Caution Concerning Forward-Looking Statements

This current report on Form 8-K contains forward-looking statements as that term is used in the Private Securities Litigation Reform Act of 1995. These statements are based on our current expectations about future events or future financial performance. Forward-looking statements by their nature address matters that are, to different degrees, uncertain, and often contain words such as "may," "could," "expect," "intend," "plan," "seek," "anticipate," "believe," "estimate," "predict," "potential," or "continue." These statements involve known and unknown risks and uncertainties that may cause the events we discuss not to occur or to differ significantly from what we expect. For us, these risks and uncertainties include, among others,

- liability for any losses that result from an actual or claimed breach of our fiduciary duties;
- failing to maintain and protect our brand, independence, and reputation;
- failing to differentiate our products and continuously create innovative, proprietary research tools;
- failing to respond to technological change, keep pace with new technology developments, or adopt a successful technology strategy;
- trends in the asset management industry, including the increasing popularity of passively managed investment vehicles;
- inadequacy in our business continuity program in the event of a material emergency or adverse political or regulatory developments;
- liability related to the storage of personal information related to individuals as well as portfolio and account-level information;
- compliance failures, regulatory action, or changes in laws applicable to our investment advisory or credit rating operations;
- an outage of our database, technology-based products and services, or network facilities or the movement of parts of our technology infrastructure to the public cloud;
- downturns in the financial sector, global financial markets, and global economy;
- the effect of market volatility on revenue from asset-based fees;
- the failure of acquisitions and other investments to produce the results we anticipate;
- the failure to recruit, develop, and retain qualified employees;
- challenges faced by our non-U.S. operations, including the concentration of data and development work at our offshore facilities in China and India;
- liability relating to the acquisition or redistribution of data or information we acquire or errors included therein; and
- the failure to protect our intellectual property rights or claim of intellectual property infringement against us.

Morningstar Managed Portfolios

1. *The July 25, 2018 press release notes that 19,000 advisors globally use Morningstar Managed Portfolio (making up \$44.7B of assets under management). For the advisors working most closely with Morningstar Managed Portfolios, what percent of the assets they advise reside in the Managed Portfolio program (penetration rate of existing customers)? And, what percent of your broader set of 255,000 financial advisors using Morningstar products does Morningstar think could start using Morningstar Managed Portfolios?*

We do not disclose our estimates of the percentage of advisor client assets under management or advisement in Morningstar Managed Portfolios. That said, we believe there is ample opportunity for us to win more of our existing clients' assets, as well as win new clients, as advisor practices evolve over time to cope with the rise of digital advice offerings, a heightened fiduciary environment, and increasing demand for value-added services as part of a comprehensive financial plan. Cerulli Associates estimates that out of \$5.3 trillion in managed assets in the U.S. at the end of 2017, approximately \$3.0 trillion of these are outsourced using non-rep managed programs, which we consider to be addressable. Over the next four years, Cerulli expects that managed assets in the U.S. will reach approximately \$8 trillion, which includes about \$4.5 trillion in addressable assets. We're excited about the sizable opportunity this represents for us.
