Approximate date of commencement of proposed sale to the public:
As soon as practicable after this registration statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, as amended (the "Securities Act") check the following box. ☐

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If delivery of the prospectus is expected to be made pursuant to Rule 434, please check the following box. ☐

CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered	Proposed maximum aggregate offering price⁽¹⁾⁽²⁾	Amount of registration fee
Common Stock, par value \$0.001 per share	\$ 115,000,000	\$ 14,571

(1) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(o) of the Securities Act.

(2) Includes shares which the underwriters have the option to purchase to cover over-allotments, if any.

The Registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective

date until the Registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act, or until the registration statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting offers to buy these securities in any state where the offer or sale is not permitted.

Subject to Completion, dated July 20, 2004

PROSPECTUS

Shares

Ormat Technologies, Inc.

Common Stock

We are offering shares of our common stock in this initial public offering. No public market currently exists for our common stock.

We intend to list our common stock on the New York Stock Exchange under the symbol "ORA." We anticipate that the initial public offering price will be between \$ and \$ per share.

Investing in our common stock involves risks. See "Risk Factors" beginning on page 16.

	<u>Per Share</u>	<u>Total</u>
Public offering price	\$	
Underwriting discount	\$	
Proceeds to Ormat Technologies, Inc. (before expenses).	\$	

We have granted the underwriters a 30-day option to purchase up to additional shares of common stock at the public offering price less the underwriting discount to cover over-allotments.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Lehman Brothers, on behalf of the underwriters, expects to deliver the shares on or about , 2004.

You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with information that is different from that contained in this prospectus. This prospectus is not an offer to sell or a solicitation of an offer to buy shares of our common stock in any jurisdiction where such offer or any sale of shares of our common stock would be unlawful. The information in this prospectus is complete and accurate only as of the date on the front cover regardless of the time of delivery of this prospectus or of any sale of shares of our common stock.

We use market data and industry forecasts and projections throughout this prospectus, which we have obtained from market research, publicly available information and industry publications and surveys. These sources generally state that the information they provide has been obtained from sources believed to be reliable, but that the accuracy and completeness of the information are not guaranteed. The forecasts and projections are based on industry surveys and the preparers' experience in the industry and there is no assurance that any of the projected amounts will be achieved. Similarly, we believe that the surveys and market research others have performed are reliable, but we have not independently verified this information.

This prospectus refers to brand names, trademarks, service marks and trade names of other companies and organizations, and these brand names, trademarks, service marks and trade names are the property of their respective holders.

Until _____, 2004 (25 days after the commencement of this offering), all dealers that effect transactions in our common stock, whether or not participating in this offering, may be required to deliver a prospectus. This is in addition to the dealer's obligation to deliver a prospectus when acting as an underwriter and with respect to unsold allotments or subscriptions.

PROSPECTUS SUMMARY

This summary highlights information contained elsewhere in this prospectus. This summary may not contain all of the information that may be important to you. We urge you to read this entire prospectus carefully,

including the more detailed information about us and about the shares of our common stock being sold in this offering and our consolidated financial statements and related notes appearing elsewhere in this prospectus, the "Risk Factors" section, and the documents to which we refer, before making an investment decision. All references in this prospectus to "Ormat," "the Company," "we," "us," "our company" or "our" refer to Ormat Technologies, Inc. and its consolidated subsidiaries, except where it is clear that such terms refer to Ormat Technologies, Inc. only; "Ormat Industries" refers to ORMAT Industries Ltd., the parent company of Ormat Technologies, Inc.; "Ormat International" refers to Ormat International, Inc.; "Ormat Holding" refers to Ormat Holding Corp.; "Ormat Funding" refers to "Ormat Funding Corp."; and "Ormat Systems" refers to Ormat Systems Ltd. Ormat International, Ormat Holding, Ormat Funding and Ormat Systems are all wholly owned subsidiaries of ours. Unless the context otherwise requires, "plants" refers to the various power generating plants owned and/or operated or built by Ormat and "units" refer to particular power generating units at those plants or at remote sites. We refer to a plant or a group of plants and the geothermal resources associated with them in a certain geographic area as a "project." References to generating capacity refer to the net amount of electrical energy available for sale to the power purchaser, in the case of all of our existing domestic projects and the Momotombo and Olkaria III projects (two of our foreign projects), and to the generating capacity that is subject to the "take or pay" power purchase agreements in the case of the Leyte and Zunil projects (another two of our foreign projects). In the case of projects under construction or enhancement, references to generating capacity refer to the net amount of electrical energy that we expect will be available for sale to the relevant power purchasers. As used in this prospectus, "pro forma" information is information presented giving effect to the acquisition of the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project that was consummated on December 18, 2003 and the acquisition of the Puna project that was consummated on June 3, 2004, as if such acquisitions were consummated on January 1, 2003, but not including the acquisitions of the Steamboat 2/3 project and the Steamboat Hills project that were consummated on February 13 and May 20, 2004, respectively.

The Company

We are a leading vertically integrated company engaged in the geothermal and recovered energy power business. We design, develop, build, own and operate clean, environmentally friendly geothermal power plants, and we also design, develop and build, and plan to own and operate, recovered energy-based power plants, in each case, using equipment that we design and manufacture. We conduct our business activities in two business segments. We develop, build, own and operate geothermal power plants in the United States and other countries around the world and sell the electricity they generate. In addition, we design, manufacture and sell equipment for geothermal and recovered energy-based electricity generation and other power generating units and provide services relating to the engineering, procurement, construction, operation and maintenance of geothermal and recovered energy power plants.

All of the projects that we currently own or operate produce electricity from geothermal energy sources. Geothermal energy is a clean, renewable and generally sustainable form of energy derived from the natural heat of the earth. Unlike electricity produced by burning fossil fuels, electricity produced from geothermal energy sources is produced without emissions of certain pollutants such as nitrogen oxide, and with far lower emissions of other pollutants such as carbon dioxide. Therefore, electricity produced from geothermal energy sources contributes significantly less to local and regional incidences of acid rain and global warming than energy produced by burning fossil fuels. Geothermal energy is also an attractive alternative to other sources of energy as part of a national diversification strategy to avoid dependence on any one energy source or politically sensitive supply sources.

In addition to our geothermal energy power generation business, we have developed and continue to develop products that produce electricity from recovered energy or so-called "waste heat." Recovered energy or waste heat represents residual heat that is generated as a by-product of gas turbine-driven compressor stations and in a variety of industrial processes such as cement manufacturing, and is not otherwise used for any purpose. Such residual heat, that would otherwise be wasted, is captured in the recovery process and is used by recovered energy power plants to generate electricity without burning additional fuel and without emissions.

Our Power Generation Business

We are the fastest growing geothermal power generation company in the United States measured by growth

in generating capacity. We also own and operate or control and operate geothermal projects in Guatemala, Kenya, Nicaragua and the Philippines and continue to pursue opportunities to acquire and develop similar projects elsewhere in the world, including in the United States. Most of our projects are located in regions where there is, or is expected to be, demand for additional generating capacity.

In 2003, pro forma revenues from the sale of electricity by our domestic projects were \$128.7 million, constituting approximately 79.1% of our total pro forma revenues from the sale of electricity, and pro forma revenues from the sale of electricity by our foreign projects were \$33.9 million, constituting approximately 20.9% of our total pro forma revenues from the sale of electricity. In 2003, our actual revenues from the sale of electricity by our domestic projects were \$43.8 million and by our foreign projects were \$34.0 million, respectively. Pro forma revenues from the sale of electricity constituted approximately 79.6% of our total pro forma revenues in 2003. As noted previously, such pro forma revenues do not include revenues generated from the Steamboat 2/3 project and Steamboat Hills project, two additional domestic projects that were acquired this year.

Our Projects . The table below summarizes key information relating to our projects that are currently in operation, under construction and subject to enhancement.

Project	Location	Ownership ⁽¹⁾	Commercial Operation Date	Generating Capacity in MW ⁽²⁾	Power Purchaser	Contract Expiration
<u>Projects in Operation</u>						
Domestic						
Ormesa	East Mesa, California	100%	1986/1987	52	Southern California Edison Company	2016/2017

Total Projects under Construction or Enhancement :				<u>86</u>		

(1) We own and operate all of our projects, except the Momotombo project in Nicaragua, which we do not own but which we control and operate through a concession arrangement with the Nicaraguan government, and three of our other projects, in which we have less than full ownership.

(2)

This column represents the net generating capacity of the project, not our net ownership in such generating capacity. Such net generating capacity is based on either (i) operational data for the previous 12 months or (ii) if operational data for the previous 12 months is not available but is available for a shorter period, such available data on an annualized basis.

- (3) This reference includes the Steamboat 1/1A project and Steamboat 2/3 project.
- (4) The power purchase agreement for the Olkaria III project will expire in 2020 or, if Phase II of the project is constructed and completed, 20 years from the completion of such Phase II. Phase II of this project involves a proposed construction of additional facilities that would add approximately 35 MW of generating capacity to this project.
- (5) Projected.
- (6) Incremental to the Steamboat complex.
- (7) The power purchase agreement will expire 20 years from the January 1 immediately following the commercial operation date.
- (8) The power purchase agreement will expire at the later of 20 years from the commencement of commercial operations and 23 years from the commencement of construction works.
- (9) We are currently in discussions with Southern California Edison Company, the power purchaser for this project, regarding these proposed enhancements.
- (10) These enhancements are in their early engineering stage.
- (11) The enhancement will result in an additional 3 MW that can be sold under the existing power purchase agreement and another 6 MW is subject to negotiation of offtake arrangements with the existing power purchaser.

All of the revenues that we derive from the sale of electricity are from fully-contracted payments under long-term power purchase agreements. In the United States, the power purchasers under such agreements are all investor-owned electric utilities. More than 80% of our total pro forma revenues for 2003 from the sale of electricity by our domestic projects were derived from power purchasers that currently have investment grade credit rating. The purchasers of electricity from our foreign projects are either state-owned entities or recently privatized state-owned entities. We have obtained political risk insurance from the Multilateral Investment Guarantee Agency of the World Bank group for all of our foreign projects (other than the Leyte project) in order to cover a portion of any loss that we may suffer upon the occurrence of certain political events covered by such insurance.

Development, Construction, and Acquisition. We have experienced significant growth in recent years, principally through the acquisition of geothermal power plants from third parties and the expansion and enhancement of our existing projects. In December 2003, we acquired the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project, in February 2004, we acquired the Steamboat 2/3 project, in May 2004, we acquired the Steamboat Hills project and in June 2004, we acquired the Puna project. In total, we have increased our net ownership interest in generating capacity from 94 MW as of December 31, 2001 to 312 MW as of June 30, 2004. We currently expect to continue growing our power generation business through:

- the development and construction of new geothermal and recovered energy-based power plants;
- the expansion and enhancement of our existing projects; and
- the acquisition of additional geothermal and other renewable assets from third parties.

As part of these efforts, we regularly monitor requests for proposals from, and submit bids to, investor-owned electric utilities in the United States to provide additional generating capacity, primarily in the western

United States where geothermal resources are generally concentrated. We also respond to international tenders issued by foreign state-owned electric utilities for the development, construction and operation of new geothermal power plants. In addition, we apply our technological expertise to upgrade the facilities of our existing geothermal power plants and to continuously monitor and manage our existing geothermal resources in order to increase the efficiency and generating capacity of such facilities.

We are currently in varying stages of development or construction of new projects and enhancement of existing projects. Based on our current development and construction schedule, which is subject to change at any time and which we may not achieve, we expect to have approximately 66 additional MW in generating capacity in the United States by the end of 2006 and approximately 20 additional MW in Guatemala by June 2006. In addition, we have obtained exclusive rights to develop the geothermal resources of a project in China, which, if implemented, is expected to produce approximately 50 MW in generating capacity. We are also currently in discussions with the Kenyan government and Kenya Power & Lighting Co. Ltd. regarding, among other things, the construction of Phase II of the Olkaria III project in Kenya and the provision of certain collateral and government support. If implemented, Phase II would add approximately 35 MW in generating capacity to the current Olkaria III project. We are also in the early development stage of two new projects in El Salvador. We intend to pursue these opportunities to the extent they continue to meet our investment criteria and business strategy.

Our Products Business

We design, manufacture and sell the following products for electricity generation and provide the following services:

Power Units for Geothermal Power Plants. We design, manufacture and sell power units for geothermal electricity generation, which we refer to as Ormat Energy Converters or OECs. Our customers include contractors and geothermal plant owners and operators.

Power Units for Recovered Energy-Based Power Generation. We design, manufacture and sell power units used to generate electricity from recovered energy or so-called "waste heat" that is generated as a residual by-product of gas turbine-driven compressor stations and a variety of industrial processes such as cement manufacturing, and is not otherwise used for any purpose. Our existing and target customers include interstate natural gas pipeline owners and operators, gas processing plant owners and operators, cement plant owners and operators, and other companies engaged in other energy-intensive industrial processes.

Remote Power Units and other Generators. We design, manufacture and sell fossil fuel powered turbo-generators with a capacity ranging between 200 watts and 5,000 watts, which operate unattended in extreme climate conditions, whether hot or cold. Our customers include contractors installing gas pipelines in remote areas. In addition, we design, manufacture and sell generators for various other uses, including heavy duty direct current generators.

Engineering, Procurement and Construction of Power Plants. We engineer, procure and construct (EPC), as an EPC contractor, geothermal and recovered energy power plants on a turnkey basis, using power units we design and manufacture. Our customers are geothermal power plant owners as well as the same customers described above that we target for the sale of our power units for recovered energy-based power generation. Unlike many other companies that provide EPC services, we have an advantage in that we are using our own manufactured equipment and thus have better control over the timing and delivery of required equipment and its costs.

Operation and Maintenance of Power Plants. We provide operation and maintenance services for geothermal power plants owned by us and by third parties.

In 2003, our actual revenues from our products business were \$41.7 million, constituting approximately 20.4% of our total pro forma revenues and approximately 34.9% of our actual revenues.

Market Opportunity

The geothermal energy industry in the United States experienced significant growth in the 1970s and 1980s, followed by a period of consolidation of owners and operators of geothermal assets in the 1990s. The industry, once dominated by large oil companies and investor-owned electric utilities, now includes several independent

power producers. During the 1990s, growth and development in the geothermal energy industry occurred primarily in foreign markets, and only minimal growth and development occurred in the United States. Since 2001, there has been renewed interest in geothermal energy in the United States as production costs for electricity generated from geothermal resources have become more competitive relative to fossil fuel-based electricity generation, due to the increasing cost of natural gas, and as legislative and regulatory incentives, such as state renewable portfolio standards, have become more prevalent.

Electricity generation from geothermal resources in the United States constitutes a \$1 billion-a-year industry (in terms of revenues) and accounts for almost 20% of all non-hydropower renewable energy-based electricity generation in the United States (according to the Energy Information Administration, Annual Energy Outlook 2004). Although electricity generation from geothermal resources is currently concentrated in California, Nevada, Hawaii and Utah, there are opportunities for development in other states such as Alaska, Arizona, Idaho, New Mexico and Oregon due to the availability of geothermal resources and, in some cases, a favorable regulatory environment in such states.

A recent forecast of the U.S. Department of Energy projects the addition of geothermal installations with generating capacity totaling 6,800 MW by 2025, based on the assumption that natural gas prices will remain relatively stable at current levels. This forecast is based on existing, known geothermal resources and does not take into account any positive effects on generating capacity resulting from new technology, such as enhanced utilization of existing geothermal bases and engineered geothermal systems (according to the Energy Information Administration, Annual Energy Outlook 2004).

Much of this growth potential stems from growing global concerns about the environment. Power plants that use fossil fuels generate higher levels of air pollution and their emissions have been linked to acid rain and global warming. In response to an increasing demand for "green" energy, many countries have adopted legislation requiring, and providing incentives for, electric utilities to sell electricity generated from renewable energy sources. In the United States, Arizona, California, Connecticut, Hawaii, Illinois, Iowa, Maine, Maryland, Massachusetts, Minnesota, Nevada, New Jersey, New Mexico, Pennsylvania, Rhode Island, Texas, and Wisconsin have all adopted renewable portfolio standards, renewable portfolio goals, or other similar laws requiring or encouraging electric utilities in such states to generate or buy a certain percentage of their electricity from renewable energy sources or recovered heat sources. Eleven of these seventeen states (including California, Nevada and Hawaii, where we have been the most active in our geothermal energy development and in which all of our U.S. projects are located) define geothermal resources as "renewables." Several other states are also considering the adoption of renewable portfolio standards, renewable portfolio goals or similar legislation.

We believe that these legislative measures and initiatives present a significant market opportunity for us. For example, California generally requires that the electricity supplied by its investor-owned electric utility companies operating within the state must be increased by at least 1% every year until it reaches 20% by 2017. Presently, 9% of the electricity supplied by the three main electric utility companies in California is derived from renewable resources. Nevada's renewable portfolio standard requires each Nevada electric utility to obtain 5% of its annual energy requirements from renewable energy sources in 2004, which requirement increases to 7% in 2005 and thereafter increases by 2% every two years until 2013, when 15% of such annual energy requirements must be provided from renewable energy sources. Hawaii's renewable portfolio standard requires each Hawaiian electric utility to obtain 8% of its net electricity sales from renewable energy sources by December 31, 2005 and 10% by December 31, 2010 and 20% by December 31, 2020.

In addition, in some states an entity generating electricity from renewable resources, such as geothermal energy, is awarded renewable energy credits, which we refer to as RECs, that can be sold for cash. RECs have been sold in the market for 0.5 cents to 2 cents a kWh during the past year.

Outside of the United States, the majority of power generating capacity has historically been owned and controlled by governments. During the past decade, however, many foreign governments have privatized their power generation industries through sales to third parties and have encouraged new capacity development and/or refurbishment of existing assets by independent power developers. These foreign governments have taken a variety of approaches to encourage the development of competitive power markets, including awarding long-term contracts for energy and capacity to independent power generators and creating competitive wholesale markets for selling and trading energy, capacity and related products. Different countries have also adopted active governmental programs designed to encourage clean renewable energy power generation. For example, China,

where we are currently developing a project, has in place a five-year Plan for New and Renewable Energy Commercialization Development. The plan's goals include increasing production of geothermal energy as well as providing electricity in remote areas. Several Latin American countries have rural electrification programs and renewable energy programs. For example, Nicaragua, where we operate the Momotombo project, is currently developing a national rural electrification plan with the support of the World Bank. One of the plan's primary goals is the reduction of market barriers to renewable energy technologies useful for remote areas not connected to the main electricity grid. Nicaragua also has a national master plan for geothermal energy, which is intended to facilitate the awarding of concessions for geothermal exploration and development in the country. Guatemala, another country in which we have ongoing operations (the Zunil project) and development activities (the Amatitlan project), recently approved a law which creates incentives for power generation from renewable energy sources by, among other things, providing economic and fiscal incentives such as exemptions from taxes on the importation of relevant equipment and various tax exemptions for companies implementing renewable energy projects. We believe that these developments and governmental plans

will create opportunities for us to acquire and develop geothermal power generation facilities internationally as well as create additional opportunities for us to sell our remote power units and other products.

In addition to our geothermal power generation activities, we have also identified recovered energy power generation as a significant market opportunity for us in the United States and internationally. We are initially targeting the North American market, where we expect that recovered energy-based power generation will be derived principally from compressor stations along interstate pipelines, from midstream gas processing facilities, and from processing industries in general. Several states, as well as the federal government, have recognized the environmental benefits of recovered energy-based power generation. For example, Nevada and Hawaii allow electric utilities to include recovered energy-based power generation in calculating their compliance with the state's renewable portfolio standards. In addition, North Dakota, South Dakota and the Department of Agriculture (through the Rural Electricity Service) have certified recovered energy-based power generation as "green" energy, which qualifies recovered energy-based power generators (whether in those two states or elsewhere in the United States) for federally subsidized, low cost funding. We believe that the European market has similar potential and we expect to leverage our early success in North America in order to expand into such market and other markets worldwide. In North America alone, we estimate the potential total market for recovered energy-based generation to be approximately 1000 MW.

Competitive Strengths

Competitive Assets. Our assets are highly competitive:

- *Contracted Generation .* All of the electricity generated by our geothermal power plants is currently sold pursuant to long-term power purchase agreements, providing generally predictable cash flows.
- *Baseload Generation .* All of our geothermal power plants supply a part of the baseload capacity of the electric system in their respective markets, meaning that they operate to serve all or a part of the minimum power requirements of the electric system in such market on an around-the-clock basis. Because our projects supply a part of the baseload needs of the respective electric system and are marginally weather dependent, we have a competitive advantage over other renewable energy sources, such as wind power, solar power, or hydro-electric power (to the extent dependent on rainfall), which compete with us to meet electric utilities' renewable portfolio requirements but which cannot serve baseload capacity because of the weather dependence and thus intermittent nature of these other renewable energy sources.
- *Competitive Pricing .* Geothermal power plants, while site specific, are economically feasible to develop, construct, own and operate in many locations, and the electricity they generate is generally price competitive as compared to electricity generated from fossil fuels or other renewable sources under existing economic conditions and existing tax and regulatory regimes.

Growing Legislative Demand for Environmentally-Friendly Renewable Resource Assets. All of our

existing projects produce electricity from geothermal energy sources. Geothermal energy is a clean, renewable and generally sustainable energy source. Unlike electricity produced by burning fossil fuels, electricity produced from geothermal energy sources is produced without emissions of certain pollutants such as nitrogen oxide, and with far lower emissions of other pollutants such as carbon dioxide. The characteristics of geothermal energy give us a competitive advantage over fossil fuel-based electricity generation as countries increasingly seek to balance environmental concerns with demands for reliable sources of electricity.

High Efficiency from Vertical Integration. Unlike any of our competitors in the geothermal industry, we are a fully-integrated geothermal equipment, services and power provider. We design,

develop and manufacture most of the equipment we use in our geothermal power plants. Our intimate knowledge of the equipment that we use in our operations allows us to operate and maintain our projects efficiently and to respond to operational issues in a timely and cost efficient manner. Moreover, given the efficient communications among our subsidiary that designs and manufactures the products we use in our operations and our subsidiaries that own and operate our projects, we are able to quickly and in a cost-effective manner identify and repair mechanical issues and to have technical assistance and replacement parts available to us as and when needed.

Highly Experienced Management Team. We have a highly qualified senior management team with extensive experience in the geothermal power sector. The key members of our senior management team have worked in the power industry for most of their careers and average over 20 years of industry experience.

Technological Innovation. We own or have rights to use more than 70 patents relating to various processes and renewable resource technologies. Our ability to draw upon internal resources from various disciplines related to the geothermal power sector, such as geological expertise relating to reservoir management and equipment engineering relating to power units, allows us to be innovative in creating new technologies and technological solutions.

No Exposure to Fuel Price Risk. A geothermal power plant does not need to purchase fuel (such as coal, natural gas, or fuel oil) in order to generate electricity. Thus, once the geothermal reservoir has been identified and estimated to be sufficient for use in a geothermal power plant and the drilling of wells is complete, the plant is not exposed to fuel price or fuel delivery risk.

Business Strategy

Our strategy is to continue building a geographically balanced portfolio of geothermal and recovered energy assets, and to continue to be a leading manufacturer and provider of products and services related to renewable energy. We intend to implement this strategy through:

- *Development and Construction of New Projects* — continuously seeking out commercially exploitable geothermal resources and developing and constructing new geothermal and recovered energy-based power projects in jurisdictions where the regulatory, tax and business environments encourage or provide incentives for such development and which meet our investment criteria;
- *Increasing Output from Our Existing Projects* — increasing output from our existing geothermal power projects by adding additional generating capacity, upgrading plant technology, and improving geothermal reservoir operations, including improving methods of heat source supply and delivery;
- *Acquisition of New Assets* — acquiring from third parties additional geothermal and other renewable assets that meet our investment criteria;
- *Technological Expertise* — investing in research and development of renewable energy technologies and leveraging our technological expertise to continuously improve power plant components, reduce operations and maintenance costs, develop competitive and environmentally friendly products for electricity generation and target new service opportunities;

- *Developing Recovered Energy* — establishing a first-to-market leadership position in recovered energy projects in North America and building on that experience to expand into other markets worldwide; and
- *Long-term Contracts* — entering into long-term contracts with energy purchasers that will provide stable cash flows.

History

Ormat Industries is our parent company. Ormat Industries is an international power systems company whose predecessor, Ormat Turbines Ltd., was founded in 1965 by Lucien and Yehudit Bronicki for the principal purpose of developing equipment for the production of clean, renewable energy. Lucien and Yehudit Bronicki continue to be Ormat Industries' controlling shareholders. Ormat Industries and its subsidiaries have developed geothermal power plants, remote power units, industrial recovered energy systems and solar energy plants worldwide. At December 31, 2003, Ormat Industries and its subsidiaries had more than 600 employees worldwide, and had revenues of approximately \$119.8 million. Ormat Industries is listed on the Tel Aviv Stock Exchange under the symbol "ORMT." Ormat Industries and its subsidiaries have supplied, developed, constructed or rehabilitated over 700 MW of geothermal power plants in 22 countries, constituting approximately 10% of geothermal installed capacity worldwide.

We were formed by Ormat Industries in 1994 for the purpose of investing and holding ownership interests in power projects, as well as constructing and operating power plants owned by us and by third parties. We have served as the holding company for all of Ormat Industries' geothermal power projects. In December 2003, we acquired the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project, in February 2004, we acquired the Steamboat 2/3 project, in May 2004, we acquired the Steamboat Hills project and in June 2004, we acquired the Puna project. On February 13, 2004, Ormat Funding, our wholly owned subsidiary, completed an offering of senior secured notes that raised gross proceeds of \$190 million. Pursuant to the terms of such offering, Ormat Funding is required to exchange the senior secured notes it issued thereunder for senior secured notes registered under the Securities Act of 1933, as amended, no later than January 2005. Effective as of July 1, 2004, Ormat Industries sold to us its business relating to the manufacturing and sale of energy-related equipment and services, which is based in Israel. Following this sale, we now hold all of Ormat Industries' power generation products business, and had, as of July 1, 2004, 676 employees. Upon completion of this offering, Ormat Industries will own % of our outstanding common stock.

Corporate Structure

A summary chart of our corporate structure showing our main subsidiaries and assets following the completion of this offering is depicted below.

- 1 We own a 50% ownership interest in the Mammoth project.
 2 We own an 80% ownership interest in the Leyte project.
 3 We own a 21% ownership interest in the Zunil project.

The Offering

Issuer	Ormat Technologies, Inc.
Common stock offered by Ormat Technologies, Inc.	shares
Underwriters' option to purchase additional shares	shares
Common stock outstanding after giving effect to this offering	shares
Use of proceeds	We estimate that the net proceeds we will receive from this offering will be approximately \$ million, or approximately \$ million if the underwriters exercise their over-allotment option in full, in each case, after deducting the underwriting discounts and commissions and estimated expenses of this offering payable by us. We expect to use the net proceeds from this offering to finance the continued growth of our business and for general corporate purposes, including for purposes of making investments or acquisitions. However, we have no present understanding or agreement

relating to any specific acquisition. Accordingly, management will have significant flexibility in applying the net proceeds of the offering. Pending the use of such proceeds as described above, we intend to invest such proceeds in interest-bearing instruments. See "Use of Proceeds."

Proposed New York Stock Exchange symbol ORA

Except as otherwise indicated, all common stock information in this prospectus is based on the number of shares of common stock outstanding on and:

- assumes an initial public offering price of \$ per share;
- excludes shares of common stock subject to outstanding stock options with a weighted average exercise price of \$ per share;
- excludes shares of common stock available for future grant or issuance under our 2004 Incentive Compensation Plan; and
- excludes the shares of common stock subject to the option granted to the underwriters to purchase additional shares of common stock in this offering to cover over-allotments.

Dividend Policy

We have adopted a dividend policy pursuant to which we currently expect, commencing with the first full fiscal quarter following the consummation of this offering, to distribute at least 20% of our annual profits available for distribution by way of quarterly dividends. Notwithstanding this policy, dividends will be paid only when, as and if determined by our board of directors out of funds legally

available therefor. Our board of directors may, from time to time, examine our dividend policy and may, in their absolute discretion, change such policy.

Risk Factors

Investing in our common stock involves a number of material risks. For a discussion of certain risk factors that should be considered in connection with your investment in our common stock, see "Risk Factors" beginning on page 16.

Corporate Information

Our principal executive offices are located at 980 Greg Street, Sparks, Nevada 89431. Our telephone number is (775) 356-9029. The majority of our senior management and all of our production and manufacturing facilities are located in Yavne, Israel.

Summary Historical and Unaudited Pro Forma Condensed Consolidated Financial Data

The following table sets forth our summary historical and unaudited pro forma condensed consolidated financial data for the periods ended and at the dates indicated in such table. We have derived the historical consolidated financial data as of and for the periods ended December 31, 2001, 2002 and 2003 from our audited consolidated financial statements included elsewhere in this prospectus. We have derived the historical consolidated financial data as of and for the three months ended March 31, 2003 and March 31, 2004 from our unaudited condensed consolidated financial statements included elsewhere in this prospectus. In the opinion of our management, our unaudited historical condensed consolidated financial statements contain all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of our financial position, results of operations and cash flows. The results of operations for the three-month periods ended March 31, 2003 and March 31, 2004 are not necessarily indicative of the operating results to be expected for the full fiscal years encompassing such periods. The pro forma data as of and for the fiscal year ended December 31, 2003 is derived from the unaudited pro forma condensed financial statements included elsewhere in this prospectus and gives effect to the acquisition of the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project that was consummated on December 18, 2003 and the acquisition of the Puna project that was consummated on June 3, 2004, as if such acquisitions were consummated on January 1, 2003, but not including the acquisitions of the Steamboat 1/1A project, Steamboat 2/3 project and the Steamboat Hills project that were consummated on June 30, 2003, February 13, 2004 and May 20, 2004, respectively.

The information set forth below should be read in conjunction with "Unaudited Pro Forma Condensed Financial Data", "Selected Historical Financial Data", "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and the financial statements relating to the Heber 1, Heber 2, Mammoth and Puna projects included elsewhere in this prospectus.

RISK FACTORS

You should carefully consider the risks described below together with the other information included in this Prospectus before deciding to invest in our common stock. Our business, financial condition, or results of operations could be adversely affected by any of these risks. If any of these risks occur, the value of our common stock could decline and you might lose all or part of your investment.

Risks Relating to Our Business and Industry

Our financial performance depends on the successful operation of our geothermal power plants which is subject to various operational risks.

We derive a significant portion of our revenues from, and we depend upon the successful operation of, our subsidiaries' geothermal power plants. The cost of operation and maintenance and the operating performance of geothermal power plants may be adversely affected by a variety of factors, including some which are discussed elsewhere in these risk factors and the following:

- regular and unexpected maintenance and replacement expenditures;
- shutdowns due to the breakdown or failure of our equipment or the equipment of the transmission serving utility;
- labor disputes;
- the presence of hazardous materials on our project sites; and
-

catastrophic events such as fires, explosions, earthquakes, floods, releases of hazardous materials, severe storms or similar occurrences affecting our projects or any of the power purchasers or other third parties providing services to our projects.

Any of these events could significantly increase the expenses incurred by our projects or reduce the overall generating capacity of our projects and could significantly reduce or entirely eliminate the revenues generated by one or more of our projects, which in turn would reduce our net income and could materially and adversely affect our business, financial condition, future results and cash flow.

Our exploration, development, and operation of geothermal energy resources is subject to geological risks and uncertainties which may result in decreased performance or increased costs for our projects.

Our business involves the exploration, development and operation of geothermal energy resources. These activities are subject to uncertainties, which vary among different geothermal reservoirs and are in some respects similar to those typically associated with oil and gas exploration and development, such as dry holes, uncontrolled releases and pressure and temperature decline, all of which can increase our operating costs, capital expenditures or the efficiency of our power plants. Prior to our acquisition of the Steamboat Hills project, one of the wells related to such project experienced an uncontrolled release. In addition, the high temperature and high pressure in the Puna project's geothermal energy resource requires special reservoir management and monitoring. Further, the temperature of the geothermal resource at our Heber 1 project has declined since the project commenced operations and, as a result, the project currently operates at a level that is close to the minimum performance requirements set forth in the project's power purchase agreement. Because geothermal reservoirs are complex geological structures, we can only estimate their geographic area and sustainable output. The viability of geothermal projects depends on different factors directly related to the geothermal resource, such as the heat content (the relevant composition of temperature and pressure) of the geothermal reservoir, the useful life (commercially exploitable life) of the reservoir and operational factors relating to the extraction of geothermal fluids. Our geothermal energy projects may suffer an unexpected decline in the capacity of their respective geothermal wells and are exposed to a risk of geothermal reservoirs not being sufficient for sustained generation of the electrical power capacity desired over time. In addition, we may fail to find commercially viable geothermal resources in the expected quantities and temperatures which would adversely affect our development of geothermal power projects.

Additionally, geothermally active areas, such as the areas in which our projects are located, are subject to frequent low-level seismic disturbances. Serious seismic disturbances are possible and could result in damage to our projects or equipment or degrade the quality of our geothermal resources to such an extent that we could not perform under the power purchase agreement for the affected project, which in turn could reduce our net income and materially and adversely affect our business, financial condition, future results and cash flow. If we suffer a serious seismic disturbance, our business interruption and property damage insurance may not be adequate to cover all losses sustained as a result thereof. In addition, insurance coverage may not continue to be available in the future in amounts adequate to insure against such seismic disturbances.

Our business development activities may not be successful and our projects under construction may not commence operation as scheduled despite the expenditure of significant amounts of capital.

We are currently in the process of developing and constructing a number of new power plants. Our success in developing a particular project is contingent upon, among other things, negotiation of satisfactory engineering and construction agreements and power purchase agreements, receipt of required governmental permits, obtaining adequate financing, and the timely implementation and satisfactory completion of construction. We may be unsuccessful in accomplishing any of these matters or doing so on a timely basis. Although we may attempt to minimize the financial risks attributable to the development of a project by securing a favorable power purchase agreement, obtaining all required governmental permits and approvals and arranging adequate financing prior to the commencement of construction, the development of a power project may require us to incur significant expenses for preliminary engineering, permitting and legal and other expenses before we can determine whether a project is feasible, economically attractive or capable of being financed.

Currently, we have power plants under development or construction in the United States, Kenya, Guatemala, China and El Salvador, and we intend to pursue the expansion of some of our existing plants and the development of other new plants. Our completion of these facilities is subject to substantial risks, including:

- unanticipated cost increases;
- shortages and inconsistent qualities of equipment, material and labor;
- work stoppages;
- inability to obtain permits and other regulatory matters;
- failure by key contractors and vendors to timely and properly perform;
- adverse environmental and geological conditions (including inclement weather conditions); and
- our attention to other projects,

any one of which could give rise to delays, cost overruns, the termination of the plant expansion, construction or development or the loss (total or partial) of our interest in the project under development, construction or expansion.

We may be unable to obtain the financing we need to pursue our growth strategy and any future financing we receive may be less favorable to us than our current financing arrangements, either of which may adversely affect our ability to expand our operations.

Our geothermal power plants generally have been financed using leveraged financing structures, consisting of non-recourse or limited recourse debt obligations. As of March 31, 2004, we had approximately \$427.6 million of total consolidated indebtedness, of which approximately 88.5% represented non-recourse debt and limited recourse debt held by our subsidiaries. Each of our projects under development or construction and those projects and businesses we may seek to acquire or construct will require substantial capital investment. Our continued access to capital with acceptable terms is necessary for the success of our growth strategy. Our attempts to obtain future financings may not be successful or on favorable terms.

Market conditions and other factors may not permit future project and acquisition financings on terms similar to those our subsidiaries have previously received. Our ability to arrange for financing on a substantially non-recourse or limited recourse basis and the costs of such capital are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of current projects, the credit quality of the projects being financed, the political situation in the country where the project is located and the continued existence of tax and securities laws which are conducive to raising capital. If we are not able to obtain financing for our projects on a substantially non-recourse or limited recourse basis, we may have to finance them using recourse capital such as direct equity investments, parent company loans or the incurrence of additional debt by us.

Also, in the absence of favorable financing options, we may decide not to build new plants or acquire facilities from third parties. Any of these alternatives could have a material adverse effect on our growth prospects.

Our foreign projects expose us to risks related to the application of foreign laws, taxes, economic conditions, labor supply and relations, political conditions and policies of foreign governments which risks may delay or reduce our ability to profit from such projects.

We have substantial operations outside of the United States. Our foreign operations are subject to regulation by various foreign governments and regulatory authorities and are subject to the application of foreign laws. Such foreign laws or regulations may not provide for the same type of legal certainty and rights, in connection with our contractual relationships in such countries, as are afforded to our projects in the United States, which may adversely affect our ability to receive revenues or enforce our rights in connection with such foreign operations.

In addition, the laws and regulations of some countries may limit our ability to hold a majority interest in some of the projects that we may develop or acquire, thus limiting our ability to control the development, construction and operation of such projects. Our foreign operations are also subject to significant political, economic and financial risks, which vary by country, and include:

- changes in government policies or personnel;
- changes in general economic conditions;
- restrictions on currency transfer or convertibility;
- changes in labor relations;
- political instability and civil unrest;
- changes in the local electricity market;
- breach or repudiation of important contractual undertakings by governmental entities; and
- expropriation and confiscation of assets and facilities.

In particular, the Philippines is in the midst of an ongoing privatization of the electric industry, and in Guatemala the electricity sector was partially privatized and it is currently unclear whether further privatization will occur in the future. Such developments may affect our existing Leyte and Zunil projects and the Amatitlan project currently under construction if, for example, they result in changes to the prevailing tariff regime or in the identity and creditworthiness of our power purchasers. In Nicaragua, there is potential labor unrest and strengthening of labor unions, which may adversely affect our Momotombo project. In Kenya, the new government that was elected in 2002 is making an effort to deliver on campaign promises to reduce the price for electricity and is applying pressure on independent power producers, such as our Olkaria III project, to lower their tariffs. In addition, Kenya's new government is considering a further restructuring and privatization of the electricity industry in Kenya and may divide Kenya Power & Lighting Co. Ltd., the power purchaser for our Olkaria III project, into separate entities and then privatize one or more of such resulting entities. A material tariff reduction or any break-up and potential privatization of Kenya Power & Lighting Co. Ltd. may adversely affect our Olkaria III project. We are also currently in discussions with the Kenyan

government and Kenya Power & Lighting Co. Ltd. regarding, among other things, the construction of Phase II of the Olkaria III project in Kenya and the provision of certain collateral and government support. We must notify Kenya Power & Lighting Co. Ltd., by April 17, 2005, whether we will proceed to construct Phase II of the Olkaria III project and, if we notify Kenya Power & Lighting Co. Ltd. that we will not proceed with such construction, then the portion of the current power purchase agreement applicable to Phase II of the Olkaria III project will be terminated (but the current portion applicable to Phase I will be unaffected). If we fail to provide such notification we will be required to construct Phase II and reach commercial operations by May 31, 2007 in order to avoid the application of financial penalties, or at the latest by April 17, 2008 in order to avoid termination of the entire power purchase agreement. In addition, if we do not proceed with the construction of Phase II, we may lose some or all of our investment relating to Phase II, which is approximately \$22.2 million.

Although we generally obtain political risk insurance in connection with our foreign projects, such political risk insurance does not mitigate all of the above-mentioned risks. In addition, insurance proceeds received pursuant to our political risk insurance policies, where applicable, may not be adequate to cover all losses

sustained as a result of any covered risks and may at times be pledged in favor of the lenders to a project as collateral. Also, insurance may not be available in the future with the scope of coverage and in amounts of coverage adequate to insure against such risks and disturbances.

Our foreign projects and foreign manufacturing operations expose us to risks related to fluctuations in currency rates, which may reduce our profits from such projects and operations.

Risks attributable to fluctuations in currency exchange rates can arise when any of our foreign subsidiaries borrow funds or incur operating or other expenses in one type of currency but receive revenues in another. In such cases, an adverse change in exchange rates can reduce such subsidiary's ability to meet its debt service obligations, reduce the amount of cash and income we receive from such foreign subsidiary or increase such subsidiary's overall expenses. In addition, the imposition by foreign governments of restrictions on the transfer of foreign currency abroad or restrictions on the conversion of local currency into foreign currency would have an adverse effect on the operations of our foreign projects and foreign manufacturing operations and may limit or diminish the amount of cash and income that we receive from such foreign projects and operations.

A significant portion of our net revenue is attributed to payments made by power purchasers under power purchase agreements. The failure of any such power purchaser to perform its obligations under the relevant power purchase agreement or the loss of a power purchase agreement due to a default would reduce our net income and could materially and adversely affect our business, financial condition, future results and cash flow.

A significant portion of our net revenue is attributed to revenues derived from power purchasers under the relevant power purchase agreements. Southern California Edison Company, Hawaii Electric Light Company, PNOG-Energy Development Corporation and Sierra Pacific Power Company have accounted for 48.3%, 9.2%, 6.2% and 5.6% of our pro forma revenues, respectively, for the fiscal year ended December 31, 2003. Based on publicly available information, as of June 30, 2004, the issuer ratings of Southern California Edison Company, Sierra Pacific Power Company and Nevada Power Company (a potential power purchaser for the Desert Peak 2 and Desert Peak 3 projects) were Baa3 (under review), B1 (negative outlook) and B1 (negative outlook), respectively, from Moody's Investors Services and BBB (stable outlook), B+ (negative outlook), and B+ (negative outlook), respectively, from Standard & Poor's Ratings Services and the issuer rating of Hawaii Electric Light Company was BBB+ (stable outlook) by Standard & Poor's Ratings Services. The credit ratings of any power purchaser may decrease from time to time. There is no publicly available information with respect to the credit ratings or stability of the power purchasers under the power purchase agreements for our foreign projects.

Neither we nor any of our affiliates make any representations as to the financial condition or creditworthiness of any purchaser under a power purchase agreement and nothing in this prospectus should be construed as such a representation.

There is a risk that any one or more of the power purchasers may not fulfill their respective payment obligations under their power purchase agreements. For example, as a result of the energy crisis in California, Southern California Edison Company withheld payments it owed under various of its power purchase agreements with a number of power generators (such as the Ormesa, Heber 1, Heber 2, and Mammoth projects) payable for certain energy delivered between November 2000 and March 2001 under such power purchase agreements until March 2002. In the case of our Ormesa project (which we acquired in April 2002), the payment withheld by Southern California Edison Company totaled \$21.2 million. If any of the power purchasers fails to meet its payment obligations under its power purchase agreements, it could materially and adversely affect our business, financial condition, future results and cash flow.

In connection with the power purchase agreements for the Ormesa project, Southern California Edison Company has raised an issue regarding a potential breach by the Ormesa project of such power purchase agreements as a result of the use of power from the GEM 2 and GEM 3 plants by the Ormesa project for auxiliary purposes. The loss of a power purchase agreement as a result of a default would materially and adversely affect our business, financial condition, future results and cash flow.

Seasonal variations may cause significant fluctuations in our cash flows, which may cause the market price of our common stock to fall in certain periods.

Our results of operations are subject to seasonal variations. This is primarily because some of our domestic projects receive higher capacity payments under the power purchase agreements during the summer months and

due to the generally higher short run avoided costs in effect during the summer months. Some of our other projects may experience reduced generation during warm periods due to the lower heat differential between the geothermal fluid and the ambient surroundings. Such seasonal variations could materially and adversely affect our business, financial condition, future results and cash flow. If our operating results fall below the public's or analysts' expectations in some future period or periods, the market price of our common stock will likely fall in such period or periods.

Pursuant to the terms of some of our power purchase agreements with investor-owned electric utilities in states that have renewable portfolio standards, the failure to supply the contracted capacity thereunder may result in the imposition of penalties.

Pursuant to the terms of certain of the power purchase agreements that we have entered into and under which we will sell electricity from certain projects that are currently under development and construction, we may be required to make payments to the relevant power purchaser in an amount equal to such purchaser's replacement costs for renewable energy relating to any shortfall amount of renewable energy that we do not provide as required under the power purchase agreement and which such power purchaser is forced to obtain from an alternate source. In addition, we may be required to make payments to the relevant power purchaser in an amount equal to its replacement costs relating to any renewable energy credits we do not provide as required under the relevant power purchase agreement. We may also be required to pay liquidated damages if certain minimum performance requirements are not met under certain of our power purchase agreements, all of which could materially and adversely affect our business, financial condition, future results and cash flow. Our Puna project was not in compliance with the minimum performance requirements of its power purchase agreement at the time we acquired such project and is currently not in compliance with such requirements. Such non-compliance has resulted in the imposition of sanctions that have reduced, and as long as such non-compliance continues to exist, will continue to reduce, the aggregate amount of revenues payable to us from the power purchaser. Further, the temperature of the geothermal resource at our Heber 1 project has declined from the date on which the project has commenced operations and, as a result, the project currently operates at a level that is close to the minimum performance requirements set forth in such project's power purchase agreement.

The short run avoided cost for our power purchasers may decline, which would reduce our project revenues and could materially and adversely affect our business, financial condition, future results and cash flow.

Under the power purchase agreements for our projects in California, the price that Southern California Edison Company pays for energy is based upon its short run avoided costs, which are the incremental costs that it would have incurred had it generated the relevant electrical energy itself or purchased such energy from others. Under settlement agreements between Southern California Edison Company and a number of Qualifying Facility power generators in California, including our subsidiaries, the energy price component payable by Southern California Edison Company has been fixed through April 2007, and thereafter will be based on Southern California Edison Company's short run avoided costs, as determined by the California Public Utilities Commission, which we refer to as CPUC. These short run avoided costs are made available by Southern California Edison Company to the public and may vary substantially on a monthly basis, based primarily on gas prices and other factors. The levels of short run avoided cost prices paid by Southern California Edison Company may decline following the expiration date of the settlement agreements, which in turn would reduce our project revenues derived from Southern California Edison Company under our power purchase agreements with it and could materially and adversely affect our business, financial condition, future results and cash flow.

In addition, under certain of the power purchase agreements for our projects in Nevada, the price that Sierra Pacific Power Company pays for energy and capacity is based upon its short run avoided costs. These short run avoided costs, and in turn the rates payable by Sierra Pacific Power Company, may decline, which in turn would reduce the aggregate amount of project revenues recovered by our Nevada projects pursuant to the relevant Nevada project power purchase agreements. Such a decrease in project revenues could adversely affect our business, financial condition, future results and cash flow.

In response to an order issued by a California State Court of Appeal, the CPUC has commenced an administrative proceeding in order to address short run avoided cost pricing for Qualifying Facilities for the period spanning from December 2000 to March 2001. The court directed the CPUC to modify short run avoided cost pricing on a retroactive basis to the extent that the CPUC determined that short run avoided cost prices were not sufficiently "accurate" or "correct." If the short run avoided cost prices charged during the period in question

were determined by the CPUC not to be "accurate" or "correct," retroactive price adjustments could be required for any of our Qualifying Facilities in California whose payments are tied to short run avoided cost pricing, including the Heber 1, Mammoth and Ormesa projects. Currently, it is not possible to predict the outcome of such proceeding, however, any retroactive price adjustment required to be made in relation to any of our projects may require such projects to make refund payments or charge less for future sales, which could materially and adversely affect our business, financial condition, future results and cash flow.

If any of our domestic projects loses its Qualifying Facility status under PURPA, or if amendments to PURPA are enacted that substantially reduce the benefits currently afforded to our Qualifying Facilities, our domestic operations could be adversely affected.

The operations of most of our domestic projects are subject to, and benefit from, the Public Utility Regulatory Policies Act of 1978, as amended, which we refer to as PURPA, are subject to limited provisions of the Federal Power Act, which we refer to as FPA, and are potentially subject to the provisions of various other energy laws and regulations, including the Public Utility Holding Company Act of 1935, as amended, which we refer to as PUHCA, other provisions of the FPA and certain state and local laws and regulations regarding rates and financial and organizational requirements for electric utilities.

Qualifying Facility status under PURPA exempts our projects from PUHCA, most of the provisions of the FPA, and certain state laws concerning rates and the financial and organizational regulation of electric utilities. If any of our domestic projects in which we have an interest loses its

Qualifying Facility status and no regulatory exemptions apply or if amendments to PURPA are enacted that substantially reduce the benefits currently afforded Qualifying Facilities, our operations could be adversely affected.

In the event that one of our domestic projects loses its Qualifying Facility status, such project and we would become subject to PUHCA and such project would become subject to the full scope of the FPA and applicable state regulations unless an exemption or waiver applies, such as "exempt wholesale generator" ("EWG", as defined under PUHCA) status or "utility geothermal small power production facility" (as defined under PURPA regulations) status, for such project. The application of PUHCA and such other regulations to our projects would require our operations to comply with an increasingly complex regulatory regime that may be costly and greatly reduce our operational flexibility. In the unlikely event that none of the PUHCA exemptions or waivers are available, we could become a public utility holding company under PUHCA, which could be deemed to occur prospectively or retroactively to the date that any of our projects lost its Qualifying Facility status. In addition, our other domestic projects could lose Qualifying Facility status because our interests in such projects could be considered to be electric utility holding company interests for purposes of the 50% limit on ownership of Qualifying Facilities by electric utilities or electric utility holding companies. As a result of such loss of Qualifying Facility status and in the absence of an applicable exemption or waiver, the Federal Energy Regulatory Commission, which we refer to as FERC, or relevant state regulators, whichever had jurisdiction, may order partial refunds of past amounts paid by the relevant power purchaser or order a reduction of the rate pursuant to the power purchase agreement prospectively, or both, and thus could cause the loss of some or all of our revenues payable pursuant to the related power purchase agreement, result in significant liability for refunds of past amounts paid, or otherwise impair the value of our projects.

A loss of Qualifying Facility status also could permit the power purchaser, pursuant to the terms of the particular power purchase agreement, to cease taking and paying for electricity from the relevant project or, consistent with FERC precedent, to seek refunds of past amounts paid. This could cause the loss of some or all of our revenues payable pursuant to the related power purchase agreement, result in significant liability for refunds of past amounts paid, or otherwise impair the value of our project. If a power purchaser were to cease taking and paying for electricity or seek to obtain refunds of past amounts paid, there can be no assurance that the costs incurred in connection with the project could be recovered through sales to other purchasers or that we would have sufficient funds to make such payments. In addition, the loss of Qualifying Facility status would be an event of default under the financing arrangements currently in place for some of our projects, which would enable the lenders to exercise their remedies and enforce the liens on the relevant project.

The United States Congress is considering proposed legislation that would amend PURPA by limiting the mandatory purchase obligations of power purchasers under new power purchase agreements. The enactment of such legislation could adversely affect our new projects or enhancements of existing projects that do not have a

current power purchase agreement.

An adverse FERC ruling related to the use by the Ormesa project of power generated from another Qualifying Facility for auxiliary purposes may adversely affect our operations and financial results.

Our Ormesa project uses electricity generated by two of our power plants for pumps that help reinject its geothermal brine after it has been used for power generation. According to a recent FERC decision involving such project, a geothermal Qualifying Facility that obtains electricity for the operation of its reinjection pumps from an electric utility must reduce its net capacity available for sale by an equivalent amount, unless such electricity is obtained from another Qualifying Facility. FERC has recently granted a rehearing of its decision for further consideration. If FERC were to reverse its ruling regarding electricity provided by another Qualifying Facility for reinjection pumps, our Ormesa project would be required to reduce its capacity for sale by the amount of power used for such purposes. Such a reversal by FERC could have an adverse effect on the revenues that our Ormesa project receives from its power sales and may impact the operations at some of our other projects.

Our Heber 1 and Mammoth projects purchase electricity for their reinjection pumps from Southern California Edison Company. If FERC were to uphold its ruling that electricity obtained from third parties that are not Qualifying Facilities for use by reinjection pumps must be subtracted from geothermal projects' net capacity, and if such ruling was to be sustained on appeal, this could have an adverse effect on the revenues that our Heber 1 and Mammoth projects receive from their power sales. Although FERC has not previously applied rulings such as these retroactively in similar cases, if FERC were to apply such rulings retroactively, our subsidiaries may owe Southern California Edison Company a refund for prior sales of electricity in amounts that correspond to the historical power purchases for reinjection pumping.

Our financial performance is significantly dependent on the successful operation of our projects which is subject to changes in the legal and regulatory environment affecting our projects.

All of our projects are subject to extensive regulation and therefore changes in applicable laws or regulations, or interpretations of those laws and regulations, could result in increased compliance costs, the need for additional capital expenditures or the reduction of certain benefits currently available to our projects. The structure of federal and state energy regulation is currently, and may continue to be, subject to challenges, modifications, the imposition of additional regulatory requirements, and restructuring proposals. We and our power purchasers may not be able to obtain all regulatory approvals that may be required in the future, or any necessary modifications to existing regulatory approvals, or maintain all required regulatory approvals. In addition, the cost of operation and maintenance and the operating performance of geothermal power plants may be adversely affected by changes in certain laws and regulations, including tax laws.

The federal government also encourages production of electricity from geothermal resources through certain tax subsidies. We are permitted to claim in our consolidated federal tax returns approximately 10% of the construction cost of each new geothermal power plant as a credit against our consolidated federal income taxes. We are also permitted to deduct, as a depreciation expense on our consolidated federal tax returns, up to 95% of the cost of the power plant over five years on an accelerated basis, which results in more of the cost being deducted in the first few years than during the remainder of the depreciation period. In addition, we have the ability to obtain value from these tax incentives through lease financing transactions even when we are not in a position to use them directly. Any reduction in such tax incentives or any restrictions on such lease financing transactions would materially and adversely affect our business, financial condition, future results and cash flow.

Any such changes could significantly increase the regulatory-related compliance and other expenses incurred by the projects and could significantly reduce or entirely eliminate the revenues generated by one or more of the projects, which in turn would reduce our net income and could materially and adversely affect our business, financial condition, future results and cash flow.

The costs of compliance with environmental laws, which currently are significant, may increase in the future and could materially and adversely affect our business, financial condition, future results and cash flow and any non-compliance with such laws or regulations may result in the imposition of liabilities which could materially and adversely affect our business, financial condition, future results and cash flow.

Our projects are required to comply with numerous domestic and foreign federal, regional, state and local statutory and regulatory environmental standards and to maintain numerous environmental permits and governmental approvals required for construction and/or operation. Some of the environmental permits and

governmental approvals that have been issued to the projects contain conditions and restrictions, including restrictions or limits on emissions and discharges of pollutants and contaminants, or may have limited terms. If we fail to satisfy these conditions or comply with these restrictions, or with any statutory or regulatory environmental standards, we may become subject to regulatory enforcement action and the operation of the projects could be adversely affected or be subject to fines, penalties or additional costs. In addition, we may not be able to renew, maintain or obtain all environmental permits and governmental approvals required for the continued operation or further development of the projects, as a result of which the operation of the projects may be

limited or suspended. Environmental laws, ordinances and regulations affecting us can be subject to change and such change could result in increased compliance costs, the need for additional capital expenditures, or otherwise adversely affect us.

We could be exposed to significant liability for violations of hazardous substances laws because of the use or presence of such substances at our projects.

Our projects are subject to numerous domestic and foreign federal, regional, state and local statutory and regulatory standards relating to the use, storage and disposal of hazardous substances. We use isobutane, isopentane, industrial lubricants and other substances at our projects which are or could become classified as hazardous substances. If any hazardous substances are found to have been released into the environment at or by the projects, we could become liable for the investigation and removal of those substances, regardless of their source and time of release. If we fail to comply with these laws, ordinances or regulations (or any change thereto), we could be subject to civil or criminal liability, the imposition of liens or fines, and large expenditures to bring the projects into compliance. Furthermore, in the United States, we can be held liable for the cleanup of releases of hazardous substances at other locations where we arranged for disposal of those substances, even if we did not cause the release at that location. The cost of any remediation activities in connection with a spill or other release of such substances could be significant.

We believe that there may have at one time been a gas station located on the Mammoth project site, but because of significant surface disturbance and construction since that time further physical evaluation of the former gas station site has been impractical. There may be soil or groundwater contamination and related liability exposure of which we are unaware related to this site which may be significant and may adversely and materially affect our operations and revenues.

We may not be able to successfully integrate companies that we have acquired or which we may acquire in the future, which could materially and adversely affect our business, financial condition, future results and cash flow.

We recently acquired our Heber 1, Heber 2, Mammoth, Steamboat 2/3, Steamboat Hills and Puna projects. Our strategy is to continue to expand in the future, including through acquisitions. Integrating acquisitions is often costly, and we may not be able to successfully integrate our acquired companies with our existing operations without substantial costs, delays or other adverse operational or financial consequences. Integrating our acquired companies involves a number of risks that could materially and adversely affect our business, including:

- failure of the acquired companies to achieve the results we expect;
- inability to retain key personnel of the acquired companies;
- risks associated with unanticipated events or liabilities; and
- the difficulty of establishing and maintaining uniform standards, controls, procedures and policies, including accounting controls and procedures.

If any of our acquired companies suffers customer dissatisfaction or performance problems, the same could

adversely affect the reputation of our group of companies and could materially and adversely affect our business, financial condition, future results and cash flow.

The power generation industry is characterized by intense competition, and we encounter competition from electric utilities, other power producers, and power marketers that could materially and adversely affect our business, financial condition, future results and cash flow.

The power generation industry is characterized by intense competition from electric utilities, other power producers and power marketers. In recent years, there has been increasing competition in the sale of electricity, in part due to excess capacity in a number of U.S. markets and an emphasis on short-term or "spot" markets, and competition has contributed to a reduction in electricity prices. For the most part, we expect that power purchasers interested in long-term arrangements with a capacity

price component will engage in "competitive bid" solicitations to satisfy new capacity demands. This competition could adversely affect our ability to obtain power purchase agreements and the price paid for electricity by the relevant power purchasers. There is also increasing competition between electric utilities, particularly in California where the CPUC has launched an initiative designed to give all electricity consumers the ability to choose between competing suppliers of electricity. This competition has put pressure on electric utilities to lower their costs, including the cost of purchased electricity, and increasing competition in the future will put further pressure on power purchasers to reduce the prices at which they purchase electricity from us.

The existence of a prolonged force majeure event or a forced outage affecting a project could reduce our net income and materially and adversely affect our business, financial condition, future results and cash flow.

If a project experiences a force majeure event, our subsidiary owning that project would be excused from its obligations under the relevant power purchase agreement. However, the relevant power purchaser may not be required to make any capacity and/or energy payments with respect to the affected project or plant so long as the force majeure event continues and, pursuant to certain of our power purchase agreements, will have the right to prematurely terminate the power purchase agreement. Additionally, to the extent that a forced outage has occurred, the relevant power purchaser may not be required to make any capacity and/or energy payments to such project and if as a result the project fails to attain certain performance requirements under certain of our power purchase agreements, the purchaser may have the right to permanently reduce the contract capacity (and, correspondingly, the amount of capacity payments due pursuant to such agreements in the future), seek refunds of certain past capacity payments, and/or prematurely terminate the power purchase agreement. As a consequence, we may not receive any net revenues from the affected project or plant other than the proceeds from any business interruption insurance that applies to the force majeure event or forced outage after the relevant waiting period and may incur significant liabilities in respect of past amounts required to be refunded. Accordingly, our business, financial condition, future results and cash flows could be materially and adversely affected.

The existence of a force majeure event or a forced outage affecting the transmission system of the Imperial Irrigation District could reduce our net income and materially and adversely affect our business, financial condition, future results and cash flow.

If the transmission system of the Imperial Irrigation District experiences a force majeure event or a forced outage which prevents it from transmitting the electricity from certain of our projects to the relevant power purchaser, the relevant power purchaser would not be required to make energy payments for such non-delivered electricity and may not be required to make any capacity payments with respect to the affected project so long as such force majeure event or forced outage continues, thus reducing or eliminating the revenues of such project.

Some of our leases will terminate if we do not extract geothermal resources in "commercial quantities," thus requiring us to enter into new leases or secure rights to alternate geothermal resources, none of which may be available on terms as favorable to us as any such terminated lease, if at all.

Most of our geothermal resource leases are for a fixed primary term, and then continue for so long as geothermal resources are extracted in "commercial quantities" or pursuant to other terms of extension. The land covered by some of our leases is undeveloped and has not yet produced geothermal resources in "commercial quantities." Leases that cover land which remains undeveloped and does not produce, or does not continue to produce, geothermal resources in commercial quantities or leases that we allow to expire, will terminate. In the event that a lease is terminated and we determine that we will need that lease once the applicable project is

operating, we would need to enter into one or more new leases with the owner(s) of the premises that are the subject of the terminated lease(s) in order to develop geothermal resources from or inject geothermal resources into such premises or secure rights to alternate geothermal resources or lands suitable for injection, all of which may not be possible or could result in increased cost to us which could materially and adversely affect our business, financial condition, future results and cash flow.

Our Bureau of Land Management leases may be terminated if we fail to comply with any of the provisions of the Geothermal Steam Act of 1970 or if we fail to comply with the terms or stipulations of such leases, which may materially and adversely affect our business and operations.

Pursuant to the terms of our Bureau of Land Management (which we refer to as BLM) leases, we are required to conduct our operations on BLM-leased land in a workmanlike manner and in accordance with all applicable laws and BLM directives and to take all mitigating actions required by the BLM to protect the surface of and the environment surrounding the relevant land. Additionally, certain BLM leases contain additional requirements, some of which relate to the mitigation or avoidance of disturbance of any antiquities, cultural values or threatened or endangered plants or animals, the payment of royalties for timber and the imposition of certain restrictions on residential development on the leased land. In the event of a default under any BLM lease, or the failure to comply with such requirements, or any non-compliance with any of the provisions of the Geothermal Steam Act of 1970 or regulations issued thereunder, the BLM may, 30 days after notice of default is provided to our relevant project subsidiary, suspend operations until the requested action is taken or terminate the lease, either of which could materially and adversely affect our business, financial condition, future results and cash flows.

Some of our leases (or subleases) could terminate if the lessor (or sublessor) under any such lease (or sublease) defaults on any debt secured by the relevant property, thus terminating our rights to access the underlying geothermal resources at that location.

The fee interest in the land which is the subject of each of our leases (or subleases) may currently be or may become subject to encumbrances securing loans from third party lenders to the lessor (or sublessor). Our rights as lessee (or sublessee) under such leases (or subleases) are or may be subject and subordinate to the rights of any such lender. Accordingly, a default by the lessor (or sublessor) under any such loan could result in a foreclosure on the underlying fee interest in the property and thereby terminate our leasehold interest and result in the shutdown of the project located on the relevant property and/or terminate our right of access to the underlying geothermal resources required for our operations.

In addition, a default by a sublessor under its lease with the owner of the property which is the subject of our sublease could result in the termination of such lease and thereby terminate our sublease interest and our right to access the underlying geothermal resources required for our operations.

We depend on key personnel for the success of our business.

Our success is largely dependent on the skills, experience and efforts of our senior management team and other key personnel. In particular, our success depends on the continued efforts of Lucien Bronicki, Yehudit Bronicki, Hezy Ram, Nadav Amir and other key employees. The loss of the services of any key employee could materially harm our business, financial condition, future results and cash flow. Although we have been, to date, successful in retaining the services of senior management, we may not be able to locate or employ on acceptable terms qualified replacements for our senior management or key employees if their services were no longer available.

Our projects have generally been financed through a combination of parent company loans and limited- or non-recourse project finance debt. If our project subsidiaries default on their obligations under such limited- or non-recourse debt, we may be required to make certain payments to the relevant debt holders and if the collateral supporting such leveraged financing structures is foreclosed upon, we may lose certain of our projects.

Our projects have generally been financed using a combination of parent company loans and limited- or non-recourse project finance debt. Non-recourse project finance debt refers to debt that is repaid solely from the project's revenues and is secured by the project's physical assets, major contracts, cash accounts and, in many cases, our ownership interest in the project subsidiary. Limited recourse project finance debt refers to our additional agreement, as part of the financing of a project,

to provide limited financial support for the project subsidiary in the form of limited guarantees, indemnities, capital contributions and agreements to pay certain debt service deficiencies. If our project subsidiaries default on their obligations under the relevant debt documents, creditors of a limited recourse project financing will have direct recourse to us, to the extent of our limited recourse obligations, which may require us to use distributions received by us from other projects, as well as other sources of cash available to us, in order to satisfy such obligations. In addition, if our project subsidiaries default on their obligations under the relevant debt documents and the creditors foreclose on the relevant collateral, we may lose our ownership interest in the relevant project subsidiary or our project subsidiary owning the project would only retain an interest in the physical assets, if any, remaining after all debts and obligations were paid in full.

Changes in costs and technology may significantly impact our business by making our power plants and products less competitive.

A basic premise of our business model is that generating baseload power at central geothermal power plants achieves economies of scale and produces electricity at a competitive price. However, traditional coal-fired systems and gas-fired systems may under certain economic conditions produce electricity at lower average prices than our geothermal plants. In addition, there are other technologies that can produce electricity, most notably fuel oil systems, hydroelectric systems, fuel cells, microturbines, windmills and photovoltaic (solar) cells. Some of these alternative technologies currently produce electricity at a higher average price than our geothermal plants, however research and development activities are ongoing to seek improvements in such alternate technologies and their cost of producing electricity is gradually declining. It is possible that advances will further reduce the cost of alternate methods of power generation to a level that is equal to or below that of most geothermal power generation technologies. If this were to happen, the competitive advantage of our projects may be significantly impaired.

Our expectations regarding the market potential for the development of recovered energy-based power generation may not materialize and as a result we may not derive any significant revenues from this line of business.

We have identified recovered energy-based power generation as a significant market opportunity for us. Demand for our recovered energy-based power generation units may not materialize or grow at the levels that we expect. We currently face competition in this market from manufacturers of conventional steam turbines and may face competition from other related technologies in the future. If this market does not materialize at the levels that we expect, such failure may materially and adversely affect our business, financial condition, future results and cash flow.

Our intellectual property rights may not be adequate to protect our business.

Our intellectual property rights may not be adequate to protect our business. While we occasionally file patent applications, such patents may not be issued on the basis of such applications or, if such patents are issued, they may not be sufficiently broad to protect our technology. In addition, any patents issued to us or for which we have use rights may be challenged, invalidated or circumvented.

In order to safeguard our unpatented proprietary know-how, trade secrets and technology, we rely primarily upon trade secret protection and non-disclosure provisions in agreements with employees and others having access to confidential information. These measures may not adequately protect us from disclosure or misappropriation of our proprietary information.

Even if we adequately protect our intellectual property rights, litigation may be necessary to enforce these rights, which could result in substantial costs to us and a substantial diversion of management attention. Also, while we have attempted to ensure that our technology and the operation of our business do not infringe other parties' patents and proprietary rights, our competitors or other parties may assert that certain aspects of our business or technology may be covered by patents held by them. Infringement or other intellectual property claims, regardless of merit or ultimate outcome, can be expensive and time-consuming and can divert management's attention from our core business.

We are subject to risks associated with a changing economic and political environment which may adversely affect our financial stability or the financial stability of our counterparties.

The risk of terrorist attacks in the United States or elsewhere continues to remain a potential source of disruption to the nation's economy and financial markets in general. The availability and cost of capital for our business and that of our competitors has been adversely affected by the bankruptcy of Enron Corp. and events related to the California electric market crisis. Additionally, the recent rise in fuel costs may make it more expensive for our customers to operate their businesses. These events could constrain the capital available to our industry and could adversely affect our financial stability and the financial stability of our counterparties in transactions.

Possible fluctuations in the cost of raw materials may materially and adversely affect our business, financial condition, future results and cash flow.

Our manufacturing operations are dependent on the supply of various raw materials including primarily steel and aluminum, and are also dependent on the supply of various industrial equipment components that we use. We currently obtain all such materials and equipment at prevailing market prices. Supply interruptions or future cost increases of such raw materials and equipment, to the extent not otherwise passed along to our customers, could adversely affect our profit margins.

Conditions in Israel, where the majority of our senior management and all of our production and manufacturing facilities are located, may adversely affect our operations and may limit our ability to produce and sell our products or manage our projects.

Operations in Israel accounted for approximately 61.3%, 56.3%, and 51.0% of our operating expenses in fiscal year 2001, fiscal year 2002 and fiscal year 2003, respectively. Political, economic and security conditions in Israel directly affect our operations. Since the establishment of the State of Israel in 1948, a number of armed conflicts have taken place between Israel and its Arab neighbors, and the continued state of hostility, varying in degree and intensity, has led to security and economic problems for Israel. Since October 2000, there has been a significant increase in violence, primarily in the West Bank and Gaza Strip, and more recently Israel has experienced a significant increase in terrorist incidents within its borders. As a result, negotiations between Israel and representatives of the Palestinian Authority have been sporadic and have failed to result in peace. We could be adversely affected by hostilities involving Israel, the interruption or curtailment of trade between Israel and its trading partners, or a significant downturn in the economic or financial condition of Israel. In addition, the sale of products manufactured in Israel may be adversely affected in certain countries by restrictive laws, policies or practices directed toward Israel or companies having operations in Israel.

In addition, some of our employees in Israel are subject to being called upon to perform military service in Israel, and their absence may have an adverse effect upon our operations. Generally, unless exempt, male adult citizens of Israel under the age of 41 are obligated to perform up to 36 days of military reserve duty annually. Additionally, all such citizens are subject to being called to active duty at any time under emergency circumstances.

These events and conditions could disrupt our operations in Israel, which could materially harm our business, financial condition, future results and cash flow.

Failure to comply with certain conditions and restrictions associated with tax benefits provided to Ormat Systems by the Government of Israel as an "approved enterprise" may require us to refund such tax benefits and pay future taxes in Israel at higher rates.

Our subsidiary, Ormat Systems, has received "approved enterprise" status under Israel's Law for Encouragement of Capital Investments, 1959, with respect to two of its investment programs. As an approved enterprise, our subsidiary is exempt from Israeli income taxes with respect to revenues derived from the approved investment program for a period of two years commencing on the year it first generates profits from the approved investment program and, thereafter, such revenues are

subject to reduced Israeli income tax rates of 25% for an additional five years. These benefits are subject to certain conditions set forth in the certificate of approval from Israel's Investment Center, that include, among other things, a requirement that Ormat Systems comply with Israeli intellectual property law, that all transactions between Ormat Systems and our affiliates be at arms length, and that there will be no change in control of, on a cumulative basis, more than 49% of Ormat Systems' capital stock (including by way of a public or private

offering) without the prior written approval of the Investment Center. If Ormat Systems does not comply with these conditions, in whole or in part, it would be required to refund the amount of tax benefits (as adjusted by the Israeli consumer price index and for accrued interest) and would no longer benefit from the reduced Israeli tax rates, which could have an adverse effect on our financial condition, future results and cash flow. If Ormat Systems distributes dividends out of revenues derived during the tax exemption period from the approved investment program, it will be subject, in the year in which such dividend is paid, to Israeli income tax on the distributed dividend.

If our parent defaults on its lease agreement with the Israel Land Administration, or is involved in a bankruptcy or similar proceeding, our rights and remedies under certain agreements pursuant to which we acquired our products business and pursuant to which we sublease our land and manufacturing facilities from our parent may be adversely affected.

We acquired our business relating to the manufacturing and sale of products for electricity generation and related services from our parent, Ormat Industries. In connection with that acquisition, we entered into a sublease with Ormat Industries for the lease of the land and facilities where our manufacturing and production operations are conducted and where our Israeli offices are located. Under the terms of our parent's lease agreement with the Israel Land Administration, any sublease for a period of more than five years may require the prior approval of the Israel Land Administration. As a result, the initial term of our sublease with Ormat Industries is for a period of four years and eleven months, extendable to twenty-five years (which includes the initial term) should our parent obtain the approval of the Israel Land Administration, to the extent necessary. If such an approval is required and our parent fails to obtain the Israel Land Administration's approval, our sublease will terminate on June 1, 2009, at which time we will have to renegotiate the terms of a new sublease. We may not be successful in reaching an agreement with our parent as to the terms of a new sublease or in obtaining such sublease on favorable terms, both of which circumstances will adversely affect our manufacturing activities and our financial position. Additionally, if our parent was to breach its obligations to the Israel Land Administration under its lease agreement, the Israel Land Administration may terminate the lease agreement and consequently, our sublease will terminate as well.

As part of the acquisition described in the preceding paragraph, we also entered into a patent license agreement with Ormat Industries, pursuant to which we were granted an exclusive license for certain patents and trademarks relating to certain technologies that are used in our business. If a bankruptcy case were commenced by or against our parent, it is possible that performance of all or part of the agreements entered into in connection with such acquisition (including the lease of land and facilities described above) could be stayed by the bankruptcy court in Israel or rejected by a liquidator appointed pursuant to the Bankruptcy Ordinance in Israel and thus not be enforceable. Any of these events could have a material and adverse effect on our business, financial condition, future results and cash flow.

We are a holding company and our revenues depend substantially on the performance of our subsidiaries and the projects they operate, most of which are subject to restrictions and taxation on dividends and distributions.

We are a holding company whose primary assets are our ownership of the equity interests in our subsidiaries. We conduct no other business and, as a result, we depend entirely upon our subsidiaries' earnings and cash flow.

The agreements pursuant to which most of our subsidiaries have incurred debt restrict the ability of these subsidiaries to pay dividends, make distributions or otherwise transfer funds to us prior to the

satisfaction of other obligations, including the payment of operating expenses, debt service and replenishment or maintenance of cash reserves. In the case of some of our projects, such as the Mammoth project, there may be certain additional restrictions on dividend distributions pursuant to our agreements with our partners. Further, if we elect to receive distributions of earnings from our foreign operations, we may incur United States taxes on account of such distributions, net of any available foreign tax credits. In all of the foreign countries where our existing projects are located, dividend payments to us are also subject to withholding taxes. Each of the events described above may reduce or eliminate the aggregate amount of revenues we can receive from our subsidiaries.

Risks Relating to this Offering

Our controlling stockholders may take actions that conflict with your interests.

Immediately following this offering, _____ % of our common stock will be held by Ormat Industries, Ltd. (_____ % if the underwriters exercise their over-allotment option in full), which is controlled by Bronicki Investments Ltd. Bronicki Investments Ltd. is a privately held Israeli company and is controlled by Lucien and Yehudit Bronicki. Because of these holdings, our parent company and its controlling stockholders will be able to exercise control over all matters requiring stockholder approval, including the election of directors, amendment of our certificate of incorporation and approval of significant corporate transactions, and they will have significant control over our management and policies. The directors elected by these stockholders will be able to significantly influence decisions affecting our capital structure. This control may have the effect of delaying or preventing changes in control or changes in management, or limiting the ability of our other stockholders to approve transactions that they may deem to be in their best interest. For example, our controlling stockholders will be able to control the sale or other disposition of our products business to another entity or the transfer of such business outside of the State of Israel, as such action requires the affirmative vote of at least 75% of our outstanding shares.

Some of our directors that also hold positions with our parent may have conflicts of interest with respect to matters involving both companies.

Two of our three directors are directors and/or officers of Ormat Industries. These directors will have fiduciary duties to both companies and may have conflicts of interest on matters affecting both us and our parent and in some circumstances may have interests adverse to our interests. Our Chairman, Director and Chief Technology Officer, Mr. Bronicki, will continue to be Chairman of our parent following the offering. In addition, our Chief Executive Officer and Director, Mrs. Bronicki, will continue to be the Chief Executive Officer of our parent following the offering.

There has been no prior market for our common stock and an active trading market may not develop.

Prior to this offering, there has been no public market for our common stock. An active trading market may not develop following the closing of this offering or, if developed, may not be sustained. The lack of an active market may impair your ability to sell your shares of common stock at the time you wish to sell them or at a price that you consider reasonable. The lack of an active market may also reduce the fair market value and increase the volatility of your shares of common stock. An inactive market may also impair our ability to raise capital by selling shares of common stock and may impair our ability to acquire other companies or technologies by using our shares of common stock as consideration.

The price of our common stock may fluctuate substantially and your investment may decline in value.

The initial public offering price for the shares of our common stock sold in this offering will be determined by negotiation between the representatives of the underwriters and us. This price may not reflect the market price of our common stock following this offering. In addition, the market price of our common stock is likely to be highly volatile and may fluctuate substantially due to many factors, including:

-
- actual or anticipated fluctuations in our results of operations including as a result of seasonal variations in our electricity-based revenues;
 - variance in our financial performance from the expectations of market analysts;
 - conditions and trends in the end markets we serve and changes in the estimation of the size and growth rate of these markets;
 - announcements of significant contracts by us or our competitors;
 - changes in our pricing policies or the pricing policies of our competitors;

- loss of one or more of our significant customers;
- legislation;
- changes in market valuation or earnings of our competitors;
- the trading volume of our common stock; and
- general economic conditions.

In addition, the stock market in general, and the New York Stock Exchange and the market for energy companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of particular companies affected. These broad market and industry factors may materially harm the market price of our common stock, regardless of our operating performance. In the past, following periods of volatility in the market price of a company's securities, securities class-action litigation has often been instituted against that company. Such litigation, if instituted against us, could result in substantial costs and a diversion of management's attention and resources, which could materially harm our business, financial condition, future results and cash flow.

Our management team may invest or spend the proceeds of this offering in ways with which you may not agree or in ways that may not yield a positive return.

Presently, anticipated uses of the proceeds to us of this offering include funding business growth and expansion, providing additional working capital, and for other general corporate purposes. We cannot specify with certainty how we will use the net proceeds of this offering. Accordingly, our management will have considerable discretion in the application of these proceeds, and you will not have the opportunity to assess whether these proceeds are being used appropriately. These proceeds may be used for corporate purposes that do not increase our operating results or market value. Until the net proceeds are used, they may be placed in investments that do not produce income or that lose value.

Future sales of our common stock may depress our share price.

After this offering, we will have _____ shares of common stock outstanding. The _____ shares sold in this offering (or _____ shares if the underwriters' over-allotment is exercised in full) will be freely tradable without restriction or further registration under federal securities laws unless purchased by our affiliates. The remaining shares of common stock outstanding after this offering are subject to lock-up agreements, will be available for sale in the public market beginning 180 days after the date of this prospectus, and will be subject to certain volume limitations under Rule 144 of the Securities Act of 1933, as amended. Lehman Brothers Inc. may waive the lock-up provisions in its sole discretion.

Sales of substantial amounts of our common stock in the public market following this offering, or the perception that these sales may occur, could cause the market price of our common stock to decline. At or prior to the closing of this offering, we will enter into a registration rights agreement with Ormat Industries. See "Certain Relationships and Related Transactions" for more information.

This offering will cause substantial dilution in the net tangible book value of your shares of common stock.

The initial public offering price of our common stock is considerably more than the net tangible book value per share of our outstanding common stock. Accordingly, investors purchasing shares of

common stock in this offering will contribute _____ % of the total amount invested to fund our company, but will own only _____ % of the shares of common stock outstanding after this offering. To the extent outstanding stock options are exercised, there will be further dilution to new investors. See "Dilution" for more information.

Provisions in our charter documents and Delaware law may delay or prevent acquisition of us, which could adversely affect the value of our common stock.

Our restated certificate of incorporation and our bylaws contain provisions that could make it harder for a third party to acquire us without the consent of our board of directors. These provisions do not permit actions by our stockholders by written consent. In addition, these provisions include procedural requirements relating to stockholder meetings and stockholder proposals that could make stockholder actions more difficult. Our board of directors will be classified into three classes of directors serving staggered, three-year terms and may be removed only for cause. Any vacancy on the board of directors may be filled only by the vote of the majority of directors then in office. Our board of directors has the right to issue preferred stock without stockholder approval, which could be used to institute a "poison pill" that would work to dilute the stock ownership of a potential hostile acquirer, effectively preventing acquisitions that have not been approved by our board of directors. Delaware law also imposes some restrictions on mergers and other business combinations between us and any holder of 15% or more for our outstanding common stock. Although we believe these provisions provide for an opportunity to receive a higher bid by requiring potential acquirers to negotiate with our board of directors, these provisions apply even if the offer may be considered beneficial by some stockholders.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some of the statements made in this prospectus are forward-looking statements. These forward looking statements are based upon our current expectations and projections about future events. When used in this prospectus, the words "believe", "anticipate", "intend", "estimate", "expect", "will", "should", "may" and similar expressions, or the negative of such words and expressions, are intended to identify forward-looking statements, although not all forward-looking statements contain such words or expressions. The forward-looking statements in this prospectus are primarily located in the material set forth under the headings "Prospectus Summary", "Risk Factors", "Capitalization", "Management's Discussion and Analysis of Financial Condition and Results of Operations", and "Business", but are found in other locations as well. These forward-looking statements generally relate to our plans, objectives and expectations for future operations and are based upon management's current estimates and projections of future results or trends. Although we believe that our plans and objectives reflected in or suggested by these forward-looking statements are reasonable, we may not achieve these plans or objectives. You should read this prospectus completely and with the understanding that actual future results may be materially different from what we expect. We will not update forward-looking statements even though our situation may change in the future.

Specific factors that might cause actual results to differ from our expectations or may affect the value of our common stock include, but are not limited to:

- significant considerations and risks discussed in this prospectus;
- operating risks, including equipment failures and the amounts and timing of revenues and expenses;
- geothermal resource risk (such as the heat content of the reservoir, useful life and geological formation);
- environmental constraints on operations and environmental liabilities arising out of past or present operations;
- project delays or cancellations;
- financial market conditions and the results of financing efforts;
- political, legal, regulatory, governmental, administrative and economic conditions and developments in

the United States and other countries in which we operate;

- the enforceability of the long-term power purchase agreements for our projects;
- contract counterparty risk;
- weather and other natural phenomena;
- impact of recent and future federal and state regulatory proceedings and changes, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry, and incentives for the production of renewable energy, changes in environmental and other laws and regulations to which our company is subject, as well as changes in the application of existing laws and regulations;
- current and future litigation;
- our ability to successfully identify, integrate and complete acquisitions;
- competition from other similar geothermal energy projects, including any such new geothermal energy projects developed in the future, and from alternative electricity producing technologies;
- the effect of and changes in economic conditions in the areas in which we operate;
- market or business conditions and fluctuations in demand for energy or capacity in the markets in which we operate; and
- the direct or indirect impact on our company's business resulting from terrorist incidents or responses to such incidents, including the effect on the availability of and premiums on insurance.

USE OF PROCEEDS

We estimate that the net proceeds we will receive from this offering will be approximately \$ million, or approximately \$ million if the underwriters exercise their over-allotment option in full, in each case, after deducting the underwriting discounts and commissions and estimated expenses of this offering payable by us. We expect to use the net proceeds from this offering to finance the continued growth of our business and for general corporate purposes, including for purposes of making investments or acquisitions. However, we have no present understanding or agreement relating to any specific acquisition. Accordingly, management will have significant flexibility in applying the net proceeds of the offering. Pending the use of such proceeds as described above, we intend to invest such proceeds in interest-bearing instruments.

DIVIDEND POLICY

We have adopted a dividend policy pursuant to which we currently expect, commencing with the first full fiscal quarter following the consummation of this offering, to distribute at least 20% of our annual profits available for distribution by way of quarterly dividends. In determining whether there are profits available for distribution, our board of directors will take into account our business plan and current and expected obligations and no distribution will be made that in the judgment of our board of directors would prevent us from meeting such business plan or obligations.

Notwithstanding this policy, dividends will be paid only when, as and if approved by our board of directors out of funds legally available therefor. The actual amount and timing of dividend payments will depend upon our financial condition, results of operations, business prospects and such other matters as the board may deem relevant from time to time. Even if profits are available for the payment of dividends, the board of directors could determine that such profits should be retained for an extended period of time, used for working capital purposes, expansion or acquisition of businesses or any other appropriate purpose. As a holding company, we are dependent upon the earnings and cash flow of our subsidiaries in order to fund any dividend distributions, and, as a result, we may not be able to pay dividends in accordance with our policy. Our board of directors may, from time to time, examine our dividend policy and may, in its absolute discretion, change such policy.

CAPITALIZATION

The following table summarizes our capitalization as of March 31, 2004 on:

- a historical basis; and
- as adjusted to give effect to the completion of this offering, including the application of the estimated net proceeds to us from this offering as described under "Use of Proceeds."

You should read the following table in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations," "Description of Capital Stock" and our consolidated financial statements and related notes appearing elsewhere in this prospectus.

	As of March 31, 2004	
	Actual	Pro Forma Consolidated
	(unaudited)	
	(in thousands)	
Cash and cash equivalents	\$ 28,901	\$
Debt:		
Parent company loans	150,504	
Long term debt	427,576	
Total debt	578,080	
Shareholders' equity:		
Common stock, \$0.001 par value; 200,000,000 shares authorized and 30,769,230 shares issued and outstanding, historical; shares authorized and shares issued and outstanding, pro forma consolidated	31	
Additional paid-in capital	6,994	
Unearned stock-based compensation	(76)	
Retained Earnings	37,322	
Total shareholders' equity	44,271	
Total capitalization	\$ 622,351	\$

The discussion and tables above exclude shares of our common stock available for future grant or issuance under our stock option plan(s). See "Management—Stock Option Plan."

36

DILUTION

At March 31, 2004, the net tangible book value of our common stock was approximately \$8.4 million, or approximately \$0.27 per share of our common stock. After giving effect to the sale of shares of our common stock in this offering at an assumed initial public offering price of \$ per share, and after deducting estimated underwriting discounts and commissions paid by us and the estimated offering expenses of this offering, the net tangible book value at March 31, 2004 attributable to common stockholders would have been approximately \$ million, or approximately \$ per share of our common stock. This represents an immediate increase in net tangible book value of \$ per share, and an immediate dilution in net tangible book value of \$ per share to new stockholders. The following table illustrates this per share dilution to new stockholders:

Assumed initial public offering price per share	\$
Net tangible book value per share before the offering	\$
Net increase in tangible book value per share attributable to new stockholders	\$
Net tangible book value per share after the offering	\$
Dilution in net tangible book value per share to new stockholders	\$

The table below summarizes, as of , the differences for our existing stockholders and new stockholders in this offering, with respect to the number of shares of common stock purchased from us, the total consideration paid and the average price per share paid before deducting fees and expenses.

	Shares Issued		Total Consideration		Average Price
	Number	Percentage	Amount	Percentage	Per Share
(in thousands, except per share data)					
Our existing stockholders					
New stockholders in this offering					
Total					

The discussion and tables above exclude shares of our common stock available for future grant or issuance under our stock plans. See "Management—Stock Option Plans."

SELECTED CONSOLIDATED FINANCIAL AND OTHER DATA

The following table sets forth our selected consolidated financial and other data for the periods ended and at the dates indicated in such table. We have derived the selected consolidated financial and other data as of and for the periods ended December 31, 2001, 2002 and 2003 from our audited consolidated financial statements included elsewhere in this prospectus. We have derived the selected consolidated financial data as of and for the periods ended December 31, 1999 and 2000 from our unaudited consolidated financial statements not included in

this prospectus. We have derived the selected consolidated financial and other data as of and for the three months ended March 31, 2003 and March 31, 2004 from our unaudited consolidated financial statements included elsewhere in this prospectus. In the opinion of our management, our unaudited consolidated financial statements contain all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of our financial position, results of operations and cash flows. The results of operations for the three months ended March 31, 2003 and March 31, 2004 are not necessarily indicative of the operating results to be expected for the full fiscal years encompassing such periods.

The information set forth below should be read in conjunction with the "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements included elsewhere in this prospectus.

UNAUDITED PRO FORMA CONDENSED COMBINED FINANCIAL DATA

Overview

The unaudited pro forma condensed combined balance sheet, as of March 31, 2004, is based on our consolidated financial statements and the financial statements of the Puna project, which was acquired by us on June 3, 2004, and adjusted to give effect to the acquisition of the Puna project as if it had occurred on March 31, 2004. The unaudited pro forma condensed combined statements of operations for the year ended December 31, 2003 and for the three months ended March 31, 2004 are based on our consolidated financial statements and the financial statements of the Puna, Heber 1, Heber 2 and Mammoth projects, which Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project were acquired on December 18, 2003, and adjusted to give effect to the acquisition thereof as if each had occurred at the beginning of the periods presented.

The unaudited pro forma condensed combined financial data gives effect to the acquisitions of the Puna, Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project, acquisitions which are accounted for using the purchase method of accounting. Pursuant to such method, the purchase price has been allocated to the principal categories of assets and liabilities in the accompanying pro forma financial data based on independent valuations related to the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project, and on preliminary estimates of fair value related to the Puna project acquisition. The actual fair value and allocation of the purchase price of the Puna project acquisition will be determined upon the completion of an independent valuation. The actual allocation of the purchase price and the resulting effect on income from operations may differ for the estimate included herein for the Puna project. It should be noted that because the acquisitions of the (i) Steamboat 1/1A project on June 30, 2003, (ii) Steamboat 2/3 Project on February 11, 2004, and (iii) Steamboat Hills project on May 20, 2004 are not material under applicable Securities Act rules, such transactions have not been included in the accompanying pro forma balance sheet or results of operations.

The unaudited pro forma condensed combined financial data also give effect to (i) Ormat Funding's issuance of 8¼% senior secured notes in the amount of \$190 million, which offering was completed on February 13, 2004, and (ii) Orcal Geothermal's entering into a loan agreement with Beal Bank amounting to \$154.5 million in connection with the acquisition of the Heber 1, Heber 2 and Mammoth projects.

The unaudited pro forma condensed combined financial data presented herein does not necessarily reflect what our actual results of operations or financial position would have been had the transactions occurred at the

dates indicated, or project our results of operations or financial position for any future date or period.

The unaudited pro forma condensed combined financial data should be read in conjunction with our historical consolidated financial statements and the historical financial statements of the Heber 1, Heber 2, Mammoth and Puna projects included elsewhere in this prospectus.

Notes to Unaudited Pro Forma Condensed Combined Financial Data

The following adjustments were applied to our historical financial statements and those of the Puna, Heber 1, Heber 2 and Mammoth projects in order to prepare the pro forma condensed combined financial data.

Balance Sheet Footnotes:

The unaudited pro forma condensed combined balance sheet at March 31, 2004 is based on our consolidated financial statements and the financial statements of the Puna project and adjusted to give effect to the acquisition of the Puna project as if it had occurred on March 31, 2004 by combining our balance sheet with the balance sheet of the Puna project at March 31, 2004.

(a) Reflects an adjustment to eliminate assets and liabilities not acquired by us, and to eliminate the former owners' equity in the Puna project.

(b) The preliminary allocation of the purchase price for the Puna project, assuming the acquisition occurred on March 31, 2004, is as follows (in thousands):

Cash purchase price	\$ 72,600
Acquisition costs	231
Total purchase price	<u>\$ 72,831</u>
Property, plant and equipment	<u>\$ 66,812</u>
Power purchase agreement	6,500
Accounts receivable, net	1,600
Asset retirement obligation	(2,081)
Total purchase price allocation	<u>\$ 72,831</u>
Step-down of fixed assets included in net tangible assets	<u>\$ 69,280</u>
Step-up for power purchase agreement	<u>\$ 6,500</u>

Statements of Operations Footnotes:

The unaudited pro forma condensed combined statements of operations for the year ended December 31, 2003 and for the three months ended March 31, 2004 are based on our consolidated financial statements and the financial statements of the Puna, Heber 1, Heber 2 and Mammoth projects, and adjusted to give effect to the acquisitions as if they had occurred at the beginning of the periods presented by: (1) combining our results of operations for the year ended December 31, 2003 and the three months ended March 31, 2004, with (i) the Puna project's operations for the year ended December 31, 2003 and for the three months ended March 31, 2004, and (ii) the Heber 1 and Heber 2 projects' operations for the period from January 1, 2003 to December 17, 2003, and (2) recording our 50% equity in the income of the Mammoth project for the period from January 1, 2003 to December 17, 2003, with our results for the year ended December 31, 2003.

(c) Represents the recording of the change in depreciation resulting from the (step-down)/step-up in basis of \$(69.3) million, and \$110 million of property, plant and equipment to their respective fair values related to the acquisitions of the Puna, Heber 1, and Heber 2 projects, respectively. Property, plant and equipment are being depreciated using the straight-line method over the estimated service period of 15 to 23 years.

(d) Represents the recording of the change in amortization resulting from the step-up in basis of \$6.5 million and \$25.3 million of power purchase agreements to their respective fair values related to the acquisition of the Puna, Heber 1 and Heber 2 projects, respectively, using the straight-line method over the estimated contract periods of 15 to 23 years.

(e) Represents the elimination of interest expense related to the Puna, Heber 1, and Heber 2 projects related to project financing and capital leases that have been terminated as part of the acquisitions.

(f) Represents the recording of interest expense, prior to February 13, 2004, associated with the gross proceeds of \$190 million pursuant to the issuance by Ormat Funding of the senior secured notes with an interest rate of 8.25%, including the amortization of debt issue costs.

(g) Represents the recording of interest expense associated with the gross proceeds of \$154.5 million from Beal Bank with an interest rate of 7.125%, including the amortization of debt issue costs. Such debt was incurred for the acquisition of the Heber 1 and Heber 2 projects.

(h) Represents the recording of interest expense related to shareholder loans and short-term loans aggregating \$72.8 million at an interest rate of 5.5% associated with the acquisition of the Puna project.

(i) Represents the recording of our 50% equity in the income of the Mammoth project, increased by the amortization of the equity basis difference, and has been presented as "Equity in income of investee." As the purchase price is less than the underlying net equity of the Mammoth project by \$9.5 million, the equity basis will be amortized over the remaining useful life of the property, plant and equipment and the power purchase agreements, which is approximately 12 to 17 years.

Summarized statement of operations information of the Mammoth project for the period from January 1, 2003 to December 17, 2003 is as follows (in thousands):

Revenues	\$ 16,353
Gross margin	4,288
Net income	2,024
Company's equity in income of the Mammoth project:	
50% of the Mammoth project net income	\$ 1,012
Plus amortization of the equity basis difference	600
	<u>\$ 1,612</u>

(j) Represents the recording of income tax expenses to reflect an effective tax rate of 40% on the pro forma adjustments, which is our expected effective tax rate.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our results of operations, financial condition and liquidity in conjunction with our consolidated financial statements and the related notes. Some of the information contained in this discussion and analysis or set forth elsewhere in this prospectus, including information with respect to our plans and strategies for our business, statements regarding the industry outlook, our expectations regarding the future performance of our business, and the other non-historical statements contained herein are forward-looking statements. See "Special Note Regarding Forward-Looking Statements." You should also review the "Risk Factors" section of this prospectus for a discussion of important factors that could cause actual results to differ materially from the results described herein or implied by such forward-looking statements. Unless specifically stated otherwise, references to balances and results of operations in this section are to our continuing operations and do not include our discontinued operations discussed below. In addition, financial information presented herein for periods on and prior to March 31, 2004 does not reflect the acquisitions of the Puna project, the Steamboat 2/3 project (with respect to periods prior to February 11, 2004) and the Steamboat Hills project. For a discussion of the effect of our significant acquisitions, please see "Unaudited Pro Forma Condensed Combined Financial Data" included elsewhere in this prospectus, which does not include the acquisition of the Steamboat 2/3 project and Steamboat Hills project.

Overview

We are a leading vertically integrated company engaged in the geothermal and recovered energy power business. We design, develop, build, own and operate clean, environmentally friendly geothermal power plants, and we also design, develop and build, and plan to own and operate, recovered energy-based power plants, in each case, using equipment that we design and manufacture. In addition, we sell the equipment we design and manufacture for geothermal electricity generation, recovered energy-based electricity generation, and other equipment for electricity generation to third parties. Our operations consist of two principal business segments. The first consists of the sale of electricity from our power plants, which we refer to as the Electricity Segment, while the second consists of the design, manufacturing and sale of equipment for electricity generation, the installation thereof and the provision of related operation and maintenance services, which we refer to as the Products Segment.

Our Electricity Segment currently consists of our investment in power plants producing electricity from geothermal resources. It will also include our planned investment in power plants producing electricity from recovered energy resources. Our geothermal power plants include both power plants that we have built and power plants that we have acquired. Our Products Segment consists of the design, manufacture and sale of equipment that generates electricity, principally, from geothermal and recovered energy resources, but also using other fuel sources as well. Our Products Segment also includes, to the extent requested by our customers, the installation of our equipment and other related power plant installations and the provision of operation and maintenance services. For the three months ended March 31, 2004, our Electricity Segment represented approximately 70.3% of our total revenues, while our Products Segment represented approximately 29.7% of our total revenues during such period.

Our Electricity Segment operations are conducted in the United States and throughout the world. We are the fastest growing geothermal power generation company in the United States, measured by growth in generating capacity. Since January 1, 2001, we have completed various acquisitions of geothermal power plants in the United States with an aggregate acquisition cost, net of cash received, of \$410.8 million. Such acquisitions have increased our net ownership in our generating capacity from 94 MW, as of December 31, 2001, to 312 MW, as of June 30, 2004. We also own (or control) and operate geothermal power plants in Guatemala, Kenya, Nicaragua and the Philippines. In 2003, pro forma revenues from the sale of electricity by our power plants were \$162.6 million. Such revenues do not include any revenues attributable to our Steamboat 2/3 project and Steamboat Hills project that were acquired in 2004, which we estimate (based on, in the case of the Steamboat 2/3 project, \$14.0

million of revenues generated by such project in 2003 and, in the case of the Steamboat Hills project, \$3.0 million based on the current revenue generation of such project, computed on an annualized basis) to be approximately \$17.0 million for the fiscal year ended December 31, 2004.

Our Products Segment operations are also conducted in the United States and throughout the world. For the fiscal year ended December 31, 2003, revenues attributable to our Products Segment were \$41.7 million. Such revenues included approximately \$5.0 million received from the construction of a recovered energy-based power plant in a gas processing plant in the United States. We expect that an important component of our Products Segment will be the design, manufacturing and sale of recovered energy products, which is a market opportunity we have identified that we expect will allow us (in our Electricity Segment) and potential customers (in our Products Segment) to utilize waste heat for the purpose of producing electricity.

Our Electricity Segment is characterized by relatively predictable revenues generated by our power plants pursuant to long-term power purchase agreements, with terms which are generally up to 20 years. By contrast, revenues attributable to our Products Segment, which are based on the sale of equipment and the provision of various services to our customers are far less predictable and may vary significantly from period to period. Our management assesses the performance of our two segments of operation differently. In the case of our Electricity Segment, when making decisions about potential acquisitions or the development of new projects, our management typically focuses on the internal rate of return of the relevant investment, relevant technical and geological matters and other relevant business considerations. Additionally, as part of our Electricity Segment, our management evaluates our operating projects based on the performance of such projects in terms of revenues and expenses in contrast to projects that are under development, which our management evaluates based on costs attributable to each such project. Our management evaluates the performance of our Products Segment based on the timely delivery of our products, performance quality of our products and costs actually incurred to complete customer orders as compared to the costs originally budgeted for such orders.

Recent Developments

In December 2003, we acquired our Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project for a total cost of approximately \$256.8 million. The acquisition of our Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project was financed with a combination of parent company loans, project finance debt provided by Beal Bank and short-term loans. We accounted for such acquisition pursuant to the purchase method of accounting in accordance with Statement of Financial Accounting Standards (which we refer to as SFAS) No. 141.

In February 2004, we acquired the Steamboat 2/3 project for a total cost of approximately \$82.8 million. The acquisition of the Steamboat 2/3 project was financed with a portion of the proceeds received from the

issuance of the 8¼% senior secured notes by Ormat Funding. Such acquisition was accounted for pursuant to the purchase method of accounting in accordance with SFAS No. 141.

At the end of May 2004, we acquired the Steamboat Hills project for a total cost of approximately \$20.2 million and in early June 2004, we acquired the Puna project for a total cost of approximately \$72.8 million. The acquisition of the Steamboat Hills project was financed with internally generated cash while the acquisition of the Puna project was financed with parent company loans and short-term loans. We accounted for the acquisitions of both of the Puna and Steamboat Hills projects pursuant to the purchase method of accounting in accordance with SFAS No. 141.

As a result of our recent acquisitions, our results of operations for the various periods covered by our financial statements attached hereto may not be comparable with each other or indicative of future results.

Trends and Uncertainties

The geothermal industry in the United States has historically experienced significant growth followed by a consolidation of owners and operators of geothermal power plants. During the 1990s,

growth and development in the geothermal industry occurred primarily in foreign markets and only minimal growth and development occurred in the United States. Since 2001, there has been increased demand for energy generated from geothermal resources in the United States as production costs for electricity generated from geothermal resources have become more competitive relative to fossil fuel generation due to increasing gas prices and as a result of newly enacted legislative and regulatory incentives, such as state renewable portfolio standards. We see the increasing demand for energy generated from geothermal and other renewable resources in the United States and the further introduction of renewable portfolio standards as the most significant trends affecting our industry today and in the immediate future. Our operations and the trends that from time to time impact our operations are subject to market cycles.

Although other trends, factors and uncertainties may impact our operations and financial condition, including many that we do not or cannot foresee, we believe that our results of operations and financial condition for the foreseeable future will be affected by the following trends, factors and uncertainties:

- We have experienced significant growth through the acquisition and enhancement of geothermal power plants. On a pro forma basis, the Heber 1 and Heber 2 projects and the Puna project accounted for 33.3% and 9.2% of our pro forma revenues, respectively, and 45.9% and 10.8% of our operating profits, respectively, for the fiscal year ended December 31, 2003. As a result of such acquisitions, we expect an increase in our revenues and operating profits for the current fiscal year, as compared to our consolidated revenues and operating profits for the fiscal year ended December 31, 2003. We also expect an increase in our revenues and operating profits for the current fiscal year as a result of the acquisition of the Steamboat 2/3 project and the Steamboat Hills project this year.
- In the United States, we expect to continue to benefit from the increasing demand for renewable energy as a result of favorable legislation adopted by 17 states, including California, Nevada and Hawaii (where we have been the most active in our geothermal development and in which all of our U.S. projects are located). In each of these states, relevant legislation currently requires that an increasing percentage of the electricity supplied by electric utility companies operating in such states be derived from renewable energy resources until certain pre-established goals are met. We expect that the additional demand for renewable energy from utilities in such states will create additional opportunities for us to expand existing projects and build new power plants.
- Outside of the United States, we expect that a variety of governmental initiatives, including the award of long-term contracts to independent power generators, the creation of competitive wholesale markets for selling and trading energy, capacity and related energy products and the adoption of programs designed to encourage "clean" renewable and sustainable energy sources, will create new opportunities for the development of new projects as well as create additional markets for our remote power units and other products.

- We have identified recovered energy-based power generation as a significant market opportunity for us in the United States and throughout the world. We are initially targeting the North American market and, thereafter, we intend to leverage our success in such market in order to expand such operations throughout the world. If our expectations regarding the growth in demand for our recovered energy units are not met, we may not be able to generate the revenues we expect from such operations.
- In the short term, we may experience a decline in our revenues attributable to our Products Segment as we currently do not have any new orders to replace large existing contracts.
- We expect to continue to generate the majority of our revenues from the sale of electricity from our power plants. All of our current revenues from the sale of electricity are derived from fully-contracted payments under long-term power purchase agreements.
- We expect that our financing expenses during the current fiscal year will increase, as compared to our financing expenses for the fiscal year ended December 31, 2003, as we financed the majority of our recent acquisitions with long-term non- and limited-recourse financing.

-
- The viability of the geothermal resources utilized by our power plants that generate electricity depends on various factors such as the heat content of the geothermal reservoir, useful life of the reservoir (the term during which such geothermal reservoir has sufficient extractable fluids for our operations) and operational factors relating to the extraction of the geothermal fluids. Our geothermal power plants may experience an unexpected decline in the capacity of their respective geothermal wells. Such factors, together with the possibility that we may fail to find commercially viable geothermal resources in the future, represent significant uncertainties we face in connection with our operations.
 - Our foreign operations are subject to significant political, economic and financial risks, which vary by country. Such risks include the ongoing privatization of the electricity industry in the Philippines, the partial privatization of the electricity sector in Guatemala, labor unrest and strengthening of unions in Nicaragua and the political uncertainty currently prevailing in Kenya. Although we maintain political risk insurance as an attempt to mitigate such risks, such insurance does not provide complete coverage with respect to all such risks.
 - We do not expect the current low interest rate environment to continue in the foreseeable future. As a result, any increases in interest rates that impact our existing financings or future financings could increase the aggregate amount of our interest expenses and thus could have an adverse effect on our results of operations.
 - We have experienced recent increases in the cost of raw materials required for our equipment manufacturing activities, which we believe have resulted primarily from increased demand in the Chinese market for such raw materials and in the cost of transportation of our products. An increase in such costs may have an adverse effect on our financial condition and results of operations.

Revenues

We generate our revenues primarily from the sale of electricity from our geothermal power plants and the design, manufacturing and sale of equipment for electricity generation and the construction, installation and engineering of power plant equipment.

Revenues attributable to our Electricity Segment are relatively predictable as they are derived from the sale of electricity from our power plants pursuant to long-term power purchase agreements, however, such revenues

are subject to seasonal variations, as more fully described below in the section entitled "Seasonality". Our power purchase agreements generally provide for the payment of capacity payments, energy payments, or both. Generally, capacity payments are payments calculated based on the amount of time that our power plants are available to generate electricity. Some of our power purchase agreements provide for bonus payments in the event that we are able to exceed certain target levels and the potential forfeiture of payments if we fail to meet minimum target levels. Energy payments, on the other hand, are payments calculated based on the amount of electrical energy delivered to the relevant power purchaser at a designated delivery point. The rates applicable to such payments are either fixed (subject, in certain cases, to certain adjustments) or are based on the relevant power purchaser's short run avoided costs (the incremental costs that the power purchaser avoids by not having to generate such electrical energy itself or purchase it from others).

Revenues attributable to our Products Segment are generally unpredictable because larger customer orders for our products are typically a result of our participating in, and winning, tenders issued by potential customers in connection with projects they are developing. Such projects often take a long time to design and develop and are often subject to various contingencies such as the customer's ability to raise the necessary financing for such project. As a result, we are generally unable to predict the timing of such orders for our products and may not be able to replace existing orders that we have completed with new ones. As a result, our revenues from our Products Segment fluctuate (and at times, extensively) from period to period.

The following table sets forth a breakdown of our revenues for the periods indicated:

	Revenues (in thousands)					% of revenues for period indicated				
	Year ended December 31,			Three months ended March 31,		Year ended December 31,			Three months ended March 31,	
	2001	2002	2003	2003	2004	2001	2002	2003	2003	2004
				(unaudited)					(unaudited)	
Revenues										
Electricity Segment	\$ 33,956	\$ 65,491	\$ 77,752	\$ 17,604	\$ 33,459	70.9%	76.5%	65.1%	69.3%	70.3%
Products Segment	13,959	20,138	41,688	7,812	14,146	29.1	23.5	34.9	30.7	29.7
Total	\$ 47,915	\$ 85,629	\$119,440	\$ 25,416	\$ 47,605	100%	100%	100%	100%	100%

Geographical breakdown

11.7%, 48.0% and 56.4% of the revenues attributable to our Electricity Segment were generated in the United States in 2001, 2002, and 2003, respectively. For the three months ended March 31, 2004, 74.7% of our revenues attributable to our Electricity Segment were generated in the United States, as compared to 50.9% for the same period in 2003. During the past three fiscal years, the percentage of our total revenues attributable to the sale of electricity in the United States has increased significantly, as compared to the percentage of our total revenues that is attributable to the sale of electricity by our foreign projects that has declined commensurately. Such increase is largely attributable to our recent acquisition of various projects in the United States. The following table sets forth the geographic breakdown of the revenues attributable to our Electricity Segment for the periods indicated:

	Year ended December 31,			Three Months ended March 31,	
	2001	2002	2003	2003	2004
United States	11.7%	48.0%	56.4%	50.9%	74.7%
Foreign	88.3%	52.0%	43.6%	49.1%	25.3%

Historically, revenues attributable to our Products Segment, after giving effect to the elimination of intercompany balances, have been derived primarily from outside of the United States, which is reflective of the historical demand in the United States described elsewhere in this prospectus. Since 2003, we have begun to generate revenues attributable to our Products Segment in the United States as well. However, as a result of the volatility and unpredictability of the revenues attributable to our Products Segment and the impact that a few sales or EPC contracts can have on the geographic distribution of such revenues, the geographical distribution of such revenues may not be indicative of any developing trends and of our future results.

Seasonality

The demand for the electricity generated by our domestic projects and the prices paid for such electricity pursuant to our power purchase agreements are subject to seasonal variations. The demand for electricity from the Heber 1 project and Heber 2 project, the Mammoth project and the Ormesa project is the highest in the summer months of June through September, because the power purchaser for those projects, Southern California Edison Company, delivers more electricity to its California markets during such period in order to meet demand for air conditioning and other energy-intensive cooling systems utilized during such summer months. The demand for electricity from the Steamboat complex and the Brady project is more balanced, consisting of both summer and winter peaks that reflect the greater temperature variation in Nevada. Similarly, the demand for electricity from the Puna project is balanced due to the equatorial temperature in Hawaii (with less pronounced temperature variations during the year). In California, the capacity rates payable pursuant to the applicable power purchase agreement are higher in the summer months and as a result we receive higher revenues during such months. In contrast, there are no significant changes in prices during the year payable pursuant to our power purchase agreement for the Puna project and the Nevada

projects. In the winter, due principally to the lower ambient temperature, our power plants produce more energy and as a result we receive higher energy revenues. However, the higher capacity payments payable by the power purchaser in California in the summer months as a result of the increase in demand and in prices has a more significant impact on our revenues than that of the higher energy revenues generally generated in winter due to increased efficiency, and as a result our revenues are generally higher in the summer than in the winter.

Expenses

Electricity Segment

The principal expenses attributable to our operating projects include operation and maintenance expenses such as labor expenses, equipment expenses, cost of parts and chemicals, costs related to third-party services, lease expenses, royalties, startup and auxiliary electricity purchases, property taxes and insurance and, for the California projects, transmission charges, scheduling charges and purchases of sweet water for use in our plant cooling towers. Some of these expenses such as parts and third party services, are not incurred on a regular basis, which results in fluctuations in our expenses and our results of operations for individual projects from quarter to quarter.

Our partner in the Mammoth project reimburses us for 50% of the actual costs associated with the operation and maintenance of the project, plus certain general and administrative expenses.

Lease expenses are included as a component of operating expenses and principally consist of payments made to government agencies and private entities as compensation for the use of the relevant geothermal resources and site leases where plants are located.

Royalty payments are payments made as compensation for the right to use certain geothermal resources and are included as a component of operating expenses and are paid as a percentage of the revenues derived from the associated geothermal resources.

Products Segment

The principal expenses attributable to our Products Segment include materials, salaries and related employee benefits, expenses related to subcontracting activities, transportation expenses, and royalties pertaining to government participation in our research and development programs at a rate of 3.5% of the proceeds recovered from the sale of products which were developed pursuant to such research and development programs.

Some of the principal expenses attributable to our Products Segment, such as a portion of the costs related to labor, utilities and other support services, are fixed and, in order to maintain our current production and construction capability, must be incurred, notwithstanding the revenues attributable to our Products Segment. As a result, the cost of revenues attributable to our Products Segment, expressed as a percentage of total revenues, is often very volatile. To date, our management has made the strategic decision to maintain our production and construction capacity, and therefore maintain the fixed cost component of the total costs attributable to our Products Segment at the current level. Another reason for such volatility is that in responding to bids for our products, we price our products and services in relation to existing competition and other prevailing market conditions, which may vary substantially from order to order.

Critical Accounting Policies

Our critical accounting policies are more fully described in Note 1 to our audited consolidated financial statements. However, certain of our accounting policies are particularly important to the portrayal of our financial position and results of operations. In applying these critical accounting policies, our management uses its judgment to determine the appropriate assumptions to be used in making certain estimates. Such estimates are based on management's historical experience, the terms of existing contracts, management's observance of trends in the geothermal industry, information provided by our customers and information available to management from other outside sources, as appropriate. Such estimates are subject to an inherent degree of uncertainty. Our critical accounting policies include:

- *Revenues* . Revenues related to the sale of electricity from our geothermal power plants and capacity payments paid in connection with such sale are recorded based upon output delivered and capacity provided by such power plants at rates specified pursuant to the relevant power purchase agreements. Revenues generated from engineering and operating services and sales of products and parts are recorded once the service is provided or product delivery is made, as applicable. Revenues generated from the construction of geothermal power plant equipment, on behalf of third parties, is recognized on the percentage completion method, which is the relationship between costs actually incurred and total estimated costs to completion. Such cost estimate is made by management in part based on prior operations and in part based on specific project characteristics and designs. If management's estimates utilized with respect to our Products Segment of total estimated costs to completion are inaccurate, then the percentage of completion will also be inaccurate and thus lead management to over- or under-estimate the gross margins for our Products Segment. Selling, general and administrative costs are charged as and when incurred. Provisions for estimated losses relating to contracts are made in the period in which such losses are determined. Changes in job performance, job conditions, and estimated profitability, including those arising from the application of penalty provisions in relevant contracts and final contract settlements, may result in revisions to costs and income and are recognized in the period in which the revisions are determined.
- *Impairment of Long-lived Assets and Long-lived Assets to Be Disposed of* . Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the relevant asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less costs to sell. We believe that no impairment exists for our long-lived assets, however future estimates as to the recoverability of such assets may change based on revised circumstances.
- *Obligations Associated with the Retirement of Long-Lived Assets* . Effective January 1, 2003, we adopted SFAS No. 143, *Accounting for Obligations Associated with the Retirement of Long-Lived Assets* . Pursuant to SFAS No. 143, entities are required to record the fair market value of any legal liability related to the retirement of any of its assets in the period in which such liability is incurred. Our liabilities related to the retirement of our assets include our obligation to capping wells upon termination of our operating activities, the dismantling of our geothermal power plants upon cessation

of our operations and the performance of certain remedial measures related to the land on which such operations were conducted. When a new liability for an asset retirement obligation is recorded, we capitalize the costs of such liability by increasing the carrying amount of the related long-lived asset. Such liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset. At retirement, an entity either settles the obligation for its recorded amount or incurs a gain or a loss with respect thereto, as applicable. We estimate the costs related to such liabilities and if such estimates are incorrect, then the capitalized costs and carrying amount of the related long-lived asset will change and as a result may affect our financial condition.

- *Derivative Instruments.* SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted by other related accounting literature, establishes accounting and reporting standards for derivative instruments (including certain derivative instruments embedded in other contracts). SFAS No. 133 requires companies to record derivatives on their balance sheets as either assets or liabilities measured at their fair value unless such instruments are exempted from derivative treatment as a normal purchase and normal sale. All changes in the fair value of derivatives are recognized currently in earnings

unless specific hedge criteria are met which requires a company to formally document, designate and assess the effectiveness of transactions that receive hedge accounting.

We maintain a risk management strategy that incorporates the use of interest rate swaps and interest rate caps to minimize significant fluctuation in cash flows and/or earnings that are caused by interest rate volatility. Gain or loss on contracts that initially qualify for cash flow hedge accounting is included as a component of other comprehensive income and are subsequently reclassified into earnings when interest on the related debt is paid. Gain or loss on contracts that are not designated to qualify as a cash flow hedge is included as a component of interest expense.

We were required to adopt and have become subject to the provisions of SFAS No. 133 Derivative Implementation Group ("DIG") Issue No. C15 (DIG Issue No. C15), *Normal Purchases and Normal Sales Exception for Certain Option-Type Contracts and Forward Contracts in Electricity*, which expands the requirements for the normal purchase and normal sales exception to include electricity contracts entered into by a utility company when certain criteria are met. Also, pursuant to DIG Issue No. C15, contracts that have a price adjustment clause based on an index that is not directly related to the electricity generated, as defined in SFAS No. 133, do not meet the requirements for the normal purchases and normal sales exception. We have power sales agreements that qualify as derivative instruments under DIG Issue No. C15 and do not meet the exception as they have a price adjustment clause based on an index that does not directly relate to the sources of the power used to generate the electricity. Our adoption of the provisions of DIG Issue No. C15 in 2002 did not have a material impact on our consolidated financial position and results of operations.

In June 2003, the FASB issued DIG Issue No. C20, *Scope Exceptions: Interpretation of the Meaning of Not Clearly and Closely Related in Paragraph 10(b) regarding Contracts with a Price Adjustment Feature*. DIG Issue No. C20 specified additional circumstances in which a price adjustment feature in a derivative contract would not be an impediment to qualifying for the normal purchases and normal sales scope exception under SFAS No. 133. DIG Issue No. C20 was effective as of the first day of the fiscal quarter beginning after July 10, 2003, or October 1, 2003 for us. DIG Issue No. C20 requires contracts that did not previously qualify for the normal purchases and normal sales scope exception, and do qualify for the exception under DIG Issue No. C20, to freeze the fair value of the contract as of the date of the initial application, and amortized such fair value over the remaining contract period. Upon our adoption of DIG Issue No. C20, we elected the normal purchase and normal sales scope exception under FAS No. 133 related to our power purchase agreements. Such adoption did not have a material impact on our consolidated financial position and results of operations.

- *Accounting for Income Taxes* . As part of the process of preparing our consolidated financial statements, we are required to estimate our income tax in each of the jurisdictions in which we operate. This process requires us to estimate our actual current tax exposure and make an assessment of temporary differences resulting from differing treatment of items for tax and accounting purposes. Such differences result in deferred tax assets and liabilities which are included on our consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income and, to the extent we believe that such recovery is not likely, we must establish a valuation allowance. To the extent we establish a valuation allowance or increase such allowance in a period, we must include an expense within the tax provision in our statement of operations. Management uses significant judgment in determining our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets. In the event that we generate taxable income in a particular jurisdiction in which we operate and in which we have net operating loss carry-forwards for which a deferred tax valuation allowance has been established, we may be required to adjust our valuation allowance.
- *Stock Based Compensation* . We account for stock-based compensation based on the provisions of Accounting Board Opinion No. 25, *Accounting for Stock Issued to Employees* ,

which we refer to as APB 25, which states that no compensation expense is required to be recorded for stock options or other stock-based awards to employees that are granted with an exercise price equal to or above the estimated fair value per share of common stock on the relevant grant date. In the event that stock options are granted at a price that is lower than the fair market value on the relevant date, the difference between the fair market value of the common stock and the exercise price of the stock options is recorded as unearned compensation. Unearned compensation is amortized to compensation expense over the vesting period applicable to the stock option. We have adopted the disclosure requirements of SFAS No. 123, *Accounting for Stock-Based Compensation* , as it relates to stock options granted to employees, which requires pro-forma net income to be disclosed based on the fair value of the options granted at the date of the relevant grant.

- *New Accounting Pronouncements*

Consolidation of Variable Interest Entities

In January 2003, the Financial Accounting Standards Board, which we refer to as FASB, issued Interpretation No. 46, *Consolidation of Variable Interest Entities, an interpretation of ARB 51* , which we refer to as FIN No. 46, as amended by FIN No. 46R in December 2003. Among other things, FIN No. 46R generally deferred the effective date of FIN No. 46 to the quarter ended March 31, 2004. The objectives of FIN No. 46R are to provide guidance on the identification of Variable Interest Entities, which we refer to as VIEs, for which control is achieved through means other than ownership of a majority of the voting interest of an entity, and how to determine which company (if any), as the primary beneficiary, should consolidate such VIE. A variable interest in a VIE, by definition, is an asset, liability, equity, contractual arrangement or other economic interest that absorbs the entity's economic variability.

Effective as of March 31, 2004, we adopted FIN No. 46R. In connection with the adoption of FIN No. 46R, we concluded that Ormat-Leyte Co. Ltd., in which we have an 80% ownership interest, should be deconsolidated. Ormat-Leyte Co. Ltd.'s operating results continue to be accounted for using the consolidated method of accounting for the three month period ending March 31, 2004 and, effective April 1, 2004, our ownership interest in Ormat-Leyte Co. Ltd. will be accounted for using the equity method of accounting.

Derivative Instruments and Hedging Activities

In April 2003, the FASB issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities* . SFAS No. 149 amends and clarifies the accounting and reporting treatment for derivative instruments, including certain derivatives embedded in other contracts, and hedging activities under SFAS No. 133. The amendments set forth in SFAS No. 149 require that contracts with

comparable characteristics be accounted for as derivative instruments. SFAS No. 149 clarifies the circumstances under which a contract meets the characteristics of a derivative instrument according to SFAS No. 133 and clarifies when a derivative instrument contains a financing component that warrants special reporting in the statement of cash flows. The requirements of SFAS No. 149 are effective for contracts entered into or modified after June 30, 2003, and for hedging arrangements designated after June 30, 2003. We adopted the provisions of SFAS No. 149 effective July 1, 2003, which did not have a material impact on our consolidated results of operations and financial position as of December 31, 2003.

Accounting for Certain Financial Instruments with Characteristics of both Liability and Equity

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. SFAS No. 150 establishes standards for how a company classifies and measures in its statement of financial position certain financial instruments with characteristics of both liabilities and equity. It requires that a company classify a financial instrument that is within its scope as a liability because that financial instrument embodies an obligation of the company. The requirements of SFAS No. 150 are

effective for financial instruments entered into or modified after May 31, 2003, effective the first interim period beginning after June 15, 2003. For financial instruments created prior to the issuance date of SFAS No. 150, a transition is achieved by reporting the cumulative effect of a change in accounting principle. We adopted the provisions of SFAS No. 150 effective July 1, 2003, which did not have a material impact on our consolidated results of operations and financial position as of December 31, 2003.

Obligations Associated with the Retirement of Long-Lived Assets.

For a discussion of SFAS No. 143, please see the discussion set forth above.

Results of Operations

Our historical operating results, as a percentage of total revenues are presented below. A comparison of the different periods described below may be of limited value, as a result of the effects that (i) our recent acquisitions and enhancements of acquired projects, (ii) the sale of our investment in Karaganda Holding Company, which we refer to as KHC, in the third quarter of 2002, which owned and operated two coal fired power plants in Kazakhstan, and (iii) volatility in revenues of our Products Segment, in each case, have had on our historical operating results.

Comparison of the Three Months Ended March 31, 2004 and the Three Months Ended March 31, 2003

Total Revenues

Total revenues for the three months ended March 31, 2004 were \$47.6 million, as compared with \$25.4 million for the three months ended March 31, 2003, which represented an 87.4% increase in total revenues. Such increase was attributable to additional revenues being generated from the Heber 1 project and the Heber 2 project that were acquired in December of 2003 and the Steamboat 2/3 project that was acquired on February 13, 2004. Such increase in revenues was also due to an additional \$6.3 million received from the sale of products during such period.

Electricity Segment

	Three Months ended March 31,	
	2003	2004
	(in millions)	
Heber 1 and Heber 2 Project	\$ —	\$ 13.0
Steamboat Project	—	3.0

Other Projects	17.6	17.5
Total	<u>\$ 17.6</u>	<u>\$ 33.5</u>

Revenues attributable to our Electricity Segment for the three months ended March 31, 2004 were \$33.5 million, as compared with \$17.6 million for the three months ended March 31, 2003, which represented a 90.3% increase in such revenues. Such period included \$13.0 million of revenues generated by the Heber 1 project and Heber 2 project and \$3.0 million of revenues generated by the Steamboat 1/1A and Steamboat 2/3 projects, as compared to the same period in 2003, during which we did not record any revenues from such projects.

Products Segment

Revenues attributable to our Products Segment for the three months ended March 31, 2004 were \$14.1 million, as compared with \$7.8 million for the three months ended March 31, 2003, which represented an 80.8% increase in such revenues. This increase resulted from added revenues of \$6.3 million, principally attributable to two large projects (Mokai and Wairakei) during the three-month period ended March 31, 2004. Such increase reflects the volatility of the revenues generated from our Products Segment.

Total Cost of Revenues

Total cost of revenues for the three months ended March 31, 2004 was \$30.7 million, as compared with \$16.5 million for the three months ended March 31, 2003, which represented an 86.1% increase in total cost of revenues. As a percentage of total revenues, our total cost of revenues for the three months ended March 31, 2004 and the three months ended March 31, 2003 were 64.5% and 64.8%, respectively.

Electricity Segment

Total cost of revenues attributable to our Electricity Segment for the three months ended March 31, 2004 was \$19.4 million, as compared with \$10.1 million for the three months ended March 31, 2003, which represented a 92.1% increase in cost of revenues for such segment. The three months ended March 31, 2004 included \$8.3 million and \$1.2 million, respectively, of cost of revenues attributable to the Heber 1 project and the Heber 2 project and the Steamboat 1/1A and Steamboat 2/3 projects, as compared to the three months ended March 31, 2003, during which such projects were not included in our results of operations. As a percentage of total revenues, total cost of revenues attributable to our Electricity Segment for the three months ended March 31, 2004 (58.0%) remained consistent with such percentage for the three months ended March 31, 2003 (57.6%) because as a percentage of revenues, total cost of revenues for our newly acquired projects were substantially the same as those for the projects in our portfolio prior to such acquisitions.

Products Segment

Total cost of revenues attributable to our Products Segment for the three months ended March 31, 2004 was \$11.3 million, as compared with \$6.3 million for the three months ended March 31, 2003, which represented a 79.4% increase in cost of revenues related to such segment. Such \$5.0 million increase in cost of revenues was attributable to an increase in revenues received during the relevant period in 2004, as compared to the relevant period in 2003. As a percentage of total revenues, our total cost of revenues for the three months ended March 31, 2004 and the three months ended March 31, 2003 were substantially the same.

Research and Development Expenses

Research and development expenses for the three months ended March 31, 2004 were \$0.3 million, as compared with \$0.4 million for the three months ended March 31, 2003, which represented a 25.0% decrease in research and development expenses. Such decrease was in the ordinary course of our operations and does not represent any significant change in our research and development program or our ability to maintain and continue to develop our technologies and operations.

Selling and Marketing Expenses

Selling and marketing expenses for the three months ended March 31, 2004 were \$1.9 million, as compared with \$1.4 million for the three months ended March 31, 2003, which represented a 35.7% increase in selling and marketing expenses. Selling and marketing expenses for the three months ended March 31, 2004 constituted

3.9% of total revenues for such period, as compared with 5.4% for the three months ended March 31, 2003. Such 1.5% decrease is attributable to the fixed cost nature of certain of our selling and marketing expenses as compared to a larger revenue base. The larger revenue base was principally attributable to an increase in the revenues generated by our Electricity Segment. Once a project is in operation and generates electricity, selling and marketing expenses attributable to such project are relatively insignificant.

General and Administrative Expenses

General and administrative expenses for the three months ended March 31, 2004 were \$2.3 million, as compared with \$2.1 million for the three months ended March 31, 2003, which represented a 9.5% increase in general and administrative expenses. Such increase was principally attributable to an increase in professional services fees related to our business development activities in the United States. General and administrative expenses for the three months ended March 31, 2004 constituted 4.9% of total revenues for such period, as compared with 8.1% for the three months ended March 31, 2003. Such 3.3% decrease is attributable to the fixed cost nature of certain of our general and administrative expenses as compared to a larger revenue base.

Interest Expense

Interest expense for the three months ended March 31, 2004 was \$8.5 million, as compared with \$1.7 million for the three months ended March 31, 2003, which represented a 400.0% increase in such

interest expense. Approximately \$2.8 million of such increase was attributable to the interest expenses incurred by certain of our subsidiaries in connection with the Beal Bank financing and approximately \$2.2 million of such increase was attributable to the interest expenses incurred in connection with the issuance by Ormat Funding, on February 13, 2004, of \$190.0 million of senior secured notes. The remaining \$1.8 million increase was attributable to an increase in parent company loans. Interest on the senior secured notes of Ormat Funding for a full quarter would be \$3.9 million.

Income Taxes

Income taxes for the three months ended March 31, 2004 were \$1.7 million, as compared with \$1.4 million for the three months ended March 31, 2003, which represented a 21.4% increase in such income taxes. The effective tax rate for periods ended March 31, 2004 and March 31, 2003 was 38.5% and 41.3%, respectively. The higher effective rate for the period ended March 31, 2003 is primarily due to net losses of Ormat Systems for which no tax benefit was recognized because a deferred tax valuation allowance was applied to the related net operating losses in both periods. The net losses related to the operations of Ormat Systems were higher for the period ended March 31, 2003 than those for the corresponding period in 2004.

Equity in Income of Investees

Our participation in the income generated from our investees for the three months ended March 31, 2004 was \$0.8 million, as compared with \$0.1 million for the three months ended March 31, 2003, which represented a 700% increase. Such increase was principally attributable to the income generated in connection with our 50.0% equity interest in the Mammoth project, which was acquired in December, 2003 and which accounted for \$0.6 million of such income for the three months ended March 31, 2004.

Net Income

Net income for the three months ended March 31, 2004 was \$2.7 million, as compared with \$1.8 million for the three months ended March 31, 2003, which represented an increase of 50.0% in our net income. Our net income was reduced by the increase in our interest expenses incurred for the three months ended March 31, 2004. Net income as a percentage of our total revenues for the three months ended March 31, 2004 was 5.7%, as compared with 7.0% for the three months ended March 31, 2003. Such decrease was attributable to an increase in our financing expenses relating to the financing of the acquisition of the Heber 1 project, Heber 2 project and Steamboat 2/3 project.

Comparison of the Year Ended December 31, 2003 and the Year Ended December 31, 2002

Total Revenues

Total revenues for the year ended December 31, 2003 were \$119.4 million, as compared with \$85.6 million for the year ended December 31, 2002, which represented a 39.5% increase in our total revenues. Such increase was principally attributable to the receipt of additional revenues generated by the Ormesa project that was acquired on April 15, 2002 and the increase in revenues generated from the sale and installation of equipment to power plants worldwide.

Electricity Segment

	Year Ended December 31,	
	2002	2003
	<i>(in millions)</i>	
Ormesa Project	\$ 21.8	\$ 30.5
Heber 1 and Heber 2 Projects	—	2.0
Steamboat 1/1A Project	—	1.0
Leyte Project	15.6	12.6
Momotombo Project	9.2	11.6
Other Projects	18.9	20.1
Total	<u>\$ 65.5</u>	<u>\$ 77.8</u>

Revenues from the sale of electricity for the year ended December 31, 2003 were \$77.8 million, as compared with \$65.5 million for the year ended December 31, 2002, which represented a 18.8% increase in such revenues. Such increase was a result of: (i) the acquisition of the Ormesa project in April of 2002, which for the full fiscal year ended December 31, 2003 generated \$30.5 million of revenues, as compared to \$21.8 million for the eight-months of operation in 2002 following its acquisition; (ii) \$2.0 million of revenues generated by the Heber 1 project and the Heber 2 project for the 13-day period ended December 31, 2003, as compared with no revenues attributable to such projects in 2002; and (iii) \$1.0 million of revenues generated by the Steamboat 1/1A project as compared with no revenues attributable to such project in 2002. The increase in our revenues for the fiscal year ended December 31, 2003, as compared to the fiscal year ended December 31, 2002 would have been higher, but for the one-time addition to the revenues received in 2002 in the amount of \$2.7 million, as a result of a disputed performance bonus that was resolved and recognized in 2002.

Products Segment

Revenues from our Products Segment for the year ended December 31, 2003 were \$41.7 million, as compared with \$20.1 million for the year ended December 31, 2002, which represented a 107.5% increase in such revenues. Such increase resulted primarily from \$14.0 million of revenues primarily attributable to two large projects (Mokai and Miravalles) and the sale of products, services and parts for the year ended December 31, 2003. Such increase reflects the volatility of the revenues generated from our Products Segment.

Total Cost of Revenues

Total cost of revenues for the year ended December 31, 2003 was \$76.2 million, as compared with \$50.8 million for the year ended December 31, 2002, which represented a 50.0% increase. As a percentage of total revenues, our total cost of revenues for the year ended December 31, 2003 was 63.8% as compared to 59.3% for the year ended December 31, 2002. This increase is explained below.

Electricity Segment

Cost of revenues attributable to our Electricity Segment for the year ended December 31, 2003 was \$46.7 million, as compared with \$33.5 million for the year ended December 31, 2002, which represented a 39.4% increase for such cost of revenues. Such increase was principally attributable to the acquisition of the Ormesa project, as cost of revenues for the year ended December 31, 2003 included expenses of the Ormesa project in the amount of \$23.3 million, as compared to \$15.7 million for the year ended December 31, 2002. The Ormesa project had higher operating expenses than the other projects we operated at such time due to additional

transmission costs relating to the transmission of electricity over the Imperial Irrigation District transmission system and the type of equipment used in the Ormesa project, which is more costly to operate and maintain than the equipment used in our other projects that existed at the time of such acquisition. As a percentage of total revenues, the total cost of revenues attributable to our Electricity Segment was 60.1% for the

year ended December 31, 2003 as compared to 51.1% for the year ended December 31, 2002. Such increase, on a percentage basis, was partially attributable to \$2.7 million of revenues received as a result of a one-time disputed performance bonus that was resolved and recognized in 2002.

Products Segment

Cost of revenues attributable to our Products Segment for the year ended December 31, 2003 was \$29.5 million, as compared with \$17.3 million for the year ended December 31, 2002, which represented a 70.5% increase in such cost of revenues. Such \$12.2 million increase in cost of revenues was attributable to the generation of additional revenues from the sale of our equipment during the year ended December 31, 2003. As a percentage of our total revenues, our cost of revenues attributable to our Products Segment for the year ended December 31, 2003 was 70.7% as compared to 85.9% for the year ended December 31, 2002. Such 15.2% decrease reflects the fixed nature of our cost of revenues as compared to a larger revenue base.

Research and Development Expenses

Research and development expenses for the year ended December 31, 2003 were \$1.4 million, as compared with \$1.5 million for the year ended December 31, 2002, which represented a 6.7% decrease in such research and development expenses. Such decrease reflects a fluctuation in the ordinary course of our business and does not represent a significant change in our research and development program or our ability to maintain and continue to develop our technologies and operations.

Selling and Marketing Expenses

Selling and marketing expenses for the year ended December 31, 2003 were \$7.1 million, as compared with \$6.1 million for the year ended December 31, 2002, which represented a 16.4% increase in such selling and marketing expenses. Selling and marketing expenses for the year ended December 31, 2003 represented 5.9% of our total revenues, as compared to 7.1% for the year ended December 31, 2002. Such 1.2% decrease is a result of the effect of the fixed cost component of our selling and marketing expenses over a larger revenue base. The larger revenue base was principally attributable to an increase in the revenues generated by our Electricity Segment. Once a project is in operation and generates electricity, selling and marketing expenses are relatively insignificant.

General and Administrative Expenses

General and administrative expenses for the year ended December 31, 2003 were \$9.3 million, as compared with \$7.1 million for the year ended December 31, 2002, which represented a 31.0% increase in general and administrative expenses. Such increase was attributable to costs related to an increase in our personnel, wages and professional services and other costs related to our business development activities in the United States. As a percentage of our total revenues, general and administrative expenses were 7.7% of such revenues for the year ended December 31, 2003 and 8.3% of such revenues for the year ended December 31, 2002.

Interest Expense

Interest expense for the year ended December 31, 2003 was \$8.1 million, as compared with \$6.9 million for the year ended December 31, 2002, which represented an increase of 17.4% in our total interest expense. Such increase resulted from \$1.9 million of interest expense incurred in connection with the United Capital project finance loan incurred on December 31, 2002 by our project subsidiary to refinance the Ormesa acquisition, \$0.8 million of interest expense incurred in connection with outstanding parent company loans, and \$0.4 million of interest expense incurred in connection with the Beal Bank loan incurred on December 18, 2003, in order to finance the acquisition of the Heber 1 project, the Heber 2 project and the Mammoth project. Interest expenses related to certain other bank loans decreased by \$1.2 million for the fiscal year ended December 31, 2003 due to a decrease in outstanding corresponding balances.

Income Taxes

Income taxes for the year ended December 31, 2003 were \$2.5 million, as compared with \$6.1 million for the year ended December 31, 2002, which represented a decrease of 59.0% in such income taxes. The effective tax rate for the years ended December 31, 2003 and 2002 was 13.8% and 41.9%, respectively. For the year ended December 31, 2003, our effective tax rate was reduced by approximately 8.0% as a result of the application of investment tax credits. In addition, our foreign tax rates were substantially lower than our U.S. tax rates due primarily to the tax holiday in the Philippines that applied to us and the reversal of a deferred tax valuation allowance related to the realization of net operating losses in Ormat Systems which decreased our effective tax rate by approximately 5.6%. For the year ended December 31, 2002, our effective tax rate was reduced by approximately 2.7% as a result of the application of investment tax credits and increased by approximately 8.5% related to a deferred tax valuation allowance applied to the net operating losses in Ormat Systems.

Equity in Income of Investees

Our participation in the income generated from our investees for the year ended December 31, 2003 was \$0.6 million, as compared with \$0.3 million for the year ended December 31, 2002, which represented an increase of 100%. Such increase was principally attributable to an increase in our income derived from our 21.0% ownership of the Zunil project, which had lower debt service and therefore higher net income.

Discontinued Operations

Losses from operations of discontinued activities in Kazakhstan and losses from the sale of our Kazakhstan operations were \$3.1 million and \$6.4 million, respectively for the year ended December 31, 2002. The sale of our Kazakhstan operations (consisting of coal fired power plants and related assets), occurred on September 16, 2002. Such losses were recorded and reflected in our financial statements for the fiscal year ended December 31, 2002.

Net Income

Our income from continuing operations was \$15.7 million in the fiscal year ended December 31, 2003, as compared to \$8.5 million in fiscal year ended December 31, 2002, representing 13.1% of revenues in 2003 as compared to 9.9% of revenues in 2002. Such increase was attributable to increased revenues in both segments. Net income in 2002 was equal to a loss of \$1.0 million as a result of the loss from discontinued operations in Kazakhstan and the loss from the sale of our Kazakhstan assets. Net income in 2003 was \$15.5 million.

Comparison of the Year Ended December 31, 2002 and the Year Ended December 31, 2001

Total Revenues

Total revenues for the year ended December 31, 2002 were \$85.6 million, as compared with \$47.9 million for the year ended December 31, 2001, which represented a 78.7% increase in such total revenues. Such increase in total revenues was principally attributable to the revenues generated by the acquired Ormesa project and Brady project and is also due to an increase in the revenues generated by our Products Segment.

Electricity Segment

	Year Ended December 31,	
	2001	2002
	(in millions)	
Brady Project	\$ 4.0	\$ 9.6

Ormesa Project	—	21.8
Leyte Project	12.5	15.6
Other Projects	17.5	18.5
Total	<u>\$ 34.0</u>	<u>\$ 65.5</u>

Revenues attributable to our Electricity Segment for the year ended December 31, 2002 were \$65.5 million, as compared with \$34.0 million for the year ended December 31, 2001, which represented a 92.6% increase in such revenues. Such increase in revenues was principally attributable to the acquisition of the Ormesa project, as total revenues for the year ended December 31, 2002 included \$21.8 million of revenues generated from the Ormesa project, as compared with the year ended December 31, 2001, during which no revenues from the Ormesa project were recorded. Additionally, the acquisition of the Brady project on June 29, 2001 also contributed additional revenues, as total revenues for the year ended December 31, 2002 included Brady project revenues in the amount of \$9.6 million, while the period from June 29, 2001 to December 31, 2001 only included \$4.0 million of Brady project revenues. Lastly, our increased revenues were partially attributable to \$2.7 million of revenues received as a result of a one-time disputed performance bonus that was resolved and recognized in 2002.

Products Segment

Revenues from our Products Segment for the year ended December 31, 2002 were \$20.1 million, as compared with \$14.0 million for the year ended December 31, 2001, which represented a 43.6% increase in such revenues. Such increase resulted from revenues of \$7.0 million attributable to the Miravalles power plant during the year ended December 31, 2002, as compared with no revenues from any large project during 2001. Such difference reflects the volatility of the revenues generated from our Products Segment.

Total Cost of Revenues

Total cost of revenues for the year ended December 31, 2002 was \$50.8 million, as compared with \$30.0 million for the year ended December 31, 2001, which represented a 69.3% increase in total cost of revenues. As a percentage of our total revenues, our total cost of revenues for the year ended December 31, 2002 was 59.3%, as compared with 62.6% for the year ended December 31, 2001.

Electricity Segment

Cost of revenues attributable to our Electricity Segment for the year ended December 31, 2002 was \$33.5 million, as compared with cost of revenues of \$12.5 million for the year ended December 31, 2001, which represented a 168.0% increase in such cost of revenues. Such increase was principally attributable to the acquisition of the Ormesa project, as cost of revenues for the year ended December 31, 2002 included expenses of the Ormesa project equal to \$15.7 million, as compared to operating expenses relating to the Ormesa project during the year ended December 31, 2001. In addition to the acquisition of the Ormesa project, as a result of the acquisition of Brady project, operating expenses for the year ended December 31, 2002 included expenses for the Brady project equal to \$5.3 million, as compared to the fiscal year ended December 31, 2001, which included \$2.6 million of such expenses. As a percentage of our total revenues, our cost of revenues attributable to our Electricity Segment was 51.1% for the fiscal year ended December 31, 2002, as compared with 36.9% for the fiscal year ended December 31, 2001. Such increase was primarily attributable to the cost of revenues for the Ormesa project which were substantially higher than the cost of revenues of

our other existing projects at the time of such acquisition which are due to additional transmission costs relating to the transmission of electricity over the Imperial Irrigation District transmission system and the type of equipment used in the Ormesa project, which is more costly to operate and maintain than the equipment used in our other projects that existed at the time of such acquisition.

Products Segment

Cost of revenues attributable to our Products Segment for the year ended December 31, 2002 was \$17.3 million, as compared with \$17.5 million for the year ended December 31, 2001, which represented a 1.1% decrease in such cost of revenues. As a percentage of our total revenues, our cost of revenues attributable to our Products Segment for the fiscal year ended December 31, 2002 was 85.9%, as compared with 125.0% for the

fiscal year ended December 31, 2001. Such reduction was primarily attributable to a higher volume of product sales which was sufficient to absorb the related fixed costs whereas in 2001, cost of revenues attributable to our Products Segment exceeded revenues generated from our Products Segment.

Research and Development Expenses

Research and development expenses for the year ended December 31, 2002 were \$1.5 million, as compared with \$1.7 million for the year ended December 31, 2001, which represented a 11.8% decrease in research and development expenses. Such decrease was in ordinary course of our operations and does not represent a significant change in our research and development program or our ability to maintain and continue to develop our technologies and operations.

Selling and Marketing Expenses

Selling and marketing expenses for the year ended December 31, 2002 were \$6.1 million, as compared with \$6.5 million for the year ended December 31, 2001, which represented a 6.2% decrease in such selling and marketing expenses. Selling and marketing expenses for the year ended December 31, 2002 represented 7.1% of our total revenues, as compared with 13.6% for the year ended December 31, 2001. Such 6.5% decrease is attributable to the fixed cost nature of certain of our selling and marketing expenses as compared to a larger revenue base. The larger revenue base was principally attributable to an increase in the revenues generated by our Electricity Segment. Once a project is in operation and generates electricity, selling and marketing expenses attributable to such project are relatively insignificant.

General and Administrative Expenses

General and administrative expenses for the year ended December 31, 2002 were \$7.1 million, as compared with \$5.4 million for the year ended December 31, 2001, which represented a 31.5% increase in general and administrative expenses. Such increase was principally attributable to an increase in our business development activities in the United States. General and administrative expenses for the year ended December 31, 2002 constituted 8.3% of our total revenues, as compared to 11.3% for the year ended December 31, 2001.

Interest Expense

Interest expense for the year ended December 31, 2002 was \$6.9 million, as compared with \$4.5 million for the year ended December 31, 2001, which represented a 53.3% increase in our total interest expense. Such increase was primarily attributable to an increase in interest expense and related guarantee fees of \$1.9 million relating to short term bank loans, and an increase in interest expense of approximately \$0.5 million relating to medium term corporate loans.

Income Taxes

Income taxes for the year ended December 31, 2002 were \$6.1 million, as compared with \$3.1 million for the year ended December 31, 2001, which represented an increase of 96.8% in such income taxes. The effective tax rate for the years ended December 31, 2002 and 2001 was 41.9% and

229.9%. For the year ended December 31, 2002, our effective tax rate was reduced by approximately 2.7% as a result of the application of investment tax credits and increased by approximately 8.5% related to a deferred tax valuation allowance applied to the net operating losses of Ormat Systems. For the year ended December 31, 2001, our effective tax rate was increased by a deferred tax valuation allowance applied to the net operating losses in Ormat Systems.

Equity in Income of Investees

Our participation in the income generated from our investees for the year ended December 31, 2002 was \$0.3 million, as compared with \$0.2 million for the year ended December 31, 2001, which represented an increase of 50.0%. Such increase was principally attributable to an increase in our income derived from our 21.0% ownership interest of the Zunil project, which had lower debt service and therefore higher net income.

Discontinued Operations

Losses from operations of discontinued activities in Kazakhstan and losses from the sale of our operations in Kazakhstan were \$3.1 million and \$6.4 million, respectively, for the year ended December 31, 2002. Losses from operations of discontinued activities in Kazakhstan for the year ended December 31, 2001 were \$4.7 million.

Net Income (Loss)

Our income from continuing operations was \$8.5 million in the fiscal year ended December 31, 2002, as compared to a loss of \$1.7 million for the fiscal year ended December 31, 2001. Such increase was attributable to increased revenues generated by both segments. Loss from discontinued operations amounted to \$3.1 million compared with \$4.7 million in 2001. In 2002, we also recorded a loss on the sale of our Kazakhstan assets of \$6.4 million. The net income was a loss of \$1 million in 2002, compared to a loss of \$6.4 million in 2001.

Quarterly Results of Operations

The table below sets forth unaudited consolidated statement of operations data for each of the five consecutive quarters ended March 31, 2004. The unaudited consolidated financial statements have been prepared on the same basis as our audited consolidated financial statements included elsewhere in this prospectus and include all adjustments, consisting only of normal recurring adjustments, which, in the opinion of management, are necessary for a fair presentation of such financial information. The operating results for any quarter described below are not necessarily indicative of our future results of operations for any fiscal quarter or year.

	Three Months ended

Liquidity and Capital Resources

Since our inception, we have funded our operations through a combination of internally generated cash and parent company loans, supplemented with third party debt.

Our third-party debt is composed of two principal categories. The first consists of project finance debt or acquisition financing that we or our subsidiaries have incurred for the purpose of developing and constructing our projects or for the acquisition of our projects. The second consists of debt incurred by us or our subsidiaries for general corporate purposes. Orcal Geothermal, one of our subsidiaries, has incurred a non-recourse project finance loan from Beal Bank, for the purpose of financing, in part, the acquisition of the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project, of which \$154.5 million was outstanding as of March 31, 2004, bearing an interest rate of the greater of 7.125% or LIBOR plus 5.125% per annum. On February 13, 2004, Ormat Funding, one of our subsidiaries, issued 8¾% senior secured notes in a capital markets offering subject to Rule 144A and Regulation S of the Securities Act, for the purpose of the refinancing of the acquisition cost of the Brady, Ormesa and Steamboat 1/1A projects, and the financing of the acquisition cost of the Steamboat 2/3 project, of which \$190.0 million was outstanding as of March 31, 2004. The Bank Hapoalim project finance debt, of which \$19.2 million was outstanding as of March 31, 2004, bearing an interest rate of LIBOR plus 2.375% per annum on tranche one of the loan and LIBOR plus 3.0% per annum on tranche two of the loan, and the Export-Import Bank of the United States project finance debt, of which \$17.8 million was outstanding as of March 31, 2004, bearing an interest rate of 6.54% per annum, were each incurred by our relevant subsidiaries to finance the Momotombo project and Leyte project, respectively. All of the agreements described in this section are described in more detail under "Description of Certain Material Agreements — Financing Agreements."

The second category of our third party debt includes the following loans: (i) a \$20.0 million credit facility from United Mizrahi Bank, of which no amount was outstanding as of March 31, 2004, bearing an interest rate of LIBOR plus 1.2% per annum, (ii) a \$20 million credit facility from Bank Leumi, of which \$14.9 million was outstanding as of March 31, 2004, bearing an interest rate of LIBOR plus 5% per annum, (iii) medium term loans from Bank Continental, of which \$6.8 million was outstanding as of March 31, 2004, and which we are obligated to repay no later than January 14, 2005 or otherwise refinance with Bank Continental or one of its affiliates, bearing an interest rate of LIBOR plus 1% per annum; (iv) a medium term loan from Bank Hapoalim, of which \$5.0 million was outstanding as of March 31, 2004, bearing an interest rate of LIBOR plus 1.7% per annum; (v) a medium term loan from Discount Bank, of which \$4.6 million was outstanding as of March 31, 2004, bearing an interest rate of LIBOR plus 1.7% per annum and (vi) a medium term loan from Israel's Industrial Development Bank, of which \$5.8 million was outstanding as of March 31, 2004, bearing an interest rate of LIBOR plus 1.8% per annum. Our payment obligation under such credit facilities are all currently guaranteed by our parent.

From time to time, Bank Leumi has issued, as security for certain of our obligations, performance letters of credit in favor of our customers. Our parent is the counterparty with respect to such letters of credit. Pursuant to certain existing agreements described elsewhere in this prospectus, we are required to pay to our parent a guarantee fee with respect to such letters of credit (and other guarantees) and are responsible to reimburse our parent for any draw or payment made under these letters of credit or guarantees. As of March 31, 2004, the outstanding aggregate amount available to be drawn under these letters of credit was \$8.5 million.

In connection with the acquisition transaction between Ormat Systems and our parent, we have entered into certain agreements with each of Bank Hapoalim, Bank Leumi, Bank Continental, United Mizrahi Bank and Israel's Industry Development Bank pursuant to which, in exchange for such banks' release of our parent's guarantee and a release of their security interest over the assets our subsidiary, Ormat Systems, acquired from our parent, we will, and Ormat Systems will, agree to certain negative pledge covenants and, in some cases, comply with certain financial ratios such as a debt service coverage ratio and a debt to equity ratio. We do not expect that these covenants or ratios, which will apply to us on a consolidated basis, will materially limit our ability to execute our future business plans or our operations. In addition, as part of the consideration for the acquisition transaction between Ormat Systems and our parent, we will assume approximately \$5.4 million of our parent's outstanding loan with Continental Bank.

We have also entered into an agreement with Bank Hapoalim pursuant to which we have assumed our parent's existing obligations to Bank Hapoalim with respect to approximately \$17.2 million of outstanding letters of credit.

We do not expect that any third party debt that we, or any of our subsidiaries, will incur in the future will be guaranteed by our parent.

We are currently evaluating different options for the refinancing of the acquisition cost of the Puna project, which may include the issuance by Ormat Funding of an additional tranche of its senior secured notes or the incurrence by our project subsidiary that owns the Puna project of project finance debt, lease financing, or other form of leverage financing. If we are successful in acquiring the remaining 50% ownership of the Mammoth project, we will also be able to finance such acquisition with the issuance by Ormat Funding of an additional tranche of its senior secured notes.

Our management believes that we are in material compliance with our covenants with respect to our third-party debt.

We estimate that the net proceeds we will receive from this offering will be approximately \$ million, or approximately \$ million if the underwriters exercise their over-allotment option in full, in each case, after deducting the underwriting discounts and commissions and estimated expenses of this offering payable by us.

We expect to use the net proceeds of this offering to finance the continued growth of our business and for general corporate purposes, including by making other investments or acquisitions. However,

we have no present understanding or agreement relating to any specific acquisition. Accordingly, management will have significant flexibility in applying the net proceeds of this offering. Pending the use of such proceeds, we intend to invest such proceeds in interest-bearing instruments. Our management believes that the sources of liquidity described above, together with the proceeds of this offering, will be sufficient to address our near and short term liquidity and other investment requirements.

Historical Cash Flows

The following table sets forth the components of our cash flows for the relevant periods indicated:

	Year ended December 31,			Three months ended March 31,	
	2001	2002	2003	2003	2004
	(in thousands)			(unaudited)	
Net cash provided by operating activities	\$ 11,392	\$ 11,545	\$ 46,019	\$ 8,929	\$ 22,496
Net cash used in investing activities	(62,436)	(60,521)	(285,180)	(6,183)	(151,446)
Net cash provided by (used in) financing activities	54,468	72,509	211,350	(15,858)	148,978
Effect of foreign currency translation adjustments	(293)	(51)	—	—	—
Net increase (decrease) in cash and cash equivalents	\$ 3,131	\$ 23,482	\$ (27,811)	\$ (13,112)	\$ 20,028

For the Three Months Ended March 31, 2004

Net cash provided by operating activities for the three months ended March 31, 2004 was \$22.5 million, as compared with \$8.9 million for the three months ended March 31, 2003. Such increase was principally attributable to the addition of cash flows from the operating activities of the Heber 1 project and Heber 2 project.

Net cash used in investing activities for the three months ended March 31, 2004 was \$151.4 million, as compared with \$6.2 million for the three months ended March 31, 2003. The principal factors that affected the increase in the use of our cash flow for investing activities during such period were the aggregate amount of cash paid for acquisitions, net of cash received, which, for the three months ended March 31, 2004, as a result of the acquisition of the Steamboat 2/3 project, was equal to \$82.8 million and the increase in our restricted cash and cash equivalents during such period, which was equal to \$64.3 million resulting primarily from the issuance by Ormat Funding of its 8¼% senior secured notes in the amount of \$190.0 million. A portion of the proceeds from the issuance of the such senior secured notes was escrowed and reserved for additional investments for the Galena project and for the purpose of repayment of the loan extended by United Capital to fund the acquisition of the Ormesa project.

Net cash provided by financing activities for the three months ended March 31, 2004 was \$149.0 million, as compared with \$15.9 million used in financing activities for the three months ended March 31, 2003. The principal factors that affected the cash flow provided by financing activities during the three months ended March 31, 2004 were the use of the proceeds from the issuance of the senior secured notes in order to finance the acquisition of the Steamboat 2/3 project and to refinance the acquisition of the Ormesa, Brady, and Steamboat 1/A projects, and a repayment of outstanding parent company loans in the amount of \$27.0 million.

For the Year Ended December 31, 2003

Net cash provided by operating activities for the year ended December 31, 2003 was \$46.0 million, as compared with \$11.5 million for the year ended December 31, 2002. Such change was principally attributable to an increase in revenues as a result of the acquisition of the Ormesa project and an increase in revenues generated from our Products Segment.

Net cash used in investing activities for the year ended December 31, 2003 was \$285.2 million, as compared with \$60.5 million for the year ended December 31, 2002. The principal factors that affected the increase in the use of our cash flow for investing activities during such period included:

-
- Cash paid for acquisitions (net of cash received) in the amount of \$256.6 million, relating to the acquisition of the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project; and
 - Capital expenditures spent in connection with the Ormesa project in an amount equal to \$17.0 million for the installation of new power units and the modification of the geothermal fluid gathering and electrical systems, in order to increase the capacity, reliability and availability of the Ormesa project.

Net cash provided by financing activities for the year ended December 31, 2003 was \$211.4 million, as compared with \$72.5 million for the year ended December 31, 2002. The principal factors that impacted our cash flow provided by financing activities during the year ended December 31, 2003 were the incurrence of a loan by Orcal in an amount of \$154.5 million from Beal Bank in December 2003, and the receipt of \$126.3 million of proceeds from parent company loans, less a repayment of \$55.0 million of short-term debt.

For the Year Ended December 31, 2002

Net cash provided by operating activities for the year ended December 31, 2002 was \$11.5 million, as compared with \$11.4 million for the year ended December 31, 2001. Such increase was principally attributable to the acquisition of the Ormesa project.

Net cash used in investing activities for the year ended December 31, 2002 was equal to \$60.5 million, as compared to \$62.4 million for the year ended December 31, 2001. The principal factors that impacted the use of our cash flow from investing activities during such period included:

Cash paid for acquisitions (net of cash received) in the amount of \$39.7 million, relating to the acquisition of the Ormesa project in 2002, as compared to the cash paid for acquisitions (net of cash received) in the amount of \$30.5 million, relating to the acquisition of the Brady project in 2001; and

- Capital expenditures incurred in connection with the Brady project and the Momotombo project in the amount of \$19.7 million and the Ormesa project in the amount of \$1.7 million.

Net cash provided by financing activities for the year ended December 31, 2002 was \$72.5 million, as compared with \$54.5 million for the year ended December 31, 2001. The principal factors that impacted our cash flow provided by financing activities were \$55.0 million of proceeds received pursuant to short term lines of credit and \$18.4 million of proceeds received in connection with the loan made to the Ormesa project.

Capital Expenditures

Our capital expenditures primarily relate to two principal components, the enhancement of our existing power plants and the development of new power plants. In addition, we have budgeted approximately \$5.0 million for purposes of the acquisition of machinery and equipment and for an office building for the next two to three years.

Enhancement of existing plants

To the extent not otherwise described below, we expect that the following enhancements of our existing power plants will be funded from internally generated cash or other available corporate resources, which we expect to subsequently refinance with non- or limited-resource debt at the project level.

Galena Re-powering . We have commenced the design and construction phase of the re-powering of the Galena project and expect to complete the project by the end of 2005. The estimated \$23.0 million of costs attributable to such enhancement will be funded from proceeds received by Ormat Funding in connection with its issuance of its senior secured notes, which are currently deposited in an escrow account, and will be released in accordance with the progress of the construction phase for such enhancement. We expect that the investment will increase the total output of the Steamboat complex by 13MW.

Mammoth Project Enhancement . Mammoth-Pacific, L.P. plans to commence a \$5.0 million enhancement program of the Mammoth project, consisting primarily of drilling activities, which we believe will result in an increase in such output of the project of 30,500 MWh per year and is expected to be completed by January of 2006. A substantial portion of the funds required for such enhancement have been earmarked by us and our partners for such enhancement program.

Heber Project Enhancement . In connection with the Heber 1 and Heber 2 projects, we are currently pursuing an enhancement program consisting of geothermal field optimization and the drilling of an additional well at the Heber 2 project and the adding of additional OEC units at the Heber 1 and Heber 2 projects, in order to increase the generating capacity of the Heber 1 and Heber 2 projects by 18 MW, for a total budgeted investment of approximately \$28.0 million. Such enhancement program will be funded from cash generated by the Heber 1 and Heber 2 projects and other liquidity sources.

Steamboat Hills Project Enhancement . In connection with the Steamboat Hills project, we plan to add a further OEC unit and perform associated work in order to increase the output of the power plant by 7.5 MW for a total budgeted investment of approximately \$10.0 million, which is currently scheduled to be completed in 2006.

Puna Project Enhancement . In connection with the Puna project, an approximately \$22.0 million dollar enhancement program is currently planned and is intended to increase the output of the project by 6.5 MW and to improve its reliability. We expect that such enhancement program will be completed in 2007. We are currently exploring various financing options for the refinancing of the acquisition cost of the Puna project.

Construction of new projects

Initially, we intend to fund the construction projects described below from internally generated cash, parent company loans and short-term debt.

Desert Peak 2 and Desert Peak 3 Projects . In connection with the Desert Peak 2 and Desert Peak 3

projects, we have already drilled the necessary production wells and expect to begin the manufacturing and construction of the associated power plant shortly, which manufacturing and construction is expected to be completed in 2006. The total construction cost for the construction of the 15 MW power plant is estimated to be between \$30.0 million and \$35.0 million.

Amatitlan Project . The Amatitlan project, which is in its final engineering stage, is scheduled to be completed in 2006 and the aggregate construction cost related to such project is estimated at approximately \$40 million.

Other than the enhancements described above, we do not anticipate any other material capital expenditures in the near term for any of our operating projects, other than ordinary maintenance requirements, which we typically fund with internally generated cash.

Exposure To Market Risks

One market risk to which power plants are typically exposed is the volatility of electricity prices. However, our exposure to such market risk is not significant, principally because our long-term power purchase agreements have fixed or escalating rate provisions that limit our exposure to changes in electricity prices. However, beginning in May 2007, the energy payments payable under the power purchase agreements for the Heber 1 project and Heber 2 project, the Ormesa project and the Mammoth project will be determined by reference to the relevant power purchaser's short run avoided costs. In addition, under certain of the power purchase agreements for our projects in Nevada, the price that Sierra Pacific Power Company pays for energy and capacity is based upon its short run avoided cost. We estimate that energy payments will represent approximately two-thirds of those projects' revenues after 2007 and as a result, expect that there will be some volatility in the revenues received from such projects. 44.4% of our consolidated long-term debt (excluding amounts owed to our parent) is currently in the form of fixed rate securities and is therefore not subject to

interest rate fluctuation risk. However, 55.6% of our debt is currently in the form of a floating rate which exposes us to changes in interest rates in connection therewith. In order to mitigate such risks, we have acquired an interest rate cap of 6.0% with respect to the LIBOR component of the interest rate applicable to the Beal Bank loan from 2007 to 2011. Ormat Systems has also entered into an interest rate swap transaction relating to the Bank Continental loan in order to mitigate the risk of LIBOR fluctuations in connection with such loan. Pursuant to such swap, Ormat Systems pays a fixed interest rate of 2.26% instead of the three-month LIBOR rate applicable to the loan. The outstanding balance of such loan as at March 31, 2004 was \$6.8 million. Giving effect to such financial instruments, as of March 31, 2004, \$194.5 million of our debt is subject to some floating rate risk. As such, we are exposed to changes in interest rates with respect to our long term obligations. The detrimental effect on our pre-tax earnings of a hypothetical 50 basis point increase in interest rates would be approximately \$970,000. See "— Liquidity and Capital Resources" for further discussion of our debt instruments.

Another market risk to which we are exposed is primarily related to potential adverse changes in foreign currency exchange rates, in particular the fluctuation of the U.S. dollar versus the new Israeli shekel. Risks attributable to fluctuations in currency exchange rates can arise when any of our foreign subsidiaries borrows funds or incurs operating or other expenses in one type of currency but receives revenues in another. In such cases, an adverse change in exchange rates can reduce such subsidiary's ability to meet its debt service obligations, reduce the amount of cash and income we receive from such foreign subsidiary or increase such subsidiary's overall expenses. Risks attributable to fluctuations in foreign currency exchange rates can arise when the currency-denomination of a particular contract is not the U.S. dollar. All of our power purchase agreements in the international markets are either U.S. dollar-denominated or linked to the U.S. dollar. Our construction contracts from time to time contemplate costs which are incurred in local currencies. The way we often mitigate such risk is to receive part of the proceeds from the sale contract in the currency in which the expenses are incurred. Currently, we have not used any material foreign currency exchange contracts or other derivative instruments to reduce our exposure to this risk. In the future, we may use such foreign currency exchange contracts and other derivative instruments to reduce our foreign currency exposure to the extent we deem such instruments to be the appropriate tool for managing such exposure. We do not believe that our exchange rate exposure has or will have a material adverse effect on our financial condition, results of operations or cash flows.

We currently maintain our surplus cash in short-term, interest-bearing bank deposits and Preferred Auctioned Rate Securities, which we refer to as PARS (deposits of entities with a minimum investment grade

rating of AA (by Standard & Poor's Ratings Services)). Upon completion of this offering, pending further application, we may invest a portion of the net proceeds we derive from this offering in interest-bearing investment-grade instruments or bank deposits. We do not expect that a 300 basis point increase or decrease from current interest rates would have a material adverse effect on our financial position, but will have an effect on our results of operations and cash flows.

Effects of Inflation

We do not expect that the low inflation environment of recent years in most of the countries in which we operate will continue. To address rising inflation, some of our contracts include certain mitigating factors against any inflation risk. In connection with the Electricity Segment, inflation may directly impact an expense incurred for the operation of our projects, hence increasing the overall operating cost to us. The negative impact of inflation may be partially offset by price adjustments built into some of our power purchase agreements that could be triggered upon such occurrences. As energy payments pursuant to the power purchase agreements for the Mammoth project (after April 2007), Ormesa project (after April 2007), Heber 1 project, Heber 2 project (after April 2007) and Steamboat 1/1A project change our power purchasers' underlying short run avoided cost, to the extent that inflation causes an increase in the short run avoided cost of our power purchaser, higher energy payments could have an offsetting impact to any inflation-driven increase in our expenses. Similarly, the energy payments pursuant to the power purchase agreements for the Brady project, Steamboat 2/3 project, the Steamboat Hills project and the Galena project increase every year through the end of the

relevant terms of such agreements, however, such increases are not directly linked to the CPI. Lease payments are generally fixed, while royalty payments are generally determined as a percentage of revenues and therefore are not significantly impacted by inflation.

The recent price increase in the cost of raw materials that we use in our Products Segment has not been due to inflation but rather to a high demand for such raw materials, which we believe mainly to result from demand generated by the Chinese market. This may cause a reduction in the profitability of our Products Segment, as well as an increase in the capital cost of our projects under construction and enhancements.

Overall, we believe that the impact of inflation on our business will not be significant.

Contractual Obligations and Commercial Commitments

The following table sets forth our material contractual obligations as of March 31, 2004, excluding interest:

	Remaining Total	Payment Due By Period					
		2004	2005	2006	2007	2008	Thereafter
Long-Term non-recourse & limited recourse debt	\$188,573	\$ 9,292	\$ 19,141	\$ 9,456	\$ 11,386	\$ 12,931	\$126,367
Long-Term recourse debt	49,003	27,942	10,490	5,771	1,700	1,700	1,400
Non-recourse Senior Secured Notes due 2020	190,000	511	6,090	9,611	8,932	7,835	157,021
Unconditional purchase obligations	—	—	—	—	—	—	—
Ormat Industries notes payable	150,504	—	—	—	—	—	150,504
Total contractual obligations	<u>\$578,080</u>	<u>\$ 37,745</u>	<u>\$ 35,721</u>	<u>\$ 24,838</u>	<u>\$ 22,018</u>	<u>\$ 22,466</u>	<u>\$435,292</u>

Off Balance Sheet Arrangements

Letters of Credit

On June 30, 2004, our subsidiary, Ormat Nevada, entered into a Letter of Credit Agreement with Hudson United Bank, pursuant to which Hudson United Bank agreed to issue one or more letters of credit in an aggregate face amount of up to \$15.0 million. As of the date hereof, two letters of credit have been issued pursuant to this

facility. The first was issued in favor of the trustee for the 8¼% senior secured notes, for a face amount of \$8.1 million, which will be increased by an additional amount of \$2.7 million as of December 31, 2004. The second was issued in favor of Beal Bank, for a face amount of \$3.6 million. Such letters of credit have been issued to substitute for current cash balances in respective reserve accounts. We will use the available cash, in the amount of \$11.7 million, that will be released from such reserve accounts either for working capital, repayment of parent company loans, or reductions of outstanding bank debt.

On July 15, 2004, we entered into a reimbursement agreement with Ormat Industries, pursuant to which we agreed to reimburse Ormat Industries for any draws made on any standby letter of credit issued by Ormat Industries that is subject to the guarantee fee agreement between us and Ormat Industries and any payments made under any guarantee provided by Ormat Industries subject to such agreement. Interest on any amounts owing pursuant to the reimbursement agreement is paid in U.S. dollars at a rate per annum equal to Ormat Industries' average effective cost of funds plus 0.3%.

Some of our customers require our project subsidiaries to post letters of credit in order to guarantee their respective performance under relevant contracts. We are also required to post letters of credits to secure our obligations under various leases and licenses and may, from time to time, decide to post letters of credit in lieu of cash deposits in reserve accounts under certain financing arrangements. In addition, our subsidiary, Ormat Systems, is required from time to time to post performance letters of credit in favor of our customers with respect to orders of products.

Bank Hapoalim has issued such performance letters of credit in favor of our customers from time to time. Initially, our parent, Ormat Industries, was Bank Hapoalim's counterparty on such letters of credit and we paid our parent a guarantee fee and were responsible to reimburse our parent for any draw under these letters of credit. In connection with the acquisition transaction between Ormat Systems and our parent, we have assumed such letters of credit and are now the direct counterparty of Bank Hapoalim on such letters of credit. As of March 31, 2004 the aggregate amount available to be drawn under these letters of credit was \$17.2 million. The amount that can be drawn under some of these letters of credit may be increased from time to time subject to the satisfaction of certain conditions.

As of the date hereof, we have not had a draw presented against any letter of credit issued or provided on our behalf and do not believe that it is likely that any claims will be made under a letter of credit in the foreseeable future.

Prior to 2003, our research and development efforts were partially funded through grants from the Office of the Chief Scientist of the Israeli Ministry of Industry and Trade. We currently have no such grants available or outstanding. Under Israeli law, we are required to pay royalties to the Israeli government based on revenues derived from the sale of products developed with the assistance of such grants. The applicable royalty rate is between 3.0% to 5.0%, and the amount of royalties required to be paid are capped at the amount of the grants received (in U.S. dollars). The outstanding balance of grants provided after January 1, 1999 accrue interest at a rate equal to the 12-month LIBOR, as published on the first day of the calendar year in which the particular grant was approved. Because the royalties are payable only from revenues, if any, derived from the relevant products, we only recognize a royalty expense to the government upon delivery of the product to our customers.

Concentration of Credit Risk

Our credit risk is currently concentrated with a limited number of major customers, Sierra Pacific Power Company, Southern California Edison Company, Hawaii Electric Light Company, PNOC-Energy Development Corporation, The Kenya Power and Lighting Company Limited and two electric distribution companies who are assignees of Empresa Nicaraguense de Electricidad. If any of these electric utilities fails to make payments under its power purchase agreements with us, such failure would have a material adverse impact on our financial condition.

Historically, Southern California Edison Company accounted for 27.1%, 25.5% and 0% of our total revenues for the three years ended December 31, 2003, 2002 and 2001, respectively, and 40.6% and 24.0% of our total revenues for the three months ended March 31, 2004 and 2003, respectively. Southern California Edison Company is also the power purchaser and revenue source for our Mammoth project, which we account for separately under the equity method of accounting.

Sierra Pacific Power Company accounted for 9.5%, 11.2% and 8.3% of our total revenues for the three years ended December 31, 2003, 2002 and 2001, respectively, and 12.5% and 11.3% of our total revenues for the three months ended March 31, 2004 and 2003, respectively.

PNOC-Energy Development Corporation accounted for 10.6%, 18.2% and 26.0% of our total revenues for the three years ended December 31, 2003, 2002 and 2001, respectively, and 6.5% and 12.6% of our total revenues for the three months ended March 31, 2004 and 2003, respectively.

The two electric distribution companies who are assignees of Empresa Nicaraguense de Electricidad accounted for 9.7%, 10.8% and 18.6% of our total revenues for the three years ended December 31, 2003, 2002 and 2001, respectively, and 6.2% and 12.2% of our total revenues for the three months ended March 31, 2004 and 2003, respectively.

The Kenya Power & Lighting Co. Ltd. accounted for 8.1%, 10.8% and 18.0% of our total revenues for the years ended December 31, 2003, 2002 and 2001, respectively, and 5.0% and 9.2% of our total revenues for the three months ended March 31, 2004 and 2003, respectively.

Following the acquisition of the Puna project, Hawaii Electric Light Company has become one of our key customers, and we expect that Hawaii Electric Light Company will account for approximately 4.0% of our total revenues in the year 2004.

Government Grants and Tax Benefits

Our subsidiary, Ormat Systems, has received "approved enterprise" status under Israel's Law for Encouragement of Capital Investments, 1959, with respect to two of its investment programs. One such approval was received in 1996 and another such approval was received in May 2004. As an approved enterprise, our subsidiary is exempt from Israeli income taxes with respect to revenues derived from the approved investment program for a period of two years commencing on the year it first generates profits from the approved investment program and, thereafter, such revenues are subject to reduced Israeli income tax rates of 25.0% for an additional five years. These benefits are subject to certain conditions set forth in the certificate of approval from Israel's Investment Center, that include, among other things, a requirement that Ormat Systems comply with Israeli intellectual property law, that all transactions between Ormat Systems and our affiliates be at arms length, and that there will be no change in control of, on a cumulative basis, more than 49% of Ormat Systems' capital stock (including by way of a public offering) without the prior written approval of the Investment Center.

For a discussion of our grants from Israel's Office of the Chief Scientist, see "Off Balance Sheet Arrangements" above.

BUSINESS

Overview

We are a leading vertically integrated company engaged in the geothermal and recovered energy power business. We design, develop, build, own and operate clean, environmentally friendly geothermal power plants, and we also design, develop and build, and plan to own and operate, recovered energy-based power plants, in each case, using equipment that we design and manufacture. We conduct our business activities in two business segments. We develop, build, own and operate geothermal power plants in the United States and other countries around the world and sell the electricity they generate. In addition, we design, manufacture and sell equipment for geothermal and recovered energy-based electricity generation and other power generating units and provide services relating to the engineering, procurement, construction, operation and maintenance of geothermal and recovered energy power plants.

All of the projects that we currently own or operate produce electricity from geothermal energy sources.

Geothermal energy is a clean, renewable and generally sustainable form of energy derived from the natural heat of the earth. Unlike electricity produced by burning fossil fuels, electricity produced from geothermal energy sources is produced without emissions of certain pollutants such as nitrogen oxide, and with far lower emissions of other pollutants such as carbon dioxide. Therefore, electricity produced from geothermal energy sources contributes significantly less to local and regional incidences of acid rain and global warming than energy produced by burning fossil fuels. Geothermal energy is also an attractive alternative to other sources of energy as part of a national diversification strategy to avoid dependence on any one energy source or politically sensitive supply sources.

In addition to our geothermal energy power generation business, we have developed and continue to develop products that produce electricity from recovered energy or so-called "waste heat." Recovered energy or waste heat represents residual heat that is generated as a by-product of gas turbine-driven compressor stations and in a variety of industrial processes such as cement manufacturing, and is not otherwise used for any purpose. Such residual heat, that would otherwise be wasted, is captured in the recovery process and is used by recovered energy power plants to generate electricity without burning additional fuel and without emissions.

Our Power Generation Business

We are the fastest growing geothermal power generation company in the United States measured by growth in generating capacity. We also own and operate or control and operate geothermal projects in Guatemala, Kenya, Nicaragua and the Philippines and continue to pursue opportunities to acquire and develop similar projects elsewhere in the world, including in the United States. Most of our projects are located in regions where there is, or is expected to be, demand for additional generating capacity.

In 2003, pro forma revenues from the sale of electricity by our domestic projects were \$128.7 million, constituting approximately 79.1% of our total pro forma revenues from the sale of electricity, and pro forma revenues from the sale of electricity by our foreign projects were \$33.9 million, constituting approximately 20.9% of our total pro forma revenues from the sale of electricity. In 2003, our actual revenues from the sale of electricity by our domestic projects were \$43.8 million and by our foreign projects were \$34.0 million, respectively. Pro forma revenues from the sale of electricity constituted approximately 79.6% of our total pro forma revenues in 2003. As noted previously, such pro forma revenues do not include revenues generated from the Steamboat 2/3 project and Steamboat Hills project, two additional domestic projects that were acquired this year.

We own and operate all of our projects, except the Momotombo project in Nicaragua, which we do not own but which we control and operate, and three of our other projects, in which we have less than full ownership.

All of the revenues that we derive from the sale of electricity are from fully-contracted payments under long-term power purchase agreements. In the United States, the power purchasers under such

agreements are all investor-owned electric utilities. More than 80% of our total pro forma revenues in 2003 from the sale of electricity by our domestic projects were derived from power purchasers that currently have investment grade credit rating. The purchasers of electricity from our foreign projects are either state-owned entities or recently privatized state-owned entities. We have obtained political risk insurance from the Multilateral Investment Guarantee Agency of the World Bank group for all of our foreign projects (other than the Leyte project) in order to cover a portion of any loss that we may suffer upon the occurrence of certain political events covered by such insurance.

Development, Construction, and Acquisition. We have experienced significant growth in recent years, principally through the acquisition of geothermal power plants from third parties and the expansion and enhancement of our existing projects. In December 2003, we acquired the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project, in February 2004, we acquired the Steamboat 2/3 project, in May 2004, we acquired the Steamboat Hills project and in June 2004, we acquired the Puna project. In total, we have increased our net ownership interest in generating capacity from 94 MW as of December 31, 2001 to 312 MW as of June 30, 2004. We currently expect to continue growing our power generation business through:

- the development and construction of new geothermal and recovered energy-based power plants;

- the expansion and enhancement of our existing projects; and
- the acquisition of additional geothermal and other renewable assets from third parties.

As part of these efforts, we regularly monitor requests for proposals from, and submit bids to, investor-owned electric utilities in the United States to provide additional generating capacity, primarily in the western United States where geothermal resources are generally concentrated. We also respond to international tenders issued by foreign state-owned electric utilities for the development, construction and operation of new geothermal power plants. In addition, we apply our technological expertise to upgrade the facilities of our existing geothermal power plants and to continuously monitor and manage our existing geothermal resources in order to increase the efficiency and generating capacity of such facilities.

We are currently in varying stages of development or construction of new projects and enhancement of existing projects. Based on our current development and construction schedule, which is subject to change at any time and which we may not achieve, we expect to have approximately 66 additional MW in generating capacity in the United States by the end of 2006 and approximately 20 additional MW in Guatemala by June 2006. In addition, we have obtained exclusive rights to develop the geothermal resources of a project in China, which, if implemented, is expected to produce approximately 50 MW in generating capacity. We are also currently in discussions with the Kenyan government and Kenya Power & Lighting Co. Ltd. regarding, among other things, the construction of Phase II of the Olkaria III project in Kenya and the provision of certain collateral and government support. If implemented, Phase II would add approximately 35 MW in generating capacity to the current Olkaria III project. We are also in the early development stage of two new projects in El Salvador. We intend to pursue these opportunities to the extent they continue to meet our investment criteria and business strategy.

Our Products Business

We design, manufacture and sell products for electricity generation and provide the related services described below. Generally, we manufacture products only against customer orders and do not manufacture products for inventory purposes.

Power Units for Geothermal Power Plants. We design, manufacture and sell power units for geothermal electricity generation, which we refer to as Ormat Energy Converters or OECs. Our customers include contractors and geothermal plant owners and operators. We recently sold two of our OEC units, with a total gross output of approximately 18 MW, to Instituto Costarricense de Electricidad in Costa Rica, which is developing the Miravalles V geothermal power project in that country. We also recently sold one of our OEC units for approximately 2 MW for installation at Oserian Farm in Kenya, where farmers grow flowers for export.

Power Units for Recovered Energy-Based Power Generation. We design, manufacture and sell power units used to generate electricity from recovered energy or so-called "waste heat" that is generated as a residual by-product of gas turbine-driven compressor stations and a variety of industrial processes such as cement manufacturing, and is not otherwise used for any purpose. Our existing and target customers include interstate natural gas pipeline owners and operators, gas processing plant owners and operators, cement plant owners and operators, and other companies engaged in other energy-intensive industrial processes. We have installed one of our recovered energy-based generation units at Enterprise Product's Neptune gas processing plant in Louisiana.

Remote Power Units and other Generators. We design, manufacture and sell fossil fuel powered turbo-generators with a capacity ranging between 200 watts and 5,000 watts, which operate unattended in extreme climate conditions, whether hot or cold. Our customers include contractors installing gas pipelines in remote areas. In addition, we design, manufacture and sell generators for various other uses, including heavy duty direct current generators. Our remote power units were recently installed on a Pemex pipeline in Mexico.

Engineering, Procurement and Construction of Power Plants. We engineer, procure and construct (EPC), as an EPC contractor, geothermal and recovered energy power plants on a turnkey basis, using power units we design and manufacture. Our customers are geothermal power plant owners as well as the same customers described above that we target for the sale of our power units for recovered energy-based power generation. Unlike many other companies that provide EPC services, we have an advantage in that we are using our own

manufactured equipment and thus have better control over the timing and delivery of required equipment and its costs. Recent examples of our construction activities include the design and construction of the Mokai and Wairakei geothermal power plants in New Zealand.

Operation and Maintenance of Power Plants. We provide operation and maintenance services for geothermal power plants owned by us and by third parties.

In 2003, our actual revenues from our products business were \$41.7 million, constituting approximately 20.4% of our total pro forma revenues and approximately 34.9% of our actual revenues.

Industry Background

Geothermal Energy

All of the projects we currently own produce electricity from geothermal energy. Geothermal energy is a clean, renewable and generally sustainable energy source that, because it does not utilize combustion in the production of electricity, releases significantly lower levels of emissions, principally steam, than those that result from energy generation based on the burning of fossil fuels. Geothermal energy is derived from the natural heat of the earth when water comes sufficiently close to hot molten rock to heat the water to temperatures of 300 degrees Fahrenheit or more. The heated water then ascends toward the surface of the earth where, if geological conditions are suitable for its commercial extraction, it can be extracted by drilling geothermal wells. The energy necessary to operate a geothermal power plant is typically obtained from several such wells which are drilled using established technology that is in some respects similar to that employed in the oil and gas industry. Geothermal production wells are normally located within approximately one to two miles of the power plant as geothermal fluids cannot be transported economically over longer distances due to heat and pressure loss which result in redistributive costs. The geothermal reservoir is a renewable source of energy if natural ground water sources and reinjection of extracted geothermal fluids are adequate over the long term to replenish the geothermal reservoir following the withdrawal of geothermal fluids as long as the wellfield is properly operated. Geothermal energy projects typically have higher capital costs (primarily as a result of the costs attributable to wellfield development) but tend to have significantly lower variable operating costs, principally consisting of maintenance expenditures, than fossil fuel-fired power plants that require ongoing fuel expenses.

Geothermal Power Plant Technologies

Geothermal power plants generally employ either binary systems or conventional flash systems. In our projects, we also employ our proprietary technology of combined geothermal cycle systems. See "Business — Our Technology."

Binary System

In a plant using a binary system, geothermal fluid, either hot water (also called brine) or steam or both, is extracted from the underground reservoir and flows from the wellhead through a gathering system of insulated steel pipelines to a heat exchanger, which heats a secondary working fluid which has a low boiling point. This is typically an organic fluid such as isopentane or isobutene, which is vaporized and is used to drive the turbine. The organic fluid is then condensed in a condenser which may be cooled by air or by water from a cooling tower. The condensed fluid is then recycled back to the heat exchanger, closing the cycle within the sealed system. The cooled geothermal fluid is then reinjected back into the reservoir. The binary technology is depicted in the graphic below.

Flash Design System

In a plant using flash design, geothermal fluid is extracted from the underground reservoir and flows from the wellhead through a gathering system of insulated steel pipelines to flash tanks and/or separators. There, the steam is separated from the brine and is sent to a demister in the plant, where any remaining water droplets are removed. This produces a stream of dry steam, which drives a turbine generator to produce electricity. In some cases, the brine at the outlet of the separator is flashed a second time (dual flash), providing additional steam at lower pressure used in the low pressure section steam turbine to produce additional electricity. Steam exhausted from the steam turbine is condensed in a surface or direct contact condenser cooled by cold water from a cooling tower. The non-condensable gases (such as carbon dioxide) are removed through the removal system in order to optimize the performance of the steam turbines. The condensate is used to provide make-up water for the cooling tower. The hot brine remaining after separation of steam is injected back into the geothermal resource through a series of injection wells. The flash technology is depicted in the graphic below.

77

In some instances, the wells directly produce dry steam (the flashing occurring under ground). In such cases, the steam is fed directly to the steam turbine and the rest of the system is similar to the flash power plant

described above.

Market Opportunity

The geothermal energy industry in the United States experienced significant growth in the 1970s and 1980s, followed by a period of consolidation of owners and operators of geothermal assets in the 1990s. The industry, once dominated by large oil companies and investor-owned electric utilities, now includes several independent power producers. During the 1990s, growth and development in the geothermal energy industry occurred primarily in foreign markets, and only minimal growth and development occurred in the United States. Since 2001, there has been renewed interest in geothermal energy in the United States as production costs for electricity generated from geothermal resources have become more competitive relative to fossil fuel-based electricity generation, due to the increasing cost of natural gas, and as legislative and regulatory incentives, such as state renewable portfolio standards, have become more prevalent.

Electricity generation from geothermal resources in the United States constitutes a \$1 billion-a-year industry (in terms of revenues) and accounts for almost 20% of all non-hydropower renewable energy-based electricity generation in the United States (according to the Energy Information Administration, Annual Energy Outlook 2004). Although electricity generation from geothermal resources is currently concentrated in California, Nevada, Hawaii and Utah, there are opportunities for development in other states such as Alaska, Arizona, Idaho, New Mexico and Oregon due to the availability of geothermal resources and, in some cases, a favorable regulatory environment in such states.

A recent forecast of the U.S. Department of Energy projects the addition of geothermal installations with generating capacity totaling 6,800 MW by 2025, based on the assumption that natural

gas prices will remain relatively stable at current levels. This forecast is based on existing, known geothermal resources and does not take into account any positive effects on generating capacity resulting from new technology, such as enhanced utilization of existing geothermal bases and engineered geothermal systems (according to the Energy Information Administration, Annual Energy Outlook 2004).

Much of this growth potential stems from growing global concerns about the environment. Power plants that use fossil fuels generate higher levels of air pollution and their emissions have been linked to acid rain and global warming. In response to an increasing demand for "green" energy, many countries have adopted legislation requiring, and providing incentives for, electric utilities to sell electricity generated from renewable energy sources. In the United States, Arizona, California, Connecticut, Hawaii, Illinois, Iowa, Maine, Maryland, Massachusetts, Minnesota, Nevada, New Jersey, New Mexico, Pennsylvania, Rhode Island, Texas, and Wisconsin have all adopted renewable portfolio standards, renewable portfolio goals, or other similar laws requiring or encouraging electric utilities in such states to generate or buy a certain percentage of their electricity from renewable energy sources or recovered heat sources. Eleven of these seventeen states (including California, Nevada and Hawaii, where we have been the most active in our geothermal energy development and in which all of our U.S. projects are located) define geothermal resources as "renewables." Several other states are also considering the adoption of renewable portfolio standards, renewable portfolio goals or similar legislation.

We believe that these legislative measures and initiatives present a significant market opportunity for us. For example, California generally requires that the electricity supplied by its investor-owned electric utility companies operating within the state must be increased by at least 1% every year until it reaches 20% by 2017. Presently, 9% of the electricity supplied by the three main electric utility companies in California is derived from renewable resources. Nevada's renewable portfolio standard requires each Nevada electric utility to obtain 5% of its annual energy requirements from renewable energy sources in 2004, which requirement increases to 7% in 2005 and thereafter increases by 2% every two years until 2013, when 15% of such annual energy requirements must be provided from renewable energy sources. Hawaii's renewable portfolio standard requires each Hawaiian electric utility to obtain 8% of its net electricity sales from renewable energy sources by December 31, 2005 and 10% by December 31, 2010 and 20% by December 31, 2020.

In addition, in some states an entity generating electricity from renewable resources, such as geothermal energy, is awarded renewable energy credits, which we refer to as RECs, that can be sold for cash. RECs have been sold in the market for 0.5 cents to 2 cents a kWh during the past year.

The federal government also encourages production of electricity from geothermal resources through certain

tax subsidies. We are permitted to claim approximately 10% of the cost of each new geothermal power plant as a credit against our federal income taxes. We are also permitted to deduct up to 95% of the cost of the power plant over five years on an accelerated basis, which results in more of the cost being deducted in the first few years than during the remainder of the depreciation period. These two tax benefits collectively offset approximately one-third of the capital cost of each new project.

In May 2004, the United States Senate passed a bill to allow geothermal power companies to claim a "production tax credit" of 1.8 cents per kilowatt hour on electricity produced from geothermal resources. According to such proposal, credits could be claimed on such electricity sold during the first ten years after a project achieves commercial operation. Only projects put into service during 2005 and 2006 would qualify for such production tax credits. The owner of the project would have to choose between this production tax credit and the 10% energy tax credit described above. The Senate bill, however, was not approved by the United States House of Representatives, which has passed its own version of a production tax credit bill, and will not become law unless the two legislative bodies reconcile the differences between the two bills.

Outside of the United States, the majority of power generating capacity has historically been owned and controlled by governments. During the past decade, however, many foreign governments have privatized their power generation industries through sales to third parties and have encouraged

new capacity development and/or refurbishment of existing assets by independent power developers. These foreign governments have taken a variety of approaches to encourage the development of competitive power markets, including awarding long-term contracts for energy and capacity to independent power generators and creating competitive wholesale markets for selling and trading energy, capacity and related products. Different countries have also adopted active governmental programs designed to encourage clean renewable energy power generation. For example, China, where we are currently developing a project, has in place a five-year Plan for New and Renewable Energy Commercialization Development. The plan's goals include increasing production of geothermal energy as well as providing electricity in remote areas. Several Latin American countries have rural electrification programs and renewable energy programs. For example, Nicaragua, where we operate the Momotombo project, is currently developing a national rural electrification plan with the support of the World Bank. One of the plan's primary goals is the reduction of market barriers to renewable energy technologies useful for remote areas not connected to the main electricity grid. Nicaragua also has a national master plan for geothermal energy, which is intended to facilitate the awarding of concessions for geothermal exploration and development in the country. Guatemala, another country in which we have ongoing operations (the Zunil project) and development activities (the Amatitlan project), recently approved a law which creates incentives for power generation from renewable energy sources by, among other things, providing economic and fiscal incentives such as exemptions from taxes on the importation of relevant equipment and various tax exemptions for companies implementing renewable energy projects. We believe that these developments and governmental plans will create opportunities for us to acquire and develop geothermal power generation facilities internationally as well as create additional opportunities for us to sell our remote power units and other products.

In addition to our geothermal power generation activities, we have also identified recovered energy power generation as a significant market opportunity for us in the United States and internationally. We are initially targeting the North American market, where we expect that recovered energy-based power generation will be derived principally from compressor stations along interstate pipelines, from midstream gas processing facilities, and from processing industries in general. Several states, as well as the federal government, have recognized the environmental benefits of recovered energy-based power generation. For example, Nevada and Hawaii allow electric utilities to include recovered energy-based power generation in calculating their compliance with the state's renewable portfolio standards. In addition, North Dakota, South Dakota and the Department of Agriculture (through the Rural Electricity Service) have certified recovered energy-based power generation as "green" energy, which qualifies recovered energy-based power generators (whether in those two states or elsewhere in the United States) for federally subsidized, low-cost funding. We believe that the European market has similar potential and we expect to leverage our early success in North America in order to expand into such market and other markets worldwide. In North America alone, we estimate the potential total market for recovered energy-based generation to be approximately 1000 MW.

Competitive Strengths

Competitive Assets. Our assets are highly competitive:

- *Contracted Generation.* All of the electricity generated by our geothermal power plants is currently sold pursuant to long-term power purchase agreements, providing generally predictable cash flows.
- *Baseload Generation.* All of our geothermal power plants supply a part of the baseload capacity of the electric system in their respective markets, meaning that they operate to serve all or a part of the minimum power requirements of the electric system in such market on an around-the-clock basis. Because our projects supply a part of the baseload needs of the respective electric system and are marginally weather dependent, we have a competitive advantage over other renewable energy sources, such as wind power, solar power, or hydro-electric power (to the extent dependent on rainfall), which compete with us to meet

electric utilities' renewable portfolio requirements but which cannot serve baseload capacity because of the weather dependence and thus intermittent nature of these other renewable energy sources.

- *Competitive Pricing.* Geothermal power plants, while site specific, are economically feasible to develop, construct, own and operate in many locations, and the electricity they generate is generally price competitive as compared to electricity generated from fossil fuels or other renewable sources under existing economic conditions and existing tax and regulatory regimes.

Growing Legislative Demand for Environmentally-Friendly Renewable Resource Assets. All of our existing projects produce electricity from geothermal energy sources. Geothermal energy is a clean, renewable and generally sustainable energy source. Unlike electricity produced by burning fossil fuels, electricity produced from geothermal energy sources is produced without emissions of certain pollutants such as nitrogen oxide, and with far lower emissions of other pollutants such as carbon dioxide. The characteristics of geothermal energy give us a competitive advantage over fossil fuel-based electricity generation as countries increasingly seek to balance environmental concerns with demands for reliable sources of electricity.

High Efficiency from Vertical Integration. Unlike any of our competitors in the geothermal industry, we are a fully-integrated geothermal equipment, services and power provider. We design, develop and manufacture most of the equipment we use in our geothermal power plants. Our intimate knowledge of the equipment that we use in our operations allows us to operate and maintain our projects efficiently and to respond to operational issues in a timely and cost efficient manner. Moreover, given the efficient communications among our subsidiary that designs and manufactures the products we use in our operations and our subsidiaries that own and operate our projects, we are able to quickly and in a cost-effective manner identify and repair mechanical issues and to have technical assistance and replacement parts available to us as and when needed.

Highly Experienced Management Team. We have a highly qualified senior management team with extensive experience in the geothermal power sector. The key members of our senior management team have worked in the power industry for most of their careers and average over 20 years of industry experience.

Technological Innovation. We own or have rights to use more than 70 patents relating to various processes and renewable resource technologies. Our ability to draw upon internal resources from various disciplines related to the geothermal power sector, such as geological expertise relating to reservoir management, and equipment engineering relating to power units, allows us to be innovative in creating new technologies and technological solutions.

No Exposure to Fuel Price Risk. A geothermal power plant does not need to purchase fuel (such as coal, natural gas, or fuel oil) in order to generate electricity. Thus, once the geothermal reservoir has been identified and estimated to be sufficient for use in a geothermal power plant and the drilling of wells is complete, the plant is not exposed to fuel price or fuel delivery risk.

Business Strategy

Our strategy is to continue building a geographically balanced portfolio of geothermal and recovered energy assets, and to continue to be a leading manufacturer and provider of products and services related to renewable

energy. We intend to implement this strategy through:

- *Development and Construction of New Projects* — continuously seeking out commercially exploitable geothermal resources and developing and constructing new geothermal and recovered energy-based power projects in jurisdictions where the regulatory, tax and business environments encourage or provide incentives for such development and which meet our investment criteria;
- *Increasing Output from Our Existing Projects* — increasing output from our existing geothermal power projects by adding additional generating capacity, upgrading plant technology, and improving geothermal reservoir operations, including improving methods of heat source supply and delivery;

-
- *Acquisition of New Assets* — acquiring from third parties additional geothermal and other renewable assets that meet our investment criteria;
 - *Technological Expertise* — investing in research and development of renewable energy technologies and leveraging our technological expertise to continuously improve power plant components, reduce operations and maintenance costs, develop competitive and environmentally friendly products for electricity generation and target new service opportunities;
 - *Developing Recovered Energy* — establishing a first-to-market leadership position in recovered energy projects in North America and building on that experience to expand into other markets worldwide; and
 - *Long-term Contracts* — entering into long-term contracts with energy purchasers that will provide stable cash flows.

Operations of our Power Generation Segment

How We Own Our Power Plants. We customarily establish a separate subsidiary to own interests in each power plant. Our purpose in establishing a separate subsidiary for each plant is to ensure that the plant, and the revenues generated by it, will be the only source for repaying indebtedness, if any, incurred to finance the construction or the acquisition (or to refinance the acquisition) of the relevant plant. If we do not own all of the interest in a power plant, we enter into a shareholders agreement or a partnership agreement that governs the management of the specific subsidiary and our relationship with our partner in connection with our project. Our ability to transfer or sell our interest in certain projects may be restricted by certain purchase options or rights of first refusal in favor of our project partners or the project's power purchasers and/or certain change of control and assignment restrictions in the underlying project and financing documents. All of our domestic projects, with the exception of the Puna project, which is an EWG, are Qualifying Facilities and are eligible for regulatory exemptions from most provisions of the FPA, certain state laws and regulations, and PUHCA as set forth in 18 C.F.R. Section 292, Subpart F. As an EWG, the Puna project is exempt from regulation under PUHCA, and does not cause us to be regulated as a holding company under PUHCA. The Puna project is not subject to the FPA.

How We Obtain Development Sites and Geothermal Resources. For domestic projects, we either lease or own the sites on which our power plants are located. In our foreign projects, our lease rights for the plant site are generally contained in the terms of a concession agreement or other contract with the host government or an agency thereof. In certain cases, we also enter into one or more geothermal resource leases (or subleases) or a concession or other agreement granting us the exclusive rights to extract geothermal resources from specified areas of land, with the owners (or sublessors) of such land. A geothermal resource lease (or sublease) or a concession or other agreement will usually give us the right to explore, develop, operate and maintain the geothermal field including, among other things, the right to drill wells (and if there are existing wells in the area, to alter them) and build pipelines for transmitting geothermal fluid. At times, the holder of rights in the geothermal resource is a governmental entity and at times, a private entity. Usually, the terms of the lease (or sublease) and concession agreement correspond to the term of the relevant power purchase agreement. In certain

other cases, we own the land where the geothermal resource is located, in which case, there are no restrictions on its utilization.

How We Sell Electricity. In the United States, the purchasers of power from our projects are investor-owned electric utility companies. Outside of the United States, the purchaser is typically a state-owned utility or distribution company or a recently privatized state-owned entity and we typically operate our facilities pursuant to rights granted to us by a governmental agency pursuant to a concession agreement. In each case, we enter into long-term contracts (typically called power purchase agreements) for the sale of electricity or the conversion of geothermal resources into electricity. A project's revenues under a power purchase agreement usually consist of two payments: energy payments and capacity payments. Energy payments are normally based on a project's electrical output actually delivered to the purchaser measured in kilowatt hours, with payment rates either fixed or

indexed to the power purchaser's "avoided" costs (i.e., the costs the power purchaser would have incurred itself had it produced the power it is purchasing from third parties, such as us). Capacity payments are normally calculated based on the generating capacity or the declared capacity of a project available for delivery to the purchaser, regardless of the amount of electrical output actually produced or delivered. In addition, most of our domestic projects located in California are eligible for capacity bonus payments under the respective power purchase agreements upon reaching certain levels of generation.

How We Operate and Maintain Our Power Plants. We usually employ one of our subsidiaries to act as operator of our power plants pursuant to the terms of an operation and maintenance agreement. Our operations and maintenance practices are designed to minimize operating costs without compromising safety or environmental standards while maximizing plant flexibility and maintaining high reliability. Our approach to plant management emphasizes the operational autonomy of our individual plant managers and staff to identify and resolve operations and maintenance issues at their respective projects, however, each project draws upon the collective resources and experience available in our operation and maintenance subsidiary. We have organized our operations such that inventories, maintenance, backup and other operational functions are pooled within each project complex and provided by one operation and maintenance provider. This approach enables us to realize cost savings and enhances our ability to meet our project availability goals.

We have a long track record of excellence in operating different power plants with diverse resource characteristics. We currently operate and maintain approximately 353 MW of generating capacity. Since our recent acquisitions in California and Nevada, as a result of our vertical integration, our proprietary technology and our operational and maintenance expertise, we have been successful in increasing the efficiency and performance of most of our acquired facilities and have been able to use the staff required to operate these facilities more efficiently. For example, we have been able to increase the output of the Brady project by approximately 50% since its acquisition by us.

Safety is a key area of concern to us. We believe that the most efficient and profitable performance of our projects can only be accomplished within a safe working environment for our employees. Our compensation and incentive program includes safety as a factor in evaluating our employees, and we have a well-developed reporting system to track safety and environmental incidents at our projects.

How We Finance Our Power Plants. Historically, we have funded our projects with a combination of non-recourse or limited recourse debt, parent company loans and internally generated cash. Such leveraged financing permits the development of projects with a limited amount of equity contributions, but also increases the risk that a reduction in revenues could adversely affect a particular project's ability to meet its debt obligations. Leveraged financing also means that distributions of dividends or other distributions by plant subsidiaries to us are contingent on compliance with financial and other covenants contained in the financing documents.

Non-recourse debt refers to debt that is repaid solely from the project's revenues (rather than our revenues or revenues of any other project) and generally is secured by the project's physical assets, major contracts and agreements, and cash accounts and, in many cases, our ownership interest in that project affiliate. This type of financing is referred to as "project financing." Project financing transactions generally are structured so that all revenues of a project are deposited directly with a bank or other financial institution acting as escrow or security deposit agent. These funds then are payable in a specified order of priority set forth in the financing documents to ensure that, to the extent available, they are used first to pay operating expenses, senior debt service and taxes and

to fund reserve accounts. Thereafter, subject to satisfying debt service coverage ratios and certain other conditions, available funds may be disbursed for management fees or dividends or, where there are subordinated lenders, to the payment of subordinated debt service.

In the event of a foreclosure after a default, our project affiliate owning the project would only retain an interest in the assets, if any, remaining after all debts and obligations were paid in full. In addition, incurrence of debt by a project may reduce the liquidity of our equity interest in that project

because the interest is typically subject both to a pledge in favor of the project's lenders securing the project's debt and to transfer and change of control restrictions set forth in the relevant financing agreements.

Limited recourse debt refers to project financing as described above with the addition of our agreement to undertake limited financial support for the project affiliate in the form of certain limited obligations and contingent liabilities. These obligations and contingent liabilities take the form of guarantees of certain specified obligations, indemnities, capital infusions and agreements to pay certain debt service deficiencies. To the extent we become liable under such guarantees and other agreements in respect of a particular project, distributions received by us from other projects and other sources of cash available to us may be required to be used by us in order to satisfy these obligations. To the extent of these limited recourse obligations, creditors of a project financing of a particular project may have direct recourse to us.

How We Mitigate International Political Risk. We generally purchase insurance policies to cover our exposure to certain political risks involved in operating in developing countries. The policies are issued by entities which specialize in such policies, such as the Multilateral Investment Guarantee Agency (an institution that is part of the World Bank Group). From time to time, we also examine the possibility of purchasing political risk insurance from private sector providers, such as Zurich Re, AIG and other such companies, however, to date all of our political risk insurance contracts are with the Multilateral Investment Guarantee Agency. Such insurance policies cover, in general and subject to the limitations and restrictions contained therein, 80%-90% of our revenue loss derived from a specified governmental act, such as confiscation, expropriation, riots, the inability to convert local currency into hard currency and, in certain cases, the breach of agreements. We have obtained such insurance for all of our foreign projects in operation except for the Leyte project.

Description of Our Projects

In 2003, pro forma revenues from the sale of electricity by our domestic projects were \$128.7 million, constituting 79.1% of our total pro forma revenues from the sale of electricity, and pro forma revenues from the sale of electricity by our foreign projects were \$33.9 million, constituting 20.9% of our total pro forma revenues from the sale of electricity. In 2003, our actual revenues from the sale of electricity by our domestic projects were \$43.8 million and by our foreign projects were \$34.0 million, respectively. Pro forma revenues from the sale of electricity constituted approximately 79.6% of our total pro forma revenues in 2003. As noted previously, such pro forma revenues do not include revenues generated from the Steamboat 2/3 project and Steamboat Hills project, two additional domestic projects that were acquired this year.

The financing of certain of our projects and the terms of our power purchase agreements and certain other agreements related to our operations are further described in the "Description of Certain of our Material Agreements" section.

Domestic Projects

Our projects in operation in the United States have a generating capacity of approximately 240 MW. All of our current domestic projects are located in California, Nevada and Hawaii. We also have projects under construction and enhancement in California, Nevada and Hawaii.

The Ormesa Project

The Ormesa project is located in East Mesa, Imperial Valley, California. The Ormesa project consists of six plants, OG I, OG IE, OG IH (collectively, the OG I plant), OG II, GEM 2 and GEM 3. The various OG I plants commenced commercial operations between 1987 and 1989 and the OG II plant commenced commercial operations in 1988. The GEM 2 and GEM 3 plants commenced commercial operations in April 1989. The OG plants utilize a binary system and the GEM plants utilize a flash system. The OG I plants have a generating

capacity of 35 MW; the OG II plant has a generating capacity of 17 MW; and the GEM 2 and GEM 3 plants have a generating capacity of

28 MW. However, electricity generated by the GEM 2 and GEM 3 plants is not sold under a power purchase agreement because their power is used to provide auxiliary power for wellfield operations at the Ormesa project. The Ormesa project sells its electrical output to Southern California Edison Company under two separate power purchase agreements. In certain circumstances, Southern California Edison Company or its designee has a right of first refusal to acquire the OG I and OG II plants. The Ormesa project was acquired in April 2002, and was initially re-financed with project finance debt from United Capital. It is anticipated that on or before January 31, 2005, the United Capital loan will be paid off with a portion of the proceeds from the issuance by Ormat Funding of its senior secured notes on February 13, 2004.

In connection with the power purchase agreements for the Ormesa project, Southern California Edison Company has raised an issue regarding a potential breach by the Ormesa project of such power purchase agreements as a result of the use of power from the GEM 2 and GEM 3 plants by the Ormesa project for auxiliary purposes. We are currently in negotiation with Southern California Edison Company to resolve such dispute and, in addition, combine the relevant power purchase agreements for the Ormesa project into one agreement, which would enhance our operating flexibility and would not otherwise adversely affect our operations.

The Heber Projects

The Heber 1 Project. The Heber 1 project is located in Heber, Imperial County, California. The Heber 1 project includes one power plant which commenced commercial operations in 1985, and a geothermal resources field. The plant utilizes a dual flash system and has a generating capacity of 38 MW. The Heber 1 project sells its electrical output to Southern California Edison Company under a power purchase agreement. In certain circumstances, Southern California Edison Company and its affiliated entities have a right of first refusal to acquire the power plant. Upon satisfaction of certain conditions specified in the power purchase agreement and subject to receipt of requisite approvals and negotiations between the parties, our project subsidiary will have the right to demand that Southern California Edison Company purchase the power plant. The Heber 1 project was acquired in December 2003 and was financed with project finance debt from Beal Bank in December 2003.

The Heber 2 Project. The Heber 2 project is located in Heber, Imperial County, California. The Heber 2 project includes one power plant which commenced commercial operations in 1993. The plant utilizes a binary system and has a generating capacity of 38 MW. The Heber 2 project sells its electrical output to Southern California Edison Company under a power purchase agreement. The Heber 2 project was acquired in December 2003, and was financed with project finance debt from Beal Bank in December 2003.

The Steamboat Projects

The Steamboat 1/1A Project. The Steamboat 1/1A project is located in Steamboat Hills, Washoe County, Nevada. The Steamboat 1/1A project includes two power plants which commenced commercial operations in 1986 and 1988, respectively. The Steamboat 1/1A project utilizes a binary system and has a generating capacity of 5 MW. The Steamboat 1/1A project sells its electrical output to Sierra Pacific Power Company under two separate power purchase agreements. The Steamboat 1/1A project was acquired in June 2003 using internally generated cash, and was re-financed with the proceeds from the issuance by Ormat Funding of its senior secured notes on February 13, 2004.

The Steamboat 2/3 Project. The Steamboat 2/3 project is also located in Steamboat, Washoe County, Nevada. The Steamboat 2/3 project consists of two power plants which commenced commercial operations in 1992. The Steamboat 2/3 project utilizes a binary system and has a generating capacity of 29 MW. The Steamboat 2/3 project sells its electrical output to Sierra Pacific Power Company under two separate power purchase agreements. The Steamboat 2/3 project was acquired in February 2004 using internally generated cash and was financed with the proceeds from the issuance by Ormat Funding of its senior secured notes on February 13, 2004.

The Steamboat Hills Project. The Steamboat Hills project is also located in Steamboat Hills, Washoe County, Nevada. The Steamboat Hills project is comprised of one plant and commenced

commercial operations in 1988. The Steamboat Hills project utilizes a single flash system and water cooled condenser and has a generating capacity of 7 MW, although the power purchase agreement capacity is 12.5 MW. The Steamboat Hills project sells its electrical output to Sierra Pacific Power Company pursuant to a power purchase agreement. The project, under the predecessor owner, experienced difficulties operating at full capacity, among other reasons because of a well blow-out. We intend to increase the generating capacity of the Steamboat Hills project by additional drilling and certain other capital expenditures to take full advantage of the power purchase agreement. The Steamboat Hills project was acquired in May 2004 using internally generated cash.

The Mammoth Project

The Mammoth project is located in Mammoth Lakes, California. The Mammoth project is comprised of three plants, G-1, G-2 and G-3. The G-1 plant commenced commercial operations in 1985 and the G-2 and G-3 plants commenced commercial operations in 1990. The Mammoth project utilizes a binary system and has a generating capacity of 26 MW. Our project subsidiary owns a 50% partnership interest in Mammoth-Pacific, L.P., which owns 100% of the Mammoth project. The other 50% partnership interest is owned by an unrelated third party. The Mammoth project sells its electrical output to Southern California Edison Company under three separate power purchase agreements. Under the G-1 power purchase agreement, in certain circumstances, Southern California Edison Company or its affiliates has a right of first refusal to acquire the plant. Our 50% ownership interest in the Mammoth project was acquired in December 2003 using internally generated cash and was financed with project finance debt from Beal Bank in December 2003.

The Brady Project

The Brady project is located in Churchill County, Nevada and includes the Brady plant and the Desert Peak 1 plant. The Desert Peak 1 plant is approximately 4.5 miles southeast of the Brady plant. The Brady plant commenced commercial operations in 1992 and the Desert Peak 1 plant commenced commercial operations in 1985. The Brady project has a generating capacity of 20 MW and has in the past utilized a dual flash design. In August 2002, an additional 6 MW binary unit was added to the Brady plant to generate additional power from the brine before its reinjection. The Desert Peak 1 plant utilizes a dual flash design. The Brady project sells its electrical output from the Brady plant and Desert Peak 1 plant to Sierra Pacific Power Company under a power purchase agreement. Our project subsidiary is currently evaluating the replacement of the Desert Peak 1 plant with a new plant that would be more efficient. The new plant may be constructed on the same site as the existing Desert Peak 1 plant. However, subject to the results of ongoing engineering studies and additional drilling which may indicate additional geothermal resource availability at the site of the Brady plant, our project subsidiary may instead construct a replacement plant adjacent to the Brady plant. If our project subsidiary decides to build either plant, construction would likely begin in the first quarter of 2005 and be completed in the fourth quarter of 2005, at an estimated total project cost of approximately \$10 million. The Brady project was acquired in June 2001 using internally generated cash and was re-financed with the proceeds from the issuance by Ormat Funding of its senior secured notes on February 13, 2004.

The Puna Project

The Puna project is located in the Puna district, Hawaii. The Puna plant commenced commercial operations in 1993. The Puna plant utilizes a geothermal combined cycle system, and has a generating capacity of 25 MW, although the power purchase agreement is for 30 MW. The Puna project sells its electrical output to Hawaii Electric Light Company under two power purchase agreements. Although the Puna project has significant geothermal resources, because of existing geological conditions, these resources are difficult to manage. In the past, the Puna project required extensive levels of investment mainly to address problems with the production and injection wells related to the geothermal resources. We intend to increase the output of the Puna project by upgrading the technology of the plant through the addition of Ormat Energy Converters, drilling another production well, and negotiating a new power purchase agreement for the additional generating capacity that will be

Foreign Projects

Our foreign projects in operation have a generating capacity of approximately 113 MW. Our current foreign projects are located in the Philippines, Nicaragua, Kenya and Guatemala. We also have projects under development or construction in Guatemala, China, El Salvador and Kenya.

The Leyte Project (The Philippines)

The Leyte project is located in Leyte, Philippines, on the Isle of Leyte. The Leyte project consists of 4 power plants. The Leyte plant utilizes a steam system and has a generating capacity of 49 MW. Our project subsidiary has an 80% partnership interest in Ormat-Leyte Co. Ltd., which owns 100% of the Leyte project. The remaining 20% partnership interest in Ormat-Leyte Co. Ltd. is held by two unrelated third parties. In August 1995, following a build-operate-transfer, which we refer to as BOT, international tender, Ormat Inc. (which later transferred its interest in the BOT agreement to Ormat-Leyte Co. Ltd.) entered into a BOT agreement with PNOC-Energy Development Corporation, a Philippine company wholly owned by Philippine National Oil Company, a government-owned company. Ormat-Leyte Co. Ltd. has an outstanding non-recourse loan to the Export-Import Bank of the United States, whose balance, as of March 31, 2004, is \$17.8 million. The loan is due and payable in approximately equal quarterly installments until July 2007.

The Government of The Philippines has initiated the privatization of its electricity industry. However, we cannot foresee when such privatization may be completed. If such privatization is achieved in a manner that jeopardizes PNOC-Energy Development Corporation's or its affiliate's ability to comply with their obligations under the BOT agreement, the parties are required to negotiate an amendment to the power purchase agreement. Should they fail to reach an agreement, PNOC-Energy Development Corporation has the obligation (and our project subsidiary has the right to demand PNOC-Energy Development Corporation) to buy out Ormat-Leyte Co. Ltd.'s rights in the project at a price based upon the net present value of the projected cash flow from the project during the remaining term of the BOT agreement.

The Momotombo Project (Nicaragua)

The Momotombo project is located in Momotombo, Nicaragua. The Momotombo project is comprised of one plant and a geothermal field. The plant was already in existence when we signed the concession agreement for the project in March 1999, and had commenced commercial operations in the mid-1980s utilizing a dual flash system. In 2003, an additional 6 MW binary unit was added, bringing the generating capacity to approximately 28 MW. The Momotombo project has a power purchase agreement with Empresa Distribuidora de Electricidad del Norte (DISNORTE) and Empresa Distribuidora de Electricidad del Sur (DISSUR), two corporations which own the power distribution rights in Nicaragua. Our project subsidiary, which operates the Momotombo project, has an outstanding loan from Bank Hapoalim B.M., whose outstanding balance as of March 31, 2004 was \$19.2 million.

The Olkaria III Project — Phase I (Kenya)

The Olkaria III project is located in Naivasha, Kenya. The Olkaria III project is comprised of one plant, which commenced commercial operations in August 2000, and a geothermal field. The plant currently has a generating capacity of approximately 13 MW (early generation commercial operation for Phase I). The parties contemplated the construction of Phase II (full generation commercial operation) of this project which, upon completion, would increase the generating capacity of the Olkaria III project to approximately 48 MW. A description of Phase II of this project is set forth below in "Projects under Development." Phase I of the Olkaria III project utilizes a binary system. In November 1998, following an international tender, our project subsidiary entered into a power

purchase agreement with the Kenya Power & Lighting Co. Ltd. which was further amended in July 2000 and April 2003. Our project subsidiary leases the site on which the geothermal resources and the plant facilities are located from the Kenyan government pursuant to an agreement which will expire in 2040. The Kenyan government granted our project subsidiary a license giving it exclusive rights of use and possession of the relevant geothermal resources for an initial period of 30 years, expiring in 2029, which initial period may be extended by two additional five year terms. The Kenyan Minister of Energy has the right to terminate or revoke the license in the event our project subsidiary ceases work in or under the license area during a period of six months, or has failed to comply with the terms of the license or the provisions of the law relating to geothermal resources. Our project subsidiary is obligated to pay the Kenyan government monthly fees and royalties based on

the amount of power supplied to the Kenya Power & Lighting Co. Ltd.

The Zunil Project (Guatemala)

The Zunil project is located in Zunil, Guatemala. The Zunil project is comprised of one plant which commenced commercial operations in 1999. The plant utilizes a binary system consisting of Ormat Energy Converters and has a generating capacity of 24 MW. The project is owned by Orzunil I de Electricidad, Limitada, which owns 100% of the Zunil project. Our project subsidiary owns 21% of the outstanding partnership interests of Orzunil I de Electricidad, Limitada. Another of our subsidiaries provides operation and maintenance services to the project. The Zunil project sells its generating capacity to Instituto Nacional de Electrificación pursuant to a power supply agreement. As of the date of this prospectus, Orzunil I de Electricidad, Limitada has two senior outstanding non-recourse loans, one from International Finance Corporation (IFC) and the other from the Commonwealth Development Corporation (CDC), the aggregate total balance of which was, as of March 31, 2004, \$32 million. The loans are due and payable in quarterly installments until November 2011. Each of IFC and the CDC owns 14% of the issued and outstanding partnership interests of Orzunil I de Electricidad, Limitada.

Projects under Construction

We are in varying stages of development and construction of projects, both domestic and foreign. Based on our current construction schedule, we expect to have an additional generating capacity of approximately 49 MW in the United States by the end of 2006 and approximately 20 additional MW in Guatemala by June 2006.

The Desert Peak 2 Project

Our project subsidiary is currently constructing the Desert Peak 2 project in Churchill County, Nevada (near the Brady project). The Desert Peak 2 project is expected to have a generating capacity of up to 15 MW and will utilize our Ormat Energy Converters. The electrical output from the project will be sold, and renewable energy and environmental credits will be transferred to Nevada Power Company under a power purchase agreement that has a 20-year term commencing from the January 1 following the commercial operation date of such power plant. The Desert Peak 2 project is expected to be completed in early 2006.

The Amatitlan Project (Guatemala)

Our project subsidiary is currently constructing a geothermal power plant in Amatitlan, Guatemala on a "build, own and operate" or "BOO" basis. The project is comprised of one power plant, and has obtained the rights to various geothermal production and reinjection wells. The Amatitlan plant will use our Ormat Energy Converters.

The term of the power purchase agreement for the Amatitlan project is 20 years from the date of the commencement of operations at the power plant or 23 years from the date of commencement of the construction works, whichever is later. During a period of two years after the completion of the construction of the power plant, and subject to the signing of an additional agreement with Instituto

Nacional de Electrificación and the result of a feasibility test, our project subsidiary may increase the power generating capacity of the power plant to 50 MW by drilling additional wells. We anticipate that the Amatitlan project will be completed in 2006.

The Galena Project

Our project subsidiary is in the process of replacing the equipment currently used in the Steamboat 1/1A project with new upgraded equipment. Our project subsidiary will augment the operation of the Steamboat 1/1A project with additional geothermal resources extracted from the Steamboat 2/3 project's leases that will be diverted for use by Steamboat 1/1A project. After such upgrade, we will rename the Steamboat 1/1A project as the Galena project. We believe that this upgrade will allow the Galena project to obtain a generating capacity of 20 MW (adding an incremental 13 MW to the existing Steamboat complex). We anticipate that the Galena project will achieve commercial operations by the end of 2005 and that the project will sell its electrical output and transfer its renewable energy credits to Sierra Pacific Power Company under a power purchase agreement that has a 20-year term commencing from the January 1 following the commercial operation date of such power plant. Our project subsidiary is coordinating the transition from the Steamboat 1/1A project to the Galena project with Sierra Pacific Power Company. We intend to replace the existing equipment at the Steamboat 1/1A project with current Ormat technology, which we believe will optimize the geothermal resources available.

Enhancement of Operating Projects

We are currently pursuing the addition of Ormat Energy Converters for the Heber 1 and Heber 2 projects, the drilling of additional wells with respect to the Heber 2 project, and other enhancement activities for the Heber 1 and Heber 2 projects. We believe that these enhancements could increase the generating capacity of the Heber 1 and the Heber 2 projects collectively by 18 MW, and are currently in discussion with Southern California Edison Company regarding these proposed enhancements. We are also in the early engineering stages of an enhancement program for the Mammoth, Steamboat Hills and Puna projects, which we believe could increase the generating capacity of each of these facilities by 4 MW, 7 MW and 9 MW, respectively.

Projects under Development

We also have projects under development in the United States, China, El Salvador and Kenya. In certain cases we have obtained concession agreements and/or financing commitments, and in other cases, the projects are in early development stages. We expect to continue to explore these and other opportunities for expansion so long as they continue to meet our business objectives and investment criteria.

The Desert Peak 3 Project

In the United States, the Desert Peak 3 project is currently under development and is expected to have a generating capacity of 10 MW. Our project subsidiary will sell electrical output from the plant, and transfer the renewable energy and environmental credits, to Nevada Power Company under a power purchase agreement that has a 20-year term from the January 1 following the commercial operation date of the plant and which was signed as part of Nevada Power Company's efforts to comply with Nevada's renewable portfolio standards.

The Yunnan Project (China)

OrYunnan Geothermal Co., Ltd., which is a joint venture established between our project subsidiary and Yuan Province Geothermal Development Co., Ltd., owns exclusive rights to develop all of the geothermal resources in Teng Chong County, Baoshan City, in Yunnan Province, southwest China. Our project subsidiary owns 85% of the interests in OrYunnan Geothermal Co. Ltd., which owns all of the ownership interests in the Yunnan project. The area of the geothermal concession is

approximately 65 square miles and it is located approximately 200 miles southwest of Kunming, the provincial capital of Yunnan, approximately 40 miles from the border with Myanmar. We estimate the potential of the geothermal resources in the concession area to be between 150 to 200 MW. Initially, our project subsidiary and its partner intend to develop a geothermal field and construct a power plant with a generating capacity of approximately 48 MW, which we estimate will require a capital investment of approximately CNY 940,000,000 (approximately \$112.8 million calculated at the prevailing exchange rate as at June 30, 2004). As of the date hereof, our project subsidiary is awaiting completion of the Chinese central government approval procedures, following which negotiations with the provincial utility company towards the signing of a power purchase agreement can conclude. On May 29, 2002, our project subsidiary entered into a memorandum of understanding regarding the main terms of the power purchase agreement and other major project agreements with Yunan Electric Power Co., Ltd., a state-owned utility company, concerning the purchase of electric power by the utility company from our project subsidiary on a 30-year basis and the related interconnection arrangements. The MOU estimates that the commercial operation date of the plant is to be January 1, 2006. However, we have been in the development stage of the OrYunnan Project for several years and there is no assurance that this date will not have to be extended.

The San Vicente/Chanameca Project (El Salvador)

The San Vicente project and the Chanameca project in El Salvador are in the early development stage. Our project subsidiary has a concession over the relevant geothermal field and is in the process of evaluating the geothermal resources covered by the concession.

The Olkaria III Project — Phase II (Kenya)

As previously noted, our project subsidiary and Kenya Power & Lighting Co. Ltd. contemplated the construction of Phase II of the Olkaria III project. As of the date hereof, our project subsidiary has drilled the wells and commenced preliminary construction activities but has not begun any material construction activities with respect to Phase II. We halted our construction activities due to uncertainty relating to the form of

government support that would be provided for the project and the related collateral package, both of which are pre-conditions for the financing of such Phase II. Our project subsidiary has recently engaged in discussions with the Kenyan government and Kenya Power & Lighting Co. Ltd., as facilitated by the Multilateral Investment Guarantee Agency in connection with such matters. Pursuant to the power purchase agreement, our obligation to construct Phase II is contingent upon Kenya Power & Lighting Co. Ltd. providing to us (1) a letter of support from the Kenyan Government and (2) a certain deposit by April 17, 2004, a deadline which was not met. We currently have until April 17, 2005 to notify Kenya Power & Lighting Co. Ltd. whether we will proceed to construct Phase II of the Olkaria III project, in which case the current power purchase agreement with respect to Phase I will remain valid until 2020. If we notify Kenya Power & Lighting Co. Ltd. that we will not proceed, then the portion of the current power purchase agreement applicable to Phase II of the Olkaria III project will be terminated (but the current portion applicable to Phase I will be unaffected). If we fail to make such notification that we will not proceed, we will be required to construct Phase II and reach commercial operations by May 31, 2007 in order to avoid the application of financial penalties, or at the latest by April 17, 2008 in order to avoid termination of the entire power purchase agreement. In recent discussions, our project subsidiary has requested that certain adjustments be made to the power purchase agreement which, if implemented, would extend the period during which the option to decide to pursue the construction of Phase II can be exercised.

Geothermal Assets for Future Development in the United States

We have various geothermal leases for future development in the United States. These geothermal leases include the Meyberg lease near Steamboat, Nevada, the Newberry lease in Oregon, the Rhyolite Plateau lease near Mammoth, various leases for future development in Puna and various other leases for development in Nevada.

Operations of our Products Segment

Power Units for Geothermal Power Plants. We design, manufacture and sell power units for geothermal electricity generation, which we refer to as Ormat Energy Converters or OECs. Our

customers include contractors and geothermal plant owners and operators. Recently, one of our 1.8 MW power units was installed at Oserian Farm in Kenya, where farmers grow flowers for export.

The consideration for the power units is usually paid in installments, in accordance with milestones set in the supply agreement. Sometimes we agree to provide the purchaser with spare parts (or alternatively, with a non-exclusive license to manufacture such parts). We provide the purchaser with at least a 12-month warranty for such products. We usually also provide the purchaser (often, upon receipt of advances made by the purchaser) with a guarantee, which expires in part upon delivery of the equipment to the site and fully expires at the termination of the warranty period.

Power Units for Recovered Energy-Based Power Generation. We design, manufacture and sell power units used to generate electricity from recovered energy or so-called "waste heat" that is generated as a residual by-product of gas turbine-driven compressor stations and a variety of industrial processes such as cement manufacturing, and is not otherwise used for any purpose. Our existing and target customers include interstate natural gas pipeline owners and operators, gas processing plant owners and operators, cement plant owners and operators, and other companies engaged in other energy-intensive industrial processes. We view the recovered energy generation as a significant market opportunity for us, and we utilize two different business models in connection with such business opportunity. The first, which is similar to the one utilized in our geothermal power generation business, consists of the development, construction, ownership and operation of the recovered energy-based generation power plant. In this case, we enter into agreements to purchase industrial waste heat, and into long-term power purchase agreements with offtakers to sell the electricity generated by the recovered energy generation unit that utilizes such industrial waste heat. We expect that the power purchasers in such cases will be investor owned electric utilities or local electrical cooperatives.

Pursuant to the second business model, we construct and sell the power units for recovered energy-based power generation to third parties for use in "inside-the-fence" installations or otherwise. Our customers include gas processing plant owners and operators, cement plant owners and operators and companies in the process industry. Our Neptune recovered energy project is an example of such a model. We have installed one of our recovered energy-based generation units at Enterprise Product's Neptune gas processing plant in Louisiana. The

unit utilizes exhaust gas from two gas turbines at the plant and is providing electrical power that is consumed internally by the facility (although a portion of the generated electricity is also sold to the local electric utility). Our Basin Electric/NBPL recovered generation project is another example of this model. We will supply four 5 MW recovered energy generation units which will be used by Basin Electric, the largest generation cooperative in the United States.

Our recovered energy generation units qualify as Qualifying Facilities for regulatory purposes and, if structured properly, may also be eligible for favorable tax treatment such as the seven year modified accelerated cost recovery under relevant U.S. federal tax rules.

Remote Power Units and other Generators. We design, manufacture and sell fossil fuel powered turbo-generators with a capacity ranging between 200 watts and 5,000 watts, which operate unattended in extreme climate conditions, whether hot or cold. The remote power units supply energy for remote and unmanned installations and along communications lines and cathodic protection along gas and oil pipelines. Our customers include contractors installing gas pipelines in remote areas. In addition, we manufacture and sell generators for various other uses, including heavy duty direct current generators. Our remote power units were recently installed on a Pemex pipeline in Mexico. The terms of sale of the turbo-generators are similar to those for the power units produced for power plants.

Engineering, Procurement and Construction of Power Plants. We engineer, procure and construct (EPC), as an EPC contractor, geothermal and recovered energy power plants on a turnkey basis, using power units we design and manufacture. Our customers are geothermal power plant owners as well as the same customers described above that we target for the sale of our power units for recovered energy-based power generation. Unlike many other companies that provide EPC services, we have an advantage in that we are using our own manufactured equipment and thus have better control over

the timing and delivery of required equipment and its costs. Recent examples of our construction activities include the design and construction of the Mokai and Wairakei geothermal power plants in New Zealand.

The consideration for such services is usually paid in installments, in accordance with milestones set in the EPC contract and related documents. We usually provide performance guarantees or letters of credit securing our obligations under the contract. Upon delivery of the plant to its owner, such guarantees are replaced with a warranty guarantee, usually for a period ranging from 12 months to 36 months. The EPC contract usually places a cap on our liabilities for failure to meet our obligations thereunder. For example, our subsidiary, Ormat Pacific, Inc., is currently acting as EPC contractor for two geothermal projects in New Zealand owned by Contact Energy Limited and Tuaropaki Power Company Limited, respectively. Ormat Industries has guaranteed Ormat Pacific, Inc.'s obligations under both agreements. Ormat Systems will supply the equipment and products necessary for the construction and operation of these power plants.

We also design and construct the recovered energy generation units on a turnkey basis, and may provide a long-term agreement to supply non-routine maintenance for such units. Our customers constitute interstate natural gas pipeline owners and operators, gas processing plant owners and operators, cement plant owners and operators and companies engaged in the process industry.

Operation and Maintenance of Power Plants. We provide operation and maintenance services for geothermal power plants owned by us and by third parties. For example, we provide operations and management services to the Orzunil project in Guatemala, in which we have a minority ownership interest.

Our manufacturing operations and products are certified ISO 9001, ISO 14001, ASME and TÜV and we are an approved supplier to many electric utilities around the world.

Our Technology

Our proprietary technology covers power plants operating according to the Organic Rankine Cycle only or in combination with the Steam Rankine Cycle and Brayton Cycle, as well as integration of power plants with energy sources such as geothermal, recovered energy, biomass, solar energy and fossil fuels. Specifically, our technology involves original designs of turbines, pumps, and heat exchangers, as well as formulation of organic motive fluids. All of our motive fluids are non-ozone-depleting substances. Using advanced computerized fluid dynamics and other CAD software as well as our test facilities, we continuously seek to improve power plant components, reduce operations and maintenance costs, and increase the range of our equipment and applications.

In particular, we are examining ways to increase the output of our plants by utilizing evaporative cooling, cold reinjection, performance simulation programs, and topping turbines. In the geothermal as well as the recovered energy (waste heat) area, we are examining two-level recovered energy systems and new motive fluids.

We also construct combined cycle geothermal plants where the steam first produces power in a backpressure steam turbine and is subsequently condensed in a vaporizer of a binary plant which produces additional power.

In the conversion of geothermal energy into electricity, our technology has a number of advantages compared with conventional geothermal steam turbine plants. A conventional geothermal steam turbine plant consumes significant quantities of water, causing depletion of the aquifer, and also requires cooling water treatment with chemicals and thus a need for the disposition of such chemicals. A conventional geothermal steam turbine plant also creates a significant visual impact in the form of an emitted plume from the cooling tower during cold weather. By contrast, our binary and combined cycle geothermal power plants have a low profile with minimum visual impact and do not emit a plume when they use air cooled condensers. Our binary and combined cycle geothermal power plants reinject all of the geothermal fluids utilized in the respective processes into the geothermal reservoir. Consequently, such processes generally have no emissions. Accidental or fugitive emissions (that result from minor leaks) of motive fluids are within the limits defined by federal, state and local regulatory standards.

Other advantages of our technology include simplicity of operation and easy maintenance, low RPM, temperature and pressure in the Ormat Energy Converter, a high efficiency turbine and the fact that there is no contact between the turbine itself and often corrosive geothermal fluids.

We use the same elements of our technology in our recovered energy products. The heat source could be exhaust gases from a simple cycle gas turbine, low pressure steam or medium temperature liquid found in the process industry. In most cases we attach an additional heat exchanger in which we circulate thermal oil to transfer the heat into the Ormat Energy Converter's own vaporizer in order to provide greater operational flexibility and control. Once this stage of each recovery is completed, the rest of the operation is identical to the Ormat Energy Converter used in our geothermal power plants. The same advantages using the Organic Rankine Cycle apply here as well. In addition, our technology allows for better load following than a conventional steam turbine can exhibit, requires no water treatment as it is air cooled, and does not require the continuous presence of a steam licensed operator on site.

More than 70 valid United States patents (and about 10 pending patents) cover our products (mainly power units based on Organic Rankine Cycle) and systems (mainly geothermal power plants and industrial waste heat recovery for electricity production). The systems-related patents cover not only a particular component but rather the overall effectiveness of the plant's systems from the "fuel" (i.e., geothermal fluid, waste heat, biomass or solar) to generated electricity.

The products-related patents cover components such as turbines, heat exchanges, seals and controls. The system patents cover subjects such as disposal of non-condensable gases present in geothermal fluids, power plants for very high pressure geothermal resources and use of two-phase fluids. A number of patents cover the combined cycle geothermal power plants where the steam first produces power in a backpressure steam turbine and is subsequently condensed in a vaporizer of a binary plant which produces additional power.

We are also involved in developing new technology to extract heat from the earth by circulating fluid through an enhanced or man-made reservoir created in naturally low permeable or water-poor rocks. We are undertaking this development in cooperation with GeothermEx Inc., the University of Utah, Energy & Geoscience Institute, the University of Nevada-Reno and the Great Basin Center for Geothermal Energy, with funding support from the United States Department of Energy.

Competition

The power generation industry is characterized by intense competition from electric utilities, other power producers, and marketers. In recent years, the United States in particular has seen increasing competition in power sales, in part due to excess capacity in a number of U.S. markets and an emphasis on short-term markets, and competition has contributed to a reduction in electricity prices. There is also increasing competition between electric utilities, particularly in California where the California Public Utilities Commission has launched an initiative designed to give all electric consumers the ability to choose between competing suppliers of electricity.

In the geothermal power generation sector, our main competitors in the United States are CalEnergy, Calpine and Caithness. Some of these companies are also active outside of the United States. Outside of the United States, aside from these companies, we have not recently encountered competition from any private sector geothermal power developer, but may face competition from national electric utilities or state-owned oil companies.

In the products segment of our business, our main competitors are Mitsubishi, Fuji and Toshiba of Japan, GE/Nuevo Pignone and Ansaldo of Italy, Siemens of Germany, Alstom of France and Kaluga of Russia. In the remote power unit business, we face competition from Global Thermoelectric, as well as from manufacturers of diesel generator sets.

Siemens of Germany as well as other manufacturers of conventional steam turbines are potential competitors in the recovered energy generation business, although we believe that our recovered energy generation unit has technological and economical advantages over the Siemens/Kalina technology and the conventional steam technology.

We also compete with companies engaged in the power generation business from renewable energy sources other than geothermal energy, such as wind power, solar power and hydro-electric power.

None of our competitors competes with us in both the power generation segment and the products segment of our business.

Customers

All of our revenues from the power generation segment were derived from fully-contracted energy and/or capacity payments under long-term power purchase agreements with governmental and private utility companies. Southern California Edison Company, Hawaii Electric Light Company, PNOC-Energy Development Corporation and Sierra Pacific Power Company have accounted for 48.3%, 9.2%, 6.2% and 5.6% of our pro forma revenues, respectively, for the fiscal year ended December 31, 2003. Based on publicly available information, as of June 30, 2004, the issuer ratings of Southern California Edison Company, Sierra Pacific Power Company and Nevada Power Company (a potential power purchaser for the Desert Peak 2 and Desert Peak 3 projects) were Baa3 (under review), B1 (negative outlook) and B1 (negative outlook), respectively, from Moody's Investors Services and BBB (stable outlook), B+ (negative outlook), and B+ (negative outlook), respectively, from Standard & Poor's Ratings Services and the issuer rating of Hawaii Electric Light Company was BBB+ (stable outlook) from Standard & Poor's Ratings Services. The credit ratings of any power purchaser may decrease from time to time. There is no publicly available information with respect to the credit rating or stability of the power purchasers under the power purchase agreements for our foreign power projects.

All of our revenues from the products segment were derived from contractors or owners or operators of power plants, process companies and pipelines, including Miravalles and Mokai, which accounted for 25.8% and 24.8%, respectively, of our revenues from the sale of products in 2003.

Raw Materials

In connection with our manufacturing activities, we use raw materials such as steel and copper. We do not rely on any one supplier for the raw materials used in our manufacturing activities, as all of such raw materials are readily available.

Employees

As of July 1, 2004, we had 676 employees, of which 223 employees were in the United States, 294 employees were in Israel and 159 employees were located in other countries around the world. We expect that any future growth in the number of our employees would be mainly attributable to the purchase and/or development of new power plants.

None of our employees (other than the Momotombo project employees) are represented by a labor union, and we have never experienced any labor dispute, strike or work stoppage. We consider our relations with our employees to be satisfactory. We believe our future success will depend on our continuing ability to hire, integrate and retain qualified personnel.

We have no collective bargaining agreements with respect to our Israeli employees. However, by order of the Israeli Ministry of Labor and Welfare, the provisions of a collective bargaining agreement between the Histadrut (the General Federation of Labor in Israel) and the Coordination Bureau of Economic Organizations (which includes the Industrialists Association) may apply to some of our non-managerial, finance and administrative, and sales and marketing personnel. This collective bargaining agreement principally concerns cost of living increases, length of the workday, minimum wages, insurance for work-related accidents, procedures for dismissing employees, annual and other vacation, sick pay, determination of severance pay, pension contributions and other conditions of employment. We currently provide such employees with benefits and working conditions which are at least as favorable as the conditions specified in the collective bargaining agreement.

Insurance

We maintain business interruption insurance, casualty insurance, including flood and earthquake coverage, and primary and excess liability insurance, as well as customary worker's compensation and

automobile insurance and such other insurance, if any, as is generally carried by companies engaged in similar businesses and owning similar properties in the same general areas and financed in a similar manner. To the extent any such casualty insurance covers both us and/or our projects, on the one hand, and any other person and/or plants, on the other hand, we generally have specifically designated as applicable solely to us and our projects "all risk" property insurance coverage in an amount based upon the estimated full replacement value of our projects (provided that earthquake and flood coverages may be subject to annual aggregate limits depending on the type and location of the project) and business interruption insurance in an amount that also varies from project to project.

We generally purchase insurance policies to cover our exposure to certain political risks involved in operating in developing countries. The policies are issued by entities which specialize in such policies, such as Multilateral Investment Guarantee Agency (a member of the World Bank Group). From time to time, we also examine the possibility of purchasing political risk insurance from private sector providers, such as Zurich Re, AIG and other such companies, however, to date all of our political risk insurance contracts are with the Multilateral Investment Guarantee Agency. Such insurance policies cover, in general, and subject to the limitations and restrictions contained therein, 80%-90% of our revenue loss derived from a specified governmental act, such as confiscation, expropriation, riots, the inability to convert local currency into hard currency and, in certain cases, the breach of agreements. We have obtained such insurance for all of our foreign projects in operation except for the Leyte project.

Legal Proceedings

In August 2003, Ormesa LLC agreed to enter into binding arbitration with the Imperial Irrigation District, which we refer to as IID, in connection with IID's claim that Ormesa LLC is obligated to pay scheduling and transmission charges (including those applicable to the GEM 2 and GEM 3 plants) through the effective date of relinquishment of nominated capacity for the GEM 2 and GEM 3 plants. The amount in dispute is \$529,000. Ormesa LLC contends that it is not obligated to pay the subject charges for the GEM 2 and GEM 3 plants after the January 1, 2003 effective date of the Energy Services Agreement that Ormesa LLC entered into with the IID. Settlement discussions are in progress. We believe that the dispute will be resolved in 2004 and that any outcome will not have a material impact on our operations or relationship with the IID.

As a result of our acquisition of the Steamboat 1 plant and Steamboat 1A plant, our subsidiary Steamboat Geothermal LLC has become a party to litigation pending in the Second Judicial District Court in Washoe County, Nevada with Geothermal Development Associates and Delphi Securities, Inc. In April 2002, these plaintiffs initiated a lawsuit against the former owner and operator of the Steamboat 1/1A project. The plaintiffs dispute amounts owing to them pursuant to an agreement, dated July 14, 1985, through which Geothermal Development Associates assigned all of its right, title, and interest in the subject geothermal leasehold property in exchange for a net operating royalty interest in the revenues of the Steamboat 1 plant. The plaintiffs allege damages based upon three separate theories: (1) that the actions of the former owner in developing the Steamboat 1A plant have decreased the output of the Steamboat 1 plant; (2) that general, administrative, and corporate expenses included by the former owner in the calculation of the net royalty amount were overstated for the years 2000 and 2001; and (3) that, in addition to its royalty interest in the revenues from the Steamboat 1 plant, plaintiffs are entitled to a net revenue royalty interest from the Steamboat 1A plant. The plaintiffs have asserted

in pleadings and in settlement negotiations that the sum of their claimed damages arising from these three claims is approximately \$1 million. This case was originally set for trial in September 2003, but the trial date was continued in order to allow the plaintiffs to obtain substitute counsel. Prior to the continuance of the trial date, initial evidentiary disclosures had been made, as well as some initial discovery requests. No dispositive motions are pending before the court and the trial date has not been rescheduled. We have initiated settlement discussions with plaintiff and believe that any outcome will not have a material impact on our results of operations.

From time to time, we (and our subsidiaries) are a party to various other lawsuits, claims and other legal and regulatory proceedings that arise in the ordinary course of our (and their) business. These actions typically seek, among other things, compensation for alleged personal injury, breach of

contract, property damage, punitive damages, civil penalties or other losses, or injunctive or declaratory relief. With respect to such lawsuits, claims and proceedings, we accrue reserves in accordance with U.S. generally accepted accounting principles. We do not believe that any of these proceedings, individually or in the aggregate, would materially and adversely affect our business, financial condition, future results and cash flows.

Regulation of the Electric Utility Industry in the United States

The following is a summary overview of the electric utility industry in the United States and applicable regulations and should not be considered a full statement of the law or all issues pertaining thereto.

PURPA

PURPA, in relevant part, exempts renewable electric generating projects that are "Qualifying Facilities" from various regulations under the FPA. There are two types of Qualifying Facilities: "Qualifying Small Power Production Facilities" and "Qualifying Cogeneration Facilities." Under PURPA and the regulations promulgated thereunder, a power production facility is a "Qualifying Small Power Production Facility" if (1) the facility produces no more than 80 MW (on a net capacity basis) or satisfies certain FERC certification and construction dates, (2) the primary energy source of the facility is biomass, waste, renewable resources, geothermal resources or any combination thereof, and at least 75% of the total energy input is from these sources, and (3) the facility is owned by a person not primarily engaged in the generation or sale of electric power (other than electric power solely from cogeneration facilities or small power production facilities) (*i. e.*, the project company cannot be controlled by, more than 50% of the equity interests of the facility may not be owned by, and more than 50% of the equity benefits cannot be received by an electric utility, an electric utility holding company or a combination thereof or their subsidiaries).

Under PURPA, Qualifying Facilities receive two primary benefits. First, PURPA exempts Qualifying Facilities, such as our domestic projects (other than the Puna project) from the definition of "electric utility company" under PUHCA, most provisions of the FPA and state laws and regulations relating to financial, organization and rate regulation of electric utilities. Second, the regulations promulgated by FERC under PURPA require, in relevant part, that electric utilities (1) purchase energy and capacity made available by Qualifying Facilities, construction of which commenced on or after November 9, 1978, at a rate based on the purchasing utility's full "avoided costs" and (2) sell supplementary, back-up, maintenance and interruptible power to Qualifying Facilities on a just and reasonable and nondiscriminatory basis. FERC's regulations define "avoided costs" as the "incremental costs to an electric utility of electric energy or capacity or both which, but for the purchase from the qualifying facility or qualifying facilities, such utility would generate itself or purchase from another source." Utilities may also purchase power at prices other than avoided cost pursuant to negotiations as provided by FERC's regulations. Under an amendment to PURPA and PURPA regulations, FERC has also provided that utility geothermal small power production facilities (that is, geothermal small power production facilities that could be Qualifying Facilities except that they are owned by a person primarily engaged in the generation or sale of electric energy) are exempt from PUHCA but not state regulation or, if applicable, the FPA.

We expect that our domestic projects will continue to meet all of the criteria required for Qualifying Facilities under PURPA. If any of our domestic projects in which we have an interest loses its Qualifying Facility status or if amendments to PURPA are enacted that substantially reduce the benefits currently afforded Qualifying Facilities, our operations could be adversely affected. Loss of Qualifying Facility status for one of our domestic projects for having more than 50% utility ownership would make that facility a utility geothermal small power production facility. Such facilities are exempt from PUHCA but are subject to state regulation and, if

applicable, the FPA. Loss of Qualifying Facility status for any other reason would also make the facility subject to state regulation and, if applicable, the FPA. In addition, loss of Qualifying Facility status for any reason other than utility ownership would make the facility subject to PUHCA unless it has EWG status or falls within

another exemption. If a facility lost Qualifying Facility status for any reasons other than utility ownership and it was ineligible for EWG status because it made retail sales, we would face the choice between discontinuing the retail sales and filing for EWG status or becoming subject to PUHCA. At present, none of our domestic projects makes retail sales of electricity (other than to affiliates). In the unlikely event that we become a public utility holding company, which could be deemed to occur prospectively or retroactively to the date that any of our plants lost its Qualifying Facility status (assuming that that plant was neither an EWG nor a utility geothermal small power production facility), our other domestic projects could lose Qualifying Facility status because our interests in such projects could be considered to be electric utility holding company interests for purposes of the Qualifying Facility ownership requirements. This could cause all of our projects to become subject to federal and state energy regulations. In addition, a loss of Qualifying Facility status could allow the power purchaser, pursuant to the terms of the particular power purchase agreement, to cease taking and paying for electricity from the relevant project or, consistent with FERC precedent, to seek refunds of past amounts paid. This could cause the loss of some or all contract revenues, result in significant liability for refunds of past amounts paid, or otherwise impair the value of a project. If a power purchaser were to cease taking and paying for electricity or seek to obtain refunds of past amounts paid, there can be no assurance that the costs incurred in connection with the project could be recovered through sales to other purchasers or that we would have sufficient funds to make such refund payment. In addition, such a loss of status would be an event of default under the financing arrangements currently in place for some of our projects which would enable the lenders to exercise their remedies and enforce the liens on the relevant project.

In 2003, Congress proposed legislation that, among other provisions, would have had the practical effect of repealing PUHCA and shifting regulatory oversight of holding companies to FERC, and repealing the mandatory purchase requirements of PURPA. Although the 2003 legislation would not affect existing power purchase agreements for Qualifying Facilities, such legislation or other legislation (1) could repeal or amend PURPA in a manner that substantially reduces the benefits currently afforded Qualifying Facilities, or (2) could otherwise make more burdensome the requirements for the projects to maintain their status as Qualifying Facilities. In such event, operations at the projects or compliance with the terms of the power purchase agreements could be adversely affected, which in turn could reduce our net income and materially and adversely affect our business, financial condition, future results and cash flow.

PUHCA

PUHCA, in relevant part, provides that any corporation, partnership or other entity or organized group that owns, controls or holds power to vote 10% or more of the outstanding voting securities of a "public utility company" (which is defined to include an "electric utility company" or a "gas utility company") or of a company that is a "holding company" of a public utility company or public utility holding company, is subject to registration with the Securities and Exchange Commission and to regulation under PUHCA, unless exempted by a Securities and Exchange Commission rule, regulation or order. An entity may also be deemed to be a holding company if the Securities and Exchange Commission determines, after providing notice and an opportunity for a hearing, that such entity exercises a controlling influence over the management or policies of any public utility or holding company as to make it necessary or appropriate in the public interest or for the protection of investors or consumers that such entity be regulated as a holding company. Unless an exemption is obtained, PUHCA requires registration for a holding company of a public utility company, and requires a public utility holding company to limit its utility operations to a single integrated utility system and to divest any other operations not functionally related to the operation of the utility system. In addition, a public utility company that is a subsidiary of a registered holding company under PUHCA is subject to financial and organizational regulation, including approval by the Securities and Exchange Commission of its financing transactions.

Under current federal law, we are not subject to regulation as a holding company under PUHCA and will not be subject to such regulation as long as the plants in which we have an interest (1) are

Qualifying Facilities, (2) are "Exempt Wholesale Generators" (as defined in PUHCA) or (3) are subject to another exemption or waiver, such as status as an electric utility geothermal small power production facility.

FPA

Under the FPA, FERC has exclusive rate-making jurisdiction over wholesale sales of electricity and transmission in interstate commerce. These rates may be based on a cost of service approach or may be determined through competitive bidding or negotiation. If a project were to lose its Qualifying Facility status, the rates set forth in its power purchase agreement would have to be filed with FERC and would be subject to review by FERC under the FPA, unless the project is located in Hawaii, Alaska or the parts of Texas that are not deemed to be interstate commerce, in which case state regulations would apply. Under FERC policy, the rates under those circumstances could be no higher than the rate or price the relevant power purchaser would have paid for energy had it not been required to purchase from such project under PURPA's mandatory purchase requirements, i.e., such power purchaser's economy energy (incremental) cost during the period of non-compliance with Qualifying Facility requirements, unless the applicable power purchase agreement otherwise provides for alternative rates to apply in the event of such loss of Qualifying Facility status and FERC accepts such alternative rates.

State Regulation

Our projects in California and Nevada, by virtue of being Qualifying Facilities and because they engage in wholesale sales of electricity to public electric utilities in California and Nevada, are not subject to rate, financial and organizational regulations applicable to public electric utilities in those states. The projects each sell or will sell their electrical output to public electric utilities (either Sierra Pacific Power Company, Nevada Power Company or Southern California Edison Company) which are regulated by their respective state public utility commission. Sierra Pacific Power Company and Nevada Power Company are regulated by the Public Utility Commission of Nevada, which we refer to as NPUC. Southern California Edison Company and a small portion of Sierra Pacific Power Company in the Lake Tahoe area are regulated by the California Public Utility Commission. Since the NPUC and the CPUC regulate the retail rates through which the purchasing utilities recover their payments to our facilities from the retail electric customers of the public electric utilities under their jurisdiction, it is important for the purchasing electric utilities to obtain approval by their respective public utility commissions of their agreements with our projects. It is also important for the public electric utilities to be allowed continued recovery in their retail electric rates of the cost paid to our projects for electricity.

The NPUC has previously approved the agreements for each of our existing projects located in Nevada and has continuously allowed recovery of the costs of the electricity from those projects in the retail electric rates charged by Sierra Pacific Power Company. The NPUC, pursuant to a delegation of authority from FERC, also sets the avoided cost basis for updating the rates in several of our contracts. While we have no reason to believe that the NPUC will not continue to allow such recovery and continue to set the appropriate avoided cost rate, we cannot guarantee a specific avoided cost rate level or recovery in rates by the regulated public utility. The inability to recover the full cost of the electricity from our project by a public utility could adversely impact the ability of the public utility to pay for the electricity from a project, but such adverse treatment is unlikely given the pre-approval of the agreements. Further, we believe that federal law requires the state commissions to permit full recovery of PURPA-based wholesale rates by the purchasing utility, but we are aware of no judicial decisions in California, Nevada, or Hawaii upholding this principle.

Under Hawaii law, non-fossil generators are not public utilities. Hawaii law provides that a geothermal power producer is to negotiate the rate for its output with the public utility purchaser; if such rate cannot be determined by mutual accord, the Hawaii Public Utility Commission will set a just and reasonable rate. If a non-fossil generator in Hawaii is a Qualifying Facility, federal law applies to such Qualifying Facility and the utility is required to purchase the energy and capacity at full avoided cost.

Foreign Regulation of the Electric Utility Industry

The following is a summary overview of certain aspects of the electric industry in the foreign countries in which we have an operating geothermal power project and should not be considered a full statement of the laws in such countries or all of the issues pertaining thereto.

Nicaragua. Two recently approved laws, Law No. 272-98 and Law No. 271-98, define the structure of the new energy sector in Nicaragua. Law No. 272-98 provides for the establishment of a National Energy Commission, which we refer to as CNE, that is responsible for setting policies, strategies and objectives for such sector and approving indicative plans therefor. Law No. 271-98 formally assigned regulatory, supervisory, inspection and oversight functions to the Nicaraguan Institute of Energy, which we refer to as INE. The Nicaraguan government currently owns all of the commercial activities in the energy sector through Empresa Nacional de Electricidad (ENEL), a vertically integrated utility. The Nicaraguan energy sector has recently been restructured and partially privatized. Following such restructuring and privatization, the government has retained title and control of the transmission assets and has created the Empresa Estatal de Transmision which will be in charge of the operation of the transmission system in the country and of the new wholesale market. As part of the recent restructuring of the energy sector, most of the distribution facilities previously owned by the Nicaraguan Electricity Company, the government-owned vertically-integrated monopoly, were transferred to two companies, Empresa Distribuidora de Electricidad del Norte (DISNORTE) and Empresa Distribuidora de Electricidad del Sur (DISSUR), which in turn were privatized and acquired by an affiliate of Union Fenosa, a large Spanish utility. Following such privatization, the power purchase agreement for our Momotombo project was assigned by the Nicaraguan Electricity Company to Empresa Distribuidora de Electricidad del Norte and Empresa Distribuidora de Electricidad del Sur. A subsidiary of the Nicaraguan Electricity Company, ENTRESA, owns the transmission grid and is currently scheduled to be privatized. In addition, a National Dispatch Center was created to work with ENTRESA and provide for dispatch and wholesale market administration.

Guatemala. The General Electricity Law of 1996 created a wholesale electricity market in Guatemala and established a new regulatory framework for the electricity sector. The law created a new regulatory commission, the National Electric Energy Commission (CNEE) and a new wholesale power market administrator, the Administrator of the Wholesale Market (AMM), for the regulation and administration of such sector. The CNEE functions as an independent agency under the Ministry of Energy and Mines and is in charge of regulating the electricity law, overseeing the market and setting rates for transmission services and for electricity service to medium and small customers. All distribution companies must supply electricity to such customers pursuant to long-term contracts with electricity generators. Large customers can contract directly with electricity generators or power marketers, or buy energy in the spot market. Guatemala has approved a Law of Incentives for the Development of Renewable Energy Projects in order to promote the development of renewable energy projects in Guatemala. Such law provides certain benefits to companies utilizing renewable energy, including a 10-year corporate income tax exemption and a 10-year business tax exemption.

Kenya. Kenya's Electric Power Act of 1997 restructured the electricity sector in such country. Among other things, the Act provides for the licensing of electricity power producers and public electricity suppliers or distributors. The Kenya Power & Lighting Co. Ltd. is the only licensed public electricity supplier and has a monopoly in the transmission and distribution of electricity in the country. The Act permitted independent power producers (IPPs) to install power generators and sell electricity to Kenya Power & Lighting Co. Ltd., which is owned by various private and government entities and which purchases energy and capacity from three other IPPs in addition to our Olkaria III project. The Act also created the Electricity Regulation Board, as an independent regulator for the electricity sector. Kenya Power & Lighting Co. Ltd.'s retail electricity rates are subject to approval by the Electricity Regulation Board.

Philippines. The Philippine's Electric Power Industry Reform Act of 2001 created the Energy Regulatory Commission, which is an independent quasi-judicial regulatory body mandated to promote competition, encourage market development, ensure customer choice and penalize abuse of market power in the restructured electricity industry. The Energy Regulatory Commission is responsible for

the enforcement of the rules and regulations governing the operations of the electricity spot market and the activities of the spot market operator and other participants, to ensure a greater supply and rational pricing of electricity. In addition, the Energy Regulatory Commission determines, fixes, and approves transmission and distribution wheeling charges and retail electricity rates for the captive market of a distribution utility through an Energy Regulatory Commission-established and enforced methodology. The Energy Regulatory Commission also monitors and takes measures to penalize abuse of market power and anti-competitive or discriminatory behavior by any electric power industry participant.

While our power generation operations produce electricity without emissions of certain pollutants such as nitrogen oxide, and with far lower emissions of other pollutants such as carbon dioxide, some of our projects do emit air pollutants in quantities that are subject to regulation under applicable environmental air pollution laws. Such operations typically require air permits. Especially critical to our geothermal operations are those permits and standards applicable to the construction and operation of geothermal wells and brine reinjection wells. In the United States, injection wells are regulated under the federal Safe Drinking Water Act Underground Injection Control, which we refer to as UIC, program. Our injection wells typically fall into UIC Class V, one of the least regulated categories, because fluids are reinjected to enhance utilization of the geothermal resource. Our projects are required to comply with numerous domestic and foreign federal, regional, state and local statutory and regulatory environmental standards and to maintain numerous environmental permits and governmental approvals required for their operation. Some of the environmental permits and governmental approvals that have been issued to the projects contain conditions and restrictions, including restrictions or limits on emissions and discharges of pollutants and contaminants, or may have limited terms. As of the date hereof, we are in material compliance with all such material permits and approvals.

As of the date of this prospectus, all of the material permits and approvals required to construct or operate our projects have been obtained and are currently valid, except for the fact that certain permits for some of the projects are held in the name of predecessor owners and must be transferred or reissued to the correct entity. We believe such transfer and reissuance will occur in the ordinary course.

Environmental Laws and Regulations

Geothermal operations can produce significant quantities of brine and scale, which builds up on metal surfaces in our equipment with which the brine comes into contact. These waste materials, most of which are currently reinjected into the subsurface, can contain various concentrations of hazardous materials, including arsenic, lead, and naturally occurring radioactive materials. We also use various substances, including isobutene, isopentane, and industrial lubricants, that could become potential contaminants and are generally flammable. Hazardous materials are also used and generated in connection with our equipment manufacturing operations in Israel. As a result, our projects are subject to numerous domestic and foreign federal, state and local statutory and regulatory standards relating to the use, storage, fugitive emissions and disposal of hazardous substances. The cost of any remediation activities in connection with a spill or other release of such contaminants could be significant.

Although we are not aware of any mismanagement of these materials, including any mismanagement prior to the acquisition of some of our projects that may have impacted any of the project sites, any disposal or release of these materials onto project sites, other than by means of permitted injection wells, could result in material cleanup requirements or other responsive obligations under applicable environmental laws. We believe that there may have at one time been a gas station located on the Mammoth project site (which we lease), but because of significant surface disturbance and construction since that time further physical evaluation of the former gas station site has been impractical. We believe that, given the subsequent surface disturbance and construction activity in the vicinity of the suspected location of the service station, it is likely that the former facilities and any associated underground storage tanks would have already been encountered if they still existed.

Properties

Our corporate offices are at 980 Greg Street, Sparks, Nevada 89431. We also occupy an approximately 66,000 square meter office and manufacturing facility located in the industrial park of Yavne, Israel, which we sublease from Ormat Industries. See "Certain Relationships and Related Transactions." We also lease small offices in each of the countries we operate.

We believe that our current facilities are adequate for our operations as currently conducted. If additional facilities are required, we believe that we could obtain additional facilities at commercially reasonable prices.

Each of our plants is located on property that we lease or own, or property subject to a concession agreement. See "Business — Our Projects."

MANAGEMENT

The following table sets forth the name, age and positions of our directors, executive officers, persons who are executive officers of certain of our subsidiaries who perform policy making functions for us, and our significant employees:

Name	Age	Position
Lucien Bronicki	69	Chairman of the Board of Directors; Chief Technology Officer
Yehudit "Dita" Bronicki	62	Chief Executive Officer; Director
Yoram Bronicki	37	Chief Operating Officer—North America
Lisa Kidron	40	Chief Financial Officer, Ormat Systems *
Nadav Amir	54	Executive Vice President—Engineering, Ormat Systems *
Hezy Ram	54	Executive Vice President—Business Development, Ormat Nevada †
Joseph Shiloah	58	Executive Vice President—Marketing and Sales, Ormat Systems *
Aaron Choresh	58	Vice President—Operations and Product Support, Ormat Systems *
Zvi Krieger	49	Vice President—Geothermal Engineering, Ormat Systems *
Zvi Reiss	53	Vice President—Project Management, Ormat Systems *
Etty Rosner	48	Vice President—Contract Administrator; Corporate Secretary *
Connie Stechman	48	Vice President—Controller; Director

Significant Employees:

Shimon Hatzir	42	Vice President—Electrical and Conceptual Engineering, Ormat Systems *
Ran Raviv	36	Vice President—Business Development, Ormat Nevada †
Ohad Zimron	49	Vice President—Product Engineering, Ormat Systems *
Uzi Albert	52	Manager—Logistics and Production, Ormat Systems *

* Performs the functions described in the table, but is employed by Ormat Systems.

† Performs the functions described in the table, but is employed by Ormat Nevada.

Lucien Bronicki . Lucien Bronicki is the Chairman of our board of directors, a position he has held since our inception in 1994, and is also our Chief Technology Officer, effective as of July 1, 2004. Mr. Bronicki co-founded Ormat Turbines Ltd. in 1965 and is the Chairman of the board of directors of Ormat Industries, the publicly-traded successor to Ormat Turbines Ltd., and various of its subsidiaries. Since 1992, Mr. Bronicki has also been the Chairman of the board of directors of Bet Shemesh Engines, a manufacturer of jet engines, and of OPTI Canada Inc. Mr. Bronicki is also the Chairman of the board of directors of Orad Hi-Tec Systems Ltd., a manufacturer of image processing systems, and was the Co-Chairman of Orbotech Ltd., a NASDAQ-listed manufacturer of equipment for inspecting and imaging circuit boards and display panels. Mr. Bronicki has worked in the power industry since 1958. He is a member of the Executive Council of the Weizmann Institute of Science and chairs the Israeli Committee of the World Energy Council. Yehudit Bronicki and Lucien Bronicki are married. Mr. Bronicki obtained a postgraduate degree in Nuclear Engineering from Conservatoire National des Arts et Metiers in 1958 and a Master of Science Degree in Physics from Universite de Paris in 1958 and a Master of Science in Mechanical Engineering from Ecole Nationale Supérieure d'Ingenieurs Arts et Metiers in 1957.

Yehudit "Dita" Bronicki . Yehudit "Dita" Bronicki is our Chief Executive Officer, effective as of July 1,

2004, and is also a member of our board of directors, our President and our Secretary, positions she has held since our inception in 1994. Mrs. Bronicki is also the President of Ormat Systems, effective as of July 1, 2004. Mrs. Bronicki was also a co-founder of Ormat Turbines Ltd. and

is a member of the board of directors and the General Manager (a CEO-equivalent position) of Ormat Industries, the publicly-traded successor to Ormat Turbines Ltd., and various of its subsidiaries. Since 1992, Mrs. Bronicki has also been a director of Bet Shemesh Engines. Mrs. Bronicki is also a member of the board of directors of OPTI Canada Inc., and of Orbotech Ltd., a NASDAQ-listed manufacturer of equipment for inspecting and imaging circuit boards and display panels. From 1994 to 2001, Mrs. Bronicki was on the Advisory Board of the Bank of Israel. Mrs. Bronicki has worked in the power industry since 1965. Yehudit Bronicki and Lucien Bronicki are married. Mrs. Bronicki obtained a Bachelor of Arts in Social Sciences from Hebrew University in 1965.

Yoram Bronicki . Yoram Bronicki is our Chief Operating Officer, effective as of July 1, 2004. Mr. Bronicki is also a member of the board of directors of Ormat Industries, a position he has held since 2001. From 2001 to 2004, Mr. Bronicki was Vice President of OPTI Canada Inc., from 1999 to 2001, he was Project Manager of Ormat Industries and Ormat International, from 1996 to 1999, he was Project Manager of Ormat Industries, and from 1995 to 1996, he was Project Engineer of Ormat Industries. Mr. Bronicki is the son of Lucien and Yehudit Bronicki. Mr. Bronicki obtained a Bachelor of Science in Mechanical Engineering from Tel Aviv University in 1989 and a Certificate from the Technion Institute of Management Senior Executives Program.

Lisa Kidron . Lisa Kidron performs the function of our Chief Financial Officer and is the Chief Financial Officer of Ormat Systems, effective as of July 1, 2004. Ms. Kidron is also the Chief Financial Officer of Ormat Industries, a position she has held since 2002. From 2000 to 2002, Ms. Kidron was Chief Financial Officer at MUL-T-LOCK Ltd. and from 1999 to 2000, Ms. Kidron was Chief Financial Officer at MUL-T-LOCK Technologies Ltd. Ms. Kidron served as a director on the boards of various subsidiaries within the MUL-T-LOCK group from 1999 to 2002. Until 1999, Ms. Kidron was a senior manager in the accounting firm Kost-Forrer & Gabai (Ernst & Young, Global Services). Ms. Kidron obtained an L.L.M. Degree in Law from Bar-Ilan University in 2002, a Bachelor of Arts in Accounting from Tel Aviv University in 1994, a Masters of Science in Industrial Engineering from Ben Gurion University in 1987 and a Bachelor of Science in Computer Science and Mathematics from Rutgers University in 1985.

Nadav Amir . Nadav Amir performs the function of our Executive Vice President of Engineering, and is the Executive Vice President of Engineering of Ormat Systems, effective as of July 1, 2004. From 2001 through June 30, 2004, Mr. Amir was Executive Vice President of Engineering of Ormat Industries, from 1993 to 2001, he was Vice President of Engineering of Ormat Industries, from 1988 to 1993, he was Manager of Engineering of Ormat Industries, from 1984 to 1988, he was Manager of Product Engineering of Ormat Industries, and from 1983 to 1984, he was Manager of Research and Development of Ormat Industries. Mr. Amir obtained a Bachelor of Science in Aeronautical Engineering from Technion Haifa in 1972.

Hezy Ram . Hezy Ram performs the function of our Executive Vice President of Business Development, and is the Executive Vice President of Ormat Nevada, a position he has held since January 1, 2004. From 1999 through December 31, 2003, Mr. Ram was Executive Vice President of Business Development of Ormat Industries. Mr. Ram obtained a Master of Business Administration Degree from Hebrew University in 1978, a Master of Science Degree in Mechanical Engineering from Ben Gurion University in 1977 and a Bachelor of Science in Mechanical Engineering from Ben Gurion University in 1975.

Joseph Shiloah . Joseph Shiloah performs the function of our Executive Vice President of Marketing and Sales, and is the Executive Vice President of Marketing and Sales of Ormat Systems, effective as of July 1, 2004. From 2001 through June 30, 2004, Mr. Shiloah was the Executive Vice President of Marketing and Sales at Ormat Industries, from 1989 to 2000, he was Vice President of Marketing and Sales of Ormat Industries, from 1983 to 1989, he was Vice President of Special Projects of Ormat Turbines Ltd., from 1984 to 1989, he was Operating Manager of the Solar Pond project of Solmat Systems Ltd., a subsidiary of Ormat Turbines Ltd., and from 1981 to 1983, he was Project Administrator of the Solar Pond power plant project of Ormat Turbines Ltd. and Solmat Systems Ltd. Mr. Shiloah obtained a Bachelor of Arts in Economics from Hebrew University in 1972.

Aaron Chores . Aaron Chores performs the function of our Vice President of Operations and Product Support, and is the Vice President of Operations and Product Support of Ormat Systems, effective as of July 1, 2004, and will also serve in that capacity and provide services to us upon the completion of this offering. From 1999 through June 30, 2004, Mr. Chores was the Vice President of Operations and Product Support of Ormat Industries, from 1993 to 1998, he was the Director of Operations and Product Support of Ormat Industries, from 1991 to 1992, he was Manager of Project Engineering and Product Support, and from 1989 to 1990, he was Manager of Project Engineering of Ormat Industries. Mr. Chores obtained a Bachelor of Science in Electrical Engineering from Technion Haifa in 1982.

Zvi Krieger . Zvi Krieger performs the function of our Vice President of Geothermal Engineering, and is the Vice President of Geothermal Engineering of Ormat Systems, effective as of July 1, 2004. From 2001 through June 30, 2004, Mr. Krieger was the Vice President of Geothermal Engineering of Ormat Industries. Mr. Krieger has been with Ormat Industries since 1981 and served as Application Engineer, Manager of System Engineering, Director of New Technologies Business Development and Vice President of Geothermal Engineering. Mr. Krieger obtained a Bachelor of Science in Mechanical Engineering from the Technion, Israel Institute of Technology in 1980.

Zvi Reiss . Zvi Reiss performs the function of our Executive Vice President of Project Management, and is the Executive Vice President of Project Management of Ormat Systems, effective as of July 1, 2004. From 2001 through June 30, 2004, Mr. Reiss was the Executive Vice President of Project Management of Ormat Industries, from 1995 to 2000, he was Vice President of Project Management and from 1993 to 1994 he was Director of Projects of Ormat Industries. Mr. Reiss obtained a Bachelor of Science in Mechanical Engineering from Ben Gurion University in 1975.

Etty Rosner . Etty Rosner performs the function of our Corporate Secretary, and is the Corporate Secretary of Ormat Systems, effective as of July 1, 2004. Ms. Rosner is also the Corporate Secretary of Ormat Industries, a position she has held since 1991, and Vice President of Contract Management of Ormat Industries, a position she has held since 1999. From 1991 to 1999, Ms. Rosner was Contract Administrator Manager and Corporate Secretary and from 1981 to 1991, she was the Manager of the Export Department and Office Administrative Manager. Ms. Rosner obtained a Diploma in General Management from Tel Aviv University in 1990.

Connie Stechman . Connie Stechman is a member of our board of directors and our Vice President and Controller, positions she has held since our inception in 1994. Prior to joining Ormat Technologies, Ms. Stechman worked for an international public accounting firm. Ms. Stechman is a Certified Public Accountant and obtained a Bachelor of Science in Business and Concentration Accounting from California State University, Sacramento, in 1977.

Shimon Hatzir . Shimon Hatzir performs the function of our Vice President of Electrical and Conceptual Engineering, and is the Vice President of Electrical and Conceptual Engineering of Ormat Systems, effective as of July 1, 2004. From 2002 through June 30, 2004, Mr. Hatzir was the Vice President of Electrical and Conceptual Engineering of Ormat Industries, from 1996 to 2001, he was Manager of Electrical and Conceptual Engineering of Ormat Industries, and from 1989 to 1995, he was Project Engineer in the Engineering Division. Mr. Hatzir obtained a Bachelor of Science Degree in Mechanical Engineering from Tel Aviv University in 1988.

Ran Raviv . Ran Raviv performs the function of our Vice President of Business Development, and is the Vice President of Business Development of Ormat Nevada, a position he has held since 2001. From 1994 to 1997, Mr. Raviv was a business manager at Green Land Ltd., a subsidiary of Browning Ferris Inc. of Houston, Texas. In 1993, Mr. Raviv was a management consultant at Global Present Ltd. Mr. Raviv obtained a Bachelor of Science Degree in Computer Science and Business Studies from the University of Buckingham in 1992 and a Master of Business Administration Degree from City University Business School in 1993.

Ohad Zimron . Ohad Zimron performs the function of our Vice President of Product Engineering, and is the Vice President of Product Engineering of Ormat Systems, effective as of July 1, 2004. From 1999 through June 30, 2004, Mr. Zimron was the Vice President of Product Engineering

of Ormat Industries, from 1992 to 1999, he was Manager of Product Engineering of Ormat Industries, from 1986 to 1992 he was Product Engineer of Ormat Industries, from 1984 to 1986, he was Product Support Manager of Ormat Systems Inc. and from 1981 to 1984, he was Product Engineer of Ormat Turbines Ltd. Mr. Zimron obtained a Bachelor of Science Degree in Mechanical Engineering from Ben Gurion University in 1979 and a Master of Business Administration from Bar Ilan University in 2002.

Uzi Albert . Uzi Albert performs the function of our Manager of Logistics and Production, and is the Manager of Logistics and Production of Ormat Systems, effective as of July 1, 2004. From 1998 through June 30, 1994, Mr. Albert was the Manager of Logistics and Production of Ormat Industries. Mr. Albert obtained a Diploma of Business Administration from Tel Aviv University in 1991.

Security Ownership of Certain Beneficial Owners and Management

We are a wholly owned subsidiary of Ormat Industries. Ormat Industries is an Israeli company that is publicly traded on the Tel Aviv Stock Exchange. Based on publicly available information, Lucien Bronicki, the Chairman of our board of directors, Yehudit Bronicki, our Chief Executive Officer, Yoram Bronicki, our Chief Operating Officer, and their family beneficially own 35.38%, as of June 30, 2004, of the shares of common stock of Ormat Industries.

Board Composition

Our board of directors is currently composed of three members. Before this offering is completed, we intend to increase the number of directors on our board of directors to a total of six members, including three independent directors. Also, before this offering is completed, our board of directors will be classified into three classes of directors serving staggered, three-year terms and may be removed only for cause. In addition, in order to ensure compliance with the independence requirements of the New York Stock Exchange, the composition of the board of directors may change prior to and following the offering. It is our intention to be in full and timely compliance with all applicable rules of the New York Stock Exchange and applicable laws, including with respect to the independence of our directors. We intend to rely on the "controlled company" exception to the board of directors and committee composition requirements under the rules of the New York Stock Exchange. The "controlled company" exception does not modify the independence requirements for the audit committee, and we intend to comply with the requirements of the Sarbanes-Oxley Act of 2002 and the New York Stock Exchange rules which require that our audit committee be composed of at least three independent directors.

Board Committees

Our board of directors has the authority to appoint committees to perform certain management and administration functions. Our board of directors currently intends to establish an audit committee, a compensation committee and a nominating and corporate governance committee, effective upon completion of this offering.

Audit Committee. The audit committee will select, on behalf of our board of directors, an independent public accounting firm to be engaged to audit our financial statements, discuss with the independent auditors their independence, review and discuss the audited financial statements with the independent auditors and management and review our compliance with legal and regulatory requirements with respect to accounting policies, internal controls and financial reporting. The audit committee will consist of three or more members, all of whom will be independent directors.

Compensation Committee. The compensation committee will review and either approve, on behalf of our board of directors, or recommend to the board of directors for approval (1) the annual salaries and other compensation of our chief executive officer and certain other executive officers and (2) individual stock and stock option grants. The compensation committee also provides recommendations with respect to our compensation policies and practices and incentive compensation plans and equity plans. The compensation committee will consist of three or more members, of which at least two will be independent directors.

Nominating and Corporate Governance Committee. The nominating and corporate governance committee will assist our board of directors in fulfilling its responsibilities by identifying and approving individuals qualified to serve as members of our board of directors, selecting director nominees for our annual meetings of

stockholders, and developing and recommending to our board of directors corporate governance guidelines and oversight with respect to corporate governance and ethical conduct. The nominating and corporate governance committee will consist of three or more directors, of which at least one will be an independent director.

Compensation Committee Interlocks and Insider Participation

Prior to the completion of this offering, we have not had a compensation committee. Lucien Bronicki, Yehudit Bronicki and Connie Stechman served as the Chairman of our board of directors, President and Controller, respectively, during 2003. Lucien Bronicki and Yehudit Bronicki also held such positions in our parent and all of our subsidiaries and Connie Stechman also held such positions in a number of our subsidiaries during fiscal year 2003. See "Certain Relationships and Related Transactions."

Compensation of Directors

After consummation of this offering, we intend to pay our non-employee directors an annual retainer of \$ as fees related to their service on our board of directors and an additional annual retainer of \$ for each committee on which they serve as a member. Any non-employee director who also serves as chairman of the board will receive an annual retainer of \$ in lieu of the foregoing retainers.

We intend to promptly reimburse all directors for reasonable expenses incurred to attend meetings of our board of directors or committees.

Executive Compensation

The following table sets forth all compensation received during the year ended December 31, 2003, 2002 and 2001 by our named executive officers. The compensation described in this table does not include medical, group life insurance, or other benefits which are available generally to all of our salaried employees.

Summary Compensation Table

- (1) In 2003, 2002 and 2001, in addition to these amounts, Mrs. Bronicki received \$58,438, \$100,206 and \$110,794, respectively, as salary compensation from Ormat Industries; and in 2003, 2002 and 2001, Mr. Amir received \$169,820, \$156,016 and \$166,004, respectively, Mr. Ram received \$145,495, \$110,593 and \$127,951, respectively, Mr. Choreshe received \$115,819, \$110,185 and \$95,688, respectively, and Mr. Reiss received \$135,441, \$124,970 and \$132,993, respectively, as salary compensation from Ormat Industries.
- (2) In 2002, Mr. Amir earned \$101,492, as bonus compensation from Ormat Industries; in 2003, 2002 and 2001, Mr. Ram earned \$333,242, \$128,739 and \$118,516, respectively, and Mr. Choreshe earned \$22,161, \$19,543 and \$16,592, respectively, as bonus compensation from Ormat Industries.
- (3) In 2003, 2002 and 2001, Mr. Amir received options to purchase 33,000, 33,000 and 33,000 shares of Ormat Industries' common stock, respectively, Mr. Ram received options to purchase 33,000, 33,000 and 33,000 shares of Ormat Industries' common stock, respectively, Mr. Choreshe received options to purchase 22,500, 20,000 and 20,000 shares of Ormat Industries' common stock, respectively, and Mr. Reiss received options to purchase 33,000, 33,000 and 24,750 shares of Ormat Industries' common stock, respectively.
- (4) In 2003, 2002 and 2001, Mrs. Bronicki received \$7,872, \$7,271 and \$8,000, respectively, Mr. Amir received \$6,017, \$5,561 and \$5,987, respectively, Mr. Ram received \$3,996, \$3,693 and \$3,316, respectively, Mr. Choreshe received \$3,996, \$3,693 and \$3,757, respectively, and Mr. Reiss received \$3,996, \$3,693 and \$3,757, respectively, from Ormat Industries reflecting the private use of company-leased cars.

Option Grants

We have not granted any options to any of our executive officers since our inception.

Stock Option Plans

Our board of directors intends to adopt, prior to completion of this offering, subject to approval of the shareholders, the Ormat Technologies, Inc. 2004 Incentive Compensation Plan. The plan is a

broad-based equity incentive compensation plan which will cover the employees, directors and independent contractors of Ormat Technologies. The compensation committee will have the flexibility to grant a wide range of equity-based compensation, including incentive and non-qualified stock options, tandem and free-standing stock appreciation rights, restricted and unrestricted stock, restricted and unrestricted stock units, phantom stock, cash incentives, or any combination thereof. For both equity and cash compensation awards, there may either be time-based or performance-based criteria for full vesting of the award. The awards with performance-based criteria for vesting will satisfy the requirements of Internal Revenue Code Section 162(m), where applicable.

Employment Agreements

Mrs. Bronicki is currently employed by us as our President pursuant to an employment agreement dated January 1, 2003. Such employment agreement provides for a monthly base salary of \$3,500, payable in arrears. Pursuant to the terms of Mrs. Bronicki's employment agreement, if we terminate her employment without cause, Mrs. Bronicki is entitled to receive her monthly salary for the following 90-day period. If we terminate her employment for cause, Mrs. Bronicki is not entitled to any subsequent payments. Mrs. Bronicki is also employed as President of Ormat Systems pursuant to an employment agreement that sets forth terms of employment that are generally applicable to all of Ormat Systems' staff, covering matters such as vacation, health and other benefits. Pursuant to such employment agreement, Mrs. Bronicki can be terminated for any reason subject to 30 days prior notice. No prior notice is required in the case of a termination for cause. Mrs. Bronicki's base salary at Ormat Systems is approximately \$104,000. In addition, she has the use of a company-leased car. Mrs. Bronicki is also covered by Ormat Systems' management insurance plan, to which Ormat Systems contributes a percentage of her salary, and which covers any compensation she might be entitled to receive upon termination, other than in the case of termination for cause.

We intend to enter into a new executive employment agreement with Mrs. Bronicki, effective as of July 1,

2004. Such employment agreement will provide for a salary that is yet to be determined. We expect that the employment agreement will be for a two-year term initially expiring on June 30, 2006, but subject to automatic renewal unless terminated in the manner provided in the employment agreement and that it will also include the terms described below.

Pursuant to the terms of such employment agreement, if we terminate Mrs. Bronicki's employment without cause, upon providing 30 days' prior written notice, Mrs. Bronicki will be entitled to her salary, bonus and other compensation and benefits set forth in such agreement for the unexpired portion of the term of the employment agreement. If we terminate her employment for cause, Mrs. Bronicki will not be entitled to any salary, bonus or other compensation or benefits except for accrued but unpaid salary through the last day worked prior to such termination. If Mrs. Bronicki voluntarily terminates her employment upon providing 120 days' prior written notice to us, unless we are in breach of the provisions of such agreement, Mrs. Bronicki will not be entitled to receive any salary, bonus or other compensation or benefits except for accrued but unpaid salary through the last day worked prior to such termination. If Mrs. Bronicki dies during the term of the agreement, we must pay Mrs. Bronicki's estate (1) any unpaid base salary accrued to the date of Mrs. Bronicki's death, (2) any unpaid bonus earned by Mrs. Bronicki for a completed year, and (3) a portion of the annual bonuses for the year of Mrs. Bronicki's death and payable after the end of such year but multiplied by a fraction, the numerator of which is the number of days in the year through Mrs. Bronicki's death and the denominator of which is 365. If Mrs. Bronicki becomes disabled, we may terminate her employment.

Hezy Ram is currently employed by Ormat Nevada and serves as our Executive Vice President of Business Development pursuant to an employment agreement dated January 1, 2004, which expires on December 31, 2004. Mr. Ram's employment agreement provides for an annual base salary of \$175,000. Pursuant to the terms of Mr. Ram's employment agreement, in addition to his annual salary, Mr. Ram is entitled to certain other benefits paid for by us, including, among other things, annual bonuses and medical and hospitalization insurance. Pursuant to the terms of Mr. Ram's employment agreement, if we terminate his employment without cause, Mr. Ram is entitled to receive his monthly salary for the following 90-day period. If Mr. Ram terminates his employment voluntarily, he is not entitled to

receive any subsequent payments. Mr. Ram's employment agreement also contains a one-year non-competition and non-solicitation provision.

Nadav Amir is employed by Ormat Systems and serves as our Executive Vice President of Engineering, Aaron Choresh is employed by Ormat Systems and serves as our Vice President of Operations and Product Support and Zvi Reiss is employed by Ormat Systems and serves as our Vice President of Geothermal Engineering. Each of Messrs. Amir, Choresh and Reiss is party to an employment agreement with Ormat Systems that sets forth their respective terms of employment that are generally applicable to all of Ormat Systems' staff, covering matters such as vacation, health and other benefits. Under such employment agreements, any Ormat Systems employee may be terminated for any reason subject to 30 days' prior notice. However, termination for cause does not require any prior notice. An employee that is terminated for cause is not entitled to any subsequent payments.

The actual salary and other compensation arrangements of Messrs. Amir, Choresh, and Reiss are agreed separately with each employee. Mr. Amir is entitled to a base salary of approximately \$173,750 and a guaranteed bonus for 2004 of approximately \$44,440, Mr. Choresh is entitled to a base salary of approximately \$115,600 and a guaranteed bonus for 2004 of approximately \$35,500 and Mr. Reiss is entitled to a base salary of approximately \$139,500 and a guaranteed bonus for 2004 of approximately \$44,400. Each of these individuals is also covered by Ormat Systems' management insurance plan, to which Ormat Systems contributes a percentage of such individual's salary, and which covers any compensation that such individual may be entitled to receive upon termination. In addition, each of the individuals has the benefit of the use of a company-leased car.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Loan Agreement between us and Ormat Industries

In 2003, we entered into a loan agreement with Ormat Industries. Pursuant to this loan agreement, Ormat Industries agreed to make a loan to us in one or more advances not exceeding a total aggregate amount of \$150,000,000. The proceeds of the loan are to be used to fund our general corporate activities and investments. We are required to repay the loan and accrued interest in full and in accordance with an agreed-upon repayment schedule and in any event on or prior to June 5, 2010.

Interest on the loan is calculated on the balance from the date of the receipt of each advance until the date of payment thereof at a rate per annum equal to Ormat Industries' average effective cost of funds plus 0.3% percent in U.S. dollars, which represented a rate of 7.5% for the advances made during year 2003. All computations of interest shall be made by Ormat Industries on the basis of a year consisting of 360 days. As of March 31, 2004, the outstanding balance of the loan was approximately \$150.5 million.

The loan agreement contains customary representations and warranties to Ormat Industries and also contains customary events of default and notice provisions.

The loan agreement is governed by, and interpreted and construed under the laws of Israel.

Capital Note Issued to Ormat Industries

In 2003, pursuant to the terms of a capital note, Ormat Industries converted outstanding balances owed by us to Ormat Industries into a subordinated non-interest bearing loan in an amount equal to NIS 240.0 million. We can repay the loan in full or, upon demand by Ormat Industries, we will be required to repay the loan in full, at any time after November 30, 2005. The final maturity of the loan is December 30, 2006. In accordance with the terms of such note, we will not be required to repay any amount in excess of \$50 million (using the exchange rate existing on the date of such note).

Guarantee Fee Agreement between us and Ormat Industries

In 1999, we entered into a guarantee fee agreement with Ormat Industries, pursuant to which Ormat Industries agreed to issue certain standby letters of credit and guarantees on our behalf to certain of our customers as well as guarantees with respect to our bank credit lines.

Such agreement establishes a fee, calculated quarterly, equal to 1% per annum of all amounts guaranteed or subject to an outstanding letter of credit during the relevant quarter. Such payment is due quarterly in arrears and is payable against the receipt of an invoice from Ormat Industries.

Asset Purchase Agreement between us and Ormat Industries

Pursuant to an asset purchase agreement, effective as of July 1, 2004, Ormat Industries sold and assigned to our subsidiary, Ormat Systems, certain assets and liabilities related to Ormat Industries' geothermal power plants and power units business, which is described elsewhere in this prospectus as our products business. The parties agreed to use their best efforts to assign the contracts and liabilities related to this business to Ormat Systems within 12 months from July 15, 2004, and until then, their unassigned assets are to be held in trust by Ormat Industries for Ormat Systems. As part of this transaction, Ormat Industries agreed, for so long as it holds more than 50% of the voting interest in us, not to compete or engage in any business which is in the same field of the business acquired by Ormat Systems.

As total consideration for the purchase, Ormat Systems agreed to pay Ormat Industries the amount of \$11.0 million, which consists of a cash payment and the assumption of an outstanding loan to Bank Continental and certain employment liabilities.

As part of this transaction, Ormat Systems also agreed to pay to Ormat Industries certain commissions ranging between 2.5% and 5.0% on revenues from sale orders entered into prior to July 1, 2004.

Our subsidiary, Ormat Systems, has entered into a sublease with Ormat Industries for real estate leased by Ormat Industries from the Israeli Land Administration on which our production and manufacturing facilities are located. Such sublease is effective as of July 1, 2004 and the term of such sublease is 4 years and 11 months, which term may be extended for up to 25 years (which includes the initial term) provided certain consents are obtained from the Israeli Land Administration, if necessary, and if not, the sublease term will automatically be 25 years.

Pursuant to the sublease, Ormat Systems agreed to pay rent, in advance, on a monthly basis, equal to \$52,250.00 (plus VAT) per month. Payment will be adjusted every year to reflect increases in the Israeli Consumer Price Index, but will in no event be lower than the rent paid during the previous year. Pursuant to the sublease, Ormat Systems has also agreed to pay taxes and other compulsory charges, to make other required payments, and to indemnify Ormat Industries for taxes (other than income taxes) imposed in connection with the subleased real estate.

Pursuant to the sublease, Ormat Systems agreed to certain other customary undertakings, including indemnification and insurance undertakings.

The sublease was executed in connection with the asset purchase agreement between Ormat Systems and Ormat Industries.

License Agreement between us and Ormat Industries

On July 15, 2004, our subsidiary, Ormat Systems, entered into a patents and trademarks license agreement, effective as of July 1, 2004, pursuant to which Ormat Industries granted a world-wide royalty-free license to Ormat Systems (which is exclusive with respect to the patents and certain of the trademarks) to internally copy, use, and create derivatives of certain patents and trademarks. The license survives sales and/or transfers of the patents and trademarks and Ormat Systems owns the derivatives created from the licensed patents. The term of the license agreement continues until the patents or trademarks expire or are assigned to Ormat Systems (which are intended to be assigned, subject to tax and other considerations) and the agreement may be terminated if either party becomes insolvent.

The license agreement was executed in connection with the asset purchase agreement between Ormat Systems and Ormat Industries.

Service Agreement between us and Ormat Industries

On July 15, 2004, our subsidiary, Ormat Systems, entered into a services agreement, effective as of July 1, 2004, pursuant to which Ormat Systems agreed to provide, as an independent contractor, certain corporate, financial, secretarial and administrative services to Ormat Industries. At the request of Ormat Industries, Ormat Systems may also provide certain engineering services.

Ormat Industries is required to pay \$10,000 per month for all services (other than engineering services) rendered pursuant to such services agreement plus all out-of-pocket expenses of Ormat Systems. For engineering services, Ormat Industries is required to pay a fee equal to the cost of such services plus 10.0% and all out-of-pocket expenses of Ormat Systems. On each anniversary of such services agreement, such monthly fees are adjusted in accordance with the Israeli Consumer Price Index during the previous 12-month period plus 10.0%.

The services agreement was executed in connection with the asset purchase agreement between Ormat Systems and Ormat Industries.

Reimbursement Agreement between us and Ormat Industries

On July 15, 2004, we entered into a reimbursement agreement pursuant to which we agreed to reimburse Ormat Industries for any draws made on any standby letter of credit subject to the guarantee fee agreement, dated as of January 1, 1999, between us and Ormat Industries, and any

Registration Rights Agreement between us and Ormat Industries

At or prior to the closing of this offering, we will enter into a registration rights agreement with Ormat Industries. Under this agreement, Ormat Industries may require us on one occasion to register our common stock for sale on Form S-1 under the Securities Act if we are not eligible to use Form S-3 under that Act. After we become eligible to use Form S-3, Ormat Industries may require us on unlimited occasions to register our common stock for sale on this form. In addition, we will be required to file a registration statement on Form S-3 to register for sale shares of our common stock that are or have been acquired by directors, officers and employees of Ormat Industries upon the exercise of options granted to them by Ormat Industries. Ormat Industries will also have an unlimited number of piggyback registration rights. This means that any time we register our common stock for sale, Ormat Industries may require us to include shares of our common stock held by it or its directors, officers and employees in that offering and sale. Ormat Industries will not be allowed to exercise any registration rights during the lock-up period.

We will also agree to pay all expenses that result from the registration of our common stock under the registration rights agreement, other than underwriting commissions for such shares and taxes. We have also agreed to indemnify Ormat Industries, its directors, officers and employees against liabilities that may result from their sale of our common stock, including Securities Act liabilities.

Employment Agreement

We intend to enter into an executive employment agreement with Yoram Bronicki. The terms of the employment agreement are substantially similar to those of our Chief Executive Officer. See "Management — Employment Agreements." Yoram Bronicki will be our Chief Operating Officer. The employment agreement will provide for a salary that is yet to be determined.

DESCRIPTION OF CERTAIN MATERIAL AGREEMENTS

The following is a description of certain of our material agreements relating to our projects:

Financing Agreements

Beal Bank Credit Agreement and Related Documents

On December 18, 2003, our subsidiary OrCal Geothermal, Inc. entered into a credit agreement with Beal Bank, S.S.B. pursuant to which Beal Bank made a loan to OrCal Geothermal, Inc. in the amount of \$154,500,000. The proceeds of this loan were used to fund a portion of the purchase price for the Heber 1 and Heber 2 projects and our 50% ownership interest in the Mammoth project. Such loan amortizes quarterly in amounts set forth in the credit agreement. The loan accrues at an interest rate determined on each anniversary date of the loan as the greater of 7.125%, which increases 0.50% starting December 2011, or the three-month LIBOR plus 5.125%, with the margin stepping up after a certain number of years. We have entered into cap transactions with Union Bank of California and Lehman Brothers Special Financing Inc. pursuant to which our effective interest rate is capped at 6% for the period between March 30, 2007 and March 31, 2011. The final maturity of the loan is December 18, 2019. As of March 31, 2004, the outstanding balance on the loan was \$154.5 million.

Effective January 30, 2004, Beal Bank released its security interest over our partnership interest in the Mammoth project which was subsequently included in the collateral package supporting the issuance by Ormat Funding of its 8¼% senior secured notes described below.

The loan is secured by liens over (1) all real and personal property comprising the Heber 1 project and the Heber 2 project, (2) the bank accounts into which revenues from these projects are required to be paid, and (3) all capital stock and partnership interests in OrCal Geothermal, Inc. and its subsidiaries, including the entities that own the Heber 1 project and the Heber 2 project.

The credit agreement and related documents contain various affirmative and negative covenants regarding the manner in which OrCal Geothermal, Inc. and its subsidiaries conduct their business, including their ownership, operation, and maintenance of the Heber 1 project and the Heber 2 project and the performance of their obligations and exercise of their rights under the project documents related to these projects. One such

negative covenant is that OrCal Geothermal, Inc. and its subsidiaries may not expand their geothermal fields, develop new geothermal resources, or drill new geothermal wells without the lenders' consent. In addition, OrCal Geothermal, Inc. is prohibited from paying any dividend or making any other distributions to its immediate parent, Ormat Nevada, unless certain conditions are satisfied, including debt services coverage ratios that are at or above specified levels, cash flow forecasts that do not demonstrate an inability to repay the loan as it amortizes, and the absence of defaults and events of default under the credit agreement and related documents.

The credit agreement contains customary events of default, some of which are subject to cure periods and, in some instances, materiality thresholds. The occurrence of any of such events of default would enable the lenders to enforce their liens on the collateral.

All project revenues from the Heber 1 project and the Heber 2 project are required to be deposited into a bank account over which Beal Bank has a lien. Amounts from time to time on deposit in this account are disbursed into other segregated accounts (over which Beal Bank has liens) available to pay or fund operating expenses of the Heber 1 project and the Heber 2 project, fees and expenses of the lenders and their agents, principal and interest on the loan, debt service reserve obligations, capital expenditure reserve obligations, and dividends. During the 2004 and 2005 calendar years, OrCal Geothermal, Inc. is required to use project revenues to establish and maintain a capital expenditures reserve in an amount equal to 50% of the capital expenditures reasonably anticipated to become due and payable during such years. We estimate the required amount of these reserves during these years to be between \$4.2 million and \$10.5 million. In subsequent calendar years, OrCal Geothermal, Inc. must use project revenues to maintain a capital expenditures reserve in an amount at any time that is equal to 100% of the capital expenditures reasonably anticipated to become due and payable during the next three months.

Senior Secured Notes and Related Documents

On February 13, 2004, our subsidiary Ormat Funding issued \$190,000,000 of 8¼% senior secured notes due 2020 in an offering under Rule 144A and Regulation S of the U.S. Securities Act of 1933, as amended. The proceeds of the senior secured notes were used to finance the acquisition of the Steamboat 2/3 project, refinance the acquisition of the Brady project, the Steamboat 1/1A project and the Mammoth project, provide funds for the capital expenditures associated with the upgrade of the Steamboat 1/1A project and the Galena repowering, fund a reserve account to repay a loan from United Capital Bank (the proceeds of which were previously used to refinance the acquisition of the Ormesa project), repay a portion of a certain subordinated loan from Ormat Nevada, prepay a portion of the Meyberg lease, and pay transaction expenses associated with the issuance of such notes.

The notes have a final maturity date of December 30, 2020, unless redeemed earlier. Interest on the notes is payable in arrears on June 30 and December 30 of each year, beginning June 30, 2004. The principal of the notes amortizes over time in amounts set forth in the indenture.

The notes are secured by liens over (1) the capital stock of Ormat Funding and all of the capital stock held by Ormat Funding in each of the direct and indirect subsidiaries that own the Brady project, the Steamboat 1/1A project, the Steamboat 2/3 project, and the Mammoth project, (2) with certain exceptions for unassigned leases, all real property owned or leased by Ormat Funding and all of its direct and indirect subsidiaries that own the Brady, Steamboat 1/1A and Steamboat 2/3 projects, (3) all contractual rights under the agreements relating to the Brady, Steamboat 1/1A and Steamboat 2/3 projects (such as the power purchase agreements and all other relevant contracts) and all governmental approvals and permits relating to such projects; (4) all of Ormat Funding's revenues and all of the revenues derived from the Brady, Steamboat 1/1A and Steamboat 2/3 projects, including amounts received as distributions from the Ormesa and Mammoth projects, as well as all of Ormat Funding bank accounts and those of Ormat Funding direct and indirect subsidiaries that own the Brady, Steamboat 1/1A, Steamboat 2/3 and Mammoth projects; (5) any intercompany notes payable to Ormat Funding or any of the direct or indirect subsidiaries that own the Brady, Steamboat and Mammoth projects; (6) insurance policies covering the Brady, Steamboat 1/1A and Steamboat 2/3 projects and, to the extent of our interest therein, any insurance maintained with respect to the Mammoth project; and (7) guarantees from each of the direct and indirect subsidiaries that own the Brady, Steamboat 1/1A and Steamboat 2/3 projects.

Following the repayment of the United Capital Bank loan, which we expect will happen on or prior to January 31, 2005, or such other date as of which Ormesa LLC is no longer prohibited by the terms of the United

Capital Bank loan to grant liens on its assets, Ormat Funding and Ormesa LLC are obligated to grant similar liens over similar items of collateral in favor of the indenture trustee and collateral agent for the senior secured notes.

Ormat Funding may redeem all or a portion of the senior secured notes at our option, at any time, at a redemption price equal to the principal amount of the senior secured notes to be redeemed, plus a "make-whole" premium, accrued interest and liquidated damages, if any, to the redemption date. The make-whole premium is calculated using a discount rate equal to the interest on U.S. Treasury securities with a comparable maturity, plus 50 basis points. In no event can the sum of the redemption price for the notes being redeemed and the make-whole premium be less than 100% of the principal amount of senior secured notes to be redeemed.

Under certain circumstances, Ormat Funding must redeem a portion of the senior secured notes. If Ormat Funding has not satisfied certain conditions with respect to the Galena repowering on or prior to September 30, 2005, or Ormat Funding fails to achieve certain levels of generating capacity from the Galena repowering or from the Mammoth enhancement by March 31, 2006 or January 1, 2006, respectively, Ormat Funding will have to redeem the senior secured notes at a price equal to 101% together with accrued interest and liquidated damages, if any, to the redemption date, in an amount calculated in accordance with the indenture for the senior secured notes which cannot exceed, in the aggregate, \$20.0 million. Upon the occurrence of certain loss, eminent domain and similar events described in the indenture for the senior secured notes, Ormat Funding will have to use any

funds received in connection with such events to redeem the senior secured notes at a price equal to the principal amount of the notes scheduled to be redeemed plus accrued interest to the redemption date.

The indenture for the senior secured notes and related documents contains various affirmative and negative covenants regarding the manner in which Ormat Funding and its direct or indirect subsidiaries that own the Brady, Steamboat, Mammoth and, after the repayment of the United Capital Bank loan, Ormesa projects conduct their business, including their ownership, operation and maintenance of these projects and the performance of their obligations and exercise of their rights under the relevant project documents (such as the power purchase agreement and other relevant contracts) relating to such projects. In addition, Ormat Funding cannot make any dividend distribution to its immediate parent, Ormat Nevada, unless certain conditions are satisfied, including compliance with debt service coverage ratios and projected debt service coverage ratios that are at or above specified levels, and the absence of defaults and events of default under the indenture for the senior secured notes and related documents.

The indenture for the senior secured notes contains customary events of default, some of which are subject to cure periods and, in some instances, materiality thresholds. One such event of default is the occurrence of any change in control which, among other things, refers to a situation whereby a party other than Ormat Nevada and certain related parties becomes, in certain circumstances, the beneficial owner of 50% or more of the economic and voting interests in Ormat Funding.

Under the depositary agreement for the senior secured notes, all revenues from the projects (other than the Ormesa project, which are not required to be deposited until the United Capital Bank loan is paid off) are required to be deposited into certain bank accounts established with a collateral agent and pledged as security for payment obligations under the senior secured notes. The principal accounts so established constitute a revenue account, operating account, debt service payment account and debt service reserve account. All revenues are required to be deposited initially in the revenue account, and are then transferred in a prescribed order to pay operating expenses, to pay principal and interest on the senior secured notes, to fund the debt service reserve account, and to fund certain other accounts.

The indenture for the senior secured notes authorizes Ormat Funding to issue an unlimited aggregate principal amount of senior secured notes, subject to compliance with certain financial and other conditions set forth in the indenture. Ormat Funding may decide to issue additional senior secured notes under the indenture in the future in connection with possible financing or refinancing of additional projects.

In connection with the issuance of the senior secured notes, Ormat Funding entered into a registration rights agreement, pursuant to which it (1) undertook to file a registration statement with the Securities and Exchange Commission and offer to exchange the senior secured notes for publicly registered notes with substantially identical terms and conditions to the senior secured notes and consummate the exchange offer within 330 days from February 13, 2004; and (2) undertook to file a shelf registration statement for the resale of senior secured

notes if the exchange offer described in the foregoing clause could not be consummated within the time period prescribed in such agreement and in certain other circumstances. If Ormat Funding does not comply with these exchange or registration obligations, it will be required under certain circumstances to pay to holders of the senior secured notes liquidated damages until such obligations are satisfied.

Credit Facility Agreement (The Momotombo Project)

On September 15, 2000, our subsidiary Ormat Momotombo Power Company Ltd. entered into a credit facility agreement (as amended as of March 25, 2003) with Bank Hapoalim B.M. The loan, in an aggregate amount equal to \$26,435,000, was made pursuant to two tranches, which are used to finance up to 70% of the costs of Phases I and II of the project. Tranche one of the loan bears interest at LIBOR plus 2.375%. Tranche two of the loan bears interest at LIBOR plus 3%. As of March 31, 2004, the outstanding balance on the loan was approximately \$19.2 million. The first tranche of the loan is due by December 2009 and the final maturity of the second tranche of the loan is December 2010.

The loan is secured by liens over (1) all real and personal property comprising the Momotombo project, (2) all project revenues and the bank account into which they are required to be deposited, and (3) all of the equity interests in Ormat Momotombo Power Company Ltd.

Ormat Systems has also guaranteed the repayment of 50% of such outstanding obligations to Bank Hapoalim B.M. upon the occurrence of certain events.

Pursuant to the terms of the credit facility agreement, Ormat Momotombo Power Company Ltd. is required to repay all principal amounts disbursed under the credit facility agreement in approximately equal, successive quarterly installments.

Subject to the successful receipt of any required governmental approvals, Ormat Momotombo Power Company Ltd. may, at any time on at least 30 but not more than 60 days' prior written notice to Bank Hapoalim, prepay all or any part of the outstanding principal amount, without premium or penalty.

The credit facility agreement contains various affirmative and negative covenants regarding the manner in which Ormat Momotombo Power Company Ltd. conducts its business, including its ownership, operation and maintenance of the project and the performance of its obligations and exercise of its rights under the related project documents. Such covenants include, but are not limited to, restrictions on the ability of Ormat Momotombo Power Company Ltd. (1) to take actions which would constitute or result in any material alteration to the nature of its business or the nature and scope of the Momotombo project without Bank Hapoalim's prior written consent, (2) to consolidate, merge or consolidate its assets, (3) to modify or amend its organizational documents or its filings with the Nicaraguan Foreign Investment Committee, (4) to declare dividends or make certain payments to holders of any share capital, (5) to enter into certain leases (subject to certain exceptions contained in the credit facility agreement) or (6) to incur any additional indebtedness. Ormat Momotombo Power Company Ltd. must also maintain certain leverage and debt service coverage ratios under the terms of the credit facility agreement.

The credit facility agreement also contains certain customary events of default, some of which are subject to cure periods and/or materiality thresholds. Upon the occurrence of an event of default, Bank Hapoalim is authorized at any time or from time to time, without notice to Ormat Momotombo Power Company Ltd., to set off and to appropriate and apply any deposits (general or special) and any other indebtedness at any time held or owing by Bank Hapoalim B.M. to or for Ormat Momotombo Power Company Ltd. against and on account of the secured obligations and liabilities of Ormat Momotombo Power Company Ltd. under the credit facility agreement or any related agreement.

Eximbank Credit Agreement (The Leyte Project)

On May 13, 1996, our subsidiary Ormat-Leyte Co. Ltd. entered into a credit agreement with the Export-Import Bank of the United States, an agency of the United States, pursuant to which the Export-Import Bank made a loan to Ormat-Leyte Co. Ltd. in the amount of \$44,448,038. The credit was established as part of the overall debt financing for the construction of the Leyte project and the proceeds of the loan were used to repay in part certain short-term previous loans made by other lenders to the project owner. As of March 31, 2004, the outstanding balance on the loan was approximately \$17.8 million. The final maturity of the loan is July 2007.

The loan is secured by liens over (1) all real and personal property comprising the Leyte project, (2) the bank accounts into which revenues from the project are required to be deposited and (3) all of the equity interests in Ormat-Leyte Co. Ltd.

Pursuant to the terms of the credit agreement, Ormat-Leyte Co. Ltd. is required to repay all principal amounts disbursed under the credit agreement in approximately equal, successive quarterly installments. Ormat-Leyte Co. Ltd. is required to pay interest at a rate equal to 6.54% per annum.

Subject to providing 10 business days' prior written notice, Ormat-Leyte Co. Ltd. may from time to time prepay all or any part of the outstanding principal amount of the loan, together with accrued

interest and all other amounts due to Eximbank under the credit agreement and the related financing documents, and a prepayment premium, as provided for in the credit agreement.

The credit agreement contains various customary affirmative and negative covenants regarding the manner in which Ormat-Leyte Co. Ltd. conducts its business, including its ownership, operation and maintenance of the Leyte project and the performance of its obligations and exercise of its rights under the related project documents.

The credit agreement also contains certain customary events of default, some of which are subject to cure periods and/or materiality thresholds.

Project-related Agreements

Power Purchase Agreements For Our Nevada Projects

Our existing projects in Nevada sell, and the Galena project will sell, their electrical output to Sierra Pacific Power Company under individual power purchase agreements for each project. The Desert Peak 2 and Desert Peak 3 projects will sell their electrical output to Nevada Power Company under separate power purchase agreements. These agreements have different durations, but generally have similar terms and conditions, except as specifically noted below. We refer to our Nevada project, including our projects under development, construction or enhancement as, the Galena, Steamboat 1/1A, Steamboat 2/3, Steamboat Hills, Brady, Desert Peak 2 and Desert Peak 3 projects.

The power purchase agreements with Sierra Pacific Power Company (other than the Steamboat 1 and Galena power purchase agreements) generally provide that they may be terminated by Sierra Pacific Power Company prior to their respective expiry dates if our project subsidiaries fail to deliver energy for 180 consecutive days, so long as our project subsidiaries are not attempting to resume operations of the relevant project. In the case of the Galena, Desert Peak 2 and Desert Peak 3 power purchase agreements, early termination may occur if the required approval from the NPUC or FERC is not obtained or, in the case of the Galena power purchase agreement, after a force majeure event has occurred and continued for longer than six months (or twelve months if the force majeure event caused loss of a major component of the plant). In the case of the Steamboat 1 power purchase agreement, early termination may occur if there is a force majeure event.

Pursuant to the Steamboat 1 and Steamboat 1A power purchase agreements, our project subsidiaries are entitled to receive, on a monthly basis, energy payments equal to the short term avoided cost rates for energy in effect for the relevant billing period. Under the Brady power purchase agreement and the Steamboat 2 and Steamboat 3 power purchase agreements, our project subsidiaries are entitled to receive, on a monthly basis, energy and capacity payments. The energy payment escalates each year under the Steamboat 2, Steamboat 3 and the Brady power purchase agreements. The capacity payments under these power purchase agreements are subject to reduction if certain capacity availability percentages are not met. There is also a scheduled reduction in the capacity price that will occur in the future with respect to the Steamboat 2, Steamboat 3 and Brady power purchase agreements. In addition, under these power purchase agreements, Sierra Pacific Power Company may dispatch the Steamboat 2/3 and Brady projects up to a certain number of hours per year at a reduced energy rate.

Pursuant to the Galena, Desert Peak 2 and Desert Peak 3 power purchase agreements, our project subsidiaries are obligated to deliver energy on a continuous basis, along with dedicating all renewable energy credits and environmental credits, to Sierra Pacific Power Company. Our project subsidiaries receive an energy payment for all energy they deliver under such agreements, which payment escalates over time. In the event our project subsidiaries do not supply 95% of the amount of energy required during a certain period, they must

compensate Sierra Pacific Power Company or Nevada Power Company for its replacement costs to purchase such shortfall amount from an alternate source. In addition, if our project subsidiaries do not transfer all of our renewable energy credits associated with the project to Sierra Pacific Company or Nevada Power Company, our project subsidiaries may have to compensate for Sierra Pacific Power Company's or Nevada Power Company's replacement cost to purchase such credits from alternate sources.

Our project subsidiaries are generally relieved from their obligations under the power purchase agreements to the extent they cannot wholly or partly perform such obligations as a result of the occurrence of a force majeure event. Generally, under these power purchase agreements, such relief is contingent upon our providing Sierra Pacific Power Company or Nevada Power Company with prompt notice of the suspension of our performance and our project subsidiaries attempting to remedy the inability to perform.

Pursuant to most of the power purchase agreements, including those of the Brady, Steamboat 1A, Steamboat 2, Steamboat 3, Steamboat Hills, Desert Peak 2 and Desert Peak 3 projects, the non-availability of the geothermal resource by itself is not a force majeure event. The Brady, Steamboat 2 and Steamboat 3 power purchase agreements provide that if the project does not maintain Peak Period Capacity values of at least 85% of those listed in the contract, our relevant project subsidiary will be obligated to pay liquidated damages to Sierra Pacific Power Company in amounts ranging from \$1.0 million to \$1.5 million.

Pursuant to these power purchase agreements, our project subsidiaries have certain customary obligations to indemnify Sierra Pacific Power Company and Nevada Power Company under certain circumstances.

Pursuant to the Steamboat Hills and Steamboat 1A power purchase agreements, our project subsidiaries must provide notice of the project's availability for sale to Sierra Pacific Power Company. Under the Steamboat 2, Steamboat 3, Brady, Galena, Desert Peak 2 and Desert Peak 3 power purchase agreements, our project subsidiaries must provide Sierra Pacific Power Company or Nevada Power Company, as the case may be, with a right of first refusal for the acquisition of such projects.

Our project subsidiaries are generally required to coordinate scheduled maintenance on the plants with Sierra Pacific by providing a list of proposed maintenance operations certain months in advance. In the case of the Steamboat 1 power purchase agreement, our project subsidiary is obligated only to give notice to Sierra Pacific Power Company of scheduled maintenance outages. In the case of the Galena, Desert Peak 2 and Desert Peak 3 power purchase agreements, our project subsidiaries have an obligation to obtain Sierra Pacific Power Company's or Nevada Power Company's, as the case may be, consent for any non-forced outage and are limited to fifteen days per year for the Galena project and thirty days per year for the Desert Peak 2 and Desert Peak 3 projects.

Our project subsidiaries are required to obtain and maintain insurance coverage for our plants. Other than in the case of the Steamboat 1, Desert Peak 2, Desert Peak 3 and the Galena power purchase agreements, if our project subsidiaries fail to carry insurance, our project subsidiaries may not deliver capacity and energy to Sierra Pacific Power Company and Sierra Pacific Power Company has no obligation to accept or pay for any capacity or energy until appropriate insurance is obtained or reinstated. If any of our Desert Peak 2 or Desert Peak 3 project subsidiaries fails to maintain the requisite coverage, it must indemnify Nevada Power Company for liabilities that would have been protected against had our project subsidiary maintained such coverage.

Pursuant to the Desert Peak 2 and Desert Peak 3 power purchase agreements, our project subsidiaries are required to maintain a certain credit rating or to provide certain security as collateral in favor of Nevada Power Company. Pursuant to the Galena power purchase agreement, our project subsidiary is required to provide certain collateral as security in favor of Sierra Pacific Power Company.

Our project subsidiaries generally cannot assign the power purchase agreements without the prior written consent of Sierra Pacific Power Company or Nevada Power Company, as the case may be, although the power purchase agreements of all our project subsidiaries provide for collateral assignment for financing purposes without consent from Sierra Pacific Power Company or Nevada Power Company.

The Steamboat 1 power purchase agreement term continues until December 5, 2006 and is then automatically renewed each year unless terminated by either party; the Steamboat 1A power purchase agreement expires on December 14, 2018; the Steamboat 2 and Steamboat 3 power purchase agreements expire on December 19, 2022; the Steamboat Hills power purchase agreement expires in

February, 2018; the Brady power purchase agreement expires in July 2022; and the Galena, Desert Peak 2 and Desert Peak 3 power purchase agreements expire twenty years from the first January 1 after the commercial operation date, which we currently expect to be the end of 2005, in the case of the Galena project, and early 2006 in the case of the Desert Peak 2 and Desert Peak 3 projects.

Interconnection Arrangements For Our Nevada Projects

The Steamboat 1A plant is interconnected to Sierra Pacific Power Company's grid pursuant to the terms of a special facilities agreement. There are no material outstanding obligations under this agreement remaining to be performed by our project subsidiary. The Steamboat 1 and Steamboat Hills projects are interconnected to Sierra Pacific Power Company's grid pursuant to the terms of each project's power purchase agreement.

Our project subsidiaries also have interconnected the Steamboat 2 and Steamboat 3 plants to Sierra Pacific Power Company's grid pursuant to the terms of a special facilities agreement. Our project subsidiaries reimburse Sierra Pacific Power Company, the interconnecting utility, for costs incurred in the operation, maintenance and refurbishment of the interconnection facilities and equipment. As a part of the interconnection agreement, it was stipulated that Sierra Pacific Power Company would perform a reduced scope of work, as certain recommendations made by Sierra Pacific Power Company were not agreed to by us. As a result of the reduced scope of work performed by Sierra Pacific Power Company, our project subsidiaries agreed, under the terms of the agreement to assume certain increased risks of outages, indemnify Sierra Pacific Power Company from liability resulting from the reduced scope of work, and add certain equipment to our facilities before expanding the plants.

All of the special facilities agreements for the Steamboat 1A, Steamboat 2, and Steamboat 3 projects require our project subsidiaries to indemnify Sierra Pacific Power Company from liability arising out of the engineering, design, construction, maintenance or operation of, or the making of improvements or additions to, our facilities. However, our project subsidiaries do not have an obligation to indemnify Sierra Pacific Power Company for liability or loss to the extent such liability or loss results from Sierra Pacific Power Company's negligence or willful misconduct.

Our project subsidiary has interconnected the Brady project to Sierra Pacific Power Company's grid pursuant to the terms of the Brady power purchase agreement. Our project subsidiary has an obligation under this agreement to maintain all project property required for the receipt of energy from the interconnecting utility.

Power Purchase Agreements For Our California Projects

Our California project subsidiaries sell electricity from our Mammoth, Ormesa, Heber 1 and Heber 2 projects under seven separate power purchase agreements with Southern California Edison Company. In the case of our Mammoth project subsidiary, there are three such agreements which we refer to as the G-1, G-2 and G-3 power purchase agreements. In the case of our Ormesa project subsidiary, there are two such power purchase agreements, which we refer to as the Ormesa I and Ormesa II power purchase agreements. Each of our Heber 1 and Heber 2 project subsidiaries also has one such power purchase agreement. These agreements have different durations, but generally have the same terms and conditions, except as specifically noted below.

The G-1, G-2, G-3, Ormesa I, Ormesa II, Heber 1 and Heber 2 power purchase agreements do not terminate at their stated expiry dates unless either party gives prior written notice. The notice period is five years in the case of the G-1 power purchase agreement and 90 days in the case of the other power purchase agreements. The Heber 1 power purchase agreement may be terminated by our project subsidiary prior to its stated expiry upon making a certain payment to Southern California Edison Company.

Under all of the power purchase agreements, our project subsidiaries are entitled to receive, against performance of their obligations, capacity and energy payments on a monthly basis. The energy payments for all of our California project subsidiaries are currently set pursuant to the terms

of settlement agreements through April 2007, but beginning in May 2007 will be based on Southern California Edison Company's short run avoided cost. Under the G-3, Ormesa I, Ormesa II and Heber 1 and 2 power purchase agreements, our project subsidiaries potentially are entitled to receive capacity bonuses if the performance of the respective facilities exceed certain requisite performance requirements. Under the G-2, G-3, Ormesa I, Ormesa II and Heber 2 power purchase agreements, Southern California Edison Company may request that our project subsidiaries discontinue or reduce the delivery of energy during off-peak periods if certain economic circumstances exist.

Our project subsidiaries are entitled to perform scheduled maintenance on the respective facilities subject to certain limitations. Under the G-1 power purchase agreement, our project subsidiary has agreed to give reasonable prior written notice of its intent to perform scheduled maintenance and must use its best efforts to schedule such outages during off-peak hours. Under the G-2, G-3, Ormesa I, Ormesa II, Heber 1 and Heber 2 power purchase agreements, our project subsidiaries have agreed to give prior written notice of all scheduled outages; not to perform major overhauls during peak months; to use reasonable efforts to schedule routine maintenance during off-peak months; to cap the number of outage hours that may be taken during peak hours of peak months; and to cap the number of outage hours that may be taken during any twelve-month period.

Under the G-3, Ormesa I, Ormesa II and Heber 1 and 2 power purchase agreements, each of our project subsidiaries has an obligation to meet certain minimum performance requirements set forth in such agreements and to demonstrate its capacity on an annual basis. If one of our project subsidiaries fails to meet the performance requirements, it may be placed on probation, the capacity of the relevant plant may be permanently reduced and, in such an instance, a refund would be owed from such project subsidiary to Southern California Edison Company. If one of our project subsidiaries fails to demonstrate its capacity, the capacity of the relevant power plant may be permanently reduced and, in such case, a refund would be required to be made from such project subsidiary to Southern California Edison Company. Our project subsidiary may also reduce the capacity of the plants upon notice to Southern California Edison Company and after making a certain payment to it.

All of our project subsidiaries have an obligation pursuant to their respective power purchase agreements to indemnify Southern California Edison Company under certain circumstances.

As part of their obligations, our project subsidiaries must maintain certain insurance coverage for the relevant project. If any of our project subsidiaries fails to maintain such coverage, it must indemnify Southern California Edison Company for liabilities to the extent Southern California Edison Company would have been protected had our project subsidiary maintained such insurance coverage.

Our project subsidiaries are released from their obligations under the relevant power purchase agreement to the extent any of them cannot wholly or partly perform such obligations as a result of uncontrollable force, so long as our project subsidiary provides prompt written notice to Southern California Edison Company and attempts to remedy its inability to perform. In addition, under the G-3, Ormesa I, Ormesa II, and Heber 1 and 2 power purchase agreements, Southern California Edison Company is obligated to make capacity payments for up to 90 days during the occurrence of an uncontrollable force. Also, pursuant to the Heber 1, Ormesa I and Ormesa II power purchase agreements, an uncontrollable force that prevents operation for certain prolonged periods of time is deemed to be an abandonment of the project. An abandonment, whether due to an uncontrollable force or other specified events provides Southern California Edison Company with certain rights to purchase the relevant power plant.

All of our project subsidiaries are prohibited from assigning their respective power purchase agreements without the prior written consent of Southern California Edison Company, except that all of our project subsidiaries other than Heber 1 may assign their respective power purchase agreement in connection with the merger or a sale of substantially all of the project assets. The Ormesa II power purchase agreement may be assigned by our project subsidiary to a lender in connection with a related financing. Our Heber 1 and 2 project subsidiaries may assign their power purchase agreements without the prior written consent of Southern California Edison Company to an affiliate.

Under the Ormesa I and Ormesa II power purchase agreements, under certain circumstances, Southern California Edison Company or its designee has a right of first refusal to acquire the facility. Under the G-1 power purchase agreements, under certain circumstances, Southern California Edison Company or its subsidiary or affiliate has a right of first refusal to acquire the facility. Under the Heber 1 power purchase agreement, under certain circumstances, Southern California Edison Company or its subsidiary has a right of first refusal to acquire

the facility.

The G-1 power purchase agreement expires on February 26, 2014; the G-2 power purchase agreement expires on December 7, 2020 and the G-3 power purchase agreement expires on December 22, 2020. The Ormesa I and Ormesa II power purchase agreements expire on October 2016 and March 1, 2017, respectively. Our Heber 1 and 2 power purchase agreements expire on December 2015 and July 2023, respectively.

Interconnection Arrangements for our California Projects

Each of our project subsidiaries have entered into an interconnection facilities agreement for the Mammoth G-1, G-2 and G-3 plants with Southern California Edison Company. Each of our project subsidiaries has an obligation to operate and maintain the interconnection facilities at its own expense. Each of our project subsidiaries must indemnify the interconnecting utility from liability arising out of any fault or damage to our interconnection facilities, the interconnecting utility's transmission system or the public as a result of its operation of the G-1, G-2 and G-3 plants.

Each of our project subsidiaries interconnects the Ormesa project (for the Ormesa I and Ormesa II power purchase agreements) and Heber 1 and 2 projects to Southern California Edison Company's grid by way of transmission lines owned by the Imperial Irrigation District, which we refer to as IID. These transmission lines interconnect the Ormesa, Heber 1 and Heber 2 projects with Southern California Edison Company's transmission system and are governed by the terms of certain plant connection agreements. IID has the right to curtail the amount of electricity it carries on such transmission lines under certain circumstances. Transmission service charges are paid monthly to IID pursuant to certain transmission service agreements.

Power Purchase Agreement for the Puna Project

Our Puna project subsidiary in Hawaii sells its electrical output to Hawaii Electric Light Company under a long-term power purchase agreement.

The power purchase agreement with Hawaii Electric Light Company provides that either party may terminate the agreement if an event of force majeure occurs and is continuing for twelve consecutive months and the affected party has not taken action to cure the event.

Under the Puna power purchase agreement, our project subsidiary is entitled to receive, on a monthly basis, energy payments and capacity payments. The energy payments for a portion of the energy delivered by our project subsidiary are equal to the higher of the short term avoided cost rates for energy in effect for the relevant billing period or a fixed rate. The energy payments for a smaller portion of energy to be delivered by our project subsidiary to Hawaii Electric Light Company are equal to an amount based on a fuel rate and a variable operation and maintenance rate, as each are adjusted over the term of the agreement, but which rate will never go below a certain floor. Our project subsidiary also receives a payment for providing reactive power to Hawaii Electric Light Company. Our project subsidiary is required to make certain payments to Hawaii Electric Light Company if certain performance requirements under the Puna power purchase agreement are not met.

Our project subsidiary is not required to perform its obligations under the power purchase agreement following the occurrence of a force majeure event, upon providing Hawaii Electric Light Company with prompt notice of the suspension of our project subsidiary's performance and commencing with remedial measures. Issues with the geothermal resource by itself do not constitute a force majeure event unless our project subsidiary has taken adequate measures to try to mitigate the adverse impacts of such issues.

Our project subsidiary has an obligation to indemnify Hawaii Electric Light Company in certain circumstances. Our project subsidiary also is required to obtain and maintain insurance coverage for the power plant.

Our project subsidiary is generally required to coordinate scheduled maintenance with respect to the power plant with Hawaii Electric Light Company. Our project subsidiary has an obligation to obtain Hawaii Electric Light Company's approval in order to schedule the days each year during which a plant overhaul may be performed.

Our project subsidiary cannot assign the power purchase agreement without the prior written consent of Hawaii Electric Light Company, although our project subsidiary may assign the power purchase agreement to

lending institutions in connection with the financing of the project without the prior consent of Hawaii Electric Light Company.

The initial term of the Puna power purchase agreement is scheduled to expire on December 31, 2027 which term will continue in effect after such initial term until either party has given notice of not less than five years of its intent to terminate such power purchase agreement.

Interconnection Arrangement for the Puna Project

Our project subsidiary is interconnected to Hawaii Electric Light Company's transmission system pursuant to agreements to design and construct transmission lines and substation facilities. There are no material outstanding obligations under these agreements.

Foreign Projects

Power Purchase Agreement for the Leyte Project

The Leyte project in the Philippines sells energy and capacity to the Philippine National Power Corporation. According to the BOT agreement which was subsequently amended in February and April 1996, Ormat-Leyte Co. Ltd. is required to deliver the electricity generated at the Leyte Project to the Philippine National Power Corporation, on behalf of PNOC-Energy Development Corporation. PNOC-Energy Development Corporation agreed to supply Ormat-Leyte Co. Ltd. with the geothermal fluid necessary for operating the power plant during the entire term of the BOT agreement at no cost. Under the BOT agreement, our project subsidiary will dedicate all energy and capacity of the power plant to the purchaser, and the purchaser is obligated to purchase all of the electricity generated by the project and provide our project with capacity payments and energy fees. PNOC-Energy Development Corporation agreed to make the Leyte Power Expansion Geothermal Reservation site available exclusively to us at no cost in exchange for the construction and operation of the project. The BOT agreement expires in September 2007, at the end of which the power plant will be transferred to PNOC-Energy Development Corporation (for no further consideration).

Power Purchase Agreement for the Momotombo Project

The Momotombo project in Nicaragua sells electricity to the Nicaraguan Electricity Company. The Momotombo project has a power purchase agreement and a concession agreement with Nicaraguan Electricity Company, both of which will expire in 2014. The revenues from the Momotombo project will cease at the time the concession expires. The term of the concession may be extended for an additional period of 15 years or less with both parties' consent. There is also a provision for possible extension of the power purchase agreement, subject to both parties' consent. In 2001, Nicaraguan Electricity Company assigned the power purchase agreement to Empresa Distribuidora de Electricidad del Norte (DISNORTE) and Empresa Distribuidora de Electricidad del Sur (DISSUR), two corporations which own the power-distribution rights in Nicaragua. Under the power purchase agreement, Ormat Momotombo Power Company, our wholly owned project subsidiary that operates the project, is required to use all available geothermal steam extracted by the plant in order to generate electricity. Our project subsidiary cannot sell the electricity to any person or organization other than the power purchasers. The power purchasers are required to pay for the

electricity each month according to the amount of electricity that our project subsidiary sold or is deemed to have sold. Our project subsidiary may sell electricity to third parties if the power purchase agreement is terminated prior to the end of its term for reasons attributable to the power purchasers. However, if the price at which the electricity is sold to the third party is higher than the price fixed in the power purchase agreement, the power purchasers are entitled to 85% of such difference.

Power Purchase Agreement for the Olkaria III Project

The Olkaria III project in Kenya sells electricity to the Kenya Power & Lighting Co. Ltd. Under the power purchase agreement, the purchaser is obligated to pay the project a capacity fee and an energy fee. The term of the power purchase agreement expires in 2020 or, if Phase II of the project is constructed, 20 years from the date on which such Phase II commences commercial operation, and may be extended with both parties' consent on such terms as the parties may agree.

Power Purchase Agreement for the Zunil Project

The Zunil project in Guatemala sells electricity to Instituto Nacional de Electrificación. Pursuant to the power purchase agreement, which will expire in October 2019, the power purchaser is responsible for supplying the geothermal fluid to the plant. The power purchaser is obligated to purchase all the power generated by the plant's facilities, as converted from the geothermal fluid. The power purchaser is required to make both an energy payment and a capacity payment to the project, the rate of which is pre-determined under the power purchase agreement, regardless of whether or not the power purchaser is able to supply the geothermal fluid to the plant. Instituto Nacional de Electrificación has the option to receive, by way of allotment for no consideration, 3% of the issued share capital of Orzunil, the owner of the Zunil project. Upon termination of the power purchase agreement, Instituto Nacional de Electrificación will have the right of first refusal to acquire the power plant's assets at a price no lower than its market value. In the event that our project terminates the power purchase agreement, it will have the right to continue and operate the power plant and sell electricity to any other purchaser. Pursuant to the power purchase agreement, the purchaser is responsible, among other things, for building and maintaining transmission lines and maintaining and operating the geothermal reservoir.

Bureau of Land Management Geothermal Leases

Certain of our domestic project subsidiaries have entered into geothermal resources leases with the U.S. government, pursuant to which they have obtained the right to conduct their geothermal development and operations on federally-owned land. These leases are made pursuant to the Geothermal Steam Act of 1970, which we refer to as the Act, and the lessor under such leases is the U.S. government, acting through the U.S. Department of the Interior, Bureau of Land Management, which we refer to as the BLM.

Typically, BLM geothermal leases grant projects the exclusive right and privilege to drill for, extract, produce, remove, utilize, sell and dispose of geothermal steam and associated geothermal resources. The projects are also granted certain nonexclusive rights, which include, among others, the right to conduct within the leased area geological and geophysical exploration (in accordance with certain applicable regulations), as well as the right to construct and operate within the leased area power generating plants and certain other works and related structures and to use so much of the surface of the land as may be necessary or reasonably convenient for the production, utilization and processing of geothermal resources (subject to applicable laws and regulations). Additionally, projects are granted the right to reinject into the leased lands geothermal resources and condensates to the extent that such resources and condensates are not utilized and to the extent that such reinjection is necessary for geothermal operations.

The leases provide for a primary term of 10 years and so long thereafter as geothermal steam is being produced or utilized in commercial quantities, but cannot exceed a period of 40 years after the end of the primary term. However, if at the end of the such 40-year period geothermal steam is still being produced or utilized in commercial quantities and the applicable leased lands are not needed for

other purposes, the project will have a preferential right for a renewal of the lease for a second 40-year term, in accordance with such terms and conditions as the BLM deems appropriate. If actual drilling operations are commenced on the leased lands or under an approved plan or agreement on behalf of the leased lands prior to the end of the primary term and are being diligently prosecuted at the end of the primary term, the lease will be extended for 5 additional years and so long thereafter (but not more than 35 years) as geothermal steam is produced or utilized in commercial quantities. If at the end of such extended term, geothermal steam is still being produced or utilized in commercial quantities, the project will have the preferential right for a renewal for a second term. The leases also provide for extensions under certain other circumstances.

Under the terms of the BLM leases, projects are required to pay an annual rental fee (on a per acre basis), which escalates according to a schedule described therein, until production of geothermal steam in commercial quantities has commenced. After such production has commenced, the projects are required to pay royalties (on a monthly basis) on the amount or value of (1) steam, (2) by-products derived from production and (3) commercially de-mineralized water sold or utilized by the project (or reasonably susceptible to such sale or use).

Such BLM leases include certain covenants that require the projects to conduct their operations under the lease in a workmanlike manner and in accordance with all applicable laws and BLM directives and to take all mitigating actions required by the BLM to protect the surface of and the environment surrounding the land.

Additionally, certain leases contain additional requirements, some of which concern the mitigation or avoidance of disturbance of any antiquities, cultural values or threatened or endangered plants or animals, the payment of royalties for timber and the imposition of certain restriction on residential development on the leased land.

In the event of a default under any such BLM lease, or the failure to comply with any of the provisions of the Act or regulations issued under the Act or the terms or stipulations of the lease, the BLM may, 30 days after notice of default is provided to the relevant project, (1) suspend operations until the requested action is taken or (2) cancel the lease.

Private Geothermal Leases

Certain of our domestic project subsidiaries have entered into geothermal resources leases with private parties, pursuant to which they have obtained the right to conduct their geothermal development and operations on privately owned land.

Typically, the leases grant our project subsidiaries the exclusive right and privilege to drill for, produce, extract, take and remove from the leased land water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gases associated with oil), and other products produced or extracted by such project subsidiary. The project subsidiaries are also granted certain rights pertaining to the construction and operation of plants, structures and facilities on the leased land. Additionally, the project subsidiaries are granted the right to dispose of waste brine and other waste products as well as the right to reinject into the leased land water, brine, steam and gases in a well or wells for the purpose of maintaining or restoring pressure in the productive zones beneath the leased land or other land in the vicinity.

The leases provide for a term consisting of a primary term in the range of five to 30 years, depending on the lease, and so long thereafter as lease products are being produced or the project subsidiary is engaged in drilling, extraction, processing or reworking operations on the leased land.

As consideration under such leases, the project subsidiary must pay to the lessor a certain specified percentage of the value "at the well" (which is not attributable to the enhanced value of electricity generation) of all lease products produced, saved and sold on a monthly basis.

In addition, pursuant to the leases, the project subsidiary typically agrees to commence drilling, extraction or processing operations on the leased land within the primary term, and to conduct such operations with reasonable diligence until lease products have been found, extracted and processed in quantities deemed "paying quantities" by the project subsidiary, or until further operations would, in such project subsidiary's judgment, be unprofitable or impracticable, or the project subsidiary may at

any time within the primary term terminate the lease and surrender the relevant land. If the project subsidiary has not commenced any such operations on said land or on the unit area or terminated the lease within the primary term, the project subsidiary must pay to the lessor, annually in advance, a rental fee until operations are commenced on the leased land.

If the project subsidiary fails to pay any installment of royalty or rental when due and if such default continues for a period of 15 days after its receipt of written notice thereof from the lessor, then at the option of the lessor, the lease will terminate as to the portion or portions thereof as to which the project subsidiary is in default.

If the project subsidiary defaults in the performance of any obligations under the lease, other than a payment default, and if, for a period of 90 days after written notice is given to it by the lessor of such default, the project subsidiary fails to commence and thereafter diligently and in good faith take remedial measures to remedy such default, the lessor may terminate the lease.

PRINCIPAL STOCKHOLDERS

The following table shows information with respect to the beneficial ownership of our common stock as of June 30, 2004, and as adjusted to reflect the sale of common stock being offered in this offering, for:

- each person, or group of affiliated persons, known to us to own beneficially 5% or more of our outstanding common stock;
- each of our directors;
- each of our named executive officers; and
- all of our directors and executive officers as a group.

Percentage ownership before the offering is based on 32,307,692 shares of common stock outstanding as of June 30, 2004, subject to the assumptions set forth below. Percentage ownership after the offering is based on shares of common stock outstanding immediately after the closing of this offering. Beneficial ownership is determined in accordance with the rules of the SEC. Except as indicated by footnote and subject to community property laws where applicable, to our knowledge, the persons named in the table below have sole voting and investment power with respect to all shares of common stock shown as beneficially owned by them. In computing the number of shares beneficially owned by a person and the percentage ownership of that person, shares of common stock subject to options held by that person that are exercisable as of June 30, 2004, or will become exercisable within 60 days thereafter are deemed outstanding, while such shares are not deemed outstanding for purposes of computing percentage ownership of any other person.

DESCRIPTION OF CAPITAL STOCK

The following is a description of our capital stock and the material provisions of our amended and restated certificate of incorporation, amended and restated by-laws and other agreements to which we and our stockholders are parties, in each case upon the closing of this offering. The following is only a summary and is qualified by applicable law and by the provisions of the amended and restated certificate of incorporation, amended and restated by-laws and other agreements, copies of which are available as set forth under the caption entitled "Where You Can Find More Information."

General

As of June 30, 2004, 32,307,692 shares of our common stock were issued and outstanding, all of which were owned by Ormat Industries. Our amended and restated certificate of incorporation provides that our authorized capital stock will consist of an aggregate number of 200,000,000 shares of common stock, par value \$0.001 per share, and 5,000,000 shares of preferred stock, par value \$0.001 per share, of which our board of directors has designated 500,000 shares as Series A Junior Participatory Preferred Stock for issuance in connection with the exercise of our preferred share purchase rights pursuant to a rights plan which we intend to adopt. See "—Rights Plan" below. Each such outstanding share of our common stock will be validly issued, fully

paid and non-assessable. In addition, at such time, shares of our common stock will be reserved for issuance upon exercise of outstanding options.

Common Stock

Voting. The holders of our common stock are entitled to one vote for each outstanding share of common stock owned by that stockholder on every matter properly submitted to the stockholders for their vote. Stockholders are not entitled to vote cumulatively for the election of directors.

Dividend Rights. Subject to the dividend rights of the holders of any outstanding series of preferred stock, holders of our common stock are entitled to receive ratably such dividends and other distributions of cash or any other right or property as may be declared by our board of directors out of our assets or funds legally available for such dividends or distributions.

Liquidation Rights. In the event of any voluntary or involuntary liquidation, dissolution or winding up of our affairs, holders of our common stock would be entitled to share ratably in our assets that are legally available for distribution to stockholders after payment of liabilities. If we have any preferred stock outstanding at such time, holders of the preferred stock may be entitled to distribution and/or liquidation preferences. In either such case, we must pay the applicable distribution to the holders of our preferred stock before we may pay distributions to the holders of our common stock.

Conversion, Redemption and Preemptive Rights. Holders of our common stock have no conversion, redemption, preemptive, subscription or similar rights.

Preferred Stock

Our amended and restated certificate of incorporation authorizes our board of directors, subject to limitations prescribed by law, to issue up to 5,000,000 shares of preferred stock in one or more series without further stockholder approval. The board will have discretion to determine the rights, preferences, privileges and restrictions of, including, without limitation, voting rights, dividend rights, conversion rights, redemption privileges and liquidation preferences of, and to fix the number of shares of, each series of our preferred stock.

Our board of directors has designated 500,000 shares of our preferred stock as Series A Junior Participatory Preferred Stock for issuance in connection with the exercise of our preferred share purchase rights pursuant to a rights plan which we intend to adopt. Although our board of directors has no intention at the present time of doing so, it could authorize the issuance of shares of preferred stock with terms and conditions that could have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for holders of our common stock or otherwise be in their best interest. See "—Rights Plan" below.

Limitations on Directors' Liability

Our amended and restated certificate of incorporation and by-laws contain provisions indemnifying our directors and officers to the fullest extent permitted by law. Prior to the completion of this offering, we intend to enter into indemnification agreements with each of our directors which may, in some cases, be broader than the specific indemnification provisions contained under Delaware law.

In addition, as permitted by Delaware law, our amended and restated certificate of incorporation provides that no director will be liable to us or our stockholders for monetary damages for breach of fiduciary duty as a director. The effect of this provision is to restrict our rights and the rights of our stockholders in derivative suits to recover monetary damages against a director for breach of fiduciary duty as a director, except that a director will be personally liable for:

- any breach of his or her duty of loyalty to us or our stockholders;
- acts or omissions not in good faith which involve intentional misconduct or a knowing violation of law;
-

the payment of dividends or the redemption or purchase of stock in violation of Delaware law; or

- any transaction from which the director derived an improper personal benefit.

This provision does not affect a director's liability under the federal securities laws.

To the extent that our directors, officers and controlling persons are indemnified under the provisions contained in our amended and restated certificate of incorporation, Delaware law or contractual arrangements against liabilities arising under the Securities Act, we have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

Provisions of Our Amended and Restated Certificate of Incorporation and Amended and Restated By-laws and Delaware Law that May Have an Anti-Takeover Effect

Amended and Restated Certificate of Incorporation and Amended and Restated By-laws

Certain provisions in our amended and restated certificate of incorporation and amended and restated by-laws summarized below may be deemed to have an anti-takeover effect and may delay, deter or prevent a tender offer or takeover attempt that a stockholder might consider to be in its best interests, including attempts that might result in a premium being paid over the market price for the shares held by stockholders.

Classified Board of Directors . Our amended and restated certificate of incorporation provides that the number of directors is fixed by our board of directors. Other than directors elected by the holders of any series of preferred stock or any other series or class of stock (except common stock), our directors are divided into three classes. Each class consists as nearly as possible of an equal number of directors. Currently, the terms of office for the three classes of directors expire, respectively, at our annual meetings in 2005, 2006 and 2007. The term of the successors of each class of directors expires three years from the year of election. Directors elected by stockholders at an annual meeting of stockholders will be elected by a plurality of all votes cast.

Special Meetings . Our amended and restated certificate of incorporation and amended and restated by-laws provide that a special meeting of stockholders may be called only by the Chairman of the Board, the President, our board of directors, the holders of not less than a majority of all of the outstanding shares of the corporation entitled to vote at the meeting or, at any time that Ormat Industries (or a certain transferee of Ormat Industries) owns at least 20% of the then outstanding shares of our common stock, by Ormat Industries (or such transferee). Stockholders are not permitted to call, or to require that the board of directors call, a special meeting of stockholders. Moreover, the business permitted to be conducted at any special meeting of stockholders is limited to the business

brought before the meeting pursuant to the notice of the meeting given by us. Our amended and restated by-laws establish an advance notice procedure for stockholders to nominate candidates for election as directors or to bring other business before meetings of our stockholders.

The foregoing proposed provisions of our amended and restated certificate of incorporation and amended and restated by-laws could discourage potential acquisition proposals and could delay or prevent a change in control. These provisions are intended to enhance the likelihood of continuity and stability in the composition of the board of directors and in the policies formulated by the board of directors and to discourage certain types of transactions that may involve an actual or threatened change of control. These provisions are designed to reduce our vulnerability to an unsolicited acquisition proposal. The provisions also are intended to discourage certain tactics that may be used in proxy fights. However, such provisions could have the effect of discouraging others from making tender offers for our shares and, as a consequence, they also may inhibit fluctuations in the market price of our common stock that could result from actual or rumored takeover attempts. Such provisions also may have the effect of preventing changes in our management.

Rights Plan

Prior to the completion of this offering, we intend to enter into a rights agreement. The material terms of such rights agreement and the preferred share purchase rights will be determined and disclosed upon adoption of the rights plan prior to the completion of this offering.

Delaware Takeover Statute

We are subject to Section 203 of the Delaware General Corporation Law, which, subject to certain exceptions, prohibits a Delaware corporation from engaging in any "business combination" (as defined below) with any "interested stockholder" (as defined below) for a period of three years following the date that such stockholder became an interested stockholder, unless: (1) prior to such date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder; (2) on consummation of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, excluding for purposes of determining the number of shares outstanding those shares owned (x) by persons who are directors and also officers and (y) by employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or (3) on or subsequent to such date, the business combination is approved by the board of directors and authorized at an annual or special meeting of stockholders, and not by written consent, by the affirmative vote of at least 66 2/3% of the outstanding voting stock that is not owned by the interested stockholder.

Section 203 of the Delaware General Corporation Law defines "business combination" to include: (1) any merger or consolidation involving the corporation and the interested stockholder; (2) any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested stockholder; (3) subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder; (4) any transaction involving the corporation that has the effect of increasing the proportionate share of the stock of any class or series of the corporation beneficially owned by the interested stockholder; or (5) the receipt by the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation. In general, Section 203 defines an "interested stockholder" as any entity or person beneficially owning 15% or more of the outstanding voting stock of the corporation and any entity or person affiliated with or controlling or controlled by such entity or person.

The New York Stock Exchange

We will apply to list our common stock on the New York Stock Exchange under the symbol "ORA".

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is _____.

SHARES ELIGIBLE FOR FUTURE SALE

Prior to this offering, there has been no public market for our common stock, and a significant public market for our common stock may not develop or be sustained after this offering. Future sales of significant amounts of our common stock, including shares of our outstanding common stock and shares of our common stock issued upon exercise of outstanding options, in the public market after this offering could adversely affect the prevailing market price of our common stock and could impair our future ability to raise capital through the sale of our equity securities.

Sale of Restricted Shares and Lock-Up Agreements

Upon the closing of this offering, we will have outstanding shares of common stock based upon our shares outstanding as of _____.

Of these shares, the _____ shares of common stock sold in this offering will be freely tradable without restriction under the Securities Act, unless purchased by affiliates of our company, as that term is defined in Rule 144 under the Securities Act.

The remaining _____ shares of common stock were issued and sold by us in private transactions, and are eligible for public sale if registered under the Securities Act or sold in accordance with Rules 144, 144(k) or 701 of the Securities Act. However, _____ of these remaining shares of common stock are held by officers, directors, and existing stockholders who are subject to lock-up agreements for a period of 180 days after the date of this prospectus under which all holders of our common stock have agreed not to sell or otherwise dispose of their shares of common stock. The representatives of the underwriters may, in their sole discretion and at any time without notice, release all or any portion of the securities subject to the lock-up agreements.

Lehman Brothers Inc., in its sole discretion, may release the shares subject to the lock-up agreements in whole or in part at anytime with or without notice. We have been advised by Lehman Brothers Inc. that, when determining whether or not to release shares from the lock-up agreements, Lehman Brothers Inc. will consider, among other factors, the stockholder's reasons for requesting the release, the number of shares for which the release is being requested and market conditions at the time. Lehman Brothers Inc. has advised us that they have no present intention to release any of the shares subject to the lock-up agreements prior to the expiration of the lock-up period.

As of the date of this prospectus, up to of the remaining shares may be eligible for sale in the public market. Beginning 180 days after the date of this prospectus, of these remaining shares will be eligible for sale in the public market, although all but shares will be subject to certain volume limitations under Rule 144.

Rule 144

In general, Rule 144 allows a stockholder (or stockholders where shares are aggregated) who has beneficially owned shares of our common stock for at least one year and who files a Form 144 with the SEC to sell within any three month period commencing 90 days after the date of this prospectus a number of those shares that does not exceed the greater of:

- 1% of the number of shares of common stock then outstanding, which will equal approximately shares immediately after this offering; or
- the average weekly trading volume of the common stock during the four calendar weeks preceding the filing of the Form 144 with respect to such sale.

Sales under Rule 144, however, are subject to specific manner of sale provisions, notice requirements, and the availability of current public information about our company. We cannot estimate the number of shares of common stock our existing stockholders will sell under Rule 144, as this will depend on the market price for our common stock, the personal circumstances of the stockholders, and other factors.

Rule 144(k)

Under Rule 144(k), in general, a stockholder who has beneficially owned shares of our common stock for at least two years and who is not deemed to have been an affiliate of our company at any

time during the immediately preceding 90 days may sell shares without complying with the manner of 98 sale provisions, notice requirements, public information requirements, or volume limitations of Rule 144. Affiliates of our company, however, must always sell pursuant to Rule 144, even after the otherwise applicable Rule 144(k) holding periods have been satisfied.

Rule 701

Rule 701 generally allows a stockholder who purchased shares of our common stock pursuant to a written compensatory plan or contract and who is not deemed to have been an affiliate of our company during the immediately preceding 90 days to sell these shares in reliance upon Rule 144, but without being required to comply with the public information, holding period, volume limitation, or notice provisions of Rule 144. Rule 701 also permits affiliates of our company to sell their Rule 701 shares under Rule 144 without complying with the holding period requirements of Rule 144. All holders of Rule 701 shares, however, are required to wait until 90 days after the date of this prospectus before selling such shares pursuant to Rule 701.

As of the date of this prospectus, no shares of our outstanding common stock had been issued in reliance on Rule 701 as a result of exercises of stock options.

Options

In addition to the shares of common stock outstanding, immediately after this offering, as of , there

were outstanding options to purchase shares of our common stock. As soon as practicable after the closing of this offering, we intend to file a registration statement on Form S-8 under the Securities Act covering shares of our common stock issued or reserved for issuance under our 2004 Incentive Compensation Plan. Accordingly, shares of our common stock registered under such registration statement will be available for sale in the open market upon exercise by the holders, subject to vesting restrictions with us, contractual lock-up restrictions, and/or market stand-off provisions applicable to each option agreement that prohibit the sale or other disposition of the shares of common stock underlying the options for a period of 180 days after the date of this prospectus without the prior written consent from us or our underwriters.

Registration Rights

At or prior to the closing of this offering, we will enter into a registration rights agreement with Ormat Industries. See "Certain Relationships and Related Transactions." We do not have any other contractual obligations to register our common stock.

UNITED STATES FEDERAL INCOME TAX CONSEQUENCES TO NON-U.S. HOLDERS

The following is a description of the material United States federal income tax consequences that may be relevant to Non-U.S. Holders, as defined below, with respect to the acquisition, ownership and disposition of our common stock. This description addresses only the United States federal income tax considerations of holders that are initial purchasers of our common stock pursuant to the offering and that will hold our common stock as capital assets. This description does not address tax considerations applicable to holders that are U.S. persons or that may be subject to special tax rules, including:

- financial institutions or insurance companies;
- real estate investment trusts, regulated investment companies or grantor trusts;
- dealers or traders in securities or currencies;
- tax-exempt entities;
- persons that received our stock as compensation for the performance of services;
- persons that will hold our stock as part of a "hedging" or "conversion" transaction or as a position in a "straddle" for United States federal income tax purposes;
- persons that have a "functional currency" other than the U.S. dollar; or
- holders that own or are deemed to own 10% or more, by voting power or value, of our stock.

Moreover, except as set forth below, this description does not address the United States federal estate and gift or alternative minimum tax consequences of the acquisition, ownership and disposition of our common stock.

This description is based on the Internal Revenue Code of 1986, as amended, which we refer to as the Code, existing, proposed and temporary United States Treasury Regulations and judicial and administrative interpretations thereof, in each case as in effect and available on the date hereof. All of the foregoing are subject to change, which change could apply retroactively and could affect the tax consequences described below.

For purposes of this description, a "Non-U.S. Holder" is a beneficial owner of our common stock that, for

United States federal income tax purposes, is not:

- a citizen or resident of the United States;
- a partnership or corporation created or organized in or under the laws of the United States or any state thereof, including the District of Columbia;
- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust if such trust validly elects to be treated as a United States person for United States federal income tax purposes or if (1) a court within the United States is able to exercise primary supervision over its administration and (2) one or more United States persons have the authority to control all of the substantial decisions of such trust.

If a partnership (or any other entity treated as a partnership for United States federal income tax purposes) holds our common stock, the tax treatment of a partner in such partnership will generally depend on the status of the partner and the activities of the partnership. Such a partner should consult its tax advisor as to its tax consequences.

You should consult your own tax advisor with respect to the United States federal, state, local and foreign tax consequences of acquiring, owning and disposing of our common stock.

Distributions

Generally, but subject to the discussions below under "Status as United States Real Property Holding Corporation" and "Backup Withholding Tax and Information Reporting Requirements," if

you are a Non-U.S. Holder, distributions of cash or property paid to you will be subject to withholding of United States federal income tax at a 30% rate or such lower rate as may be specified by an applicable United States income tax treaty. In order to obtain the benefit of any applicable United States income tax treaty, you will have to file certain forms (e.g., Form W-8BEN). Such forms generally would contain your name and address and a certification that you are eligible for the benefits of such treaty.

Except as may be otherwise provided in an applicable United States income tax treaty, if you are a Non-U.S. Holder and conduct a trade or business within the United States, you generally will be taxed at ordinary United States federal income tax rates (on a net income basis) on dividends that are effectively connected with the conduct of such trade or business and such dividends will not be subject to the withholding described above. If you are a foreign corporation, you may also be subject to a 30% "branch profits tax" unless you qualify for a lower rate under an applicable United States income tax treaty. To claim an exemption from withholding because the income is effectively connected with a United States trade or business, you must provide a properly executed Form W-8ECI (or such successor form as the Internal Revenue Service designates) prior to the payment of dividends.

Sale or Exchange of Our Common Stock

Generally, but subject to the discussions below under "Status as United States Real Property Holding Corporation" and "Backup Withholding Tax and Information Reporting Requirements," if you are a Non-U.S. Holder, you will not be subject to United States federal income or withholding tax on any gain realized on the sale or exchange of our common stock unless (1) such gain is effectively connected with your conduct of a trade or business in the United States or (2) if you are an individual, you are present in the United States for 183 days or more in the taxable year of such sale or exchange and certain other conditions are met.

Status as United States Real Property Holding Corporation

If you are a Non-U.S. Holder, under certain circumstances, gain recognized on the sale or exchange of, and certain distributions in excess of basis with respect to, our common stock would be subject to United States federal income tax, notwithstanding your lack of other connections with the United States, if we are or have been a "United States real property holding corporation" for United States federal income tax purposes at any time during the five-year period ending on the date of such sale or exchange (or distribution). We believe that we will not be classified as a United States real property holding corporation as of the date of this offering and do not expect to become a United States real property holding corporation.

Federal Estate Tax

Our common stock held by an individual at death, regardless of whether such individual is a citizen, resident or domiciliary of the United States, will be included in the individual's gross estate for United States federal estate tax purposes, subject to an applicable estate tax or other treaty, and therefore may be subject to United States federal estate tax.

Backup Withholding Tax and Information Reporting Requirements

United States backup withholding tax and information reporting requirements generally apply to certain payments to certain non-corporate holders of stock. The backup withholding tax rate is currently 28%.

If you are not a United States person, under current Treasury regulations, backup withholding will not apply to distributions on our common stock to you, provided that we have received valid certifications meeting the requirements of the Code and neither we nor the payor has actual knowledge or reason to know that you are a United States person for purposes of such backup withholding tax requirements.

If provided by a beneficial owner, the certification must give the name and address of such owner, state that such owner is not a United States person, or, in the case of an individual, that such person is

neither a citizen or resident of the United States, and must be signed by the owner under penalties of perjury. If provided by a financial institution, other than a financial institution that is a qualified intermediary, the certification must state that the financial institution has received from the beneficial owner the certificate set forth in the preceding sentence, set forth the information contained in such certificate (and include a copy of such certificate), and be signed by an authorized representative of the financial institution under penalties of perjury. Generally, the furnishing of the names of the beneficial owners of our common stock that are not United States persons and a copy of such beneficial owner's certificate by a financial institution will not be required where the financial institution is a qualified intermediary.

In the case of such payments made within the United States to a foreign simple trust, a foreign grantor trust or a foreign partnership, other than payments to a foreign simple trust, a foreign grantor trust or a foreign partnership that qualifies as a "withholding foreign trust" or a "withholding foreign partnership" within the meaning of such United States Treasury Regulations and payments to a foreign simple trust, a foreign grantor trust or a foreign partnership that are effectively connected with the conduct of a trade or business in the United States, the beneficiaries of the foreign simple trust, the persons treated as the owners of the foreign grantor trust or the partners of the foreign partnership, as the case may be, will be required to provide the certification discussed above, and the trust or partnership, as the case may be, will need to provide an appropriate intermediary certification form, in order to establish an exemption from backup withholding tax and information reporting requirements. Moreover, a payor may rely on a certification provided by a payee that is not a United States person only if such payor does not have actual knowledge or a reason to know that any information or certification stated in such certificate is incorrect.

The above description is not intended to constitute a complete analysis of all tax consequences relating to the acquisition, ownership and disposition of our common stock. You should consult your own tax advisor concerning the tax consequences of your particular situation.

UNDERWRITING

Under the underwriting agreement, which is filed as an exhibit to the registration statement relating to this prospectus, Lehman Brothers Inc. and _____, as representatives of the underwriters listed below, have severally agreed to purchase from us, on a firm commitment basis, subject only to the conditions contained in the underwriting agreement, the number of shares of common stock shown opposite each of their names below:

<u>Underwriter</u>	<u>Number of Shares</u>
Lehman Brothers Inc.	_____
Total	=====

The underwriting agreement provides that the underwriters' obligations to purchase our common stock depend on the satisfaction of the conditions contained in the underwriting agreement, which include:

- if any shares of common stock are purchased by the underwriters, then all of the shares of common stock the underwriters agreed to purchase must be purchased;
- the representations and warranties made by us to the underwriters are true;
- there is no material change in the financial markets; and
- we deliver customary closing documents to the underwriters.

Commissions and Expenses

The representatives have advised us that the underwriters propose to offer the common stock directly to the public at the public offering price presented on the cover page of this prospectus, and to selected dealers, that may include the underwriters, at the public offering price less a selling concession not in excess of \$ _____ per share. The underwriters may allow, and the selected dealers may re-allow, a concession not in excess of \$ _____ per share to brokers and dealers. After the offering, the underwriters may change the offering price and other selling terms.

The following table summarizes the underwriting discounts and commissions that we will pay. The underwriting discount is the difference between the offering price and the amount the underwriters pay to purchase the shares from us. These amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase up to an additional _____ shares. The underwriting discounts and commissions equal _____ % of the public offering price.

	<u>No Exercise</u>	<u>Full Exercise</u>
Per share	\$ _____	\$ _____
Total		

We estimate that the total expenses of the offering, excluding underwriting discounts and commissions, will be approximately _____. We have agreed to pay such expenses.

Over-Allotment Option

We have granted to the underwriters an option to purchase up to an aggregate of additional shares of common stock, exercisable to cover over-allotments, if any, at the public offering price less the underwriting discounts and commissions shown on the cover page of this prospectus. The underwriters may exercise this option at any time, and from time to time, until 30 days after the date of the underwriting agreement. To the extent the underwriters exercise this option, each underwriter will be committed, so long as the conditions of the

underwriting agreement are satisfied, to purchase a number of additional shares of common stock proportionate to that underwriter's initial commitment as indicated in the preceding table, and we will be obligated, under the over-allotment option, to sell the additional shares of common stock to the underwriters.

Lock-Up Agreements

Pursuant to lock-up agreements, we will agree not to, and each of our officers, directors and stockholders will agree not to, for period of 180 days from the date of this prospectus, directly or

136

indirectly, (1) offer for sale, sell, pledge or otherwise dispose of (or enter into any transaction or device which is designed to, or could be expected to, result in the disposition by any person at any time in the future of) any shares of common stock or securities convertible into or exchangeable for common stock (other than the stock and shares issued pursuant to employee benefit plans, qualified stock option plans or other employee compensation plans existing on the date hereof or pursuant to currently outstanding options, warrants or rights), or sell or grant options, rights or warrants with respect to any shares of common stock or securities convertible into or exchangeable for common stock (other than the grant of options pursuant to option plans existing on the date hereof), (2) enter into any swap or other derivatives transaction that transfers to another, in whole or in part, any of the economic benefits or risks of ownership of such shares of common stock, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of common stock or other securities, in cash or otherwise, in each case without the prior written consent of Lehman Brothers Inc. on behalf of the underwriters. If (1) during the last 17 days of such 180-day period we issue an earnings release or material news or a material event relating to us occurs or (2) prior to the expiration of such 180-day period, we announce that we will release earnings results during the 17-day period beginning on the last day of such 180-day period, then such 180-day period shall continue to apply until the expiration of the 17-day period beginning on the issuance of the earnings release or the occurrence of the material news or material event.

Offering Price Determination

Prior to this offering, there has been no public market for our common stock. The initial public offering price will be negotiated between the representatives and us. In determining the initial public offering price of our common stock, the representatives will consider:

- prevailing market conditions;
- estimates of our business potential and earning prospects;
- our historical performance and capital structure;
- an overall assessment of our management; and
- the consideration of these factors in relation to market valuation of companies in related businesses.

Indemnification

We have agreed to indemnify the underwriters against certain liabilities relating to the offering, including liabilities under the Securities Act, liabilities arising from breaches of the representations and warranties contained in the underwriting agreement, and to contribute to payments that the underwriters may be required to make for these liabilities.

Discretionary Shares

The underwriters have informed us that they do not intend to confirm sales to discretionary accounts that exceed 5% of the total number of shares of our common stock offered by them.

Stabilization, Short Positions and Penalty Bids

The underwriters may engage in over-allotment, stabilizing transactions, syndicate covering transactions and penalty bids or purchases for the purpose of pegging, fixing or maintaining the price of the common stock, in accordance with Regulation M under the Exchange Act:

- Over-allotment involves sales by the underwriters of shares of common stock in excess of the number of shares the underwriters are obligated to purchase, which creates a syndicate short position. The short position may be either a covered short position or a naked short position. In a covered short position, the number of shares over-allotted by the underwriters is not greater than the number of shares that they may purchase in the over-allotment option. In a

137

naked short position, the number of shares involved is greater than the number of shares in the over-allotment option. The underwriters may close out any short position by either exercising their over-allotment option, in whole or in part, or purchasing shares in the open market.

- Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum.
- Syndicate covering transactions involve purchases of the common stock in the open market after the distribution has been completed in order to cover syndicate short positions. In determining the source of shares to close out the short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the over-allotment option. If the underwriters sell more shares than could be covered by the over-allotment option, a naked short position, the position can only be closed out by buying shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there could be downward pressure on the price of the shares in the open market after pricing that could adversely affect investors who purchase in the offering.
- Penalty bids permit the representatives to reclaim a selling concession from a syndicate member when the common stock originally sold by the syndicate member is purchased in a stabilizing or syndicate covering transaction to cover syndicate short positions.

These stabilizing transactions, syndicate covering transactions and penalty bids may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of our common stock. As a result, the price of our common stock may be higher than the price that might otherwise exist in the open market. These transactions may be effected on the New York Stock Exchange or otherwise and, if commenced, may be discontinued at any time.

Neither we, nor any of the underwriters make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of our common stock. In addition, neither we, nor any of the underwriters make any representation that the underwriters will engage in these stabilizing transactions or that any transaction, once commenced, will not be discontinued without notice.

Stamp Taxes

Purchasers of the shares of our common stock offered in this prospectus may be required to pay stamp taxes and other charges under the laws and practices of the country of purchase, in addition to the offering price listed on the cover page of this prospectus. Accordingly, we urge you to consult a tax advisor with respect to whether you may be required to pay those taxes or charges, as well as any other tax consequences that may arise under the laws of the country of purchase.

Electronic Distribution

A prospectus in electronic format may be made available on Internet sites or through other online services maintained by one or more of the underwriters and/or selling group members participating in this offering, or by their affiliates. In those cases, prospective investors may view offering terms online and, depending upon the particular underwriter or selling group member, prospective investors may be allowed to place orders online. The underwriters may agree with us to allocate a specific number of shares for sale to online brokerage account holders. Any such allocation for online distributions will be made by the underwriters on the same basis as other allocations.

Other than the prospectus in electronic format, the information on any underwriter's or selling group member's web site and any information contained in any other web site maintained by an underwriter or selling group member is not part of the prospectus or the registration statement of which this prospectus forms a part, has not been approved and/or endorsed by us or any underwriter or selling group member in its capacity as underwriter or selling group member and should not be relied upon by investors.

138

Relationships

The underwriters may in the future perform investment banking and advisory services for us from time to time for which they may in the future receive customary fees and expenses. The underwriters may, from time to time, engage in transactions with or perform services for us in the ordinary course of their business.

139

VALIDITY OF COMMON STOCK

The validity of the shares of common stock offered hereby will be passed upon for us by Chadbourne & Parke LLP, New York, New York, and for the underwriters by White & Case, New York, New York. Chadbourne & Parke LLP has from time to time represented Lehman Brothers, Inc. on unrelated matters. White & Case has from time to time represented one of our subsidiaries on unrelated matters.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 (including the exhibits, schedules, and amendments to the registration statement) under the Securities Act with respect to the shares of common stock offered by this prospectus. This prospectus does not contain all the information set forth in the registration statement. For further information with respect to us and the shares of common stock to be sold in this offering, we refer you to the registration statement. Statements contained in this prospectus as to the contents of any contract, agreement or other document to which we make reference are not necessarily complete. In each instance, we refer you to the copy of such contract, agreement or other document filed as an exhibit to the registration statement, each such statement being qualified in all respects by the more complete description of the matter involved. Our World Wide Web site is located at <http://www.ormat.com>. Information contained on our company Web site is not a part of this prospectus.

Upon completion of this offering, we will become subject to the reporting and information requirements of the Securities Exchange Act of 1934, as amended, and, as a result, will file periodic and current reports, proxy statements, and other information with the SEC. You may read and copy this information at the Public Reference Room of the SEC located at 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the Public Reference Room. Copies of all or any part of the registration statement may be obtained from the SEC's offices upon payment of fees prescribed by the SEC. The SEC maintains an Internet site that contains periodic and current reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The address of the SEC's website is <http://www.sec.gov>.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholder of
Ormat Technologies, Inc.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations and comprehensive income (loss), of stockholder's equity and of cash flows present fairly, in all material respects, the financial position of Ormat Technologies, Inc. and its subsidiaries at December 31, 2002 and 2003, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2003 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 11 to the financial statements, effective January 1, 2003, the Company adopted the provisions of Statement of Financial Accounting Standards No. 143, *Accounting for Obligations Associated with the Retirement of Long-Lived Assets*.

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

1. Business and Significant Accounting Policies

Business

Ormat Technologies, Inc. ("Company"), a wholly owned subsidiary of Ormat Industries Ltd. ("Parent"), is engaged in the geothermal and recovered energy business, including supply of equipment that is manufactured by the Company and design and construction of such power plants for projects owned by the Company or for third parties. The Company owns and operates geothermal power plants in various countries, including Kenya, Nicaragua, the Philippines, Guatemala and the United States of America ("U.S."). The Company also owned coal fueled heating and electricity power plants and distribution facilities in the Republic of Kazakhstan ("Kazakhstan"), that were sold on September 16, 2002 (Note 2). The Company's equipment manufacturing operations are located in Israel.

Several of the Company's power plant facilities are listed as Qualifying Facilities (QF) under the Public Utility Regulatory Policies Act (PURPA). The related power purchase agreements for such facilities are dependent upon the Company maintaining the QF status.

Basis of Presentation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, an 85% interest in OrYunnan Geothermal Co. Ltd. ("OrYunnan"), a 79% interest in Ormat Leyte Co, Ltd. ("OLCL"), a 50% interest in Karaganda Holding Company ("KHC") prior to March 12, 2002, and a 100% interest in KHC from March 12, 2002 to September 16, 2002. All intercompany accounts and transactions are eliminated.

In November 1999, the Company, through a wholly owned subsidiary, entered into an agreement with Yunnan Province Geothermal Development Co. ("YPGD") to form OrYunnan, a limited liability joint venture, whereby the Company is to contribute, for an 85% ownership interest, \$2,550 and YPGD is to contribute, for the remaining 15% ownership interest, \$450. Pursuant to such agreement, 15% of the capital contribution was made in April 2000, and the remaining portion is to be paid within 60 days after the date on which a power purchase agreement is executed. OrYunnan is currently in the process of negotiating a power purchase agreement. OrYunnan was formed for the purpose of utilizing, for electric power generation, all of the geothermal resources of Teng Chong County of the Yunnan Province in the Republic of China.

OLCL is a limited partnership established for the purpose of developing, financing, constructing, owning, operating, and maintaining geothermal power plants in Leyte Provina, the Philippines.

The Company's consolidated balance sheets include 100% of the assets and liabilities of OrYunnan and of OLCL prior to March 31, 2004. The unrelated entity's 15% interests in OrYunnan, and 21% interest in OLCL prior to March 31, 2004, have been reflected as "Minority interest in net assets of subsidiaries" in the Company's consolidated balance sheets and the earnings therefrom have been reflected on the consolidated statements of operations and comprehensive income for all periods presented and have been reflected in "Minority interest in earnings of subsidiaries". Intercompany accounts and transactions have been eliminated in the consolidation.

The Company accounts for its interests in partnerships and companies in which it has equal to or less than a 50% ownership interest under the equity method. Under the equity method, original investments are recorded at cost and adjusted by the Company's share of undistributed earnings or losses of such companies. The Company's earnings in investments accounted for under the equity method have been reflected as "Equity in income of investees" on the Company's consolidated statements of operations and comprehensive income.

Adoption of FIN No. 46R

In January 2003, the Financial Accounting Standards Board ("FASB") issued Interpretation No. 46, *Consolidation of Variable Interest Entities, an interpretation of ARB 51* ("FIN No. 46"), and amended

on the identification of Variable Interest Entities ("VIEs") for which control is achieved through means other than ownership of a majority of the voting interest of the entity, and how to determine which company (if any), as the primary beneficiary, should consolidate the VIE. A variable interest in a VIE, by definition, is an asset, liability, equity, contractual arrangement or other economic interest that absorbs the entity's economic variability.

Effective as of March 31, 2004, the Company adopted FIN No. 46R. In connection with the adoption of FIN No. 46R, the Company concluded that OLCL, in which the Company has an 80% ownership interest, should be deconsolidated. OLCL's operating results continue to be accounted for using the consolidated method of accounting for the three month period ended March 31, 2004, and effective April 1, 2004, the Company's ownership interest in OLCL will be accounted for using the equity method of accounting. The Company's maximum exposure to loss as a result of its involvement with OLCL is estimated to be \$4.9 million, which is the Company's net investment at March 31, 2004 (unaudited).

The Company also has variable interests in certain other consolidated wholly owned VIEs that will continue to be consolidated because the Company is the primary beneficiary. Further, the Company has concluded that the Company's remaining significant equity investments do not require consolidation as they are not VIEs.

Purchase of the power generation business from the Parent

As of July 1, 2004, a wholly owned subsidiary of the Company, Ormat Systems Ltd. ("OSL"), an Israeli company, acquired from the Parent for \$11 million the power generation business which includes the manufacturing and sale of energy-related products pertaining mainly to the geothermal and recovered energy industry.

The Company considers this business to be synergistic with its ownership and operation of geothermal power plants as well as to the construction of the projects (on a turnkey basis). In addition to acquiring the tangible net assets of the power generation business, OSL has assumed the title and interest to certain related contracts and liabilities and rights under agreements with employees and consultants, and obtained a perpetual license of all intellectual property pertaining to the power generation business from the Parent. Further, in connection with binding work and product orders that the Parent had with its customers, which were transferred to OSL as part of the acquisition, OSL has agreed to pay the Parent a commission ranging from 2.5% to 5% of sales by OSL related to such work and product orders.

In connection with the acquisition, OSL and the Parent have entered into an agreement whereby OSL will provide to the Parent, for a monthly fee of \$10, services including certain corporate administrative services, including the services of executive officers. In addition, OSL has agreed to provide the Parent with services of certain skilled engineers at OSL's cost plus 10%. Such agreements may be terminated by either party after the initial term through 2009.

Also in connection with the acquisitions, OSL entered into a rental agreement with the Parent for the use of office and manufacturing facilities in Yavne, Israel, for a monthly rent of \$52, adjusted annually for the Israeli Consumer Price Index, plus tax and other costs to maintain the properties. The term of the rental agreement is for 59 months and expires in June 2009.

The Company has recorded the purchase of the power generation business at historical net book value, and has accounted for the purchase as a transfer of assets between entities under common control in a manner similar to the pooling of interests, accordingly, all prior period consolidated financial statements of the Company have been restated to include the results of operations, financial position, and cash flows of the power generation business.

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Interim financial data

The interim financial data as of March 31, 2004, and for the three months ended March 31, 2003 and 2004, is unaudited, however, in the opinion of the Company, the interim data includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the results for such interim periods. The interim amounts presented are not necessarily indicative of the results of operations of the Company for the year ending

December 31, 2004.

Cash and cash equivalents

The Company considers all highly liquid instruments, with an original maturity of three months or less, to be cash equivalents.

Restricted cash and cash equivalents

Under the terms of certain long-term debt agreements, the Company is required to maintain certain debt service reserve, cash collateral and operating fund accounts that have been classified as restricted cash and cash equivalents. Funds that will be used to satisfy obligations due during the next twelve months are classified as current restricted cash and cash equivalents, with the remainder classified as non-current restricted cash and cash equivalents. Such amounts are invested primarily in money market accounts. The Company considers all highly liquid instruments, with an original maturity of three months or less, to be cash equivalents.

Concentration of credit risk

Financial instruments which potentially subject the Company to concentration of credit risk consist principally of temporary cash investments and accounts receivable.

The Company places its temporary cash investments with high credit quality financial institutions located in the U.S. and in foreign countries. At December 31, 2002 and 2003, and March 31, 2004 (unaudited), the Company had deposits in four, six and seven, respectively, U.S. financial institutions that were federally insured up to \$100 per financial institution. At December 31, 2002 and 2003, and March 31, 2004 (unaudited), the Company's deposits in foreign countries of approximately \$9,642, \$9,927, and \$10,382, respectively, were not insured.

At December 31, 2002 and 2003, and March 31, 2004 (unaudited), accounts receivable related to operations in foreign countries amounted to approximately \$15,093, \$13,029, and \$10,198, respectively. The Company performs ongoing credit evaluations of its customers' financial condition. The Company requires the customer in Nicaragua to provide a cash security arrangement for its payment obligations. The Company has historically been able to collect on all of its receivable balances, and accordingly, no provision for doubtful accounts has been made.

As further described in Note 15, a substantial portion of the Company's revenues are earned from major power companies. Power sales from operations in foreign countries amounted to approximately 82%, 37%, 33%, 38% and 17% of total power sales during the years ended December 31, 2001, 2002, and 2003, and the three months ended March 31, 2003 and 2004 (unaudited), respectively. Five geothermal power customers accounted for 76%, 57%, 80%, and 53% of the Company's total revenues for the years ended December 31, 2002 and 2003, and the three months ended March 31, 2003 and 2004 (unaudited), respectively, and three geothermal power customers accounted for 63% of the Company's total revenues for the year ended December 31, 2001. These customers also accounted for 66%, 74% and 66% of the Company's accounts receivable as of December 31, 2002 and 2003, and March 31, 2004 (unaudited), respectively.

F-10

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Inventories

Inventories consist primarily of raw material parts and sub assemblies for power units, and are stated at the lower of cost or market value, using the moving-average cost method, which approximates the first-in first-out method, and is stated net of provision for slow-moving and obsolescence, which was not significant.

Deposits and other

Deposits and other consist primarily of performance bonds for construction projects and a long-term insurance contract.

Property, plant and equipment

Property, plant and equipment are stated at cost. All costs associated with the acquisition, development and construction incurred as part of the construction of power plants operated by the Company are capitalized. Major improvements are capitalized and repairs and maintenance costs are expensed. Power plants operated by the Company are depreciated using the straight-line method over the term of the relevant power purchase agreement. The geothermal power plants in the Philippines and Nicaragua are to be fully depreciated over the period that the plants are owned by the Company. The other assets are depreciated using the straight-line method over their estimated useful lives of three to twenty years. The cost and accumulated depreciation of items sold or retired are removed from the accounts. Any resulting gain or loss is recognized currently and is recorded in operating income.

The Company capitalizes interest costs as part of constructing power plants. Such capitalized interest is recorded as part of the asset to which it relates and is amortized over the asset's estimated useful life. Capitalized interest costs amounted to approximately \$974, \$201, and \$297 for the years ended December 31, 2001, 2002 and 2003, respectively. No amounts were capitalized during the three months ended March 31, 2003 and 2004 (unaudited).

Intangible assets

Intangible assets consist of allocated acquisition cost of power purchase agreements, that are amortized over the 15 to 20-year terms of the agreements using the straight-line method.

Deferred financing costs

Deferred financing costs are amortized over the term of the related obligation using the effective interest method. Amortization of deferred financing costs are presented as interest expense in the statement of operations. Accumulated amortization related to deferred financing costs amounted to \$0, \$576 and \$900 at December 31, 2002 and 2003 and March 31, 2004 (unaudited), respectively. Amortization expense for the years ended December 31, 2001, 2002 and 2003 and for the three months ended March 31, 2003 and 2004 (unaudited) amounted to \$0, \$0, \$576, \$142 and \$324, respectively.

Impairment of long-lived assets and long-lived assets to be disposed of

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets

F-11

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

exceed the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell. Management believes that no impairment exists for long-lived assets, however, future estimates as to the recoverability of such assets may change based on revised circumstances.

Derivative instruments

Statement of Financial Accounting Standards ("SFAS") No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted by other related accounting literature, establishes accounting and reporting standards for derivative instruments (including certain derivative instruments embedded in other contracts). SFAS No. 133 requires companies to record derivatives on their balance sheets as either assets or liabilities measured at their fair value unless exempted from derivative treatment as a normal purchase and sale. All changes in the fair value of derivatives are recognized currently in earnings unless specific hedge criteria are met, which requires that a company must formally document, designate, and assess the effectiveness of transactions that receive hedge accounting.

The Company maintains a risk management strategy that incorporates the use of interest rate swaps and interest

rate caps to minimize significant fluctuation in cash flows and/or earnings that are caused by interest rate volatility. Gain or loss on contracts that initially qualify for cash flow hedge accounting is included as a component of other comprehensive income and are subsequently reclassified into earnings when interest on the related debt is paid. Gain or loss on contracts that are not designated to qualify as a cash flow hedge is included as a component of interest expense.

The Company is subject to the provisions of SFAS No. 133 Derivative Implementation Group ("DIG") Issue No. C15 (DIG Issue No. C15), *Normal Purchases and Normal Sales Exception for Certain Option-Type Contracts and Forward Contracts in Electricity*, which expands the requirements for the normal purchase and normal sales exception to include electricity contracts entered into by a utility company when certain criteria are met. Also under DIG Issue No. C15, contracts that have a price adjustment clause based on an index that is not directly related to the electricity generated, as defined in SFAS No. 133, do not meet the requirements for the normal purchases and normal sales exception. The Company has power sales agreements that qualify as derivative instruments under DIG Issue No. C15 because they have a price adjustment clause based on an index that does not directly relate to the sources of the power used to generate the electricity. The adoption of the provisions of DIG Issue No. C15 in 2002 did not have a material impact on the Company's consolidated financial position and results of operations.

In June 2003, the FASB issued DIG Issue No. C20, *Scope Exceptions: Interpretation of the Meaning of Not Clearly and Closely Related in Paragraph 10(b) regarding Contracts with a Price Adjustment Feature*. DIG Issue No. C20 superseded DIG Issue No. C11 *Interpretation of Clearly and Closely Related in Contracts That Qualify for the Normal Purchases and Normal Sales Exception*, and specified additional circumstances in which a price adjustment feature in a derivative contract would not be an impediment to qualifying for the normal purchases and normal sales scope exception under SFAS No. 133. DIG Issue No. C20 was effective as of the first day of the fiscal quarter beginning after July 10, 2003, (i.e. October 1, 2003, for the Company). In conjunction with initially applying the implementation guidance, DIG Issue No. C20 requires contracts that did not previously qualify for the normal purchases normal sales scope exception, and do qualify for the exception under DIG Issue No. C20, to freeze the fair value of the contract as of the date of the initial application, and amortized such fair value over the remaining contract period. Upon adoption of DIG Issue No. C20, the Company elected the normal purchase and normal sales scope exception under FAS No. 133 related to its power purchase agreements. Such adoption did not have a material impact on the Company's consolidated financial position and results of operations.

F-12

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Foreign currency translation

The functional currency of all foreign entities is the reporting currency (U.S. dollars). For these entities, monetary assets and liabilities are translated at the current exchange rate, while non-monetary items are translated at historical rates. Income and expense items are translated at the average exchange rate for the year, except for depreciation, which is translated at historical rates. Translation adjustments and transaction gains or losses are included in results of operations.

The Company's functional currency of certain Kazakhstan activities was considered to be the local currency, accordingly all assets and liabilities were translated at the exchange rate as of the balance sheet date. Revenues, costs and expenses were translated at the weighted average exchange rate for the period. Translation adjustments were accumulated in a separate component of equity. Upon sale of the Kazakhstan business (Note 2), the accumulated foreign currency translation losses were eliminated.

Revenue and cost of revenues

Revenues are primarily related to (i) sale of electricity from geothermal power plants owned and operated by the Company; and (ii) geothermal and recovered energy power plant equipment engineering, sale, construction and installation and operating services.

Revenues related to the sale of electricity from geothermal power plants and capacity payments are recorded

based upon output delivered and capacity provided at rates specified under relevant contract terms. Revenues from engineering, operating services, and parts and product sales are recorded upon providing the service or delivery of the products and parts. Revenue from the construction of geothermal and recovered energy power plant equipment on behalf of others is recognized on the percentage completion method. Revenue is based on the percentage relationship that incurred costs bear to total estimated costs. Costs include direct material, labor, and indirect costs. Selling, general, and administrative costs are charged to expense as incurred. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. Changes in job performance, job conditions, and estimated profitability, including those arising from contract penalty provisions and final contract settlements, may result in revisions to costs and income and are recognized in the period in which the revisions are determined.

Warranty on products sold

The Company generally provides a one-year warranty against defects in workmanship and materials related to the sale of products for electricity generation. A provision for warranty reserve is recorded currently for the estimated costs that may be incurred under its warranty. Such reserve is estimated based on past experience, which have historically been immaterial.

Research and development

Research and development costs incurred by OSL, a wholly owned Israeli subsidiary, for the development of existing and new geothermal, recovered energy, and remote power technologies, are expensed as incurred. Grants received from the Office of the Chief Scientist ("OCS") of the Israeli Government are offset against the related research and development expenses. Such grants amounted to \$1,030, \$531 and \$142 during the years ended December 31, 2001, 2002, and 2003, respectively. No grants were received during the three months ended March 31, 2003 and 2004 (unaudited). During 2003, OSL discontinued requesting any further grants from OCS.

Advertising expense

Advertising costs are expensed as incurred and totaled \$118, \$72, \$58, \$11, and \$25 for the years ended December 31, 2001, 2002, and 2003, and the three months ended March 31, 2003 and 2004 (unaudited), respectively.

F-13

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Income taxes

Income taxes are accounted for using an asset and liability approach, which requires the recognition of taxes payable or refundable for the current year and deferred tax assets and liabilities for the future tax consequences of events that have been recognized in the Company's financial statements or tax returns. The measurement of current and deferred tax assets and liabilities are based on provisions of the enacted tax law; the effects of future changes in tax laws or rates are not anticipated. The Company accounts for investment tax credits as a reduction to income taxes in the year in which the credit arises. The measurement of deferred tax assets is reduced, if necessary, by the amount of any tax benefits that, based on available evidence, are not expected to be realized.

Income (loss) per share

Basic income (loss) per share is computed by dividing income (loss) available to common shareholders by the weighted average number of common shares outstanding for the period. The Company does not have any equity instruments that are dilutive. The stock options granted to employees of the Company in the Parent's stock are not dilutive to the Company's earnings per share.

Stock-Based compensation

The Company accounts for stock-based compensation based on the provisions of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* ("APB 25"), and FASB Interpretation No. 44,

Accounting for Certain Transactions Involving Stock Compensation, and other related interpretations which states that no compensation expense is recorded for stock options or other stock-based awards to employees that are granted with an exercise price equal to or above the estimated fair value per share of common stock on the grant date. In the event that stock options are granted at a price lower than the fair market value at that date, the difference between the fair market value of the common stock and the exercise price of the stock options is recorded as unearned compensation. Unearned compensation is amortized to compensation expense over the vesting period applicable to the stock option. The Company has adopted the disclosure requirements of SFAS No. 123, *Accounting for Stock-Based Compensation* ("SFAS No. 123"), as it relates to stock options granted to employees, which requires proforma net income be disclosed based on the fair value of the options granted at the date of the grant.

The Company calculated the fair value of each option on the date of grant using the Black-Scholes option pricing model using the following assumptions. There were no options granted during the three months ended March 31, 2004 (unaudited):

	Year Ended December 31,		
	2001	2002	2003
Risk-free interest rates	4.8%	4.7%	4.7%
Expected lives (in years)	5	5	5
Dividend yield	0%	0%	0%
Expected volatility	44%	37%	31%

F-14

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Had compensation cost for the options granted to employees of the Company been determined based on the fair value method prescribed by SFAS No. 123, the Company's proforma net income (loss) and earnings (loss) per share would have been as follows:

	Year Ended December 31,			Three Months Ended March 31,	
	2001	2002	2003	2003	2004
				(unaudited)	
Net income (loss):					
As reported	\$ (6,413)	\$ (1,044)	\$ 15,454	\$ 1,782	\$ 2,737
Add: Total stock-based employee compensation expense included in reported net income, net of tax	—	24	24	—	6
Deduct: Total stock-based employee compensation expense determined under fair value based method, net of tax	—	(94)	(175)	—	—
Pro forma net income (loss)	<u>\$ (6,413)</u>	<u>\$ (1,114)</u>	<u>\$ 15,303</u>	<u>\$ 1,782</u>	<u>\$ 2,743</u>
Basic and diluted net income (loss) per share:					
As reported	\$ (0.21)	\$ (0.03)	\$ 0.50	\$ 0.05	\$ 0.09
Pro forma	\$ (0.21)	\$ (0.03)	\$ 0.50	\$ 0.05	\$ 0.09

Fair value of financial instruments

The carrying amount of cash and cash equivalents approximates fair value because of the short maturity of those

instruments. The fair value of long-term debt is estimated based on the current borrowing rates for similar issues, which approximates carrying amount.

Accounting estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of such financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

New accounting pronouncements

In April 2003, the FASB issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. SFAS No. 149 amends and clarifies the accounting and reporting for derivative instruments, including certain derivatives embedded in other contracts, and hedging activities under SFAS No. 133. The amendments in SFAS No. 149 require that contracts with comparable characteristics be accounted for similarly. SFAS No. 149 clarifies the circumstances under which a contract with an initial net investment meets the characteristics of a derivative according to SFAS No. 133 and clarifies when a derivative contains a financing component that warrants special reporting in the statement of cash flows. The requirements of SFAS No. 149 are effective for contracts entered into or modified after June 30, 2003, and for hedging relationships designated after June 30, 2003. The Company adopted the provisions of SFAS No. 149 effective July 1, 2003, which did not have a material impact on its consolidated results of operations and financial position as of December 31, 2003.

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. SFAS No. 150 establishes standards for how an issuer

F-15

Ormat Technologies, Inc. and Subsidiaries **Notes to Consolidated Financial Statements** **(dollars in thousands, except per share amounts)**

classifies and measures in its statement of financial position certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability because that financial instrument embodies an obligation of the issuer. The requirements of SFAS No. 150 are effective for financial instruments entered into or modified after May 31, 2003, effective the first interim period beginning after June 15, 2003. For financial instruments created prior to the issuance date of SFAS No. 150, transition shall be achieved by reporting the cumulative effect of a change in accounting principle. The Company adopted the provisions of SFAS No. 150 effective July 1, 2003, which did not have a material impact on its consolidated results of operations and financial position as of December 31, 2003.

In May 2003, the Emerging Issues Task Force ("EITF") reached consensus in EITF Issue No. 01-08, *Determining Whether an Arrangement Contains a Lease*, to clarify the requirements of identifying whether an arrangement should be accounted for as a lease at its inception. The guidance in the consensus is designed to broaden the scope of arrangements, such as power purchase agreements, accounted for as leases. EITF Issue No. 01-08 requires both parties to an arrangement to determine whether a service contract or similar arrangement is, or includes, a lease within the scope of SFAS No. 13, *Accounting for Leases*. The consensus is being applied prospectively to arrangements agreed to, modified, or acquired in business combination on or after July 1, 2003. The adoption of EITF No. 01-08 did not have a material effect to the Company's financial position or results of operations.

2. Business Acquisitions and Sale

Karaganda Holding Company ("KHC")

KHC was established for the purpose of generating power and selling and distributing electricity and heating power in Kazakhstan. Prior to March 12, 2002, the Company had a 50% ownership interest in KHC. Effective March 12, 2002, the Company purchased the remaining 50% interest in KHC for \$500. Such transaction was accounted for using the purchase method, and the allocation of the \$500 purchase price was as follows:

Cash and cash equivalents	\$ 2,541
Accounts receivable assumed	6,988
Property, plant and equipment	9,089
Other assets assumed	3,056
Accounts payable and accrued liabilities assumed	(9,747)
Long-term debt assumed	(10,632)
Deferred tax liabilities assumed	(795)
Total purchase price allocation	<u>\$ 500</u>

On September 16, 2002, the Company sold all of its ownership interest in KHC to a third party for approximately \$4.1 million, less \$184 of costs related to the sale. The Company recognized a loss on the sale of this subsidiary equal to approximately \$6.4 million during 2002, in addition to the operational losses incurred prior to such sale. The net assets of KHC on the date of the sale were as follows:

F-16

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Accounts receivable	\$ 12,718
Inventory, prepaid expenses and other	5,035
Property, plant and equipment	27,061
Accounts payable and accrued liabilities	(13,966)
Long-term debt	(19,988)
Deferred tax liabilities	(1,634)
Accumulated foreign currency translation adjustments	1,184
Net assets	<u>\$ 10,410</u>

The sale of KHC resulted in the Company discontinuing its operating activities in Kazakhstan. The net results of operations of the discontinued activities in Kazakhstan prior to September 16, 2002 are shown in the statement of operations as "Loss from discontinued activities in Kazakhstan" for the year ended December 31, 2001 and 2002.

The Ormesa Project

In April 2002, the Company acquired 100% of the equity interests in the combined 52-megawatt ("MW") generating capacity of the Ormesa Project, located in Imperial Valley, Southern California, to expand its geothermal power plant operations. The Ormesa Project consists of six power plants and was owned by several unrelated companies. The Company acquired 100% interests in four of the entities and acquired the assets of a fifth entity. These entities and assets were merged into Ormesa, LLC ("Ormesa") in 2002. The Company paid approximately \$41.7 million for the ownership of the Ormesa Project, of which approximately \$35.7 million and \$6 million has been allocated to property, plant and equipment and intangible assets, respectively. The acquisition was accounted for as a purchase and the acquired assets are being depreciated over their estimated useful lives of five to fifteen years.

The Steamboat Projects

On June 30, 2003, the Company acquired from two groups of unrelated sellers, a 100% interest in Steamboat Geothermal LLC ("SG"), which owns geothermal power plants ("Steamboat 1/1A") in Nevada. The purchase price of \$1,215 was paid in cash, of which, \$2,138 has been recorded as property, plant and equipment, less assumption of liabilities of \$923. The acquisition has been accounted for as a purchase and the acquired assets are being depreciated over their estimated useful lives of three to fifteen years.

On February 11, 2004, the Company acquired 100% of the outstanding shares of capital stock of Steamboat Development Corp. ("SDC"), and certain real property ("Meyberg Property") from an unrelated party. SDC owned certain leasehold interests as a lessee in the two Steamboat 2/3 geothermal power plants and certain related geothermal leases. On February 13, 2004, the Company acquired all of the beneficial rights, title, and interest in the Steamboat 2/3 geothermal power plants from the lessor. The Company acquired SDC and the Meyberg Property to increase its geothermal power plant operations in the United States. The Company acquired the lessee and lessor positions of the Steamboat 2/3 geothermal power plants for a combined purchase price of approximately \$82 million, plus transaction cost of approximately \$0.8 million. The results of SDC's operations have been included in the consolidated financial statements since February 11, 2004.

The acquisition of the Steamboat 2/3 power plants and the Meyberg Property have been accounted for under the purchase method of accounting and the depreciable acquired assets and intangibles, are being depreciated over their estimated useful lives of approximately 19 years. The purchase price of the lessee and lessor position has been allocated based on independent valuation and management's estimates as follows (unaudited):

F-17

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Current assets	\$ 1,944
Property, plant and equipment	78,719
Intangibles (power purchase agreement)	4,499
Accounts payable and other liabilities assumed	<u>(2,395)</u>
Net assets acquired	<u>\$ 82,767</u>

The Heber and Mammoth Projects

On December 18, 2003, the Company purchased certain geothermal assets from Covanta Energy Corporation ("CEC"), an unrelated entity for a total purchase price of \$215 million, plus transaction costs of approximately \$3.2 million. As further discussed in Note 10, the Company entered into a loan agreement and borrowed \$154.5 million from Beal Bank, all of which is collateralized by the acquired assets described below, except for the assets related to the Company's 50% ownership interest in Mammoth-Pacific, L.P. ("Mammoth").

The assets purchased include (i) a 100% ownership in Heber Geothermal Company, which owns a 38 MW geothermal power plant ("Heber 1") located near Heber, California, (ii) a 100% ownership in Second Imperial Geothermal Company ("SIGC"), that has rights to the lessee position of a 38 MW geothermal power plant ("Heber 2"), adjacent to the Heber 1 plant, (iii) a 100% ownership in Heber Field Company, that has the rights to the geothermal resources used by Heber 1 and Heber 2, and (iv) 50% ownership interest in Mammoth, that owns and operates three geothermal plants, with a combined generating capacity of 26 MW located near the city of Mammoth, California.

In addition, the Company acquired all of the beneficial rights, title and interest in the Heber 2 geothermal power plant from the lessor for a purchase price of approximately \$38.5 million.

The SG and Heber and Mammoth projects asset acquisitions have been accounted for under the purchase method of accounting and the acquired assets and intangibles are being depreciated over their estimated useful lives of three to 20 years. The purchase price has been allocated based on independent valuation and management's estimates as follows:

	SG	Projects	Total
Cash and cash equivalents	\$ —	\$ 195	\$ 195
Restricted cash	—	5,959	5,959
Accounts receivable assumed	—	7,155	7,155
Property, plant and equipment	2,138	184,585	186,723
Intangibles (power purchase agreement)	—	25,273	25,273
Investment in Mammoth	—	38,632	38,632
Other assets assumed	—	270	270
Accounts payable and other liabilities assumed	(923)	(2,559)	(3,482)
Asset retirement obligation	—	(2,701)	(2,701)
	<u>—</u>	<u>(2,701)</u>	<u>(2,701)</u>
Total purchase price allocation	<u>\$ 1,215</u>	<u>\$ 256,809</u>	<u>\$ 258,024</u>

The following unaudited pro forma financial information for the years ended December 31, 2002 and 2003, assumes the Heber and Mammoth projects acquisition occurred as of the beginning of the respective periods, after giving effect to certain adjustments, including the amortization of intangible assets, interest expense on acquisition debt, depreciation based on the adjustments to the fair market value of the property, plant and equipment acquired, and related income tax effects. The pro forma results have been prepared for comparative purposes only and are not necessarily indicative of the

F-18

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

results of operations that may occur in the future or that would have occurred had the acquisition of the Heber and Mammoth projects been affected on the dates indicated.

	Year Ended December 31,	
	2002	2003
	(unaudited)	
Revenues	\$ 150,707	\$ 185,571
Income before cumulative effect of accounting change	10,684	42,246
Net income	10,684	40,381
Basic and diluted income per share	\$ 0.35	\$ 1.31

3. Cost and Estimated Earnings on Uncompleted Contracts

	December 31,		March 31,
	2002	2003	2004
	(unaudited)		
Costs and estimated earnings incurred on uncompleted contracts	\$ 7,622	\$ 12,493	\$ 24,454
Less billings to date	(10,775)	(18,414)	(26,544)
Total	<u>\$ (3,153)</u>	<u>\$ (5,921)</u>	<u>\$ (2,090)</u>

These amounts are included in the accompanying balance sheets under the following captions:

	December 31,		March 31,
	2002	2003	2004
			(unaudited)
Costs and estimated earnings in excess of billings on uncompleted contracts	\$ —	\$ 1,922	\$ 4,211
Billings in excess of costs and estimated earnings on uncompleted contracts	(3,153)	(7,843)	(6,301)
Total	<u>\$ (3,153)</u>	<u>\$ (5,921)</u>	<u>\$ (2,090)</u>

The completion costs of the Company's construction contracts are subject to estimation. Due to uncertainties inherent in the estimation process, it is reasonably possible that estimated contract earnings will be further revised in the near term.

4. Inventories

Inventories consist of the following:

	December 31,		March 31,
	2002	2003	2004
			(unaudited)
Raw materials and purchased parts for assembly	\$ 3,090	\$ 2,181	\$ 3,550
Self-manufactured assembly parts and finished products	2,858	1,531	735
Total	<u>\$ 5,948</u>	<u>\$ 3,712</u>	<u>\$ 4,285</u>

F-19

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

5. Unconsolidated Investments

Unconsolidated investments in power plant projects consist of the following:

	December 31,		March 31,
	2002	2003	2004
			(unaudited)
Orzunil:			
Investment	\$ 2,303	\$ 2,722	\$ 2,881
Advances	6,060	5,266	5,048
	<u>8,363</u>	<u>7,988</u>	<u>7,929</u>
Mammoth	—	38,772	39,400
OLCL	—	—	4,881
Total	<u>\$ 8,363</u>	<u>\$ 46,760</u>	<u>\$ 52,210</u>

The Zunil Project

The Company has a 21% ownership interest in Orzunil I de Electricidad, Limitada ("Orzunil"), a limited responsibility company incorporated in Guatemala and established for the purpose of the generation and co-generation of power from a geothermal power plant in the Province of Quetzaltenango in Guatemala. The Company operates and maintains the geothermal power plant and the power purchaser supplies geothermal fluid to the power plant. The Company's 21% ownership interest in Orzunil is accounted for under the equity method of accounting as the Company has the ability to exercise significant influence, but not control, over Orzunil.

Notes receivable for cash advances to Orzunil consist of the following:

	<u>December 31,</u>		<u>March 31,</u>	<u>Interest</u>	<u>Maturity</u>
	<u>2002</u>	<u>2003</u>	<u>2004</u>		
			(unaudited)	Rate	Date
Subordinated	\$ 4,499	\$ 4,207	\$ 4,122	Libor +4%	11/15/2011
Junior subordinated	1,561	1,059	926	0%	see below
	<u>\$ 6,060</u>	<u>\$ 5,266</u>	<u>\$ 5,048</u>		

All available cash after the debt service under the Subordinated Loan is used to repay the Junior Subordinated Loan. Interest income received from these loans amounted to approximately \$546, \$296, \$270, and \$56 during the years ended December 31, 2001, 2002 and 2003, and the three months ended March 31, 2004 (unaudited), respectively.

The Company's equity in income of Orzunil was not significant for each of the periods presented in the accompanying financial statements.

The Mammoth Project

As discussed in Note 2, on December 18, 2003, the Company acquired a 50% interest in the Mammoth Project, which is comprised of three geothermal power plants. The purchase price was less than the underlying net equity of Mammoth by approximately \$9.5 million. As such, the basis difference will be amortized over the remaining useful life of the property, plant and equipment and the power purchase agreements, which range from 12 to 17 years. Effective December 18, 2003, the Company operates and maintains the geothermal power plants under an O&M agreement. The Company's 50% ownership interest in Mammoth is accounted for under the equity method of accounting as the Company has the ability to exercise significant influence, but not control, over Mammoth.

F-20

Ormat Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

(dollars in thousands, except per share amounts)

The condensed financial position and results of operations of Mammoth are summarized below:

	<u>December 31,</u>	<u>March 31,</u>
	<u>2003</u>	<u>2004</u>
		(unaudited)
Condensed balance sheets:		
Current assets	\$ 11,182	\$ 13,191
Non-current assets	88,918	87,652
Current liabilities	608	369
Non-current liabilities	3,680	3,704
Stockholders' equity	95,812	96,770

	Period from December 18, 2003 to December 31, 2003	Three Months Ended March 31, 2004 (unaudited)
Condensed statements of operations:		
Net sales	\$ 672	\$ 3,892
Gross margin	252	1,013
Net income	246	958
Company's equity in income of Mammoth:		
50% of Mammoth net income	\$ 123	\$ 479
Plus amortization of the equity	18	148
	<u>\$ 141</u>	<u>\$ 627</u>

The Leyte Project

The Company holds an 80% interest in OLCL (which owns the Leyte Project), however, as further discussed in Note 1, upon the adoption of FIN No. 46R, the balance sheet of OLCL was deconsolidated as of March 31, 2004, and the income and cash flow statements will be deconsolidated effective April 1, 2004.

The condensed financial position of OLCL at March 31, 2004, is summarized below (unaudited):

Condensed balance sheets:	
Current assets	\$ 7,528
Non-current assets	21,509
Current liabilities	5,754
Non-current liabilities	12,699
Stockholders' equity	10,584

OLCL's operating results for all periods prior to March 31, 2004 have been accounted for on the consolidated method of accounting, and effective April 1, 2004, the Company's ownership interest in OLCL will be accounted for using the equity method of accounting.

Office equipment	2,151	2,218	2,288
Automobiles	1,003	1,221	1,238
Geothermal power plants, including geothermal wells:			
United States of America	71,094	269,108	340,429
Foreign countries	111,212	113,177	64,037
Asset retirement cost	—	5,316	6,257
	<u>196,482</u>	<u>403,709</u>	<u>435,431</u>
Less accumulated depreciation	<u>(44,140)</u>	<u>(59,694)</u>	<u>(36,801)</u>
	<u>\$ 152,342</u>	<u>\$ 344,015</u>	<u>\$ 398,630</u>

U.S. operations:

The net book value of the property, plant and equipment, including construction in progress, located in the United States is approximately \$67,640, \$274,465 and \$387,820, as of December 31, 2002 and 2003, and March 31, 2004 (unaudited), respectively.

Foreign operations:

In 1996, OLCL entered into a Build, Operate, and Transfer ("BOT") agreement with PNOC-Energy Development Corporation (PNOC) in connection with the geothermal power plants located in Leyte, Philippines. The BOT agreement calls for the Company to design, construct, own, and operate geothermal electricity generating plants, utilizing the geothermal resources of the Leyte Geothermal Power Optimization Project Area. During 1997, the power plants started commercial operations and began selling power to PNOC under a 10 year power purchase agreement (tolling arrangement). The Company owns the plants for a ten-year period ending September 2007, at which time they will be transferred to PNOC for no further consideration. As such, the Company's cost is being depreciated over the 10 year period. The net book value of the assets related to the geothermal power plants located in the Philippines amounted to approximately \$22,078 and \$17,433, at December 31, 2002 and 2003. As further discussed in Note 1, the Company deconsolidated the balance sheet of OLCL as of March 31, 2004.

During 1998, the Company entered into a power purchase agreement with Kenya Power and Lighting Company Limited ("KPLC"). Under the agreement, the Company will design, construct and operate geothermal power plants in Kenya in several phases. Upon the completion of construction of each phase, KPLC is committed to purchase the electricity generated by the power plants for a minimum of 20 years under the terms of the power purchase agreement. The first phase has been completed and the net book value of the assets related to the generation power plant and the related wells amounted to approximately \$33,269, \$32,722 and \$32,320 at December 31, 2002 and 2003, and March 31, 2004 (unaudited), respectively. The Company is currently in discussions with the Kenyan government and KPLC regarding, among other things, the construction of Phase II of the Olkaria III project in Kenya and the provision of certain collateral and government support. The Company must notify KPLC, by

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

April 17, 2005, whether the Company will proceed to construct Phase II of the Olkaria III project and, if the company notifies KPLC that the Company will not proceed with such construction, then the portion of the current power purchase agreement applicable to Phase II of the Olkaria III project will be terminated (but the current portion applicable to Phase I will be unaffected). If the Company fails to provide such notification the Company will be required to construct Phase II and reach commercial operations by May 31, 2007 in order to avoid the application of financial penalties, or at the latest by April 17, 2008 in order to avoid termination of the entire power purchase agreement. As of December 31, 2002 and 2003, and March 31, 2004 (unaudited), the Company had incurred approximately \$22,913, \$22,189 and \$22,198, respectively, (included in construction-in-

process) in connection with construction of Phase II of the power plant, which is required to be completed no later than 2007. Management believes that the discussions will be successful and the project will be completed in the required timeframe.

In June 1999, the Company entered into an agreement with Nicaraguan Electricity Company ("NEC") a Nicaraguan power utility, whereby the Company will rehabilitate existing wells, drill new wells, and operate the geothermal facilities. The Company owns the plants for a fifteen-year period ending in 2014, at which time they will be transferred to NEC at no cost. The Company sells the power from the facilities to two power companies who are assignees of NEC at the agreed upon price and terms of the "take or pay" power purchase agreement. The net book value of the assets related to the constructed plant and wells and rehabilitated existing wells amounted to approximately \$27,567, \$26,087 and \$25,435 at December 31, 2002 and 2003, and March 31, 2004 (unaudited), respectively. Additionally, as of December 31, 2002 and 2003, and March 31, 2004 (unaudited), the Company has incurred approximately \$1,506, \$1,103 and \$1,153, respectively, (included in construction-in-process) to drill an additional well.

The Company is engaged in the construction of several geothermal power plants in other foreign countries. At December 31, 2002 and 2003, and March 31, 2004 (unaudited), such projects were in the early stages of construction and the related costs totaling approximately \$2,260, \$3,588 and \$4,443, respectively, have been included as construction-in-process.

7. Intangible assets

Intangible assets consist of power purchase agreements amounting to \$7,256, \$32,005 and \$35,985, net of accumulated amortization of \$402, \$926 and \$1,446 as of December 31, 2002, 2003 and March 31, 2004 (unaudited), respectively. Amortization expense for the years ended December 31, 2001, 2002 and 2003, and for the three months ended March 31, 2003 and 2004 (unaudited) amount to \$40, \$362, \$524, \$120, and \$520, respectively.

Estimated future amortization expense for the intangible assets as of December 31, 2003 is as follows:

Year ending December 31:	
2004	\$ 1,743
2005	1,743
2006	1,743
2007	1,743
2008	1,743
Thereafter	23,290
Total	<u>\$ 32,005</u>

Other	2,874	3,593	2,988
Total	<u>\$ 18,650</u>	<u>\$ 27,479</u>	<u>\$ 36,236</u>

9. Short-term debt

Line of credit

In July 2002, the Company consolidated an existing line of credit into a new line of credit for \$55,000, all of which was outstanding as of December 31, 2002. During 2003, the line of credit was repaid in full and expired on June 30, 2004.

Bridge loan

During 2002, the Company entered into a \$40,000 bridge loan agreement ("Bridge Loan") with an unrelated party, of which \$10,000 was outstanding at December 31, 2002. During 2003, the Bridge Loan was amended and reclassified to long-term debt (Note 10).

Eximbank Credit Agreement (Term Loan)

In connection with the construction of four geothermal power generation plants, with a total capacity of 49MW in Leyte, Philippines, the Company obtained a term loan ("Term Loan") amounting to approximately \$44.5 million from the Export-Import Bank of the government of the United States ("Eximbank"). Principal is payable in equal quarterly installments through July 2007. Interest on the Term Loan is at a fixed rate of 6.54% and is payable quarterly. The Term Loan is collateralized by mortgage on all real property, assignment of revenues, and pledge of partnership interest in OLCL. There are various covenants under the Term Loan, which include maintaining minimum levels of equity ratio, as defined, and limitations on additional indebtedness and payment of dividends.

Ormesa Loan

On December 31, 2002, a wholly owned subsidiary of the Company ("Ormesa LLC"), that owns and operates the Ormesa Complex, entered into a credit facility agreement ("Ormesa Loan") amounting to \$20 million with a bank. Principal payments are payable in 20 varying quarterly payments that

F-25

Ormat Technologies, Inc. and Subsidiaries Notes to Consolidated Financial Statements (dollars in thousands, except per share amounts)

commenced in March 2003. As further discussed below, in connection with the Company's issuance of 8¼% senior secured notes, the Company has committed under the terms of the notes to repay in full the Ormesa Loan no later than January 31, 2005. Interest is computed at LIBOR (2.1% at December 31, 2003, and 1.96% at March 31, 2004 – unaudited) plus 5%, and is also payable quarterly. The Ormesa Loan is collateralized by all of the assets of Ormesa LLC and the Company's ownership interest in Ormesa LLC. There are various restrictive covenants under the Ormesa Loan, which include limitations on additional indebtedness and payments of dividends.

As required by the Ormesa Loan agreement, the Company entered into an interest rate cap agreement ("Cap Agreement") with another bank. This agreement allows the Company to receive limited reimbursement, as defined in the Cap Agreement, for interest payments the Company will pay to the bank under the Ormesa Loan if the LIBOR rate should increase to more than 6%.

Beal Bank Credit Agreement

In December 2003, in connection with the acquisition of the CEC geothermal power plant assets (Note 2), OrCal Geothermal, Inc. ("OrCal"), a wholly owned subsidiary of the Company, entered into a loan agreement with Beal Bank ("Beal Bank Credit Agreement") amounting to \$154.5 million. Principal payments range from 0.25% to 3.5% of the outstanding balance and are payable quarterly, commencing in June 2004 and continuing through December 2019. Interest payments on the unpaid principal balance commenced in March 2004, and are payable quarterly at a variable rate determined on each anniversary date of the loan as the greater of 7.125% or LIBOR plus 5.125%. The applicable interest rate will increase by 0.5% starting in December 2011.

The Beal Bank Credit Agreement is collateralized by substantially all of the assets of OrCal and certain OrCal subsidiaries ("OrCal Subsidiaries"). Performance under the Beal Bank Credit Agreement is guaranteed by OrCal

and its subsidiaries. Funds held in debt service reserve accounts established under a depository agreement are pledged for the benefit of Beal Bank and have been included in restricted cash in the accompanying balance sheet.

There are various restrictive covenants under the Beal Bank Credit Agreement, which include limitations on indebtedness, transactions with related parties and payments of dividends. Beal Bank maintains the right, through December 31, 2004, to refinance up to \$100 million of the Beal Bank Credit Agreement as senior secured notes under the 1933 Securities Act, at terms consistent with the terms of the Beal Bank Credit Agreement. Should Beal Bank exercise its right, OrCal would be required to provide necessary information in connection with the issuance of such senior secured notes, and pay reasonable fees and expenses, not to exceed \$25. Mandatory prepayment of the Beal Bank Credit Agreement is required to the extent that OrCal or its subsidiaries receives funds from an issuance of equity or debt securities, as well as in the occurrence of a major casualty resulting from damage or destruction of power plants owned by OrCal, whereby, receipt of insurance proceeds are in excess of \$2,500.

Credit Facility Agreement (the Momotombo Project)

In September 2000, Ormat Momotombo Power Company ("OMPC"), a wholly owned subsidiary of the Company, entered into a credit facility agreement with Bank Hapoalim B.M. pursuant to which the Company executed a two-phase loan with the bank in the amounts of \$11,435 ("Phase I Loan") and \$36,800 ("Phase II Loan") (collectively "Credit Facility Agreement"). In March 2003, the Company signed an amendment to the Credit Facility Agreement changing the amount of the Phase II Loan from \$36,800 to \$15,000. Principal and interest payments on the Phase I Loan are payable in 32 equal quarterly payments that commenced upon completion of Phase I of the project in December 2001. Interest on the Phase I Loan is variable based on LIBOR plus 2.375%. Principal and interest payments on the Phase II Loan are payable in equal 28 quarterly payments that commenced

F-26

Ormat Technologies, Inc. and Subsidiaries Notes to Consolidated Financial Statements (dollars in thousands, except per share amounts)

in March 2004. Interest on the Phase II Loan is variable based on LIBOR plus 3.0%, and is added to the outstanding balances of the Phase II Loan until the commencement of the principal and interest payments. At December 31, 2003, and March 31, 2004 (unaudited), approximately \$8,046 and \$7,749, respectively, was outstanding under the Phase I Loan and approximately \$11,869 and \$11,445, respectively, was outstanding under the Phase II Loan. The Credit Facility Agreement is collateralized by liens over all real and personal property comprising the Momotombo Project and the Company's ownership interest in OMPC. Additionally, the Parent has provided to the lender a repayment guarantee of 50% of the unpaid principal, interest and all other amounts of the Credit Facility Agreement which become past due and are not paid by the Company due to any event of default as defined in the Credit Facility Agreement. There are various restrictive covenants under the Credit Facility Agreement, which include maintaining certain levels of debt to equity ratio and debt service coverage ratio, and limitations on additional indebtedness and payment of dividends.

Loan one

In May 1998, the Company entered into an \$8,000 loan agreement, with principal payable in \$1,000 annual installments that commenced in May 2001, and continue through May 2008. Interest is computed at LIBOR plus 1.7%, and is payable annually. The Parent has provided a guarantee, whereby in the event that the Company fails to perform its obligation under the loan agreement, the Parent would be required to pay the bank the remaining outstanding balance of the loan.

Loan two

In July 2000, the Company entered into a \$5,600 loan agreement with principal payable in equal semi-annual payments that commenced in January 2003, and continue through July 2010. Interest is computed at LIBOR plus 1.7% and is payable semi-annually. The Parent has provided a guarantee, whereby in the event that the Company fails to perform its obligation under the loan agreement, the Parent would be required to pay the bank the remaining outstanding balance of the loan. On July 14, 2004 (unaudited), the Company repaid the loan in full.

Loan three

In March 2001, the Company entered into a \$10,000 loan agreement, with principal payable in equal quarterly payments that commenced in April 2003, and continue through January 2006. Interest is computed at LIBOR plus a margin as calculated by the bank each quarter (1.8% at December 31, 2003), and is payable quarterly. The Parent has provided a guarantee, whereby in the event that the Company fails to perform its obligation under the loan agreement, the Parent would be required to pay the bank the remaining outstanding balance of the loan.

Loan four

In July 2001, the Company entered into a \$9,500 loan agreement with a bank, with principal payable in equal semi-annual payments that commenced in July 2003, and continue through July 2006. Interest is computed at LIBOR plus 1% and is payable annually. The Parent has provided a guarantee, whereby in the event that the Company fails to perform its obligation under the loan agreement, the Parent would be required to pay the bank the remaining outstanding balance of the loan. In July 2004 (unaudited) the Company committed to the lender to repay the entire loan no later than January 14, 2005 or convert the outstanding balance into a five year loan bearing interest at LIBOR plus 2.5%. In addition, the Company is subject to various restrictive covenants. If neither of the actions is taken, the lender is entitled to demand immediate repayment of the above loan.

Loan five

In July 2001, the Company entered into a \$9,500 loan agreement with a bank, with principal payable in equal semi-annual payments that commenced in May 2003, and continue through May 2006.

F-27

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Interest is computed at LIBOR plus 1% and is payable annually. The Parent has provided a guarantee, whereby in the event that the Company fails to perform its obligation under the loan agreement, the Parent would be required to pay the bank the remaining outstanding balance of the loan. In July 2004 (unaudited) the Company committed to the lender to repay the entire loan no later than January 14, 2005 or convert the outstanding balance into a five year loan bearing interest at LIBOR plus 2.5%. In addition, the Company is subject to various restrictive covenants. If neither of the actions is taken, the lender is entitled to demand immediate repayment of the above loan.

In December 2002, the Company entered into an interest rate swap agreement with a financial institution that involves the exchange of fixed interest rate payments at a rate of 2.26% on a notional amount of \$9,500 at the effective date of February 21, 2003, that is reduced periodically (\$8,143 at December 31, 2003) in exchange for floating interest rate payments that equal the interest due under Loan Five. As the Company did not achieve hedge accounting on such swap, the net payments or receipts under such agreement are recognized as an adjustment to interest expense. This agreement expires on May 22, 2006.

The fair value of the interest rate swap is the estimated amount that the Company would currently pay to terminate the swap agreement at the reporting date, taking into account current interest rates and the current creditworthiness of the swap counterparties. The estimated fair value of the interest rate swap was a liability of \$41 at December 31, 2003. The effect of the interest rate swap utilized to offset variable rate funding was to increase interest expense by approximately \$74 in 2003.

Bridge loan

During 2003, a wholly owned subsidiary of the Company amended the Bridge Loan by changing the maximum loan amount from \$40,000 to \$20,000. The amendment also changed the interest rate from LIBOR plus 1% to LIBOR plus 1.5%, which is payable quarterly, and extended the maturity date to February 2005. Under the terms of the Bridge Loan, the Parent has provided a letter of credit in the amount of \$21 million that expires in March 2005 as collateral for the Bridge Loan.

Future minimum payments under long-term obligations as of December 31, 2003 are as follows:

Year ending December 31:	
2004	\$ 26,176
2005	48,048
2006	26,082
2007	23,960
2008	15,016
Thereafter	121,206
Total	<u>\$ 260,488</u>

Senior Secured Notes (Unaudited)

On February 13, 2004, the Company, through Ormat Funding Corporation ("OFC"), a wholly owned subsidiary, completed the issuance of 8¼% senior secured notes ("Notes") pursuant to an exempt offering under Rule 144A and Regulation S of the Securities Act of 1933 ("Offering"), amounting to \$190 million, and received net cash proceeds of approximately \$179.7 million net of bond issuance costs of approximately \$10.3 million, which have been included in intangible assets at March 31, 2004. The Notes have a final maturity date of December 30, 2020. Principal and interest on the Notes are payable semi-annually beginning June 30, 2004. The Notes are collateralized by substantially all of the assets of OFC and fully and unconditionally guaranteed by all of the wholly owned subsidiaries of OFC, other than Ormesa LLC ("Ormesa"), which will be obligated to guarantee the Notes upon the

F-28

Ormat Technologies, Inc. and Subsidiaries Notes to Consolidated Financial Statements (dollars in thousands, except per share amounts)

earlier of (i) January 31, 2005, (ii) the date that all the obligations under the Ormesa Loan have been repaid in full, and (iii) the date that Ormesa is no longer prohibited pursuant to the terms of the Ormesa Loan from providing a guarantee and (with certain exceptions) by all real property, contractual rights, revenues and bank accounts, intercompany notes, certain insurance policies and guarantees of OFC and its subsidiaries. There are various restrictive covenants under the Note, which include limitations on additional indebtedness and payment of dividends.

The Company may redeem the Notes, in whole or in part, at any time at a redemption price equal to the principal amount of the Notes to be redeemed plus accrued interest, premium and liquidated damages, if any, plus a "make-whole" premium. Under certain conditions, as defined in the note agreement, the Company may be required to redeem the Notes at a redemption price ranging from 100% to 101% of the principal amount of the Notes being redeemed plus accrued interest, premium and liquidated damages, if any.

OFC has agreed to file a registration statement with the Securities and Exchange Commission and offer to exchange the Notes for publicly registered exchange notes with substantially identical terms and consummate the exchange offer prior to January 8, 2005.

Non-current restricted cash at March 31, 2004 relating to proceeds from the Offering consists of the following:

Galena re-powering construction reserve

As required by the Offering, the Company has set aside approximately \$25.8 million to replace the existing equipment at the Steamboat 1/1A project with more efficient equipment, in order to optimize the geothermal resources available. After such replacement, the company will rename the Steamboat 1/1A project as the Galena project. The Company expects the re-powering will be complete and the project will achieve commercial operations by the end of 2005.

Also as required under the terms of the Notes, the Company has restricted cash accounts, consisting of the following, which are classified as current on the balance sheet:

Debt service reserve

The Company maintains an account to fund an amount sufficient to pay scheduled debt service amounts, including principal and interest, due under the terms of the Notes in the following six months. As of March 31, 2004 the required funds amounted to \$10.5 million.

Ormesa debt reserve

The Company has committed under the Offering to repay in full the Ormesa Loan no later than January 31, 2005. Approximately \$13.6 million of the proceeds from the Offering equal to the outstanding balance on the Ormesa Loan, less the deposit in the Debt Service reserve account described above, was placed in escrow to be released to the Company for principal payments toward the Ormesa Loan. If the Ormesa Loan is not paid in full by January 31, 2005, the balance in the escrow account will be used to repay the outstanding balance on the Ormesa Loan.

Revenue reserve

The Company deposits all revenues received into the revenue account. Such amounts are used to pay operating expenses and fund the debt service reserve account, but the funds are only available to the Company upon submission of draw requests by the Company to the bank. As such amounts are not fully unrestricted to use by the Company, they have been classified as restricted on the accompanying balance sheet. As of March 31, 2004 the balance of such account was approximately \$4 million.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

11. Asset Retirement Obligation

The Company adopted SFAS No. 143, *Accounting for Obligations Associated with the Retirement of Long-Lived Assets*, effective January 1, 2003. Under SFAS No. 143, entities are required to record the fair value of a legal liability for an asset retirement obligation in the period in which it is incurred. The Company's legal liabilities include capping wells and post-closure costs of geothermal power producing sites. When a new liability for asset retirement obligations is recorded, the Company capitalizes the costs of the liability by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset. At retirement, an entity settles the obligation for its recorded amount or incurs a gain or loss. On January 1, 2003, the Company recorded a cumulative effect of change in accounting principle of \$205, net of related tax benefit of \$125. As a result of adopting the provisions of SFAS No. 143, the net income for the year ended December 31, 2003, decreased by \$238, net of tax benefit of \$144. The proforma net loss for the years ended December 31, 2001 and 2002 reflecting the adoption of SFAS No. 143 applied retroactively would have been \$6,435 and \$1,227, respectively.

The following table summarizes the impact on the Company's balance sheet following the adoption of SFAS No. 143:

	Balance at December 31, 2002	Change Resulting from Application of SFAS No. 143	Balance at January 1, 2003
Property, plant and equipment	\$ 196,482	\$ 2,615	\$ 199,097
Accumulated depreciation	(44,140)	(140)	(44,280)
Net property, plant and equipment	<u>\$ 152,342</u>	<u>\$ 2,475</u>	<u>\$ 154,817</u>
Deferred income tax liability (benefit)	<u>\$ 11,951</u>	<u>\$ (125)</u>	<u>\$ 11,826</u>
Non-current asset retirement obligation	<u>\$ —</u>	<u>\$ 2,805</u>	<u>\$ 2,805</u>

The proforma changes to the non-current asset retirement obligation, based on the information, assumptions and interest rates as of January 1, 2003 are presented below to show what the Company would have reported if the provisions of SFAS No. 143 had been in effect for the periods presented below (unaudited):

	2001	December 31, 2002	2003	March 31, 2004 (unaudited)
Balance, beginning of period	\$ —	\$ 580	\$ 2,805	\$ 5,737
Liabilities incurred	556	2,057	2,701	941
Accretion expense	24	168	231	74
Balance, end of period	<u>\$ 580</u>	<u>\$ 2,805</u>	<u>\$ 5,737</u>	<u>\$ 6,752</u>

12. Stock Options

The Parent has four stock option plans: the 2001 Employee Stock Option Plan, the 2002 Employee Stock Option Plan, the 2003 Employee Stock Option Plan, and the 2004 Employee Stock Option Plan (collectively "the Plans"). Options under the 2004 Employee Stock Option Plan were granted in April 2004. Under the Plans, employees of the Company were granted options in the Parent's Ordinary shares, which are registered and traded on the Tel-Aviv Stock Exchange Ltd. Options under the Plans cliff vest and are exercisable from the grant date as follows: 25% after 24 months, 25% after 36 months, and the remaining 50% after 48 months. Vested shares may be exercised for up to five years

F-30

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

from the date of grant. The maximum aggregate number of shares that may be optioned and sold under the Plans is determined each year by the board of directors of the Parent, and is equal to the number of options granted during each plan year.

The following table summarizes the status of the Plans as of and for the periods presented below (shares in thousands):

	2001		Year Ended December 31, 2002		2003		Three Months Ended March 31, 2004 (unaudited)

Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

13. Power Purchase Agreements

U.S. operations:

The Company has various power purchase agreements in the U.S. as follows:

Southern California Edison Company ("SCE")

The Company has two power purchase agreements ("PPAs") with SCE related to the Ormesa Complex and two PPAs related to Heber 1 and Heber 2. The PPAs provide for the sale of capacity and energy through their respective terms, with the following expiring dates: Ormesa PPAs expiring in 2017 and 2018, and Heber 1 and Heber 2 PPAs expiring in 2015 and 2023, respectively. Under the PPAs, the Company receives a fixed energy payment through April 30, 2007, and thereafter an energy payment based on SCE's short-run avoided cost ("SRAC"). The PPAs provide for firm capacity and bonus payments established by the contracts and are paid to the Company each month through the contracts' term based on plant performance. Bonus capacity payments are earned based on actual capacity available during certain peak hours.

SPPC — Nevada

The Company also has four power purchase agreements with Sierra Pacific Power Company ("SPPC"); one

related to the Brady Power Plant, two related to the Steamboat 1 and 1A Power Plants, and one related to the Steamboat 2 and 3 Power Plants. The PPAs provide for the sale of energy, and for capacity for all power plants except Brady, through their respective terms, with the following expiring dates: Steamboat 1 and 1A expire in 2006 and 2018, and Brady and Steamboat 2 and 3 expire in 2022. Energy payments under the Brady PPA are based on deliveries during specified winter and summer seasons for on-peak, mid-peak, and off-peak times.

Foreign operations:

The Company has power purchase agreements in various foreign countries as follows:

The Olkaria III Project (Kenya)

In connection with the agreement with KPLC (Note 6), the subsidiary in Kenya sells power to KPLC at the agreed upon price and terms of a 20-year power purchase agreement. Fees are paid each month through the term of the agreement and vary based on plant performance.

The Leyte Project (Philippines)

In connection with the BOT agreement with PNOC (Note 6), the subsidiary in the Philippines converts the steam delivered by PNOC into electric energy required by the National Power Corporation ("NPC") in accordance with the power purchase agreement between NPC and PNOC during the term of the BOT agreement. OLCL receives capacity and energy fees from PNOC established by the BOT agreement. Fees are paid each month through the term of the BOT agreement and vary based on plant performance.

The Momotombo Project (Nicaragua)

In connection with the agreement with NEC (Note 6), the subsidiary in Nicaragua sells power to two assignees of NEC at the agreed upon price and terms of a "take or pay" power purchase agreement. Fees are paid each month through the term of the agreement and vary based on plant performance.

F-32

Ormat Technologies, Inc. and Subsidiaries Notes to Consolidated Financial Statements (dollars in thousands, except per share amounts)

Pursuant to the terms of certain of the power purchase agreements described above, the Company may be required to make payments to the relevant power purchaser under certain conditions, such as shortfall on delivery of renewable energy and energy credits, and not meeting certain threshold performance requirements, as defined.

14. Income Taxes

Income (loss) from continuing operations before provision for income taxes consisted of:

	Year Ended December 31,			Three Months Ended	
	2001	2002	2003	2003	2004
				(unaudited)	
U.S.	\$ (2,843)	\$ 5,756	\$ 2,263	\$ 988	\$ 1,230
Non-U.S. (foreign)	4,176	8,893	15,902	2,396	3,224
	<u>\$ 1,333</u>	<u>\$ 14,649</u>	<u>\$ 18,165</u>	<u>\$ 3,384</u>	<u>\$ 4,454</u>

The components of income tax expense (benefit) from continuing operations are as follows:

Three Months Ended

	Year Ended December 31,			March 31,	
	2001	2002	2003	2003	2004
				(unaudited)

Realization of the deferred tax assets and investment tax credits is dependent on generating sufficient taxable income prior to expiration of the loss carryforwards. Although realization is not assured, management believes it is more likely than not that the deferred tax asset, except for those of the Company's Israeli operations (separate tax jurisdiction), will be realized.

At December 31, 2003, the Company had U.S. federal and state net operating loss carryforwards of approximately \$20.7 million and \$7.3 million, respectively, available to reduce future taxable income, which expire between 2021 and 2023, and 2014, respectively. The investment tax credits carry over indefinitely until utilized.

At December 31, 2003, the Company had net operating loss carryforwards related to its Israeli operations of approximately \$16.7 million available to reduce future taxable income, which carryover indefinitely until utilized. Further, despite the fact that the net operating losses carryforward indefinitely, there is currently uncertainty as to the Israeli tax laws related to establishing limitations on the use of net operating losses. Due to OSL's history of operating losses and based on OSL's inability to generate sufficient taxable income in the foreseeable future, management believes it is not more likely than not that such net operating loss carry forwards will be utilized. Accordingly, the Company has recorded a full valuation allowance against such deferred tax assets.

The total amount of undistributed earnings of foreign subsidiaries for income tax purposes was approximately \$31 million at December 31, 2003. It is the Company's intention to reinvest undistributed earnings of its foreign subsidiaries and thereby indefinitely postpone their remittance. Accordingly, no provision has been made for foreign withholding taxes or U.S. income taxes which

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

may become payable if undistributed earnings of foreign subsidiaries were paid as dividends to the Company. The additional taxes on that portion of undistributed earnings which is available for dividends are not practicably determinable.

Income taxes related to foreign operations

Philippines – From OLCL's inception in 1996 to September 2003, OLCL, an 80% owned subsidiary with operations in the Philippines, had an income tax holiday. Subsequent to September 2003, OLCL is subject to the Philippines regular corporate income tax rate of 32%. The tax holiday, assuming a tax rate of 32%, has the effect of reducing tax expense by \$1,032, \$1,978, \$798, \$327, and \$0, and increasing earnings per share by \$0.03,

\$0.06, \$0.03, \$0.01, and \$0, for the years ended December 31, 2001, 2002 and 2003 and for the three months ended March 31, 2003 and 2004 (unaudited), respectively.

Israel – The Company's operations in Israel through OSL are taxed at the regular corporate tax rate of 36%. However, under the Israeli Law for the Encouragement of Capital Investments, some of the operations of OSL have been granted "Approved Enterprise" status under expansion plan of 1996 and 2003, whereby income from the Approved Enterprise, which is determined as the increase of revenues in a particular year compared to those of the program's determined base year (1995 and 2002), will be exempt from taxes for two years commencing in the first year OSL generates taxable income, which for OSL has not commenced yet, and at a reduced tax rate of 25% for a remaining five years. The Approved Enterprise status plans of 1996 and 2003 expire in 2010 and 2017, respectively.

Other significant foreign countries – The Company's operations in Nicaragua and Kenya are taxed at the rates of 25% and 40%, respectively.

15. Business Segments

The Company engages in the following business segments, which report to the Company's management for decision-making purposes: The electricity segment is engaged in the maintenance and operation of wholly or partly owned power plants and in the production of electricity according to contracts. The products segment is engaged in the manufacture, including design and development, of turbines and power units for the supply of electrical energy and in the associated construction of power plants utilizing the power units manufactured by the Company to supply energy from geothermal fields and other alternative energy sources. Transfer prices between the operating segments were determined on current market value or cost plus markup of the seller's business segment.

16. Transactions with related entities

Transactions between the Company and the related entities during the periods presented below and balances as of the periods presented below, other than those disclosed elsewhere in the financial statements, approximated:

	Year Ended December 31,			Three Months Ended March 31,	
	2001	2002	2003	2003	2004
	(unaudited)				
Transactions					
Revenues on construction project to subsidiary of Parent	\$ 303	\$ —	\$ —	\$ —	\$ —
Revenues on construction of Zunil project	\$ 330	\$ —	\$ —	\$ —	\$ —
Property rental fee expense paid to Parent	\$ 627	\$ 627	\$ 627	\$ 157	\$ 157
Interest expense on note payable to Parent	\$ 1,131	\$ 1,068	\$ 1,874	\$ 171	\$ 2,198
Guarantee fees to Parent	\$ 145	\$ 783	\$ 709	\$ 307	\$ 123
Corporate financial, administrative and executive services provided to Parent	\$ 120	\$ 120	\$ 120	\$ 30	\$ 30
Year-End Balances (at end of period)					
Due from Orzunil		\$ 132	\$ 145		\$ 140
Due from subsidiaries of Parent		\$ 1,624	\$ 1,761		\$ 881
Due from Parent		\$ —	\$ 4,431		\$ 1,508

The Company has an agreement with the Parent whereby, for a fee, the Parent maintains certain standby letters of credit on behalf of the Company. During the years ended December 31, 2001, 2002 and 2003, and the three months ended March 31, 2003 and 2004 (unaudited), the fees under the agreement totaled approximately \$145, \$783, \$709, \$307 and \$123, respectively.

The current liability due to Parent at December 31, 2002 and 2003, and March 31, 2004 (unaudited) of \$53,171, \$0 and \$0, respectively, represents the net obligation resulting from ongoing operations and transactions with the Parent and is payable from available cash flow. Interest is computed on balances greater than 60 days at LIBOR plus 1%, however not less than the Israeli Consumer Price Index plus 4%, compounded quarterly, and is accrued and paid to the Parent annually.

Notes payable to Parent

In 2003, the Company entered into a loan agreement ("Parent Loan Agreement") with the Parent pursuant to which the Company may borrow up to \$150 million in one or more advances. Interest accrues on the unpaid principal of the loan amount at a rate per annum of the Parent's average effective interest plus 0.3% (7.5% during 2003). The principal and interest on the Parent Loan Agreement are payable in varying amounts through the loan due date of June 2010. The outstanding balance of such loan at December 31, 2003 and March 31, 2004 (unaudited) was \$126,339 and \$99,839, respectively. As further discussed in Note 19, on June 29, 2004, \$20,000 outstanding under the Parent Loan Agreement was converted to 1,538,462 shares of \$0.001 par value common stock of the Company.

F-40

Ormat Technologies, Inc. and Subsidiaries **Notes to Consolidated Financial Statements** **(dollars in thousands, except per share amounts)**

In 2003, the Company entered into a \$50,665 non-interest bearing note agreement with the Parent. Principal is payable upon demand at any time after November 2005, but no later than December 2006. The loan is subordinated to all other liabilities of the Company.

Future minimum payments under the notes payable to Parent as of December 31, 2003 are as follows:

Year ending December 31:	
2004	\$ —
2005	17,834
2006	78,100
2007	27,435
2008	27,435
Thereafter	26,200
	<u>\$ 177,004</u>

17. Employee benefit plan

401(k) Plan

Prior to July 1, 2002, the Company had a Simple IRA ("IRA Plan") plan covering substantially all employees of the Company, age 21 or older, with minimum service requirements. The Company contributed 2% of the eligible employees' compensation for the year. The Company contributed \$17 and \$6 to the plan for year ended December 31, 2001 and for the six-month period ended June 30, 2002, respectively. On July 1, 2002 the Company discontinued making contributions to the IRA Plan, as the Company exceeded the maximum number of employees allowed for such a plan due to the purchase of the Ormesa Project. Any amounts remaining in the IRA Plan will continue to be invested, and earnings applied to the participating employees' accounts. All contributions made after July 1, 2002 are contributed into the Company's new 401(k) plan, discussed below.

On July 1, 2002 the Company established a 401(k) Plan (the "Plan") for the benefit of its employees. Employees of the Company who have completed one year of service or who had one year of service upon establishment of the Plan are eligible to participate in the Plan. Contributions are made by employees through pretax deductions up to 60% of their annual salary. Contributions made by the Company are matched up to a maximum of 2% of the employee's annual salary. The Company's contributions to the Plan were \$46, \$83, \$23 and \$39 and for the six-month period ended December 31, 2002, the year ended December 31, 2003 and for the three months ended March 31, 2003 and 2004 (unaudited), respectively.

Severance plan

The Company, through OSL, provides limited non-pension benefits to all current employees in Israel who are entitled to benefits in the event of termination or retirement in accordance with the Israeli government sponsored programs. These plans generally obligate the Company to pay one month's salary per year of service to employees in the event of involuntary termination. There is no limit on the number of years of service in calculation of the benefit obligation. The liabilities for these plans are accounted for under the guidance of EITF 88-1, *Determination of Vested Benefit Obligation for a Defined Benefit Pension Plan*, using what is commonly referred to as the "shut down" method, where a company records the undiscounted obligation as if it was payable at each balance sheet date. Such liabilities have been presented on the balance sheet as "Liability for severance pay". The Company has an obligation to partially fund the liabilities through regular deposits in pension funds and severance pay funds. The amounts funded amounted to \$9,047, \$9,440, and \$9,215 at December 31,

F-41

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

2002 and 2003, and March 31, 2004 (unaudited), of which \$8,067, \$8,227 and \$8,034 was restricted, respectively, and have been presented on the balance sheet as part of "Deposits and other". Under the severance pay law, restricted funds may not be withdrawn or pledged until the respective severance pay obligations have been met. As allowed under the program, earnings from the investment are used to offset severance pay costs. Severance pay expenses for the years ended December 31, 2001, 2002 and 2003, and for the three month periods ended March 31, 2003 and 2004 (unaudited) were \$516, \$456, \$511, \$153, and \$162, respectively, which includes losses (income) amounting to \$(49), \$8, \$65, \$40, and \$55, respectively, generated from the regular deposits and amounts accrued in severance funds.

18. Commitments and contingencies

Geothermal Resources

The Company, through its project subsidiaries in the United States, controls certain rights to geothermal fluids through certain leases with the Bureau of Land Management ("BLM") or through private leases. Royalties on the utilization of the geothermal resources are computed and paid to the lessors as defined in the respective agreements. Royalties expense under the geothermal resource agreements were \$135, \$925, \$1,181, \$290 and \$917 for the years ended December 31, 2001, 2002 and 2003, and for the three months ended March 31, 2003 and 2004, respectively.

Letters of credit

In the ordinary course of business with customers, vendors, and lenders, the Company is contingently liable for performance under letters of credit and other financial guarantees obtained by the Parent and issued on behalf of the Company totaling \$19,736 and \$25,642 at December 31, 2003 and March 31, 2004 (unaudited). Management does not expect any material losses to result from these off-balance-sheet instruments because performance is not expected to be required, and, therefore, is of the opinion that the fair value of these instruments is zero.

Grants and royalties

The Company, through OSL, has historically requested and received grants for research and development from the Office of the Chief Scientist of the Israeli Government. OSL is required to pay royalties to the Israeli Government at a rate of 3.5% to 5.0% of the revenues derived from products and services developed using such

grants, and amounted to \$42, \$700, \$1,171, \$231, and \$389 for the years ended December 31, 2001, 2002 and 2003, and for the three months ended March 31, 2003 and 2004 (unaudited), respectively. Such royalties are capped at the amount of the grants received plus interest at LIBOR, and the cap at December 31, 2003 and March 31, 2004 (unaudited), amounted to \$7,050 and \$6,966, respectively, of which approximately \$5,268 and \$5,352 of the cap, respectively, increases based on the LIBOR rate, as defined.

In addition, OSL is obligated to pay royalties to an unaffiliated entity at 2% of its domestic sales up to a cumulative amount of \$9.25 million, and royalties at a rate of 0.2% of revenues on the next \$5.4 million related to a certain technology that is not currently being utilized. However, no royalties will be paid after 30 years have elapsed from the completion of the related project. OSL has not derived any revenues from this technology to date, nor have any royalties been paid to date.

Contingencies

In August 2003, Ormesa agreed to enter into binding arbitration with the Imperial Irrigation District in connection with Imperial Irrigation District's claim that Ormesa is obligated to pay scheduling and transmission charges in the amount of \$529 through the effective date of relinquishment of nominated

F-42

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

capacity for two of the Ormesa Project plants. Ormesa contends that it is not obligated to pay the subject charges after the January 1, 2003, effective date of the Energy Services Agreement that Ormesa entered into with the Imperial Irrigation District. The Company believes that the dispute will be resolved in 2004 and that any outcome will not have a material impact on the Company's operations or relationship with the Imperial Irrigation District.

In response to an order issued by a California State Court of Appeal, the California Public Utilities Commission ("CPUC"), has commenced an administrative proceeding in order to address short run avoided cost pricing for Qualifying Facilities for the period spanning from December 2000 to March 2001. The court directed that the CPUC modify short run avoided cost pricing on a retroactive basis to the extent that the CPUC determined that short run avoided cost prices were not sufficiently "accurate" or "correct." If the short run avoided cost prices charged during the period in question were determined by the CPUC to not be "accurate" or "correct," retroactive price adjustments could be required for any of the Company's Qualifying Facilities in California whose payments are tied to short run avoided cost pricing, including the Heber 1, Heber 2, Mammoth and Ormesa projects. Currently it is not possible to predict the outcome of such proceeding, however, any retroactive price adjustment required to be made in relation to any of the Company's projects may require such projects to make refund payments, which could materially effect the financial condition, future results and cash flow of the Company.

SG is party to litigation related to a dispute over amounts owed to the plaintiffs under certain operating agreements. SG has initiated settlement discussions with the plaintiff and the Company believes that any outcome will not have a material impact on the Company's results of operations.

The Company is a defendant in various other legal suits in the ordinary course of business. It is the opinion of the Company's management that the expected outcome of these matters, individually or in the aggregate, will not have a material effect on the results of operations and financial condition of the Company.

Certain of the Company's projects are subject to contested FERC rulings whereby an adverse outcome could result in a refund of a portion of previous revenues and/or a reduction in future revenues from those projects. The outcome of this matter cannot be predicted at this time.

19. Subsequent events (unaudited)

Acquisition of Steamboat Hills

On May 20, 2004, the Company acquired 100% ownership interest in Yankee Caithness Joint Venture, L.P. ("Yankee") from unrelated parties for a purchase price of approximately \$20.2 million. Yankee owns and operates a geothermal electric generation plant, located in the city of Steamboat Springs, Nevada. The Company purchased Yankee to increase its geothermal power plant operations in the United States. Yankee was

subsequently renamed to Steamboat Hills.

Acquisition of Puna Geothermal Plant

On April 22, 2004, the Company entered into an agreement with an unrelated party to acquire 100% interests in Puna Geothermal Venture ("PGV"), which operates a geothermal power plant ("Puna Project") located on the island of Hawaii. The Company purchased PGV to increase its geothermal power plant operations in the United States. The PGV acquisition was completed on June 3, 2004 with a purchase price of approximately \$72.8 million, including acquisition costs of \$200, which purchase price is subject to working capital adjustments. Of the total purchase price of \$72,831, the Company allocated \$66,812 to property, plant and equipment, \$6,500 to the power purchase agreement, \$1,600 to net working capital, and \$2,081 liability related to asset retirement obligation.

F-43

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Such allocation is preliminary, pending completion of an independent valuation, and may differ from the final allocation. The property, plant and equipment and power purchase agreement will be amortized over their estimated useful life of 23 years. The Puna Project was not in compliance with the threshold minimum performance requirements of its power purchase agreement at the time of the acquisition, and is currently not in compliance with such requirements, which non-compliance has resulted in the imposition of sanctions that reduce the aggregate amounts of revenues payable to the Company from the power purchaser.

Loan agreement

In June 2004, the Company entered into a \$20,000 loan agreement with a financial institution, with principal payable by November 2005. Interest is computed at LIBOR plus 1.45%, and is payable semi-annually. The Parent has provided a guarantee, whereby in the event that the Company fails to perform its obligation under the loan agreement, the Parent would be required to pay the bank the remaining outstanding balance of the loan.

Interest rate cap agreements

During the second quarter of 2004, the Company entered into two separate interest rate cap agreements ("Cap Transactions") with two different financial institutions pursuant to which the Company paid an aggregate of \$3,820 to the financial institutions. The Cap Transactions are effective on March 30, 2007 and terminate on March 31, 2011. Under the terms of the Cap Transactions, the financial institutions are required to pay the Company the difference between the LIBOR rate and 6.0% (if LIBOR is greater than 6.0%), times the notional amount, which for each of the contracts will be \$67,401 on the effective date and reduces each payment period down to \$49,633 upon termination.

LOC Agreement

On June 30, 2004, the Company entered into a letter of credit and loan agreement ("LOC Agreement") with a bank pursuant to which the bank agreed to issue one or more letters of credit aggregating to \$15 million, and expires on June 30, 2007, which shall be extended for successive one-year periods unless notice is provided by either the Company or the bank not to extend such expiration date. In the event that the bank is required to pay on a letter of credit drawn by the beneficiary thereof, such letter of credit converts to a loan, bearing interest at LIBOR plus 4.0%, and matures on the next expiration date of the LOC Agreement. There are various restrictive covenants under the LOC Agreement, which include maintaining certain levels of tangible net worth, leverage ratio, and minimum coverage ratio. Subsequent to June 30, 2004, two letters of credit were issued under this agreement aggregating \$11,769, which have been used to replace cash on deposit in reserve funds that were used as a pledge against the OFC Notes and the Beal Bank Credit Agreement. The amount on one of the letters of credit will increase by \$2,674 in December 2004.

Recapitalization

On June 29, 2004, the Company amended and restated its certification of incorporation, pursuant to which the

authorized capital stock of the Company was increased from 1,000 shares of \$1.00 par value common stock to 205,000,000 authorized shares, comprising of 200,000,000 shares of \$0.001 par value common stock and 5,000,000 shares of \$0.001 par value preferred stock, of which, 500,000 shares have been designated as Series A Preferred Stock. The board of directors has the authority to issue the undesignated preferred stock in one or more series and to fix the rights, preferences, privileges and restrictions thereof.

Additionally, on June 29, 2004, the outstanding and issued 200 shares of \$1.00 par value common stock were divided and converted (stock split) to 30,769,230 shares of \$0.001 par value common stock.

F-44

Ormat Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share amounts)

Accordingly, all common share and per common share amounts in the accompanying consolidated financial statements have been restated to give retroactive effect to the stock split for all periods presented.

Further, on June 29, 2004, \$20,000 outstanding under the Parent Loan Agreement (Note 16) was converted to 1,538,462 shares of \$0.001 par value common stock of the Company.

Reimbursement agreement

On July 15, 2004, the Company entered into a reimbursement agreement with its Parent pursuant to which the Company agreed to reimburse its Parent for (1) any draws made on any standby letter of credits issued by the Parent for the Company and (2) any payments made under any guarantee provided by the Parent to the Company. Interest on any amounts owing pursuant to the reimbursement agreement is payable at a rate per annum equal to the Parent's average effective cost of funds plus 0.3% in U.S. dollars.

Finance arrangements

In connection with the acquisition transaction between OSL and the Parent, the Company amended certain terms of its debt related to Loans 1, 4 and 5, and the Bridge Loan (Note 10), pursuant to which the Company is subject to various financial covenants, including maintaining certain levels of debt service coverage ratio and debt to equity ratio.

In July 2004, the Company also entered into an agreement with a bank pursuant to which the Company has assumed, as the primary obligor, existing contingent obligations of approximately \$17.2 million in outstanding letters of credit that were previously obtained by the Parent under which the Parent was the primary obligor (Note 18).

Report of Independent Auditors

To the Partners of
Puna Geothermal Venture

In our opinion, the accompanying balance sheet present fairly, in all material respects, the financial position of Puna Geothermal Venture (the "Company") at December 31, 2002, and the results of its operations, partners' equity, and its cash flows for the period from January 1, 2003 to December 10, 2003 and for the year ended December 31, 2002, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Notes 2 and 8, effective January 1, 2003, the Company adopted Statement of Financial Accounting Standards No. 143, *Accounting for Asset Retirement Obligations* .

As discussed in Notes 1 and 2 to the financial statements, on December 11, 2003, CE Puna I Corporation, a subsidiary of Constellation Power Corporation, acquired the entire partnership interest of AMOR VIII Corporation, resulting in the Company being wholly owned by Constellation Power Corporation, through its subsidiaries. The financial statements for the period subsequent to December 10, 2003 have been prepared on the basis of accounting arising from this acquisition.

**Puna Geothermal Venture
Notes to Financial Statements
December 31, 2002 and 2003 and March 31, 2004**

1. Organization and Operations

Puna Geothermal Venture ("PGV"), a Hawaii General Partnership, operates under the Second Amended and Restated Partnership Agreement dated December 2, 1996 (the "Partnership Agreement"). Prior to December 11, 2003, the partners of PGV were CE Puna Limited Partnership ("CE Puna"), a subsidiary of Constellation Power Corporation and AMOR VIII Corporation ("AMOR"). Each partner had a 50% interest. However, under the Partnership Agreement and other agreements between the partners, CE Puna has provided a larger percentage of PGV's capital and, therefore, is entitled to a greater percentage of PGV's income or loss, tax benefits and cash flow. In particular, CE Puna is to receive 100% of net cash flow until its Preferred Capital, together with a cumulative Preferred Capital Return of 10% per annum, is paid. On December 11, 2003, CE Puna I Corporation ("CE Puna I"), a subsidiary of Constellation Power Corporation, consummated an agreement to purchase the entire partnership interest of AMOR. At December 31, 2003, the partners are CE Puna I and CE Puna, subsidiaries of Constellation Power Corporation.

PGV developed and is operating a geothermal energy project on the island of Hawaii in the State of Hawaii. PGV sells the electricity it generates to Hawaii Electric Light Company, Inc. ("HELCO") under the terms of a long-term power purchase agreement. PGV began generating electricity commercially in 1993.

During 2002, PGV encountered problems with the production capacity and injection wells related to geothermal

resources and production levels fell significantly below minimum performance requirements under the Power Purchase Agreement ("PPA") (Note 5) with HELCO. Such non-compliance with the PPA subjected PGV to PPA-based sanctions (Note 5).

In January 2003, PGV finished development of a well which increased the production under the PPA with HELCO and, in April 2003, PGV finished development of another well that further increased production. The costs of completing these projects were funded by capital contributions from CE Puna.

Management expects to generate positive cash flows from operations in fiscal 2004 in amounts sufficient to fund debt service requirements.

2. Summary of Significant Accounting Policies

Basis of Presentation

On December 11, 2003, Constellation Power Corporation ("Constellation") closed on the purchase of the remaining interest in PGV that it did not already own. As a result, PGV is wholly owned by Constellation Power Corporation, through its subsidiaries. The purchase was accounted for as an acquisition of an asset, as opposed to the acquisition of a business, and is subject to the purchase method of accounting. Starting on December 11, 2003, PGV's financial statements reflected Constellation's (through its subsidiaries) "pushed down" accounting basis. The change in the partnership equity as a result of this acquisition was an approximately \$21.2 million decrease in Partners' capital.

The following reconciles PGV's partners' capital as of December 10, 2003 to Constellation's "pushed down" accounting basis as of December 11, 2003:

Partners' capital as of December 10, 2003	\$ 125,107,607
Acquisition of AMOR VIII Corporation's investment in PGV by Constellation	
Constellation's acquisition cost of AMOR VIII's interest	100,000
AMOR VIII's capital account	(21,296,210)
Constellation's "pushed down" accounting basis at December 11, 2003	<u>\$ 103,911,397</u>

Puna Geothermal Venture
Notes to Financial Statements
December 31, 2002 and 2003 and March 31, 2004

PGV's plant and equipment was written down by approximately \$21.2 million; there were no other changes in the basis of any other assets and liabilities as a result of the "push down."

Interim Financial Data

The interim financial data for the three months ended March 31, 2004 and 2003 is unaudited; however, in the opinion of management, the interim data includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the results of the interim periods.

Cash Equivalents

PGV considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Restricted Cash

PGV funds reserve accounts for new wells, debt service, working capital and major maintenance repairs as required by its financing agreement.

Spare Parts Inventory

Spare parts inventory is stated at cost determined on a weighted average basis.

Plant and Equipment

Plant and equipment consists of costs incurred during the development and construction of the power plant, the wellfield and transmission lines (the "plant"). Construction period interest totaling \$18,423,973 was capitalized in connection with development and construction of the plant and has been allocated to the assets to which it relates. The plant went into service on August 1, 1993.

Plant and equipment is depreciated using the straight-line method over the lesser of the estimated useful lives of the assets (generally 35 years) or the number of years remaining in the power purchase agreement with HELCO (34.33 years at August 1, 1993.)

Deferred Financing Costs

The expense of issuance of the long-term note payable is being amortized over the fifteen-year life of the note payable under the interest method.

Income Taxes

No provision for federal or state income taxes is made in the financial statements as the individual partners are responsible for reporting their respective shares of PGV's income, loss, deductions and credits to taxing authorities. The proforma net income (loss) on the statements of operations reflects a tax provision (benefit) of 38%, the effective rate of the company that acquired CE Puna I and CE Puna's ownership interest (see Note 9).

Financial Instruments

The carrying amount of cash and cash equivalents and restricted cash approximates fair value because of the short maturity of these instruments. The carrying amount of long-term debt approximates fair value because its interest rate is variable. The estimated termination cost associated with the interest rate swap at December 31, 2003, which represents fair value, is approximately \$3,692,000.

F-54

**Puna Geothermal Venture
Notes to Financial Statements
December 31, 2002 and 2003 and March 31, 2004**

Use of Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of the contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates involve judgments with respect to, among other things, various future economic factors, which are difficult to predict and are beyond the control of PGV. Therefore, actual amounts could differ from these estimates.

Impairment of Long-Lived Assets

Long-lived assets subject to the requirements of Statement of Financial Accounting Standards ("SFAS") No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, as amended by SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, are evaluated for impairment through a review of undiscounted expected future cash flows. If the sum of the undiscounted expected future cash flows is less than the carrying amount of the asset, an impairment loss is recognized. As a result of the change in PGV's ownership in 2003, a detailed impairment analysis was performed. The result of this analysis concluded that the sum of the undiscounted expected future cash flows was more than the carrying amount of its long-lived assets. Accordingly, PGV recognized no impairment losses of its long-lived assets in 2003 or in any other periods presented.

Asset Retirement Obligation

On July 22, 2001, the Financial Accounting Standards Board ("FASB") issued SFAS No. 143, *Accounting for Asset Retirement Obligations* ("SFAS 143"). Under SFAS 143, retirement obligations associated with tangible long-lived assets acquired are to be recognized at fair value in the period in which incurred, effective for financial statements issued for fiscal years beginning after June 15, 2002. PGV adopted SFAS 143 beginning January 1, 2003. See Note 8 for further discussion.

Derivative Instruments

On January 1, 2001, PGV adopted SFAS No. 133, as amended by SFAS No. 138, *Accounting for Derivative Instruments and Hedging Activities* ("SFAS 133"). Under SFAS 133, all derivative instruments are recognized in the balance sheet at their fair values. PGV's interest rate swap agreements qualify as a cash flow hedge under SFAS 133. See Note 4 for further discussion.

Concentrations of Credit Risk

Financial instruments that potentially subject PGV to a concentration of credit risk primarily consist of cash and cash equivalents and trade accounts receivable.

PGV's cash and cash equivalents are deposited with two financial institutions in the United States of America and may exceed federally insured amounts. PGV has not experienced any losses on its cash and cash equivalents.

PGV's customer base is comprised of one single customer, HELCO. Loss of or default by this customer could have an adverse effect upon PGV's financial position, results of operations and cash flows.

PGV's production wells are subject to volatility and potential shutdown on exhaustion. A shutdown of a well, as occurred in 2002, could have adverse effects on PGV's ability to produce ample power in accordance with the Power Purchase Agreement (see Note 5), subjecting PGV to reduced revenues and sanctions by HELCO in compensation of the inability to meet specified energy production levels.

F-55

Puna Geothermal Venture
Notes to Financial Statements
December 31, 2002 and 2003 and March 31, 2004

3. Note Payable

PGV has entered into a Credit Agreement dated as of December 2, 1996 with Credit Suisse, which provides for a 15-year term loan in an amount not to exceed \$65,387,594. Substantially all of the assets of PGV are pledged as collateral on amounts due under the Credit Agreement. Principal is due quarterly. Amounts outstanding under the Credit Agreement bear interest at LIBOR plus 1.50% or the lender's Base Rate plus .75%, at PGV's option. On the fifth and tenth anniversary of the closing of the Credit Agreement, the interest rate increases by 25 basis points. In addition, the interest rate may be increased by 25 basis points if PGV fails to maintain at least a 1.25:1 debt service coverage ratio. The interest rate at December 31, 2003 and 2002 was 2.94% and 3.56%, respectively.

As required under the Credit Agreement, Constellation Investments, Inc., an affiliate of CE Puna, established several reserves and guarantees in order to fund specific needs of PGV. Under the agreement, a Debt Service Reserve, a New Well Field Reserve and an Underground Injection Control ("UIC") Guaranty were established. PGV is required, per the amended Credit Agreement, to maintain \$3.0 million in the New Well Field Reserve for the purpose of funding well improvements as structured in PGV's Restoration Plan. The Debt Service Reserve Guaranty includes a guaranty of \$4.5 million by Constellation Investments, Inc. and a Debt Service Reserve to be maintained by PGV of \$1.8 million. The reserve balances recorded as restricted cash by PGV as of December 31, 2002, 2003 and March 31, 2004 were as follows:

March 31,

	<u>2002</u>	<u>2003</u>	<u>2004</u> (unaudited)
New Well Field Reserve	\$ 3,073,759	\$ 2,224	\$ 2,224
Debt Service Reserve	1,815,644	1,831,786	1,835,261
Maintenance Reserve	625,990	631,479	632,660
Working Capital Reserve	592,366	597,546	598,662
	<u>\$ 6,107,759</u>	<u>\$ 3,063,035</u>	<u>\$ 3,068,807</u>

These reserve accounts are classified as current restricted cash since they are used and replenished for servicing current debt and for funding current operations.

Under terms of the Revised Credit Agreement, reserve accounts were funded at closing for debt service, working capital and major maintenance repairs. Additional payments into these and other reserve accounts will occur as provided in the Revised Credit Agreement. Distributions to the partners are made after all required funding of reserves.

At December 31, 2003, the scheduled maturities under the Credit Agreement are as follows:

<u>Years Ending</u>	
2004	\$ 4,004,990
2005	4,413,661
2006	5,108,405
2007	5,925,752
2008	6,579,627
Thereafter	18,267,447
	<u>\$ 44,299,882</u>

See Note 9 for subsequent event.

4. Derivative Instruments

As required under the Credit Agreement to reduce the impact of changes in interest rates on its variable rate debt, PGV entered into 10-year interest rate swap agreements on approximately 75%

F-56

Puna Geothermal Venture
Notes to Financial Statements
December 31, 2002 and 2003 and March 31, 2004

of the amounts outstanding under the Credit Agreement. The swap agreements qualify for hedge accounting as a cash flow hedge. The average fixed LIBOR is 6.67% under the swap agreements.

For the periods from December 11, 2003 to December 31, 2003, from January 1, 2003 to December 10, 2003, and for the year ended December 31, 2002, unrealized holding gains of \$800,333 and \$265,699 and unrealized holding loss of \$2,163,265, respectively, were recorded in accumulated other comprehensive income/loss to recognize the change in fair value of the swap agreements. An unrealized holding gain of \$923,103 was recorded for the three months ended March 31, 2004 (unaudited).

PGV made payments of \$1,814,620 under the swap agreements for the year ended December 31, 2002. Payments totaled \$1,447,950 for the period January 1, 2003 to December 10, 2003 and \$480,157 for the period December 11, 2003 to December 31, 2003. PGV made payments of \$231,065 for the three months ended March 31, 2004 (unaudited).

PGV may be exposed to a potential loss in the event of nonperformance by the other parties to the swap

agreements, but PGV does not anticipate any such nonperformance. The notional value of the amounts outstanding under the swap agreements is approximately \$32 million.

The swap agreements were terminated on June 3, 2004. The unrealized holding loss for the period April 1, 2004 through June 2, 2004 amounted to approximately \$31,000 (unaudited).

5. Power Purchase Agreement

PGV has entered into a long-term non-cancelable power purchase agreement with HELCO. HELCO agreed to purchase up to 30 MW of net output during peak hours and up to 22 MW of net output during off peak hours through the year 2027. The agreement specifies energy rates of the greater of avoided costs of 6.56¢ per kWh for the first 25 MW of peak energy and 5.43¢ per kWh for the first 22 MW of off peak energy. Energy rates for production in excess of 25 MW for peak hours and in excess of 22 MW for off peak hours are greater of the avoided energy payment rates of 4.325¢ per kWh for peak hours and 3.325¢ per kWh for off peak hours. In addition, PGV receives capacity payments for providing peak period energy. Capacity payments are 3.39¢ per kWh for the first 25 MW and 2.14¢ per kWh for the additional 5 MW based on annual capacity payments of \$4 million and \$504,750, respectively, and 4,718 peak hours in a year.

PGV is subject to sanctions in the power purchase agreement in cases where PGV is not able to provide the agreed upon power output, within a 5% yield. Such sanctions do not result in the agreement becoming cancelable at HELCO's discretion. In 2003 and 2002, PGV was not able to meet the specified goals for power output and as such, was subject to sanctions based on the following: 1) reductions are made to the monthly capacity payments noted above for deficiencies at the above rates and 2) on an annual basis, shortfalls of the on-peak availability provide for payments due of \$7,992 per full percentage point below 95% to and including 80% and \$11,875 per full percentage point less than 80%. Pursuant to the agreement as summarized above, PGV recognized capacity sanction expenses of \$608,831 in fiscal 2002, \$313,473 in the period January 1, 2003 to December 10, 2003, and \$18,808 in the three-months ended March 31, 2004 (unaudited), based on the capacity shortfalls for these periods.

6. Royalty and Lease Agreements

PGV has entered into various long-term royalty and lease agreements related to the use of geothermal resources and to the land on which the facility is situated. Such agreements call for PGV to pay royalty payments based on gross revenues derived from energy sales. Royalties are remitted to the State of Hawaii based on steam value at approximately 3% of gross revenue. Royalties to the State of Hawaii were \$179,753 in 2002, \$497,530 from January 1, 2003 to December 10, 2003 and \$30,373 from

F-57

Puna Geothermal Venture Notes to Financial Statements December 31, 2002 and 2003 and March 31, 2004

December 11, 2003 to December 31, 2003. Royalties for the three months ended March 31, 2004 were \$157,550 (unaudited). Royalties are remitted to Thermal Power based on steam value. Royalties to Thermal Power were \$69,988 in 2002, \$191,227 from January 1, 2003 to December 10, 2003 and \$11,674 from December 11, 2003 to December 31, 2003. Royalties for the three months ended March 31, 2004 were \$66,911 (unaudited). Royalties are remitted to the lessor of the facility site and associated properties, Kapoho Land Partnership ("KLP"), at approximately 3% of steam value. Royalty payments to KLP are subject to minimum payments of \$260,520 per year with the minimum payment made for 2003 and 2002. In addition, KLP receives operating lease payments of \$167,107 annually for the use of the site. Minimum royalty payments are subject to adjustment every five years based upon changes in the CPI. Payments for the use of the site are subject to renegotiation every five years based on rental value of comparable properties.

At December 31, 2003, the total remaining minimum commitments for royalties and operating leases, excluding the effects of future renegotiations, are as follows:

<u>Years Ending</u>	
2004	\$ 427,627
2005	427,627
2006	427,627
2007	427,627
2008	427,627
Thereafter	8,124,913
	<u>\$ 10,263,048</u>

7. Related Party Transactions

During December 1996, PGV and COSI Puna, Inc., an affiliate of Constellation Power, Inc., entered into an Operation and Maintenance Agreement effective as of December 2, 1996. COSI Puna, Inc.'s fees under the agreement are 10% of the total labor plus related burden costs. The fee for 2002 was \$251,676 and payments to COSI Puna, Inc. for payroll related costs and fees totaled \$2,719,084 in 2002. In connection with CE Puna I's acquisition of AMOR's ownership interest in PGV, COSI Puna, Inc. agreed to waive payment of certain fees payable at the acquisition date. Such payable amounted to \$480,726. PGV has recognized the forgiveness of this payable as a capital contribution in the period ended December 10, 2003.

Two employees of Constellation Power, Inc. ("CPI") serve as Owner's Representative and Financial Manager of PGV. In addition, other employees of CPI and its affiliates perform human resources, risk management, environmental and safety, financial and consultation services for PGV. The cost for such services in 2002 totaled \$264,000. In connection with CE Puna I's acquisition of AMOR's ownership interest in PGV, CPI agreed to waive payment of all fees payable at the acquisition date. Such payable amounted to \$484,000. PGV has recognized the forgiveness of this payable as a capital contribution in the period ended December 10, 2003.

8. Asset Retirement Obligation

Effective January 1, 2003, PGV adopted SFAS No. 143, *Accounting for Asset Retirement Obligations*. SFAS No. 143 provides the accounting requirements for recognizing an estimated liability for legal obligations associated with the retirement of tangible long-lived assets. PGV measures the liability at fair value when incurred and capitalizes a corresponding amount as part of the book value of the related long-lived assets. The increase in the capitalized cost is included in determining depreciation expense over the estimated useful life of these assets. Since the fair value of the asset retirement obligations ("ARO") is determined using a present value approach, accretion of the liability due to

Puna Geothermal Venture
Notes to Financial Statements
December 31, 2002 and 2003 and March 31, 2004

the passage of time is recognized each period to "Accretion of asset retirement obligations" in PGV's Statements of Operations until the settlement of the liability. A gain or loss is recorded when the liability is settled after retirement. The adoption of SFAS No. 143 on January 1, 2003 resulted in an increase to plant and equipment of \$715,148, net of accumulated depreciation and the establishment of an asset retirement obligation liability of \$1,872,413. The cumulative effect of this change for periods prior to January 1, 2003 of \$1,157,265 is shown as the cumulative effect of change in accounting principle in the Statements of Operations.

Inherent in the fair value calculation of ARO are numerous assumptions and judgments including the ultimate settlement amounts, inflation factors, credit adjusted discount rates, and timing of settlement. To the extent future revisions to these assumptions impact the fair value of the existing ARO liability, a corresponding adjustment will be made to the plant and equipment balance.

The change in the "Asset retirement obligation" liability during 2003 was as follows:

Liability at January 1, 2003	\$ 1,872,413
Accretion expense through December 31, 2003	158,804
Accretion expense – December 11, 2003 to December 31, 2003	<u>9,826</u>
Liability at December 31, 2003	2,041,043
Accretion expense – January 1, 2004 to March 31, 2004 (unaudited)	<u>39,801</u>
Liability at March 31, 2004 (unaudited)	<u><u>\$ 2,080,844</u></u>

The pro-forma asset retirement obligation PGV would have recognized as of January 1, 2002, had PGV implemented SFAS No. 143 as of that date, was approximately \$1,760,146 based on the information, assumptions, and interest rates as of January 1, 2003 used to determine the \$1,872,413 liability recognized upon the adoption of SFAS No. 143. The following discloses the pro forma effect of the implementation on the Company's net loss for the year ended December 31, 2002, had SFAS No. 143 been adopted by the Company on January 1, 2002:

Net loss, as reported	\$ (12,179,557)
Effect on net loss had SFAS No. 143 been applied	<u>(129,160)</u>
Net loss, as adjusted	<u><u>\$ (12,308,717)</u></u>

9. Subsequent Event

Constellation Power Corporation sold its interest in CE Puna I and CE Puna to an unrelated third party on June 3, 2004. In connection with this transaction, the Company's note payable to Credit Suisse was paid in full, and the Credit Agreement and Revised Credit Agreement with Credit Suisse and swap agreements were terminated.

Report of Independent Auditors

To the Partners of Combined Heber and Affiliates

In our opinion, the accompanying combined balance sheet and the related combined statements of operations, of partners' capital and of cash flows present fairly, in all material respects, the financial position of Heber Geothermal Company, Heber Field Company, and Second Imperial Geothermal Company (collectively "Heber and Affiliates" or the "Company") at December 31, 2002 and December 17, 2003, and the results of their operations and their cash flows for the years ended December 31, 2001 and 2002, and for the period from January 1, 2003 to December 17, 2003 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1 to the combined financial statements, Covanta Energy Corporation and 123 of its subsidiaries, including the Company, filed voluntary petitions on April 1, 2002 with the United States Bankruptcy Court for the Southern District of New York for reorganization under the provisions of Chapter 11 of the Bankruptcy Code. The Company's Debtor's Third Amended Joint Plan of Reorganization Under Chapter 11 (Heber Plan) was substantially consummated on December 18, 2003, and the Company emerged from bankruptcy.

As discussed in Note 1 to the financial statements, on December 18, 2003, OrCal Geothermal, Inc. acquired the partnership interests in the Company.

As discussed in Note 5 to the financial statements, effective January 1, 2003, the Company adopted the provisions of Statement of Financial Accounting Standards No. 143, *Accounting for Obligations Associated with the Retirement of Long-Lived Assets*.

1. Business and Significant Accounting Policies

Basis of combination and presentation

The accompanying financial statements have been prepared by combining the following three legal entities, all of which were under common control, through affiliates, by Covanta Energy Corporation ("CEC") for all periods presented prior to December 18, 2003, and effective December 18, 2003 (see discussion below regarding sale of company), by OrCal Geothermal, Inc. ("OrCal"), a wholly owned subsidiary of Ormat Nevada, Inc. (ONI), which in turn is a wholly owned subsidiary of Ormat Technologies, Inc. (OTI):

- *Second Imperial Geothermal Company* ("SIGC" or "Heber 2"), a California limited partnership, that was formed on November 24, 1992 for the purpose of developing, constructing and operating a geothermal electrical generating facility located in Heber, California.
- *Heber Geothermal Company* ("HGC" or "Heber 1"), a California general partnership, that was formed on August 12, 1983 for the purpose of designing, constructing and operating a geothermal electrical generating station located in Heber, California.
- *Heber Field Company* ("HFC"), a California general partnership, that was formed on November 1, 1991 for the purpose of acquiring and operating a geothermal field located in Heber, California, and selling the geothermal fluid to HGC and to SIGC.

The combination of the above entities is collectively referred to as "Heber and Affiliates" or the "Company". Intercompany accounts and transactions have been eliminated in the combination.

Bankruptcy and sale transaction

On April 1, 2002 ("Petition Date"), CEC and 123 of its domestic subsidiaries (collectively the "Debtors") filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code (the "Bankruptcy Code") in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court"). CEC and these subsidiaries, which include the Company, have been operating their businesses as debtors in possession pursuant to the Bankruptcy Code.

The Company's Financial Statements have been prepared in accordance with the American Institute of Certified Public Accountants Statement of Position 90-7 ("SOP 90-7"), Financial Reporting by Entities in Reorganization under the Bankruptcy Code. Accordingly, all pre-petition liabilities believed to be subject to compromise have been segregated in the balance sheet and classified as liabilities subject to compromise, at the estimated amount of allowable claims. As of December 31, 2002 such liabilities consisted mainly of amounts due to related entities (Note 7). Liabilities not believed to be subject to compromise are separately classified as current and non-current.

On September 29, 2003, the court entered an order approving competitive bidding and auction procedures for the purpose of obtaining the highest or best offer for the sale of the Company. On November 19, 2003 the Debtors held an auction before the Court. As a result of the auction, the Debtors determined that the offer submitted by OrCal, was the best and highest bid.

On November 21, 2003, the Bankruptcy Court confirmed the Debtor's Third Amended Joint Plan of Reorganization Under Chapter 11 (Heber Plan) and approved the sale of interests to OrCal. On December 18, 2003, each of the conditions precedent to the Confirmation Date pursuant to Heber Plan occurred or was waived in accordance with the Heber Plan, and the Company was sold to OrCal for a combined purchase price of approximately \$180 million.

**Combined Heber and Affiliates
(California Limited Partnerships)
(Debtors-in-Possession)
Notes to Financial Statements (in thousands)**

Cash

Cash consists of deposit accounts with banks.

Restricted cash and cash equivalents

Under the terms of the lease agreement (Note 4), the Company was required to maintain a debt service reserve and operating fund accounts that have been classified as restricted cash and cash equivalents. Such amounts were invested primarily in money market accounts. The Company considers all highly liquid instruments, with an original maturity of three months or less, to be cash equivalents. Due to the revolving nature of the operating fund account, the amounts are classified as current assets. Due to the long-term nature of the debt service reserve account, the amounts are classified as non-current assets.

Concentration of credit risk

Financial instruments which potentially subject the Company to concentration of credit risk consist principally of temporary cash investments and accounts receivable. The Company places its temporary cash investments with high credit quality financial institutions located in the United States of America. At December 31, 2002 and December 17, 2003, the Company maintained all of its deposits in three U.S. financial institutions that were federally insured up to \$100 per financial institution. All of the Company's revenues, and the related receivable balances, are earned from one customer, Southern California Edison Company ("SCE"). The Company has historically been able to collect on all of its receivable balances from SCE, accordingly no provision for doubtful accounts has been made.

Property, plant and equipment

Property, plant and equipment are stated at cost. All costs associated with acquisition, development and construction of power plant facilities are capitalized. Major improvements are capitalized, and repairs and maintenance costs are expensed. Power plants were depreciated using the straight-line method over the estimated service period of 24 to 28 years. The cost and accumulated depreciation of items sold or retired are removed from the accounts. Any resulting gain or loss is recognized currently in operating income.

Impairment of long-lived assets and long-lived assets to be disposed of

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less costs to sell. Management believes that no impairment exists for long-lived assets, however future estimates as to the recoverability of such assets may change based on revised circumstances.

Derivative instruments

Statement of Financial Accounting Standards ("SFAS") No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted by other related accounting literature, establishes accounting and reporting standards for derivative instruments (including certain derivative instruments embedded in other contracts). SFAS No. 133 requires companies to record derivatives on

Combined Heber and Affiliates
(California Limited Partnerships)
(Debtors-in-Possession)
Notes to Financial Statements (in thousands)

their balance sheets as either assets or liabilities measured at their fair value unless exempted from derivative treatment as a normal purchase and sale. All changes in the fair value of derivatives are recognized currently in earnings unless specific hedge criteria are met, which requires that a company must formally document, designate, and assess the effectiveness of transactions that receive hedge accounting.

The Company is subject to the provisions of SFAS No. 133 Derivative Implementation Group ("DIG") Issue No. C15 (DIG Issue No. C15), *Normal Purchases and Normal Sales Exception for Certain Option-Type Contracts and Forward Contracts in Electricity*, which expands the requirements for the normal purchase and normal sales exception to include electricity contracts entered into by a utility company when certain criteria are met. Also under DIG Issue No. C15, contracts that have a price adjustment clause based on an index that is not directly related to the electricity generated, as defined in SFAS No. 133, do not meet the requirements for the normal purchases and normal sales exception. The Company has power sales agreements that qualify as derivative instruments under DIG Issue No. C15 because they have a price adjustment clause based on an index that does not directly relate to the sources of the power used to generate the electricity. The adoption of the provisions of DIG Issue No. C15 in 2002 did not have a material impact on the Company's consolidated financial position and results of operations.

In June 2003, the FASB issued DIG Issue No. C20, *Scope Exceptions: Interpretation of the Meaning of Not Clearly and Closely Related in Paragraph 10(b) regarding Contracts with a Price Adjustment Feature*. DIG Issue No. C20 superseded DIG Issue No. C11 *Interpretation of Clearly and Closely Related in Contracts That Qualify for the Normal Purchases and Normal Sales Exception*, and specified additional circumstances in which a price adjustment feature in a derivative contract would not be an impediment to qualifying for the normal purchases and normal sales scope exception under SFAS No. 133. DIG Issue No. C20 was effective as of the first day of the fiscal quarter beginning after July 10, 2003, (i.e. October 1, 2003, for the Company). In conjunction with initially applying the implementation guidance, DIG Issue No. C20 requires contracts that did not previously qualify for the normal purchases normal sales scope exception, and do qualify for the exception under DIG Issue No. C20, to freeze the fair value of the contract as of the date of the initial application, and amortized such fair value over the remaining contract period. Upon adoption of DIG Issue No. C20, the Company elected the normal purchase and normal sales scope exception under FAS No. 133 related to its power purchase agreements. Such adoption did not have a material impact on the Company's consolidated financial position and results of operations.

Revenue recognition

Revenue from the sale of electricity is recorded based upon output delivered and capacity provided at rates as specified under terms of long-term power purchase agreements (Note 6).

Income taxes

The net income of the Company for income tax purposes is the responsibility of the individual partners. Accordingly, no provision for income taxes has been recorded in the accompanying financial statements. The pro forma net income on the statement of operations reflects a tax provision of 38%, the effective rate of the company that acquired the Company's ownership interest.

Accounting estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of such financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

(California Limited Partnerships)
(Debtors-in-Possession)
Notes to Financial Statements (in thousands)

Fair value of financial instruments

The carrying amount of cash, restricted cash and cash equivalents approximates fair value because of the short maturity of those instruments. The fair value of long-term debt is estimated based on the current borrowing rates for similar issues, which approximates carrying amount.

Recently issued accounting pronouncements

In April 2003, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. SFAS No. 149 amends and clarifies the accounting and reporting for derivative instruments, including certain derivatives embedded in other contracts, and for hedging activities under SFAS No. 133. The amendments in SFAS No. 149 require that contracts with comparable characteristics be accounted for similarly. SFAS No. 149 clarifies under what circumstances a contract with an initial net investment meets the characteristics of a derivative according to SFAS No. 133 and when a derivative contains a financing component that warrants special reporting in the statement of cash flows. In addition, SFAS No. 149 amends the definition of an "underlying" to conform it to language used in FIN No. 45 and amends certain other existing pronouncements. The provisions of SFAS No. 149 that relate to SFAS No. 133 "Implementation Issues" that have been effective for periods that began prior to June 15, 2003 should continue to be applied in accordance with their respective effective dates. The requirements of SFAS No. 149 are effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. The Company adopted the provisions of SFAS No. 149 effective July 1, 2003, which did not have a material impact on its results of operations and financial position as of December 17, 2003.

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. SFAS No. 150 establishes standards for how an issuer classifies and measures in its statement of financial position certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability because that financial instrument embodies an obligation of the issuer. The requirements of SFAS No. 150 are effective for financial instruments entered into or modified after May 31, 2003. For financial instruments created prior to the issuance date of SFAS No. 150, transition shall be achieved by reporting the cumulative effect of a change in accounting principle. The Company adopted the provisions of SFAS No. 150 effective July 1, 2003, which did not have a material impact on its results of operations and financial position as of December 17, 2003.

2. Property, Plant and Equipment

Property, plant and equipment, consists of the following:

	December 31, 2002	December 17, 2003
Power plant facility	\$ 154,870	\$ 154,915
Asset retirement cost	—	527
	154,870	155,442
Less accumulated depreciation	(76,784)	(85,729)
	<u>\$ 78,086</u>	<u>\$ 69,713</u>

Included in the power plant facility are assets recorded under capital lease, as further discussed in Note 4.

(Debtors-in-Possession)
Notes to Financial Statements (in thousands)

3. Notes Payable

On December 17, 1999, the Company entered into a note agreement with General Electric Capital Corporation ("GECC") for \$21.7 million. Under the agreement, principal was due by July 31, 2003. Interest was payable quarterly and was computed at 7.5% per annum through March 14, 2001. Then, for the periods from March 14, 2001 to January 31, 2002 and from January 31, 2002 to July 31, 2003, interest was computed at a rate per annum of LIBOR plus 2.75% and LIBOR plus 4.75%, respectively.

The notes were fully paid during the period from January 1, 2003 to December 17, 2003.

4. Finance Obligation

Construction of the Heber 2 project was financed through a \$115 million construction loan obtained by SIGC from GECC. On September 1, 1993, SIGC sold the project to GECC for a purchase price equal to the balance of the construction loan and simultaneously agreed to lease back the project under a lease with an initial term that would have expired in 2008.

The lease was collateralized by all of SIGC assets including the power purchase agreement (PPA) (Note 6), geothermal leases, SCE payments and cash reserve through an escrow agreement.

All revenues from the project were required to be deposited into a series of escrow accounts administered by an independent escrow agent. The related project agreements provided for the disbursement of funds by the escrow agent for the project's operating costs and lease payments, as well as the establishment of certain long-term cash escrow accounts. During the initial lease term, these long-term cash escrow accounts could have been used in limited situations to pay current operating and lease expenses to the extent that project revenues were not sufficient to fund such expenses.

In connection with OrCal's purchase of the Company, the lease was cancelled and OTI purchased the lessor position from GECC.

5. Asset Retirement Obligation

The Company adopted SFAS No. 143, *Accounting for Obligations Associated with the Retirement of Long-Lived Assets*, effective January 1, 2003. Under SFAS No. 143, entities are required to record the fair value of a legal liability for an asset retirement obligation in the period in which it is incurred. The Company's legal liabilities include capping wells and post-closure costs of geothermal power producing sites. When a new liability for asset retirement obligations is recorded, the Company capitalizes the costs of the liability by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset. At retirement, an entity settles the obligation for its recorded amount or incurs a gain or loss. On January 1, 2003 the Company recorded a cumulative effect of change in accounting principle of \$1,660. As a result of adopting the provisions of SFAS No. 143, the net income for period from January 1, 2003 to December 17, 2003, decreased by approximately \$165.

F-70

Combined Heber and Affiliates
(California Limited Partnerships)
(Debtors-in-Possession)
Notes to Financial Statements (in thousands)

The following table summarizes the impact on the Company balance sheet following the adoption of SFAS No. 143:

Balance at December 31, 2002	Change Resulting From Application of SFAS No. 143	Balance at January 1, 2003

Property, plant and equipment	\$ 154,870	\$ 527	\$ 155,397
Accumulated depreciation	<u>(76,784)</u>	<u>(236)</u>	<u>(77,020)</u>
Net property, plant and equipment	\$ <u>78,086</u>	\$ <u>291</u>	\$ <u>78,377</u>
Non-current asset retirement obligation	\$ <u>—</u>	\$ <u>1,951</u>	\$ <u>1,951</u>

The unaudited pro-forma changes to the non-current asset retirement obligation, based on the information, assumptions, and interest rates as of January 1, 2003, are presented below to show what the Company would have reported if the provisions of SFAS No. 143 had been in effect for the periods presented below:

	Year Ended December 31, 2002	For the Period From January 1, 2003 to December 17, 2003
Balance, beginning of period	\$ 1,800	\$ 1,951
Accretion expense	<u>151</u>	<u>150</u>
Balance, end of period	\$ <u>1,951</u>	\$ <u>2,101</u>

6. Power Purchase Agreements

The Company has two power purchase agreements (PPAs) with SCE. The PPAs provide for the sale of capacity and energy through their respective terms, one expiring in 2015 and the other in 2023. Under the PPAs, the Company receives a fixed energy payment through April 30, 2007, and thereafter an energy payment based on SCE's short-run avoided cost (SRAC). The PPAs provide for firm capacity and bonus payments established by the contracts and are paid to the Company each month through the contracts' term based on plant performance. Bonus capacity payments are earned based on actual capacity available during certain peak hours.

7. Related Party Transactions

Operation and Maintenance Contracts

The Heber plant was operated by Covanta Imperial Power Services, Inc ("CIPS"), an affiliated entity, under a long term agreement, for the same term as the PPA. In return for providing all personnel, equipment, materials, supplies and services to operate and maintain the plant, CIPS received a fixed fee, which escalates by 5% annually, and received reimbursement for its non-labor costs.

HFC was operated by Covanta Geothermal Operations, Inc ("CGO"), an affiliated entity, under a long term agreement similar to CIPS agreement with HGC.

The Heber 2 plant was operated by Covanta SIGC Geothermal Operations, Inc. ("SIGC Operator"), an affiliated entity, under a long term agreement that extended for the life of the PPA. SIGC Operator was responsible for providing all customary operations and maintenance services. SIGC Operator was reimbursed for all costs incurred in running the plant. The contract also provided for an annual bonus to be paid to the operator if electricity production and on-peak capacity factors exceeded specified levels.

	Year Ended December 31, 2001	Year Ended December 31, 2002	Period from January 1, 2003 to December 17, 2003
O&M expenses	\$ 9,935	\$ 9,316	\$ 9,375
Operating Bonus	1,642	1,657	1,682
	<u>\$ 11,577</u>	<u>\$ 10,973</u>	<u>\$ 11,057</u>

Management Services

Management services were provided by ERC Energy, Inc (an affiliated entity) to HGC and HFC, and by Amor 14 (an affiliated entity) to SIGC. For the years ended December 31, 2001 and 2002 and for the period from January 1, 2003 to December 17, 2003 the fees relating to those services amounted to \$228, \$240 and \$243, respectively.

Allocated Administrative Costs

Administrative costs incurred by CEC were allocated to the Company. Such costs amounted to \$7,226 and \$7,337 for the years ended December 31, 2001 and 2002, respectively. No such costs were allocated to the Company in 2003.

As of December 31, 2002, amounts due to related entities was \$50,749, which resulted from expenses to be paid under the operations and maintenance contracts, management service fees, and allocated administrative costs. In 2003, all amounts due to related entities were determined to be rejected claims under the bankruptcy proceedings, and as such the balance as of December 31, 2002 has been included in liabilities subject to compromise on the accompanying balance sheet. The outstanding balance of \$31,460 as of December 17, 2003, was discharged and recognized as a gain on discharge of liabilities subject to compromise on the accompanying statement of operations.

8. Commitment and contingencies

Contingencies

The lessors owning interest in the Heber Geothermal Area (an area where the Company obtains its geothermal resource) filed a claim in the Company's bankruptcy proceedings totaling approximately \$80 million. The Company reached a full and final settlement with a group of the royalty related claims totaling \$2.175 million, which was fully executed on October 6, 2003 and approved by the bankruptcy court on October 10, 2003. In addition, it was agreed that the method of calculating royalties would remain the same. The Company also paid legal fees of \$550 related to that group. Such amounts have been reflected in operating expenses in the accompanying statement of operations for the period from January 1, 2003 to December 17, 2003.

For those royalty related claims not included in the group settlement, the Company began negotiations to settle such claims. The Company had accrued approximately \$744 as of December 17, 2003 as their best estimate of the settlements remaining, including amounts not yet paid for the group settlement mentioned above, which is included in account payable and accruals on the accompanying balance sheet. In 2004, a settlement was reached with most of the remaining parties for approximately \$478. The Company believes that the remaining \$266 accrued will satisfy the remaining parties not yet fully settled or those for which settlements have been reached but have not yet paid.

F-72

**Combined Heber and Affiliates
(California Limited Partnerships)
(Debtors-in-Possession)**

Notes to Financial Statements (in thousands)

For lessors with non-royalty surface right related claims, the Company agreed to pay a one time payment of \$390, and increase prospective annual rental and/or severance payments by approximately \$67 per year, which

will be adjusted for the cost of living each year.

In response to an order issued by a California State Court of Appeal, the California Public Utilities Commission ("CPUC"), has commenced an administrative proceeding in order to address short run avoided cost pricing for Qualifying Facilities for the period spanning from December 2000 to March 2001. The court directed that the CPUC modify short run avoided cost pricing on a retroactive basis to the extent that the CPUC determined that short run avoided cost prices were not sufficiently "accurate" or "correct." If the short run avoided cost prices charged during the period in question were determined by the CPUC to not be "accurate" or "correct," retroactive price adjustments could be required for either of the Company's Qualifying Facilities. Currently it is not possible to predict the outcome of such proceeding, however, any retroactive price adjustment required to be made in relation to either of the Company's projects may require such projects to make refund payments or receive less from future revenues, which could materially affect the financial condition, future results and cash flow of the Company.

Commitment

HFC pays monthly royalties under several mineral right leases. The monthly royalties total approximately 5% of the HGC's and SIGC's revenues, respectively, less transmissions and scheduling charges. Royalty expenses recorded for the years ended December 31, 2001 and 2002, and for the period from January 1, 2003 to December 17, 2003 totaled \$4,341, \$3,194 and \$3,509, respectively.

Report of Independent Auditors

To the Partner of Mammoth Pacific, L.P. (Or Mammoth, Inc.)

In our opinion, the accompanying balance sheets and the related statements of operations, of partners' capital and of cash flows present fairly, in all material respects, the financial position of Mammoth Pacific, L.P. ("Partnership") at December 31, 2002 and September 30, 2003, and the results of its operations and its cash flows

for the year ended December 31, 2002 and for the nine-month period ended September 30, 2003 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Partnership's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 3 to the financial statements, effective January 1, 2003, the Partnership adopted the provisions of Statement of Financial Accounting Standards No. 143, *Accounting for Obligations Associated with the Retirement of Long-Lived Assets*.

F-79

Mammoth Pacific, L.P.
(A California Limited Partnership)
Notes to Financial Statements

1. Business and Summary of Significant Accounting Policies

Business

Mammoth Pacific, L.P., a California limited partnership (the Partnership), owns and operates three geothermal electric generation plants located in Mammoth Lakes, California. Such geothermal plants are collectively referred to herein as the "Project".

The partners are Mammoth Geothermal Company (MGC) and Pacific Geothermal Company (PGC), which are both wholly owned subsidiaries of Covanta Energy Corporation (CEC), and CD Mammoth Lakes I (CDI) and CD Mammoth Lakes II (CDII), which are both wholly owned subsidiaries of Constellation Energy Inc., which is a wholly owned subsidiary of Constellation Holdings, Inc., which is a wholly owned subsidiary of Baltimore Gas and Electric Corporation.

The partners' general and limited partnership interests as of December 31, 2002 and September 30, 2003 are as follows

General partners:

MGC	49%
CDI	1%

Limited partners:

PGC	1%
CDI	24%
CDII	25%

All income, loss, tax deductions and credits, cash distributions from operations, and net proceeds from dissolution and liquidation of the Partnership shall be allocated to the partners in percentages equal to their partnership interests.

Interim financial data

The interim financial data for the nine months ended September 30, 2002 is unaudited; however, in the opinion of the Partnership, the interim data includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the results for the interim period.

Cash and cash equivalents

The Partnership considers all investments purchased with an original maturity of three months or less to be cash equivalents.

Concentration of credit risk

Financial instruments that potentially subject the Partnership to concentration of credit risk consist principally of temporary cash investments and accounts receivable. The Partnership places its temporary cash investments with high credit quality financial institutions located in the United States of America. At December 31, 2002 and September 30, 2003, the Partnership maintained all of its deposits in one U.S. financial institution that is federally insured up to \$100,000. All of the Partnership's revenues, and the related receivable balances, are earned from one power company, Southern California Edison Company.

Property, plant and equipment

Property, plant and equipment are stated at cost. All costs associated with acquisition, development and construction of power plant facilities are capitalized. Major improvements are capitalized, and

F-80

Mammoth Pacific, L.P. **(A California Limited Partnership)** **Notes to Financial Statements**

repairs and maintenance costs are expensed. Power plants are depreciated using the straight-line method over the estimated service period of 28 years. The other assets are depreciated using the straight-line method over their estimated useful lives ranging from five to seven years. The cost and accumulated depreciation of items sold or retired are removed from the accounts. Any resulting gain or loss is recognized currently.

Impairment of long-lived assets and long-lived assets to be disposed of

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less costs to sell. Management believes that no impairment exists for long-lived assets, however future estimates as to the recoverability of such assets may change based on revised circumstances.

Derivative instruments

Statement of Financial Accounting Standards ("SFAS") No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted by other related accounting literature, establishes accounting and reporting standards for derivative instruments (including certain derivative instruments embedded in other contracts). SFAS No. 133 requires companies to record derivatives on their balance sheets as either assets or

liabilities measured at their fair value unless exempted from derivative treatment as a normal purchase and sale. All changes in the fair value of derivatives are recognized currently in earnings unless specific hedge criteria are met, which requires that a company must formally document, designate, and assess the effectiveness of transactions that receive hedge accounting.

The Company is subject to the provisions of SFAS No. 133 Derivative Implementation Group ("DIG") Issue No. C15 (DIG Issue No. C15), *Normal Purchases and Normal Sales Exception for Certain Option-Type Contracts and Forward Contracts in Electricity*, which expands the requirements for the normal purchase and normal sales exception to include electricity contracts entered into by a utility company when certain criteria are met. Also under DIG Issue No. C15, contracts that have a price adjustment clause based on an index that is not directly related to the electricity generated, as defined in SFAS No. 133, do not meet the requirements for the normal purchases and normal sales exception. The Company has power sales agreements that qualify as derivative instruments under DIG Issue No. C15 because they have a price adjustment clause based on an index that does not directly relate to the sources of the power used to generate the electricity. The adoption of the provisions of DIG Issue No. C15 in 2002 did not have a material impact on the Company's consolidated financial position and results of operations.

In June 2003, the FASB issued DIG Issue No. C20, *Scope Exceptions: Interpretation of the Meaning of Not Clearly and Closely Related in Paragraph 10(b) regarding Contracts with a Price Adjustment Feature*. DIG Issue No. C20 superseded DIG Issue No. C11 *Interpretation of Clearly and Closely Related in Contracts That Qualify for the Normal Purchases and Normal Sales Exception*, and specified additional circumstances in which a price adjustment feature in a derivative contract would not be an impediment to qualifying for the normal purchases and normal sales scope exception under SFAS No. 133. DIG Issue No. C20 was effective as of the first day of the fiscal quarter beginning after July 10, 2003, (i.e. October 1, 2003, for the Company). In conjunction with initially applying the implementation guidance, DIG Issue No. C20 requires contracts that did not previously qualify for the

F-81

Mammoth Pacific, L.P.
(A California Limited Partnership)
Notes to Financial Statements

normal purchases normal sales scope exception, and do qualify for the exception under DIG Issue No. C20, to freeze the fair value of the contract as of the date of the initial application, and amortized such fair value over the remaining contract period. Upon adoption of DIG Issue No. C20, the Company elected the normal purchase and normal sales scope exception under FAS No. 133 related to its power purchase agreements. Such adoption did not have a material impact on the Company's consolidated financial position and results of operations.

Income taxes

The net income of the Partnership for income tax purposes is the responsibility of the individual partners. Accordingly, no provision for income taxes has been recorded in the accompanying financial statements. The proforma net income on the statement of operations reflects a tax provision of 38%, the effective rate of the company that acquired MGC and PGC's ownership interest (Note 7).

Revenue recognition

Revenue from the sale of electricity is recorded based upon output delivered and capacity provided at rates as specified under terms of long-term power purchase agreements (see Note 4).

Accounting estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair value of financial instruments

The fair value of cash and cash equivalents, accounts receivable, and accounts payable approximate their reported

carrying amounts because of the short maturity of those instruments.

Recently issued accounting pronouncements

In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations*, and SFAS No. 142, *Goodwill and Other Intangible Assets*. They also issued SFAS No. 143, *Accounting for Obligations Associated with the Retirement of Long-Lived Assets*, and SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, in August and October 2001, respectively.

SFAS No. 141 requires all business combinations initiated after June 30, 2001 be accounted for under the purchase method. SFAS No. 141 supersedes Accounting Principles Board (APB) Opinion No. 16, *Business Combinations*, and SFAS No. 38, *Accounting for Pre-acquisition Contingencies of Purchased Enterprises*, and is effective for all business combinations initiated after June 30, 2001.

SFAS No. 142 addresses the financial accounting and reporting for acquired goodwill and other intangible assets. Under the new rules, the Partnership is no longer required to amortize goodwill and other intangible assets with indefinite lives, but will be subject to periodic testing for impairment. SFAS No. 142 supersedes APB Opinion No. 17, *Intangible Assets*. The Partnership adopted the provisions of SFAS No. 142 effective January 1, 2002, which did not have a material impact on its results of operations and financial position, as the Partnership did not have any material amounts of goodwill and other intangible assets.

As further discussed in Note 3, the Partnership adopted the provisions of SFAS No. 143 effective January 1, 2003.

F-82

Mammoth Pacific, L.P.
(A California Limited Partnership)
Notes to Financial Statements

SFAS No. 144 establishes a single accounting model for the impairment or disposal of long-lived assets, including discontinued operations. SFAS No. 144 superseded SFAS No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, and APB Opinion No. 30, *Reporting the Results of Operations-- Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*. The Partnership adopted the provisions of SFAS No. 144 effective January 1, 2002, which did not have a material impact on its results of operations and financial position.

In April 2003, the FASB issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. SFAS No. 149 amends and clarifies the accounting and reporting for derivative instruments, including certain derivatives embedded in other contracts, and for hedging activities under SFAS No. 133. The amendments in SFAS No. 149 require that contracts with comparable characteristics be accounted for similarly. SFAS No. 149 clarifies under what circumstances a contract with an initial net investment meets the characteristics of a derivative according to SFAS No. 133 and when a derivative contains a financing component that warrants special reporting in the statement of cash flows. In addition, SFAS No. 149 amends the definition of an "underlying" to conform it to language used in FIN No. 45 and amends certain other existing pronouncements. The provisions of SFAS No. 149 that relate to SFAS No. 133 "Implementation Issues" that have been effective for periods that began prior to June 15, 2003 should continue to be applied in accordance with their respective effective dates. The requirements of SFAS No. 149 are effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. The Partnership adopted the provisions of SFAS No. 149 effective July 1, 2003, which did not have a material impact on its results of operations and financial position as of September 30, 2003.

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. SFAS No. 150 establishes standards for how an issuer classifies and measures in its statement of financial position certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability because that financial instrument embodies an obligation of the issuer. The requirements of SFAS No. 150 are effective for financial instruments entered into or modified after May 31, 2003. For financial instruments created prior to the issuance date of SFAS No. 150, transition shall be achieved by reporting the cumulative effect of a

change in accounting principle. The Partnership adopted the provisions of SFAS No. 150 effective July 1, 2003, which did not have a material impact on its results of operations and financial position as of September 30, 2003.

2. Property, Plant and Equipment

Property, plant and equipment, consists of the following:

	December 31, 2002	September 30, 2003
Plant and related equipment	\$ 152,196,497	\$ 152,181,247
Transportation equipment	181,442	181,442
Furniture and fixtures	117,665	120,667
Asset retirement cost	—	1,097,000
	152,495,604	153,580,356
Less accumulated depreciation	(59,296,969)	(63,435,625)
	<u>\$ 93,198,635</u>	<u>\$ 90,144,731</u>

3. Asset Retirement Obligation

The Partnership adopted SFAS No. 143 effective January 1, 2003. Under SFAS No. 143, entities are required to record the fair value of a legal liability for an asset retirement obligation in the period in

F-83

Mammoth Pacific, L.P. (A California Limited Partnership) Notes to Financial Statements

which it is incurred. The Partnership's legal liabilities include capping wells and post-closure costs of geothermal power producing sites. When a new liability for asset retirement obligations is recorded, the Partnership capitalizes the costs of the liability by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset. At retirement, an entity settles the obligation for its recorded amount or incurs a gain or loss. On January 1, 2003 the Partnership recorded a cumulative effect of change in accounting principle of \$2,107,000, net of related tax benefit of \$0. As a result of adopting the provisions of SFAS No. 143, the net income for the nine-month period ended September 30, 2003 decreased by approximately \$166,000. The pro-forma amounts shown on the statements of operations have been adjusted for the effect of retroactive application of SFAS No. 143.

The following table summarizes the impact on the Partnership's balance sheet following the adoption of SFAS No. 143:

	Balance at December 31, 2002	Change Resulting from Application of SFAS No. 143	Balance at January 1, 2003
Property, plant and equipment	\$ 152,495,604	\$ 1,097,000	\$ 153,592,604
Accumulated depreciation	(59,296,969)	(439,000)	(59,735,969)
Net property, plant and equipment	<u>\$ 93,198,635</u>	<u>\$ 658,000</u>	<u>\$ 93,856,635</u>
Non-current asset retirement obligation	<u>\$ —</u>	<u>\$ 2,765,000</u>	<u>\$ 2,765,000</u>

The unaudited pro-forma changes to the non-current asset retirement obligation, based on the information, assumptions, and interest rates as of January 1, 2003, are presented below to show what the Partnership would have reported if the provisions of SFAS No. 143 had been in effect for the periods presented below:

	Year Ended December 31,	Nine Months Ended September 30,
	2002	2003
Balance at beginning of period	\$ 2,565,000	\$ 2,765,000
Accretion expense	200,000	165,664
Balance at end of period	<u>\$ 2,765,000</u>	<u>\$ 2,930,664</u>

4. Power Purchase Agreements

The Partnership has three power purchase agreements (the PPA's) with Southern California Edison Company (SCE), that provide for the sale of capacity and energy through their respective terms, expiring from 2015 to 2020. Under the PPA's, the Partnership received payments based on SCE's short-run avoided cost (SRAC) and receives a fixed energy payment starting in May 2002 through April 2007, and thereafter based on SCE's SRAC. The PPA's provide for firm capacity and bonus payments established by the contracts and are paid to the Partnership each month through the contracts' term based on plant performance. Bonus capacity payments are earned based on actual capacity available during certain peak hours.

5. Commitments and Contingencies

The geothermal resources being utilized by the Project are owned by unrelated parties, which receive royalties based on a percentage of gross revenues from the sale of energy.

F-84

Mammoth Pacific, L.P. (A California Limited Partnership) Notes to Financial Statements

Effective January 1, 1995, the Partnership entered into an operating agreement with a wholly owned subsidiary of CEC (the Operator), for the operation and maintenance of the Project. Operator fees are equal to the Operator's labor costs and overhead, plus a \$15,000 annual administration fee. Total expenses incurred under this agreement were approximately \$1,851,200, \$1,296,300 and \$1,396,200 for the year ended December 31, 2002, and for the nine-month periods ended September 30, 2002 (unaudited) and 2003, respectively, of which approximately \$147,100 and \$203,300 was included in due to related entities at December 31, 2002 and September 30, 2003, respectively.

The Partnership is planning to construct a pipeline and two new production wells for a total expected cost of approximately \$5 million to be completed by January 2006.

Subsequent to September 30, 2003, in response to an order issued by a California State Court of Appeal, the California Public Utilities Commission, "CPUC", has commenced a proceeding to address SRAC pricing for Qualifying Facilities for the period December 2000 to March 2001. The court directed that the CPUC modify SRAC pricing on a retroactive basis to the extent the CPUC determined that SRAC prices were not sufficiently "accurate" or "correct." If the SRAC prices during the period in question were determined by the CPUC to not be "accurate" or "correct," retroactive price adjustments could be required. Currently it is not possible to predict the outcome of such proceeding, however, any retroactive price adjustment may require the Partnership to make refund payments or receive less from future revenues, which could materially affect the financial condition, future results and cash flows.

6. Related Party Transactions

MGC has been designated as the managing general partner and is reimbursed for direct expenses and allocated

costs incurred on behalf of the Partnership. Total expenses incurred were approximately \$73,600, \$11,300 and \$152,700 for the year ended December 31, 2002, and for the nine-month periods ended September 30, 2002 (unaudited) and 2003, respectively.

Included in the amount due to related entities are amounts due to MGC of approximately \$752,600 and \$709,200 as of December 31, 2002 and September 30, 2003, respectively, for advances received. Such amounts are to be repaid monthly, subject to available operating cash flow, over a 20-year period beginning January 1, 1996.

7. Subsequent Events

On December 18, 2003, the partnership interests owned by MGC and PGC were sold to an unrelated entity.

Printing and engraving expenses	\$	*
Transfer agent fees and expenses	\$	*
Blue sky fees and expenses	\$	*
Miscellaneous fees and expenses	\$	*
Total	\$	*

* To be filed by amendment.

Item 14. Indemnification of Directors and Officers

Section 145 of the Delaware General Corporation Law provides that a corporation may indemnify directors and officers as well as other employees and individuals against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with any threatened, pending or completed actions, suits or proceedings in which such person is made a party by reason of such person being or having been a director, officer, employee or agent to Ormat Technologies, Inc. The Delaware General Corporation Law provides that Section 145 is not exclusive of other rights to which those seeking indemnification may be entitled under any bylaw, agreement, vote of stockholders or disinterested directors or otherwise.

Section 102(b)(7) of the Delaware General Corporation Law permits a corporation to provide in its certificate of incorporation that a director of the corporation shall not be personally liable to the corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, except for liability for any breach of the director's duty of loyalty to the corporation or its stockholders, for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, for unlawful payments of dividends or unlawful stock repurchases, redemptions or other distributions, or for any transaction from which the director derived an improper personal benefit.

Article Eleventh of Ormat Technologies, Inc.'s certificate of incorporation provides that a director of Ormat Technologies, Inc. shall not be liable to Ormat Technologies, Inc. or its stockholders for monetary damages for breach of fiduciary duty as a director to the fullest extent permitted by Delaware law. In addition, Section 10.1 of Ormat Technologies, Inc.'s by-laws provides that Ormat Technologies, Inc. shall indemnify its directors and officers to the fullest extent permitted by Delaware law, including all expenses liability and loss actually and reasonably incurred or suffered by such director or officer in connection therewith in defending or otherwise participating in any proceeding in advance of its final disposition.

Prior to the completion of this offering, we intend to enter into indemnification agreements with our directors and officers. The indemnification agreements provide indemnification to our directors

and officers under certain circumstances for acts or omissions which may not be covered by directors' and officers' liability insurance, and may, in some cases, be broader than the specific indemnification provisions contained under Delaware law. We have also obtained directors' and officers' liability insurance, which insures against liabilities that our directors or officers may incur in such capacities.

Item 15. Recent Sales of Unregistered Securities

On June 30, we issued 1,538,462 shares of our common stock to Ormant Industries in connection with the capitalization of an outstanding loan in the amount of \$20.0 million with Ormant Industries.

99.1	Material terms with respect to BLM geothermal resources leases
99.2	Material terms with respect to BLM site leases

* To be filed by subsequent amendment.

** Portions of this exhibit have been omitted pursuant to a request for confidential treatment. The omitted portions have been separately filed with the Securities and Exchange Commission.

† We agree to furnish copies of the Schedules and Exhibits referenced in this agreement to the Securities and Exchange Commission upon request.

†† We have entered into other BLM geothermal resources leases that are substantially similar in terms with this exhibit. Any deviation in terms with this exhibit have been described in Exhibit 99.1.

††† We have entered into other BLM site leases that are substantially similar in terms with this exhibit. Any deviation in terms with this exhibit have been described in Exhibit 99.2.

Item 17. Undertakings

(a) The undersigned Registrant hereby undertakes to provide to the underwriters at the closing certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.

(b) Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers, and controlling persons of the Registrant pursuant to the provisions described in "Item 14—Indemnification of Directors and Officers" above, or otherwise, the Registrant has been informed that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification by the Registrant against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer, or controlling person of the Registrant in the successful defense of any action, suit, or proceeding) is asserted by such director, officer, or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

(c) The undersigned Registrant hereby undertakes that:

- (1) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the Registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.
- (2) For the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, as amended, the Registrant has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of New York on the 20th day of July, 2004.

EXHIBIT 3.1

AMENDED AND RESTATED

CERTIFICATE OF INCORPORATION

OF

ORMAT TECHNOLOGIES, INC.

Pursuant to Sections 242 and 245 of the
General Corporation Law of the State of Delaware

Ormat Technologies, Inc., a corporation organized and existing under the General Corporation Law of the State of Delaware (the "Corporation"), does hereby certify as follows:

FIRST: The name of the Corporation is Ormat Technologies, Inc.

SECOND: The original Certificate of Incorporation of the Corporation was filed with the Secretary of State of the State of Delaware on September 15, 1994.

THIRD: The Certificate of Incorporation of the Corporation is hereby amended in its entirety and restated and integrated into a single instrument to read in full as set forth in the Amended and Restated Certificate of Incorporation of the Corporation attached hereto as Exhibit A and made a part hereof.

FOURTH: The Amended and Restated Certificate of Incorporation of the Corporation shall become effective at 8:30 a.m., Eastern Time, on June 30, 2004.

FIFTH: The Amended and Restated Certificate of Incorporation of the Corporation was proposed by the Board of Directors of the Corporation and was duly adopted in accordance with Section 228 of the General Corporation Law of the State of Delaware by the sole shareholder of the Corporation in the manner prescribed by Section 242 of the General Corporation Law of the State of Delaware.

SIXTH: The Amended and Restated Certificate of Incorporation of the Corporation was duly adopted in accordance with the provisions of Section 245 of the General Corporation Law of the State of Delaware.

IN WITNESS WHEREOF, the Corporation has caused this certificate to be signed by its officer thereunto duly authorized this 29th day of June, 2004.

ORMAT TECHNOLOGIES, INC.

By: /s/ Yehudit Bronicki

Name: Yehudit Bronicki
Title: Secretary

2

EXHIBIT A

AMENDED AND RESTATED
CERTIFICATE OF INCORPORATION
OF
ORMAT TECHNOLOGIES, INC.

FIRST: The name of the Corporation is Ormat Technologies, Inc.

SECOND: The Corporation's registered office in the State of Delaware is located at 15 E. North Street, in the City of Dover, County of Kent. The name and address of its registered agent is HIQ Corporate Services, Inc., 15 E. North Street, Dover, Delaware 19901.

THIRD: The nature of the business, or objects or purposes to be transacted, promoted or carried on, are: To engage in any lawful act or activity for which corporations may be organized under the General Corporation Law of the State of Delaware.

FOURTH: The total number of shares of all classes of stock which the Corporation shall have the authority to issue is Two Hundred Five Million (205,000,000), of which (i) Two Hundred Million (200,000,000) shares of par value of \$.001 each are to be of a class designated Common Stock (the "Common Stock") and (ii) Five Million (5,000,000) shares of par value of \$.001 are to be of a class designated Preferred Stock (the "Preferred Stock").

The shares of the Corporation outstanding as of June 29, 2004 (consisting of 200 shares of common stock par value \$1.00) are divided and

converted into 30,769,230 outstanding shares of Common Stock.

In this Article Fourth, any reference to a section or paragraph, without further attribution, within a provision relating to a particular class of stock is intended to refer solely to the specified section or paragraph of the provisions relating to the same class of stock.

COMMON STOCK

The Common Stock shall have the following voting powers, designations, preferences and relative, participating, optional and other special rights, and qualifications, limitations or restrictions thereof:

1. Dividends. Whenever the full dividends upon any outstanding Preferred Stock for all past dividend periods shall have been paid and the full dividends thereon for the then current respective dividend periods shall have been paid, or declared and a sum sufficient for the respective payments thereof set apart, the holders of shares of the Common Stock shall be entitled to receive such dividends and distributions in equal amounts per share, payable in cash or otherwise, as may be declared thereon by the Board of Directors from time to time out of assets or funds of the Corporation legally available therefor.

2. Rights on Liquidation. In the event of any liquidation, dissolution or winding-up of the Corporation, whether voluntary or involuntary, after the payment or setting apart for payment to the holders of any outstanding Preferred Stock of the full preferential amounts to which such holders are entitled as herein provided or referred to, all of the remaining assets of the Corporation shall belong to and be distributable in equal amounts per share to the holders of the Common Stock. For purposes of this paragraph 2, a consolidation or merger of the Corporation with any other corporation, or the sale, transfer or lease of all or substantially all its assets shall not constitute or be deemed a liquidation, dissolution or winding-up of the Corporation.

3. Voting. Except as otherwise provided by the laws of the State of Delaware or by this Article Fourth, each share of Common Stock shall entitle the holder thereof to one vote.

PREFERRED STOCK

The Preferred Stock may be issued from time to time in one or more series. The Board of Directors is hereby authorized to provide for the issuance of shares of Preferred Stock in series and, by filing a certificate pursuant to the applicable law of the State of Delaware (hereinafter referred to as a "Preferred Stock Designation"), to establish from time to time the number of shares to be included in each such series, and to fix the designation, powers, preferences and rights of the shares of each such series and the qualifications, limitations and restrictions thereof. The authority of the Board of Directors with respect to each series shall include, but not be limited to, determination of the following:

(a) the designation of the series, which may be by distinguishing number, letter or title;

(b) the number of shares of the series, which number the Board of Directors may thereafter (except where otherwise provided in the Preferred Stock

Designation) increase or decrease (but not below the number of shares thereof then outstanding);

(c) whether dividends, if any, shall be cumulative or noncumulative and the dividend rate of the series;

(d) the dates at which dividends, if any, shall be payable;

(e) the redemption rights and price or prices, if any, for shares of the series;

(f) the terms and amount of any sinking fund provided for the purchase or redemption of shares of the series;

(g) the amounts payable on shares of the series in the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Corporation;

(h) whether the shares of the series shall be convertible into shares of any other class or series, or any other security, of the Corporation or any other corporation, and, if so, the specification of such other class or series or such other security, the conversion price or prices or rate or rates, any adjustments thereof, the date or dates as of which such shares shall be convertible and all other terms and conditions upon which such conversion may be made;

(i) restrictions on the issuance of shares of the same series or of any other class or series; and

(j) the voting rights, if any, of the holders of shares of the series.

Except as may be provided in this Certificate of Incorporation or in a Preferred Stock Designation, the Common Stock shall have the exclusive right to vote for the election of directors and for all other purposes, and holders of Preferred Stock shall not be entitled to receive notice of any meeting of stockholders at which they are not entitled to vote. The number of authorized shares of Preferred Stock may be increased or decreased (but not below the number of shares thereof then outstanding) by the affirmative vote of the holders of a majority of the outstanding Common Stock, without a vote of the holders of the Preferred Stock, or of any series thereof, unless a vote of any such holders is required pursuant to any Preferred Stock Designation.

The Corporation shall be entitled to treat the person in whose name any share of its stock is registered as the owner thereof for all purposes and shall not be bound to recognize any equitable or other claim to, or interest in, such share on the part

of any other person, whether or not the Corporation shall have notice thereof, except as expressly provided by applicable law.

SERIES A JUNIOR PARTICIPATING PREFERRED STOCK

1. Designation and Amount. A series of Preferred Stock of par value \$.001 per share is hereby created and shall be designated as "Series A Junior Participating Preferred Stock" (the "Series A Preferred Stock") and the number of shares constituting the Series A Preferred Stock shall be Five Hundred Thousand (500,000). Such number of shares may be increased or decreased by

resolution of the Board of Directors; provided, that no decrease shall reduce the number of shares of Series A Preferred Stock to a number less than the number of shares then outstanding plus the number of shares reserved for issuance upon the exercise of outstanding options, rights or warrants or upon the conversion of any outstanding securities issued by the Corporation convertible into Series A Preferred Stock.

2. Dividends and Distributions.

2.1. Subject to the rights of the holders of any shares of any series of Preferred Stock (or any similar stock) ranking prior and superior to the Series A Preferred Stock with respect to dividends, the holders of shares of Series A Preferred Stock, in preference to the holders of Common Stock and of any other junior stock of the Corporation, shall be entitled to receive, when, as and if declared by the Board of Directors out of funds legally available for the purpose, quarterly dividends payable in cash on the second Monday of March, June, September and December in each year (each such date being referred to herein as a "Quarterly Dividend Payment Date"), commencing on the first Quarterly Dividend Payment Date after the first issuance of a share or fraction of a share of Series A Preferred Stock, in an amount per share (rounded to the nearest cent) equal to the greater of (a) \$1 or (b) subject to the provision for adjustment hereinafter set forth, 100 times the aggregate per share amount of all cash dividends, and 100 times the aggregate per share amount (payable in kind) of all non-cash dividends or other distributions, other than a dividend payable in shares of Common Stock or a subdivision of the outstanding shares of Common Stock (by reclassification or otherwise), declared on the Common Stock since the immediately preceding Quarterly Dividend Payment Date or, with respect to the first Quarterly Dividend Payment Date, since the first issuance of any share or fraction of a share of Series A Preferred Stock. In the event the Corporation shall at any time declare or pay any dividend on the Common Stock payable in shares of Common Stock, or effect a subdivision or combination or consolidation of the outstanding shares of Common Stock (by reclassification or otherwise than by payment of a dividend in shares of Common Stock) into a greater or lesser number of shares of Common Stock, then in each such case the amount to which holders of shares of Series A Preferred Stock were entitled immediately prior to such

4

event under clause (b) of the preceding sentence shall be adjusted by multiplying such amount by a fraction, the numerator of which is the number of shares of Common Stock outstanding immediately after such event and the denominator of which is the number of shares of Common Stock that were outstanding immediately prior to such event.

2.2. The Corporation shall declare a dividend or distribution on the Series A Preferred Stock as provided in paragraph 2.1 immediately after it declares a dividend or distribution on the Common Stock (other than a dividend payable in shares of Common Stock); provided that, in the event no dividend or distribution shall have been declared on the Common Stock during the period between any Quarterly Dividend Payment Date and the next subsequent Quarterly Dividend Payment Date, a dividend of \$1 per share on the Series A Preferred Stock shall nevertheless be payable on such subsequent Quarterly Dividend Payment Date.

2.3. Dividends shall begin to accrue and be cumulative on outstanding shares of Series A Preferred Stock from the Quarterly Dividend Payment Date next preceding the date of issue of such shares, unless the date of issue of such shares is prior to the record date for the first Quarterly Dividend Payment Date, in which case dividends on such shares shall begin to accrue from the date of issue of such shares, or unless the date of issue is a

Quarterly Dividend Payment Date or is a date after the record date for the determination of holders of shares of Series A Preferred Stock entitled to receive a quarterly dividend and before such Quarterly Dividend Payment Date, in either of which events such dividends shall begin to accrue and be cumulative from such Quarterly Dividend Payment Date. Accrued but unpaid dividends shall not bear interest. Dividends paid on the shares of Series A Preferred Stock in an amount less than the total amount of such dividends at the time accrued and payable on such shares shall be allocated pro rata on a share-by-share basis among all such shares at the time outstanding. The Board of Directors may fix a record date for the determination of holders of shares of Series A Preferred Stock entitled to receive payment of a dividend or distribution declared thereon, which record date shall be not more than 60 days prior to the date fixed for the payment thereof.

3. Voting Rights. The holders of shares of Series A Preferred Stock shall have the following voting rights:

3.1. Subject to the provision for adjustment hereinafter set forth, each share of Series A Preferred Stock shall entitle the holder thereof to 100 votes on all matters submitted to a vote of the stockholders of the Corporation. In the event the Corporation shall at any time declare or pay any dividend on the Common Stock payable in shares of Common Stock, or effect a subdivision or combination or consolidation of the outstanding shares of Common Stock (by reclassification or otherwise than by payment of a dividend in shares of Common

5

Stock) into a greater or lesser number of shares of Common Stock, then in each such case the number of votes per share to which holders of shares of Series A Preferred Stock were entitled immediately prior to such event shall be adjusted by multiplying such number by a fraction, the numerator of which is the number of shares of Common Stock outstanding immediately after such event and the denominator of which is the number of shares of Common Stock that were outstanding immediately prior to such event.

3.2. Except as otherwise provided herein, in any other Preferred Stock Designation creating a series of Preferred Stock or any similar stock, or by law, the holders of shares of Series A Preferred Stock and the holders of shares of Common Stock and any other capital stock of the Corporation having general voting rights shall vote together as one class on all matters submitted to a vote of stockholders of the Corporation.

3.3. Except as set forth herein, or as otherwise provided by law, holders of Series A Preferred Stock shall have no special voting rights and their consent shall not be required (except to the extent they are entitled to vote with holders of Common Stock as set forth herein) for taking any corporate action.

4. Certain Restrictions.

4.1. Whenever quarterly dividends or other dividends or distributions payable on the Series A Preferred Stock as provided in paragraph 2 are in arrears, thereafter and until all accrued and unpaid dividends and distributions, whether or not declared, on shares of Series A Preferred Stock outstanding shall have been paid in full, the Corporation shall not:

(a) declare or pay dividends, or make any other distributions,

on any shares of stock ranking junior (either as to dividends or upon liquidation, dissolution or winding up) to the Series A Preferred Stock;

(b) declare or pay dividends, or make any other distributions, on any shares of stock ranking on a parity (either as to dividends or upon liquidation, dissolution or winding up) with the Series A Preferred Stock, except dividends paid ratably on the Series A Preferred Stock and all such parity stock on which dividends are payable or in arrears in proportion to the total amounts to which the holders of all such shares are then entitled;

(c) redeem or purchase or otherwise acquire for consideration shares of any stock ranking junior (either as to dividends or upon liquidation, dissolution or winding up) to the Series A Preferred Stock, provided that the Corporation may

6

at any time redeem, purchase or otherwise acquire shares of any such junior stock in exchange for shares of any stock of the Corporation ranking junior (either as to dividends or upon dissolution, liquidation or winding up) to the Series A Preferred Stock; or

(d) redeem or purchase or otherwise acquire for consideration any shares of Series A Preferred Stock, or any shares of stock ranking on a parity with the Series A Preferred Stock, except in accordance with a purchase offer made in writing or by publication (as determined by the Board of Directors) to all holders of such shares upon such terms as the Board of Directors, after consideration of the respective annual dividend rates and other relative rights and preferences of the respective series and classes, shall determine in good faith will result in fair and equitable treatment among the respective series or classes.

4.2. The Corporation shall not permit any subsidiary of the Corporation to purchase or otherwise acquire for consideration any shares of stock of the Corporation unless the Corporation could, under subparagraph (c) of paragraph 4.1, purchase or otherwise acquire such shares at such time and in such manner.

5. Reacquired Shares. Any shares of Series A Preferred Stock purchased or otherwise acquired by the Corporation in any manner whatsoever shall be retired and cancelled promptly after the acquisition thereof. All such shares shall upon their cancellation become authorized but unissued shares of Preferred Stock and may be reissued as part of a new series of Preferred Stock subject to the conditions and restrictions on issuance set forth herein or in any other Preferred Stock Designation creating a series of Preferred Stock or any similar stock or as otherwise required by law.

6. Liquidation, Dissolution or Winding Up. Upon any liquidation, dissolution or winding up of the Corporation, no distribution shall be made (i) to the holders of shares of stock ranking junior (either as to dividends or upon liquidation, dissolution or winding up) to the Series A Preferred Stock unless, prior thereto, the holders of shares of Series A Preferred Stock shall have received \$100 per share, plus an amount equal to accrued and unpaid dividends and distributions thereon, whether or not declared, to the date of such payment, provided that the holders of shares of Series A Preferred Stock shall be entitled to receive an aggregate amount per share, subject to the provision for adjustment hereinafter set forth, equal to 100

times the aggregate amount to be distributed per share to holders of shares of Common Stock, or (ii) to the holders of shares of stock ranking on a parity (either as to dividends or upon liquidation, dissolution or winding up) with the Series A Preferred Stock, except distributions made ratably on the Series A Preferred Stock and all such parity stock in proportion to the total amounts to which the holders of all such shares are entitled upon such liquidation, dissolution or winding up. In the event the Corporation shall at any time declare or pay any dividend on

7

the Common Stock payable in shares of Common Stock, or effect a subdivision or combination or consolidation of the outstanding shares of Common Stock (by reclassification or otherwise than by payment of a dividend in shares of Common Stock) into a greater or lesser number of shares of Common Stock, then in each such case the aggregate amount to which holders of shares of Series A Preferred Stock were entitled immediately prior to such event under the proviso in clause (i) of the preceding sentence shall be adjusted by multiplying such amount by a fraction, the numerator of which is the number of shares of Common Stock outstanding immediately after such event and the denominator of which is the number of shares of Common Stock that were outstanding immediately prior to such event.

7. Consolidation, Merger, etc. In case the Corporation shall enter into any consolidation, merger, combination or other transaction in which the shares of Common Stock are exchanged for or changed into other stock or securities, cash and/or any other property, then in any such case each share of Series A Preferred Stock shall at the same time be similarly exchanged or changed into an amount per share, subject to the provision for adjustment hereinafter set forth, equal to 100 times the aggregate amount of stock, securities, cash and/or any other property (payable in kind), as the case may be, into which or for which each share of Common Stock is changed or exchanged. In the event the Corporation shall at any time declare or pay any dividend on the Common Stock payable in shares of Common Stock, or effect a subdivision or combination or consolidation of the outstanding shares of Common Stock (by reclassification or otherwise than by payment of a dividend in shares of Common Stock) into a greater or lesser number of shares of Common Stock, then in each such case the amount set forth in the preceding sentence with respect to the exchange or change of shares of Series A Preferred Stock shall be adjusted by multiplying such amount by a fraction, the numerator of which is the number of shares of Common Stock outstanding immediately after such event and the denominator of which is the number of shares of Common Stock that were outstanding immediately prior to such event.

8. No Redemption. The shares of Series A Preferred Stock shall not be redeemable.

9. Rank. The Series A Preferred Stock shall rank, with respect to the payment of dividends and the distribution of assets, junior to all series of any other class of the Corporation's Preferred Stock.

10. Amendment. The Certificate of Incorporation of the Corporation shall not be amended in any manner which would materially alter or change the powers, preferences or special rights of the Series A Preferred Stock so as to affect them adversely without the affirmative vote of the holders of the outstanding shares of Series A Preferred Stock, voting together as a single class.

8

FIFTH: The Corporation is to have perpetual existence.

SIXTH: The private property of the stockholders of the Corporation shall not be subject to the payment of corporate debts to any extent whatever.

SEVENTH: Subject to the rights of the holders of any series of Preferred Stock to elect additional directors under specified circumstances, the number of directors of the Corporation shall be fixed from time to time exclusively by the Board of Directors pursuant to a resolution adopted by a majority of the whole Board. A director need not be a stockholder. The election of directors of the Corporation need not be by ballot unless the By-Laws so require.

The directors, other than those who may be elected by the holders of any series of Preferred Stock or any other series or class of stock, as provided herein or in any Preferred Stock Designation, shall be divided into three classes, as nearly equal in number as possible. One class of directors shall be initially elected for a term expiring at the annual meeting of stockholders to be held in 2005, another class shall be initially elected for a term expiring at the annual meeting of stockholders to be held in 2006, and another class shall be initially elected for a term expiring at the annual meeting of stockholders to be held in 2007. Members of each class shall hold office until their successors are duly elected and qualified. At each annual meeting of the stockholders of the Corporation, commencing with the 2005 annual meeting, the successors of the class of directors whose term expires at that meeting shall be elected by a plurality vote of all votes cast for the election of directors at such meeting to hold office for a term expiring at the annual meeting of stockholders held in the third year following the year of their election.

Subject to the rights of the holders of any series of Preferred Stock or any other series or class of stock, as provided herein or in any Preferred Stock Designation, to elect additional directors under specific circumstances, any director may be removed from office at any time, but only for cause and only by the affirmative vote of the holders of at least 66 2/3% of the voting power of the then outstanding capital stock of the Corporation (the "Capital Stock") entitled to vote generally in the election of directors (the "Voting Stock"), voting together as a single class.

Subject to the rights of the holders of any series of Preferred Stock, and unless the Board of Directors otherwise determines, newly created directorships resulting from any increase in the authorized number of directors or any vacancies on the Board of Directors resulting from death, resignation, retirement, disqualification, removal from office or other cause may be filled only by a majority vote of the directors then serving on the Board, though less than a quorum, and directors so chosen shall hold office for a term expiring at the annual meeting of stockholders at which the term of office of the

class to which they have been elected expires and until such director's successor shall have been duly elected and qualified. No decrease in the number of authorized directors constituting the whole Board of Directors shall shorten the term of any incumbent director.

No director of the Corporation shall be liable to the Corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, except for liability (i) for any breach of the director's duty of loyalty to the Corporation or its stockholders, (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (iii) under Section 174 of the General Corporation Law of the State of Delaware, or (iv) for any transaction from which the director derived an improper personal benefit. No repeal or modification of this paragraph,

directly or by adoption of an inconsistent provision of this Certificate of Incorporation, by the stockholders of the Corporation shall be effective with respect to any cause of action, suit, claim or other matter that, but for this paragraph, would accrue or arise prior to such repeal or modification.

EIGHTH: Unless otherwise determined by the Board of Directors, no holder of stock of the Corporation shall, as such holder, have any right to purchase or subscribe for any stock of any class which the Corporation may issue or sell, whether or not exchangeable for any stock of the Corporation of any class or classes and whether out of unissued shares authorized by the Certificate of Incorporation of the Corporation as originally filed or by any amendment thereof or out of shares of stock of the Corporation acquired by it after the issue thereof.

NINTH: Whenever a compromise or arrangement is proposed between this Corporation and its creditors or any class of them and/or between this Corporation and its stockholders or any class of them, any court of equitable jurisdiction within the State of Delaware may, on the application in a summary way of this Corporation or of any creditor or stockholder thereof, or on the application of any receiver or receivers appointed for this Corporation under the provisions of Section 291 of Title 8 of the General Corporation Law of the State of Delaware or on the application of trustees in dissolution or of any receiver or receivers appointed for this Corporation under the provisions of Section 279 of Title 8 of the General Corporation Law of the State of Delaware order a meeting of the creditors or class of creditors, and/or of the stockholders or class of stockholders of this Corporation, as the case may be, to be summoned in such manner as the said court directs. If a majority in number representing three-fourths in value of the creditors or class of creditors, and/or of the stockholders or class of stockholders of this Corporation, as the case may be, agree to any compromise or arrangement and to any reorganization of this Corporation as a consequence of such compromise or arrangement, the said compromise or arrangement and the said reorganization shall, if sanctioned by the court to which said application has been made,

10

be binding on all the creditors or class of creditors, and/or on all the stockholders or class of stockholders, of this Corporation, as the case may be, and also on this Corporation.

TENTH:

1. Amendment of Certificate of Incorporation. From time to time any of the provisions of the Certificate of Incorporation may be amended, altered or repealed, and other provisions authorized by the statutes of the State of Delaware at the time in force may be added or inserted in the manner at the time prescribed by said statutes, and all rights at any time conferred upon the stockholders of the Corporation by its Certificate of Incorporation are granted, subject to this reservation.

2. By-Laws. The Board of Directors is expressly authorized to make, alter, amend and repeal the By-Laws of the Corporation, in any manner not inconsistent with the laws of the State of Delaware or of the Certificate of Incorporation of the Corporation, subject to the power of the holders of the Capital Stock to alter or repeal the By-Laws made by the Board of Directors.

ELEVENTH:

1. Written Consent in Lieu of Meeting. Any action which could be taken at any annual or special meeting of stockholders may be taken without a meeting, without prior notice and without a vote, if a consent or consents in writing, setting forth the action so taken, shall (a) be signed by the holders

of outstanding stock having not less than the minimum number of votes that would be necessary to authorize or take such action at a meeting at which all shares entitled to vote thereon were present and voted and (b) be delivered to the corporation by delivery to its registered office in the State of Delaware, its principal place of business, or an officer or agent of the corporation having custody of the records of proceedings of meetings of stockholders.

2. Special Meeting of Stockholders. A special meeting of the stockholders for any purpose or purposes, unless otherwise provided by law, may be called by the Chairman of the Board, the President, the Board or the holders of not less than a majority of all the outstanding shares of the corporation entitled to vote at the meeting may call special meetings of the stockholders for any purpose or, at any time that Ormat Industries Ltd. or any OIL Transferee owns at least 20% of the then outstanding shares of Common Stock, by Ormat Industries Ltd. or any OIL Transferee. For purposes of this Section 2 of Article Eleventh, "OIL Transferee" shall mean a transferee of Ormat Industries Ltd. or any other OIL Transferee that receives at least 20% of the then outstanding shares of Common Stock that pursuant to an instrument of transfer or related agreement has been granted rights under this Section 2 of Article Eleventh by Ormat Industries Ltd. or any OIL Transferee.

WHEREAS the Borrower has requested the Bank to grant it a loan in the total principal sum of 20,000,000\$ (Twenty million US dollar) (hereinafter; the

"Loan") with interest, in accordance with the terms and conditions set forth below; and

WHEREAS the Bank is prepared to grant the Borrower the requested Loan upon the terms and conditions hereinafter stipulated;

NOW, THEREFORE, IT IS HEREBY AGREED AND DECLARED BETWEEN THE PARTIES AS FOLLOWS:

1. The Preamble hereto constitutes an integral part hereof.
2. The Bank hereby agrees to grant a loan to the Borrower and the Borrower hereby agrees to borrow from the Bank the total principal sum of 20,000,000\$ (Twenty million US dollar).
3. The Borrower confirms that the Loan shall be deemed to have been granted by the Bank and received by the Borrower upon the Bank crediting the account of ORMAT TECHNOLOGIES INC. Account No. 101455 maintained at the 461-Tel Aviv main Branch of the Bank with the proceeds of the Loan.
4. The Borrower undertakes to repay to the Bank the principal amount of the Loan in 1 payment of \$20,000,000 within 18 months.
5. (a) The Borrower shall pay interest as calculated by the Bank on the balance of the principal amount of the Loan outstanding from time to time as from the date on which such principal amount is granted to the Borrower (hereinafter; the "Drawdown Date") at a rate (hereinafter the "Interest Rate") which shall be:-
 - (i) Commitment fee at the rate of 0.25% (zero point twenty five per cent) per annum, which will be paid at the day of the granted loan.
 - (ii) at the of the rate of 1.2% (one point two per cent) per annum in excess of the London Interbank Offered Rate (hereinafter; the "Floating Rate"*)

such interest to be payable in arrears commencing on the Drawdown Date and on the last day of each successive Interest Period, as hereinafter defined (hereinafter; the "Interest Payment Date") and at maturity.

(*Kindly indicate whether the Fixed Rate or the Floating Rate is to prevail).

- (b) In the event that the Floating Rate is to prevail, the Interest Rate in respect of the principal amount of the Loan shall be determined once every [deleted_text]three*[/deleted_text]/six* months in advance, depending on availability, by reference to the London Interbank Offered Rate, on the respective Date of Determination, as hereinafter defined, and shall be calculated on the balance thereof from time to time outstanding during the next period of [deleted_text]three*[/deleted_text]/six* months (each such period, hereinafter; an "Interest Period").

(*Kindly delete as applicable).

For the purpose of determining and calculating the Interest Rate, "LIBOR" shall mean the annual rate of interest appearing on the Telerate screen Page 3750 or Page 3740 (as appropriate) or any equivalent successor to such page or other page as appropriate (as determined by the Bank) at or about 11.00 AM (London Time), on the Date of Determination as being the interest rate offered in the London Interbank Market for deposits in the relevant currency for a period equal to the Interest Period

"Date of Determination" shall mean with regard to all Interest Periods, two Business Days prior to the commencement of any such Interest Period.

For the purposes hereof, the term "Business Day" shall mean a day of the year other than a Saturday or Sunday or a day on which banks in Israel, London or the financial centre of the relevant currency of the Loan are authorized or required to remain closed.

- (c) All computations of interest hereunder shall be made by the Bank on the basis of a year of 360 days (consisting of four 90-day quarters) or, in the case of interest payable on an amount denominated in Sterling or where market practice otherwise dictates 365 days, for the actual number of days lapsed (including the first day but excluding the last day) occurring in the period for which such interest is payable.
- (d) The Borrower hereby undertakes to pay to the Bank the following commissions:

[deleted_text]

- |_| *(i) A commission at the rate of ____ % (____ per cent) of the total amount of the Loan to be paid on the Drawdown Date.

[/deleted_text]

- |_| *(ii) A commission charged for the opening of the loan file [deleted_text] 2500\$ at the rate of ____ % (____ per cent) of the total amount of the Loan (being an amount of not less than _____ and not more than _____) to be paid on the Drawdown Date.

(*Kindly indicate as applicable).

- (e) Whenever any payment to be made hereunder shall be stated to be due, or whenever the last day of any Interest Period would otherwise occur on a day other than a Business Day, such payments shall be made, and the last day of such Interest Period shall occur, on the next succeeding Business Day. Any such change in time of payment shall be taken into account in the computation of payment of interest.
6. (a) On giving not less than 14 (fourteen) Business Days' prior written notice, the Borrower may prepay on any Interest Payment Date all or any part of the Loan, principal and interest, provided that any amount so prepaid shall be in a minimum sum of not less than 2,000,000\$ and provided that the Bank shall receive [deleted_text] full compensation from the Borrower for costs incurred by the Bank in reemploying such prepaid funds. [/deleted_text] Compensation as stipulated in clause 31.2.3 in the "General condition for credit activity". Each prepayment made pursuant to this Agreement may not be reborrowed hereunder and any notice of prepayment given by the Borrower shall be irrevocable and the Borrower shall be bound to prepay in accordance with such notice.
- (b) Whenever the Borrower is overdue in repaying any of the payments due and payable by it under this Agreement, the Bank shall charge the Borrower with respect to any such overdue payment with arrears of interest at a rate equal to L+6% (Libor + six _ per centum) per annum. [deleted_text] in excess of the Interest Rate determined pursuant to Clause 5 herein. [/deleted_text] Arrears of interest may be capitalized by the Bank periodically once every three or six months, as determined by the Bank at its sole discretion.
7. (a) The Borrower's obligation to repay the principal, any amount of interest on and/or other amounts in connection with the Loan shall be absolute and unconditional, regardless of any law, regulation or decree now or hereafter in effect in any country or other jurisdiction (including, without limitation, restrictions on payments in any

currency) which might render

invalid or unenforceable, or otherwise alter or affect in any manner, any of the terms and conditions of the Loan of this Agreement or any rights or obligations hereunder, and all payments by the Borrower shall be made in full without set-off or counterclaim.

- (b) All payments required to be made under this Agreement shall be made to the Bank free of any taxes, deductions or charges and without set-off or counterclaim, in lawful and freely transferable currency and in funds available to the Bank or at any other place nominated by the Bank and not prohibited for that purpose by any applicable law, provided that 5 (five) days' prior notice thereof shall have been given to the Borrower by the Bank, except for any taxes withheld by any relevant authorities at source, in which case the Borrower hereby undertakes to furnish to the Bank a certificate setting forth and confirming the amount so deducted in accordance thereto, which certificate shall be prima facie evidence of the amount set forth therein.
- (c) If the Borrower is prevented by operation of law from effecting payment, free of any deduction, taxes, duties, fees, costs or other charges, or from paying, causing to be paid or remitting the same, the payment of interest under this Agreement shall be increased to such amount as is necessary to yield and remit to the Bank interest at the rate specified in this Agreement after provision for payment of such deduction, taxes, duties, fees, costs or other charges. The Borrower shall at the request of the Bank executed and deliver to the Bank such instruments as may be necessary or desirable to give full force and effect to such increase in the Interest Rate.
- (d) In the event that any law or regulation shall be interpreted by any governmental authority charged with the administration thereof to:
 - (i) Subject the Bank to any form of tax payable in respect of this Agreement or to any tax with respect to payments of principal of or interest on the Loan or to change the basis of taxation of payments to the Bank of principal of or interest on the Loan (except for taxes on the overall income of the Bank); or
 - (ii) Impose, modify or deem applicable any reserve requirements against assets held by, or deposits on or for the account of, or loans received by the Bank; or
 - (iii) Impose, modify or deem applicable any withholding tax against interest payable by the Bank on deposits or loans received by the Bank; or
 - (iv) Impose on the Bank any other condition with respect to this Agreement,

and the result of any of the foregoing shall in the opinion of the Bank be to increase the cost to the Bank of making or funding the Loan by an amount which the Bank deems to be material then, upon demand being made to the Borrower by the Bank, the Borrower shall pay to the Bank that amount which shall compensate the Bank for such additional cost in respect of the Loan. The Bank shall use its best efforts promptly to notify the Borrower of any event which may entitle the Bank to payment pursuant to the preceding sentence but failure by the Bank to give any such notification shall in no way prejudice its rights hereunder. A certificate by a duly authorised officer of the Bank, setting forth the amount of such payment and the basis therefor shall be sent by the Bank to the Borrower and shall except in the case

of manifest error be conclusive evidence of such amount. All mentioned above is subject to clause 45.6 in "General conditions for credit activity".

8. If as a result of the introduction of or any change in or in the interpretation of any law or regulation, whether by any court, central bank, other governmental authority or otherwise, it shall become (or be claimed to be) unlawful for the Bank to continue to fund or maintain the Loan or to perform any of its obligations in connection therewith, the Bank and the Borrower undertake to cooperate in good faith in pursuing any reasonable possibility to restructure the Loan so that it will be valid and binding. However, if all attempts fail to accomplish such a restructuring within a reasonable period of time, upon demand by the Bank, the Borrower shall forthwith (and in any event not later than the next Interest Payment Date) prepay in full the unpaid principal amount of

3

the Loan together with accrued interest thereon and all other amounts payable by the Borrower hereunder, all without penalty or premium.

9. (a) On or before the advancement of the Loan and/or as security for the full and punctual payment of all sums now or hereafter to become due to the Bank by the Borrower, the Borrower hereby undertakes to furnish to the Bank the following securities:

Full Guarantee of ORMAT INDUSTRIES LTD (mother company)_____

- (b) The full and punctual payment of all sums now or hereafter to become due to the Bank from the Borrower hereunder shall be secured by any and all securities given or to be given to the Bank from time to time by the Borrower and/or for the Borrower.

10. On the happening of any one of the events specified in section 24 in "General conditions for credit activity", the Bank will be entitled to demand the immediate repayment of any amount owing to the Bank from the Borrower on account of the Loan or in accordance with this Agreement and such amount shall thenceforth become immediately due and repayable to the Bank until the repayment thereof in full:

[deleted_text]

- (a) If any sum due from the Borrower to the Bank under this Agreement is not paid when and as the same shall become due and payable and such sum is not paid within a period of 15 (fifteen) days; or
- (b) If an order shall be made or a resolution passed for the winding up of the Borrower or if the Borrower be otherwise in liquidation; or
- (c) If a receiver, trustee or similar officer is appointed over any of the assets of the Borrower and such appointment is not cancelled within 30 (thirty) days; or
- (d) If the Borrower commits an act of bankruptcy, enters into a scheme or arrangement with its creditors, or convenes a meeting for the purpose of entering into a scheme or arrangement with its creditors, or applies to a court for the purpose of approving a scheme or arrangement with its creditors, or admits its inability to pay its debts when due and shall continue for a period of 30 (thirty) days; or
- (e) If any representation or warranty or obligation made by the Borrower in Clause 11 is or proves to have been incorrect when made or the Borrower is in breach of any obligation under Clause 14; or
- (f) If the Borrower ceases or threatens to cease all or a substantial part

of its operations or transfers or disposes of (otherwise than in the ordinary course of business) all or a substantial part of its assets whether by one or a series of transactions related or not.

[/deleted_text]

11. In the event that the Borrower is a company, the Borrower represents and warrants as follows:
- (a) The Borrower is a corporation duly incorporated, validly existing and in good standing under the laws of the jurisdiction indicated at the beginning of this Agreement.
 - (b) The execution, delivery and performance by the Borrower of this Agreement are within the Borrower's corporate powers, have been duly authorized by all necessary corporate action, and do not contravene (i) the Borrower's Memorandum and Articles of Association or equivalent constitutional documents (ii) any law or any contractual restriction binding on or affecting the Borrower.
 - (c) The Agreement is a legal, valid and binding obligation of the Borrower enforceable against the Borrower according to its terms, and such obligation ranks and will rank at least parri passu in all respects with all other unsecured obligations of the Borrower.

4

[deleted_text]

- (d) No charges, pledges or encumbrances, floating or fixed, exist over all or any of the present or future revenues or assets of the Borrower.

[/deleted_text]

- (e) There is no pending or threatened action or proceeding affecting the Borrower before any court, governmental agency or arbitrator, which may materially adversely affect the financial condition or operations of the Borrower.

12. [deleted_text] The Bank shall have a lien and/or a first ranking pledge and/or charge on all monies and/or securities and/or claims and/or goods, and other property, assets and/or rights of the Borrower, that shall be held by the Bank, whether the same shall be held directly or indirectly by the Borrower or in any company of which the Borrower is a shareholder, until payment in full of all amounts due from the Borrower to the Bank hereunder. All mentioned in this clause is subject to clause 11 in "General conditions for credit activity".[/deleted_text]

[deleted_text]

13. The Bank shall be entitled to appropriate and/or to discharge any amount owed by the Borrower pursuant to this Agreement, any amount had or received by the Bank for or on account of the Borrower, notwithstanding that any amount so had or received was intended by the Borrower or any third party to be appropriated for or on account of any other amount.

[/deleted_text]

14. (a) [deleted_text] The Borrower hereby undertakes, at the request of the Bank, to execute and deliver to the Bank such instruments which in the sole opinion of the Bank shall be necessary or desirable to give full force and effect to any clause in this Agreement.[/deleted_text]
- (b) [deleted_text] The Borrower undertakes not to create or have outstanding any charge, pledge or encumbrance, fixed or floating, or over any of its present or future reserves or assets[/deleted_text]

15. Should any undertaking of the Borrower contained in this Agreement be contrary to any applicable law, such undertaking shall be severable from all remaining parts of this Agreement and the validity of the remainder shall not be affected.
16. [deleted_text] All the costs and expenses (including[/deleted_text] stamp duties shall be paid by the Borrower.
17. Any waiver on the part of either party hereto in favour of the other party in respect of a previous breach or non-compliance of one or more of such other party's obligations hereunder shall not be deemed to be a justification or excuse for an additional breach or noncompliance of any provision or obligation of the Agreement. The invalidity or unenforceability of any provisions hereof shall not affect or impair the validity or enforceability of any other provisions hereof. The remedies herein provided are cumulative and not exclusive of any remedies provided by law.
18. (a) For the purpose of this Agreement, the expression "written" or "in writing" shall mean "by letter, facsimile, SWIFT, cable or telex.
- (b) Any demand for payment of any amounts due and payable under this Agreement and any notice in writing required or permitted to be made hereunder shall, if made by letter, be deemed to be sufficiently made if addressed as follows:
- (i) In the case of a demand or notice to the Borrower at the address set forth above; and _P.O.B 68, Derech Shidlovsky st., Yavne_____
-
- (ii) In the case of a demand or notice to the Bank, at: __48 Lilienblum st. Tel Aviv 65134_____
-
- and posted to them or served on them personally there or left for them there and in proving such service in case of postage it shall be sufficient to show that the letter containing such demand or notice was properly addressed, stamped and posted by registered airmail for service to be deemed to have been effected within 7 (seven) days after the date of posting.

5

- (c) Any demand for payment of any amount due and payable under the Agreement and any notice in writing required or permitted to be made hereunder shall, if made by cable, facsimile, SWIFT or telex, be deemed to be sufficiently made if addressed as follows:
- (i) In the case of a demand or notice to the Borrower -
Telex Number:___001-775-356-9079_____
Facsimile Number:___001-775-356-9039_____
- (ii) In the case of a demand or notice to the Bank -
Telex Number: 33625, 341225-6 MIZBK IL
Facsimile Number: 972-3-7557916-1630 or
972-3-5679916

and any such facsimile, cable, SWIFT or telex properly addressed and sent shall be deemed to have been received within 12 (twelve) hours after the time of sending.

(d) Each of the parties hereto shall be entitled at any time and from time to time to give the other party notice in writing of any change in any of the addresses relating to the party giving such notice, and paragraphs (b) and (c) of this Clause shall be deemed modified by and in accordance with every such notice of change.

19. This Agreement shall be governed by, and construed in accordance with, the laws of the State of Israel.
20. The parties agree that the Courts of the City of Tel Aviv shall have non-exclusive jurisdiction over any dispute arising from or in connection with the existence, the interpretation, the performance, enforcement or the termination of this Agreement, but nothing herein contained shall derogate from the right of the Bank to institute, at its sole choice and discretion, proceedings against the Borrower in any other competent courts wheresoever situated.
21. This Agreement shall enter into force as of the day and year first above written after having been signed by both parties.

IN WITNESS WHEREOF, the Bank and the Borrower have caused this Agreement to be duly executed at the respective places and on the respective dates below written.

Exhibit 10.1.2

AMENDED AND RESTATED BRIDGE LOAN AGREEMENT

This AMENDED AND RESTATED BRIDGE LOAN AGREEMENT (this "Agreement") is made as of October 2, 2003 by and between ORMAT NEVADA, INC. (the "Borrower"), a Delaware corporation having its principal place of business at 980 Greg Street, Sparks, Nevada 89431-6039, and BANK LEUMI USA (the "Bank"), a New York State chartered banking institution with its office at 564 Fifth Avenue, New York, NY 10036.

The Borrower and the Bank heretofore entered into a Bridge Loan Agreement, made as of May 2, 2002, which was subsequently amended by a First Amendment made as of July 11, 2002, and letter agreements dated April 30 and July 2, 2003 (the said Bridge Loan Agreement as so amended is the "Initial Agreement"). This Agreement amends, restates and supersedes the Initial Agreement.

1. DEFINITIONS

Certain capitalized terms are defined below:

Affiliate: Any individual, corporation, partnership, trust, unincorporated association, business, or other legal entity that would be considered to be an affiliate of the Borrower under Rule 144(a) of the Rules and Regulations of the Securities and Exchange Commission, as in effect on the date hereof, if the Borrower were issuing securities.

Agreement: See preamble, which term shall include this Agreement and the Schedules hereto, all as amended and in effect from time to time.

Bank: Bank Leumi USA.

BLITA: Bank Leumi Le-Israel B.M., an Israeli banking institution and an Affiliate of the Bank.

Borrower: Ormat Nevada, Inc.

Business Day: Any day on which banks in New York, NY, are open for business generally.

Charter Documents: In respect of any entity, the certificate or articles of incorporation or organization and the by-laws of such entity, or other constitutive documents of such entity.

Commitment: The undertaking of the Bank, subject to the terms and conditions of this Agreement, to make Loans to the Borrower up to an aggregate outstanding principal amount not to exceed the Commitment Amount; provided, however, that the Bank is in receipt of a Standby Letter of Credit in an amount which is not less than 105% of the intended outstanding principal amount of each Loan (which Standby Letter of Credit shall be a condition precedent to making such Loan).

Commitment Amount: \$20,000,000.

Consent: In respect of any person or entity, any permit, license or exemption from, approval, consent of, registration or filing with any local, state or federal governmental or regulatory agency or authority, required under applicable law.

Default: An event or act which with the giving of notice and/or the lapse of time, would become an Event of Default.

Drawdown Date: In respect of any Loan, the date on which such Loan is made to the Borrower.

Environmental Laws: All laws pertaining to environmental matters, including without limitation, the Resource Conservation and Recovery Act, the Comprehensive Environmental Response Compensation and Liability Act of 1980, the Superfund Amendments and Reauthorization Act of 1986, the Federal Clean Water Act, the Federal Clean Air Act, the Toxic Substances Control Act, in each case as amended, and all rules, regulations, judgments, decrees and orders arising under all such laws.

ERISA: The Employee Retirement Income Security Act of 1974, as amended, and all rules, regulations, judgments, decrees, and orders arising thereunder.

Event of Default: Any of the events listed as such in the Restated Note or in (section) VIII hereof.

Federal Funds Effective Rate: For any day, the rate per annum equal to the weighted average of the rates on overnight federal funds transactions with members of the Federal Reserve System arranged by federal

funds brokers, as published for such day (or, if such day is not a Business Day, for the next preceding Business Day) by the Federal Reserve Bank of New York, or, if such rate is not so published for any day that is a Business Day, the average of the quotations for such day on such transactions received by the Bank from three funds brokers of recognized standing selected by the Bank.

Financials: In respect of any period, the balance sheet of any person or entity as at the end of such period, and the related statement of income and statement of cash

2

flow for such period, each setting forth in comparative form the figures for the previous comparable fiscal period, all in reasonable detail and prepared in accordance with GAAP.

GAAP: Generally accepted accounting principles consistent with those adopted by the Financial Accounting Standards Board and its predecessor, as in effect from time to time.

Indebtedness: In respect of any entity, all obligations, contingent and otherwise, that in accordance with GAAP should be classified as liabilities, including without limitation (i) all debt obligations, (ii) all liabilities secured by Liens, (iii) all guarantees and (iv) all liabilities in respect of bankers' acceptances or letters of credit.

Interest Period: As defined in the Restated Note.

Liens: Any encumbrance, mortgage, pledge, hypothecation, charge, restriction or other security interest of any kind securing any obligation of any entity or person.

Loan: Any loan made or to be made to the Borrower pursuant to (section) II hereof.

Loan Documents: This Agreement, the Restated Note and the Standby Letter of Credit in each case as from time to time amended or supplemented.

Loan Request: See (section) 2.1.

Materially Adverse Effect: Any materially adverse effect on the financial condition or business operations of the Borrower or material impairment of the ability of the Borrower to perform its obligations hereunder or under any of the other Loan Documents.

Maturity Date: February 2, 2005, or such earlier date on which all Loans may become due and payable pursuant to the terms hereof.

Obligations: All indebtedness, obligations and liabilities of the Borrower to the Bank, existing on the date of this Agreement or arising thereafter, direct or indirect, joint or several, absolute or contingent, matured or unmatured, liquidated or unliquidated, secured or unsecured, arising by contract, operation of law or otherwise, arising or incurred under this Agreement or any other Loan Document or in respect of any of the Loans or the Restated Note or other instruments at any time evidencing any thereof.

Requirement of Law: In respect of any person or entity, any law, treaty, rule, regulation or final and binding determination of an arbitrator, court, or other

3

governmental authority, in each case applicable to or binding upon such person or entity or affecting any of its property.

Restated Note: See (section) 2.1 .

Standby Letter of Credit: One or more unconditional, irrevocable standby letters of credit in a total amount of not less than 105% of the outstanding principal amount of each Loan made up to the Commitment Amount issued by BLITA in favor of the Bank, and expiring not earlier than thirty (30) days after the Maturity Date. The Standby Letter of Credit shall be available for drawing at any given time in an amount equal to the sum of the then outstanding principal, accrued interest and other amounts payable with respect to the Loans.

2. BRIDGE LOAN FACILITY

2.1 Commitment to Lend.

(a) On the terms and subject to the conditions of this Agreement, the Bank agrees to lend to the Borrower such sums that the Borrower may request, from the date hereof until, but not including, the Maturity Date, provided that the sum of the outstanding principal amount of all Loans (after giving effect to amounts requested) shall at no time exceed the then applicable Commitment Amount.

(b) The Commitment Amount is Twenty Million Dollars (\$20,000,000).

(c) Loans shall be in the minimum aggregate amount of \$1,000,000 or an integral multiple thereof. The Borrower shall deliver to the Bank and to BLITA in writing or telephonically a notice of the principal amount of each requested Loan. Each such notice must be received by the Bank and by BLITA not later than 12:00 p.m. New York time three Business Days before the Drawdown Date (which must be a Business Day). Subject to the foregoing, so long as the Commitment is then in effect and the conditions set forth in Section VI hereof are fully satisfied as of such Drawdown Date, the Bank shall advance the amount requested to the Borrower's account at the Bank in immediately available funds not later than the close of business on such Drawdown Date. The obligation of the Borrower to repay to the Bank the principal of the Loans and interest accrued thereon is evidenced by an amended and restated promissory note (the "Restated Note"), dated as of even date with this Agreement, in the maximum aggregate principal amount of \$20,000,000.00 executed and delivered by the Borrower and payable to the order of the Bank, in form and substance satisfactory to the Bank.

4

2.2 Interest. The Borrower shall pay interest on the Loans in accordance with the terms of the Restated Note.

2.3 Repayments, Prepayments and Reborrowings.

(a) The Borrower shall pay to the Bank on the Maturity Date the entire unpaid principal of and interest on all Loans.

(b) The Borrower may elect to prepay the outstanding principal of all or any part of any Loan, without premium or penalty, in a minimum amount of \$1,000,000 or an integral multiple thereof, upon written notice to the Bank given by 10:00 a.m. New York time on the Business Day before the date of such prepayment, of the amount to be prepaid. If prepayment is made on a date other than the last day of an Interest Period, Borrower shall also pay to the Bank additional compensation as prescribed in the Restated Note.

(c) Each repayment or prepayment of principal of any Loan shall be accompanied by payment of the unpaid interest accrued to such date on the principal being repaid or prepaid.

(d) The Borrower may elect to reduce or terminate the Commitment

Amount by a minimum principal amount of \$2,000,000 or an integral multiple thereof, upon written notice to the Bank given by 10:00 a.m. New York time at least two (2) Business Days prior to the date of such reduction or termination. The Borrower shall not be entitled to increase or reinstate the Commitment Amount following such reduction or termination.

3. CHANGES IN CIRCUMSTANCES

If after the date hereof the Bank determines that (i) the adoption of or any change in any banking law, rule, regulation or guideline or the administration thereof (whether or not having the force of law), or (ii) compliance by the Bank or its parent bank holding company with any guideline, request or directive (whether or not having the force of law), has the effect of reducing the return on the Bank's or such holding company's capital as a consequence of the Commitment or the Loans to a level below that which the Bank or such holding company could have achieved but for such adoption, change or compliance by any amount deemed by the Bank to be material, the Bank may notify the Borrower thereof. The Borrower agrees to pay the Bank the amount of the Borrower's allocable share of the amount of such reduction in the return on capital as and when such reduction is determined, upon presentation by the Bank of a statement in the amount and setting forth the Bank's calculation thereof, which statement shall be deemed true and correct absent manifest error. The Bank agrees to allocate shares of such

5

reduction among the Borrower and the Bank's other customers similarly situated on a fair and nondiscriminatory basis.

4. FEES AND PAYMENTS

4.1 Up-front Fees. Contemporaneously with execution and delivery of this Agreement, the Borrower shall pay to the Bank a one-time total up-front fee in the amount of \$20,000.

4.2 Commitment Fees. Until the earlier of the Maturity Date or the date upon which the Commitment is no longer in effect, the Borrower shall pay to the Bank, on the first day of each calendar quarter hereafter, and upon the Maturity Date or the date upon which the Commitment is no longer in effect, a commitment fee calculated at a rate per annum which is equal to one quarter percent (1/4%) of the average daily difference by which the then applicable Commitment Amount exceeds the aggregate of the outstanding Loans during the preceding calendar quarter or portion thereof.

4.3 Manner of Payment. All payments to be made by the Borrower under this Agreement shall be made in U.S. dollars in immediately available funds at the Bank's office at 564 Fifth Avenue, New York, NY 10036 without set-off or counterclaim and without any withholding or deduction whatsoever. The Bank shall be entitled to charge any account of the Borrower with the Bank for any sum due and payable by the Borrower to the Bank hereunder, or under any of the other Loan Documents. If any payment hereunder is required to be made on a day which is not a Business Day, it shall be paid on the immediately preceding Business Day. All computations of interest or of the commitment fee payable hereunder shall be made by the Bank on the basis of actual days elapsed and on a 360-day year. The aggregate unpaid amount of Loans set forth on the Bank's internal records shall be prima facie evidence of the principal amount thereof owing and unpaid to the Bank, but the failure to record, or any error in so recording, any such amount on the Bank's records shall not affect the obligations of the Borrower hereunder or under the Restated Note to make payments of principal of and interest on the Restated Note when due.

5. REPRESENTATIONS AND WARRANTIES

The Borrower represents and warrants to the Bank on the date

hereof, on the date of any Loan Request, and on each Drawdown Date that:

(a) the Borrower is duly organized, validly existing, and in good standing under the laws of the State of Delaware, is duly qualified and in good standing in every other jurisdiction where it is doing business, and the execution, delivery and performance by the Borrower of the Loan Documents (i) are within its corporate

6

authority, (ii) have been duly authorized, and (iii) do not conflict with or contravene its Charter Documents;

(b) upon execution and delivery thereof, each Loan Document shall constitute the legal, valid and binding obligation of the Borrower, enforceable in accordance with its terms;

(c) the Borrower has good and marketable title to all its material properties, and possesses all assets, including intellectual properties, franchises and Consents, adequate for the conduct of its business as now conducted, without known conflict with any rights of others;

(d) the Borrower has provided to the Bank its unaudited Financials as at December 31, 2002, and for the period then ended, and such Financials are complete and correct and fairly present the position of the Borrower as at such date and for such period in accordance with GAAP consistently applied;

(e) since December 31, 2002, there has been no materially adverse change of any kind in the Borrower which would have a Materially Adverse Effect;

(f) there are no legal or other proceedings or investigations pending or threatened against the Borrower before any court, tribunal or regulatory authority which would, if adversely determined, alone or together, have a Materially Adverse Effect;

(g) the execution, delivery, performance of its obligations, and exercise of its rights under the Loan Documents by the Borrower, including borrowing under this Agreement (i) do not require any Consents; and (ii) are not and will not be in conflict with or prohibited or prevented by (A) any Requirement of Law, or (B) any Charter Document, corporate minute or resolution, instrument, agreement or provision thereof, in each case binding on it or affecting its property; and

(h) the Borrower is not in violation of (i) any Charter Document, corporate minute or resolution, (ii) any instrument or agreement, in each case binding on it or affecting its property, or (iii) any Requirement of Law, in a manner which could have a Materially Adverse Effect.

6. CONDITIONS PRECEDENT

In addition to the making of the foregoing representations and warranties, the payment of fees, and the delivery of the Loan Documents, the obligation of the Bank to

7

make each Loan hereunder shall be subject to the satisfaction, as of the date of the funding of each such Loan, of the following further conditions precedent:

(a) BLITA shall have advanced funds to the Bank in the amount of such Loan;

(b) the Standby Letter of Credit shall be in full force and effect;

(c) the representations and warranties of the Borrower to the Bank shall be true and correct in all material respects as of the time made or claimed to have been made;

(d) no Default or Event of Default shall be continuing;

(e) all proceedings in connection with the transactions contemplated hereby shall be in form and substance satisfactory to the Bank, and the Bank shall have received all information and documents as it may have reasonably requested;

(f) no change shall have occurred in any law or regulation or in the interpretation thereof that in the reasonable opinion of the Bank would make it unlawful for the Bank to make such Loan; and

(g) prior to the funding of the first Loan under this Agreement, the Bank shall have received the legal opinion of counsel to the Borrower, substantially in the form attached as Exhibit A.

7. COVENANTS

7.1 Affirmative Covenants. The Borrower agrees that until the termination of the Commitment and the payment and satisfaction in full of all the Obligations, the Borrower will comply with its obligations as set forth throughout this Agreement and will:

(a) furnish the Bank: (i) as soon as available but in any event within ninety (90) days after the close of each fiscal year, its Financials, prepared in accordance with GAAP, for such fiscal year, in such form as is satisfactory for inclusion in the audited Financials of Ormat Industries Ltd. (the ultimate parent company), and certified by the Borrower's accountants; (ii) as soon as available but in any event within sixty (60) days after the end of each fiscal quarter its unaudited Financials for such quarter, certified by its chief financial officer; and (iii) together with the quarterly and annual audited Financials, a certificate of the Borrower certifying that no Default or Event of Default has occurred, or if it has, the actions taken by the Borrower with respect thereto;

8

(b) keep true and accurate books of account, maintain its current fiscal year and permit the Bank or its designated representatives to inspect the Borrower's premises during normal business hours and to examine and be advised as to such or other business records upon the request of the Bank;

(c) (i) maintain its corporate existence, business and assets, (ii) keep its business and assets adequately insured, (iii) maintain its chief executive office in the United States, (iv) continue to engage in the same lines of business, and (v) comply with all Requirements of Law, including ERISA and Environmental Laws;

(d) notify the Bank promptly in writing of (i) the occurrence of any Default or Event of Default, (ii) any material noncompliance with ERISA or any Environmental Law or proceeding in respect thereof which could have a Materially Adverse Effect, (iii) any change of address, (iv) any threatened or pending litigation or similar proceeding affecting the Borrower or any Affiliate which could have a Materially Adverse Effect, or any material adverse change in any such litigation or proceeding previously reported, and (v) material claims against any assets or properties of the Borrower or any of its Affiliates encumbered in favor

of the Bank; and

(e) cooperate with the Bank, take such action, execute such documents, and provide such information as the Bank may from time to time reasonably request in order further to effect the transactions contemplated by and the purposes of the Loan Documents.

7.2 Negative Covenants. The Borrower agrees that until the termination of the Commitment and the payment and satisfaction in full of all the Obligations, the Borrower will not, without the prior written consent of the Bank:

(a) make any distributions on or in respect of its capital of any nature whatsoever to its shareholders in their capacity as shareholders;

(b) become party to a merger or sale-leaseback transaction, or effect any disposition of assets other than in the ordinary course.

8. EVENTS OF DEFAULT; ACCELERATION

Each of the following shall constitute an Event of Default under this Agreement:

9

(a) the Borrower shall fail to pay when due and payable any principal of the Loans when the same becomes due;

(b) the Borrower shall fail to pay interest on the Loans or any other sum due under any of the Loan Documents within two (2) Business Days after the date on which the same shall have first become due and payable;

(c) the Borrower shall fail to perform any term, covenant or agreement contained in (sections) 7.1(c)(i) and 7.2;

(d) the Borrower shall fail to perform any other term, covenant or agreement contained in any Loan Document within fourteen (14) days after the Bank has given written notice of such failure to the Borrower;

(e) any representation or warranty of the Borrower in the Loan Documents or in any certificate or notice given in connection therewith shall have been false or misleading in any material respect at the time made or deemed to have been made;

(f) the Borrower, or any Affiliate of Borrower, shall be in default (after any applicable period of grace or cure period) under any agreement evidencing Indebtedness owing to the Bank, or shall fail to pay such Indebtedness when due (after any applicable period of grace or cure period);

(g) any of the Loan Documents shall cease to be in full force and effect;

(h) the Borrower (i) shall make an assignment for the benefit of creditors, (ii) shall be adjudicated bankrupt or insolvent, (iii) shall seek the appointment of, or be the subject of an order appointing, a trustee, liquidator or receiver as to all or part of its assets, (iv) shall commence, approve or consent to, any case or proceeding under any bankruptcy, reorganization or similar law and, in the case of an involuntary case or proceeding, such case or proceeding is not dismissed within forty-five (45) days following the commencement thereof, or (v) shall be the subject of an order for relief in an involuntary case under federal bankruptcy law;

(i) the Borrower shall be unable to pay its debts as they mature;

(j) there shall remain undischarged for more than thirty (30) days any final judgment or execution action against the Borrower that, together with other outstanding claims and execution actions against the Borrower exceeds \$200,000 in the aggregate;

(k) the commencement of a foreclosure proceeding affecting any Approved Geothermal Project;

10

(l) the Borrower, or any Affiliate of Borrower, shall be in default (after any applicable period of grace or cure period) under any agreement evidencing Indebtedness owing to BLITA, or to any Affiliate of BLITA other than the Bank, or shall fail to pay such Indebtedness when due (after any applicable period of grace or cure period); or

(m) a change in the financial condition or affairs of Borrower which in the reasonable opinion of the Bank materially reduces Borrower's ability to pay all the Obligations.

If any of the Events of Default shall occur and be continuing, then, or at any time thereafter:

(a) In the case of any Event of Default under clause (h) or (i), the Commitment shall automatically terminate, and the entire unpaid principal amount of the Loans, all interest accrued and unpaid thereon, and all other amounts payable thereunder and under the other Loan Documents shall automatically become forthwith due and payable, without presentment, demand, protest or notice of any kind, all of which are hereby expressly waived by the Borrower;

(b) In the case of any Event of Default under clause (a) or (b), the Bank may, by written notice to the Borrower, terminate the Commitment and/or declare the unpaid principal amount of the Loans, all interest accrued and unpaid thereon, and all other amounts payable hereunder and under the other Loan Documents to be forthwith due and payable, without presentment, demand, protest or further notice of any kind, all of which are hereby expressly waived by the Borrower; and

(c) In the case of any Event of Default other than (a), (b), (h) or (i), the Bank may, by two (2) Business Days' prior written notice to the Borrower, and where such Event of Default has not been cured during such period, terminate the Commitment and/or declare the unpaid principal amount of the Loans, all interest accrued and unpaid thereon, and all other amounts payable hereunder and under the other Loan Documents to be forthwith due and payable, without presentment, demand, protest or further notice of any kind, all of which are hereby expressly waived by the Borrower.

No remedy herein conferred upon the Bank is intended to be exclusive of any other remedy and each and every remedy shall be cumulative and in addition to every other remedy hereunder, now or hereafter existing at law or in equity or otherwise.

11

9. SETOFF

Regardless of the adequacy of any collateral for the Obligations, any deposits or other sums credited by or due from the Bank to the Borrower may be applied to or set off against any principal, interest and any other amounts due from the Borrower to the Bank at any time without notice to the Borrower, or

compliance with any other procedure imposed by statute or otherwise, all of which are hereby expressly waived by the Borrower.

10. MISCELLANEOUS

(a) The Borrower agrees to indemnify and hold harmless the Bank, its officers, employees, affiliates, agents, and controlling persons from and against all claims, damages, liabilities and losses of every kind, including reasonable legal fees, arising out of the Loan Documents, and including claims in respect of the application of Environmental Laws to the Borrower, absent the gross negligence and willful misconduct of the Bank.

(b) The Borrower shall pay to the Bank promptly on demand in accordance with the mutual agreement of the Bank and the Borrower reasonable costs and expenses (including reasonable legal fees) incurred by the Bank in connection with the subsequent amendment, administration or enforcement of any of the Loan Documents, provided that the costs and expenses incurred with respect to the execution and preparation of this Agreement, and the related documents by counsel to the Bank shall not exceed the maximum amount of US\$ 7,000.

(c) Any communication to be made hereunder shall (i) be made in writing, but unless otherwise stated, may be made by facsimile transmission or letter, and (ii) be made or delivered to the address of the party receiving notice which is identified with its signature below (unless such party has by five (5) days' written notice specified another address), and shall be deemed made or delivered, when dispatched, left at that address, or five (5) days after being mailed, postage prepaid, to such address.

(d) This Agreement shall be binding upon and inure to the benefit of each party hereto and its successors and assigns, but the Borrower may not assign its rights or obligations hereunder. This Agreement may not be amended or waived except by a written instrument signed by the Borrower and the Bank, and any such amendment or waiver shall be effective only for the specific purpose given. No failure or delay by the Bank to exercise any right hereunder shall operate as a waiver thereof, nor shall any single or partial exercise of any right, power or privilege preclude any other right, power or privilege. The provisions of this Agreement are severable and if any one provision hereof shall be held invalid or unenforceable in whole or in part in any jurisdiction, such

12

invalidity or unenforceability shall affect only such provision in such jurisdiction. This Agreement, together with all Schedules hereto, expresses the entire understanding of the parties with respect to the transactions contemplated hereby. This Agreement and any amendment hereby may be executed in several counterparts, each of which shall be an original, and all of which shall constitute one agreement. In proving this Agreement, it shall not be necessary to produce more than one such counterpart executed by the party to be charged.

(e) THIS AGREEMENT AND THE RESTATED NOTE ARE CONTRACTS UNDER THE LAWS OF THE STATE OF NEW YORK AND SHALL BE CONSTRUED IN ACCORDANCE THEREWITH AND GOVERNED THEREBY. THE BORROWER AGREES THAT ANY SUIT FOR THE ENFORCEMENT OF ANY OF THE LOAN DOCUMENTS MAY BE BROUGHT IN THE COURTS OF THE STATE OF NEW YORK OR ANY FEDERAL COURT SITTING THEREIN. The Borrower, as an inducement to the Bank to enter into this Agreement, hereby waives its right to a jury trial with respect to any action arising in connection with any Loan Document.

(f) In the event of inconsistency between this Agreement and any other Loan Document, the provisions of this Agreement shall control.

IN WITNESS WHEREOF, the undersigned have duly executed this Bridge Loan Agreement as a sealed instrument as of the date first above written.

vi CREDIT FACILITY AGREEMENT

CREDIT FACILITY AGREEMENT

CREDIT FACILITY AGREEMENT (this "Agreement"), dated as of September 5, 2000 (the "Effective Date"), between ORMAT MOMOTOMBO POWER COMPANY, an exempted limited liability company incorporated and existing under the laws of the Cayman Islands, (the "Borrower") and BANK HAPOALIM B.M., a commercial bank organized and existing under the laws of the State of Israel, as lender ("Lender"). Capitalized terms used herein shall have the meanings set forth in Appendix A, unless otherwise defined herein.

WITNESSETH:

WHEREAS, the Borrower has requested the Lender to make a credit facility (the "Credit") available to it on the terms and subject to the conditions set forth in this Agreement, for the purpose of financing the Project in Nicaragua as more fully described in the Agreement of Association in Participation and in the Business Plan; and

WHEREAS, the Lender is willing to provide the Credit to the Borrower on the terms and subject to the conditions set forth in this Agreement, for the purpose described above;

NOW, THEREFORE, the parties hereto agree as follows:

ARTICLE 1. DEFINED TERMS AND PRINCIPLES OF CONSTRUCTION

SECTION 1.01. DEFINED TERMS AND PRINCIPLES OF CONSTRUCTION. For all purposes of this Agreement, (a) capitalized terms used but not otherwise defined herein shall have the meanings set forth in Appendix A attached hereto and (b) the principles of construction set forth in Appendix A shall apply.

ARTICLE 2. AMOUNT AND TERMS OF THE CREDIT

SECTION 2.01 THE TOTAL COMMITMENT. Subject to the terms and conditions of this Agreement, the Lender agrees to make available to the Borrower, during the applicable Availability Period, the Loans not to exceed the Total Commitment amount of \$48,235,000 in two tranches identified as Loan I and Loan II as follows:

(a) Loan I. An amount up to \$11,435,000 on account of Loan I to finance up to 70% of the costs of Phase I of the Project; and

(b) Loan II. An amount up to \$36,800,000 on account of Loan II to finance up to (i) an amount equal to 75% of costs of Phase II of the Project, plus (ii) an amount equal to 5% of the costs of Phase I of the Project (the "Additional Amount").

(c) No Reborrowing. The Loans are not revolving in nature, and any amounts repaid, prepaid or canceled pursuant to the terms of this Agreement may not be reborrowed.

(d) Benefit of Collateral. Any and all amounts due to the Lender with respect to the Loans under this Agreement and any other Financing Documents are entitled to the benefit of the Collateral which is held by the Lender pursuant to the terms of the Security Documents and the Sponsor Project Funding Agreement.

CREDIT FACILITY AGREEMENT

(e) Availability. For the purpose of making Disbursements hereunder: (i) Loan I will be available during the Loan I Availability Period; and, (ii) Loan II will be available during the Loan II Availability Period. The Loan I Availability Period and the Loan II Availability Period shall run consecutively, but not concurrently, unless otherwise agreed by the Lender.

SECTION 2.02 PROCEDURES FOR DISBURSEMENT OF THE LOANS.

(a) Procedure. Subject to the terms specified in this Section 2.02, the Borrower may submit to the Lender from time to time, but not more frequently than once per month, a properly executed Application for Funding in the form of Schedule 2.02 ("Application for Funding") for Disbursements to be made in accordance with the Business Plan as: (i) reimbursements to the Borrower for payments previously made to Project contractors, subcontractors, suppliers, vendors and other Persons; (ii) advances to the Borrower for payment for work performed or to be performed by Project contractors, subcontractors, suppliers, vendors and other Persons for amounts payable by the Borrower within thirty (30) days following the date of Disbursement in each case as budgeted in the Business Plan; (iii) advances to fund MIGA premium payments in accordance with Section 5.41; (iv) advances to fund the payment of fees under Section 2.05; and (v)

advances to fund payments by the Borrower of Attorney Costs and other expenses incurred by the Lender pursuant to Section 7.03(b)(i). The Borrower shall use such Application for Funding to request each Disbursement under (i) Loan I during the Loan I Availability Period and (ii) Loan II during the Loan II Availability Period. The Borrower shall submit each such Application for Funding at least twelve (12) Business Days prior to the date on which a Disbursement is requested. No Application for Funding shall request a Disbursement (i) in excess of the then unutilized and uncanceled amount of the Loan I or Loan II Commitment, respectively, less the amount required to permit the Lender to fund the Borrower's obligation under Section 5.33 (nor shall the aggregate amount of the Disbursements exceed the Total Commitment), or (ii) that is less than \$300,000 (except with respect to the last Disbursement in respect of each Loan). Except in the case of the first Application for Funding submitted under Loan I, each Application for Funding shall include an implementation report, prepared and executed by the Borrower's representative in accordance with Section 5.01(f).

(b) Adherence to Business Plan. All amounts requested under each Application for Funding shall be consistent with the Business Plan. The Lender shall not disburse all or any part of the amounts requested in an Application for Funding (i) for which all conditions precedent for the making of such Disbursement have not been satisfied or waived pursuant to this Agreement or (ii) with respect to Disbursements to be made under Loan II, as to which documentation required to be delivered to the Lender or the Lender's Engineer, as the case may be, has not been timely delivered by the Borrower. With respect to Loan II, the making of any Disbursement thereunder shall be contingent on the Lender's receipt four Business Days prior to the date on which a Disbursement is requested of a certificate from the Lender's Engineer appointed under Section 5.36(a) hereof to the effect that the costs incurred or to be paid are reasonable and appropriate for the value of the work performed or to be performed and that such work is in conformity with the Business Plan.

(c) Errors in Applications for Funding. If any Application for Funding shall be disapproved in whole or in part on the basis of errors contained therein or on the basis of incompleteness of such Application for Funding, the Lender will cooperate in good faith with the Borrower in the Borrower's efforts to correct any and all such errors or incompleteness so as to

permit the making of a Disbursement in a timely manner (taking into account the due date for the payment of Project Costs which are the subject of such Application for Funding). The Borrower acknowledges that, as a result of any such disapproval of an Application for Funding, the date on which a Disbursement is actually approved and/or proceeds actually disbursed may be later than the date requested in such Application for Funding.

(d) Fundings under Sponsor Project Funding Agreement. All disbursements to be made by the Sponsor pursuant to the Sponsor Project Funding Agreement shall be made in accordance with the terms thereof, and it shall not be necessary for the Borrower to submit an Application for Funding in connection therewith. The Borrower shall certify to the Lender in each Application for Funding that the amounts required to be disbursed to the Borrower in accordance with the terms of the Sponsor Project Funding Agreement have been made as of the date of the requested Disbursement.

(e) Loan Disbursement Account. All Disbursements, irrespective of whether made as reimbursements or advances shall be made to the Borrower's current account with the New York Branch of the Lender.

SECTION 2.03 INTEREST.

(a) Interest Rate and Payment. Interest shall accrue and be payable in arrears on each Interest Payment Date on the outstanding balances of Loan I and Loan II, respectively, at the rate of LIBOR plus 2.5% per annum until the beginning of the first Interest Period following the completion date of Phase I with respect to Loan I, and the completion date of Phase II with respect to Loan II, at which time the interest rate on each such Loan shall be LIBOR plus 2.375% per annum (the "Interest Rate").

(b) Capitalized Interest Payment.

(i) Loan I. On each Interest Payment Date until the first scheduled Loan I Principal Repayment Date, interest at the Interest Rate due on each such date with respect to Loan I shall be capitalized by adding such amount to the outstanding balance of Loan I.

(ii) Loan II. On each Interest Payment Date until the first scheduled Loan II Principal Repayment Date, interest at the Interest Rate due on each such date with respect to Loan II, shall be capitalized by adding such amount to the outstanding balance of Loan II.

(c) Additional Interest. With respect to any other interest due to the Lender, on each Interest Payment Date, the Borrower shall pay to the Lender interest in respect of each Interest Period, on the daily unpaid principal amounts of any Loan outstanding during such Interest Period, in arrears, at the rates per annum equal to the Interest Rates in effect applicable to each such period (or at such other interest rates as may be specified in this Article 2).

(d) Overdue Interest. Without prejudice to the remedies available to the Lender under this Agreement or otherwise, the Borrower shall pay, in Dollars, interest at the rate of LIBOR Overnight Rate plus 4.50% on any principal amount of any Loan or any other amount which is due under this Agreement which is not paid when due (whether by lapse of time, acceleration, requirement for mandatory prepayment or otherwise), for each day that such amount remains unpaid until payment in full thereof.

(e) Computation of Interest. Interest shall be computed on the basis of the actual number of days elapsed in the relevant Interest Period and a year of 360 days.

SECTION 2.04 REPAYMENT.

(a) Loan I. The principal of Loan I shall be repaid in 32 consecutive equal payments, commencing on the Principal Repayment Date occurring on the earlier of (i) 27 months from the Effective Date or (ii) the last day of the Interest Period ending not sooner than thirty (30) days following receipt of a Phase I Completion Certificate, and on each Principal Repayment Date thereafter.

(b) Loan II. The principal of Loan II shall be repaid in 28 equal consecutive payments, commencing on the Principal Repayment Date occurring after the earlier of (i) 63 months from the Effective Date or (ii) the last day of the Interest Period which ends at least 30 days following receipt of a Phase II Completion Certificate, but in no event later than 39 months after the Loan II Closing Date, and on each Principal Repayment Date thereafter.

SECTION 2.05 FEES.

(a) Commitment Fee.

(i) Loan I. The Borrower shall pay to the Lender a commitment fee (the "Loan I Commitment Fee") which shall be at the rate of 0.25% per annum of the difference, determined as of the relevant due date, between (A) the Loan I Commitment and (B) the drawn amount under Loan I. The Loan I Commitment Fee shall begin to accrue with retroactive effect as of March 15, 2000 and shall be increased to 0.50% per annum on the Effective Date.

(ii) Loan II. The Borrower shall pay to the Lender a commitment fee (the "Loan II Commitment Fee") which shall be at the rate of 0.25% per annum of the difference, determined as of the relevant due date, between (A) the Loan II Commitment and (B) the drawn amount under Loan II. The Loan II Commitment Fee shall begin to accrue with retroactive effect as of March 15, 2000 and shall be increased to 0.50% per annum on the Loan II Closing Date.

Commitment Fee shall accrue from day to day, beginning on March 15, 2000, and shall be computed on the basis of the actual number of days elapsed and a year of 360 days. Commitment Fee shall be due and payable in advance, on March 15, 2000 and every three months thereafter until the first Interest Payment Date and on every Interest Payment Date thereafter, terminating on the last day of the Loan II Availability Period or upon such earlier date as the Total Commitment is reduced to zero or the undisbursed amount thereafter is cancelled or terminated.

(b) Arrangement Fee. The Borrower shall pay a non-refundable arrangement fee (the "Arrangement Fee") equal to 0.25% of the Total Commitment within 30 days of the Effective Date, but in no event later than the first Disbursement under Loan I.

(c) Front-End Fee. The Borrower shall pay a non-refundable, front-end fee (the "Front-End Fee") in the amount of 1.25% of the Total Commitment, payable in two installments. The first installment shall be due and payable on the Loan I Closing Date and shall be equal to 1.25%

of the Loan I Commitment plus 0.3125% of the Loan II Commitment; the second installment shall be due and payable on the Loan II Closing Date and shall be equal to 0.9375% of the Loan II Commitment.

SECTION 2.06 PAYMENTS.

(a) Time and Place of Payment. Except as otherwise specifically provided herein, all payments to be made by the Borrower under this Agreement shall be made in full in Same Day Funds, without retention, set-off or counter claim and free and clear of any deductions and charges, not later than 12:00 p.m. (New York time) on the date upon which the relevant payment is due, to the Lender's account No. 373700001501 with Bank Hapoalim B.M., 1177 Avenue of the Americas, New York, N.Y., 10036, mentioning "Ormat/Momotombo Project", or to such other account as the Lender may designate from time to time by written notice to the Borrower five Business Days prior to the date on which any payment is made by the Borrower hereunder. The Borrower shall advise the Lender by facsimile of the payment about to be made by the Borrower.

(b) Payment on a Business Day. If any date for any payment under this Agreement shall not be a Business Day then such payment shall be made on the next succeeding Business Day and interest (or Commitment Fee, as the case may

be) shall continue to accrue for the period from such due date to the next succeeding Business Day.

SECTION 2.07 PAYMENT ALLOCATION. Any payment made by the Borrower to the Lender and any other amount received by the Lender under any of the Financing Documents (excluding voluntary prepayments received by the Lender pursuant to Section 2.11) shall be applied as follows: (i) against charges, fees, costs and expenses due to the Lender; (ii) against interest on interest which became overdue, if any, with respect to the Loans; (iii) against interest on principal of the Loans which became overdue, if any; (iv) against interest due on the Loans; and thereafter, (v) against the principal amount of the Loans due and payable applied pro-rata to Loan I and Loan II and applied pro-rata to installments within each such Loan, and any remaining amount shall be paid or returned to the Borrower unless there is an Event of Default which is continuing.

SECTION 2.08 CURRENCY OF PAYMENT. The obligation of the Borrower to pay all amounts payable under this Agreement shall be in Dollars and shall not be deemed to have been novated, discharged or satisfied by any tender of (or recovery under judgment expressed in) any currency other than Dollars, except to the extent to which such tender (or recovery) shall result in the effective payment of such aggregate amount in Dollars at the place where such payment is to be made and, accordingly, the amount (if any) by which any such tender (or recovery) shall fall short of such aggregate amount shall be and remain due to the Lender, as a separate obligation, unaffected by judgment having been obtained (if such is the case) for any other amounts due under or in respect of this Agreement.

SECTION 2.09 TAXES.

(a) Payments Free and Clear of Taxes. Any and all payments by the Borrower to the Lender under this Agreement and any other Financing Document shall be made free and clear of

5

and without deduction or withholding for any Taxes. In addition, the Borrower shall pay all Other Taxes.

(b) Indemnity. The Borrower agrees to indemnify and hold harmless the Lender for the full amount of Taxes or Other Taxes (including any Taxes or Other Taxes imposed on amounts payable under this Section 2.09) paid by the Lender and any liability (including penalties, interest, additions to tax and expenses) arising therefrom or with respect thereto, whether or not such Taxes or Other Taxes were correctly or legally asserted. Payment under this indemnity shall be made within 30 days after the date the Lender makes written demand therefor.

(c) Gross-Up. If the Borrower shall be required by law to deduct or withhold any Taxes or Other Taxes from or in respect of any sum payable hereunder or under any Financing Document to the Lender, then:

(i) the sum payable shall be increased as necessary so that, after making all required deductions and withholdings (including deductions and withholdings applicable to additional sums payable under this Section 2.09), the Lender receives an amount equal to the sum it would have received had no such deductions or withholdings been made;

(ii) the Borrower shall make such deductions and withholdings;
and

(iii) the Borrower shall pay the full amount deducted or

withheld to the relevant taxing authority or other authority in accordance with Applicable Law.

(d) Receipts. Within 30 days after the date of any payment by the Borrower of Taxes or Other Taxes, the Borrower shall furnish to the Lender the original or a certified copy of a receipt evidencing payment thereof, or other evidence of payment satisfactory to the Lender.

(e) Mitigation. If the Borrower is required to pay additional amounts to the Lender pursuant to Section 2.09(c), then the Lender shall endeavor to use reasonable efforts (consistent with legal and regulatory restrictions) as may be available to it to mitigate the effect of such circumstances, including booking the Loans in a different jurisdiction so as to minimize any such additional payment by the Borrower which may thereafter accrue, if such change in the judgment of the Lender is not otherwise disadvantageous to the Lender.

(f) Claims Against Lender. The Lender shall give notice to the Borrower of the assertion of any claim against the Lender relating to the Lender's Taxes or Other Taxes as promptly as is practicable after being notified of such assertion; provided that any failure to notify the Borrower promptly of such assertion shall not relieve the Borrower of its obligations under this Section 2.09.

(g) Survival. Without prejudice to the survival of any other agreement of the Borrower under this Agreement or any other Project Document, the provisions set forth in this Section 2.09 shall survive the payment of all amounts due to the Lender under Loan I and Loan II, respectively.

SECTION 2.10 TERMINATION OF TOTAL COMMITMENT. The Lender may terminate the Total Commitment upon the occurrence of an Event of Default in accordance with the provisions of Article 6 hereof. The Borrower may cancel the undisbursed amount of the Total Commitment

with the consent of the Lender upon the Lender's satisfaction that such amounts are not needed to complete the Project. The Borrower may also cancel the Total Commitment on account of Loan II either (i) if the Borrower decides not to commence Phase II and notifies the Lender of its decision and that it does not plan to commission the Technical Report referred to in Section 4.04, or (ii) upon delivery to the Lender of a Phase II Completion Certificate in accordance with Section 5.35 hereof.

SECTION 2.11 VOLUNTARY PREPAYMENT. Subject to any required Governmental Approvals having been obtained, the Borrower shall have the right, at any time on at least 30 but not more than 60 days' prior written notice to the Lender, to prepay all or a part of the principal amount then outstanding of the Loans, without premium or penalty; provided that (a) no prepayment of any part of any Loan shall be made on a day which is not the last day of an Interest Period with respect thereto, (b) the amount of such prepayment is applied pro rata to Loan I and Loan II and applied pro rata to outstanding installments of principal within each Loan, (c) all accrued interest on the principal amount of the Loans to be prepaid and all other amounts then due to the Lender hereunder are paid at the same time, and (d) in the case of partial prepayment, such prepayment shall be in an amount equal to \$500,000 or more in integral multiples of \$500,000.

SECTION 2.12 INTENTIONALLY OMITTED.

SECTION 2.13 FUNDING COSTS. If, as a result of (a) any failure by the Borrower to pay when due the principal amount of or interest on any Loan (or

portion thereof), (b) any failure by the Borrower to make a borrowing of any Loan after the Borrower has made a request for disbursement, (c) any failure by the Borrower to make any prepayment of any Loan after the Borrower has given any notice required hereunder regarding such prepayment or (d) the making of a payment or prepayment (including, without limitation, on acceleration) on a day which is not the last day of an Interest Period with respect thereto, the Lender shall incur any costs, expenses or losses, then the Borrower shall pay, upon request by the Lender, the amount which the Lender shall notify the Borrower as being the aggregate of such costs, expenses and losses. For the purposes of the preceding sentence, "costs, expenses or losses" shall include, without limitation, any interest paid or payable to carry any unpaid amount and any loss, premium, penalty or expense which may be incurred in liquidating or employing deposits of or borrowings from third parties in order to make, maintain or fund the Loans or any portion thereof.

SECTION 2.14 MAINTENANCE AMOUNT.

(a) Obligation to Pay. On each Interest Payment Date, the Borrower shall pay in addition to interest on the Loans, the amount which the Lender shall from time to time notify to the Borrower as the aggregate of the Maintenance Amount (as defined in subsection (b) below), if any, of the Lender, accrued and unpaid prior to such Interest Payment Date.

(b) Definitions. For the purposes of subsection (a) above, the following terms shall have the following meanings:

(i) "Maintenance Amount" means the amount, if any, certified in the Maintenance Amount Certification to be the net incremental costs of the Lender with respect to the making or maintaining of any Loan which result from (A) any change in, or introduction of,

any Applicable Law and/or (B) any compliance with any request from, guideline or requirement of, any central bank or other monetary or other comparable authority or any Governmental Authority (whether or not having the force of law), which in either case, subsequent to the date of this Agreement, shall:

(A) impose, modify or deem applicable any reserve, capital adequacy (only to the extent such capital adequacy requirement is generally applicable to financial institutions that are subject to the same regulatory controls as the Lender), special deposit or similar requirements against assets held by, or deposits with or for the account of, or Loans by, the Lender;

(B) impose a cost on the Lender as a result of its having made, funded or maintained any Loan or its commitment to make, fund or maintain any Loan, or reduce the rate of return on the overall capital of the Lender which it would have been able to achieve if it had not made or committed itself to make such Loan;

(C) change the basis of taxation on payments received by the Lender in respect of its Loans otherwise than by a change in taxation of the overall net income of the Lender; or

(D) impose on the Lender any other condition regarding the making or maintaining of the Loans; and

(ii) "Maintenance Amount Certification" means a certification furnished from time to time by the Lender to the Borrower, certifying:

(A) the circumstances giving rise to the Maintenance Amount;

(B) that such net costs have increased and that such net costs are within the definition of Maintenance Amount;

(C) that, in the opinion of the Lender it has exercised reasonable efforts to minimize or eliminate such increase; and

(D) the Maintenance Amount.

(c) Optional Prepayment. Notwithstanding anything in Section 2.11, and subject to any Governmental Approvals having been obtained (including from the Central Bank), the Borrower shall have the right on any Interest Payment Date for the Loans, upon not less than thirty (30) days' prior written notice to the Lender (which notice shall be irrevocable and shall bind the Borrower to make the prepayment specified below) and upon payment of all accrued interest and Maintenance Amount (if any) on the amount to be prepaid, to prepay all or, as the case may be, that portion of the Loans with respect to which the Lender informs the Borrower that Maintenance Amount is then being charged.

SECTION 2.15 ILLEGALITY.

(a) Illegality of Total Commitment or Loan. Notwithstanding any other provision of this Agreement, if, subsequent to the date of this Agreement, the making, funding or continuance of

the Total Commitment or any Loan has been made (i) unlawful by any change made in any Applicable Law, (ii) impossible by compliance by the Lender with any request of a Governmental Authority (whether or not having force of law) or (iii) impracticable as a result of a contingency occurring after the Effective Date which materially and adversely affects the London interbank dollar market, the Borrower shall, upon notice by the Lender (but subject to the approval of the appropriate Governmental Authorities (including the Central Bank), which the Borrower agrees to take all reasonable steps to obtain as quickly as possible, if such approval is then required), prepay in full and on the next occurring Interest Payment Date unless the effect of the Applicable Law, request or contingency requires earlier or immediate repayment, in which case, on such earlier date or immediately, as relevant, that portion of the principal amount of the Loans affected thereby together with all accrued interest and Maintenance Amount (if any) thereon and all amounts, if any, determined by the Lender to be payable to it pursuant to Section 2.13 hereof. In addition, the Total Commitment of the Lender to make Loans similar to those affected by the foregoing shall terminate immediately.

(b) Illegality of Interest Rate. Notwithstanding any other provision of this Agreement, if, subsequent to the date of this Agreement, the making, funding or continuance by the Lender of a Disbursement or any Loan bearing interest based on LIBOR has been made (i) unlawful by any change made in any Applicable Law, (ii) impossible by compliance by the Lender with any request of a Governmental Authority (whether or not having the force of law), then the Lender shall promptly give notice thereof to the Borrower and the obligation of the Lender to make or continue Loans bearing interest based on LIBOR shall be immediately suspended and during such suspension be converted into an obligation bearing interest at the rate per annum equal to the Base Rate plus 2.375%; provided, however, that if the Lender determines that it may lawfully continue to maintain and fund any outstanding Loans bearing interest based on LIBOR until the end of the applicable Interest Period then in effect with respect thereto, upon written notice from the Borrower to the Lender, such outstanding Loans shall be converted into Loans bearing interest at the rate per annum equal to

the Base Rate plus 2.375% on the last day of the then current Interest Period applicable to such Loans.

SECTION 2.16 SUBSTITUTE BASIS OF BORROWING. If, on or before the first day of any Interest Period relating to the Loans, either (a) the Lender determines that, for whatever reason, deposits in Dollars for a period equal to such Interest Period or in the relevant amounts are not being offered to the Lender in the London interbank market or (b) the Lender gives notice to the Borrower that the Interest Rate then in effect based on LIBOR for such Interest Period does not adequately reflect the cost to the Lender of making, funding or otherwise maintaining the Loans for such Interest Period, the Lender shall promptly notify the Borrower of such event. Thereafter, the obligations of the Lender to make or maintain the Loans bearing interest at LIBOR shall be suspended until the Lender revokes such notice in writing and interest for such Interest Period with respect to a scheduled Disbursement and for outstanding Loans for which interest is then scheduled to be determined shall accrue at the rate per annum equal to the Base Rate plus 2.375%.

SECTION 2.17 MITIGATION PROVISION. The Lender agrees that (a) as promptly as practicable after it becomes aware of the occurrence of an event or the existence of a condition arising after the date hereof that would cause it to be affected under Section 2.13 and (b) as promptly as practicable after it has made a determination to make a claim for amounts under Sections 2.13, 2.14 or 2.15, as the case may be, with respect to events or conditions arising after

the date hereof, it shall notify the Borrower of the same and use commercially reasonable efforts (consistent with legal and regulatory restrictions and the Lender's internal policies) to mitigate the effect of such provisions on the Borrower, including (i) in the case of Sections 2.13, 2.14 or 2.15, efforts to make, fund, issue or maintain its Loans, as relevant, through another office of the Lender, and (ii) in the case of Section 2.15, efforts to reemploy amounts held by the Lender, (A) if as a result thereof the additional moneys which would otherwise be required to be paid to the Lender pursuant to any of such provisions of this Agreement would be reduced, or the illegality or other adverse circumstances which would otherwise require a prepayment of such Loans pursuant to any of such provisions would cease to exist, and (B) if, as determined by the Lender in good faith, the making, funding or maintaining of the Loan through such other office would not otherwise adversely affect the Lender.

SECTION 2.18 CERTIFICATE OF LENDER. If the Lender claims reimbursement under Sections 2.13, 2.14, 2.15 or 2.16, it shall deliver to the Borrower a certificate setting forth in reasonable detail, including calculations thereof, the amount payable to the Lender and such certificate shall be conclusive and binding on the Borrower in the absence of manifest error.

SECTION 2.19 SURVIVAL. Without prejudice to the survival of any other agreement of the Borrower under this Agreement and any other Project Document, the agreements and obligations of the Borrower set forth in Sections 2.13 2.14, 2.15 and 2.16 shall survive the payment of the Loans.

ARTICLE 3. REPRESENTATIONS AND WARRANTIES.

In order to induce the Lender to enter into this Agreement and each of the other Financing Documents to which it is a party and in order to induce the Lender to make the Loans, the Borrower makes the following representations, warranties and agreements as of the date of this Agreement, which shall survive the execution and delivery of this Agreement and the making and repayment of the

Loans:

SECTION 3.01 STATUS. The Borrower (a) is an exempted limited liability company duly incorporated, validly existing and in good standing under the laws of the Cayman Islands, (b) is duly qualified to do business under the laws of each jurisdiction in which the character of the properties owned by it or in which the transaction of its business as presently conducted or proposed to be conducted makes such qualification necessary, and (c) has full power and authority to own the property and assets owned by it and to transact the business in which it is engaged or proposes to be engaged and to do all things necessary or appropriate in respect of the Project and to consummate the transactions contemplated by the Project Documents in effect or required to be in effect as of each date this representation is made or deemed made.

SECTION 3.02 POWER AND AUTHORITY. The Borrower has the full power and authority to execute and deliver, and to perform the terms and provisions of, each of the Project Documents to which it is party and has taken all proper and necessary action to authorize the execution, delivery and performance by it of each of such Project Documents as have been executed and delivered as of each date this representation and warranty is made. The Borrower, has, or, in the case of the Project Documents other than this Agreement, by the Loan I Closing Date will have, duly executed and delivered each of the Project Documents to which it is a party, and each of such Project Documents constitutes or, in the case of each such other Project Document when

executed and delivered will constitute, the legal, valid and binding obligations of the Borrower, enforceable in accordance with its respective terms, except as the enforceability thereof may be limited by (a) applicable bankruptcy, insolvency, reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally, and (b) general equitable principles, regardless of whether the issue of enforceability is considered in a proceeding in equity or at law.

SECTION 3.03 NO VIOLATION. Neither the execution and delivery by the Borrower of the Project Documents to which it is a party, nor the Borrower's compliance with or performance of the terms and provisions thereof, or the use of the proceeds of the Loans as contemplated by this Agreement (a) will contravene or violate any provision of any Applicable Law to which the Borrower, any of its assets, the Project or any transaction contemplated by the Project Documents are subject, (b) will conflict or be inconsistent with or result in any breach of any of the terms, covenants, conditions or provisions of, or constitute a default under, or result in the creation or imposition of (or the obligation to create or impose) any Lien (except any Permitted Liens) upon any of the property or assets of the Borrower pursuant to the terms of any indenture, mortgage, deed of trust, credit agreement, loan agreement or any other agreement, contract or instrument to which the Borrower is a party or by which it or any of its property or assets is bound or to which it may be subject, (c) will violate any provision of any other Organization Document of the Borrower or (d) will require any consent or approval of any Governmental Authority or any other Person which has not been obtained.

SECTION 3.04 ORGANIZATION. All of the issued and outstanding shares of the Borrower are owned by Ormat Holding Corp. except as provided in the Share Pledge and Sponsor Participation Retention Agreement.

SECTION 3.05 SUBSIDIARIES. The Borrower has no Subsidiaries and owns no equity interest in any other Person.

SECTION 3.06 SINGLE-PURPOSE BORROWER. The Borrower (a) has not incurred

any liabilities other than in connection with its participation in the transactions contemplated by the Project Documents and (b) has not engaged in any business other than the Project. The Borrower is not a party to any material agreement, contract or commitment (other than the ENEL Agreements, the Fiduciary Account Agreement, the Financing Documents, the Investment Agreement and any Implementation Agreements).

SECTION 3.07 FINANCIAL STATEMENTS; FINANCIAL CONDITION: UNDISCLOSED LIABILITIES; ETC.

(a) No Material Adverse Effect. The financial statements of the Borrower for the Fiscal Year ended December 31, 1999, heretofore furnished to the Lender, present fairly the financial condition of the Borrower at the date thereof and the results of the operations of the Borrower for the fiscal period referred to in such statements. Such financial statements have been prepared in accordance with GAAP. Since the date of such financial statements, no event, condition or circumstance (including, without limitation, Force Majeure) has existed or has occurred which is reasonably likely to have a Material Adverse Effect.

(b) No Likelihood of Material Adverse Effect. Except as fully reflected in the financial statements referred to in Section 3.07(a), there are no liabilities or obligations with respect to the

Borrower (whether absolute, accrued, contingent or otherwise and whether or not due) for the period to which such financial statements relate which, either individually or in the aggregate, is reasonably likely to have a Material Adverse Effect. The Borrower does not know of any reasonable basis for the assertion against the Borrower of any liability or obligation of any nature whatsoever for such relevant period that is not fully reflected in the financial statements referred to in Section 3.07(a) which, either individually or in the aggregate, is reasonably likely to have a Material Adverse Effect.

SECTION 3.08 LITIGATION; LABOR DISPUTES.

(a) No Proceedings. Except as disclosed in Schedule 3.08 hereto, there is no action, suit, investigation or proceeding by or before any court, arbitrator, administrative agency or other Governmental Authority pending or, to the best of the Borrower's knowledge, threatened against or affecting the Borrower or any of its properties, revenues or assets or the Project or the Site (including Environmental Claims) which has had or is reasonably likely to have a Material Adverse Effect. The Borrower is not in default with respect to any order of any court, arbitrator, administrative agency or other Governmental Authority. There is no injunction, writ, preliminary restraining order or any order of any nature issued by an arbitrator, court or other Governmental Authority directing that any of the material transactions provided for in any of the Project Documents not be consummated as herein or therein provided. To the best of the Borrower's knowledge, there is no action, suit, investigation or proceeding by or before any court, arbitrator, administrative agency or other Governmental Authority pending or threatened against or affecting the Borrower or any of its properties, revenues or assets, and the Borrower does not have actual knowledge of any such action, suit, investigation or proceeding pending or threatened against or affecting any other party to any Project Document or any of their respective properties, revenues or assets, in each case described in this sentence which has had or is reasonably likely to have a Material Adverse Effect.

(b) No Labor Claims Pending. There are no strikes, slowdowns or work stoppages by the Borrower's employees ongoing, or, to the knowledge of the

Borrower, threatened which are reasonably likely to have a Material Adverse Effect. There are no claims pending against the Borrower arising from the transfer of personnel pursuant to the terms of the ENEL Agreements.

SECTION 3.09 TRUE AND COMPLETE DISCLOSURE. All factual information (taken as a whole), which, for the avoidance of doubt (a) shall not include any information by way of projections, estimates or other expressions of view as to future circumstances, provided that such projections, estimates or other expressions of view are expressed in good faith and on the basis of reasonable assumptions and (b) shall be qualified by any disclaimers with respect to such factual information provided by the Borrower to the Lender heretofore or contemporaneously furnished by or on behalf of the Borrower in writing to the Lender (including without limitation such factual information related to the Project as is contained in the preliminary business plan dated February 27, 2000 (financial model) previously submitted to the Lender on February 27, 2000 with respect to the Project and as stated in the Lender's Offer Letter dated March 14, 2000 and in the Business Plan), and all other such factual information (taken as a whole) hereafter furnished by or on behalf of the Borrower in writing to the Lender will be, true and accurate in all material respects on the date as of which such information is stated or certified and not incomplete by omitting to state any fact necessary to make such information (taken as a whole) not misleading in any material respect in light of the circumstances and the time under which or

at which such information was provided. There are in existence no documents or agreements which have not been disclosed to the Lender which are material in the context of the Project Documents or which have the effect of varying any of the Project Documents or their meaning.

SECTION 3.10 TAX RETURNS AND PAYMENTS. Except as disclosed in Schedule 3.11, the Borrower has filed all tax returns required by Applicable Law to be filed by it and has paid all income taxes payable by it which have become due pursuant to such tax returns and all other taxes and assessments payable by it which have become due, other than those not yet delinquent and except for those contested in good faith and for which adequate reserves have been established. The Borrower has paid, or has provided adequate reserves for the payment of, all national, regional or local income taxes applicable for all prior Fiscal Years and for the current Fiscal Year to the date hereof, except as disclosed under Schedule 3.11.

SECTION 3.11 GOVERNMENTAL APPROVALS. All Governmental Approvals necessary under Applicable Law in connection with (a) the due execution and delivery of, and performance by the Borrower of its obligations and the exercise of its rights under, the Project Documents in effect or required to be in effect as of each date this representation is made or deemed made, (b) the grant by the Borrower of the Liens created pursuant to the Security Documents and the validity, enforceability and perfection thereof and the exercise by the Lender of its rights and remedies thereunder and (c) the construction and operation of the Project as contemplated by the Project Documents, to be obtained by the Borrower and to be obtained by any other Person (to the best knowledge of the Borrower) are set forth in Schedule 3.11 hereto. Except as disclosed in Part C of Schedule 3.11, each of the Governmental Approvals set forth in Part A and Part C of Schedule 3.11 hereto and each other Governmental Approval obtained by the Borrower after the date hereof but on or prior to the date this representation is made, has been duly obtained or made, is validly issued, is in full force and effect, is not subject to appeal (it being understood that for purposes of this Section 3.11, a Governmental Approval shall not be considered to be subject to appeal if it is being contested or challenged solely by Persons other than the Governmental Authority which issued the Governmental Approval or

any other Governmental Authority notwithstanding that such contest or challenge is ongoing) and is free from conditions or requirements compliance with which is reasonably likely to have a Material Adverse Effect or which the Borrower does not reasonably expect to be able to satisfy. There is no proceeding pending or, to the best knowledge of the Borrower, threatened which is reasonably likely to result in the rescission, termination, material modification, suspension or determination of invalidity or lack of effectiveness of any such Governmental Approval. The information set forth in each application and other written material submitted by the Borrower to the applicable Governmental Authority in connection with each such Governmental Approval was accurate and complete in all material respects at that time (provided, that no representation is made regarding the accuracy and completeness of any projections, estimates or other expressions of view as to future circumstances, and provided further that any such information is further qualified by any disclaimers with respect thereto included therein). The Borrower has no reason to believe that any Governmental Approval that has not been obtained by the Borrower, but which will be required in the future, will not be granted to it in due course, on or prior to the date when required and free from any condition or requirement compliance with which is reasonably likely to have a Material Adverse Effect or which the Borrower does not reasonably expect to be able to satisfy. The Project, if constructed and performed in accordance with the Business Plan, will conform to and comply in all material respects with all covenants, conditions, restrictions and reservations in the Governmental Approvals and the Project Documents applicable thereto and

all Applicable Laws. The Borrower has no reason to believe that the Lender will not be entitled, without undue expense or delay, to the benefit of each Governmental Approval set forth on Schedule 3.11 hereto upon the exercise of remedies under the Security Documents. The Lender has received a true and complete copy of each Governmental Approval heretofore obtained or received by the Borrower.

SECTION 3.12 COMPLIANCE WITH STATUTES, ETC.

(a) Compliance with Applicable Laws. Except as set forth in (b) below, and in Section 3.13, and in Part C of Schedule 3.11, the Borrower is in compliance with all Applicable Laws in respect of the conduct of its business and the ownership of its property (including, without limitation, Applicable Laws relating to environmental standards and controls and resettlements and Applicable Laws relating to the maintenance of debt to equity ratios).

(b) Environmental Compliance. The Borrower's business and the Project are being carried out in compliance with the Project Remediation Program.

SECTION 3.13 ENVIRONMENTAL MATTERS. To the best of the Borrower's knowledge, neither the Site nor the Power Plant (nor any other property with respect to which the Borrower has retained or assumed liability either contractually or by operation of the law) has been affected by any Hazardous Material, other than as described in the Project Remediation Program, in a manner which does or is reasonably likely to give rise to any material liability of the Borrower under any Environmental Law or which has had or is reasonably likely to have a Material Adverse Effect.

SECTION 3.14 PATENTS, LICENSES, FRANCHISES AND FORMULAS. The Borrower owns or has the right to use all intellectual property including all the patents, trademarks, permits, service marks, trade names, copyrights, licenses, franchises and formulas, or rights with respect thereto, and has obtained assignments of all leases and other rights of whatever nature, necessary for the present and proposed conduct of its business and the carrying out of the Project

in the manner contemplated by the Project Documents, without any known conflict with the rights of others which, or the failure to obtain which, as the case may be, is reasonably likely to have a Material Adverse Effect.

SECTION 3.15 SUBMISSION TO LAW AND JURISDICTION. The choice of governing law for each of the respective Project Documents in effect or required to be in effect as of the Loan I Closing Date will be recognized in the courts of Nicaragua, and those courts will recognize and give effect to any judgment in respect of such Project Document obtained by or against the Borrower in the courts the jurisdictions of which the Borrower has submitted to.

SECTION 3.16 STATUS OF THE LOANS. The Loans constitute direct, unconditional, and general obligations of the Borrower and rank senior as to priority of payment to any or all Indebtedness of the Borrower except as permitted under Section 5.15(b). Except as permitted by Section 5.16 of this Agreement, the Borrower has not secured or agreed to secure any such other Indebtedness by any Lien upon any of its present or future revenues, assets or properties or upon any shares of stock of the Borrower.

SECTION 3.17 PROJECT DOCUMENTS; SUFFICIENCY OF PROJECT DOCUMENTS.

(a) All Project Documents Received. The Lender has received a complete copy of each Project Document in effect or required to be in effect as of each date this representation is made or deemed made (including all exhibits, schedules and disclosure letters referred to therein or delivered pursuant thereto, if any).

(b) All Rights Obtained. To the best of the Borrower's knowledge, the services to be performed, the materials to be supplied and the easements, licenses and other rights granted or to be granted to the Borrower pursuant to the terms of the Project Documents provide or will provide the Borrower with all rights and property interests required to enable the Borrower to obtain all services, materials or rights (including access) required for the rehabilitation, operation and maintenance of the Project, including the Borrower's full and prompt performance of its obligations, and full and timely satisfaction of all conditions precedent to the performance by others of their obligations, under the Project Documents, other than those services, materials or rights that reasonably can be expected to be obtainable in the ordinary course of business without material additional expense or material delay.

SECTION 3.18 FEES AND ENFORCEMENT. Other than amounts that have been paid in full or will have been paid in full by the Loan I Closing Date, no fees or taxes, including without limitation, stamp, transaction, registration or similar taxes, are required to be paid for the legality, validity, or enforceability of this Agreement or any of the other Project Documents in effect or required to be in effect as of each date this representation is made or deemed made. This Agreement and each of such Project Documents are each in proper legal form under the laws of Nicaragua, and under the respective governing laws selected in such Project Documents, for the enforcement thereof in such jurisdiction without any further action on the part of the Lender.

SECTION 3.19 AVAILABILITY AND TRANSFER OF FOREIGN CURRENCY. All requisite foreign exchange control approvals and other authorizations, if any, by Nicaragua or any department or agency thereof have been validly obtained and will be kept current and in full force and effect to assure (a) the ability of the Borrower to receive any and all payments to the Borrower contemplated by the Project Documents, (b) the availability of Dollars to enable the Borrower to perform all of its obligations hereunder and under the other Project Documents, as the case may be, in accordance with their respective terms, and (c) the

ability of the Borrower to convert into Dollars all sums received in Cordoba amounts from ENEL, immediately upon receipt thereof, and to use the Dollars as necessary to perform all of its obligations under the Project Documents, in accordance with their respective terms. There are no restrictions or requirements which limit the availability or transfer of foreign exchange, or the conversion to foreign exchange, for the purpose of the performance by the Borrower of its obligations under this Agreement or under any of the other Project Documents.

SECTION 3.20 BUSINESS PLAN.

(a) Effectiveness. The Business Plan as in effect on the date hereof is attached hereto as Annex A. The Business Plan accurately specifies, to the best of the Borrower's knowledge, all costs and expenses incurred and anticipated to be incurred prior to the date on which a Phase I Completion Certificate and a Phase II Completion Certificate will have been issued. In addition, to the best of the Borrower's knowledge, the amount of all costs and expenses required or

expected to be paid or incurred prior to the latest date on which a Phase I Completion Certificate or a Phase II Completion Certificate, as the case may be, will have been issued does not exceed the amount reflected in the Business Plan.

(b) Assumptions. To the best of the Borrower's knowledge, all projections and budgets furnished to the Lender by or on behalf of the Borrower and the summaries of significant assumptions related thereto (i) have been prepared with due care, (ii) fairly present the Borrower's expectations as to the matters covered thereby as of their date, (iii) are based on reasonable assumptions as to all factual and legal matters material to the estimates therein as of their date (including interest rates and costs) and (iv) are in all material respects consistent with the provisions of the Project Documents.

SECTION 3.21 TITLES; LIENS. The Borrower has good and valid title to all of its properties and assets, in each case, free and clear of all Liens other than Permitted Liens. No mortgage or financing statement or other instrument or recordation covering all or any part of the property or assets of the Borrower is on file in any recording office, except such as relate only to Permitted Liens described in clauses (a) and (b) of Section 5.16 hereof.

SECTION 3.22 TRANSACTIONS WITH AFFILIATES. The Borrower is not a party to any contracts or agreements with, or any other commitments to, any Affiliate, other than in the ordinary course of business on terms at least as favorable to the Borrower as available on an arm's-length basis from third parties.

SECTION 3.23 NO ADDITIONAL FEES. Other than as expressly set forth in the Business Plan, the Borrower has not paid or become obligated to pay any fee or commission to any agent, broker, finder or intermediary for or on account of arranging the financing of the transactions contemplated by the Project Documents.

SECTION 3.24 REGULATION OF PARTIES. None of the Borrower, its Affiliates or the Lender is or will be, solely as a result of the participation by such parties separately or as a group in the transactions contemplated hereby or by any other Project Document, or as a result of the ownership, use or operation of the Project, subject to regulation by any Governmental Authority of the United States as a "public utility", an "electric utility", an "electric utility holding company", a "public utility holding company", a "holding company", or an "electrical corporation" or a subsidiary or affiliate of any of the foregoing under any Applicable Law of the United States (including, without limitation, PUHCA) or by any Governmental Authority of Nicaragua as a "public utility" under any Applicable Law of Nicaragua. The Borrower is not a holding

company organized under the laws of the United States or the District of Columbia. Neither the Borrower nor its Affiliates owns any utility assets located within any state of the United States or the District of Columbia.

ARTICLE 4. CONDITIONS PRECEDENT.

SECTION 4.01 CONDITIONS OF FIRST DISBURSEMENT OF LOAN I. The first Disbursement of Loan I hereunder shall be subject to the satisfaction in form and substance of the Lender of the following conditions on or prior to the Loan I Closing Date:

(a) Project Documents. (i) Each of the Project Documents shall have been entered into by the respective parties thereto, shall be unconditional and fully effective in accordance with

their respective terms (except for this Agreement having become unconditional and fully effective, if that is a condition of effectiveness of any of such documents) and the Borrower shall deliver to the Lender a certificate signed by an authorized officer of the Borrower certifying the foregoing, which certification shall be incorporated into each Application for Funding; and (ii) the Lender shall have received a copy of the Nicaragua Government Support Letter and of the ENEL Agreements (which shall be construed, for the purposes of this Section 4.01(a), as not including the Nicaragua Government Support Letter), in its escritura publica form, accompanied by a certificate executed by a Financial Officer of the Borrower certifying that the attached copies are true and correct copies of the original Nicaragua Government Support Letter and the ENEL Agreements (as defined for purposes of this Section 4.01(a)).

(b) Insurance; MIGA Guarantee. Each of the Insurance Contracts and the MIGA Contracts shall be in full force and effect and in respect of the MIGA Guarantee, in form and substance satisfactory to the Lender.

(c) Opinions of Counsel. The Lender shall have received signed legal opinions, each in form and substance satisfactory to the Lender, of (i) Cayman Islands counsel to the Borrower, (ii) United States counsel to the Sponsor, (iii) Israeli counsel to Ormat Industries Ltd., (iv) US and Nicaraguan counsel to the Lender, and (v) counsel to such other Person as the Lender may reasonably require.

(d) Organization Documents; Proceedings.

(i) The Lender shall have received a certificate, signed by the Secretary or Assistant Secretary of the Borrower, in form and substance satisfactory to the Lender, together with copies of Organization Documents of the Borrower and resolutions of the Borrower's board of directors approving the financing to be provided pursuant to the terms of this Agreement, certifying that the documents attached to such certificate are true, correct and complete copies of such documents.

(ii) The Lender shall have received a certificate signed by the Secretary or Assistant Secretary of the Sponsor in form and substance satisfactory to the Lender, together with copies of the Organization Documents of the Sponsor and resolutions of the Sponsor's board of directors approving the documents to which Sponsor is party with respect to the provision of financing pursuant to the provisions of this Agreement, certifying that the documents attached to such certificate are true, correct and complete copies of such Organization Documents and resolutions.

(iii) The Lender shall have received a letter from the Auditors

confirming the acceptance of their appointment as the Auditors.

(iv) The Lender shall have received a certificate from each of the Borrower, the Sponsor, the Shareholder and the Sponsor Parent, in form and substance satisfactory to the Lender, signed by an authorized officer certifying the incumbency of the parties executing any Project Document or related document on behalf of the Borrower, the Sponsor, the Shareholder and the Sponsor Parent, respectively.

(e) Auditors. The Lender shall have received a copy of the authorization to the Auditors referred to in Section 5.02(b).

(f) Security Documents. The Borrower shall have delivered to the Lender fully executed Security Documents, in full force and effect, with all registration fees in connection therewith paid in full, and with executed instruments of transfer delivered by the Borrower if required.

(g) Consent Letters. The Lender shall have received a letter, in form and substance satisfactory to the Lender, from CT Corporation System, presently located 111 Eighth Avenue, New York, New York 10011, indicating the consent of CT Corporation System to its appointment by the Borrower, the Sponsor, the Shareholder and the Sponsor Parent as their agent to receive service of process.

(h) Certificates. The Lender shall have received copies of each executed Project Document, together with a certificate of a Financial Officer of the Borrower certifying that the Borrower is not in default in the performance, observance or fulfillment of any of its material obligations, covenants or conditions contained therein and, to the best of the Borrower's knowledge, no other party to any such Project Document is in default in the performance, observance or fulfillment of any of its material obligations, covenants or conditions contained therein and the Lender shall have received evidence or copies of all Governmental Approvals set forth in Schedule 3.11 hereof (other than those set forth in Parts B and C thereof), certified by a Financial Officer of the Borrower as being in full force and effect and not subject to appeal, except as disclosed in Schedule 3.11 hereof. For purposes of this Section 4.01(h), a Governmental Approval shall not be considered to be subject to appeal if it is being contested or challenged solely by Persons other than the Governmental Authority who issued the Governmental Approval or any other Governmental Authority notwithstanding that such contest or challenge is ongoing.

(i) Business Plan. The Lender shall have received the Business Plan, which shall be in form and substance satisfactory to the Lender.

(j) Financial Statements. The Lender shall have received copies of the most recent audited financial statements of the Borrower (except that for the Fiscal Year ending December 31, 1999 financial statements may be submitted unaudited) and audited financial statements of the Sponsor, and the Lender shall have received copies of the most recent unaudited financial statements (if audited financial statements are not otherwise available) of the Borrower and the Sponsor showing, for each such Person, no material adverse change in the financial condition of such Person since the date of the last financial statements provided to the Lender prior to the date of this Agreement, and certificates dated the Loan I Closing Date signed by a Financial Officer of each such Person stating that (i) such financial statements are true, complete and correct and (ii) no material adverse change as to such Person has occurred since the date of such financial statements.

(k) Evidence of Authority. The Lender shall have received evidence of

the authority of the Borrower to enter into this Agreement and the names, specimen signatures and evidences of authority of the Persons signing this Agreement, and the other documents required by this Agreement as of the date of execution hereof or who will otherwise act as representatives of the Borrower in the operation of the Credit.

(l) Accounts. The Borrower shall have established: (i) the Debt Service Reserve Account with the Lender's New York Branch, fully funded in accordance with Section 5.33; and (ii) the bank account with the Lender's New York Branch in accordance with Section 5.28(a).

(m) Other Instruments, Conditions, Due Diligence, Etc. The delivery of every other instrument and agreement, and the satisfaction of any other condition as the Lender may reasonably request, including due diligence reports satisfactory to the Lender.

(n) Fees, Costs, Etc. The Fees, and all other fees, costs and expenses (including any and all Attorney Costs of Lender's outside counsel) due and payable on or before the Loan I Closing Date shall have been paid.

(o) MIGA Premium. The Borrower will execute and deliver to the Lender an irrevocable instruction to the Lender's New York Branch to debit the Borrower's Account established pursuant to Section 5.28(a) for payment of the MIGA premium upon the direction of the Lender and the Lender shall deliver to the Borrower the relevant renewal notice.

SECTION 4.02 CONDITIONS OF EACH DISBURSEMENT. Each Disbursement hereunder shall be subject to the satisfaction in form and substance of the Lender of the following conditions:

(a) No Default; Representations and Warranties. Immediately before and after giving effect to such Disbursement:

(i) no Event of Default shall have occurred and be continuing;

(ii) all representations and warranties made by the Borrower and contained herein (other than the representations made pursuant to Section 3.07(b)) or in the other Project Documents shall be true and correct in all material respects with the same effect as though such representations and warranties had been made on and as of the date of such Disbursement, except where expressed to be made only as of an earlier date;

(iii) the following representations and warranties shall be true and correct in all material respects with the same effect as though such representations and warranties had been made on and as of the date of such Disbursement: (A) except as fully reflected in each financial statement delivered prior to such Disbursement pursuant to Sections 5.01(a) and 5.01(b), there shall have been, as of the date of such financial statement, no liabilities or obligations with respect to the Borrower of any nature whatsoever (whether absolute, accrued, contingent or otherwise and whether or not due) which, either individually or in the aggregate, is reasonably likely to have a Material Adverse Effect, and (B) the Borrower does not know of any reasonable basis for the assertion against the Borrower of any liability or obligation of any nature whatsoever that is not fully reflected in the financial statements delivered pursuant to Sections 5.01(a) and 5.01(b) which, either individually or in the aggregate, is reasonably likely to have a Material Adverse Effect.

(b) Security. The Security, in form and substance satisfactory to the

Lender, shall have been duly created, perfected and, where appropriate, registered as required hereunder, to create a first priority security interest and charge over the Collateral in existence at the date of such Disbursement. Without limitation to the preceding sentence, the Borrower shall have duly authorized, executed and delivered or, as the case may be, provided:

(i) acknowledgment copies of proper financing statements or other instruments duly filed under the Applicable Law of each jurisdiction as may be necessary or, in the reasonable opinion of the Lender, desirable to perfect the charges and security interests purported to be created by the Security Documents;

(ii) upon the reasonable request of the Lender, certified copies of requests for information or copies, or equivalent reports, listing the financing statements and instruments referred to in clause (i) above and all other effective financing statements that name the Borrower as debtor and that are filed in the jurisdictions referred to in said clause (i), together with copies of such other financing statements and instruments (none of which shall cover the Collateral except to the extent of Permitted Liens);

(iii) evidence of the completion of all other recordings and filings of, or with respect to, the Security Documents as may be necessary or, in the reasonable opinion of the Lender, desirable to perfect the security interests purported to be created by the Security Documents; and

(iv) evidence that all other actions necessary or, in the reasonable opinion of the Lender, desirable to perfect and protect the security interests purported to be created by the Security Documents have been taken.

(c) Consents and Approvals. There shall have been obtained, or there shall have been made arrangements satisfactory to the Lender for obtaining, in addition to the Project Documents, all other governmental, corporate, creditors', shareholders' and other necessary licenses, approvals or consents for: (i) the financing by the Lender under this Agreement; (ii) the carrying on of the business of the Borrower as it is presently carried on and is contemplated to be carried on; (iii) the carrying out of Phase I of the Project with respect to Loan I and Phase II with respect to Loan II; (iv) the due execution and delivery of, and performance under, each Project Document which has been entered into at the time of such Disbursement, the Security, and any documents in implementation of any thereof; and (v) the remittance to the Lender of all monies payable pursuant to each Project Document which has been entered into at the time of such Disbursement, and any documents in implementation of any thereof. In addition, a true and complete copy of each material license, approval or consent described in this Section 4.02(c) shall have been delivered by the Borrower to the Lender.

(d) No Project Document Default. Each of the Project Documents which has been entered into or which is required to have been entered into at the time of such Disbursement shall be in full force and effect and no material breach or default shall have occurred under any such Project Document. No event of Force Majeure shall have occurred which has had, or in the reasonable judgment of the Lender is reasonably likely to have, a Material Adverse Effect.

(e) ENEL Agreements. The Lender shall have received from the Borrower a certification, in form and substance satisfactory to the Lender, signed by an authorized representative of the Borrower and expressed to be effective as of the date of the relevant Disbursement, stating that the Borrower is in compliance in all material respects with all provisions of the ENEL Agreements.

(f) No Material Adverse Effect. Since the Loan I Closing Date, no event or events shall have occurred which has had or is reasonably likely to have a Material Adverse Effect.

(g) Insurance; Shareholder's MIGA Guarantee. The Borrower shall have certified to the Lender that each of the Insurance Contracts required pursuant to Section 5.03 and the Shareholder's MIGA Guarantee, continue to be in full force and effect on the date of such Disbursement and that the Insurance Contracts are in compliance and in full accord with the recommendations of the Lender's Insurance Consultant.

(h) Fees and Expenses. The Borrower shall have paid all fees, expenses and other charges then payable by it under this Agreement.

(i) Debt Service Reserve Account. The Debt Service Reserve Account shall have been funded in accordance with Section 5.33.

(j) Disbursements for Additional Amount. In respect of each Disbursement made in respect of Additional Amounts, the Senior Loan Debt to Borrower's Equity ratio shall not exceed 3:1 after giving effect to the requested Disbursement.

(k) Sponsor Advances. The Sponsor shall have made advances to the Borrower either as additional equity or subordinated long term loans on the same terms and conditions as set forth in Section 2.02 of the Sponsor Project Funding Agreement in an amount which when added to the Borrower's Equity shall be equal to, as the case may be, (i) forty-two and eight hundred fifty-seven thousandths percent (42.857%) of the sum of the requested Disbursement to be made under Loan I plus any Interest to be capitalized pursuant to Section 2.03 plus all amounts previously disbursed under Loan I, or (ii) thirty-three and three hundred thirty-three thousandths percent (33.333%) of the sum of the requested Disbursement to be made under Loan II (including any Disbursement to be made in respect of an Additional Amount) plus any Interest to be capitalized pursuant to Section 2.03 plus all amounts previously disbursed.

(l) Phase II - Approval of Lender's Engineer. With respect to Disbursements to be made under Loan II, the Lender shall have received the approval of the Lender's Engineer as required under Section 2.02(b).

SECTION 4.03 NO WAIVERS. No course of dealing or waiver by the Lender in connection with any condition of Disbursement under this Agreement shall impair any right, power or remedy of the Lender with respect to any other condition of Disbursement, or be construed to be a waiver thereof; nor shall the action of the Lender in respect of any Disbursement affect or impair any right, power or remedy of the Lender in respect of any other Disbursement.

SECTION 4.04 CONDITIONS FOR FIRST DISBURSEMENT OF LOAN II. The Lender shall have received at the Borrower's expense each of the following on or prior to the Loan II Closing Date: (a) a Technical Report from a recognized and independent engineer or consulting firm acceptable to the Lender confirming costs, technical and commercial feasibility of the Business Plan; (b) an opinion of Nicaraguan legal counsel acceptable to the Lender confirming the legal opinion provided pursuant to Section 4.01(c) and such other opinions related to any changes in Applicable Law that have occurred since the date thereof, in form and substance satisfactory to the Lender; (c) payment to the Lender of (i) the Loan II Commitment Fee and (ii) the final installment of the Front-End Fee; and (d) in the event that the amendment to the PPA referred to

in Section 5.43 is not in full force and effect, an executed amendment to the PPA incorporating substantially the provisions set forth in Schedule 4.04 shall be in full force and effect and executed in the form of an escritura publica prepared by a Nicaraguan notary public.

ARTICLE 5. COVENANTS

The Borrower covenants and agrees that:

SECTION 5.01 INFORMATION COVENANTS. The Borrower shall furnish to the Lender:

(a) Quarterly Financial Statements of Borrower. As soon as available but, in any event, within 90 days after the close of each of the first three quarterly accounting periods in each Fiscal Year,

(i) complete unaudited financial statements of the Borrower as at the end of such quarterly period with statements of operations and statement of cash flows for such quarterly period and for the elapsed portion of the Fiscal Year ended with the last day of such quarterly period, in each case setting forth comparative figures for the related periods in the prior Fiscal Year, subject to normal year-end audit adjustments;

(ii) a report on any event or condition which has had or which is reasonably likely to have a Material Adverse Effect; and

(iii) a statement, in form and detail reasonably satisfactory to the Lender, of all financial transactions in such Quarter between the Borrower and any Affiliate of the Borrower, including a certification on behalf of the Borrower by a Financial Officer of the Borrower that such transactions were in the ordinary course of business on terms at least as favorable to the Borrower as available on an arm's-length basis from third parties.

(b) Annual Financial Statements of Borrower. As soon as available but, in any event, within 120 days after the close of each Fiscal Year, (i) the financial statements of the Borrower as at the end of such Fiscal Year with statements of operations and statement of cash flows for such Fiscal Year, in each case setting forth comparative figures for the preceding Fiscal Year ending after December 30, 1999 and (except in the case of financial statements of the Borrower for the Fiscal Year ended December 31, 1999) certified by the Auditors (all such statements being in agreement with the Borrower's books of account and prepared in accordance with GAAP), and (ii) for all fiscal years after December 31, 1999 a report of the Auditors stating that in the course of its regular audit of the financial statements of the Borrower, which audit was conducted in accordance with generally accepted auditing standards, the Auditors obtained no knowledge of any Default or Event of Default which has occurred and is continuing or, if in the opinion of the Auditors such a Default or Event of Default has occurred and is continuing, a statement as to the nature thereof .

(c) Management Letters. Promptly after the Borrower's receipt thereof, a copy of any "management letter" or other similar communication received by the Borrower, from the Auditors, as the case may be, in relation to the Borrower's financial, accounting and other systems, management and accounts.

(d) Officer's Certificates. Except as required for purposes of the first Disbursement under Loan I, at the time of the delivery of the financial statements provided for in Sections 5.01(a) and 5.01(b), a certificate of a Financial Officer of the Borrower to the effect that, to the best of his knowledge, no Default or Event of Default has occurred and is continuing or, if any such Default or Event of Default has occurred and is continuing, specifying the nature and extent thereof and what action the Borrower is taking or proposes to take in response thereto.

(e) Notice of Default, Litigation, etc.

(i) Immediately upon the Borrower obtaining actual knowledge thereof, notice, by facsimile, of the occurrence of any Default or Event of Default or any breach or default under any of the other Project Documents by the Borrower or any other party thereto, specifying the nature thereof and the action which the Borrower is taking and proposes to take with respect to the same; and

(ii) promptly, and in any event within twenty (20) Business Days after Borrower obtains actual knowledge thereof, notice of:

(A) any litigation or governmental proceeding, pending (1) against the Borrower, Sponsor or ENEL (x) involving a claim in excess of \$100,000 with respect to the Borrower and \$5,000,000 with respect to the Sponsor or ENEL (or the equivalent thereof in other currency) or (y) which is reasonably likely to have a Material Adverse Effect or (2) with respect to any Project Document;

(B) any proposal by any Governmental Authority to acquire compulsorily the Borrower, Sponsor, the Shareholder or ENEL, any Collateral or a substantial part of the business or assets of any of them;

(C) any substantial dispute between or among the Borrower, the Sponsor, the Shareholder or ENEL and any Governmental Authority or any other of the Borrower, Sponsor, the Shareholder or ENEL;

(D) any change in the authorized officers or directors referred to in Section 4.01(d) above, giving certified specimen signatures of any new officer or director so appointed and, if requested by the Lender, satisfactory evidence of the authority of such new officer or director;

(E) any actual or proposed termination, rescission, discharge (otherwise than by performance), amendment or waiver or indulgence under, any material provision of any Project Document (other than by the Lender);

(F) any material notice or correspondence received or initiated by the Borrower relating to a Governmental Approval or other license or authorization necessary for the performance by it of its obligations under the Project Documents;

(G) any Lien (including a Permitted Lien) becoming enforceable over any of the Borrower's assets;

(H) any proposed material change in the nature or scope of the Project or the business or operations of the Borrower, the Sponsor or ENEL and any one or more events, conditions or circumstances (including without limitation Force Majeure as defined in the ENEL Agreements) that exist or have occurred which are reasonably likely to have a Material Adverse Effect; or

(I) the occurrence of any event or act which could reasonably qualify as the basis for a claim under either of the MIGA Contracts.

(f) Implementation Reports. Within 21 days of the end of each month, beginning with the end of the month hereof, a report executed by the Borrower's chief engineer and attached to each Application for Funding in a form satisfactory to the Lender, on the implementation and progress of the Project, including (i) any factors materially and adversely affecting or which are reasonably likely to materially and adversely affect the carrying out of Phase II of the Project and (ii) copies of any reports received by the Borrower from any outside technical consultant identifying any matter that is of material adverse significance to the rehabilitation or operation of the Power Plant. Upon reasonable request of the Lender, the Borrower shall provide to the Lender copies of all reports submitted by the Borrower to ENEL or CNDC under the ENEL Agreements.

(g) Fiduciary Account Reports. The Borrower shall provide to the Lender any and all copies of monthly reports issued by Banco de Credito Centroamericano ("Banco") in accordance with Section 2.2 of the Fiduciary Account Agreement. Such reports shall be provided no later than the tenth day of each calendar month. The Borrower shall attach to each copy of such reports a copy of the notice specified under Section 2.1(c) of such Fiduciary Account Agreement indicating the amount to be required to be deposited in the account for the applicable month(s).

(h) Other Information. Any other information or reports related to the Borrower, Sponsor, the Shareholder, ENEL or the Project as the Lender may reasonably request.

SECTION 5.02 BOOKS, RECORDS AND INSPECTIONS; ACCOUNTING AND AUDIT MATTERS.

(a) Maintenance of Books and Records; Inspections. The Borrower will keep proper books of record and account adequate to reflect truly and fairly the financial condition and results of operations of the Borrower (including the progress of the Project) in which full, true and correct entries in conformity with GAAP shall be made. The Borrower will permit officers and designated representatives of the Lender to visit and inspect, under guidance of officers of the Borrower, any of the properties of the Borrower, and to examine and make copies of the books of record and account of the Borrower and discuss the affairs, finances and accounts of the Borrower with, and be advised as to the same by, its officers, all at such reasonable times and intervals and to such reasonable extent as the Lender may request.

(b) Consultation with Auditors. The Borrower shall (i) authorize the Auditors to communicate directly with the representatives of the Lender at reasonable intervals, but if a Default or Event of Default has occurred or is continuing, then at any time, regarding the Borrower's accounts and operations and (ii) furnish to the Lender a copy of such authorization, provided, however, that the Lender will (i) provide the Borrower with copies of any correspondence between such representatives and the Auditors; and (ii) provide the Borrower

with reasonable notice of any meeting between such representatives and the Auditors, with a description of the matters to be discussed at such meeting, and allow the Borrower to attend any such meeting.

SECTION 5.03 MAINTENANCE OF PROPERTY; INSURANCE.

(a) Obligation to Maintain Property and Insurances. The Borrower will (i) keep all property in its business in good working order and condition; (ii) keep its present and future properties and business insured (with business interruption coverage in an amount sufficient to cover fixed operating costs plus Debt Service as set forth in the approved Business Plan for a 24-month period commencing on the date of loss with financially sound and reputable insurers satisfactory to the Lender against loss or damage in such manner and to the same extent as specified in Schedule 5.03 until the expiration of such policies and continuously immediately thereafter, in each case pursuant to policies naming the Lender except as otherwise provided in Schedule 5.03 as sole loss payee thereunder, permitting the Lender to make claims thereunder and containing cut-through endorsements to reinsurers and provisions requiring that the Lender shall receive notices of extensions or renewals of insurance policies and notice of any non-payment of premiums and that such policy may only be canceled for non-payment of premiums, if cancelable, upon sixty (60) days prior notice to the Lender. Under no circumstances shall the Lender become liable for the payment of any premiums or any other amounts due or payable under the Insurance Contracts. On or prior to the dates required pursuant to this Section 5.03, the Borrower will submit to the Lender certificates of insurance relating to the insurances specified in Schedule 5.03 (together with copies of such insurance policies if then available) from the Borrower's insurers and insurance brokers (including confirmation of premium payments then due), which certificates shall indicate the properties insured, amounts and risks covered, names of the beneficiaries, expiration dates, names of the insurers and special features of the insurance policies. The Borrower shall provide the Lender with copies of insurance policies relating to the insurances specified in Schedule 5.03 hereto on or prior to the date such policies are required to be delivered to the Lender such policies to be in form and substance, and issued by companies, satisfactory to the Lender.

(b) Compliance with MIGA Contracts. The Borrower shall comply with or perform and shall procure compliance with or performance of all obligations specified under the MIGA Contracts as required to be complied with or performed by the Project Enterprise (as defined in the MIGA Contracts) or by the Guarantee Holder (as defined in the Shareholder's MIGA Guarantee) and shall not take any action or fail to take any action which would permit MIGA to terminate any of the MIGA Contracts.

(c) Effectiveness of Assignments. In the event that any insurance whatsoever is purchased, taken or otherwise obtained by the Borrower with respect to the Project, excluding insurance policies under Section 4.2.1 of the PPA, otherwise than as required hereunder or if not properly endorsed to the Lender as the sole loss payee or otherwise made upon the terms required in this Section 5.03, without limitation to any provision of the Security Documents, such insurance shall be considered assigned hereunder to the Lender with the right of the Lender to exercise its rights and remedies under any of the Financing Documents or under any Applicable Law.

(d) Reinstatement and Renewal of Insurances. Promptly after the

issuance, renewal, expiration or termination of any of the Insurance Contracts other than the MIGA Guarantee required to be maintained under this Section 5.03, or upon the reasonable request of the Lender, the Borrower shall cause issuance of a certificate stating that each of such Insurance Contracts is in full force and effect.

SECTION 5.04 MAINTENANCE OF EXISTENCE; PRIVILEGES; ETC. The Borrower shall at all times (a) preserve and maintain in full force and effect (i) its existence as an exempted limited liability company and in good standing under the laws of the Cayman Islands, (ii) its qualification to do business in each other jurisdiction in which the character of the properties owned or leased by it or in which the transaction of its business as conducted or proposed to be conducted makes such qualification necessary and (iii) all of its powers, rights, privileges and franchises necessary for the construction, ownership, maintenance and operation of the Project and the maintenance of its existence, (b) obtain in a timely manner and maintain in full force and effect (or where appropriate, renew) all Governmental Approvals (including, without limitation, those under Environmental Laws) and all other licenses, registrations, waivers, consents and approvals required at any time or advisable in connection with the construction, maintenance, ownership or good and orderly operation of the Project and all licenses, consents and approvals necessary for the conversion to Dollars of all Cordoba amounts payable under the PPA, the Nicaragua Government Support Letter for the remission to the United States in Dollars of any amounts paid or payable to the Lender in connection with any Financing Document or the transactions contemplated thereby, and (c) preserve and maintain good and marketable title to its properties and assets (it being understood that the Borrower's rights with respect to the Site are solely as set forth in the Agreement of Association in Participation) subject to no Liens other than Permitted Liens.

SECTION 5.05 COMPLIANCE WITH STATUTES. The Borrower will comply with all Applicable Laws in respect of the conduct of its business and the ownership, operation and use of its property.

SECTION 5.06 PROJECT IMPLEMENTATION. The Borrower shall (i) carry out the Project and conduct its business with due diligence and efficiency and in accordance with sound engineering, financial, and business practices; (ii) obtain, or cause to be obtained, approval by the competent authority of the Republic of Nicaragua of the Project Remediation Plan; and (iii) use the proceeds of all Disbursements only for the purposes set forth in Section 2.02(a) and strictly in accordance with the Business Plan.

SECTION 5.07 AUDITORS. In the event that PricewaterhouseCoopers, Nicaragua should cease to be the Auditors of the Borrower for any reason, the Borrower shall appoint and maintain as the Auditors another firm of independent public accountants approved by the Lender.

SECTION 5.08 TAXES, DUTIES, ETC. The Borrower will pay and discharge all taxes, duties, fees, assessments and other governmental charges (including, without limitation, any documentary, stamp, registration, transaction or similar tax or fee) imposed on it, on its income or profits, on any of its property, or in connection with the execution, issue, delivery, registration, notarization, assignment or transfer of any interest in or for the legality, validity or enforceability of any Project Document (including, without limitation, any such tax or fee imposed in connection with any assignment or transfer by any Lender of the Loans or any of its

interests therein or herein) prior to the date on which penalties attach

thereto, and all claims, levies or liabilities (including, without limitation, claims for labor, services, materials and supplies) for sums which have become due and payable and which have or, if unpaid, might become a Lien upon the property of Borrower (or any part thereof). The Borrower shall have the right, however, to contest in good faith the validity or amount of any such tax, assessment, governmental charge or claim by proper proceedings timely instituted, and may permit the taxes, assessments, governmental charges or claims so contested to remain unpaid during the period of such contest if: (a) the Borrower diligently prosecutes such contest; (b) during the period of such contest the enforcement of any contested item is effectively stayed; (c) the Borrower sets aside on its books adequate reserves with respect to the contested items; and, (d) such contest does not, in the reasonable discretion of the Lender, involve a material risk of the sale, forfeiture or loss of any of the Collateral. The Borrower will promptly pay or cause to be paid any valid, final judgment enforcing any such tax, duty, fee, assessment, other governmental charge or claim and cause the same to be satisfied of record.

SECTION 5.09 PERFORMANCE OF OBLIGATIONS. The Borrower will perform all of its material obligations under the terms of each mortgage, indenture, security agreement and other debt instrument by which it is bound and will perform (a) all of its obligations under the terms of the Financing Documents, the PPA and the Agreement of Association in Participation and (b) such of its obligations under the terms of the Implementation Agreements, the non-performance of which is reasonably likely to have a Material Adverse Effect. The Borrower will obtain and maintain in full force and effect at all times the registration of this CFA with the appropriate Governmental Authorities.

SECTION 5.10 AVAILABILITY AND TRANSFER OF FOREIGN EXCHANGE. All requisite foreign exchange control approvals, licenses, consents and authorizations, if any, by Nicaragua or any department or agency thereof will be kept current and in full force and effect to assure (a) the ability of the Borrower to make any and all payments to the Borrower contemplated by the Project Documents and (b) and availability of Dollars to enable the Borrower to perform all of its obligations hereunder and under all other Project Documents in accordance with their respective terms.

SECTION 5.11 NAME CHANGES; ETC. The Borrower shall not change its name without the prior written consent of the Lender which shall not be unreasonably withheld. The Borrower shall not adopt or change any trade name or its business name without the prior written consent of the Lender which shall not be unreasonably withheld. The Borrower shall execute and deliver to the Lender any additional documents necessary or advisable to reflect any permitted adoption of or change in its name, trade name or fictitious name.

SECTION 5.12 CONSOLIDATION, MERGER, SALE OF ASSETS. Without the prior written consent of the Lender, the Borrower will not: (a) wind up, liquidate or abandon its affairs or enter into any transaction of merger or consolidation; (b) convey, sell, lease or otherwise transfer (or agree to do any of the foregoing at any future date) all or any part of its property or assets, except in the ordinary course of business and except sales of equipment which is uneconomic or obsolete or sales of assets that are no longer used by or useful to the Project and which are promptly replaced (if applicable) by substitutes of substantially equivalent utility to the replaced assets; or, (c) purchase or otherwise acquire (in one or a series of related transactions) any part of

the property or assets of any Person (other than purchases or other acquisitions of inventory or materials or capital expenditures, each in the ordinary course

of business).

SECTION 5.13 DISTRIBUTIONS; RESTRICTED PAYMENTS.

(a) Distributions. Without the prior written consent of the Lender, the Borrower will not return any capital or pay any profits to holders of any Share Capital or authorize or make or incur or assume any obligation to make any other distribution, payment or delivery of property or cash to the Shareholder or the Sponsor as such or by way of payment on account of Subordinated Indebtedness, or otherwise acquire, directly or indirectly, for consideration any ownership interest in the Borrower now or hereafter outstanding, or set aside any funds for any of the foregoing purposes, except if there is no Default and if at the time of declaration and after payment of such dividend, the Borrower meets the requirements of Section 5.34(b).

(b) Restricted Payments. Without the prior written consent of the Lender, the Borrower will not (i) make any payment or delivery of property or cash to any Person on account of any subordinated debt service or (ii) redeem, retire, purchase or otherwise acquire, directly or indirectly, for consideration, any third party subordinated indebtedness, or (iii) set aside any funds for any of the foregoing purposes, except in accordance with the Sponsor Project Funding Agreement.

SECTION 5.14 LEASES. Without the Lender's prior written consent, the Borrower will not enter into any agreement or arrangements to lease any property or equipment of any kind as lessee, except with respect to which the aggregate lease payments do not exceed the equivalent of US\$1,000,000 in any Fiscal Year or \$3,000,000 in the aggregate with respect to property other than Capital Expenditures.

SECTION 5.15 INDEBTEDNESS. Without the prior written consent of the Lender, the Borrower will not contract, create, incur, assume or suffer to exist any Indebtedness, except for the following types of Indebtedness ("Permitted Indebtedness"):

(a) The Loans. Indebtedness of the Borrower incurred under the Financing Documents;

(b) Working Capital. Indebtedness for working capital in the normal course of business and pari passu with the Loans, which would not exceed at any one time outstanding the equivalent of an amount equal to the sum of all revenues received by the Borrower for the three month period prior to the date such Indebtedness is incurred.

SECTION 5.16 LIENS. Without the prior written consent of the Lender, the Borrower will not, and will not agree to, create, incur, assume or suffer to exist any Lien upon or with respect to any property or assets (real, personal or mixed, tangible or intangible) of the Borrower, whether now owned or hereafter acquired, provided that the provisions of this Section 5.16 shall not prevent the creation, incurrence, assumption or existence of the following Liens (each, a "Permitted Lien"):

(a) Liens. Liens for current taxes, assessments and other governmental charges, the payment of which is not at the time required;

(b) Liens Hereunder. Liens created pursuant to the Security Documents;
and

(c) Statutory Liens. Mechanics', materialmen's, carrier's and similar Liens securing obligations incurred in the ordinary course of business which (i)

are not past due or which are the subject of a Good Faith Contest by the Borrower (unless during the pendency of such contest or as a result thereof the Liens of the Security Documents could reasonably be expected to be materially endangered or any material portion of the Site, or the Project could reasonably be expected to become subject to loss or forfeiture) and (ii) which do not in the aggregate materially detract from the value of the Site or the Project or other assets of the Borrower or materially impair the use thereof; provided that upon the commencement of any proceeding to foreclose or enforce any such Permitted Lien, the Lender may take such action as it reasonably deems necessary to protect the Lender's interests in the Site or the Project including, without limitation, payment of amounts reasonably necessary to release any such Lien, and in such event the Borrower shall reimburse the Lender upon demand for the cost thereof together with interest thereon at a rate per annum equal to the LIBOR Overnight Rate plus 4.50%.

SECTION 5.17 GUARANTEES. Without the prior written consent of the Lender, the Borrower will not enter into any Contingent Obligations.

SECTION 5.18 SUBSIDIARIES; ADVANCES, INVESTMENTS AND LOANS. Without the prior written consent of the Lender, the Borrower will not form or have any Subsidiaries, lend money or credit or make deposits (other than deposits with the Lender or as provided in Section 5.28 of this Agreement or in relation to the payment for goods and equipment in the ordinary course of business) with or advances (except as specifically required by any Implementation Agreement) to any Person, or purchase or acquire any stock, obligations or securities of, or any other interest in, or make any capital contribution to, any other Person, except that the Borrower may instruct the Lender to make Permitted Investments for the account of the Borrower up to amounts available in its current accounts with the Lender's New York Branch; provided, that such Permitted Investments shall mature no later than the Business Day prior to the day on which the Borrower needs the proceeds thereof for payment of Debt Service or for any other permitted use under this Agreement.

SECTION 5.19 TRANSACTIONS. The Borrower will not enter into any transaction or series of related transactions with any Person other than in the ordinary course of business on terms at least as favorable to the Borrower as available on an arm's-length basis from third parties and as permitted under the PPA. The Borrower shall remain at all times the "supplier" and the "operator" for purposes of the ENEL Agreements and will not, except in accordance with Sections 4.1.10 and 4.1.11 of the PPA, assign, hire, contract with or otherwise transfer to any Person the rights, duties and responsibilities under the ENEL Agreements.

SECTION 5.20 OTHER TRANSACTIONS. Without prior written consent of the Lender, the Borrower will not enter into any partnership, profit-sharing, or royalty agreement or other similar arrangement whereby the Borrower's income or profits are, or might be, shared with any other Person, or enter into any management contract or similar arrangement whereby its business or operations are managed by any other Person, except as permitted under the PPA.

SECTION 5.21 MODIFICATIONS OF ORGANIZATION DOCUMENTS; ADDITIONAL AGREEMENTS; ASSIGNMENTS AND MODIFICATIONS OF AGREEMENTS; ETC.

(a) No Modifications. The Borrower will not, without the prior written consent of the Lender, (i) amend or modify the Organization Documents of the Borrower, (ii) its filings with the Nicaraguan Foreign Investment Committee in existence as of the date hereof or (iii) change its Fiscal Year.

(b) No Amendment or Transfer of Project Documents. Without the prior written consent of the Lender which shall not be unreasonably withheld or

delayed, the Borrower shall not, directly or indirectly, terminate, cancel or suspend, or permit or consent to any termination, cancellation or suspension of, or enter into or consent to or permit the assignment of amend or modify the terms of the rights or obligations of any party to, any of the Project Documents. The Borrower shall not, directly or indirectly, amend, modify, supplement or waive, or permit or consent to the amendment, modification, supplement or waiver of, any of the provisions of, or give any consent under, any of the Project Documents without the prior, written consent of the Lender which shall not be unreasonably withheld or delayed.

(c) No Assignments of Project Document Rights. Other than the assignment of the Project Documents to the Lender, the Borrower will not assign (except with respect to Permitted Liens) any of its rights or obligations under any Project Document without the prior written consent of the Lender.

(d) No PPA Termination Without Lender Consent. The Borrower will not take any action under Section 12.3 of the PPA to require Termination (in terms of the PPA) without the prior written consent of the Lender, which consent shall not be unreasonably withheld or delayed.

(e) No Force Majeure Claims Without Lender Consultation. The Borrower shall not claim for itself Force Majeure as provided in Clause XI of the PPA without prior consultation with the Lender.

SECTION 5.22 NO OTHER BUSINESS. Without the prior written consent of the Lender, the Borrower will not carry on any business other than in connection with the completion and operation of the Project and will take no action whether by acquisition or otherwise which would constitute or result in any material alteration to the nature of that business or the nature or scope of the Project.

SECTION 5.23 ABANDONMENT. The Borrower will not abandon or agree to abandon the Project or place it or agree to place it on a "care and maintenance" basis provided, however, that (a) nothing in this Section 5.23 shall prevent the Borrower from making shut-downs necessary for repairs and maintenance at the Power Plant in accordance with the ENEL Agreements or from placing the Power Plant or any part thereof on a "maintenance" basis during any Force Majeure (not within the control of the Borrower, which Force Majeure prevents the Borrower from rehabilitating, maintaining or operating same); and (b) nothing in this Section 5.23 shall be deemed to waive or limit in any way the right of the Lender to declare an Event of Default as provided in Article 6 hereof.

SECTION 5.24 IMPROPER USE. The Borrower will not use, maintain, operate or occupy, or allow the use, maintenance, operation or occupancy of, any portion of the Site or the Project for any purpose:

30

(a) Danger. Which may be dangerous, unless safeguarded as required by Applicable Law (provided, however, that this clause (a) shall not be deemed to prohibit the Borrower from carrying out the Project in accordance with the terms of the PPA and the Drilling Contracts in a reasonable and prudent manner);

(b) Violation of Applicable Law. Which violates any Applicable Law in any material respect;

(c) Nuisance. Which may constitute a public or private nuisance resulting in a Material Adverse Effect;

(d) Effect on Insurance Coverage. Which may make void, voidable, or cancelable or increase the premium of, any insurance (including, but not limited to, the MIGA Contracts) then in force with respect to the Site or the Project or any part thereof unless, in the case of an increase in premium, the Borrower

gives proof of payment of such increase; or

(e) Other Purposes. Otherwise than for the intended purpose thereof in the rehabilitation, maintenance and operation of the Power Plant.

SECTION 5.25 BUSINESS PLAN EXPENDITURES. From and after the Effective Date the Borrower may accelerate expenditures in any Fiscal Year in excess of the projected annual costs set forth in the Business Plan provided such expenditures are conducive to the earlier completion of the Project; the Borrower shall not delay any such expenditures without the concurrence of the Lender's Engineer.

SECTION 5.26 ISSUANCE OR TRANSFER OF SHARES. The Borrower will not issue any additional Share Capital or permit or consent to the transfer (by sale, assignment or otherwise) of any Share Capital in the Borrower, except as permitted under the Share Pledge and Sponsor Participation Retention Agreement.

SECTION 5.27 AMENDMENT OF BUSINESS PLAN. Other than as provided in Section 5.25, the Borrower will not, directly or indirectly, amend, modify, allocate, re-allocate or supplement or permit or consent to the amendment, modification, allocation, re-allocation or supplement of, any of the provisions of the Business Plan, except with the prior written approval of the Lender.

SECTION 5.28 BANK ACCOUNTS. The Borrower shall (a) establish and maintain at all times bank accounts with the Lender's New York Branch, opening such accounts with such documents as the Lender may require; and (b) maintain all its other bank accounts with the Lender, except that the Borrower may maintain bank accounts with balances not exceeding \$1,000,000, plus, for a period of 5 Business Days from the receipt thereof by the Borrower, an amount equal to the payments from ENEL, or its equivalent in Cordobas or combination thereof with Banco de Credito Centroamericano S.A. or such other Nicaraguan financial institutions that are approved in advance by the Lender; provided, however, that it shall not be a Default or Event of Default if the balances in the accounts permitted hereunder exceed such permitted amounts solely as a result of the Borrower's inability to exchange or transfer local currency, as a result of disruption in or closure of the foreign exchange market, if and for so long as such inability to convert or transfer continues and if there is not otherwise an Event of Default.

SECTION 5.29 PRESS RELEASES; ADVERTISING. Neither the Borrower, the Lender nor any Affiliate of the Borrower shall issue or consent to the issuance of any press release or other announcement or advertisement that refers to the provision of financing by the Lender for the Project without the prior written consent of the Borrower, which consent shall not be unreasonably withheld or delayed; except that no consent shall be required where (a) the issuance of such press release, announcement or advertisement is required by Applicable Law or (b) such press release, announcement or advertisement discloses only the names of the parties involved in the provision of financing for the Project, together with a general description of the Project, without disclosing any of the terms of such financing.

SECTION 5.30 ADDITIONAL DOCUMENTS; FILINGS AND RECORDINGS. The Borrower shall execute and deliver, from time to time as reasonably requested by the Lender at the Borrower's expense, such other documents as shall be necessary or advisable or that the Lender may reasonably request in connection with the rights and remedies granted or provided for by the Project Documents, as applicable, and to consummate the transactions contemplated therein. The Borrower shall, at its own expense, take all reasonable actions that have been or shall be requested by the Lender or that the Borrower knows are necessary to

establish, maintain, protect, perfect and continue the perfection of the first priority security interests of the Lender created by the Security Documents and shall furnish timely notice of the necessity of any such action, together with such instruments, in execution form, and such other information as may be required to enable the Lender to effect any such action. Without limiting the generality of the foregoing, the Borrower shall (a) execute or cause to be executed and shall file or cause to be filed such financing statements, continuation statements, fixture filings and mortgages or deeds of trust in all places necessary or advisable (in the opinion of counsel for the Lender) to establish, maintain and perfect such security interests and in all other places that the Lender shall reasonably request and (b) do everything necessary in the reasonable judgment of the Lender to (i) create and perfect the Security with respect to future assets covered by the Security Documents, (ii) maintain the Security in full force and effect at all times and (iii) preserve and protect the Collateral and protect and enforce its rights and title and the rights and title of the Lender to the Collateral.

SECTION 5.31 EMPLOYEES AND EMPLOYEE PLANS. The Borrower shall not adopt, establish, maintain, sponsor, administer, contribute to, participate in, or incur any liability to provide post-retirement welfare benefits, except such liability to provide post-retirement welfare benefits as may be required by Applicable Law, the PPA and the Agreement of Association in Participation.

SECTION 5.32 ACCOUNTING CHANGES. The Borrower shall not make any significant change in accounting treatment or reporting, except as permitted by GAAP.

SECTION 5.33 DEBT SERVICE RESERVE ACCOUNT. The Borrower will establish no later than the Loan I Closing Date a separate Debt Service Reserve Account, maintained with the Lender's New York Branch, funded in Dollars with respect to each of Loan I and Loan II, on the earlier of (x) the date of the Phase I Completion Certificate or the Phase II Completion Certificate or (y) the last day of the Loan I Availability Period or Loan II Availability Period, as the case may be. The Lender will fund this obligation by drawing on the respective Loan commitments and by crediting the DSRA with the amount required and adding such amount to the outstanding balance of the respective Loan I or Loan II, and with a balance sufficient at all

times to cover Indebtedness For Borrowed Money in respect of Loan I and Loan II falling due on the first and second Principal Repayment Dates of each respective Loan, and in each case thereafter on the two next successive Principal Repayment Dates. Notwithstanding the above, in the event the Borrower does not have sufficient funds in bank accounts other than the DSRA, the Borrower may utilize balances in the DSRA to make payments as required under Section 2.03 and Section 2.04 of this Agreement on any Principal Repayment Date provided the remaining balance is not less than the amounts required for the next Principal Repayment Date. In such a case, the Borrower must deposit funds to the DSRA within 180 days in an amount sufficient to comply with the requirements of this Section 5.33.

SECTION 5.34 FINANCIAL RATIOS. The Borrower shall maintain at all times the following financial ratios:

(a) Leverage. A Senior Loan Debt to Borrower's Equity ratio not to exceed 7:3 prior to the Loan II Closing Date and 3:1 thereafter; and

(b) Coverage. A DSCR at a minimum level of 1.25:1, determined on and

reported to Lender on a quarterly basis.

(i) Prior to the Loan II Closing Date

(A) During the first four quarters commencing on the Loan I Closing Date the ratio shall be calculated as projected EBITDA during the succeeding four quarters divided by the Debt Service for the successive four quarters beginning on the first Principal Repayment Date, on the basis of the amount outstanding under Loan I on the date of calculation.

(B) From a date which is one year after the Loan I Closing Date the ratio shall be calculated as EBITDA during the previous four quarters divided by the Debt Service for the successive four quarters beginning on the first Principal Repayment Date, on the basis of the amount outstanding under Loan I on the date of calculation.

(ii) After the Loan II Closing Date:

(A) The ratio shall be calculated as EBITDA during the previous four quarters divided by the Debt Service for the succeeding four quarters in respect of Loan I and for the successive four quarters beginning on the first Principal Repayment Date applicable to Loan II and, in the event the Borrower declares a dividend, such dividend is permitted to be distributed under the terms of this Agreement and the Borrower distributes such dividend from Net Cashflow, the Borrower shall have reserved or set aside the payment of an amount from Net Cashflow as is necessary to maintain the DSCR at a minimum level of 1.25:1 after such dividend is distributed.

SECTION 5.35 COMPLETION CERTIFICATE. At the conclusion of each of Phase I and Phase II, as determined by the Borrower, which determination in the case of Phase II shall not be made prior to the completion of all geothermal wells for which drilling has begun unless the Lender's Engineer confirms that no Material Adverse Effect will result if such drilling is not completed, the Borrower shall submit to the Lender a Phase I or II Completion Certificate, as appropriate, certifying to the Lender that Phase I or Phase II, respectively, has been completed.

SECTION 5.36 LENDER'S EXPERTS AND CONSULTANTS.

(a) Lender's Engineer. The Lender may appoint an independent engineer or engineering firm to act as the Lender's engineer (the "Lender's Engineer") to observe and report on the drilling and construction works related to Phase II of the Project, to approve each Application for Funding from the Loan II Commitment as appropriate for the value of the work performed or to be performed, and in general to report to the Lender on the progress of the Project;

(b) Insurance Consultant. The Lender may appoint an independent Insurance Consultant to advise the Lender regarding the adequacy of all insurance coverage related to the Project and to make recommendations in respect thereto; and

(c) Borrower to Reimburse for Costs. All fees, disbursements and all other related costs of the Lender's Engineer and Insurance Consultant shall be reimbursed or paid by the Borrower no later than 30 days from the date of the Borrower's receipt of the relevant invoice.

SECTION 5.37 REGULATORY STATUS. The Borrower shall remain continuously exempt from all regulation under PUHCA as a result of being a "foreign utility company" under Section 33 of PUHCA or otherwise.

SECTION 5.38 CHILD LABOR AND FORCED LABOR. The Borrower shall refrain from employing Harmful Child Labor and/or using Forced Labor as defined in the MIGA Guarantee.

SECTION 5.39 INSURANCE PROCEEDS. The Borrower shall, in accordance with Section 4.2.2.2 of the PPA, apply all insurance proceeds received under the All-Risks property insurance to repair and rebuild the Project. In the event that ENEL fails to present a claim under such All-Risks property insurance to the insurers, the Borrower shall present such claim. In the case of business interruption, insurance proceeds shall be paid to or received by the Lender and held by it to be applied as if received from the Borrower as payment for amounts due on the next Principal Repayment Date and, provided no Event of Default has occurred and is continuing, any remaining amount shall be paid to the Borrower.

SECTION 5.40 NOTARIZATION, CONSULARIZATION AND REGISTRATION OF CFA

Within thirty (30) calendar days of the date hereof, this Agreement shall be translated into Spanish by an official translator, notarized and consularized as well as delivered for registration with each of the following:

(i) Ministerio de Hacienda y Credito Publico, Direccion General de Ingresos, for purposes of the Ley de Impuestos sobre la Renta of Nicaragua; and

(ii) Banco Central de Nicaragua, for purposes of the Ley Monetaria of Nicaragua.

SECTION 5.41 MIGA PREMIUM PAYMENTS

The Borrower will maintain with the Lender's New York Branch a balance in Dollars equal to the premium in respect of the MIGA Guarantee, as notified to the Borrower by either

MIGA or the Lender, falling due for the next six-month coverage period not less than two weeks prior to the due date.

SECTION 5.42 PPA AMENDMENT.

The Borrower shall use its reasonable efforts to ensure that an amendment to the PPA substantially in the form attached as Schedule 5.43 has been executed and is in full force and effect within 120 days of the date hereof. Failure to receive such executed amendment shall not constitute a Default or an Event of Default, but, the provision of Section 4.04(d) shall apply.

SECTION 5.43 MIGA ARBITRATION. The Borrower shall cooperate with the Lender and take such actions as the Lender may request to enable the Lender to obtain an Award (as such term is defined in the MIGA Guarantee) for purposes of satisfying the provision of Section 17.2 of the MIGA Guarantee, provided that if the Borrowers shall also elect to pursue an Award, the Lender shall consult with the Borrower regarding such actions.

ARTICLE 6. EVENTS OF DEFAULT.

Each of the following events or conditions set forth in Sections 6.01 through 6.17 (inclusive) shall be an event of default ("Event of Default") hereunder:

SECTION 6.01 PAYMENTS. The Borrower shall default in the payment when due of any principal of any Loan or any interest on any Loan or any other amounts owing to the Lender hereunder and such default shall continue unremedied for five (5) or more Business Days.

SECTION 6.02 REPRESENTATIONS, ETC. Any representation or warranty confirmed or made in any Project Document by the Borrower or any obligor which is an Affiliate of the Borrower, or in any writing provided by any of them in connection with the execution and delivery of, or in connection with any Application for Funding under this Agreement shall be found to have been incorrect in any material respect when made or deemed to be made and shall continue to be incorrect for a period of thirty (30) days after notice thereof shall have been given to the Borrower by the Lender.

SECTION 6.03 COVENANTS.

(a) This Agreement. The Borrower shall fail to perform or observe any covenant, term or agreement contained in 5.03 (Maintenance of Property; Insurance), 5.21 (Modifications of Organization Documents; Additional Agreements; Assignments and Modifications of Agreements; Etc.), 5.22 (No Other Business), 5.28 (Bank Accounts), and 5.33 (Debt Service Reserve Account) hereof.

(b) Other Agreements. The Borrower, the Sponsor, Ormat Industries Ltd. or any other Affiliate of the Borrower shall fail to perform or observe any other covenant, term or agreement contained in this Agreement or any other Project Document to which it is a party and such failure shall not be remediable or, if remediable, shall continue unremedied for a period of 30 days after the earlier of (i) the date on which such failure shall have first become known to the Borrower, the Sponsor, Ormat Industries Ltd. or other Affiliate of the Borrower, as the case may be, and (ii) the date on which written notice thereof shall have been received by the Borrower, the Sponsor, Ormat Industries Ltd. or other Affiliate of the Borrower, as the case may be, from the Lender;

provided that if (A) such failure cannot be cured within such 30-day period, (B) such failure, in the reasonable judgment of the Lender, is susceptible of cure, (C) the Borrower, the Sponsor, Ormat Industries Ltd. or other Affiliate of the Borrower, as the case may be, is proceeding with diligence and in good faith to cure such failure, (D) the existence of such failure in the reasonable judgment of the Lender has not had and is not reasonably likely to have a Material Adverse Effect and (E) the Lender shall have received an officer's certificate signed by a Financial Officer of the Borrower, the Sponsor, Ormat Industries Ltd. or other Affiliate of the Borrower, as the case may be, to the effect of clauses (A), (B) and (C) above and stating what action the Borrower is taking to cure such failure, then, such 30-day cure period shall be extended by up to an additional 60 days as shall be necessary for the Borrower, the Sponsor, Ormat Industries Ltd. or other Affiliate of the Borrower, as the case may be, diligently to cure such failure.

SECTION 6.04 DEFAULT UNDER OTHER AGREEMENTS.

(a) Borrower. Any Indebtedness For Borrowed Money of the Borrower shall be declared or for any reason any Person is entitled to declare it to be due and payable, or required to be prepaid other than by a regularly scheduled required

prepayment, prior to the stated maturity thereof taking into account any applicable grace period.

(b) ENEL Indebtedness. ENEL shall (i) default in any payment of any Indebtedness For Borrowed Money in an aggregate principal amount exceeding \$5 million beyond the period of grace, if any, provided in the instrument or agreement under which such Indebtedness For Borrowed Money was created or (ii) default in the observance or performance of any material condition or provision of any agreement or condition relating to any Indebtedness For Borrowed Money in an aggregate principal amount exceeding \$10 million or contained in any instrument or agreement evidencing, securing or relating thereto, the effect of which default is to cause any such Indebtedness For Borrowed Money to become due prior to its stated maturity.

(c) The Sponsor. The Sponsor (i) defaults in any payment of any Indebtedness For Borrowed Money in an aggregate principal amount exceeding \$5 million beyond the period of grace, if any, provided in the instrument or agreement under which such Indebtedness For Borrowed Money was created or (ii) defaults in the observance or performance of any material condition or provision of any agreement or condition relating to any Indebtedness For Borrowed Money in an aggregate principal amount exceeding \$10 million or contained in any instrument or agreement evidencing, securing or relating thereto, the effect of which default is to cause any such Indebtedness For Borrowed Money to become due prior to its stated maturity.

(d) ENEL Project Obligations. A default shall have occurred in the performance of any material obligation by (i) ENEL or Nicaragua under any of the Project Documents to which such Person is a party and such default shall continue unremedied beyond the period of grace, if any, extended to such Person with respect to such default, as specified in the Project Document under which such obligation was created or (ii) any other party (other than the Persons referred to in clause (i) of this Section 6.04(d)) under any of the Project Documents and the existence of such default in the reasonable judgment of the Lender has had or is reasonably likely to have a Material Adverse Effect and such default has not been cured within 60 days.

SECTION 6.05 BANKRUPTCY, ETC. There shall have been entered against the Borrower, Ormat Holding Corp., the Sponsor or ENEL a decree or order by a court adjudging the Borrower or such other Person bankrupt or insolvent, or approving as properly filed a petition seeking reorganization, arrangement, adjustment or composition of or in respect of the Borrower or such Person under any Applicable Law; or appointing a receiver, liquidator, assignee, trustee, sequestrator, special manager or administrator (or other similar official) of the Borrower or such Person or of any substantial part of its property or other assets, or ordering the winding up or liquidation of its affairs and the Borrower or such other Person (w) fails to obtain the dismissal or stay on appeal of any such proceeding or arrangement within forty-five (45) days of the commencement thereof against it or (x) any other procedure for the relief of financially distressed debtors is instituted against it and is not dismissed within forty-five (45) days of such commencement; or the institution by the Borrower or such other Person of proceedings to be adjudicated bankrupt or insolvent, or the consent by it to the institution of bankruptcy or insolvency proceedings against it; or the filing by it of a petition or answer or consent seeking reorganization or debt relief under any Applicable Law; or the consent by it to the filing of any such petition or to the appointment of a receiver, liquidator, assignee, trustee, sequestrator, special manager or administrator (or other similar official) of the Borrower or any such other Person or of any substantial

part of its property; or the making by it of an assignment or an arrangement for the benefit of creditors; or the admission by it in writing of its inability to pay its debts generally as they become due; or any other event shall have occurred which under any Applicable Law would have an effect analogous to any of those events listed above in this subsection with respect to the Borrower or Ormat Holding Corp., the Sponsor or ENEL; or any corporate action is taken by the Borrower or Ormat Holding Corp., the Sponsor or ENEL for the purpose of effecting any of the foregoing; provided that any reorganization or reconstruction of a company while solvent with the prior consent of the Lender, such consent not to be unreasonably withheld or delayed, shall not be held to constitute any event mentioned in this paragraph; and provided, further, that (a) in connection with any other Person, no Event of Default shall be declared under this Section 6.05 if (y) such Person has fully complied and continues to fully comply with all of its obligations under all Project Documents to which such Person is a party and (z) in the reasonable judgment of the Lender, such Event of Default has not had and is not reasonably likely to have a Material Adverse Effect.

SECTION 6.06 PROJECT EVENTS.

(a) Eviction. The Borrower shall cease to have the right to access and use the Site; or

(b) PPA Termination. Any event shall have occurred which entitles (i) the Borrower to give a notice under Section 12.3 of the PPA, or (ii) ENEL to give a notice under Section 12.2 of the PPA; or

(c) Disposition of Interest. The Borrower shall (except as permitted by Section 6.13 hereof) sell or otherwise dispose of any of its interest in the Project.

SECTION 6.07 MATERIAL ADVERSE EFFECT. One or more events, conditions or circumstances shall exist or shall have occurred which, in the reasonable judgment of the Lender, is reasonably likely to have a Material Adverse Effect.

SECTION 6.08 PROJECT DOCUMENTS; SECURITY DOCUMENTS.

(a) Failure of Project Document. This Agreement or any of the other Financing Documents or any of the Project Documents, or any material provision hereof or thereof (i) is or becomes invalid, illegal or unenforceable or any party thereto (other than the Lender) shall so assert, unless a Good Faith Contest is instituted and the assertion is withdrawn within 30 days thereof and prior to the next date of Disbursement, or (ii) ceases to be in full force and effect, or shall cease to give the Lender the Collateral, rights, powers and privileges purported to be created thereby, therein or hereby or any party thereto (other than any Lender) shall so assert subject to the last clause of this Section 6.08 (a)(i).

(b) Failure of Security Document. Except as permitted by Section 5.16 hereof, the Collateral or any component part thereof for any reason fails to constitute a valid and perfected first priority Lien or ceases to be in full force and effect or the Borrower or the grantor or pledgor thereof shall so assert provided, however, that if and for so long as the Sponsor Project Funding Agreement and the Contingent Guarantee Agreement remain in full force and effect, the cancellation, invalidity or termination of the coverage for Expropriation as provided in Addendum A, Paragraphs 1 and 3 of the MIGA Guarantee shall not be an Event of Default under this Section 6.08(b).

SECTION 6.09 OWNERSHIP OF THE BORROWER. The Sponsor shall cease to maintain Control of the Borrower or shall cease to own, directly or indirectly, all of the ownership interests in the Borrower free and clear of all Liens other than as permitted by the Share Pledge and Sponsor Participation Retention Agreement (it being understood that, for purposes of this Section 6.09, if the Sponsor owns ownership interests in the Borrower indirectly, the percentage of its ownership in the Borrower shall be the product of the percentage ownership it has in any intermediate subsidiary or other entity and the percentage ownership which the subsidiary or other entity owning ownership interests in the Borrower directly has in the Borrower).

SECTION 6.10 JUDGMENTS. One or more judgments or decrees shall be entered (a) against the Borrower involving in the aggregate a liability (not paid or fully covered by insurance) of \$1 million or more; or (b) prior to the date on which the Sponsor shall cease to be an obligor, against the Sponsor or involving in the aggregate a liability (not paid or fully covered by insurance) of \$1 million or more with respect to the Sponsor which liability in the reasonable judgment of the Lender has had or is likely to have a Material Adverse Effect; and in any such case all such judgments or decrees shall not have been vacated, discharged, or stayed or bonded pending appeal within 60 days after the entry thereof.

SECTION 6.11 GOVERNMENTAL ACTION. Any government or Governmental Authority shall have condemned, nationalized, seized, or otherwise expropriated all or any substantial part of the property or other assets of the Borrower or shall have assumed custody or control of such property or other assets or of the business or operations of the Borrower or shall have taken any action for the dissolution or disestablishment of the Borrower or any action that would prevent the Borrower or its officers from carrying on its business or operations or a substantial part thereof.

SECTION 6.12 PERMITS. The Borrower, ENEL, or any of their respective Affiliates shall fail to obtain, renew, maintain or comply in all material respects with any Governmental Approval set forth in Schedule 3.11, except as noted thereon, or any license, approval or

consent referred to in Section 4.02(c); or any such Governmental Approval or license, approval or consent shall be rescinded, terminated, suspended, modified or withheld or shall be determined to be invalid or shall cease to be in full force and effect; or any proceeding shall be commenced by or before any Governmental Authority for the purpose of rescinding, terminating, suspending, modifying or withholding any such Governmental Approval or license, approval or consent and such proceeding is not dismissed within 60 days; and such failure, rescission, determination of invalidity, termination, suspension, modification, withholding, cessation or commencement is reasonably likely to have a Material Adverse Effect.

SECTION 6.13 TRANSFER OF COLLATERAL; EVENT OF LOSS; DIMINUTION OF PROPERTY RIGHTS.

(a) Transfer; Event of Loss. Title to or any right in all or any part of the Collateral, covered by the Security Documents (other than as permitted pursuant to this Agreement, including Section 5.12 hereof) shall become vested in any party other than the party named as owner and/or holder thereof in the applicable Security Document, whether by operation of law or otherwise, or (iv) there shall have occurred an Event of Loss with respect to which adequate compensation has not been paid, or it is reasonably unlikely that adequate

compensation will be paid.

(b) Diminution. Except as permitted pursuant to any Financing Document or this Agreement, the Borrower hereafter grants or permits any easement or dedication, files any plat, declaration or restriction or enters any lease or sub-lease concerning the Site, the Collateral or the Power Plant and the effect thereof is determined by the Lender, in its reasonable discretion, to have a Material and Adverse Effect.

SECTION 6.14 COMPLETION BY DATE CERTAIN. A determination by the Lender, in each case in its reasonable judgment, that the Project is not reasonably likely to be completed either within the financial budget or on time as established under the Business Plan; provided that no Event of Default shall be declared as a result of any such determination if all of the following conditions are met: (i) within 30 days after notice by the Lender to the Borrower of such determination, the Borrower submits to the Lender a plan, in form and substance acceptable to the Lender, specifying the plan of action the Borrower intends to take to remedy the condition described herein and (ii) the Borrower proceeds diligently in implementing such plan to the Lender's reasonable satisfaction and provides reports periodically as the Lender may request of the status of such implementation and from time to time amends such plan with the Lender's consent (which shall not be unreasonably withheld) so that such plan remains likely to achieve its aims.

SECTION 6.15 SPONSOR PROJECT FUNDING AGREEMENT. The failure of the Sponsor to make or cause to be made any subordinated loan or equity contribution or the failure of the Sponsor to pay any amount required to be paid by it under, or otherwise to comply with any of the terms of, the Sponsor Project Funding Agreement.

SECTION 6.16 CONTINGENT GUARANTEE AGREEMENT. The failure of Ormat Industries Ltd. to pay any amount required to be paid by it under or otherwise to comply with any of the terms of the Contingent Guarantee Agreement.

SECTION 6.17 MIGA CONTRACTS. Any of the MIGA Contracts shall not be valid, binding and in full force and effect.

SECTION 6.18 REMEDIES. Notwithstanding anything herein or in any Financing Document or elsewhere to the contrary, upon the occurrence of an Event of Default, and at any time thereafter, if such Event of Default is continuing, the Lender, by written notice to the Borrower and the Sponsor, may declare immediately due and payable (i) all or any portion of the principal amounts of the Loans then outstanding, including accrued interest thereon to the date of payment, and (ii) all other amounts owing under this Agreement. Except as expressly provided in this Article 6, presentment, demand, protest, promptness, dishonor and all other notices of any kind are hereby expressly waived. The aforementioned right to accelerate is in addition to and not a substitute for any other rights and remedies, in law or in equity, available to the Lender under this Agreement and other Applicable Laws, including, without limitation or prejudice to the Lender's other rights and remedies, the following:

(a) Suspension. The Lender's right to refuse, and the Lender not to be obligated, to make any Disbursements or make any payments from any account, including (but not limited to) the Debt Service Reserve Account;

(b) Enforcement of Rights. Exercise any and all rights and remedies available to it under any of the Project Documents.

ARTICLE 7. MISCELLANEOUS

SECTION 7.01 NOTICES.

(a) Procedure. All notices, requests and other communications shall be in writing (including, unless the context expressly otherwise provides, by facsimile transmission, provided that any matter transmitted by the Borrower by facsimile (i) shall be immediately confirmed by a telephone call to the recipient at the number specified below, and (ii) shall be followed promptly by the mailing or delivery of a hard copy original thereof) and mailed, faxed or delivered, to the address or facsimile number specified for notices below; or, as directed to the Borrower or the Lender, to such other address as shall be designated by such party in a written notice to the other parties, and as directed to any other party, at such other address as shall be designated by such party in a written notice to the Borrower and the Lender.

(b) Effectiveness. All such notices, requests and communications shall, when faxed, be effective when transmitted in legible form by facsimile machine, or if mailed, upon the seventh day after the date deposited into the national mail, or if delivered, upon delivery; except that notices pursuant to Article 2 shall not be effective until actually received by the Lender, and notices, requests and communications received on a day which is not a Business Day, shall be deemed received on the next following Business Day.

(c) Lender's Right to Rely. Any agreement of the Lender to receive certain notices by telephone or facsimile is solely for the convenience and at the request of the Borrower. The Lender shall be entitled to rely on the authority of any Person purporting to be a Person authorized by the Borrower to give such notice and the Lender shall not have any liability to any other Person on account of any action taken or not taken by the Lender in reliance upon such telephonic or facsimile notice. The obligation of the Borrower to repay the Loans shall not be

affected in any way or to any extent by any failure by the Lender to receive written confirmation of any telephonic or facsimile notice or the receipt by the Lender of a confirmation which is at variance with the terms understood by the Lender to be contained in the telephonic or facsimile notice.

(d) Addresses.

SECTION 7.02 ENGLISH LANGUAGE. All documents to be furnished or communications to be given or made under this Agreement, or any other Financing Document shall be in the English language or, if in another language, shall be accompanied by a translation into English certified by a representative of the Borrower, which translation shall be the governing version among the Borrower and the Lender.

SECTION 7.03 INDEMNITIES AND EXPENSES.

(a) Indemnity Obligation. Subject to Section 7.03(b), whether or not the transactions contemplated hereby are consummated, the Borrower shall indemnify and hold the Lender and each of its respective officers, directors, employees, counsel, agents and attorneys-in-fact (each, an "Indemnified Person") harmless from and against any and all liabilities, obligations, losses, damages, penalties, actions, judgments, claims, suits, costs, charges, expenses and disbursements (including, without limitation, Attorney Costs) of any kind or nature whatsoever which may at any time (including at any time following repayment of the Loans) be imposed on, incurred by or asserted against any such Indemnified Person in any way relating to or arising out of this Agreement or any document contemplated by or referred to herein, or the transactions contemplated hereby, or any action taken or omitted by any such Person under or in connection with any of the foregoing, any investigation, litigation or proceeding (including any bankruptcy, insolvency proceeding or appellate proceeding) related to or arising out of this Agreement, or any other Project Documents or the Loans or the use of the proceeds thereof or any Environmental Claim relating to the Borrower or the Project or arising out of the use of the Power Plant or Site or any actual or alleged presence of Hazardous Materials on, under or at the Power Plant or Site, whether or not any Indemnified Person is a party thereto (all the foregoing, collectively, the "Indemnified Liabilities"); provided, that the Borrower shall have no obligation hereunder to any

Indemnified Person with respect to Indemnified Liabilities resulting solely from the gross negligence or willful misconduct of such Indemnified Person. The agreements in this Section shall survive payment of all amounts due under this Agreement. The Lender and each other Indemnified Person shall (1) use its reasonable efforts to, upon its becoming aware of any event which may result in the Borrower being required to perform any of its obligations under this Section 7.03(a), promptly notify the Borrower (provided that failure to so notify shall not mitigate the obligations of the Borrower hereunder), (2) upon request from the Borrower consult the Borrower regarding any step (including any step which may mitigate the effect of such event) it proposes to take in respect of such event, and (3) obtain the prior written consent of the Borrower before entering into any settlement or compromise in relation to any such claims, actions or suits.

(b) Expenses. The Borrower shall: (i) subject to the last sentence of this Section 7.03(b) whether or not the transactions contemplated hereby are consummated, pay or reimburse the Lender as soon as practicable but, in any event, within 30 days after demand for all reasonable costs and expenses incurred by the Lender, in connection with the development, preparation, negotiation, delivery, printing, registration, administration and execution of, and any amendment, supplement, waiver or modification to (in each case, whether or not consummated), this

Agreement, any Financing Document and any other documents prepared in connection herewith or therewith, and the consummation of the transactions contemplated hereby and thereby, including reasonable travel expenses, communication costs, fees and expenses of outside professional or technical advisers or consultants, and including Attorney Costs incurred by the Lender, with respect thereto; and (ii) pay or reimburse the Lender as soon as practicable but, in any event, within 30 days after demand for all reasonable costs and expenses (including Attorney Costs) incurred by them in connection with the enforcement, attempted enforcement, or preservation of any rights or remedies under this Agreement or any other Financing Document during the existence of an Event of Default or after acceleration of the Loans (including in connection with any "workout" or restructuring regarding the Loans, and including in any bankruptcy or insolvency proceeding or appellate proceeding). In addition, the Borrower shall, whether or not the transactions contemplated hereby are consummated, pay or reimburse the Lender on the each of the Loan I Closing Date and Loan II Closing Date for all accrued and unpaid reasonable costs, fees and expenses to the extent then due and payable on such date of payment (including Attorney Costs, Commitment Fees and any amounts arising from any indemnities) incurred by the Lender, prior to such date in connection with the development, preparation, negotiation, delivery, printing, administration, enforcement and execution of, and any amendment, supplement, waiver or modification to (in each case whether or not consummated), this Agreement, any Financing Document and any other documents prepared in connection herewith or therewith, and the consummation of the transactions contemplated hereby and thereby, provided that Attorney Costs shall include such costs to the extent invoiced prior to or on such date of payment.

(c) Maximum Amount Permitted under Applicable Law. To the extent that the undertaking in the preceding paragraphs of this Section 7.03 may be unenforceable because it is violative of any law or public policy, the Borrower will contribute the maximum portion that it is permitted to pay and satisfy under Applicable Law to the payment and satisfaction of such undertakings.

(d) Late Payment. All sums paid and costs incurred by the Lender in respect to any matter indemnified hereunder shall bear interest at the LIBOR Overnight Rate plus 4.50% from the date so paid until reimbursed by the Borrower, and all such sums and costs shall be added to the debt and be secured

by the Security Documents and shall be immediately due and payable on demand.

(e) Judgment Currency. If any arbitration award, judgment or order is given or made for the payment of any amount due under this Agreement or any other Project Document and such arbitration award, judgment or order is expressed in a currency other than Dollars, the Borrower shall, subject to this Section 7.03(e), indemnify the Lender against and hold it harmless from all loss and damage incurred by the Lender as a result of any variation in rates of exchange between the date of such arbitration award, judgment or order and the date of payment (or, in the case of partial payments, the date of each partial payment) thereof. This indemnity shall constitute an obligation separate and independent from the other obligations contained in this Agreement or any other Project Document, shall give rise to a separate and independent cause of action, shall apply irrespective of any indulgence granted by the Lender from time to time, and shall continue in full force and effect notwithstanding any arbitration award, judgment or order for a liquidated sum in respect of an amount due under this Agreement or any other Project Document.

SECTION 7.04 SURVIVAL. All indemnities set forth herein and the obligations of the Borrower to pay additional costs as set forth in Article 2 hereof shall survive the execution and delivery of this Agreement and the making and repayment of the Loans.

SECTION 7.05 GOVERNING LAW; SUBMISSION TO JURISDICTION.

(a) Governing Law. THIS AGREEMENT SHALL IN ALL RESPECTS BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE INTERNAL LAWS OF THE STATE OF NEW YORK, UNITED STATES OF AMERICA WITHOUT REFERENCE TO THE CONFLICTS OF LAWS PROVISIONS THEREOF (OTHER THAN SECTION 5-1401 OF THE NEW YORK GENERAL OBLIGATIONS LAW).

(b) Submission to Jurisdiction. Any legal action or proceeding against the Borrower with respect to this Agreement, or any Financing Document may be brought in the courts of the State of New York in the County of New York or of the United States for the Southern District of New York and, by execution and delivery of this Agreement, the Borrower hereby irrevocably accepts for itself and in respect of its property, generally and unconditionally, the jurisdiction of the aforesaid courts. The Borrower agrees that a judgment, after exhaustion of all available appeals, in any such action or proceeding shall be conclusive and binding upon the Borrower, and may be enforced in any other jurisdiction, including without limitation Nicaragua, by a suit upon such judgment, a certified copy of which shall be conclusive evidence of the judgment. The Borrower hereby irrevocably designates, appoints and empowers CT Corporation System, on the date hereof, with offices at 111 Eighth Avenue, New York, New York 10011, as its designee, appointee and agent to receive, accept and acknowledge for and on its behalf, and in respect of its property, service of any and all legal process, summons, notices and documents which may be served in any such action or proceeding. If for any reason such designee, appointee and agent shall cease to be available to act as such, the Borrower agrees to designate a new designee, appointee and agent in New York City on the terms and for the purposes of this provision satisfactory to the Lender. The Borrower further irrevocably consents to the service of process out of any of the aforementioned courts in any such action or proceeding by the mailing of copies thereof by registered or certified mail, postage prepaid, to the Borrower, at its address set forth in Section 7.01 hereof, such service to become effective 30 days after such mailing. Nothing herein shall affect the right of the Lender to serve process in any other manner permitted by law or to commence legal proceedings or otherwise proceed against the Borrower in Nicaragua or in any other jurisdiction.

(c) Waiver of Procedural Defenses. The Borrower hereby irrevocably waives any objection which it may now or hereafter have to the laying of venue of any of the aforesaid actions or proceedings arising out of or in connection with this Agreement, or any other Financing Document brought in the courts referred to in clause (b) above and hereby further irrevocably waives and agrees not to plead or claim in any such court that any such action or proceeding brought in any such court has been brought in an inconvenient forum.

(d) Waiver of Jury Trial. WITH REGARD TO THIS AGREEMENT, EACH OF THE BORROWER AND THE LENDER HEREBY WAIVE THE RIGHT TO A TRIAL BY JURY, SUCH WAIVER ACKNOWLEDGED HEREBY AS BEING A VOLUNTARY, KNOWING AND INTELLIGENT WAIVER BY EACH PARTY HERETO.

SECTION 7.06 SUCCESSORS AND ASSIGNS.

(a) Benefit of Agreement. This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the parties hereto except that the Borrower may not assign or otherwise transfer all or any part of its rights or obligations under this Agreement without obtaining the prior written consent of the Lender. For the avoidance of doubt, any merger, reincorporation, corporate restructuring or other business combination involving any shareholder of any Lender (and any other transaction related to such shareholder which is undertaken in connection with any such transactions) shall not be construed as an assignment or transfer requiring any consent under this Section 7.06(a).

(b) Disposition of Indebtedness. Subject to the following restrictions, the Lender may at any time sell, assign, transfer, negotiate, or otherwise dispose of, in whole or in part, its rights and obligations under this Agreement or the Loans and such sale, assignment, negotiation or disposition shall be evidenced by an assignment and acceptance agreement, in form and substance acceptable to the Lender and to the Borrower, appropriately completed and executed by the assigning Lender and the assignee. Such executed assignment and acceptance agreement shall be delivered to the Lender and the Borrower immediately after execution and shall not be effective until all conditions set forth therein and in this Section 7.06 shall have been satisfied.

(i) The Lender may assign its rights and obligations under this Agreement and/or the Loans only to a Person approved by the Borrower (which approval in each case shall not be unreasonably withheld) in its sole discretion; provided, that no Borrower approval shall be required in the event of such an assignment by a Lender to an Affiliate of the Lender.

(ii) The exercise of such right by the Lender is subject in all cases to the conditions that immediately thereafter the Lender shall have given written notice of any such transfer to the Borrower, and the transferee shall (a) not have, or shall have effectively waived, any right pursuant to Section 2.09 or 2.14 to claim from the Borrower any additional amounts above and beyond those which could have been claimed by the transferor had it continued to own its Loans hereunder and (b) not have any right pursuant to Section 2.09 or 2.14 not possessed by the transferor had it continued to own its Loans hereunder.

(c) Succession. From and after the date that the Lender has received an executed assignment and acceptance agreement (in accordance with the terms of Section 7.06(b) and the conditions set forth in such assignment and acceptance agreement have been satisfied, (i) the assignee Lender thereunder shall be a party hereto and, to the extent that rights and obligations hereunder have been assigned to it pursuant to such assignment and acceptance agreement, shall have the rights and obligations of a Lender hereunder and under the other Financing

Documents and (ii) the assignor Lender shall, to the extent that rights and obligations hereunder and under the other Financing Documents have been assigned by it pursuant to such assignment and acceptance agreement, relinquish its rights and be released from its obligations under the Financing Documents.

(d) Deemed Amendment. Immediately upon the satisfaction of all other conditions in this Section 7.06 and in such assignment and acceptance agreement, this Agreement shall be deemed to be amended to the extent, but only to the extent, necessary to reflect the addition of the assignee Lender and the resulting adjustment of the Total Commitment arising therefrom.

The Total Commitment allocated to each assignee Lender shall reduce such Total Commitment of the assigning Lender pro tanto.

(e) Disposition Acknowledged Upon Notice. The Borrower may treat the Lender as the owner of the Loans until written notice of transfer or assignment shall have been received by it.

(f) Participations. Notwithstanding anything to the contrary contained in this Section 7.06, each Lender may grant participations, in whole or in part, in its rights and obligations under this Agreement and the Loans without notice to the Borrower and without restriction; provided that (i) the Lender's obligations under this Agreement shall remain unchanged, (ii) the Lender shall remain solely responsible to the other parties hereto for the performance of such obligations and (iii) the Borrower, shall continue to deal solely and directly with the Lender in connection with the Lender's rights and obligations under this Agreement, and the Lender shall retain the sole right to enforce the obligations of the Borrower relating to the Loans of the Lender.

SECTION 7.07 COUNTERPARTS. This Agreement may be executed in several counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same agreement.

SECTION 7.08 RIGHT OF SETOFF. In addition to any rights now or hereafter granted under Applicable Law or otherwise, and not by way of limitation of any such rights, upon the occurrence of an Event of Default, the Lender is hereby authorized at any time or from time to time, without presentment, demand, protest or other notice of any kind to the Borrower or to any other Person, any such notice being hereby expressly waived, to set off and to appropriate and apply any and all deposits (general or special) including, without limitation, the accounts established under Sections 5.28(a) and 5.33, and any other Indebtedness at any time held or owing by the Lender (including without limitation by branches and agencies of the Lender, wherever located), to or for the credit or the account of the Borrower against and on account of the Loans and any other Indebtedness of the Borrower to the Lender, under this Agreement, or any of the other Financing Documents, including, without limitation, all claims of any nature or description arising out of or connected with this Agreement, or any other Financing Document, irrespective of whether or not the Lender shall have made any demand hereunder and although said liabilities or claims, or any of them, shall be contingent or unmatured.

SECTION 7.09 NO WAIVER; REMEDIES CUMULATIVE. No failure or delay on the part of the Lender in exercising any right, power or privilege hereunder or any other Financing Document and no course of dealing between the Borrower and the Lender shall impair any such right, power or privilege or operate as a waiver thereof; nor shall any single or partial exercise of any right, power or privilege hereunder or any other Financing Document preclude any other or further exercise thereof or the exercise of any other right, power or privilege hereunder or thereunder. The rights, powers and remedies herein, or in any other

Financing Document expressly provided are cumulative and not exclusive of any rights, powers or remedies which the Lender would otherwise have. No notice to or demand on the Borrower in any case shall entitle the Borrower to any other or further notice or demand in similar or other circumstances or constitute a waiver of the rights of the Lender to any other or further action in any circumstances without notice or demand.

SECTION 7.10 SEVERABILITY. Any provision of this Agreement and any other Financing Document which is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability but that shall not invalidate the remaining provisions of this Agreement or any other Financing Document or affect such provision in any other jurisdiction.

SECTION 7.11 CALCULATION. Except as otherwise provided, all accounts, financial determinations and calculations to be made under, or for the purposes of, this Agreement shall be determined in accordance with GAAP, applied on a consistent basis and, except as otherwise required to conform to the definitions contained in Appendix A of this Agreement or any other provisions of this Agreement, shall be calculated from the then most recently issued quarterly financial statements which the Borrower is obligated to furnish to the Lender from time to time, as provided hereunder; provided, however, that (a) if the relevant quarterly financial statements should be in respect of the last quarter of a Fiscal Year then such calculations shall be made from the audited financial statements for the relevant Fiscal Year, and (b) if there should occur any material adverse change in the financial condition or results of operations of the Borrower after the end of the period covered by the relevant financial statements, then such material adverse change shall also be taken into account in calculating the relevant figures.

SECTION 7.12 HEADINGS DESCRIPTIVE. The headings of the several sections and subsections of this Agreement are inserted for convenience only and shall not in any way affect the meaning or construction of any provision of this Agreement.

SECTION 7.13 AMENDMENT OR WAIVER. Neither this Agreement nor any terms hereof may be changed, waived, discharged or terminated unless, such change, waiver, discharge or termination is in a writing signed by the Lender and the Borrower.

SECTION 7.14 DISCLAIMER. The Lender shall not be responsible in any way for the performance of the Project Documents, and no claim with respect to the performance of the Project Documents will affect the obligations of the Borrower under this Agreement or any other Financing Document.

SECTION 7.15 PAYMENTS SET ASIDE. To the extent that the Borrower makes a payment to the Lender or the Lender exercises its right of set-off, and such payment or the proceeds of such set-off or any part thereof are subsequently invalidated, declared to be fraudulent or preferential, set aside or required to be repaid to a trustee, receiver or any other party, in connection with any bankruptcy or insolvency proceeding or otherwise, then to the extent of such recovery, the obligation or part thereof originally intended to be satisfied shall be revived and continued in full force and effect as if such payment had not been made or such set-off had not occurred.

SECTION 7.16 CONFIDENTIAL INFORMATION. The Lender agrees that it (a) shall hold all non-public information obtained by it pursuant to the requirements of the Financing Documents, which have been identified in writing

as non-public information by the Sponsor, in accordance with its customary procedures for handling confidential information of such nature and in accordance with reasonable internal practices, and (b) may make disclosure reasonably required by a potential assignee of the Lender or by a potential participant in the Loans made or to be made by the Lender or of the Collateral in connection with the contemplated assignment or participation if such potential assignee or participant executes an agreement to keep such

disclosure confidential substantially in accordance with the terms of this clause; provided, however, no confidentiality obligation shall apply to any information that (x) is generally available to the public, (y) was already known to the Lender on a non-confidential basis on the date of receipt, or (z) is subsequently disclosed to the Lender on a non-confidential basis by a third party not having a confidential relationship with the Sponsor with respect to such information. Notwithstanding the foregoing, the Lender shall be free to disclose any such information or data to its attorneys, outside engineers, experts and auditors and shall be free to disclose any such information otherwise (a) to the extent required by Applicable Law or by any Governmental Authority, except as provided in the last sentence of this Section 7.16, it is expressly understood that all obligations and liabilities of the Borrower under this Agreement, and the other Project Documents to which the Borrower is a party and any other related document, agreement or instrument executed by the Borrower are solely obligations of the Borrower, provided, that such limitation of liability shall not apply to any other party hereto if and to the extent that such party commits fraud or misappropriation of earnings, revenues, profits or proceeds from the Borrower or the Project. Notwithstanding anything herein to the contrary, nothing herein shall limit, or be construed or deemed to limit, the liability of any other party under any Project Document to which such is a party in its individual capacity.

SECTION 7.17 NO RECOURSE. Except as provided in the last 2 sentences of this Section 7.17 neither the Sponsor nor any Affiliate of the Sponsor (other than the Borrower), nor its or their respective officers, directors, stockholders, controlling persons or employees (each, a "Non-Recourse Party"), shall have any personal liability for any amounts payable by the Borrower hereunder or under any other Project Document or for the performance of any covenant, agreement or obligation of the Borrower, or for the breach of any representation, warranty or covenant of the Borrower under this Agreement or any other Project Document, agreement, undertaking, certificate or other document delivered by or on behalf of the Borrower in connection with this Agreement, and therefore no judgment or recourse shall be sought or enforced against any Non-Recourse Party for the payment or performance of the obligations of the Borrower under any Project Document or any other such agreement, undertaking, certificate or document executed by the Borrower. Except as provided in the last sentence of this Section 7.17, it is expressly understood that all obligations and liabilities of the Borrower under this Agreement and the other Project Documents to which the Borrower is a party and any other related document, agreement or instrument executed by the Borrower are solely obligations of the Borrower, provided, that such limitation of liability shall not apply to a Non-Recourse Party if and to the extent that such Non-Recourse Party commits fraud causing material damage or loss to the Borrower, the Project or the Lender or misappropriates earnings, revenues, profits or proceeds from the Borrower or the Project. Notwithstanding anything herein to the contrary, nothing herein shall limit, or be construed or deemed to limit, the liability of any Non-Recourse Party under any Project Document to which such Non-Recourse party is a party in its individual capacity.

IN WITNESS WHEREOF, the parties hereto, acting through their duly authorized representatives, have caused this Agreement to be signed in their respective names as of the date set forth below.

CREDIT AGREEMENT (this "AGREEMENT") dated as of December 31, 2002 among ORMESA LLC, a limited liability company duly formed and validly existing under the laws of the State of Delaware (the "BORROWER"), each of the lenders that is a signatory hereto or which, pursuant to Section 11.06(b), shall become a "Lender" hereunder (individually, a "LENDER" and, collectively, the "LENDERS"), UNITED CAPITAL, a division of Hudson United Bank, a New Jersey banking corporation ("UNITED"), not in its individual capacity, but solely as administrative agent for the Lenders (in such capacity, the "ADMINISTRATIVE AGENT"), and UNITED, not in its individual capacity, but solely as collateral agent for the benefit of the Secured Parties (in such capacity, the "COLLATERAL AGENT").

WHEREAS, the Borrower directly owns 100% of the assets comprising each Project and has requested that the Lenders make Loans to it in an aggregate principal amount not exceeding \$27,500,000 in order to enable the Borrower to: (a) fund the Debt Service Reserve Account as provided herein; (b) fund certain of its working capital needs in connection with the operation of each Project; (c) pay costs associated with the transactions contemplated by the Financing Documents; and (d) make a distribution to the Sponsor;

WHEREAS, the Lenders are prepared to make the Loans upon the terms and conditions hereof;

NOW, THEREFORE, the parties hereto agree as follows:

ARTICLE I

DEFINITIONS AND INTERPRETIVE MATTERS

- 1.01 CERTAIN DEFINED TERMS. Unless otherwise specified herein, capitalized terms used in this Agreement shall have the meanings assigned to such terms in Schedule I. Capitalized terms and other terms used in this Agreement shall be interpreted in accordance with Sections 1.02, 1.03 and 1.04, as applicable.
- 1.02 CLASSES AND TYPES OF LOANS. Loans hereunder are distinguished by "Class" and by "Type". The "CLASS" of a Loan refers to whether such Loan is an Initial Term Loan or an Additional Term Loan, each of which constitutes a Class of Loans. Commitments to make Loans and Notes evidencing Loans may be correspondingly referred to hereunder by the Class of Loan to which such Commitment or Note, as applicable, relates. The "TYPE" of a Loan refers to whether such Loan is a Prime Rate Loan or a Eurodollar Loan, each of which constitutes a Type of Loan. Loans may be identified by both Class and Type.
- 1.03 RULES OF INTERPRETATION. Unless the context of this Agreement otherwise requires:
- (a) words of any gender include each other gender;

-2-

- (b) words using the singular or plural form also include the plural or singular form, respectively;
- (c) any reference to any Person in any capacity includes a reference

to its successors and assigns in such capacity to the extent such succession or assignment is permitted or not prohibited hereunder and, in the case of any Government Authority, any Person succeeding to its functions and capacities;

- (d) the terms "hereof", "herein", "hereby", "hereto" and similar words refer to this entire Agreement and not any particular Section, Schedule, Exhibit or other subdivision of this Agreement;
- (e) references to "Section", "Schedule" or "Exhibit" are to such subdivisions contained in or annexed to this Agreement;
- (f) the words "include" and "including" shall be deemed to be followed by "without limitation" or "but not limited to", whether or not they are followed by such phrases or words of like import;
- (g) references to any statute or statutory provision shall be construed as a reference to the same as it may have been, or may from time to time be, amended, modified or re-enacted;
- (h) references to any agreement or document (including this Agreement) shall (unless otherwise expressly provided) be construed as a reference to such agreement or document as amended, modified, novated or supplemented (to the extent such amendment, modification, novation or supplement is permitted or not prohibited by the terms of such agreement or document, this Agreement and any other Financing Document) and in effect from time to time and shall (unless otherwise expressly provided) include a reference to any document that amends, modifies, novates or supplements it, or is entered into, made or given pursuant to or in accordance with its terms;
- (i) "this Agreement" and words of similar import shall mean this Agreement, together with all Schedules and Exhibits;
- (j) the headings and table of contents contained in this Agreement are inserted for convenience of reference only and shall not affect the interpretation of this Agreement;
- (k) references to days shall refer to calendar days, unless Business Days are expressly specified; references to weeks, months or years shall be to calendar weeks, months or years, respectively, unless expressly specified otherwise; and

-3-

- (l) to the extent capitalized terms used in this Agreement are defined by reference to any other Transaction Document (or by reference in such Transaction Document to any other Transaction Document), for purposes of this Agreement, such terms shall continue to have their original definitions notwithstanding any termination or expiration of such agreements, except to the extent the parties hereto agree to the contrary.

1.04 ACCOUNTING TERMS.

- (a) Accounting Principles, Etc. Except as otherwise expressly provided in this Agreement, all accounting terms used herein or in any other Financing Document shall be interpreted, and all financial statements, certificates and reports as to financial accounting matters required to be delivered hereunder or thereunder, shall (unless otherwise notified as provided in Section 1.04(b)) be prepared or made in accordance with the Accounting Principles of the relevant Person to which such terms, financial statements,

certificates and/or reports relate, applied on a basis consistent with those used in the preparation of the latest financial statements of such Person furnished hereunder or thereunder, as the case may be, except for such changes as are required by such Accounting Principles.

- (b) Accounting Variations. In respect of any relevant period, the Borrower shall, except to the extent already required by the relevant Accounting Principles, deliver (or cause the relevant other Person to deliver) to the Administrative Agent, at the same time as the delivery of any financial statement for that period under Section 8.01, a description in reasonable detail of any material variation (and the consequence thereof) between the application of the Accounting Principles employed in the preparation of such statement and the application of the Accounting Principles employed in the preparation of the financial statements for the immediately preceding period.
- (c) Fiscal Periods. To enable the ready and consistent determination of compliance with this Agreement, the Borrower shall not change the last day of its fiscal year from December 31 of each year, or the last days of the first three fiscal quarters in each of its fiscal years from March 31, June 30 and September 30 of each year, respectively, except to the extent required by any Government Rule. The Borrower shall notify the Administrative Agent promptly upon becoming aware of such proposed Government Rule requirement of the nature and the effective date of such proposed change. Promptly after the delivery of such notice, the Borrower and the Administrative Agent (acting at the direction or with the consent of the Majority Lenders) shall negotiate in good faith any amendments to the provisions of the Financing Documents that may be necessary to give fair effect to the intention of such provisions.

-4-

ARTICLE II

COMMITMENTS

2.01 LOANS.

- (a) Initial Term Loan Facility. Each Lender severally agrees, on the terms and conditions of this Agreement, to make a loan (collectively, the "INITIAL TERM LOANS") to the Borrower in Dollars on the Closing Date in an aggregate principal amount equal to the amount of the Initial Term Loan Commitment of such Lender; provided that: (i) there shall be no more than one borrowing of Initial Term Loans; and (ii) in no event shall the aggregate principal amount of all Initial Term Loans at any one time outstanding exceed the aggregate amount of the Initial Term Loan Commitments as in effect from time to time. Amounts prepaid or repaid in respect of the Initial Term Loans may not be reborrowed.
- (b) Additional Term Loan Facility. Each Lender severally agrees, on the terms and conditions of this Agreement, to make a loan (collectively, the "ADDITIONAL TERM LOANS") to the Borrower in Dollars during the Additional Term Loan Availability Period in an aggregate principal amount at any one time outstanding up to, but not exceeding, the amount of the Additional Term Loan Commitment of such Lender as in effect from time to time; provided that: (i) there shall be no more than one borrowing of Additional Term

Loans; and (ii) in no event shall the aggregate principal amount of all Additional Term Loans at any one time outstanding exceed the aggregate amount of the Additional Term Loan Commitments as in effect from time to time. Amounts prepaid or repaid in respect of the Additional Term Loans may not be reborrowed.

(c) Terms Applicable to All Loans; Conversions and Continuations.

- (i) Borrowings of Loans shall be made and Continued solely in the form of Eurodollar Loans; provided that the Borrower may, subject to all other applicable terms and conditions of this Agreement (including Section 5.04):
 - (A) Subject to its prior delivery to the Administrative Agent of a Conversion/Continuation Notice, convert any Loans that are Eurodollar Loans into Prime Rate Loans as provided in Sections 5.02 and 5.04;
 - (B) in any other circumstance where the Borrower and the Administrative Agent concur that, taking account of the expected timing of repayment of any such Loan and the duration of the Interest Periods available for selection by the Borrower, Converting such Loan into a Prime Rate
- (C) borrow Loans initially as Prime Rate Loans with the consent of the Administrative Agent (not to be unreasonably withheld or delayed) as and to the extent necessary to synchronize the Interest Period of such Loans with other outstanding Loans that are Eurodollar Loans; provided that the Borrower shall, subject to its prior delivery to the Administrative Agent of a Conversion/Continuation Notice, Convert such Prime Rate Loans to Eurodollar Loans as soon as possible to achieve synchronization of such Loans.
- (ii) Borrowings of Loans may be made initially in the form of Prime Rate Loans if the Borrower is unable to provide sufficient advance notice pursuant to Section 4.05 of the borrowing of such Loans as Eurodollar Loans; provided that such Loans shall be Converted as soon as practicable after the initial borrowing thereof into Eurodollar Loans (unless the Borrower and the Administrative Agent concur that, taking account of the expected timing of repayment of any such Loan and the duration of the Interest Periods available for selection by the Borrower if such Loan were so Converted, the Conversion of such Loan into a Eurodollar Loan will likely subject the Borrower to additional costs pursuant to Section 5.05).
- (iii) Following the occurrence of any Default or Event of Default, the Administrative Agent may suspend the right of the Borrower to Continue any Loans as, or to Convert any Loans into, Eurodollar Loans.
- (iv) In connection with any Conversion hereunder, and notwithstanding anything to the contrary contained in this

Loan will enable the Borrower to avoid breakage costs pursuant to Section 5.05, make such Conversion; and

Agreement, a Lender may (in its sole discretion, subject to Section 5.07(a)) change its Applicable Lending Office with respect to the Loan so Converted.

- (d) Limit on Eurodollar Loans. Only one Interest Period in respect of Eurodollar Loans may be outstanding at any one time.

2.02 BORROWINGS. The Borrower shall give the Administrative Agent (which shall promptly notify the Lenders) notice of each borrowing hereunder as provided in Section 4.05 pursuant to a Notice of Borrowing. Not later than 11:00 a.m., New York time, on the date specified for each borrowing hereunder, each Lender shall make available the amount of the Loan to be made by it on such date to the Administrative Agent at its

-6-

Principal Office, in immediately available funds, for the account of the Borrower. The aggregate principal amount of the Initial Term Loan Commitment shall, subject to the terms and conditions of this Agreement, be made available to the Borrower by the Administrative Agent's depositing the same in immediately available funds to such accounts as agreed between the Borrower and the Administrative Agent; provided that an amount equal to \$724,000 of the proceeds of the Initial Term Loans shall, pursuant to said agreement between the Borrower and the Administrative Agent, be deposited to the Revenue Account.

2.03 REDUCTION OF COMMITMENTS.

- (a) Optional Reduction of Additional Term Loan Commitments. Subject to Section 2.03(b), the Borrower may at any time reduce the aggregate unused amount of the Additional Term Loan Commitments that are surplus to the needs of the Borrower; provided that: (i) the Borrower shall give notice of each such reduction as provided in Section 4.05; and (ii) each partial reduction shall be in an aggregate amount at least equal to \$500,000 and in integral multiples of \$500,000 in excess thereof.
- (b) No Reinstatement. Any Commitments reduced pursuant to paragraph (a) above shall for all purposes hereof be terminated and may not be reinstated.
- (c) Termination of Commitments. Unless previously terminated, the Commitments of each Class shall terminate at 5:00 p.m., New York time, on the last day of the Initial Term Loan Availability Period or Additional Term Loan Availability Period, as the case may be.

2.04 FEES.

- (a) Up-Front Fee. On the Closing Date the Borrower shall pay to the Administrative Agent, for the account of each Lender, an up-front fee in an amount equal to 2.00% of the sum of such Lender's Commitments; provided, however, that such fee payable to United, as Lender, shall be reduced by an amount equal to \$50,000.
- (b) Commitment Fees. The Borrower shall pay to the Administrative Agent, for the account of each Lender, a commitment fee on the daily average unused amount of such Lender's Commitments for the period from (and including) the Execution Date through (and including): (i) in the case of the Initial Term Loan Commitments,

the earliest of (A) the Closing Date, (B) the day on which the Initial Term Loan Commitments are reduced to zero or terminated, and (C) the last day of the Initial Term Loan Availability Period and, (ii) in the case of the Additional Term Loan Commitments, the earliest of (A) the Second Closing Date, (B) the day on which the Additional Term Loan Commitments are reduced to zero or terminated, and (C) the last day of the Additional Term Loan Availability Period, in each case in the amount of 0.375% per annum.

-7-

- (c) Commitment Fees Generally. All accrued commitment fees payable pursuant to Section 2.04(b) shall be payable in arrears on each Quarterly Date and, with respect to the Commitments of any Class, on the earliest to occur of the date on which of the Commitments of such Class expire, the date the Commitments of such Class are terminated or reduced to zero, and the Final Maturity Date.
- (d) Administrative Agency Fees. Commencing on the first anniversary of the Closing Date, and annually on each subsequent anniversary thereafter, the Borrower shall pay to the Administrative Agent, for the account of the Administrative Agent, an annual agency fee in an amount equal to \$25,000. The Administrative Agent shall not be required to refund any fee it has already received.

2.05 LENDING OFFICES. The Loans of each Type made by each Lender shall be made and maintained at such Lender's Applicable Lending Office for Loans of such Type.

2.06 SEVERAL OBLIGATIONS; REMEDIES INDEPENDENT. The obligations of the Lenders hereunder are several and not joint. The failure of any Lender to make any Loan to be made by it, or any payment required to be made by it hereunder, on the date specified therefor shall not relieve any other Lender of its obligation to make its Loan, or its payment, on such date. Neither any Lender nor any Agent shall be responsible for the failure of any other Lender to make a Loan, or a payment, to be made by such other Lender.

2.07 NOTES.

- (a) Initial Term Loan Notes. The Initial Term Loan of each Lender shall be evidenced by a single promissory note of the Borrower (each, an "INITIAL TERM LOAN NOTE") substantially in the form of Exhibit A-1, dated the Closing Date, payable to such Lender in a principal amount equal to the amount of its Initial Term Loan Commitment as in effect on the Closing Date and otherwise duly completed.
- (b) Additional Term Loan Notes. The Additional Term Loan of each Lender shall be evidenced by a single promissory note of the Borrower (each, an "ADDITIONAL TERM LOAN NOTE") substantially in the form of Exhibit A-2, dated the Closing Date, payable to such Lender in a principal amount equal to the amount of its Additional Term Loan Commitment as in effect on the Closing Date and otherwise duly completed.
- (c) Loan Records. Each Lender shall maintain in accordance with its usual practice records evidencing the indebtedness of the Borrower to such Lender resulting from each Loan made by such Lender,

including the amounts of principal and interest payable and paid to such Lender from time to time hereunder. The Administrative Agent shall maintain records in which it shall record: (i) the amount of each Loan made hereunder, the Class and Type thereof and each Interest Period therefor; (ii) the amount of any principal or interest due and

-8-

payable or to become due and payable from the Borrower to each Lender hereunder; and (iii) the amount of any sum received by the Administrative Agent hereunder for the account of the Lenders and each Lender's share thereof. The entries made in the records maintained pursuant to this paragraph (c) shall be prima facie evidence of the existence and amounts of the obligations recorded therein; provided that the failure of any Lender or the Administrative Agent to maintain such records or any error therein shall not in any manner affect the obligation of the Borrower to repay the Loans in accordance with the terms of this Agreement.

- (d) Subdivision. No Lender shall be entitled to have any of its Notes subdivided, by exchange for promissory notes of lesser denominations or otherwise, except in connection with a permitted assignment of all or any portion of such Lender's related Commitment, related Loan and related Notes pursuant to Section 11.06(b).

-9-

ARTICLE III

PAYMENTS OF PRINCIPAL AND INTEREST

3.01 REPAYMENT OF LOANS.

The Borrower hereby promises to pay to the Administrative Agent for the account of each Lender the outstanding principal of such Lender's Loan in twenty (20) consecutive quarterly installments payable commencing on the first Quarterly Date following the Closing Date, on the next eighteen succeeding Quarterly Dates and on the Final Maturity Date, each such installment in the amount set forth below (a) if prior to the Second Closing Date, under the heading "Initial Term Loan Principal Payment" and (b) if on or after the Second Closing Date, under the heading "Initial and Additional Term Loan Principal Payment", in each case opposite the reference to such Quarterly Date, less any portion of any such Initial Term Loans prepaid in accordance with Sections 3.03 and 3.04:

PAYMENT DATE	INITIAL TERM LOAN PRINCIPAL PAYMENT	INITIAL AND ADDITIONAL TERM LOAN PRINCIPAL PAYMENT
March 31, 2003	\$ 698,000	\$ 698,000
June 30, 2003	\$ 434,000	\$ 434,000
September 30, 2003	\$1,696,000	\$1,696,000
December 31, 2003	\$1,698,700	\$1,698,700

March 31, 2004	\$ 594,171	\$ 869,000
June 30, 2004	\$ 369,596	\$ 540,550
September 30, 2004	\$1,446,369	\$2,115,375
December 31, 2004	\$1,446,369	\$2,115,375
March 31, 2005	\$ 649,177	\$ 950,000
June 30, 2005	\$ 403,856	\$ 591,000
September 30, 2005	\$1,579,208	\$2,311,000
December 31, 2005	\$1,579,209	\$2,311,000
March 31, 2006	\$ 709,544	\$1,039,000
June 30, 2006	\$ 441,161	\$ 646,000
September 30, 2006	\$1,726,399	\$2,528,000
December 31, 2006	\$1,726,399	\$2,528,000
March 31, 2007	\$ 446,306	\$ 683,000
June 30, 2007	\$ 277,062	\$ 424,000
September 30, 2007	\$1,085,379	\$1,661,000
December 31, 2007	\$ 993,095	\$1,661,000

-10-

Notwithstanding anything to the contrary herein, to the extent not otherwise repaid in full prior to the Final Maturity Date, the Borrower unconditionally promises to pay to the Administrative Agent for the account of each Lender the outstanding principal amount of the Loans made by such Lender, and such Loans shall mature, on the Final Maturity Date.

3.02 INTEREST.

- (a) General. The Borrower hereby promises to pay to the Administrative Agent for the account of each Lender, interest on the unpaid principal amount of each Loan made by such Lender for the period from and including the date of such Loan to but excluding the date such Loan shall be paid in full, at the following rates per annum:
 - (i) during such periods as such Loan is a Prime Rate Loan, the Prime Rate (as in effect from time to time) plus the Applicable Margin; and
 - (ii) during such periods as such Loan is a Eurodollar Loan, for each Interest Period relating thereto, the Eurodollar Rate for such Loan for such Interest Period plus the Applicable Margin.
- (b) Default Interest. Notwithstanding the foregoing, the Borrower hereby promises to pay to the Administrative Agent for the account of each Lender interest at the applicable Post-Default Rate on any principal of any Loan made by such Lender, and on any other amount payable by the Borrower hereunder or under any Note held by such Lender, to or for the account of such Lender, which shall not be paid in full when due (whether at stated maturity, by acceleration, by mandatory prepayment or otherwise), for the period from and including the due date thereof to but excluding the date the same is paid in full.
- (c) Payment. Accrued interest on each Loan shall be payable: (i) in the case of a Prime Rate Loan, quarterly on the Quarterly Dates; (ii) in the case of a Eurodollar Loan, on the last day of each Interest Period therefor; and (iii) in the case of any Loan, upon the payment or prepayment thereof or the Conversion of such Loan to a Loan of another Type (but only on the principal amount so paid, prepaid or Converted).

Interest payable at the Post-Default Rate as provided in Section 3.02(b) shall be payable from time to time on demand (or, if no

demand is made during any month, on the last day of such month).

-11-

- (d) Determination of Interest Rate. Promptly after the determination of any interest rate provided for herein or any change therein, the Administrative Agent shall give notice thereof to the Lenders to which such interest is payable and to the Borrower.

-12-

3.03 OPTIONAL PREPAYMENTS.

- (a) Subject to Section 4.04, the Borrower shall have the right to prepay any Loans, at any time and from time to time following the second anniversary of the Closing Date; provided that: (a) the Borrower shall give the Administrative Agent and the Collateral Agent notice of each such prepayment, as provided in Section 4.05 (and, upon the date specified in any such notice of prepayment, the amount to be prepaid shall become due and payable hereunder); and (b) Eurodollar Loans may be prepaid only on the last day of the Interest Period for such Loans unless the Borrower pays all applicable breakage costs pursuant to Section 5.05 at the time of such prepayment.
- (b) Simultaneously with any optional prepayment, in whole or in part, of the principal of any Loans pursuant to the foregoing clause (a) (other than any prepayment made pursuant to the final sentence of Section 5.07(a)) or any mandatory prepayment pursuant to Sections 3.04(b) or 3.04(c), the Borrower agrees to pay to the Administrative Agent for the account of each Lender a prepayment commission in respect of each such prepayment in an amount equal to that percentage of the principal amount of the Loans so prepaid set forth below opposite the period in which such prepayment occurs:

Period in Which Prepayment is Made -----	Prepayment Commission -----
From and including the second anniversary of the Closing Date through and including the day prior to the third anniversary of the Closing Date	2.00%
From and including the third anniversary of the Closing Date through and including the day prior to the fourth anniversary of the Closing Date	1.00%
From and including the fourth anniversary of the Closing Date through and including the Final Maturity Date	0.00%

- 3.04 MANDATORY PREPAYMENTS; ETC. The Borrower shall make the following mandatory payments in the amounts and at the times set out below, in each case, except as otherwise provided in Section 3.03(b), without any

(a) Event of Loss.

- (i) If a Project is declared a Total Loss by its insurers, then on the later of the date of actual receipt of Loss Proceeds with respect thereto and the date of such declaration; and
- (ii) not later than the date specified for prepayment in accordance with Section 8.05(d) with respect to: (A) any Event of Loss (or upon such earlier date as the Borrower shall have determined not to Restore the related Affected Property); or (B) any period during which any of the conditions of the Restoration under Section 8.05(d) shall have ceased to be satisfied,

in each case, the Borrower shall prepay the Loans in an amount equal to 100% of the Loss Proceeds with respect to such Event of Loss (less the amount expended on the Restoration of the related Affected Property as permitted by, and as expended in accordance with, Section 8.05(d)).

Nothing in this paragraph (a) shall be deemed to limit any obligation of the Borrower to deposit (or cause to be deposited) in the Restoration Sub-Account the Loss Proceeds in respect of any Event of Loss.

- (b) Project Documents. If any Project Document at any time is amended or terminated by any party thereto and in a manner that could reasonably be expected to result in a Material Adverse Effect and generate a current cash payment to the Borrower, then the Borrower shall, promptly upon receipt of such payment, prepay the Loans in an amount equal to the proceeds of such payment.
- (c) Certain Asset Sales. If the Borrower at any time shall transfer, assign, sell or otherwise dispose of any material asset or Property pertaining to any Project, other than in accordance with Section 8.12 hereof, then the Borrower shall, promptly upon receipt of the proceeds of any payment relating to such transaction, prepay the Loans in an amount equal to the proceeds of such payment.
- (d) Cash Sweeps. If, as of any Quarterly Date, the Borrower shall fail to comply with Section 8.13(iii) hereof, the Borrower shall, at its sole option as provided in Section 4.1(e) of the Depositary Agreement, prepay the Loans in the amounts set out in, and otherwise in accordance with, such Section 4.1(e).

3.05 Prepayment Mechanics. All prepayments described in Sections 3.03 and 3.04 (other than any prepayment made pursuant to the final sentence of Section 5.07(a) which prepayment shall be applied in accordance with such Section 5.07(a)) shall be applied to the Initial Term Loans and the Additional Term Loans pro rata, and in the inverse order of the maturities of the installments of the Loans then outstanding. Amounts prepaid may

not be reborrowed. Any prepayment made or required to be made pursuant to Sections 3.03 or 3.04 shall be made together with all accrued but unpaid interest thereon and all other amounts (including, without limitation, any amounts due pursuant to Article V) then due from the Borrower hereunder.

ARTICLE IV

PAYMENTS; PRO RATA TREATMENT; COMPUTATIONS; ETC.

4.01 PAYMENTS.

- (a) General. Except to the extent otherwise provided herein, all payments of principal, interest and other amounts to be made by the Borrower under this Agreement and the Notes and, except to the extent otherwise provided therein, all payments to be made by the Borrower under any other Financing Document, shall be made in Dollars, in immediately available funds, without deduction, set-off or counterclaim, to the Administrative Agent at its Principal Office, or to such account as the Administrative Agent may specify in writing to the Borrower, not later than 1:00 p.m., New York time, on the date on which such payment shall become due (each such payment made after such time on such due date to be deemed to have been made on the next succeeding Business Day).
- (b) Application of Payments. The Borrower shall, at the time of making each payment under this Agreement or any Note for the account of any Lender, specify to the Administrative Agent (which shall so notify the intended recipient(s) thereof) the Loans or other amounts owing by the Borrower hereunder to which such payment is to be applied. In the event that the Borrower fails to so specify, or if an Event of Default has occurred and is continuing, the Administrative Agent may distribute such payment to the Lenders for application in such manner as the Administrative Agent or the Majority Lenders, subject to Section 4.02, may reasonably determine to be appropriate.
- (c) Forwarding of Payments by Administrative Agent. Each payment received by the Administrative Agent under this Agreement or any Note for the account of any Lender or the Collateral Agent or the Depositary Bank shall be paid by the Administrative Agent promptly to such Person, in immediately available funds, for the account of such Lender's Applicable Lending Office for the Loan or other obligation in respect of which such payment is made or for the account of the Collateral Agent or the Depositary Bank, as applicable.
- (d) Extensions to Next Business Day. If the due date of any payment under this Agreement or any Note would otherwise fall on a day that is not a Business Day, such date shall instead be extended to the first Business Day thereafter, and interest shall be payable for any principal so extended for the period of such

-15-

extension, unless such Business Day shall fall in a subsequent calendar month, in which case such payment shall be due on the immediately preceding Business Day.

-16-

4.02 PRO RATA TREATMENT. Except to the extent otherwise provided herein:

- (a) each borrowing of Loans from the Lenders under Section 2.01 shall be made from the relevant Lenders, each payment of commitment fees under Section 2.04 in respect of Commitments shall be made for the account of the relevant Lenders, and each termination or reduction of the amount of the Commitments under Section 2.03 shall be applied to the respective Commitments, pro rata according to the amounts of their respective Commitments;
- (b) the making of Loans shall be made pro rata among the relevant Lenders according to the amounts of their respective Commitments;
- (c) except to the extent indicated in Section 4.07(b) and except for prepayments made pursuant to the final sentence of Section 5.07(a), each payment or prepayment of principal of Loans by the Borrower shall be made for the account of the relevant Lenders pro rata in accordance with the respective unpaid principal amounts of the Loans held by them; provided that if immediately prior to giving effect to any such payment in respect of any Loan the outstanding principal amount of the Loans shall not be held by the Lenders pro rata in accordance with their respective Commitments in effect at the time such Loans were made (by reason of a failure of a Lender to make a Loan hereunder in the circumstances described in the penultimate paragraph of Section 11.04), then such payment shall be applied to the Loans in such manner as shall result, as nearly as is practicable, in the outstanding principal amount of the Loans being held by the Lenders pro rata in accordance with their respective Commitments; and
- (d) each payment of interest on Loans by the Borrower shall be made for the account of the relevant Lenders pro rata in accordance with the amounts of interest on such Loans then due and payable to the respective Lenders.

4.03 COMPUTATIONS. Interest on Eurodollar Loans and on other obligations of the Borrower or the Lenders that are computed on the basis of the Federal Funds Rate shall be computed on the basis of a year of 360 days and actual days elapsed (including the first day but excluding the last day) occurring in the period for which payable. Interest on Prime Rate Loans, on other obligations of the Borrower or the Lenders that are computed on the basis of the Prime Rate and commitment fees payable in accordance with Section 2.04 shall be computed on the basis of a year of 365 or 366 days, as the case may be, and actual days elapsed (including the first day but excluding the last day) occurring in the period for which payable.

4.04 MINIMUM AMOUNTS. Except for mandatory prepayments pursuant to Section 3.04 and the borrowing of Additional Term Loans, each borrowing and partial prepayment of principal of Loans shall be in an amount at least equal to \$500,000 and in multiples of \$100,000 in excess thereof. Borrowings or prepayments of Loans of different Types or, in the case of Eurodollar Loans, having different Interest Periods, at the same time

hereunder shall be deemed separate borrowings and prepayments for purposes of the foregoing, one for each Type or Interest Period.

4.05 NOTICES.

(a) Certain Notices.

- (i) Notices by the Borrower to the Administrative Agent (and, as applicable, the Collateral Agent) of optional terminations or reductions of the Commitments, borrowings of Loans, optional prepayments of Loans, Continuations of Eurodollar Loans and Conversions of Loans shall be irrevocable and shall be effective only if received by the Administrative Agent (and, as applicable, the Collateral Agent) not later than 11:00 a.m., New York time, on the number of Business Days prior to the date of the relevant termination, reduction, borrowing, prepayment, Continuation or Conversion or the first day of such Interest Period specified below:

Notice	Number of Business Days Prior
Optional termination or reduction of the Commitments; optional prepayment of Loans	5
Borrowing of, Continuation of, or Conversion into Eurodollar Loans	3
Borrowing of or Conversion into, Prime Rate Loans	1

- (ii) Each such notice of optional termination or reduction of Commitments shall specify the amount of such Commitments to be terminated or reduced.
- (iii) Each such notice of borrowing, Conversion, Continuation or optional prepayment shall specify the Class and Type of Loans to be borrowed, Converted, Continued or prepaid, the amount (subject to Section 4.04) of each Loan to be borrowed, Converted, Continued or prepaid, and the date of borrowing, Conversion, Continuation or optional prepayment (which shall be a Business Day).
- (iv) Each such notice of Conversion shall contain a certification of an Authorized Officer of the Borrower that the requirements of

-18-

Section 2.01(c) have been satisfied with respect to such Conversion.

- (v) The Administrative Agent shall promptly notify the Lenders of the contents of each such notice. In the event that the Borrower fails to select the Type of Loan, within the time period and otherwise as provided in this Section 4.05, such Loan will be made or Continued, as applicable, as a Eurodollar Loan having an Interest Period of three months.

4.06 NON-RECEIPT OF FUNDS BY THE ADMINISTRATIVE AGENT(a). Unless the Administrative Agent shall have been notified by the Borrower prior to the date on which the Borrower is to make payment to the Administrative Agent for the account of one or more of the Lenders hereunder (each such payment being herein called the "REQUIRED PAYMENT"), which notice shall be effective upon receipt, that the Borrower does not intend to make the Required Payment to the Administrative Agent, the Administrative Agent may assume that the Required Payment has been made and may, in reliance upon such assumption (but shall not be required to), make the amount thereof available to the intended recipient(s) on such date. If the Borrower has not in fact made the Required Payment to the Administrative Agent, the recipient(s) of such payment shall, on demand, repay to the Administrative Agent the amount made available by the Administrative Agent pursuant to the previous sentence, together with interest thereon in respect of each day during the period commencing on the date (the "ADVANCE DATE") such amount was so made available by the Administrative Agent until the date the Administrative Agent recovers such amount at a rate per annum equal to the Federal Funds Rate for such day.

4.07 SHARING OF PAYMENTS; ETC.

- (a) Right of Set-Off. The Borrower agrees that, in addition to (and without limitation of) any right of set-off, banker's lien or counterclaim a Lender may otherwise have, each Lender shall be entitled, at its option, to offset balances held by it for the account of the Borrower at any of its offices, in Dollars or in any other currency, against any principal of or interest on any of such Lender's Loans, or any other amount payable to such Lender hereunder, that is not paid when due (regardless of whether such balances are then due to the Borrower), in which case it shall promptly notify the Borrower and the Administrative Agent thereof; provided that such Lender's failure to give such notice shall not affect the validity thereof.
- (b) Sharing. If any Lender shall obtain from the Borrower payment of any principal of or interest on any Loan owing to it or payment of any other amount under this Agreement or any Note held by it or any other Financing Document through the exercise of any right of set-off, banker's lien or counterclaim or similar right or otherwise (other than: (i) from the Administrative Agent as provided herein; or (ii) in connection with any reimbursement or indemnification under Section 11.03

-19-

or any similar provision of any other Financing Document to which less than all of the Lenders are entitled under the terms hereof or thereof, as the case may be; or (iii) in connection with any assignment or participation pursuant to Section 11.06 or any replacement of any Lender pursuant to Article V) and, as a result of such payment, such Lender shall have received a greater percentage of the principal of or interest on the Loans or such other amounts then due hereunder or thereunder to such Lender than the percentage received by any other Lender(s) who were also entitled to receive such payments, it shall promptly purchase from such other Lenders participations in (or, if and to the extent specified by such Lender, direct interests in) the Loans or such other amounts, respectively, owing to such other Lenders (or in interest due thereon, as the case may be) in such amounts, and make such other adjustments from time to time as shall be equitable, to the end that all the Lenders shall share the benefit of such excess payment (net of any expenses that may be incurred by such Lender in obtaining or preserving such excess payment) pro

rata in accordance with the unpaid principal of and/or interest on the Loans or such other amounts, respectively, owing to each of the Lenders; provided that if at the time of such payment, the outstanding principal amount of the Loans shall not be held by the Lenders pro rata in accordance with their respective Commitments in effect at the time such Loans were made (by reason of a failure of a Lender to make a Loan hereunder in the circumstances described in the penultimate paragraph of Section 11.04), then such purchases of participations and/or direct interests shall be made in such manner as will result, as nearly as is practicable, in the outstanding principal amount of the Loans being held by the Lenders pro rata according to the amounts of such Commitments. To such end all the Lenders shall make appropriate adjustments among themselves (by the resale of participations sold or otherwise) if such payment is rescinded or must otherwise be restored.

- (c) Consent by the Borrower. The Borrower agrees that any Lender so purchasing such a participation (or direct interest) may exercise all rights of set-off, banker's liens, counterclaims or similar rights with respect to such participation as fully as if such Lender were a direct holder of Loans or other amounts (as the case may be) owing to such Lender in the amount of such participation.
- (d) Rights of Lenders; Bankruptcy. Nothing contained in this Section 4.07 shall require any Lender to exercise any such right or shall affect the right of any Lender to exercise, and retain the benefits of exercising, any such right with respect to any other indebtedness or obligation of the Borrower. If, under any applicable bankruptcy, insolvency or other similar law, any Lender receives a secured claim in lieu of a set-off to which this Section 4.07 applies, such Lender shall, to the extent practicable, exercise its rights in respect of such secured claim in a manner consistent with the rights of the Lenders entitled under this Section 4.07 to share in the benefits of any recovery on such secured claim.

-20-

ARTICLE V

YIELD PROTECTION; ETC.

5.01 ADDITIONAL COSTS.

- (a) Costs of Making or Maintaining Eurodollar Loans. The Borrower shall pay directly to each Lender from time to time such amounts as such Lender may determine to be necessary to compensate it for any costs that such Lender determines are attributable to its making or maintaining of any Eurodollar Loans or its obligation to make any Eurodollar Loans hereunder, or any reduction in any amount receivable by such Lender hereunder in respect of any of such Loans or such obligation (such increases in costs and reductions in amounts receivable being herein called "ADDITIONAL COSTS"), resulting from any Regulatory Change that:
 - (i) shall subject any Lender (or its Applicable Lending Office for any of such Loans) to any tax, duty or other charge in respect of such Loans or changes the basis of taxation of any amounts payable to such Lender under this Agreement or the Notes in respect of such Loans (other than taxes imposed on or measured by the overall net income of such Lender or of its Applicable Lending Office for such Loans by the jurisdiction in which such Lender has its principal office or such Applicable Lending Office);

- (ii) imposes or modifies any reserve, special deposit or similar requirements (other than the Reserve Requirement utilized in the determination of the Eurodollar Rate for any Interest Period for such Loan) relating to any extensions of credit or other assets of, or any deposits with or other liabilities of, such Lender (including any of such Loans or any deposits referred to in the definition of "Eurodollar Base Rate"), or any Commitment of such Lender to make any such Loans hereunder; or
- (iii) imposes any other condition affecting this Agreement or the Notes (or any of such extensions of credit or liabilities) or its Commitments.

If any Lender requests compensation from the Borrower under this paragraph (a), the Borrower may, by notice to such Lender (with a copy to the Administrative Agent), suspend the obligation of such Lender to make or Continue Eurodollar Loans or to Convert Prime Rate Loans into Eurodollar Loans, until the Regulatory Change giving rise to such request ceases to be in effect (in which case the

-21-

provisions of Section 5.04 shall apply); provided that such suspension shall not affect the right of such Lender to receive the compensation so requested.

- (b) Election by Lender to Suspend Obligations. Without limiting the effect of the provisions of paragraph (a) above, in the event that, by reason of any Regulatory Change, any Lender either:
 - (i) incurs Additional Costs based on or measured by the excess above a specified level of the amount of a category of deposits or other liabilities of such Lender that includes deposits by reference to which the interest rate on Eurodollar Loans is determined as provided in this Agreement or a category of extensions of credit or other assets of such Lender that includes Eurodollar Loans; or
 - (ii) becomes subject to restrictions on the amount of such a category of liabilities or assets that it may hold,

then, if such Lender so elects by notice to the Borrower (with a copy to the Administrative Agent), the obligation of such Lender to make or Continue, or Convert Prime Rate Loans into, Eurodollar Loans hereunder shall be suspended until such Regulatory Change ceases to be in effect (in which case the provisions of Section 5.04 shall apply).

- (c) Capital Costs. Without limiting the effect of the foregoing provisions of this Section 5.01 (but without duplication), the Borrower shall pay directly to each Lender from time to time on request such amounts as such Lender may determine to be necessary to compensate such Lender (or, without duplication, the parent company of such Lender) for any costs that it determines are attributable to the maintenance by such Lender (or any Applicable Lending Office or such parent company) of capital in respect of its Commitments or Loans, pursuant to any law or regulation or any interpretation, directive or request (whether or not having the force of law) of any court, Government Authority or monetary authority:

- (i) following any Regulatory Change; or
- (ii) implementing any risk-based capital guideline or other requirement (whether or not having the force of law and whether or not the failure to comply therewith would be unlawful) heretofore issued but not implemented, or hereafter issued, by any Government Authority or supervisory authority implementing at the national level the Basle Accord (including the Final Risk-Based Capital Guidelines of the Board of Governors of the Federal Reserve System (12 C.F.R. Part 208, Appendix A; 12 C.F.R. Part 225, Appendix A) and the Final Risk-Based Capital Guidelines of the

-22-

Office of the Comptroller of the Currency (12 C.F.R. Part 3, Appendix A)).

Such compensation shall include an amount equal to any reduction of the rate of return on assets or equity of such Lender (or any Applicable Lending Office or such parent company) to a level below that which such Lender (or any Applicable Lending Office or such parent company) could have achieved but for such law, regulation, interpretation, directive or request.

- (d) Notification and Certification. Each Lender shall notify the Borrower of any event occurring after the date of this Agreement that will entitle such Lender to compensation under paragraph (a) or (c) above as promptly as practicable after such Lender obtains actual knowledge thereof. Each Lender will furnish to the Borrower a certificate setting out in reasonable detail the basis and amount of each request by such Lender for compensation under paragraph (a) or (c) above. Determinations and allocations by any Lender, for purposes of this Section 5.01, of the effect of any Regulatory Change pursuant to paragraph (a) or (b) above, or of the effect of capital maintained pursuant to paragraph (c) above, on its costs or rate of return of maintaining Loans or its obligation to make Loans, or on amounts receivable by it in respect of Loans, and of the amounts required to compensate such Lender under this Section 5.01, shall be conclusive absent manifest error.
- (e) Delay in Requests. Failure or delay on the part of any Lender to demand compensation pursuant to this Section 5.01 shall not constitute a waiver of such Lender's right to demand such compensation; provided that the Borrower shall not be required to compensate a Lender pursuant to this Section 5.01 for any increased costs or reductions incurred more than 60 days prior to the date that such Lender notifies the Borrower of the Regulatory Change giving rise to such increased costs or reductions and of such Lender's intention to claim compensation therefor; provided, further, that, if the Regulatory Change giving rise to such increased costs or reductions is retroactive, then the 60-day period referred to above shall be extended to include the period of retroactive effect thereof.

5.02 LIMITATION ON EURODOLLAR LOANS. Anything herein to the contrary notwithstanding, if, on or prior to the determination of any Eurodollar Base Rate for any Interest Period:

- (a) the Administrative Agent determines, which determination shall be

conclusive absent manifest error, that quotations of interest rates for the relevant deposits referred to in the definition of "Eurodollar Base Rate" are not being provided in the relevant amounts or for the relevant maturities for purposes of determining rates of interest for Eurodollar Loans as provided herein; or

- (b) the Majority Lenders determine, which determination shall be conclusive absent manifest error, and notify the Administrative Agent that the relevant rates of

-23-

interest referred to in the definition of "Eurodollar Base Rate", upon the basis of which the rate of interest for Eurodollar Loans for such Interest Period is to be determined, are not likely to adequately cover the cost to such Lenders of making or maintaining such Eurodollar Loans for such Interest Period,

then the Administrative Agent shall give the Borrower and each Lender prompt notice thereof, and so long as such condition remains in effect, the obligation of the Lenders to make additional Eurodollar Loans, Continue existing Eurodollar Loans or Convert Prime Rate Loans into Eurodollar Loans shall be suspended, in which case the provisions of Section 5.04 shall be applicable.

5.03 ILLEGALITY. Notwithstanding any other provision of this Agreement, in the event that it becomes unlawful or any central bank or other Government Authority asserts that it is unlawful for any Lender or its Applicable Lending Office to honor its obligation to make or maintain Eurodollar Loans hereunder, and, in the opinion of such Lender (as stated in writing), the designation of a different Applicable Lending Office would either not avoid such unlawfulness or would be disadvantageous to such Lender, then such Lender shall promptly notify the Borrower thereof in writing (with a copy to the Administrative Agent) and such Lender's obligation to make or Continue, or to Convert Prime Rate Loans into, Eurodollar Loans shall be suspended until such time as such Lender may again make and maintain Eurodollar Loans (in which case the provisions of Section 5.04 shall be applicable).

5.04 TREATMENT OF AFFECTED LOANS. If the obligation of any Lender to make or Continue, or to Convert Prime Rate Loans into, Eurodollar Loans shall be suspended pursuant to Section 5.01, 5.02 or 5.03 (the "AFFECTED LOANS"), such Lender's Affected Loans shall be automatically Converted into Prime Rate Loans on the last day(s) of the then-current Interest Period(s) for the Affected Loans (or, in the case of a Conversion required by Section 5.01(b) or 5.03, on such earlier date as such Lender may certify to the Borrower with a copy to the Administrative Agent as being the last permissible date for such Conversion under, or by reason of, the relevant Regulatory Change or circumstances described under Section 5.03, such certification to be conclusive absent manifest error) and, unless and until such Lender gives notice as provided below that the circumstances specified in Section 5.01, 5.02 or 5.03 which gave rise to such Conversion no longer exist:

- (a) to the extent that such Lender's Affected Loans have been so Converted, all payments and prepayments of principal that would otherwise be applied to such Lender's Eurodollar Loans shall be applied instead to its Prime Rate Loans; and
- (b) all Loans that would otherwise be made by such Lender as

Eurodollar Loans shall be made instead as Prime Rate Loans.

If such Lender gives notice to the Borrower with a copy to the Administrative Agent that the circumstances specified in Section 5.01, 5.02 or 5.03 that gave rise to the Conversion

-24-

of such Lender's Eurodollar Loans of any Class pursuant to this Section 5.04 no longer exist (which such Lender agrees to do promptly upon such circumstances ceasing to exist): (i) at a time when Eurodollar Loans made by other Lenders are outstanding, each of such Lender's Prime Rate Loans shall be automatically Converted to Eurodollar Loans, on the first day of the next succeeding Interest Period for, and having the same Interest Period as, such outstanding Eurodollar Loans and to the extent necessary so that, after giving effect thereto, all Prime Rate Loans and Eurodollar Loans are allocated among the Lenders ratably (as to principal amounts, Types and Interest Periods) as nearly as possible in accordance with their respective Commitments; and (ii) at any other time, the Borrower may thereafter provide to the Administrative Agent a notice of Conversion, in accordance with Section 4.05, of such Lender's Prime Rate Loans to Eurodollar Loans.

- 5.05 COMPENSATION. The Borrower shall pay to the Administrative Agent for the account of each Lender, upon the request of such Lender through the Administrative Agent, such amount or amounts as shall be sufficient (in the reasonable opinion of such Lender) to compensate such Lender for any loss, cost or expense that such Lender reasonably determines is attributable to:
- (a) any payment, prepayment or Conversion of a Eurodollar Loan made by such Lender for any reason (including the acceleration of the Loans pursuant to Section 9.02) on a date other than the last day of an Interest Period for such Loan; or
 - (b) any failure by the Borrower for any reason (including the failure of any of the conditions precedent specified in Article VI to be satisfied) to borrow a Eurodollar Loan from such Lender on the date for such borrowing specified in the relevant Notice of Borrowing given pursuant to Section 2.02.

Without limiting the effect of the preceding sentence, such compensation shall include an amount equal to the excess, if any, of: (i) the amount of interest that otherwise would have accrued on the principal amount so paid, prepaid, Converted or not borrowed for the period from the date of such payment, prepayment, Conversion or failure to borrow to the last day of the then-current Interest Period for such Loan (or, in the case of a failure to borrow, the Interest Period for such Loan which would have commenced on the date specified for such borrowing) at the applicable rate of interest for such Loan provided for herein; over (ii) the amount of interest that otherwise would have accrued on such principal amount at a rate per annum equal to the interest component of the amount such Lender would have bid in the London interbank market for Dollar deposits of the Reference Banks in amounts comparable to such principal amount and with maturities comparable to such period (as reasonably determined by such Lender).

5.06 TAXES.

- (a) General. All payments to be made hereunder and under the Notes and any other Financing Document by the Borrower shall be made free

deduction for or on account of, any Taxes (other than Taxes imposed on either Agent or any Lender by the jurisdiction in which such Person is organized or has its principal office or, in the case of any Lender, by the jurisdiction in which its Applicable Lending Office is organized or located or, in each case, any political subdivision or taxing authority thereof or therein or otherwise imposed by any taxing authority upon, or measured by, income or assets as a result of the organization or location of such Lender in such taxing authority's jurisdiction (unless such organization or location is attributable to the execution of, or the exercise of any rights or remedies under or in connection with, the Transaction Documents)) (such Taxes being herein referred to as the "APPLICABLE TAXES").

If any Applicable Taxes are imposed and required to be withheld from any amount payable by the Borrower hereunder or under the Notes or any other Financing Document, the Borrower shall (subject to the second sentence of Section 5.06(c)) be obligated to: (i) pay such additional amount so that the Agents and the Lenders, as applicable, shall receive a net amount (after giving effect to the payment of such additional amount and to the deduction of all Applicable Taxes) equal to the amount due hereunder; (ii) pay such Applicable Taxes to the appropriate taxing authority for the account of the Administrative Agent, for the benefit of the Agents and the Lenders, as applicable; and (iii) as promptly as possible thereafter, send to the Administrative Agent a certified copy of any original official receipt showing payment thereof, together with such additional documentary evidence as the Administrative Agent or such other Agent or Lender (as applicable) may from time to time reasonably require.

If the Borrower fails to pay any Applicable Taxes when due to the appropriate taxing authority or fails to remit to the Administrative Agent the required receipts or other required documentary evidence, the Borrower shall be obligated to indemnify each Agent and each Lender for any incremental Taxes, as well as interest and penalties that may become payable by such Agent or such Lender as a result of such failure. The obligations of the Borrower under this Section 5.06(a) shall survive the termination of the Commitments and the repayment of the Loans.

- (b) Evidence of Payment. Within 30 days after paying any amount to either Agent or any Lender from which it is required by law to make any deduction or withholding, and within 30 days after it is required by law to remit such deduction or withholding to any relevant taxing or other authority, the Borrower shall deliver to the Administrative Agent, for delivery to such Person, evidence reasonably satisfactory to such Person of such deduction, withholding or payment (as the case may be).
- (c) Foreign Lenders. Any Foreign Lender that is entitled to an exemption from or reduction of withholding tax under the law of the jurisdiction in which the Borrower is located, or any treaty to which such jurisdiction is a party, with

respect to payments by the Borrower under this Agreement, the Notes or any other Financing Document shall deliver to the Borrower (with a copy to the Administrative Agent), at the time or times reasonably requested by the Borrower, such properly completed and executed documentation prescribed by applicable law as will permit such payments to be made without withholding or at a reduced rate. For any period during which a Foreign Lender has failed to provide the Borrower with the appropriate documentation as required by the preceding sentence, the Borrower shall not be obligated to pay, and such Foreign Lender shall not be entitled to receive, additional amounts under Section 5.06(a) with respect to Applicable Taxes imposed by the United States to the extent that such additional amounts would not have arisen but for such failure of such Foreign Lender. If a Foreign Lender that is otherwise exempt from or subject to a reduced rate of withholding tax becomes subject to Applicable Taxes, or a higher amount thereof, because of its failure to deliver documentation described in the first sentence of this paragraph (c), the Borrower shall take such steps as such Foreign Lender shall reasonably request to assist such Foreign Lender to recover such Applicable Taxes.

- (d) Tax Refunds. If an Agent or a Lender receives a refund of, or in respect of, any Applicable Taxes with respect to which the Borrower has paid additional amounts pursuant to Section 5.06(a) and (i) either: (A) such refund (as received by such Agent or such Lender) is specifically referable to such Applicable Taxes; or (B) such Agent or such Lender determines (in its sole discretion) that such refund is in respect of, such Applicable Taxes; and (ii) such Agent's or such Lender's (as applicable) tax affairs for its tax year in respect of which such refund was obtained have been finally settled, then in each case such Agent or such Lender shall, to the extent it can do so without prejudice to the retention of such refund, pay to the Borrower an amount equal to such refund (but only to the extent of additional amounts paid by the Borrower under Section 5.06(a) with respect to the Applicable Taxes giving rise to such refund), net of all out-of-pocket expenses and Taxes incurred by such Agent or such Lender with respect thereto and without interest (other than any interest paid by the relevant Government Authority with respect to such refund). Any such payment by any Agent or any Lender shall be applied toward payments of amounts then owed by the Borrower under this Agreement if, at the time of such payment, an Event of Default has occurred and is continuing.

The Borrower shall indemnify each Agent and each Lender on an after-tax basis for any Taxes that are imposed on such Person as a result of the disallowance, unavailability, recapture or reduction of any such refund, as to which such Person has already made payment in full to the Borrower as required by this paragraph (d). Nothing herein shall oblige any Agent or any Lender to disclose any of the tax returns, books or other records of such Person, nor shall anything herein interfere with the right of any Agent or any Lender to arrange its tax and

commercial affairs and its dealings with its various customers in whatever manner it thinks fit. In particular, no Agent or Lender shall be under any obligation to claim credit, relief, remission or repayment from or against its corporate profits or similar tax liability in respect of the amount of any Tax, deduction or withholding as aforesaid in priority to any other claims, reliefs, credits or deductions available to it or that it determines in its sole discretion to be inadvisable.

5.07 MITIGATION OBLIGATIONS; PREPAYMENTS; REPLACEMENT OF LENDERS.

- (a) Designation of a Different Lending Office; Prepayments. If any Lender requests compensation under Section 5.01 or 5.06, or if the Borrower is required to pay any additional amount to any Lender or any Government Authority for the account of any Lender pursuant to Section 5.06, then such Lender shall use reasonable efforts (consistent with its internal policy and legal and regulatory restrictions) to designate a different Applicable Lending Office for the Loans of such Lender affected by such event or to assign its rights and obligations therein to another of its offices, branches or Affiliates, if, in the sole opinion of such Lender, such designation or assignment: (i) would eliminate or reduce amounts payable pursuant to Section 5.01 or 5.06, as the case may be, in the future; and (ii) would not be disadvantageous to such Lender; provided that such Lender shall have no obligation to designate an Applicable Lending Office located in the United States if such Lender's Applicable Lending Office is not then located in the United States. The Borrower shall pay all reasonable costs and expenses incurred by any Lender in connection with any such designation or assignment. In the event any such Lender requesting compensation is unable or, for any reason, declines to so designate a different Applicable Lending Office of its Loans, the Borrower shall have the right to prepay such Lender in whole or in part pursuant to the terms of Section 3.03(a) and Section 3.05, and such prepayment shall be exclusive of the prepayment commission described in Section 3.03(b).
- (b) Replacement of Lenders. If any Lender requests compensation under Section 5.01 or 5.06, or if the Borrower is required to pay any additional amount to any Lender or any Government Authority for the account of any Lender pursuant to Section 5.06, or if any Lender exercises its rights under Section 5.03, then the Borrower may, at its sole expense and effort, upon notice to such Lender and the Administrative Agent, require such Lender to assign and delegate (in accordance with and subject to the restrictions contained in Section 11.06), without recourse and without compensation or payment of any type other than amounts referred to in clause (i) below, all its interests, rights and obligations under this Agreement to an assignee that shall assume such obligations (which assignee may be another Lender, if a Lender accepts such assignment); provided that: (i) such Lender shall have received payment of an amount equal to the outstanding principal of its Loans, accrued interest thereon, accrued fees and all other amounts payable to it hereunder, from the assignee (to the extent of such outstanding principal and accrued interest and fees) or the Borrower (in the case

-28-

of all other amounts); and (ii) such assignment will: (A) result in a reduction in such compensation or payments; or (B) effect the availability of Eurodollar Loans, as applicable. A Lender shall not be required to make any such assignment and delegation if, prior thereto, as a result of a waiver by such Lender or otherwise, the circumstances entitling the Borrower to require such assignment and delegation cease to apply.

-29-

ARTICLE VI

CONDITIONS PRECEDENT

6.01 INITIAL TERM LOANS. The obligation of any Lender to make its Initial Loan Term Loan hereunder is subject to the receipt by the Administrative Agent of each of the documents and the satisfaction of the conditions precedent set out in this Section 6.01, each of which shall be satisfactory to the Lenders in form, scope and substance.

(a) Certain Financing Documents. Each of the following Financing Documents, each such document to be duly executed and delivered by each of the intended parties thereto:

- (i) this Agreement;
- (ii) each of the Initial Term Loan Notes; and
- (iii) the Consent and Agreement of each of the Operator and Imperial Irrigation District relating to the Project Documents to which such Project Party is a party or by which it is otherwise bound, except as otherwise agreed in writing by the Administrative Agent on or prior to the Closing Date.

(b) Security Documents. Each of the following Security Documents, each such document to be duly executed and delivered by each of the intended parties thereto:

- (i) the Borrower Security Agreement;
- (ii) the Borrower Equity Interest Pledge;
- (iii) the Deed of Trust; and
- (iv) the Depositary Agreement.

(c) Project Documents. A copy (which, in the case of the Project Documents referred to in clauses (v), (viii), (ix) and (x) below, may be in electronic, CD-ROM format), certified by an Authorized Officer of the Borrower to be true, correct and complete, of each of the following Project Documents, each such document to be duly executed and delivered by each of the intended parties thereto:

- (i) each PPA;
- (ii) each Plant Connection Agreement;

-30-

- (iii) the O&M Contract;
- (iv) each Transmission Services Agreement;
- (v) each Real Property Document;
- (vi) the Water Supply Agreement;
- (vii) the Energy Services Agreement;

- (viii) each Acquisition Document;
 - (ix) each Restructuring Document;
 - (x) each Merger Document;
 - (xi) the Funding and Construction Agreement; and
 - (xii) the Unit Agreement.
- (d) Limited Liability Company Documents. A certificate of the Secretary or Assistant Secretary of the Borrower or of its managing member, dated as of the Closing Date, certifying: (A) that attached thereto is a true, correct and complete copy of the Charter Documents (including the LLC Agreement) of the Borrower as in effect on the date of such certificate; (B) that attached thereto is a true, correct and complete copy of resolutions duly adopted by the managers or member of the Borrower, authorizing the execution, delivery and performance of the Financing Documents to which the Borrower is or is intended to be a party, and that such resolutions have not been modified, rescinded or amended and are in full force and effect; and (C) as to the incumbency and specimen signature of each officer of the Borrower executing each of the Financing Documents, to which the Borrower is or is intended to be a party and each other document to be delivered by the Borrower from time to time in connection therewith (and each Financing Party may conclusively rely on such certificate until it receives notice in writing to the contrary from the Borrower).
- (e) Officers' Certificates. A certificate of an Authorized Officer of the Borrower, dated as of the Closing Date, certifying that: (A) the representations and warranties of the Borrower contained in Article VII and the material representations and warranties of the Borrower in each other Transaction Document to which it is a party are true and correct in all material respects as if made on and as of such date (or, if stated to have been made solely as of an earlier date, were true and correct as of such date); (B) the Borrower is in compliance with all of its covenants and obligations under each of the Financing Documents to which it is a party, and is in compliance in all material respects with all of its covenants and obligations under each of the Project Documents to which it is a

-31-

party; (C) all Transaction Documents are in full force and effect; and (D) no Default or Event of Default has occurred and is continuing on such date, in each case, both immediately prior to the initial extension of credit hereunder and after giving effect thereto and to the intended use thereof.

- (f) Real Property Documents; Title Insurance; Survey.
- (i) Title Insurance. A title policy or policies issued by the relevant Title Company or Title Companies which is in ALTA, extended coverage, Lender's Fee Policy form 1970 (revised 10/17/84) or such other form approved by the Lenders, or a binding marked commitment to issue such policy or policies, in form, scope and substance satisfactory to the Lenders, insuring the Collateral Agent for the benefit of the Secured Parties, in an amount satisfactory to the Lenders, that the Borrower is lawfully seized and possessed of a valid and subsisting leasehold interest in the Leasehold Properties and estate or interest in the ROW and the Site

Licenses, as the case may be, in the Project and that such interests are free and clear of all defects and encumbrances except those approved by the Lenders.

Each Title Policy shall contain:

- (A) full coverage against Mechanics' Liens (filed and inchoate);
 - (B) a reference to the relevant Initial Survey with no survey exceptions except those theretofore approved by the Lenders; and
 - (C) such affirmative insurance and endorsements as the Lenders may require.
- (ii) Initial Survey. An as-built survey of the Site current to within 90 days of the Closing Date (each such survey, an "INITIAL SURVEY"), which survey shall:
- (A) be a current "as-built" metes and bounds survey of the Site, including easements that benefit such Site;
 - (B) be made in accordance with the "Minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys" jointly established and adopted by ALTA, ACSM and NSPS in 1999 with all measurements made in accordance with the "Minimum Angle, Distance and Closure

-32-

Requirements for Survey Measurements Which Control Land Boundaries for ALTA/ACSM Land Title Surveys";

- (C) be prepared by a surveyor satisfactory to the Lenders;
 - (D) contain "Optional Survey Responsibilities and Specifications" 2, 3, 8, 10 and 16 as specified on Table A to the "Minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys"; and
 - (E) contain a certification from said surveyor satisfactory to the Lenders.
- (iii) Fees. Evidence that the Borrower shall have paid to each Title Company all of its expenses and premiums in connection with the issuance of the Title Policy and in addition shall have paid to each Title Company an amount equal to the relevant recording and stamp taxes payable in connection with recording the Deed of Trust in the appropriate county land offices.
- (g) Financial Statements. The most recent unaudited quarterly financial statements (consolidated as appropriate) of the Borrower, prepared in accordance with the relevant Accounting Principles, together with a certificate from an Authorized Officer of the Borrower stating that: (A) no material adverse change in its consolidated assets, liabilities and operations or financial condition has occurred from those set out in such most recent financial statements; and (B) such financial statements fairly present in all material respects the financial condition of the

Borrower.

(h) Government Actions.

- (i) Government Approvals. Copies, certified by an Authorized Officer of the Borrower to be true, correct and complete, of all Government Approvals referred to in Schedule VI (other than those listed on Schedule VII or otherwise designated on such Schedule VII as unavailable), all of which shall be in form and substance satisfactory to the Lenders, together with a certificate from an Authorized Officer of the Borrower stating that all such Government Approvals, other than those listed on Schedule VII, are in full force and effect.
- (ii) Status. Evidence in form and substance satisfactory to the Lenders that each of the Projects is a QF.

-33-

- (i) Independent Engineer's Report and Certificate. A report of the Independent Engineer, dated as of a recent date and in form, scope and substance satisfactory to the Lenders addressing (among other matters reviewed at the request of the Lenders as determined in their sole discretion): (i) the historical and projected operating and maintenance costs; (ii) the historic operation of the Project, including capacity ratings and actual energy production; (iii) the capability of the Resource, including (A) a review of Resource temperature, well production and operation and maintenance costs associated with the production and injection wells; (B) the historic production and injection volumes and temperature; (C) the ability of the Resource to continually provide sufficient temperatures and volumes of geothermal fluid to maintain the Project's electricity production and costs as set forth in the Closing Pro Forma; (D) the expected degradation of the Resource during the period beginning on the Closing Date and ending on the Final Maturity Date; (E) a review of the Resource management and well drilling plans, and the capabilities of the Operator to operate and maintain the Resource; (F) a review of the costs associated with management, maintenance, and development of the Resource to maintain temperature and production; and (G) the expected useful life of the Resource as currently used and as anticipated to be used following the Upgrade Project; (iv) the assumptions, formulae, methodologies and structure of the Closing Pro Forma; (v) the technical and economic ability and feasibility of the Project to produce and transmit the capacity and energy, and generate Project Cash Flow, in accordance with the Closing Pro Forma; (vi) the technical ability and feasibility of the Project to supply capacity and energy and otherwise fulfill its obligations under the PPAs; (vii) the projected availability of the Project; (viii) the Borrower's ability to perform under the Project Documents; (ix) the adequacy of the Plant Connection Agreements, the Transmission Services Agreements, and all other arrangements relating to interconnection; (x) the adequacy of the O&M Contract and the reasonableness of the costs and expenses of the Operator for performing services under the O&M Contract; (xi) the existence of skilled third party operators capable of performing such services at a comparable cost to the fees paid to the Operator under the O&M Contract; (xii) any environmental matters at or in relation to the Site, including (A) the Borrower's and the Project's compliance with all applicable Government Rules, including all Environmental Laws and all applicable Government Rules relating to health and safety; (B) whether the Borrower or the Project is subject to any federal, state or local investigation regarding any actual or potential

remedial action or involving any actual or potential expenditure in excess of \$100,000 in the aggregate with respect to any Environmental Law or in response to any Release; and (C) whether the Borrower or the Project has any contingent liability in excess of \$100,000 in the aggregate in connection with any Release; (xiii) the adequacy of the plans relating to the Upgrade Project and an opinion that the expectations of the Upgrade Project are obtainable within the cost and time frame anticipated; and (xiv) any other technical or regulatory issue that may arise in

-34-

connection with the Independent Engineer's review of the Project on behalf of the Lenders.

- (j) Closing Pro Forma. The Closing Pro Forma.
- (k) Insurance.
 - (i) Acceptable Insurance Broker Certificate. A certificate of an Acceptable Insurance Broker as to the Borrower's compliance with Section 8.05(a) and Schedule IV, such certificate to be in form and substance satisfactory to the Administrative Agent.
 - (ii) Compliance Certificate. A certificate of an Authorized Officer of the Borrower, dated as of the Closing Date, certifying that insurance complying with Section 8.05(a) and Schedule IV, covering the risks referred to therein, has been obtained and is in full force and effect and, as of the date thereof, no notice of cancellation has been issued thereunder.
 - (iii) Insurance Advisor's Report. A report of the Insurance Advisor, dated as of a recent date and satisfactory in form, scope and substance: (A) addressing (among other matters reviewed at the request of the Lenders as determined in their sole discretion): (I) the adequacy of the insurance required by Section 8.05 and Schedule IV and confirming that such insurance and reinsurance provides adequate cover for the Project and adequately protects the interests of the Agents and the Lenders; and (II) the comparability of such insurance with insurance maintained with respect to similar projects by prudent power producers; and (B) confirming that insurance complying with Section 8.05 and Schedule IV, covering the risks referred to therein: (I) is reasonably likely to remain available through the Final Maturity Date; and (II) has been obtained and is in full force and effect and as of the date thereof, no notice of cancellation has been issued thereunder.
- (l) Filings, Registrations and Recordings; Fees and Taxes.
 - (i) Financing Statements. Acknowledgment copies of all financing statements under the Uniform Commercial Code (and copies of Uniform Commercial Code search reports and tax lien, judgment and litigation search reports) with respect to the Borrower, in each jurisdiction (and, to the extent applicable, county land offices) listed under the name of such Person on Schedule V and in each other jurisdiction in which such financing statements are necessary or, in the opinion of special counsel to the Lenders, desirable to

perfect the Liens created by the Security Documents (including Liens in fixtures created by the Deed of Trust and all other instruments to be recorded or filed or delivered in connection with the Security Documents).

- (ii) Recordation. Evidence satisfactory to the Administrative Agent that the Security Documents have been duly recorded and filed in all places wherein such recording and filing are necessary to perfect the interests of the Administrative Agent in and to the Collateral covered thereby.
- (iii) Fees and Taxes. Evidence that all filing, recordation, subscription and inscription fees and all recording and other similar fees, and all recording, stamp and other taxes and other expenses related to such filings, registrations and recordings necessary for the consummation of the transactions contemplated by this Agreement and the other Financing Documents have been paid in full by or on behalf of the Borrower or otherwise provided for.
- (iv) Other Action. Evidence satisfactory to the Administrative Agent that all other action necessary in order to effectively establish, create and perfect the Liens, charges and security interests contemplated by the Security Documents shall have been duly taken or made and remains in full force and effect.

(m) No Proceedings.

- (i) As of the Closing Date there is no: (I) injunction, writ, preliminary restraining order or any order of any nature issued by any Government Authority, arbitral tribunal or other body directing that any of the transactions provided for herein or in the other Transaction Documents not be consummated as herein or therein provided; or (II) litigation, proceeding or, to the Borrower's knowledge, investigation, of or before any Government Authority, arbitral tribunal or other body pending or, to the Borrower's knowledge, threatened with respect to or affecting any Project, this Agreement or any other Transaction Document or any of the transactions contemplated hereby or thereby.
- (ii) A certificate of an Authorized Officer of the Borrower, dated as of the Closing Date, certifying as to such effect.

(n) No Material Adverse Change.

- (i) As of the Closing Date, there has been no Material Adverse Effect since November 7, 2002, and no act, event or circumstance affecting the Borrower has arisen since such date that could reasonably be expected to result in a Material Adverse Effect.
- (ii) A certificate of an Authorized Officer of the Borrower, dated as of the Closing Date, certifying as to such effect.

- (o) Opinions of Counsel. The following opinions of counsel, each acceptable in form and substance to the Agents and the Lenders:
 - (i) An opinion of Chadbourne & Parke LLP, as special New York counsel to the Borrower and the Sponsor, and addressing certain New York State and Federal law matters;
 - (ii) An opinion of David Chanover, special California counsel to the Borrower; and
 - (iii) An opinion of Morris, Nichols, Arsht & Tunnell, as special Delaware counsel to the Borrower and the Sponsor and addressing certain general Delaware corporate, limited liability Company, and Uniform Commercial Code matters.
- (p) Fees and Expenses. Evidence that the Borrower shall have paid in full, on or before the Closing Date, all fees and expenses then due under or pursuant to this Agreement.
- (q) Establishment and Funding of the Accounts. Each of the Accounts shall have been established as of the Closing Date in accordance with the terms of the Depositary Agreement. The Debt Service Reserve Account shall have on deposit a credit balance of immediately available funds in an amount not less than the Debt Service Reserve Required Amount, provided that the initial funding of the Debt Service Reserve Account may be made with the proceeds of the Initial Term Loans.
- (r) Borrower's LLC Agreement. The Borrower's LLC Agreement shall be in form and substance satisfactory to the Administrative Agent.
- (s) No Default. Immediately before and after giving effect to such proposed Loan, no Default or Event of Default shall have occurred and be continuing and no Default would result therefrom.
- (t) Representations and Warranties. Immediately before and after giving effect to such proposed extension of credit, all representations of the Borrower and the Sponsor contained in the Financing Documents shall be true and correct on and as

-37-

of the Closing Date in all material respects as if made on and as of such date except for any such representations and warranties that were initially stated to have been made solely as of an earlier date, in which case such representations shall have been true and correct in all material respects as of such earlier date.

- (u) Absence of Material Adverse Effect. Immediately before and after giving effect to such proposed extension of credit, no Material Adverse Effect shall have occurred and be continuing or would result therefrom.
- (v) Government Approvals. All Government Approvals that are necessary for each Project as of the Closing Date shall have been obtained on or prior to the Closing Date and shall be in full force and effect and not subject to appeal. (w) Notice of Borrowing. The Borrower shall have delivered to the Administrative Agent (with a copy to the Collateral Agent) a Notice of Borrowing with respect to Initial Term Loans in an amount equal to the aggregate Initial Term Loan Commitments.

- (x) Payment Instructions. Evidence that the Borrower shall have irrevocably instructed in writing each of SCE and Imperial Irrigation District to make all payments owing to the Borrower under any Project Document to which either SCE or Imperial Irrigation District is party to the Depositary Bank for deposit into the Revenue Account.

6.02 ADDITIONAL TERM LOANS. The obligation of any Lender to make its Additional Term Loan is subject to the receipt by the Administrative Agent of the documents and the satisfaction of the conditions precedent set out below on the date of such Loan, each of which shall be in form and substance satisfactory to the Administrative Agent and the Majority Lenders.

- (a) No Default. Immediately before and after giving effect to such proposed extension of credit, no Default or Event of Default shall have occurred and be continuing and no Default would result therefrom.
- (b) Representations and Warranties. Immediately before and after giving effect to such proposed extension of credit, all representations of the Borrower and the Sponsor contained in the Financing Documents shall be true and correct on and as of the date of such Additional Term Loan in all material respects as if made on and as of such date except for any such representations and warranties that were initially stated to have been made solely as of an earlier date, in which case such representations shall have been true and correct in all material respects as of such earlier date.

-38-

- (c) Absence of Material Adverse Effect. Immediately before and after giving effect to such proposed extension of credit, no Material Adverse Effect shall have occurred and be continuing or would result therefrom.
- (d) Government Approvals. All Government Approvals that are necessary for the then current stage of the Development of each Project shall have been obtained on or prior to the date of such extension of credit and shall be in full force and effect and not subject to appeal.
- (e) Upgrade Acceptance Test. The Project has successfully passed the Upgrade Acceptance Test on or before December 31, 2003.
- (f) Upgrade Pro Forma. The Upgrade Pro Forma, containing assumptions and otherwise in form and substance satisfactory to the Lenders and the Independent Engineer, taking into account the effect of the Upgrade Project on the Projects' performance, and demonstrating an annual Debt Service Coverage Ratio of at least 1.5:1.
- (g) Independent Engineer's Upgrade Report; Defective Tower Repair. An update to the report of the Independent Engineer that was delivered on the Closing Date, confirming that the Upgrade Acceptance Test has been satisfied in all material respects in form and substance satisfactory to the Lenders, and a certificate of an Authorized Officer of the Borrower, dated no later than July 1, 2003 certifying that the Tower Repairs have been substantially completed and that, as a result, the cooling towers subject

thereof are, as of such date, in good working order and condition in accordance with generally accepted prudent utility practices.

- (h) Title Policy Endorsement. An endorsement to the Title Policy to the date of such extension of credit, in the form approved by the Administrative Agent and setting out no additional exceptions (including survey exceptions).
- (i) Notice of Borrowing. The Borrower shall have delivered to the Administrative Agent (with a copy to the Collateral Agent) a Notice of Borrowing with respect to Additional Term Loans in an amount not exceeding the present value, as calculated by the Administrative Agent, discounted at ten percent (10%), of two-thirds (2/3) of Additional Project Cash Flow, as set forth in the Upgrade Pro Forma, for the period from the date the Project passes the Upgrade Acceptance Test to the Final Maturity Date, but not to exceed the aggregate Additional Term Loan Commitments.
- (j) Other. Such other statements, certificates, documents and information with respect to any Project or matters contemplated by this Agreement as either Agent or the Majority Lenders may reasonably request.

-39-

ARTICLE VII

REPRESENTATIONS AND WARRANTIES

The Borrower represents and warrants to the Lenders and each Agent that:

7.01 EXISTENCE. The Borrower is duly organized or formed, validly existing and in good standing under the laws of the State of Delaware. The Borrower is duly qualified to do business and is in good standing in the State of California. The Borrower is duly qualified to do business and is in good standing in all other places where necessary in light of the business it conducts and the Property it owns and intends to conduct and own and in light of the transactions contemplated by this Agreement and the other Transaction Documents, except where the failure to so qualify or be in good standing could not reasonably be expected to have a Material Adverse Effect. No filing, recording, publishing or other act that has not been made or done is necessary in connection with the existence or good standing of the Borrower or the conduct of its business.

7.02 FINANCIAL CONDITION.

- (a) Financial Statements. The financial statements delivered to the Administrative Agent pursuant to Section 8.01, and any related statements of income, owner's equity and cash flows: (i) fairly present, in all material respects, the financial condition of the Borrower as of the date delivered and the results of its operations for the period covered thereby (subject, in the case of any quarterly financial statements to normal year-end audit adjustments); and (ii) have been prepared in accordance with the Accounting Principles applicable to such Person.
- (b) No Material Contingent Liabilities. As of the date of the relevant balance sheet included in such financial statements, the Borrower has no contingent liabilities, liabilities for taxes, unusual forward or long-term commitments or unrealized or anticipated losses from any unfavorable commitments or any other liabilities or obligations of a nature required to be reflected in a balance

sheet for the period to which such financial statements relate that were not disclosed in such balance sheet and, either individually or in the aggregate would be material to the Borrower.

- (c) No Material Adverse Change. The Borrower knows of no reasonable basis existing as of the date of its most recent balance sheet in accordance with Section 8.01 for the assertion against it of any liability or obligation of a nature required to be reflected in a balance sheet that is not fully reflected in its most recent balance sheet. Since the date of delivery of such balance sheet, there has been no material adverse change in the financial condition, operations or business of the Borrower from that set out in such financial statements as at such date.

-40-

7.03 ACTION.

- (a) Borrower. The Borrower has full limited liability company power, authority and legal right to execute and deliver the Transaction Documents to which it is or is intended to be a party and to perform its obligations thereunder. The execution, delivery and performance by the Borrower of each of the Transaction Documents to which it is or is intended to be a party and the consummation of the transactions contemplated thereby have been duly authorized by all necessary limited liability company action on its part. Each of the Transaction Documents to which the Borrower is a party has been duly executed and delivered by or on behalf of such Person and constitutes its legal, valid and binding obligation enforceable against it in accordance with its terms, except as the enforceability thereof may be limited by: (i) applicable bankruptcy, insolvency, moratorium or other similar laws affecting the enforcement of creditors' rights generally; and (ii) the application of general principles of equity (regardless of whether such enforceability is considered in a proceeding at law or in equity).
- (b) Other Major Project Parties.
 - (i) Each of the other Major Project Parties has full corporate, limited liability company or partnership power, authority and legal right to execute and deliver each of the Transaction Documents to which it is or is intended to be a party and to perform its obligations thereunder;
 - (ii) the execution, delivery and performance by each other Major Project Party of each of the Transaction Documents to which it is or is intended to be a party and the consummation of the transactions contemplated thereby have been duly authorized by all necessary corporate, limited liability company or partnership action on the part of such other Major Project Party; and
 - (iii) each of the Transaction Documents to which any other Major Project Party is a party has been duly executed and delivered by such other Major Project Party and constitutes the legal, valid and binding obligation of such other Project Party enforceable against such other Major Project Party in accordance with its terms, except as the enforceability thereof may be limited by: (A) applicable

bankruptcy, insolvency, moratorium or other similar laws affecting the enforcement of creditors' rights generally; and (B) the application of general principles of equity (regardless of whether such enforceability is considered in a proceeding at law or in equity);

-41-

provided that these representations shall be made only to the knowledge of the Borrower with respect to any other Major Project Party that is not an Affiliate of the Borrower.

7.04 NO BREACH.

- (a) Execution, Etc. of Transaction Documents. The execution, delivery and performance by the Borrower of each of the Transaction Documents to which it is or is intended to be a party and the consummation of the transactions contemplated thereby do not and will not: (i) require any consent or approval of any Person that has not been obtained (except for consents from the BLM, SCE and for certain consents by third parties to the right of the Collateral Agent on behalf of the Secured Parties under the Security Documents to step into, cure defaults under or substitute a counterparty to, certain Project Documents) and each such consent and approval that has been obtained is in full force and effect; (ii) violate any material Government Rule or material Government Approval applicable to any Project; (iii) conflict with, result in a breach of or constitute a default under: (A) the Borrower's Charter Documents or any corporate, limited liability company action or any resolution of the member of the Borrower; or (B) any Project Document other than with respect to the Consents described in clause (i) above that have not been obtained or any indenture or loan or credit agreement or any other material agreement, lease or instrument to which the Borrower is a party or by which it or its Property may be bound or affected in any material respect; or (iv) result in, or create any Lien (other than a Permitted Lien) upon or with respect to any of the properties now owned or hereafter acquired by the Borrower.
- (b) No Breach. The Borrower is not in violation of any Government Rule or Government Approval that could reasonably be expected to result in a Material Adverse Effect. The Borrower is not in breach of or default under any indenture, loan or credit agreement or any other agreement, lease or instrument referred to in paragraph (a)(iii) above, except such breaches or defaults that, in the aggregate could not reasonably be expected to result in a Material Adverse Effect.

7.05 GOVERNMENT APPROVALS; GOVERNMENT RULES.

- (a) Borrower. All Government Approvals necessary under Government Rules to be obtained by or on behalf of the Borrower on or prior to the Closing Date are set out in Schedules VI and, except for those Government Approvals set out in Schedule VII which are not currently required for any Project, have been duly obtained, were validly issued, are in full force and effect, are not subject to appeal, are held in the name, or on behalf of, such Person and are free from conditions or requirements compliance with which could reasonably be expected to result in a Material Adverse Effect or which such Person does not reasonably expect to be able to satisfy on or prior to the time when necessary.

-42-

- (b) Other Major Project Parties. To the Borrower's knowledge: (i) each other Major Project Party has obtained all Government Approvals necessary under Government Rules that are required to be obtained on or prior to the Closing Date in order for such other Major Project Party to perform its obligations under the Transaction Documents to which it is or is intended to be a party, other than those Government Approvals not currently required for any Project; and (ii) such Government Approvals are in full force and effect, are not subject to appeal, are held in the name of such other Major Project Party and are free from conditions or requirements compliance with which could reasonably be expected to result in a Material Adverse Effect or which the Borrower does not reasonably expect such other Major Project Party to be able to satisfy on or prior to the time when necessary.
- (c) No Material Omission. The information set out in each application and all other written materials submitted by the Borrower (and to the Borrower's knowledge, each other Major Project Party) to the applicable Government Authority in connection with each of its Government Approvals is accurate and complete in all material respects as of the date submitted to such Government Authority and does not omit to state any material fact necessary to make such information not misleading.
- (d) Future Government Approvals. The Borrower has no reason to believe that any Government Approvals that have not been obtained by it or any other Major Project Party as of the date of this Agreement, but which will be required in the future, will not be obtained in due course on or prior to the time when necessary and will be free from any condition or requirement, compliance with which could reasonably be expected to have a Material Adverse Effect.
- (e) Compliance of Upgrade Project. The Upgrade Project, if constructed in accordance with the Plans and Specifications therefor and otherwise Developed as contemplated by the Project Documents, will conform to and comply, in all material respects, with all covenants, conditions, restrictions and reservations in the Government Approvals applicable thereto and all Government Rules.
- (f) Copies Provided to Administrative Agent. In accordance with Section 6.01(h), the Administrative Agent has received a certified copy of each Government Approval heretofore obtained.

7.06 PROCEEDINGS. There is no action, suit or proceeding at law or in equity or by or before any Government Authority, arbitral tribunal or other body now pending or, to the knowledge of the Borrower, threatened against or affecting it, any of its Property (including any Project) or, to the knowledge of the Borrower, any other Major Project Party, that could reasonably be expected to result in a Material Adverse Effect. No winding up, dissolution or similar process is pending or threatened against the Borrower or (to the knowledge of the Borrower) any other Major Project Party except, after the

Closing Date, to the extent such process, if adversely determined, could not reasonably be expected to result in an Event of Default.

7.07 ENVIRONMENTAL MATTERS.

- (a) Environmental Claims. Except as described in Part A of Schedule VIII, to the knowledge of the Borrower, there are no facts, circumstances, conditions or occurrences regarding any Project that could reasonably be expected to form the basis of an Environmental Claim arising with respect to any Project or against such Project, the Borrower or, in connection with its involvement in any Project, any other Environmental Party, that individually or in the aggregate could reasonably be expected to result in a Material Adverse Effect.
- (b) Threatened Environmental Claims. Except as set out in Part B of Schedule VIII, there are no pending or, to the knowledge of the Borrower no past or, threatened Environmental Claims arising with respect to any Project or against such Project, the Borrower or, in connection with its involvement in the Development of any Project, any other Environmental Party, that individually or in the aggregate could reasonably be expected to result in a Material Adverse Effect.
- (c) Hazardous Materials. Except as set out in Part C of Schedule VIII, to the Borrower's knowledge no Hazardous Materials have been Used or Released at, on, under or from any Project in an amount or concentration that is not otherwise in compliance with applicable Environmental Law and that individually or in the aggregate could reasonably be expected to result in a Material Adverse Effect.
- (d) Other Materials. There are not now and, to the knowledge of the Borrower, never have been any underground storage tanks located at any Project. There is no asbestos contained in, forming part of, or contaminating any part of any Project, and no polychlorinated biphenyls are used, stored, located at or contaminate any part of any Project.
- (e) Investigations. There have been no environmental investigations, studies, audits, reviews or other analyses conducted by or that are in the possession of the Borrower (or, with respect to such investigations, studies, audits, reviews and other analysis conducted prior to April 15, 2002, known by the Borrower to be in its possession) in relation to any Project that have not been provided to the Administrative Agent and the Lenders.

7.08 TAXES. The Borrower has filed or caused to be filed all tax returns that are required by applicable law to be filed, and has paid all Taxes shown to be due and payable on said returns or on any assessments made against the Borrower or any of its Property and all other Taxes imposed on the Borrower by any Government Authority (other than Taxes the payment of which are not yet due or that are being Contested) except, in each case, where such failure could not reasonably be expected to have a Material Adverse Effect.

No Liens for Taxes (other than Permitted Liens) against the Borrower or any of its Property exist and no claims are being asserted against the Borrower or any of its Property with respect to any Taxes. The aggregate amount of sales, excise or property taxes imposed or reasonably expected to be imposed on the Borrower or any of its Property does not exceed the amounts provided therefor in the Closing Pro Forma. The charges, accruals and reserves on its books in respect of Taxes are, in the opinion of the Borrower, adequate.

7.09 TAX STATUS.

- (a) For Federal and state income tax purposes, the Borrower is disregarded as an entity separate from its owner.
- (b) Neither the execution and delivery of this Agreement, the other Transaction Documents or the Non-Material Project Contracts nor the consummation of any of the transactions contemplated hereby or thereby shall affect the classification of the Borrower as set out in paragraph (a) above.

7.10 ERISA. No ERISA Event has occurred or is reasonably expected to occur that, when taken together with all other such ERISA Events for which liability is reasonably expected to occur, could reasonably be expected to result in a Material Adverse Effect. The present value of all accumulated benefit obligations under each Plan (based on the assumptions used for purposes of Statement of Financial Accounting Standards No. 87) did not, as of the date of the most recent financial statements reflecting such amounts, materially exceed the fair market value of the assets of such Plan, and the present value of all accumulated benefit obligations of all underfunded Plans (based on the assumptions used for purposes of Statement of Financial Accounting Standards No. 87) did not, as of the date of the most recent financial statements reflecting such amounts, materially exceed the fair market value of the assets of all such underfunded Plans.

7.11 NATURE OF BUSINESS. The Borrower has not engaged in any business other than the Development of the Projects and with respect to the SIGC Lease. Neither the business nor any Properties of the Borrower are or have been affected by any fire, explosion, accident, strike, lockout or other labor dispute, drought, storm, hail, earthquake, embargo, act of God or of the public enemy or other casualty (whether or not covered by insurance) that could reasonably be expected to have a Material Adverse Effect.

7.12 TITLE; SECURITY DOCUMENTS.

- (a) Title. The Borrower owns and has good, legal and marketable title to the Collateral purported to be covered by the Security Documents to which it is a party, except for that portion of the Collateral which is Real Property, in which the Borrower has a valid estate or interest, and all such interests of the Borrower are free and clear of all Liens other than Permitted Liens.

-45-

- (i) The Borrower is lawfully possessed of a valid and subsisting estate in and to the Real Property and rights to the Real Property described in the Deed of Trust free and clear of all Liens other than the Liens granted to the Collateral Agent for the benefit of the Secured Parties under the Security Documents and:
 - (A) as at the Closing Date, exceptions shown on the Title Policy delivered on the Closing Date in relation thereto; and
 - (B) Permitted Liens.
- (ii) The Borrower enjoys peaceful and undisturbed possession of,

all of its Properties (subject only to the Permitted Liens described above) that are necessary for the Projects.

- (b) Security Documents. The provisions of the Security Documents are effective to create, in favor of the Collateral Agent for the benefit of the Secured Parties, a legal, valid and enforceable Lien on and security interest in all of the Collateral purported to be covered thereby in accordance with state law and as permitted pursuant to the rules and regulations of the BLM. All necessary and appropriate recordings and filings have been made, or are being made concurrently herewith, in all necessary and appropriate public offices (including in the jurisdictions set out in Schedule V), and all other necessary and appropriate action has been, or is concurrently herewith being, taken, so that, subject to the rules and regulations of the BLM, each such Security Document creates, or as to after-acquired property will create, to the extent set forth in such Security Document, a perfected Lien on and security interest in all right, title, estate and interest in the Collateral covered thereby, prior and superior to all other Liens other than Permitted Liens. Except as otherwise agreed by the Lenders, all necessary and appropriate consents to the creation, perfection and enforcement of such Liens have been obtained from each of the parties to the Project Documents except for the BLM and SCE. Subject to the rules and regulations of the BLM, no mortgage or financing statement or other instrument or recordation covering all or any part of the Collateral purported to be covered by the Security Documents is on file in any recording office, except such as may have been filed in favor of the Collateral Agent for the benefit of the Secured Parties or in respect of any Permitted Lien.

7.13 SUBSIDIARIES.

- (a) No Subsidiaries. The Borrower has no subsidiaries.
- (b) Ownership Interests in Borrower. There are no ownership interests in the Borrower other than the 100% member interest held by the Sponsor.

-46-

7.14 UTILITY REGULATION.

- (a) Holding Company. The Borrower is not a "public-utility company" or a "holding company", or an "affiliate" of a "holding company" or of a "public-utility company", or a "subsidiary company" of a "holding company", within the meaning of PUHCA nor is Borrower subject to regulation under PUHCA. None of the Projects is a "public-utility company" or a "holding company", or an "affiliate" of a "holding company" or of a "public-utility company", or a "subsidiary company" of a "holding company" within the meaning of PUHCA.
- (b) Status. Each of the Projects is a QF. The Borrower is not, nor will any of the Secured Parties (solely as a result of its execution, delivery or performance of this Agreement or the other Financing Documents or the transactions contemplated thereby, other than the exercise of remedies under the Security Documents except to the extent that, following such exercise of remedies, the Borrower will remain as the owner of the Projects, and the Operator will remain as the operator thereof) be, subject to regulation as a "public-utility company", a "holding company" or a "subsidiary company" or an "affiliate" of any of the foregoing,

under PUHCA.

- (c) Public Utility. Except as set out on Schedule VII and provided in the Government Approvals identified therein, the Borrower is not, nor will any of the Secured Parties be (solely as a result of its execution, delivery or performance of this Agreement or the other Financing Documents or the transactions contemplated thereby, other than the exercise of remedies under the Security Documents except to the extent that, following such exercise of remedies, the Borrower will remain as the owner of the relevant Projects, and the Operator will remain as the operator thereof), subject to regulation: (i) respecting the rates of electric utilities or material financial and organizational regulation of electric utilities under the FPA or the applicable Government Rules of the State of California other than, solely with respect to the Secured Parties' exercise of remedies under the Security Documents, Section 203 of the FPA; or (ii) otherwise as a gas or other regulated utility, however denominated, under applicable Government Rules of the United States of America or the State of California.
- (d) Investment Company. The Borrower is not an "investment company" or a company "controlled" by an "investment company" within the meaning of the Investment Company Act of 1940 or an "investment advisor" within the meaning of the Investment Company Act of 1940.

7.15 FINANCING DOCUMENTS; PROJECT DOCUMENTS; NON-MATERIAL PROJECT CONTRACTS; LICENSES, ETC.

- (a) Financing Documents; Project Documents; Non-Material Project Contracts. The Financing Documents, Project Documents and the Non-Material Project Contracts constitute and include all contracts and agreements relating to the Projects. As at

-47-

the Closing Date, all Project Documents are set out in the definition thereof in Schedule I. There are no material services, materials or rights (other than Government Approvals) required for any Project other than those granted by, or to be provided to the Borrower pursuant to, the Project Documents. The Borrower has no reason to believe that any services, materials or rights (other than Government Approvals) that have not been obtained as of the date of this Agreement, but that will be required for a future stage of the Development of any Project (including, without limitation, the Upgrade Project), will not be obtained in due course on or prior to the commencement of the appropriate stage of Development of such Project and will not contain any condition or requirement compliance with which could reasonably be expected to have a Material Adverse Effect.

- (b) Copies of Documents. The Administrative Agent has received a copy (certified by the Borrower) of each Project Document, in accordance with Section 6.01(c), in each case as in effect on the date of delivery and each amendment, modification or supplement thereto.
- (c) No Amendment. Since their certification and delivery in accordance with Section 6.01(c) and except as permitted pursuant to Section 8.22, none of the Project Documents has been amended, modified or supplemented or has been Impaired and all of the Project Documents

are in full force and effect in all material respects. All conditions precedent to the obligations of the respective parties under the Project Documents have been satisfied or waived except for such conditions precedent that need not and cannot be satisfied until a later stage of Development of the relevant Project, and the Borrower has no reason to believe that any such condition precedent cannot be satisfied on or prior to the commencement of the appropriate stage of Development of such Project.

- (d) Representations and Warranties. All material representations, warranties and other factual statements made by the Borrower and, to the knowledge of the Borrower, made by each other Person in the Project Documents are true and correct in all material respects (or, if stated to have been made solely as of an earlier date, were true and correct as of such date) and do not omit to state any material fact necessary to make such representations, warranties and other factual statements not misleading.
- (e) No Default. The Borrower is not in default in the performance of any covenant or obligation set out in any Project Document in a manner that could reasonably be expected to result in a Material Adverse Effect. To the knowledge of the Borrower, no other party to any Project Document is in default in the performance of any covenant or obligation set out therein in a manner that could reasonably be expected to result in a Material Adverse Effect. No Default or Event of Default has occurred and is continuing.

-48-

- (f) Licenses. All material permits, licenses, trademarks, patents or agreements with respect to the usage of technology or other property (other than those constituting Government Approvals) that are necessary for each Project have been obtained, are final and are in full force and effect in all material respects and any such permits, licenses, trademarks, patents or agreements not currently necessary for each Project can reasonably be expected to be obtained when needed, free from conditions or requirements, compliance with which could reasonably be expected to result in a Material Adverse Effect.

- 7.16 UTILITY SERVICES. All utility services necessary for the Development of each Project, including, as necessary, water supply, storm and sanitary sewer, electric and telephone services and facilities, are available to such Project.
- 7.17 DISCLOSURE. All factual information in writing (taken as a whole) furnished by the Borrower or any Affiliate of the Borrower on its behalf, whether in print or electronic form, to any Financing Party was true and accurate in all material respects: on the dates as of which such information was furnished, and was not incomplete by omitting to state any material fact necessary to make such information (taken as a whole) not misleading in any material respect at such time in light of the circumstances under which such information was provided; provided, however, that, except as otherwise expressly provided in this Agreement, the Borrower's sole representation with respect to projections, estimates or other expressions of view as to future circumstances shall be that such projections, estimates or other expressions of view as to future circumstances: (i) were prepared in good faith and with due care; (ii) fairly present in all material respects the Borrower's expectations as to the matters covered thereby as of their respective date(s) of delivery;

(iii) were based on reasonable assumptions as to all factual and legal matters material to the estimates therein as of their respective date(s) of delivery; (iv) were in all material respects consistent with the provisions of the Transaction Documents as of their respective date(s) of delivery; and (v) contain no statements or conclusions that are based upon or include information known to the Borrower to be misleading or that fail to take into account material information regarding the matters reported therein as of their respective date(s) of delivery. There are in existence no documents or agreements that have not been disclosed to the Lenders that are material in the context of the Transaction Documents or that have the effect of varying any of the Transaction Documents or the Projects. There is no fact known to the Borrower that has not been disclosed in writing to the Lenders and that has had, or that could reasonably be expected in the future to have, a Material Adverse Effect.

- 7.18 USE OF PROCEEDS. The proceeds of each Loan will be used solely in accordance with, and solely for the purposes contemplated by, Section 8.09. No part of the proceeds of any Loan hereunder will be used for the purpose, whether immediate, incidental or ultimate, of buying or carrying any Margin Stock or to extend credit to others for such purpose.
- 7.19 FEES. On the Closing Date, except with respect to the financial advisor to the Borrower in connection with the transactions contemplated hereby, the Borrower does not have any

-49-

obligation to any Person in respect of any finder's, broker's, investment banking, legal or accounting or other similar fee (including any fee payable to engineers, environmental consultants, fuel consultants or similar experts) in connection with any of the transactions contemplated by the Transaction Documents for services rendered more than 60 days prior to the Closing Date other than fees payable to Lenders or fees specifically contemplated in the Closing Pro Forma.

- 7.20 INDEBTEDNESS. The Borrower is not directly or indirectly liable with respect to any Indebtedness outstanding as of the Closing Date other than Permitted Indebtedness.
- 7.21 INVESTMENTS. The Borrower has no Investments except Permitted Investments.
- 7.22 NO FORCE MAJEURE. No event, condition or circumstance has occurred on the basis of which the Borrower has either given a notice of "force majeure" or received such notice from any other Person that could reasonably be expected to entitle the Borrower or such notifying Person to excuse, defer or suspend the performance of any of the material obligations of the Borrower or such notifying Person under any Transaction Document to which it is a party on the basis of "force majeure."
- 7.23 ASSETS. The Borrower owns, leases and otherwise has full legal right to use all Real Property, subject to the rules and regulations of the BLM, buildings, machinery, equipment and other assets, whether tangible or intangible, that are necessary or useful for the conduct of its business as presently conducted and as proposed to be conducted through the Final Maturity Date. On and as of the Closing Date, each such asset is, except for the assets to be repaired and/or upgraded as part of the Upgrade Project and the Tower Repairs, free from defects (patent and latent), is in good operating condition and repair (subject to normal wear and tear), and is suitable for the purposes for which it is presently used and as proposed to be used through the Final Maturity Date. Since April 15,

2002, each such asset, except for the assets to be repaired and/or upgraded as part of the Upgrade Project and the Tower Repairs, has been maintained in accordance with prudent and good industry practice.

ARTICLE VIII

COVENANTS

The Borrower covenants and agrees with the Lenders and the Agents that until the Termination Date:

8.01 FINANCIAL STATEMENTS AND OTHER INFORMATION. The Borrower shall deliver to the Administrative Agent (in sufficient copies for distribution to each of the Lenders):

- (a) as soon as available and in any event within 60 days after the end of each quarterly fiscal period of each fiscal year of the Borrower, unaudited statements

-50-

of income, owners' equity and cash flows of the Borrower, for such period and for the period from the beginning of the respective fiscal year to the end of such period, and the related unaudited balance sheet as at the end of such period, setting out in each case in comparative form the corresponding figures for the corresponding period in the preceding fiscal year, accompanied by any material accounting variation report required by Section 1.04(b) and a certificate of a senior financial officer of the Borrower, which certificate shall state that said financial statements fairly present in all material respects the financial condition and results of operations of the Borrower, in accordance with the Accounting Principles applicable to the Borrower as at the end of, and for, such period (subject to normal year-end audit adjustments);

- (b) as soon as available and in any event within 120 days after the end of each fiscal year of the Borrower, audited statements of income, owners' equity and cash flows of the Borrower for such year and the related audited balance sheets as at the end of such year, setting out in each case in comparative form the corresponding figures for the preceding fiscal year, and accompanied by any material accounting variation report required by Section 1.04(b) and an opinion thereon of independent certified public accountants of recognized standing reasonably acceptable to the Lenders, which opinion shall state that said financial statements fairly present in all material respects the financial condition and results of operations of the Borrower as at the end of, and for, such fiscal year in accordance with the Accounting Principles applicable to the Borrower, and a certificate of such accountants stating that, in making the examination necessary for their opinion, they obtained no knowledge, except as specifically stated, of any Default or Event of Default (which certificate may be limited to the extent required by accounting rules or guidelines or customary accounting practice);
- (c) promptly upon their becoming available, copies of all registration statements and regular periodic reports, if any, that the Borrower shall have filed with the Securities and Exchange Commission or any national securities exchange;

- (d) prompt written notice of receipt by the Borrower of written notice of the occurrence of any ERISA Event that, alone or together with any other ERISA Events that have occurred, could reasonably be expected to result in liability of the Borrower in an aggregate amount that could reasonably be expected to result in a Default or have a Material Adverse Effect;
- (e) promptly after the Borrower knows or has reason to believe that any Default or Event of Default has occurred, a notice of such event describing the same in reasonable detail and, together with such notice or as soon thereafter as practicable, a description of the action that the Borrower has taken or proposes to take with respect thereto;

-51-

- (f) promptly after the Borrower knows or has reason to believe that any fact, event, circumstance, condition or occurrence has occurred that results in, or could reasonably be expected to result in, a Material Adverse Effect, a notice of such fact, event, circumstance, condition or occurrence describing the same in reasonable detail and, together with such notice or as soon thereafter as practicable, a description of the action that the Borrower has taken or proposes to take with respect thereto;
- (g) promptly after the Borrower knows or has reason to believe that any event, circumstance or condition in the nature of force majeure has occurred which could reasonably be expected to result in a materially adverse change from the Closing Pro Forma or, if the Second Closing Date has occurred, the Upgrade Pro Form, a notice of such event, describing the same in reasonable detail and, together with such notice or as soon thereafter as practicable, a description of the action that the Borrower has taken or proposes to take with respect thereto;
- (h) promptly upon their becoming available, copies of all material notices or material documents received by the Borrower pursuant to any Project Document (including any notice or other document relating to a failure by the Borrower to perform any of its covenants or obligations under such Project Document);
- (i) promptly upon their becoming available, copies of all material periodic reports received from the Operator and other material notices relating to any Project received from any Project Party;
- (j) the notices required by Section 8.06;
- (k) as soon as practicable as they are available, copies of each insurance policy relating to the Projects, together with a certificate of an Authorized Officer of the Borrower, dated as of the date of such delivery, certifying that the policies comply with Section 8.05(a) and Schedule IV, cover the risks referred to therein, are in full and effect, as of the date of such delivery, no notice of cancellation has been issued thereunder, and that all premiums then due and payable thereon have been paid; and
- (l) from time to time such other information regarding the financial condition, operations, business or prospects of the Borrower (including any Plan or Multiemployer Plan and any reports or other information required to be filed under ERISA) as any Lender

(through the Administrative Agent) or Agent may reasonably request.

- 8.02 MAINTENANCE OF EXISTENCE; ETC. The Borrower shall: (a) preserve and maintain its legal existence; (b) preserve and maintain its good standing and all material licenses, rights, privileges and franchises necessary for the proper operation of each Project and its qualification to do business; and (c) conduct its business in an orderly, efficient and

-52-

regular manner, unless the failure to so comply could not reasonably be expected to result in a Material Adverse Effect.

8.03 COMPLIANCE WITH GOVERNMENT RULES; ETC.

- (a) Compliance with Government Rules. The Borrower shall comply with all applicable Government Rules and from time to time obtain, maintain, comply with and renew all Government Approvals as shall now or hereafter be necessary under applicable Government Rules (except any thereof the non-compliance with or non-renewal of which could not reasonably be expected to result in a Material Adverse Effect). The Borrower shall promptly upon receipt or publication furnish a copy (certified by the Borrower or, if available, the applicable Government Authority) of each such Government Approval to the Administrative Agent.
- (b) No Amendment. Except as provided in Section 8.22(b)(vi), the Borrower shall not petition, request or take any legal or administrative action that seeks to amend, supplement or modify any Government Approval unless: (i) the Borrower theretofore shall have furnished to the Administrative Agent and the Lenders a detailed description of the proposed amendment, supplement or modification and the actions that the Borrower proposes to take with respect thereto; and (ii) such amendment, supplement or modification could not reasonably be expected to result in a Material Adverse Effect. The Borrower shall promptly upon receipt or publication thereof furnish a copy (certified by the Borrower or the applicable Government Authority) of each amendment, supplement or modification to any Government Approval to the Administrative Agent.
- (c) QF Status. The Borrower shall maintain the status of the Projects as QFs.

8.04 ENVIRONMENTAL COMPLIANCE.

- (a) No Use or Release. The Borrower shall not Use or Release, or permit the Use or Release of, Hazardous Materials at any Project other than in compliance with all applicable Environmental Laws and where such Use or Release could not reasonably be expected to result in a Material Adverse Effect.
- (b) Investigation. The Borrower shall conduct and complete any investigation, study, sampling and testing and undertake any cleanup, removal, remedial or other action necessary to remove and clean up all Hazardous Materials Released at, on, in, under or from any Project, to the extent required by and consistent with the requirements of all applicable Environmental Laws except where failure to conduct or complete such clean-up, removal, remedial or other action could not reasonably be expected to result in a Material Adverse Effect.

- (c) Environmental Claim. The Borrower shall deliver to the Administrative Agent and each Lender:

-53-

- (i) promptly upon obtaining knowledge of: (A) any fact, circumstance, condition or occurrence that could form the basis of an Environmental Claim arising with respect to any Project or against such Project, the Borrower or, in connection with its involvement in any Project, any other Environmental Party, in each case, which could reasonably be expected to have a Material Adverse Effect; or (B) any pending or threatened material Environmental Claim arising with respect to any Project or against such Project, the Borrower or, in connection with its involvement in any Project, any other Environmental Party, a notice thereof describing the same in reasonable detail and, together with such notice or as soon thereafter as practicable, a description of the action that the Borrower has taken or proposes to take with respect thereto and, thereafter, from time to time such detailed reports with respect thereto as the Administrative Agent or any Lender (through the Administrative Agent) may reasonably request; and
- (ii) promptly upon their becoming available, copies of all material written communications with any Government Authority relating to any violation or alleged violation of any Environmental Law or any Environmental Claim relating to any Project.

8.05 INSURANCE; EVENTS OF LOSS.

- (a) Insurance Maintained by the Borrower. The Borrower shall keep its present and future properties and business insured as required by and in accordance with the terms and conditions described in Schedule IV.
- (b) Compromise, Adjustment or Settlement. The Administrative Agent shall be entitled at its option to participate in any compromise, adjustment or settlement in connection with any Event of Loss under any policy or policies of insurance or any proceeding with respect to any condemnation (including a Condemnation) or other taking of Property of the Borrower in excess of \$1,000,000. The Borrower shall, within five Business Days after request therefor, reimburse the Administrative Agent for all reasonable out-of-pocket expenses (including reasonable attorneys' and experts' fees) incurred by the Administrative Agent in connection with such participation. The Borrower shall not make any compromise, adjustment or settlement in connection with any such claim without the approval of the Administrative Agent, which approval shall not unreasonably be withheld, conditioned or delayed. The Borrower shall diligently pursue all claims and rights to compensation against all relevant insurers and/or Government Authorities, as applicable, in respect of any Event of Loss.
- (c) Loss Proceeds. In the event that the Borrower receives any amount of Loss Proceeds in respect of any Event of Loss, the Borrower shall deposit the amount

-54-

of such Loss Proceeds in the Restoration Sub-Account. In the event that the Borrower receives any amount of proceeds of business interruption insurance and other payments received for interruption of operations in respect of any Event of Loss, the Borrower shall deposit the amount of such proceeds in the Revenue Account. In the event that the amount of such Loss Proceeds with respect to any Event of Loss is \$2,500,000 or less, such amounts shall be made available to the Borrower for the purpose of Restoring the Affected Property and shall be applied by the Borrower to the payment of the cost of the Restoration of the Affected Property. In the event that the amount of such Loss Proceeds with respect to any Event of Loss is greater than \$2,500,000, such amounts shall be made available to the Borrower from time to time in accordance with paragraph (d) and shall be applied by the Borrower to the payment of the cost of the Restoration of the Affected Property.

In the event that the relevant Event of Loss has caused a Project to be declared a total loss by its insurers, the Loss Proceeds with respect to such Event of Loss shall be promptly applied by the Administrative Agent in accordance with Section 3.04.

(d) Restoration. Amounts to be made available to the Borrower from the Restoration Sub-Account to be applied to the Restoration of Affected Property following any Event of Loss ("RESTORATION WORK") shall be remitted to the Borrower by the Administrative Agent, in the event that the amount of Loss Proceeds with respect to such Event of Loss is greater than \$2,500,000, subject to the satisfaction of the following conditions:

- (i) in the event that the amount of Loss Proceeds with respect to such Event of Loss is less than or equal to \$5,000,000, the Borrower has delivered to the Administrative Agent plans and specifications for the Restoration Work, including reasonable estimates of the costs and time required to complete such Restoration Work ("RESTORATION PLANS") and has certified in writing to the Administrative Agent that the conditions set out in paragraphs (ii)(B), (C), (E) and (F) below have been satisfied; and
- (ii) in the event that the amount of Loss Proceeds with respect to such Event of Loss is greater than \$5,000,000:
 - (A) the Borrower shall have delivered the relevant Restoration Plan to the Administrative Agent and the Independent Engineer;
 - (B) the Restoration Plans provide for Restoration Work that is technically feasible and will, upon completion thereof, result in the Project being at least equal in value, general

-55-

utility and levels of performance as the Project prior to the Event of Loss;

- (C) the Restoration Plans provide for the Restoration Work to be completed within the period covered by business interruption insurance, plus any additional period agreed between the Borrower and the Administrative Agent (after consultation with the Independent Engineer) for a cost not to exceed the

relevant Loss Proceeds plus any necessary additional funds ("ADDITIONAL RESTORATION FUNDS") to be contributed towards such Restoration from: (I) amounts then on deposit in the Revenue Account that are distributable in accordance with Section 8.13, which amounts shall be transferred to the Restoration Sub-Account; or (II) cash actually deposited into the Restoration Sub-Account by a Person other than the Borrower;

- (D) the Independent Engineer shall have delivered to the Administrative Agent and the Lenders a certificate to the effect that the amount of Loss Proceeds with respect to such Event of Loss that has been deposited in the Restoration Sub-Account together with any Additional Restoration Funds, business interruption insurance proceeds relating thereto and any projected revenues from the Project are sufficient to Restore the Affected Property and to pay all Operation and Maintenance Expenses and all maintenance expenditures for such affected Project and Debt Service, in each case during the period of time that is required, in the opinion of the Independent Engineer, to Restore the Affected Property (the "RECONSTRUCTION PERIOD");
- (E) no Event of Default could reasonably be expected to occur during Restoration as a consequence of Restoration Work, assuming that Restoration Work on such Project proceeds in accordance with the Restoration Plan;
- (F) the Property constituting the Restoration Work shall be subject to the Lien of the Security Documents (whether by amendment to the Security Documents or otherwise) free and clear of all Liens other than Permitted Liens; and
- (G) Each request by the Borrower for a disbursement of funds from the Restoration Sub-Account shall be made on 10 days' prior written notice to the Administrative Agent,

-56-

Collateral Agent and the Depositary Bank and shall be accompanied by: (I) a certificate of each of an Authorized Officer of the Borrower and the Independent Engineer that: (1) all of the Restoration Work completed has been done substantially in compliance with the Restoration Plan therefor; (2) the sum requested is required to pay, or to reimburse the Borrower for, costs incurred in connection with such Restoration Work (giving a brief description of the services and materials provided in connection with such Restoration Work); (3) the sum requested, when added to all Loss Proceeds and Additional Restoration Funds with respect to the relevant Event of Loss previously paid out by the Depositary Bank, does not exceed the cost of the Restoration Work done as of the date of such certificate; and (4) the amount of Loss Proceeds with respect to the relevant Event of Loss remaining in the Restoration Sub-Account,

together with any remaining Additional Restoration Funds, will be sufficient to complete the Restoration Work (giving an estimate of the cost of such completion in such reasonable detail as the Administrative Agent may reasonably request); (II) a certificate of an Authorized Officer of the Borrower certifying that no Default or Event of Default shall have occurred and is continuing at such date; and (III) partial lien waivers executed by each contractor and major subcontractor involved in the Restoration Work that shall cover all labor, materials (including equipment and fixtures of all kinds), supplies or services done, performed or furnished at, for or to the relevant Project in connection with the Restoration Work performed to the date of such payment.

Once such Restoration Work is complete (such completion to be evidenced by a certificate of the Borrower delivered to the Administrative Agent, the Collateral Agent and the Depositary Bank), any remaining relevant Loss Proceeds shall be applied as set out in Section 4.3 of the Depositary Agreement.

If the Borrower shall at any time abandon the Restoration Work or otherwise fail to pursue the Restoration Work substantially in accordance with the Restoration Plans, then, to the extent that such Loss Proceeds shall not otherwise have been remitted as aforesaid to the Borrower, such Loss Proceeds shall promptly (at the direction of the Majority Lenders) be applied by the Administrative Agent in accordance with Section 3.04(a). Anything to the contrary in this Section 8.05 notwithstanding, if as the result of such Event of Loss or Restoration Work an Event of Default shall have occurred and be continuing, the Administrative Agent

-57-

may instruct the Depositary Bank to apply any amount of such Loss Proceeds in the Restoration Sub-Account in accordance with Section 3.05.

- 8.06 PROCEEDINGS. The Borrower shall, promptly upon: (a) obtaining knowledge of any action, suit or proceeding at law or in equity by or before any Government Authority, arbitral tribunal or other body pending or threatened against or otherwise affecting the Borrower or any other Major Project Party or any of such Person's Property, any Transaction Document, any Project or the Collateral, in each case that could reasonably be expected to result in a Material Adverse Effect; or (b) becoming aware of any other circumstance, act or condition (including the adoption, amendment or repeal of any Government Rule or the Impairment of any Government Approval or notice (whether formal or informal, written or oral) of the failure to comply with the terms and conditions of any Government Approval) that could reasonably be expected to result in a Material Adverse Effect, in each case, furnish to the Administrative Agent a notice of such event describing the same in reasonable detail and, together with such notice or as soon thereafter as practicable, a description of the action that the Borrower or such other Major Project Party has taken and, with respect to the Borrower, proposes to take with respect thereto.
- 8.07 TAXES. The Borrower shall pay and discharge all Taxes imposed on it or on its income or profits or on any of its Property or on any Transaction

Document prior to the date on which penalties attach thereto and prepare and file Tax returns on or before their due date.

- 8.08 **BOOKS AND RECORDS.** The Borrower shall keep proper books of record and accounts in accordance with Accounting Principles applicable to it and permit representatives of either Agent, upon reasonable notice, to visit and inspect its properties, to examine, copy or make excerpts from its books, records and documents and to discuss its affairs, finances and accounts with its principal officers during normal business hours and at such intervals as either Agent may reasonably request. The Borrower shall notify the Agents of any change in its independent accountants. The Independent Engineer shall have the right to inspect any Project in order to perform its obligations under the Financing Documents, including, to witness and verify any acceptance tests and to discuss the Borrower's affairs with its principal officers and engineers, all at such reasonable times and at such intervals as the Independent Engineer may reasonably request. The Borrower shall at all times maintain and preserve a complete set of Plans and Specifications for each Project (and any Restoration Plans with respect to such Project) at such Project's Site, available for inspection by the Independent Engineer (in order to perform its obligations under the Financing Documents), the Agents and any Lender.
- 8.09 **USE OF PROCEEDS.** The Borrower shall utilize the proceeds of the Loans as provided in the second paragraph of this Agreement.
- 8.10 **MAINTENANCE OF LIENS.** The Borrower shall maintain and preserve the Liens created by the Security Documents and the priority thereof and shall from time to time execute or

-58-

cause to be executed any and all further instruments (including financing statements, continuation statements and similar statements with respect to any Security Document) reasonably requested by the Collateral Agent for such purposes. The Borrower shall promptly discharge, at the Borrower's cost and expense, any Lien (other than Permitted Liens) on the Collateral.

- 8.11 [INTENTIONALLY OMITTED].
- 8.12 **PROHIBITION OF FUNDAMENTAL CHANGES.**
- (a) **Merger or Consolidation.** The Borrower shall not merge into or consolidate with, or acquire all or any substantial part of the assets or any class of stock or other ownership interests of, any other Person without the prior written consent of the Majority Lenders. The Borrower shall not convey, sell, lease, transfer or otherwise dispose of, in one transaction or a series of transactions, any assets except sales of (without duplication) (A) electrical energy or capacity or ancillary services pursuant to a PPA or otherwise in the ordinary course of its business; (B) assets in the ordinary course of its business, the proceeds of which do not in any year exceed the aggregate sum of \$250,000 as to all Projects; and (C) assets made redundant by the Upgrade Project.
 - (b) **No Acquisition.** The Borrower shall not purchase or acquire any assets other than: (i) the purchase of assets reasonably required for the repair of the Defective Towers, and the Upgrade Project, in each case, in accordance with the respective plans therefor; (ii) the purchase of assets reasonably required in connection with

Restoration of the Project in accordance with Section 8.05(d); (iii) the purchase of assets in the ordinary course of business as reasonably required in connection with the Project in accordance with the Project Documents and the Non-Material Project Contracts and as contemplated by the Closing Pro Forma or, if the Second Closing Date has occurred, the Upgrade Pro Forma; and (iv) Permitted Investments.

8.13 RESTRICTED PAYMENTS(a).

The Borrower shall not, directly or indirectly, declare or make any other Restricted Payment unless each of the following conditions is satisfied both immediately before and after the date of payment thereof:

- (i) the date of payment of such Restricted Payment shall be on or within 30 days after a Quarterly Date; provided that, if the Borrower has been precluded from making any Restricted Payment within such 30-day period solely as a consequence of the condition set out in paragraph (ii) below being unsatisfied during such period and such condition is subsequently satisfied, the Borrower may make such Restricted Payment on any date (the "EXTENDED

-59-

RESTRICTED PAYMENT DATE") within 10 days after the date such condition is first satisfied as long as all other conditions of this Section 8.13 are satisfied on and as of such Extended Restricted Payment Date;

- (ii) no Default (other than any Default that (i) provides a cure period therefor of not less than 30 days, (ii) is reasonably capable of being remedied during such 30-day period, (iii) as to which the Borrower is diligently prosecuting or pursuing such remedy, and (iv) following the occurrence of which not more than 30 days have elapsed), or an Event of Default shall have occurred and shall be continuing or would result from the making of such Restricted Payment;
- (iii) for any Quarterly Date on or prior to March 31, 2004, the Projected Debt Service Coverage Ratio shall be at least 1.20:1, and for any corresponding Quarterly Date thereafter, the Debt Service Coverage Ratio for the relevant Historical Computation Period shall be at least 1.20:1;
- (iv) the balance on deposit in the Debt Service Reserve Account shall, on the date of payment of such Restricted Payment after giving effect thereto, be at least equal to the Debt Service Reserve Required Amount;
- (v) the Restricted Payment shall only be made from and to the extent of Distributable Cash (as defined in the Depositary Agreement); and
- (vi) each of the Administrative Agent and the Depositary Bank has received: (i) at least 10 days prior to the corresponding Quarterly Date and, if applicable, Extended Restricted Payment Date, a Distribution Certificate substantially in the form of Exhibit G.

If any of the foregoing conditions to distribution are not satisfied, the

relevant monies shall be applied as set out in Section 4.1 of the Depositary Agreement.

- 8.14 LIENS. The Borrower shall not create, incur, assume or suffer to exist any Lien on any of the Collateral or any of the other Property of the Borrower except Permitted Liens.
- 8.15 INVESTMENTS. The Borrower shall not make any Investments except Permitted Investments.
- 8.16 HEDGING ARRANGEMENTS. The Borrower shall, not later than 30 days following the Closing Date, enter into and at all times thereafter maintain in full force and effect one or

-60-

more Interest Rate Cap Agreements providing for the payment to the Borrower of an amount equal to the excess of the Eurodollar Rate minus (b) six percent (6%), and otherwise on terms reasonably acceptable to the Administrative Agent and the Borrower, with one or more hedge providers reasonably acceptable to the Administrative Agent and the Borrower, and in a notional equivalent amount at least equal to 60% of the principal amount of all Loans outstanding on any Quarterly Date prior to the Final Maturity Date.

- 8.17 INDEBTEDNESS. The Borrower shall not, directly or indirectly, create, incur, assume or otherwise be or become liable with respect to any Indebtedness except Permitted Indebtedness.
- 8.18 TRANSACTIONS WITH AFFILIATES. Except as expressly permitted by this Agreement, the Borrower shall not, directly or indirectly, enter into any transaction directly or indirectly with or for the benefit of an Affiliate other than transactions that: (a) are in the ordinary course of business, including, without limitation, the Upgrade Project; (b) are on terms and conditions at least as favorable to the Borrower as would be obtainable at the time in a comparable "arm's-length" transaction with a Person other than an Affiliate; (c) would not result in any Default hereunder; and (d) are not otherwise prohibited hereunder.
- 8.19 NATURE OF BUSINESS. The Borrower shall not engage in any business other than the operation of the Projects as contemplated by the applicable Project Documents and Non-Material Project Contracts and as contemplated by the SIGC Lease.
- 8.20 MAINTENANCE OF PROPERTIES.
 - (a) Properties. The Borrower shall maintain and preserve all of its Properties necessary or useful in the proper conduct of its business in good working order and condition, ordinary wear and tear excepted, and in accordance with generally accepted prudent utility practices (and all other standards and requirements, to the extent more stringent, set out in any Project Document).
 - (b) Restoration. The Borrower shall Restore any of its Property now or hereafter the subject of an Event of Loss (whether or not insured against or insurable) except any of its Property that has been the subject of an Event of Loss that the Borrower determines in good faith (and, in relation to any Event of Loss for which the amount of the Loss Proceeds exceeds \$2,000,000, with the approval of the Majority Lenders) not to be necessary to the conduct of its business.

- (c) No Removal. The Borrower shall not permit all or any portion of any Project to be removed from such Project's Site (except in the ordinary course of business with respect to maintenance of components of such Project that is required to be conducted off of such Project's Site), demolished or materially altered; provided that spare parts and similar individual items of equipment may be moved from one Project to another Project as the Borrower may reasonably believe necessary.

-61-

8.21 [INTENTIONALLY OMITTED]

8.22 PROJECT DOCUMENTS; ETC.

- (a) Project Documents. The Borrower shall, unless prior written consent is obtained from the Majority Lenders: (i) perform and observe in all material respects all of its material covenants and obligations contained in each of the Project Documents to which it is a party; and (ii) except as permitted by Section 8.22(b): (A) take all reasonable and necessary action to prevent the termination or cancellation of any Project Documents in accordance with the terms thereof or otherwise; and (B) enforce against the relevant Project Party each material covenant or obligation of such Project Document in accordance with its terms, unless the failure to so comply could not reasonably be expected to result in a Material Adverse Effect. Anything in the foregoing to the contrary notwithstanding, the Borrower shall pay, or cause to be paid, when due, all claims for labor, material, supplies or services (under the Project Documents or otherwise) that, if unpaid, could by law result in a Mechanics' Lien; provided that: (A) in the event that, in accordance with the provisions of the relevant Project Document, any such claim may be paid in installments or may be deferred (whether or not interest shall accrue on the unpaid balance thereof), the Borrower may pay such claim in installments (together with accrued interest on the unpaid balance thereof, if any) as the same become due or prior to the end of such period of deferral; and (B) the Borrower shall have the right to contest the validity or amount of such claim.
- (b) No Cancellation, Assignment, Etc. The Borrower shall not, without the prior written consent of the Majority Lenders:
- (i) cancel or terminate any Project Document to which it is a party or consent to or accept any cancellation or termination thereof;
 - (ii) sell, assign (other than pursuant to the Security Documents) or otherwise dispose of (by operation of law or otherwise) any part of its interest in any Project Document, except as permitted by Section 8.12;
 - (iii) waive any default under, or material breach of, any Project Document or waive, fail to enforce, forgive, compromise, settle, adjust or release any material right, interest or entitlement, howsoever arising, under or in respect of any Project Document or in any way vary, or agree to the variation of, any material provision of such Project Document or of the performance of any material covenant or

-62-

- (iv) exercise any "price reopener" or quantity adjustment provisions or similar contractual adjustment provisions (whether or not such provisions relate to price or quantity) under any Project Document or act upon any "price reopener" or quantity adjustment provisions or any such similar contractual adjustment provisions under any Project Document exercised by any other Project Party (except, in each case, upon instructions of the Majority Lenders (after Expert Consultation));
 - (v) petition, request or take any other legal or administrative action that seeks, or may reasonably be expected, to impair any Project Document or amend, modify or supplement any Project Document; or
 - (vi) amend, supplement or modify any Project Document (in each case as in effect on the Closing Date (or if executed subsequently, its execution date) other than as contemplated by the Energy Services Agreement and as thereafter amended, supplemented or modified in accordance with this paragraph (b)) in any material respect.
- (c) Additional Project Documents. The Borrower shall not enter into any Additional Project Document (other than Interest Rate Cap Agreements) without the prior approval of the Majority Lenders (such consent not to be unreasonably withheld or delayed) unless:
- (i) the terms of such Additional Project Document are in accordance with the terms of the then-current Annual Operating Plan and Budget;
 - (ii) entering into such Additional Project Document could not reasonably be expected to have a Material Adverse Effect;
 - (iii) the terms and conditions of such Additional Project Document are consistent with the Financing Documents; and
 - (iv) the Borrower shall take (or cause to be taken) all action necessary to create and perfect the Lien and security interests of the Secured Parties thereon (including execution of all Ancillary Documents).
- (d) Restrictions. The Borrower shall not enter into any contract or agreement (other than the Financing Documents and any Project Document related to the Upgrade Project) or take any other action that, directly or indirectly, restricts its ability to:
- (i) enter into amendments, modifications, supplements or waivers of any of the Transaction Documents;
 - (ii) sell, transfer or otherwise dispose of its assets other than in the ordinary course of its business;
 - (iii) create, incur, assume or suffer to exist any Lien upon any of its Property other than Permitted Liens;
 - (iv) create, incur, assume, suffer to exist or otherwise become liable with respect to any Indebtedness other than Permitted Indebtedness; or
 - (v) declare or make any Restricted Payment except in accordance with Section 8.13.
- (e) Delivery of Documents. Promptly after the execution and delivery thereof, the Borrower shall furnish each Agent and the Lenders with:
- (i) copies (certified by

-63-

the Borrower) of: (A) all amendments, supplements, change orders or modifications of any Project Document to which such Person is a party; and (B) all Additional Project Documents to which it is a party; and (ii) all Ancillary Documents to which it is a party relating to any Additional Project Document.

- (f) Fees Under O&M Contract. The Borrower and the Operator shall not, without the prior written consent of the Majority Lenders, permit "Extraordinary Operation Expenses" under and as defined in the O&M Contract to exceed \$750,000 in any fiscal year of the Borrower.

8.23 ANNUAL OPERATING PLANS AND BUDGETS; OPERATING STATEMENTS.

- (a) Annual Operating Plan and Budget.
 - (i) Scope of Annual Operating Plan and Budget. The Borrower shall prepare and submit to the Administrative Agent (with sufficient copies to permit distribution to each Lender and the Independent Engineer), as and when required by this Agreement, a consolidated annual operating plan and budget for the Borrower for the upcoming Operating Year, including operating and maintenance programs, capital expenditure programs, and budgeted statements of income and sources and uses of cash and balance sheets (the "ANNUAL OPERATING PLAN AND BUDGET"). The Annual Operating Plan and Budget shall be accompanied by a statement of a financial officer of the Borrower to the effect that, to the best of such officer's knowledge, such budget is a reasonable estimate for the period covered thereby and is in compliance with the requirements of this Section 8.23(a).
 - (ii) Contents. Each Annual Operating Plan and Budget shall contain reasonable estimates of Project Revenues (broken out by source), Operation and Maintenance Expenses, Extraordinary Operation Expenses (as defined in the O&M Contract (including a monthly breakdown thereof), capital expenditures, projected working capital requirements of the Borrower and production goals, including detailed assumptions regarding the dispatch of each Project and power prices, in each case, for each calendar month covered by such Annual Operating Plan and Budget, based on the reasonable projections at such time. Such projections shall be based on all facts and circumstances then existing and known to the Borrower and that reflect a reasonable estimate of its future results for the upcoming Operating Year and, in the case of its net income, the next succeeding three (3) Operating Years. Each Annual Operating Plan and Budget shall also address each Project's interface requirements in relation to local utilities,

-64-

proposed staffing levels and safety, regulatory and environmental compliance programs. Each Annual Operating Plan and Budget shall be prepared in good faith on the basis of written assumptions stated therein which the Borrower believes to be reasonable as to all factual and legal matters material to such estimates.

- (iii) Form of Annual Operating Plan and Budget. Unless otherwise consented to by the Administrative Agent, which consent shall not be unreasonably withheld, conditioned or delayed, each Annual Operating Plan and Budget from year to year

shall be based on the same format as the "Data Import" worksheet that is a part of the Closing Pro Forma and be maintained on the same basis and provide sufficient detail to permit a meaningful comparison to previous years.

- (iv) At least 45 (but no more than 90) days prior to the end of each Operating Year, the Borrower shall prepare and submit to the Administrative Agent a draft Annual Operating Plan and Budget for the upcoming Operating Year.
- (v) Effectiveness and Approval of Annual Operating Plans and Budgets. Subject to the following sentence, a draft Annual Operating Plan and Budget shall become effective on the first day of the relevant Operating Year. In relation to any draft Annual Operating Plan and Budget delivered pursuant to paragraph (iv) above in relation to a new Operating Year, if: (A) expenses for the Operating Year covered thereby for any Project exceed those set out for such Project in the then-current Annual Operating Plan and Budget by more than 10% on a consolidated basis; or (B) actual expenditures for any Project in respect of Operation and Maintenance Expenses in the then-current Operating Year met the conditions set out in paragraph (b)(i)(B) below, in each case: (I) the Borrower shall notify the Administrative Agent thereof when submitting the draft Annual Operating Plan and Budget pursuant to paragraph (a)(iv) above or (b) below; and (II) Majority Lender approval of such draft Annual Operating Plan and Budget shall be required, which approval shall not unreasonably be withheld, conditioned or delayed. If the Administrative Agent does not inform the Borrower of the Majority Lenders' disapproval of the submitted Annual Operating Plan and Budget within 30 days after submission thereof to the Administrative Agent, such Annual Operating Plan and Budget shall be deemed approved by the Majority Lenders. If the Majority Lenders do not approve an Annual Operating Plan and Budget, the Administrative Agent shall

-65-

advise the Borrower of the items that are disapproved and the reason for such disapproval.

If all or any portion of an Annual Operating Plan and Budget is disapproved, the Borrower shall adhere to all approved aspects of such Annual Operating Plan and Budget. With respect to those aspects of any Annual Operating Plan and Budget that are not approved, the Annual Operating Plan and Budget for the preceding Operating Year (if applicable), adjusted (in relation to budgeted expenditures) for inflation in a manner mutually acceptable to the Borrower and the Administrative Agent (after Expert Consultation), shall be applicable thereto (and shall for all purposes hereof be deemed to be part of the approved Annual Operating Plan and Budget for such Operating Year) until such time as such aspects of the Annual Operating Plan and Budget therefor have been approved by the Majority Lenders.

- (vi) O&M Contract Consistency. The Borrower shall ensure that any budget or other applicable projection under the O&M Contract is consistent with the Annual Operating Plan and Budget hereunder (as modified from time to time hereunder).

(b) Operation and Maintenance Expenses.

- (i) The Borrower shall not at any time during any Operating Year make expenditures for any Project in respect of any Operation and Maintenance Expenses for such Project in excess of:
 - (A) in the case of any line item or category of the proposed Annual Operating Plan and Budget which is not approved by the Majority Lenders (and until such time as such amounts are so approved), the amounts applicable thereto pursuant to the second paragraph of paragraph (a)(v) above for the period from the beginning of such Operating Year to the end of the current month thereof;
 - (B) in respect of all other such Operation and Maintenance Expenses, any amount which would cause the aggregate amount of such other expenditures to exceed \$250,000; or
 - (C) solely in respect of the "Compromise Payment" under and as defined in the Energy Services Agreement, an aggregate amount exceeding \$724,000;

in the case of (A) and (B), without having first proposed an amendment to the then-current Annual Operating Plan and Budget and the Majority

-66-

Lenders having approved such amendment in accordance with paragraph (ii) below; provided, however, that no such approval shall be required for the "Compromise Payment" referred to in the foregoing clause (C) or for Emergency Operating Costs up to \$1,000,000 per Project in any Operating Year (prorated on the basis of a 365-day year for any Operating Year which is less than a full calendar year).

- (ii) If at any time during any Operating Year: (A) Operation and Maintenance Expenses to be paid by the Borrower during the balance of such Operating Year exceed or could reasonably be expected to exceed the allowance provisions of paragraph (i) above; or (B) the Borrower believes such costs for the balance of such year will exceed such allowance provisions, in each case, the Borrower shall propose an amendment to the then-current Annual Operating Plan and Budget (with copies thereof delivered to the Administrative Agent and the Independent Engineer). Such amendment shall become effective on the date that such proposal is approved by the Majority Lenders. At the time the Borrower submits such proposal, the Borrower shall certify the purpose of such amendment and that such amendment is reasonably necessary or desirable for the operation and maintenance of the Projects. If the Majority Lenders do not approve a proposed amendment, the Administrative Agent shall advise the Borrower of the items that are disapproved and the reason for such disapproval. If all or any portion of a proposed amendment is disapproved, the Borrower shall adhere to the Operation and Maintenance Expenses included in the approved Annual Operating Plan and Budget (subject to the allowance provisions of paragraph (i) above).

- (c) O&M Contract Operating Reports. The Borrower shall furnish to the Administrative Agent a copy of each Quarterly Operations Reports received by it pursuant to the terms of the O&M Contract which include: (i) technical performance of the Projects, including production, (ii) an accident incident report, (iii) safety and environmental compliance status, (iv) equipment operational status, (v) a summary of all major maintenance performed in the preceding quarter and that planned for the coming quarter, including a summary of Major Corrective Maintenance Work (as defined in the O&M Contract) performed in the preceding quarter, (vi) any other known conditions which may adversely affect the technical or financial performance of the Projects, and (vii) the incurrence or payment of any "Extraordinary Operation Expenses" under and as defined in the O&M Contract.

8.24 SPECULATIVE ACTIVITIES.

-67-

The Borrower shall not engage in any speculative activities. Nothing in this Section 8.24 shall prohibit the Borrower from entering into the Interest Rate Cap Agreements.

8.25 STATUS.

- (a) The Borrower shall take, or cause to be taken, all action required to maintain the status of each of the Projects as a QF.
- (b) The Borrower shall not take or permit any Affiliate to take, any action that would cause the Borrower: (i) to become regulated as a public utility under: (A) the FPA in a manner different than that contemplated by its Government Approvals set out on Schedule VI or any of its future Government Approvals regarding the rates of public utilities granted by FERC, such future Government Approvals not to be sought without the prior written consent of the Majority Lenders; or (B) any other material utility regulation under any Government Rule (excluding the FPA and the Government Rules promulgated thereunder), other than as set out on Schedule VI; or (ii) to become subject to any material utility regulation under any Government Rule, other than as set out on Schedule VI.
- (c) Neither the Borrower nor any of its Affiliates shall take, or permit to be taken, any action that would cause the Borrower to be an "investment company" or a company "controlled" by an "investment company" within the meaning of the Investment Company Act of 1940.

8.26 UPDATED SURVEYS AND TITLE POLICY FOLLOWING UPGRADE PROJECT.

- (a) Surveys. The Administrative Agent shall have received, no later than 100 days following completion of the Upgrade Project, a survey of the Site certified to the Borrower, the relevant Title Company and the Administrative Agent, updated, with respect to all relevant requirements and information required for the Initial Surveys under Section 6.01(f)(ii), to within 60 days of the date of receipt by the Administrative Agent.
- (b) Title Policy. Promptly and in any event within 100 days after completion of the Upgrade Project, the Borrower shall cause the relevant Title Company to deliver to the Administrative Agent:
 - (i) an endorsement of the Title Policy issued in connection

with such Project deleting from the Title Policy: (A) any exception in connection with pending disbursements; (B) any exception with respect to unrecorded mechanics' and materialmen's liens; and (C) any exception with respect to survey matters; and

- (ii) an abstractor's certificate or other title evidence showing no Liens or other exceptions to the title of the Deed of Trust Estate, other

-68-

than Permitted Liens and those previously approved in writing by the Administrative Agent.

- 8.27 ACCOUNTS. The Borrower shall not establish or maintain any account other than (a) the Accounts established and maintained pursuant to the Depositary Agreement and (b) any account that does not hold Project Revenues.
- 8.28 NO SUBSIDIARIES. The Borrower shall not form, establish, acquire or suffer to exist any Subsidiaries of the Borrower.
- 8.29 SCE CONSENT. The Borrower shall use commercially reasonable efforts to obtain and deliver to the Administrative Agent, on or prior to the date 60 days following the Closing Date, an agreement among the Borrower, SCE and the Collateral Agent providing for the consent by SCE to the collateral assignment by the Borrower to the Collateral Agent of the Borrower's rights under each PPA.

ARTICLE IX

EVENTS OF DEFAULT

- 9.01 EVENTS OF DEFAULT. Each of the following events shall be and constitute an "EVENT OF DEFAULT":
 - (a) The Borrower shall default in the payment when due hereunder of any principal of or interest on any Loan and such default shall continue unremedied for a period of three (3) Business Days after such amount first became due.
 - (b) The Borrower shall default in the payment when due of any amount payable by it hereunder or under any other Financing Document (other than amounts described in paragraph (a) above) and such default shall continue unremedied for a period of 30 days after such amount first became due.
 - (c) Any material representation, warranty or statement confirmed or made by the Borrower, the Sponsor or any other Major Project Party under any Financing Document or contained in any certificate, statement, notice or other document provided to any Financing Party under or pursuant to any Financing Document shall have been incorrect or misleading in any material respect when made or deemed to be made or (except if stated to have been made solely as of an earlier date) repeated.
 - (d) The Borrower shall default in the performance of any of its obligations under any of:

- (i) Section 8.02(a); (solely in relation to the maintenance of its existence); 8.03(a) (in relation to the first sentence thereof);

-69-

8.03(b) (solely in relation to the first sentence thereof); 8.03(c); 8.04(a); 8.04(b); 8.04(c); 8.05(a); 8.05(b) (other than in relation to the provisions of the second sentence thereof); 8.05(d) (solely in relation to the provisions of the first and second sentences thereof); 8.07; 8.09; 8.12; 8.13 (and such default shall continue for a period of five (5) consecutive Business Days); 8.15 (and such default shall continue for a period of five (5) consecutive Business Days); 8.16; 8.17; 8.19; 8.22(b); 8.22(c); 8.22(d); 8.24; 8.25; 8.26; 8.27; or 8.28; or any other provision of any Financing Document and such continues for more than thirty (30) consecutive days after the Borrower should reasonably become aware of such default;

- (ii) Section 4.01(a), (b), (c) and (g); 4.02 (provided, that solely if the Borrower has no knowledge of the existence of any financing statement referred to therein, no Event of Default shall occur until the date 30 days after the filing of such financing statement); 4.04(a), 4.09, or 4.15 of the Borrower Security Agreement;

- (iii) Section 1.2, 1.3, 1.6, 1.7, 1.8, 1.9, 1.14 or 1.18 of the Deed of Trust; or

- (iv) Sections 3.1(a), 3.1(b) or 4.3 of the Depositary Agreement.

- (e) The Sponsor shall default in the performance of any of its obligations under Sections 4.01(a), 4.02, 4.03, 4.05, 4.06, 4.07, 4.09 or 4.10 of the Pledge Agreement; or any other provision of the Pledge Agreement and such continues for more than thirty (30) consecutive days after the Borrower should reasonably become aware of such default.

- (f) The Borrower or any other Major Project Party shall default in the performance of any material covenant or undertaking contained in any Project Document other than any obligation for the payment of money, which default continues beyond the shorter of the applicable period of grace specified therefor in such document or (i) ten (10) days, in the case of a payment default, or (ii) 30 days, in the case of any other default provided that, if such other default (x) is not capable of being remedied with diligent effort within such 30-day period, and (y) is reasonably capable of being remedied and the Borrower is diligently prosecuting or pursuing such remedy, such other default shall not give rise to an Event of Default unless such other default shall continue unremedied for a period of ninety (90) days after an Authorized Officer of the Borrower becomes aware or reasonably should have become aware of such other default.

- (g) The Borrower or the Sponsor shall: (i) admit in writing its inability to, or be generally unable to, pay its debts as such debts become due; (ii) apply for or consent to the appointment of, or the taking of possession by, a receiver,

-70-

custodian, trustee or liquidator of itself or of all or a substantial part of its Property; (iii) make a general assignment for the benefit of its creditors; (iv) commence a voluntary case under the Bankruptcy Code; (v) file a petition seeking to take advantage of any other law relating to bankruptcy, insolvency, reorganization, winding-up, or composition or readjustment of debts; (vi) fail to controvert in a timely and appropriate manner, or acquiesce in writing to, any petition filed against it in an involuntary case under the Bankruptcy Code; or (vii) take any corporate, limited liability company or partnership action for the purpose of effecting any of the foregoing.

- (h) (i) A proceeding or case shall be commenced against the Borrower or the Sponsor, in each case without the application or consent of such Person, in any court of competent jurisdiction, seeking: (A) its liquidation, reorganization, dissolution or winding-up, or the composition or readjustment of its debts; (B) the appointment of a trustee, receiver, custodian, liquidator or the like of such Person or of all or any substantial part of its Property; or (C) similar relief in respect of such Person under any law relating to bankruptcy, insolvency, reorganization, winding-up, or composition or adjustment of debts, and, in each case, such proceeding or case shall continue undismissed, or an order, judgment or decree approving or ordering any of the foregoing shall be entered and continue unstayed and in effect, for a period of 90 or more days; or (ii) an order for relief against such Person shall be entered in an involuntary case under the Bankruptcy Code.
- (i) Prior to the completion of its duties under all Transaction Documents to which it is a party, any of SCE, the Operator or Imperial Irrigation District shall: (i) admit in writing its inability to, or be generally unable to, pay its debts as such debts become due; (ii) apply for or consent to the appointment of, or the taking of possession by, a receiver, custodian, trustee or liquidator of itself or of all or a substantial part of its Property; (iii) make a general assignment for the benefit of its creditors; (iv) commence a voluntary case under the Bankruptcy Code; (v) file a petition seeking to take advantage of any other law relating to bankruptcy, insolvency, reorganization, winding-up, or composition or readjustment of debts; (vi) fail to controvert in a timely and appropriate manner, or acquiesce in writing to, any petition filed against it in an involuntary case under the Bankruptcy Code; or (vii) take any corporate or partnership action for the purpose of effecting any of the foregoing.
- (j) (i) Prior to the completion of its duties under all Transaction Documents to which it is a party, a proceeding or case shall be commenced against any of SCE, the Operator or Imperial Irrigation District, without the application or consent of such Person, in any court of competent jurisdiction, seeking: (A) its liquidation, reorganization, dissolution or winding-up, or the composition or readjustment of its debts; (B) the appointment of a trustee, receiver, custodian, liquidator or the like of such Person or of all or any substantial part of its Property; or (C) similar relief in respect of such Person under any law relating to bankruptcy, insolvency,

reorganization, winding-up, or composition or adjustment of debts, and, in each case, such proceeding or case shall continue

undismissed, or an order, judgment or decree approving or ordering any of the foregoing shall be entered and continue unstayed and in effect, for a period of 90 or more days; or (ii) an order for relief against such Person shall be entered in an involuntary case under the Bankruptcy Code.

- (k) Any Person referred to in paragraph (g) or (h) above shall be terminated or dissolved (as a matter of Government Rule or otherwise), or proceedings shall be commenced by any Person seeking the termination or dissolution of any Person referred to in paragraph (g) or (h) above and such proceedings shall continue undismissed or unstayed for a period of 90 or more days (or such shorter period of time which such Person has pursuant to Government Rule to cause the dismissal of such proceeding or stay the effectiveness of any such order, judgment or decree).
- (l) A judgment or judgments for the payment of money is rendered by one or more Government Authorities against the Borrower in an aggregate amount (less any amount that applicable insurers have acknowledged liability for) exceeding \$500,000 in the aggregate, and the same shall not be discharged (or provision shall not be made for such discharge), or a stay of execution thereof shall not be procured, within 45 days from the date of entry thereof, and such Person shall not, within said period of 45 days, or such longer period during which execution of the same shall have been stayed, appeal therefrom and cause the execution thereof to be stayed during such appeal, or any action shall be taken by a judgment creditor to attach or levy upon any assets of such Person to enforce any such judgment.
- (m) An ERISA Event shall have occurred that, in the opinion of the Administrative Agent, when taken together with all other ERISA Events that have occurred, could reasonably be expected to result in a Material Adverse Effect.
- (n) (i) Any Environmental Claim arising with respect to the Development of any Project shall have been asserted against such Project, the Borrower or the Operator or, in connection with its involvement with the Development of a Project, any other Environmental Party which, if adversely determined, could reasonably be expected to have a Material Adverse Effect; or (ii) any Release or Use of any Hazardous Materials at, on, under or from such Project shall have occurred which could reasonably be expected to have a Material Adverse Effect.
- (o) Any Indebtedness of the Borrower in excess of \$500,000 is not paid when due (after giving effect to any grace period applicable thereto), becomes due and payable by reason of any default or event of default with respect thereto (howsoever described), or could under the terms of the documentation evidencing such Indebtedness (after giving effect to any grace period applicable thereto)

-72-

become due and payable by reason of any default or event of default with respect thereto (howsoever described).

- (p) (i) The Borrower, the Sponsor, SCE, the Operator or Imperial Irrigation District shall fail to obtain, renew, maintain or comply with all Government Approvals as shall now or hereafter be necessary or desirable; or (ii) any Government Approval related to any Project shall be Impaired or shall cease to be in full force and effect; or (iii) any action, suit, proceeding or investigation

shall be commenced by or before any Government Authority that could reasonably be expected to result in the Impairment of any such Government Approval and such action, suit, proceeding or investigation is not dismissed or terminated within 90 days and, in each such case, such failure, Impairment, cessation or commencement could reasonably be expected to have a Material Adverse Effect.

- (q) (i) Except as expressly contemplated pursuant to paragraph (u) below, any material provision of any Transaction Document shall at any time for any reason cease to be valid and binding or in full force and effect; or (ii) except as expressly contemplated pursuant to paragraph (u) below, any Transaction Document shall be Impaired in whole or part; or (iii) the validity or enforceability of any Transaction Document shall be contested by any party thereto (other than either Agent or the Lenders) or any Government Authority; or (iv) the Borrower, the Sponsor, SCE, the Operator or Imperial Irrigation District shall deny that it has any or further liability or obligation under any Transaction Document and, in each such case, such cessation, Impairment, contest or denial could reasonably be expected to have a Material Adverse Effect.
- (r) Any Security Document shall cease to be in full force and effect or to be effective to grant a perfected Lien to the Collateral Agent for the benefit of the Secured Parties, on any part of the Collateral described therein having value in excess of \$100,000 in the aggregate with the priority purported to be created thereby subject to the rules and regulations of the BLM.
- (s) Any Material Adverse Effect shall occur and be continuing.
- (t) One or more judgments or decrees is entered against the Borrower in the form of an injunction or other similar relief requiring suspension or abandonment of the Development of any Project (or a material portion thereof) for a continuous period of at least 90 days, and such judgment or decree is not vacated, discharged or stayed or bonded pending appeal within 90 days (or any shorter appeal period as is available under applicable Government Rules from the date of entry thereof).
- (u) The Borrower or the Operator ceases to carry on or suspends all or substantially all of its activities in connection with the Development of a Project or otherwise abandons or permits the abandonment of its Project, in each case for a period of 45 days or more, other than where the cessation or suspension is for bona fide

-73-

operational reasons or due to an event of force majeure and the Borrower is using commercially reasonable efforts to commence or recommence such construction or operation.

- (v) The Tower Repairs fail to be substantially completed on or prior to July 1, 2003.

9.02 RIGHTS UPON AN EVENT OF DEFAULT. Upon the occurrence and during the continuation of an Event of Default:

- (a) the Administrative Agent may, and, upon request of the Majority Lenders, shall, by notice to the Borrower and the Collateral Agent, terminate the Commitments and/or declare the principal

amount then outstanding of, and the accrued interest on, the Loans and all other amounts payable by the Borrower hereunder and under the Notes (including, without limitation, any amounts payable under Section 5.05 or 5.06) to be forthwith due and payable, whereupon such amounts shall be immediately due and payable without presentment, demand, protest or other formalities of any kind, all of which are hereby expressly waived by the Borrower; and

- (b) in the case of the occurrence of an Event of Default referred to in paragraph (g) or (h) above with respect to the Borrower, the Commitments shall automatically be terminated and the principal amount then outstanding of, and the accrued interest on, the Loans and all other amounts payable by the Borrower hereunder and under the Notes (including any amounts payable under Section 5.05 or 5.06) shall automatically become immediately due and payable without presentment, demand, protest or other formalities of any kind, all of which are hereby expressly waived by the Borrower.

Notwithstanding anything else provided herein, upon the occurrence and during the continuance of an Event of Default, the Collateral Agent may exercise any and all remedies available to it under law or equity and any Lender may exercise any right of set-off available to it. Without limiting the foregoing, remedies under any Security Document may only be exercised by the Collateral Agent, although any Secured Party shall have the right (but not the obligation) to cure any default under a Security Document subject to the rules and regulations of the BLM.

ARTICLE X

THE AGENTS

- 10.01 APPOINTMENT, POWERS AND IMMUNITIES. Each Lender hereby appoints and authorizes each of the Administrative Agent and the Collateral Agent to act as its agent hereunder and under the other Financing Documents to which such Agent is or becomes a party with such powers as are specifically delegated to such Agent by the terms of this

-74-

Agreement and of such other Financing Documents, together with such other powers as are reasonably incidental thereto. Each Agent (which term as used in this sentence and in Section 10.05 and the first sentence of Section 10.06 shall include reference to its Affiliates and its own and its Affiliates' officers, directors, employees, representatives, attorneys and agents):

- (a) shall have no duties or responsibilities except those expressly set out in this Agreement and in the other Financing Documents to which such Agent is or becomes a party, and shall not by reason of this Agreement or any such other Financing Document be a trustee for any Lender or subject to any fiduciary or other implied duties, regardless of whether a Default has occurred and is continuing;
- (b) shall not be responsible to the Lenders for any recitals, statements, representations or warranties contained in this Agreement or in any other Financing Document, or in any certificate or other document referred to or provided for in, or received by any of them under, this Agreement or any other

Financing Document, or for the value, validity, effectiveness, genuineness, enforceability or sufficiency of this Agreement or any other Financing Document or any other document referred to or provided for herein or therein, or for the validity or sufficiency of the security afforded hereby or thereby, or for any failure by the Borrower or any other Person to perform any of its obligations hereunder or thereunder;

- (c) shall not, except (in the case of the Collateral Agent) to the extent expressly instructed by the Majority Lenders with respect to collateral security under the Security Documents, be required to initiate or conduct any litigation or collection proceedings hereunder or with respect hereto or under, or with respect to, any other Financing Document;
- (d) shall not be liable or responsible for any action taken, suffered or omitted to be taken by it hereunder or under, or with respect to, any other Financing Document or under any other document or instrument referred to or provided for herein or therein or in connection herewith or therewith, except for its own gross negligence or willful misconduct as finally determined by a court of competent jurisdiction; and
- (e) shall not be required to take any action which is contrary to the Financing Documents or applicable Government Rules.

Each Agent may employ agents, experts and attorneys-in-fact and shall not be responsible for the negligence or misconduct of any such agents, experts or attorneys-in-fact selected by it in good faith. The Administrative Agent may deem and treat the payee of any Note as the holder thereof for all purposes hereof unless and until a notice of the assignment or transfer thereof shall have been filed with the Administrative

-75-

Agent, together with the consent of the Borrower to such assignment or transfer (to the extent provided in Section 11.06(b)).

10.02 RELIANCE BY AGENTS. Each Agent shall be entitled to rely upon, and shall not incur any liability for relying upon, any certification, notice or other written communication (including any thereof by telex, telegram or cable) reasonably believed by it to be genuine and correct and to have been signed or sent by or on behalf of the proper Person or Persons, and upon advice and statements of legal counsel, independent accountants and other experts selected by such Agent. Each Agent may also rely upon any statement made to it orally or by telephone and believed by it to be made by the proper Person, and shall not incur any liability for relying thereon. As to any matters not expressly provided for by this Agreement or any other Financing Document to which an Agent is intended to be a party, such Agent shall in all cases be fully protected in acting, or in refraining from acting, hereunder or thereunder in accordance with instructions given by the Majority Lenders or all of the Lenders as is required in such circumstance, and such instructions of such Lenders and any action taken, suffered or omitted or failure to act pursuant thereto shall be binding on all of the Lenders.

Without limiting the foregoing, each Agent shall be entitled to advice of counsel and other professionals concerning all matters of trust and its duty hereunder, but no Agent shall be answerable or responsible for the professional malpractice of any attorney-at-law or certified public accountant or for the acts or omissions of any other professional in

connection with the rendering of professional advice in accordance with the terms of this Agreement, if such attorney-at-law, certified public accountant or other professional was selected by such Agent with due care.

- 10.03 DEFAULTS. Each Agent shall be deemed not to have knowledge or notice of the occurrence of a Default (other than, in the case of the Administrative Agent, the non-payment of principal of or interest on Loans or of commitment fees payable to the Administrative Agent and, in the case of each Agent, fees payable to it under Financing Documents) unless such Agent has received notice from a Lender or the Borrower specifying such Default and stating that such notice is a "Notice of Default". In the event that any Agent receives such a notice of the occurrence of a Default, such Agent shall give prompt notice thereof to the Lenders (and, in the case of the Administrative Agent, shall give each Lender prompt notice of each such non-payment) and the other Agent. Each Agent shall (subject to Section 10.07) take such action with respect to such Default as shall be directed by the Majority Lenders or, if provided herein, all of the Lenders, as applicable; provided that, unless and until such Agent shall have received such directions, such Agent may (but shall not be obligated to) take such action, or refrain from taking such action, with respect to such Default as it shall deem advisable in the best interest of the Lenders except to the extent that this Agreement expressly requires that such action be taken, or not be taken, only with the consent or upon the authorization of the Majority Lenders or all of the Lenders, as applicable.

-76-

- 10.04 RIGHTS AS A LENDER. With respect to its Commitments and the Loans made by it, United (and any successor acting as Administrative Agent or Collateral Agent) in its capacity as a Lender hereunder shall have the same rights and powers hereunder as any other Lender and may exercise the same as though it were not acting as the Administrative Agent or the Collateral Agent, and the term "Lender" or "Lenders" shall, unless the context otherwise indicates, include United in its individual capacity. United (and any successor acting as Administrative Agent or Collateral Agent, as applicable) and its Affiliates may (without having to account therefor to any Lender) accept deposits from, lend money to and generally engage in any kind of banking, trust or other business with the Borrower (and any of its Affiliates) as if it were not acting as the Administrative Agent or the Collateral Agent, as applicable, and United (and any successor acting as Administrative Agent or Collateral Agent, as applicable) and its Affiliates may accept fees and other consideration from the Borrower (and any of its Affiliates) for services in connection with this Agreement or otherwise without having to account for the same to the Lenders.
- 10.05 INDEMNIFICATION. The Lenders agree to indemnify each Agent (to the extent not reimbursed under Section 11.03, but without limiting the obligations of the Borrower under Section 11.03) ratably in accordance with the aggregate principal amount of the Loans held by the Lenders (or, if no Loans are at the time outstanding, ratably in accordance with their respective Commitments), for any and all liabilities, obligations, losses, damages, penalties, actions, judgments, fines, claims, demands, settlements, suits, costs, expenses or disbursements of any kind and nature whatsoever which may be imposed on, incurred by or asserted against such Agent (including by any Lender) arising out of or by reason of any investigation or in any way relating to or arising out of this Agreement or any other Transaction Document or any other documents contemplated by or referred to herein or therein or the transactions contemplated hereby or thereby (including the costs and expenses which the Borrower is obligated to pay under Section 11.03, but excluding, unless a Default has occurred and is continuing, normal administrative costs and expenses incident to the performance of its agency duties

hereunder) or the enforcement of any of the terms hereof or thereof or of any such other documents; provided that no Lender shall be liable for any of the foregoing to the extent they arise from the gross negligence or willful misconduct (as finally determined by a court of competent jurisdiction) of the party to be indemnified. The obligations of the Lenders under this Section 10.05 shall survive the termination of this Agreement, the repayment of the Loans or the earlier resignation or removal of either Agent.

- 10.06 NON-RELIANCE ON AGENTS AND OTHER LENDERS. Each Lender agrees that it has, independently and without reliance on either Agent or any other Lender, and based on such documents and information as it has deemed appropriate, made its own credit analysis of the Borrower and its Affiliates and its own decision to enter into this Agreement and that it will, independently and without reliance upon either Agent or any other Lender, and based on such documents and information as it shall deem appropriate at the time, continue to make its own analysis and decisions in taking or not taking action under this Agreement or any other Transaction Document. No Agent shall be required to

-77-

keep itself informed as to the performance or observance by the Borrower or any other Person of this Agreement or any other Transaction Document or any other document referred to or provided for herein or therein or to inspect the Properties or books of the Borrower or such other Person. Except for notices, reports and other documents and information expressly required to be furnished to the Lenders by an Agent hereunder or under the Financing Documents, such Agent shall not have any duty or responsibility to provide any Lender with any credit or other information concerning the affairs, financial condition or business of the Borrower (or any Affiliate thereof) which may come into the possession of such Agent or any of its Affiliates.

- 10.07 FAILURE TO ACT. Except for action expressly required of an Agent hereunder and under the other Financing Documents to which such Agent is or becomes a party, such Agent shall in all cases be fully justified in failing or refusing to act hereunder and thereunder unless it shall receive further assurances to its satisfaction from the Lenders of their indemnification obligations under Section 10.05 against any and all liability and expense which may be incurred by it by reason of taking or continuing to take any such action. No provision of this Agreement shall require the Collateral Agent to expend or risk its own funds or otherwise incur financial liability in the performance of any of its duties hereunder or in the exercise of any of its rights or powers if it shall have reasonable grounds to believe that repayment of such funds or adequate indemnity against such risk or liability is not reasonably assured to it. Each Agent shall be entitled to interest (calculated on a per annum basis) on all amounts advanced by it hereunder in its discretion at the Federal Funds Rate. Each Agent shall at any time be entitled to cease taking any action if it no longer deems any indemnity or undertaking from the Lenders to be sufficient.

- 10.08 RESIGNATION OR REMOVAL OF AGENTS. Subject to the appointment and acceptance of a successor Agent as provided below, an Agent may resign at any time by giving notice thereof to the Lenders and the Borrower, and an Agent may be removed at any time with or without cause by the Majority Lenders. Upon any such resignation or removal, the Majority Lenders shall have the right to appoint, with the consent of the Borrower (unless a Default or Event of Default has occurred and is continuing), such consent not to be unreasonably withheld or delayed, a successor Agent. If no

successor Agent shall have been so appointed by the Majority Lenders and shall have accepted such appointment within 30 days after the retiring Agent's giving of notice of resignation or the Majority Lenders' removal of the retiring Agent, then the retiring Agent, at its discretion, may, on behalf of the Lenders, appoint a successor Agent, which shall be a bank which has an office in New York, New York with capital, surplus and undivided profits of at least \$500,000,000. Upon the acceptance of any appointment as Agent hereunder by a successor Agent, such successor Agent shall thereupon succeed to and become vested with all the rights, powers, privileges and duties of the retiring Agent, and the retiring Agent shall be discharged from its duties and obligations hereunder. After any retiring Agent's resignation or removal hereunder as Agent, the provisions of this Article X and Section 11.03 shall continue in effect for its benefit in respect of any actions taken,

-78-

suffered or omitted to be taken by it while it was acting as such Agent. Each Agent agrees not to resign solely as a result of the occurrence and continuance of a Default or an Event of Default.

10.09 CONSENTS. Except as otherwise provided in Section 11.04, each Agent may, with the prior written consent of the Majority Lenders (but not otherwise), consent to any modification, supplement or waiver under any Transaction Document; provided that, without the prior written consent of each Lender, the Collateral Agent shall not (except as provided herein or in the Security Documents) release any Collateral or otherwise terminate any Lien under any Security Document, or agree to additional obligations being secured by the Collateral (unless the Lien for such additional obligations shall be junior to the Lien in favor of the other obligations secured by such Security Document and is otherwise permitted hereunder) or alter the relative priorities of the obligations entitled to the benefits of the Liens created under the Security Documents with respect to any of the Collateral, except that no such consent shall be required, and the Collateral Agent is hereby authorized, to release any Lien covering the Borrower's Property that is the subject of a disposition of Property permitted under this Agreement or under the relevant Security Document or to which the Lenders have consented.

10.10 COLLATERAL AGENT. The Collateral Agent shall:

- (a) forward promptly after receipt thereof (and use its best efforts to forward within five Business Days of such receipt): (i) to each Secured Party a copy of each document furnished to such Agent for such Secured Party under this Agreement, and any other Financing Documents to which such Agent is a party; and (ii) to the Administrative Agent any notice delivered to the Collateral Agent pursuant to any Consent and Agreement;
- (b) have the right, but not the obligation, to: (i) refuse any item for credit to any Account except as required by the terms of the Financing Documents; (ii) refuse to honor any request for transfer in relation to any Account that is not consistent with the Financing Documents; (iii) charge to any Account all applicable charges; and (iv) pay fees, interest and other charges owing by the Borrower as provided herein and in the other Transaction Documents;
- (c) except as otherwise provided herein and in the Depositary Agreement (including by the provision of standing instructions therein), and subject to the provisions of Section 10.07, take all

actions and make all determinations with respect to the Collateral and the Security Documents, including as to the advisability of taking additional steps to perfect, or cause the perfection of, any security interest, as directed in writing by the Administrative Agent; and

- (d) have the right at any time to seek clarification and instructions concerning the administration of the Financing Documents from the Administrative Agent, legal

-79-

counsel or any court of competent jurisdiction and shall be fully protected in relying upon such instructions.

ARTICLE XI

MISCELLANEOUS

- 11.01 WAIVER. No failure on the part of either Agent or any Lender to exercise and no delay in exercising, and no course of dealing with respect to, any right, power or privilege under this Agreement, any Note or any other Financing Document shall operate as a waiver thereof, and no single or partial exercise of any right, power or privilege under this Agreement, any Note or any other Financing Document shall preclude any other or further exercise thereof or the exercise of any other right, power or privilege. The remedies provided herein are cumulative and not exclusive of any remedies provided by law.
- 11.02 NOTICES. All notices, requests and other communications provided for herein and under the Financing Documents (including any modifications of, or waivers or consents under, this Agreement) shall be given or made in writing (including by telecopy) delivered to the intended recipient at the "Address for Notices" specified below its name on the signature pages hereof or, as to any party, at such other address as shall be designated by such party in a notice to each other party. Except as otherwise provided in this Agreement, all such communications shall be deemed to have been duly given when transmitted by telecopier with confirmation of receipt received or personally delivered or, in the case of a mailed notice, upon receipt, in each case given or addressed as aforesaid; provided, however, that if such transmission or delivery does not occur by 4:00 p.m. recipient's time, then such transmission or delivery shall be deemed to occur on the next Business Day.
- 11.03 EXPENSES; ETC.
 - (a) Expenses. The Borrower shall pay or reimburse each of the Lenders and each Agent for paying:
 - (i) all reasonable out-of-pocket costs and expenses of the Agents (including the reasonable fees and expenses of: (A) Bingham McCutchen LLP, special counsel to the Lenders; (B) the Independent Engineer; (C) the Insurance Advisor; (D) such other counsel or experts engaged by the Administrative Agent at the request of the Majority Lenders (and, except during the occurrence and continuation of a Default, with the consent of the Borrower, such consent not to be unreasonably withheld or delayed) from time to time; and (E) counsel engaged by the Collateral Agent from time to time with (except during the occurrence and continuation of a Default) the consent of the Borrower, such

consent not to be unreasonably withheld or delayed), in each case in connection with: (I) the negotiation, preparation, execution and delivery of this Agreement and the other Transaction Documents and the extension of credit hereunder; or (II) any amendment, modification or waiver of any of the terms of this Agreement or any other Transaction Document;

- (ii) all reasonable costs and expenses of the Lenders and each Agent (including reasonable counsels' fees and expenses and reasonable experts' fees and expenses) in connection with: (A) any Default and any enforcement or collection proceedings resulting therefrom or in connection with the negotiation of any restructuring or "work-out" (whether or not consummated) of the obligations of the Borrower under this Agreement or the obligations of any Project Party under any other Transaction Document; and (B) the enforcement of this Section 11.03;
- (iii) all transfer, stamp, documentary or other similar taxes, assessments or charges levied by any Government Authority in respect of this Agreement or any other Transaction Document or any other document referred to herein or therein and all costs, expenses, taxes, assessments and other charges incurred in connection with any filing, registration, recording or perfection of any Lien contemplated by this Agreement or any other Financing Document or any other document referred to herein or therein; and
- (iv) all costs, expenses and other charges in respect of title insurance procured with respect to the Liens created pursuant to the Deed of Trust.

In relation to payments referred to under clause (iii) above, within 30 days after paying such amount, the Borrower shall deliver to the Administrative Agent, evidence reasonably satisfactory to the Administrative Agent of such payment.

- (b) Indemnity. The Borrower shall indemnify each Agent, each Lender, their respective Affiliates and their respective shareholders, officers, directors, employees, representatives, attorneys and agents (each, an "INDEMNITEE") from, and shall hold each of them harmless against, any and all losses, liabilities, claims, damages, expenses, obligations, penalties, fines, demands, settlements, actions, judgments, suits, costs or disbursements of any kind or nature whatsoever (including the reasonable fees and expenses of counsel and consultants for each Indemnitee in connection with any investigative, administrative or judicial proceeding commenced or threatened, whether or not such Indemnitee shall be designated a party thereto, but excluding any such losses, liabilities, claims, damages, expenses, obligations, penalties, actions, judgments, suits, costs or

disbursements incurred solely by reason of the gross negligence or willful misconduct of such Indemnitee) that may at any time

(including at any time following the Termination Date) be imposed on, asserted against or incurred by any Indemnitee as a result of, or arising out of, or in any way related to or by reason of:

- (i) any of the transactions contemplated hereby or by any other Transaction Document or the execution, delivery or performance of this Agreement or any other Transaction Document;
 - (ii) the extensions of credit hereunder or the actual or proposed use by the Borrower of any of the extensions of credit hereunder or the grant to the Collateral Agent for the benefit of, or to any of, the Secured Parties of any Lien on the Collateral or on any other Property of the Borrower, the Sponsor or any ownership interest in the Borrower;
 - (iii) the exercise by the Collateral Agent or the other Secured Parties of their rights and remedies (including foreclosure) under any agreements creating any such Lien; and
 - (iv) any Environmental Law (including any Lien filed against any Project by or in favor of any Government Authority) as a result of the past, present or future operations of the Borrower, the Sponsor (as it relates to the Projects) or the Operator (or any predecessor in interest to any such person), or the past, present or future condition of any site or facility owned, operated or leased at any time by the Borrower, the Sponsor or the Operator (or any such predecessor in interest to any such person), or any Release or Use or threatened Release of any Hazardous Materials at any such site or facility, that is not otherwise in accordance with applicable Environmental Law, including any such Release or Use or threatened Release which shall occur during any period when such Indemnitee shall be in possession of any such site or facility following the exercise by either Agent or any other Secured Party of any of its rights and remedies hereunder or under any Financing Document or any other Transaction Document.
- (c) Records. Each relevant Financing Party shall maintain in accordance with its usual practice records evidencing the amounts payable by the Borrower under this Section 11.03; provided that the failure of any Financing Party to maintain such records shall not in any manner affect the obligation of the Borrower to make such payments.

-82-

11.04 AMENDMENTS; ETC. Except as otherwise expressly provided in this Agreement, any provision of this Agreement may be amended or modified only by an instrument in writing signed by each of the Borrower, the Administrative Agent, the Collateral Agent and the Majority Lenders, or by each of the Borrower and the Collateral Agent and the Administrative Agent acting with the consent of the Majority Lenders, and any provision of this Agreement may be waived by the Majority Lenders or by the Administrative Agent acting with the consent of the Majority Lenders; provided that:

- (a) no amendment, modification or waiver shall, unless by an instrument signed by all of the Lenders or by the Administrative Agent acting with the consent of all of the Lenders: (i) increase

or extend the term, or extend the time or waive any requirement for the reduction or termination, of the Commitments; (ii) extend the date fixed for the payment of principal of or interest on any Loan or any fee hereunder; (iii) reduce the amount of any such payment of principal; (iv) reduce the rate at which interest is payable thereon or any fee is payable hereunder; (v) alter the rights or obligations of the Borrower to prepay Loans; (vi) alter the manner in which payments or prepayments of principal, interest or other amounts hereunder shall be applied among the Lenders or Types or Classes of Loans; (vii) alter the terms of this Section 11.04; (viii) amend the definition of the term "Majority Lenders" or modify in any other manner the number or percentage of the Lenders required to make any determinations or waive any rights hereunder or to modify any provision hereof; (ix) waive any of the conditions precedent set out in Section 6.01; or (x) release all or any material portion of the Collateral; and

- (b) any amendment, modification, waiver or supplement of the rights or duties of either Agent hereunder shall require the consent of such Agent.

Anything in this Agreement to the contrary notwithstanding, if at any time when the conditions precedent set out in Article VI to any extension of credit hereunder are, in the opinion of the Majority Lenders, satisfied, any Lender shall fail to fulfill its obligations to make such extension of credit, then, for so long as such failure shall continue, such Lender shall (unless the Majority Lenders, determined as if such Lender were not a "Lender" hereunder, shall otherwise consent in writing) be deemed for all purposes relating to amendments, modifications, waivers or consents under this Agreement or any other Financing Document (including under this Section 11.04 and under Section 10.09) to have no Loans or Commitments, shall not be treated as a "Lender" hereunder when performing the computation of Majority Lenders, and shall have no rights under the preceding paragraph of this Section 11.04.

Anything in this Agreement to the contrary notwithstanding, no waiver or modification of any provision of this Agreement that has the effect (either immediately or at some later time) of enabling the Borrower to satisfy a condition precedent to the making of a Loan of any Class shall be effective against the Lenders making Loans of such Class for purposes of the Commitments of such Class unless the Majority Lenders making Loans of such Class shall have concurred with such waiver or modification, and no waiver or

-83-

modification of any provision of this Agreement or any other Financing Document that could reasonably be expected to adversely affect the Lenders making Loans of any Class in a manner that does not affect all Classes equally shall be effective against the Lenders making Loans of such Class unless the Majority Lenders making Loans of such Class shall have concurred with such waiver or modification.

11.05 SUCCESSORS AND ASSIGNS. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns.

11.06 ASSIGNMENTS AND PARTICIPATIONS.

- (a) Borrower. The Borrower may not assign its rights or obligations hereunder or under the Notes without the prior consent of all of

the Lenders and the Administrative Agent.

- (b) Lenders. Subject to the terms of clause (g) below, each Lender may assign any of its Loans, its Notes and its Commitments (but only with the consent of, in the case of an outstanding Commitment, the Administrative Agent, not to be unreasonably withheld) to an Eligible Assignee; provided that: (i) no such consent by the Administrative Agent shall be required in the case of any assignment to another Lender or an Affiliate (or Approved Fund) of a Lender; (ii) except in the case of an assignment to a Lender or an Affiliate (or Approved Fund) of a Lender or an assignment of the entire remaining amount of the assigning Lender's Commitments, any such partial assignment shall be in an amount at least equal to \$5,000,000; and (iii) each assignment by a Lender of its Commitment, Loans or Note of a particular Class shall be made in such a manner so that the same portion of its Commitment, Loans and Note of such Class is assigned to the respective assignee.

Upon execution and delivery by the assignee to the Borrower and the Administrative Agent of an instrument in writing pursuant to which such assignee agrees to become a "Lender" hereunder (if not already a Lender) having the Commitments and Loans specified in such instrument, and upon consent thereto by the Administrative Agent, to the extent required above, the assignee shall have, to the extent of such assignment (unless otherwise provided in such assignment with the consent of the Administrative Agent, to the extent required above), the obligations, rights and benefits of a Lender hereunder holding the Commitments and Loans (or portions thereof) assigned to it (in addition to the Commitments and Loans, if any, theretofore held by such assignee) and the assigning Lender shall, to the extent of such assignment, be released from the Commitments (or portion thereof) so assigned. Upon each such assignment (other than such an assignment by United), the assigning Lender shall pay the Administrative Agent an assignment fee of \$3,000.

-84-

In furtherance of the foregoing, on the date of any such assignment pursuant to this Section 11.06(b), the Borrower shall deliver to the assigning Lender and the assignee Lender, in exchange for the Notes theretofore delivered by the Borrower to the assigning Lender, appropriately completed Notes, dated the effective date of such assignment, payable to such assigning Lender and to such assignee, in an aggregate amount equal to their respective Commitments after giving effect to such assignment, and otherwise duly completed.

[Intentionally omitted.]

- (c) Participants. A Lender may sell or agree to sell to one or more other Persons a participation in all or any part of any Loan held by it, or in its Commitments (provided that partial participations shall be in an amount at least equal to \$5,000,000 or the entire remaining amount of the assigning Lender's Loans and Commitments, whichever is the lesser). Each purchaser of a participation (a "PARTICIPANT") shall be entitled to the rights and benefits of the provisions of Section 8.01(m) with respect to its participation in such Loans and Commitments as if (and the Borrower shall be directly obligated to such Participant under such provision as if) such Participant were a "Lender" for purposes of said Section, but, except as otherwise provided in Section 4.07(c), shall not have any other rights or benefits under this Agreement or any Note

or any other Financing Document (the Participant's rights against such Lender in respect of such participation to be those set out in the agreements executed by such Lender in favor of the Participant). All amounts payable by the Borrower to any Lender under Article V in respect of Loans and its Commitments, shall be determined as if such Lender had not sold or agreed to sell any participations in such Loans and Commitments, and as if such Lender were funding each of such Loans and Commitments in the same way that it is funding the portion of such Loans and Commitments in which no participations have been sold. In no event shall a Lender that sells a participation agree with the Participant to take or refrain from taking any action hereunder or under any other Financing Document, except that such Lender may agree with the Participant that it will not, without the consent of the Participant, agree to: (i) increase or extend the term, or extend the time or waive any requirement for the reduction or termination, of such Lender's Commitment; (ii) extend the date fixed for the payment of principal of or interest on the related Loans or any portion of any fee hereunder payable to the Participant; (iii) reduce the amount of any such payment of principal; (iv) reduce the rate at which interest is payable thereon, or any fee hereunder payable to the Participant, to a level below the rate at which the Participant is entitled to receive such interest or fee; (v) alter the rights or obligations of the Borrower to prepay the related Loans; or (vi) consent to any modification or waiver hereof or of any Financing Document to the extent that the same, under Section 10.09 or 11.04, requires the consent of each Lender.

-85-

Notwithstanding anything else provided herein, no Person purchasing a participation in accordance with the terms hereof shall be considered a "Lender" for any purposes of the Financing Documents by reason of the purchase of such participation.

- (d) Assignment to Federal Reserve Bank. Anything in this Section 11.06 to the contrary notwithstanding, any Lender may (without notice to the Borrower, either Agent or any other Lender, and without payment of any fee) assign and pledge all or any portion of its Loans and its Notes to any Federal Reserve Bank as collateral security pursuant to Regulation A of the Board of Governors of the Federal Reserve System and any Operating Circular issued by such Federal Reserve Bank. No such assignment shall release the assigning Lender from its obligations hereunder.
- (e) Information. A Lender may furnish any information concerning the Borrower in the possession of such Lender from time to time to assignees and participants (including prospective assignees and participants), subject, however, to the provisions of Section 11.08.
- (f) Assignment to Borrower. Anything in this Section 11.06 to the contrary notwithstanding, no Lender may assign or participate any interest in any Loan held by it hereunder to the Borrower or any of its Affiliates without the prior consent of each Lender.
- (g) United. Notwithstanding anything to the contrary in this Section 11.06, United shall not assign any interest in any Commitment or Loan such that at any time it shall cease to own less than 50.1% of the aggregate principal amount of the Loans from time to time

outstanding.

- 11.07 MARSHALLING; RECAPTURE. None of the Administrative Agent, the Collateral Agent, or any Lender shall be under any obligation to marshal any assets in favor of the Borrower or any other party or against or in payment of any or all of the Secured Obligations. To the extent either Agent or any Lender receives any payment by or on behalf of the Borrower, which payment or any part thereof is subsequently invalidated, declared to be fraudulent or preferential, set aside or required to be repaid to the Borrower or its estate, trustee, receiver, custodian or any other party under any bankruptcy or insolvency law, state or Federal law, common law or equitable cause, then to the extent of such payment or repayment, the obligation or part thereof that has been paid, reduced or satisfied by the amount so repaid shall be reinstated by the amount so repaid and shall be included within the liabilities of the Borrower to such Agent or such Lender as of the date such initial payment, reduction or satisfaction occurred.
- 11.08 CONFIDENTIALITY. Each Lender and each Agent agrees (on behalf of itself and each of its Affiliates, directors, officers, employees and representatives) to keep confidential, any non-public information supplied to it by the Borrower pursuant to this Agreement that is

-86-

identified by the Borrower as being confidential at the time the same is delivered to such Lender or such Agent; provided that nothing herein shall limit the disclosure of any such information: (i) to the extent required by any Government Rule or judicial process; provided that, unless prohibited by applicable Government Rules or not reasonably practicable: (A) notice shall be given to the Borrower of such request; and (B) such Lender or such Agent, as applicable, shall reasonably cooperate with the Borrower to the extent the Borrower may seek to challenge such requirement, so long as the Borrower pays all costs of such challenge and the disclosing party determines that such challenge would not adversely affect it; (ii) to counsel for any of the Lenders or either Agent; (iii) to banking, securities exchange or other regulatory or supervisory authorities, auditors or accountants; (iv) to either Agent or any other Lender; (v) in connection with the exercise of any remedies hereunder or under any of the Financing Documents or any suit, action or proceeding relating to this Agreement or any other Financing Document or the enforcement of rights hereunder or thereunder; (vi) to the Independent Engineer, the Insurance Advisor or to other experts engaged by either Agent or any Lender in connection with this Agreement and the transactions contemplated hereby; (vii) to the extent that such information is required to be disclosed to a Government Authority in connection with a tax audit or dispute; (viii) in connection with any Default and any enforcement or collection proceedings resulting therefrom or in connection with the negotiation of any restructuring or "work-out" (whether or not consummated) of the obligations of the Borrower under this Agreement or the obligations of the Borrower, the Sponsor, the Operator or other Project Party under any other Transaction Document; or (ix) to any assignee or participant (or prospective assignee or participant) so long as such assignee or participant (or prospective assignee or participant) first executes and delivers to the respective Lender and the Borrower a confidentiality agreement pursuant to which it agrees to comply with the requirements of this Section 11.08. Notwithstanding the foregoing provisions of this Section 11.08(b), the foregoing obligation of confidentiality shall not apply to any such information that: (A) was known to any Lender or either Agent prior to

the time it received such confidential information from the Borrower or its Affiliates pursuant to the Transaction Documents; or (B) becomes part of the public domain independently of any act of any Lender or either Agent not permitted hereunder (through publication or otherwise); or (C) is received by any Lender or either Agent, as applicable, without restriction as to its disclosure or use, from a Person other than the Borrower or its Affiliates; provided that such Lender or such Agent, as applicable has no actual knowledge that such source is disclosing such information to such Lender or such Agent, as applicable, in violation of a confidentiality agreement with respect to such information.

11.09 NON-RECOURSE. No recourse shall be had for the payment of any obligations under any Loan or upon any other obligation, covenant or agreement under this Agreement or any other Financing Document, against the Sponsor or any Affiliate thereof, any incorporator, direct or indirect stockholder, member, partner, officer, director, as such, whether past, present or future of the Sponsor or the Borrower or any Affiliate thereof or of any successor corporation thereto (either directly or through the Sponsor or the Borrower or a

-87-

successor corporation) (each hereinafter, a "NON-RECOURSE PERSON"), whether by virtue of any constitutional provision, statute or rule of law, or by the enforcement of any assessment or penalty or otherwise. It is expressly agreed and understood that:

- (a) this Agreement and each other Financing Document are solely limited liability company obligations of the Borrower, and that no personal liability whatsoever shall attach to, or be incurred by, any Non-Recourse Person, either directly or indirectly through the Borrower or any successor Person, because of the indebtedness thereby authorized or under or by reason of any of the obligations, covenants or agreements contained in this Agreement or any of the Financing Documents or to be implied herefrom or therefrom; and
- (b) any claim of or relating to such personal liability is hereby expressly waived and released as a condition of, and as part of the consideration for, the execution of this Agreement and each other Financing Document.

Notwithstanding the foregoing, nothing in this Section 11.09 shall impair or in any way limit any liabilities or obligations of: (i) the Sponsor under or pursuant to its obligations as set forth in the Borrower Equity Interest Pledge; or (ii) any Non-Recourse Party for fraud or willful misconduct.

11.10 SURVIVAL. The obligations of the Borrower under Sections 5.01, 5.05, 5.06 and 11.03, the obligations of the Lenders under Section 10.05 and the obligations of the Borrower and the Lenders under the penultimate sentence of Section 10.08 and under Section 11.08 shall survive after the Termination Date. In addition, each representation and warranty made, or deemed to be made by a notice of any Disbursement, herein or pursuant hereto shall survive the making of such representation and warranty, and no Lender shall be deemed to have waived, by reason of making any Disbursement hereunder, any Default that may arise by reason of such representation or warranty proving to have been false or misleading, notwithstanding that such Lender or either Agent may have had notice or knowledge or reason to believe that such representation or warranty was false or misleading at the time such Disbursement was made.

- 11.11 COUNTERPARTS; INTEGRATION; EFFECTIVENESS. This Agreement may be executed in any number of counterparts, all of which taken together shall constitute one and the same instrument and any party hereto may execute this Agreement by signing any such counterpart. This Agreement and the other Financing Documents constitute the entire agreement and understanding among the parties hereto with respect to matters covered by this Agreement and the other Financing Documents and supersede any and all prior agreements and understandings, written or oral, relating to the subject matter hereof. This Agreement shall become effective at such time as the Administrative Agent shall have received counterparts hereof signed by all of the intended parties hereto.
- 11.12 NO THIRD PARTY BENEFICIARIES IN RELATION TO DISBURSEMENTS. THE AGREEMENT OF THE LENDERS TO MAKE THE LOANS TO THE

-88-

BORROWER, ON THE TERMS AND CONDITIONS SET OUT IN THIS AGREEMENT, ARE SOLELY FOR THE BENEFIT OF THE BORROWER, AND NO OTHER PERSON (INCLUDING ANY AFFILIATE OF THE BORROWER, OR ANY PROJECT PARTY, CONTRACTOR, SUBCONTRACTOR, SUPPLIER, WORKMAN, CARRIER, WAREHOUSEMAN OR MATERIALMAN FURNISHING LABOR, SUPPLIES, GOODS OR SERVICES TO OR FOR THE BENEFIT OF ANY PROJECT) SHALL HAVE ANY RIGHTS HEREUNDER OR UNDER ANY OTHER FINANCING DOCUMENT AS AGAINST EITHER AGENT OR ANY LENDER OR WITH RESPECT TO ANY EXTENSION OF CREDIT CONTEMPLATED HEREBY.

- 11.13 GOVERNING LAW; SUBMISSION TO JURISDICTION, ETC. THIS AGREEMENT AND THE NOTES SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAW OF THE STATE OF NEW YORK. EACH PARTY HERETO HEREBY SUBMITS TO THE NONEXCLUSIVE JURISDICTION OF THE UNITED STATES DISTRICT COURT FOR THE SOUTHERN DISTRICT OF NEW YORK AND OF ANY NEW YORK STATE COURT SITTING IN NEW YORK COUNTY (INCLUDING ANY APPELLATE DIVISION THEREOF), AND OF ANY OTHER APPELLATE COURT IN THE STATE OF NEW YORK, FOR THE PURPOSES OF ALL LEGAL PROCEEDINGS ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY (OTHER THAN ENFORCEMENT OF THE DEED OF TRUST). EACH PARTY HERETO IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY OBJECTION THAT IT MAY NOW OR HEREAFTER HAVE TO THE LAYING OF THE VENUE OF ANY SUCH PROCEEDING BROUGHT IN SUCH A COURT AND ANY CLAIM THAT ANY SUCH PROCEEDING BROUGHT IN SUCH A COURT HAS BEEN BROUGHT IN AN INCONVENIENT FORUM.
- 11.14 WAIVER OF JURY TRIAL. EACH OF THE BORROWER, EACH AGENT AND EACH OF THE LENDERS HEREBY IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY LEGAL PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.
- 11.15 SPECIAL EXCULPATION. NO CLAIM MAY BE MADE BY THE BORROWER, ANY OF ITS AFFILIATES, ANY PARTY TO THIS AGREEMENT OR THE AFFILIATES, SHAREHOLDERS, DIRECTORS, OFFICERS, EMPLOYEES, ATTORNEYS OR AGENTS OF ANY OF THEM AGAINST EITHER AGENT OR ANY LENDER OR THE AFFILIATES, SHAREHOLDERS, DIRECTORS, OFFICERS, EMPLOYEES, ATTORNEYS OR AGENTS OF ANY OF THEM FOR ANY SPECIAL, INDIRECT, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE LOSS OR DAMAGES IN RESPECT OF ANY CLAIM FOR BREACH OF CONTRACT OR ANY OTHER THEORY OF LIABILITY ARISING OUT OF OR RELATING TO THIS AGREEMENT OR ANY OTHER TRANSACTION DOCUMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY, OR ANY ACT,

OMISSION OR EVENT OCCURRING IN CONNECTION THEREWITH, AND THE BORROWER HEREBY WAIVES, RELEASES AND AGREES NOT TO SUE UPON ANY CLAIM FOR ANY SUCH DAMAGES, WHETHER OR NOT ACCRUED AND WHETHER OR NOT KNOWN OR SUSPECTED TO EXIST IN ITS FAVOR.

- 11.16 SERVICE OF PROCESS. Each party hereto hereby irrevocably consents to the service of process in any suit, action or proceeding in such courts by the mailing thereof by any of the other parties hereto by registered or certified mail, postage prepaid, to the "Address for Notices" specified below its name on the signature pages hereof.
- 11.17 SERVICE OF PROCESS. Nothing herein shall in any way be deemed to limit the ability of any party hereto to serve any writs, process or summonses in any other manner permitted by applicable law or to obtain jurisdiction over any other party hereto in such jurisdiction, and in such manner, as may be permitted by applicable law.
- 11.18 SEVERABILITY. Any provision of this Agreement or the other Financing Documents that is prohibited or unenforceable in any particular jurisdiction shall, as to that jurisdiction, be ineffective to the extent of that prohibition or unenforceability without invalidating the remaining provisions of this Agreement or the other Financing Documents, and any such prohibition or unenforceability in any particular jurisdiction shall not invalidate or render unenforceable that provision in any other jurisdiction.

[SIGNATURE PAGES FOLLOW]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

Schedule I to the Credit Agreement

Exhibit 10.1.5

This CREDIT AGREEMENT, dated as of December 18, 2003 (this "Agreement"), is entered into among ORCAL GEOTHERMAL INC., a corporation organized under the laws of the State of Delaware, as borrower ("Borrower"), THE FINANCIAL INSTITUTIONS LISTED ON EXHIBIT H OR WHO LATER BECOME A PARTY HERETO, as banks (the financial institutions party to this Agreement being collectively referred to as the "Banks") and BEAL BANK, S.S.B., as administrative agent for the Banks (in such capacity, "Administrative Agent").

RECITALS

A. Borrower intends to acquire directly or indirectly certain Persons which directly or indirectly own, lease, use and operate the Projects referred to herein, consisting of (a) an approximately 52 MW geothermal electric power project located in Heber, California and owned by HGC, (b) a geothermal fluid facility located in Heber, California and owned by HFC, (c) an approximately 40 MW geothermal electric power project (comprised of three geothermal plants) located near Mammoth Lakes, California and owned by Mammoth Lakes and (d) an approximately 48 MW geothermal electric power project located in Heber, California and leased by SIGC pursuant to the GE Lease, and, in connection therewith, Borrower has requested that the Banks provide a portion of the financing for the Acquisition; and

B. The Banks are willing to provide such financing upon the terms and subject to the conditions set forth herein and in the other Credit Documents.

AGREEMENT

NOW, THEREFORE, in consideration of the agreements herein and in the other Credit Documents and in reliance upon the representations and warranties set forth herein and therein, the parties hereto agree as follows:

ARTICLE 1 DEFINITIONS

1.1 DEFINITIONS. Except as otherwise expressly provided, capitalized terms used in this Agreement (including its exhibits and schedules) shall have the meanings given to such terms in Exhibit A.

1.2 RULES OF INTERPRETATION. Except as otherwise expressly provided, the rules of interpretation set forth in Exhibit A shall apply to this Agreement and the other Credit Documents.

ARTICLE 2 THE CREDIT FACILITIES

2.1 LOAN FACILITIES.

2.1.1 Senior Credit Facility.

(a) Availability. Subject to the terms and conditions set forth in this Agreement and in reliance upon the representations and warranties of Borrower set forth herein, each Bank severally agrees to advance to Borrower on the Closing Date such loans as Borrower may request pursuant to this Section 2.1.1 (individually, a "Loan" and, collectively, the "Loans"), in an aggregate principal amount which does not exceed such Bank's Senior Loan Commitment. Nothing in this clause (a) shall in any respect impair Beal Bank, S.S.B.'s obligations under Section 9.12.

(b) Notice of Borrowing. Borrower shall request Loans by delivering to Administrative Agent a written notice in the form of Exhibit C-1, appropriately completed (a "Notice of Borrowing"), which contains or specifies, among other things:

(i) the portion of the requested Loan which shall bear interest as provided in (A) Section 2.1.1(c)(i) (individually, a "Base Rate Loan" and, collectively, the "Base Rate Loans") or (B) Section 2.1.1(c)(ii) (individually, a "LIBOR Loan" and, collectively, the "LIBOR Loans");

(ii) the aggregate principal amount of the requested Loan, which shall be in the minimum amount of \$1,000,000 or an integral multiple of \$100,000 in excess thereof;

(iii) the proposed date of the requested Loan (which shall be a Banking Day and the Closing Date);

(iv) in the case of any requested Loan to be made as a LIBOR Loan, the initial Interest Period requested therefor (which shall, subject to Section 2.1.2(a), be twelve months); and

(v) a certification by Borrower that, as of the date such requested Loan is proposed to be made, the Loan proposed to be made on such date does not exceed \$154,500,000.

Borrower shall give the Notice of Borrowing to Administrative Agent so as to provide not less than the Minimum Notice Period applicable to Loans of the Type requested. Any Notice of Borrowing may be modified or revoked by Borrower through the Banking Day immediately prior to the Closing Date, and shall thereafter be irrevocable.

Each Notice of Borrowing shall be delivered in any manner permitted by Section 10.1 to Administrative Agent at the office, to the facsimile number or to the electronic mail address and during the hours specified in Section 10.1.

2

(c) Interest. Subject to Section 2.4.3, Borrower shall pay interest on the unpaid principal amount of each Loan from the date of Borrowing of such Loan until the maturity or prepayment thereof at the following rates per annum:

(i) With respect to the principal portion of such Loan which is, and during such periods as such Loan is, a Base Rate Loan, at a rate per annum equal to the Base Rate (such rate to change from time to time as the Base Rate shall change) plus 4.375%; provided that such 4.375% interest rate margin shall be increased by 0.50% on the eighth anniversary of the Closing Date.

(ii) With respect to the principal portion of such Loan which is, and during such periods as such Loan is, a LIBOR Loan, at a rate per annum, at all times during each Interest Period for such LIBOR Loan, equal to the greater of (A) the Adjusted LIBO Rate for such Interest Period and (B) 2.00%, in each case plus 5.125%; provided that such 5.125% interest rate margin shall be increased by 0.50% on the eighth anniversary of the Closing Date.

(d) Principal Payments. Borrower shall repay to Administrative Agent, for the account of each Bank, the aggregate unpaid principal amount of the Loan made by such Bank in installments payable on each Principal Repayment Date in accordance with the repayment schedule set forth on Exhibit I, with any remaining unpaid principal, interest, fees and costs due and payable on the Maturity Date. Borrower may not re-borrow the principal amount of any Loan so repaid.

2.1.2 Interest Provisions Relating to All Loans.

(a) Applicable Interest Rate. Subject to Section 2.4.3, the applicable basis for determining the rate of interest with respect to any Loan shall be selected by Borrower initially at the time a Notice of Borrowing is given pursuant to Section 2.1.1. The basis for determining the interest rate with respect to any Loan may be changed from time to time as specified in a Notice of Conversion of Loan Type delivered pursuant to Section 2.1.5. If on any day a Loan is outstanding with respect to which notice has not been delivered to Administrative Agent in accordance with the terms of this Agreement specifying the applicable basis for determining the rate of interest, then for that day such Loan shall bear interest determined by reference to the Base Rate. Upon the occurrence and during the continuation of any Event of Default, the Banks shall not be obligated to make any LIBOR Loans with an Interest Period greater than one month.

(b) Interest Payment Dates. Borrower shall pay accrued interest on the unpaid principal amount of each Loan (i) in the case of each Base Rate Loan, on the last Banking Day of each calendar quarter, (ii) in the case of each LIBOR Loan, on the last Banking Day of the calendar month in which the three-month anniversary of the first day of the applicable Interest Period in which such LIBOR Loan is outstanding occurs, and (iii) in all cases, upon repayment or prepayment (to the extent thereof and including any optional prepayments or Mandatory Prepayments), upon conversion from one Type of Loan to another Type of Loan and at maturity (whether by acceleration or otherwise); provided, however, that Borrower's first scheduled interest payment hereunder shall occur on March 31, 2004.

3

(c) LIBOR Loan Interest Periods.

(i) Subject to Section 2.1.2(a), each Interest Period for LIBOR Loans shall be twelve months. Notwithstanding anything to the contrary in the preceding sentence, (A) any Interest Period which would otherwise end on a day which is not a Banking Day shall be extended to the next succeeding Banking Day unless such next Banking Day falls in another calendar month, in which case such Interest Period shall end on the immediately preceding Banking Day; (B) any Interest Period which begins on the last Banking Day of a calendar month (or on a day for which there is no numerically corresponding day in the calendar month at the end of such Interest Period) shall end on the last Banking Day of a calendar month; and (C) any Interest Period which would otherwise end after the Maturity Date shall end on the Maturity Date.

(ii) Borrower may contact Administrative Agent at any time prior to the end of an Interest Period for a quotation of Interest Rates in effect at such time for given Interest Periods and Administrative Agent shall promptly provide such quotation. Borrower may select an Interest Period telephonically or by electronic mail within the time periods specified in Section 2.1.5, which selection shall be irrevocable on and after commencement of the applicable Minimum Notice Period. Borrower shall confirm such telephonic or electronic mail notice to Administrative Agent by facsimile on the day such notice is given by delivery to Administrative Agent of a written notice in substantially the form of Exhibit C-2, appropriately completed (a "Confirmation of Interest Period Selection"). If Borrower fails to notify Administrative Agent of the next Interest Period for any LIBOR Loans in accordance with this Section 2.1.2(c)(ii) then, subject to Section 2.1.2(a), such Loans shall automatically be renewed as LIBOR Loans with an Interest Period of twelve months on the last day of the current Interest Period therefor. Administrative Agent shall as soon as practicable (and, in any case, within two Banking Days after delivery of the Confirmation of Interest Period Selection) notify Borrower of each determination of the Interest Rate applicable to each Loan.

(d) Interest Computations. All computations of interest on Base Rate Loans shall be based upon a year of 365 days or, in the case of a leap year, 366 days, shall be payable for the actual days elapsed (including the first day but excluding the last day), and shall be adjusted in accordance with any changes in the Base Rate to take effect on the beginning of the day of such change in the Base Rate. All computations of interest on LIBOR Loans shall be based upon a year of 360 days and shall be payable for the actual days elapsed (including the first day but excluding the last day). Borrower agrees that all computations by Administrative Agent of interest shall be conclusive and binding in the absence of manifest error.

2.1.3 Promissory Notes. The obligation of Borrower to repay the Loans made by a Bank and to pay interest thereon at the rates provided herein shall, upon the written request of such Bank, be evidenced by promissory notes in the form of Exhibit B-1 (individually, a "Note" and, collectively, the "Notes") payable to the order of such requesting Bank and in the principal amount of such

Bank's Senior Loan Commitment or outstanding Loan balance, as the case may be. Borrower authorizes each such requesting Bank to record on the schedule annexed to such Bank's Note or Notes, the date and amount of each Loan made by such requesting Bank, and each payment or prepayment of principal thereunder and agrees that all such notations shall

4

constitute prima facie evidence of the matters noted; provided that in the event of any inconsistency between the records or books of Administrative Agent and any Bank's records or Notes, the records of Administrative Agent shall be conclusive and binding in the absence of manifest error. Borrower further authorizes each such requesting Bank to attach to and make a part of such requesting Bank's Note or Notes continuations of the schedule attached thereto as necessary. No failure to make any such notations, nor any errors in making any such notations, shall affect the validity of Borrower's obligations to repay the full unpaid principal amount of the Loans or the duties of Borrower hereunder or thereunder. Upon the payment in full in cash of the aggregate principal amount of, and all accrued and unpaid interest on, the Loans, and upon the request of Borrower, the Banks holding such Notes shall promptly mark the applicable Notes cancelled and return such cancelled Notes to Borrower.

2.1.4 Loan Funding.

(a) Notice. Each Notice of Borrowing and Notice of Conversion of Loan Type shall be delivered to Administrative Agent in accordance with Sections 2.1.1(b) and 2.1.5, respectively. Administrative Agent shall promptly notify each Bank of the contents of each Notice of Borrowing and Notice of Conversion of Loan Type.

(b) Pro Rata Loans. All Loans shall be made on a pro rata basis by the Banks in accordance with their respective Proportionate Shares of such Loans, with each Borrowing to consist of a Loan by each Bank equal to such Bank's Proportionate Share of such Loans.

(c) Bank Funding. Each Bank shall, before noon (12:00 p.m.) on the date of each Borrowing, make available to Administrative Agent by wire transfer of immediately available funds in Dollars to the account of Administrative Agent most recently designated by it for such purpose, such Bank's Proportionate Share of the Loan to be made on such date. The failure of any Bank to make the Loan to be made by it as part of any Borrowing shall not relieve any other Bank of its obligation hereunder to make its Loan on the date of such Loan. Except as provided in Section 9.12, no Bank shall be responsible for the failure of any other Bank to make the Loan to be made by such other Bank on the date of any Borrowing.

(d) Failure of Bank to Fund. Without limiting the obligations of Beal Bank, S.S.B. under Section 9.12, unless Administrative Agent shall have been notified by any Bank prior to the applicable date of a Borrowing that such Bank does not intend to make available to Administrative Agent the amount of such Bank's Proportionate Share of the Loan requested on such date, Administrative Agent may assume that such Bank has made such amount available to Administrative Agent on such date in accordance with the prior paragraph and Administrative Agent may, in its sole discretion and in reliance upon such assumption, make available to Borrower a corresponding amount on such date. If such amount is not in fact made available to Administrative Agent by such Bank, Administrative Agent shall be entitled to recover such amount on demand (and, in any event, within two Banking Days from the applicable date of such Borrowing) from such Bank together with interest thereon, for each day from the applicable date of such Borrowing until the date such amount is paid to Administrative Agent, at the Federal Funds Rate for the first two Banking Days after such date. If such Bank pays such amount to Administrative Agent, then such amount shall constitute such Bank's Proportionate Share of

such Loan included in such Loan. Nothing in this Section 2.1.4(d) shall be deemed to relieve any Bank from its obligation to fulfill its obligations hereunder or to prejudice any rights that Borrower may have against any Bank as a result of any default by such Bank hereunder.

(e) Funding Account. No later than noon (12:00 p.m.) on the date specified in the Notice of Borrowing, if the applicable conditions precedent listed in Section 3.1 have been satisfied or waived in accordance with the terms thereof and, subject to Section 2.1.4(d), to the extent Administrative Agent shall have received the appropriate funds from the Banks, Administrative Agent shall make available to Borrower the Loans requested in such Notice of Borrowing in Dollars and in immediately available funds, at Administrative Agent's New York Branch, and shall deposit or cause to be deposited the proceeds of such Loans into the Funding Account.

2.1.5 Conversion of Loans. Borrower may convert Loans (or portions thereof) from one Type of Loans to another Type of Loans; provided, however, that (i) any conversion of LIBOR Loans into Base Rate Loans shall be made on, and only on, the first day after the last day of an Interest Period for such LIBOR Loans and (ii) Loans shall be converted only in amounts of \$1,000,000 and increments of \$500,000 in excess thereof. Borrower shall request such a conversion by delivering to Administrative Agent a written notice in the form of Exhibit C-3, appropriately completed (a "Notice of Conversion of Loan Type"), which contains or specifies, among other things:

(a) the Loans, or portions thereof, which are to be converted;

(b) the Type of Loans into which such Loans, or portions thereof, are to be converted;

(c) if such Loans are to be converted into LIBOR Loans, the initial Interest Period selected by Borrower for such Loans (which Interest Period, subject to Section 2.1.2(a), shall be twelve months as provided in Section 2.1.2(c));

(d) the proposed date of the requested conversion (which shall be a Banking Day and otherwise in accordance with this Section 2.1.5); and

(e) a certification by Borrower that no Event of Default has occurred and is continuing.

Borrower shall so deliver each Notice of Conversion of Loan Type so as to provide at least the applicable Minimum Notice Period. Any Notice of Conversion of Loan Type may be modified or revoked by Borrower through the Banking Day immediately prior to the Minimum Notice Period, and shall thereafter be irrevocable. Each Notice of Conversion of Loan Type shall be delivered in any manner permitted by Section 10.1 to Administrative Agent at the office, to the facsimile number or to the electronic mail address and as otherwise specified in Section 10.1. Administrative Agent shall promptly notify each Bank of the contents of each Notice of Conversion of Loan Type.

2.1.6 Prepayments.

(a) Terms of All Prepayments.

(i) Upon the prepayment of any Loan (whether such prepayment is an optional prepayment under Section 2.1.6(b) or a Mandatory Prepayment), Borrower

shall pay to Administrative Agent for the account of the Bank which made such Loan, (A) all accrued interest to the date of such prepayment on the amount of such Loan prepaid, (B) all accrued fees to the date of such prepayment relating to the amount of such Loan being prepaid, (C) any applicable Make-Whole Premiums, and (D) if such prepayment is the prepayment of a LIBOR Loan on a day other than the last day of an Interest Period for such LIBOR Loan, all Liquidation Costs incurred by such Bank as a result of such prepayment (pursuant to the terms of Section 2.6).

(ii) Notwithstanding the foregoing, but only in respect of any Mandatory Prepayment, Borrower shall have the right, by giving five Banking Days' notice to Administrative Agent, in lieu of prepaying a LIBOR Loan on a day other than the last day of an Interest Period for such LIBOR Loan, to deposit or cause Administrative Agent to deposit into an account to be held by Depositary Agent (which account shall be subjected to the Lien of the Collateral Documents in a manner reasonably satisfactory to Administrative Agent) an amount equal to the LIBOR Loans to be prepaid. Such funds shall be held in such account until the expiration of the Interest Period applicable to the LIBOR Loan to be prepaid at which time the amount deposited in such account shall be used to prepay such LIBOR Loan and any interest accrued on such amount shall be deposited into the Revenue Account. The deposit of amounts into such account shall not constitute a prepayment of Loans and all Loans to be prepaid using the proceeds from such account shall continue to accrue interest at the then applicable interest rate for such Loans until actually prepaid. All amounts in such account shall only be invested in Permitted Investments as directed by and at the expense and risk of Borrower.

(iii) Except as otherwise specifically set forth herein, all prepayments of Loans shall be applied to reduce the remaining payments required under Section 2.1.1(d) in inverse order of maturity. Borrower may not re-borrow the principal amount of any Loan which is prepaid.

(b) Optional Prepayments.

(i) On or before the third anniversary of the Closing Date, Borrower may not prepay all or any part of the outstanding Loans.

(ii) After the third anniversary of the Closing Date, Borrower may prepay all or any part of the outstanding Loans, at any time, on giving at least 30-Banking Days' notice to Administrative Agent, provided that, (A) each such prepayment equals or exceeds \$1,000,000 or integral multiples of \$100,000 in excess thereof and, (B) each such prepayment shall be made at a prepayment premium (the "Make-Whole Premium") equal to (I) after the third anniversary of the Closing Date and on or prior to the fourth anniversary of the Closing Date, 103% of the amount of such outstanding Loans, (II) after the fourth anniversary of the Closing

Date and on or prior to the fifth anniversary of the Closing Date, 102.5% of the amount of such outstanding Loans, (III) after the fifth anniversary of the Closing Date and on or prior to the sixth anniversary of the Closing Date, 102% of the amount of such outstanding Loans, (IV) after the sixth anniversary of the Closing Date and on or prior to the seventh anniversary of the Closing Date, 101.5% of the amount of such outstanding Loans, (V) after the seventh anniversary of the Closing Date and on or prior to the eighth anniversary of the Closing Date, 101% of the amount of such outstanding Loans, (VI) after the eighth anniversary of the Closing Date and on or prior to the ninth anniversary of the Closing Date, 100.5% of the amount of such outstanding Loans, and (VII) thereafter, 100% of the amount of such outstanding Loans.

(iii) Notwithstanding the foregoing Sections 2.1.6(b)(i) and (ii), if the Banks do not provide the Lease Financing for reasons other than that

Borrower is not in full compliance with the provisions of Section 5 of the Fee Letter, then Borrower may prepay, without premium or penalty, all (but not part) of the outstanding Loans, at any time, on giving at least 30-Banking Days' notice to Administrative Agent (provided that if Borrower shall have delivered the Release Notice pursuant to Section 3.3, the Borrower shall not have any such right to prepay such Loans under this clause (iii)).

(c) Mandatory Prepayments. Borrower shall prepay (or cause to be prepaid) Loans (i) to the extent required by Sections 3.7.4(b) and (c) of the Depositary Agreement, Section 7.2 of this Agreement or any other provision of this Agreement or any other Credit Document which requires such prepayment or (ii) to the extent of (A) 100% of the cash proceeds of the issuance of any new equity securities of Borrower or any of its Subsidiaries (other than any equity securities issued by Borrower pursuant to Section 2.2 of the Sponsor Guaranty), (B) 100% of any debt (other than Permitted Debt) issued by Borrower or any of its Subsidiaries and (C) 100% of proceeds of asset sales of Borrower or any of its Subsidiaries (other than sales permitted by Section 6.3 and exclusive of sales of electrical energy and renewable energy credits in accordance with the terms of the Credit Documents) (any such prepayment pursuant to this Section 2.1.6(c), a "Mandatory Prepayment"). If the Loans are accelerated (whether voluntarily, involuntarily or by operation of law) upon the occurrence or during the continuation of any Event of Default occurring under Section 7.1.1, 7.1.2, 7.1.9 or 7.1.11 or otherwise as a result of a willful breach by Borrower of any of its obligations under Section 5.2, 5.17, 5.18, 6.1, 6.3 or 6.8 that results in an Event of Default, Borrower shall repay all of the outstanding Loans at a price equal to (I) on or before the third anniversary of the Closing Date, 105% of the amount of such outstanding Loans and (II) after the third anniversary of the Closing Date, the applicable Make-Whole Premium.

2.1.7 Register. Administrative Agent shall maintain, at its address referred to in Section 10.1, a register for the recordation of the names and addresses of the Banks and the Commitments and Loans of each Bank from time to time (the "Register"). The Register shall be available for inspection by Borrower or any Bank at any reasonable time and from time to time upon reasonable prior notice. Administrative Agent shall record in the Register (i) the Commitments and the Loans from time to time of each Bank, (ii) the interest rates applicable to all Loans and the effective dates of all changes thereto, (iii) the Interest Period for each LIBOR Loan, (iv) the date and amount of any principal or interest due and payable or to become due and

payable from Borrower to each Bank hereunder, (v) each repayment or prepayment in respect of the principal amount of the Loans of each Bank, (vi) the amount of any sum received by Administrative Agent hereunder for the account of the Banks and each Bank's share thereof, and (vii) such other information as Administrative Agent may determine is necessary or appropriate for the administering of the Loans and this Agreement. Any such recording shall be conclusive and binding in the absence of manifest error; provided that neither the failure to make any such recordation, nor any error in such recordation, shall affect any Bank's Commitment or Borrower's Obligations in respect of any applicable Loans or otherwise; and provided further that in the event of any inconsistency between the Register and any Bank's records, the Register shall govern absent manifest error.

2.2 TOTAL SENIOR LOAN COMMITMENTS. Notwithstanding anything that may be construed to the contrary in this Agreement, the aggregate principal amount of all Loans made by the Banks shall not exceed \$154,500,000 (such amount, the "Total Senior Loan Commitment").

2.3 FEES. Borrower shall pay to Administrative Agent solely for Administrative Agent's account the fees and other amounts described in the Fee Letter.

2.4 OTHER PAYMENT TERMS.

2.4.1 Place and Manner. Except as otherwise expressly provided in the Fee Letter or any other provision contained in any of the Credit Documents, Borrower shall make all payments due to any Bank or Administrative Agent hereunder to Administrative Agent, for the account of such Bank or Administrative Agent (as the case may be), to the account in the name of OrCal Geothermal Inc., Account No. 01-20016024, at Federal Home Loan Bank of Dallas, ABA No. 111040195, or such other account as Administrative Agent shall notify Borrower in writing from time to time, in Dollars and in immediately available funds not later than 12:00 noon on the date on which such payment is due. Any payment made after such time on any day shall be deemed received on the Banking Day immediately after the date such payment is received. Administrative Agent shall disburse to each Bank each such payment received by Administrative Agent for such Bank, such disbursement to occur on the day such payment is received if received by 12:00 noon or if otherwise reasonably possible, or otherwise on the next Banking Day.

2.4.2 Date. Whenever any payment due hereunder shall fall due on a day other than a Banking Day, such payment shall be made on the next succeeding Banking Day, and such extension of time shall be included in the computation of interest or fees, as the case may be, without duplication of any interest or fees so paid in the next subsequent calculation of interest or fees payable.

2.4.3 Default Interest. Notwithstanding anything to the contrary herein, upon the occurrence and during the continuation of any Event of Default under Section 7.1.1, the outstanding principal amount of all Loans and, to the extent permitted by applicable Legal Requirements, any accrued but unpaid interest payments thereon and any accrued but unpaid fees and other amounts hereunder, shall thereafter bear interest (including post-petition interest in any proceeding under applicable Bankruptcy Laws) payable upon demand at a rate that is (a) 2% per annum in excess of the interest rate then otherwise payable under this Agreement with respect to the applicable Loans or (b) in the case of any such fees and other amounts, at a rate that is 2% per

annum in excess of the interest rate then otherwise payable under this Agreement for Base Rate Loans (the "Default Rate"); provided that, in the case of LIBOR Loans, upon the expiration of the Interest Period in effect at the time any such increase in interest rate is effective, such LIBOR Loans shall thereupon become Base Rate Loans and shall thereafter bear interest payable upon demand at a rate that is 2% per annum in excess of the interest rate then otherwise payable under this Agreement for Base Rate Loans.

2.4.4 Net of Taxes, Etc.

(a) Taxes. Subject to each Bank's compliance with Section 2.4.6, any and all payments to or for the benefit of Administrative Agent or any Bank by Borrower hereunder or under any other Credit Document shall be made free and clear of and without deduction, setoff or counterclaim of any kind whatsoever and in such amounts as may be necessary in order that all such payments, after deduction for or on account of any present or future taxes, levies, imposts, deductions, charges or withholdings, and all liabilities with respect thereto (excluding income and franchise taxes, which include taxes imposed on or measured by the net income, net profits or capital of Administrative Agent or such Bank by any jurisdiction or any political subdivision or taxing authority thereof or therein as a result of a connection between such Bank and such jurisdiction or political subdivision, unless such connection results solely from such Bank's executing, delivering or performing its obligations or receiving a payment under, or enforcing, this Agreement or any Note) (all such non-excluded taxes, levies, imposts, deductions, charges, withholdings and liabilities being hereinafter referred to as "Taxes"), shall be equal to the amounts otherwise specified to be paid under this Agreement and the other Credit

Documents. If Borrower shall be required by applicable Legal Requirements to withhold or deduct any Taxes from or in respect of any sum payable hereunder or under any other Credit Document to Administrative Agent or any Bank, (i) the sum payable shall be increased as may be necessary so that after making all required deductions (including deductions applicable to additional sums payable under this Section 2.4.4), Administrative Agent or such Bank receives an amount equal to the sum it would have received had no such deductions been made, (ii) Borrower shall make such deductions and (iii) Borrower shall pay the full amount deducted to the relevant taxation authority or other authority in accordance with applicable Legal Requirements. In addition, Borrower agrees to pay any present or future stamp, recording or documentary taxes and any other excise or property taxes, charges or similar levies (not including income or franchise taxes) that arise under the laws of the United States of America, the State of New York or the State of California from any payment made hereunder or under any other Credit Document or from the execution or delivery or otherwise with respect to this Agreement or any other Credit Document (hereinafter referred to as "Other Taxes").

(b) Tax Indemnity. Borrower shall indemnify each Bank for and hold it harmless against the full amount of Taxes and Other Taxes (including any Taxes or Other Taxes imposed by any jurisdiction on amounts payable under this Section 2.4.4) paid by any Bank, or any liability (including penalties, interest and expenses) arising therefrom or with respect thereto, whether or not such Taxes or Other Taxes were correctly or legally asserted; provided that

10

Borrower shall not be obligated to indemnify any Bank for any penalties, interest or expenses relating to Taxes or Other Taxes arising from such Bank's gross negligence or willful misconduct. Each Bank agrees to give written notice to Borrower of the assertion of any claim against such Bank relating to such Taxes or Other Taxes as promptly as is practicable after being notified of such assertion, and in no event later than 90 days after the principal officer of such Bank responsible for administering this Agreement obtains knowledge thereof; provided that any Bank's failure to notify Borrower of such assertion within such 90 day period shall not relieve Borrower of its obligation under this Section 2.4.4 with respect to Taxes or Other Taxes, penalties, interest or expenses arising prior to the end of such period, but shall relieve Borrower of its obligations under this Section 2.4.4 with respect to Taxes or Other Taxes, penalties, interest or expenses between the end of such period and such time as Borrower receives notice from such Bank as provided herein. Payments by Borrower pursuant to this indemnification shall be made within 30 days from the date such Bank makes written demand therefor (submitted through Administrative Agent), which demand shall be accompanied by a certificate describing in reasonable detail the basis thereof.

(c) Notice. Within 30 days after the date of any payment of Taxes by Borrower, Borrower shall furnish to Administrative Agent, at its address referred to in Section 10.1, the original or a certified copy of a receipt evidencing payment thereof or, if such receipt is not obtainable, other evidence of such payment by Borrower reasonably satisfactory to Administrative Agent. Borrower shall compensate each Bank for all reasonable losses and expenses sustained by such Bank as a result of any failure by Borrower to so furnish such copy of such receipt.

(d) Conduit Financing. Notwithstanding anything to the contrary contained in this Section 2.4.4, if a Bank is a conduit entity participating in a conduit financing arrangement (as defined in Section 7701(l) of the Code and the Treasury Regulations issued thereunder) with respect to any payments made by Borrower under this Agreement and under any Credit Document, Borrower shall not be obligated to pay additional amounts to such Bank pursuant to this Section 2.4.4 to the extent that the amount of taxes in the United States exceeds the amount that would have otherwise been payable were such Bank not a conduit entity participating in a conduit financing arrangement.

(e) Reimbursement by Banks. If any Bank receives an indemnification payment pursuant to Section 2.4.4(b) and if such Bank is able, in its sole opinion, to apply or otherwise take advantage of any refund or tax credit arising out of or in conjunction with any Taxes or Other Taxes which give rise to such indemnification, such Bank shall, to the extent that in its sole opinion it can do so without prejudice to the retention of the amount of such refund or credit and without any other adverse tax consequences for such Bank, reimburse to Borrower at such time as such tax refund or credit shall have actually been received or utilized by such Bank such amount as the Bank shall, in its sole opinion, have determined to be attributable to the relevant Taxes or Other Taxes and as will leave such Bank in no better or worse position than it would have been in if the payment of such Taxes or Other Taxes had not been required. Nothing in this Section 2.4.4(e) shall oblige any Bank to disclose to Borrower or any other person any information regarding its tax affairs or tax computations, or shall interfere with Bank's absolute

11

discretion to arrange its tax affairs in whatever manner it thinks fit. In particular, no Bank shall be under any obligation to claim relief from its corporate profits or similar tax liability in credits or deductions available to it and, if it does claim, the extent, order and manner in which it does so shall be at its absolute discretion.

(f) Survival of Obligations. The obligations of Borrower under this Section 2.4.4 shall survive the termination of this Agreement and the repayment of the Obligations.

2.4.5 Application of Payments. Except as otherwise expressly provided herein or in the other Credit Documents, payments made under this Agreement or the other Credit Documents and other amounts received by Administrative Agent, Depositary Agent or the Banks under this Agreement or the other Credit Documents shall first be applied to any fees, costs, charges or expenses payable to Administrative Agent, Depositary Agent or the Banks, next to any accrued but unpaid interest then due and owing, and then to outstanding principal then due and owing or otherwise to be prepaid, in each case hereunder or under the other Credit Documents (in each case, such application to be made on a pro rata basis among such applicable Persons).

2.4.6 Withholding Exemption Certificates. Each Bank upon becoming a Bank and each Person to which any Bank grants a participation (or otherwise transfers its interest in this Agreement) upon the granting of such participation (or the occurrence of such other transfer) will deliver to Administrative Agent and Borrower either (a) if such Bank or Person is a corporation established under the laws of the United States or any political subdivision thereof, an executed copy of a United States Internal Revenue Service Form W-9, or (b) if such Bank or Person is not a corporation established under the laws of the United States or any political subdivision thereof, a duly completed and executed non-bank certificate in the form of Exhibit J hereto, if applicable, and two duly completed copies of United States Internal Revenue Service Form W-8BEN or W-8ECI or successor applicable form, as the case may be (certifying therein an entitlement to a reduction in, or an exemption from, United States withholding taxes). Each Bank or Person which delivers to Borrower and Administrative Agent a Form W-8BEN or W-8ECI pursuant to the preceding sentence shall deliver to Borrower and Administrative Agent two copies of each Form W-8BEN or W-8ECI, or successor applicable forms, or other manner of certification or procedure, as the case may be, on or before the date that any such form expires or becomes obsolete or after the occurrence of any event requiring a change in the most recent forms previously delivered by it to Borrower, and such extensions or renewals thereof as may reasonably be requested by Borrower, certifying in the case of a Form W-8BEN or W-8ECI that such Bank is entitled to receive payments under this Agreement without deduction or withholding (or at a reduced rate of withholding under any applicable tax

treaty) of any United States federal income taxes, unless in any such cases an event (including any change in treaty, law or regulation) has occurred prior to the date on which any such delivery would otherwise be required which renders all such forms inapplicable or which would prevent a Bank from duly completing and delivering any such form with respect to it and such Bank advises Borrower that it is not capable of receiving payments without any deduction or withholding (or at a reduced rate of withholding) of United States federal income tax, and in the case of Form W-8BEN or W-

12

8ECI, establishing an exemption from United States backup withholding tax. Borrower shall not be obligated, however, to pay any additional amounts in respect of United States federal income tax pursuant to Section 2.4.4 (or make an indemnification payment pursuant to Section 2.4.4) to any Bank (including any entity to which any Bank sells, assigns, grants a participation in, or otherwise transfers its rights under this Agreement, any Note or any other Credit Document) if the obligation to pay such additional amounts (or such indemnification) would not have arisen but for a failure of such Bank to comply with its obligations under this Section 2.4.6.

2.5 PRO RATA TREATMENT.

2.5.1 Borrowings, Etc. Except as otherwise provided herein, (a) each Borrowing consisting of Loans shall be made or allocated among the Banks pro rata according to their respective Proportionate Shares of such Loans and (b) each payment of principal of and interest on Loans shall be made or shared among the Banks holding such Loans pro rata according to the respective unpaid principal amounts of such Loans held by such Banks.

2.5.2 Sharing of Payments, Etc. If any Bank shall obtain any payment (whether voluntary, involuntary, through the exercise of any right of setoff, or otherwise) on account of Loans owed to it, in excess of its Proportionate Share of payments on account of such Loans obtained by all Banks entitled to such payments, such Bank shall forthwith purchase from the other Banks such participation in the Loans, as the case may be, as shall be necessary to cause such purchasing Bank to share the excess payment ratably with each of them; provided, however, that if all or any portion of such excess payment is thereafter recovered from such purchasing Bank, such purchase from such Bank shall be rescinded and each other Bank shall repay to the purchasing Bank the purchase price to the extent of such recovery together with an amount equal to such other Bank's Proportionate Share (according to the proportion of (a) the amount of such other Bank's required repayment to (b) the total amount so recovered from the purchasing Bank) of any interest or other amount paid or payable by the purchasing Bank in respect of the total amount so recovered. Borrower agrees that any Bank so purchasing a participation from another Bank pursuant to this Section 2.5.2 may, to the fullest extent permitted by law, exercise all its rights of payment (including the right of setoff) with respect to such participation as fully as if such Bank were the direct creditor of Borrower in the amount of such participation.

2.6 CHANGE OF CIRCUMSTANCES.

2.6.1 Inability to Determine Rates. If, on or before the first day of any Interest Period for any LIBOR Loans, (a) Administrative Agent determines that the Adjusted LIBO Rate for such Interest Period cannot be adequately and reasonably determined due to the unavailability of funds in or other circumstances affecting the London interbank market, or (b) Banks holding aggregate Proportionate Shares of 33-1/3% or more of the Loans shall advise Administrative Agent that (i) the rates of interest for such LIBOR Loans do not adequately and fairly reflect the cost to such Banks of making or maintaining such Loans or (ii) deposits in Dollars in the London interbank market are not available to such Banks (as conclusively certified by each such Bank in good faith in writing to Administrative Agent and to Borrower) in the ordinary course

of business in sufficient amounts to make and/or maintain their LIBOR Loans, then Administrative Agent shall immediately give notice of such condition to Borrower. After

13

the giving of any such notice and until Administrative Agent shall otherwise notify Borrower that the circumstances giving rise to such condition no longer exist (which Administrative Agent shall deliver to Borrower promptly, and in any event within 2 Banking Days, after the cessation of such circumstances), Borrower's right to request from the applicable affected Banks the making of or conversion to, and the applicable affected Banks' obligations to make or convert to, LIBOR Loans shall be suspended; provided, however, that Borrower shall have the right in such event to request the making of or conversion to, and the applicable affected Banks shall be obligated to make or convert to, LIBOR Loans with an Interest Period that is 1, 3, 6 or 9 months (as selected by such Banks) if the circumstances giving rise to the conditions described in this Section 2.6.1 are not applicable to LIBOR Loans with such shorter Interest Period. Any LIBOR Loans outstanding at the commencement of any such suspension shall be converted at the end of the then current Interest Period for such Loans into Base Rate Loans unless such suspension has then ended.

2.6.2 Illegality. If, after the date of this Agreement, the adoption of any Governmental Rule, any change in any Governmental Rule or the application or requirements thereof (whether such change occurs in accordance with the terms of such Governmental Rule as enacted, as a result of amendment, or otherwise), any change in the interpretation or administration of any Governmental Rule by any Governmental Instrumentality, or compliance by any Bank or Borrower with any request or directive (whether or not having the force of law, but if not having the force of law, being of a type with which a Bank customarily complies) of any Governmental Instrumentality (a "Change of Law") shall make it unlawful or impossible for any Bank to make or maintain any LIBOR Loan, then such Bank shall immediately notify Administrative Agent and Borrower of such Change of Law. Upon receipt of such notice, (a) Borrower's right to request the making of or conversion to, and such Bank's obligations to make or convert to, LIBOR Loans shall be suspended for so long as such condition shall exist, and (b) Borrower shall, at the request of such Bank, at Borrower's option either (i) pursuant to Section 2.1.5, convert any then outstanding LIBOR Loans into Base Rate Loans at the end of the current Interest Periods for such Loans, or (ii) immediately repay pursuant to Section 2.1.6 or convert LIBOR Loans of the affected Type into Base Rate Loans if such Bank shall notify Borrower that such Bank may not lawfully continue to fund and maintain such Loans. Any conversion or prepayment of LIBOR Loans made pursuant to the preceding sentence prior to the last day of an Interest Period for such Loans shall be deemed a prepayment thereof for purposes of Section 2.7 (but not for purposes of Section 2.1.6(b)).

2.6.3 Increased Costs. If, after the date of this Agreement, any Change of Law:

(a) shall subject any Bank to any tax, duty or other charge with respect to any LIBOR Loan or Commitment in respect thereof, or shall change the basis of taxation of payments by Borrower to any Bank on such a Loan or with respect to any such Commitment (except for Taxes, Other Taxes or changes in the rate of taxation on the overall net income of any Bank); or

(b) shall impose, modify or hold applicable any reserve, special deposit or similar requirement (without duplication of any reserve requirement included within the applicable Interest Rate through the definition of "Reserve Requirement") against assets held by,

14

deposits or other liabilities in or for the account of, advances or loans by, or any other acquisition of funds by any Bank for any LIBOR Loan; or

(c) shall impose on any Bank any other condition directly related to any LIBOR Loan or Commitment in respect thereof;

and the effect of any of the foregoing is to increase the cost to such Bank of making, issuing, creating, renewing, participating in (subject to the limitations in Section 9.13) or maintaining any such LIBOR Loan or Commitment in respect thereof or to reduce any amount receivable by such Bank hereunder, then Borrower shall from time to time, within thirty days after demand by such Bank, pay to such Bank additional amounts sufficient to reimburse such Bank for such increased costs or to compensate such Bank for such reduced amounts. A certificate setting forth in reasonable detail the amount of such increased costs or reduced amounts and the basis for determination of such amount, submitted by such Bank to Borrower, shall, in the absence of manifest error, be conclusive and binding on Borrower for purposes of this Agreement.

2.6.4 Capital Requirements. If any Bank determines that (a) any Change of Law after the date of this Agreement increases the amount of capital required or expected to be maintained by such Bank, or the Lending Office of such Bank or any Person controlling such Bank (a "Capital Adequacy Requirement"), and (b) the amount of capital maintained by such Bank or such Person which is attributable to or based upon the Loans, the Commitments or this Agreement must be increased as a result of such Capital Adequacy Requirement (taking into account such Bank's or such Person's policies with respect to capital adequacy), then Borrower shall pay to such Bank or such Person, within thirty days after delivery of demand by such Bank or such Person, such amounts as such Bank or such Person shall reasonably determine are necessary to compensate such Bank or such Person for the increased costs to such Bank or such Person of such increased capital. A certificate of such Bank or such Person, setting forth in reasonable detail the computation of any such increased costs, delivered to Borrower by such Bank or such Person shall, in the absence of manifest error, be conclusive and binding on Borrower for purposes of this Agreement.

2.6.5 Notice; Participating Banks' Rights. Each Bank shall notify Borrower of any event occurring after the date of this Agreement that will entitle such Bank to compensation pursuant to this Section 2.6, as promptly as practicable, and in no event later than 90 days after the principal officer of such Bank responsible for administering this Agreement obtains knowledge thereof; provided that any Bank's failure to notify Borrower within such 90 day period shall not relieve Borrower of its obligation under this Section 2.6 with respect to claims arising prior to the end of such period, but shall relieve Borrower of its obligations under this Section 2.6 with respect to the time between the end of such period and such time as Borrower receives notice from the indemnitee as provided herein. No Person purchasing from a Bank a participation in any Loan (as opposed to an assignment) shall be entitled to any payment from or on behalf of Borrower pursuant to Section 2.4.4, Section 2.6.3 or Section 2.6.4 which would be in excess of the applicable proportionate amount (based on the portion of the Loan in which such Person is participating) which would then be payable to such Bank if such Bank had not sold a participation in that portion of the Loan.

2.7 FUNDING LOSSES. If Borrower shall (a) repay or prepay any LIBOR Loans on any day other than the last day of an Interest Period for such Loans (whether an optional prepayment or a Mandatory Prepayment), (b) fail to borrow any LIBOR Loans in accordance with a Notice of Borrowing delivered to Administrative Agent (whether as a result of the failure to satisfy any applicable conditions or otherwise) after such Notice of Loan Borrowing has become irrevocable, (c) fail to convert any Loans into LIBOR Loans in accordance with a Notice of Conversion of Loan Type delivered to Administrative Agent

(whether as a result of the failure to satisfy any applicable conditions or otherwise) after such Notice of Conversion of Loan Type has become irrevocable, (d) fail to continue a LIBOR Loan in accordance with a Confirmation of Interest Period Selection delivered to Administrative Agent, or (e) fail to make any prepayment in accordance with any notice of prepayment delivered to Administrative Agent, then Borrower shall, within ten Banking Days after demand by any Bank, reimburse such Bank for all reasonable costs and losses incurred by such Bank as a result of such repayment, prepayment or failure ("Liquidation Costs"). Borrower understands that such costs and losses may include losses incurred by a Bank as a result of funding and other contracts entered into by such Bank to fund LIBOR Loans (other than non-receipt of the margin applicable to such LIBOR Loans). Each Bank demanding payment under this Section 2.7 shall deliver to Borrower a certificate setting forth in reasonable detail the basis for and the amount of costs and losses for which demand is made. Such a certificate so delivered to Borrower shall, in the absence of manifest error, be conclusive and binding as to the amount of such loss for purposes of this Agreement.

2.8 ALTERNATE OFFICE.

2.8.1 To the extent reasonably possible, each Bank shall designate an alternative Lending Office with respect to its LIBOR Loans and otherwise take any reasonable actions to reduce any liability of Borrower to any Bank under Section 2.4.4, 2.6.3, 2.6.4 or 2.7, or to avoid the unavailability of any Type of Loans under Section 2.6.1 or 2.6.2 so long as (in the case of the designation of an alternative Lending Office) such Bank, in its sole discretion, determines that (a) such designation is not disadvantageous to such Bank and (b) such actions would eliminate or reduce liability to such Bank. Borrower hereby agrees to pay all reasonable costs and expenses incurred by any Bank in connection with any such designation or actions within ten Banking Days of demand thereof to Borrower.

2.8.2 Upon written notice to Administrative Agent, any Bank may designate a Lending Office other than the Lending Office most recently designated to Administrative Agent and may assign all of its interests under the Credit Documents and its Notes (if any) to such Lending Office; provided that such designation and assignment do not at the time of such designation and assignment increase the reasonably foreseeable liability of Borrower under Section 2.4.4, 2.6.3 or 2.6.4 or make an Interest Rate option unavailable pursuant to Section 2.6.1 or 2.6.2.

2.9 REPLACEMENT OF BANK IN RESPECT OF INCREASED COSTS.

2.9.1 Within fifteen days after receipt by Borrower of (a) written notice and demand from any Bank (an "Affected Bank") for payment of additional amounts or increased costs as provided in Section 2.4.4, 2.6.3 or 2.6.4, (b) notice that such Bank is suspending its

obligation to make or convert to LIBOR Loans with an Interest Period of twelve months as provided in Section 2.6.1, or (c) notice that it is unlawful for such Bank to make LIBOR Loans as provided in Section 2.6.2, Borrower may, at its option, notify Administrative Agent and such Affected Bank of its intention to replace the Affected Bank. So long as no Event of Default shall have occurred and be continuing, Borrower may obtain, at Borrower's expense, one or more replacement Banks (each, a "Replacement Bank") for the Affected Bank, which Replacement Banks shall be reasonably satisfactory to Administrative Agent. If Borrower obtains a Replacement Bank within 90 days following notice of its intention to do so, the Affected Bank must sell and assign its Loans to such Replacement Banks for an aggregate amount equal to the principal balance of all Loans held by the Affected Bank and all accrued interest and fees with respect thereto through the date of such sale; provided, however, that Borrower shall have reimbursed such Affected Bank for the additional amounts, increased costs,

and any other amounts that it is entitled to receive under this Agreement through the date of such sale and assignment.

2.9.2 Notwithstanding the foregoing, Borrower shall not have the right to obtain a Replacement Bank if the Affected Bank rescinds its demand for increased costs or additional amounts within fifteen days following its receipt of Borrower's notice of intention to replace such Affected Bank. If Borrower gives a notice of intention to replace and does not so replace such Affected Bank within 90 days thereafter, Borrower's rights relating to any previously incurred increased costs or additional amounts under this Section 2.9 shall terminate and Borrower shall promptly pay all increased costs or additional amounts previously demanded by such Affected Bank pursuant to Sections 2.4.4, 2.6.1, 2.6.3 or 2.6.4.

ARTICLE 3 CONDITIONS PRECEDENT

3.1 CONDITIONS PRECEDENT TO THE CLOSING DATE. The obligation of each Bank to make the Loans under this Agreement is subject to the prior satisfaction of each of the following conditions (unless waived in writing by Administrative Agent with the consent of the Banks) on or before December 31, 2003 (the date such conditions precedent are so satisfied or waived being referred to as the "Closing Date"):

3.1.1 Resolutions. Delivery to Administrative Agent of a copy of one or more resolutions or other authorizations, in form and substance reasonably satisfactory to Administrative Agent, of Ormat Technologies, Sponsor, Borrower, OrHeber 1, ORNI and OrMammoth certified by a Responsible Officer of each such Loan Party as being in full force and effect on the Closing Date, authorizing, as applicable and among other things, the Loans, the granting of the Liens under the Collateral Documents, the contribution (in the case of Sponsor) of Equity Funds and/or Subordinated Loans to Borrower, and the execution, delivery and performance (in the case of OrHeber 1 and OrMammoth) of the Acquisition Agreement and (in the case of all such Loan Parties) the relevant Credit Documents to which each such Loan Party is a party.

3.1.2 Incumbency. Delivery to Administrative Agent of a certificate from Sponsor, Borrower, OrHeber 1, ORNI and OrMammoth signed by the appropriate authorized

17

officer of such Loan Party and dated as of the Closing Date, as to the incumbency of the natural Persons authorized to execute and deliver the Credit Documents to which such Loan Party is a party.

3.1.3 Formation Documents. Delivery to Administrative Agent of (a) copies of the certificate of incorporation of Sponsor, Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI and OrMammoth, certified by the Secretary of State of Delaware, and (b) copies of the bylaws of each such Loan Party, certified by an officer of such Loan Party as being true, correct and complete on the Closing Date.

3.1.4 Good Standing Certificates. Delivery to Administrative Agent of certificates issued by (a) the Secretary of State of Delaware, for each of Ormat Technologies, Sponsor, Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI and OrMammoth, and (b) the Secretary of the State of California, for Borrower, in each case (i) dated no more than ten days prior to the Closing Date and (ii) certifying that the applicable party is in good standing and is qualified to do business in, and has paid all franchise taxes or similar taxes due to, such states.

3.1.5 Third Party and Bankruptcy Court Approvals. Administrative Agent shall have received copies of any approval or consents required from (a) any

Person under Section 7 of the Acquisition Agreement and (b) GECC in connection with the acquisition by Borrower, OrHeber 1, ORNI, OrHeber 2 and OrHeber 3 of their respective ownership interests in SIGC, HGC and HFC as such ownership interests are set forth in Section 4.2.2, rather than as set forth in the Acquisition Agreement, the Confirmation Plan or the Seller Plan of Reorganization. The Bankruptcy Court shall have entered the Confirmation Order, the Confirmation Order shall not have been amended, modified, vacated or stayed in any manner and shall have become final and non-appealable. All of the conditions precedent to the occurrence of the effective date under the Seller Plan of Reorganization shall have occurred (provided that no condition to the occurrence of such effective date shall have been waived without the consent of the Banks), other than any condition related to the consummation of the Acquisition.

3.1.6 Credit Documents. Delivery to Administrative Agent of executed originals of this Agreement, the Notes, the Depositary Agreement, the Security Agreements referred to in clauses (a), (d) and (e) of the definition thereof, the Pledge Agreements referred to in clauses (a), (b) (c) and (e) of the definition thereof, the Escrow Agreement, the Fee Letter, the Subordination Agreements, the Sponsor Guaranty, the Subsidiary Guaranties referred to in clauses (c) and (d) of the definition thereof and the Ormat Industries Letter, all of which shall have been duly authorized, executed and delivered by the parties thereto.

3.1.7 Certificates of Sponsor and Borrower. Delivery to Administrative Agent of (a) a certificate, dated as of the Closing Date, duly executed by a Responsible Officer of Borrower, in substantially the form of Exhibit F-1, which certificate shall state that (i) all conditions precedent to the occurrence of the Closing Date shall have been satisfied, (ii) all conditions (other than the payment of the purchase price) to the consummation of the Acquisition in accordance with the terms and provisions of the Acquisition Agreement have been satisfied without waiver or amendment (unless agreed to by the Banks), (iii) Borrower has complied with all of the terms and provisions of, and representations and warranties contained in, the

Commitment Letter, (iv) immediately prior to and after the Closing Date and the consummation of the Acquisition, Borrower, OrHeber 1 and OrMammoth is and will be Solvent, and (v) the Projections, the Initial Operating Budget and the Initial Capital Expenditures Budget were prepared in good faith based on reasonable assumptions and (b) a certificate, dated as of the Closing Date, duly executed by a Responsible Officer of Sponsor, in substantially the form of Exhibit F-2, which certificate shall state that all of the representations and warranties set forth in the Sponsor Guaranty are true and correct.

3.1.8 Legal Opinions. Delivery to Administrative Agent of opinions of counsel to Ormat Technologies, Sponsor, Borrower, OrHeber 1, ORNI and OrMammoth, in each case in form and substance reasonably satisfactory to the Banks.

3.1.9 Insurance. Insurance complying with terms and conditions set forth in Exhibit K shall be in full force and effect and Administrative Agent shall have received (a) a certificate from Borrower's insurance broker(s), dated as of a date which is no earlier than three days prior to the Closing Date, (i) identifying underwriters, type of insurance, insurance limits and policy terms, in each case substantially in the manner typically described in certificates of this nature, (ii) describing the insurance obtained and (iii) stating that such insurance is in full force and effect and that all premiums then due thereon have been paid and that, in the opinion of such broker(s), such insurance complies with the terms and conditions set forth in the Credit Documents, and (b) certified copies of all policies evidencing such insurance (or a binder, commitment or certificates signed by the insurer or a broker authorized to bind the insurer), each in form and substance reasonably satisfactory to Administrative Agent.

3.1.10 Conditions under Acquisition Agreement. The transactions described in the Acquisition Agreement (other than the payment of the purchase price) which are to occur on or prior to the Closing Date shall have been consummated without amendment or waiver (that have not been agreed to by the Banks) in accordance with the terms and provisions of the Acquisition Agreement.

3.1.11 Funding of Equity; Funds Flow. Sponsor shall have contributed \$27,425,603.92 in Equity Funds and/or Subordinated Loans to Borrower, and Sponsor and Borrower shall have caused such contributions to be deposited in the Funding Account. Administrative Agent, Sponsor and Borrower shall have entered into the Funds Flow Memorandum, which shall provide, among other things, that Administrative Agent will disburse all amounts on deposit in the Funding Account (including such Equity Funds and/or Subordinated Loans and the Loan proceeds), other than agreed-upon amounts reserved for the payment of certain fees and expenses and working capital purposes, to the Sellers under the Acquisition Agreement upon (a) the satisfaction of each of the conditions precedent set forth in this Article 3 and (b) the consent of the Banks and Borrower.

3.1.12 Permits. Each of the material discretionary Permits necessary for the performance of Borrower's, OrHeber 1's, OrHeber 2's, OrHeber 3's, ORNI's and OrMammoth's obligations under the Acquisition Agreement and the Credit Documents as of the Closing Date (a) shall have been duly obtained, except for such renewals, transfers, reissuance, or modifications of existing permits that can reasonably be obtained in the normal course, (b) shall

19

be in full force and effect, (c) shall not be subject to any current legal proceeding, and (d) shall not be subject to any Unsatisfied Condition that could reasonably be expected to result in material modification or revocation of such Permit, and all applicable appeal periods with respect to such Permit shall have expired. Each such Permit shall not be subject to any restriction, condition, limitation or other provision which could reasonably be expected to have a Material Adverse Effect or result in any of the Projects being operated in a manner substantially inconsistent with the assumptions underlying the Projections.

3.1.13 Absence of Litigation. No action, suit, proceeding or investigation shall have been instituted or threatened in writing against any Loan Party (other than those described in Schedule 4.18 to the Acquisition Agreement and actions, suits, proceedings or investigations against Ormat Technologies) that (a) contests the Acquisition or any of the transactions under the Credit Documents or (b) could reasonably be expected to have a Material Adverse Effect. No action, suit, proceeding or investigation shall have been instituted or threatened in writing against any other Major Project Participant that could reasonably be expected to have a Material Adverse Effect.

3.1.14 Payment of Fees. All taxes, fees and other costs payable in connection with the execution, delivery, recordation and filing of the Credit Documents shall have been paid in full or, as approved by Administrative Agent, provided for. Administrative Agent shall have deducted out of the proceeds of the Loans all outstanding amounts due, as of the Closing Date, and owing to (a) the Banks or Administrative Agent under any fee letter or other agreement or pursuant to Section 2.3, (b) the Banks' attorneys and consultants and the Title Insurer for all services rendered and billed prior to the Closing Date and (c) the Depositary Agent under the Depositary Agreement.

3.1.15 UCC Reports. Delivery to Administrative Agent of a UCC report of a date no less recent than five Banking Days before the Closing Date for each of the jurisdictions in which the UCC-1 financing statements and the fixture filings are intended to be filed in respect of the Collateral, showing that upon due filing or recordation (assuming such filing or recordation occurred on the date of such respective reports), as the case may be, and after giving effect to

the Acquisition, the Liens created under the Collateral Documents will be prior to all other Liens on the Collateral (except for the GECC Liens, the mechanics' liens referred to in item No. 7 to Schedule 4.10 of the Acquisition Agreement and any Liens on the Uninsured Real Property Interests or the real property that is subject thereto) which are perfected by filing or recording.

3.1.16 No Material Adverse Change. Since November 14, 2003, no Material Adverse Effect (under and as defined in the Acquisition Agreement) has occurred and is continuing.

3.1.17 Perfection of Liens. All actions necessary or desirable to perfect the Liens of the Collateral Documents to which Sponsor, Borrower, OrHeber 1, ORNI and OrMammoth are a party as of the Closing Date shall have been taken (including (a) the delivery of certificated securities of Borrower, OrHeber 1 and OrMammoth, together with executed,

20

undated transfer documents and (b) the filing of UCC-1 financing statements naming the applicable Loan Party as the debtor and Administrative Agent as the secured party).

3.1.18 Establishment of Accounts. The Operating Accounts and the Accounts required to be established as of the Closing Date under the Depositary Agreement shall have been established to the satisfaction of the Banks.

3.1.19 Representations and Warranties. Each representation and warranty of Sponsor, Borrower, OrHeber 1, ORNI and OrMammoth under the Credit Documents shall be true and correct as of the Closing Date.

3.1.20 No Default. No Event of Default or Potential Event of Default shall have occurred and be continuing as of the Closing Date, or will result from the Acquisition and the consummation of the transactions contemplated by Section 3.2.

3.1.21 BLM Notice. Delivery to Administrative Agent of a copy of one or more notices from Borrower to the United States Bureau of Land Management and any other applicable Persons with respect to the change in ownership of the Project Companies and Borrower's intention to replace certain bonds described in Schedule 4.10 to the Acquisition Agreement.

3.1.22 Notice of Borrowing. Delivery to Administrative Agent of a properly completed Notice of Borrowing.

3.1.23 Process Agents. Delivery to Administrative Agent of evidence that each of Sponsor, Borrower, OrHeber 1, ORNI and OrMammoth has appointed CT Corporation System as its respective agent for service of process in the State of New York.

3.1.24 Escrow. Execution and delivery to Administrative Agent of an Escrow Agreement (the "Escrow Agreement"), in substantially the form of Exhibit C-4, among Sponsor, Borrower, Administrative Agent and Chicago Title Company.

3.2 TRANSACTIONS TO OCCUR AT CLOSING. No later than 5:00 p.m. (New York City time) on the Closing Date, Borrower shall cause each of the following to occur (the satisfaction of each of the following being referred to as the "Close of Escrow"):

3.2.1 Acquisition. Consummation of the Acquisition in accordance with the terms of (and without any waivers or amendments unless agreed to by the Banks to) the Acquisition Agreement.

3.2.2 Resolutions. Delivery to Administrative Agent of a copy of one or more resolutions or other authorizations of each Loan Party (other than Ormat

Technologies, Sponsor, Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI, OrMammoth, Mammoth Lakes and SIGC) certified by an officer of each such Loan Party as being in full force and effect on the Closing Date, authorizing, as applicable and among other things, the granting of the Liens under the

Collateral Documents and the execution, delivery and performance of the Credit Documents to which such Loan Party is a party.

3.2.3 Incumbency. Delivery to Administrative Agent of a certificate from each Loan Party (other than Ormat Technologies, Sponsor, Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI, OrMammoth, Mammoth Lakes and SIGC) signed by the appropriate authorized officer of each such Loan Party and dated as of the Closing Date, as to the incumbency of the natural Persons authorized to execute and deliver the Credit Documents to which such Loan Party is a party.

3.2.4 Formation Documents. Delivery to Administrative Agent of the Governing Documents of each Loan Party (other than Ormat Technologies, Sponsor, Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI and OrMammoth), certified by an officer of such Loan Party as being true, correct and complete on the Closing Date.

3.2.5 Good Standing Certificates. Delivery to Administrative Agent of certificates issued by the secretary of state of the state in which each Loan Party (other than Ormat Technologies, Sponsor, Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI and OrMammoth) is formed or incorporated, as applicable, (a) dated no more than ten days prior to the Closing Date and (b) certifying that such Loan Party is in good standing and is qualified to do business in, and has paid all franchise taxes or similar taxes due to, such states.

3.2.6 Credit Documents and Major Project Documents. Delivery to Administrative Agent of (a) executed originals of each Credit Document to be executed by any Loan Party on the Closing Date, other than (i) those Credit Documents delivered under Section 3.1.6 above and (ii) Consents, and (b) a certified list of, and true, correct and complete copies of, each Major Project Document in effect as of the Closing Date, and, in each case, all of which shall have been duly authorized, executed and delivered by the parties thereto.

3.2.7 Certificate of Officer. Delivery to Administrative Agent of a certificate, dated as of the Closing Date and in substantially the form of Exhibit F-3, duly executed by a Responsible Officer of each Loan Party (other than Ormat Technologies, Sponsor, Mammoth Lakes, OrHeber 2, OrHeber 3, ORNI and SIGC) which certificate shall, among other things, state that (a) neither such Loan Party nor, to such Loan Party's knowledge, any other party to any Major Project Document is or, but for the passage of time or giving of notice or both will be, in breach of any material obligation thereunder, (b) all conditions precedent to the performance of such Loan Party, and, to such Loan Party's knowledge, all conditions precedent to the performance of the other parties under the Major Project Documents then required to have been performed shall have been satisfied, (c) immediately prior to and at the Close of Escrow, each of the Guarantors is Solvent and (d) all conditions precedent set forth in this Section shall have been satisfied.

3.2.8 Legal Opinions. Delivery to Administrative Agent of opinions of counsel to the Loan Parties and Affiliates thereof (if any) (other than Ormat Technologies, Sponsor and Borrower) which are parties to any Major Project Document, in each case in form and substance reasonably satisfactory to the Banks.

3.2.9 Utilities. All potable water, sewer, telephone, electric and all other utility services necessary for the leasing, ownership and operation of the Projects shall have been contracted for.

3.2.10 Permits. Each of the material discretionary Permits necessary for the performance of the applicable Loan Party's (other than Ormat Technologies') or the applicable Major Project Participant's obligations under the Credit Documents or the Major Project Documents as of the Closing Date (a) shall have been duly obtained, except for such renewals, transfers, reissuance, or modifications of existing permits that can reasonably be obtained in the normal course, (b) shall be in full force and effect, (c) shall not be subject to any current legal proceeding, and (d) shall not be subject to any Unsatisfied Condition that could reasonably be expected to result in material modification or revocation of such Permit, and all applicable appeal periods with respect to such Permit shall have expired. Each such Permit shall not be subject to any restriction, condition, limitation or other provision which could reasonably be expected to have a Material Adverse Effect or result in any of the Projects being operated in a manner substantially inconsistent with the assumptions underlying the Projections.

3.2.11 Perfection of Liens. All actions necessary or desirable to perfect the Liens of the Collateral Documents to which OrHeber 1, OrMammoth, HFC and HGC are a party as of the Closing Date shall have been taken (including the filing of UCC-1 financing statements naming HFC and HGC (as the case may be) as the debtor and Administrative Agent as the secured party).

3.2.12 ALTA Title Policy.

(a) Subject to clause (c) of this Section 3.2.12, delivery to Administrative Agent of a lender's ALTA extended coverage policy of title insurance, together with such endorsements thereto as are reasonably required by the Banks (which shall include, but not be limited to, a tie-in endorsement for all such policies), or the commitment of Title Insurer to issue such a policy, dated as of the Closing Date, in the amount of \$125,000,000, issued by Title Insurer in form and substance substantially similar to the owner's ALTA policy of title insurance provided to Borrower under the Acquisition Agreement, insuring (or agreeing to insure) that:

(i) each of HFC and HGC has a good, marketable and insurable leasehold, easement and/or fee interest in the material real property interests comprising the applicable Project, in each case free and clear of Liens, encumbrances or other exceptions to title, other than the Title Exceptions; and

(ii) each Deed of Trust creates (or will create when recorded) a valid first-priority Lien on HFC's or HGC's (as the case may be) interest in the applicable Mortgaged Property, free and clear of all Liens, encumbrances and exceptions to title whatsoever, other than the Title Exceptions.

(b) The Banks shall have determined that each title policy or title commitment referred to in clause (a) above shall be in all material respects the same as the title policies referred to in Schedule 7.9 to the Acquisition Agreement; provided, however, that any additional

exceptions to title contained in such Bank's policy or commitment shall be permitted only if they do not violate the Real Property Standard.

(c) The ALTA policy of title insurance set forth in Section 3.2.12(a) shall (i) not provide coverage to Administrative Agent for any real property interests located in Mono County, California, (ii) not contain an exception for mechanics' or materialmen's liens, except for (A) the mechanic's liens described in item No. 7 to Schedule 4.10 of the Acquisition Agreement, (B) any other mechanics' and materialmen's liens that do not violate the Real Property

Standard and (C) the mechanics' and materialmen's lien exceptions and exclusions set forth in the policy jacket and (iii) be permitted to contain one or more exceptions for matters that would be shown by an ALTA survey.

3.2.13 Real Estate Rights. Each Project Company shall have obtained and shall hold all leasehold or other possessory rights in real estate, together with necessary real property Permits and access rights necessary for (a) performance in full of each such Project Company's obligations under the Credit Documents and Major Project Documents to which such Project Company is a party, and (b) the leasing, ownership and operation of the Projects in accordance with the Projections; in each case except to the extent that any such missing leases, possessory rights, real property Permits or access rights do not violate the Real Property Standard.

3.2.14 Request for Notice. Requests for Notice shall have been recorded in favor of Administrative Agent with respect to any Major Project Documents that are subject to recorded underlying Liens.

3.2.15 Regulatory Status. (a) Each Project is, and has been since it commenced commercial operation, (i) a QF, and (ii) exempt from all provisions of the FPA except Sections 1-18, 202(c), 210-214, 305(c) and such provisions of Part III of the FPA as may be necessary for FERC actions to enforce the foregoing; and (b) each Project's FERC Form 556 most recently filed with FERC contains current and accurate ownership and operating characteristics of the Project.

3.2.16 Representations and Warranties. Each representation and warranty of each Loan Party under the Credit Documents shall be true and correct.

3.2.17 No Default. No Event of Default or Potential Event of Default shall have occurred and be continuing, or will result from the Acquisition and the consummation of the transactions contemplated by this Section 3.2.

3.2.18 Process Agents. Delivery to Administrative Agent of evidence that each Loan Party (other than Ormat Technologies, Sponsor, Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI, OrMammoth, SIGC and Mammoth Lakes) has appointed CT Corporation System as its respective agent for service of process in the State of New York in respect of each Credit Document to which such Person is a party which is governed by the laws of the State of New York.

24

3.2.19 Close of Escrow. Concurrently with the payment of the purchase price with respect to the condition precedent set forth in Section 3.2.1, the termination of the escrow under the Escrow Agreement shall occur and all documents and closing deliverables contained in such escrow shall be released from such escrow.

3.3 MAMMOTH COLLATERAL RELEASE

3.3.1 Upon the written request of Borrower, Administrative Agent, on the behalf of Secured Parties, (a) shall return to Borrower all Pledged Equity Interests (as defined in the Pledge Agreements described in clause (c) of the definition thereof) of OrMammoth free and clear of the Liens imposed by the applicable Pledge Agreements, (b) shall execute and deliver to Borrower and OrMammoth such documents and instruments (including UCC-3 termination statements), in each case as may be reasonably necessary to release the Liens granted to Administrative Agent, for the benefit of Secured Parties, in respect of the Collateral directly relating to OrMammoth and the Mammoth Project, and (c) shall execute and deliver to Borrower and OrMammoth such documents and instruments as may be reasonably necessary to release OrMammoth from its obligations under the applicable Subsidiary Guaranty, the Depositary Agreement and the other Credit Documents to which such Loan Party is a party, provided that either the Mammoth Prepayment Conditions or the GE Buyout Conditions are

satisfied (the satisfaction of either the Mammoth Prepayment Conditions or the GE Buyout Conditions and the related release of Collateral described in this Section 3.3.1 being referred to as the "Mammoth Collateral Release").

3.3.2 Upon the satisfaction of the Mammoth Prepayment Conditions, then (a) Administrative Agent shall undertake each of the actions specified in Section 3.3.1, and (b) the amounts on deposit in the Funding Account shall be held in the Funding Account until the earlier to occur of (i) the satisfaction of the GE Buyout Conditions and (ii) the date Borrower delivers a notice (the "Release Notice") to Administrative Agent requesting that the funds on deposit in the Funding Account be applied to the prepayment of the Loans pursuant to this Section and Section 2.1.6(a)(i) (other than clauses (C) and (D) thereof) (it being acknowledged and agreed that, from and after the date of the delivery of the Release Notice (the "Release Date"), Beal Bank, S.S.B. shall be released from all of its obligations under the Credit Documents (including the Fee Letter) to provide any financing relating to the Lease Buyout or any other Lease Solution). Subject to Section 3.3.3, if the satisfaction of the GE Buyout Conditions occurs on or before the Release Date, then the amounts on deposit in the Funding Account shall be transferred to Sponsor free and clear of the Liens imposed by the Collateral Documents. Subject to Section 3.3.3, if the satisfaction of the GE Buyout Conditions does not occur on or before the Release Date, then the amounts on deposit in the Funding Account shall be transferred to Administrative Agent and applied to the prepayment of the Loans pursuant to Section 2.1.6(a)(i) (other than clauses (C) and (D) thereof).

3.3.3 Each of the parties hereto acknowledges and agrees that (a) the deposit of amounts into the Funding Account pursuant to Section 3.3.2 and otherwise in connection with the Mammoth Collateral Release shall not constitute a prepayment of Loans until such time (if ever) such amounts are transferred to Administrative Agent and applied to the prepayment of the Loans pursuant to Section 2.1.6(a)(i) (other than clauses (C) and (D) thereof), and (b) all Loans

25

to be prepaid or transferred to Sponsor using amounts from the Funding Account shall continue to accrue interest at the then-applicable interest rate for such Loans until actually prepaid. Without limiting the foregoing, if such amounts are transferred to Sponsor, then (i) the corresponding amount of Loans (i.e., \$28,900,000) shall at all times (including during such times as such amounts are on deposit in the Funding Account) be deemed to be outstanding under the Credit Agreement and (ii) interest on such amounts shall be due and payable in accordance with the provisions of Section 2.1.2.

3.3.4 Each of the parties hereto acknowledges and agrees that, upon the release of OrMammoth from its obligations under the applicable Subsidiary Guaranty, the Depositary Agreement and the other Credit Documents to which such Loan Party is a party and the release of the Collateral directly relating to OrMammoth and the Mammoth Project pursuant to this Section 3.3 and notwithstanding anything to the contrary contained in any of the Credit Documents, (a) OrMammoth shall be deemed not to be a "Loan Party", "Non-Guarantor" or "Guarantor", (b) the Mammoth Project shall be deemed not to be a "Project", (c) each of OrMammoth and Mammoth Lakes shall be deemed to be a "Nonrecourse Person", (d) Mammoth Lakes shall be deemed not to be a "Project Company", (e) "Project Revenues" shall be deemed not to include any income, cash, receipts or proceeds generated by OrMammoth, Mammoth Lakes or the Mammoth Project, (f) each Project Document solely related to the Mammoth Project shall be deemed not to be a "Project Document" or "Major Project Document", (g) each of the Loan Parties shall be released from all of their respective obligations under the Credit Documents with respect to OrMammoth, Mammoth Lakes and the Mammoth Project (including any covenants or defaults directly related to OrMammoth, Mammoth Lakes, the Mammoth Project or the Collateral being released as part of the Mammoth Collateral Release), other than the Loan Parties' (excluding OrMammoth) obligations under Sections 5.24, 7.1.5, 7.1.13 and 10.4 of the Credit Agreement, and (h) on or before the second Banking Day following the

Mammoth Collateral Release, Borrower shall take all actions necessary to cause OrMammoth and Mammoth Lakes not to be direct or indirect subsidiaries of Borrower, any Guarantor or any Non-Guarantor.

3.3.5 Concurrent with and as a condition to the Mammoth Collateral Release, OrMammoth shall execute and deliver to Administrative Agent a release (in form and substance reasonably satisfactory to Administrative Agent), pursuant to which OrMammoth shall release each Secured Party from any and all claims which OrMammoth may have against any of the Secured Parties arising from the Operative Documents and the transactions contemplated thereby.

ARTICLE 4 REPRESENTATIONS AND WARRANTIES

Borrower makes the following representations and warranties to and in favor of Administrative Agent and the Banks (a) to the extent they relate to any Loan Party (other than Ormat Technologies, the Non-Guarantors (other than ORNI) and the Project Companies), as of the Closing Date (unless such representation and warranty expressly relates solely to another time) both prior to and immediately after the consummation of the Acquisition and (b) to the extent they relate to any of each Non-Guarantor (other than ORNI) and each Project Company,

26

as of the Closing Date (unless such representation and warranty expressly relates solely to another time) but immediately after giving effect to the consummation of the Acquisition, all of which shall survive the Closing Date, the Close of Escrow and the making of the Loans:

4.1 EXISTENCE. Borrower, each Guarantor and each Non-Guarantor are organized or formed and validly existing under the laws of the jurisdiction of its incorporation or formation (as applicable) and are qualified to do business in such jurisdiction and in each other jurisdiction in which the conduct of their business requires such qualification (including, with respect to Borrower, the State of California).

4.2 OWNERSHIP OF THE LOAN PARTIES.

4.2.1 The equity interests in Borrower, each Guarantor and each Non-Guarantor are duly authorized, validly issued and fully paid and nonassessable and, as of the Closing Date, none of such equity interests consists of margin stock.

4.2.2 The capital structure of the Loan Parties (other than Ormat Technologies) is accurately set forth on Exhibit L, and each of the following is true and correct:

(a) Sponsor directly owns all of the equity interests in Borrower.

(b) Borrower directly owns all of the equity interests in OrHeber 1, all of the equity interests in OrMammoth, a 50% general partnership interest in HFC and a 50% general partnership interest in HGC.

(c) OrHeber 1 directly owns a 50% general partnership interest in HFC, a 50% general partnership interest in HGC and all of the membership interests in ORNI.

(d) ORNI directly owns all of the equity interests in OrHeber 2 and all of the equity interests in OrHeber 3.

(e) OrHeber 2 directly owns a 99.998% general partnership interest in SIGC.

(f) OrHeber 3 directly owns a 0.002% limited partnership interest in SIGC.

(g) OrMammoth directly owns a 1% limited partnership interest in Mammoth Lakes and a 49% general partnership interest in Mammoth Lakes.

(h) There no options, warrants, convertible securities or other rights to acquire any equity interests in Borrower, any Guarantor or any Non-Guarantor.

(i) Borrower does not have any direct or indirect Subsidiaries, other than the Guarantors and Non-Guarantors.

4.3 POWER AND AUTHORIZATION. Each of Borrower, each Guarantor and each Non-Guarantor has full power and authority to conduct its business as contemplated by the Operative Documents. The Credit Documents and the Project Documents to which Borrower, each

27

Guarantor and each Non-Guarantor is a party have been duly authorized, executed and delivered by each such Loan Party.

4.4 NO CONFLICT. The execution, delivery and performance by each of Borrower, each Guarantor and each Non-Guarantor of the Credit Documents and Major Project Documents to which it is a party and the consummation of the transactions contemplated by the Credit Documents and the Major Project Documents do not and will not (a) violate any provision of (i) any Legal Requirement applicable to Borrower, any of the Guarantors or any of the Non-Guarantors, as the case may be, (ii) the Governing Documents of Borrower, any of the Guarantors or any of the Non-Guarantors, as the case may be, or (iii) any order, judgment or decree of any court or agency or Governmental Instrumentality binding on Borrower, any of the Guarantors or any of the Non-Guarantors, (b) conflict with, result in a breach of or constitute (with due notice or lapse of time or both) a default under any material contractual obligation of Borrower, any of the Guarantors or any of the Non-Guarantors, (c) result in or require the creation or imposition of any Lien upon any of the properties or assets of Borrower, any of the Guarantors or any of the Non-Guarantors (other than any Liens created under any of the Credit Documents in favor of Administrative Agent on behalf of the Secured Parties), or (d) require any approval of any Person, except for such approvals or consents which will be obtained on or before the Closing Date and disclosed in writing to the Banks.

4.5 ENFORCEABLE OBLIGATIONS. Each Credit Document and Major Project Document to which Borrower, any of the Guarantors or any of the Non-Guarantors is a party constitutes a legal, valid and binding obligation of such Loan Party, as the case may be, enforceable against such Loan Party in accordance with its terms, except to the extent that enforceability may be limited by applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting the enforcement of creditors' rights or by the effect of general equitable principles (regardless of whether such enforceability is considered in a proceeding in equity or at law).

4.6 COMPLIANCE WITH LAW. None of Borrower, any of the Guarantors or any of the Non-Guarantors (a) is in violation of any applicable Legal Requirements in any material respect or (b) is subject to or in default in any material respect with respect to any final judgments, writs, injunctions, decrees, rules or regulations of any court or any federal, state, municipal or other governmental department, commission, board, bureau, agency or instrumentality, domestic or foreign.

4.7 CONDUCT OF BUSINESS. The only business conducted by Borrower, OrHeber 1, OrHeber 2, OrHeber 3, ORNI and OrMammoth is the ownership of those Loan Parties

which they directly own, as described in Section 4.2.2. To the knowledge of Borrower, the only business conducted by any of the Guarantors or Non-Guarantors is the business of directly or indirectly owning, operating, leasing, maintaining and using the Projects. Neither Borrower nor any Project Company is a party to or bound by any material contract other than the Credit Documents and the Major Project Documents to which it is a party. The Guarantors and Non-Guarantors (other than the Project Companies) are parties only to those agreements set forth on Exhibit G-5.

4.8 INVESTMENT COMPANY ACT. None of Borrower, any of the Guarantors or any of the Non-Guarantors is an "investment company" or a "company controlled by an investment company", within the meaning of the Investment Company Act of 1940, as amended.

4.9 ERISA. There are no ERISA Plans for any Loan Party (other than Ormat Technologies) or any ERISA Affiliate.

4.10 HAZARDOUS SUBSTANCES.

4.10.1 Except as set forth in Exhibit G-4: (a) with respect to each Site, none of Borrower, any of the Guarantors or any of the Non-Guarantors is or, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, has in the past been in violation of any Hazardous Substance Law which violation could reasonably be expected to result in a material liability to such Loan Party or its properties and assets or in an inability of such Loan Party to perform its obligations under the Operative Documents; (b) none of Borrower, any of the Guarantors, or any of the Non-Guarantors nor, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, any other Person has used, Released, generated, manufactured, produced or stored in, on, under, or about any Site, or Released or arranged for the disposal at any other location of any Hazardous Substances in any form, circumstance or condition that could reasonably be expected to subject any Secured Party to liability, or Borrower, any of the Guarantors, or any of the Non-Guarantors to material liability, under any Hazardous Substance Law; (c) to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, there are no underground tanks, whether operative or temporarily or permanently closed, located on any Site that could reasonably be expected to subject any Secured Party to liability, or Borrower, any of the Guarantors, or any of the Non-Guarantors to material liability, under any Hazardous Substance Law; (d) there are no Hazardous Substances used, stored or present at or on any Site except in material compliance with Hazardous Substance Laws and other Legal Requirements or as disclosed in the Environmental Reports; (e) to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, there are no Hazardous Substances that could reasonably be expected to migrate onto any Site that could reasonably be expected to impose on Borrower, any of the Guarantors, or any of the Non-Guarantors a material liability, except as disclosed in the Environmental Reports; and (f) to Borrower's, each Guarantor's and each Non-Guarantor's knowledge there neither is nor has been any condition, circumstance, action, activity or event that could reasonably be expected to be, or result in, a material violation by Borrower of any Hazardous Substance Law, or to result in liability of any Secured Party or material liability of Borrower, any of the Guarantors, or any of the Non-Guarantors under any Hazardous Substance Law.

4.10.2 Except as set forth on Exhibit G-4, (a) as of the Closing Date, there is no pending or, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, threatened in writing, judicial or administrative action or proceeding seeking to impose material liability against Borrower or any Guarantor or Non-Guarantor by any Governmental Instrumentality (including the California Public Utilities Commission, U.S. Army Corps of Engineers and U.S. Environmental Protection Agency) or any other Person which is not a Governmental Instrumentality with respect to the presence or Release of Hazardous Substances in, on, from or to any Site and, (b) thereafter, there is no pending or, to

Non-Guarantor's knowledge, threatened in writing, judicial or administrative action or proceeding by any Governmental Instrumentality (including the California Public Utilities Commission, U.S. Army Corps of Engineers and U.S. Environmental Protection Agency) or any non-governmental third party with respect to the presence or Release of Hazardous Substances in, on, from or to any Site which could reasonably be expected to have a Material Adverse Effect.

4.10.3 Except as set forth on Exhibit G-4 or in the Environmental Reports, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, there are no past violations that have not been finally resolved or existing violations of any Hazardous Substances Laws with respect to any Site, which violations could reasonably be expected to result in a material liability of Borrower, any of the Guarantors, or any of the Non-Guarantors.

4.11 LITIGATION.

4.11.1 No action, suit, proceeding or investigation has been instituted or, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, threatened in writing against any Loan Party (other than Ormat Technologies), other than (i) those described in Schedule 4.18 to the Acquisition Agreement or (ii) those that could not reasonably be expected to have a Material Adverse Effect.

4.11.2 None of Borrower, any Guarantor or any Non-Guarantor has any knowledge of (a) any action, suit, proceeding or investigation that has been instituted or threatened in writing against any Major Project Participant, or by which any of them or their properties are bound, which could reasonably be expected to have a Material Adverse Effect, (b) any proceeding or investigation that has been instituted by the FERC which could reasonably be expected to result in the revocation of any Project's QF status or any other determination that one or more of the Projects has failed to comply with FERC's regulations relating to QFs, or (c) any order, judgment or decree has been issued or proposed to be issued by any Governmental Instrumentality that, as a result of the leasing, ownership or operation of any of the Projects, the sale of electricity therefrom or the entering into of any Credit Document or Project Document or any transaction contemplated thereby, could reasonably be expected to cause or deem the Banks, Administrative Agent, Borrower or any Affiliate of any of them to be subject to, or not exempted from, regulation under PUHCA or the FPA, or subject to laws or regulations of the State of California respecting the rates or the financial or organizational regulation of electric utilities.

4.11.3 No action, suit or proceeding before or by any court, arbitrator or other Governmental Instrumentality is pending to which any Loan Party is a party or to which its business, assets or property is subject and, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, no such action, suit or proceeding is threatened to which any such Loan Party or its business, assets or property would be subject that, in either case, questions the validity of any of the Credit Documents.

4.12 LABOR DISPUTES AND ACTS OF GOD. Neither the business nor the properties of any of the Project Companies or, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, any Major Project Participant are currently affected by any fire, explosion, accident,

strike, lockout or other labor dispute, drought, storm, hail, earthquake, embargo, act of God or of the public enemy, or other casualty (whether or not

covered by insurance), which could reasonably be expected to have a Material Adverse Effect.

4.13 DISCLOSURE. No information or documentation furnished by any of the Loan Parties to Administrative Agent or the Banks or to any consultant submitting a report to Administrative Agent or the Banks contained (at the time of delivery thereof) any untrue statement of a material fact or omitted (at the time of delivery thereof) to state a material fact necessary in order to make the statements contained herein or therein not misleading under the circumstances in which they were made at the time such statements were made (other than (a) the Projections, (b) the Operating Budget, (c) the Capital Expenditures Budget, (d) any information that was corrected or updated in writing by Borrower to the Banks prior to the Closing Date, and (e) any information which was provided by Borrower to any of the Banks' consultants prior to the Closing Date and which contains "forward looking statements"). To the knowledge of Borrower, no information which was provided by Borrower to any of the Banks' consultants prior to the Closing Date and which contains "forward looking statements" contained (at the time of delivery thereof) any untrue statement of a material fact or omitted (at the time of delivery thereof) to state a material fact necessary in order to make the statements contained herein or therein not misleading under the circumstances in which they were made at the time such statements were made. There is no fact known to Borrower, any Guarantor or any Non-Guarantor which has had or could reasonably be expected to have a Material Adverse Effect which has not been disclosed in writing to Administrative Agent and the Banks by or on behalf of Borrower on or prior to the Closing Date in connection with the transactions contemplated hereby.

4.14 TAXES.

4.14.1 Each of Borrower, each Guarantor and each Non-Guarantor has timely filed all federal, state and local tax returns and reports that it is required to file, and has paid all taxes, material assessments, utility charges, fees and other governmental charges it is required to pay to the extent due (other than those taxes that it is contesting in good faith and by appropriate proceedings). None of Borrower, any Guarantor's or any Non-Guarantor has received any written notice proposing tax assessment against any such Loan Party which could reasonably be expected to have a Material Adverse Effect. To the extent any taxes, assessments, charges and fees are being contested, the applicable Loan Party (other than Ormat Technologies) has established reserves that are adequate for the payment thereof in conformity with GAAP.

4.14.2 To Borrower's, each Guarantor's and each Non-Guarantor's knowledge, (a) at all times since its formation, each Project Company has been an entity that is disregarded as separate from its owner for federal income tax purposes and (b) no IRS Form 8832 has ever been filed with respect to any Project Company to treat such Project Company as other than a disregarded entity.

4.14.3 None of Borrower, any Guarantor and any Non-Guarantor has any liability for the taxes of any Person (other than itself) (i) under Treasury Regulations Section 1.1502-6 (or any similar provision of state, local or foreign law), (ii) as a transferee or

successor, (iii) by contract, or (iv) otherwise, other than those liabilities which are being assumed by (through indemnification of OrHeber 1, OrHeber 2, OrHeber 3 and OrMammoth or otherwise) Covanta under the Acquisition Agreement.

4.14.4 Borrower does not intend to treat the Loans (including the incurrence thereof) as being a "reportable transaction" (within the meaning of Treasury Regulation Section 1.6011-4).

4.15 OWNERSHIP OF PROPERTY; LIENS; MATERIAL REAL PROPERTY INTERESTS.

Borrower, each Guarantor and each Non-Guarantor have, as applicable, (a) good, marketable and insurable easement, fee and/or leasehold interest in each of the Material Real Property Interests, free and clear of all Liens (other than the Title Exceptions) and (b) good, marketable and valid title to all other Collateral, free and clear of all Liens (other than Permitted Liens). With respect to each Project, the Title Exceptions do not, in the aggregate, materially and adversely affect the value, operations or use of such Project. Exhibit G-6 contains an accurate and complete list of all of the Project Companies' material real property interests (including fee, leasehold and easement interests).

4.16 GOVERNMENTAL REGULATION. None of the Loan Parties, Administrative Agent, or any Bank, nor any Affiliate of any of them will (solely as a result of the ownership, leasing or operation of the Projects, the sale of electricity, capacity or ancillary services therefrom or the entering into any Credit Document or Project Document or any transaction contemplated thereby) be subject to, or not exempt from, regulation under the FPA or PUHCA or under state laws and regulations respecting the rates or the financial or organizational regulation of electric utilities, except that each Project Company will be subject to Sections 1-18, 21-30, 202(c), 210-214 and 305(c) of the FPA and such provisions of Part III of the FPA as may be necessary for FERC actions to enforce the foregoing. Except to the extent provided in the preceding clause, none of Borrower, any Guarantor or any Non-Guarantor will be deemed by any Governmental Instrumentality to be subject to financial, organizational or rate regulation as an "electric utility", "electric corporation", "electrical company", "public utility", or "public utility holding company" or any similar Person under any applicable Governmental Rule.

4.17 MARGIN STOCK. None of Borrower, any Guarantor or any Non-Guarantor is engaged principally, or as one of its principal activities, in the business of extending credit for the purpose of "buying", "carrying" or "purchasing" margin stock (each as defined in Regulations T, U or X of the Federal Reserve Board), and no part of the proceeds of the Loans will be used by any Loan Party for the purpose of "buying", "carrying" or "purchasing" any such margin stock or for any other purpose which violates the provisions of the regulations of the Federal Reserve Board.

4.18 BUDGETS; PROJECTIONS. Borrower has prepared the Capital Expenditures Budget, the Operating Budget and the Projections and is responsible for developing the assumptions on which such Capital Expenditures Budget, Operating Budget and the Projections are based; and such Capital Expenditures Budget, Operating Budget and the Projections (a) are based on reasonable assumptions (including as to all legal and factual matters material to the estimates set forth therein) and (b) are consistent in all material respects with the provisions of

the Major Project Documents in effect as of the Closing Date.

4.19 FINANCIAL STATEMENTS. In the case of each financial statement of (a) Ormat Technologies for the calendar year ending on December 31, 2002, (b) Sponsor for the quarterly period ending on March 31, 2003 and (c) Sponsor for the quarterly period ending on September 30, 2003, each such financial statement and information has been prepared in conformity with GAAP and fairly presents, in all material respects, the financial position (on a consolidated and, where applicable, consolidating basis) of such Loan Party, described in such financial statements as at the respective dates thereof and the results of operations and cash flows (on a consolidated and, where applicable, consolidating basis) of such Loan Party, described therein for each of the periods then ended, subject, in the case of any such unaudited financial statements, to changes resulting from audit and normal year-end adjustments and the absence of footnote disclosure.

4.20 NO DEFAULT. None of Borrower, any Guarantor or any Non-Guarantor is in default under any Major Project Document as of the Closing Date, except with respect to defaults that may be claimed by any landowner set forth on Exhibit N who (a) has submitted claims to the Bankruptcy Court relating to the SIGC Project, the HFC Project or the HGC Project, and (b) has not entered into a settlement agreement with respect to such claims (each such landowner, an "Outstanding Non-Royalty Claimant"). No Potential Event of Default or Event of Default has occurred and is continuing.

4.21 ORGANIZATION ID NUMBER. The organizational identification numbers of the Loan Parties (other than Ormat Technologies) set forth on Exhibit M are true and correct.

4.22 INTELLECTUAL PROPERTY. Borrower, each Guarantor and each Non-Guarantor own or possess all Permits, patents, copyrights, service marks, trademarks and trade names, or rights thereto, that are necessary for the operation of its business, without known conflict with the rights of others.

4.23 CERTAIN FEES. No broker's or finder's fee or commission will be payable with respect to the transactions contemplated by the Credit Documents, other than (a) fees payable to Administrative Agent, the Banks or any of their respective Affiliates and (b) fees payable by Sponsor to Marathon Capital, LLC.

4.24 COLLATERAL. The Liens granted to Administrative Agent (for the benefit of the Secured Parties) pursuant to the Collateral Documents (a) constitute as to personal property included in the Collateral a valid lien, subject, with respect to any proceeds, to the limitations set forth in Section 9-315 of the UCC and (b) constitute as to the Mortgaged Property included in the Collateral a valid Lien on the Mortgaged Property; provided, however, that the Non-Material Real Property Interests shall be subject to the Real Property Standard for purposes of this Section 4.24(b). The security interest granted to Administrative Agent (for the benefit of the Secured Parties) pursuant to the Collateral Documents in the Collateral consisting of personal property (other than the Operating Accounts and all amounts deposited therein or credited thereto) will be perfected (i) with respect to any property that can be perfected solely by filing, to the extent Article 9 of the UCC applies thereto, upon the filing of financing statements in the filing offices identified in Exhibit D-6, (ii) with respect to any property that can be perfected by

control (subject to Section 6.14), upon execution of the Depositary Agreement, and (iii) with respect to any property (if any) that can be perfected by possession, upon Administrative Agent receiving possession thereof, and in each case such security interest will be, as to Collateral perfected under the UCC or otherwise as aforesaid, superior and prior to the rights of all third Persons now existing or hereafter arising whether by way of mortgage, Lien, security interests, encumbrance, assignment or otherwise, except (A) with respect to the Collateral described in clause (i) of this Section 4.24, the Permitted Liens described in clauses (a) and (e) of the definition of "Permitted Liens" and, to the extent required by Governmental Rule, those matters described in clauses (b), (c) and (g) of the definition of "Permitted Liens" and (B) with respect to the Collateral described in clauses (ii) and (iii) of this Section 4.24, the Permitted Liens described in clause (a) of the definition of "Permitted Liens" and, to the extent required by Governmental Rule, those matters described in clause (b) of the definition of "Permitted Liens". Except to the extent possession of portions of the Collateral is required for perfection, all such action as is necessary has been taken to establish and perfect Administrative Agent's rights in and to the Collateral in existence on the Closing Date to the extent Administrative Agent's security interest can be perfected by filing, including any recording, filing, registration, giving of notice or other similar action; provided, however, that the Non-Material Real Property Interests shall be subject to the Real Property Standard for purposes of this sentence. Subject to the requirements contained in the UCC with respect to the filing of

continuation statements, no filing, recordation, re-filing or re-recording other than those listed on Exhibit D-6 hereto is necessary to perfect and maintain the perfection of the interest, title or Liens of the Collateral Documents, and on the Closing Date all such filings or recordings will have been made to the extent Administrative Agent's security interest can be perfected by filing. Borrower has properly delivered or caused to be delivered, or provided control, to Administrative Agent or Depositary Agent all Collateral that permits perfection of the Lien and security interest described above by possession or control.

4.25 SUFFICIENCY OF PROJECT DOCUMENTS. Other than those that can be reasonably expected to be commercially available when and as required, the services to be performed, the materials to be supplied and the real property interests, the easements and other rights granted, or to be granted, pursuant to the Major Project Documents in effect as of the Closing Date comprise all of the material services, materials and property interests required to lease, own and operate the Projects in accordance with the terms of the Credit Documents and the Major Project Documents.

4.26 UTILITY SERVICES. All utility services necessary for operation of each Project for its intended purposes are available at such Project.

4.27 REAL PROPERTY RIGHTS. Each Project Company possesses all necessary easements, rights of way, licenses, agreements and other rights for (a) the contiguous interconnection and utilization of all interconnection facilities (including geothermal resource production and injection pipelines) and (b) the operation of the Projects in accordance with the Projections.

4.28 PROPER SUBDIVISION. Each Material Real Property Interest has been subdivided or entitled to exception therefrom, and for all purposes each Material Real Property Interest may

34

be mortgaged, conveyed and otherwise dealt with as separate legal lots or parcels.

4.29 FLOOD ZONE DISCLOSURE. No material portion of the Collateral includes improvements that are located in an area that has been identified by the Federal Emergency Management Agency as an area having special flood or mudslide hazards and in which flood insurance has been made available under the National Flood Insurance Act of 1968, as amended.

4.30 QF STATUS. Each Project is, and has been since it commenced commercial operation, (a) a QF, and (b) exempt from all provisions of the FPA. Each Project's FERC Form 556 most recently filed with FERC contains current and accurate ownership and operating characteristics of such Project, except for updated information that is to be included in the filings contemplated by Section 5.19.1.

4.31 ACQUISITION AGREEMENT. The representations and warranties of each applicable Loan Party contained in the Acquisition Agreement are true and correct in all material respects.

4.32 SOLVENCY. (a) Borrower, each Guarantor and each Non-Guarantor is Solvent.

4.33 GEOTHERMAL RESOURCES. To the knowledge of Borrower, the geothermal resources available to the Project Companies under the applicable Project Documents are sufficient to operate each Project in accordance with the terms of the Power Purchase Agreements and the Credit Documents and in a manner consistent with the Projections.

4.34 OPERATOR EXPERIENCE. Sponsor has substantial experience in the operation and maintenance of comparable geothermal electric generating facilities and geothermal fields (including associated equipment) and is fully qualified to operate and maintain the Projects in accordance with the terms of the Power Purchase Agreements and the Credit Documents and in a manner consistent with the Projections.

ARTICLE 5 AFFIRMATIVE COVENANTS

Borrower covenants and agrees that until the repayment in full in cash of all Obligations (other than those contingent Obligations that are intended to survive the termination of this Agreement or the other applicable Credit Documents), Borrower shall, and shall cause each of the Guarantors and the Non-Guarantors, as applicable, to:

5.1 USE OF PROCEEDS. Use the proceeds of the Loans only (a) to fund the Acquisition and (b) to pay related fees and expenses of Borrower, in each case as provided in the Funds Flow Memorandum.

5.2 PAYMENT OF OBLIGATIONS. Pay all of Borrower's, each Guarantor's and each Non-Guarantor's respective obligations due under the Project Documents as and when due and payable, except (a) such as may be contested in good faith or as to which a bona fide dispute may exist (provided that adequate reserves have been established in conformity with GAAP), and

35

(b) Borrower's and the Project Companies' trade payables which shall be paid in the ordinary course of business.

5.3 WARRANTY OF TITLE. Maintain (a) good, marketable and insurable fee, easement and/or leasehold interests in each Material Real Property Interest, as applicable, and (b) good, legal and valid title to all of its other respective material properties and assets (other than properties and assets disposed of in the ordinary course of business or otherwise disposed of in accordance with Section 6.3), in each case free and clear of all Liens (other than Permitted Liens). Borrower, the Guarantors and the Non-Guarantors shall warrant and defend, as applicable, title to and right of possession and use of each Project, and the validity and priority of the Liens of the Secured Parties on the Collateral.

5.4 NOTICES; REPORTS. Promptly, upon acquiring notice or giving notice (except as otherwise specified below), as the case may be, or obtaining knowledge thereof, give written notice (with copies of any underlying notices, papers, files or related documentation) to Administrative Agent of:

5.4.1 any litigation pending or, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, threatened in writing against Borrower, any Guarantor or any Non-Guarantor involving claims against such Loan Party or a Project in excess of \$500,000 individually or \$1,000,000 in the aggregate per calendar year or involving any injunctive, declaratory or other equitable relief, such notice to include, if requested in writing by Administrative Agent, copies of all papers filed in such litigation and to be given monthly if any such papers have been filed since the last notice given;

5.4.2 any dispute or disputes for which written notice has been received by Borrower, any Guarantor or any Non-Guarantor which may exist between such Loan Party and any Governmental Instrumentality and which involve (a) claims against Borrower, any Guarantor or any Non-Guarantor which exceed \$500,000 individually or \$1,000,000 in the aggregate per calendar year, (b) injunctive or declaratory relief, or (c) revocation, modification, failure to renew or the like of any material discretionary Permits necessary for the performance of any Loan Party's (other than Ormat Technologies') or Major

Project Participant's obligations under the Credit Documents or the Major Project Documents;

5.4.3 any Event of Default or Potential Event of Default;

5.4.4 any casualty, damage or loss, whether or not insured, through fire, theft, other hazard or casualty, or any act or omission of (a) Borrower, any Guarantor, any Non-Guarantor, or any of their employees, agents, contractors, consultants or representatives in excess of \$500,000 for any one casualty or loss or \$1,000,000 in the aggregate in any calendar year, or (b) to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, any other Person if such casualty, damage or loss could reasonably be expected to have a Material Adverse Effect;

5.4.5 any cancellation, suspension or material change in the terms, coverage or amounts of any insurance described in Exhibit K;

36

5.4.6 any contractual obligations incurred by Borrower, any Guarantor or any Non-Guarantor exceeding \$500,000 per year in the aggregate for a Project, not including any obligations incurred pursuant to the Operative Documents or any obligation contemplated in the then-current Capital Expenditures Budget or the then-current Operating Budget;

5.4.7 any intentional withholding of compensation to, or any right to withhold compensation claimed by, any Major Project Participant, other than retention provided by the express terms of any such contracts;

5.4.8 any (a) termination (other than expiration in accordance with its terms and any applicable Consent) or material default of which Borrower, any Guarantor or any Non-Guarantor has knowledge or written notice thereof under any Major Project Document and (b) material Project Document Modification (with copies of all such Project Document Modifications whether or not requiring approval of Administrative Agent or the Required Banks pursuant to Section 6.12);

5.4.9 any written claim of events of force majeure (including claims therefor regardless of whether Borrower believes such claim has merit) and, to the extent requested in writing by Administrative Agent, copies of invoices or statements which are reasonably available to Borrower, any Guarantor or any Non-Guarantor under any Major Project Document, certified by an authorized representative of Borrower, together with a copy of any supporting documentation, schedule, data or affidavit delivered under such Major Project Document;

5.4.10 any (a) material noncompliance with any Hazardous Substance Law or any material Release of Hazardous Substances on or from each Site that has resulted or could reasonably be expected to result in personal injury or material property damage or to have a Material Adverse Effect, (b) pending or, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, threatened in writing, Environmental Claim against Borrower or, to Borrower's, each Guarantor's and each Non-Guarantor's knowledge, any of its Affiliates, contractors, lessees or any other Persons, arising in connection with their occupying or conducting operations on or at any Project or any Site which, if adversely determined, could reasonably be expected to have a Material Adverse Effect, or (c) underground tank, whether operative or temporarily or permanently closed, located on any Site;

5.4.11 promptly, but in no event later than 10 Banking Days prior to any Lease Solution, notice thereof, which notice shall describe, in reasonable detail, the nature of such Lease Solution;

5.4.12 promptly, but in no event later than 10 Banking Days prior to

any change in or transfer of ownership interests in Borrower, any Guarantor, any Non-Guarantor or any Project (including a Mammoth Ownership Event), notice thereof, which notice shall identify any transferee of such ownership interest and the nature of such transferee's interest or shall describe, in reasonable detail, such other change or transfer; provided that Borrower shall not be obligated to notify Administrative Agent of any change in the Constellation Entities' interest in Mammoth Lakes or a transfer by the Constellation Entities of any of their ownership interest in Mammoth

37

Lakes if such changes or transfer was to an Affiliate of the Constellation Entities, in each case until 30 days after it has knowledge of the occurrence of such change or transfer.

5.4.13 initiation of any condemnation proceedings involving any Project, any Site or any material portion thereof;

5.4.14 promptly, but in no event later than fifteen Banking Days after Borrower has knowledge of the execution and delivery thereof, a copy of each Additional Project Document;

5.4.15 promptly, but in no event later than 30 days after the receipt thereof by Borrower, copies of (a) any material discretionary Permits necessary for the performance of the any Loan Party's (other than Ormat Technologies') obligations under the Credit Documents or the Major Project Documents obtained by such Loan Party after the Closing Date, (b) any amendment, supplement or other modification to any material discretionary Permits necessary for the performance of the any Loan Party's (other than Ormat Technologies') or Major Project Participant's obligations under the Credit Documents or the Major Project Documents after the Closing Date and (c) all material notices relating to any Project received by Borrower, any Guarantor or any Non-Guarantor from, or delivered by any such Loan Party to, any Governmental Instrumentality;

5.4.16 promptly, but in no event later than five days after occurrence thereof, notice of (a) the scheduling of any outage with an anticipated duration in excess of ten days, (b) any outage (scheduled or otherwise) with a duration in excess of ten days, and (c) any de-rating or change in the rating of any Project; and

5.4.17 (a) within ten days after the occurrence of a Reportable Event with respect to any ERISA Plan; (b) promptly, but in no event later than fifteen days, after the withdrawal of any Loan Party (other than Ormat Technologies) or any ERISA Affiliate from a Multiemployer Plan; (c) promptly, but in no event later than five days, after the PBGC institutes any proceedings to terminate any ERISA Plan or takes action to appoint a trustee of any ERISA Plan under Section 4042 of ERISA; (d) promptly, but in no event later than ten days, after the occurrence of any event which could give rise to a Lien in favor of the IRS or the PBGC under any ERISA Plan; (e) promptly, but in no event later than 30 days, after any Loan Party (other than Ormat Technologist) or any ERISA Affiliate has knowledge that any ERISA Plan that is a Multiemployer Plan is in reorganization, is insolvent or intends to terminate under Section 4041A of ERISA and (f) promptly, but in no event later than ten days after, the date any Loan Party (other than Ormat Technologies) or any ERISA Affiliate shall apply for a minimum funding waiver under Section 412 of the Code with respect to an ERISA Plan, a description thereof and copies of documents and materials related thereto.

5.5 FINANCIAL STATEMENTS.

5.5.1 Deliver or cause to be delivered to Administrative Agent, in form and detail reasonably satisfactory to Administrative Agent (except where GAAP is specifically required):

(a) as soon as practicable and in any event within 60 days after the end of (i) each quarterly accounting period of each Guarantor's and each Non-Guarantor's fiscal year and (ii) each of the first three quarterly accounting periods of Borrower's fiscal year (in each case commencing with the fiscal quarter ending March 31, 2004), unaudited quarterly financial statements of Borrower, the Guarantors and the Non-Guarantors as of the last day of such quarterly period and the related statements of income, cash flow, and shareholders' or members' equity (as applicable) for such quarterly period and (in the case of second and third quarterly periods) for the portion of the fiscal year ending with the last day of such quarterly period, setting forth in each case (but only with respect to periods occurring during or after the 2005 fiscal year) in comparative form corresponding unaudited figures from the preceding fiscal year (it being acknowledged that such requirement may be satisfied by the delivery of the appropriate report or Form 10-Q filed with the United States Securities Exchange Commission), all prepared in accordance with GAAP (subject to changes resulting from audit and normal year-end adjustments and the absence of footnote disclosure); and

(b) as soon as practicable and in any event within 120 days after the close of each applicable fiscal year, audited consolidated financial statements of Borrower (it being acknowledged that such requirement may be satisfied by the delivery of the appropriate report or Form 10-K filed with the United States Securities Exchange Commission). Such financial statements shall include a balance sheet as of the close of such year, an income and expense statement, reconciliation of capital accounts (where applicable) and a statement of cash flow (it being acknowledged that such requirement may be satisfied by the delivery of the appropriate report or Form 10-K filed with the United States Securities Exchange Commission), all prepared in accordance with GAAP and certified by an independent certified public accountant selected by the Person whose financial statements are being prepared. Such certificate shall not be qualified or limited because of restricted or limited examination by such accountant of any material portion of the records of Borrower.

5.5.2 Cause to be delivered, along with such financial statements of Borrower, the Guarantors and the Non-Guarantors that are required to be provided pursuant to Section 5.5.1, a certificate signed by a Responsible Officer of such Loan Party certifying that (a) such Responsible Officer has made or caused to be made a review of the transactions and financial condition of such Loan Party during the relevant fiscal period and that such review has not, to such Responsible Officer's knowledge, disclosed the existence of any event or condition which constitutes an Event of Default or Potential Event of Default, or if any such event or condition existed or exists, the nature thereof and the corrective actions that such Loan Party has taken or proposes to take with respect thereto, (b) such Loan Party is in compliance with all applicable material provisions of each Credit Document to which such Loan Party is a party or, if such is not the case, stating the nature of such non-compliance and the corrective actions which such Loan Party has taken or proposes to take with respect thereto, and (c) such financial statements are true and correct in all material respects and that no material adverse change in the consolidated assets, liabilities, operations, or financial condition of such Loan Party has occurred since the date of the immediately preceding financial statements provided to Administrative Agent or, if a material adverse change has occurred, the nature of such change.

5.6 BOOKS, RECORDS, ACCESS.

5.6.1 Maintain, or cause to be maintained, adequate books, accounts and records with respect to Borrower and the Projects.

5.6.2 Subject to requirements of Governmental Rules, safety requirements and existing confidentiality restrictions imposed upon any Loan Party (other than Ormat Technologies) by any other Person, permit employees or agents of Administrative Agent and Independent Engineer at any reasonable times and upon reasonable prior notice to inspect all of their respective properties, to examine or audit all of their respective books, accounts and records and make copies and memoranda thereof, and to communicate with their auditors outside their presence (it being acknowledged that Administrative Agent shall endeavor to notify Borrower of any such communications with auditors prior to such communications).

5.7 COMPLIANCE WITH LAW. Promptly comply, or cause compliance, in all material respects with all Legal Requirements (including Legal Requirements and applicable Permits relating to pollution control, environmental protection, equal employment opportunity or employee benefit plans, ERISA Plans and employee safety, with respect to any Project Company or any Project), and make such alterations to the Projects and the Sites as may be required for such compliance; provided, however, that nothing in this Section 5.7 shall prohibit Borrower from challenging or defending any claim or proceeding asserting that such noncompliance may exist.

5.8 EXISTENCE; CONDUCT OF BUSINESS. Except as otherwise expressly permitted under this Agreement, (a) maintain and preserve its existence and all material rights, privileges and franchises necessary in the normal conduct of its business, (b) subject to Section 5.2, perform (to the extent not excused by force majeure events or the nonperformance of the other party and not subject to a good faith dispute) all of its material contractual obligations under the Major Project Documents to which it is party or by which it is bound, (c) maintain all of its Permits and use reasonable efforts to cause all Major Project Participants to maintain all of their respective Permits related to the Projects, except to the extent that any such failure to maintain could not reasonably be expected to have a Material Adverse Effect, and (d) obtain all Permits necessary for the operation of the Projects in accordance with the Power Purchase Agreements and the Credit Documents and in a manner consistent with the Projections.

5.9 EXEMPTION FROM REGULATION. Take or cause to be taken all necessary or appropriate actions so that (a) each Project will be a QF and (b) each Loan Party (other than Ormat Technologies) and each Project shall not be subject to, or shall be exempt from, financial or organizational regulation as a "public utility company" or "public utility holding company" under PUHCA, the FPA or financial, organizational or rate regulation as a public utility under the laws of the State of California.

5.10 OPERATION OF THE PROJECTS.

40

5.10.1 Cause the Project Companies to keep each Project in good operating condition consistent with the standard of care set forth in the Major Project Documents and all applicable Permits, and make all repairs necessary to keep each such Project in such condition.

5.10.2 Cause the Project Companies to operate each Project in a manner consistent with Prudent Utility Practices and in compliance with the terms of the Power Purchase Agreements.

5.10.3 At any time after June 30, 2004, if the Lease Buyout shall not have occurred, at the request of Administrative Agent, (a) cause Sponsor to assign the SIGC O&M Agreement to a wholly-owned Subsidiary of Borrower and an Affiliate of OrHeber 1, (b) transfer or cause to be transferred all of the employees of Sponsor who operate, administer and maintain the SIGC Project to such newly formed wholly-owned Subsidiary of Borrower, (c) grant or cause to be granted to Administrative Agent (for the benefit of the Secured Parties) a first-priority

perfected Lien on the ownership interests and assets of such newly formed wholly-owned Subsidiary of Borrower, and (d) provide or cause to be provided to Administrative Agent with respect to such transactions and such newly formed wholly-owned Subsidiary of Borrower, to the satisfaction of Administrative Agent, (i) assignment and transfer documents, (ii) Consents as described in Section 5.13.2, (iii) each of the documents described in Sections 3.1.1, 3.1.3 and 3.1.4 and (iv) opinions of counsel as described in Section 3.1.8.

5.11 BUDGETS.

5.11.1 On or before 90 days prior to the beginning of each calendar year (other than 2004), adopt an operating plan and a budget, detailed by month, of anticipated Project Revenues, such budget to include scheduled debt service, proposed dividend distributions, proposed Major Maintenance, proposed reserves and all anticipated O&M Costs (including reasonable allowance for contingencies) applicable to each Project for the ensuing calendar year (each such annual operating plan and budget, including the Initial Operating Budget, an "Operating Budget"). There shall be one Operating Budget for the Mammoth Project and, at the election of Borrower, there shall be one or more Operating Budgets for the SIGC Project, the HGC Project and the HFC Project. Each Operating Budget shall be subject to the approval of Administrative Agent only if (a) the aggregate amount of anticipated O&M Costs exceeds by 15% or is less by 20% of the amount proposed to be expended by the applicable Loan Parties (other than Ormat Technologies) for all such items during the applicable calendar year (as set forth in the Projections), or (b) the aggregate amount of actual O&M Costs (i) for the prior three-years (or, if applicable, partial years) exceeds by 10% or (ii) for the prior three-years (or, if applicable, partial years) is less than 85%, in each case of the amount proposed (as set forth in the Projections) to be expended by the applicable Loan Parties (other than Ormat Technologies) for all such items during such prior years. Each Project Company shall operate and maintain each Project within amounts for (A) any line-item set forth in the Operating Budget not to exceed 120% (on a year-to-date basis) and (B) all line-items set forth in the Operating Budget not to exceed (I) during the first six months of the applicable calendar year, 115% (on a year-to-date basis) and (II) during the last six months of the applicable calendar year, 110% (on a year-to-date basis).

5.11.2 On or before 90 days prior to the beginning of each calendar year (other than 2004), adopt a capital expenditures plan and a budget, detailed by quarter, of anticipated capital expenditures (including reasonable allowance for contingencies) applicable to each Project for the ensuing calendar year (each such annual capital expenditures, including the Initial Capital Expenditures Budget, a "Capital Expenditures Budget"). There shall be one Capital Expenditures Budget for the Mammoth Project and, at the election of Borrower, there shall be one or more Capital Expenditures Budgets for the SIGC Project, the HGC Project and the HFC Project. Each Capital Expenditures Budget shall be subject to the approval of Administrative Agent only if (a) the aggregate amount of anticipated capital expenditures exceeds by 15% or is less by 20% of the amount proposed to be expended by the applicable Loan Parties (other than Ormat Technologies) for all such items during the applicable calendar year (as set forth in the Projections), or (b) the aggregate amount of actual capital expenditures (i) for the prior three-years (or, if applicable, partial years) exceeds by 10% or (ii) for the prior three-years (or, if applicable, partial years) is less than 85%, in each case of the amount proposed (as set forth in the Projections) to be expended by the applicable Loan Parties (other than Ormat Technologies) for all such items during such prior years. Each Project Company shall perform capital expenditures for each Project within amounts for (A) any line-item set forth in the Capital Expenditures Budget not to exceed 120% (on a year-to-date basis) and (B) all line-items set forth in the Capital Expenditures Budget not to exceed (I) during the first six months of the applicable calendar year, 115% (on a year-to-date basis) and (II) during the last six months of the applicable calendar year, 110% (on a year-to-date basis).

5.12 PRESERVATION OF RIGHTS; FURTHER ASSURANCES.

5.12.1 Maintain in full force and effect, perform (subject to Section 5.2) the obligations of Borrower, each Guarantor and each Non-Guarantor under, preserve, protect and defend the material rights of Borrower, each Guarantor and each Non-Guarantor under and take all reasonable action necessary to prevent termination (except by expiration in accordance with its terms) of each and every Major Project Document, including (where Borrower, a Guarantor or a Non-Guarantor, as applicable, in the exercise of its business judgment deems it proper) prosecution of suits to enforce any material right of such Loan Party thereunder and enforcement of any material claims with respect thereto; provided, however, that upon the occurrence and during the continuance of an Event of Default if Administrative Agent requests that certain actions be taken and the applicable Loan Party (other than Ormat Technologies) fails to take the requested actions within five Banking Days, Administrative Agent may enforce in its own name or in such Loan Party's name, such rights of such Loan Party in the manner and to the extent provided in the Security Agreements and the other Credit Documents.

5.12.2 From time to time, execute, acknowledge, record, register, deliver and/or file all such notices, statements, instruments and other documents (including any memorandum of lease or other agreement, financing statement, continuation statement, certificate of title or estoppel certificate), relating to the Loans stating the interest and charges then due and any known Events of Default or Potential Events of Default, and take such other steps as may be necessary or advisable to render fully valid and enforceable under all applicable laws the rights, liens and priorities of the Secured Parties with respect to all Collateral and other security from

42

time to time furnished under this Agreement and the other Credit Documents or intended to be so furnished, in each case in such form and at such times as shall be reasonably requested by Administrative Agent, and pay all reasonable fees and expenses (including reasonable attorneys' fees) incident to compliance with this Section 5.12.2.

5.12.3 If Borrower, any Guarantor or any Non-Guarantor that previously has executed and delivered a Deed of Trust shall at any time acquire any real property or leasehold or other interest in real property not covered by any such Deed of Trust, then promptly upon such acquisition, execute, deliver and record a supplement to the applicable Deed of Trust, reasonably satisfactory in form and substance to Administrative Agent, subjecting the real property or leasehold or other interests to the Lien created by such Deed of Trust. If reasonably requested by Administrative Agent, Borrower shall obtain an appropriate title insurance policy endorsement or supplement, as applicable, insuring the Lien of the Secured Parties in such additional property, subject only to Permitted Liens and other exceptions to title approved by Administrative Agent.

5.12.4 Upon the request of Administrative Agent, execute and deliver all documents as shall be necessary or that Administrative Agent shall reasonably request in connection with the rights and remedies of Administrative Agent and the Banks under the Operative Documents, and perform, such other reasonable acts as may be necessary to carry out the intent of this Agreement and the other Credit Documents.

5.12.5 Take such action, including the execution and filing of all such documents and instruments, as may be necessary to effect and continue the appointment of CT Corporation System as its agent for service of process in full force and effect, or if necessary by reason of any fact or condition relating to such agent, to replace such agent (but only after having given notice and evidence thereof to Administrative Agent).

5.13 POST-CLOSING CONSENTS.

5.13.1 On or before the date which is 60 days after the Closing Date or, in respect of Major Project Documents related to the SIGC Project, on or before March 31, 2004, cause each applicable Project Company and each applicable Major Project Participant in respect of the Major Project Documents described in Exhibit E-2, respectively, to enter into (a) a Consent in substantially the form of Exhibit E-1 or (b) in the case of the Major Project Documents to which Edison or IID is a counterparty, a Consent substantially in the form customarily provided by such Persons in substantially similar circumstances.

5.13.2 With respect to any Additional Project Document entered into by HGC, HFC, Mammoth Lakes (at any time after a Mammoth Ownership Event) or SIGC (at any time after a Lease Buyout), cause the applicable counterparty to execute and deliver to Administrative Agent (a) a Consent in substantially the form of Exhibit E-1 or (b) in the case of any Additional Project Document to which Edison or IID is a counterparty, a Consent substantially in the form customarily provided by such Persons in substantially similar circumstances.

5.14 INSURANCE. Maintain in effect at all times the types of insurance set forth on Exhibit K, in the amounts and on the terms and conditions specified therein, with insurance companies

43

rated "A-" or better, with a minimum size rating of "IX", by Best's Insurance Guide and Key Ratings (or an equivalent rating by another nationally recognized insurance rating agency of similar standing if Best's Insurance Guide and Key Ratings shall no longer be published).

5.15 TAXES. Timely file all federal, state and local tax returns and reports that it is required to file, and pay all taxes, material assessments, utility charges, fees and other governmental charges it is required to pay to the extent due. The applicable Loan Party may contest in good faith any such taxes, assessments and other charges and, in such event, may permit the taxes, assessments or other charges so contested to remain unpaid during any period, including appeals, when such Loan Party is in good faith contesting the same, so long as (a) reserves to the extent required by GAAP have been established in an amount sufficient to pay any such taxes, assessments or other charges, accrued interest thereon and potential penalties or other costs relating thereto, or other adequate provision for the payment thereof shall have been made and maintained at all times during such contest, (b) enforcement of the contested tax, assessment or other charge is effectively stayed for the entire duration of such contest, and (c) any tax, assessment or other charge determined to be due, together with any interest or penalties thereon, is promptly paid after resolution of such contest.

5.16 EMINENT DOMAIN. If an event of eminent domain shall occur, (a) diligently pursue all its rights to compensation against the relevant Governmental Instrumentality, (b) not, without the written consent of the Required Banks, compromise or settle any claim against such Governmental Instrumentality, and (c) pay or apply all eminent domain proceeds in accordance with the Depositary Agreement. Borrower, the Guarantors and the Non-Guarantors consent to, and agree not to object to or otherwise impede or impair, the participation of Administrative Agent in any eminent domain proceedings, and such Loan Party shall from time to time deliver to Administrative Agent all documents and instruments requested by it to permit such participation.

5.17 GE LEASE SOLUTION. Use its best efforts to (a) extend the term of the GE Lease until a date no earlier than the Maturity Date on terms and conditions satisfactory to the Required Banks, in their respective reasonable business judgment (it being acknowledged and agreed that the Required Banks may not approve any such extension or terms if the annual rent or lease payment under the GE Lease is an amount in excess of (i) 0.50 multiplied by (ii) the

difference between (A) the projected Project Revenues generated by SIGC and (B) the projected amount of SIGC's O&M Costs (excluding any such rent or lease payments); or (b) purchase the SIGC Project from GECC (a "Lease Buyout") on terms and conditions reasonably acceptable to the Required Banks (it being acknowledged and agreed that the Required Banks may not approve any such purchase if the purchase price is to be paid by Borrower, any Guarantor or any Non-Guarantor, unless the funds used to pay such purchase price are Equity Funds and/or Subordinated Loans and are supplied to Borrower, the applicable Guarantor or the applicable Non-Guarantor by Sponsor or are raised by the Loan Parties in a financing contemplated by Section 5 of the Fee Letter). Upon any such Lease Buyout, the Loan Parties (other than Ormat Technologies and Sponsor) shall concurrently take all actions necessary to (i) grant Administrative Agent, for the benefit of the Secured Parties, a first-priority perfected Lien on the

44

assets of SIGC, ORNI, OrHeber 2 and OrHeber 3 (subject to any Permitted Liens), pursuant to (A) a Deed of Trust, in substantially the form of Exhibit D-1 (with respect to SIGC only) and (B) a Security Agreement, in substantially the form of Exhibit D-2; (ii) pledge all of the ownership interests in SIGC, OrHeber 2 and OrHeber 3 to Administrative Agent, for the benefit of the Secured Parties, pursuant to a Pledge Agreement in substantially the form of Exhibit D-3, (iii) provide a guaranty by SIGC, ORNI, OrHeber 2 and OrHeber 3 of the Obligations of the other Loan Parties (other than Ormat Technologies and Sponsor) under the Credit Documents, in substantially the form of Exhibit D-5, and (iv) provide to Administrative Agent the following documents related to such Lease Buyout: (A) executed copies of the purchase documents, (B) Consents as described in Section 5.13.2, (C) each of the documents described in Section 3.1.1 relevant to the Lease Buyout, (D) opinions of counsel as described in Section 3.1.8 and (E) title insurance policies (with a survey exception) and surveys (which surveys shall be completed within the Applicable Post-Closing Period) substantially similar to those described in Section 5.20. The successful consummation of a transaction described in clause (a) or (b) above shall be referred to herein as the "Lease Solution". If the Lease Solution is not implemented, then SIGC shall properly exercise its initial three-year renewal option under the GE Lease on or before September 30, 2004. No Loan Party shall exercise any other renewal option or purchase option under the GE Lease. Administrative Agent, the Banks and Borrower hereby acknowledge that the purchase of the SIGC Project from Owner Participant pursuant to the terms of the Purchase Agreement, dated as of November 14, 2003, by and between Ormat Technologies and Owner Participant (without giving effect to any amendments or waivers thereto which have not been approved in writing by Administrative Agent) shall be deemed to be, upon the successful consummation of the acquisition contemplated thereby, a Lease Buyout and a Lease Solution.

5.18 MAMMOTH LAKES SECURITY. Upon any Mammoth Ownership Event, concurrently take all actions necessary to (a) grant Administrative Agent, for the benefit of the Secured Parties, a first-priority perfected Lien on the assets of Mammoth Lakes (subject to any Permitted Liens), pursuant to (i) a Deed of Trust, in substantially the form of Exhibit D-1 and (ii) a Security Agreement, in substantially the form of Exhibit D-2, (b) pledge all of the ownership interests in Mammoth Lakes to Administrative Agent, for the benefit of the Secured Parties, pursuant to a Pledge Agreement in substantially the form of Exhibit D-3, (c) provide a guaranty by Mammoth Lakes of the obligations of the other Loan Parties (other than Ormat Technologies and Sponsor) under the Credit Documents, in substantially the form of Exhibit D-5 and (d) provide to Administrative Agent the following documents related to such Mammoth Ownership Event: (A) executed copies of the purchase or transfer documents, (B) Consents as described in Section 5.13.2, (C) each of the documents described in Sections 3.1.1 and 3.1.3 (including the partnership agreement of Mammoth Lakes), (D) opinions of counsel as described in Section 3.1.8 and (E) title insurance policies (with a survey exception) and surveys (which surveys shall be completed within the Applicable Post-Closing Period) substantially similar to those described in Section 5.20.

5.19 FERC MATTERS.

5.19.1 Cause each applicable Project Company to prepare and file with FERC, within 20 Banking Days of the Closing Date, a self-certification using FERC Form 556 updating

45

the Project's prior certification or self-certification, as applicable, to include any changes that have occurred as a result of the Acquisition. Each such self-certification shall comply with all applicable FERC rules and regulations.

5.19.2 Cause each applicable Project Company to receive all necessary approvals under the law (including applicable FERC rules and regulations) before selling any electrical energy to any Person other than Edison.

5.20 POST-CLOSING REAL ESTATE MATTERS. Within the Applicable Post-Closing Period, provide to Administrative Agent updated ALTA surveys and updated ALTA lender's title insurance policies (reflecting such updated surveys) that cover all of the real property interests held by the Project Companies (based on each Project as it exists as of the Closing Date) (such provision by Borrower, the "Post-Closing Title Work"); provided, that (a) no such surveys or title insurance policies shall be provided with respect to those interests (and the real property associated therewith) that Administrative Agent determines do not require surveying and (b) no lender's title insurance policies shall be provided for any real property interests located in Mono County, California. Such updated surveys and title insurance policies shall demonstrate that the Project Companies have all material real property interests necessary to operate the Projects in accordance with the Projections, and shall not show any material title exceptions or Liens that could reasonably be expected to have a Material Adverse Effect (other than the Title Exceptions and the Liens created under the Collateral Documents) which were not disclosed on the surveys delivered prior to November 14, 2003 or the title policies or commitments delivered as of the Closing Date.

5.21 MINIMUM MWH. If any of the Projects fails to generate in any year 97% or more of the anticipated megawatt-hours (determined by reference to the Projections), at Borrower's cost, promptly deliver to Administrative Agent an updated GeothermEx Report.

5.22 CAPITAL EXPENDITURES. With respect to the capital expenditures anticipated to be made during the 2004 and 2005 calendar years (as set forth in the GeothermEx Report, the Independent Engineer's Report and the Projections), cause each applicable Project Company to make all such capital expenditures and in all material respects complete such capital expenditure projects in the manner and in the time provided for in the GeothermEx Report, the Independent Engineer's Report and the Projections; provided, however, that with respect to the Mammoth Project, Mammoth Lakes shall not be obligated to undertake such capital expenditures unless and to the extent that the Constellation Entities shall have approved such capital expenditures as and to the extent required under the Governing Documents of Mammoth Lakes. Borrower, OrMammoth and Mammoth Lakes shall use their respective commercially reasonable efforts to cause the Constellation Entities to grant all approvals necessary under the Governing Documents of Mammoth Lakes to undertake and complete such capital expenditures.

5.23 CALCULATIONS. In no event later than fifteen Banking Days after each Principal Repayment Date, calculate and deliver to Administrative Agent (a) the Average Debt Service Coverage Ratio for the twelve-month period immediately preceding such Principal Repayment Date and, for each Principal Repayment Date on or before December 31, 2004, the Blended Debt Service Coverage Ratio for such Principal Repayment Date, (b) Borrower's then-current forecast

of cash flow and (c) each Project's actual megawatt-hours for the applicable prior quarter or year. The calculations hereunder shall be used in determining (i) the application and distribution of funds pursuant to Section 6.19 of this Agreement and Sections 3.1.2(b) and 3.6.2 of the Depositary Agreement and (ii) compliance with Sections 5.21 and 7.1.17 of this Agreement.

5.24 INDEMNIFICATION.

5.24.1 Indemnify, defend and hold harmless Administrative Agent and each Bank, and in their capacities as such, their respective officers, directors, shareholders, controlling Persons, employees and agents (collectively, the "Indemnitees") from and against and reimburse the Indemnitees for:

(a) any and all claims, obligations, liabilities, losses, damages, injuries (to Person, property, or natural resources), penalties, actions, suits, judgments, costs and expenses (including reasonable attorney's fees) of whatever kind or nature, whether or not well founded, meritorious or unmeritorious, demanded, asserted or claimed against any such Indemnatee (collectively, "Subject Claims") in any way relating to, or arising out of or in connection with this Agreement or the other Operative Documents to which it is a party, except for claims by a Loan Party against an Indemnatee that are in whole or in part successful;

(b) any and all Subject Claims arising in connection with the Release or presence of any Hazardous Substances at any Project, whether foreseeable or unforeseeable, including all costs of removal, investigation, remediation and disposal of such Hazardous Substances, all reasonable costs required to be incurred in (i) determining whether any Project is in compliance and (ii) causing any Project to be in compliance, with all applicable Legal Requirements, all reasonable costs associated with claims for damages to Persons or property, and reasonable attorneys' and consultants' fees and court costs; and

(c) any and all Subject Claims in any way relating to, or arising out of or in connection with any claims, suits or liabilities against any Loan Party to the extent related to any of the Projects or the transactions contemplated by the Operative Documents.

5.24.2 The foregoing indemnities shall not apply with respect to an Indemnatee to the extent arising as a result of the gross negligence or willful misconduct of such Indemnatee, but shall continue to apply to other Indemnitees.

5.24.3 The provisions of this Section 5.24 shall survive foreclosure of the Collateral Documents and satisfaction or discharge of the Obligations, and shall be in addition to any other rights and remedies of Administrative Agent and any Bank.

5.24.4 In case any action, suit or proceeding shall be brought against any Indemnatee, such Indemnatee shall notify Borrower of the commencement thereof, and Borrower shall be entitled, at Sponsor's expense, acting through counsel reasonably acceptable to such Indemnatee, to participate in the defense thereof.

5.24.5 Any Indemnatee shall be entitled to compromise or settle such Subject Claim.

5.24.6 Upon payment of any Subject Claim by Borrower pursuant to this Section 5.24 or other similar indemnity provisions contained herein to or on behalf of an Indemnatee, Borrower, without any further action, shall be subrogated to any and all claims that such Indemnatee may have relating thereto,

and such Indemnatee shall cooperate with Borrower and Borrower's insurance carrier and give such further assurances as are necessary or advisable to enable Borrower vigorously to pursue such claims.

5.24.7 Any amounts payable by Borrower pursuant to this Section 5.24 shall be regularly payable within 10 Banking Days after Borrower receives an invoice for such amounts from any applicable Indemnatee, and if not paid within such 10 Banking Day period shall bear interest at the lesser of (a) the Default Rate and (b) the maximum rate payable under applicable Legal Requirements. The obligations of Borrower under this Section 5.24 shall be deemed to be part of the Obligations.

5.24.8 Notwithstanding anything to the contrary set forth herein, Borrower shall not, in connection with any one legal proceeding or claim, or separate but related proceedings or claims arising out of the same general allegations or circumstances, in which the interests of the Indemnitees do not materially differ, be liable to the Indemnitees (or any of them) under any of the provisions set forth in this Section 5.24 for the fees and expenses of more than one separate firm of attorneys (which firm shall be selected by the affected Indemnitees, or upon failure to so select, by Administrative Agent).

5.24.9 If, for any reason whatsoever, the indemnification provided under this Section 5.24 is unavailable to any Indemnatee or is insufficient to hold it harmless to the extent provided in this Section 5.24, then provided such payment is not prohibited by or contrary to any applicable Legal Requirement or public policy, Borrower shall contribute to the amount paid or payable by such Indemnatee as a result of the Subject Claim in such proportion as is appropriate to reflect the relative economic interests of Borrower and its Affiliates on the one hand, and such Indemnatee on the other hand, in the matters contemplated by this Agreement as well as the relative fault of Borrower (and its Affiliates) and such Indemnatee with respect to such Subject Claim, and any other relevant equitable considerations.

5.24.10 Nothing in this Section 5.24 shall constitute a release by Borrower of any claims that it has as a result of a breach or a default by any of the Secured Parties of their respective obligations under this Agreement or any other Credit Document.

ARTICLE 6 NEGATIVE COVENANTS

Borrower covenants and agrees that until the repayment in full in cash of all Obligations (other than those contingent Obligations that are intended to survive the termination of this Agreement and the other applicable Credit Documents) Borrower shall not, and shall cause each Guarantor and Non-Guarantor, as applicable, not to:

48

6.1 INDEBTEDNESS. Create, incur or suffer to exist any Debt of Borrower, the Guarantors and the Non-Guarantors, other than Permitted Debt in an aggregate amount (other than the Loans) not to exceed at any time 8% of the aggregate of (a) the amount of the Total Senior Loan Commitment and (b) if applicable, the Lease Financing.

6.2 LIENS. Create, assume or suffer to exist any Lien, securing a charge or obligation on any Project or on any of the Collateral or of any Loan Party (other than Sponsor and Ormat Technologies), real or personal, whether now owned or hereafter acquired, except Permitted Liens.

6.3 SALE OR LEASE OF ASSETS. Sell, lease, assign, transfer or otherwise dispose of assets, whether now owned or hereafter acquired, except (a) in the ordinary course of its business and as contemplated by the Project Documents, (b) to the extent that such asset is unnecessary, worn out or no longer useful

or usable in connection with the operation or maintenance of the applicable Project, (c) any asset with a fair market value not in excess of \$100,000, or, in any one calendar year, assets with an aggregate fair market value not in excess of \$500,000, and, in each case, at fair market value; provided that, in the case of clause (a), (b) or (c), no such sale, lease, assignment, transfer or other disposition shall be permitted if such sale, lease, assignment, transfer or other disposition could reasonably be expected to have a Material Adverse Effect. Upon any such sale, lease, assignment, transfer or other disposition of any such assets, all Liens in favor of any Secured Party, including the Liens created pursuant to the Collateral Documents, relating to such asset shall be released.

6.4 CHANGE IN BUSINESS. Change the nature of its business or expand its business beyond the business contemplated by the Operative Documents and the Lease Financing. Borrower shall conduct no business, hold no assets and have no liabilities, other than (a) its ownership interests in OrHeber 1, OrHeber 2, OrHeber 3, ORNI, OrMammoth, SIGC, HGC and HFC and (b) its rights, liabilities and obligations under its Governing Documents, the Lease Financing and the Credit Documents to which it is a party. Each of OrHeber 1 OrHeber 2, OrHeber 3, ORNI and OrMammoth shall conduct no business, hold no assets and have no liabilities, other than (i) its ownership interests in the applicable Guarantor or Non-Guarantor and (ii) its liabilities under its Governing Documents, the Acquisition Agreement, the agreements set forth on Exhibit G-5, and the Credit Documents to which it is a party. Each Project Company shall conduct no business, hold no assets and have no liabilities, other than in connection with the business of operating and using its applicable Project.

6.5 CHANGE OF NAME. Change its name, principal place of business, organizational identification number or jurisdiction of incorporation or formation, as applicable, without giving Administrative Agent at least 45 days' prior written notice.

6.6 INVESTMENTS. Make any investments (whether by purchase of stocks, bonds, notes or other securities, loan, extension of credit, advance or otherwise) other than (a) Permitted Investments, (b) the Lease Buyout and (c) the Mammoth Ownership Event; provided that, for purposes of this Section 6.6, capital expenditures provided for in the then-current Capital Expenditures Budget shall not constitute investments.

49

6.7 FORMATION OF SUBSIDIARIES. Create any new Subsidiary or become a joint venturer in any joint venture.

6.8 FUNDAMENTAL CHANGES. Enter into any merger, consolidation or amalgamation, or liquidate, dissolve or wind up or terminate itself (other than a Permitted Reorganization).

6.9 TRANSACTIONS WITH AFFILIATES.

6.9.1 Enter into any transaction or series of transactions relating to any Project with or for the benefit of an Affiliate without the prior written approval of the Required Banks, other than (a) the Project Documents in effect on the Closing Date, and the transactions permitted thereby, (b) any employment, noncompetition or confidentiality agreement entered into by such Loan Party with any of its employees, officers or directors in the ordinary course of business, (c) the Project Documents entered into by any Project Company and any such Affiliate for the purpose of providing the applicable Project with electrical energy to service its internal power requirements (provided that (i) the IID is obligated to provide such power requirements in the event that such Affiliate cannot serve such power requirements and (ii) such Project Document is materially more favorable to such Project Company than any Project Document which would be obtainable for a comparable transaction with the IID), (d) transactions with a fair market value not in excess of \$500,000 in any one

calendar year which are no less favorable to such Project Company than would be obtainable for a comparable transaction in arms-length dealings with an unrelated third party, and (e) as otherwise expressly permitted or contemplated by the Credit Documents. Notwithstanding anything to the contrary contained in this Section 6.9.1, the applicable Project Company may enter into any Project Document with respect to the capital expenditures to be performed during the 2004 or 2005 calendar year in the manner described in the GeothermEx Report or the Independent Engineer's Report without the consent of Administrative Agent or any of the other Banks.

6.9.2 Enter into any operation and maintenance agreements (including any O&M Agreement) or engineering, procurement or construction contracts relating to any Project pursuant to which such Project Company is obligated to pay such Affiliate (including any Operator) any profits or bonuses.

6.10 CERTAIN RESTRICTIONS ON CHANGES TO GOVERNING DOCUMENTS. Amend, supplement, give any consent under or otherwise modify its Governing Documents in a manner which is inconsistent with or violates the terms of, or could reasonably be expected to prevent compliance with any of the terms of, any Credit Document or any Major Project Document or could reasonably be expected to result in a Material Adverse Effect.

6.11 REGULATIONS. Directly or indirectly apply any part of the proceeds of any Loan, any Equity Funds, and any Subordinated Loans received by Borrower or other funds or revenues received by any Subsidiary thereof to the "buying", "carrying" or "purchasing" of any margin stock within the meaning of Regulations T, U or X of the Federal Reserve Board, or any regulations, interpretations or rulings thereunder.

50

6.12 AMENDMENT OF PROJECT DOCUMENTS.

6.12.1 Terminate (other than in accordance with its terms), amend, supplement or otherwise modify (except for any amendments to the Material Real Property Documents, to the extent that such amendments are in the form attached as Exhibit B to that certain Settlement Agreement dated October 6, 2003, among HGC, HFC, SIGC, Covanta and each of the other parties thereto), or grant any waivers or consents under, or agree to any contract variation or discretionary or other change that requires the consent or agreement of such Loan Party (each, a "Project Document Modification") under any Major Project Documents, including the GE Lease and the Power Purchase Agreements.

6.12.2 Agree to any Project Document Modification under any Project Document other than a Major Project Document unless such Project Document Modification (a) could not reasonably be expected to have a Material Adverse Effect, (b) is not reasonably likely to materially impair or reduce the maximum capacity, value, efficiency, utility, output, performance, reliability, durability or availability of the applicable Project, or materially increase O&M Costs, or materially decrease Project Revenues, and (c) is not otherwise prohibited under the Credit Documents.

6.13 ASSIGNMENT.

6.13.1 Assign its rights under any of the Credit Documents or under any Major Project Document to any Person (other than in connection with a Permitted Reorganization).

6.13.2 Consent to the assignment of any obligations under any Major Project Document by any counterparty thereto (other than any assignment made (a) by GECC to SIGC in connection with the Lease Buyout, (b) by Sponsor of the SIGC O&M Agreement pursuant to Section 5.10.3 or (c) by any counterparty to a Material Real Property Document).

6.14 ACCOUNTS. Maintain, establish or use any account other than the Accounts; provided that (a) SIGC may maintain each account which it is required to maintain under the GE Lease (provided, further, that, upon the termination of the GE Lease, all amounts on deposit in the accounts maintained under the GE Lease and which are released to SIGC shall be transferred to the Revenue Account), (b) Mammoth Lakes may maintain each account which it is required to maintain under its Governing Documents or that is existing on the Closing Date (provided, further, that, upon any Mammoth Ownership Event, all amounts on deposit in such accounts shall be transferred to the Revenue Account), and (c) each of OrHeber, OrMammoth and Borrower may maintain a checking account (an "Operating Account") with a maximum aggregate balance not to exceed \$60,000.

6.15 HAZARDOUS MATERIALS. Release into the environment any Hazardous Substances in violation of any Hazardous Substance Laws, Legal Requirements or the Project's Permits, except for (a) temporary unplanned exceedences not allowed under any Project's Permits, which temporary unplanned exceedences could not reasonably be expected to have a Material Adverse Effect and which a Loan Party is diligently and in good faith attempting to correct and (b) unintentional violations with respect to which (i) the Release is not continuing or

51

reasonably likely to re-occur and is not reasonably susceptible to prevention or cure, (ii) there are no unsatisfied reporting and/or remediation requirements under applicable Hazardous Substance Laws, Legal Requirements or applicable Permits, (iii) no non-monetary penalties or sanctions have been imposed or are reasonably likely to be imposed (except for the remediation of such violation) under applicable Hazardous Substance Laws, Legal Requirements or applicable Permits, and (iv) the Release could not reasonably be expected to materially impair the value of any Site or any other Collateral, and could not otherwise reasonably be expected to have a Material Adverse Effect.

6.16 ADDITIONAL PROJECT DOCUMENTS. Enter into, or become a party to, any Additional Project Document without the consent of Administrative Agent, which consent shall not unreasonably be withheld, conditioned or delayed. Notwithstanding anything to the contrary contained in this Section 6.16, the applicable Project Company may enter into any Project Document with respect to the capital expenditures to be performed during the 2004 or 2005 calendar year in the manner described in the GeothermEx Report or the Independent Engineer's Report without the consent of Administrative Agent or any of the other Banks.

6.17 REAL PROPERTY ACQUISITIONS. Acquire or lease any real property or other interest in real property (excluding the acquisition (but not the exercise) of any options to acquire any such interests in real property) other than the real property interests acquired prior to the Closing Date, unless Borrower shall have delivered to Administrative Agent a "Phase I" environmental report with respect to such real property and, if a "Phase II" environmental review is warranted (as reasonably determined by Administrative Agent upon its review of such "Phase I" environmental report), a "Phase II" environmental report, in each case, along with a corresponding reliance letter from the consultant issuing such report(s), confirming, in form and substance reasonably satisfactory to Administrative Agent, either that no Hazardous Substances were found in, on or under such real property of a nature or in concentrations that could reasonably be expected to impose on the Loan Parties a material environmental liability (other than Ormat Technologies or Sponsor).

6.18 ERISA. Maintain, contribute to, or become obligated to contribute to, or become subject to any liability under or relating to any ERISA Plan.

6.19 DIVIDENDS. Declare or make any distribution or dividend, unless the following conditions have been satisfied (the "Restricted Payments Conditions"):

(a) such dividend or distribution is on a date occurring within 45 days

after the immediately preceding Principal Repayment Date;

(b) no Event of Default or Potential Event of Default has occurred and is continuing as of the date of such applicable dividend or distribution, and such dividend or distribution would not cause an Event of Default or Potential Event of Default;

(c) with respect to each such dividend or distribution which is on a date occurring prior to December 31, 2004, (i) the Blended Debt Service Coverage Ratio is greater than or equal to 1.25 to 1, and (ii) the Average Debt Service Coverage Ratio for each quarterly

52

period immediately preceding or ending on the applicable Principal Repayment Date (but after the Closing Date) is greater than or equal to the projected Average Debt Service Coverage Ratio for each such quarterly period (as set forth in the Projections);

(d) with respect to each such dividend or distribution which is on a date occurring on or after December 31, 2004, the Average Debt Service Coverage Ratio for the four-quarter period immediately preceding the applicable Principal Repayment Date is greater than or equal to 1.25 to 1; and

(e) Borrower's forecast of cash flow, delivered to Administrative Agent pursuant to Section 5.23 and approved by Administrative Agent in its sole discretion, does not indicate an inability to amortize the Loans (due to technical reasons and/or contractual issues).

Notwithstanding the foregoing, nothing in this Section 6.19 shall prohibit (i) distributions or dividends by the Guarantors or Non-Guarantors to Borrower or (ii) distributions or dividends by Borrower to Sponsor pursuant to Section 2.2 of the Sponsor Guaranty.

6.20 POWER SALES.

6.20.1 With respect to Borrower, any Guarantor or any Non-Guarantor (other than the Project Companies), sell any electrical energy, capacity or ancillary services to any Person other than sales of renewable energy credits.

6.20.2 With respect to any Project Company, sell any electrical energy, capacity or ancillary services to any Person, other than to Edison under the Power Purchase Agreements and sales of renewable energy credits.

6.21 CAPITAL EXPENDITURES; GEOTHERMAL RESOURCE DEVELOPMENT. Without the prior written consent of the Required Banks (which consent may be withheld in their respective sole discretion), cause any Loan Party to take any action (including the making of capital expenditures) for the purpose of (a) expanding any of the geothermal fields which currently service any of the Projects, (b) developing new geothermal resources at or contiguous to any of the Sites (including the Mammoth Lakes and HFC geothermal fields) or (c) drilling new wells of any type at any of the Sites (including the Mammoth Lakes and HFC geothermal fields); provided that no such consent shall be required for any such actions related to the Projects which are to be performed during the 2004 or 2005 calendar year in the manner described in the GeothermEx Report and the Independent Engineer's Report. The parties hereby acknowledge that no such consent shall be required for geothermal field maintenance (including pumps, well-workovers, replacement wells and make-up wells) unless such maintenance could reasonably be expected to have a Material Adverse Effect.

6.22 INTEREST RATE AGREEMENTS. Secure any of its obligations under any Interest Rate Agreement with any portion of the Collateral.

7.1 EVENTS OF DEFAULT. The occurrence of any of the following events shall constitute an event of default (each, an "Event of Default") hereunder:

7.1.1 Failure to Make Payments. Any Loan Party shall fail to perform in accordance with the terms of this Agreement or any other Credit Document its obligation (if any) to pay (a) any principal on any Loan on the date that such sum is due, (b) any interest on any Loan within three days after the date such sum is due, (c) any scheduled fee, cost, charge, Make-Whole Premium, or sum due hereunder or under any other Credit Documents within three days of the date that such sum is due, or (d) any other fee, cost, charge or other sum due under this Agreement or the other Credit Documents within five days after written notice that such sum is due.

7.1.2 Bankruptcy; Insolvency. Any Loan Party (other than Ormat Technologies) or any other Major Project Participant (so long as such Major Project Participant shall have outstanding or unperformed obligations (other than warranty obligations) under the Operative Document to which it is a party) shall become subject to a Bankruptcy Event; provided that, solely with respect to a Bankruptcy Event with respect to a Major Project Participant other than any Loan Party (other than Ormat Technologies), no Event of Default shall occur as a result of such Bankruptcy Event if Borrower is attempting to obtain a Replacement Obligor for the affected party and does so within 30 days thereof.

7.1.3 Defaults Under Other Indebtedness. Borrower, any Guarantor, any Non-Guarantor or, prior to the termination of the Sponsor Guaranty pursuant to the terms hereof and thereof, Sponsor shall default for a period beyond any applicable grace period (a) in the payment of any principal, interest or other amount due under any agreement involving Debt and the outstanding principal amount or amounts payable under any such agreement equals or exceeds (i) in the case of Borrower or any Project Company, \$1,000,000 in the aggregate, (ii) in the case of any Guarantor or Non-Guarantor that is not a Project Company, \$100,000 in the aggregate and (iii) in the case of Sponsor, \$5,000,000 in the aggregate, or (b) in the performance of any obligation due under any agreement involving Debt if in the case of this clause (b), pursuant to such default, the holder of the obligation concerned has the right to accelerate the maturity of any Debt evidenced thereby which equals or exceeds (i) in the case of Borrower or any Project Company, \$1,000,000 in the aggregate, (ii) in the case of any Guarantor or Non-Guarantor that is not a Project Company, \$100,000 in the aggregate and (iii) in the case of Sponsor, \$5,000,000 in the aggregate.

7.1.4 Judgments.

(a) A final judgment or judgments shall be entered against (i) Sponsor, at any time prior to the termination of the Sponsor Guaranty pursuant to the terms hereof and thereof, in the amount of \$5,000,000 or more individually or (ii) Borrower, any Guarantor or any Non-Guarantor in the amount of \$1,000,000 or more individually or in the aggregate or involving injunctive relief requiring suspension or abandonment of the operation of a Project (other than, in each case, (A) a judgment which is fully covered by insurance, discharged, bonded pending appeal or satisfied within 60 days after its entry, or (B) a judgment, the execution of which is

effectively stayed within 60 days after its entry but only for 60 days after the date on which such stay is terminated or expires).

(b) Any order, judgment or decree shall be entered against any Loan

Party (other than Ormat Technologies) decreeing the dissolution or split up of such Person and such order shall remain undischarged or unstayed for a period in excess of 30 days.

7.1.5 ERISA. If any Loan Party (other than Ormat Technologies) or any ERISA Affiliate should establish, maintain, contribute to or become obligated to contribute to any ERISA Plan and (a) a Reportable Event shall have occurred with respect to any ERISA Plan and, within 30 days after the reporting of such Reportable Event to Administrative Agent by Borrower (or Administrative Agent otherwise obtaining knowledge of such event) and the furnishing of such information as Administrative Agent may reasonably request with respect thereto, Administrative Agent shall have notified Borrower in writing that (i) Administrative Agent or Majority Banks has made a determination that, on the basis of such Reportable Event, there are reasonable grounds for the termination of such ERISA Plan by the PBGC or for the appointment by the appropriate United States District Court of a trustee to administer such ERISA Plan and (ii) as a result thereof, an Event of Default exists hereunder; or (b) a trustee shall be appointed by a United States District Court to administer any ERISA Plan; or (c) the PBGC shall institute proceedings to terminate any ERISA Plan; or (d) a complete or partial withdrawal by any Loan Party (other than Ormat Technologies) or any ERISA Affiliate from any Multiemployer Plan shall have occurred and, within 30 days after the reporting of any such occurrence to Administrative Agent by Borrower (or Administrative Agent otherwise obtaining knowledge of such event) and the furnishing of such information as Administrative Agent or Majority Banks may reasonably request with respect thereto, Administrative Agent shall have notified Borrower in writing that Administrative Agent has made a determination that, on the basis of such occurrence, an Event of Default exists hereunder; provided that before any event shall constitute an Event of Default under this Section 7.1.5, the events described in this Section 7.1.5 must, individually or together, result in total liability to Borrower, any applicable Loan Party (other than Ormat Technologies) and all ERISA Affiliates in excess of \$5,000,000.

7.1.6 Breach of Terms of Agreement.

(a) Defaults Without Cure Periods. (i) Any Loan Party shall fail to perform or observe any of the covenants set forth in Section 5.1, 5.8(a), 5.12.2, 5.14, 5.17 or 5.18 or Article 6 of this Agreement; or (ii) Sponsor shall fail to perform or observe any of the covenants set forth in Article 2 or Section 4.1 or 4.6 of the Sponsor Guaranty.

(b) Defaults With Fifteen Day Cure Periods. Borrower shall fail to perform or observe any of the covenants set forth in Section 5.6.2 of this Agreement or Sponsor shall fail to perform or observe any of the covenants set forth in Section 4.7 or 4.8 of the Sponsor Guaranty, and such failure shall continue unremedied for a period of fifteen days after such Loan Party becomes aware thereof or receives written notice thereof from Administrative Agent.

(c) Other Defaults. Any Loan Party shall fail to perform or observe any of the covenants set forth hereunder or any other Credit Document not otherwise specifically provided

for in Section 7.1.6(a), Section 7.1.6(b) or elsewhere in this Article 7, and such failure shall otherwise continue unremedied for a period of 30 days after such Loan Party becomes aware thereof or receives written notice thereof from Administrative Agent; provided, however, that, if (i) such failure cannot be cured within such 30 day period, (ii) such failure is capable of being cured, (iii) such Loan Party is proceeding with diligence and in good faith to cure such failure, (iv) the existence of such failure has not had and could not, after considering the nature of the cure, be reasonably expected to have a Material Adverse Effect, and (v) Administrative Agent shall have received an officer's certificate signed by a Responsible Officer to the effect of clauses

(i), (ii), (iii) and (iv) above and stating what action such Loan Party is taking to cure such failure, then such 30 day cure period shall be extended to such date, not to exceed a total of 90 days, as shall be necessary for such Loan Party diligently to cure such failure.

7.1.7 Loss of Collateral. Any substantial portion of the Collateral is damaged, seized or appropriated without appropriate insurance proceeds (subject to the underlying deductible) or without fair value being paid therefor so as to allow replacement of such Collateral and/or prepayment of Loans and to allow the Loan Parties (other than Ormat Technologies) to continue satisfying their respective obligations hereunder and under the other Operative Documents.

7.1.8 Regulatory Status.

(a) Any Loan Party (other than Ormat Technologies) shall suffer an Adverse PUHCA Event or shall otherwise become subject to, or not exempt from financial, organizational or rate regulation as a "holding company" or a "subsidiary company" of a "holding company" under PUHCA, as a "public utility" or "electric utility" under the FPA, or as a public utility under the laws of the State of California.

(b) Any of the Projects shall cease to be a QF.

7.1.9 Abandonment. Any Project shall be abandoned or operation thereof shall be suspended for a period of more than 30 consecutive days for any reason (other than force majeure); provided that a forced outage or scheduled outage of a Project shall not constitute abandonment or suspension of the Project, so long as the applicable Project Company is diligently attempting to end such outage and such outage does not result in a default under any Major Project Document.

7.1.10 Unenforceability of Credit Documents.

(a) Any material provision of any Credit Document shall cease to be in full force and effect (other than by reason of a release of Collateral thereunder in accordance with the terms of the Credit Documents, the satisfaction in full of the obligations of the Loan Parties under the Credit Documents or any other termination of a Credit Document in accordance with the terms thereof) or any Credit Document shall be declared null and void by a Governmental Instrumentality.

56

(b) Subject to Section 3.3, Administrative Agent shall not have a valid and perfected Lien in the Collateral. Subject to Section 3.3, Administrative Agent shall not have a valid and perfected first priority Lien in the Collateral (subject to (i) with respect to the Collateral described in Section 4.24(i), the Permitted Liens described in clauses (a) and (e) of the definition of "Permitted Liens" and, to the extent required by Governmental Rule, those matters described in clauses (b), (c) and (g) of the definition of "Permitted Liens", (ii) with respect to the Collateral described in Sections 4.24(ii) and 4.24(iii), the Permitted Liens described in clause (a) of the definition of "Permitted Liens" and, to the extent required by Governmental Rule, those matters described in clause (b) of the definition of "Permitted Liens" and (iii) with respect to the Uninsured Real Property Interests, those matters described in clause (j) of the definition of "Permitted Liens").

(c) Any Loan Party shall contest the validity or enforceability of any Credit Document in writing or deny in writing that it has any further liability prior to the payment in full of all obligations of the Loan Parties under the Credit Documents.

7.1.11 Change of Control.

(a) Any of the following shall occur: (i) any sale, lease, exchange or

other transfer (in one transaction or a series of related transactions) of all or substantially all of the assets of Borrower, any Guarantor or any Non-Guarantor to any Person or group of related Persons, together with any Affiliates thereof; (ii) the holders of the ownership interests of any Loan Party (other than Ormat Technologies) shall approve any plan or proposal for the liquidation or dissolution of any Loan Party (other than Ormat Technologies); (iii) Sponsor shall cease to directly own 100% of the voting and economic interests in Borrower; (iv) Borrower shall cease to directly own 100% of the voting and economic interests in OrHeber 1, 100% of the voting and economic interests in OrMammoth, 50% of the voting and economic interests in HFC and 50% of the voting and economic interests in HGC; (v) OrHeber 1 shall cease to directly own 50% of the voting and economic interests in HFC, 50% of the voting and economic interests in HGC and 100% of the voting and economic interests in ORNI; (vi) ORNI shall cease to directly own 100% of the voting and economic interests in OrHeber 2 and 100% of the voting and economic interests in OrHeber 3; (vii) OrHeber 2 shall cease to directly own 99.998% of the voting and economic interests in ORNI; (viii) OrHeber 3 shall cease to directly own 0.002% of the voting and economic interests in SIGC; or (ix) OrMammoth shall cease to directly own 100% of the voting and economic interests in Mammoth Lakes.

(b) Notwithstanding the provisions of Section 7.1.11(a), (i) the Loan Parties shall be permitted to undertake a Permitted Reorganization on or before December 31, 2004, and (ii) Sponsor shall be permitted to undertake a Permitted Sponsor Sale.

7.1.12 Loss of or Failure to Obtain Necessary Permits.

(a) Borrower, any Guarantor or any Non-Guarantor shall fail to obtain any Permit necessary for the ownership, leasing, maintenance or operation of any Project and such failure could reasonably be expected to have a Material Adverse Effect.

57

(b) Any Permit necessary for ownership, leasing, maintenance or operation of any Project shall be materially modified, revoked, canceled or not renewed by a Governmental Instrumentality (or otherwise ceases to be in full force and effect) and such modification, revocation, cancellation or non-renewal could reasonably be expected to have a Material Adverse Effect.

7.1.13 Misstatements; Omissions. Any representation or warranty made or deemed made by any Loan Party in any Credit Document to which such Loan Party is a party, shall be untrue or misleading in any material respect as of the time made; provided that, in respect of unintentional misrepresentations which are capable of being remedied and are made or deemed made after the Closing Date, any such unintentional misrepresentation shall not be deemed to be an Event of Default if such misrepresentation is corrected within 30 days of the occurrence thereof.

7.1.14 Project Document Defaults.

(a) Any Project Document shall cease to be valid and binding and in full force and effect; provided that any such event will not constitute an Event of Default if the applicable Project Company is attempting to replace such Project Document with the consent of the Required Banks and does so within 60 days of such event; provided, further, that an Event of Default shall occur under this paragraph only if the failure of such Project Document to remain valid and binding and in full force and effect could reasonably be expected to have a Material Adverse Effect.

(b) Any Project Document shall terminate or be terminated or canceled prior to its stated expiration date or any Project Company shall be in default (after the giving of any applicable notice and the expiration of any applicable grace period) under any of the Project Documents; provided that a default under

or termination or cancellation of any Project Document shall constitute an Event of Default only if (a) such default or termination could reasonably be expected to have a Material Adverse Effect or (b) such default could result in a Major Project Document being terminated by the applicable counterparty within five Banking Days.

(c) Any Major Project Participant shall be in default (after the giving of any applicable notice and the expiration of any applicable grace period) under any of the Major Project Documents; provided that a default under any Project Document shall constitute an Event of Default only if such default or termination could reasonably be expected to have a Material Adverse Effect.

7.1.15 Failure to Close Escrow. The Close of Escrow shall not have occurred on or before 5:00 p.m. (New York City time) on the Closing Date.

7.1.16 Failure to Meet Minimum Debt Service Coverage Ratio. The Average Debt Service Coverage Ratio for the twelve-month period immediately preceding the applicable Principal Repayment Date is less than 1.00 to 1, and any funds on deposit in the Debt Service

58

Reserve Account shall have been applied to the payment of fees, interest or principal on the Loans.

7.1.17 Failure to Meet Projections.

(a) (i) The Projects (taken as a whole) shall generate in any year less than 90% of the anticipated megawatt-hours (as set forth in the Projections) for such year, and (ii) the Projects (taken as a whole) shall have generated in the preceding three years (on average) less than 95% of the anticipated megawatt-hours (as set forth in the Projections) for such years.

(b) The Projects (taken as a whole) shall generate in any year less than 90% of the anticipated megawatt-hours (as set forth in the Projections) for such year; provided that such failure shall not be an Event of Default if (i) the Projects (taken as a whole) shall have generated in the preceding three years (on average) at least 95% of the anticipated megawatt-hours (as set forth in the Projections) for such years and (ii) within fifteen days of the end of such year, Borrower shall have provided Administrative Agent with a report describing (A) the actions Borrower and the applicable Project Companies are taking and have taken to correct and remedy such operating performance shortfalls, (B) the date by which such corrective actions will be completed (which date shall be on or before June 30 of the year after the year in which such failure arose), and (C) the causes of such operating performance shortfalls (it being acknowledged and agreed that (I) Administrative Agent may consult with consultants of its choosing, at the expense of Borrower, in respect of its evaluation of such report and (II) Administrative Agent shall have no approval rights with respect to such report); provided further that, if the Projects (taken as a whole) shall fail to generate 95% or more of the anticipated megawatt-hours (as set forth in the Projections) in each of the next two quarters following the end of the earlier of (x) June 30 of the relevant year and (y) the quarter during which such corrective actions have been fully implemented, then an Event of Default shall be deemed to have occurred.

7.1.18 Post-Closing Title Work. At the expiration of the Applicable Post-Closing Period, (a) the Non-Material Real Property Interests shall not be part of the Mortgaged Property or (b) the Liens granted to Administrative Agent (for the benefit of the Secured Parties) pursuant to the Collateral Documents shall not constitute as to the Non-Material Real Property Interests a valid and perfected Lien on such Non-Material Real Property Interests.

7.2 REMEDIES. Upon the occurrence and during the continuation of any Event

of Default, Administrative Agent and the Banks may, at the election of the Majority Banks, without further notice of default, presentment or demand for payment, protest or notice of non-payment or dishonor, or other notices or demands of any kind, all such notices and demands (other than notices required by the Credit Documents) being waived, exercise any or all of the following rights and remedies, in any combination or order that the Majority Banks may elect, in addition to such other rights or remedies as the Secured Parties may have hereunder, under the Collateral Documents or at law or in equity:

7.2.1 No Further Loans. Refuse, and Administrative Agent, and the Banks shall not be obligated, to continue any Loans, make any additional Loans, or make any payments, or

59

permit the making of payments, from any Account or other funds held by Administrative Agent under the Credit Documents or on behalf of any Loan Party (other than Ormat Technologies).

7.2.2 Cure by Agents. Without any obligation to do so, make disbursements or Loans to or on behalf of any Loan Party (other than Ormat Technologies) or disburse amounts from the Revenue Account to cure (a) any Event of Default hereunder and (b) any default and render any performance under any Project Document as the Majority Banks in their sole discretion may consider necessary or appropriate, whether to preserve and protect the Collateral or the Secured Parties' interests therein or for any other reason. All sums so expended, together with interest on such total amount at the Default Rate (but in no event shall the rate exceed the maximum lawful rate), shall be repaid by Borrower to Administrative Agent, as the case may be, on demand and shall be secured by the Credit Documents, notwithstanding that such expenditures may, together with amounts advanced under this Agreement, exceed the aggregate amount of the Total Senior Loan Commitment.

7.2.3 Acceleration. Declare and make all or a portion of the sums of accrued and outstanding principal and accrued but unpaid interest remaining under this Agreement, together with all unpaid fees, costs (including Liquidation Costs) and charges due hereunder or under any other Credit Document, immediately due and payable and require Borrower immediately, without presentment, demand, protest or other notice of any kind (other than notices required by the Credit Documents or by applicable Legal Requirements), all of which Borrower hereby expressly waives, to pay Administrative Agent or the Secured Parties an amount in immediately available funds equal to the aggregate amount of any outstanding Obligations; provided that, in the event of an Event of Default occurring under Section 7.1.2 with respect to any Loan Party, all such amounts shall become immediately due and payable without further act of Administrative Agent or the Secured Parties.

7.2.4 Cash Collateral. Apply or execute upon any amounts on deposit in any Account or any moneys of any Loan Party (other than Ormat Technologies) on deposit with Administrative Agent or any Secured Party in the manner provided in the UCC and other relevant statutes and decisions and interpretations thereunder with respect to cash collateral. Without limiting the foregoing, Administrative Agent shall have all rights and powers with respect to the Accounts and the contents of the Accounts as it has with respect to any other Collateral and may apply, or cause the application of, such amounts to the payment of interest, principal, fees, costs, charges or other amounts due or payable to Administrative Agent, Depositary Agent or the Secured Parties with respect to the Loans in such order as the Required Banks may elect in their sole discretion. Until such time as the Majority Banks so elect to exercise such rights and powers, amounts in the Revenue Account shall be applied as provided in Section 2.2(b) of the Depositary Agreement. Borrower shall not have any rights or powers with respect to such amounts except as expressly provided in this Section 7.2.4.

7.2.5 Possession of Projects. Enter into possession of any Project and perform any and all work and labor necessary to operate and maintain any such Projects, and all sums expended by Administrative Agent in so doing, together with interest on such total amount at the Default Rate, shall be repaid by Borrower to Administrative Agent upon demand and shall be secured by the Credit Documents, notwithstanding that such expenditures may, together with

60

amounts advanced under this Agreement, exceed the aggregate amount of the Total Senior Loan Commitment.

7.2.6 Remedies Under Credit Documents. Exercise, and direct Administrative Agent to exercise, any and all rights and remedies available to it under any of the Credit Documents, including judicial or non-judicial foreclosure or public or private sale of any of the Collateral pursuant to the Collateral Documents.

ARTICLE 8 SCOPE OF LIABILITY

Except as expressly set forth in this Article 8, notwithstanding anything in this Agreement or the other Credit Documents to the contrary, the Banks shall have no claims with respect to the transactions contemplated by the Operative Documents against Sponsor or any of its Affiliates (other than Borrower, the Guarantors and the Non-Guarantors), or any of Sponsor's or Sponsor's Affiliates' shareholders (other than Borrower, the Guarantors and the Non-Guarantors), partners (other than Borrower, the Guarantors and the Non-Guarantors), members (other than Borrower, the Guarantors and the Non-Guarantors), officers, agents, managers, directors or employees (collectively, the "Nonrecourse Persons"). The Banks' recourse against the Nonrecourse Persons shall be limited to the Collateral (including the Projects, all Project Revenues, all Loan proceeds, Insurance Proceeds, Eminent Domain Proceeds, and all income or revenues of the foregoing) as and to the extent provided herein and in the Collateral Documents; provided that the foregoing provision of this Article 8 shall not (a) constitute a waiver, release or discharge of any of the indebtedness, or of any of the terms, covenants, conditions, or provisions of this Agreement or any other Credit Document and the same shall continue (but without personal liability to the Nonrecourse Persons) until fully paid, discharged, observed, or performed; (b) limit or restrict the right of Administrative Agent or any Secured Party (or any assignee, beneficiary or successor to any of them) to name Borrower or any other Person as a defendant in any action or suit for a judicial foreclosure or for the exercise of any other remedy under or with respect to this Agreement or any other Collateral Document or Credit Document, or for injunction or specific performance, so long as no judgment in the nature of a deficiency judgment shall be enforced against any Nonrecourse Person, except as set forth in this Article 8; (c) in any way limit or restrict any right or remedy of Administrative Agent or any Secured Party (or any assignee or beneficiary thereof or successor thereto) with respect to, and each of the Nonrecourse Persons shall remain fully liable to the extent that it would otherwise be liable for its own actions with respect to, any fraud, willful breaches of covenants, willful misrepresentation, common law waste or misappropriation of Project Revenues, Loan proceeds, Insurance Proceeds, Eminent Domain Proceeds or any other earnings, revenues, rents, issues, profits or proceeds from or of the Collateral, that should or would have been paid as provided herein or paid or delivered to Administrative Agent or any Secured Party (or any assignee or beneficiary thereof or successor thereto) towards any payment required under this Agreement or any other Credit Document; (d) affect or diminish or constitute a waiver, release or discharge of any specific written obligation, covenant, or agreement in respect of the transactions contemplated by the Operative Documents made by any of the Nonrecourse Persons or any security granted by the Nonrecourse Persons in support of the obligations of such Persons under

any Collateral Document (or as security for the obligations of Borrower), any Subsidiary Guaranty or the Sponsor Guaranty; and (e) limit the liability of any Person who is a party to any Project Document or has issued any certificate or other statement in connection therewith with respect to such liability as may arise by reason of the terms and conditions of such Project Document, certificate or statement (but subject to any limitation of liability in such Project Document) under relating solely to such liability of such Person as may arise under such referenced agreement, certificate or statement. The Banks shall have full recourse against Borrower, the Guarantors and the Non-Guarantors for all of their respective obligations under the Credit Documents. Notwithstanding anything to the contrary contained in any of the Credit Documents, no employee, officer, authorized representative, or director of any Loan Party (including Ormat Technologies, Sponsor, Borrower, the Guarantors and the Non-Guarantors) shall have any personal liability (as distinct from any corporate, partnership or limited liability company liability that any Loan Party may have under any of the Credit Documents as and to the extent that such liability is a result of such Loan Party being a "Loan Party") arising under or in connection with this Agreement, any other Credit Document or any transaction contemplated hereby or thereby. The limitations on recourse set forth in this Article 8 shall survive the termination of this Agreement and the indefeasible payment in full in cash and performance in full of the Obligations hereunder and under the other Operative Documents.

ARTICLE 9 AGENTS; SUBSTITUTION

9.1 APPOINTMENT, POWERS AND IMMUNITIES.

9.1.1 Each Bank hereby appoints and authorizes Administrative Agent to act as its agent and collateral agent hereunder and under the other Credit Documents, in each case with such powers as are expressly delegated to Administrative Agent by the terms of this Agreement and the other Credit Documents, together with such other powers as are reasonably incidental thereto. Administrative Agent shall not have any duties or responsibilities except those expressly set forth in this Agreement or in any other Credit Document, or be a trustee or a fiduciary for any Secured Party. Notwithstanding anything to the contrary contained herein, Administrative Agent shall not be required to take any action which is contrary to this Agreement or any other Credit Documents or any Legal Requirement or exposes Administrative Agent to any liability. Each of Administrative Agent, the Banks and any of their respective Affiliates shall not be responsible to any other Secured Party for (i) any recitals, statements, representations or warranties made by Borrower or its Affiliates contained in this Agreement, the other Credit Documents or in any certificate or other document referred to or provided for in, or received by Administrative Agent or any Secured Party under this Agreement or any other Credit Document, (ii) the value, validity, effectiveness, genuineness, enforceability or sufficiency of this Agreement, the other Credit Documents, any Notes or any other document referred to or provided for herein, or (iii) any failure by Borrower or its Affiliates to perform their respective obligations hereunder or thereunder. Administrative Agent may employ agents and attorneys-in-fact, and shall not be responsible for the negligence or misconduct of any such agents or attorneys-in-fact selected by it with reasonable care.

9.1.2 Administrative Agent and its directors, officers, employees or agents shall not be responsible for any action taken or omitted to be taken by it or them hereunder or under any other Credit Document or in connection herewith or therewith, except for its own gross negligence or willful misconduct. Without limiting the generality of the foregoing, (a) Administrative

Agent may treat the payee of any Note as the holder thereof until Administrative Agent receives written notice of the permitted assignment or transfer thereof in accordance with the requirements of the Credit Documents, including Section 9.14 of this Agreement, signed by such payee and in form satisfactory to Administrative Agent; (b) Administrative Agent may consult with legal counsel, independent public accountants and other experts selected by it and shall not be liable for any action taken or omitted to be taken in good faith by it in accordance with the advice of such counsel, accountants or experts; (c) Administrative Agent does not make any warranty or representation to any Secured Party for any statements, warranties or representations made in or in connection with any Operative Document; (d) Administrative Agent shall not have any duty to ascertain or to inquire as to the performance or observance of any of the terms, covenants or conditions of any Operative Document on the part of any party thereto, to inspect the property (including the books and records) of Borrower or any other Person or to ascertain or determine whether a Material Adverse Effect exists or is continuing; and (e) Administrative Agent shall not be responsible to any Secured Party for the due execution, legality, validity, enforceability, genuineness, sufficiency or value of any Operative Document or any other instrument or document furnished pursuant hereto. Except as otherwise provided under this Agreement and the other Credit Documents, Administrative Agent shall take such action with respect to the Credit Documents as shall be directed by the Required Banks or Majority Banks, as applicable in accordance with the terms of the Credit Documents.

9.2 RELIANCE. Administrative Agent shall be entitled to rely upon any certificate, notice or other document (including any cable, telegram, facsimile, electronic mail or telex) believed by it to be genuine and correct and to have been signed or sent by or on behalf of the proper Person or Persons, and upon advice and statements of legal counsel, independent accountants and other experts selected by it. As to any other matters not expressly provided for by this Agreement, Administrative Agent shall not be required to take any action or exercise any discretion, but shall be required to act or to refrain from acting upon instructions of the Required Banks or, where expressly provided, the Majority Banks or all Banks (except that Administrative Agent shall not be required to take any action which exposes Administrative Agent to personal liability or which is contrary to this Agreement, any other Credit Document or any Legal Requirement). Administrative Agent shall in all cases (including when any action by Administrative Agent alone is authorized hereunder, if Administrative Agent elects in its sole discretion to obtain instructions from the Required Banks) be fully protected in acting, or in refraining from acting, hereunder or under any other Credit Document in accordance with the instructions of the Required Banks (or, where so expressly stated, the Majority Banks or all Banks), and such instructions of the Required Banks (or Majority Banks or all Banks, where applicable) and any action taken or failure to act pursuant thereto shall be binding on all of the Secured Parties.

9.3 NON-RELIANCE. Each Bank represents that it has, independently and without reliance on Administrative Agent, or any other Bank, and based on such documents and information as it has deemed appropriate, made its own appraisal of the financial condition and affairs of the Loan Parties and its own decision to enter into this Agreement and agrees that it will, independently and without reliance upon Administrative Agent, or any other Bank, and based on such documents and information as it shall deem appropriate at the time, continue to make its own appraisals and decisions in taking or not taking action under this Agreement. Each of Administrative Agent and any Bank shall not be required to keep informed as to the performance or observance by any Loan Party or its Affiliates under this Agreement or any other document referred to or provided for herein or to make inquiry of, or to inspect the properties or books of any Loan Party or its Affiliates.

9.4 DEFAULTS; MATERIAL ADVERSE EFFECT. Administrative Agent shall not be deemed to have knowledge or notice of the occurrence of any Potential Event of

Default, Event of Default or Material Adverse Effect, unless such Person has received a notice from a Bank or Borrower, referring to this Agreement, describing such Potential Event of Default, Event of Default or Material Adverse Effect and indicating that such notice is a notice of the occurrence of such Potential Event of Default, Event of Default or Material Adverse Effect (as the case may be). If Administrative Agent receives such a notice of the occurrence of a Potential Event of Default, Event of Default or Material Adverse Effect, Administrative Agent shall give notice thereof to the Banks. Administrative Agent shall take such action with respect to such Potential Event of Default, Event of Default or Material Adverse Effect as is provided in Article 3, Article 7 or the terms of the Credit Documents, or if not provided for in Article 3, Article 7 or such Credit Documents, as Administrative Agent shall be reasonably directed by the Majority Banks; provided, however, that unless and until Administrative Agent shall have received such directions, Administrative Agent may (but shall not be obligated to) take such action, or refrain from taking such action, with respect to such Potential Event of Default, Event of Default or Material Adverse Effect as it shall deem advisable in the best interest of the Banks.

9.5 INDEMNIFICATION. Without limiting the Obligations of Borrower hereunder, each Bank agrees to indemnify Administrative Agent and its officers, directors, shareholders, controlling Persons, employees, agents and servants, ratably in accordance with their Proportionate Shares for any and all liabilities, obligations, losses, damages, penalties, actions, judgments, suits, costs, expenses or disbursements of any kind or nature whatsoever which may at any time be imposed on, incurred by or asserted against Administrative Agent or such Person in any way relating to or arising out of this Agreement or any documents contemplated by or referred to herein or therein or the transactions contemplated hereby or thereby or the enforcement of any of the terms hereof or thereof or of any such other documents (to the extent Borrower has not paid any such amounts pursuant to Section 5.24); provided, however, that no Bank shall be liable for any of the foregoing to the extent they arise from Administrative Agent's, or any such Person's gross negligence or willful misconduct. Administrative Agent or any such Person shall be fully justified in refusing to take or to continue to take any action hereunder or under any other Credit Document unless it shall first be indemnified to its satisfaction by the Banks against any and all liability and expense which may be incurred by it by reason of taking or continuing to take any such action. Without limitation of the foregoing,

each Bank agrees to reimburse Administrative Agent or any such Person promptly upon demand for its Proportionate Share of any out-of-pocket expenses (including counsel fees) incurred by Administrative Agent or any such Person in connection with the preparation, execution, administration or enforcement of, or legal advice in respect of rights or responsibilities under, the Operative Documents, to the extent that Administrative Agent or any such Person is not reimbursed for such expenses by Borrower.

9.6 SUCCESSOR AGENT. Administrative Agent may resign at any time by giving fifteen days' written notice thereof to the Secured Parties and Borrower, such resignation to become effective in the manner and at the time set forth below. Administrative Agent may be removed involuntarily at the request of Borrower or the Banks only for a material breach of its duties and obligations hereunder and under the other Credit Documents or for gross negligence or willful misconduct in connection with the performance of its duties hereunder or under the other Credit Documents and then only upon the affirmative vote of the Required Banks (excluding Administrative Agent from such vote and Administrative Agent's Proportionate Share (if any) of the Commitments from the amounts used to determine the portion of the Commitments necessary to constitute the required Proportionate Share of the remaining Banks). Upon any such resignation or removal of Administrative Agent, the Required Banks shall have the right, with the consent of Borrower (such consent not to be unreasonably withheld or

delayed) to appoint a successor Administrative Agent. If no successor Administrative Agent shall have been so appointed by the Required Banks and shall have accepted such appointment, within 30 days after the retiring Administrative Agent's giving of notice of resignation or the Banks' removal of the retiring Administrative Agent, the retiring Administrative Agent may, on behalf of the Secured Parties, with the consent of Borrower (such consent not to be unreasonably withheld or delayed), appoint a successor Administrative Agent hereunder, which shall be a Bank, if any Bank shall be willing to serve, and otherwise shall be a commercial bank having a combined capital and surplus of at least \$500,000,000. Upon the acceptance of any appointment as Administrative Agent under the Operative Documents by a successor Administrative Agent, such successor Administrative Agent shall thereupon succeed to and become vested with all the rights, powers, privileges and duties of the retiring Administrative Agent, and the retiring Administrative Agent shall be discharged from its duties and obligations as Administrative Agent only under the Credit Documents. After any retiring Administrative Agent's resignation or removal hereunder as Administrative Agent, the provisions of this Article 9 shall inure to its benefit as to any actions taken or omitted to be taken by it while it was Administrative Agent under the Operative Documents.

9.7 AUTHORIZATION. Each Secured Party hereby constitutes and appoints Administrative Agent, acting for and on behalf of itself and each of the Secured Parties and each successor or assign of Administrative Agent and the Secured Parties, the true and lawful attorney-in-fact of such Secured Party, with full power and authority in the place and stead of such Secured Party and in the name of such Secured Party, Administrative Agent or otherwise to (a) to execute, deliver and perform each of the Credit Documents to which Administrative Agent is or is intended to be a party, and each Bank agrees to be bound by all of the agreements of Administrative Agent contained in the Credit Documents, and (b) to release Liens on property that Borrower is permitted to sell or transfer pursuant to the terms of this Agreement or the other

65

Credit Documents and to enter into agreements supplemental hereto for the purpose of curing any formal defect, inconsistency, omission or ambiguity in this Agreement or any Credit Document to which it is a party.

9.8 OTHER ROLES. With respect to its Commitment, the Loans made by it and any Note issued to it, Administrative Agent in its individual capacity shall have the same rights and powers under the Operative Documents as any other Bank and may exercise the same as though it were not Administrative Agent. The term "Bank" or "Banks" shall, unless otherwise expressly indicated, include Administrative Agent in its individual capacity for so long as Administrative Agent has Loans or Commitments outstanding. Administrative Agent and its Affiliates may accept deposits from, lend money to, act as trustee under indentures of, and generally engage in any kind of business with Borrower or any other Person, without any duty to account therefor to the Banks. For the avoidance of doubt Administrative Agent may act as Depositary Agent notwithstanding any potential or actual conflict of interest presented by the foregoing and Borrower. Each of the Banks hereby waives any claim against Administrative Agent and any of its Affiliates based upon any conflict of interest that such Person may have with regard to acting as an agent, arranger or issuing bank hereunder and acting in such other roles.

9.9 AMENDMENTS; WAIVERS. Subject to the provisions of this Section 9.9, unless otherwise specified in this Agreement or another Credit Document, the Required Banks (or Administrative Agent pursuant to Section 9.7, or otherwise with the consent in writing of the Majority Banks or Required Banks, as the case may be) and Borrower, Guarantors, Non-Guarantors or Sponsor may enter into agreements, waivers or supplements hereto for the purpose of adding, modifying or waiving any provisions to the Credit Documents or changing in any manner the rights of the Banks, Borrower, Guarantors, Non-Guarantors or Sponsor hereunder or thereunder or waiving any Potential Event of Default or Event of Default;

provided, however, that no such supplemental agreement shall, without the consent of each Bank directly affected thereby:

(a) modify, in any respect adverse to the Banks, Section 2.1.1(d), 2.5, 2.6, 2.7, 6.12 (with respect to the assignment of Borrower's or any Guarantors' rights under any of the Credit Documents), 9.13, 9.14 or 10.21 hereof, Section 3.1.2(b) of the Depositary Agreement or Article 2 of the Sponsor Guaranty; or

(b) reduce the percentage specified in the definition of "Majority Banks" or "Required Banks"; or

(c) amend this Section 9.9; or

(d) release any Collateral (other than immaterial portions thereof) from the Lien of any of the Collateral Documents or allow release of any funds from any Account, in each case other than in accordance with Section 3.3 and any other applicable terms of the Credit Documents (provided, however, that with the consent of Administrative Agent, HFC may terminate or quitclaim any of the Non-Material Real Property Interests); or

66

(e) extend the Maturity Date or reduce the principal amount of any outstanding Loans or Notes or reduce the rate or change the time of payment of interest due on any Loan; or

(f) reduce the amount or extend the payment date for any amount due under Article 2, whether principal, interest, fees or other amounts; or

(g) reduce or change the time of payment of any fee due or payable hereunder; or

(h) release any Loan Party from any of its material obligations under the Sponsor Guaranty or any Subsidiary Guaranty; or

(i) increase the maximum duration of Interest Periods permitted hereunder; or

(j) subordinate the Loans to any other Debt.

No amendment, modification, termination or waiver of any provision of this Agreement affecting the rights or obligations of Administrative Agent or any Loan Party shall be effective without the written consent of Administrative Agent or such Loan Party, respectively. No amendment, modification, termination or waiver of any provision of any Note (other than by way of amending a document referred to therein) shall be effective without the written concurrence of the Bank which is the holder of such Note. NO CREDIT DOCUMENT TO WHICH BEAL BANK, S.S.B. IS A PARTY SHALL BE EFFECTIVE UNLESS TWO OFFICERS OF BEAL BANK, S.S.B. SHALL HAVE EXECUTED SUCH CREDIT DOCUMENT.

9.10 WITHHOLDING TAX. If the forms or other documentation required by Section 2.4.6 are not delivered to Administrative Agent, then Administrative Agent may withhold from any interest payment to any Bank not providing such forms or other documentation, an amount equivalent to the applicable withholding tax.

9.10.1 If the Internal Revenue Service or any authority of the United States or other jurisdiction asserts a claim that Administrative Agent did not properly withhold tax from amounts paid to or for the account of any Bank (because the appropriate form was not delivered, was not properly executed, or because such Bank failed to notify Administrative Agent of a change in circumstances which rendered the exemption from, or reduction of, withholding tax ineffective, or for any other reason), then such Bank shall indemnify Administrative Agent fully for all amounts paid, directly or indirectly, by

Administrative Agent as tax or otherwise, including penalties and interest, together with all expenses incurred, including legal expenses, allocated staff costs, and any out of pocket expenses. Borrower shall not be responsible for any amounts paid or required to be paid by a Bank under this Section 9.10.1.

9.10.2 If any Bank sells, assigns, grants participation in, or otherwise transfers its rights under this Agreement, the purchaser, assignee, participant or transferee, as applicable, shall comply and be bound by the terms of Section 2.4.6 and this Section 9.10 as though it were such Bank.

67

9.11 GENERAL PROVISIONS AS TO PAYMENTS. Administrative Agent shall promptly distribute to each Bank, subject to the terms of any separate agreement between Administrative Agent and such Bank, its pro rata share of each payment of principal and interest payable to the Banks on the Loans and of fees hereunder received by Administrative Agent for the account of the Banks and of any other amounts owing under the Loans. The payments made for the account of each Bank shall be made, and distributed to it, for the account of (a) its domestic lending office in the case of payments of principal of, and interest on, its Base Rate Loans, (b) its domestic or foreign lending office, as each Bank may designate in writing to Administrative Agent, in the case of LIBOR Loans, and (c) its domestic lending office, or such other lending office as it may designate for the purpose from time to time, in the case of payments of fees and other amounts payable hereunder. Subject to the requirement of Section 2.8.2, Banks shall have the right to alter designated lending offices upon five Banking Days prior written notice to Administrative Agent and Borrower. Administrative Agent and each Bank acknowledge and agree that each payment made by or on behalf of any Loan Party to Administrative Agent under any Credit Document for the benefit of any Bank shall discharge the obligation of such Loan Party under such Credit Document to make such payment to Administrative Agent or such Bank irrespective of any designation made by such Bank, or any agreement or arrangement between Administrative Agent and such Bank, contemplated by this Section 9.11.

9.12 SUBSTITUTION OF BANK. Notwithstanding anything in any Credit Document to the contrary, should any Bank fail to make a Loan in violation of its obligations under this Agreement (a "Non-Advancing Bank"), Beal Bank, S.S.B. shall fund such Loan on the Closing Date and shall be deemed to have assumed each of the Non-Advancing Bank's obligations under this Agreement (including the obligation to make the Loan which the Non-Advancing Bank failed to make) and such Person automatically shall be substituted for the Non-Advancing Bank hereunder, and all interest and fees which would otherwise have been payable to the Non-Advancing Bank shall thereafter be payable to such Person. Nothing in (and no action taken pursuant to) this Section 9.12 shall relieve the Non-Advancing Bank from any liability it might have to Borrower or to the other Banks as a result of its failure to make any Loan.

9.13 PARTICIPATION. Nothing herein provided shall prevent any Bank from selling a participation in one or more of its Loans made hereunder; provided that (a) no such sale of a participation shall alter such Bank's or Borrower's obligations hereunder and (b) any agreement pursuant to which any Bank may grant a participation in its rights with respect to its Loans made hereunder shall provide that, with respect to such Loans, subject to the following proviso, such Bank shall retain the sole right and responsibility to exercise the rights of such Bank, including any rights it has to enforce the obligations of Borrower relating to such Loans, to approve any amendment, modification or waiver of any provision of this Agreement or any other Credit Document, and to take action to have the Obligations (or any portion thereof) declared due and payable pursuant to Article 7; provided, however, that such agreement may provide that the participant may exercise any rights that such Bank may have to approve or disapprove decreases in interest rates, lengthening of maturity of any Loans, extend the payment date for any principal or interest payments, release of any material portion of the Collateral (other than in accordance with the terms of

the Credit Documents) or release any Loan Party (other than in accordance with the terms of the Credit Documents) from its obligations under the Sponsor Guaranty or any

Subsidiary Guaranty. Recipients of a participation in any Loans of any Bank shall have rights under this Agreement with respect to increased costs or reserve requirements under Section 2.4 or 2.6, if such recipient complies with the requirements of Section 2.4.6, to the same extent as if they were Banks (except that any such participant shall be entitled to claim any such amount only to the extent that the Bank from which such participant acquired its participation is entitled to, and such Bank makes such claim on its own behalf because it would have otherwise incurred the same costs). For the avoidance of doubt, Borrower shall not be responsible for increased costs arising out of any sale of a participation of any Loans or Notes.

9.14 TRANSFER OF COMMITMENT. Notwithstanding anything else herein to the contrary, any Bank, after receiving Administrative Agent's prior written consent (such consent not to be unreasonably withheld), may from time to time, without the consent of Borrower or any other Person, at its option, sell, assign, transfer, negotiate or otherwise dispose of a portion of one or more of its Loans made hereunder (including the Bank's interest in this Agreement and the other Credit Documents) to its Affiliate, any Bank or to one or more banks or other Persons that constitute a "Bank"; provided, however, that no Bank (including any assignee of any Bank) may assign any portion of its Loans in an amount less than \$1,000,000 (unless such lesser amount constitutes the assigning Bank's entire share of the Loans); and provided, further, that at all times Beal Bank, S.S.B. and its Affiliates shall collectively hold no less than 51% of the aggregate amount of the Loans and the Commitments; and provided, further, that Borrower shall not be responsible for increased costs arising out of any assignment of any Loans or Notes. In the event of any such assignment, (a) the assigning Bank's Proportionate Share shall be reduced and its obligations hereunder released by the amount of the Proportionate Share assigned to the new Bank, (b) the parties to such assignment shall execute and deliver an appropriate agreement evidencing such sale, assignment, transfer or other disposition, in form and substance reasonably satisfactory to Administrative Agent and Borrower, (c) the parties to the sale, assignment, transfer or other disposition, excluding Borrower, shall collectively pay to Administrative Agent an administrative fee of \$3,500, (d) at the assigning Bank's option, Borrower shall execute and deliver to such assigning Bank a new Note in the form attached hereto as Exhibit B-1, as requested, in a principal amount equal to such new Bank's Commitment, but only if it shall also be executing and exchanging with the assigning Bank a replacement note for any Note in an amount equal to the Commitment retained by the assigning Bank, if any; provided that Borrower shall have received for cancellation the existing Note held by such assigning Bank, and (v) Administrative Agent shall amend Exhibit H attached hereto to reflect the Proportionate Shares of the Banks following such assignment. Thereafter, such new Bank shall be deemed to be a Bank and shall have all of the rights and duties of a Bank (except as otherwise provided in this Article 9), in accordance with its Proportionate Share, under each of the Credit Documents.

9.15 LAWS. Notwithstanding the foregoing provisions of this Article 9, no sale, assignment, transfer, negotiation or other disposition of the interests of any Bank hereunder or under the other Credit Documents shall be allowed if it would require registration under the federal Securities Act of 1933, as then amended, any other federal securities laws or regulations or the securities laws or regulations of any applicable jurisdiction. Borrower shall, from time to time at the request and expense of Administrative Agent, execute and deliver to Administrative Agent, or to such party or parties as Administrative Agent may designate, any and all further

instruments as may in the opinion of Administrative Agent be reasonably necessary or advisable to give full force and effect to such sale, assignment, transfer, negotiation or disposition which would not require any such registration.

9.16 ASSIGNABILITY AS COLLATERAL. Notwithstanding any other provision contained in this Agreement or any other Credit Document to the contrary, any Bank may assign all or any portion of the Loans or Note held by it to the Federal Reserve Bank and the United States Treasury as collateral security; provided that any payment in respect of such assigned Loans or Note made by Borrower to or for the account of the assigning or pledging Bank in accordance with the terms of this Agreement shall satisfy Borrower's obligations hereunder in respect of such assigned Loans or Note to the extent of such payment. No such assignment shall release the assigning Bank from its obligations hereunder.

ARTICLE 10 MISCELLANEOUS

10.1 ADDRESSES. Any communications between the parties hereto or notices provided herein to be given may be given to the following addresses:

If to Administrative Agent: Beal Bank, S.S.B.
6000 Legacy Dr., 4E
Plano, Texas 75024
Attn: William T. Saurenmann
Tel: (469) 467-5510
Fax: (469) 241-9568
E-mail: bsaurenmann@bealbank.com

with a copy to: CSG Investments, Inc.
6000 Legacy Dr., 4W
Plano, Texas 75024
Attn: Steve Harvey
Tel: (469) 467-5652
Fax: (469) 241-9567
E-mail: sharvey@csginvestments.com

If to Borrower: OrCal Geothermal Inc.
980 Greg Street
Sparks, NV 89431
Attn: President
Tel: (775) 356-9029
Fax: (775) 356-9039
E-mail: dbronicki@ormat.com

All notices or other communications required or permitted to be given hereunder shall be in writing and shall be considered as properly given (a) if delivered in person, (b) if sent

by overnight delivery service (including Federal Express, UPS and other similar overnight delivery services), (c) if mailed by first class United States Mail, postage prepaid, registered or certified with return receipt requested, (d) if sent by facsimile or (e) if sent via other electronic means (including electronic mail). Notice so given shall be effective upon receipt by the addressee, except that communication or notice so transmitted by facsimile or other direct written electronic means shall be deemed to have been validly and effectively given on the day (if a Banking Day and, if not, on the next

following Banking Day) on which it is transmitted if transmitted before 4:00 p.m., recipient's time, and if transmitted after that time, on the next following Banking Day; provided, however, that (i) if any notice is tendered to an addressee and the delivery thereof is refused by such addressee, such notice shall be effective upon such tender, and (ii) with respect to any notice given via facsimile or other electronic means, the sender of such message shall promptly provide the addressee with an original copy of such notice by any of the means specified in clause (a), (b) or (c) above. Any party shall have the right to change its address for notice hereunder to any other location within the continental United States by giving of 5 Banking Days' notice to the other parties in the manner set forth above.

10.2 ADDITIONAL SECURITY; RIGHT TO SET-OFF. Subject to Section 2.5.2, regardless of the adequacy of any other Collateral, any Secured Party with the prior written consent of Administrative Agent may execute or realize on its or Administrative Agent's security interest in any such deposits or other sums credited by or due from Banks to Borrower, and may apply any such deposits or other sums to or set them off against Borrower's obligations to Banks under any Notes and this Agreement at any time after the occurrence and during the continuance of any Event of Default.

10.3 DELAY AND WAIVER. No delay or omission to exercise any right, power or remedy accruing to the Secured Parties upon the occurrence of any Event of Default, Potential Event of Default, Material Adverse Effect or any breach or default of Borrower or any other Loan Party or unsatisfied condition precedent under this Agreement or any other Credit Document shall impair any such right, power or remedy of the Secured Parties, nor shall it be construed to be a waiver of any such breach or default or unsatisfied condition precedent, or an acquiescence therein, or of or in any similar breach or default or unsatisfied condition precedent thereafter occurring, nor shall any waiver of any single Event of Default, Potential Event of Default, Material Adverse Effect or other breach or default or unsatisfied condition precedent be deemed a waiver of any other Event of Default, Potential Event of Default, Material Adverse Effect or other breach or default or unsatisfied condition precedent theretofore or thereafter occurring. Any waiver, permit, consent or approval of any kind or character on the part of Administrative Agent or the Secured Parties of any Event of Default, Potential Event of Default, Material Adverse Effect or other breach or default or unsatisfied condition precedent under this Agreement or any other Credit Document, or any waiver on the part of Administrative Agent or the Secured Parties of any provision or condition of this Agreement or any other Credit Document, must be in writing and shall be effective only to the extent in such writing specifically set forth. All remedies, either under this Agreement or any other Credit Document or by law or otherwise afforded to Administrative Agent and the Secured Parties, shall be cumulative and not alternative. If any Event of Default has been waived by the Secured Parties in accordance with Section 9.9 and this Section 10.3, then after such waiver becomes effective

the applicable Event of Default shall for all purposes under the Credit Documents be deemed to be no longer continuing.

10.4 COSTS, EXPENSES AND ATTORNEYS' FEES. Borrower will pay to Administrative Agent all of its reasonable costs and expenses in connection with the preparation, negotiation, closing and administering of this Agreement and the Credit Documents (including the Post-Closing Title Work), including the reasonable fees, expenses and disbursements of Jenkins & Gilchrist, a Professional Corporation, and Latham & Watkins LLP; provided, however, that Borrower shall not be required to pay the fees of the other Banks' attorneys; provided, further, that (a) except as set forth in Sections 5.21 and 7.1.17, no Loan Party shall be responsible for the payment of any fees and expenses related to the Independent Consultants and (b) Borrower shall not be responsible for the internal costs and internal expenses incurred in connection with the administering of any of the Credit Documents. Borrower will reimburse (i)

Administrative Agent for all reasonable costs and expenses, including reasonable attorneys' fees (it being acknowledged and agreed that (A) Borrower shall only be responsible for the payment of one general counsel and one special counsel to Administrative Agent and (B) Borrower shall not be responsible for any attorneys' fees for any of the Banks, except as provided in the preceding clause (A)), expended or incurred by Administrative Agent and the Banks for their reasonable internal out-of-pocket expenses, in enforcing this Agreement or the other Credit Documents in connection with an Event of Default or Potential Event of Default, in actions for declaratory relief in any way related to this Agreement or in collecting any sum which becomes due on the Notes or under the Credit Documents and (ii) Administrative Agent and the Banks for their reasonable out-of-pocket expenses, including reasonable attorney fees (it being acknowledged and agreed that (A) Borrower shall only be responsible for the payment of one general counsel and one special counsel to Administrative Agent and (B) Borrower shall not be responsible for any attorneys' fees for any of the Banks, except as provided in the preceding clause (A)) and reasonable expert, consultant and advisor fees and expenses, in the case of a restructuring of the Loans or otherwise relating to the occurrence of any Potential Event of Default or Event of Default. Borrower shall not be responsible for any counsel fees of Administrative Agent or the Banks other than as set forth above, in Section 5.24 or as otherwise set forth in a separate agreement.

10.5 ENTIRE AGREEMENT. This Agreement and each of the Credit Documents integrate all the terms and conditions mentioned herein or incidental hereto and supersede all oral negotiations and prior writings in respect to the subject matter hereof.

10.6 GOVERNING LAW. THIS AGREEMENT AND ANY OTHER CREDIT DOCUMENT (UNLESS OTHERWISE EXPRESSLY PROVIDED FOR THEREIN), SHALL BE GOVERNED BY, AND CONSTRUED UNDER, THE LAWS OF THE STATE OF NEW YORK, WITHOUT REFERENCE TO CONFLICTS OF LAWS (OTHER THAN SECTION 5-1401 AND SECTION 5-1402 OF THE NEW YORK GENERAL OBLIGATIONS LAW).

10.7 SEVERABILITY. In case any one or more of the provisions contained in this Agreement should be invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions shall not in any way be affected or impaired thereby.

72

10.8 HEADINGS. Article, Section and Paragraph headings have been inserted in this Agreement as a matter of convenience for reference only and it is agreed that such headings are not a part of this Agreement and shall not be used in the interpretation of any provision of this Agreement.

10.9 ACCOUNTING TERMS. All accounting terms not specifically defined herein shall be construed in accordance with GAAP and practices consistent with those applied in the preparation of the financial statements submitted by Borrower to Administrative Agent, and all financial data submitted pursuant to this Agreement shall be prepared in accordance with such principles and practices.

10.10 ADDITIONAL FINANCING. The parties hereto acknowledge that as of the Closing Date the Banks have made no agreement or commitment to provide any financing except as set forth herein.

10.11 NO PARTNERSHIP, ETC. The Banks and Borrower intend that the relationship between them shall be solely that of creditor and debtor. Nothing contained in this Agreement, the Notes or in any of the other Credit Documents shall be deemed or construed to create a partnership, tenancy-in-common, joint tenancy, joint venture or co-ownership by or between the Banks and Borrower or any other Person. None of Administrative Agent or the Banks shall be in any way responsible or liable for the debts, losses, obligations or duties of Borrower or any other Person with respect to the Projects or otherwise. All obligations to pay real property or other taxes, assessments, insurance premiums, and all

other fees and charges arising from the ownership, operation or occupancy of the Projects (if any) and to perform all obligations and other agreements and contracts relating to the Projects shall be the sole responsibility of Borrower.

10.12 DEED OF TRUST/COLLATERAL DOCUMENTS. The Loans are secured in part by the Deeds of Trust encumbering certain properties in the State of California. Reference is hereby made to the Deeds of Trust and the other Collateral Documents for the provisions, among others, relating to the nature and extent of the security provided thereunder, the rights, duties and obligations of Borrower and the rights of Administrative Agent and the other Secured Parties with respect to such security.

10.13 LIMITATION ON LIABILITY. No claim shall be made by Borrower against Administrative Agent, the Banks or any of their respective Affiliates, directors, employees, attorneys or agents for any loss of profits, business or anticipated savings, special or punitive damages or any indirect or consequential loss whatsoever in respect of any breach or wrongful conduct (whether or not the claim therefor is based on contract, tort or duty imposed by law), in connection with, arising out of or in any way related to the transactions contemplated by this Agreement or the other Operative Documents or any act or omission or event occurring in connection therewith, and Borrower hereby waives, releases and agrees not to sue upon any such claim for any such damages, whether or not accrued and whether or not known or suspected to exist in its favor.

10.14 WAIVER OF JURY TRIAL. ADMINISTRATIVE AGENT, THE BANKS AND

73

BORROWER HEREBY KNOWINGLY, VOLUNTARILY, AND INTENTIONALLY WAIVE ANY RIGHTS THEY MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LITIGATION BASED HEREON, OR ARISING OUT OF, UNDER, OR IN CONNECTION WITH, THIS AGREEMENT OR ANY OTHER CREDIT DOCUMENT, OR ANY COURSE OF CONDUCT, COURSE OF DEALING, STATEMENTS (WHETHER VERBAL OR WRITTEN), OR ACTIONS OF ADMINISTRATIVE AGENT, THE BANKS OR BORROWER. THIS PROVISION IS A MATERIAL INDUCEMENT FOR BORROWER, ADMINISTRATIVE AGENT AND THE BANKS TO ENTER INTO THIS AGREEMENT.

10.15 CONSENT TO JURISDICTION. Administrative Agent, the Banks and Borrower agree that any legal action or proceeding by or against Borrower or with respect to or arising out of this Agreement, the Notes, or any other Credit Document may be brought in or removed to the courts of the State of New York, in and for the Borough of Manhattan, or of the United States of America for the Southern District of New York, as Administrative Agent may elect. By execution and delivery of this Agreement, the Banks, Administrative Agent and Borrower accept, for themselves and in respect of their property, generally and unconditionally, the jurisdiction of the aforesaid courts. Administrative Agent, the Banks and Borrower irrevocably consent to the service of process out of any of the aforementioned courts in any manner permitted by law. Administrative Agent, the Banks and Borrower further agree that the aforesaid courts of the State of New York and of the United States of America shall have exclusive jurisdiction with respect to any claim or counterclaim of Borrower based upon the assertion that the rate of interest charged by the Banks on or under this Agreement, the Loans or the other Credit Documents is usurious. Administrative Agent, the Banks and Borrower hereby waive any right to stay or dismiss any action or proceeding under or in connection with any or all of the Projects, this Agreement or any other Credit Document brought before the foregoing courts on the basis of forum non-conveniens. Nothing herein shall affect the right of Administrative Agent to bring legal action or proceedings in any other competent jurisdiction, including judicial or non-judicial foreclosure of the Deeds of Trust.

10.16 KNOWLEDGE AND ATTRIBUTION. References in this Agreement and the other Credit Documents to the "knowledge," "best knowledge" or facts and circumstances "known to" Borrower or any other Loan Party, and all like references, mean facts or circumstances of which a Responsible Officer of the applicable Loan Party has

actual knowledge (after due inquiry).

10.17 SUCCESSIONS AND ASSIGNS. The provisions of this Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns. Borrower may not assign or otherwise transfer any of its rights under this Agreement except as provided in Section 6.13, and the Banks may not assign or otherwise transfer any of their rights under this Agreement except as provided in Article 9.

10.18 COUNTERPARTS. This Agreement and any amendments, waivers, consents or supplements hereto or in connection herewith may be executed in one or more duplicate counterparts and by different parties hereto in separate counterparts, each of which when so executed and delivered shall be deemed an original, but all such counterparts together shall constitute but one and the same instrument; signature pages may be detached from multiple separate counterparts and attached to a single counterpart so that all signature pages are

74

physically attached to the same document.

10.19 USURY. Nothing contained in this Agreement or the Notes shall be deemed to require the payment of interest or other charges by Borrower or any other Person in excess of the amount which the holders of the Notes may lawfully charge under applicable usury laws. In the event that the Banks shall collect moneys which are deemed to constitute interest which would increase the effective interest rate to a rate in excess of that permitted to be charged by applicable Legal Requirements, all such sums deemed to constitute interest in excess of the legal rate shall, upon such determination, at the option of the Banks, be returned to Borrower or credited against the principal balance then outstanding.

10.20 SURVIVAL. All representations, warranties, covenants and agreements made herein and in the certificates or other instruments delivered in connection with or pursuant to this Agreement and the other Credit Documents shall be considered to have been relied upon by the parties hereto and shall survive the execution and delivery of this Agreement, the other Credit Documents and the making of the Loans (it being acknowledged and agreed that, subject to the following sentence and except as expressly provided in any such Credit Document, all of the representations, warranties, covenants and agreements made in any Credit Document by any Loan Party shall terminate upon the payment in full in cash and the performance in full of the Obligations). Notwithstanding anything in this Agreement or implied by law to the contrary, the agreements of Borrower set forth in Sections 2.1.1(d), 2.1.6, 2.3, 2.4.4, 2.6.3, 2.6.4, 2.7, 5.24, 9.8 and 10.4 and the agreements of the Banks set forth in Sections 9.1, 9.5 and 9.10.1 shall survive the payment and performance of the Loans and the other Obligations and the reimbursement of any amounts drawn hereunder, and the termination of this Agreement.

10.21 REFINANCING. Upon the written request of Administrative Agent at any time prior to December 31, 2004, the Banks shall have the right to convert (including by way of a refinancing) up to \$100,000,000 of the Loans to senior secured notes issued by Borrower pursuant to Section 4(2) of the Securities Act of 1933. Borrower shall (and shall cause each other Loan Party (other than Ormat Technologies) to, as applicable) execute, acknowledge, and/or deliver all agreements, notices, statements, instruments and other documents (including a note purchase agreement, notes, an intercreditor agreement and amendments to any Credit Documents) necessary or advisable (as determined by Administrative Agent in its sole discretion) to effectuate such conversion and the issuance of such senior secured notes. Such note purchase agreement shall contain (a) identical terms and conditions set forth in Articles 2 and 4 through 10 of this Agreement, other than any changes necessarily resulting from such conversion, (b) customary representations and warranties by Borrower, as issuer of such senior secured notes, relating to securities law matters, (c) representations and warranties by

Borrower of the type described in Sections 4.1, 4.3, 4.4 and 4.5, (d) customary representations and warranties by the purchasers of such senior secured notes, relating to securities law matters and (e) provisions otherwise conforming in substance to Model Form No. 2 of Note Purchase Agreement, including any changes to Articles 2, 9 and 10 of this Agreement necessarily resulting from such conversion. Without limiting the foregoing, Borrower shall (and shall cause each other Loan Party (other than Ormat Technologies) to, as applicable) (i) provide any information necessary or advisable in connection with the issuance of such senior secured notes, (ii) deliver,

75

to the satisfaction of Administrative Agent, each of the documents described in Sections 3.1.1, 3.1.2, 3.1.3, 3.1.4, 3.1.7 and 3.1.8 (including, if requested by S&P or Moody's, an opinion of counsel regarding non-consolidation of the Loan Parties) with respect to any Loan Party, (iii) take any other action reasonably requested by Administrative Agent in connection with such conversion, including any steps as may be necessary or advisable to render fully valid and enforceable under all applicable laws the rights of the initial purchasers and any other holders of such senior secured notes, and (iv) pay all reasonable fees and expenses (including reasonable attorneys' fees) of Administrative Agent and Beal Bank, S.S.B. incident to such conversion; provided that Borrower shall not be obligated to pay (A) any such attorneys' fees in excess of \$25,000 or (B) any fees, expenses or other amounts charged by S&P or Moody's in connection with such conversion (whether on account of an initial rating or subsequent surveillance ratings). For the avoidance of doubt, the terms of such senior secured notes shall not provide for the payment of a "make-whole premium," as that term customarily is utilized in connection with Model Form No. 2 of Note Purchase Agreement, and shall not provide for interest rates (including default interest rates), interest periods, interest calculations, interest payment dates, principal amortization and repayment dates, optional and mandatory principal prepayment rights and obligations, or fees that deviate in any respect from such terms as set forth in this Agreement. In the event of any conversion pursuant to and in accordance with this Section 10.21, Borrower shall not be obligated to make any Make-Whole Premium or other prepayment premium that would otherwise be required under Section 2.1.6 of this Agreement.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

76

IN WITNESS WHEREOF, the parties hereto, by their officers duly authorized, intending to be legally bound, have caused this Credit Agreement to be duly executed and delivered as of the day and year first above written.

EXIMBANK CREDIT AGREEMENT, dated as of May 13, 1996 (this "Agreement"), between ORMAT LEYTE CO. LTD., a limited partnership organized and existing under the laws of the Republic of the Philippines (the "Borrower") and EXPORT-IMPORT BANK OF THE UNITED STATES ("Eximbank"), an agency of the United States. Capitalized terms used herein shall be defined as provided in Section 1.01.

BACKGROUND

WHEREAS, the Borrower, the Administrative Agent, the Issuing Bank and the Lenders are entering into the Lender Credit Agreement, pursuant to which the Lenders have agreed, subject to the terms and conditions set forth therein, to finance, inter alia, exports from the United States to the Borrower's Country for construction of the Project and, in connection therewith, the Guaranteed Lenders (as defined in the Eximbank Guarantee Agreement referred to below) have requested Eximbank to provide a limited guaranty of the Loans pursuant to a guarantee agreement dated as of the date hereof among Eximbank, the Guaranteed Lenders and the Administrative Agent (the "Eximbank Guarantee Agreement");

WHEREAS, the Borrower has requested Eximbank to establish a credit (the "Eximbank Credit") in the maximum amount of \$49,763,955 (as the same may be reduced pursuant to Section 4.01, the "Maximum Eximbank Credit Amount") in favor of the Borrower as part of the overall debt financing for construction of the Project and it is contemplated that the proceeds of the Eximbank Credit shall be applied by the Borrower to repay in part the Loans made by the Guaranteed Lenders;

WHEREAS, Eximbank is prepared (i) issue its guarantee subject to the terms and conditions of the Eximbank Guarantee Agreement and (ii) to establish the Eximbank Credit and to make the Eximbank Credit available to the Borrower on or after the Project Completion Date, subject the terms and conditions set forth in this Agreement;

NOW THEREFORE, the parties hereto agree as follows:

SECTION 1. DEFINITIONS AND PRINCIPLES OF CONSTRUCTION

Section 1.01. General Definitions. Capitalized terms used in this Agreement and not otherwise defined herein shall have the meanings assigned thereto in Schedule X attached hereto. In addition, wherever used in this Agreement or any Annex, Exhibit or Schedule hereto, unless the context otherwise requires, the following terms shall have the following meanings:

"Agreement" shall mean this Credit Agreement, including any Annex, Exhibit, Schedule and other attachment hereto, as amended or otherwise modified from time to time.

"Borrower" shall have the meaning specified in the first paragraph of this Agreement.

"Borrower's Country" shall mean the Republic.

"Business Day" shall mean any day on which the Federal Reserve Bank of New York is open for business.

"Cash Payment" shall have the meaning set forth in Section 2.02.

"Commitment Fee" shall have the meaning specified in Section 3.03.

"Completion Date" shall have the meaning specified in the BOT Agreement.

"Construction Note" shall mean the promissory note executed and delivered by the Borrower pursuant to Section 2.4 of the Lender Credit Agreement.

"Covered Taxes" shall mean any and all present or future taxes, levies, imposts, deductions, withholdings, duties, fees, commissions or other charges, of whatsoever nature and all liabilities paid with respect thereto imposed by any Governmental Authority or taxing or monetary authority thereof, other than any tax imposed on or measured by the net income or capital of a Person pursuant to the laws of the jurisdiction of its place of incorporation or in which the principal office is located or the office from which such Person books any assigned interest of the Eximbank Credit.

"Credit Exposure Fee" shall mean an exposure fee in the amount equal to 9.57% of the amount of the Eximbank Disbursement that represents: (i) the Financed Portion of the Items; (ii) the IDC Financed Portion of IDC; and (iii) the aggregate amount of the Guarantee Exposure Fee.

"Default" shall mean any event, act or condition which, with notice, lapse of time, or both, or the fulfillment of any other requirement provided for in Section 9, would constitute an Event of Default.

"Disbursement Date" shall mean the date on which the Eximbank Disbursement is made by to the Borrower.

"Eximbank Credit" shall have the meaning specified in the second WHEREAS clause hereof.

2

"Eximbank Disbursement" shall mean the disbursement made under the Eximbank Credit in accordance with the terms of this Agreement and evidenced by the Eximbank Note.

"Eximbank Note" shall have the meaning specified in Section 3.07(a).

"Event of Default" shall have the meaning specified in Section 9.

"Final Disbursement Date" shall mean the earlier of (i) June 15, 1998; provided that (x) if on or before such date, the Completion Date for the entire Power Plant shall have actually occurred pursuant to Section 6.1 of the BOT Agreement, or shall have been deemed to have occurred pursuant to Section 5.4(h) of the BOT Agreement, or (y) if on June (15) 1998, Force Majeure (as defined in any of the BCE Agreement, the Construction Contract or the Supply Contract) or default by PNOC-EDC under the BOT Agreement shall exist, or shall have existed prior to June 15, 1998, for an aggregate period in excess of fifteen (15) days, the date specified in clause (i) of this definition shall be extended to March 15, 1999; and (ii) the date on which the Eximbank Credit is cancelled in full in accordance with Section 4.02.

"Guarantee Exposure Fee" shall have the meaning set forth in the Eximbank Guarantee Agreement.

"Guarantee Operative Date" shall mean the date designated by Eximbank on or after which Utilizations may be made under the Lender Credit Agreement.

"IDC" shall have the meaning specified in the Eximbank Utilization Procedures.

"IDC Financed Portion" shall have the meaning specified in the Eximbank Utilization Procedures.

"Items" shall have the meaning specified in the Eximbank Utilization Procedures.

"Lender Disbursement" shall mean each of the Loans disbursed from time to time pursuant to Section 2 or 3 of the Lender Credit Agreement.

"Local Cost Financed Portion" shall have the meaning specified in the Eximbank Utilization Procedures.

"Local Cost Item" shall have the meaning Specified in the Eximbank Utilization Procedures.

3

"Maximum Eximbank Credit Amount" shall have the meaning specified in the second clause of this Agreement.

"Payment Date" shall mean July 30, 1996 and, thereafter, each succeeding October 30, January 30, April 30, and July 30.

"Payment Default Date" shall have the meanings in Section 3.02(b).

"Principal Amortization Commencement Date" shall mean the earlier of (i) the Completion Date (as defined in the BOT Agreement) for the initial Plant to be constructed and tested in accordance with the terms of the Construction Contract, the Supply Contract and the BOT Agreement and (ii) September 25, 1997.

"Reconciliation Certificate" shall mean a reconciliation certificate in the form of Exhibit 1 to Annex B hereto.

"Request for Eximbank Disbursement" shall mean a request for disbursement in the form of Annex B hereto.

"Taxes" shall mean any and all present and future taxes, fees, levies, imposts, duties or charges of whatsoever nature (whether imposed by withholding or deduction or otherwise) imposed by any Governmental Authority (including without limitation any and all liabilities with respect thereto).

"U.S." or "United States" shall mean the United States of America.

Section 1.02. Principles of Construction. The principles of construction set forth in Schedule X apply.

SECTION 2. THE EXIMBANK CREDIT

Section 2.01. Amount of the Eximbank Credit. (a) Eximbank hereby establishes the Eximbank Credit, upon the terms and conditions set forth in this Agreement, in favor of the Borrower to enable the Borrower to (i) refinance, in an aggregate amount not to exceed \$35,457,750, the Financed Portion of the costs incurred on or after March 1, 1995 by the Borrower for the purchase m the United States and export to the Republic of the Items; (ii) refinance, in an aggregate amount not to exceed \$5,832,000, the Local Cost Financed Portion of the costs incurred on or after March 1, 1995 by the Borrower for the purchase m the Republic of the Local Cost Items; (iii) refinance in an aggregate amount not to exceed \$3,124,000, the IDC Financed Portion of IDC; (iv) refinance the Guarantee Exposure Fee; and (v) finance the Credit Exposure Fee.

4

(b) On the terms and conditions hereof, Eximbank shall make the Eximbank Credit available to the Borrower in a single Eximbank Disbursement, subject to the satisfaction of the conditions precedent to such disbursement under Section 5.02 hereof, and otherwise in accordance with Section 5.03 hereof.

(c) The Eximbank Credit shall not under any circumstances exceed in

aggregate amount the lesser of:

(i) the sum of (a) the aggregate amount of the Financed Portion for all Items; (b) the aggregate amount of the Local Cost Financed Portion for all Local Cost Items; (c) the aggregate amount of the IDC Financed Portion for all IDC; (d) 100% of the Guarantee Exposure Fee paid to Eximbank under the Eximbank Guarantee Agreement in respect of each of the above; and (e) 100% of the Credit Exposure Fee payable to Eximbank under this Agreement; and

(ii) the Maximum Eximbank Credit Amount.

(d) All amounts due to Eximbank under this Agreement, the Eximbank Note and the other Financing Documents are entitled to the benefit of the Security. Any amount of the Eximbank Credit not disbursed on the Disbursement Date shall automatically be canceled upon and as of the close of business on the Disbursement Date.

Section 2.02. Cash Payment. The Borrower shall have made or caused to be made a cash payment for the purchase of each Item in an amount equal to not less than fifteen percent (15%) of the Contract Price of such Item (the "Cash Payment").

Section 2.03. Credit Availability Date. The Eximbank Credit will not be disbursed after, and Eximbank's commitment to make available the Eximbank Credit shall terminate upon, the close of business on the Final Disbursement Date.

SECTION 3. TERMS OF THE EXIMBANK CREDIT

Section 3.01. Principal Repayment. Subject to Section 4.01, the Borrower shall repay all principal amounts disbursed under the Eximbank Credit in approximately equal, successive quarterly installments (of which the maximum number shall be 38), the first such installment being due on the first Payment Date occurring on or after the date falling two hundred ten (210) days after the Principal Amortization Commencement Date and on each succeeding Payment Date thereafter, and ending on the Payment Date immediately preceding the Transfer Date (as such term is defined in the BOT Agreement as in effect on the date hereof); provided, that on the last such Payment Date the Borrower shall repay in full the principal amount of the Eximbank Credit then outstanding. Eximbank has determined the initial Payment Date by adding 180 days to

5

its calculation of the weighted midpoint of the projected Completion Date for each of the four Plants.

Section 3.02 Interest Payment. (a) The Borrower shall pay interest on each Payment Date, and on the date that all amounts disbursed under the Eximbank Credit are paid in full, on all amounts disbursed and outstanding from time to time under the Eximbank Credit, beginning on the first Payment Date which is after the Disbursement Date, calculated at an interest rate per annum of 6.54%, computed on the basis of the actual number of days elapsed (including the first day but including the last day), using a 365-day year.

(b) If any amount of principal, accrued interest, fees or other amounts owing by the Borrower to Eximbank under this Agreement, the Eximbank Note or any other Financing Document is not paid in full when due (whether at stated maturity, by acceleration or otherwise), the Borrower shall pay to Eximbank on demand interest on the unpaid amount (to the extent permitted by applicable law) for the period from the date such amount was due (the "Payment Default Date") until the date such amount was paid in full, at an interest rate per annum equal to the higher of: (i) the then applicable New Borrowing Rate (such rate to remain in effect until such amount is paid in full); and (ii) the rate specified in Section 3.02(a) above plus one percent (1.0%) per annum. For the purposes of

this Agreement and the Eximbank Note, "New Borrowing Rate" shall mean the specified on the Commerce Department Economic Bulletin Board, under the heading "Interest Rate for Credit Reform Act", for the year and calendar quarter in which the Payment Default Date occurs, and under the "Maturity Ranges" category which covers the total period of repayment described in Section 3.01.

Section 3.03. Commitment Fee. The Borrower shall pay or cause to be paid to Eximbank a commitment fee of one-half of one percent (0.5%) per annum on the uncanceled amount of the Maximum Eximbank Credit (the "Commitment Fee"), computed on the basis of the actual number of days elapsed (including the first day but excluding the last day), using a 365-day year, accruing from June 8, 1996 to the earlier of (i) the Disbursement Date and (ii) the Final Disbursement Date, and payable quarterly on each Payment Date, beginning on July 30, 1996, and on the Disbursement Date.

Section 3.04. Credit Exposure Fee. No later than the Disbursement Date, the Borrower shall pay or cause to be paid to Eximbank the Credit Exposure Fee. The Credit Exposure Fee may be financed by the Borrower by the inclusion of the request for such financing the Borrower's Request for Eximbank Disbursement.

Section 3.05. Voluntary Prepayment. The Borrower may from time to time prepay all or any part of the outstanding principal amount of the Eximbank Credit, provided that the Borrower (i) shall have given Eximbank ten (10) Business Days prior

6

written notice of the proposed amount and date of prepayment; (ii) shall have paid in full all interest which has accrued to the date of prepayment on the principal amount so prepaid, together with all other amounts then due to Eximbank under this Agreement, the Eximbank Note, the Eximbank Guarantee Agreement or any other Financing Document as of the date of such prepayment; and (iii) shall pay to Eximbank a prepayment premium. The prepayment premium shall be equal to the amount by which the prepaid principal amount is less than the sum of the present values, discounted from the scheduled payment dates, of (A) the installments of principal being prepaid, plus (B) the amounts of interest which otherwise would have accrued on such principal amounts to the scheduled repayment dates. The discount rate used to calculate such present values shall be that rate of interest specified in the weekly Federal Reserve Statistical Release, H.15 (519) Selected Interest Rates, in the category "U.S. government securities; Treasury bills, Secondary market" for a Maturity Period (as hereafter defined) through one year, or in the category "U.S. government securities; Treasury constant maturities" for a Maturity Period of greater than one year, in the column for Business Day which is five (5) Business Days prior to the date of prepayment. "Maturity Date" shall mean the weighted average of the periods between the date of prepayment and the scheduled repayment dates of the installments of principal of the Eximbank Credit that are prepaid. All prepayments shall be applied to the installments of principal of the Eximbank Credit in the inverse order of their maturities.

Section 3.06. Mandatory Prepayment. On the applicable dates set forth in Sections 3.05(a) and 3.05(d) of the Disbursement Agreement, the Borrower shall, without demand or notice, make prepayments to Eximbank using funds then made available for such purpose from the Contingency Account by the Collateral Trustee pursuant to Sections 3.05(a) and 3.05(d) of the Disbursement Agreement. In addition, on the date of receipt of funds from any Buyout, the Borrower shall, without demand or notice, make a prepayment to Eximbank in the amount of the then outstanding principal amount of the Eximbank Credit, together with all interest accrued thereon and all other amounts then payable to Eximbank by the Borrower under any of the Financing Documents. In the case of any partial payments, such prepayments shall be applied to the installments of principal of the Eximbank Credit in the inverse order of their maturity. No prepayment premium is payable in connection with a mandatory prepayment pursuant to this Section 3.06.

Section 3.07. Eximbank Note. (a) The Borrower agrees that to evidence further its obligation to repay all amounts disbursed under the Eximbank Credit, with interest accrued thereon, it shall issue and deliver to Eximbank a promissory note dated the Disbursement Date in the form of Annex A (together with replacements and substitutions therefor, the "Eximbank Note"). The Eximbank Note shall be valid and enforceable as to its principal amount at any time only to the extent of the amount then

7

disbursed and outstanding under the Eximbank Credit and, as to interest, only to the extent of the interest accrued thereon.

(b) If requested by Eximbank pursuant Section 11.05(a)(ii), the Borrower shall issue and deliver to Eximbank a new Eximbank Note in exchange for the Eximbank Note previously issued and delivered in accordance with this Agreement, whereupon Eximbank shall surrender such previously issued Eximbank Note to the Borrower for cancellation.

(c) If the Eximbank Note is mutilated, lost, stolen or destroyed, the Borrower shall issue and deliver a new Eximbank Note of the same date, maturity and denomination as the Eximbank Note so mutilated, lost, stolen or destroyed; provided that, in the case of any mutilated Eximbank, not such mutilate Eximbank Note shall be returned to the Borrower, and, in the case of any lost, stolen or destroyed Eximbank Note, the Borrower shall have first received such evidence of loss, theft or destruction as shall reasonably be considered satisfactory to the Borrower.

Section 3.08. Method of Payment. (a) All payments to be made to Eximbank under this Agreement, the Eximbank Note or any other Financing Document (whether at stated maturity, by reason of acceleration or prepayment, or otherwise) shall be made without set-off or counterclaim in Dollars in immediately available and freely transferable funds no later than 11:00 a.m. (New York City time) on the date on which due (each such payment made after such time shall be deemed to have been made on the next succeeding Business Day) at the Federal Reserve Bank of New York for credit to the following Eximbank account as identified below:

U.S. Treasury Department
021030004
TREAS NYC/CTR/
BNF = /AC-4984 OBI =
EXPORT-IMPORT BANK
DUE _____ ON EIB CREDIT NO. AP069121 - PHILIPPINES
FROM ORMAT LEYTE CO. LTD.

(b) Whenever any payment under this Agreement or the Eximbank Note shall be stated to be due and payable on a day other than a Business Day, such payment shall be made on the next succeeding Business Day and such extension of time shall be included in the computation of any interest or fee due thereon.

Section 3.09. Application of Payments. Eximbank shall apply payments received by it under this Agreement, the Eximbank Note or any other Financing Document (whether at stated maturity, by reason of acceleration or prepayment or

8

otherwise) in the following order of priority: (i) interest due pursuant to Section 3.02(b), (ii) Commitment Fee, Credit Exposure Fee, Guarantee Exposure Fees and all other amounts due to Eximbank under this Agreement, the Eximbank Note or any other Financing Document and not otherwise provided for under this

Section 3.09, (iii) interest due pursuant to Section 3.02(a) and (iv) installments of principal due.

SECTION 4. CANCELLATION; SUSPENSION

Section 4.01. Mandatory Cancellation. In the event any scheduled Payment Date for the repayment of principal of the Eximbank Credit falls on a date that is on or prior to the final Completion Date to occur in respect of the Plants comprising the Power Plant, the Maximum Eximbank Credit Amount shall be reduced, in respect of each such scheduled Payment Date occurring prior to such final Completion Date, by an amount equal to one thirty-eighth (1/38th) of the Maximum Eximbank Credit Amount.

Section 4.02. Cancellation by the Borrower. The Borrower may cancel at any time all or any part of the undisbursed and uncanceled amount of the Eximbank Credit, provided that thirty (30) days' prior written notice is given to Eximbank. In the event of a cancellation of all or any part of the Eximbank Credit by the Borrower, the Borrower shall pay to Eximbank, on or before the proposed date of cancellation, all Commitment Fees accrued and unpaid under Section 3.03 in respect of the cancelled amount and all other amounts due and payable to Eximbank under this Agreement, the Eximbank Note or any other Financing Document as of the proposed date of cancellation. Cancellation in full of the Eximbank Credit shall not terminate any provision of this agreement other than Sections 7, 8 and 9 hereof.

Section 4.03. Suspension by Eximbank.

(a) In the event that:

(i) prior to the Disbursement Date, the Borrower shall fail to pay when due any Commitment Fee payable by the Borrower to Eximbank hereunder or any other amount payable by the Borrower to Eximbank hereunder, under the Eximbank Guarantee Agreement or under any other Financing Document; or

(ii) at any time, any Lender suspends the right of the Borrower to request disbursements in accordance with the Lender Credit Agreement; or

(iii) at any time, Lenders with twenty-five percent (25%) or more of the total Commitments provided for in respect of the Lender Credit (such as 25%, the "Cancelled Commitments") cancel their respective Commitments (other than

9

any such cancellation pursuant to any undrawn Commitment at the Project Completion Date);

then Eximbank, by written notice to the Borrower and the Administrative Agent, may:

(x) in the case of clause (i) above, suspend disbursement of the Eximbank Credit until all such amounts due and owing to Eximbank shall have been paid in full to Eximbank (whether by or on behalf of the Borrower or by another Person, including any Lender or Lenders);

(y) in the case of clause (ii) above, suspend disbursement of the Eximbank Credit until it is satisfied that the cause of such suspension has been removed; and

(z) in the case of clause (iii) above, suspend disbursement of the Eximbank Credit until such time as another lender or lenders, with the consent of Eximbank, such consent not to be unreasonably withheld (it being understood that each of the Lenders is acceptable to Eximbank for this purpose), shall enter into a binding commitment with the Borrower to

replace the Cancelled Commitments.

(b) The terms of Section 4.03(a) above shall be in addition to and not in limitation of any other rights of Eximbank under this Agreement or any other Financing Document.

SECTION 5. CONDITIONS PRECEDENT

Section 5.01. Conditions Precedent to Lender Disbursement. The applicability of the Eximbank Guarantee to any Utilization shall be subject to the satisfaction of the following conditions on or prior to the Guarantee Operative Date (or, if so specified, the Credit Date); provided that if any such conditions shall have been satisfied on or prior to the Guarantee Operative Date, then on the Credit Date the Borrower shall supply such evidence indicating that such condition continues to be satisfied as Eximbank may reasonably require, including, without limitation, bring-down opinions and certificates:

(a) Project Documents. Each of the Project Documents, excluding (i) the Governmental Approvals set forth in Part B of Schedule 5.01(t) hereto, (ii) the BOT Operation Performance Security, (iii) the BOT Construction Performance Security, (iv) the Post-Completion Ormat Guaranty and (v) agreements and instruments pertaining to Permitted Indebtedness not then incurred shall have been entered into by the respective parties thereto, shall be unconditional and fully effective in accordance with their

10

respective terms (except for this Agreement or the Eximbank Guarantee Agreement having become unconditional and fully effective, if such is a condition of effectiveness of any of such documents), shall be in form and substance satisfactory to Eximbank and Eximbank and the Collateral Trustee shall each have received a true, original copy thereof or, if a true, original copy is unavailable, a certified true copy thereof.

(b) Opinions of Counsel. Eximbank shall have received signed legal opinions of counsel to each Person listed on Section A of Schedule 5.01(b) hereto, each of which shall be in form and substance and by counsel satisfactory to Eximbank and shall be dated the Guarantee Operative Date; provided that the opinion of counsel to PNOC-EDC may be dated the Effectivity Date (as defined in the BOT Agreement).

(c) Organization Documents; Proceedings.

(i) Eximbank shall have received a certificate, dated not earlier than the Guarantee Operative Date, signed by a Financial Officer of the General Partner, and attested to by the Secretary or any Assistant Secretary of the General Partner, in form and substance satisfactory to Eximbank, together with copies of the Partnership Agreement and other Organization Documents of the Borrower and such resolutions of the Board of Directors of the General Partner as are reasonably requested by Eximbank.

(ii) Eximbank shall have received a certificate, dated not earlier than the Guarantee Operative Date, signed by a Financial Officer of each Obligor (other than the Borrower, PNOC-EDC, the BOT Construction Performance Security Issuer and the BOT Operation Performance Security Issuer) and attested to by the Secretary or any Assistant Secretary of such Obligor, in form and substance satisfactory to Eximbank, together with copies of the Articles of Incorporation and By-Laws of such Obligor and resolutions of such Obligor reasonably requested by Eximbank.

(iii) Arrangements satisfactory to Eximbank shall have been made for the appointment of SyCip Gorres Velayo & Co. or such other firm of independent public accountants acceptable to Eximbank, as Auditors.

(iv) Eximbank shall have received a certificate from each Obligor (other than PNOC-EDC, the BOT Construction Performance Security Issuer and the BOT Operation Performance Security Issuer) signed by an authorized officer certifying the incumbency of parties executing any Project Document or related document on behalf of such Obligor.

11

(d) Auditors. Eximbank shall have received copies of the authorization of the Auditors referred to in Section 6.2(b) of the Lender Credit Agreement and Section 7.02(b) hereof.

(e) Pledged Certificates of Partnership Interests; Subordinated Notes. The Partners shall have delivered to the Collateral Trustee, as pledgee, (i) the partnership certificates representing all of their respective general and limited partnership interests in the Borrower, together with executed and undated partnership interest transfer powers, and (ii) the Subordinated Notes evidencing all outstanding Required Subordinated Loans, Standby Subordinated Loans and Post-Completion Standby Subordinated Loans.

(f) Consent Letters. Eximbank shall have received a letter, in form and substance satisfactory to Eximbank, from CT Corporation System, presently located at 1633 Broadway, New York, New York 10019, indicating the consent of CT Corporation System to its appointment by the Borrower, Ormat, Ormat International, Orleyte Company, the Construction Contractor and the Construction Supplier as their agent to receive service of process as specified in Section 10.02 hereof, in the case of the Borrower; as specified in the Funding Agreement, the Keystone Agreement and the Ormat EPC Guarantee, in the case of Ormat; as specified in the Funding Agreement, the Keystone Agreement and the International EPC Guarantee in the case of Ormat International; as specified in the Funding Agreement and the Mortgage, Assignment and Pledge Agreement in the case of Orleyte Company; as specified in that Funding Agreement, the Pledge Agreement, the Construction Contract and the Keystone Agreement in the case of the Construction Contractor; and as specified in the Supply Contract and the Keystone Agreement in the case of the Construction Supplier.

(g) Environment Matters. Arrangements satisfactory to Eximbank shall have been made for the Borrower and the Project to comply with Eximbank Environmental Procedures and Guidelines (effective February 1, 1995) and Philippine law and guidelines relating to occupational health and safety and to the environment.

(h) BOT Agreement Effectiveness. Each of PNOC-EDC and the Borrower shall have issued to Eximbank a certification confirming that the Effective Date (as defined in the BOT Agreement) has occurred.

(i) Certificates. Eximbank shall have received copies of each executed Project Document, together with a certificate of a Financial Officer of the Borrower certifying that (i) the Borrower is not in default in the performance, observance or fulfillment of any of its obligations, covenants or conditions contained therein and, to the best of the Borrower's and the General Partner's knowledge, no other party to any such Project Document is in default in the performance, observance or fulfillment of any of its material obligations, covenants or conditions contained therein and (ii) in the case of each

12

such document to which Eximbank is not a party, (x) that such document is in full force and effect, (y) that to the best of the Borrower's and the General Partner's knowledge no event of Force Majeure (as defined in such Project Document) has occurred thereunder and (z) that the copy thereof delivered to

Eximbank is true, correct and complete. Eximbank shall have received evidence or copies of all Governmental Approvals set forth in Schedule 5.01(t) hereto (other than those set forth in Part B thereof), certified by a Financial Officer of the Borrower as being in full force and effect and except as disclosed in such Schedule 5.01(t), not the object of a currently pending appeal.

(j) Construction Budget; Base Case Forecast. Eximbank shall have received the Construction Budget and the Base Case Forecast, each of which shall be in form and substance satisfactory to Eximbank.

(k) Reports of Consultants. Eximbank shall have received the Independent Engineer's Report, a report prepared by the Insurance Consultant and such other information as shall be reasonably requested by Eximbank.

(l) Financial Statements. Eximbank shall have received copies of the most recent audited financial statements of Ormat and Ormat International and shall have received copies of the most recent unaudited financial statements (if audited financial statements are not otherwise available) of the Borrower and each other Obligor (other than the Borrower, Ormat, Ormat international, PNOC-EDC, the BOT Construction Performance Security Issuer and the BOT Operation Performance Security Issuer), showing, for each such Person, no material adverse change in the financial condition of such Person since the date of the last financial statements provided to Eximbank prior to the date of this Agreement, and certificates dated the Guarantee Operative Date and signed by a Financial Officer of each such Person stating that (x) such financial statements are true, complete and correct and (y) no material adverse change in the financial condition, operations, properties, business or prospects of such Person has occurred since the date of such financial statements.

(m) Evidence of Authority. Eximbank shall have received evidence of the authority of the Borrower to enter into this Agreement, the Eximbank Note, the Lender Credit Agreement, the Disbursement Agreement, the Collateral Trust Agreement and the Security Documents and the other documents required by this Agreement and the Lender Credit Agreement as of the date hereof, and the names, specimen signatures and evidences of authority of the person signing this Agreement, the Eximbank Note, the Eximbank Guarantee Agreement, the Lender Credit Agreement, the Funding Agreement, the Disbursement Agreement, the Collateral Trust Agreement and the Security Documents, the Partnership Agreement and the other documents required by this Agreement and the Lender Credit Agreement as of the date hereof, or who, as of the date

hereof, will otherwise act as representatives of the Borrower in the operation of the Eximbank Guarantee Agreement and the Eximbank Credit.

(n) Notice to Proceed and Construction Contractor's and Construction Supplier's Representation. Eximbank shall have received a certified copy of the Notice to Proceed under (and as defined in) the Construction Contract and the Notice to Proceed under (and as defined in) the Supply Contract, each of which shall have been issued on or prior to the Credit Date Eximbank shall have received certificates signed by authorized representatives of each of the Construction Contractor and the Construction Supplier to the effect that (i) the Construction Contract and the Supply Contract, respectively, are effective and work has commenced thereunder, (ii) as of the date hereof the Scheduled Completion Date for each of Plant A, Plant B and Plant C is September 1, 1997 and for Plant D is January 1, 1998, or such later dates (which Eximbank has confirmed in writing are acceptable to it) as shall correspond to any extension of the milestone dates set forth in Section 4.1(a) of the BOT Agreement for the achievement of the Completion Date for the relevant Plant, (iii) the Borrower is not in default under the Construction Contract or the Supply Contract, respectively, (iv) the Construction Contractor is not entitled to any change orders under the Construction Contract and the Construction Supplier is not entitled to any change orders under the Supply Contract (in each case, other

than change orders previously disclosed to Eximbank in writing) on such date and is not then aware of any other change orders required under the Construction Contract or the Supply Contract, respectively, and (v) to the best of the Construction Contractor's or the Construction Supplier's (as the case may be) respective knowledge, after reasonable inquiry, no Force Majeure event (as defined in each of the Construction Contract and the Supply Contract) has occurred.

(o) Project Site. Eximbank shall have received (i) an opinion of counsel to the Borrower to the effect that the Republic has valid legal title to the Site free of Liens (other than Liens of or arising through the Borrower, the Construction Contractor or the Construction Supplier) and that PNOC-EDC has the valid legal authority to use the Site and delegate unencumbered use of the Site to the Borrower on the terms and conditions set forth in the BOT Agreement, which opinion shall be from counsel and in form and substance satisfactory to Eximbank, and (ii) a certificate of the Borrower that PNOC-EDC has granted the Borrower and its designees full access to and the ability to use the Site, so that the Borrower and/or the Construction Contractor and their respective designees may fully perform their respective obligations under the BOT Agreement and their respective related obligations.

14

(p) No Default; Representative and Warranties. Immediately before and after the initial Utilization:

(i) no Lender Credit Default or Lender Credit Event of Default shall have occurred and be continuing; and

(ii) all representations and warranties made by the Borrower and any Obligor which is an Affiliate of the Borrower and contained herein or in the Project Documents (other than the Insurance Contracts, Governmental Approvals or any other agreement, commitment or understanding referred to in subsection (xiv) of the definition of "Operating Agreements" in Schedule X) shall be true and correct in all material respects with the same effect as though such representations and warranties had been made on and as of the Guarantee Operative Date except where expressed to be made only as of an earlier date.

(q) Security. The Security, in form and substance satisfactory to Eximbank, shall have been duly created, perfected and, where appropriate, registered, to create a first priority security interest and charge over the Collateral in existence at the date hereof. Without limitation to the preceding sentence, the Borrower shall have duly authorized, executed and delivered or, as the case may be, provided:

(i) acknowledgment copies of proper financing statements or other instruments duly filed under the Applicable Law of each jurisdiction as may be necessary or, in the reasonable opinion of Eximbank, desirable to perfect the charges and security interests purported to be created by the Security Documents;

(ii) certified copies of requests, for information or copies, or equivalent reports, listing the financing statements and instruments referred to in clause (i) above and all other effective financing statements that name the Borrower as debtor and that are filed in the jurisdictions referred to in said clause (i), together with copies of such other financing statements and instruments (none of which shall cover the Collateral except to the extent evidencing Lender Credit Permitted Liens);

(iii) evidence of the completion of all other recordings and filings of, or with respect to, the Security Documents as may be necessary or, in the reasonable opinion of Eximbank, desirable to perfect the security

interests purported to be created by the Security Documents;

15

(iv) evidence that all other actions necessary or, in the reasonable opinion of Eximbank, desirable to perfect and protect the security interests purported to be created by the Security Documents have been taken;

(v) the Borrower shall have established the Blocked Account; and

(vi) the Required Funding Amount shall have been fully funded either through a cash deposit pursuant to Section 2(j)(i) of the Funding Agreement and/or a Required Letter of Credit pursuant to Section 2(k)(i) of the Funding Agreement.

(r) Consent and Approvals. There shall have been obtained, or there shall have been made arrangements, satisfactory to Eximbank, for obtaining during the period prior to the Project Completion Date, in addition to the Project Documents, the governmental, corporate, creditors', shareholders', partners' and other licenses, approvals or consents listed in Schedule 5.01(t) hereto and all other governmental, corporate, creditors, shareholders', partners' and other necessary licenses, approvals or consents (other than with respect to Eximbank) for: (i) the financing by each of the Lenders and the Issuing Bank under the Lender Credit Agreement; (ii) the carrying on of the business of the Borrower as it is presently carried on and is contemplated to be carried on; (iii) the carrying out of the Project; (iv) the due execution and delivery of, and performance under, each Project Document which has been entered into at the date hereof, the Security, and any documents in implementation of any thereof; and (v) the remittance to Eximbank and the Collateral Trustee and by the Collateral Trustee to the Secured Parties or the respective assignees, in Dollars, of all monies payable pursuant to each Project Document which has been entered into on the date hereof, and any documents in implementation of any thereof.

(s) No Project Document Default; Governmental Approvals. Each of the Project Documents which has been entered into or which is required to have been entered into on the Guarantee Operative Date shall be in full force and effect and no material breach or default shall have occurred under such Project Document. No event of Force Majeure (as defined in any of the BOT Agreement, the Supply Contract and the Construction Contract) shall have occurred which has had, or in the reasonable judgment of Eximbank is reasonably likely to have, a Material Adverse Effect. No events shall have occurred pursuant to which a claim could be made by the Administrative Agent on behalf of the Lenders under the Eximbank Guarantee Agreement.

(t) Costs; Construction Progress. Eximbank and the Independent Engineer shall have received from the Borrower a certificate in the form of Schedule 5.2(h) to the Lender Credit Agreement signed by an authorized representative of the Borrower and expressed to be effective on the date of the relevant Utilization that (i) the costs and

16

expenses theretofore incurred by the Borrower and to be incurred by the Borrower prior to the latest date on which the Final Disbursement Date can be expected to occur will not exceed [\$68,469,000] and (ii) the sum of (A) the aggregate Financed Portion of the costs incurred by the Borrower after March 1, 1995 and before the Final Disbursement Date for the purchase in the United States and export to the Borrower's Country of the Items and (B) the aggregate Local Cost Financed Portion of the costs incurred by the Borrower for the purchase in the Republic of the Local Cost items and (C) the aggregate IDC Financed Portion of

IDC will not exceed the difference between (x) the Total Commitment and (y) 100% of the Guarantee Exposure Fee.

(u) Fees and Expenses. On or before the Credit Date, the Borrower shall have paid or arranged for payment of fees, expenses and other charges (including any and all Attorney Costs) then due and payable by it under this Agreement.

(v) No Change in Contract Price. The contract price set forth in the Supply Contract, the Construction Contract and the Keystone Agreement shall not have been amended, changed or otherwise modified and Eximbank shall have received a certificate from each of the Construction Supplier and the Construction Contractor to such effect in form and substance satisfactory to Eximbank.

(w) Insurance. Eximbank shall have received a certificate from the Insurance Consultant stating that the insurance policies required under the Lender Credit Agreement to be in effect on the Credit Date are in full force and effect.

(x) Other Instrument, Conditions, Etc. The delivery of any other instruments and agreements and the satisfaction of any other condition as Eximbank may reasonably request.

Section 5.02. Conditions Precedent to Eximbank Disbursement. As conditions precedent to the Eximbank Disbursement, the documents described in paragraphs (a) through (h) below shall have been received by Eximbank, each in form and substance satisfactory to Eximbank and dated the Disbursement Date, and the conditions described in paragraphs (i) through (n) shall have been fulfilled as of the date on which the Eximbank Disbursement is requested by the Borrower to be made, in a manner satisfactory to Eximbank:

(a) Eximbank Note. The executed Eximbank Note in the principal amount of the Eximbank Credit.

(b) Opinions of Counsel. Signed legal opinions of counsel to each Person listed on Section B of Schedule 5.01(c) hereto, each of which shall be in form and

17

substance and by counsel satisfactory to Eximbank and shall be dated the Disbursement Date.

(c) Evidence of Authority. Evidence of the authority of the Borrower to execute, deliver and perform the terms and conditions of this Agreement, the Eximbank Note and the other documents requested by this Agreement, and the names and evidence of authority (including specimen signatures) of each person who, on behalf of the Borrower, signed or will sign this Agreement, the Eximbank Note and the other documents required by this Agreement, or will otherwise act as representatives of the Borrower in the operation of the Eximbank Credit.

(d) BOT Agreement. A certification signed by an authorized representative of the Borrower and expressed to be effective as of the Disbursement Date, stating that the Borrower is in compliance with the BOT Agreement and that such agreement is in full force and effect.

(e) Security. A certification signed by an authorized representative of the Borrower and expressed to be effective as of the Disbursement Date, stating that the Security Documents are in full force and effect and that the Security granted therein shall have been duly created, perfected and, where appropriate, registered, to create a first priority security interest and charge over the Collateral in existence on the Disbursement Date in favor of the Collateral trustee for the benefit of Eximbank.

(f) Agent for Service of Process. Evidence that the Borrower and each other Obligor (other than PNOC-EDC, the BOT Operation Performance Security Issuer and the BOT Construction Performance Security Issuer) has irrevocably appointed as its agent for service of process the Person or Persons so specified in Section 5.01(f), and that each such agent has accepted the appointment and has agreed to forward forthwith to the Borrower, or the relevant Obligor, as the case may be, all legal process addressed to the Borrower or such Obligor, received by such agent.

(g) Insurance. A certification from the Insurance Consultant stating that the insurance policies required pursuant to Section 7.03 to be in effect on the Disbursement Date, as such provisions may have been modified since the date of this Agreement and as such provisions are in effect on such date, are in full force and effect.

(h) Financial Completion Test. A certification signed by an authorized representative of the Borrower and expressed to be effective as of the Disbursement Date, attaching relevant calculations, and reasonably acceptable to Eximbank, stating that, after giving effect to the Eximbank Disbursement:

18

- (1) The aggregate principal amount of all Senior Debt of the Borrower then outstanding shall not exceed [\$51,263,955].
- (2) The outstanding principal amount of all Required Subordinated Loans shall have been converted into common equity in the Borrower on terms and conditions satisfactory to Eximbank.
- (3) The Equity Ratio shall not be less than 25:75.
- (4) The equity contributions to the Borrower aggregate no less than \$16,705,045.

(i) Project Completion. The Project Completion Date shall have occurred.

(j) No Event of Default. Both before and after giving effect to the Eximbank Disbursement, no Lender Credit Default, Lender Credit Event of Default, Default or Event of Default exists or will exist that has not been cured or waived.

(k) Representations and Warranties. All the representations and warranties made by the Borrower in Section 6.02 shall be true and correct in all material respects with the same effect as though such representations and warranties had been made on and as of such date by reference to the facts and circumstances existing on such date, except where such representation or warranty is expressed to be made as of a specified date.

(l) Fees and Costs. The fees due pursuant to Section 3.03 and all costs and expenses required to be paid pursuant to Section 11.07 shall have been paid by the Borrower, and (i) Eximbank has been paid the Credit Exposure Fee, or (ii) arrangements satisfactory to Eximbank shall have been entered into for providing payment to Eximbank of the Credit Exposure Fee. For the purposes of the foregoing sentence, "arrangements satisfactory to Eximbank" shall include, without limitation, the direct payment of the Credit Exposure Fee by the Borrower to Eximbank prior to the Disbursement Date or the submission to Eximbank by the Borrower of a Request for Eximbank Disbursement that includes a request for Eximbank financing of the Credit Exposure Fee.

(m) Debt Reserve Cash Collateral Account. The Debt Reserve Cash Collateral Account shall be funded in an amount not less than \$4,200,000 (if the principal of the Eximbank Credit shall be repayable in 38 installments) and an amount

equal to the Senior Debt Service due and payable during the next succeeding six months (if the principal of the Eximbank Credit shall be repayable in fewer than 38 installments).

19

(n) No Material Adverse Effect. No Material Adverse Effect shall exist or shall have occurred that has not been waived by Eximbank.

(o) Payment of Buy Down Amounts. All liquidated damages accruing under Sections 14.2 and 14.3 of the Construction Contract and Sections 12.2 and 12.3 of the Supply Contract shall have been paid in full, irrespective of any limitation on liability therefor set forth in the Construction Contract, the Supply Contract or the Keystone Agreement.

(p) Post-Competition Ormat Guaranty. The Post-Completion Ormat Guaranty shall have been entered into by the respective parties thereto, shall be unconditional and fully effective in accordance with its terms, shall be substantially in the form of Annex C hereto, and Eximbank and the Collateral Trustee shall have each received a true, original copy thereof or, if a true, original copy is unavailable, a certified true copy thereof.

(q) Lender Financing Termination Date. After giving effect to the Eximbank Disbursement, the Lender Financing Termination Date shall have occurred.

Section 5.03. Request for Eximbank Disbursement. The Borrower may, no earlier than ten (10) and no later than five (5) Business Days prior to the proposed Disbursement Date, submit to Eximbank a completed and duly executed Request for Eximbank Disbursement; provided, however, that no Eximbank Disbursement shall be made in respect of such Request for Eximbank Disbursement until the conditions set forth in Section 5.02 have been fulfilled or waived by Eximbank. The Request for Eximbank Disbursement shall be executed by an authorized representative of the Borrower, and shall be accompanied by (i) true, correct and complete copies of each Eximbank Certificate; (ii) a true, correct and complete Reconciliation Certificate; and (iii) a written undertaking from the Administrative Agent in the form of Exhibit 1 to Annex B hereto. In no event shall the maximum amount of the Eximbank Disbursement exceed the aggregate of the Dollar amounts certified by Eximbank in the accompanying Eximbank Certificates as amounts eligible for Eximbank support and 100% of the Credit Exposure Fee. Notwithstanding anything to the contrary contained herein, the Borrower may only submit one (1) Request for Eximbank Disbursement under this Agreement. The Borrower shall apply the proceeds of the Eximbank Disbursement to the payment of amounts owed to the Lenders under the Lender Credit Agreement and the payment of the Credit Exposure Fee in accordance with the terms of Section 6.30(d) of the Lender Credit Agreement and this Agreement.

20

SECTION 6. REPRESENTATIONS AND WARRANTIES

Section 6.01. Representations and Warranties with Respect to Guarantee Operative Date. In order to induce Eximbank to enter into this Agreement and each of the other Financing Documents to which it is a party, to issue the Eximbank Guarantee Agreement and to establish the Eximbank Credit, the Borrower makes the following representations, warranties and agreements as of the date of execution hereof and as of the Guarantee Operative Date, which shall survive the execution and delivery of this Agreement and the other Financing Documents to which Eximbank is a party and the disbursement and repayment of the Eximbank Credit:

(a) Limited Partnership Status. The Borrower (i) is a limited partnership duly organized and validly existing and in good standing under the laws of the

Republic, (ii) is duly qualified to do business under the laws of each jurisdiction in which the character of the properties owned or leased by it or in which the transaction of its business as presently conducted or proposed to be conducted makes such qualification necessary and (iii) has full power and authority to own the property and assets owned by it and to lease the properties leased by it and to transact the business in which it is engaged or proposes to be engaged and to do all things necessary or appropriate in respect of the Project and to consummate the transactions contemplated by the Project Documents in effect or required to be in effect as of each date this representation is made or deemed made. Orleyte Company is the sole general partner of the Borrower, and Ormat Philippines and Orleyte Company are the sole limited partners of the Borrower. Each Partner (a) is a limited life company duly organized, validly existing and in good standing under the laws of the Cayman islands, (b) is duly qualified to do business and is in good standing under the laws of each jurisdiction in which the character of the properties owned or leased by it or in which the transaction of its business as presently conducted or as proposed to be conducted makes such qualification necessary or desirable, and (c) has full power and authority to own the property and assets owned by it and to lease the properties leased by it and to transact the business in which it is engaged or proposes to be engaged.

(b) Power and Authority. The Borrower and each Partner has the full power and authority to execute and deliver, and to perform the terms and provisions of, each of the Project Documents to which it is party and has taken all necessary partnership or corporate action, as the case may be, to authorize the execution, delivery and performance by it of each of such Project Documents as have been executed and delivered as of each date this representation and warranty is made. The General Partner has the corporate power and authority to execute and deliver in the name of the Borrower, and to perform on behalf of the Borrower the terms and provisions of, each of the Project Documents to which the Borrower is a party and has taken all necessary corporate action to authorize the execution, delivery and performance by it on the Borrower's behalf of each of such Project Documents as of each date this representation and warranty is made.

21

The Borrower and each Partner has, or in the case of the Project Documents other than this Agreement, by the Guarantee Operative Date will have, duly executed and delivered each of the Project Documents to which it is party, and each of such Project Documents constitutes or, in the case of each such other Project Document when executed and delivered, will constitute, the legal, valid and binding obligations of the Borrower or such Partner, as the case may be, and enforceable in accordance with its respective terms, except as the enforceability thereof may be limited by (a) applicable bankruptcy, insolvency, reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally and (b) general equitable principles, regardless of whether the issue of enforceability is considered in a proceeding in equity or at law.

(c) No Violation. None of the execution and delivery by the Borrower of the Project Documents to which it is a party, nor the Borrower's compliance with or performance of the terms and provisions thereof, nor the use of the proceeds of the Loans or the Eximbank Credit as contemplated by the respective Financing Documents, nor the execution, delivery and performance on behalf of the Borrower by the General Partner of the Project Documents to which the Borrower is a party (i) will contravene or violate any provision of any Applicable Law to which the Borrower or the General Partner, any of their respective assets or the Project is subject, (ii) will conflict or be inconsistent with or result in any breach of any of the terms, covenants, conditions or provisions of, or constitute a default under, or result in the creation or imposition of (or the obligation to create or impose) any Lien (except any Permitted Liens) upon any of the property or assets of the Borrower or the General Partner pursuant to the term of any indenture, mortgage, deed of trust, credit agreement, loan agreement or any

other agreement, contract or instrument to which the Borrower or the General Partner is a party or by which either of them or any of any of their respective property or assets is bound or to which either of them may be subject, (iii) will violate any provision of the Partnership Agreement or any other Organization Document of the Borrower or (iv) will require any consent or approval of any Governmental Authority or any other Person which has not been obtained.

(d) Organization. The general and limited partnership interests of Orleyte Company and the limited partnership interests of Ormat Philippines in the Borrower and the respective interests of Orleyte Company and Ormat Philippines in the capital and the profits and distributions of the Borrower are as set forth in the Partnership Agreement. All such partnership interests in the Borrower have been duly and validly authorized and issued. Orleyte Company and Ormat Philippines own the general and limited partnership interests in the Borrower set forth in the Partnership Agreement free and clear of any Liens of any-nature on such partnership interests except for the Liens created pursuant to the Mortgage, Assignment and Pledge Agreement. The Borrower does not have outstanding any certificates or securities that evidence interests in the Borrower (except for certificates representing the respective general and limited partnership interests of

22

Orleyte Company and Ormat Philippines in the Borrower), or any securities convertible into or exchangeable for any of its partnership interests or any rights to subscribe for or to purchase, or any warranties or options to purchase, or any agreements providing for the issuance (contingent or otherwise) of, or any calls, commitments or claims of any character relating to, any such partnership interests, except for those rights established pursuant to the Mortgage, Assignment and Pledge Agreement, the Partnership Agreement, the Itochu MOU, and agreements (certified copies of which shall have been delivered to Eximbank) relating to a sale or assignment to EPDCI or an Affiliate thereof of limited partnership interests in the Borrower representing not more than 10% of the aggregate partnership interests in the Borrower.

(e) Subsidiaries. The Borrower has no Subsidiaries and owns no equity interest in any other Person.

(f) Single-Purpose Borrower. The Borrower has not incurred any liabilities other than in connection with its participation in the transactions contemplated by the Project Documents. The Borrower (i) has not engaged in any business other than the design, development, ownership, financing, construction and operation of the Project and (ii) has not a party to any agreement, contract or commitment (other than (w) the agreements identified in clauses (i) through (xiv), inclusive, (xvii) and (xviii) of the definition of the term Operating Agreements set forth in Schedule X hereto, (x) the Financing Documents, (y) agreements, contracts or commitments contemplated by the O&M Parameters (including those relating to employee training, secondment of employees and vehicle rentals), the then-current Construction Budget or the then-current Annual Budget and (z) agreements, contracts and commitments in respect of Permitted Indebtedness) which, individually, creates an annual financial obligation of the Borrower in excess of \$75,000 (or the equivalent in other currency) or which would cause the aggregate annual financial obligations of the Borrower under all agreements, contracts and commitments (other than those specified in clauses (w) through (z) immediately above) to which the Borrower is a party to exceed \$150,000 (or the equivalent in other currency).

(g) Financial Statements; Financial Condition; Undisclosed Liabilities; Etc.

(i) The statements of financial condition of the Borrower and the General Partner most recently furnished to Eximbank present fairly the financial condition of the Borrower or the General Partner, as the case

may be, at the date of such statements of financial condition and the results of the operations of the Borrower or the General Partner, as the case may be, for such fiscal year. Such financial statements have been prepared in accordance with Philippine (in the case of the Borrower) and Cayman Islands (in the case of the General Partner) generally accepted accounting principles and practices consistently applied.

23

Since the date of such financial statements, no event, condition or circumstance (including without limitation Force Majeure as defined in Articles 13.1(a) and 13.1(b) of the BOT Agreement) has existed or has occurred which is reasonably likely to have a Material Adverse Effect.

(ii) Except as fully reflected in the financial statements referred to in Section 6.01(g)(i), there are no liabilities or obligations with respect to the Borrower or the General Partner of any nature whatsoever (whether absolute, accrued, contingent or otherwise and whether or not due) for the period to which such financial statements relate which, either individually or in the aggregate, is reasonably likely to have a Material Adverse Effect. Neither the Borrower nor the General Partner knows of any reasonable basis for the assertion against the Borrower or the General Partner of any liability or obligation of any nature whatsoever for such relevant period that is not fully reflected in the financial statements referred to in Section 6.01(g)(i) which, either individually or in the aggregate, is reasonably likely to have a Material Adverse Effect.

(h) Litigation; Labor Duties.

(i) Except as disclosed in Schedule 6.01(h) hereto, there is no action, suit, investigation or proceeding by or before any court, arbitrator, administrative agency or other Governmental Authority (including without limitation any appeal by any Person of a Governmental Approval) pending or, to the best of the Borrower's knowledge, threatened against or affecting the Borrower or any of its properties, revenues or assets or the Project or the Site which has had or is reasonably likely to have a Material Adverse Effect. The Borrower is not in default with respect to any order of any court, arbitrator, administrative agency or other Governmental Authority. There is no injunction, writ, preliminary restraining order of any nature issued by an arbitrator, court or other Governmental Authority directing that any of the material transactions provided for in any of the Project Documents not be consummated as herein or therein provided. To the best of the Borrower's knowledge, there is no action, suit, investigation or proceeding by or before any court, arbitrator, administrative agency or other Governmental Authority (including without limitation any appeal by any Person of a Governmental Approval) pending or threatened against or affecting any party to any Project Document which is an Affiliate of the Borrower or any of their properties, revenues or assets, and the Borrower does not have knowledge of any such action, suit, investigation or proceeding pending or threatened against or affecting any other party to any Project Document or any of their properties, revenues or assets, in each case

24

described in this sentence which has had or is reasonably likely to have a Material Adverse Effect.

(ii) There are no strikes, slowdowns or work stoppages by the Borrower's employees on-going or, to the knowledge of the Borrower, threatened which are reasonably likely to have a Material Adverse Effect.

(i) True and Complete Disclosure. All factual information (taken as a whole, which, for the avoidance of doubt (i) shall not include any information by way of projections, estimates or other expressions of view as to future circumstances provided that such projections, estimates or other expressions of view are expressed in good faith and on the basis of reasonable assumptions and (ii) shall be qualified by any disclaimers with respect to such factual information provided by the Borrower to Eximbank) heretofore or contemporaneously furnished by or on behalf of the Borrower, Ormat or any other Affiliate of the Borrower in writing to Eximbank (including without limitation such factual information as contained in the information Memorandum and the Project Documents), and all other such factual information (taken as a whole) hereafter furnished by or on behalf of the Borrower, Ormat or any other Affiliate of Ormat in writing to Eximbank will be, true and accurate in all material respects on the date as of which such information is dated or certified and not incomplete by omitting to state any fact necessary to make such information (taken as a whole) not misleading in any material respect at such time in light of the circumstances under which such information was provided. There are in existence no documents or agreements which have not been disclosed to Eximbank which are material in the context of the Project Documents or which have the effect of varying any of the Project Documents.

(j) Tax Returns and Payments. The Borrower has filed all tax returns required by Applicable Law to be filed by it and has paid all income taxes payable by it which have become due pursuant to such tax returns and all other taxes and assessments payable by it which have become due, other than those not yet delinquent and except for those contested in good faith and for which adequate reserves have been established. The Borrower has paid, or has provided adequate reserves (in the good faith judgment of the management of the Borrower) for the payment of, all national, regional or local income taxes applicable for all prior Fiscal Years and for the current Fiscal Year to the date hereof.

(k) Governmental Approvals. All Governmental Approvals necessary under Applicable Law in connection with (i) the due execution and delivery of, and performance by the Borrower of its obligations and the exercise of its rights under, the Project Documents in effect or required to be in effect as of each date this representation is made or deemed made, (ii) the investment by the Partners in the Borrower, (iii) the due execution, delivery and performance by the General Partner on behalf of the Borrower of

each of the Project Documents to which the Borrower is a party, (iv) the grant by each of the Borrower, the Partners, and Ormat International of the Liens created pursuant to the Security Documents and the Funding Agreement and the validity, enforceability and perfection thereof and the exercise by Eximbank or the Collateral Trustee of its rights and remedies thereunder and (v) the construction and operation of the Project as contemplated by the Project Documents, to be obtained by the Borrower or any Affiliate of the Borrower are, and to be obtained by any other Person (to the best knowledge of the Borrower) are, set forth in Schedule 5.01(t). Each of the Governmental Approvals set forth in Part A of Schedule 5.01(t) and each other Governmental Approval obtained by the Borrower after the date of this Agreement but on or prior to the date this representation is made, has duly obtained or made, is validly issued, is in full force and effect, is not the object of a currently pending appeal, is held in the name of the Person identified in Schedule 5.01(t) and is free from any condition or requirement compliance with which is reasonably likely to have a Material Adverse Effect or which the Borrower does not reasonably expect to be able to satisfy. There is no proceeding (including without limitation any appeal by any Person) pending or, to the best knowledge of the Borrower, threatened which is reasonably likely to result in the rescission, termination, material modification, suspension or determination of invalidity or lack of effectiveness of any such Governmental Approval. The information set forth in each application and other written material submitted by the Borrower to the applicable

Governmental Authority in connection with each such Governmental Approval is accurate and complete in all material respects. The Governmental Approvals set forth in Part B of Schedule 5.01(t) are required solely in connection with later stages of construction and operation of the Project. The Borrower has no reason to believe that any Governmental Approval that has not been obtained by the Borrower, but which will be required in the future, will not be granted to it in due course, on or prior to the date when required and free from any condition or requirement compliance with which is reasonably likely to have a Material Adverse Effect or which the Borrower does not reasonably expect to be able to satisfy. The Project, if constructed in accordance with the Construction Contract, the Supply Contract and the other Project Documents, will conform to and comply with all covenants, conditions, restrictions and reservations in the Governmental Approvals and the Project Documents applicable thereto and all Applicable Laws. The Borrower has no reason to believe that the Collateral Trustee will not be entitled, without undue expense or delay, to the benefit of each Governmental Approval set forth on Schedule 5.01(t) upon the exercise of remedies under the Security Documents Eximbank has received a true and complete copy of each Governmental Approval heretofore obtain or made by the Borrower.

(l) Compliance with Statutes, Etc.

(i) Each of the Borrower and, with respect to its ownership interest in and management of the Borrower, the General Partner is in compliance with all

26

Applicable Laws in respect of the conduct of its business and the ownership of its property (including, without limitation, Applicable Laws relating to environmental standards and controls and resettlements and Applicable Laws relating to the maintenance of debt to equity ratios).

(ii) Without limitation to the foregoing clause (i), the Borrower's business and the Project are being carried out in compliance with applicable Republic environmental guidelines.

(m) Environmental Matters. To the best of the Borrower's knowledge, neither the Site nor the Power Plant (nor any other property with respect to which the Borrower has retained or assumed liability either contractually or by operation of the law) has been affected by any Hazardous Material in a manner that is reasonably likely to give rise to any material liability of the Borrower under any Environmental Law or which has had or is reasonably likely to have an Adverse Effect.

(n) Patents, Licenses, Franchises and Formulas. The Borrower owns or has the right to use all the patents, trademarks, permits, service marks, trade names, copyrights, licenses, franchises and formulas, or rights with respect thereto, and has obtained assignments of all leases and other rights of whatever nature, necessary for the present and proposed conduct of its business and the carrying out of the Project in the manner contemplated by the Project Documents, without any known conflict with the fights of others which, or the failure to obtain which, as the case may be, is reasonably likely to result in a Material Adverse Effect.

(o) Submission to Law and Jurisdiction. As of the Guarantee Operative Date, the choice of governing law for each of the respective Project Documents in effect or required to be in effect as of the Guarantee Operative Date will be recognized in the courts of the Republic, and those courts will recognize and give effect to any judgment in respect of such Project Document obtained by or against the Borrower in the courts of the jurisdictions to which the Borrower has submitted.

(p) Status of the Loans and the Eximbank Credit. The Lender Financing Secured Obligations constitute, and the Eximbank Secured Obligations will

constitute, direct, unconditional, and general obligations of the Borrower and rank senior as to priority of payment and security to all Subordinated Secured Obligations and Affiliated Reimbursement Obligations of the Borrower and not less than pari passu as to priority of payment to all other Indebtedness of the Borrower. Except as permitted by Section 8.01 of this Agreement, the Borrower has not secured or agreed to secure any such other Indebtedness by any Lien upon any of its present or future revenues, assets or properties or upon any general or limited partnership interests in the Borrower.

27

(q) Documents; Sufficiency of Project Documents.

(i) Eximbank has received a complete copy of each Project Document in effect or required to be in effect as of each date this representation is made or deemed made (including all exhibits, schedules and disclosure letters referred to therein or delivered pursuant thereto, if any).

(ii) To the best of the Borrower's knowledge, the services to be performed, the materials to be supplied and easements, licenses and other rights granted or to be granted to the Borrower pursuant to the terms of the Project Documents provide or will provide the Borrower with all rights and property interests required to enable the Borrower to obtain all services, materials or rights (including access) required for the design, construction, start-up, operation and maintenance of the Project, including the Borrower's full and prompt performance of its obligations, and full and timely satisfaction of all conditions precedent to the performance by others of their obligations, under the Project Documents, other than those services, materials or rights that reasonably can be expected to be obtainable in the ordinary course of business without material additional expenses or material delay.

(r) Fees and Enforcement. Other than amounts that have been paid in full or will have been paid in full by the Guarantee Operative Date (or, for the purposes of Section 6.02 hereof, the Disbursement Date), no fees or taxes, including without limitation stamp, transaction, registration or similar taxes, are required to be paid for the legality, validity, or enforceability of this Agreement or any of the other Project Documents in effect or required to be in effect as of each date this representation is made or deemed made. This Agreement and each of such Project Documents executed and delivered as of the date this representation is made or deemed made are each in proper legal form under the laws of the Republic, and under the respective governing laws selected in such Project Documents, for the enforcement thereof in such jurisdiction without any further action on the part of the Collateral Trustee or Eximbank.

(s) Utility Availability. Arrangements reflected accurately and completely in the Construction Budget have been made under the Construction Contract, the Supply Contract, the BOT Agreement or otherwise on commercially reasonable terms for the provision of all services, materials and utilities reasonably necessary for the construction of the Project.

(t) Availability and transfer of Foreign Currency. Except as disclosed in Schedule 6.01(t) to this Agreement, all requisite foreign exchange control approvals and other authorizations, if any, by the Republic or any department or agency thereof have been duly obtained and validly issued and are in full force and effect to assure (i) the

28

ability of the Borrower to receive, and the ability of any other Person to make, any and all payments to the Borrower contemplated by the Project Documents, (ii)

the availability of Dollars to enable the Borrower to perform all of its obligations under the Financing Documents or any of the other Project Documents, as the case may be, in accordance with their respective terms, and (iii) the ability of the Borrower to convert all sums received in Peso amounts from PNOC-EDC under the BOT Agreement and the PNOC-EDC Consent Agreement and from the Republic under the Performance Undertaking and the Republic Consent Agreement, including any Peso amounts representing SFRI Fees, from Pesos to Dollars, immediately upon receipt thereof, and to use the Dollars as necessary to perform all of its obligations under the Project Documents, in accordance with their respective terms. None of such foreign exchange control approvals and other authorizations are subject by its respective terms as currently in effect to modification or revocation. Except as disclosed in Schedule 6.01(t) to this Agreement, there are no restrictions or requirements which limit the availability or transfer of foreign exchange, or the conversion to a foreign exchange, for the purpose of the performance by the Borrower of its obligations under the Financing Documents, this Agreement or under any of the other Project Documents.

(u) Construction Budget.

(i) The Construction Budget as in effect on the date hereof is attached as Schedule 6.01(u) to this Agreement. The Construction Budget accurately specifies all costs and expenses incurred and, to the best of the Borrower's knowledge, anticipated to be incurred, prior to the latest date on which the Maturity Date can be expected to occur to construct and finance the construction of the Project in the manner contemplated by the Project Documents. In addition, to the best of the Borrower's knowledge, the amount of all costs and expenses required to be paid or incurred prior to the latest date on which the Maturity Date can be expected to occur to construct and finance the construction of the Project in the manner contemplated by the Project Documents does not exceed the amount reflected in the Construction Budget

(ii) To the best of the Borrower's knowledge, all projections and budgets (including the Construction Budget and the Base Case Forecast) furnished or to be furnished to the Administrative Agent, the Collateral Trustee, the Issuing Bank, the Lenders or Eximbank by or on behalf of the Borrower and the summaries of significant assumptions related thereto (w) have been and will be prepared with due care, (x) fairly present, and will fairly present, the Borrower's expectations as to the matters covered thereby as of their date, (y) are based on, and will be based on, reasonable assumptions as to all factual and legal matters material to the estimates therein (including interest rates and costs)

29

and (z) are in all materials respects consistent with, and will be in all material respects consistent with, the provisions of the Project Documents.

(v) Title; Liens. The Borrower has good and valid title to all of its other properties and assets, in each case, free and clear of all Liens other than Permitted Liens, including without limitation, on and subject to the terms and conditions of the BOT Agreement, an unconditional and unencumbered right to use the Site for the duration of the Cooperation Period (as defined in the BOT Agreement). No mortgage or financing statement or other instrument or recordation covering all or any part of the property or assets of the Borrower is on file in any recording office, except such as relate to Liens described in paragraphs (a) and (b) of Section 8.01 hereof.

(w) Transactions with Affiliates. The Borrower is not a party to any contracts or agreements with, or any other commitments to, whether or not in the ordinary course of business, any Affiliate, which are individually valued in excess of \$50,000 or in the aggregate valued in excess of \$100,000 except for

the Lender Credit Agreement, the Construction Contract, the Supply Contract, the Funding Agreement, the Mortgage, Assignment and Pledge Agreement, the Keystone Agreement, the Assignment and Assumption Agreement, the O&M Support Undertaking and any other contracts, agreements or commitments that are contemplated in the O&M Parameters (including those relating to employee training, vehicle rentals and secondment of employees) or in the Funding Agreement.

(x) No Additional Fees. Other than as expressly set forth in the Base Case Forecast and the Construction Budget, the Borrower has not paid or become obligated to pay any fee or commission to any broker, finder or intermediary for or on account of arranging the financing of the transactions contemplated by the Project Documents.

(y) Regulation of Parties. None of the Borrower, its Affiliates nor any of the Secured Parties or Eximbank is or will be, solely as a result of the participation by such parties separately or as a group in the transactions contemplated hereby or by any other Project Document, or as a result of the ownership, use or operation of the Project, subject to regulation by any Governmental Authority of the United States as a "public utility", an "electric utility holding company", a "public utility holding company", a "holding company", or an "electrical corporation" or a subsidiary or affiliate of any of the foregoing under any Applicable Law of the United States (including, without limitation, PUHCA and FPA) or by any Governmental Authority of the Republic as a "public utility" under any Applicable Law of the Republic. So long as the owner and operator of the Project is an "exempt wholesale generator" under Section 32 of PUHCA or a "foreign utility company" under Section 33 of PUHCA, none of the Secured Parties will by reason of its or their ownership or operation of the Project upon the exercise or remedies under the Security Documents be subject to regulation by any Governmental Authority of the

30

United States as a "public utility", an "electric utility", an "electric utility holding company", a "holding company", or an "electric corporation" or a subsidiary or affiliate of any of the foregoing under any Applicable Law of the United States (including, without limitation, PUHCA and FPA).

(z) Regulatory Status. The Borrower is not subject to regulation as a "subsidiary company" of a holding company under PUHCA.

(aa) ERISA and Employees. The Borrower does not sponsor, maintain, administer, contribute to, participate in, or have any obligation to contribute to or any liability under, any Plan nor since the date which is six years immediately preceding the Guarantee Operative Date has the Borrower established, sponsored, maintained, administered, contributed to, participated in, or had any obligation to contribute to or liability under, any Plan. A Termination Event has not occurred with respect to any Plan the occurrence of which has had or to the Borrower's knowledge is reasonably likely to result in a Material Adverse Effect. Neither the Borrower nor any ERISA Affiliate has failed to make a required contribution or payment to a Multiemployer Plan when due, the failure of which has had or to the Borrower's knowledge is reasonably likely to result in a Material Adverse Effect. To the Borrower's knowledge, no accumulated funding deficiency as defined in Section 412 of the Code has been incurred nor has any funding waiver from the Internal Revenue Service been received or requested with respect to any Pension Plan, nor has the Borrower or any ERISA Affiliate failed to make any contribution or to pay any amount due and owing as required by Section 412 of the Code, Section 302 of ERISA or the terms of any Pension Plan, nor has there been any event requiring disclosure under Section 4041(c)(3)(C) or Section 4063 of ERISA with respect to any Pension Plan, the event or occurrence of which has had or to the Borrower's knowledge is reasonably likely to result in a Material Adverse Effect. To the Borrower's knowledge, the Borrower and each ERISA Affiliate has met its minimum funding requirements under ERISA and the Code with respect to the Plans and all benefit liabilities under each Pension Plan are being funded in accordance with

applicable legal requirements and reasonable actuarial assumptions and methods as set forth in ERISA and the Code. To the Borrower's knowledge, no material proceeding, claim, lawsuit and/or investigation exists or, to the best of the Borrower's knowledge, is threatened concerning any (i) Pension Plan, or (ii) Multiemployer Plan, the occurrence of which has had or is reasonably likely to result in a Material Adverse Effect. Neither the Borrower nor, to the Borrower's knowledge, any ERISA Affiliate has incurred any liability to the PBGC other than for insurance premiums with respect to a Pension Plan, the payment of which is not yet due.

(bb) Investment Company Act. Neither the Borrower nor any of its Affiliates is an "investment company" or a company "controlled" by an "investment company", within the meaning of the Investment Company Act of 1940, as amended.

31

Section 6.02. Representations and Warranties with Respect to the Disbursement Date. In order to induce Eximbank to make the Eximbank Credit available to the Borrower on the Disbursement Date, the Borrower confirms the representations and warranties set forth in Section 6.01 as if made as of the Disbursement Date (except where specified to be made as of a special date).

Section 6.03. Acknowledgment. The Borrower acknowledges that it has made the foregoing representations and warranties with the intention of persuading Eximbank to enter into this Agreement, the Eximbank Guarantee Agreement and the other Financing Documents to which Eximbank is a party, and that Eximbank has entered into this Agreement, the Eximbank Guarantee Agreement and the other Financing Documents to which Eximbank is a party on the basis of, and in full reliance on, each of such representations and warranties. The Borrower warrants to Eximbank that each of such representations is true and correct in all material respects as of the date of this Agreement and that none of them omits any matter necessary to make such representation not misleading in any material respect. The rights and remedies of Eximbank in relation to any misrepresentations or breach of warranty on the part of the Borrower shall not be prejudiced by any investigation by or on behalf of Eximbank into the affairs of the Borrower, by the execution, delivery or performance of this Agreement or any other Financing Document or by any other act or thing which may be done by or on behalf of Eximbank in connection with this Agreement or any other Financing Document and which might, apart from this Section, prejudice such rights or remedies. The representations referred to in this Section 6 shall survive the execution and delivery of this Agreement and the making of the Eximbank Disbursement.

SECTION 7. AFFIRMATIVE COVENANTS

With respect to provisions of this Section 7 so specifying, from and after the Disbursement Date and, with respect to all remaining provisions of this Section 7, from and after the execution and delivery of this Agreement, in each case until the Eximbank Credit is paid in full, except as otherwise waived pursuant to the next two succeeding sentences, the Borrower covenants and agrees as provided in this Section 7. Provisions of this Section 7 specifying effect from and after the Disbursement Date and provisions requiring consultations with or the furnishing of documents or other information to Eximbank or requiring the consent or approval of Eximbank to the taking or omission of any action may only be waived by Eximbank and in writing. All other provisions of this Section 7 may be waived with effect during the period prior to the Disbursement Date by the Required Secured Parties and in writing and, thereafter, by Eximbank and in writing.

Section 7.01. Information Covenants. The Borrower shall furnish to shall furnish to Eximbank:

(a) Quarterly Financial Statements. As soon as available but, in any event, within ninety (90) days (or one hundred twenty (120) days in the case of the fourth quarterly accounting period) after the close of each quarterly accounting period in each Fiscal Year:

(i) two copies of complete unaudited statements of financial condition of the Borrower and the General Partner as at the end of such quarterly period with related statements of income and retained earnings and statements of changes in financial position for such quarterly period and for the elapsed portion of the Fiscal Year ended with the last day of such quarterly period, in each case setting forth comparative figures for the related periods in the prior Fiscal Year, which shall be prepared in accordance with generally accepted accounting principles as in effect from time to time (A) in the case of the Borrower, in the Republic and (B) in the case of the General Partner, in the United States and which, in either case, shall otherwise be in form satisfactory to Eximbank and certified by the chief financial officer of the Borrower or the General Partner, as the case may be, subject to normal year-end audit adjustments;

(ii) a report on any event or condition which has had or which is reasonably likely to have a Material Adverse Effect; and

(iii) a statement, in form reasonably satisfactory to Eximbank, of all financial transactions in such Quarter between the Borrower and any Affiliate of the Borrower, including a certification that such transactions were on ordinary commercial terms negotiated on an arms-length basis.

(b) Annual Financial Statement. As soon as available but, in any event, within one hundred twenty (120) days after the close of each Fiscal Year, two copies of the following, all prepared in accordance with generally accepted accounting principles as in effect in the Republic from time to time and otherwise in form satisfactory to Eximbank: (i) statements of financial condition of the Borrower as at the end of such Fiscal Year with the related statements of income and retained earnings and statements of changes in financial position for such Fiscal Year, setting forth comparative figures for the preceding Fiscal Year and certified by the Auditors, together with (if applicable) consolidated statements and all adjustments thereto (all such statements being in agreement with the Borrower's books of account and prepared in accordance with Republic generally accepted accounting principles consistently applied), (ii) a report of the Auditors (x) stating that in the course of its regular audit of the financial statements of the Borrower, which audit was conducted in accordance with Republic generally accepted auditing standards, the Auditors obtained no knowledge of any Incipient Default Event or Default Event which has occurred and is continuing or, in the opinion of the

Auditors such an Incipient Default Event or Default Event has occurred and is continuing, a statement as to the nature thereof and (y) certifying that, based on said financial statements, the Borrower was in compliance with the financial covenant contained in Section 8.18 as of the end of the relevant Fiscal Year and, during the last fiscal quarter of such Fiscal Year, did not receive any distributions or make any payments of principal of or interest on any Subordinated Secured Obligations or Affiliated Reimbursement Obligations in violation of such covenant or of the Debt Reserve Annual Coverage Ratios set forth in priorities SIXTH, SEVENTH, EIGHTH or NINTH, as the case may be, of Section 3.02(d)(ii) of the Disbursement Agreement or, as the case may be,

detailing any non-compliance therewith and (iii) a certificate of the chief financial officer of the Borrower setting forth comparative figures for such statements of financial condition and the pro forma financial projections submitted to Eximbank in connection with the Borrower's application for credit approval.

(c) Other Financial Statements.

(i) Within one hundred twenty (120) days (or, with respect to Ormat, one hundred fifty (150) days) of the end of each fiscal year, copies of the audited (or unaudited, if audited are not available) annual financial statements (consisting of a balance sheet and the related statements of income, equity and cash flows) of Ormat, Ormat International, Orleyte Company and Ormat Philippines certified by the respective chief financial officer of each such person and within ninety (90) days after the end of each of the first three fiscal quarters of each fiscal year, copies of the unaudited quarterly financial statements (consisting of a balance sheet and the related statements of income, equity and cash flows) of Ormat, Ormat International, Orleyte Company and Ormat Philippines, certified by the respective chief financial officer of each such person that such financial statements are true and correct and have been prepared in accordance with United States (or, in the case of Ormat, Israeli) generally accepted accounting principles (subject to normal year-end adjustments); provided, however, that the Borrower shall have no obligation hereunder to provide to Eximbank the financial statements of either Ormat or Ormat International after such entity is no longer an Obligor.

(ii) Within one hundred (115) days after the close of the second fiscal quarter of each Fiscal Year of the Borrower, a report of the Auditors certifying that, as of the end of such fiscal quarter, the Borrower was in compliance with the financial covenant contained in Section 8.18 and, during such fiscal quarter, did not receive any distributions or make any payments of principal of or interest on any Subordinated Secured Obligations or Affiliated Reimbursement Obligations in violation of such covenant or of the Debt Reserve Annual Coverage Ratios set forth in priorities SIXTH, SEVENTH, EIGHTH or NINTH,

34

as the case may be, of Section 3.02(d)(ii) of the Disbursement Agreement or, as the case may be, detailing any non-compliance therewith.

(iii) Within ninety (90) days after the close of each of the first and third fiscal quarters of each Fiscal Year of the Borrower, a certificate of the chief financial officer of the Borrower, accompanied by calculations in reasonable detail supporting the conclusions set forth therein, to the effect as of the end of each such fiscal quarter, the Borrower was in compliance with the financial covenant contained in Section 8.18 and, during each such fiscal quarter, did not receive any distributions or make any payments of principal of or interest on any Subordinated Secured Obligations or Affiliated Reimbursement Obligations in violation of such covenant or of the Debt Reserve Annual Coverage Ratios set forth in priorities SIXTH, SEVENTH, EIGHTH or NINTH, as the case may be, of Section 3.02(d)(ii) of the Disbursement Agreement or, as the case may be, detailing any non-compliance therewith.

(iv) Contemporaneously with the delivery thereof to the Collateral Trustee, copies of each certificate requesting a distribution or payment of principal of or interest on any Subordinated Secured Obligations or Affiliated Reimbursement Obligations in accordance with priorities SIXTH, SEVENTH, EIGHTH or NINTH, as the case may be, of Section 3.02(d)(ii) of the Disbursement Agreement.

(d) Management Letters. Promptly after the Borrower's receipt thereof, a copy of any "management letter" or other similar communication received by the Borrower from the Auditors in relation to the Borrower's financial, accounting and other systems, management and accounts.

(e) Annual Operating Budget. As soon as available but, in any event, within sixty (60) days prior to (i) the Cooperation Period Commencement Date in respect of the initial Plant to be completed and, thereafter, (ii) the commencement of each Fiscal Year, an annual operating budget (the "Annual Budget") (including budgeted statements of income and sources and uses of cash and balance sheets) prepared by the Borrower and accompanied by a statement of the chief financial officer of the Borrower to the effect that, the best of his or her knowledge, the budget is a reasonable estimate for the period covered thereby. The first Annual Budget shall cover the period from the Cooperation Period Commencement Date through the end of the Fiscal Year in which the Cooperation Period Commencement Date occurs, and, if such period consists of less than six (6) months, for the immediately succeeding Fiscal Year. Each Annual Budget shall contain complete, fair and accurate estimates (by principal components) of Sales Proceeds, Operating and Maintenance Costs and Debt Service for each Month covered by such Annual Budget based on the Borrower's best projections at such time. Unless otherwise

35

consented to by Eximbank, the Annual Budget from year to year shall be based on the same format as the Base Case Forecast, including any amounts allocated for contingencies, and be maintained on the same basis and provide sufficient detail to permit a meaningful comparison. For each Annual Budget that is expected to cover any period occurring after the Disbursement Date, Eximbank (in consultation with the Independent Engineer) shall review such Annual Budget, and Eximbank's response shall not be unreasonably delayed. If Eximbank does not approve an Annual Budget, Eximbank shall notify the Borrower of the items which are disapproved and the reason for such disapproval. Until such Annual Budget is so approved, the Annual Budget most recently in effect shall continue to apply, except that any items of the then proposed Annual Budget that have been approved shall also be given effect. From time to time, but not more frequently than once per Quarter, the Borrower may propose amendments to an Annual Budget, and Eximbank (in consultation with the Independent Engineer) may reject such proposal within thirty (30) Business Days from the date the Borrower submits such proposal if in Eximbank's reasonable judgment such amendment is not reasonably necessary or advisable for operation of the Project and, if no such rejection is made, such amendments shall become effective. Not later than three (3) Business Days after the effective date of each Annual budget and of any amendment thereto, the Borrower shall provide a copy of the same to the Collateral Trustee.

(f) Officer's Certificates. At the time of the delivery of the financial statements provided for in Section 7.01(a) and (b), a certificate of a Financial Officer of the Borrower to the effect that, to the best of his or her knowledge, no Incipient Default Event or Default Event has occurred and is continuing or, if any Incipient Default Event or Default Event has occurred and is continuing, specifying the nature and extent thereof and what action the Borrower is taking or proposes to take in response thereto, which certificate shall (without duplication of the Borrower's obligations under Section 7.03(c)(iii)), from and after the Disbursement Date, set forth the calculations required to establish whether the Borrower was in compliance with the provisions of Section 7.14, 8.03 and 8.18 and Section 3.02(d)(ii) of the Disbursement Agreement.

(g) Notice of Default, Litigation, etc. (i) Immediately upon the Borrower obtaining knowledge thereof, notice, by facsimile, cable or telex, of any event which constitutes an Incipient Default Event or Default Event, specifying the nature of such Incipient Default Event or Default Event and any steps the Borrower is taking to remedy the same; and (ii) promptly, and in any event within twenty (20) Business Days (or such shorter period as may be specified

below) after an officer of the Borrower or the General Partner, as the case may be, obtains knowledge thereof:

(A) notice of any litigation or governmental proceeding pending (x) against the Borrower or the General Partner (i) involving a claim in excess of \$125,000 (or the equivalent thereof in other currency) or (ii) which is

36

reasonably likely to have a Material Adverse Effect or (y) with respect to any Project Document;

(B) notice of any proposal by any Governmental Authority to acquire compulsorily the Borrower or the General Partner, any of the Collateral or a substantial part of the Borrower's or the General Partner's business or assets;

(C) notice of any substantial dispute between the Borrower or any Affiliate of the Borrower and any Governmental Authority relating to the Project;

(D) notice of any change in the authorized officers or directors referred to in Section 5.01(m) above, giving certified specimen signatures of any new officer or director so appointed and, if requested by Eximbank, satisfactory evidence of the authority of such new officer or director;

(E) (x) as promptly as practicable and in any event not later than two Business Days after becoming aware thereof notice of any actual or proposed termination, rescission, discharge (otherwise than by performance) under any material provision of any Project Document (other than by Eximbank) and (y) as promptly as practicable and in any event not later than ten Business Days after becoming aware thereof notice of any actual or proposed amendment, waiver or indulgence under any material provision of any Project Document (other than by Eximbank);

(F) copies of any material notice or correspondence received or initiated by the Borrower or the General Partner relating to a Governmental Approval or other license or authorization necessary for the Performance by the Borrower or the General Partner of its respective obligations under the Project Documents;

(G) notice of any Lien (other than a Permitted Lien) becoming enforceable over any of the Borrower's assets;

(H) notice of any proposed material change in the nature or scope of the Project or the business or operations of the Borrower and any one or more events, conditions or circumstances (including without limitation Force Majeure as defined in Sections 14.1(a) and 14.1(b) of the BOT Agreement) that exist or have occurred which are reasonably likely to have a Material Adverse Effect;

(I) until the Eximbank Guarantee Agreement has terminated in accordance with its terms, notice of the occurrence of any event or act which

37

could reasonably qualify as a Political Risk (as defined in the Eximbank Guarantee Agreement);

(J) notice of or (in the case of items described in the immediately

succeeding clause (x)) copies of: (x) each funding waiver request filed with respect to any Pension Plan and all communications received or sent by the Borrower or any ERISA Affiliate with respect to such request, and (y) the failure of the Borrower or any ERISA Affiliate to make a required installment or payment under Section 412 of the Code, Section 302 of ERISA or the terms of any Pension Plan by the due date (other than the quarterly contributions described in Section 302(e) of ERISA or Section 412(m) of the Code);

(K) notice of the occurrence of any Termination Event which has had or is reasonably likely to result in a Material Adverse Effect in connection with any Pension Plan or any trust thereunder, specifying the nature thereof, what action the Borrower or the ERISA Affiliate has taken, is taking or proposes to take with respect thereto and, when known, any action taken or threatened by the United States Internal Revenue Service, the United States Department of Labor or the PBGC with thereto;

(L) copies of: (x) all notices of the PBGC's intent to terminate any Pension Plan or to have a trustee appointed to administer any Pension Plan; and (y) all notices from a Multiemployer Plan sponsor concerning the imposition or amount of withdrawal liability pursuant to Section 4202 of ERISA; or

(M) notice of the filing of an intent to terminate any Pension Plan under a distress termination within the meaning of Section 4041(c) of ERISA; or

(N) a copy of each agreement, commitment or understanding (whether or not subject to the approval of Eximbank pursuant to any other provision of this Agreement) executed by or on behalf of the Borrower (excluding (x) the agreements set forth in clauses (i) through (xiii), inclusive, (xvi), (xvii) and (xviii) of the definition of the term "Operating Agreements" in Schedule X hereto but including replacements thereof and (y) agreements, commitments or understandings entered into in the ordinary course of business which are required to perform the O&M Parameters and which (1) do not, individually, create a financial obligation of the Borrower in excess of \$75,000 and (2) would not, in the aggregate, result in the expenditure of funds in any Fiscal Year in excess of the amount budgeted for Operating and Maintenance Costs (including the Contingent O&M Amount) in the then-current Annual Budget for such Fiscal Year) in connection with the Project, which notice shall specifically refer to this Section 7.01(g)(ii)(N) and, with respect to any such agreement,

38

commitment or understanding extending by its terms beyond the Disbursement Date, request that Eximbank confirm (prior to the Disbursement Date, after consultation with the Administrative Agent) whether or not such agreement, commitment or understanding shall constitute an Operating Agreement, in which case such agreement, commitment or understanding shall only constitute an Operating Agreement if Eximbank shall so designate it as an Operating Agreement in a writing delivered to the Borrower within 60 days of Eximbank's receipt thereof; or

(O) notice of the occurrence of any event of default or default under Section 19.1 of the Construction Contract or under the Assignment and Assumption Agreement.

(h) Implementation Reports. Prior to the Project Completion Date, within twenty-one (21) days of the end of each Month, a report, in a form satisfactory to Eximbank, on the implementation and progress of the Project, including (i) any factors materially and adversely affecting or which are reasonably likely to materially and adversely affect the carrying out of the Project and (ii) copies of any reports received by the Borrower from any outside technical consultant

identifying any matter that is or may prove to be of material adverse significance to the operation of the Plant.

(i) Completion Date and Operation Date Notices. The Borrower shall provide Eximbank with not more than ten (10) or less than two (2) Business Days' prior notice of the scheduled occurrence of the Completion Date for each Plant. The Borrower shall provide Eximbank with not more than ten (10) or less than two (2) Business Days' prior notice of the scheduled occurrence of (i) each Operation Date and (ii) the date on which the Borrower expects to satisfy the conditions precedent to Eximbank Disbursement specified in Section 5.02 hereof (other than those conditions that may only be satisfied on and as of the Disbursement Date). The Borrower shall provide Eximbank with notice of the Completion Date for each Plant and the Operation Date for each Plant not more than five (5) Business Days after the occurrence of any thereof.

(j) Other Information. From time to time, such other information or documents (financial or otherwise) as Eximbank may reasonably request including, without limitation, (1) advance notice of the commencement of all performance tests under the Construction Contract and (2) if the Completion Date for any Plant in the BOT Agreement shall have been deemed to have occurred pursuant to Section 5.4(h) of the BOT Agreement, information as to the circumstances giving rise to the same, the action(s) which the Borrower (and, to the extent known by the Borrower, PNOC-EDC) is taking or proposes to take with respect to the same and periodic reports of the status of such actions and the implementation thereof.

39

Section 7.02. Books, Records and Inspections; Accounting and Audit Matters.

(a) The Borrower will keep proper books of record and account adequate to reflect truly and fairly the financial condition and results of operations of the Borrower (including the progress of the Project) in which full, true and correct entries in conformity with Philippine generally accepted accounting principles consistently applied and all Applicable Laws shall be made of all dealings and transactions in relation to its business and activities. The Borrower will permit officers and designated representatives of Eximbank to visit and inspect, under guidance of officers of the Borrower, any of the properties of the Borrower, and to examine and make copies of the books of record and account of the Borrower and discuss the affairs, finances and accounts of the Borrower with, and be advised as to the same by, its and their officers, all at such reasonable times and intervals and to such reasonable extent as Eximbank may request.

(b) The Borrower shall (i) authorize the Auditors (whose fees and expenses shall be for the account of Borrower) to communicate directly with Eximbank at reasonable intervals, but if an Incipient Default Event or a Default Event has occurred or is continuing, then at any time, regarding the Borrower's accounts and operations and (ii) furnish to Eximbank a copy of such authorization, which shall be in the form of Schedule 6.2(b) to the Lender Credit Agreement; provided, however, that Eximbank will (i) provide the Borrower with copies of any correspondence between Eximbank and the Auditors, and (ii) provide the Borrower with reasonable notice of any meeting between Eximbank and the Auditors, with a description of the matters to be discussed at such meeting, and allow the Borrower to attend any such meeting.

(c) The Borrower will at all times cause a complete set of the current and (when available) as-built plans (and all supplements thereto) relating to each Plant to be maintained at such Plants or the Construction Contractor's office for inspection by the independent Engineer and Eximbank.

Section 7.03. Maintenance of Property, Insurance. (a) The Borrower will (i) keep all property useful and necessary (other than property that has become obsolete) in its business in good working order and condition and (ii) keep its

present and future properties and business insured with financially sound and reputable insurers satisfactory to Eximbank against loss or damage in such manner and to the same extent as required in Section A of Schedule 7.03 hereto until the expiration of such policies and immediately thereafter as required in Section C of Schedule 7.03 hereto, including in each case pursuant to policies naming the Collateral Trustee as sole loss payee thereunder, permitting the Collateral Trustee to make claims thereunder, and containing cut-through endorsements to reinsurers, provisions requiring that the Collateral Trustee and Eximbank shall receive notices of extensions or renewals of insurance policies and notice

40

of any non-payment of premiums and that such policy may only be canceled for non-payment of premiums, if cancelable, upon sixty (60) days prior notice to the Collateral Trustee and Eximbank. On or prior to the dates required pursuant to Section A or Section C, as the case may be, of Schedule 7.03, the Borrower will submit to Eximbank certificates of insurance relating to the insurances required by Section A and Section C of Schedule 7.03 (together with copies of such insurance policies if then available) from the Borrower's insurers or insurance brokers (including confirmation of premium payments then due), which certificates shall indicate the properties insured, amounts and risks covered, names of the expiration dates, names of the insurers and special features of the insurance policies. The Borrower shall provide Eximbank with copies of insurance policies relating to the insurances required by Section A and Section C of Schedule 7.03 hereto on or prior to the date such policies are required to be delivered to Eximbank in accordance with such Section A or Section C, as the case may be. Prior to the Disbursement Date, the Borrower shall provide Eximbank with copies of the insurance policies relating to the insurances required by Section C of Schedule 7.03 hereto, such policies to be in form and substance, and issued by companies, satisfactory to Eximbank (in consultation with the Insurance Consultant).

(b) The Borrower will cause the Construction Contractor and the Construction Supplier, as applicable, to (i) keep the insurances described in Section B of Schedule 7.03 hereto with financially sound and reputable insurers satisfactory to, prior to the Disbursement Date, the Administrative Agent and, thereafter, Eximbank, in each case against loss or damage in such manner and to the same extent as so described, in each case pursuant to policies of insurance naming the Collateral Trustee as sole loss payee thereunder, permitting the Collateral Trustee to make claims thereunder, and containing cut-through endorsements to reinsurers and provisions requiring that the Collateral Trustee and Eximbank shall receive notices of any non-payment of premiums and that such policy may only be canceled (x) as provided in Section B of Schedule 7.03 hereto or (y) if not therein provided, for non-payment of premiums, if cancelable, upon thirty (30) days prior written notice to the Collateral Trustee Eximbank. On or prior to the dates required pursuant to Section B of Schedule 7.03, the Borrower will cause the Construction Contractor or the Construction Supplier, as applicable, to submit to Eximbank certificates of insurance relating to the insurances required by Section B of Schedule 7.03 (together with copies of such insurance policies if then available) from the insurers or insurance brokers for such insurances (including confirmation of premium payments then due), which certificates shall indicate the type of insurance, amounts and risks covered, names of the beneficiaries, expiration dates, names of the insurers and special features of the insurance policies. The Borrower will cause the Construction Contractor or the Construction Supplier, as applicable, to provide Eximbank with copies of insurance policies relating to the insurances described in Section B of Schedule 7.03 hereto on or prior to the date such policies are required to be delivered to Eximbank in

41

accordance with such Section B of Schedule 7.03 hereto, such policies to be in form and substance, and issued by companies, satisfactory to Eximbank in consultation with the Insurance Consultant. The Borrower will cause the Construction Contractor to establish the BOT Construction Performance Security in favor of PNOC-EDC within the time required by PNOC-EDC in connection with the BOT Agreement and will deliver evidence reasonably satisfactory to Eximbank of PNOC-EDC's acceptance of the BOT Construction Performance Security within fifteen (15) calendar days after the same is so established.

(c) In the event any insurance (including the limits or deductibles thereof) hereby required to be maintained by the Borrower or for which the Borrower is responsible, or required to be maintained by the Construction Supplier or the Construction Contractor or for which the Construction Supplier or the Construction Contractor is responsible, other than insurance required by Applicable Law to be maintained, shall not be available on commercially reasonable terms in the commercial insurance market, the Administrative Agent, prior to the Lender Financing Termination Date, or, thereafter, Eximbank, shall not unreasonably withhold its consent to waive such requirement to the extent the maintenance thereof is not so available; provided, however, that (i) the Borrower shall first request any such waiver in writing, which request shall be accompanied by a written report prepared by the Borrower's insurance adviser certifying that such insurance is not reasonably available and commercially feasible in the commercial insurance market for electric generating plants of similar type and capacity and, with respect to catastrophic perils, located in Southeast Asia, and (ii) the Insurance Consultant shall confirm in writing the conclusions contained in such report. The failure at any time to satisfy the condition to any waiver of an insurance requirement set forth in the proviso to the preceding sentence shall not impair or be construed as a relinquishment of the Borrower's ability to obtain a waiver of an insurance requirement pursuant to the preceding sentence at any other time upon satisfaction of such conditions.

(c) The provisions of this Section 7.03 shall be deemed to be supplemental to, but not duplicative of, the provisions of any of the Security Documents that require the maintenance of insurance. In the event that any insurance whatsoever is purchased, taken or otherwise obtained by the Borrower with respect to the Project otherwise than as required hereunder or if not properly endorsed to the Collateral Trustee as the sole loss payee or beneficiary or otherwise made upon the terms required in this Section 7.03, without limitation to any provision of the Mortgage, Assignment and Pledge Agreement, such insurance shall be considered assigned hereunder to the Collateral Trustee with the right of the Collateral Trustee to make, settle, compromise and liquidate any and all claims thereunder, without prejudice to the exercise of any other rights and remedies that the Collateral Trustee may have under any of the Financing Documents, or under any Applicable Law.

Section 7.04. Maintenance of Existence; Privileges; Etc. The Borrower shall, and with respect to clauses (a)(i), (a)(iii) and (b) of this Section 7.04 shall cause the General Partner to, at all times (a) preserve and maintain in full force and effect (i) its existence as a limited partnership or a corporation, as the case may be, in each case duly authorized, validly existing and in good standing under the laws of the Republic or the Cayman Islands, as the case may be (ii) its qualification to do business in each other jurisdiction in which the character of the properties owned or leased by it or in which the transaction of its business as conducted or proposed to be conducted makes such qualification necessary and (iii) all of its powers, rights, privileges and franchise necessary for the construction, ownership, maintenance and operation of the Project and the maintenance of its existence, (b) obtain in a timely manner and maintain in full force and effect (or where appropriate, renew) all Governmental Approvals (including, without limitation, those under Environmental Laws) and all other licenses, registrations, waivers, consents and approvals

required at any time in connection with the construction, maintenance, ownership or good and orderly operation of the Project and all licenses, consents and approvals necessary for the conversion to Dollars of all Peso amounts (including, without limitation, Peso amounts representing SFRI Fees) payable under the BOT Agreement, the PNOC-EDC Consent Agreement, the Performance Undertaking and the Republic Consent Agreement and for the remission to the United States in Dollars of any amounts paid or payable to the Secured Parties in connection with any Financing Document or the transactions contemplated thereby or the partnership interests of the Borrower and (c) preserve and maintain good and marketable title to its properties and assets (it being understood that the Borrower's rights with respect to the Site are solely as set forth in the BOT Agreement and the Accession Undertaking) subject to no Liens other than Permitted Liens.

Section 7.05. Compliance with Statutes. The Borrower will comply with all Applicable Laws in respect of the conduct of its business and the ownership, operation and use of its property (including, without limitation, Applicable Laws relating to environmental standards and controls and Applicable Laws relating to the maintenance of debt to equity ratios). The Borrower will cause the General Partner to comply with all Applicable Laws in respect of the General Partner owning its equity interest in, and acting in its capacity as general partner of, the Borrower.

Section 7.06. Consultations Regarding Independent Engineer's Report. The Borrower agrees that (i) in addition to any other consultation required hereunder, following the end of each Month, upon the request of the Administrative Agent or Eximbank, the Borrower shall consult with such Person regarding any materially adverse event or condition identified by the Independent Engineer in the reports provided by the Independent Engineer for such Month pursuant the Representative Agreement, and (ii) in the event the Borrower fails to hold such consultations within 30 days of such request, such event or condition shall be deemed to have a Material Adverse Meet.

43

Section 7.07. Project Implementation; Use of Proceeds.

(a) The Borrower shall (i) carry out the Project and conduct its business with due diligence and efficiency and in accordance with sound engineering, financial, and business practices and in accordance with the Annual Budget as specified in Section 7.01(e); and (ii) use the proceeds of the Loans and the Eximbank Credit only for the purpose set forth in Section 2.01.

(b) Without limiting the generality of the preceding clause (a), the Borrower will cause the construction of the Project to be prosecuted and completed with due diligence and continuity (except for interruptions due to events of Force Majeure (as defined in any of the BOT Agreement, the Construction Contract and the Supply Contract), which the Borrower will use its best efforts to mitigate), in good and workmanlike manner and in accordance with (i) sound generally accepted budding and engineering practices, (ii) all Governmental Approvals and Applicable Laws applicable to the Site, the Plants or the Borrower, (iii) the Construction Contract, (iv) the Supply Contract and (v) the Construction Budget.

(c) Without limiting the generality of clause (a) of this Section 7.07, from and after the Cooperation Period Commencement Date, the Borrower will operate and maintain the Project, and retain and maintain the staff sufficient to operate and maintain the Project, in accordance with the O&M Parameters and will otherwise comply with and fully satisfy all of the requirements of the O&M Parameters.

(d) Without limiting the generality of clauses (a) and (b) of this Section 7.07, in order to avoid a deemed abandonment under Section 15.4.1(d) of the BOT

Agreement, if the conditions precedent specified in clauses (a) and (b) of Section 13.3 of the Construction Contract have been satisfied the Borrower shall, within ten (10) Business Days prior to the date of potential abandonment under the BOT Agreement, exercise the right granted to it under the last sentence of Section 13.3 of the Construction Contract and certify to PNOC-EDC that the Power Plant (as defined in the Construction Contract) has achieved BOT Completion in accordance with Section 6.1(a) of the BOT Agreement.

(e) The Borrower shall provide Eximbank with notice immediately upon becoming aware that the conditions to enforcing any of the Ormat EPC Guaranty, the Ormat International EPC Guaranty, the Post-Completion Ormat Guaranty or the O&M Support Undertaking have been met.

(f) The Borrower agrees that it shall not designate an arbitrator or engineering firm under either the Construction Contract or the Supply Contract with respect to any disputes thereunder without obtaining the prior written consent of the Required Secured Parties, such consent not to be unreasonably withheld.

44

(g) Without the prior written consent of Eximbank, which approval shall not be unreasonably withheld, the Borrower shall not direct that Geothermal Fluid (as defined in the Construction Contract) be run through any GU (as defined in the Construction Contract) under circumstances which would give rise to the commencement of any of the Warranty Periods (as defined in the Construction Contract) pursuant to clause (a) of Section 17.10 of the Construction Contract.

Section 7.08. Auditors. In the event that SyCip Gorres Velayo & Co. should cease to be the Auditors of the Borrower for any reason, the Borrower shall appoint and maintain as the Auditors another firm of independent public accountants approved by Eximbank.

Section 7.09. Taxes, Duties, Proper Legal Form. The Borrower will pay and discharge all taxes, duties, fees, assessments or other governmental charges imposed on it, on its income or profits, on any of its property, or in connection with any such charges imposed on it with respect to any payment made under this Agreement or the execution, issue, delivery, registration, notarization, assignment or transfer of any interest in or for the legality, validity, or enforceability, of any Project Document prior to the date on which penalties attach thereto, and all claims, levies or liabilities (including, without limitation, claims for labor, services, materials and supplies) for sums which have become due and payable and which have or, if unpaid, might become a Lien upon the property of Borrower (or any part thereof). The Borrower shall have the right, however, to contest in good faith the validity or amount of any such tax, assessment, governmental charge or claim by proper proceedings timely instituted, and may permit the taxes, assessments, governmental charges or claims so contested to remain unpaid during the period of such contest if (i) the Borrower diligently prosecutes such contest, (ii) during the period of such contest the enforcement of any contested item is effectively stayed, (iii) the Borrower sets aside on its books adequate reserves with respect to the contested items and (iv) such contest does not, in the reasonable discretion of, prior to the Disbursement Date, the Administrative Agent and thereafter, Eximbank, involve a material risk of the sale, forfeiture or loss of any of the Collateral. The Borrower will promptly pay or cause to be paid any valid, final judgment enforcing any such tax, duty, fee, assessment, other governmental charge or claim and cause the same to be satisfied of record.

Section 7.10. Independent Engineer; Insurance Consultant. The Borrower (i) agrees to the Independent Engineer carrying out the role described in the Representative Agreement, (ii) confirms and agrees to the terms of its Acknowledgment appended to the Representative Agreement, which terms are

incorporated herein by reference as if fully set forth herein and (iii) will ensure that the Insurance Consultant will be provided with all information reasonably requested by the Insurance Consultant and will exercise due care to ensure that any information which it may supply the Insurance Consultant is

45

materially accurate and not, by omission of information or otherwise, misleading in any material respect.

Section 7.11. Performance of Obligations. The Borrower will perform all of its obligations under the terms of each mortgage, indenture, security agreement and other debt instrument by which it is bound and will perform (i) all of its obligations under the terms of the Financing Documents and the BOT Agreement and (ii) such of its obligations under the terms of the Project Documents (other than the Financing Documents and the BOT Agreement) the non-performance of which is reasonably likely to have a Material Adverse Effect. The Borrower will maintain in full force and effect each of the Project Documents to which it is a party. The Borrower will preserve, protect, defend and enforce the rights granted to it under or in connection with the Project Documents. The Borrower shall take all action within its control required or in the reasonable opinion of Eximbank advisable to ensure that, unless otherwise consented to in writing by Eximbank, each of the Project Documents is in proper legal form under the laws of the Republic or under the respective governing laws selected in such Project Documents, for the enforcement thereof in such jurisdictions without any further action on the part of Eximbank or the Lenders, as the case may be.

Section 7.12. Additional Documents; Filings and Recordings. The Borrower shall execute, and deliver, from time to time as reasonably requested by Eximbank or the Collateral Trustee, at the Borrower's expense, such other documents as shall be necessary or advisable or that Eximbank or the Collateral Trustee may reasonably request in connection with the rights and remedies of the Secured Parties granted or provided for by the Project Documents, as applicable, and to consummate the transactions contemplated therein. The Borrower shall, at its own expense, take all reasonable actions that have been or shall be requested by Eximbank or the Collateral Trustee or that the Borrower knows are necessary to establish, maintain, protect, perfect and continue the perfection of the first priority security interests of the Secured Parties created by the Security Documents and shall furnish timely notice of the necessity of any such action, together with such instruments, in execution form, and such other information as may be required to enable Eximbank and any other appropriate Secured Party to effect any such action. Without limiting the generality of the foregoing, the Borrower shall (a) execute or cause to be executed and shall file or cause to be filed such financing statements, continuation statements, fixture filings, mortgages or deeds of trust and mortgage supplements in all places necessary or advisable (in the opinion of counsel for Eximbank or the Collateral Trustee) to establish, maintained perfect such security interests and in all other places that Eximbank or the Collateral Trustee shall reasonably request and (b) do everything necessary in the reasonable judgement of Eximbank or the Collateral Trustee to (i) create and perfect the Security with respect to future assets covered by the Mortgage, Assignment and Pledge Agreement, (ii) maintain the Security in full force and effect at all times and (iii) preserve and protect the Collateral and protect and enforce its rights and

46

title and the rights and title of the Secured Parties to the Collateral. In connection with the registration of each mortgage supplement required pursuant to Section 5 of Part B of the Mortgage, Assignment and Security Agreement, the Borrower shall deliver to Eximbank a certified true copy of the legal opinion required pursuant to Section 5.01(c) of Part B of the Mortgage, Assignment and Security Agreement.

Section 7.13. Bank Accounts. The Borrower shall maintain all its bank accounts with the Collateral Trustee.

Section 7.14. Debt Reserve Cash Collateral Account. On or before the Disbursement Date, the Debt Reserve Cash Collateral Account shall be fully funded in an amount equal to at least \$4,200,000 (if the principal of the Eximbank Credit shall be repayable in 38 installments) and an amount equal to the Senior Debt Service due and payable during the next succeeding six months (if the principal of the Eximbank Credit shall be repayable in fewer than 38 installments) in addition to all amounts required to be deposited at such time in accordance with clause "FOURTH" of 3.02(d)(ii) of the Disbursement Agreement.

Section 7.15. Availability and Transfer of Foreign Currency. The Borrower will ensure that all requisite foreign exchange control approvals and other authorizations, if any, by the Republic or any department or agency thereof will be kept current and in full force and effect to assure (i) the ability of the Borrower to receive, and the ability of any other party to make, any and all payments to the Borrower contemplated by the Project Documents, (ii) the availability of Dollars to enable the Borrower to perform all of its obligations under the Financing Documents or any of the other Project Documents, as the case may be, in accordance with their respective terms, and (iii) (on and after the Disbursement Date) the ability of the Borrower to convert all sums received in Peso amounts from PNOC-EDC under the BOT Agreement and the PNOC-EDC Consent Agreement and from the Republic under the Performance Undertaking and the Republic Consent Agreement, including any Peso amounts representing SFRI Fees, from Pesos to Dollars, immediately upon receipt thereof, and to use the Dollars as necessary to perform all of its Obligations under the Project Documents, in accordance with their respective terms.

Section 7.16. Privatization of NAPOCOR or PNOC-EDC. The Borrower shall promptly upon becoming aware thereof notify Eximbank of the occurrence of any event or events that give rise to any rights or benefits to the Borrower under Article 20 of the BOT Agreement. The Borrower agrees to consult with Eximbank prior to requesting or accepting any assurances, or making any determinations, in accordance with such Article 20. Any such consultation shall include, without limitation, a reasonably detailed explanation (which shall be provided to Eximbank in writing if so requested) of the

47

economic rationale for any determination or proposed course of action made or proposed to be made under or pursuant to such Article 20.

Section 7.17. Spares. On or before the Disbursement Date, the Borrower shall purchase all spare parts identified on the Acquisition List (as defined in the Eximbank Guarantee Agreement).

SECTION 8. NEGATIVE COVENANTS.

With respect to provisions of this Section 8 so specifying, from and after the Disbursement Date and, with respect to all remaining provisions of this Section 8, from and after the execution and delivery of this Agreement, in each case until the Eximbank Credit is paid in full, except as otherwise waived pursuant to the next two succeeding sentences, the Borrower covenants and agrees as provided in this Section 8. Provisions of this Section 8 specifying effect from and after the Disbursement Date and provisions requiring consultations with or the furnishing of documents or other information to Eximbank or requiring the consent or approval of Eximbank to the taking or omission of any action may only be waived by Eximbank and in writing. All other provisions of this Section 8 may be waived with effect during the period prior to the Disbursement Date by the Required Secured Parties and in writing and, thereafter, by Eximbank and in writing.

Section 8.01. Liens. The Borrower will not, and will not agree to, create, incur, assume or suffer to exist any Lien upon or with respect to any property or assets (real, personal or mixed, tangible or intangible) of the Borrower, whether now owned or hereafter acquired, provided that the provisions of this Section 8.01 shall not prevent the creation, incurrence, assumption or existence of, prior to the Disbursement Date, Lender Credit Permitted Liens and, thereafter, the following Liens (each, a "Post-Completion Permitted Lien"):

(a) any tax or other statutory Lien, provided that such lien shall be discharged within sixty (60) days after the Borrower or the General Partner becomes aware or reasonably should have been aware of such Lien (unless contested in good faith by the Borrower, in which case it shall be discharged within thirty (30) days after final adjudication, and provided that during the period of such contest the Borrower sets aside on its books adequate reserves with respect to the contested items);

(b) Liens created pursuant to the Security Documents;

(c) purchase-money Liens on any property acquired after the Operation Date provided, however, that (i) any property subject to such purchase-money Lien is acquired by the Borrower in the ordinary course of its business and such purchase-money Lien attaches to such property concurrently or within ninety (90) days after the acquisition

48

thereof; (ii) the Indebtedness secured by such purchase-money Lien shall not exceed ninety percent (90%) of the lesser of the cost or the fair market value as of the time of the acquisition of the property covered thereby by the Borrower; (iii) each such purchase-money Lien shall attach only to the property so acquired and fixed improvements thereon; (iv) the Indebtedness secured by all such purchase-money Liens shall not at any time exceed \$500,000 (or an equivalent amount in other currency); and (v) the Indebtedness secured by such purchase-money Lien is not otherwise prohibited by the provisions of Section 8.05;

(d) Liens on property and equipment constituting leases permitted by Section 8.04; and

(e) mechanics', materialmen's, carrier's and similar Liens securing obligations incurred in the ordinary course of business which (i) are not past due or which are the subject of a Good Faith Contest by the Borrower (unless during the pendency of such contest or as a result thereof the Liens of the Security Documents could reasonably be expected to be materially endangered or any material portion of the Site, any Plant, the Power Plant or the Project could reasonably be expected to become subject to loss or forfeiture) and (ii) which do not in the aggregate materially detract from the value of the Site, any Plant, the Power Plant or the Project or other assets of the Borrower or materially impair the use thereof; provided that, upon the commencement of any proceeding to foreclose or enforce any such Post-Completion Permitted Lien, Eximbank or the Collateral Trustee may take such action as it reasonably deems necessary to protect its interest in the Site, any Plant, the Power Plant or the Project including, without limitation, payment of amounts reasonably necessary to release any such Lien, and in such event the Borrower shall reimburse Eximbank or the Collateral Trustee, as the case may be, upon demand for the cost thereof together with interest thereon at a rate per annum equal to (in the case of Eximbank) the higher of (x) the New Borrowing Rate (as defined the Section 3.02(b)) that would be applicable to ____ such amounts if such amounts paid by Eximbank were deemed to be due from the Borrower on the date paid by Eximbank and not paid by the Borrower when due and (y) the rate specified in Section 3.02(a) plus 1.0% or (in the case of the Collateral Trustee) the Base Rate plus 3.75%.

Section 8.02. Consolidation, Merger, Sale of Assets, Etc. The Borrower

will not, and will not permit the General Partner to, wind up, liquidate or dissolve its affairs or enter into any transaction of merger or consolidation. The Borrower will not (a) convey, sell, lease or otherwise dispose of (or agree to do any of the foregoing at any future time) all or any part of its property or assets (other than electricity and any chemical by-products produced by the Power Plant) except in the ordinary course of business, or sales of equipment which is uneconomic or obsolete or sales of assets that are no longer used by or useful to the Borrower and which are promptly replaced (if applicable) by adequate substitutes of substantially equivalent utility to the replaced assets; or (b) purchase or

49

otherwise acquire (in one or a series of related transactions) any part of the property or assets of any Person (other than purchases or other acquisitions of inventory or materials or capital expenditures, each in the ordinary course of business).

Section 8.03. Dividends; Restricted Payments. The Borrower will not declare or pay any partnership distributions, or return any capital, to the Partners or authorize or make any other distribution, payment or delivery of property or cash to the Partners as such, or redeem, retire, purchase or otherwise acquire, directly or indirectly, for consideration, any general or limited partnership interests now or hereafter outstanding (or any options or warrants issued by the Borrower with respect to any partnership interests) (collectively, "Restricted Payments") unless:

(i) such Restricted Payment is permitted by Applicable Law;

(ii) no Default or Event of Default is then in existence (or would be in existence after giving effect to such Restricted Payment);

(iii) such Restricted Payment is made in accordance with the provisions of Section 3.02(d)(ii) of the Disbursement Agreement; and

(iv) such Restricted Payment is made only after the Disbursement Date.

Section 8.04. Leases. The Borrower will not enter into any agreement or arrangement to acquire by lease the use of any property or equipment of any kind, except leases as contemplated by the O&M Parameters, the Construction Budget or the Annual Budget (in each case as then in effect), or except leases of operating equipment and premises under which the aggregate rental payments (including, without limitation, any property taxes paid as additional rent or lease payment) do not exceed the equivalent of \$400,000 in any Fiscal Year.

Section 8.05. Indebtedness. (i) The Borrower will not contract, create, incur, assume or suffer to exist any Indebtedness, except for, prior to the Disbursement Date, Lender Credit Permitted Indebtedness and, thereafter, the following types of Indebtedness ("Post-Completion Permitted Indebtedness"):

(a) Indebtedness of the Borrower incurred under this Agreement;

(b) Indebtedness incurred after the Operation Date which is not in a principal amount in excess, in the aggregate of \$500,000, at any time and is accrued expenses or current trade accounts payable incurred in the ordinary course of business or obligations under trade letters of credit incurred by the Borrower in the ordinary course of business,

50

which are to be repaid in full not more than ninety (90) days after the date on

which such Indebtedness is originally incurred to finance the purchase of goods by the Borrower;

(c) Unsecured Senior Working Capital Indebtedness and Subordinated Secured Working Capital Indebtedness incurred after the Operation Date not exceeding in the aggregate at any one time outstanding \$1,500,000, provided that (i) Unsecured Senior Working Capital Indebtedness shall not exceed \$500,000 at any one time outstanding; (ii) any and all Subordinated Secured Working Capital Indebtedness shall be subordinated to the payment of the Eximbank Credit in accordance with the provisions of Schedule 8.05(c); (iii) any and all Subordinated Working Capital Lenders shall, prior to the date on which any Subordinated Secured Working Capital Indebtedness is incurred, become party to the Collateral Trust Agreement and deliver to the Collateral Trustee and Eximbank an opinion of counsel to such Subordinated Working Capital Lender reasonably satisfactory to Eximbank to the effect that the subordination terms set forth in Schedule 8.05(c) hereto constitute the binding obligations of such Subordinated Working Capital Lender enforceable in accordance with their respective terms (subject to customary qualifications); and (iv) any Subordinated Working Capital Lender consisting of Ormat or an Affiliate of Ormat shall (if it is not a party thereto) accede to the Mortgage, Assignment and Pledge Agreement and pledge and deliver to the Collateral Trustee the executed original of the Subordinated Note evidencing its Subordinated Working Capital Loans;

(d) Third Party Subordinated indebtedness in an outstanding principal amount not to exceed \$2,500,000 at any time; provided, however, that (i) any and all Third Party Subordinated Indebtedness shall be subordinated to the payment of the Eximbank Credit in accordance with the provisions of Schedule 8.05(c) and (ii) any and all Third Party Subordinated Lenders shall, prior to the date on which such Indebtedness is incurred, become party to the Collateral Trust Agreement and deliver to the Collateral Trustee and Eximbank an opinion of counsel to such Third Party Subordinated Lender reasonably satisfactory to Eximbank to the effect that the subordination terms set forth in Schedule 8.05(c) hereto constitute the binding obligations of such Third Party Subordinated Lender enforceable in accordance with their respective terms (subject to customary qualifications);

(e) Indebtedness secured by purchase money Liens incurred after the Operation Date and otherwise permitted under Section 8.01(c);

(f) Indebtedness constituting lease obligations permitted under Section 8.04;

(g) Optional Subordinated Loans, Standby Subordinated Loans and Post-Completion Standby Subordinated Loans in an aggregate outstanding principal amount not to exceed at any time the sum of \$5,000,000 plus the outstanding principal amount of

any Optional Subordinated Loans made by Ormat pursuant to the terms of the Development Agreement, and which bear interest at a rate not in excess of 10% per annum; provided, that (i) any and all Optional Subordinated Loans, Standby Subordinated Loans and Post-Completion Standby Subordinated Loans shall be subordinated to the payment of the Eximbank Credit in accordance with the provisions of Schedule 8.05(c) and the Collateral Trust Agreement; (ii) all requirements of the Collateral Trust Agreement shall have been satisfied prior to (or contemporaneous with) the incurrence thereof; and (iii) the Person making such Optional Subordinated Loans, Standby Subordinated Loans and Post-Completion Standby Subordinated Loans shall (if it has not previously done so) pledge (pursuant to an instrument substantially similar in form and scope to Part D of the Mortgage, Assignment and Pledge Agreement) and deliver to the Collateral Trustee the executed original of the Subordinated Note or Subordinated Notes evidencing its Optional Subordinated Loans, Standby Subordinated Loans or

Post-Completion Standby Subordinated Loans, as the case may be;

(h) Affiliated Reimbursement Obligations; and

(i) Contingent Obligations permitted under Section 8.06.

(ii) The Borrower agrees that it will not obligate itself to make regularly scheduled payments during the period when the Eximbank Credit is outstanding of or on any Permitted Indebtedness that is Indebtedness for Borrowed Money other than quarterly and other than on a Permitted Payment Date or a date occurring no earlier than eight (8) days after and no later than fifteen (15) days after a Permitted Payment Date.

Section 8.06. Guarantees. Without limitation to the restrictions of Section 8.05 hereof, from and after the Disbursement Date, the Borrower will not enter into or have outstanding any Contingent Obligations, including without limitation any agreement or arrangement to guarantee or, in any way or under any condition, become obligated for all or any part of any Indebtedness or other obligation of another Person, except that, notwithstanding the restrictions of this Section 8.06 or Section 8.05 hereof, the Borrower may enter into (a) the Accession Undertaking, (b) Contingent Obligations set forth in the then-current Construction Budget or Annual Budget and identified as Contingent Obligations in any such budget so as to permit a determination of the Borrower's compliance with this Section 8.06, (c) an obligation, not secured by any Lien, to (i) reimburse the BOT Operation Performance Security Issuer for amounts paid to PNOC-EDC under the BOT Operation Performance Security, provided that such obligation is subordinated to the prior payment in full of the Eximbank Secured Obligations on the terms set forth in Schedule 8.05(c), or (ii) reimburse Ormat International or one or both of the Affiliated Funding Entities for Affiliated Reimbursement Obligations, provided that such obligation is subordinated to the prior payment in full of the Eximbank Secured

52

Obligations on the terms set forth in Schedule 8.05(c) and payment is made solely out of funds available to the Borrower for the payment of Affiliated Reimbursement Obligations as set forth in Section 3.02(d)(ii) of the Disbursement Agreement, and (d) other Contingent Obligations to the extent that the amount of all such other Contingent Obligations does not exceed, in the aggregate, \$50,000 (or the equivalent in other currency).

Section 8.07. Subsidiaries; Advances, Investments and Loans. The Borrower will not form or have any Subsidiaries, lend money or credit or make deposits (other than deposits in relation to the payment for goods and equipment in the ordinary course of business) with or advances (except as specifically required by the Construction Contract or the Supply Contract) to any Person, or purchase or acquire any stock, obligations or securities of, or any other interest in, or make any capital contribution to, any other Person, except that the Borrower may use idle cash to acquire and hold Cash Equivalents solely to give employment to its idle resources in accordance with the Disbursement Agreement.

Section. 8.08. Transactions. From and after the Disbursement Date, the Borrower will not (a) enter into or have in effect any transaction or series of related transactions with any Person other than in the ordinary course of business and on an arm's-length basis or (b) establish or have in effect any sole and exclusive purchasing or sales agency, or enter into any transaction whereby the Borrower might receive less than the full ex-works commercial price (subject to normal trade discounts) for electricity or pay more than ex-works commercial price for products of others, provided, however, that nothing in this Section 8.08 shall be deemed to prohibit the execution, delivery, declaring effective and performance by the Borrower of the BOT Agreement, the Construction Contract, the Supply Contract, the Keystone Agreement, the O&M Support Undertaking, the Assignment and Assumption Agreement, contracts contemplated by the O&M Parameters (including those relating to employee training and secondment

of employees), the Funding Agreement or the Lender Credit Agreement.

Section 8.09. Other Transactions. From and after the Disbursement Date, the Borrower will not enter into or have in effect any partnership, profit-sharing, or royalty agreement or other similar arrangement whereby the Borrower's income or profits are, or might be, shared with any other Person, or enter into or have in effect any management contract or similar arrangement whereby its business or operations are managed by any other Person, provided, however, that nothing in this Section 8.09 shall be deemed to prohibit the execution, delivery, declaring effective and performance by the Borrower of the contracts contemplated by the O&M Parameters and the Funding Agreement.

Section 8.10. Modifications to Partnership Agreement of Borrow; Additional Agreements; Assignments and Modifications of Agreements; Etc.

53

(a) The Borrower will not (i) amend or modify its Partnership Agreement or other Organization Documents (ii) change its Fiscal Year or (iii) materially change the nature of its present business.

(b) The Borrower will not become a party to any agreement, contract or commitment (other than (i) (w) the agreements identified in clauses (i) through (xiv), inclusive, (xvi), (xvii) and (xviii) of the definition of the term Operating Agreements set forth in Schedule X hereto, but not replacements thereof, (x) the Financing Documents, (y) agreements, contacts or commitments contemplated by the O&M Parameters (including those relating to employee training, secondment of employees and vehicle rentals), the then-current Construction Budget, the then-current Annual Budget or the Funding Agreement and (z) agreements, contracts or commitments in respect of Post-Completion Permitted Indebtedness) which, individually, creates after the Disbursement Date an annual financial obligation of the Borrower in excess of \$75,000 (or the equivalent in other currency) or (ii) which would cause the aggregate annual financial obligations of the Borrower after the Disbursement Date under all agreements, contracts and commitments (other than those specified in clauses (w) through (z) immediately above) to which the Borrower is a party to exceed \$150,000 (or the equivalent in other currency).

(c) Except as contemplated by the Assignment and Assumption Agreement, the Borrower shall not, directly or indirectly, terminate, cancel or suspend, or permit or consent to any termination, cancellation or suspension of, or enter into or consent to or permit the assignment of the rights or obligations of any party to, any of the Project Documents; provided, however, that prior to the Disbursement Date and without the prior written consent of the Required Secured Parties or Eximbank the Borrower may do, permit to be done or consent to any of the foregoing if (i) the Project Document which is the subject of the proposed termination, cancellation, suspension or assignment is an Insurance Contract (other than an Insurance Contract pertaining to the operation of the Power Plant) pertaining to the construction of the Power Plant and the Administrative Agent, after consultation with the Insurance Consultant, shall have consented thereto or (ii) the Project Document which is the subject of the proposed termination, cancellation, suspension or assignment is a non-material Governmental Approval or an agreement, commitment or understanding described in clause (xv) of the definition of the term "Operating Agreements" set forth in Schedule X hereto and, in each case, the Administrative Agent shall have reasonably determined that such termination, cancellation, suspension or assignment is not reasonably likely to have a Material Adverse Effect and so notified Eximbank. The Borrower shall not, directly or indirectly amend, modify, supplement or waive, or permit or consent to the amendment, modification, supplement or waiver of, or request a waiver of, any of the provisions of, or give any consent under, any of the Project Documents (except for change orders under the Construction Contract or the Supply Contract or Change in the Work and

amendments, modifications, supplements or waivers that, in any such case, have no, or could not reasonably be expected to have any, adverse effect on the rights, benefits, obligations or duties of the Borrower existing on or arising after the Disbursement Date, or the current or prospective operation of any of the Plants or the value of any of the Collateral) without first obtaining the written consent of Eximbank to such proposed or requested amendment, supplement, waiver, or consent (provided, however, that if in any Project Document the consent of the Borrower to an assignment by the other party thereto cannot be unreasonably withheld, the consent of Eximbank to such an assignment shall not be unreasonably withheld). Notwithstanding the foregoing, the Borrower shall not, without the prior written consent of Eximbank (i) directly or indirectly, amend, modify, supplement or waive, or permit or consent to the amendment, modification, supplement or waiver of, (x) any provision of Article 9 of the BOT Agreement or (y) any other provision of the BOT Agreement governing the terms and conditions of, or the events or circumstances giving rise to the Borrower's or PNOC-EDC's right to require, a buyout of the Power Plant (as defined in the BOT Agreement); (ii) enter into or permit or grant any amendment or modification of the BOT Agreement or any supplement to or waiver thereunder which is reasonably likely to have an adverse financial impact on the Borrower (including, without limitation, on the amounts of or timing of payments to the Borrower under the BOT Agreement); (iii) the definitions of Guaranteed Net Plant Steam Rate, Net Plant Steam Rate, Performance Tests, Net Deliverable Capacity Guarantee and Reliability Guarantee, set forth in the Construction Contract; or (iv) Exhibit E to the Construction Contract.

(d) Other than the assignment as security of the Project Documents to the Collateral Trustee as security for the benefit of the Secured Parties, the Borrower will not assign (except with respect to Permitted Liens) any of its rights or obligations under any Project Document without the prior written consent of Eximbank.

(e) The Borrower will not take any action under Article 9 of the BOT Agreement to require a Buyout without the prior written consent of Eximbank.

(f) From and after the Disbursement Date, without the prior written consent of Eximbank, the Borrower will not refund to PNOC-EDC (but may credit to PNOC-EDC) any amount described in the penultimate paragraph of Section 5.4 of the BOT Agreement.

(g) From and after the Disbursement Date, the Borrower shall not claim for itself Force Majeure as provided in Article 14 of the BOT Agreement, Section 22 of the Construction Contract or Section 22 of the Supply Contract without the prior written consent of Eximbank (in consultation with the Independent Engineer).

(i) The Borrower shall not agree to any proposed revised testing protocols in accordance with the final paragraph of Section 13.5 of the Construction Contract without the prior written consent of Eximbank.

Section 8.11. No Other Business. Without the prior written consent of Eximbank and except as contemplated by Section 8.07 hereof, the Borrower will not carry on any business other than in connection with the completion and operation of the Project and will take no action whether by acquisition or otherwise which would constitute or result in any material alteration to the nature of that business or the nature or scope of the Project.

Section 8.12. Abandonment. From and after the Disbursement Date, the Borrower will not abandon or agree to abandon the Project or place it or agree to place it on a "care and maintenance" basis for more than fourteen (14) days in any calendar year, provided, however, that (i) nothing in this Section shall prevent the Borrower from shut-downs necessary for repairs and maintenance at any of the Plants or from putting any of the Plants on a "care and maintenance basis" during any Force Majeure (as defined in the BOT Agreement) not within the control of the Borrower which Force Majeure prevents the Borrower from developing, constructing or operating such Plant; and (ii) nothing in this Section 8.12 shall be deemed to waive or limit in any way the right of Eximbank to declare an Event of Default as provided in Section 9 hereof, including without limitation Sections 9.06 and 9.07 hereof.

Section 8.13. Improper Use. The Borrower will not use, maintain, operate or occupy, or allow the use, maintenance, operation or occupancy of, any portion of the Site or any Plant for any purpose:

(a) which may be dangerous, unless safeguarded as required by Applicable Law (provided, however, that this clause (a) shall not be deemed to prohibit the Borrower from carrying out the Project in accordance with the terms of the BOT Agreement and the Construction Contract in a reasonable and prudent manner);

(b) which violates any Applicable Law in any material respect;

(c) which may constitute a public or private nuisance resulting in a Material Adverse Effect;

(d) which may make void, voidable, or cancelable, or increase the premium of, any insurance then in force with respect to the Site or Project or any part thereof unless, in the case of an increase in premium, the Borrower gives proof of payment of such increase; or

56

(e) otherwise than for the intended purpose thereof in the construction, operation and maintenance of the Plants.

Section 8.14. Budgets. From and after the Disbursement Date the Borrower will not make expenditures in any Fiscal Year in excess of the projected annual Operating and Maintenance Costs (including Contingent O&M Amount) set forth in the Annual Budget for such Fiscal Year except for:

(a) emergency operating costs amounts funded with funds available to the Borrower pursuant to payment of priorities SIXTH, SEVENTH, EIGHTH or NINTH of Section 3.02(d)(ii) of the Disbursement Agreement and, to the extent that such funds are not sufficient for such purpose: (i) proceeds of Unsecured Senior Working Capital Indebtedness or Subordinated Secured Working Capital Indebtedness permitted under Section 8.05; (ii) proceeds of Optional Subordinated Loans or Third Party Subordinated Loans permitted under Section 8.05; (iii) proceeds of additional capital contributions to the Borrower; or (iv) withdrawals from the Debt Reserve Cash Collateral Account permitted under Section 3.03(b) of the Disbursement Agreement;

(b) provided no Event of Default has occurred and is continuing, expenditures not to exceed in any Fiscal Year in the aggregate \$400,000 (or the equivalent in other currency) required as a result of casualties for which the Borrower is, in its good faith judgment, insured; provided that (A) the Borrower promptly files a claim or claims for reimbursement under such insurance for any such casualty, (B) the Borrower uses its best efforts to expedite payment of such claims, and (C) the proceeds from any such insurance claims, shall be paid into the Contingency Account; and

(c) provided no Event of Default has occurred and is continuing, non-budgeted payments of amounts for which the Borrower is liable to PNOC-EDC under Article 4.11 of the BOT Agreement, not to exceed, without the consent of

the Required Secured Parties, \$5,700.000.

Section 8.15. Press Releases; Advertising. If the Borrower shall issue, or if the Borrower shall obtain knowledge that any other Person has issued, any press release or other announcement or advertisement that refers to the provision of financing or other support by Eximbank for the Project, the Borrower shall promptly notify Eximbank thereof and promptly deliver to Eximbank a copy of such press release or other announcement or advertisement.

Section 8.16. Employees and Employee Plan. The Borrower shall not adopt, establish, maintain, sponsor, administer, contribute to, participate in, or incur any liability under or obligation to contribute to, any Plan or incur any liability to provide post-

57

retirement welfare benefits, except such liability to provide post-retirement welfare benefits as required by Applicable Law.

Section 8.17. Name Changes; Etc. The Borrower shall not change its name without the prior written consent of Eximbank. The Borrower shall not adopt or change any trade name or fictitious business name without the prior written consent of Eximbank. The Borrower shall execute and deliver to Eximbank and the Collateral Trustee any additional documents or certificates necessary or advisable to reflect any permitted adoption of or change in its name, trade name or fictitious business name.

Section 8.18. Equity Ratio. On and after the Disbursement Date, the Borrower shall not permit the Equity Ratio at any time to be less than 25:75 (which, for the avoidance of doubt, shall be calculated in accordance with generally accepted accounting principles as in effect in the United States from time to time).

Section 8.19. Payments on Subordinated Debt. Without the prior written consent of Eximbank, the Borrower will not make any payment or delivery of property or cash to any Person on account of any Subordinated Secured Obligation or other subordinated debt or redeem, retire, purchase or otherwise acquire, directly or indirectly, for consideration, any Subordinated Secured Obligations or other subordinated debt now or hereafter outstanding, or set aside any funds for any of the foregoing purposes collectively, "Subordinated Debt Payments") unless:

(i) such Subordinated Debt Payment is permitted by Applicable Law;

(ii) no Default or Event of Default is then in existence (or would be in existence after giving effect to such Subordinated Debt Payment);

(iii) such Subordinated Debt Payment is made only after the Disbursement Date; and

(iv) such Subordinated Debt Payment is made in accordance with the provisions of Section 3.02(d)(ii) of the Disbursement Agreement.

Section 8.20. Limitation on Sale or Re-Export of the Items. The Borrower shall not, without the prior written consent of Eximbank, sell the Items or use or permit the use of the Items in any country other than the Borrower's Country. In no event shall the Borrower sell, use or permit the use of any Item in any Excluded Country.

58

SECTION 9. EVENTS OF DEFAULT

Notwithstanding anything herein or in any of the Financing Documents or elsewhere to the contrary, upon the occurrence of any of the following events (each of the following events, an "Event of Default"):

Section 9.01. Payment. The Borrower shall (a) default in the payment when due of any principal of or interest on the Eximbank Note or any other amount owing under this Agreement or the Eximbank Note, (b) default in the payment when due (after giving effect to any grace periods provided in the relevant Financing Document) of any principal of or interest on, or any other amount owing under, any other Financing Document save for any default arising by reason of a failure of the Collateral Trustee to make any payment where funds are available and payable pursuant to the Disbursement Agreement to meet such payment; or

Section 9.02. Representations, Etc. Any representation or warranty confirmed or made in any Project Document by the Borrower or any Obligor which is an Affiliate of the Borrower, or in any writing provided by any of the them in connection with the execution and delivery of, or in connection with any disbursement under any of the Lender Credit Agreement or this Agreement or for a payment of monies from any Account by the Collateral Trustee, shall be found to have been incorrect in any material respect when made or deemed to be made and, if remediable, shall continue to be incorrect for a period of thirty (30) days after note thereof shall have been given to the Borrower by Eximbank; or

Section 9.03. Covenants. (a) The Borrower shall fail to perform or observe any covenant, term or agreement contained in Sections 2.01 (Amount of the Eximbank Credit; Use of Proceeds), 7.03 (Maintenance of Property; Insurance), 7.14 (Debt Reserve Cash Collateral Account), 8.01 (Liens), 8.02 (Consolidation, Merger, Sale of Assets, Etc.), 8.03 (Dividends; Restricted Payments), 8.04 (Leases), 8.05 (Indebtedness), 8.06 (Guarantees), 8.07 (Subsidiaries; Advances, Investments and Loans), 8.10(a), (f) and (g) (Modifications to Partnership Agreement of Borrower; Additional Agreements; Assignments and Modifications of Agreements; Etc.), 8.11 (No Other Business); 8.18 (Equity Ratio); Section 8.19 (Payments on Subordinated Debt); or

(b) The Borrower or any Obligor which is an Affiliate of the Borrower shall fail to perform or observe any other covenant, term or agreement contained in this Agreement or any other Project Document and such failure shall not be remediable or, if remediable, shall continue unremedied for a period of thirty (30) days after the earlier of (i) the date on which such failure shall have first become known to the Borrower and (ii) the date on which written notice thereof shall have been received by the Borrower from Eximbank; provided that if (A) such failure cannot be cured within such thirty (30)

59

day period, (B) such failure in the reasonable judgment of the Independent Engineer or Eximbank is susceptible of cure, (C) the Borrower is proceeding with diligence and in good faith to cure such failure, (D) the existence of such failure in the reasonable judgment of Eximbank has not had and is not reasonably likely to have a Material Adverse Effect and (E) Eximbank shall have received an officer's certificate signed by a Financial Officer of the Borrower to the effect of clauses (A), (B) and (C) above, certifying that the existence of such failure has not had and is not reasonably likely to have a Material Adverse Effect and stating what action the Borrower is taking to cure such failure, then, such thirty (30) day cure period shall be extended by up to an additional sixty (60) days as shall be necessary for the Borrower diligently to cure such failure; or

Section 9.04. Default Under Other Agreements. (a) The Borrower shall (i) default in any payment of any Indebtedness For Borrowed Money (other than as provided in Section 9.01) beyond the period of grace, if any, provided in the instrument or agreement under which such Indebtedness For Borrowed Money was

created or (ii) default (other than in the manner referred to in clause (i)) in the observance or performance of any agreement or condition relating to any Indebtedness For Borrowed Money (other than as provided in Section 9.01) or contained in any instrument or agreement evidencing, securing or relating thereto, or any other event shall occur or condition exist, the effect of which such default or other event or condition is to (x) cause any such Indebtedness For Borrowed Money to become due prior to its stated maturity or (y) if such Indebtedness For Borrowed Money ranks pari passu in right of payment with the Eximbank Secured Obligations, permit the Person to whom such Indebtedness For Borrowed Money is owed to declare the same due and payable prior to the stated maturity thereof; or

(b) any Indebtedness For Borrowed Money of the Borrower shall be declared to be due and payable, or required to be prepaid other than by a regularly scheduled required prepayment, prior to the stated maturity thereof; or

(c) any Obligor (other than PNOC-EDC, Ormat and the BOT Operation Performance Security Issuer) shall (i) default in any payment of any Indebtedness For Borrowed Money in an aggregate principal amount exceeding the equivalent of \$2,000,000 beyond the period of grace, if any, provided in the instrument or agreement under which such Indebtedness For Borrowed Money was created or (ii) default in the observance or performance of any agreement or condition relating to any Indebtedness For Borrowed Money in an aggregate principal amount exceeding the equivalent of \$2,000,000 or contained in any instrument or agreement evidencing, securing or relating thereto, or any other event shall occur or condition exist, the effect of which default or other event or condition is to cause any such Indebtedness For Borrowed Money to become due prior to its stated maturity; or

60

(d) Ormat shall (i) default in any payment of any Indebtedness For Borrowed Money in an aggregate principal amount exceeding \$4,000,000 beyond the period of grace, if any, provided in the instrument or agreement under which such Indebtedness For Borrowed Money was created or (ii) default in the observance or performance of any agreement or condition relating to any Indebtedness For Borrowed Money in an aggregate principal amount exceeding \$4,000,000 or contained in any instrument or agreement evidencing, securing or relating thereto, or any other event shall occur or condition exist, the effect of which default or other event or condition is to cause any such Indebtedness For Borrowed Money to become due prior to its stated maturity; provided, however, that if one or more of the events described in this clause (d) shall occur after the date on which Ormat shall cease to be an Obligor, the occurrence of such event or events shall not be deemed an Event of Default unless, in the reasonable judgment of the Required Secured Parties, the occurrence of such event or events has had or is reasonably likely to have a material adverse effect on the operations, business, condition (financial or otherwise) or property of the Borrower; or

(e) any indebtedness For Borrowed Money in an aggregate principal amount exceeding the equivalent of \$2,000,000 of any Obligor (other than PNOC-EDC, Ormat and the BOT Operation Performance Security Issuer), or any Indebtedness for Borrowed Money in an aggregate principal amount exceeding \$4,000,000 of Ormat, shall be declared to be due and payable, or required to be prepaid other than by a regularly scheduled required prepayment, prior to the stated maturity thereof, and, if such Obligor is the Construction Supplier, the existence of such Indebtedness For Borrowed Money that has been declared due and payable prior to the stated maturity thereof, in the reasonable judgment of Eximbank, has had or is reasonably likely to have a Material Adverse Effect; provided, however, that if one or more of the events described in this clause (e) with respect to the Indebtedness For Borrowed Money of Ormat or Ormat International, as the case may be, shall occur after the date on which Ormat or Ormat International, as the case may be, shall cease to be an Obligor, the occurrence

of such event or events shall not be deemed an Event of Default unless, in the reasonable judgment of Eximbank, the occurrence of such Event or events has had or is reasonably likely to have a Material Adverse Effect; or

(f) a default shall have occurred in the performance of any material obligation by (i) any Obligor (other than the BOT Operation Performance Security Issuer) or the Republic under any of the Project Documents to which such Person is a party and such default shall continue unremedied beyond the period of grace, if any, extended to such Person with respect to such default, as specified in the Project Document under which such obligation was created or (ii) any other party (other than the Persons referred to in clause (i) of this Section 9.04(f)) under any of the Project Documents and the existence of such default in the reasonable judgment of Eximbank has had or is reasonably likely to have a Material Adverse Effect (and has not been cured within 60 days); or

61

Section 9.05. Bankruptcy, Etc. (a) There shall have been entered against the Borrower or any Obligor (other than the BOT Operation Performance Security Issuer or PNOC-EDC) a decree or order by a court adjudging the Borrower or such Obligor bankrupt or insolvent, or approving as properly filed a petition seeking reorganization, arrangement, adjustment or composition of or in respect of the Borrower or such Obligor under any Applicable Law; or appointing a receiver, liquidator, assignee, trustee, sequestrator (or other similar official) of the Borrower or such Obligor or of any substantial part of its property or other assets, or ordering the winding up or liquidation of its affairs, or the institution by the Borrower or such Obligor of proceedings to be adjudicated bankrupt or insolvent, or the consent by it to the institution of bankruptcy or insolvency proceedings against it; or the filing by it of a petition or answer or consent seeking reorganization or debt relief under any Applicable Law; or the consent by it to the filing of any such petition or to the appointment of a receiver, liquidator, assignee, trustee, sequestrator (or other similar official) of the Borrower or any such Obligor or of any substantial part of its property; or the making by it of an assignment for the benefit of creditors; or the admission by it in writing of its inability to pay its debts generally as they become due; or any other event shall have occurred which under any Applicable Law would have an effect analogous to any of those events listed above in this subsection with respect to the Borrower or any such Obligor; or any corporate action is taken by the Borrower or any such Obligor for the purpose of effecting any of the foregoing; provided that any reorganization or reconstruction of a company while solvent with the prior consent of Eximbank shall not be held to constitute any event mentioned in this paragraph; and provided, further, that in connection with any Obligor, no Event of Default shall be declared under this Section 9.05 if (x) such Person has fully complied and continues to fully comply with all of its obligations under all Project Documents to which such Person is a party and (y) in the reasonable judgment of Eximbank, such Event of Default has not had and is not reasonably likely to have a Material Adverse Effect; or

(b) The General Partner shall convene a meeting of creditors, or shall convene a meeting of its board of directors (or such other applicable controlling body or persons) to determine whether to commence voluntary bankruptcy proceedings; or

Section 9.06. Project Events. (a) The Borrower shall cease to have the right to possess and use all or any portion of the Site; or

(b) any event shall have occurred which entitles the Borrower or PNOC-EDC to give a notice under Section 9.1 of the BOT Agreement; or

(c) the Borrower shall (except as permitted by Section 8.02 hereof) sell or otherwise dispose of any of its interest in the Project; or

(d) an event or circumstance described in subclause (a), (b), (c) or (d) of Section 15.4.1 of the BOT Agreement shall have occurred, it being understood that for purposes of this Section 9.06(d), the words "one-hundred twenty (120)" or "120" contained in subclauses (b) and (c) of Section 15.4.1 of the BOT Agreement shall be replaced with the words "sixty (60)" in each place where such words appear and the words "one hundred fifty (150)" or "150" contained in subclause (d) of Section 15.4.1 of the BOT Agreement shall be replaced by the words "ninety (90)" in each place where such words appear; or

(e) an event or circumstance described in subclause (a), (b) or (c) of Section 15.4.2 of the BOT Agreement shall have occurred, it being understood that for purposes of this Section 9.06(e), the words "one-hundred twenty (120)" contained in subclauses (b) and (c) of Section 15.4.2 of the BOT Agreement shall be replaced with the words "sixty 60" in each place where such words appear; or

(f) the Borrower shall have received notice from PNOC-EDC under Section 15.2(c) of the BOT Agreement and shall have failed to cure the underlying BOT Agreement default giving rise to such notice within 15 days after Borrower's receipt thereof; provided, however, that if following the receipt of such notice and prior to Eximbank taking action pursuant to an Event of Default under this Section 9.06(f), (i) the Borrower and PNOC-EDC shall have agreed in writing to one or more fixed extensions of the period provided for in Section 15.2(c) of the BOT Agreement and (ii) the Borrower shall have provided Eximbank, in the case of each such extension, with an opinion of Philippine counsel reasonably satisfactory to Eximbank to the effect that such extension is legal, valid, binding and enforceable, then an Event of Default under this Section 9.06(f) shall have occurred only if the Borrower shall have failed to cure the underlying BOT Agreement default giving rise to such notice from PNOC-EDC on or prior to the date falling 15 days prior to the expiry of any such extended period; or

Section 9.07. Material Adverse Effect. One or more events, conditions or circumstances (including without limitation Force Majeure as defined in Sections 14.1(a) and 14.1(b) of the BOT Agreement) shall exist or shall have occurred which, in the reasonable judgment of Eximbank is reasonably likely to have a Material Adverse Effect; or

Section 9.08. Project Documents; Security Document. (a) This Agreement or any of the other Financing Documents or any of the BOT Agreement, the Supply Contract, the Construction Contract, the Keystone Agreement or any provision hereof or thereof (i) is or becomes invalid, illegal or unenforceable or any party thereto (other than Eximbank or any Lender Financing Secured Party) shall so assert, or (ii) ceases to be in full force and effect, or shall cease to give the Secured Parties the Liens, rights, powers

and privileges purported to be created thereby or hereby or any party thereto (other than Eximbank or any Lender Financing Secured Party) shall so assert; or

(b) any of the Project Documents (other than the Financing Documents or any of the BOT Agreement, the Supply Contract, the Construction Contract or the Keystone Agreement) or any material provision thereof (i) is or becomes invalid, illegal or unenforceable or any party thereto (other than Eximbank or any Lender Financing Secured Party) shall so assert, and such default shall have continued for a period of thirty (30) days after notice thereof shall have been given to the Borrower by Eximbank, or (ii) ceases to be in full force and effect, or shall cease to give the Secured Parties the Liens, rights, powers and privileges purported to be created thereby such that the interests of the Secured Parties

are adversely affected to a material extent; or

(c) except as permitted by Section 8.01 hereof, the Security or any component part thereof for any reason fails to constitute a valid and perfected first priority Lien or ceases to be in full force and effect or the Borrower or the grantor or pledgor thereof shall so assert; or

Section 9.09. Ownership of the Borrower. (a) Orleyte Company shall cease to be the sole general partner of the Borrower; or

(b) Ormat shall cease to maintain Control (as defined below) of the Borrower or Orleyte Company or, without the prior written consent of Eximbank, one or more sales or other transfers, directly or indirectly, of any limited partnership interest in the Borrower, shall have occurred such that, after giving effect thereto, either (x) Ormat would own, directly or indirectly, less than 66 2/3% of the aggregate partnership interests in the Borrower free and clear of all Liens (other than the Liens created by the Security Documents) or (y) Ormat and any of its Affiliates would have received, directly or indirectly, aggregate gross proceeds on account of the sale or other transfer of limited partnership interests of the Borrower exceeding an amount equal to 40% of the capitalization of the Borrower as at the Disbursement Date (for purposes of this Section 9.09, "Control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, including operating and maintenance decisions, whether through ownership of voting interests, by contract, or otherwise); or

(c) The Borrower shall, without the prior consent of Eximbank, permit or suffer to occur any sale, assignment or transfer of any limited partnership interest in the Borrower, or issue or have outstanding any securities convertible into or exchangeable for limited partnership interests in the Borrower or issue or grant or have outstanding any rights to subscribe for or to purchase, or any options or warrants for the purchase of, or any agreements, arrangements or understandings providing for the issuance (contingent

64

or otherwise) of, or any calls, commitments or claims of any character relating to any limited partnership interest in the Borrower; provided, however, that, if at all times 100% of the general and limited partnership interests in the Borrower remain subject to a Lien in favor of the Collateral Trustee pursuant to the terms of the Mortgage, Assignment and Pledge Agreement (or any similar security document acceptable to Eximbank) and the Collateral Trustee remains in possession of all of the certificates evidencing partnership interests in the Borrower together with undated transfer powers endorsed in blank, an Event of Default shall not be deemed to have occurred under this Section 9.09(c) if (i) at any time after the date hereof Orleyte Company sells, assigns or transfers limited partnership interests in the Borrower representing not more than 10% of the aggregate partnership interests in the Borrower to each of (x) Itochu pursuant to the terms of the Itochu MOU and (y) EPDCI (or an Affiliate thereof) on terms no less favorable to Ormat and its Affiliates than those in the Itochu MOU and (ii) at any time from and after the Disbursement Date (A) any sale, assignment or transfer referred to in this Section 9.09(c), (B) full dilution of the limited partnership interests in the Borrower by the methods noted above in this Section 9.09(c) or (C) any combination thereof would not have the effect of reducing below 66 2/3% the aggregate direct or indirect ownership of Ormat in the Borrower; or

Section 9.10. Judgments. One or more judgments or decrees shall be entered (i) against the Borrower or any Partner involving in the aggregate a liability not paid or fully covered by insurance) of \$2,000,000 or more; or (ii) prior to the date on which Ormat shall cease to be an Obligor, against Ormat involving in the aggregate a liability (not paid or fully covered by insurance) of \$4,000,000 or (ii) prior to the date on which Ormat International shall cease to be an Obligor, against Ormat International involving in the aggregate a liability (not

paid or fully covered by insurance) of \$2,000,000 or more; or (iv) prior to the date on which the Construction Contractor shall cease to be an Obligor, against the Construction Contractor involving in the aggregate a liability (not paid or fully covered by insurance) of \$2,000,000 or more, which liability, in the reasonable judgment of the Required Secured Parties, has had or is reasonably likely to have a Material Adverse Effect; or (v) prior to the date on which the Construction Supplier shall cease to be an Obligor, against the Construction Supplier involving in the aggregate a liability (not paid or fully covered by insurance) of \$2,000,000 or more, which liability, in the reasonable judgment of the Required Secured Parties, has had or is reasonably likely to have a Material Adverse Effect; or (vi) prior to the date on which any other Obligor ceases to be an Obligor, against such Obligor involving in the aggregate a liability (not paid or fully discharged by insurance) of \$2,000,000 or more, which liability in the reasonable judgment of the Required Secured Parties has had or is likely to have a Material Adverse Effect; and in any such case all such judgments or decrees shall not have been vacated, discharged, or stayed or bonded pending appeal within 60 days after the entry thereof; or

65

Section 9.11. Governmental Action. Any government or Governmental Authority shall have condemned, nationalized, seized, or otherwise expropriated all or any substantial part of the property or other assets of the Borrower or of its general or limited partnership interests or shall have assumed custody or control of such property or other assets or of the business or operations of the Borrower or of its general or limited partnership interests or shall have taken any action for the dissolution or disestablishment of the Borrower or any action that would prevent the Borrower or its officers from carrying on its business or operations or a substantial part thereof; or

Section 9.12. Permits. The Borrower or any Obligor shall fail to obtain, renew, maintain or comply in all material respects with any Governmental Approval set forth in Schedule 5.01(t) hereof or any license, approval or consent referred to in Section 5.2(c) of the Lender Credit Agreement; or any such Governmental Approval or license, approval or consent shall be rescinded, terminated, suspended, modified or withheld or shall be determined to be invalid or shall cease to be in full force and effect; or any proceeding shall be commenced by or before any Governmental Authority for the purpose of rescinding, terminating, suspending, modifying or withholding any such Governmental Approval or license, approval or consent and such proceeding is not dismissed within 60 days; and such failure, rescission, determination of invalidity, termination, suspension, modification, withholding, cessation or commencement is reasonably likely to have a Material Adverse Effect; or

Section 9.13. Transfer of Collateral; Event of Loss; Diminution of Property Rights. (a) Title to or any right in all or any part of (i) the Mortgage Collateral, (ii) any of the Plants or (iii) any other collateral purported to be covered by the Security Documents (other than as permitted pursuant to this Agreement, including Section 8.02 hereof) shall become vested in any party other than the party named as owner and/or holder thereof in the applicable Security Document, whether by operation of law or otherwise, or (iv) there shall have occurred an Event of Loss; or

(b) Except as otherwise permitted pursuant to this Agreement, the Borrower hereafter grants any easement or dedication, files any plat, declaration or restriction or enters into any lease or sub-lease concerning the Site or any portion thereof, the Mortgage Collateral or any of the Plants and the effect thereof is determined by Eximbank, in its reasonable discretion, to be material and adverse to the Site or such portion, the Mortgage Collateral, such Plant or Plants or the Borrower; or

Section 9.14. Regulatory Status. The Borrower shall fail to remain continuously exempt from all regulation under PUHCA as a result of being a

"foreign utility company" under Section 33 of PUHCA or otherwise; or

66

Section 9.15. ERISA. Any of the following events occur or exist with respect to the Borrower or, in the case of (a) through (e) below, any ERISA Affiliate: (a) any Termination Event with respect to any Plan; (b) any event or circumstance that is reasonably likely to constitute grounds entitling the PBGC to institute proceedings under Section 4042 of ERISA for the imposition of liability in respect of any Pension Plan (other than a liability to the PBGC for insurance premiums the payment of which is not yet due); (c) any Pension Plan shall have an accumulated funding deficiency as defined in Section 412 of the Code or Section 302 of ERISA; (d) any Plan intended to be qualified under Section 401(a) or 401(k) of the Code shall be disqualified; (e) any Plan shall be subject to an excise tax pursuant to Code Section 4980B or shall fail to comply with Sections 601-606 (inclusive) of ERISA; (f) the Borrower provides employee welfare benefits to retirees other than statutorily required or pursuant to Section 601 et seq. of ERISA and Section 4980B of the Code; or (g) the Borrower incurs liability under or relating to any Plan resulting from a violation of ERISA, the Code and/or any other applicable law, including without limitation the Age Discrimination in Employment Act, the Americans With Disabilities Act and Title VII of the Civil Rights Act, each as amended; and in each case above, such event or condition, individually or in the aggregate, together with all other such events or conditions, if any, is reasonably likely to subject the Borrower to any tax, penalty, or other liability to a Plan, a Multiemployer Plan, the PBGC, or otherwise (or any combination thereof) which in the aggregate has had or is reasonably likely to have a Material Adverse Effect; or the Borrower or any ERISA Affiliate shall fail to pay when due an amount or amounts which it shall have become liable to pay under Title IV or ERISA or as a contribution to a Pension Plan and/or Multiemployer Plan which, as a result, has had or is reasonably likely to have a Material Adverse Effect; or

Section 9.16. Funding Agreement. Ormat International, Inc. shall fail to cause the Affiliated Funding Entities to make any Post-Completion Standby Subordinated Loan or Post-Completion Standby Equity Contribution or shall fail to cause the Affiliated Funding Entities to pay any amount required to be paid by either of them under, or otherwise to comply with any of the terms of, the Funding Agreement required to be performed after the Eximbank Disbursement Date; provided that no Event of Default under this Section 9.16 shall be declared as a result of any such failure of the Affiliated Funding Entities to make a Post-Completion Standby Subordinate Loan or a Post-Completion Standby Equity Contribution if within 30 days after such failure Ormat shall have paid all such defaulted amounts pursuant to the terms of the Post-Completion Ormat Guaranty;

then, (a) in the event that an Event of Default described in Section 9.01(a) with respect to any amount owing to Eximbank shall occur and be continuing on or prior to the Disbursement Date, Eximbank shall have the right to suspend disbursement of the Eximbank Credit in accordance with Section 4.03(a), and (b) in the event that any Event

67

of Default (including any Event of Default described in Section 9.01(a) with respect to any amount owing to Eximbank) shall occur, and at any time thereafter, if such Event of Default is continuing on and/or after the Disbursement Date, Eximbank shall have the right to (i) take any actions necessary to cure such Event of Default and/or declare an Event of Default, (ii) declare, without presentment, demand, protest or notice of any kind, all of which are hereby expressly waived by Borrower, the entire amount of Borrower's outstanding Eximbank Secured Obligations to be immediately due and payable, irrespective of any other provision of any Financing Document, whereupon the

same shall be and become immediately due and payable (provided that if an Event of Default specified in Section 9.05 shall have occurred or a Buyout shall have occurred, the entire amount of Borrower's outstanding Eximbank Secured Obligations shall be automatically immediately due and payable without any declaration, presentment, demand, protest or notice or other act of any kind by Eximbank or any of the other Secured Parties whatsoever), and (iii) proceed to enforce or cause or instruct the Collateral Trustee to enforce any remedies provided under any of the Financing Documents. If an event or occurrence constitutes an Event of Default or Default under more than one of the provisions of this Section 9, Eximbank may during the continuance of such Event of Default take all actions and remedies provided hereunder upon expiration of the shortest grace period, if any, applicable to such Default or Event of Default.

SECTION 10. GOVERNING LAW AND JURISDICTION

Section 10.01. Governing Law. THIS AGREEMENT SHALL BE DEEMED TO BE A CONTRACT MADE UNDER THE LAWS OF THE STATE OF NEW YORK, UNITED STATES OF AMERICA, AND SHALL FOR ALL PURPOSES BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF SUCH STATE WITHOUT REGARD TO THE CONFLICT OF LAWS RULES THEREOF.

Section 10.02. Submission to Jurisdiction; Service of Process. (a) The Borrower irrevocably agrees that any legal action or proceeding against the Borrower with respect to this Agreement, the Eximbank Note or any Financing Document may be brought in the courts of the State of New York in the County of New York or of the United States for the Southern District of New York and, by execution and delivery of this Agreement, the Borrower hereby irrevocably accepts for itself and in respect of its property, generally and unconditionally, the jurisdiction of the aforesaid courts. The Borrower agrees that a judgment, after exhaustion of all available appeals, in any such action or proceeding shall be conclusive and binding upon the Borrower, and may be enforced in any other jurisdiction, including without limitation the Republic, by a suit upon such judgment, a certified copy of which shall be conclusive evidence of the judgment. The Borrower hereby irrevocably designates, appoints and empowers CT Corporation System, with offices on the date hereof at 1633 Broadway, New York, New

68

York 10019, as its designee, appointee and agent to receive, accept and acknowledge for and on its behalf, and in respect of its property, service of any and all legal process, summons, notices and documents which may be served in any such action or proceeding. If for any reason such designee, appointee and agent shall cease to be available to act as such, the Borrower agrees to designate a new designee, appointee and agent in New York City on the terms and for the purposes of this provision satisfactory to Eximbank, advise Eximbank thereof, and deliver to Eximbank evidence in writing of the successor agent's acceptance of such appointment. The Borrower further irrevocably consents to the service of process out of any of the aforementioned courts in any such action or proceeding by the mailing of copies thereof by registered or certified mail, postage prepaid, to the Borrower, at its address set forth opposite its signature below, such service to become effective 30 days after such mailing. The foregoing provisions constitute, among other things, a special arrangement for service between the parties to this Agreement for the purposes of 28 U.S.C. (section) 1608. Nothing herein shall affect the right of the Collateral Trustee or Eximbank to serve process in any other manner permitted by law or to commence legal proceedings or otherwise proceed against the Borrower in the Republic or in any other jurisdiction.

(b) The Borrower hereby irrevocably waives any objection which it may now or hereafter have to the laying of venue of any of the aforesaid actions or proceedings arising out of or in connection with this Agreement, the Eximbank Note or any other Financing Document brought in the courts referred to in clause (a) above and hereby further irrevocably waives and agrees not to plead or claim in any such court that any such action or proceeding brought in any such court

has been brought in an inconvenient forum.

Section 10.03. Waiver of Sovereign Immunity. The Borrower acknowledges and agrees that the activities contemplated by the provisions of this Agreement, the Eximbank Note and the Financing Documents are commercial in nature rather than governmental or public, and therefore acknowledges and agrees that it is not entitled to any right of immunity on the grounds of sovereignty or otherwise with respect to such activities or in any legal action or proceeding arising out of or relating to this Agreement, the Eximbank Note or the other Financing Documents. The Borrower, in respect of itself, its process agents, and its properties and revenues, expressly and irrevocably waives any such right of immunity which may now or hereafter exist (including any immunity from any legal process, from the jurisdiction of any court or from any execution or attachment in aid of execution prior to judgment or otherwise) or claim thereto which may now or hereafter exist, and agrees not to assert any such right or claim in any such action or proceeding, whether in the United States or otherwise.

SECTION 11. MISCELLANEOUS

Section 11.01. Transportation. All items which are financed under the Eximbank Credit and which are exported by ocean vessel must be transported from the United States in vessels of U.S. Registry as required by 46 U.S.C. (section)1241-1 (Public Resolution No. 17 of the 73rd Congress of the United States, as amended), except to the extent that a waiver of this requirement is obtained from the U.S. Maritime Administration ("MARAD"). If shipments are made on non-U.S. vessels without a waiver or contrary to the provisions of the waiver, the Items will not be eligible for financing under the Eximbank Credit or for coverage under the Eximbank Guaranty Agreement.

Section 11.02. Transportation Costs. The costs of ocean or air freight for shipment of any item on a vessel or aircraft of non-U.S. registry pursuant to a waiver from MARAD will constitute Foreign Cost associated with such Item if such costs are included in the Contract Price of such Item. If such freight costs are for shipment of an Item on a vessel or aircraft of U.S. registry, such costs will constitute U.S. Content.

Section 11.03. Insurance. The Borrower shall obtain insurance against marine and transit hazards on all shipments of the Items in an amount not less than the amount of the Disbursements made with respect to those shipments. United States insurers shall be given a nondiscriminatory opportunity to bid for such insurance business related to the Items. The cost of the premiums for such insurance may be included in the U.S. content of the insured Item if the insurance is placed in the United States with a United States company. In all other cases, the cost of the premiums shall be included in the Foreign Cost associated with the Item.

Section 11.04. Disposition of Indebtedness. Eximbank may sell, transfer, pledge, negotiate, grant participations in or otherwise dispose of all or any part of the Borrower's indebtedness under this Agreement and the Eximbank Note to any party, and any such party shall enjoy all the rights and privileges of Eximbank under this Agreement and the Eximbank Note. The Borrower shall, at the request of Eximbank, execute and deliver to Eximbank or to any party that Eximbank may designate any such further instruments as may be necessary or desirable to give full force and effect to the disposition by Eximbank. Notwithstanding anything to the contrary contained herein, the Borrower may not assign or otherwise transfer any of its rights or obligations under this Agreement without the prior written consent of Eximbank.

Section 11.05. Taxes. (a) The Borrower agrees to pay all amounts owing by it to Eximbank under this Agreement, the Eximbank Guarantee Agreement, the Eximbank Note or any other Financing Document free and clear of and without

deduction for any Taxes. The Borrower further agrees:

70

(i) that if it is prevented by operation of law from paying any Taxes, then the interest rate or fees required to be paid under this Agreement, the Eximbank Guarantee Agreement, the Eximbank Note or any other Financing Document shall increase by the amount necessary to yield to Eximbank interest, fees or expenses in the amounts provided for in this Agreement, the Eximbank Guarantee Agreement, the Eximbank Note or such other Financing Document after provision for the payment of all such Taxes;

(ii) that it shall at the request of Eximbank execute and deliver to Eximbank such further instruments as may be necessary or desirable to effect the increased in the interest or fees as provided for in clause (i) immediately above, including new Eximbank Notes to be issued in exchange for any Eximbank Note previously issued;

(iii) that it shall hold Eximbank harmless from and against any liabilities with respect to any such Taxes (whether or not properly or legally asserted);

(iv) to provide Eximbank with the original or a certified copy of evidence of the payment of any Taxes by the Borrower as Eximbank may reasonably request, or, if no Taxes have been paid, to provide Eximbank, at Eximbank's request, with a certificate from the appropriate taxing authority or an opinion of counsel acceptable to Eximbank stating that no Taxes are payable.

(v) In the event that it is necessary for Eximbank to cooperate with the Borrower in order for the Borrower to fulfill its obligations under this Section 11.05, Eximbank shall cooperate to the extent necessary, provided Eximbank shall incur no expense or other liability in connection therewith.

(b) In the event Eximbank assigns or transfers its rights, title and interest under this Agreement to a Person which is not a Person entitled to tax exemptions on its assets, revenues and operations substantially similar to the tax exemptions applicable to Eximbank, then the definition of "Taxes" applicable to such Person for purposes of this Agreement shall be the definition of "Covered Taxes" set forth herein.

Section 11.06. Disclaimer. Eximbank shall not be responsible in any way for the performance of the Purchase Contracts, and no claim against the supplier of any Item or any other person with respect to the performance of the Purchase Contracts will affect the obligations of the Borrower under this Agreement, the Eximbank Note or any Financing Document.

Section 11.07. Indemnities and Expenses. (a) The Borrower shall, whether or not the transactions herein contemplated are consummated, pay the reasonable fees and expenses of the Independent Engineer, the Insurance Consultant, Winston & Strawn, special counsel to Eximbank, and Castillo Laman Tan Panteleon & San Jose, special

71

Philippine counsel to Eximbank and the law firms referred to in Sections 5.01(b) and 5.02(b), and all reasonable costs and expenses incurred by Eximbank, incurred in connection with (i) the preparation, printing, execution, delivery, administration, registration (where appropriate) or enforcement of this Agreement, the Eximbank Note, the Eximbank Guarantee Agreement and the other Financing Documents and any other documents related thereto (including the Legal Opinions); (ii) any amendment or modification to, preservation of rights under,

or waiver in connection with, the Financing Documents or any such other document; and (iii) the registration (where appropriate) and the delivery of the evidences of Indebtedness relating to the Eximbank Credit and the Disbursement thereof.

(b) The Borrower Shall, whether or not the transactions herein contemplated are consummated, (i) pay and hold Eximbank harmless from and against any and all present and future stamp and other similar taxes and documentary or registration fees with respect to the matters referred to in the foregoing clause (a) and save Eximbank harmless from and against any and all liabilities with respect to or resulting from any delay or omission (other than to the extent attributable to Eximbank) to pay such taxes or fees; and (ii) indemnify Eximbank and each of its respective officers, directors, employees, representatives, attorneys and agents from and hold each of them harmless against any and all liabilities incurred by any of them as a result of, or arising out of, or in any way related to, or by reason of, any investigation, litigation or other proceeding (whether or not Eximbank is a party thereto) related to the entering into and/or performance of this Agreement, the Eximbank Note, the Eximbank Guarantee Agreement or any other Project Document or the use of the proceeds of the Eximbank Credit or the consummation of any transactions contemplated herein or in any other Project Document, including, without limitation, the reasonable fees and disbursements of counsel selected by such indemnified party incurred in connection with any such investigation, litigation or other proceeding or in connection with enforcing the provisions of this Section 11.07(b) (but excluding any such liabilities, obligations or losses, to the extent incurred by reason of the gross negligence or willful misconduct of the Person to be indemnified or its officers, directors, employees, representatives, attorneys or agents, as the case may be as determined by a court of competent jurisdiction). Without limitation to the foregoing provisions of this paragraph, the indemnity provided hereunder shall cover any loss, liability or expense reasonably incurred other than by reason of gross negligence or wilful misconduct on behalf of Eximbank arising out of or in connection with claims by third parties (including without limitation any Lender or the Administrative Agent) to whom a copy of the Information Memorandum has been distributed with the knowledge of the Borrower against Eximbank relating to any alleged inaccuracy of the factual information (taken as a whole) which, for the avoidance of doubt shall not include any information by way of projections, estimates or other expressions of view as to future circumstances (provided that such projections, estimates or other expressions of view are

72

expressed in good faith and on the basis of assumptions which when made were viewed by the Borrower in good faith to be reasonable) contained in, or any alleged omission of information which will render such aforesaid factual information (taken as a whole) inaccurate or misleading in a material respect from, the Information Memorandum and the Project Documents. Eximbank shall (1) use reasonable efforts to, upon its becoming aware of any event which may result in the Borrower being required to perform any of its indemnity obligations under this paragraph (b), promptly notify the Borrower (provided that failure to so notify shall not mitigate the obligations of the Borrower hereunder), (2) upon request from the Borrower consult with the Borrower regarding any step (including any step which may mitigate the effect of such event) it proposes to take in respect of such event and (3) consult with the Borrower before entering into any settlement or compromise in relation to any such claims, actions or suits.

(c) Without limitation to the provisions of paragraph (b) above, the Borrower agrees to defend, protect, indemnify and hold harmless Eximbank and each of its officers, directors, employees, representatives, attorneys and agents from and hold each of them harmless against any and all liabilities (including removal and remedial actions), obligation, losses, damages, penalties, claims, actions, judgments, suits, costs, expenses and disbursements (including reasonable attorneys' and consultants' fees and disbursements)

imposed on or asserted against any such Persons directly or indirectly based on, or arising or resulting from, (i) the actual or alleged presence of Hazardous Materials on, under or at any of the Plants or any portion of the Site, (ii) any Environmental Claim relating to the Borrower or the Project or arising out of the use of any of the Plants or any portion of the Site, or (iii) the exercise of Eximbank's rights under any of the provisions of this Section regardless of when any such matters arise, but excluding any matter based solely on the gross negligence or willful misconduct of Eximbank or its officers, directors, employees, representatives, attorneys or agents, as the case may be. Eximbank shall (1) use reasonable efforts to, upon its becoming aware of any event which may result in the Borrower being required to perform any of its obligations under this paragraph (c), promptly notify the Borrower (provided that failure to so notify shall not mitigate the obligations of the Borrower hereunder), (2) upon request from the Borrower consult with the Borrower regarding any step (including any step which may mitigate the effect of such event) it proposes to take in respect of such event and (3) consult with the Borrower before entering into any settlement or compromise in relation to any such claims, actions or suits.

(d) To the extent that the undertaking in the preceding paragraphs of this Section may be unenforceable because it is violative of any law or public policy, the Borrower will contribute the maximum portion that it is permitted to pay and satisfy under applicable law to the payment and satisfaction of such undertakings.

73

(e) All sums paid and costs incurred by Eximbank with respect to any matter indemnified hereunder shall bear interest at the default rate applicable to the Eximbank Credit from the date so paid or incurred until reimbursed by the Borrower, and all such sums and costs shall be added to the debt and be secured by the Security Documents and shall be immediately due and payable on demand.

Section 11.08. Right of Setoff. In addition to any rights now or hereafter granted under applicable law or otherwise, and not by way of limitation of any such rights, upon the occurrence of an Event of Default, Eximbank is hereby authorized at any time or from time to time, without presentment, demand, protest or other notice of any kind to the Borrower or to any other Person, any such notice being hereby expressly waived, to set off and to appropriate and apply any and all deposits (general or special) and any other Indebtedness at any time held or owing by Eximbank to or for the credit or the account of the Borrower against and on account of the Eximbank Secured Obligations and liabilities of the Borrower to Eximbank under this Agreement or under any of the other Financing Documents, and all other claims of any nature or description arising out of or connected with this Agreement or any other Financing Document, irrespective of whether or not Eximbank shall have made any demand with respect thereto.

Section 11.09. Benefit of Agreement. This Agreement shall be binding upon and inure to the benefit of and be enforceable by the respective successors and assigns of the parties hereto, except that the Borrower may not assign or transfer any of its rights or obligations hereunder without the prior written consent of Eximbank.

Section 11.10. No Waiver; Remedies Cumulative. No failure or delay on the part of Eximbank in exercising any right, power or privilege hereunder or under any other Financing Document and no course of dealing between the Borrower and Eximbank shall impair any such right, power or privilege or operate as a waiver thereof; nor shall any single or partial exercise of any right, power or privilege hereunder or under any other Financing Document preclude any other or further exercise thereof or the exercise of any other right, power or privilege hereunder or thereunder. The rights, powers and remedies herein or in any other Financing Document expressly provided are cumulative and not exclusive of any

rights, powers or remedies which Eximbank would otherwise have. No notice to or demand on the Borrower in any case shall entitle the Borrower to any other or further notice or demand in similar or other circumstances or constitute a waiver of the rights of Eximbank to any other or further action in any circumstances without notice or demand.

Section 11.11. Severability. Any provision of this Agreement, the Eximbank Note and any other Financing Document which is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability but that shall not invalidate the remaining provisions of this

74

Agreement, the Eximbank Note or any Financing Document or affect such provision in any other jurisdiction.

Section 11.12. English Language. All documents to be furnished or communications to be given or made under this Agreement or any other Financing Document shall be in the English language.

Section 11.13. Calculations; Computations. All financial calculations to be made under, or for the purposes of, this Agreement shall be determined in accordance with Philippine generally accepted accounting principles, applied on a consistent basis and, except as otherwise required to conform to the definitions contained in Schedule X or any other provisions of this Agreement, shall be calculated from the then most recently issued quarterly financial statements which the Borrower is obligated to furnish to Eximbank from time to time, as provided hereunder; provided, however, that (a) if the relevant quarterly financial statements should be in respect of the last quarter of a Fiscal Year then, at the option of Eximbank, such calculations may instead be made from the audited financial statements for the relevant Fiscal Year, and (b) if there should occur any material adverse change in the financial condition or results of operations of the Borrower after the end of the period covered by the relevant financial statements, then such material adverse change shall also be taken into account in calculating the relevant figures.

Section 11.14. Survival. All indemnities set forth herein shall survive the execution and delivery of this Agreement and the Eximbank Note, the execution, delivery and termination of the Eximbank Guarantee Agreement, and the making and repayment of the Eximbank Credit.

Section 11.15. Amendments. No term or provision of this Agreement may be amended, changed, modified or waived except by an instrument in writing signed by the party against whom such amendment, change, modification or waiver is sought to be enforced.

Section 11.16. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same agreement.

Section. 11.17. Notices. Except as otherwise expressly provided herein, (a) all notices and other communications provided for hereunder shall be provided in writing (including telegraphic, telex, facsimile or cable communication) and shall be sent by telecopy, telex, telegraph or cable with the original of such communication dispatched by (if inland) overnight or (if overseas) international courier and, if such courier service is not available, by registered airmail (or, if inland, registered first-class mail) with

75

postage prepaid to the Borrower, the Collateral Trustee and Eximbank at their

respective addresses specified below, or at such other address as shall be designated by such party in a written notice to the other parties hereto and (b) all such notices and communications shall, when mailed, telegraphed, telexed, telecopied, or cabled or sent by overnight courier, be effective seven (7) days after being deposited in the mails in the manner as aforesaid, when delivered to the telegraph company or cable company (if inland), one (1) day or (if overseas) three (3) days after delivery to a courier in the manner as aforesaid, as the case may be, or when sent by telex (with the correct answer back) or telecopier:

Section 11.18. Judgment Currency. All payments of principal, interest, fees or other amounts due to Eximbank under this Agreement, the Eximbank Note or any other Financing Document shall be made in Dollars, regardless of any law, rule, regulation or statute, whether now or hereafter in existence or in effect in any jurisdiction, which affects or purports to affect such obligations. The obligation of the Borrower in respect of any amount due under this Agreement, the Eximbank Note or any other Financing Document, notwithstanding any payment in any other currency (whether pursuant to a judgment or otherwise), shall be discharged only to the extent of the amount in Dollars that the Person entitled to receive that payment may, in accordance with normal banking procedures, purchase with the sum paid in that other currency (after any premium and costs of exchange) on the Business Day immediately succeeding the day on which that Person receives that payment. If the amount in Dollars that may be so purchased for any reason falls short of the amount originally due, the Borrower shall pay such additional amounts, in Dollars, to compensate for the shortfall. Any obligation of the Borrower not discharged by that payment shall continue to be due as a separate and

77

independent obligation and shall accrue interest in accordance with Section 3.02 until discharged as provided herein.

Section 11.19. Headings Descriptive. The headings of the several sections and subsections of this Agreement are inserted for convenience only and shall not in any way affect the meaning or construction of any provision of this Agreement.

Section 11.20. Prior Agreements Superseded. This Agreement, the Eximbank Guarantee Agreement, the Eximbank Note and the other Financing Documents to which the Borrower is a party shall completely and fully supersede all prior understandings or agreements, both written and oral, among the parties hereto regarding the Eximbank Credit and the Eximbank Guarantee Agreement.

Section 11.21. No Recourse. Except as provided in the last sentence of and the proviso to the penultimate sentence of this Section 11.21, neither any Partner, the Construction Supplier or the Construction Contractor nor their respective shareholders or Affiliates (other than the Borrower), nor its or their respective officers, directors, stockholders, controlling persons or employees (each, a "Non-Recourse Party"), shall have any personal liability for any amounts payable by the Borrower hereunder or under the Eximbank Note or any other Project Document or for the performance of any covenant, agreement or obligation of the Borrower, or for the breach of any representation, warranty or covenant of the Borrower under this Agreement, the Eximbank Note or any other Project Document, agreement, undertaking, certificate or other document delivered by or on behalf of the Borrower in connection with this Agreement, and therefore no judgment or recourse shall be sought or enforced against any Non-Recourse Party for the payment or performance of the obligations of the Borrower under any Project Document or any other such agreement, undertaking, certificate or document executed by the Borrower. Except as provided in the last sentence of this Section 11.21, it is expressly understood that all obligations and liabilities of the Borrower under this Agreement, the Eximbank Note and the other Project Documents to which the Borrower is a party and any other related document, agreement or instrument executed by the Borrower are solely obligations of the Borrower, provided, that such limitation of liability shall not apply to a Non-Recourse Party if and to the extent that such Non-Recourse Party commits fraud or misappropriation of earnings, revenues, profits or proceeds from the Borrower or the Project. Notwithstanding anything herein to

the contrary, nothing herein shall limit, or be construed or deemed to limit, the liability of any Non-Recourse Party under any Project Document to which such Non-Recourse Party is in its individual capacity a party.

IN WITNESS WHEREOF, the parties to this Agreement have caused this Agreement to be duly executed and delivered in the United States as of the date set forth below.

INDENTURE dated as of February 13, 2004 among Ormat Funding Corp., a Delaware corporation (including its successors and permitted assigns, the "Issuer"), Brady Power Partners, a Nevada general partnership ("Brady"), Steamboat Development Corp., a Utah corporation ("Steamboat Development"), Steamboat Geothermal LLC, a Delaware limited liability company ("Steamboat Geothermal"), OrMammoth Inc., a Delaware corporation ("OrMammoth"), ORNI 1 LLC, a Delaware limited liability company ("ORNI 1"), ORNI 2 LLC, a Delaware limited liability company ("ORNI 2"), ORNI 7 LLC, a Delaware limited liability company ("ORNI 7"), Ormesa LLC and Union Bank of California, N.A., a national banking association, as trustee (the "Trustee").

The Issuer, the Guarantors (as defined) and the Trustee agree as follows for the benefit of each other and for the equal and ratable benefit of the Holders of the 8 1/4% Senior Secured Notes due December 30, 2020, any Additional Notes (as defined below) and the Exchange Notes (as defined below) issued pursuant to the Registration Rights Agreement:

ARTICLE I

DEFINITIONS AND INCORPORATION BY REFERENCE

Section 1.01 Definitions.

"Acceptable Letter of Credit" means one or more irrevocable standby letters of credit available for the purpose of drawing in accordance with the Depositary Agreement, and any extensions thereof or any substitute letter of credit therefor in the stated amount contained in such extension or substitute, subject to the limitations set forth in, and permitting draws thereon as contemplated by the Depositary Agreement, (i) issued to the Depositary Agent (for the benefit of the Secured Parties entitled to the benefits of the applicable Account) by a commercial bank having a long-term

unsecured senior debt rating of at least Investment Grade, (ii) payable in immediately available U.S. Dollar funds on any Business Day, (iii) with a minimum term of at least one year, (iv) providing for the amount thereof to be available to the Depositary Agent in multiple drawings conditioned only upon presentation of sight drafts accompanied by the applicable certificate in the form attached to such letter of credit or if the issuing bank ceases to be an Eligible Letter of Credit Provider, (v) transferable to any successor Depositary Agent, the Collateral Agent or a successor Collateral Agent (or if not transferable provides for the amount thereof to be drawn upon by the Depositary Agent upon appointment of a successor Depositary Agent or Collateral Agent), (vi) governed by the laws of the State of New York or California, (vii) does not constitute Indebtedness (directly or indirectly) of the Issuer or any of its Subsidiaries, and is not secured by a Lien on any of the properties of the Issuer or any of its Subsidiaries, and the Issuer certifies to such in an Officer's Certificate and (viii) which provides that it may be drawn not more than thirty days prior to its expiration in the entire amount to be then drawn if the issuing bank does not provide a written extension of the same to the Depositary Agent at least 30 days prior to its then scheduled expiration date.

"Accounts" means the accounts established under the Depositary Agreement.

Page 2

"Additional Notes" means any Senior Secured Notes (other than Initial Notes), if any, issued under this Indenture in accordance with Sections 2.05 and 2.15 hereof.

"Additional Project Document" means any contract or agreement entered into after the Closing Date in respect of the ownership, construction, operation, maintenance, modification or administration of a Project that is material to the Issuer or one or more Projects (including a Qualified Project), other than a Financing Document. The replacement of a Project Document that is not a Material Project Document shall be deemed not to be an Additional Project Document.

"Administrative Costs" means all of the Issuer's obligations, now or hereafter existing, to pay administrative fees, costs and expenses to any trustee or agent of the Holders of the Senior Secured Notes or any Permitted Additional Senior Lender, including the Collateral Agent, the Depositary, and the Trustee (including, without limitation, the reasonable fees and expenses of counsel, agents and experts).

"Affiliate" means, with respect to a Person, any other Person that, directly or indirectly through one or more intermediaries, controls, is controlled by or is under common control with such first Person. The term "control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

"Agent" means any Registrar, Paying Agent or co-registrar.

"Agent Member" has the meaning set forth in Section 2.07(c)(v)(B) of this Indenture.

"Annual Period" means the twelve month period commencing on January 1st of each year and ending on December 31st of each year.

"Applicable Law" means any constitution, statute, law, rule, regulation, ordinance, judgment, order, decree or Governmental Approval, or any published directive or requirement which has the force of law, or other governmental restriction which has the force of law, or any determination by, or interpretation of any of the foregoing by, any judicial authority, applicable to and/or binding on a given Person or any Plant, as the context may require,

whether in effect as of the Closing Date or thereafter and in each case as amended.

"Authentication Order" means a written order or request signed in the name of the Issuer by the President, a Vice President, the Treasurer or the Assistant Treasurer, and delivered to the Trustee.

"Authorized Officer" or "Authorized Representative" of any Person means the individual or individuals authorized to act on behalf of such Person by the board of directors, managing member, management committee, board of control or any other governing body of

-2-

Page 3

such Person as designated from time to time in a certificate of such Person with specimen signatures.

"Board of Directors" means:

(1) with respect to a corporation, the board of directors of the corporation or any committee thereof duly authorized to act on behalf of such board;

(2) with respect to a partnership, the board of directors of the general partner of the partnership or any committee duly authorized and empowered to take action on behalf of such partnership by the partnership agreement of such partnership;

(3) with respect to a limited liability company, the managing member or members or any controlling committee of managing members thereof; and

(4) with respect to any other Person, the board or committee of such Person serving a similar function.

"Bankruptcy Law" means Title 11, U.S. Code or any similar federal or state law for the relief of debtors.

"Brady" means Brady Power Partners, a Nevada general partnership.

"Brady-BLM Geothermal Resources Lease N-10922" means that certain Lease for Geothermal Resources N-10922, dated October 1, 1975, between Brady and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Brady-BLM Geothermal Resources Lease N-40353" means that certain Lease for Geothermal Resources N-40353, dated April 1, 1986, between Brady and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Brady-BLM Geothermal Resources Lease N-40355" means that certain Lease for Geothermal Resources N-40355, dated July 1, 1986, between Brady and the United States of America through the Bureau of Land Management of the Department of the Interior

"Brady-BLM Geothermal Resources Lease N-46566" means that certain Lease for Geothermal Resources N-46566 between Brady and the United States of America through the Bureau of Land Management of the Department of the Interior, dated October 1, 1975.

"Brady/Desert Peak 1 Interconnection Agreement" means that certain Service Connections, Meters and Customer's Facility Exhibit to the Brady Project Power Purchase Agreement, between Brady (as successor to Nevada Geothermal Power Partners) and Sierra Pacific Power Company.

-3-

Page 4

"Brady Operation and Maintenance Agreement" means that certain Operation and Maintenance Agreement, dated January 1, 2002, between Brady, Western States and Ormat Nevada as Western States' agent.

"Brady Plant" means two geothermal power generating plants located in Churchill County, Nevada (including the Desert Peak 1 Plant) and having a gross generating capacity of 32 MW.

"Brady Project Power Purchase Agreement" means that certain Long Term Agreement for the Purchase and Sale of Electricity, dated October 5, 1990, between Brady (as successors to Nevada Geothermal Power Partners) and Sierra Pacific Power Company, as amended by that certain Amendment to Long Term Agreement for the Purchase and Sale of Electricity, dated July 12, 1991, as modified by that certain Settlement Agreement, dated February 16, 2001, between Sierra Pacific Power Company and Brady, and as further amended by that certain Amendment No. 2 to Long Term Agreement for the Purchase and Sale of Electricity, dated June 24, 2002.

"Brady Settlement Agreement" means that certain Settlement Agreement, dated May 1, 2002, among Brady, ORNI 1 LLC, ORNI 2 LLC, Ormat Nevada, Ormat Technologies, and ConAgra Foods, Inc.

"Business Day" means any day other than a Saturday or Sunday or other day on which banks in New York, New York or Nevada are authorized or required by law or executive order to remain closed.

"Capital Expenditures" means any expenses that are capitalized on the Issuer's balance sheet in accordance with GAAP.

"Capital Stock" means:

- (1) in the case of a corporation, corporate stock;
- (2) in the case of an association or business entity, any and all shares, interests, participations, rights or other equivalents (however designated) of corporate stock;
- (3) in the case of a partnership or limited liability company, partnership interests (whether general or limited) or membership interests; and
- (4) any other interest or participation that confers on a Person the right to receive a share of the profits and losses of, or distributions of assets of, the issuing Person including all warrants, options or other rights to acquire any of the foregoing, but excluding from all of the foregoing any debt securities convertible into or exchangeable for Capital Stock, whether or not such debt securities include any right of participation with Capital Stock.

-4-

Page 5

"Cash Flow Available for Debt Service" means, for any period,
(a) all revenues (including interest, Delay Liquidated Damages, and the proceeds

of any business interruption insurance but excluding any other insurance proceeds and any other similar non-recurring receipts) received in such period and deposited in the Revenue Account, less (b) the sum of (x) Operating and Maintenance Expenses for such period plus (y) Administrative Costs payable to the Trustee, the Collateral Agent, the Depositary and any other trustee or agent of the Secured Parties for such period, all as computed on a cash basis.

"Certificated Note" shall mean a certificated Senior Secured Note registered in the name of the Holder thereof and issued in accordance with Section 2.07 hereof, substantially in the form of Exhibit A-1/A-2 hereto except that such Senior Secured Note shall not bear the Global Note Legend and shall not have the "Schedule of Exchanges of Interests in the Global Note" attached thereto.

"Change of Control" means the occurrence of any of the following: (i) the sale, lease, transfer, conveyance or other disposition (other than by way of merger or consolidation), in one or a series of related transactions, of all or substantially all of the Issuer's and the Issuer's Subsidiaries' assets, taken as a whole; (ii) the adoption of a plan relating to the Issuer's liquidation or dissolution; (iii) the consummation of any transaction or series of related transactions (including, without limitation, any merger or consolidation) the result of which is that any Person other than Ormat Nevada or a Related Party, becomes the "beneficial owner" (as such term is defined Rule 13d-3 and Rule 13d-5 under the Exchange Act) directly or indirectly, of 50% or more of the Issuer's voting power; or (iv) the consummation of any transactions or series of related transactions the result of which is that Ormat Nevada and the Related Parties cease to collectively own, directly or indirectly, more than 50% of the Issuer's economic or voting interest; provided, however, that notwithstanding the foregoing, a Change of Control will not be deemed to have occurred if (x) prior to giving effect to the reduction in Ormat Nevada's and/or the Related Parties' collective voting or economic interests in the Issuer, such reduction has been approved by holders of at least 66% of the Senior Secured Notes or (y) prior to giving effect to any other Person becoming the beneficial owner of 50% or more of the Issuer's voting power pursuant to clause (iii) hereof, the transaction resulting in such change in beneficial ownership is approved by holders of at least 66% of the Senior Secured Notes.

"Clearstream" means Citibank, N.A., as operator of Clearstream Banking, S.A.

"Closing Date" means February 13, 2004.

"Code" means the U.S. Internal Revenue Code of 1986, as amended.

"Collateral" means all collateral pledged, or in respect of which a lien is granted, pursuant to this Indenture or the Security Documents.

-5-

Page 6

"Collateral Agency Agreement" means that certain Collateral Agency Agreement among the Issuer, each of the Issuer's Subsidiaries, the Collateral Agent, the Trustee and the Depositary.

"Collateral Agent" means Union Bank of California, N.A., as collateral agent for the benefit of the Secured Parties, together with its successors and assigns.

"Collection Expenses" means all reasonable out-of-pocket costs or expenses (if any) and, if applicable, reasonable transaction costs, incurred

by the Issuer in connection with the collection, enforcement, negotiation, consummation, settlement, proceedings, administration or other activity related to the receipt and/or collection of the relevant proceeds, as applicable.

"Commercial Operation" means, in connection with the Galena Re-powering, the achievement of certain operational and capability criteria specified for "commercial operation" in the Galena Power Purchase Agreement.

"Commercial Operation Date" means, in connection with the Galena Re-powering, the date upon which Commercial Operation is achieved.

"ConAgra Lease" means that certain Lease, dated May 1, 2002, between Brady and ConAgra Foods, Inc.

"Consolidated OG I Plant Connection Agreements" means the OG I Plant Connection Agreement, the OG IH Plant Connection Agreement, and the OG IE Plant Connection Agreement.

"Contractor" means Ormat Nevada in its capacity as contractor if and when the Galena Re-powering Contract is executed.

"Contractor Guarantor" means Ormat Technologies.

"Control Agreements" means (i) each Control Agreement executed and delivered by the Collateral Agent, the Issuer, certain of the Issuer's Subsidiaries and the bank or institution where the Issuer's checking accounts permitted to be established under this Indenture are held and (ii) each Control Agreement executed and delivered by the Collateral Agent, the Issuer and certain of the Issuer's Subsidiaries in connection with the Security Documents.

"Corporate Trust Office of the Trustee" shall be at the address of the Trustee specified in Section 4.02 hereof or such other address as to which the Trustee may give notice to the Issuer.

"Custodian" means, initially, the Trustee, and its successors and assigns or any other custodian performing similar functions.

-6-

Page 7

"Debt Service Coverage Ratio" means, for any period, the ratio of (i) the sum of all Cash Flow Available for Debt Service for such period to (ii) the aggregate payments of scheduled or accelerated (in accordance with the terms of the Financing Documents) principal, interest, premium, and Liquidated Damages, if any, required to be made under this Indenture and other Financing Documents and in connection with all other Permitted Indebtedness (other than Subordinated Debt) for such period.

"Debt Service Reserve Account" means the account of such name created under the Depositary Agreement.

"Debt Service Reserve Letter of Credit" means an Acceptable Letter of Credit that may be drawn in accordance with Section 3.4 of the Depositary Agreement.

"Debt Service Reserve Requirement" means, as of any date of calculation, an amount equal to the projected principal, interest and, to the extent that a Registration Default has occurred and is continuing, Liquidated Damages due on the Senior Secured Notes during the succeeding six-month period.

"Deeds of Trust" means, collectively, (i) that certain Deed of Trust, Assignment of Rents, Security Agreement, and Fixture Filing, dated as of the Closing Date, executed by Steamboat Geothermal, as grantor, for the benefit

of the Collateral Agent, as beneficiary, (ii) on or after the Ormesa Support Date, that certain Deed of Trust, Assignment of Rents, Security Agreement, and Fixture Filing, to be executed by Ormesa, as Trustor, for the benefit of the Collateral Agent, as beneficiary, (iii) that certain Deed of Trust, Assignment of Rents, Security Agreement, and Fixture Filing, to be executed by Steamboat Development, as grantor, for the benefit of the Collateral Agent, as beneficiary, in the event the respective Resource Lease Consent is obtained, (iv) that certain Deed of Trust, Assignment of Rents, Security Agreement, and Fixture Filing, to be executed by Brady Power Partners as grantor, for the benefit of the Collateral Agent, as beneficiary, to the extent any necessary Resource Lease Consents are obtained, (v) a Deed of Trust, Assignment of Rents, Security Agreement and Fixture Filing to be executed by Mammoth-Pacific, if the Issuer or any Guarantor acquires that portion of the Capital Stock of Mammoth-Pacific that the Issuer and the Guarantors do not own on the Closing Date or the Issuer and the Guarantors otherwise acquire control of 100% of the ownership interest of the Mammoth Plant, and (vi) a Deed of Trust, Assignment of Rents, Security Agreement and Fixture Filing, or the equivalents thereof, to be executed by the Issuer or a Subsidiary of the Issuer that acquires a Qualified Project.

"Default" means an event or condition that, with the giving of notice or lapse of time, or any combination thereof, would become an Event of Default.

"Delay Liquidated Damages" means amounts to be paid by the Contractor pursuant to Section 11.1 of the Galena Re-powering Contract.

-7-

Page 8

"Depository Agent" means Union Bank of California, N.A., as Depository under the Depository Agreement, together with its successors and assigns.

"Depository Agreement" means the Deposit and Disbursement Agreement, dated as of the Closing Date, among the Issuer, each of the Issuer's Subsidiaries (other than Ormesa prior to the Ormesa Support Date), the Collateral Agent, the Depository and the Securities Intermediary.

"Depository" means, with respect to the Senior Secured Notes issuable or issued in whole or in part in global form, DTC, and any and all successors thereto appointed as depository hereunder and having become such pursuant to the applicable provision of this Indenture.

"Desert Peak 1 Plant" means the geothermal generating plant located in Churchill County, Nevada, owned by Brady and providing, as of the Closing Date, net generating capacity of 6.1 MW.

"Desert Peak Sublease" means that certain sublease, dated as of or before the Closing Date, between Brady and Western States Geothermal Company.

"Distribution Account" means the account of such name created under the Depository Agreement.

"Distribution Conditions" has the meaning set forth in Section 3.8(b) of the Depository Agreement.

"Distribution Date" means any Business Day on or within 60 days after a Scheduled Payment Date, on which the Issuer may make a Restricted Payment in accordance with the terms of this Indenture.

"Distribution Suspense Account" means the account of such name created under the Depository Agreement.

"Dollars" and "\$" means lawful money of the United States.

"DTC" means The Depository Trust Company.

"Eligible Letter of Credit Provider" means a U.S. commercial bank(s) or financial institution(s) or a U.S. branch of a foreign commercial bank(s) or financial institution(s) with an investment grade rating (provided that any such rating shall not be based solely on such bank's or financial institution's foreign currency rating at such time).

"Eminent Domain Proceeds" means all amounts and proceeds (including instruments) received by the Issuer or any Guarantor in respect of any Event of Eminent Domain.

-8-

Page 9

"Energy Services Agreement" means that certain Energy Services Agreement, dated February 11, 2003, between Imperial Irrigation District and Ormesa.

"Euroclear" means Euroclear Bank S.A./N.V., as operator of the Euroclear system.

"ERISA" means the U.S. Employee Retirement Income Security Act of 1974, as amended.

"Event of Abandonment" means, with respect to a Plant, the suspension or cessation for a period of at least 120 consecutive days of all or substantially all of the operational and maintenance activities at such Plant; provided, however, that any such suspension or cessation that arises from an Event of Loss, a requirement of law, an event of force majeure, curtailment or failure to be dispatched, or other bona fide business reasons shall not constitute an Event of Abandonment, in each case, so long as the Issuer or the Issuer's applicable Subsidiaries are taking commercially reasonable actions to overcome or mitigate the effects of the cause of suspension or cessation so that maintenance and/or operations, as the case may be, can be resumed. Any period of cessation or suspension shall end on the date that operation and maintenance activities of a substantial nature are resumed.

"Event of Default" means the occurrence of any of the events set forth under Section 5.01 hereof.

"Event of Eminent Domain" means any compulsory transfer or taking or transfer under threat of compulsory transfer or taking of any material part of the Collateral or a Project by any Governmental Authority.

"Event of Loss" means an event which causes all or a portion of the Project to be damaged, destroyed or rendered unfit for normal use for any reason whatsoever, other than an Event of Eminent Domain or a Title Event.

"Exchange Act" means the U.S. Securities Exchange Act of 1934, as amended.

"Exchange Notes" means (i) the 8 1/4% Senior Secured Notes due 2020, registered under the Securities Act, issued pursuant to this Indenture in connection with an Exchange Offer pursuant to the Registration Rights Agreement and (ii) Additional Notes, if any, issued pursuant to a registration statement filed with the SEC under the Securities Act.

"Exchange Offer" means the exchange and issuance by the Issuer, pursuant to the Registration Rights Agreement, of a principal amount of Exchange Notes (which will be registered pursuant to the Exchange Offer Registration Statement) equal to the outstanding principal amount of Initial

Notes or Additional Notes, as the case may be, tendered by Holders thereof in connection with such exchange and issuance.

-9-

Page 10

"Exchange Offer Registration Statement" has the meaning set forth in the Registration Rights Agreement.

"Federal Funds Rate" means, for any period, a fluctuating interest rate per annum equal for each day during such period to the weighted average of the rates on overnight federal fund transactions with members of the Federal Reserve System arranged by federal funds brokers, as published for such day (or, if such day is not a Business Day, for the next preceding Business Day) by the Federal Reserve Bank of New York or, if such rate is not so published for any day that is a Business Day, the average of the quotations for such day on such transactions received by the issuing bank from three federal funds brokers of recognized standing selected by it.

"FERC" means the Federal Energy Regulatory Commission and any successor agency thereto.

"Final Acceptance" means, in connection with the Galena Re-powering, that the Contractor has (i) satisfied or is deemed to have satisfied all of the requirements for Final Acceptance set forth in Section 7.1 of the Galena Re-powering Contract, and (ii) delivered to ORNI 7 the final waivers and releases of Liens.

"Final Acceptance Date" means, in connection with the Galena Re-powering Contract, the date upon which the Contractor has achieved Final Acceptance.

"Final Completion" means, with respect to the Galena Re-powering, that both (a) Final Acceptance has occurred, as certified by the Issuer and concurred with by the Independent Engineer and (b) that Commercial Operation has occurred, as certified by the Issuer and confirmed by the Galena Power Purchaser.

"Final Completion Date" means, with respect to the Galena Re-powering, the date upon which both (a) Final Acceptance has occurred, as certified by the Issuer and concurred with by the Independent Engineer and (b) Commercial Operation has occurred, as certified by the Issuer and confirmed by the Galena Power Purchaser.

"Final Maturity Date" means the latest stated maturity date of any of the Senior Secured Notes.

"Financing Documents" means the Senior Secured Notes, the Guarantees (including those issued pursuant to the Exchange Offer, if and when issued), this Indenture, the Security Documents, the Note Purchase Agreement, the Registration Rights Agreement, the Exchange Notes, the Letters of Credit and any other credit or security agreement executed by a Financing Entity in respect of a Project.

"Financing Entity" means the Issuer, the Guarantors and Ormat Nevada.

-10-

Page 11

"Fleetwood Geothermal Resources Sublease" means that certain Geothermal Resources Sublease, dated May 31, 1991, between Steamboat Development, as subtenant, and Fleetwood Corporation, as sublandlord, as amended

by the amendment dated June 11, 1991.

"Fluid Supply Agreement" means that certain Fluid Supply Agreement, dated December 15, 2003, between Brady and Western States Geothermal Company.

"FPA" means the Federal Power Act, as amended.

"GAAP" means generally accepted accounting principles set forth in the opinions and pronouncements of the Accounting Principles Board of the American Institute of Certified Public Accountants and statements and pronouncements of the Financial Accounting Standards Board or in such other statements by such other entity as have been approved by a significant segment of the accounting profession, which are in effect as of the relevant date of determination.

"Galena Power Purchaser" means the party purchasing power from Steamboat Geothermal under the Galena Power Purchase Agreement.

"Galena Power Purchase Agreement" means a power purchase agreement between ORNI 7 and either Sierra Pacific Power Company or Nevada Power Company, providing for a price of not less than \$.052 kWh (escalating by one percent (1%) on an annual basis) and containing terms no less favorable than those set forth under "Description of Our Principal Contracts -- Steamboat Complex -- Galena Re-powering Documents -- Galena Power Purchase Agreement," in the Offering Memorandum, including without limitation, the obligation of ORNI 7 to deliver electrical energy in the amounts consistent with an expected generation based on a nominal net capacity of 18 MW.

"Galena Re-powering" means the upgrading of the Steamboat Geothermal Plant with the intent to achieve a minimum net electrical output of 18 MW through the replacement of certain equipment at the Steamboat Geothermal Plant and the possible addition of geothermal resources from the Steamboat Development Plant.

"Galena Re-powering Account" means the account of such name created under the Depositary Agreement.

"Galena Re-powering Contract" means the Engineering, Procurement and Galena Re-powering Contract dated as of the Closing Date between the Contractor and ORNI 7.

"Galena Re-powering Letter of Credit" means an Acceptable Letter of Credit having, at all times while such letter of credit is in effect, an amount available to be drawn that, when added to that amount then on deposit in the Galena Re-powering Account, is not less than the Galena Re-powering Requirement at such time.

-11-

Page 12

"Galena Re-powering Performance Redemption" has the meaning set forth in Section 3.08(d) of this Indenture.

"Galena Re-powering Requirement" means \$19,400,000, or if amounts have been previously withdrawn from the Galena Re-powering Account pursuant to the Depositary Agreement the greater of an amount equal to (i) \$19,400,000 less the sum of the amounts that have been previously withdrawn from the Galena Re-powering Account and (ii) the remaining amount the Independent Engineer certifies is necessary to achieve the Final Completion Date with respect to the Galena Re-powering; provided, however, that if additional amounts are required to be deposited within the Galena Re-powering Account as a result of this clause (ii), the Issuer shall be permitted to transfer amounts from the Distribution Suspense Account into the Galena Re-powering Account in order to satisfy such requirement.

"Geothermal Consultant" means Geothermex, Inc. or another widely recognized independent geothermal engineering firm retained by the Issuer as Geothermal Consultant.

"Geothermal Resources Leases" means the Sierra Pacific Geothermal Resources Lease, the Guisti Geothermal Resources Lease, the Fleetwood Geothermal Resources Sublease, the Magma Geothermal Resources Lease, the Mammoth-BLM Geothermal Resources Lease CA 11667, the Mammoth-BLM Geothermal Resources Lease CA 14408, the Ormesa-BLM Geothermal Resources Lease CA 964, the Ormesa-BLM Geothermal Resources Lease CA 966, the Ormesa-BLM Geothermal Resources Lease CA 1903, the Ormesa-BLM Geothermal Resources Lease CA 6217, the Ormesa-BLM Geothermal Resources Lease CA 6218, the Ormesa-BLM Geothermal Resources Lease CA 6219, the Ormesa-BLM Geothermal Resources Lease CA 17568, the Railway Geothermal Resources Lease, the ConAgra Lease, the Brady-BLM Geothermal Resources Lease N-10922, the Brady-BLM Geothermal Resources Lease N-46566, the Brady-BLM Geothermal Resources Lease N-40353, and the Brady-BLM Geothermal Resources Lease N-40355.

"G1 Power Purchase Agreement" means that certain Amended and Restated Power Purchase and Sales Agreement, dated December 2, 1986, between Mammoth-Pacific and Southern California Edison, as amended by that certain Amendment No. 1 to the Amended and Restated Power Purchase and Sales Agreement, dated May 18, 1990.

"G2 Interconnection Facilities Agreement" means that certain Interconnection Facilities Agreement, attached to that certain Amendment No. 1 - Power Purchase Contract as Appendix A, dated October 27, 1989, between Mammoth-Pacific and Southern California Edison.

"G2 Power Purchase Agreement" means that certain Power Purchase Contract, dated April 15, 1985, between Mammoth-Pacific and Southern California Edison, as amended by that certain Amendment No. 1 - Power Purchase Contract, dated October 27, 1989, and as amended further by that certain Amendment No. 2 - Power Purchase Contract, dated December 20, 1989.

-12-

Page 13

"G3 Interconnection Facilities Agreement" means that certain Interconnection Facilities Agreement, dated October 27, 1989, between Mammoth-Pacific and Southern California Edison.

"G3 Power Purchase Agreement" means that certain Power Purchase Contract, dated April 16, 1985, between Mammoth-Pacific (as successor to Santa Fe Geothermal, Inc.), and Southern California Edison, as amended by that certain Amendment No. 1 to the Power Purchase Contract, dated October 27, 1989, between Mammoth-Pacific and Southern California Edison and as amended further by that certain Amendment No. 2 - Power Purchase Contract, dated December 20, 1989.

"Global Note Legend" means the legend set forth in Exhibit A-1/A-2 hereto.

"Global Notes" shall mean a Senior Secured Note that evidences all or part of the Senior Secured Notes and bears the appropriate legend set forth in Exhibit A-1/A-2 (or such legend as may be contemplated by Section 2.02 for such Senior Secured Notes).

"Government Securities" means direct obligations of, or obligations guaranteed by, the United States of America, and the payment for which the United States pledges its full faith and credit.

"Governmental Approvals" means all governmental approvals,

authorizations, consents, decrees, permits, waivers, privileges and filings with or from all Governmental Authorities required to be obtained or made for the ownership, construction, operation and maintenance of a Project.

"Governmental Authority" means the government of any federal, state, municipal or other political subdivision in which the Projects are located, and any other government or political subdivision thereof exercising jurisdiction over the Projects or any of their assets or any party to any of the Project Documents, including all agencies and instrumentalities of such governments and political subdivisions.

"Guarantee" means each guarantee by a Guarantor of the Issuer's obligations under the Financing Documents pursuant to Article IX or another writing pursuant to which a Guarantor agrees to be bound by the terms applicable to Guarantors set forth in Article IX.

"Guarantor" means (i) each of Brady, Steamboat Development, Steamboat Geothermal, OrMammoth, the ORNI Entities and their respective successors and assigns and (ii) from and after the date of such execution, any of the Issuer's other direct or indirect Subsidiaries that execute a Guarantee (including without limitation, in connection with the acquisition of a Qualified Project) in accordance with the provisions of Sections 4.30 and 4.38 of this Indenture and their respective successors and assigns.

"Guisti Geothermal Resources Lease" means that certain Geothermal Resources Lease, dated June 27, 1988 among Steamboat Development, Bernice Guisti, Judith Harvey and

-13-

Page 14

Karen Thompson, as Trustees and Beneficiaries of the Guisti Trust, as amended by that certain Amendment to Geothermal Resources Lease dated January 1992, and that certain Second Amendment to Geothermal Resources Lease dated June 25, 1993.

"Hazardous Substance" means any substance, pollutant or contaminant now or hereafter included in such (or any similar) term under any state, federal or local ordinance, statute, law or regulation now in effect or hereafter enacted or amended.

"Holder" means a Person in whose name a Senior Secured Note is registered in the register maintained pursuant to Section 2.07(a).

"IID Water Supply Agreement" means that certain Amended and Restated Water Supply Agreement, dated March 6, 1990, between Ormesa (as successor to Trigor Geothermal Corporation) and the Imperial Irrigation District.

"Indebtedness" of any Person means, at any date, without duplication:

(i) all obligations of such Person for borrowed money;

(ii) all obligations of such Person evidenced by bonds, debentures, notes or other similar instruments (excluding "deposit only" endorsements on checks payable to the order of such Person);

(iii) all obligations of such Person to pay the deferred purchase price of property or services (except accounts payable and similar obligations arising in the ordinary course of business shall not be included herein);

(iv) all obligations of such Person as lessee under capital leases to the extent required to be capitalized on the books of such Person in accordance with GAAP;

(v) all obligations of such Person under conditional sale or other title retention agreements relating to property or assets purchased by such Person;

(vi) all Indebtedness of others secured by (or for which the holder of such indebtedness has an existing right, contingent or otherwise, to be secured by) any Lien on property owned or acquired by such Person, whether or not the obligations secured thereby have been assumed;

(vii) all obligations of such Person in respect of interest rate swaps, collars or caps and other interest rate protection arrangements, foreign currency exchange agreements, commodity exchange, commodity future, commodity forward or commodity option agreements, or other interest or exchange rate or commodity hedging arrangements;

-14-

Page 15

(viii) all obligations of such Person as an account party in respect of letters of credit and bankers' acceptances; and

(ix) all obligations of others of the type referred to in clauses (i) through (viii) above guaranteed by such Person, whether or not secured by a Lien or other security interest on any asset of such Person.

"Indenture" means this Indenture, as amended or supplemented from time to time.

"Independent Consultant" means the Independent Engineer, the Insurance Consultant and the Geothermal Consultant.

"Independent Engineer" means Stone & Webster Management Consultants, Inc., or another widely recognized independent engineering firm retained as Independent Engineer by the Issuer.

"Initial Galena Re-powering Withdrawal Conditions" has the meaning set forth in Section 3.5(d) of the Depositary Agreement.

"Initial Notes" means \$190,000,000 in aggregate principal amount of 8 1/4% Senior Secured Notes due 2020 issued under this Indenture on the Closing Date.

"Initial Purchaser" means Lehman Brothers Inc.

"Insurance Consultant" means Marsh USA, Inc., or its successors; provided that such successor is another nationally recognized independent insurance consultant.

"Interconnection Agreements" means the Steamboat 1/1A Interconnection Agreement, Steamboat 2/3 Interconnection Agreement, the Mammoth Interconnection Facilities Agreements, the Ormesa Interconnection Agreements, and the Brady/Desert Peak 1 Interconnection Agreement.

"Interest Payment Date" means each June 30 and December 30 commencing June 30, 2004 and concluding on the Final Maturity Date.

"Investment Grade" means a rating of Baa3 or better by Moody's and BBB- or better by S&P (or an equivalent rating by another nationally recognized credit rating agency if one or more of such corporations are not in

the business of rating long-term obligations of commercial banks at the time of issuance); provided, that such rating is not on review for possible downgrade or on negative watch by any such agency.

"Investments" means, with respect to any Person, all direct or indirect investments by such Person in other Persons (including Affiliates) in the forms of loans (including guarantees or other obligations), advances or capital contributions (excluding commission, travel and similar advances to officers and employees made in the ordinary course

-15-

Page 16

of business), purchases or other acquisitions for consideration of Indebtedness, Capital Stock or other securities, together with all items that are or would be classified as investments on a balance sheet prepared in accordance with GAAP.

"Kilowatt" or "KW" means one thousand watts.

"Kilowatt-hours" or "kWh" means a unit of electrical energy equal to one kilowatt of energy supplied or taken from an electric circuit steadily for one hour.

"Letter of Credit" means the Debt Service Reserve Letter of Credit, the Galena Re-powering Letter of Credit or the Ormesa Repayment Letter of Credit, as the case may be.

"Letter of Transmittal" means the letter of transmittal to be prepared by the Issuer and sent to all Holders of the Initial Notes and Additional Notes for use by such Holders in connection with the Exchange Offer.

"Lien" means any mortgage, pledge, hypothecation, assignment, mandatory deposit arrangement, encumbrance, security interest, charge, lien (statutory or other), preference, priority or other collateral agency agreement of any kind or nature whatsoever which has the substantial effect of constituting a security interest, including, without limitation, any conditional sale or other title retention agreement, any financing lease having substantially the same effect as any of the foregoing and the filing of any financing statement or similar instrument under the Uniform Commercial Code or comparable law of any jurisdiction, domestic or foreign.

"Liquidated Damages" means all liquidated damages then owing pursuant to Section 5 of the Registration Rights Agreement.

"Loss Proceeds" means all proceeds from an Event of Loss received by the Issuer or any Guarantor, including, without limitation, insurance proceeds or other amounts actually received, except proceeds of business interruption insurance.

"Magma Geothermal Resources Lease" means that certain Geothermal Lease, dated August 31, 1983, between Mammoth-Pacific and Magma Power Company, as amended by amendments dated April 30, 1987, January 1, 1990, and April 12, 1991.

"Make-Whole Premium" means a premium equal to the excess, if any, of (a) the present value of all scheduled principal and interest payments on all Senior Secured Notes to be redeemed (discounted at a rate equal to the yield to maturity of U.S. Treasury securities having an average life equal to the Remaining Average Life of the Senior Secured Notes, plus 50 basis points) over (b) the principal amount of the Senior Secured Notes to be redeemed.

"Mammoth-BLM Geothermal Resources Lease CA 11667" means that

certain Geothermal Resources Lease CA 11667, dated March 1, 1982, between Mammoth-Pacific and the United States of America through the Bureau of Land Management of the Department of the Interior.

-16-

Page 17

"Mammoth-BLM Geothermal Resources Lease CA 14408" means that certain lease for Geothermal Resources CA 14408, dated February 1, 1985, between Mammoth-Pacific and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Mammoth-BLM Site License" means that certain License for Electric Power Plant Site CA 21918, dated July 26, 1989, between Mammoth-Pacific and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Mammoth Enhancement" means the investment in additional equipment and other enhancements at the Mammoth Project that are designed to increase output at the Mammoth Plant by 3.6 MW.

"Mammoth Enhancement Redemption" has the meaning set forth in Section 3.08(e) of this Indenture.

"Mammoth Interconnection Facilities Agreements" means the G2 Interconnection Facilities Agreement and the G3 Interconnection Facilities Agreement.

"Mammoth Operation and Maintenance Agreement" means that certain Plant Operating Services Agreement, dated January 1, 1995, between Ormat Nevada (as successor to Pacific Power Plant Operations) and Mammoth-Pacific.

"Mammoth-Pacific" means Mammoth-Pacific, L.P. (California), a California limited partnership.

"Mammoth-Pacific LP Agreement" means that certain Amended and Restated Agreement of Limited Partnership of Mammoth-Pacific dated January 26, 1990, among CD Mammoth Lakes I, Inc., CD Mammoth Lakes II, Inc. and OrMammoth, as amended by the amendment dated June 13, 1995.

"Mammoth Plant" means the three geothermal power generating plants, denominated the G1, G2 and G3 plants located in Mammoth Lakes, California that are owned by Mammoth-Pacific (and in which OrMammoth has a 50% partnership interest) and having a gross generating capacity of 35 MW.

"Mammoth Power Purchase Agreements" means the G1 Power Purchase Agreement, the G2 Power Purchase Agreement and the G3 Power Purchase Agreement.

"Material Adverse Effect" means a material adverse effect on (i) the Issuer's or any of the Issuer's Subsidiaries' results of operations or financial condition (taken as a whole), (ii) the validity or priority of the Liens on the Collateral or Guarantees, (iii) the Issuer's or any of the Issuer's Subsidiaries' ability (taken as a whole) to observe and perform any of the Issuer's or any of the Issuer's Subsidiaries' material obligations under the Transaction Documents to which the Issuer or any of the Issuer's Subsidiaries is a party or (iv) the ability of the

-17-

Page 18

Trustee or the Collateral Agent to enforce any of the payment or other material obligations of the Issuer, any Guarantor or Ormat Nevada under the Financing Documents to which the Issuer, the Guarantors or Ormat Nevada are parties, as the case may be.

"Material Project Documents" means the Power Purchase Agreements, the Operation and Maintenance Agreements, the Interconnection Agreements, the Geothermal Resources Leases, the Site Licenses, the Mammoth-Pacific LP Agreement, the IID Water Supply Agreement, the Fluid Supply Agreement, the Desert Peak Sublease, the Brady Settlement Agreement, the Galena Re-powering Contract and any Additional Project Document.

"Megawatt" or "MW" means one million watts.

"Megawatt-hours" or "MWh" means one thousand KWh.

"Meyburg Geothermal Resources Lease" means that certain Geothermal Resources Lease, between ORNI 7, as lessee, and ORNI 6, as lessor.

"Moody's" means Moody's Investors Service, Inc., a corporation organized and existing under the laws of the State of Delaware, its successors and assigns.

"Net Available Amount" means, with respect to any proceeds, such proceeds net of the related Collection Expenses.

"Note Purchase Agreement" means the Note Purchase Agreement among the Issuer, the Guarantors and the Initial Purchaser for the sale and purchase of the Senior Secured Notes.

"Offering" means the offering of the Senior Secured Notes described herein.

"Offering Memorandum" means that certain offering memorandum dated February 6, 2004, relating to the offer of the Senior Secured Notes for sale.

"Officer's Certificate" means a certificate signed by the Issuer's Authorized Representative.

"OG I Plant Connection Agreement" means that certain Plant Connection Agreement for the Ormesa Geothermal Plant, dated October 1, 1985, between Ormesa (as successor to Ormesa Geothermal) and the Imperial Irrigation District.

"OG I Power Purchase Agreement" means that certain Power Purchase Contract, dated July 18, 1984, between Ormesa (as successor to Republic Geothermal, Inc.) and Southern California Edison, as amended by that certain Amendment No. 1 to the Power Purchase Contract, dated December 23, 1988, between Ormesa (as successor to Ormesa Geothermal) and Southern California Edison.

-18-

Page 19

"OG I Transmission Service Agreement" means that certain Transmission Service Agreement for the Ormesa I, Ormesa IE and Ormesa IH Geothermal Power Plants, dated October 3, 1989, between Ormesa (as successor to Ormesa Geothermal) and the Imperial Irrigation District.

"OG IE Plant Connection Agreement" means that certain Plant Connection Agreement for the Ormesa IE Geothermal Power Plant, dated October 21, 1988, between Ormesa (as successor to Ormesa IE) and the Imperial Irrigation District.

"OG IH Plant Connection Agreement" means that certain Plant Connection Agreement for the Ormesa IH Geothermal Power Plant, dated October 3, 1989, between Ormesa (as successor to Ormesa IH) and the Imperial Irrigation District.

"OG II Plant Connection Agreement" means that certain Plant Connection Agreement for the Ormesa Geothermal Plant No. 2, dated May 26, 1987, between Ormesa (as successor to Ormesa Geothermal II) and the Imperial Irrigation District.

"OG II Power Purchase Agreement" means that certain Power Purchase Contract, dated June 13, 1984, between Ormesa (as successor to Ormat Systems Inc.) and Southern California Edison.

"OG II Transmission Service Agreement" means that certain Transmission Service Agreement for the Ormesa II Geothermal Power Plant, dated August 25, 1987, between Ormesa (as successor to Ormesa Geothermal II) and the Imperial Irrigation District.

"Operating and Maintenance Expenses" means, for any period, all amounts disbursed by or on behalf of the Issuer or any Subsidiary of the Issuer in such period for operation, maintenance, administration, repair (other than repair done in response to a casualty event), or improvement of a Project, including, without limitation, premiums on insurance policies, property and other taxes, litigation expenses and costs, payments under leases, royalty and other land use agreements, and fees, expenses, and any other payments required under the Project Documents; provided, "Operating and Maintenance Expenses" shall not include (i) any payment made in respect of the Financing Documents or with respect to any Indebtedness, (ii) any payment or dividends or other distributions to Ormat Nevada or any of the Issuer's other Affiliates other than payments under Project Documents, (iii) any tax paid or payable by any of the Issuer's direct or indirect equity owners with respect to the Issuer's income or receipts or (iv) any amounts for construction related to the Galena Re-powering.

"Operating Budget" means the annual budget of Operating and Maintenance Expenses for the Projects, as prepared in good faith by the Issuer for each fiscal year, or part thereof, of the Issuer, showing such costs by category and, where applicable, by Project.

"Operating Subsidiaries" means all of the Issuer's Subsidiaries other than OrMammoth unless OrMammoth purchases the partnership interests of Mammoth-Pacific it does not currently own.

-19-

Page 20

"Operation and Maintenance Agreements" means the Steamboat Complex Operation and Maintenance Agreement, the Mammoth Operation and Maintenance Agreement, the Ormesa Operation and Maintenance Agreement, and the Brady Operation and Maintenance Agreement.

"Opinion of Counsel" means an opinion from legal counsel who is reasonably acceptable to the Trustee, that meets the requirements of Section 10.05 hereof. The counsel may be an employee of or counsel to the Issuer, any Affiliate of the Issuer or the Trustee.

"Organizational Documents" means as to any Person, the articles of incorporation, by laws, partnership agreement, limited liability company agreement, operating agreement or other organizational or governing documents of such Person.

"OrMammoth" means OrMammoth Inc., a Delaware corporation.

"Ormat Nevada" means Ormat Nevada Inc., a Delaware corporation.

"Ormat Nevada Subordinated Loan" means a subordinated Credit Agreement between the Issuer and Ormat Nevada that constitutes Subordinated Debt.

"Ormat Technologies" means Ormat Technologies, Inc., a Delaware corporation.

"Ormesa" means Ormesa LLC, a Delaware limited liability company.

"Ormesa-BLM Geothermal Resources Lease CA 964" means the Geothermal Resources Lease CA 964, dated September 1, 1974, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Geothermal Resources Lease CA 966" means the Geothermal Resources Lease CA 966, dated August 1, 1974, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Geothermal Resources Lease CA 1903" means the Geothermal Resources Lease CA 1903, dated September 1, 1974, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Geothermal Resources Lease CA 6217" means the Geothermal Resources Lease CA 6217, dated July 1, 1979, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Geothermal Resources Lease CA 6218" means the Geothermal Resources Lease CA 6218, dated July 1, 1979, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

-20-

Page 21

"Ormesa-BLM Geothermal Resources Lease CA 6219" means the Geothermal Resources Lease CA 6219, dated July 1, 1979, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Geothermal Resources Lease CA 17568" means the Geothermal Resources Lease CA 17568, dated July 1, 1979, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Site License CA 17129" means that certain License for Electric Power Plant Site CA 17129, dated August 21, 1985, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Site License CA 20172" means that certain License for Electric Power Plant Site CA 20172, dated July 21, 1987, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Site License CA 22079" means that certain License for Electric Power Plant Site CA 22079, dated July 24, 1989, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Site License CA 22405" means that certain License for Electric Power Plant Site CA 22405, dated June 7, 1988, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa-BLM Site License CA 24678" means that certain License for Electric Power Plant Site CA 24678, dated September 18, 1989, between Ormesa and the United States of America through the Bureau of Land Management of the Department of the Interior.

"Ormesa Credit Agreement" means the Credit Agreement dated December 31, 2002 among Ormesa, United Capital as Administrative Agent and Collateral Agent, and the lenders party thereto from time to time.

"Ormesa Interconnection Agreements" means the Consolidated OG I Plant Connection Agreements, the OG I Transmission Service Agreement, the OG II Plant Connection Agreement and the OG II Transmission Service Agreement.

"Ormesa Loan Repayment Account" means the account of such name created under the Depositary Agreement.

"Ormesa Operation and Maintenance Agreement" means that certain Operation and Maintenance Agreement, dated April 15, 2002, between Ormesa and Ormat Nevada.

"Ormesa Plant" means the six geothermal power generating plants located in East Mesa, Imperial Valley, California, owned by Ormesa and having a gross generating capacity of 94 MW.

-21-

Page 22

"Ormesa Power Purchase Agreements" means the OG I Power Purchase Agreement and the OG II Power Purchase Agreement.

"Ormesa Repayment Letter of Credit" means an Acceptable Letter of Credit having, at all times such letter of credit is in effect, an amount available to be drawn that, when added to the amount of cash then on deposit in the Ormesa Loan Repayment Account, is in an amount not less than the Ormesa Repayment Requirement.

"Ormesa Repayment Requirement" means an amount equal to \$15,500,000, which is equal to the aggregate principal amount outstanding under the Ormesa Credit Agreement on the Closing Date less cash on deposit in the "debt service reserve account" under the Ormesa Credit Agreement and amounts actually repaid under the Ormesa Credit Agreement in 2004; provided, however, that with respect to the aggregate principal amount paid on September 30, 2004, such amount shall not be reduced to an amount less than 102% of the remaining aggregate principal amount outstanding under the Ormesa Credit Agreement less cash on deposit in the "debt service reserve account" under the Ormesa Credit Agreement on such date.

"Ormesa Support Date" means the earliest to occur of (i) January 31, 2005; (ii) any other date as of which the amount payable in respect of the Ormesa Credit Agreement has been paid in full; and (iii) any other date as of which Ormesa is no longer prohibited from granting liens pursuant to the Ormesa Credit Agreement.

"ORNI 6" means ORNI 6 LLC, a Delaware limited liability company.

"ORNI 7" means ORNI 7 LLC, a Delaware limited liability company.

"ORNI Entities" means ORNI 1 LLC, a Delaware limited liability company, ORNI 2 LLC, a Delaware limited liability company and ORNI 7.

"Outstanding" in connection with the Senior Secured Notes, means, as of the time in question, all Senior Secured Notes authenticated and delivered under this Indenture, except (i) Senior Secured Notes theretofore canceled or required to be canceled under this Indenture; (ii) Senior Secured Notes for which provision for payment shall have been made in accordance with this Indenture; and (iii) Senior Secured Notes in substitution for which other Senior Secured Notes have been authenticated and delivered pursuant to this Indenture.

"Overdue Principal" shall mean, as of any Payment Date, all principal of any Senior Secured Note which has become due and payable and not been punctually paid or duly provided for when and as due and payable, whether as a result of insufficient available funds or otherwise.

"Paying Agent" has the meaning set forth in Section 2.07(a) of this Indenture.

"Payment Date" means any Interest Payment Date or Principal Payment Date.

-22-

Page 23

"Performance Guarantee Tests" means the performance tests conducted in accordance with the Galena Re-powering Contract to demonstrate and verify that the Steamboat Geothermal Facility has satisfied the Performance Guarantees and certain other performance criteria.

"Performance Guarantees" has the meaning given in the Galena Re-powering Contract.

"Performance Liquidated Damages" means the liquidated damages payable by the Contractor to Steamboat Geothermal pursuant to the Galena Re-powering Contract as a consequence of the failure of the Steamboat Geothermal Facility to meet certain of the Performance Guarantees.

"Permitted Additional Senior Lender" means a holder of any Senior Secured Obligations other than the Senior Secured Notes.

"Permitted Indebtedness" has the meaning set forth in Section 4.18 of this Indenture.

"Permitted Investments" means an investment in any of the following: (i) direct obligations of the Department of the Treasury of the United States of America; (ii) obligations of any federal agencies which obligations are backed by the full faith and credit of the United States of America; (iii) commercial paper rated in any one of the two highest rating categories by Moody's or S&P; (iv) investment agreements with banks (foreign and domestic), broker/dealers, and other financial institutions rated at the time of bid in any one of the three highest rating categories by Moody's and S&P; (v) repurchase agreements with banks (foreign and domestic), broker/dealers, and other financial institutions rated at the time of bid in any one of the three highest rating categories by Moody's and S&P, provided, that (1) collateral is limited to the securities specified in clauses (i) and (ii) above, (2) the margin levels for collateral must be maintained at a minimum of 102% including

principal and interest, (3) the Collateral Agent shall have a first priority perfected security interest in the collateral, (4) the collateral will be delivered to a third party custodian, designated by the Issuer, acting for the benefit of the Collateral Agent and all fees and expenses related to collateral custody will be the responsibility of the Issuer, (5) the collateral must have been or will be acquired at the market price and marked to market weekly and collateral level shortfalls cured within 24 hours and (6) unlimited right of substitution of collateral is allowed provided that substitution collateral must be permitted collateral substituted at a current market price and substitution fees of the custodian shall be paid by the Issuer; (vi) forward purchase agreements delivering securities specified in clauses (i) and (iii) above with banks (foreign and domestic), broker/dealers, and other financial institutions maintaining a long-term rating on the day of bid no lower than investment grade by both S&P and Moody's (such rating may be at either the parent or subsidiary level); and (vii) money market funds rated "AAAm" or "AAAm-G" or better by S&P.

-23-

Page 24

"Permitted Liens" means (a) the rights and interests of the Collateral Agent and any other Secured Party as provided in the Financing Documents; (b) Liens for any tax, either secured by a bond or other reasonable security or not yet due or being contested in good faith and by appropriate proceedings, so long as (i) such proceedings shall not involve any substantial danger of the sale, forfeiture or loss of the Projects, the sites of the Project or any easements, as the case may be, title thereto or any interest therein and shall not interfere in any material respect with the use of any Project, any Project sites or any easements, (ii) a bond or other reasonable security has been posted or provided in such manner and amount as to assure that any taxes determined to be due will be promptly paid in full when such contest is determined or (iii) adequate reserves have been provided therefor to the extent required by and in accordance with GAAP; (c) materialmen's, mechanics', workers', repairmen's, employees' or other like Liens, arising in the ordinary course of business or in connection with the development, construction, operation and/or maintenance of any Project, either for amounts not yet due or for amounts being contested in good faith and by appropriate proceedings so long as (i) the Issuer reasonably determines that such proceedings shall not involve any substantial danger of the sale, forfeiture or loss of any Project, any Project sites or any easements, as the case may be, title thereto or any interest therein and shall not interfere in any material respect with the use or disposition of any Project, any Project sites or any easements, or (ii) a bond or adequate cash reserves have been provided therefor to the extent required by and in accordance with GAAP; (d) Liens arising out of judgments or awards so long as enforcement of such Lien has been stayed and an appeal or proceeding for review is being prosecuted in good faith and for the payment of which adequate reserves, bonds or other reasonable security have been provided or are fully covered by insurance; (e) title exceptions as reflected in the Title Policies other than delinquent taxes and monetary liens which are to be paid on the Closing Date; (f) Liens, deposits or pledges to secure statutory obligations; (g) Liens, deposits or pledges to secure performance of bids, tenders, contracts (other than for the repayment of borrowed money) or leases, or for purposes of like general nature in the ordinary course of its business, not to exceed \$5 million in the aggregate at any time, and with any such Lien to be released as promptly as practicable; (h) other Liens incident to the ordinary course of business that are not incurred in connection with the obtaining of any loan, advance or credit and that do not in the aggregate materially impair the use of the Issuer's or the Issuer's Subsidiaries' property or assets or the value of such property or assets for the purposes of such business; (i) involuntary Liens as contemplated by the Financing Documents and the Project Documents (including a lien of an attachment or execution) securing a charge or obligation on any of the Issuer's property, either real or personal, whether now or hereafter owned, in the aggregate sum of less than \$3 million; (j) until the Ormesa Support Date, the Liens in favor of the lenders under the Ormesa Credit Agreement; and (k) servitudes, easements, rights-of-way, restrictions, minor defects or

irregularities in title and such other encumbrances or charges against real property or interests therein as of a nature generally existing with respect to properties of similar character and which do not in a material way interfere with the value or use thereof or the Issuer's business.

"Person" means any individual, sole proprietorship, corporation, partnership, joint venture, limited liability partnership, limited liability company, trust, unincorporated association, institution, Governmental Authority or any other entity.

-24-

Page 25

"Place of Payment" when used with respect to the Senior Secured Notes, shall mean the office or agency maintained pursuant to Section 4.02.

"Plants" means the Brady Plant, the Ormesa Plant, the Steamboat Geothermal Plant, the Steamboat Development Plant, the Mammoth Plant and geothermal power generating facilities acquired after the Closing Date that constitute Qualified Projects.

"Pledge and Security Agreements" means each of the Pledge and Security Agreements, to be executed by the Issuer, each of the Guarantors and the Collateral Agent.

"Power Purchase Agreements" means the Steamboat 1 Plant Power Purchase Agreement, the Steamboat 1A Plant Power Purchase Agreement, the Steamboat 2/3 Project Power Purchase Agreements, the Galena Power Purchase Agreement, the Mammoth Power Purchase Agreements, the Ormesa Power Purchase Agreements, the Brady Project Power Purchase Agreement and any power purchase agreements relating to a Qualified Project at the time such Qualified Project is acquired by the Issuer or a Guarantor.

"Predecessor Notes" with respect to any particular Senior Secured Note, shall mean any previous Senior Secured Note evidencing all or a portion of the same debt as that evidenced by such particular Senior Secured Note; for the purposes of this definition, any Senior Secured Note authenticated and delivered pursuant to Section 2.08 in lieu of a lost, destroyed or stolen Senior Secured Note shall be deemed to evidence the same debt as the lost, destroyed or stolen Senior Secured Note.

"Principal Payment Date" when used with respect to any Senior Secured Obligations means the date on which all or a portion of the principal of such Senior Secured Obligations become due and payable as provided in this Indenture or any other agreement governing such Senior Secured Obligations, whether on a scheduled date for payment of principal, on a Redemption Date, the Final Maturity Date, a date of declaration of acceleration, or otherwise.

"Private Placement Legend" means the legend referenced in Section 2.02 to be placed on all Senior Secured Notes issued under this Indenture except where otherwise permitted by the provisions of this Indenture.

"Project" means each Plant together with the related Project Documents, governmental approvals relating to the Plant or Project Documents, and any other item relating to the Plant, including any improvements to, and the operation of the Plant and all activities related thereto.

"Project Costs" means, with respect to the Galena Re-powering, without duplication, all costs and expenses paid, incurred or to be incurred by Steamboat Geothermal to complete the development, design, engineering, acquisition, construction, assembly, inspection, testing, completion and start-up of the Galena Re-powering in the manner contemplated under the Galena Re-powering Contract, including, without limitation, (i) Operating and

Expenses of the Galena Re-powering prior to Final Acceptance, (ii) amounts payable in respect of options for, or the granting of, necessary easements, (iii) amounts payable in respect of obtaining or maintaining Governmental Approvals, and (iv) amounts payable in respect of acquiring initial spare parts.

"Project Documents" means the Material Project Documents and any additional agreements relating to the Projects.

"Projections" means certain projections at the Closing Date of the Projects' revenues and the costs associated therewith including certain assumptions by the Issuer.

"Prudent Industry Practices" shall mean, at a particular time, (i) any of the practices, methods and acts engaged in or approved by a significant portion of the electricity generating industry operating in the United States at such time, or (ii) with respect to any matter to which clause (i) does not apply, any of the practices, methods and acts which, in the exercise of reasonable judgment at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. "Prudent Industry Practice" is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather to be a spectrum of possible practices, methods or acts having due regard for, among other things, manufacturers' warranties and the requirements of any Governmental Authority of competent jurisdiction.

"PUHCA" means the Public Utility Holding Company Act of 1935, as amended.

"Punch List Items" means those items which must be completed by the Contractor under the Galena Re-powering Contract after achieving the Final Acceptance Date, performance of which will not interrupt, disrupt or interfere to any significant extent with the operation of the Steamboat Geothermal Facility.

"QIB means a "qualified institutional buyer" as defined in Rule 144A.

"Qualified Project" means a (a) a fully constructed and operational geothermal power plant located within the United States of America (other than the Mammoth Project), (b) as to which electricity will be sold under long-term power purchase agreements that have been approved by the applicable public utility commission or similar governmental body with a counterparty that has a long-term issuer rating of not less than BBB- by S&P and Baa3 by Moody's and (c) is acquired by the Issuer or a Guarantor and the Collateral Agent is granted a first priority pledge of all of the Capital Stock of any Guarantor that acquires such Qualified Project or the Guarantor acquiring such Qualified Project provides a first priority lien with respect to collateral with respect to such Qualified Project that is consistent with that set forth under the second paragraph of "Description of the Notes--Security" in the Offering Memorandum.

"Qualifying Facility" means a facility which is a qualifying facility within the meaning of the Public Utility Regulatory Policies Act of 1978 (and all rules and regulations

adopted thereunder) and which meets the criteria defined in Title 18, Code of Federal Regulations, Sections 292.201 through 292.207.

"Quarterly Period" means each calendar quarter; provided, however, that the first Quarterly Period shall commence on the Closing Date and shall end on March 31, 2004.

"Railway Geothermal Resources Lease" means that certain Geothermal Resource Lease (SPL-6292), dated October 10, 1984, between Brady, as tenant, and The Burlington Northern and Santa Fe Railway Company, as landlord, as amended by the amendment dated December 5, 1991.

"Redemption Account" means the account of such name created under the Depositary Agreement.

"Redemption Date" means the date on which the Issuer redeems or shall redeem any Senior Secured Notes in accordance with this Indenture.

"Registrar" has the meaning specified in Section 2.07(a).

"Registration Default" has the meaning set forth in Section 5 of the Registration Rights Agreement.

"Registration Rights Agreement" means the Registration Rights Agreement, dated as of the Closing Date, by and among the Issuer and the Guarantors and the other parties named on the signature pages thereof, as such agreement may be amended, modified or supplemented from time to time and, with respect to any Additional Notes, one or more registration rights agreements among the Issuer and the Guarantors and the other parties thereto, as such agreements may be amended, modified or supplemented from time to time, relating to rights given by the Issuer to the purchasers of Additional Notes to register such Additional Notes under the Securities Act.

"Regular Record Date" for the interest or principal payable on any Payment Date on the Senior Secured Notes means the date specified for that purpose as contemplated by Section 2.09 (whether or not a Business Day).

"Regulation S" means Regulation S under the Securities Act.

"Regulation S Global Note" means the Temporary Regulation S Global Note or the Regulation S Unrestricted Global Note, as applicable.

"Regulation S Unrestricted Global Note" has the meaning specified in Section 2.01.

"Related Party" means (a) Ormat Industries, Ltd. and Ormat Technologies, Inc., (b) any direct or indirect controlling stockholder or controlling member or a more than 50%

owned subsidiary of Ormat Nevada or (c) any trust, corporation, partnership,

limited liability company or other entity, of which the beneficiaries, stockholders, partners, members or Persons holding more than a 50% controlling interest are Ormat Nevada and/or such other Persons referred to in the immediately preceding clause (a) or (b).

"Remaining Average Life" means, with respect to any Senior Secured Note, the principal of which is to be redeemed (the "Called Principal"), the number of years (calculated to the nearest one-twelfth year) obtained by dividing (i) such Called Principal into (ii) the sum of the products obtained by multiplying (a) the principal component of each Remaining Scheduled Payment (as defined below) with respect to such Called Principal by (b) the number of years (calculated to the nearest one-twelfth year) that will elapse between the date on which such Called Principal is to be redeemed (the "Settlement Date") and the scheduled due date of such Remaining Scheduled Payment. For purposes of this definition, the term "Remaining Scheduled Payments" means, with respect to the Called Principal of any Senior Secured Note, all payments of such Called Principal and interest thereon that would be due after the Settlement Date with respect to such Called Principal if no payment of such Called Principal were made prior to its scheduled due date.

"Renewable Energy Credits" means all renewable energy credits, offsets or other benefits allocated, assigned or otherwise awarded or certified to the Issuer or any of the Issuer's Subsidiaries by any Governmental Authority in connection with any of the Projects; provided, that the foregoing shall not include any federal, state, and/or local production tax credits and/or investment tax credits specific to investments in renewable energy production and delivery facilities (if any) or any environmental credits, offsets, or other similar benefits allocated, assigned or otherwise awarded to the Issuer or any of the Issuer's Subsidiaries by any Governmental Authority or received in any other manner based in whole or in part on the fact that any of the Projects constitutes a "renewable energy system" (as defined under any Applicable Law) or the like, including emissions credits or allowances, such as credits available because such Project does not produce carbon dioxide or other emissions when generating electric energy.

"Required Holders" means, at any time, Persons that at such time hold not less than 51% in aggregate principal amount of the Outstanding Senior Secured Notes.

"Resource Lease Consents" means (i) with respect to ORNI 1, LLC, ORNI 2, LLC, and Brady the consents of each of David P. Frase, Timothy Frase and Stacey Frase, and James W. Roberts, Trustee of the James W. Roberts Revocable Trust dated August 24, 1996 under the Grant of Easement Agreement, dated March 27, 1998; and of The Burlington Northern and Santa Fe Railway Company under the Railway Geothermal Resources Lease, and (ii) with respect to ORNI 7, LLC and Steamboat Development the consents of each of Fleetwood Corporation under the Fleetwood Geothermal Resources Lease; Dorothy A. Towne and the Trust of Dorothy A. Towne under a geothermal resources lease dated May 31, 1991; and Bernice Guisti, Judith Harvey, and Karen Thompson, Trustees and Beneficiaries of the Guisti Trust under the Guisti Geothermal Resources Lease.

-28-

Page 29

"Responsible Officer" means, with respect to knowledge of any default under this Indenture, the chief executive officer, president, chief financial officer, general counsel, principal accounting officer, treasurer, assistant treasurer, or any vice president of the Issuer, or other officer of the Issuer who in the normal performance of his or her operational duties would have knowledge of the subject matter relating to such default.

"Responsible Trust Officer" means, when used with respect to the Trustee, the Depositary or the Collateral Agent, any officer within the Corporate Trust Office of the Trustee, the Depositary or the Collateral Agent

(or any successor group of the Trustee, Depositary or Collateral Agent, as applicable) including any Managing Director, Principal, Vice President, Assistant Vice President, Secretary, Assistant Secretary, Treasurer, Assistant Treasurer, Controller, General Counsel, Associate Corporate Counsel or any other officer of the Trustee, the Depositary or the Collateral Agent customarily performing functions similar to those performed by any of the above designated officers and also means, with respect to a particular corporate trust matter, any other officer to whom such matter is referred because of such officer's knowledge of and familiarity with the particular subject.

"Restoration Sub-Account" means one or more accounts of such name created under the Depositary Agreement in connection with an Event of Loss or Event of Eminent Domain.

"Restricted Global Note" has the meaning set forth in Section 2.01 hereto.

"Restricted Note" has the meaning specified in Section 2.02.

"Restricted Payment" means, with respect to any Person, (i) the declaration and payment of distributions, dividends or any other payment made in cash, property, obligations or other notes, (ii) any payment of the principal of, or interest or premium, if any, on, any Subordinated Debt, (iii) the making of any loans or advances to any Affiliate (other than Permitted Indebtedness), (iv) any purchase, redemption, acquisition or retirement for value (including, without limitation in connection with any merger or consolidation of the Issuer) of any of the Issuer's Capital Stock or (v) any Investment in any Person other than a Guarantor; provided, however, that the term "Restricted Payments" shall not include (v) proceeds of this offering in the amount of \$78,500,000 utilized for the acquisition of Steamboat Development, \$33,500,000 utilized for the acquisition of a 50% interest in Mammoth-Pacific and the repayment of \$14,500,000 due to Ormat Nevada, (w) cash released from any Account as a result of the provision of an Acceptable Letter of Credit as provided for in the Financing Documents, (x) cash released from the Ormesa Loan Repayment Account as permitted under Section 3.7(b) of the Depositary Agreement, (y) payments made to any Affiliate of such Person for goods and services purchased or procured in accordance with the terms of this Indenture or (z) the use of proceeds from Indebtedness incurred in accordance with (I) clause (b)(y) under Section 4.18 hereof to purchase that portion of the of the Capital Stock of Mammoth-Pacific that the Issuer does not own as of the Closing Date or (II) clause (h) under Section 4.18 hereof to purchase a Qualified Project.

-29-

Page 30

"Restricted Period" has the meaning set forth in Section 2.01.

"Revenue Account" means the account of such name created under the Depositary Agreement.

"Rule 144" means Rule 144 promulgated under the Securities Act.

"Rule 144A" means Rule 144A promulgated under the Securities Act.

"Rule 144A Global Note" means restricted, permanent global notes in fully registered form issued to qualified institutional buyers under Rule 144A.

"Rule 903" means Rule 903 promulgated under the Securities Act.

"Rule 904" means Rule 904 promulgated under the Securities

Act.

"Scheduled Payment Date" means each June 30 and December 30, commencing on June 30, 2004 and ending on December 30, 2020.

"SEC" means the United States Securities and Exchange Commission.

"Secured Parties" means the Trustee, the Holders, the Collateral Agent, the holders of additional Permitted Indebtedness (other than Permitted Indebtedness of the type described in clause (vi) in the definition thereof), in each case to the extent such party (or an agent on such party's behalf) is or becomes a party to the Collateral Agency Agreement.

"Securities Act" means the United States Securities Act of 1933, as amended.

"Securities Intermediary" means Union Bank of California, N.A., until a successor replaces it in accordance with the applicable provisions of the Depositary Agreement and thereafter means the successor serving thereunder in such capacity.

"Security Documents" means, collectively, the Depositary Agreement, the Deeds of Trust, the Collateral Agency Agreement, the Pledge and Security Agreements, the Control Agreements, the Third Party Consents and any other document providing for any lien of the Secured Parties, pledge, encumbrance, mortgage or security interest on any or all of the Issuer's assets or the ownership interests thereof or the Issuer's Subsidiaries' assets and the ownership interests thereof.

"Senior Secured Notes" means the Initial Notes and, unless the context otherwise requires, the Additional Notes including any Exchange Notes.

"Senior Secured Obligations" means, collectively, without duplication: (i) all of the Issuer's Indebtedness, financial liabilities and obligations, of whatsoever nature and however evidenced (including, but not limited to, principal, interest, premium, fees, reimbursement

-30-

Page 31

obligations, penalties, indemnities and legal and other expenses, whether due after acceleration or otherwise) to the Secured Parties in their capacity as such under the applicable Financing Document or any other agreement, document or instrument evidencing, securing or relating to such Indebtedness, financial liabilities or obligations, in each case, direct or indirect, primary or secondary, fixed or contingent, now or hereafter arising out of or relating to any such agreements; (ii) any and all sums advanced by the Collateral Agent in order to preserve the Collateral or preserve its security interest in the Collateral; and (iii) in the event of any proceeding for the collection or enforcement of the obligations described in clauses (i) and (ii) above, after an Event of Default has occurred and is continuing and unwaived, the expenses of retaking, holding, preparing for sale or lease, selling or otherwise disposing of or realizing on the Collateral, or of any exercise by the Collateral Agent of its rights under the Security Documents, together with reasonable attorneys' fees and court costs.

"Series Supplemental Indenture" means an indenture supplemental to this Indenture entered into by the Issuer, the Trustee and the Guarantors, if applicable, for the purpose of establishing, in accordance with

this Indenture, the title, form and terms of Senior Secured Notes of any series.

"Shelf Registration Statement" means the shelf registration statement issued by the Issuer in connection with the offer and sale of Senior Secured Notes pursuant to a Registration Rights Agreement.

"Sierra Pacific Geothermal Resources Lease" means that certain Geothermal Resources Lease, dated November 18, 1983, between Steamboat Geothermal and Sierra Pacific Power Company, as amended by the amendments dated January 7, 1985, October 29, 1988, and October 2, 1989.

"Site Licenses" means the Mammoth-BLM Site License, the Ormesa-BLM Site License CA 17129, the Ormesa-BLM Site License CA 22405, the Ormesa-BLM Site License CA 24678, the Ormesa-BLM Site License CA 22079, and the Ormesa-BLM Site License CA 20172.

"Special Record Date" for the payment of any Overdue Interest or Overdue Principal shall mean a date fixed by the Trustee pursuant to Section 2.09.

"Steamboat Complex Operation and Maintenance Agreement" means that certain Amended and Restated Operation and Maintenance Agreement, dated December 8, 2003, among ORNI 7, LLC, Steamboat Geothermal LLC, Steamboat Development (as of the Closing Date) and Ormat Nevada, Inc.

"Steamboat Development" means Steamboat Development, a Utah corporation.

"Steamboat Development Plant" means the two geothermal power generating plants located in Steamboat Hills, Nevada, having a gross generating capacity of 32 MW and owned by Steamboat Development

-31-

Page 32

"Steamboat Geothermal" means Steamboat Geothermal LLC, a Delaware limited liability company.

"Steamboat Geothermal Plant" means the two geothermal power generating plants located in Steamboat Hills, Nevada, having a gross generating capacity of 10 MW and owned by Steamboat Geothermal.

"Steamboat 1 Plant Power Purchase Agreement" means that certain Agreement for the Purchase and Sale of Electricity, dated November 18, 1983, between Steamboat Geothermal LLC (as successor to Geothermal Development Associates) and Sierra Pacific Power Company, as amended by that certain Amendment to Agreement for the Purchase and Sale of Electricity, dated March 6, 1987.

"Steamboat 1A Plant Power Purchase Agreement" means that certain Long-Term Agreement for the Purchase and Sale of Electricity, dated October 29, 1988, between Steamboat Geothermal LLC (as successor to Far West Capital, Inc.) and Sierra Pacific Power Company.

"Steamboat 2 Plant Power Purchase Agreement" means that certain Long-Term Agreement, dated January 24, 1991, between Steamboat Development (as successor to Far West Capital, Inc.) and Sierra Pacific Power Company, as amended by that certain Amendment to Long-Term Agreement, dated October 29, 1991, and as further amended by that certain Amendment to Long-Term Agreement, dated October 29, 1992.

"Steamboat 1/1A Interconnection Agreement" means that certain

Special Facilities Agreement, dated October 29, 1988, between Sierra Pacific Power Company and Steamboat Geothermal (as successor to Far West Capital, Inc.).

"Steamboat 2/3 Interconnection Agreement" means that certain Special Facilities Agreement, dated April 24, 1992, between Sierra Pacific Power Company and Steamboat Development (as successor to Far West Capital, Inc.).

"Steamboat 2/3 Project Power Purchase Agreements" means the Steamboat 2 Plant Power Purchase Agreement and the Steamboat 3 Plant Power Purchase Agreement.

"Steamboat 3 Plant Power Purchase Agreement" means that certain Long-Term Agreement for the Purchase and Sale of Electricity, dated January 18, 1991, between Steamboat Geothermal Development (as successor to Far West Capital, Inc.) and Sierra Pacific Power Company.

"Subordinated Debt" means Indebtedness incurred pursuant to a Subordinated Loan Agreement.

"Subordinated Debt Provider" means a Person providing loans pursuant to a Subordinated Loan Agreement.

-32-

Page 33

"Subordinated Loan Agreement" means a binding agreement providing nonrecourse, unsecured debt financing to the Issuer on the terms and conditions set forth in Exhibit D to this Indenture.

"Subsidiary" means, with respect to any specified Person:

(1) any corporation, association or other business entity of which more than 50% of the total voting power of shares of Capital Stock entitled (without regard to the occurrence of any contingency and after giving effect to any voting agreement or stockholders' agreement that effectively transfers voting power) to vote in the election of directors, managers or trustees of the corporation, association or other business entity is at the time owned or controlled, directly or indirectly, by that Person or one or more of the other Subsidiaries of that Person (or a combination thereof); and

(2) any partnership (a) the sole general partner or the managing general partner of which is such Person or a Subsidiary of such Person or (b) the only general partners of which are that Person or one or more Subsidiaries of that Person (or any combination thereof).

"Third Party Consents" means each consent to assignment, among certain counterparties to a Material Project Document, the Issuer and/or the Issuer's applicable Subsidiary and the Collateral Agent.

"TIA" means the Trust Indenture Act of 1939 (15 U.S.C. (sections) 77aaa-77bbb) as in effect on the date on which this Indenture is qualified under the TIA.

"Title Event" means the existence of any defect of title or Lien or encumbrance on a Project (other than Permitted Liens) in effect on the Closing Date that entitles the Collateral Agent to make a claim under the policy or policies of title insurance required pursuant to the Financing Documents.

"Title Event Proceeds" means all amounts and proceeds (including instruments) in respect of any Title Event.

"Title Policies" means (i) each of the mortgagee title

insurance policies delivered by a title company of national standing or its Affiliates insuring to the Lien of the Deeds of Trust or (ii) for those Projects which do not have Deeds of Trust, the preliminary title report delivered by a title company of national standing or its Affiliates.

"Transaction Documents" means the Project Documents and the Financing Documents.

"Trustee" means Union Bank of California, N.A., until a successor replaces it in accordance with the applicable provisions of this Indenture, and thereafter means the successor serving thereunder in such capacity.

"Unassigned Leases" means (i) that certain Grant of Easement between David P. Frase, Timothy Frase and Stacey Frase, and James W. Roberts, Trustee of the James W. Roberts Revocable Trust, dated August 24, 1996, as grantor, and Brady Power, as grantee, dated March 27, 1998; (ii) the Railway Geothermal Resources Lease; (iii) the Fleetwood Geothermal Resources Sublease; (iv) that certain Geothermal Resources Lease dated May 31, 1991 between Dorothy A. Towne and the Trust of Dorothy A. Towne, as landlord, and Fleetwood Corporation, as tenant; and (v) that certain Geothermal Resources Lease dated June 27, 1988, as amended by that certain Amendment to Geothermal Resources Lease dated January 1992, and that certain Second Amendment to Geothermal Resources Lease dated June 25, 1993 between Bernice Guisti, Judith Harvey, and Karen Thompson, Trustees and Beneficiaries of the Guisti Trust, as landlord, and Steamboat Development Corp., as tenant.

"Unrestricted Global Note" means a permanent global Senior Secured Note in the form of Exhibit A-1 attached hereto that bears the Global Note Legend and that has the "Schedule of Exchanges of Interests in the Global Note" attached thereto, and that is deposited with or on behalf of and registered in the name of the Depositary, representing Senior Secured Notes that do not bear the Private Placement Legend.

"U.S. Person" means a U.S. person as defined in Rule 902(o) under the Securities Act.

"Work" means all obligations, duties and responsibilities undertaken by the Contractor and its subcontractors in accordance with the Galena Re-powering Contract, including the design, engineering, manufacturing, procurement, construction, start-up and performance testing of the Galena Plant in connection with the Galena Re-powering.

"Wholly Owned Subsidiary" of any specified Person means a Subsidiary of such Person all of the outstanding Capital Stock or other ownership interests of which (other than directors' qualifying shares) will at the time be owned by such Person or by one or more Wholly Owned Subsidiaries of such Person.

Section 1.03 Trust Indenture Act Provisions. Whenever this Indenture refers to a provision of the TIA, the provision is incorporated by reference in and made a part of this Indenture.

The following TIA terms used in this Indenture have the following meanings:

"indenture securities" means the Senior Secured Notes;

"indenture security holder" means a Holder of a Senior Secured Note;

"indenture to be qualified" means this Indenture;

"indenture trustee" or "institutional trustee" means the Trustee; and

"obligor" on the Senior Secured Notes means the Issuer and any successor obligor upon the Senior Secured Notes.

All other terms used in this Indenture that are defined by the TIA, defined by TIA reference to another statute or defined by SEC rule under the TIA have the meanings so assigned to them.

Section 1.04 Rules of Construction. Unless the context otherwise requires:

(a) a term has the meaning assigned to it;

(b) an accounting term not otherwise defined has the meaning assigned to it in accordance with GAAP;

(c) "or" is not exclusive;

(d) words in the singular include the plural, and in the plural include the singular;

(e) references to a Person shall include such Person's permitted successors and assigns;

(f) provisions apply to successive events and transactions;

-35-

(g) unless otherwise expressly specified, any agreement, contract or document defined or referred to herein shall mean such agreement, contract or document as in effect as of the date hereof, as the same may thereafter be amended, supplemented and/or otherwise modified from time to time in accordance with the terms of this Indenture and the other Transaction Documents and shall include any agreement, contract or document in substitution or replacement of any of the foregoing entered into in accordance with the terms of this Indenture and the other Transaction Documents; and

(h) references to sections of or rules under the Securities Act shall be deemed to include substitute, replacement or successor sections or rules adopted by the SEC from time to time.

ARTICLE II

THE SENIOR SECURED NOTES

Section 2.01 Form Generally. The Senior Secured Notes of each series shall be in substantially the form set forth in Exhibit A-1/A-2 or in such other form as shall, subject to Section 2.05, be established by or pursuant to an Officer's Certificate of the Issuer or in one or more Series Supplemental Indentures relating to the Senior Secured Notes of such series, with such appropriate insertions, omissions, substitutions and other variations as are required or permitted by this Indenture, and may have such letters, numbers or other marks of identification and such legends or endorsements placed thereon as may be required to comply with the rules of any securities exchange or Depository therefor or as may, consistently herewith, be determined by the officers executing such Senior Secured Notes as evidenced by their execution thereof.

The Certificated Notes shall be printed, lithographed or engraved on steel engraved borders or may be produced in any other manner, all as determined by the Authorized Officers executing such Certificated Notes, as evidenced by their execution of such Certificated Notes.

Restricted Notes shall bear the applicable legends as set forth in Exhibit A-1/A-2 and as provided in Section 2.02.

Senior Secured Notes offered and sold in their initial distribution in reliance on Rule 144A shall be issued in the form of one or more Global Notes (each a "Restricted Global Note") in definitive, fully registered form without interest coupons, substantially in the form set forth in Exhibit A-1, or in such other form as shall, subject to Section 2.05, be established by or pursuant to an Officer's Certificate of the Issuer or in one or more indentures supplemental hereto, with such applicable legends as are provided for in Exhibit A-1. Such Global Notes shall be registered in the name of the Depository for such Global Notes or its nominee and deposited with the Trustee, at the Corporate Trust Office of the Trustee, as custodian for such Depository, duly executed on behalf of the Issuer and authenticated by the Trustee as herein provided. The aggregate principal amount of any Restricted Global Note may from time to time be increased or

decreased by adjustments made on the records of the Trustee, as custodian for the Depository for such Global Note, as provided in Section 2.07, which

adjustments shall be conclusive as to the aggregate principal amount of any such Global Notes. Except as agreed by the Issuer, no Restricted Global Note shall be issued except as provided in this paragraph to evidence Senior Secured Notes offered and sold in their initial distribution in reliance on Rule 144A.

Senior Secured Notes offered and sold in their initial distribution in reliance on Regulation S shall be issued initially in the form of one or more temporary Global Notes (a "Temporary Regulation S Global Note") in definitive, fully registered form without interest coupons, substantially in the form set forth in Exhibit A-2, or in such other form as shall, subject to Section 2.05, be established by or pursuant to an Officer's Certificate of the Issuer or in one or more indentures supplemental hereto, with such applicable legends as are provided for in Exhibit A-2. Such Temporary Regulation S Global Notes shall be registered in the name of the Depository for such Global Notes or its nominee and deposited with the Trustee, at the Corporate Trust Office of the Trustee, as custodian for such Depository, duly executed by the Issuer and authenticated by the Trustee as herein provided, for credit to the respective accounts of beneficial owners of such Global Notes (or to such other accounts as they may direct) at Euroclear or Clearstream. Beneficial interests in any Temporary Regulation S Global Note may be held only through Euroclear or Clearstream. Within a reasonable period of time after the expiration of the Restricted Period (as defined below), any Temporary Regulation S Global Note will be exchanged for a permanent Regulation S Global Note (the "Regulation S Unrestricted Global Note," and together with the Temporary Regulation S Global Note, the "Regulation S Global Note") substantially in the form set forth in Exhibit A-1 with such applicable legends as are provided for in Exhibit A-1, but without the Restricted Notes legend set forth in Exhibit A-1, upon delivery to the Depository of certification of non-United States ownership and compliance with Regulation S. The Regulation S Unrestricted Global Note will be deposited with the Trustee at the Corporate Trust Office of the Trustee, as custodian for the Depository and registered in the name of the nominee of the Depository. Clearstream and Euroclear will hold beneficial interests in the Regulation S Unrestricted Global Note on behalf of their participants through their respective depositories, which in turn will hold such beneficial interests in the Regulation S Unrestricted Global Note in participants' securities accounts in the depositories' names on the books of the Depository. The aggregate principal amount of any Temporary Regulation S Global Note and any Regulation S Unrestricted Global Note may from time to time be increased or decreased by adjustments made on the records of the Trustee, as custodian for the Depository for such Global Note, as provided in Section 2.07, which adjustments shall be conclusive as to the aggregate principal amount of any such Global Note. As used herein, the term "Restricted Period", with respect to Global Notes offered and sold in reliance on Regulation S, means the period of 40 consecutive days beginning on and including the later of (i) the day on which the Senior Secured Notes are first offered to persons other than distributors (as defined in Regulation S) in reliance on Regulation S (according to a written notice to the Issuer and the Trustee by the underwriter(s), if any, of the offering of such Senior Secured Notes) and (ii) the date of the closing of the offering of such Senior Secured Notes. Except as agreed by the Issuer, no Temporary Regulation S Global Note or Regulation S Unrestricted Global Note shall

-37-

Page 38

be issued except as provided in this paragraph to evidence such Senior Secured Notes offered and sold in their initial distribution in reliance on Regulation S.

Section 2.02 Legends on Restricted Notes. All Senior Secured Notes issued pursuant to this Indenture (including Senior Secured Notes issued upon registration of transfer, in exchange for or in lieu of such Senior Secured

Notes) shall be "Restricted Notes" and shall bear the applicable legend(s) setting forth restrictions on transfer provided in Exhibit A-1/A-2 (the "Private Placement Legend"); provided, however, that the term "Restricted Notes" shall not include (i) Temporary Regulation S Global Notes or Regulation S Unrestricted Global Notes, (ii) Senior Secured Notes as to which such restrictive legend(s) shall have been removed pursuant to Section 2.07 and (iii) Senior Secured Notes issued upon registration of transfer of, in exchange for, or in lieu of, Senior Secured Notes that are not Restricted Notes.

Section 2.03 Amount of Senior Secured Notes. The aggregate principal amount of Senior Secured Notes which may be outstanding at any time is unlimited, subject to compliance with Section 4.18 hereof.

The Senior Secured Notes may be issued in one or more series. There shall be established in one or more Series Supplemental Indentures, prior to the issuance of Senior Secured Notes of any series:

(a) the title of the Senior Secured Notes of such series (which shall distinguish the Senior Secured Notes of such series from all other Senior Secured Notes) and the form or forms of Senior Secured Notes of such series;

(b) any limit upon the aggregate principal amount of the Senior Secured Notes of such series that may be authenticated and delivered under this Indenture (except for Senior Secured Notes authenticated and delivered upon registration of transfer of, or in exchange for, or in lieu of, other Senior Secured Notes of such series pursuant to Sections 2.06, 2.07, 2.08, 3.06 or 8.09 and except for Senior Secured Notes that, pursuant to the last paragraph of Section 2.05, are deemed never to have been authenticated and delivered hereunder);

(c) the date or dates on which the principal of the Senior Secured Notes of such series is payable, the amounts of principal payable on such date or dates and the Regular Record Date for the determination of Holders to whom principal is payable; and the date or dates on or as of which the Senior Secured Notes of such series shall be dated, if other than as provided in Section 2.05;

(d) the rate or rates at which the Senior Secured Notes of such series shall bear interest, or the method by which such rate or rates shall be determined, the date or dates from which such interest shall accrue, the interest payment dates on which such interest shall be payable and the Regular Record Date for the determination of Holders to

-38-

Page 39

whom interest is payable; and the basis of computation of interest, if other than as provided in Section 2.12;

(e) if other than as provided in Section 4.02, the place or places where (i) the principal of, interest and Liquidated Damages, if any, on Senior Secured Notes of such series shall be payable, (ii) Senior Secured Notes of such series may be surrendered for registration of transfer or exchange and (iii) notices and demands to or upon the Issuer in respect of the Senior Secured Notes of such series and this Indenture may be served;

(f) the price or prices at which, the period or periods within

which and the terms and conditions upon which Senior Secured Notes of such series may be redeemed, in whole or in part, at the option of the Issuer;

(g) the obligation, if any, of the Issuer to redeem, purchase or repay Senior Secured Notes of such series pursuant to any sinking fund or analogous provision or at the option of a Holder thereof and the price or prices at which and the periods or periods within which and the terms and conditions upon which Senior Secured Notes of such series shall be redeemed, purchased or repaid, in whole or in part, pursuant to such obligations;

(h) if other than minimum denominations of \$1,000 and any integral multiple of \$1,000 in excess thereof, the denominations in which Senior Secured Notes of such series shall be issuable;

(i) the restrictions or limitations, if any, on the transfer or exchange of the Senior Secured Notes of such series;

(j) the obligation, if any, of the Issuer to file a registration statement with respect to the Senior Secured Notes of such series or to exchange the Senior Secured Notes of such series for Senior Secured Notes registered pursuant to the Securities Act;

(k) any other terms of such series (which terms shall not be inconsistent with the provisions of this Indenture); and

(l) any trustees, authenticating or paying agents, warrant agents, transfer agents or registrars with respect to the Senior Secured Notes of such series.

Section 2.04 Denominations. The Senior Secured Notes shall be issuable only in registered form without coupons and in denominations of \$1,000 and any integral multiple of \$1,000 in excess thereof. Any repayments (either scheduled or pursuant to any redemption) of any Senior Secured Note shall be made only in the denomination or integral multiple thereof set forth above.

Section 2.05 Execution, Authentication, Delivery and Dating. The Senior Secured Notes shall be executed on behalf of the Issuer by an Authorized Representative of the

Issuer. The signature of any of these officers on the Senior Secured Notes may be manual or facsimile.

Senior Secured Notes bearing the manual or facsimile signature of individuals who were at the time of execution the Authorized Representative of the Issuer shall bind the Issuer, notwithstanding that such individuals or any of them have ceased to hold such offices prior to the authentication and delivery of such Senior Secured Notes or did not hold such offices at the date of such Senior Secured Notes.

At any time and from time to time after the execution and delivery of this Indenture, the Issuer may deliver Senior Secured Notes (with Guarantees endorsed thereon), if applicable, of any series executed by the Issuer to the Trustee for authentication, together with a Authentication Order for the authentication and delivery of such Senior Secured Notes, and the Trustee in accordance with the Authentication Order shall authenticate and deliver such Senior Secured Notes. The Trustee shall authenticate and deliver:

(i) on the Closing Date, an aggregate principal amount of \$190,000,000 8 1/4% Senior Secured Notes Due 2020, (ii) Additional Notes for an original issue in an aggregate principal amount specified in an Authentication Order pursuant to this Section 2.05 and (iii) Exchange Notes for issue only in an Exchange Offer pursuant to a Registration Rights Agreement, for a like principal amount of Initial Notes or Additional Notes, in each case upon an Authentication Order of the Issuer signed by an Authorized Officer of the Issuer. Such order will specify the amount of the Senior Secured Notes to be authenticated and the date on which the original issue of the Senior Secured Notes is to be authenticated. If the form or terms of the Senior Secured Notes have been established by or pursuant to an Officer's Certificate of the Issuer or a Supplemental Indenture as permitted by Section 2.01 in authenticating such Senior Secured Notes, and accepting any additional responsibilities under this Indenture in relation to such Senior Secured Notes, the Trustee shall be entitled to receive, and shall be fully protected in relying upon, an Opinion of Counsel stating,

(a) that such form has been established in conformity with the provisions of this Indenture;

(b) that such terms have been established in conformity with the provisions of this Indenture; and

(c) that such Senior Secured Notes, when authenticated and delivered by the Trustee and issued by the Issuer in the manner and subject to any conditions specified in such Opinion of Counsel, will constitute valid and legally binding obligations of the Issuer, enforceable against the Issuer in accordance with their terms (subject to customary qualifications or exceptions).

The Trustee shall not be required to authenticate such Senior Secured Notes if the issue of such Senior Secured Notes pursuant to this Indenture will affect the Trustee's own rights, duties or immunities under the Senior Secured Notes and this Indenture or otherwise in a manner which is not reasonably acceptable to the Trustee.

-40-

Page 41

Except as otherwise provided in the Series Supplemental Indenture relating to the Senior Secured Notes of a series, each Senior Secured Note of such series shall be dated the date of its authentication.

No Senior Secured Note shall be entitled to any benefit under this Indenture or be valid or obligatory for any purpose unless there appears on such Senior Secured Note a certificate of authentication substantially in the form provided for herein executed by the Trustee by manual signature of an Authorized Officer, and such certificate upon any Senior Secured Note shall be conclusive evidence, and the only evidence, that such Senior Secured Note has been duly authenticated and delivered hereunder. Notwithstanding the foregoing, if any Senior Secured Note shall have been authenticated and delivered hereunder but never issued and sold by the Issuer, and the Issuer shall deliver such Senior Secured Note to the Trustee for cancellation as provided in Section 2.11, for all purposes of this Indenture such Senior Secured Note shall be deemed never to have been authenticated and delivered hereunder and shall never be entitled to the benefits of this Indenture.

Section 2.06 Temporary Senior Secured Notes. Pending the preparation of definitive Senior Secured Notes, the Issuer may execute, and upon Authentication Order the Trustee shall authenticate and deliver, temporary Senior Secured Notes which are printed, lithographed, typewritten, mimeographed or otherwise produced, in any authorized denomination, substantially of the tenor of the definitive Senior Secured Notes in lieu of which they are issued and with such appropriate insertions, omissions, substitutions and other

variations as the officers of the Issuer executing the same may determine, as evidenced by their execution of such Senior Secured Notes.

If temporary Senior Secured Notes are issued, the Issuer will cause definitive Senior Secured Notes to be prepared without unreasonable delay. After the preparation of definitive Senior Secured Notes, the temporary Senior Secured Notes shall be exchangeable for definitive Senior Secured Notes upon surrender of the temporary Senior Secured Notes at the office or agency of the Issuer in a Place of Payment, without charge to the Holder. Upon surrender for cancellation of any one or more temporary Senior Secured Notes, the Issuer shall execute and the Trustee shall authenticate and deliver in exchange therefor one or more definitive Senior Secured Notes of any authorized denominations and of like tenor and aggregate principal amount. Until so exchanged, the temporary Senior Secured Notes shall in all respects be entitled to the same benefits under this Indenture as definitive Senior Secured Notes.

Section 2.07 Registration, Registration of Transfer and Exchange.

(a) General. The Issuer shall cause to be kept at the Corporate Trust Office of the Trustee a register in which, subject to such reasonable regulations as it may prescribe, the Issuer shall provide for the registration of Senior Secured Notes and for transfers of Senior Secured Notes. The Trustee is hereby appointed "Registrar" for the purpose of registering Senior Secured Notes and transfers of Senior Secured Notes as herein provided. The Issuer also shall cause to be kept an office or agency where Senior Secured Notes may be presented for payment

-41-

Page 42

("Paying Agent") and where notices and demands to or upon the Issuer in respect of the Senior Secured Notes may be served.

Notwithstanding anything to the contrary set forth herein, the Trustee shall not be required and shall have no obligation to monitor compliance with any federal or state securities laws.

Upon surrender for registration of transfer of any Senior Secured Note at the office or agency of the Issuer in a Place of Payment, the Issuer shall execute, and the Trustee shall authenticate and deliver, in the name of the designated transferee or transferees, one or more new Senior Secured Notes, of any authorized denominations and of like tenor and aggregate principal amount.

At the option of the Holder, Senior Secured Notes may be exchanged for other Senior Secured Notes, of any authorized denominations and of like tenor and aggregate principal amount, upon surrender of the Senior Secured Notes to be exchanged at such office or agency. Whenever any Senior Secured Notes are so surrendered for exchange, the Issuer shall execute, and the Trustee shall authenticate and deliver, the Senior Secured Notes which the Holder making the exchange is entitled to receive.

All Senior Secured Notes issued upon any registration of transfer or exchange of Senior Secured Notes shall be the valid obligations of the Issuer, evidencing the same debt, and entitled to the same benefits under this Indenture as the Senior Secured Notes surrendered upon such registration of transfer or exchange.

Every Senior Secured Note presented or surrendered for registration of transfer or for exchange shall be duly endorsed, or be accompanied by a written instrument of transfer in form satisfactory to the

Issuer and the Registrar duly executed by the Holder thereof or his attorney duly authorized in writing.

No service charge shall be made for any registration of transfer or exchange of Senior Secured Notes, but the Issuer may require payment of a sum sufficient to cover any tax or other governmental charge that maybe imposed in connection with any registration of transfer or exchange of Senior Secured Notes, other than exchanges pursuant to Section 2.06 or Section 3.06 not involving any transfer.

If the Senior Secured Notes are to be redeemed in part, the Issuer shall not be required (A) to issue, register the transfer of, or exchange, any Senior Secured Notes during a period beginning at the opening of business 15 days before the day of the mailing of a notice of redemption of any such Senior Secured Notes selected for redemption under Section 3.03 and ending at the close of business on the day of such mailing or (B) to register the transfer of or exchange any Senior Secured Note so selected for redemption in whole or in part, except the unredeemed portion of any Senior Secured Note being redeemed in part.

(b) Restricted Notes.

-42-

Page 43

Every Restricted Note shall be subject to the restrictions on offers, Transfers and exchanges provided in the applicable legend(s) required to be set forth on the face of each Restricted Note pursuant to Exhibit A-1/A-2 and Section 2.02, unless such restrictions on Transfer shall be waived by the written consent of the Issuer, and the Holder of each Restricted Note, by such Holder's acceptance thereof, agrees to be bound by such restrictions on Transfer. Whenever any Restricted Note is presented or surrendered for registration of Transfer or for exchange for a Senior Secured Note registered in a name other than that of the Holder, such Restricted Note must be accompanied by an appropriately completed certificate in substantially the form set forth in Exhibit B, in the case of Transfer, or, in the case of any exchange, Exhibit C or as contemplated by Section 2.13(c) (which may be attached to or set forth in the Restricted Note), appropriately completed, dated the date of such surrender and signed by the Holder of such Restricted Note, as to compliance with such restrictions on Transfer, unless the Issuer shall have notified the Trustee in writing pursuant to this Section 2.07 that there is an effective registration statement under the Securities Act with respect to such Restricted Note. The Registrar shall not be required to accept for such registration of Transfer or exchange any Restricted Note not so accompanied by a properly completed certificate.

Except as otherwise provided in the preceding paragraph, if Senior Secured Notes are issued upon the Transfer, exchange or replacement of Senior Secured Notes bearing a legend or legends setting forth restrictions on Transfer, or if a request is made to remove such legend(s) on a Senior Secured Note, the Senior Secured Notes so issued shall bear such legend(s) or such legend(s) shall not be removed, as the case may be, unless the transferor delivers to the Issuer such satisfactory evidence (which may include an opinion of independent counsel experienced in matters of United States securities law as may be reasonably satisfactory to the Issuer), as may be reasonably required by the Issuer, that neither such legend(s) nor the restrictions on Transfer set forth therein are required to ensure that Transfers thereof comply with the provisions of Rule 144A or Rule 144 or Regulation S or that such Senior Secured Notes are not restricted securities within the meaning of Rule 144. Upon provision of such satisfactory evidence to the Issuer, the Trustee, at the written direction of the Issuer set forth in an Officer's Certificate of the Issuer, shall authenticate and deliver a Senior Secured Note that does not bear such legend(s). In the absence of bad faith on its part, the Trustee may conclusively rely upon such direction of the Issuer in authenticating and

delivering a Senior Secured Note that does not bear such legend(s).

After a Transfer of any Initial Notes pursuant to and during the period of the effectiveness of a Shelf Registration Statement with respect to such Initial Notes, all requirements pertaining to legends relating to the restrictions on Transfer relating to the Securities Act on such Initial Note will cease to apply, the requirements requiring that any such Initial Note issued to certain Holders be issued in global form will cease to apply, and a certificated Initial Note or an Initial Note in global form, in each case without restrictive Transfer legends, will be available to the transferee of the Holder of such Initial Notes upon exchange of such transferring Holder's certificated Initial Note or appropriate directions to Transfer such Holder's interest in the Global Note, as applicable.

-43-

Page 44

Upon the consummation of an Exchange Offer with respect to the Initial Notes, all requirements pertaining to such Initial Notes that Initial Notes issued to certain Holders be issued in global form will still apply with respect to Holders of such Initial Notes that do not exchange their Initial Notes, and Exchange Notes in certificated or global form, in each case without the restrictive securities legend relating to the restrictions on Transfer relating to the Securities Act set forth in Exhibit A-1/A-2 hereto will be available to Holders that exchange such Initial Notes in such Exchange Offer.

Upon registration of Transfer of or exchange of Senior Secured Notes that are no longer Restricted Notes, the Issuer shall execute, and the Trustee shall authenticate and deliver, a Senior Secured Note that does not bear restrictive legends.

As used in this Section 2.07(b), the term "Transfer" encompasses any sale, pledge or other transfer of any Senior Secured Notes referred to herein.

(c) Global Notes. This Section 2.07(c) shall apply to Global Notes.

(i) Each Global Note authenticated under this Indenture shall be registered in the name of the Depository designated for such Global Note or a nominee thereof and delivered to such Depository or a nominee thereof or custodian therefor, and each such Global Note shall constitute a single Global Note for all purposes of this Indenture. The Senior Secured Notes may be represented by one or more Global Notes, and such Global Notes may be Restricted Global Notes, Temporary Regulation S Global Notes or Regulation S Unrestricted Global Notes, or any combination thereof.

(ii) Notwithstanding any other provision in this Indenture, no Global Note may be exchanged in whole or in part for Senior Secured Notes registered, and no transfer of a Global Note in whole or in part may be made, in the name of any Person other than the Depository for such Global Note or a nominee thereof unless (A) such Depository (1) has notified the Issuer that it is unwilling or unable to continue as Depository for such Global Note or (2) has ceased to be a clearing agency registered under the Exchange Act, and, in either case, a successor Depository is not appointed within 90 days thereof, (B) the Issuer executes and delivers to the Trustee a Authentication Order providing that such Global Note shall be so transferable, registrable and exchangeable, or (C) there shall have occurred and be continuing an Event of Default with respect to the Global Notes. Any Global Note exchanged pursuant to subclause (A) above shall be so exchanged in whole and not in part and any Global Note exchanged pursuant to subclause (B) or (C) above may be exchanged in whole or from time to

time in part as directed by the Depository for such Global Note. Notwithstanding any other provision in this Indenture, a Global Note to which the restriction set forth in the second preceding sentence shall have ceased to apply may be transferred only to, and may be registered and exchanged for Senior Secured Notes registered only in the name or names of, such Person or Persons as the Depository for such Global Note shall have directed and no transfer thereof other than such a transfer may be registered.

-44-

Page 45

(iii) Subject to clause (ii) above, any exchange of a Global Note for other Senior Secured Notes may be made in whole or in part, and all Senior Secured Notes issued in exchange for a Global Note or any portion thereof shall be registered in such name or names as the Depository for such Global Note shall direct.

(iv) Every Senior Secured Note authenticated and delivered upon registration of transfer of, or in exchange for or in lieu of, a Global Note or any portion thereof, whether pursuant to this Section 2.07, Section 2.06, 2.09 or 3.06 or otherwise shall be authenticated and delivered in the form of, and shall be, a Global Note, unless such Senior Secured Note is registered in the name of a Person other than the Depository for such Global Note or a nominee thereof.

(v) Notwithstanding any other provision of this Indenture or of the Senior Secured Notes, transfers of interests in a Global Note of the kind described in Section 2.01 and in subclauses (B), (C), (D) and (E) of this clause (v) below shall be made only in accordance with this clause (v), and all transfers of an interest in a Temporary Regulation S Global Note shall comply with subclause (F) of this clause (v). The provisions of this clause (v) providing for transfers of Senior Secured Notes or beneficial interests in Global Notes to Persons who wish to take delivery in the form of beneficial interests in a Restricted Global Note, Temporary Regulation S Global Note or Regulation S Unrestricted Global Note shall only apply if there is a Restricted Global Note, Temporary Regulation S Global Note or Regulation S Unrestricted Global Note, as the case may be.

(A) Transfer of Global Note. A Global Note may not be transferred, in whole or in part to any Person other than the Depository or a nominee thereof, and no such transfer to any such other Person may be registered; provided that this subclause (A) shall not prohibit any transfer of a Senior Secured Note that is issued in exchange for a Global Note but is not itself a Global Note. No transfer of a Senior Secured Note to any Person shall be effective under this Indenture or the Senior Secured Notes unless and until such Senior Secured Note has been registered in the name of such Person. Nothing in this Section 2.07 shall prohibit or render ineffective any transfer of a beneficial interest in a Global Note effected in accordance with the other provisions of this Section 2.07(c)(v).

(B) Restricted Global Note to Regulation S Global Note. If the holder of a beneficial interest in a Restricted Global Note wishes at any time to transfer such interest to a person who wishes to take delivery thereof in the form of a beneficial interest in a Regulation S Global Note, such transfer may be effected, subject to the rules and procedures of the Depository for such Global Note, Euroclear and Clearstream, in each case to the extent applicable (the "Applicable Procedures"), only in accordance with the

provisions of this Section 2.07(c)(v)(B). Upon receipt by the Trustee, as Registrar, at the Corporate Trust Office of (1) written instructions given in accordance with the Applicable Procedures from a member of, or participant in, the Depository for such Restricted Global Note (each, an "Agent Member") directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in a Regulation S Global Note in a principal amount equal to that of the beneficial interest in the Restricted Global Note to be so transferred, (2) a written order given in accordance with the Applicable

-45-

Page 46

Procedures containing information regarding the account of the Agent Member (and the Euroclear or Clearstream account, as the case may be) to be credited with, and the account of the Agent Member to be debited for, such beneficial interest and (3) an appropriately completed certificate in substantially the form set forth in or contemplated by Section 2.13(a) given by the holder of such beneficial interest, the Trustee, as Registrar, shall instruct the Depository for such Notes to reduce the principal amount of the Restricted Global Note, and to increase the principal amount of the Regulation S Global Note, by the principal amount of the beneficial interest in the Restricted Global Note to be so transferred, and to credit or cause to be credited to the account of the Person specified in such instructions (which shall be the Agent Member for Euroclear or Clearstream or both, as the case may be) a beneficial interest in the Regulation S Global Note having a principal amount equal to the amount by which the principal amount of the Restricted Global Note was reduced upon such transfer.

(C) Regulation S Global Note to Restricted Global Note. If the holder of a beneficial interest in a Regulation S Global Note wishes at any time to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in a Restricted Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this Section 2.07(c)(v)(C). Upon receipt by the Trustee, as Registrar, at the Corporate Trust Office of (1) written instructions given in accordance with the Applicable Procedures from an Agent Member directing the Trustee, as Registrar, to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note equal to that of the beneficial interest in the Regulation S Global Note to be so transferred, (2) a written order given in accordance with the Applicable Procedures containing information regarding the account of the Agent Member to be credited with, and the account of the Agent Member (or, if such account is held for Euroclear or Clearstream, the Euroclear or Clearstream account, as the case may be) to be debited for, such beneficial interest and (3) with respect to a transfer of a beneficial interest in the Regulation S Global Note, an appropriately completed certificate in substantially the form set forth in or contemplated by Section 2.13(b) given by the holder of such beneficial interest, the Trustee, as Registrar, shall instruct the Depository for such Regulation S Global Note to reduce the principal amount of the Regulation S Global Note and to

increase the principal amount of the Restricted Global Note, by the principal amount of the beneficial interest in the Regulation S Global Note to be so transferred, and to credit or cause to be credited to the account of the

-46-

Page 47

Person specified in such instructions a beneficial interest in the Restricted Global Note having a principal amount equal to the amount by which the principal amount of the Regulation S Global Note was reduced upon such transfer.

(D) Restricted Note (other than a Restricted Global Note) to Global Note. If the Holder of a Restricted Note (other than a Restricted Global Note) wishes at any time to transfer such Restricted Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in a Restricted Global Note or an Unrestricted Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this Section 2.07(c)(v)(D). Upon receipt by the Trustee, as Registrar, at the Corporate Trust Office of (1) the Restricted Note to be transferred, (2) written instructions given in accordance with the Applicable Procedures from an Agent Member directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note or the Unrestricted Global Note, as the case may be, in a principal amount equal to the principal amount of the Restricted Note to be so transferred, (3) a written order given in accordance with the Applicable Procedures containing information regarding the account of the Agent Member (and, in the case of any transfer pursuant to Regulation S, the Euroclear or Clearstream account for which such Agent Member's account is held or, if such account is held for Euroclear or Clearstream, the Euroclear or Clearstream account, as the case may be) to be credited with such beneficial interest and (4) an appropriately completed certificate in substantially the form set forth in or contemplated by Section 2.13(c) (which may be attached to or set forth in the Restricted Note), the Trustee, as Registrar, shall cancel the Restricted Note, the Issuer shall execute, and the Trustee shall authenticate and deliver, a new Definitive Note for the principal amount, if any, of the Restricted Note not so transferred, registered in the name of the Holder transferring such Restricted Note, and the Trustee shall instruct the Depository for such Notes to increase the principal amount of the Restricted Global Note or the Unrestricted Global Note, as the case may be, by the principal amount of the Restricted Note so transferred, and to credit or cause to be credited to the account of the Person specified in such instructions (which, in the case of any increase of the principal amount of an Unrestricted Global Note as the result of a transfer pursuant to Regulation S, shall be the Agent Member for Euroclear or Clearstream or both, as the case may be) a corresponding principal amount of the Restricted Global Note or the Unrestricted Global Note. The transfer of a Restricted Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in an Unrestricted Global Note may be effected only in accordance with Regulation S or Rule 144A (as evidenced by the certificate delivered pursuant to Section 2.13(c)).

(E) Other Exchanges. In the event that a Global Note or any portion thereof is exchanged for Senior Secured Notes other than Global Notes, the Trustee, as Registrar, shall instruct the Depository for the Global Note to reduce

-47-

Page 48

the principal amount of the Global Note by the principal amount of the Notes other than Global Notes issued upon such exchange. Such other Notes may in turn be exchanged (on transfer or otherwise) for beneficial interests in a Global Note (if any are then outstanding) only in accordance with such procedures, which shall be substantially consistent with the provisions of subclauses (A) through (D) above (including the certification requirements intended to insure that transfers of beneficial interests in a Global Note comply with Rule 144A, Rule 144 or Regulation S, as the case may be) and any other procedures as may be from time to time adopted by the Issuer and the Trustee.

(F) Interests in Temporary Regulation S Global Note to be Held Through Euroclear or Clearstream. Until the termination of the Restricted Period with respect to Senior Secured Notes represented by a Temporary Regulation S Global Note, interests in any Temporary Regulation S Global Note may be held only through Agent Members acting for and on behalf of Euroclear and Clearstream, provided that this subclause (F) shall not prohibit any transfer in accordance with subclause (D) of this Section 2.07(c)(v).

Section 2.08 Mutilated, Destroyed, Lost and Stolen Senior Secured Notes. If any mutilated Senior Secured Note is surrendered to the Trustee, the Issuer shall execute and, upon the Issuer's written request, the Trustee shall authenticate and deliver a new definitive Senior Secured Note, of like tenor and aggregate principal amount and equal face amount of principal, registered in the same manner, dated the date of its authentication and bearing interest from the date to which interest has been paid on such Senior Secured Note, in exchange and substitution for such Senior Secured Note (upon surrender and cancellation thereof); provided, that the applicant for such new Senior Secured Note shall furnish to the Issuer and to the Trustee such reasonable bond or indemnity as may be required by them to save each of them harmless.

If there shall be delivered to the Issuer and the Trustee (a) evidence to their satisfaction of the destruction, loss or theft of any Senior Secured Note and (b) such bond or indemnity as may be required by them to save each of them and any agent of either of them harmless, then, in the absence of notice to the Issuer or the Trustee that such Senior Secured Note has been acquired by a bona fide purchaser, the Issuer shall execute and, upon the Issuer's request, the Trustee shall authenticate and deliver a new definitive Senior Secured Note, of like tenor and aggregate principal amount and equal face amount of principal registered in the same manner, dated the date of its authentication and bearing interest from the date to which interest has been paid on such Senior Secured Note, in lieu of and substitution for such Senior Secured Note.

In case any such mutilated, destroyed, lost or stolen Senior Secured Note has become or is about to become due and payable, the Issuer in its discretion may, instead of issuing a new Senior Secured Note, pay such Senior Secured Note (without surrender thereof, except in the case of a mutilated Senior Secured Note) if the applicant for such payment shall furnish to the Issuer and the Trustee such reasonable bond or indemnity as they may require to

them harmless, and in case of destruction, loss or theft, evidence to the satisfaction of the Issuer and the Trustee of the destruction, loss or theft of such Senior Secured Note.

Upon the issuance of any new Senior Secured Note under this Section 2.08, the Issuer may require the payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto and any other expenses (including the fees and expenses of the Trustee) connected therewith.

Every new Senior Secured Note issued pursuant to this Section 2.08 in lieu of any destroyed, lost or stolen Senior Secured Note shall constitute an original additional contractual obligation of the Issuer, whether or not the destroyed, lost or stolen Senior Secured Note shall be at any time enforceable by anyone, and shall be entitled to all the benefits of this Indenture equally and proportionately with any and all other Senior Secured Notes duly issued hereunder.

The provisions of this Section 2.08 are exclusive and shall preclude (to the extent lawful) all other rights and remedies with respect to the replacement or payment of mutilated, destroyed, lost or stolen Senior Secured Notes.

Section 2.09 Payments; Interest Rights Preserved. Interest on any Senior Secured Note which is payable, and is punctually paid or duly provided for, on any Interest Payment Date shall be paid to the Person in whose name that Senior Secured Note (or one or more Predecessor Senior Secured Notes) is registered at the close of business on the Regular Record Date for such interest.

Any interest or Liquidated Damages on any Senior Secured Note which is payable; but is not punctually paid or duly provided for, on any Interest Payment Date (herein called "Overdue Interest") shall forthwith cease to be payable to the Holder on the relevant Regular Record Date by virtue of having been such Holder, and such Overdue Interest may be paid by the Issuer, at its election in each case, as provided in clause (a) or (b) below:

(a) The Issuer may elect to make payment of any Overdue Interest to the Persons in whose names the Senior Secured Notes (or their respective Predecessor Notes) are registered at the close of business on a Special Record Date for the payment of such Overdue Interest, which shall be set in the following manner. The Issuer shall notify the Trustee in writing of the amount of Overdue Interest proposed to be paid on each Senior Secured Note and the date of the proposed payment, and at the same time the Issuer shall deposit with the Trustee an amount of money equal to the aggregate amount proposed to be paid in respect of such Overdue Interest or shall make arrangements satisfactory to the Trustee for such deposit prior to the date of the proposed payment, such money when deposited to be held in trust for the benefit of the Persons entitled to such Overdue Interest as in this clause (a) provided. Thereupon, the Issuer shall fix a Special Record Date for the payment of such Overdue Interest which shall be not more than 15 days and not less than 10 days prior to the date of the proposed payment and not less than 10 days after the receipt by the Trustee of the notice of the proposed payment. The Trustee shall promptly, in the name and at the expense of the Issuer, mail a written notice of the proposed

payment of such Overdue Interest and the Special Record Date therefor to be given to each Holder of Senior Secured Notes, not less than 10 days prior to such Special Record Date. Notice of the proposed payment of such Overdue Interest and the Special Record Date therefor having been so mailed, such Overdue Interest shall be paid to the Persons in whose names the Senior Secured Notes (or their respective Predecessor Notes) are registered at the close of business on such Special Record Date and shall no longer be payable pursuant to the following clause (b).

(b) The Issuer may make payment of any Overdue Interest on the Senior Secured Notes in any other lawful manner not inconsistent with the requirements of any securities exchange on which such Senior Secured Notes may be listed, and upon such notice as may be required by such exchange, if, after notice given by the Issuer to the Trustee of the proposed payment pursuant to this clause (b), such manner of payment shall be deemed practicable by the Trustee.

Subject to the foregoing provisions of this Section 2.09, each Senior Secured Note delivered under this Indenture upon registration of transfer of, or in exchange for, or in lieu of, any other Senior Secured Note shall carry the rights to interest accrued and unpaid, and to accrue, which were carried by such other Senior Secured Note.

All payments of principal, premium, or Liquidated Damages, if any, and interest on Senior Secured Notes will be made by check or, with respect to Senior Secured Notes the Holders of which have provided the Issuer with wire transfer instructions, will be made by wire transfer of immediately available funds to the accounts specified by the Holders thereof. Unless such designation is revoked in writing, any designation made by such Holder with respect to such Senior Secured Notes will remain in effect with respect to any future payments with respect to such Senior Secured Notes payable to such Holder. The Issuer will indemnify and hold the Trustee and the Paying Agent harmless against any loss, liability or expense (including attorneys' fees) resulting from any act or omission to act on the part of the Trustee, the Paying Agent or any such Holder in connection with any such designation or which the Paying Agent or Trustee may incur as a result of making any payment in accordance with any such designation.

All payments of principal, premium or Liquidated Damages, if any, on the Senior Secured Notes shall be made upon presentation and surrender thereof at the office or agency of the Issuer maintained for such purpose in the Borough of Manhattan, The City of New York.

Section 2.10 Persons Deemed Owners. Prior to due presentment of a Senior Secured Note for registration of transfer, the Issuer, the Trustee and any agent of the Issuer or the Trustee shall treat the Person in whose name such Senior Secured Note is registered as the owner of such Senior Secured Note for the purpose of receiving payment of principal of and any premium or Liquidated Damages and (subject to Section 2.09) any interest on such Senior Secured Note and for all other purposes whatsoever, whether or not such Senior Secured Note be overdue, and neither the Issuer, the Trustee nor any agent of the Issuer or the Trustee shall be affected by notice to the contrary.

Section 2.11 Cancellation. All Senior Secured Notes surrendered for payment, redemption, registration of transfer or exchange shall,

if surrendered to any Person other than the Trustee, be delivered to the Trustee and shall be promptly canceled by it. The Issuer may at any time deliver to the Trustee for cancellation any Senior Secured Notes previously authenticated and delivered hereunder which the Issuer may have acquired in any manner whatsoever, and may deliver to the Trustee (or to any other Person for delivery to the Trustee for cancellation) any Senior Secured Notes previously authenticated hereunder which the Issuer has not issued and sold, and all Senior Secured Notes so delivered shall be promptly canceled by the Trustee. No Senior Secured Notes shall be authenticated in lieu of or in exchange for any Senior Secured Notes canceled as provided in this Section 2.11, except as expressly permitted by this Indenture. All canceled Senior Secured Notes held by the Trustee shall be disposed of as directed by an Authentication Order.

Section 2.12 Computation of Interest. Except as otherwise provided in the Series Supplemental Indenture relating to the Senior Secured Notes of a series, interest on the Senior Secured Notes of such series shall be computed on the basis of a 360-day year comprised of twelve 30-day months.

Section 2.13 Certification Forms. (a) Whenever any certification is to be given by a beneficial owner of a portion of a Restricted Global Note pursuant to Section 2.07(c)(v)(D) in connection with the initial transfer of a beneficial interest in a Restricted Global Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in a Regulation S Global Note, such certification shall be provided substantially in the form set forth in Exhibit C hereto.

(b) Whenever any certification is to be given by a beneficial owner of a portion of a Regulation S Global Note pursuant to Section 2.07(c)(v)(D) in connection with the initial transfer of a beneficial interest in the Regulation S Global Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note, such certification shall be provided substantially in the form set forth in Exhibit C hereto.

(c) Whenever any certification is to be given by a beneficial owner of a Restricted Note or Holder of a Restricted Note (other than a Restricted Global Note) pursuant to Section 2.07(b) in connection with the transfer or exchange of a Restricted Note, such certification shall be provided substantially in the form set forth in Exhibit B (which may be attached to or set forth on the Restricted Note).

Section 2.14 CUSIP Numbers. The Issuer in issuing the Senior Secured Notes may use "CUSIP" or "ISIN" numbers (if then generally in use), and, if so, the Trustee shall use "CUSIP" or "ISIN" numbers in notices of redemption as a convenience to Holders; provided that the Trustee shall assume no responsibility for the accuracy of such numbers and any such redemption shall not be affected by any defect in or omission of such numbers.

-51-

Page 52

Section 2.15 Issuance of Additional Notes. The Issuer shall be entitled, subject to its compliance with Section 4.18 hereof, to issue Additional Notes under this Indenture with identical terms as the Initial Notes issued on the Closing Date, other than with respect to the date of issuance and issue price. The Initial Notes issued on the Closing Date, any Additional Notes and all Exchange Notes issued in exchange therefor will be treated as a single class for all purposes under this Indenture.

With respect to any Additional Notes, the Issuer will set forth in a resolution of the Board of Directors of the Issuer and an Officers' Certificate, copies of which will be delivered to the Trustee, the following information:

(i) the aggregate principal amount of such Additional Notes to be authenticated and delivered pursuant to this Indenture;

(ii) the issue price, the issue date and the CUSIP number of such Additional Notes; provided, however, that no Additional Notes may be issued at a price that would cause such Additional Notes to have "original issue discount" within the meaning of Section 1273 of the Internal Revenue Code of 1986, as amended; and

(iii) whether such Additional Notes will be Transfer Restricted Securities or will be issued in the form of Exchange Notes.

ARTICLE III

REDEMPTION AND PREPAYMENT

Section 3.01 Notices to Trustee. If the Issuer elects to redeem Senior Secured Notes pursuant to the optional redemption provisions of Section 3.07 hereof, it shall furnish to the Trustee and Paying Agent, at least 30 days but not more than 60 days before a redemption date, an Officers' Certificate setting forth (i) the clause of this Indenture pursuant to which the redemption shall occur, (ii) the Redemption Date, (iii) the principal amount of Senior Secured Notes to be redeemed and (iv) the redemption price.

Section 3.02 Selection of Senior Secured Notes to Be Redeemed. If less than all of the Senior Secured Notes are to be redeemed at any time, selection of Senior Secured Notes for redemption will be made by the Trustee on a pro rata basis; provided that no Senior Secured Notes of \$1,000 or less will be redeemed in part. Notices of redemption will be mailed by first class mail at least 30 but not more than 60 days before the Redemption Date to each Holder of Senior Secured Notes to be redeemed at its registered address. Notices of redemption may not be conditional. If any Senior Secured Note is to be redeemed in part only, the notice of redemption that relates to such Senior Secured Note will state the portion of the principal amount thereof to be redeemed. A new Senior Secured Note in principal amount equal to the unredeemed portion thereof will be issued in the name of the Holder thereof upon cancellation of the original Senior Secured Note. Senior Secured Notes called for redemption become due on

-52-

Page 53

the date fixed for redemption. Unless the Issuer defaults in payment of the redemption price, interest and Liquidated Damages, if any, will cease to accrue on Senior Secured Notes or portions of them called for redemption on and after the Redemption Date.

The Trustee shall promptly notify the Issuer in writing of the Senior Secured Notes selected for redemption and, in the case of any Senior Secured Note selected for partial redemption, the principal amount thereof to be redeemed. Senior Secured Notes and portions of Senior Secured Notes selected shall be in denominations of \$1,000 and integral multiples of \$1,000; except that if all of the Senior Secured Notes of a Holder are to be redeemed, the entire outstanding amount of Senior Secured Notes held by such Holder, even if not a multiple of \$1,000, shall be redeemed. Except as provided in the preceding sentence, provisions of this Indenture that apply to Senior Secured Notes called for redemption also apply to portions of Senior Secured Notes called for redemption.

Section 3.03 Notice of Redemption. At least 30 days but not more than 60 days before a Redemption Date, the Issuer shall mail or cause to be mailed, by first class mail, a notice of redemption to each Holder whose Senior

Secured Notes are to be redeemed at its registered address.

The notice shall identify the Senior Secured Notes to be redeemed and shall state:

(a) the Redemption Date;

(b) the redemption price;

(c) if any Senior Secured Note is being redeemed in part, the portion of the principal amount of such Senior Secured Note to be redeemed and that, after the redemption date upon surrender of such Senior Secured Note, a new Senior Secured Note or Senior Secured Notes in principal amount equal to the unredeemed portion shall be issued upon cancellation of the original Senior Secured Note;

(d) the name, address and telephone number of the Paying Agent;

(e) that Senior Secured Notes called for redemption must be surrendered to the Paying Agent to collect the redemption price;

(f) that, unless the Issuer defaults in making such redemption payment, interest and Liquidated Damages, if any, on Senior Secured Notes called for redemption ceases to accrue on and after the Redemption Date;

(g) the paragraph of the Senior Secured Notes and/or Section of this Indenture pursuant to which the Senior Secured Notes called for redemption are being redeemed; and

-53-

Page 54

(h) the CUSIP number (provided that the Issuer may state that no representation is made as to the correctness or accuracy of the CUSIP number, if any, listed in such notice or printed on the Senior Secured Notes).

At the Issuer's request, the Trustee or the Paying Agent shall give the notice of redemption in the Issuer's name and at its expense; provided, however, that the Issuer shall have delivered to the Trustee, at least 45 days prior to the redemption date, an Officers' Certificate requesting that the Trustee give such notice and setting forth the information to be stated in such notice as provided in the preceding paragraph.

Section 3.04 Effect of Notice of Redemption. Once notice of redemption is mailed in accordance with Section 3.03 hereof, Senior Secured Notes called for redemption become irrevocably due and payable on the Redemption Date at the redemption price. A notice of redemption may not be conditional.

Section 3.05 Deposit of Redemption Price. One Business Day prior to the Redemption Date, the Issuer shall deposit with the Trustee or with the Paying Agent (other than the Issuer or an Affiliate of the Issuer) money sufficient to pay the redemption price of and accrued interest and Liquidated Damages, if any, on, all Senior Secured Notes to be redeemed on that date. The Trustee or the Paying Agent shall promptly return to the Issuer any money deposited with the Trustee or the Paying Agent by the Issuer in excess of the amounts necessary to pay the redemption price of, and accrued interest and Liquidated Damages, if any, on, all Senior Secured Notes to be redeemed.

If the Issuer complies with the provisions of the preceding paragraph and the other provisions of this Article III, on and after the Redemption Date, interest and Liquidated Damages, if any, shall cease to accrue

on the Senior Secured Notes or the portions of Senior Secured Notes called for redemption. If a Senior Secured Note is redeemed on or after an interest record date but on or prior to the related Interest Payment Date, then any accrued and unpaid interest and Liquidated Damages, if any, shall be paid to the Person in whose name such Senior Secured Note was registered at the close of business on such record date. If any Senior Secured Note called for redemption shall not be so paid upon surrender for redemption because of the failure of the Issuer to comply with the preceding paragraph, interest and Liquidated Damages, if any, shall be paid on the unpaid principal, from the Redemption Date until such principal is paid, and to the extent lawful on any interest, and Liquidated Damages, if any, not paid on such unpaid principal, in each case at the rate and in the manner provided in the Senior Secured Notes and in Section 4.01 hereof.

Section 3.06 Senior Secured Notes Redeemed in Part. Upon surrender of a Senior Secured Note that is redeemed in part, the Issuer shall issue and, upon the Issuer's written request, the Trustee shall authenticate for the Holder at the expense of the Issuer a new Senior Secured Note equal in principal amount to the unredeemed portion of the Senior Secured Note surrendered.

-54-

Page 55

Section 3.07 Optional Redemption.

(a) The Senior Secured Notes shall be redeemable at the Issuer's option at any time and from time to time, in whole or in part, upon not less than 30 nor more than 60 days' notice to the Trustee and each Holder of Senior Secured Notes, at a redemption price equal to the outstanding principal amount thereof plus accrued interest and Liquidated Damages, if any, plus the Make-Whole Premium, such redemption price to be set forth in the notice to the Trustee. In no event shall the sum of the redemption price plus the Make-Whole Premium ever be less than 100% of the Senior Secured Notes being redeemed plus accrued and unpaid interest thereon to the Redemption Date. Unless the Issuer defaults in payment of the redemption price, on and after the Redemption Date interest and Liquidated Damages, if any, shall cease to accrue on the Senior Secured Notes or portions thereof called for redemption.

(b) Any redemption pursuant to this Section 3.07 shall be made pursuant to the provisions of Sections 3.01 through 3.06 hereof.

Section 3.08 Mandatory Redemption.

(a) The Senior Secured Notes shall be subject to mandatory redemption, in whole or in part, at a redemption price equal to the principal amount of the Senior Secured Notes being redeemed plus accrued and unpaid interest and Liquidated Damages, if any, to the Redemption Date, if the Issuer or any Subsidiary receives more than \$5.0 million of Loss Proceeds or Eminent Domain Proceeds because of an Event of Loss or an Event of Eminent Domain and:

(i) the Issuer determines that all or such portion of the applicable Plant cannot be rebuilt, repaired or restored to permit operations on a commercially reasonable basis, or the Issuer determines not to rebuild, repair or restore the applicable Plant or such portion, in which case the Issuer shall have to use the Net Available Amount of such proceeds for such redemption; or

(ii) only a portion of the applicable Plant is capable of being rebuilt, repaired or restored on a commercially reasonable basis and the Issuer determines to so rebuild, repair or restore, in which case the Issuer will have to use only the amount of such Loss Proceeds or Eminent Domain Proceeds not used to rebuild, repair or restore such Plant for such redemption, except as set forth in the immediately

following paragraph.

If the Issuer or any Subsidiary receives less than \$5 million of Loss Proceeds or Eminent Domain Proceeds or has less than \$5 million remaining after rebuilding, repairing or restoring a portion of the applicable Plant because of an Event of Loss or Event of Eminent Domain the Issuer will cause such amounts to be deposited into the Revenue Account.

(b) If the Issuer or any Subsidiary (a) receives more than \$5.0 million of Title Event Proceeds in connection with a Title Event and is unable to remedy the Title Event, or (b) has more than \$5.0 million of Title Event Proceeds remaining after remedying the Title Event, the Issuer will have to use the Net Available Amount of such proceeds, to the extent not

-55-

Page 56

used to cure the Title Event, on a pro rata basis to redeem the Senior Secured Notes at a redemption price equal to the principal amount of the Senior Secured Notes being redeemed plus accrued and unpaid interest and Liquidated Damages, if any, to the Redemption Date. If the Issuer or any Subsidiary receives less than \$5 million of Title Event Proceeds in connection with a Title Event or has less than \$5 million remaining after remedying a Title Event the Issuer will cause such amounts to be deposited into the Revenue Account.

(c) If on or prior to September 30, 2005, the Issuer has not satisfied the Initial Galena Re-powering Account Withdrawal Conditions, then the Issuer will have to use the proceeds of the Galena Re-powering Account to redeem Senior Secured Notes at a price equal to 101% of the principal amount of Senior Secured Notes being redeemed plus accrued and unpaid interest and Liquidated Damages, if any, to the Redemption Date.

(d) If Final Completion is not achieved by March 31, 2006 or the Galena Re-powering does not result in a minimum net electrical output of 18 MW as determined in accordance with performance tests conducted pursuant to the Galena Re-powering Contract (as certified by the Independent Engineer), then from and after March 31, 2006, the Issuer will not be able to make any Restricted Payments until the Issuer has used any amounts the Issuer receives as Performance Liquidated Damages and amounts in the Distribution Suspense Account to redeem or has otherwise redeemed (a "Galena Re-powering Performance Redemption") Senior Secured Notes in an amount equal to the product of (x) \$1,100,000 times (y) the difference between (i) 18 MW minus (i) the actual number of Megawatts of the Galena Re-powering as demonstrated by the Performance Guarantee Tests and certified by the Independent Engineer. The Issuer will redeem the Senior Secured Notes in connection with a Galena Re-powering Performance Redemption at a price equal to 101% of the principal amount of the Senior Secured Notes required to be redeemed plus accrued and unpaid interest and Liquidated Damages, if any, to the Redemption Date.

(e) If, as of January 1, 2006, the Mammoth Enhancement has not improved the net electrical output of the Mammoth Plant by at least 3.6 MW (as certified by the Independent Engineer), then from and after January 1, 2006, the Issuer will not be able to make any Restricted Payments until the Issuer has used amounts in the Distribution Suspense Account to redeem or has otherwise redeemed (a "Mammoth Enhancement Redemption") Senior Secured Notes in an amount equal to the product of (x) \$1,100,000 times (y) the difference between (i) 3.6 MW minus (ii) the actual number of Megawatts that the Mammoth Enhancement increases the net electrical output of the Mammoth Plant. The Issuer shall redeem the Senior Secured Notes in connection with a Mammoth Enhancement Redemption at a price equal to 101% of the principal amount of the Senior Secured Notes required to be redeemed plus accrued and unpaid interest and Liquidated Damages, if any, to the Redemption Date.

In the event that any Senior Secured Obligations (other than the Senior Secured Notes) are required to be redeemed before their scheduled maturity pursuant to documents governing such Senior Secured Obligations for any reason not otherwise giving rise to a redemption of the Senior Secured Notes, the Issuer shall offer to repurchase the Senior Secured

-56-

Page 57

Notes on a pro rata basis with the other Senior Secured Obligations as are required to be redeemed at a redemption price equal to the principal amount of the Senior Secured Notes the Issuer offers to repurchase plus accrued and unpaid interest and Liquidated Damages, if any, to the Redemption Date, but without any premium.

Other than as specifically provided in this Section 3.08, any purchase or redemption pursuant to this Section 3.08 shall be made pursuant to the provisions of Sections 3.01 through 3.06 hereof.

ARTICLE IV

COVENANTS

The Issuer and each of the Issuer's Subsidiaries (other than Ormesa LLC, which shall only be subject to these covenants prior to the Ormesa Support Date to the extent compliance therewith would not violate the Ormesa Credit Agreement) shall be subject to the following covenants.

Section 4.01 Payment of Senior Secured Notes. The Issuer shall pay or cause to be paid the principal of, premium, if any, interest and Liquidated Damages, if any, on the Senior Secured Notes on the dates and in the manner provided on Exhibits A-1 and A-2 attached hereto including the Schedule of Principal Payments set forth on Schedule I attached thereto. Principal, premium, if any, interest and Liquidated Damages, if any, shall be considered paid on the date due if the Paying Agent, if other than the Issuer or a Subsidiary or an Affiliate thereof, holds as of 10:00 a.m. Eastern Time on the due date money deposited by the Issuer in immediately available funds and designated for and sufficient to pay all principal, premium, if any, interest and Liquidated Damages, if any, then due.

The Issuer shall pay interest (including post-petition interest in any proceeding under any Bankruptcy Law) on overdue principal at the rate equal to 1% per annum in excess of the then applicable interest rate on the Senior Secured Notes to the extent lawful; it shall pay interest (including post-petition interest in any proceeding under any Bankruptcy Law) on overdue installments of interest (without regard to any applicable grace period) and Liquidated Damages, if any, at the same rate to the extent lawful.

Section 4.02 Maintenance of Office or Agency. The Issuer shall maintain in the Borough of Manhattan, the City of New York, and in such other places, if any, as shall be specified for the Senior Secured Notes of any series in the related Series Supplemental Indenture an office or agency (which may be an office of the Trustee or an affiliate of the Trustee, Registrar or co-registrar) where Senior Secured Notes may be surrendered for registration of transfer or for exchange and where notices and demands to or upon the Issuer in respect of the Senior Secured Notes and this Indenture may be served. The Issuer shall give prompt written notice to the Trustee of the location, and any change in the location, of such office or agency. If at any time the Issuer shall fail to maintain any such required office or agency or shall fail to

furnish the Trustee with the address thereof, such presentations, surrenders, notices and demands may be made or served at the Corporate Trust Office of the Trustee.

The Issuer may also from time to time designate one or more other offices or agencies where the Senior Secured Notes may be presented or surrendered for any or all such purposes and may from time to time rescind such designations; provided, however, that no such designation or rescission shall in any manner relieve the Issuer of its obligation to maintain an office or agency in the Borough of Manhattan, the City of New York for such purposes. The Issuer shall give prompt written notice to the Trustee of any such designation or rescission and of any change in the location of any such other office or agency.

The Issuer hereby designates the Corporate Trust Office of the Trustee as the initial office or agency of the Issuer where the Senior Secured Notes may be presented or surrendered in accordance with the foregoing.

Section 4.03 Reporting Requirements. Whether or not required by the SEC, so long as any Senior Secured Notes are outstanding, the Issuer shall furnish to the Trustee for mailing to the Holders (directly to any Beneficial Owner (as such term is defined Rule 13d-3 and Rule 13d-5 under the Exchange Act) with notice of ownership on file with the Trustee), within the time periods specified in the SEC's rules and regulations:

(a) all quarterly and annual financial information that would be required to be contained in a filing with the SEC on Forms 10-Q and 10-K if the Issuer were required to file such Forms, including a "Management's Discussion and Analysis of Financial Conditions and Results of Operations" and, with respect to the annual information only, a report on the annual financial statements by the Issuer's certified independent accountants; and

(b) all current reports that would be required to be filed with the SEC on Form 8-K if the Issuer were required to file such reports.

In addition, following the consummation of the Exchange Offer contemplated by the Registration Rights Agreement, whether or not required by the SEC, the Issuer shall file a copy of all of the information and reports referred to in clauses (1) and (2) above with the SEC for public availability within the time periods specified in the SEC's rules and regulations (unless the SEC will not accept such a filing) and make such information available to prospective investors upon request. In addition, the Issuer and the Guarantors agree that they shall furnish to the Holders and to prospective investors, upon the request of such Holders, the information required to be delivered pursuant to Rule 144(d)(4) under the Securities Act so long as the Senior Secured Notes are not freely transferable under the Securities Act.

Notwithstanding the foregoing, the Issuer shall not be required to present financial information (i) for itself or any Subsidiary for any period prior to September 30, 2003 that is not presented in

the Offering Memorandum or (ii) pursuant to Rule 3-16 of Regulation S-X, in each

case, unless required to do so by the SEC in connection with the Exchange Offer.

The receipt by the Trustee of any such reports and documents pursuant to this Section 4.03 shall not constitute notice or constructive notice of any information contained in such documents or determinable from information contained in such documents, including the Issuer's compliance with any covenants hereunder (as to which the Trustee is entitled to rely exclusively on an Officers' Certificate).

Section 4.04 Delivery of Notices to Trustee. The Issuer shall, and shall cause each of its Subsidiaries to, so long as any of the Senior Secured Notes are outstanding, deliver to the Trustee and the Collateral Agent, forthwith upon any officer becoming aware of any Default, Event of Default, Event of Loss, Event of Eminent Domain or Title Event or, an Officers' Certificate specifying with particularity any such Default, Event of Default, Event of Loss, Event of Eminent Domain or Title Event and, if applicable, what action the Issuer is taking or proposes to take with respect thereto.

Section 4.05 Stay, Extension and Usury Laws. The Issuer covenants (to the extent that it may lawfully do so) that it shall not at any time insist upon, plead, or in any manner whatsoever claim or take the benefit or advantage of, any stay, extension or usury law wherever enacted, now or at any time hereafter in force, that may affect the covenants or the performance of its obligations under this Indenture and the Senior Secured Notes; and the Issuer (to the extent it may lawfully do so) hereby expressly waives all benefit or advantage of any such law, and covenants that it shall not, by resort to any such law, hinder, delay or impede the execution of any power herein granted to the Trustee, but shall suffer and permit the execution of every such power as though no such law has been enacted.

Section 4.06 Restrictions on Sale of Assets. The Issuer shall not nor shall the Issuer permit any of its Subsidiaries to sell, lease (as lessor) or transfer (as transferor) any property or assets (other than to a Guarantor) except:

(a) in the ordinary course of business; or

(b) property which is worn out, obsolete or no longer useful or necessary in connection with the operation of a Project as certified by the Issuer, including the 50% undivided interest of Mammoth-Pacific in those certain BLM geothermal resource leases CA 14414, CA 14405, CA 14406, CA 14407 and CA 11672 or the interest of Steamboat Development in that certain BLM Right of Way N-77428 or as a result of the lapse of geothermal leases due to the failure to commence commercial production of geothermal resources under such leases; or

(c) property comprising the Desert Peak 1 Plant and related real estate rights if the Issuer improves the output of the other facility currently located at the Brady Plant or adds a facility on the Brady site so that the overall output of the facilities located at Brady equals or exceeds the aggregate of (i) the then current output of the Desert Peak 1 Plant plus (ii) the current

output of the other facility currently located at the Brady Plant (the aggregate of (i) and (ii) referred to as the "Combined Brady Output"); provided, that prior to any such sale, lease or transfer, (i) the Geothermal Consultant shall have certified that after giving effect to such sale, lease or transfer, the Brady Plant has the necessary geothermal resources to enable the Brady Plant to produce the Combined Brady Output through the Final Maturity Date (subject to normal geothermal resource degradation in an amount no worse than that which is

projected for the Desert Peak 1 Plant) and (ii) the power purchase agreement pursuant to which the Brady Plant operates at such time continues to be in full force and effect after giving effect to such sale, lease or transfer and provides for delivery of output not less than the Combined Brady Output.

The Collateral Agent shall be obligated to release the Lien of the Security Documents upon the Issuer's transfer of any property or assets in compliance with this covenant and receipt by the Collateral Agent of an Officer's Certificate stating that such transfer is in compliance with this covenant.

Section 4.07 Insurance. The Issuer shall, and shall cause each of its Subsidiaries to, maintain or cause to be maintained business interruption insurance, casualty insurance, including flood and earthquake coverage, and primary and excess liability insurance, as well as customary worker's compensation (upon hiring of employees) and automobile insurance and such other insurance, if any, as is generally carried by companies engaged in similar businesses and owning similar properties in the same general areas and financed in a similar manner. To the extent any such casualty insurance covers both the Issuer, its Subsidiaries and/or a Project, on the one hand, and any other owner and/or plant, on the other hand, the Issuer shall ensure that it has specifically designated as applicable solely to it, its Subsidiaries and the Projects "all risk" property insurance coverage in an amount based upon the estimated full replacement value of the Plants (provided that earthquake and flood coverages may be subject to an annual aggregate limit with respect to the Issuer and its Affiliates' facilities of not less than \$5 million with respect to flood and \$10 million with respect to earthquake) and business interruption insurance in an amount of not less than the maximum fixed expenses projected over any four month period during the succeeding twelve month period (including, without limitation, debt service expenses). The Issuer shall not, nor shall the Issuer permit any of its Subsidiaries to, reduce or change such insurance coverages if the Insurance Consultant determines that such reduction or cancellation would not be reasonable under the circumstances and the insurance coverages sought to be reduced or changed are available on commercially reasonable terms or that another level of coverage greater than that proposed by the Issuer is available on commercially reasonable terms (in which case such coverage may be reduced to the higher of such available levels). The Issuer shall, and the Issuer shall cause each of its Subsidiaries (other than Ormesa prior to the Ormesa Support Date) to, cause the Collateral Agent to be named as loss payee and/or as an additional insured, as appropriate; all insurance policies shall provide for at least 30 days' written notice to the Collateral Agent of a cancellation (except cancellation due to failure to pay premiums, which may be on no less than 10 days prior written notice to the Collateral Agent) or reduction in the amount of coverage or of a material change in coverage.

-60-

Page 61

Section 4.08 Governmental Approvals; Title. The Issuer shall, and shall cause each of its Subsidiaries to, at all times (i) obtain and maintain in full force and effect the Governmental Approvals and other consents and approvals required at any time in connection with the Issuer's business and (ii) preserve and maintain good and valid title to our properties and assets (subject to no Liens other than Permitted Liens), except in each case where the failure to do so in clause (i) or (ii) could not reasonably be expected to have a Material Adverse Effect.

Section 4.09 Limitation on Nature of Business. The Issuer shall not, and shall not permit or cause any of its Subsidiaries to, engage or enter into any business other than, directly or indirectly the ownership,

operation and maintenance of the Plants and activities incidental thereto.

Section 4.10 Prohibition on Merger or Other Fundamental Changes. The Issuer shall not, nor shall it permit any of its Subsidiaries to, enter into any transaction of merger or consolidation, sell all or substantially all of its or their respective assets to any other Person (other than a merger, consolidation or sale to or into the Issuer or any of the Guarantors), change its or their respective forms of organization or its or their respective businesses, liquidate or dissolve its or their self (or suffer any liquidation or dissolution) or discontinue its or their respective businesses. The Issuer shall not, nor shall it permit any of its Subsidiaries to, purchase or otherwise acquire all or substantially all of the assets of any other Person (other than (x) the acquisition of the Capital Stock of Mammoth-Pacific that the Issuer does not own as of the Closing Date, (y) an acquisition by the Issuer or a Guarantor of assets of another Guarantor and (z) the acquisition of a Qualified Project in accordance with the terms of this Indenture).

Section 4.11 Restricted Payments. The Issuer shall not, nor shall it permit or cause any of its Subsidiaries to, make any Restricted Payments, except (i) if the Issuer meets the Distribution Conditions set forth in Section 3.8(b) of the Depositary Agreement and has satisfied Sections 3.08 (d) and (e) hereof, if applicable, and (ii) Restricted Payments made by any of its Subsidiaries; provided, that such Restricted Payments in the case of clause (ii) are made to the Issuer or a Guarantor.

Section 4.12 Revenue Account. The Issuer shall, and it shall cause each of its Subsidiaries (other than Ormesa prior to the Ormesa Support Date) to, take all actions as may be necessary to cause all revenues actually received by them from the Projects or otherwise to be deposited in the Revenue Account to the extent required by the Depositary Agreement. The Issuer shall, and shall cause its Subsidiaries (other than Ormesa prior to the Ormesa Support Date) to (x) provide irrevocable written instruction to each power purchaser related to a Project, to pay all revenues paid under power purchase agreements with respect to the Projects directly into the Revenue Account (other than with respect to the Mammoth Plant; provided, however, if at any time the Issuer or any Guarantor acquires that portion of the Capital Stock of Mammoth-Pacific that the Issuer does not own as of the Closing Date or the Issuer otherwise acquires control of 100% of the Mammoth Project, the Issuer shall, or the Issuer shall cause such Guarantor, as the case may be, to arrange for all revenues paid under power purchase agreements with respect to the Mammoth Project to be paid directly into the Revenue Account), (y) use

-61-

Page 62

commercially reasonable efforts to arrange for all other revenues to be paid directly into the Revenue Account and (z) cause any other revenues received by the Issuer or any of its Subsidiaries to be promptly paid into the Revenue Account.

Section 4.13 Transactions with Affiliates. The Issuer shall not, and shall not permit any of its Subsidiaries to, make any payment to, or sell, lease, transfer or otherwise dispose of any of its respective properties or assets to, or purchase any property or assets from, or enter into or make or amend any transaction, contract, agreement, understanding, loan, advance or guarantee with, or for the benefit of, any of its respective Affiliates (each, an "Affiliate Transaction"), unless:

(a) the Affiliate Transaction is on terms that are no less favorable to the Issuer or the relevant Subsidiary than those that would have been obtained in a comparable transaction by the Issuer or such Subsidiary with an unrelated Person; and

(b) the Issuer delivers to the Trustee:

(i) with respect to any Affiliate Transaction or series of related Affiliate Transactions involving aggregate consideration in excess of \$5 million, a resolution of the Board of Directors set forth in an Officers' Certificate certifying that such Affiliate Transaction complies with this covenant and that such Affiliate Transaction has been approved by a majority of the Board of Directors; and

(ii) with respect to any Affiliate Transaction or series of related Affiliate Transactions involving aggregate consideration in excess of \$25 million, a positive opinion as to the fairness to the Issuer of such Affiliate Transaction from a financial point of view issued by an accounting, appraisal or investment banking firm of national standing. The Trustee shall have no obligation to review the fairness opinion, but shall hold such opinion for the benefit of the Holders.

The following items shall not be deemed to be Affiliate Transactions and, therefore, shall not be subject to the provisions of the prior paragraph:

(a) any employment agreement, employee benefit plan, officer and director indemnification agreement or any similar arrangement entered into by the Issuer or any of its Subsidiaries in the ordinary course of business;

(b) transactions between or among the Issuer and/or its Wholly-Owned Subsidiaries;

(c) payment of reasonable directors' fees to Persons who are not otherwise Affiliates of the Issuer;

(d) Restricted Payments that do not violate the provisions of Section 4.11 of this Indenture;

-62-

Page 63

(e) loans or advances to employees in the ordinary course of business not to exceed \$1.0 million in the aggregate at any one time outstanding;

(f) transactions pursuant to written agreements with the Issuer's Affiliates in place as of the date of this Indenture;

(g) the transfer of the 50% undivided interest of OrMammoth in those certain BLM geothermal resource leases CA 14414, CA 14405, CA 14406, CA 14407 and CA 11672 or the interest of Steamboat Development in that certain BLM Right of Way N-77428 to any Affiliate of the Issuer;

(h) any amendments, modifications or replacements of, or waivers under, any written agreement described under clause (f) of this paragraph that is not a Material Project Document; provided that no such amendment, modification or waiver alters any such agreement in a manner than is materially adverse to the interests of Holders; and

(i) any agreement to do anything set forth in items (a) through (h) of this paragraph.

Section 4.14 Exercise of Rights. The Issuer shall not, and shall not permit any of its Subsidiaries to, exercise, or fail to exercise, its

or their respective rights under the Project Documents in a manner which could reasonably be expected to result in a Material Adverse Effect with respect to the Issuer or the applicable Subsidiary. The Issuer shall, and shall cause each of its Subsidiaries to, diligently pursue all rights to distributions or dividends and Loss Event Proceeds, Eminent Domain Proceeds and Title Proceeds upon the occurrence of a Loss Event, an Event of Eminent Domain or a Title Event, as the case may be.

Section 4.15 Termination or Amendment to Material Project Documents. The Issuer shall not, and shall not permit any of its Subsidiaries to, terminate, amend in any material adverse respect, replace, modify in any material adverse respect or assign, other than pursuant to the Security Documents (or consent to any of the foregoing) any of the Material Project Documents to which the Issuer or they are a party, provided that (x) Material Project Documents may be terminated so long as the Issuer enters into one or more replacement agreements, and (y) the Issuer's Subsidiaries may terminate Material Project Documents with respect to the rights and obligations of the Desert Peak 1 Plant if the Issuer improves the output of the Brady Plant and otherwise complies with the provisions set forth in Section 4.06(c) of this Indenture.

Section 4.16 Additional Project Documents. The Issuer shall not, and shall not permit any of its Subsidiaries to, enter into any Additional Project Documents (a) if entering into such document could reasonably be expected to result in a Material Adverse Effect, provided, however, that nothing in the foregoing is intended to preclude the Issuer or any of its Subsidiaries from entering into agreements to sell Renewable Energy Credits in connection with any Project as contemplated by the terms of the Project Documents or required by Applicable Law or (b) if entering into any such Additional Project Document constituting power purchase agreements,

-63-

Page 64

fuel supply and transportation agreements, transmission agreements and other agreements, contracts or other arrangements for the purchase of fuel for, or the sale of electricity from, the Project results in the breach of, or conflict with the terms of, any then-existing power purchase agreement.

Section 4.17 Performance of Project Documents. The Issuer shall, and shall cause each of its Subsidiaries to, perform and observe their respective covenants and obligations under all of the Project Documents, except where the failure to do so could not reasonably be expected to result in a Material Adverse Effect. Section 4.18 Limitations on Indebtedness. The Issuer shall not create, incur or suffer to exist any Indebtedness except the following Indebtedness (collectively, "Permitted Indebtedness"):

(a) Indebtedness represented by the Senior Secured Notes to be issued on the Closing Date and the Exchange Notes to be issued pursuant to the Registration Rights Agreement;

(b) Indebtedness incurred by the Issuer to (x) make capital improvements to a Project that are required by law or the terms of the Project Documents, and (y) purchase that portion of the Capital Stock of Mammoth-Pacific that the Issuer does not own as of the Closing Date; provided, that:

(i) no Default or Event of Default has occurred and is continuing at the time such Indebtedness is proposed to be incurred or would result from the incurrence of such additional Indebtedness; and

(ii) (1) the Issuer's calculations demonstrate that after giving effect to the incurrence of such additional Indebtedness, the minimum projected Debt Service Coverage Ratio for each Annual Period (each such period taken as a single accounting period) following the Quarterly Period in which such additional Indebtedness is incurred through the Final Maturity Date (provided, however, (x) with respect to Indebtedness incurred within one year of the Final Maturity Date, the period tested shall be a period commencing on the first day of the Quarterly Period immediately following such incurrence and ending on the Final Maturity Date, and (y) with respect to the Annual Period in which such Indebtedness is incurred (unless such Indebtedness is incurred on the first day of such Annual Period), the first period tested shall be the period commencing with the first day of the Quarterly Period immediately following such incurrence and ending on the last day of the Annual Period in which such Indebtedness is incurred), shall not be less than 1.40 to 1.0; and (2) the Issuer shall have delivered a certificate to the Collateral Agent confirming the foregoing clause (b)(i) and clause (b)(ii)(1) and stating that the Capital Expenditures proposed by the Issuer conform to such legal or Project Document requirements;

-64-

Page 65

(c) Indebtedness incurred by the Issuer to make discretionary capital improvements to a Project, provided, that:

(i) no Default or Event of Default has occurred and is continuing at the time such Indebtedness is proposed to be incurred or would result from the incurrence of such additional Indebtedness; and

(ii) (1) the Issuer's calculations demonstrate that (x) the minimum projected Debt Service Coverage Ratio for each Annual Period through the Final Maturity Date and (y) the average projected Debt Service Coverage Ratio for the Annual Periods through the Final Maturity Date, equals or exceeds the projected Debt Service Coverage Ratio for the corresponding Annual Period or Annual Periods, as the case may be, immediately prior to the incurrence of such additional Indebtedness and the making of any such capital improvement (provided, however, (i) with respect to Indebtedness incurred within one year of the Final Maturity Date, the period tested shall be a period commencing on the first day of the Quarterly Period immediately following such incurrence and ending on the Final Maturity Date, and (ii) with respect to the Annual Period in which such Indebtedness is incurred (unless such Indebtedness is incurred on the first day of such Annual Period), the first period tested shall be the period commencing with the first day of the Quarterly Period immediately following such incurrence and ending on the last day of the Annual Period in which such Indebtedness is incurred) and (2) the Issuer shall have delivered a certificate to the Collateral Agent confirming the foregoing clause (c)(i) and clause (c)(ii)(1);

(d) additional Indebtedness incurred by the Issuer not to exceed an aggregate principal amount outstanding at any time of \$10 million;

(e) Subordinated Debt;

(f) Indebtedness incurred by the Issuer in order to refinance existing Indebtedness incurred pursuant to clause (b), (c) or (e) above, provided, (1) such refinancing Indebtedness has an average life equal to or greater than the average life of the Indebtedness being refinanced, (2) the aggregate amount of such refinancing Indebtedness does not exceed the principal amount of the Indebtedness being refinanced and (3) to the extent that the original incurrence of the refinanced Indebtedness was subject to certain conditions and requirements pursuant to this Indenture, such refinancing Indebtedness shall comply with all of the conditions and requirements applicable to the refinanced Indebtedness;

(g) Indebtedness outstanding under the Ormesa Credit Agreement prior to the Ormesa Support Date; and

-65-

Page 66

(h) additional Senior Secured Notes issued by the Issuer to purchase not more than one Qualified Project through the Final Maturity Date of the Senior Secured Notes; provided, that:

(i) no Default or Event of Default has occurred and is continuing at the time such Indebtedness is proposed to be incurred or would result from the incurrence of such additional Indebtedness;

(ii) no Indebtedness (other than the Senior Secured Notes and Subordinated Debt issued under the Ormat Nevada Subordinated Loan) is incurred or assumed in connection with the purchase of the Qualified Project;

(iii) (1) the Issuer's calculations demonstrate that the minimum projected Debt Service Coverage Ratio for each Annual Period (each such period taken as a single accounting period) following the Quarterly Period in which such additional Indebtedness is incurred through the Final Maturity Date (provided, however, (i) with respect to Indebtedness incurred within one year of the Final Maturity Date, the period tested shall be the period commencing on the first day of the Quarterly Period immediately following such incurrence and ending on the Final Maturity Date, and (ii) with respect to the Annual Period in which such Indebtedness is incurred (unless such Indebtedness is incurred on the first day of such Annual Period), the first period tested shall be the period commencing with the first day of the Quarterly Period immediately following such incurrence and ending on the last day of the Annual Period in which such Indebtedness is incurred), shall not be less than 1.55 to 1.0, and (2) the Issuer shall have delivered a certificate to the Collateral Agent confirming the foregoing clauses (h)(i), (h)(ii), and clause (h)(iii)(1) and stating that the Project acquired is a Qualified Project.

Section 4.19 Limitation on Indebtedness of Subsidiaries. The Issuer shall not permit any of its Subsidiaries to create, incur or suffer to exist any Indebtedness other than (i) Indebtedness owed to the Issuer represented by an intercompany note and (ii) Indebtedness represented by the Guarantees.

Section 4.20 Limitations on Guarantees. The Issuer shall not, and shall not permit any of its Subsidiaries to, contingently or otherwise, be or become liable in connection with any Guarantee, except for (i) endorsements and similar obligations in the ordinary course of business and (ii) Guarantees of the Senior Secured Notes.

Section 4.21 Prohibitions on Other Obligations or Assignments. The Issuer shall not, and shall not permit any of its Subsidiaries to, assign any of its or its Subsidiaries' respective rights or obligations under any Financing Document.

-66-

Page 67

Section 4.22 Books and Records, Inspection. The Issuer shall, and shall cause each of its Subsidiaries to, maintain books and records in accordance with GAAP and provide the Trustee, the Collateral Agent and the Independent Engineer with reasonable inspection rights with respect to the Projects and such books and records.

Section 4.23 Maintenance of Existence. The Issuer shall, and shall cause each of its Subsidiaries to, do or cause to be done all things necessary to preserve and keep in full force and effect its and their (i) existence and good standing under the laws of their respective states of organization, in accordance with their organizational documents (as the same may be amended from time to time), (ii) qualification to do business in each jurisdiction in which the character of the properties owned or leased by it or in which the transaction of its business as conducted or proposed to be conducted makes such qualification necessary and (iii) powers, rights (charter and statutory), privileges, licenses and franchises with respect to the Projects except where the failure to maintain any of the foregoing in clause (iii) could not reasonably be expected to have a Material Adverse Effect.

Section 4.24 Additional Documents; Filings and Recordings. The Issuer shall, and shall cause each of its Subsidiaries to, execute and deliver, as requested by the Trustee or the Collateral Agent, such other documents as shall reasonably be necessary or advisable in order to effect or protect the rights and remedies of the Trustee or the Collateral Agent, as the case may be, granted or provided for by the Security Documents to which the Issuer is a party and to consummate the transactions contemplated therein. The Issuer shall, at its own expense, take all reasonable actions (a) that are requested by the Trustee or the Collateral Agent, or (b) that an Authorized Officer of the Issuer has actual knowledge are necessary as a legal matter, to establish, maintain and perfect the first priority security interests of Trustee and the Collateral Agent in the Collateral, subject to Permitted Liens. Without limiting the generality of the foregoing, the Issuer shall execute or cause to be executed and shall file or cause to be filed such financing statements, continuation statements, and fixture filings and such mortgages, or deeds of trust in all places necessary or advisable to establish, maintain and perfect the Liens purported to be provided for in the Security Documents, subject to Permitted Liens.

Section 4.25 Dividend and Other Payment Restrictions Affecting Subsidiaries. The Issuer shall not, nor shall it permit any of its Subsidiaries to, directly or indirectly, create or permit to exist or become effective any consensual encumbrance or restriction on the ability of any of its Subsidiaries to:

(a) pay dividends or make any other distributions on its Capital Stock to the Issuer or any of its Subsidiaries, or with respect to any other interest or participation in, or measured by, its profits, or pay any Indebtedness owed to the Issuer or any of its Subsidiaries;

(b) make loans or advances to the Issuer or any of its

(c) transfer any of its properties or assets to the Issuer or any of its Subsidiaries.

However, the preceding restrictions shall not apply to encumbrances or restrictions existing under or by reason of:

(a) any of the Financing Documents;

(b) Applicable Law;

(c) customary non-assignment provisions in contracts, agreements, leases, permits or licenses entered into or issued in the ordinary course of business and consistent with past practices;

(d) purchase money obligations for property acquired in the ordinary course of business and Capital Lease Obligations that impose restrictions on the property purchased or leased of the nature described in clauses (a) and (c) of the preceding paragraph;

(e) Indebtedness incurred pursuant to clause (f) of the definition of Permitted Indebtedness; provided that the restrictions contained in the agreements governing such Indebtedness are not materially more restrictive, taken as a whole, than those contained in the agreements governing the Indebtedness being refinanced;

(f) Liens securing Indebtedness otherwise permitted to be incurred under Section 4.27 that limit the right of the debtor to dispose of the assets subject to such Liens or to use the proceeds of any such disposition; and

(g) restrictions on cash or other deposits or net worth imposed by customers under contracts entered into in the ordinary course of business.

Section 4.26 Budget And Expenditures. The Issuer shall, and shall cause each of its Subsidiaries to, deliver, at its own expense, an annual Operating Budget to the Trustee, the Collateral Agent and the Independent Engineer at least 30 days prior to the beginning of each fiscal year of the Issuer.

Section 4.27 Limitation on Liens. The Issuer shall not, and shall not permit any of its Subsidiaries to, grant, create, incur or suffer to exist any Liens upon any of its or their assets, except for the Permitted Liens.

Section 4.28 Compliance With Laws. The Issuer shall, and shall cause each of its Subsidiaries to, comply with all applicable laws and Governmental Approvals, except where non-compliance could not reasonably be expected to have a Material Adverse Effect.

Section 4.29 Operation and Maintenance. The Issuer shall, and shall cause each of its Subsidiaries to, at all times maintain and operate each Project in compliance with Prudent Industry Practices.

Section 4.30 Additional Subsidiaries; Bank Accounts. The Issuer shall own at all times, directly or indirectly, 100% of the issued and outstanding Capital Stock of each of its Subsidiaries. The Issuer shall own at all times directly or indirectly, not less than 50% of the issued and outstanding Capital Stock of Mammoth-Pacific. The Issuer shall not, and shall not permit any of its Subsidiaries to, acquire or create any additional Subsidiaries; provided, however, this shall not limit the Issuer's ability or the ability of any Guarantor to create a Wholly-Owned Subsidiary that becomes a Guarantor in accordance with Article IX of the Indenture by execution of a Supplemental Indenture in the form of Exhibit G hereto on or prior to the date of acquisition, to (i) acquire the Capital Stock of Mammoth-Pacific that the Issuer does not own as of the Closing Date or (ii) acquire a Qualified Project in accordance with the terms of this Indenture. The Issuer shall not, and shall not permit any of its Subsidiaries to, establish any bank account other than the Accounts and not more than two checking accounts (each, a "Checking Account"), provided that the Secured Parties shall have a perfected security interest in such Checking Accounts pursuant to an agreement which is reasonably satisfactory to the Collateral Agent.

Section 4.31 Maintenance of Water Supply; Access Rights. The Issuer shall, and shall cause its Subsidiaries to, at all times maintain in full force and effect the agreements and other arrangements to ensure that (i) the Projects have a constant and continuous supply of water to the extent necessary to permit the operation of the Projects at levels contemplated in the Projections and (ii) the Projects have such real estate rights as may be necessary to ensure the ingress to and egress from each of the Projects.

Section 4.32 No Abandonment. The Issuer shall, and shall cause its Subsidiaries not to permit the occurrence of any Event of Abandonment.

Section 4.33 Consents to Assignment of Unassigned Leases Additional Project Documents. The Issuer shall, and shall cause its Subsidiaries to, use its commercially reasonable efforts to obtain executed consents to the assignment of each Unassigned Lease and each Additional Project Document.

Section 4.34 Loans. The Issuer shall not, and shall not permit its Subsidiaries to, make any loan or advance other than in the ordinary course of business (other than a loan or advance to a Guarantor that constitutes Indebtedness owed to the Issuer and that is represented by an intercompany note); provided, however, the Issuer may direct the investment of funds on deposit in the accounts in Permitted Investments in accordance with the terms of the Financing Documents.

Section 4.35 Amendments to Organizational Documents. The Issuer shall not, and shall cause its Subsidiaries not to, amend, modify or supplement its or their Organizational

Documents except such amendments as (i) could not reasonably be expected to result in a Material Adverse Effect and (ii) could not reasonably be expected to adversely affect any provisions of such organizational documents that relate to the bankruptcy remoteness of the Issuer.

Section 4.36 Removal of Independent Consultant. The Issuer shall not remove or otherwise replace any of the Independent Consultants; provided that any Independent Consultant may be replaced or removed by the Issuer at any time (i) in the event that any such Independent Consultant shall have become incapable of acting or performing its services, or otherwise fails to perform its function as the Independent Consultant in the manner contemplated

by this Indenture and the other Financing Documents, or shall have been adjudged bankrupt or insolvent, or a receiver of such Independent Consultant or of its property shall have been appointed, or any public office shall have taken control or charge of such Independent Consultant or its property or affairs for the purpose of rehabilitation, conservation or liquidation at any time or (ii) so long as the Issuer shall have certified to the Trustee (which certification shall have been delivered by an Authorized Representative of the Issuer) that the replacement Independent Consultant being retained to perform the services of the removed or replaced Independent Consultant is properly qualified to perform such services at least to the same degree, extent and quality as the replaced or removed Independent Consultant and the same could not reasonably be expected to materially adversely affect the rights of the Holders.

Section 4.37 Payments for Consent. The Issuer shall not, and shall not permit any of its Subsidiaries to, directly or indirectly, pay or cause to be paid any consideration to or for the benefit of any holder of Senior Secured Obligations for or as an inducement to any consent, waiver or amendment of any of the terms or provisions of any Financing Document unless such consideration is offered to be paid and is paid to all Holders of Senior Secured Notes that consent, waive or agree to amend in the time frame set forth in the solicitation documents relating to such consent, waiver or agreement.

Section 4.38 Limitations on Ormesa. On the Ormesa Support Date, the Issuer shall cause Ormesa to provide a Lien on substantially all of its property in favor of the Collateral Agent (including, without limitation, the consent of Southern California Edison) pursuant to the terms of the Security Agreement and to execute a Guarantee in accordance with Article IX of this Indenture by execution of a Supplemental Indenture in the form of Exhibit G hereto. The Issuer shall not grant any Liens on the Capital Stock it holds of Ormesa except to the Collateral Agent and shall not permit Ormesa to incur any Indebtedness or become subject to any Lien other than the Liens contemplated in this Section 4.38 and Liens under the Ormesa Credit Agreement.

Section 4.39 Limitation on Issuance and Sale of Capital Stock of Subsidiaries. The Issuer shall not permit any of its Subsidiaries to transfer, convey, sell or otherwise dispose of Capital Stock in any of its Subsidiaries to any Person, other than the Issuer or one of the Guarantors.

-70-

Page 71

Section 4.40 Maintenance of Qualifying Facility Status. The Issuer shall, and shall cause each of its Operating Subsidiaries to, operate and maintain each Plant as a Qualifying Facility.

Section 4.41 Payment of taxes and claims. The Issuer shall and shall cause each of its Subsidiaries to pay and discharge (a) all taxes, assessments and governmental charges or levies imposed upon it, or upon its income or profits, or upon any of its properties before they shall become delinquent, (b) all lawful claims (including claims for labor, materials and supplies) which, if unpaid, could reasonably be expected to give rise to a Lien upon any of its properties; and (c) except as prohibited under the Financing Documents, all of its other Indebtedness as it shall become due; provided, however, neither the Issuer nor its Subsidiaries shall be required to pay any such tax, assessment, charge, levy, claim or Indebtedness which is being contested in good faith by appropriate proceedings, as to which adequate reserves have been established in accordance with GAAP, unless the failure to make such payment (i) could reasonably be expected to give rise to an immediate right to foreclose on a Lien securing such amounts or (ii) could reasonably be expected to have a Material Adverse Effect.

Section 4.42 Repayment of Ormesa Credit Agreement. As consideration for the Lien and Guarantees to be provided by Ormesa pursuant to Section 4.38 hereof, a portion of the proceeds of the Initial Notes shall be

deposited in the Ormesa Repayment Account and the Issuer shall use its commercially reasonable efforts to cause the Ormesa Credit Agreement to be repaid in full with proceeds from the Ormesa Repayment Account or otherwise in accordance with the Depositary Agreement and cause all liabilities of Ormesa under the Ormesa Credit Agreement to be discharged on or prior to January 31, 2005.

Section 4.43 Provision of Additional Liens. The Issuer shall cause Liens to be provided in favor of the Collateral Agent and the relevant Guarantor shall become party to the Security Documents with respect to (i) the Mammoth Plant if, at any time, the Issuer or one of the Guarantors acquires that portion of the Capital Stock of Mammoth-Pacific that the Issuer or the Guarantors do not own as of the Closing Date, or the Issuer or one of the Guarantors otherwise acquires control of 100% of the interests in the Mammoth Plant and (ii) a Qualified Project upon an acquisition of a Qualified Project.

Section 4.44 Galena Re-powering. The Issuer shall, and shall cause its Subsidiaries to, use their commercially reasonable efforts to effect the Galena Re-Powering.

Section 4.45 Title Policies. The Issuer shall use its commercially reasonable efforts to remove any survey exceptions with respect to Title Policies.

Section 4.46 Preservation of Liens. The Issuer shall take all actions and shall cause its Subsidiaries to take all actions necessary to preserve the validity, perfection and priority of the Liens and security interests in the Collateral created pursuant to the Security Documents.

-71-

Page 72

Section 4.47 Title Reports. In connection with all real estate over which the Collateral Agent holds a Deed of Trust, the Issuer shall provide to the Collateral Agent a title report and title policy, including endorsements, or title opinion in form and substance satisfactory to the Collateral Agent, and evidence that the Deed of Trust has been filed for recording; provided, that, subject to Section 4.45 hereof, such title policies may contain a survey exception.

ARTICLE V

DEFAULTS AND REMEDIES

Section 5.01 Events of Default. The following events constitute an "Event of Default" under this Indenture:

(a) the failure to pay or cause to be paid any principal of, interest, premium, Liquidated Damages, if any, fees or any other obligations on the Senior Secured Notes for five or more days after the same becomes due and payable, whether by scheduled maturity or required prepayment or by acceleration or otherwise;

(b) any representation or warranty made by the Issuer, any Subsidiary or Ormat Nevada under any Financing Document shall prove to have been untrue or misleading as of the time made, confirmed or furnished and the fact, event or circumstance that gave rise to such inaccuracy has had or could reasonably be expected to result in a Material Adverse Effect and such fact, event or circumstance shall continue to be uncured for 30 or more days from the date a Responsible Officer of the Issuer, such Subsidiary or Ormat Nevada, as the case may be, obtains knowledge thereof; provided, that if the Issuer, such Subsidiary or Ormat Nevada, as the case may be, commences efforts to cure such fact, event or circumstance within such 30-day period, the Issuer, such Subsidiary or Ormat Nevada, as the case may be, may continue to effect such cure

and such misrepresentation will not be deemed an Event of Default for an additional 90 days so long as the Issuer, such Subsidiary or Ormat Nevada, as the case may be, is diligently pursuing such cure;

(c) the failure by the Issuer or any Subsidiary to perform or observe any covenant contained in Sections 4.06, 4.07, 4.09, 4.10, 4.11, 4.15, 4.16, 4.18, 4.19, 4.20, 4.23, 4.27 and 4.46 and such failure shall continue uncured for 30 or more days after a Responsible Officer of the Issuer obtains knowledge thereof;

(d) the failure by the Issuer, any Subsidiary or Ormat Nevada to perform or observe any of the other covenants in the Financing Documents that the Issuer, such Subsidiary or Ormat Nevada is a party to (other than such failures described in clause (a) or (c) above) and such failure shall continue uncured for 30 or more days after a Responsible Officer of the Issuer, any Subsidiary or Ormat Nevada, as the case may be, obtains knowledge thereof; provided that if the Issuer, any Subsidiary or Ormat Nevada, as the case may be, commence efforts to cure such default within such 30-day period, the Issuer, any Subsidiary or Ormat Nevada, as the case may

-72-

Page 73

be, may continue to effect such cure of the default and such default will not be deemed an Event of Default for an additional 90 days so long as the Issuer, any Subsidiary or Ormat Nevada, as the case may be, is diligently pursuing such cure;

(e) the Issuer or any Subsidiary of the Issuer:

- (i) admits in writing its inability, or is generally unable, to pay its debts as the debts become due or makes a general assignment for the benefit of creditors; or
- (ii) commences any case, proceeding or other action seeking reorganization, arrangement, adjustment, liquidation, dissolution or composition of it or its debts under any applicable liquidation, conservatorship, bankruptcy, moratorium, arrangement, adjustment, insolvency, reorganization or similar laws affecting the rights or remedies of creditors generally, as in effect from time to time (collectively, "Debtor Relief Law"); or
- (iii) in any involuntary case, proceeding or other action commenced against it which seeks to have an order for relief (injunctive or otherwise) entered against it, as debtor, or seeks reorganization, arrangement, adjustment, liquidation, dissolution or composition of it or its debts under any Debtor Relief Law, (A) fails to obtain a dismissal of such case, proceeding or other action within ninety (90) days of its commencement, or (B) converts the case from one chapter of the Bankruptcy Reform Act of 1978, as amended, to another chapter, or (C) is the subject of an order for relief that remains unstayed and in effect for a period of ninety (90) days; or
- (iv) has a trustee, receiver, custodian or other official appointed for or to take possession of all or any part of its property or has any court take

jurisdiction of any of its property, which action remains undismissed for a period of ninety (90) days;

(f) the entry of one or more final and non-appealable judgment or judgments for the payment of money in excess of \$10.0 million (exclusive of judgment amounts covered by insurance) against the Issuer or any Subsidiary, which remain unpaid or unstayed for a period of 60 or more consecutive days;

(g) an event of default under any Permitted Indebtedness (other than Indebtedness referred to in clause (a) above) that results in Indebtedness in excess of \$10.0 million becoming due and payable prior to its stated maturity;

(h) any Governmental Approval required for the operation of any Project or any material portion thereof owned by the Issuer or any Subsidiary is revoked, terminated,

-73-

Page 74

withdrawn or ceases to be in full force and effect if such revocation, termination, withdrawal or cessation has had or could reasonably be expected to have a Material Adverse Effect and such revocation, termination, withdrawal or cessation is not cured within 60 days following the occurrence thereof;

(i) any Material Project Document or Third Party Consent or any material provision thereof (i) ceases to be valid and binding and in full force and effect prior to its stated maturity date other than as a result of an amendment or termination permitted under this Indenture or (ii) a party thereto fails to perform or observe any of its covenants or obligations thereunder or makes any material misrepresentation thereunder and such event has had or could reasonably be expected to have a Material Adverse Effect; provided that, in any such event no such event shall be an Event of Default if within 180 days from the occurrence of any such event, (a) such Material Project Document or Third Party Consent or material provision thereof is reinstated as a valid and binding agreement among the parties thereto, (b) any breaching party resumes performance and otherwise cures such misrepresentation or failure to perform or observe its covenants or obligations under the Material Project Documents or Third Party Consents or (c) in the case of Material Project Documents, the Issuer enters into an Additional Project Document in replacement thereof, as permitted under this Indenture;

(j) any of the Security Documents or any other Financing Document ceases to be in full force and effect or any Lien granted therein ceases to be a valid and perfected Lien in favor of the Secured Parties on the Collateral described therein with the priority purported to be created thereby; provided, however, that the Issuer shall have 10 days after any of the Issuer or its Subsidiaries' Responsible Officers obtains knowledge thereof to cure any such cessation or to furnish to the Trustee, the Collateral Agent or the Depositary all documents or instruments required to cure any such cessation;

(k) the occurrence of a Change of Control; or

(l) the failure of Ormesa to prepay all of the amounts outstanding under the Ormesa Credit Agreement on or prior to January 31, 2005 or the failure of the Issuer to cause Ormesa to comply with its obligations under Sections 4.20 and 4.38 of this Indenture.

Section 5.02 Enforcement of Remedies

(a) If one or more Events of Default have occurred and are continuing, then:

(i) in the case of an Event of Default described in clause (e) above with respect to the Issuer, the entire outstanding principal amount of the Senior Secured Notes, all interest and Liquidated Damages, if any, accrued and unpaid thereon, and all premium, if any, and other amounts payable under this Indenture, if any, shall automatically become due and payable without presentment, demand, protest or notice of any kind; or

-74-

Page 75

(ii) in the case of an Event of Default described in:

- (A) clause (a) above, upon the written direction of the Holders of no less than 25% in aggregate principal amount of the Outstanding Senior Secured Notes, the Trustee shall declare the outstanding principal amount of the Senior Secured Notes to be accelerated and due and payable and all interest and Liquidated Damages, if any, accrued and unpaid thereon, and all premium, if any, and other amounts payable under this Indenture, if any, to be due and payable; or
- (B) clause (b), (c), (d), (e) (with respect to our Subsidiaries), (f), (g), (h), (i), (j), (k) or (l) above, upon the written direction of the Required Holders, the Trustee shall declare the outstanding principal amount of the Senior Secured Notes to be accelerated and due and payable and all interest and Liquidated Damages, if any, accrued and unpaid thereon, and all premium, if any, and other amounts payable under this Indenture, if any, to be due and payable.

(b) At any time after the principal of the Senior Secured Notes has become due and payable upon a declared acceleration, and before any judgment or decree for the payment of the money so due, or any portion thereof, has been entered, the Required Holders, by written notice to the Issuer and the Trustee, shall rescind and annul such declaration and its consequences if:

(i) there has been paid to or deposited with the Trustee a sum sufficient to pay

- (A) all overdue interest and Liquidated Damages, if any, on the Senior Secured Notes,
- (B) the principal of and premium, if any, on any Senior Secured Notes that have become due (including overdue principal) other than by such declaration of acceleration and interest thereon at the respective rates provided in the Senior Secured Notes for overdue principal;
- (C) to the extent that payment of such interest is lawful, interest upon overdue interest and Liquidated Damages, if any, at the respective rates provided in the Senior Secured Notes for overdue interest; and

- (D) all sums paid or advanced by the Trustee and the Collateral Agent and the reasonable compensation, expenses, disbursements, and

-75-

Page 76

advances of the Trustee, the Depositary, the Collateral Agent and their respective agents and counsel; and

(ii) all Events of Default, other than the nonpayment of the principal of the Senior Secured Notes that has become due solely by such acceleration, have been cured or waived in accordance with this Indenture.

(c) If an Event of Default has occurred and is continuing and an acceleration has occurred, the Trustee may (as the Required Holders request) direct the Collateral Agent to take possession of any or all of the Collateral or to exercise any or all other rights of the Secured Parties under the Security Documents.

If an Event of Default occurs and is continuing and is actually known to a Responsible Officer of the Trustee, the Trustee will mail to each Holder notice of the Event of Default within 30 days after the occurrence thereof. Except in the case of an Event of Default in payment of principal of, interest, premium or Liquidated Damages, if any, on any Senior Secured Note, the Trustee may withhold the notice to the Holders if the Trustee in good faith determines that withholding the notice is in the interest of the Holders.

If an Event of Default relating to failure to pay amounts owed on the Senior Secured Notes has occurred and is continuing, the Trustee may declare the principal amount of the Outstanding Senior Secured Notes, all interest accrued and unpaid thereon, and all premium and Liquidated Damages, if any, and other amounts payable under the Senior Secured Notes and this Indenture, if any, to be due and payable notwithstanding the absence of written direction from Holders of at least 25% in aggregate principal amount of the Outstanding Senior Secured Notes directing the Trustee in writing to accelerate the principal maturity of the Senior Secured Notes, unless the Required Holders direct the Trustee not to accelerate the maturity of such Senior Secured Notes, if in the good faith exercise of its discretion the Trustee determines that such action is necessary to protect the interests of the Holders.

In addition, if one or more of the Events of Default referred to in clause (a)(ii)(B) of this Section 5.02 has occurred and is continuing, the Trustee may declare the entire principal amount of the Outstanding Senior Secured Notes, all interest accrued and unpaid thereon, and all premium and Liquidated Damages, if any, and other amounts payable under the Senior Secured Notes and this Indenture, if any, to be due and payable notwithstanding the absence of written direction from the Required Holders directing the Trustee to accelerate the maturity of the Senior Secured Notes, unless the Required Holders direct the Trustee not to accelerate the maturity of the Senior Secured Notes, if in the good faith exercise of its discretion the Trustee determines that such action is necessary to protect the interests of the Holders.

Section 5.03 Other Remedies. If an Event of Default occurs and is continuing, the Trustee may pursue any available remedy to collect the payment of principal, interest, premium, and Liquidated Damages, if any, on the Senior Secured Notes or to enforce the performance of any provision of the Senior Secured Notes or this Indenture.

-76-

The Trustee may maintain a proceeding even if it does not possess any of the Senior Secured Notes or does not produce any of them in the proceeding. A delay or omission by the Trustee or any Holder of a Senior Secured Note in exercising any right or remedy accruing upon an Event of Default shall not impair the right or remedy or constitute a waiver of or acquiescence in the Event of Default. All remedies are cumulative to the extent permitted by law.

Section 5.04 Waiver of Past Defaults. Required Holders by notice to the Trustee may on behalf of the Holders of all of the Senior Secured Notes waive an existing Default or Event of Default and its consequences hereunder, except a continuing Default or Event of Default in the payment of the principal of, premium, Liquidated Damages if any, or interest on, the Senior Secured Notes; provided, however, that the Required Holders may rescind an acceleration and its consequences, including any related payment default that resulted from such acceleration. Upon any such waiver, such Default shall cease to exist, and any Event of Default arising therefrom shall be deemed to have been cured for every purpose of this Indenture; but no such waiver shall extend to any subsequent or other Default or impair any right consequent thereon.

Section 5.05 Control by Majority. The Required Holders have the right to direct the time, place and method of conducting any proceeding for any right or remedy available to the Trustee or exercising any trust or power conferred on the Trustee in this Indenture.

Section 5.06 Limitation on Suits. A Holder of a Senior Secured Note may pursue a remedy with respect to this Indenture or the Senior Secured Notes only if:

- (a) the Holder of a Senior Secured Note gives to the Trustee written notice of a continuing Event of Default;
- (b) the Holders of at least 25% in aggregate principal amount of the then outstanding Senior Secured Notes make a written request to the Trustee to pursue the remedy;
- (c) such Holder of a Senior Secured Note or Holders of Senior Secured Notes offer and, if requested, provide to the Trustee indemnity satisfactory to the Trustee against any loss, liability or expense;
- (d) the Trustee does not comply with the request within 60 days after receipt of the request and the offer and, if requested, the provision of indemnity; and
- (e) during such 60-day period the Holders of a majority in principal amount of the then outstanding Senior Secured Notes do not give the Trustee a direction inconsistent with the request.

A Holder of a Senior Secured Note may not use this Indenture to prejudice the rights of another Holder of a Senior Secured Note or to obtain a preference or priority over another Holder of a Senior Secured Note.

-77-

Section 5.07 Rights of Holders of Senior Secured Notes to Receive Payment. Notwithstanding any other provision of this Indenture, the right of any Holder of a Senior Secured Note to receive payment of principal, premium, Liquidated Damages if any, and interest on the Senior Secured Notes, on or after the respective due dates expressed in the Senior Secured Notes (including in connection with an offer to purchase), or to bring suit for the enforcement of any such payment on or after such respective dates, shall not be impaired or affected without the consent of such Holder.

Section 5.08 Collection Suit by Trustee. If an Event of Default specified in Section 5.01(a) occurs and is continuing, the Trustee is authorized to recover judgment in its own name and as trustee of an express trust against the Issuer for the whole amount of principal of, premium, Liquidated Damages if any, and interest remaining unpaid on the Senior Secured Notes and interest on overdue principal and, to the extent lawful, interest, Liquidated Damages and such further amount as shall be sufficient to cover the costs and expenses of collection, including the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel.

Section 5.09 Trustee May File Proofs of Claim. The Trustee is authorized to file such proofs of claim and other papers or documents as may be necessary or advisable in order to have the claims of the Trustee (including any claim for the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel) and the Holders of the Senior Secured Notes allowed in any judicial proceedings relative to the Issuer (or any other obligor upon the Senior Secured Notes), its creditors or its property and shall be entitled and empowered to collect, receive and distribute any money or other property payable or deliverable on any such claims and any custodian in any such judicial proceeding is hereby authorized by each Holder to make such payments to the Trustee, and in the event that the Trustee shall consent to the making of such payments directly to the Holders, to pay to the Trustee any amount due to it for the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel, and any other amounts due the Trustee under Section 6.07 hereof. To the extent that the payment of any such compensation, expenses, disbursements and advances of the Trustee, its agents and counsel, and any other amounts due the Trustee under Section 6.07 hereof out of the estate in any such proceeding, shall be denied for any reason, payment of the same shall be secured by a Lien on, and shall be paid out of, any and all distributions, dividends, money, securities and other properties that the Holders may be entitled to receive in such proceeding whether in liquidation or under any plan of reorganization or arrangement or otherwise. Nothing herein contained shall be deemed to authorize the Trustee to authorize or consent to or accept or adopt on behalf of any Holder any plan of reorganization, arrangement, adjustment or composition affecting the Senior Secured Notes or the rights of any Holder, or to authorize the Trustee to vote in respect of the claim of any Holder in any such proceeding.

Section 5.10 Priorities. If the Trustee collects any money pursuant to this Article, it shall be applied to amounts owed with respect to all Senior Secured Notes and will be applied ratably to the Holders of Senior Secured Notes in the following order from time to time (to the extent such order does not conflict with Section 5 of the Collateral Agency Agreement),
