, but not our commitment, to the education finance market and, specifically, the Federal Family Education Loan (FFEL) Program,” said Mike Dunlap, Chairman and Chief Executive Officer of Nelnet. “Fortunately, our business model has been developed specifically to reduce political risk, adapt to these kinds of changes, and deliver long-term value to our customers.”

The changes announced today are designed to position the company for continued long-term success by lowering the cost of student loan acquisition, creating efficiencies in its asset generation business, and decreasing operating expenses partially through a reduction in workforce and realignment of operating facilities. The company will have a net reduction of approximately 400 positions, from its current level of approximately 3,300 associates.

In addition, the company is simplifying its operating structure to leverage its larger facilities and technology. This will be achieved by closing five small origination offices and downsizing the company’s presence in Indianapolis from more than 320 associates to a staff of approximately 55. The majority of the reductions will be made in conjunction with the targeted office closings, and the entire process is expected to be substantially complete during the fourth quarter of 2007.

“The result will be an efficient, competitive company that provides more value to our customers and more opportunities to our associates over the long term,” continued Dunlap.

The company expects to reduce operating expenses by \$25 million to \$35 million (before tax) annually beginning in 2008.

The company estimates that the total after-tax charge to earnings related to severance costs, contract termination costs, and impairment of property and equipment will range between \$12 million and \$14 million in 2007, of which approximately 70 percent to 80 percent will be incurred in the third quarter.

---

The company expects to incur additional charges at the time the proposed federal legislation is enacted into law. Based on the proposed legislation as it exists today management expects the company to incur total after-tax non-cash charges of between \$22 million and \$27 million for the impairment of goodwill and certain assets associated with previous asset and business acquisitions. The company also expects to recognize a provision for loan losses related to the increase in risk share due to the anticipated elimination of the Exceptional Performer program. Assuming the elimination of the Exceptional Performer program and a default insurance rate of 97 percent, this after-tax provision is expected to be between \$10 million and \$11 million.

“The decisions affecting associates are very difficult,” added Dunlap. “Through the transition, we are committed to supporting our associates with career and job placement services, extended benefits, and severance packages.”

As part of its efforts to help minimize the impact on associates, Nelnet has signed two letters of intent with third parties which contemplate arrangements for the third parties to offer jobs to certain associates in the company’s Indianapolis and Bryan, Texas offices, as well as to sublease office space and purchase certain assets. Approximately 175 associates, included in the net reduction of positions mentioned above, may be offered positions with these third parties. The company intends to negotiate definitive agreements with the respective third parties with the intent that the agreements will be effective later this year.

The net reduction of positions mentioned above also includes the expected addition of approximately 100 new positions in its Lincoln headquarters before the end of the year to accommodate expanded default management operations as well as certain customer service support functions, which will be relocated from Indianapolis.

The key elements of the company’s business model are diversifying revenue streams, increasing fee-based income which currently makes up more than 50 percent of the company’s total revenue, generating high quality student loan assets, and deploying capital with a long-term focus.

“These actions, along with our continued focus on diversification, will further strengthen our business model in this new environment,” Dunlap concluded.

For 28 years, Nelnet has been helping the education-seeking family plan for their education, pay for their education, and prepare for their careers. The company has invested hundreds of millions of dollars in products, services, and technology improvements for students and the educational institutions they attend. These services include live counseling to help families through all aspects of the financial aid process, benefits for borrowers, including tens of millions of dollars in borrower loan discounts and other benefits, and Nelnet sponsored scholarships. Nelnet serves students in 50 states, employs over 3,000 associates, and has \$26.2 billion in net student loan assets.
