on the date or dates fixed by the Trustee: (i) first, to the payment of all amounts due to the Trustee or any predecessor Trustee under this Indenture; (ii) second; (A) in case the unpaid principal amount of the Outstanding Senior Secured Notes has not become due, to the payment of any overdue interest, (B) in case the unpaid principal amount of a portion of the Outstanding Senior Secured Notes has become due, first to the payment of accrued interest and Liquidated Damages, if any, on all Outstanding Senior Secured Notes for overdue principal, premium, Liquidated Damages if any, and overdue interest, and next to the payment of the overdue principal on all Senior Secured Notes or (C) in case the unpaid principal amount of all the Outstanding Senior Secured Notes has become due, first to the payment of the whole amount then due and unpaid upon the Outstanding Senior Secured Notes for principal, premium, Liquidated Damages if any, and interest, together with interest for overdue principal, premium, Liquidated Damages if any, and overdue interest; and (iii) third, in case the

unpaid principal amount of all the Outstanding Senior Secured Notes has become due, and all of the outstanding principal, premium, Liquidated Damages if any, interest and other amounts owed in connection with the Senior Secured Notes have been fully paid, any surplus then remaining will be paid to the Issuer, or to whomsoever may be lawfully entitled to receive the same, or as a court of competent jurisdiction may direct.

The Trustee may fix a record date and payment date for any payment to Holders of Senior Secured Notes pursuant to this Section 5.10.

Section 5.11 Undertaking for Costs. In any suit for the enforcement of any right or remedy under this Indenture or in any suit against the Trustee for any action taken or omitted by it as a Trustee, a court in its discretion may require the filing by any party litigant in the suit of an undertaking to pay the costs of the suit, and the court in its discretion may assess reasonable costs, including reasonable attorneys' fees, against any party litigant in the suit, having due regard to the merits and good faith of the claims or defenses made by the party litigant. This Section does not apply to a suit by the Trustee, a suit by a Holder of a Senior Secured Note pursuant to Section 5.07 hereof, or a suit by Holders of more than 10% in principal amount of the then outstanding Senior Secured Notes.

ARTICLE VI

TRUSTEE

Section 6.01 Duties of Trustee.

(a) If an Event of Default actually known to a Responsible Trust Officer has occurred and is continuing, the Trustee shall exercise such of the rights and powers vested in it by this Indenture, and use the same degree of care and skill in its exercise, as a prudent man would exercise or use under the circumstances in the conduct of his own affairs.

-79-

Page 80

(b) Except during the continuance of an Event of Default:

(i) the duties of the Trustee shall be determined solely by the express provisions of this Indenture and the Trustee need perform only those duties that are specifically set forth in this Indenture and no others, and no implied covenants or obligations shall be read into this Indenture against the Trustee; and

(ii) in the absence of bad faith on its part, the Trustee may conclusively rely, as to the truth of the statements and the correctness of the opinions expressed therein, upon certificates or opinions furnished to the Trustee and conforming to the requirements of this Indenture. However, the Trustee shall examine the certificates and opinions to determine whether or not they conform to the requirements of this Indenture.

(c) The Trustee may not be relieved from liabilities for its own grossly negligent action, its own negligent failure to act, or its own willful misconduct, except that:

(i) this paragraph does not limit the effect of paragraph (b) of this Section;

(ii) the Trustee shall not be liable for any error of judgment made in good faith by a Responsible Trust Officer, unless it is proved

that the Trustee was grossly negligent in ascertaining the pertinent facts; and

(iii) the Trustee shall not be liable with respect to any action it takes or omits to take in good faith in accordance with a direction received by it pursuant to Section 6.05 hereof.

(d) Whether or not therein expressly so provided, every provision of this Indenture that in any way relates to the Trustee is subject to paragraphs (a), (b), and (c) of this Section.

(e) No provision of this Indenture shall require the Trustee to expend or risk its own funds or incur any liability. The Trustee shall be under no obligation to exercise any of its rights and powers under this Indenture at the request of any Holders, unless such Holder shall have offered to the Trustee security and indemnity satisfactory to it against any loss, liability or expense.

(f) The Trustee shall not be liable for interest on any money received by it except as the Trustee may agree in writing with the Issuer. Money held in trust by the Trustee need not be segregated from other funds except to the extent required by law.

Section 6.02 Rights of Trustee.

(a) The Trustee may conclusively rely upon any document believed by it to be genuine and to have been signed or presented by the proper Person. The Trustee need not investigate any fact or matter stated in the document.

-80-

Page 81

(b) Before the Trustee acts or refrains from acting, it may require and shall be entitled to an Officer's Certificate or an Opinion of Counsel or both. The Trustee shall not be liable for any action it takes or omits to take in good faith in reliance on such Officers' Certificate or Opinion of Counsel. The Trustee may consult with counsel and the advice, promptly confirmed in writing thereafter, of such counsel or any Opinion of Counsel shall be full and complete authorization and protection from liability in respect of any action taken, suffered or omitted by it hereunder in good faith and in reliance thereon.

(c) The Trustee may act through its attorneys, custodians, nominees and agents and shall not be responsible for the misconduct or negligence of any agent, attorney, custodian or nominee appointed with due care.

(d) The Trustee shall not be liable for any action it takes or omits to take in good faith that it believes to be authorized or within the rights or powers conferred upon it by this Indenture.

(e) Unless otherwise specifically provided in this Indenture, any demand, request, direction or notice from the Issuer shall be sufficient if signed by an Officer of the Issuer.

(f) The Trustee shall be under no obligation to exercise any of the rights or powers vested in it by this Indenture at the request or direction of any of the Holders unless such Holders shall have offered to the Trustee security or indemnity satisfactory to the Trustee against the costs, expenses and liabilities that might be incurred by it in compliance with such request or direction.

(g) In no event shall the Trustee be required to take notice of any default or breach hereof or any Event of Default hereunder, except for

Events of Default specified in Section 5.01(a) hereof, unless and until the Trustee shall have received from a Holder or from the Issuer express written notice of the circumstances constituting the breach, default or Event of Default and stating that said circumstances constitute an Event of Default hereunder.

(h) If the Trustee is acting as Paying Agent, Registrar, Collateral Agent, Depositary Agent or Securities Intermediary hereunder, the rights and protections afforded to the Trustee pursuant to this Article VI (other than the Trustee's right to require, and entitlement to, an Opinion of Counsel pursuant to Section 6.02(b) hereof) will also be afforded to such Paying Agent, Registrar, Collateral Agent, Depositary Agent and Securities Intermediary.

Section 6.03 Individual Rights of Trustee. The Trustee in its individual or any other capacity may become the owner or pledgee of Senior Secured Notes and may otherwise deal with the Issuer or any Affiliate of the Issuer with the same rights it would have if it were not Trustee. However, in the event that the Trustee acquires any conflicting interest it must eliminate such conflict within 90 days, apply to the SEC for permission to continue as trustee or resign. Any Agent may do the same with like rights and duties. The Trustee is also subject to Sections 6.10 and 6.11 hereof.

-81-

Page 82

Section 6.04 Trustee's Disclaimer. The Trustee shall not be responsible for and makes no representation as to the validity or adequacy of this Indenture or the Senior Secured Notes, it shall not be accountable for the Issuer's use of the proceeds from the Senior Secured Notes or any money paid to the Issuer or upon the Issuer's direction under any provision of this Indenture, it shall not be responsible for the use or application of any money received by any Paying Agent other than the Trustee, and it shall not be responsible for any statement or recital herein or any statement in the Security Documents, the Senior Secured Notes or any other document in connection with the sale of the Senior Secured Notes or pursuant to this Indenture other than its certificate of authentication.

The Trustee makes no representations as to and shall not be responsible for the existence, genuineness, value, sufficiency or condition of any of the Collateral or as to the security afforded or intended to be afforded thereby, hereby or by any Security Document, or for the validity, perfection, priority or enforceability of the Liens or security interests in any of the Collateral created or intended to be created by any of the Security Documents, whether impaired by operation of law or by reason of any action or omission to act on its part hereunder, except to the extent such action or omission constitutes gross negligence or willful misconduct on the part of the Trustee, for the validity of the title of the Issuer to the Collateral, for insuring the Collateral or for the payment of taxes, charges, assessments or Liens upon the Collateral or otherwise as to the maintenance of the Collateral.

References to the Trustee in this Section 6.04 shall include the Trustee in its role as a Collateral Agent.

Section 6.05 Notice of Defaults. If a Default or Event of Default occurs and is continuing and if it is actually known to a Responsible Trust Officer, or if appropriate notice is provided in writing in accordance with Section 6.02(g), as applicable, the Trustee shall mail to Holders of Senior Secured Notes a notice of the Default or Event of Default within 30 days after it occurs. Except in the case of a Default or Event of Default in payment of principal of, premium, Liquidated Damages, if any, or interest on any Senior Secured Note, the Trustee may withhold the notice if and so long as a committee of its Responsible Trust Officers in good faith determines that withholding the notice is in the interests of the Holders of the Senior Secured Notes.

Section 6.06 Reports by Trustee to Holders of the Senior Secured Notes.

(a) Within 60 days after each May 15 beginning with the May 15 following the date hereof, and for so long as any Senior Secured Notes remain outstanding, the Trustee shall mail to the Holders of the Senior Secured Notes a brief report dated as of such reporting date that complies with TIA (section) 313(a) (but if no event described in TIA (section) 313(a) has occurred within the twelve months preceding the reporting date, no report need be transmitted). The Trustee also shall comply with TIA (section) 313(b)(2). The Trustee shall also transmit by mail all reports as required by TIA (section) 313(c).

-82-

Page 83

(b) A copy of each report at the time of its mailing to the Holders of Senior Secured Notes shall be mailed to the Issuer and filed with the SEC and each stock exchange on which the Senior Secured Notes are listed in accordance with TIA (section) 313(d). The Issuer shall promptly notify the Trustee in writing when the Senior Secured Notes are listed on any stock exchange.

Section 6.07 Compensation and Indemnity.

(a) The Issuer shall pay to the Trustee from time to time reasonable compensation for its acceptance of this Indenture and services hereunder as is now or hereafter agreed to in writing by the Issuer and the Trustee. The Trustee's compensation shall not be limited by any law on compensation of a trustee of an express trust. The Issuer shall reimburse the Trustee promptly upon request for all reasonable and properly documented disbursements, advances and expenses incurred or made by it in addition to the compensation for its services. Such expenses shall include the reasonable and properly documented fees, disbursements and expenses of the Trustee's agents and counsel.

(b) The Issuer shall indemnify the Trustee against any and all losses, liabilities, damages or expenses incurred by it arising out of or in connection with the acceptance or administration of its duties under this Indenture and the other Financing Documents, including the costs and expenses of enforcing this Indenture against the Issuer (including this Section 6.07) and defending itself against any claim (whether asserted by the Issuer or any Holder or any other person) or liability in connection with the exercise or performance of any of its powers or duties hereunder or in connection with the storage, use, presence, disposal or release of any Hazardous Substance on, under or about any properties encumbered by the Deeds of Trust, except to the extent any such loss, liability or expense may be attributable to its gross negligence or bad faith. The Trustee shall notify the Issuer promptly of any claim for which it may seek indemnity. Failure by the Trustee to so notify the Issuer shall not relieve the Issuer of its obligations hereunder. The Issuer shall defend the claim and the Trustee shall cooperate in the defense. The Trustee may have separate counsel (reasonably acceptable to the Issuer) and the Issuer shall pay the reasonable fees and expenses of such counsel. The Issuer need not pay for any settlement made without its consent, which consent shall not be unreasonably withheld.

(c) The obligations of the Issuer under this Section 6.07 shall survive the satisfaction and discharge of this Indenture.

(d) To secure the Issuer's payment obligations in this Section, the Trustee shall have a Lien prior to the Senior Secured Notes on all money or property held or collected by the Trustee, except that held in trust to pay principal, interest, premium and Liquidated Damages, if any, on particular Senior Secured Notes.

(e) When the Trustee incurs expenses or renders services after an Event of Default specified in Section 5.01(e) hereof occurs, the expenses and the compensation for the

-83-

Page 84

services (including the fees and expenses of its agents and counsel) are intended to constitute expenses of administration under any Bankruptcy Law.

(f) The Trustee shall comply with the provisions of TIA (section) 313(b)(2) to the extent applicable.

(g) The provisions of this Section 6.07 shall extend to the Trustee acting in the capacities of Paying Agent and Registrar, Collateral Agent, Depositary Agent and Securities Intermediary under this Indenture and the other Financing Documents.

Section 6.08 Replacement of Trustee.

(a) A resignation or removal of the Trustee and appointment of a successor Trustee shall become effective only upon the successor Trustee's acceptance of appointment as provided in this Section.

(b) The Trustee may resign in writing at any time and be discharged from the trust hereby created by giving thirty (30) days written notice to the Issuer. The Required Holders may remove the Trustee by so notifying the Trustee and the Issuer in writing. The Issuer may remove the Trustee if:

(i) the Trustee fails to meet the eligibility criteria set forth in this Indenture;

(ii) the Trustee is adjudged a bankrupt or an insolvent or an order for relief is entered with respect to the Trustee under any bankruptcy law;

(iii) no Default or Event of Default on our part has occurred and is continuing and the Trustee has failed to observe or perform any of its material obligations under the Financing Documents;

(iv) a custodian or public officer takes charge of the Trustee or its property; or

(v) the Trustee becomes incapable of acting.

(c) If the Trustee resigns or is removed or if a vacancy exists in the office of Trustee for any reason, the Issuer shall promptly appoint a successor Trustee. Within one year after the successor Trustee takes office, the Holders of a majority in principal amount of the then outstanding Senior Secured Notes may appoint a successor Trustee to replace the successor Trustee appointed by the Issuer.

(d) The Issuer shall give notice of each resignation and removal of the Trustee and each appointment of a successor to all Holders.

-84-

Page 85

(e) If a successor Trustee does not take office within 60 days

after the retiring Trustee resigns or is removed, the retiring Trustee, the Issuer, or the Holders of Senior Secured Notes of at least 10% in principal amount of the then outstanding Senior Secured Notes may petition any court of competent jurisdiction for the appointment of a successor Trustee.

(f) If the Trustee, after written request by any Holder of a Senior Secured Note who has been a Holder of a Senior Secured Note for at least six months, fails to comply with Section 6.10, such Holder of a Senior Secured Note may petition any court of competent jurisdiction for the removal of the Trustee and the appointment of a successor Trustee.

(g) A successor Trustee shall deliver a written acceptance of its appointment to the retiring Trustee and to the Issuer. Thereupon, the resignation or removal of the retiring Trustee shall become effective, and the successor Trustee shall have all the rights, powers and duties of the Trustee under this Indenture. The successor Trustee shall mail a notice of its succession to Holders of the Senior Secured Notes. The retiring Trustee shall promptly transfer all property held by it as Trustee to the successor Trustee, provided all sums owing to the Trustee hereunder have been paid and subject to the Lien provided for in Section 6.07 hereof. Notwithstanding replacement of the Trustee pursuant to this Section 6.08, the Issuer's obligations under Section 6.07 hereof shall continue for the benefit of the retiring Trustee.

(h) If a Trustee is removed with or without cause, all fees and expenses (including the reasonable fees and expenses of counsel) of the Trustee incurred in the administration of the trust or in performing of the duties hereunder shall be paid to the Trustee.

Section 6.09 Successor Trustee by Merger, etc. If the Trustee consolidates, merges or converts into, or transfers all or substantially all of its corporate trust business to, another corporation, the successor corporation without any further act shall be the successor Trustee.

Section 6.10 Eligibility; Disqualification. There will at all times be a Trustee under this Indenture, which shall be a corporation having either (a) a combined capital and surplus of at least \$50.0 million, or (b) a combined capital and surplus of at least \$10.0 million and being a Wholly-Owned Subsidiary of a corporation having a combined capital and surplus of at least \$50.0 million, in each case subject to supervision or examination by a federal or state or District of Columbia authority and having a corporate trust office in New York, New York, to the extent there is such an institution eligible and willing to serve.

This Indenture shall always have a Trustee who satisfies the requirements of TIA (section) 310(a)(1), (2) and (5). The Trustee is subject to TIA (section) 310(b).

Section 6.11 Preferential Collection of Claims Against the Issuer. The Trustee is subject to TIA (section) 311(a), excluding any creditor relationship listed in TIA (section) 311(b). A Trustee who has resigned or been removed shall be subject to TIA (section) 311(a) to the extent indicated therein.

Section 6.12 Receipt of Documents. In no event shall receipt by the Trustee of financial and other reports from the Issuer as provided in this Indenture, review of which could lead to the conclusion that an Event of Default exists hereunder, result, without further action, in the occurrence of an Event of Default, or impose upon the Trustee the obligation to review and examine the same, it being understood that all such information shall be

received by the Trustee as repository for said information and documents with no obligation on the part of the Trustee to review the same.

ARTICLE VII

LEGAL DEFEASANCE AND COVENANT DEFEASANCE

Section 7.01 Option to Effect Legal Defeasance or Covenant Defeasance. The Issuer may, at its option evidenced by a resolution set forth in an Officers' Certificate, at any time, elect to have either Section 7.02 or 7.03 hereof be applied to all outstanding Senior Secured Notes and all obligations of the Guarantors with respect to their Guarantees upon compliance with the conditions set forth below in this Article VII.

Section 7.02 Legal Defeasance and Discharge. Upon the Issuer's exercise under Section 7.01 hereof of the option applicable to this Section 7.02, the Issuer shall, subject to the satisfaction of the conditions set forth in Section 7.04 hereof, be deemed to have been discharged from its obligations with respect to all outstanding Senior Secured Notes and the Guarantors shall be deemed to be discharged from all of their obligations with respect to their Guarantees and the Collateral Agent shall release all of its liens on the Collateral other than pursuant to Section 7.04(a) hereof, on the date the conditions set forth below are satisfied (hereinafter, "Legal Defeasance"). For this purpose, Legal Defeasance means that the Issuer shall be deemed to have paid and discharged the entire Indebtedness represented by the outstanding Senior Secured Notes and the Guarantees, which shall thereafter be deemed to be "outstanding" only for the purposes of Section 7.05 hereof and the other Sections of this Indenture referred to in (a) and (b) below, and to have satisfied all its other obligations under such Senior Secured Notes, the Guarantees and this Indenture (and the Trustee, on demand of and at the expense of the Issuer, shall execute proper instruments acknowledging the same), except for the following provisions which shall survive until otherwise terminated or discharged hereunder: (a) the rights of Holders of outstanding Senior Secured Notes to receive payments in respect of the principal of, or interest or premium and Liquidated Damages, if any, on such Senior Secured Notes when such payments are due from the trust referred to below, (b) the Issuer's obligations with respect to the Senior Secured Notes concerning issuing temporary Senior Secured Notes, registration of Senior Secured Notes, replacing mutilated, destroyed, lost or stolen Senior Secured Notes and the maintenance of an office or agency for payment and money for security payments held in trust, (c) the rights, powers, trusts, duties and immunities of the trustee, and our and the Guarantors' obligations in connection therewith, and (d) this Article VII. Subject to compliance with this Article VII, the Issuer may exercise its option under this Section 7.02 notwithstanding the prior exercise of its option under Section 7.03 hereof.

-86-

Page 87

Section 7.03 Covenant Defeasance. Upon the Issuer's exercise under Section 7.01 hereof of the option applicable to this Section 7.03, the Issuer shall and the Guarantors shall, subject to the satisfaction of the conditions set forth in Section 7.04 hereof, be released from their obligations under any of the covenants contained in this Indenture other than under Sections 4.01, 4.02, 4.03, 4.05 and clauses (i) and (ii) of Section 4.23 hereof with respect to the outstanding Senior Secured Notes and may terminate the Liens of the Security Documents on the Collateral to the extent that such Liens run to the benefit of the Trustee, the Holders or other agents under any of the Security Documents on and after the date the conditions set forth in Section 7.04 are satisfied (hereinafter, "Covenant Defeasance"), and the Senior Secured Notes and all obligations of the Guarantors with respect to the Guarantees shall thereafter be deemed not "outstanding" for the purposes of any direction, waiver, consent or declaration or act of Holders (and the consequences of any thereof) in connection with such covenants, but shall continue to be deemed

"outstanding" for all other purposes hereunder (it being understood that such Senior Secured Notes and all obligations of the Guarantors with respect to the Guarantees shall not be deemed outstanding for accounting purposes). For this purpose, Covenant Defeasance means that, with respect to the outstanding Senior Secured Notes, the Issuer and the Guarantors may omit to comply with and shall have no liability in respect of any term, condition or limitation set forth in any such covenant, whether directly or indirectly, by reason of any reference elsewhere herein to any such covenant or by reason of any reference in any such covenant to any other provision herein or in any other document and such omission to comply shall not constitute a Default or an Event of Default under Section 5.01 hereof, but, except as specified above, the remainder of this Indenture and such Senior Secured Notes shall be unaffected thereby. In addition, upon the Issuer's exercise under Section 7.01 hereof of the option applicable to this Section 7.03 hereof, subject to the satisfaction of the conditions set forth in Section 7.04 hereof, Sections 5.01(b) through 5.01(d) and Sections 5.01(g) through 5.01(l) hereof shall not constitute Events of Default.

Section 7.04 Conditions to Legal or Covenant Defeasance. The following shall be the conditions to the application of either Section 7.02 or 7.03 hereof to the outstanding Senior Secured Notes:

In order to exercise either Legal Defeasance or Covenant Defeasance:

(a) the Issuer must irrevocably deposit with the Trustee, in trust, for the benefit of the Holders, cash in United States dollars, non-callable Government Securities, or a combination thereof, in such amounts as shall be sufficient, in the opinion of a nationally recognized firm of independent public accountants, to pay the principal of, premium and Liquidated Damages, if any, and interest on the outstanding Senior Secured Notes on the stated date for payment thereof or on the applicable Redemption Date, as the case may be, and the Issuer must specify whether the Senior Secured Notes are being defeased to maturity or to a particular redemption date;

(b) in the case of an election under Section 7.02 hereof, the Issuer shall have delivered to the Trustee an Opinion of Counsel in the United States reasonably acceptable to the Trustee confirming that (A) the Issuer has received from, or there has been published by, the

-87-

Page 88

Internal Revenue Service a ruling or (B) since the date hereof, there has been a change in the applicable federal income tax law, in either case to the effect that, and based thereon such Opinion of Counsel shall confirm that, the Holders of the outstanding Senior Secured Notes will not recognize income, gain or loss for federal income tax purposes as a result of such Legal Defeasance and will be subject to federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Legal Defeasance had not occurred;

(c) in the case of an election under Section 7.03 hereof, the Issuer shall have delivered to the Trustee an Opinion of Counsel in the United States reasonably acceptable to the Trustee confirming that the Holders of the outstanding Senior Secured Notes will not recognize income, gain or loss for federal income tax purposes as a result of such Covenant Defeasance and will be subject to federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Covenant Defeasance had not occurred;

(d) no Default or Event of Default shall have occurred and be

continuing on the date of such deposit (other than a Default or Event of Default resulting from the incurrence of Indebtedness all or a portion of the proceeds of which will be used to defease the Senior Secured Notes pursuant to this Article 7 concurrently with such incurrence);

(e) such Legal Defeasance or Covenant Defeasance shall not result in a breach or violation of, or constitute a default under, any material agreement or instrument (other than this Indenture) to which the Issuer is a party or by which the Issuer is bound;

(f) the Issuer shall have delivered to the Trustee an Officers' Certificate stating that the deposit was not made by the Issuer with the intent of preferring the Holders over any other creditors of the Issuer or with the intent of defeating, hindering, delaying or defrauding any other creditors of the Issuer; and

(g) the Issuer shall have delivered to the Trustee an Officers' Certificate and an Opinion of Counsel, each stating that all conditions precedent provided for or relating to the Legal Defeasance or the Covenant Defeasance have been complied with.

Section 7.05 Deposited Money and Government Securities to be Held in Trust; Other Miscellaneous Provisions. Subject to Section 7.06 hereof, all money and non-callable Government Securities (including the proceeds thereof) deposited with the Trustee (or other qualifying trustee, collectively for purposes of this Section 7.05, the "Trustee") pursuant to Section 7.04 hereof in respect of the outstanding Senior Secured Notes shall be held in trust and applied by the Trustee, in accordance with the provisions of such Senior Secured Notes and this Indenture, to the payment, either directly or through any Paying Agent (including the Issuer acting as Paying Agent) as the Trustee may determine, to the Holders of such Senior Secured Notes of all sums due and to become due thereon in respect of principal, premium, Liquidated Damages, if any, and interest, but such money need not be segregated from other funds except to the extent required by law.

-88-

Page 89

The Issuer shall pay and indemnify the Trustee against any tax, fee or other charge imposed on or assessed against the cash or non-callable Government Securities deposited pursuant to Section 7.04 hereof or the principal and interest received in respect thereof other than any such tax, fee or other charge which by law is for the account of the Holders of the outstanding Senior Secured Notes.

Anything in this Article VII to the contrary notwithstanding, the Trustee shall deliver or pay to the Issuer from time to time upon the request of the Issuer any money or non-callable Government Securities held by it as provided in Section 7.04 hereof which, in the opinion of a nationally recognized investment bank or firm of independent public accountants expressed in a written certification thereof delivered to the Trustee (which may be the opinion delivered under Section 7.04(a) hereof), are in excess of the amount thereof that would then be required to be deposited to effect an equivalent Legal Defeasance or Covenant Defeasance.

Section 7.06 Repayment to Issuer. Any money deposited with the Trustee or any Paying Agent, or then held by the Issuer, in trust for the payment of the principal of, premium, Liquidated Damages, if any, or interest on any Senior Secured Note and remaining unclaimed for two years after such principal, and premium, Liquidated Damages, if any, or interest has become due and payable shall be paid to the Issuer on its request or (if then held by the Issuer) shall be discharged from such trust; and the Holder of such Senior Secured Note shall thereafter, as a secured creditor, look only to the Issuer for payment thereof, and all liability of the Trustee or such Paying Agent with

respect to such trust money, and all liability of the Issuer as trustee thereof, shall thereupon cease; provided, however, that the Trustee or such Paying Agent, before being required to make any such repayment, may at the expense of the Issuer cause to be published once, in the New York Times and The Wall Street Journal (national edition), notice that such money remains unclaimed and that, after a date specified therein, which shall not be less than 30 days from the date of such notification or publication, any unclaimed balance of such money then remaining shall be repaid to the Issuer.

Section 7.07 Reinstatement. If the Trustee or Paying Agent is unable to apply any United States dollars or non-callable Government Securities in accordance with Section 7.02 or 7.03 hereof, as the case may be, by reason of any order or judgment of any court or governmental authority enjoining, restraining or otherwise prohibiting such application, then the Issuer's obligations under this Indenture and the Senior Secured Notes shall be revived and reinstated as though no deposit had occurred pursuant to Section 7.02 or 7.03 hereof until such time as the Trustee or Paying Agent is permitted to apply all such money in accordance with Section 7.02 or 7.03 hereof, as the case may be; provided, however, that, if the Issuer makes any payment of principal of, premium, Liquidated Damages, if any, or interest on any Senior Secured Note following the reinstatement of its obligations, the Issuer shall be subrogated to the rights of the Holders of such Senior Secured Notes to receive such payment from the money held by the Trustee or Paying Agent.

-89-

Page 90

ARTICLE VIII

AMENDMENT, SUPPLEMENT AND WAIVER

Section 8.01 Without Consent of Holders of Senior Secured Notes. Notwithstanding Section 8.02 of this Indenture, the Issuer and the Trustee may amend or supplement this Indenture and any of the other Financing Documents without the consent of any Holder of a Senior Secured Note:

(a) to cure any ambiguity, defect or inconsistency;

(b) to add additional covenants of the Issuer or its Subsidiaries, to surrender rights conferred upon the Issuer or its Subsidiaries, or to confer additional benefits upon the Holders;

(c) to increase the assets securing the Issuer's obligations under this Indenture;

(d) to allow any Subsidiary to execute a Supplemental Indenture and/or Guarantee with respect to the Senior Secured Notes;

(e) to comply with requirements of the SEC in order to effect or maintain the qualification of this Indenture under the Trust Indenture Act;

(f) to make any change not inconsistent with the terms of this Indenture that does not adversely affect the legal rights thereunder of any Holder of the Senior Secured Notes; or

(g) to establish the form and terms of Senior Secured Notes of any series permitted by Sections 2.01 and 2.03.

Upon the request of the Issuer accompanied by a resolution of the Issuer's Board of Directors authorizing the execution of any such amended or supplemental Indenture or amendments to the other Financing Documents, and upon receipt by the Trustee of the documents described in Section 6.02 hereof, the Trustee and the Collateral Agent shall join with the Issuer in the execution of any amended or supplemental Indenture and any amendment to any of the other

Financing Documents authorized or permitted by the terms of this Indenture and to make any further appropriate agreements and stipulations that may be therein contained, but the Trustee and the Collateral Agent shall not be obligated to enter into such amended or supplemental Indenture or amendments to the Financing Documents that affects its own rights, duties, immunities, or indemnities under this Indenture or otherwise.

Section 8.02 With Consent of Holders of Senior Secured Notes. Except as provided below in this Section 8.02, the Issuer and the Trustee may amend or supplement this Indenture (including Section 4.23 hereof) and the other Financing Documents with the consent of the Required Holders voting as a single class (including consents obtained in connection with a

-90-

Page 91

tender offer or exchange offer for, or purchase of, the Senior Secured Notes), and, subject to Sections 5.04 and 5.07 hereof, any existing Default or Event of Default (other than a Default or Event of Default in the payment of the principal of, premium, Liquidated Damages, if any, or interest on the Senior Secured Notes, except a payment default resulting from an acceleration that has been rescinded) or compliance with any provision of this Indenture or the other Financing Documents may be waived with the consent of the Required Holders voting as a single class (including consents obtained in connection with a tender offer or exchange offer for, or purchase of, the Senior Secured Notes); provided, however, that if there shall be Senior Secured Notes of more than one series Outstanding hereunder and if a proposed supplemental indenture shall directly affect the rights of the Holders of one or more, but less than all, of such series, then the consent only of the Holders of not less than a majority in aggregate principal amount of the Outstanding Senior Secured Notes of all series so directly affected, considered as one class, shall be required. Section 2.08 hereof shall determine which Senior Secured Notes are considered to be "outstanding" for purposes of this Section 8.02.

Upon the request of the Issuer accompanied by a resolution of the Issuer's Board of Directors authorizing the execution of any such amended or supplemental Indenture, and upon the filing with the Trustee of evidence satisfactory to the Trustee of the consent of the Holders of Senior Secured Notes as aforesaid, and upon receipt by the Trustee of the documents described in Section 6.02 hereof, the Trustee shall join with the Issuer in the execution of such amended or supplemental Indenture and amendments to the other Financing Documents unless such amended or supplemental Indenture or amendments to the Financing Documents directly affects the Trustee's own rights, duties, immunities or indemnities under this Indenture or otherwise, in which case the Trustee may in its discretion, but shall not be obligated to, enter into such amended or supplemental Indenture or such amendments.

It shall not be necessary for the consent of the Holders of Senior Secured Notes under this Section 8.02 to approve the particular form of any proposed amendment or waiver, but it shall be sufficient if such consent approves the substance thereof.

After an amendment, supplement or waiver under this Section becomes effective, the Issuer shall mail to the Holders of Senior Secured Notes affected thereby a notice briefly describing the amendment, supplement or waiver. Any failure of the Issuer to mail such notice, or any defect therein, shall not, however, in any way impair or affect the validity of any such amended or supplemental Indenture or waiver or amendments to the Financing Documents. Subject to Sections 5.04 and 5.07 hereof, the Required Holders may waive compliance in a particular instance by the Issuer with any provision of this Indenture or the Senior Secured Notes. However, without the consent of all Holders of Outstanding Senior Secured Notes directly affected thereby, an

amendment or waiver under this Section 8.02 may not (with respect to any such Senior Secured Notes held by a non-consenting Holder):

(a) modify the principal, interest, premium or Liquidated Damages, if any, payable upon the Senior Secured Notes;

-91-

Page 92

(b) modify the dates on which principal, interest, premium and Liquidated Damages, if any, on any Senior Secured Notes are paid;

(c) release any Guarantor from its obligations under a Guarantee;

(d) modify the dates of maturity of any Senior Secured Notes; and

(e) make any change in the preceding procedures for amendment, supplement or waiver.

This Indenture and the other Security Documents may be amended or supplemented to provide for the release of Collateral, by the Issuer and the Trustee, with the consent of Holders of not less than 66% of the Outstanding Senior Secured Notes.

A supplemental indenture that changes or eliminates any covenant or other provision of this Indenture which has expressly been included solely for the benefit of one or more particular series of Senior Secured Notes, or which modifies the rights of the Holders of Senior Secured Notes of such series with respect to such covenant or other provision, shall be deemed not to affect the rights under this Indenture of the Holders of Senior Secured Notes of any other series.

Upon the request of the Issuer accompanied by a resolution of the issuer's Board of Directors authorizing the execution of any such amended or supplemental Indenture or amendments to the other Financing Documents, and upon receipt by the Trustee of the documents described in Section 6.02 hereof, the Trustee and the Collateral Agent shall join with the Issuer in the execution of any amended or supplemental Indenture and any amendment to any of the other Financing Documents authorized or permitted by the terms of this Indenture and to make any further appropriate agreements and stipulations that may be therein contained, but the Trustee and the Collateral Agent shall not be obligated to enter into such amended or supplemental Indenture or amendments to the Financing Documents that affects its own rights, duties, immunities, or indemnities under this Indenture or otherwise.

It shall not be necessary for any act of Holders under this Section to approve the particular form of any proposed supplemental indenture, but it shall be sufficient if such act shall approve the substance thereof.

Section 8.03 Revocation and Effect of Consents. Until an amendment, supplement or waiver becomes effective, a consent to it by a Holder of a Senior Secured Note is a continuing consent by the Holder of a Senior Secured Note and every subsequent Holder of a Senior Secured Note or portion of a Senior Secured Note that evidences the same debt as the consenting Holder's Senior Secured Note, even if notation of the consent is not made on any Senior Secured Note. However, any such Holder of a Senior Secured Note or subsequent Holder of a Senior Secured Note may revoke the consent as to its Senior Secured Note if the Trustee receives written notice of revocation before the date the waiver, supplement or amendment

becomes effective. An amendment, supplement or waiver becomes effective in accordance with its terms and thereafter binds every Holder.

Section 8.04 Notation on or Exchange of Senior Secured Notes. The Trustee may place an appropriate notation about an amendment, supplement or waiver on any Senior Secured Note thereafter authenticated. The Issuer in exchange for all Senior Secured Notes may issue and the Trustee shall, upon receipt of an Authentication Order, authenticate new Senior Secured Notes that reflect the amendment, supplement or waiver.

Failure to make the appropriate notation or issue a new Senior Secured Note shall not affect the validity and effect of such amendment, supplement or waiver.

Section 8.05 Trustee to Sign Amendments, etc. The Trustee and the Collateral Agent shall sign any amended or Supplemental Indenture and amendments to the other Financing Documents authorized pursuant to this Article VIII if the amendment or supplement does not adversely affect the rights, duties, liabilities, immunities or indemnities of the Trustee or the Collateral Agent. The Issuer may not sign an amendment or Supplemental Indenture until its shareholders approve it. In executing any amended or Supplemental Indenture or amendments to the other Financing Documents, the Trustee and the Collateral Agent shall be entitled to receive and (subject to Section 6.01 hereof) shall be fully protected in relying upon, in addition to the documents required by Section 10.04 hereof, an Officer's Certificate and an Opinion of Counsel stating that the execution of such amended or supplemental indenture or amendment to the other Financing Documents is authorized or permitted by this Indenture.

Section 8.06 Execution of Supplemental Indentures. In executing, or accepting the additional trusts created by any Series Supplemental Indenture or other supplemental indenture permitted by this Article VIII or the modifications thereby of the trusts created by this Indenture, the Trustee shall be entitled to receive, and (subject to Sections 6.01 and 6.02) shall be fully protected in relying upon, an Opinion of Counsel stating that the execution of such supplemental indenture is authorized or permitted by this Indenture.

Section 8.07 Effect of Supplemental Indentures. Upon the execution of any Supplemental Indenture under this Article VIII, this Indenture shall be modified in accordance therewith, and such Supplemental Indenture shall form a part of this Indenture for all purposes; and every Holder of Senior Secured Notes theretofore or thereafter authenticated and delivered hereunder shall be bound thereby.

Section 8.08 Conformity with Trust Indenture Act. Every Supplemental Indenture executed pursuant to this Article VIII shall conform to the requirements of the Trust Indenture Act as then in effect.

Section 8.09 Reference in Senior Secured Notes to Supplemental Indentures. Senior Secured Notes authenticated and delivered after the execution of any Supplemental Indenture pursuant to this Article VIII may, and shall if required by the Issuer, bear a notation in

form approved by the Issuer as to any matter provided for in such Supplemental

Indenture; and, in such case, suitable notation may be made upon Outstanding Senior Secured Notes after proper presentation and demand. If the Issuer shall so determine, new Senior Secured Notes so modified as to conform, in the opinion of the Issuer and the Trustee, to any such Supplemental Indenture may be prepared and executed by the Issuer and authenticated and delivered by the Trustee in exchange for Outstanding Senior Secured Notes.

ARTICLE IX

GUARANTEE

Section 9.01 Agreement to Guarantee.

(a) Each of the Guarantors, hereby jointly and severally with all other Guarantors, unconditionally guarantees to each Holder of a Senior Secured Note authenticated and delivered by the Trustee and to the Trustee and its successors and assigns, regardless of the validity and enforceability of this Indenture, the Senior Secured Notes or the other Senior Secured Obligations of the Issuer under this Indenture or the Senior Secured Notes, that:

(i) the principal of, premium, interest and Liquidated Damages, if any, on the Senior Secured Notes will be promptly paid in full when due, whether at maturity, by acceleration, redemption or otherwise, and interest on the overdue principal of, premium and Liquidated Damages, if any, and interest on the Senior Secured Notes, to the extent lawful, and all other Senior Secured Obligations of the Issuer to the Holders or the Trustee under this Indenture or the Senior Secured Notes will be promptly paid in full, all in accordance with the terms hereof or thereof; and

(ii) in case of any extension of time for payment or renewal of any Senior Secured Note or any of such other Senior Secured Obligations, that the same will be promptly paid in full when due in accordance with the terms of the extension or renewal, whether at stated maturity, by acceleration or otherwise.

(b) Notwithstanding the foregoing, in the event that this Guarantee would constitute or result in a violation of any applicable fraudulent conveyance or similar law of any relevant jurisdiction, the liability of the Guarantors under this Indenture will be reduced to the maximum amount permissible under such fraudulent conveyance or similar law.

(c) Failing payment when due of any amount so guaranteed or any performance so guaranteed for whatever reason, the Guarantors will be jointly and severally obligated to pay, perform or cause the performance of the same immediately. Each Guarantor agrees that this is a guarantee of payment and not a guarantee of collection.

-94-

Page 95

Section 9.02 Execution and Delivery of Guarantee.

(a) To evidence its Guarantee set forth in this Indenture, each Guarantor hereby agrees that a notation of such Guarantee substantially in the form attached as Exhibit F to this Indenture will be endorsed by an Authorized Officer of such Guarantor on each Senior Secured Note authenticated and delivered by the Trustee on or after the date hereof.

(b) Notwithstanding the foregoing, each Guarantor hereby agrees that its Guarantee set forth herein will remain in full force and effect notwithstanding any failure to endorse on each Senior Secured Note a notation of such Guarantee.

(c) If an Authorized Officer whose signature is on this Indenture or on a Guarantee no longer holds that office at the time the Trustee authenticates the Senior Secured Note on which a Guarantee is endorsed, the Guarantee will be valid nevertheless.

(d) The delivery of any Senior Secured Note by the Trustee, after the authentication thereof under this Indenture, will constitute due delivery of the Guarantee set forth in this Indenture on behalf of each Guarantor.

(e) Each Guarantor hereby agrees that its Senior Secured Obligations hereunder will be unconditional, regardless of the validity, regularity or enforceability of the Senior Secured Note or this Indenture, the absence of any action to enforce the same, any waiver or consent by any Holder of the Senior Secured Notes with respect to any provisions hereof or thereof, the recovery of any judgment against the Issuer, any action to enforce the same or any other circumstance which might otherwise constitute a legal or equitable discharge or defense of a guarantor.

(f) Each Guarantor hereby waives diligence, presentment, demand of payment, filing of claims with a court in the event of insolvency or bankruptcy of the Issuer, any right to require a proceeding first against the Issuer, protest, notice and all demands whatsoever and covenants that its Guarantee made pursuant to this Indenture will not be discharged except by complete performance of the Senior Secured Obligations contained in the Senior Secured Notes and this Indenture.

(g) If any Holder or the Trustee is required by any court or otherwise to return to the Issuer or any Guarantor, or any custodian, Trustee, liquidator or other similar official acting in relation to either the Issuer or such Guarantor, any amount paid by either to the Trustee or such Holder, the Guarantee made pursuant to this Indenture, to the extent theretofore discharged, will be reinstated in full force and effect.

(h) Each Guarantor agrees that it will not be entitled to any right of subrogation in relation to the Holders in respect of any Senior Secured Notes guaranteed hereby until payment in full of all Senior Secured Notes guaranteed hereby. Each Guarantor further agrees that, as between such Guarantor, on the one hand, and the Holders and the Trustee, on the other hand:

-95-

Page 96

(i) the maturity of the Senior Secured Notes guaranteed hereby may be accelerated as provided in Article V hereof for the purposes of the Guarantee made pursuant to this Indenture, notwithstanding any stay, injunction or other prohibition preventing such acceleration in respect of the Senior Secured Notes guaranteed hereby; and

(ii) in the event of any declaration of acceleration of such Senior Secured Notes as provided in Article V hereof, such Senior Secured Notes (whether or not due and payable) will forthwith become due and payable by such Guarantor for the purpose of the Guarantee made pursuant to this Indenture.

(i) Each Guarantor will have the right to seek contribution from any other non-paying Guarantor so long as the exercise of such right does not impair the rights of the Holders or the Trustee under the Guarantee made pursuant to this Indenture.

Section 9.03 Guarantors May Consolidate, etc. on Certain Terms.

(a) Except as set forth in Article IV, and notwithstanding Section 9.03(b) hereof, nothing contained in this Indenture or in the Senior Secured Notes will prevent any consolidation or merger of any Guarantor with or into the Issuer or any other Guarantor or will prevent any transfer, sale or conveyance of the property of any Guarantor as an entirety or substantially as an entirety to the Issuer or any other Guarantor.

(b) No Guarantor may sell or otherwise dispose of all or substantially all of its assets to, or consolidate with or merge with or into (whether or not such Guarantor is the surviving Person), another Person, other than the Issuer or another Guarantor.

Section 9.04 Covenants of the Guarantors and Ormesa. Each Guarantor and Ormesa (to the extent compliance therewith would not violate the Ormesa Credit Agreement) agrees that to the extent the Issuer has agreed to cause a Subsidiary to take certain actions, or to prohibit, prevent, or otherwise limit the ability of a Subsidiary to take certain actions, that such agreement shall constitute a direct obligation of each Guarantor and Ormesa (to the extent compliance therewith would not violate the Ormesa Credit Agreement). Nothing in this Section 9.04 shall be construed to permit any Guarantor to incur Indebtedness permitted to be incurred by the Issuer pursuant to Section 4.18 hereof.

ARTICLE X

MISCELLANEOUS

Section 10.01 Trust Indenture Act Controls. If any provision of this Indenture limits, qualifies or conflicts with the duties imposed by TIA (section) 318(c), the imposed duties shall control.

-96-

Page 97

Section 10.02 Notices. Any notice or communication by the Issuer or the Trustee to the others is duly given if in writing and delivered in Person or mailed by first class mail (registered or certified, return receipt requested), telex, telecopier or overnight air courier guaranteeing next day delivery, to the others' address:

If to the Issuer or the Guarantors:

Ormat Funding Corp.
980 Greg Street
Sparks, Nevada 89431
Tel.: (775) 356-9029
Fax: (775) 356-9039
Attention: President

with a copy to:

Latham & Watkins LLP
701 "B" Street
Suite 2100
San Diego, CA 92101
Tel.: (619) 238-2869
Fax: (619) 696-7419
Attention: Andrew Singer, Esq.

If to the Trustee:

Union Bank of California, N.A.
475 Sansome Street, 12th Floor
San Francisco, CA 94111
Tel.: (415) 296-6754
Fax: (415) 296-6757
Attention: Corporate Trust Department

The Issuer or the Trustee, by notice to the other, may designate additional or different addresses for subsequent notices or communications.

All notices and communications (other than those sent to Holders) shall be deemed to have been duly given: at the time delivered by hand, if personally delivered; five Business Days after being deposited in the mail, postage prepaid, if mailed; when answered back, if telexed; when receipt acknowledged, if telecopied; and the next Business Day after timely delivery to the courier, if sent by overnight air courier guaranteeing next day delivery.

-97-

Page 98

Any notice or communication to a Holder shall be mailed by first class mail, certified or registered, return receipt requested, or by overnight air courier guaranteeing next day delivery to its address shown on the register kept by the Registrar. Any notice or communication shall also be so mailed to any Person described in TIA (section) 313(c), to the extent required by the TIA. Failure to mail a notice or communication to a Holder or any defect in it shall not affect its sufficiency with respect to other Holders.

If a notice or communication is mailed in the manner provided above within the time prescribed, it is duly given, whether or not the addressee receives it.

If the Issuer mails a notice or communication to Holders, it shall mail a copy to the Trustee and each Agent at the same time.

Section 10.03 Communication by Holders of Senior Secured Notes with Other Holders of Senior Secured Notes. Holders may communicate pursuant to TIA (section) 312(b) with other Holders with respect to their rights under this Indenture or the Senior Secured Notes. The Issuer, the Trustee, the Registrar and anyone else shall have the protection of TIA (section) 312(c).

Section 10.04 Certificate and Opinion as to Conditions Precedent. Upon any request or application by the Issuer to the Trustee to take any action under this Indenture, the Issuer shall furnish to the Trustee:

(a) an Officers' Certificate in form and substance reasonably satisfactory to the Trustee (which shall include the statements set forth in Section 10.05 hereof) stating that, in the opinion of the signers, all conditions precedent and covenants, if any, provided for in this Indenture relating to the proposed action have been satisfied; and

(b) an Opinion of Counsel in form and substance reasonably satisfactory to the Trustee (which shall include the statements set forth in Section 10.05 hereof) stating that, in the opinion of such counsel, all such conditions precedent and covenants have been satisfied.

Section 10.05 Statements Required in Certificate or Opinion. Each certificate or opinion with respect to compliance with a condition or covenant provided for in this Indenture (other than a certificate provided pursuant to TIA (section) 314(a)(4)) shall comply with the provisions of TIA (section) 314(e) and shall include:

(a) a statement that the Person making such certificate or

opinion has read such covenant or condition;

(b) a brief statement as to the nature and scope of the examination or investigation upon which the statements or opinions contained in such certificate or opinion are based;

(c) a statement that, in the opinion of such Person, he or she has made such examination or investigation as is necessary to enable him to express an informed opinion as to whether or not such covenant or condition has been satisfied; and

-98-

Page 99

(d) a statement as to whether or not, in the opinion of such Person, such condition or covenant has been satisfied.

Section 10.06 Rules by Trustee and Agents. The Trustee may make reasonable rules for action by or at a meeting of Holders. The Registrar or Paying Agent may make reasonable rules and set reasonable requirements for its functions.

Section 10.07 No Personal Liability of Directors, Officers, Employees and Stockholders. No past, present or future director, officer, employee, organizer, manager or agent of the Issuer or any Affiliate of any such party (other than the Issuer), as such, shall have any liability for any obligations of the Issuer under the Senior Secured Notes, this Indenture, any Financing Document or for any claim based on, in respect of, or by reason of, such obligations or their creation. Each Holder by accepting a Senior Secured Note waives and releases all such liability. The waiver and release are part of the consideration for issuance of the Senior Secured Notes.

Section 10.08 Governing Law. THE INTERNAL LAW OF THE STATE OF NEW YORK SHALL GOVERN AND BE USED TO CONSTRUCT THIS INDENTURE, THE SENIOR SECURED NOTES WITHOUT GIVING EFFECT TO APPLICABLE PRINCIPLES OF CONFLICTS OF LAW TO THE EXTENT THAT THE APPLICATION OF THE LAWS OF ANOTHER JURISDICTION WOULD BE REQUIRED THEREBY.

Section 10.09 Submission to Jurisdiction. The Issuer and the Guarantors hereby submit to the nonexclusive jurisdiction of the New York State Courts and the federal courts sitting in the State of New York for the purposes of all legal proceedings arising out of or relating to this Indenture or the transactions contemplated hereby. The Issuer and Guarantors hereby irrevocably waive, to the fullest extent permitted by applicable law, any objection which they may now or hereafter have to the laying of the venue of any such proceeding brought in such a court and any claim that any such proceeding brought in such court has been brought in an inconvenient forum.

Section 10.10 Waiver of Jury Trial. EACH PARTY HERETO HEREBY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN ANY LEGAL PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF OR RELATING TO THIS INDENTURE OR THE TRANSACTIONS CONTEMPLATED HEREBY (WHETHER BASED ON CONTRACT, TORT OR ANY OTHER THEORY). EACH PARTY HERETO (A) CERTIFIES THAT NO REPRESENTATIVE, AGENT OR ATTORNEY OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT, IN THE EVENT OF LITIGATION, SEEK TO ENFORCE THE FOREGOING WAIVER AND (B) ACKNOWLEDGES THAT IT AND THE OTHER PARTIES HERETO HAVE BEEN INDUCED TO ENTER THIS INDENTURE BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

-99-

Page 100

Section 10.11 No Adverse Interpretation of Other Agreements.

This Indenture may not be used to interpret any other indenture, loan or Indebtedness agreement of the Issuer or its Subsidiaries or of any other Person. Any such indenture, loan or Indebtedness agreement may not be used to interpret this Indenture.

Section 10.12 Successors. All agreements of the Issuer in this Indenture and the Senior Secured Notes shall bind its successors. All agreements of the Trustee in this Indenture shall bind its successors.

Section 10.13 Severability. In case any provision in this Indenture or in the Senior Secured Notes shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions shall not in any way be affected or impaired thereby.

Section 10.14 Counterpart Originals. The parties may sign any number of copies of this Indenture. Each signed copy shall be an original, but all of them together represent the same agreement.

Section 10.15 Table of Contents, Headings, etc. The Table of Contents, and headings of the Articles and Sections of this Indenture have been inserted for convenience of reference only, are not to be considered a part of this Indenture and shall in no way modify or restrict any of the terms or provisions hereof.

EXHIBIT 10.1.8

LOAN AGREEMENT

THIS LOAN AGREEMENT (the "Agreement") is entered into as of October 1st 2003 by and between Ormat Technologies Inc. Delaware Corporation ("OTI" or "Borrower") and Ormat Industries Ltd., an Israeli Corporation, ("Ormat" or "Lender") in effect from January 1st, 2003.

RECITALS

- A. At Borrower's request, Ormat is willing to make a loan to Borrower.
- B. The parties desire or set forth their mutual understanding with respect to the loan.

The parties therefore agree as follows:

1. LOAN

- (a) Lender hereby agrees to make a loan to Borrower in one or more advances up to a total aggregate amount of up to \$150,000,000 USD (One Hundred & Fifty Million United States Dollars) (the "Loan"), pursuant to the terms and conditions set forth in this Agreement.
- (b) If Borrower elects to borrow any funds from Lender, then within 5 (five) business days of a written request from Borrower for an advance, Lender shall consider making such advance in accordance with the terms hereof. Lender shall note on Schedule A attached hereto the date and amount of each advance and the total of all unpaid advances shall be the outstanding balance of the Loan.

2. USE OF PROCEEDS

Borrower may use the proceeds of the Loan in connection with its general corporate activities and investments.

3. PAYMENT

- (a) Schedule B defines the repayment schedule by combining the advances made to an aggregate principle amount to be repaid on each due date ("Aggregate Amount") Borrower shall repay the Loan and accrued interest in accordance with Section 5 below in full in accordance with specific schedules agreed upon payment dates according to schedule B attached ("Minimum Repayment Dates") and in any event on or before June 5th, 2010.
- (b) Upon repayment of the Loan and accrued interest, amounts repaid shall be applied first against costs, damages and expenses due Lender, then against amounts due for accrued interest and, thereafter, against overdue principle and then against the first principle Loan amounts becoming due, after the date of the prepayment, in accordance with Schedule B. A partial repayment of an Aggregate Amount shall be

allocated in a pari passu manner between the Advances constituting that Aggregate Amount.

- (c) Borrower may at any time, upon prior written notice of 2 (two) business days, prepay the Loan and accrued interest in whole or in part.
- (d) All amounts payable hereunder shall be payable at the Lender's address listed below or other place of payment as directed by Lender.

4. REPRESENTATIONS AND WARRANTIES

Borrower represents and warrants to Lender as follows:

- (a) Borrower is a company duly organized and validly existing under the laws of Delaware and is in good standing under the laws of that nation. Borrower has all requisite power and authority to own and lease its property, to conduct its business as presently conducted and to enter into and perform its obligations under this Agreement.
- (b) This Agreement has been duly executed and delivered by Lender and constitutes valid and binding obligations of Borrower, enforceable in accordance with its terms, except as enforcement may be limited by applicable bankruptcy laws or other similar laws affecting creditors' rights generally.
- (c) Borrower is not in violation or default of any provision of its organizational documents, of any indenture, agreement, instrument, judgment, order, writ, decree or contract to which it is a party or by which it or any of its properties, assets or rights is bound or affected or of any statute, rule or regulation applicable to Borrower which violation or default would have a material adverse effect on Borrower's business or property. The execution, delivery and performance of this Agreement by Borrower and the consummation of the transactions contemplated thereby will not result in any such violation by Borrower of, require any consent to be obtained by Borrower under, be in conflict with, or constitute, with or without the passage of time and giving of notice, either a default by Borrower under any such provision, instrument, judgment, order, writ, decree or contract or an event which results in the creation of any material lien, charge or encumbrance.
- (d) There are no actions, suits, investigations or proceedings pending or, to the knowledge of Borrower, threatened against Borrower before or by any governmental department, commission board, bureau, agency or instrumentality, or before any arbitrator or arbitration board which may have a material adverse effect on the assets or financial condition of the Borrower.

5. NATURE OF THE LOAN

- (a) The loan and accrued interest shall be repaid in full on or before the Minimum Repayment Date, or as specifically stated in Schedule B per advance.
- (b) Interest on the Loan shall be calculated on the balance from the date of the receipt of each advance until the date of payment at a rate per annum of Lender's average effective interest rate plus 0.3% percent in United States Dollars, which represents a rate of 7.5% for the advances made during year 2003. All computations of interest shall be made by the Lender on the year basis of 360 days.

- (c) Borrower shall pay or cause to be paid all present and future taxes, duties and other charges of whatsoever nature levied or imposed by the government of Israel or any jurisdiction through or out of which a payment is made on or in connection with any and all amounts due under this Agreement,

All payments of principal and interest due under this Agreement shall be made without deduction for or on account, and free and clear, of any such taxes, duties or other charges other than withholding income tax pertaining to the Lender, if applicable in the Borrower's country and provided that Borrower will provide a certificate indicating such a transaction.

- (d) Nothing contained in this Agreement shall impair the validity of the Loan or in any way impair the rights of Lender to exercise all remedies available to it under law.

6. DEFAULT

The occurrence of one or more of the following events shall constitute a default under this Agreement ("Event of Default").

- (a) Borrower's failure to pay the Loan and accrued interest in full or in part as it becomes due and payable, and such failure shall not be cured within 10 (ten) business days after Lender gives written notice thereof to Borrower;
- (b) Borrower's failure to comply with any of its obligations and undertakings under this Agreement;
- (c) Any representation, warranty or covenant made herein shall prove to have been false or misleading in any material respect when made;
- (d) Borrower's application for, consent to or acquiescence in the appointment of a trustee, receiver, liquidator, assignee, or other similar official Borrower or

Borrower's property, or the making of a general assignment for the benefit of creditors, or the filing of a petition or an answer seeking reorganization in proceeding under any bankruptcy or other insolvency law, or the making of an agreement, composition, extension or adjustment with its creditors; or

- (e) Any bankruptcy, reorganization, debt arrangement or other proceeding under any bankruptcy or other insolvency law being instituted by or Borrower and not dismissed within 60 (sixty) days thereafter.

7. REMEDIES

Upon the occurrence of an Event of Default hereunder, all amounts outstanding under the Loan and accrued interest shall, at the option of Lender, become immediately due and payable upon Lender's written notice to Borrower. If Lender elects to declare all amounts immediately due and payable, then Lender shall be entitled to exercise all rights and remedies available to it under law. In addition, upon the occurrence of an Event of Default and so long as such Event of Default is continuing, Lender shall be under no obligation to make additional advances pursuant to Subsection 2(b) above.

8. NOTICE

Any notice, request, instruction or other document to be given hereunder by a party hereto shall be in writing, delivered in person, or mailed by certified or

registered mail, return receipt requested, or transmitted by facsimile transmission with electronic confirmation of receipt to the addressee's address or facsimile number set forth below (or such other address of facsimile number as the party changing its address specifies in a notice to the other parties):

Notice shall be deemed given the earlier of when actually received and three days after Notice is sent in accordance with the above.

9. MODIFICATION; ENTIRE AGREEMENT; TERMINATION OF PRIOR AGREEMENT

No change or modification of this Agreement shall be valid unless it is in writing and signed by both Lender and Borrower. This Agreement sets forth the entire agreement and understanding among the parties as to the subject matter treated herein and merges and supersedes all prior discussions, agreements and understandings.

10. INVALID PROVISION

The invalidity or unenforceability of any provision of this Agreement shall not affect

the other provisions, hereof, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

11. INTERPRETATION

This Agreement and each of the terms and provisions hereof are deemed to have been explicitly negotiated among the parties and the language in all parts of this Agreement shall in all cases be construed according to its fair meaning and not strictly for or against any party.

12. COUNTERPARTS

This Agreement May be signed in two or more counterparts, each of which shall be deemed an original, and all of which, taken together shall be deemed one and the same document.

13. APPLICABLE LAW

This Agreement shall be governed by, and interpreted and

construed under the laws of Israel.

14. EXPENSES AND ATTORNEY'S FEES

In the event that any party to this Agreement brings an action or proceeding for the declaration of rights of the parties hereunder, for injunctive relief, for an alleged breach or default of or any other action arising out of this Agreement, the non-prevailing party in any action pursued in courts of competent jurisdiction (the finality of which is not legally contested) shall pay to the prevailing party all reasonable costs, damages, and expenses including attorney's fees expended or incurred in connection therewith.

15. SURVIVAL

The representations, warranties, covenants and agreement made by the parties hereto in this Agreement shall survive the closing of the transactions contemplated by this Agreement.

16. SUCCESSORS AND ASSIGNS

Except as otherwise expressly provided in this Agreement, the provisions of this Agreement shall insure to the benefit of, and be binding upon, the successors and assigns of the parties to this Agreement; provided that Lender shall not be obligated to make advances under Section 1 of this Agreement to any successor or assign of Borrower, but may do so pursuant to the terms of this Agreement as Lender's sole discretion.

17. TITLES

The titles of the Sections of this Agreement are for convenience of reference only and are not to be considered in construing this Agreement.

IN WITNESS WHEREOF, the parties hereto make this Agreement as of the date first set forth above.

ORMAT(R) [ORMAT LOGO OMITTED]

GUARANTEE FEE AGREEMENT

BETWEEN

Ormat Technologies, Inc. (OTI)

and

Effective as of January 1, 1999

At OTI's request OIL has agreed to issue certain Standby letters of Credit on behalf of OTI, as well as guarantees in forms acceptable to the end customers.

- o A fee on Standby Letters of Credit and on corporate guarantees will be calculated each quarter at a rate of 1% (one percent) per annum, on all amounts effective during that quarter.
- o All out of pocket expenses will be billed at cost.

The billing will be issued at the end of each quarter for the current quarter and due upon receipt.

This Agreement is the entire agreement between the parties hereto with respect to the subject matter hereof, and supersedes all prior agreements, understandings and discussions between them with respect to such subject matter.

Exhibit 10.1.11

REIMBURSEMENT AGREEMENT

THIS AGREEMENT (this "Agreement") between Ormat Industries Ltd., an Israeli corporation ("OIL"), and Ormat Technologies, Inc., a Delaware corporation ("OTI"), is made and entered into as of July 15, 2004.

RECITALS

WHEREAS, OIL and OTI have entered into a Guarantee Fee Agreement dated as of January 1, 1999 (the "Guarantee"), pursuant to which OIL has agreed to issue certain standby letters of credit on OTI's behalf, as well as guarantees in forms acceptable to the end customers;

WHEREAS, OIL requires that OTI execute this Agreement and OTI is willing to execute this Agreement;

NOW THEREFORE, in consideration of the premises contained herein and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto hereby agree as follows:

1. Unconditional Reimbursement Obligations. OTI, together with its successors

and permitted assigns, hereby unconditionally agrees that on the fifth business day following receipt of notice (the "Due Date") from OIL of (i) any draw made on a standby letter of credit issued by OIL pursuant to the Guarantee or (ii) any payments made in accordance with a guarantee made by OIL pursuant to the Guarantee (each, a "Payment"), OTI shall reimburse OIL in full for such Payment. Any payment that is not made on the Due Date shall bear interest, accruing from such Due Date until repayment in full, at an interest rate per annum equal to OIL's average cost of funds plus 0.3% in United States dollars.

2. Indemnification. OTI agrees at all times to indemnify OIL and hold OIL harmless from and against any and all liabilities, losses, damages, costs, and expenses, including reasonable attorney fees, which OIL may sustain or incur from time to time by reason of having executed the Guarantee or any modification, amendment, limitation, renewal or extension thereof, except as a result of OIL's gross negligence or willful misconduct.
3. Representations and Warranties of OTI. OTI hereby represents and warrants that (i) it has the requisite corporate power to execute, deliver and perform this

Agreement and has taken all necessary corporate action to authorize the execution, delivery and performance of this Agreement, (ii) the execution, delivery and performance of this Agreement does not and will not violate, create a breach of or a default under any contract or agreement to which OTI is a party or by which it is bound, and (iii) the execution, delivery and performance of this Agreement does not require any approval of any person, except for such approvals or consents which have been obtained prior to the date hereof.

4. Defense of Legal Action. In the event any legal action is taken against OIL under the Guarantee, either jointly with OTI or alone, OTI shall defend such action at its own expense and OIL shall cooperate with OTI in the defense thereof, or, at its election, OIL shall assume the defense, at the expense of OTI. OIL shall have the right to join OTI as party defendant in any legal action brought against it alone under the Guarantee and OTI hereby consents to the entry of an order making it a party defendant.
5. Miscellaneous. This Agreement (i) embodies the entire agreement and understandings between OIL and OTI (or any subsidiary to which the underlying interest may be assigned) and supersedes all prior agreements and understandings between OIL and OTI relating to the subject matter hereof; (ii) may be modified or amended only by written instrument executed by each party hereto; (iii) shall be governed by and construed according to the laws of the State of New York; and (iv) may be executed in several counterparts, each of which is an original, but all of which together constitute one and the same agreement. If any provisions of this Agreement shall be held to be invalid, illegal or unenforceable, the remaining provisions shall not in any way be effected or impaired.

IN WITNESS WHEREOF, OIL and OTI have duly executed this Agreement as of the date first written above.

SERVICES AGREEMENT

ENTERED INTO THIS 15TH DAY OF JULY, 2004

THIS SERVICES AGREEMENT (this "Agreement") is made and entered into as of the 1st day of July, 2004 (the "Effective Date") by and among Ormat Industries Ltd., an Israeli Public corporation with principal place of business at the Industrial Area, Yavne ("OIL"), and Ormat Systems Ltd., an Israeli corporation with principal place of business at the Industrial Area, Yavne ("OSL").

W I T N E S S E T H :

- - - - -

WHEREAS, OIL and OSL have entered, into a purchase agreement dated as of the date hereof (the "PURCHASE AGREEMENT") pursuant to which OSL has agreed to purchase and assume from OIL, and OIL has agreed to sell and assign to OSL, certain assets and liabilities related to the Business (as defined in the Purchase Agreement) all under the terms and subject to the conditions set forth therein; and

WHEREAS, the parties to the Purchase Agreement agreed therein that OSL shall provide corporate, financial, secretarial and administrative services to OIL as would be set forth in a services agreement; and

NOW, THEREFORE, in consideration of the foregoing premises, the mutual covenants herein contained, and other good and valuable consideration the receipt and sufficiency of which are hereby acknowledged, the parties hereto, intending to be legally bound, hereby agree as follows:

1. Definitions. Unless otherwise expressly defined in this Agreement, any capitalized term used herein shall bear the meaning ascribed to it in the Purchase Agreement.
2. The Services. For the purposes of this Agreement, the term "SERVICES" means corporate, financial, secretarial and administrative services as more fully set forth in SCHEDULE 2 attached hereto. The Services shall also include the use of office space and office equipment which is either owned or leased or used by OSL and which may be necessary from time to time for the provision of the Services.

2

In addition, upon the request of OIL, to the extent that at the relevant time OSL employs the adequate personnel for such tasks, OSL shall provide to OIL engineering services related to the business of Opti Canada, Inc. and of Opti Technologies, BV (the "ENGINEERING SERVICES").

3. Hire of Services.

- 3.1 Effective upon the Effective Date and until this Agreement is terminated in accordance with its terms, OIL hereby retains OSL

to perform and provide the Services and OSL undertakes to perform and provide the Services and the Engineering Services, if so required, to OIL.

- 3.2 It is hereby agreed and clarified that the Services shall be subject to and supervised by the Board of Directors of OIL, or any person duly authorized by such Board of Directors.
- 3.3 OSL undertakes to provide the Services hereunder which are typically performed by key officers, only through the persons listed in SCHEDULE 3.3, attached hereto (the "SERVICE PERSONNEL") or any amendment thereto effected pursuant to Section 3.4 below.
- 3.4 The list of Service Personnel may be amended either (a) by OSL, provided the prior written consent of OIL for such amendment will have been obtained by OSL; or (b) by a written notice from OIL to OSL which shall be binding upon its receipt by OSL. It is hereby clarified that any amendment to the Service Personnel initiated by OIL shall not require any prior or subsequent OSL's approval and/or consent in any form whatsoever. Such decision of OSL or OIL to amend the list of Service Personnel, will be at the sole discretion of the board of directors of the respective company, without it being necessary to obtain the approval of the general meeting of the shareholders of the relevant company.
- 3.5 Nothing in this Agreement shall prevent OIL from engaging any other persons and/or entities in connection with the Services provided that OSL shall not be liable or responsible in any manner for any loss, damage, liability, expense, claim, etc. to OIL as a result of any such other person or entities providing Services.

3

4. Acceptance by OSL. OSL hereby accepts the engagement set forth in Section 2 above and agrees to render the Services to OIL in accordance with the terms and conditions of this Agreement and further agrees to provide for the benefit of OIL its best judgment, efforts and skill in rendering its Services under this Agreement.
5. Consideration. For all Services to be provided by OSL to OIL hereunder throughout the term of this Agreement: OIL shall pay to OSL monetary consideration of US\$ Ten Thousand (10,000\$) per month (the "MONTHLY FEES") and all out of pocket expenses borne by OSL with respect to the Services rendered hereunder. In addition, OIL shall pay OSL in consideration for the Engineering Services a fee equal to the cost of such services to OSL plus 10% (the "ENGINEERING FEES"), as well as any other out of pocket expenses borne by OSL with respect to such services. For the purpose of this section, "cost" of Engineering Services shall be based on salaries and other benefits paid by OSL to those employees of OSL through whom such Engineering Services are provided to OIL, calculated in proportion to the actual time spent for the provision of said services.

On each anniversary of this Agreement, commencing 12 months from January 1, 2005, the Monthly Fees shall be increased by the rate of increase in the CPI in Israel during the previous 12 months period plus 10% (of such increase).

OIL shall pay to OSL the Monthly Fees, the Engineering Fees and out of pocket expenses, as set forth above, on a monthly basis, until the fifteenth day of each month with respect to the previous month. Any payment hereunder shall be paid together with VAT at the applicable rate added to the fees mentioned above and be made by wire transfer to OSL's

bank account, the details of which shall be provided to OIL by OSL in writing, as may be amended from time to time.

6. Term and Termination. This Agreement shall continue in effect from the Effective Date through and including December 31, 2009 (the "INITIAL PERIOD") and shall automatically renew for an unlimited number of successive one (1) year renewal periods thereafter (each, a "RENEWAL PERIOD"), unless (i) OIL provides written notice to the other that it elects to terminate this Agreement, which such written notice must be given not less than one hundred and eighty (180) days prior to the expiration of the Initial Period or any Renewal Period, as the case may be; (ii) either OIL or OSL provides written notice to the other that it elects to immediately terminate this Agreement if the other party becomes insolvent, makes a general assignment for the benefit of creditors, files a voluntary petition of bankruptcy, suffers or

4

permits the appointment of a receiver for its business or assets, or becomes subject to any proceedings under any bankruptcy or insolvency law, voluntarily or otherwise, in which case the notifying party may regard the other party as in default under this Agreement; (iii) a party hereto is in breach of, or default under, this Agreement, and the other party serves a thirty (30) days' written termination notice to the breaching party. Said notice shall become effective at the end of such period, unless during said period the breaching party shall cure such breach or default. In the event of such termination, the non-breaching party shall have all rights and remedies available at law or in equity.

7. Insurance. OSL hereby undertakes that immediately following the signing of this Agreement, a Directors and Officers' insurance policy shall be procured for any persons listed on the Service Personnel list, as shall be amended from time to time, in the minimum amount of US\$ Five Million (\$5,000,000), per incident and per period, and that such insurance policy shall be maintained effective with respect to each person so insured, for at least until seven years following the termination of such person's employment with OSL. OSL shall either execute such undertaking by procuring such insurance policy on its own account or by ensuring such coverage as part of a D&O insurance policy obtained by any of its parent companies.
8. Confidentiality. Each party recognizes that it and its officers, directors, employees and agents may obtain knowledge of the trade secrets and other confidential information of the other party which is valuable, special or unique to the continued business of that party. Accordingly, each party agrees to hold such information in confidence and to use its best efforts to ensure that such information is held in confidence by its officers, directors and employees. Notwithstanding the foregoing, each party may make such disclosure to outside parties as may be necessary to comply with applicable governmental laws, rules, and regulations and judicial orders or if any confidential information is or was in the public domain or generally available to the public through no unauthorized act or omission of the disclosing party. The parties acknowledge that each party's confidential information represents unique and valuable assets.
9. OSL as Independent Contractor. OSL and its employees shall, for all purposes of this Agreement, be deemed to be an independent contractor and not an agent or employee of the OIL and, except as otherwise expressly provided herein and/or authorized by the Board of Directors of OIL, shall have no authority to act for or to represent OIL or otherwise to be

10. Binding Effect; Successors and Assigns; Assignment. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective heirs, successors, permitted assigns and legal representatives. This Agreement shall be for the sole benefit of the parties to this Agreement and their respective heirs, successors, permitted assigns and legal representatives. This Agreement may not be assigned by either party without the prior written consent of the other party. Any attempted assignment in violation of this Section 10 shall be null and void.
11. Counterparts; Signatures; Titles and Headings. This Agreement may be executed in counterparts, each of which shall be deemed an original agreement, but all of which together shall constitute one and the same instrument. This Agreement shall be deemed executed and delivered upon the delivery of original signed copies, or facsimile copies containing telecopied signatures, to each other party hereto. The headings in this Agreement are for reference purposes only and shall not in any way affect the meaning or interpretation of this Agreement.
12. Governing Law; Jurisdiction and Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of Israel, without reference to choice of law principles thereof, and the parties agree to exclusively submit to the jurisdiction and venue of Israel and the courts of Tel-Aviv-Jaffa, Israel.

Each Party hereto waives any claim of consequential damages from the other unless: (a) the foreseeability of such damages at the time of the contract; and (b) the amount of such damages are proven by clear and convincing evidence.

Each party hereto hereby waives any claim to punitive, multiplied or exemplary damages from the other.

It is hereby clarified that in case the first paragraph of this Section 12 is found, by a court of competent jurisdiction, to be unenforceable or otherwise invalid, each party hereto waives its right to trial of any issue by jury.

13. Warranty. This Services Agreement is entered into on an "AS IS" basis without a warranty of any kind. All express or implied representations and/or warranty, including without limitation any implied warranty, are hereby excluded. The entire risk as to the quality of Services is borne by OIL.

14. Severability. If any provision of this Agreement shall be determined by any court of competent jurisdiction (or any other agreed-upon dispute resolving body) to be unenforceable or otherwise invalid as written, the same shall be enforced and validated to the fullest extent permitted by law. All provisions of this Agreement are severable, and the unenforceability or invalidity of any single provision hereof shall not affect the remaining provisions.
15. Notices. Except as otherwise provided herein, all notices shall be in writing and shall be effective upon receipt, if delivered personally or if mailed by overnight courier, postage prepaid, or upon generation of a

confirmation if sent by facsimile (provided that such transmission is followed by mailing of a conforming copy) to the parties at their addresses set forth in the first paragraph of this Agreement or such other address as subsequently may be specified in writing by a party to the other parties.

16. No Strict Construction; Interpretation. The parties hereto acknowledge that this Agreement has been prepared jointly by the parties hereto and their respective legal counsel, and shall not be strictly construed against any party as a result of the party drafting any given provision hereof. Unless otherwise indicated to the contrary herein by the context or use thereof, (a) the words "herein," "hereto," "hereof," and words of similar import refer to this Agreement as a whole and not to any particular Section, subsection or paragraph hereof, (b) words importing the masculine gender shall include the feminine and neutral genders and vice versa, and (c) words importing the singular shall include the plural and vice versa.
17. Entire Agreement; Modification and Waiver. Except for the agreements specifically referenced in or contemplated by this Agreement, this Agreement constitutes the entire agreement between the parties with respect to the matters covered hereby and supersedes all previous written, oral or implied understandings between them with respect to such matters. This Agreement may be amended or modified only by a writing signed by the party against whom enforcement of such amendment or modification is sought. Any of the terms or conditions of this Agreement may be waived at any time by the party or parties entitled to the benefit thereof, but only by a writing signed by the party or parties waiving such terms or conditions. No waiver of any provisions of this Agreement or of any rights or benefits arising hereunder shall be deemed to constitute or shall constitute a waiver of any other provisions of this Agreement (whether or not similar) nor shall such waiver constitute a continuing waiver unless otherwise expressly provided in writing.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their duly authorized representatives as of the day first above written.

PURCHASE AND SALE AGREEMENT

THIS PURCHASE AND SALE AGREEMENT dated as of April 22, 2004 (the "Effective Date"), is made and entered into by and among CONSTELLATION POWER, INC., a Maryland corporation ("CPI" or "Seller"), COSI PUNA, INC., a Maryland corporation ("COSI PUNA"), ORNI 8 LLC, a Delaware limited liability company ("ORNI 8" or "Purchaser") and ORMAT NEVADA INC., a Delaware corporation ("Purchaser's Parent")(each of the foregoing sometimes referred to herein as a "Party" and, collectively, as the "Parties").

RECITALS

A. CPI is the record and beneficial owner of 100% of the issued and outstanding capital stock of (i) CE Puna I, Inc. (the "CE PUNA I Shares"), a Maryland corporation ("CE PUNA I") and (ii) CE Puna II, Inc. (the "CE PUNA II Shares"), a Maryland corporation ("CE PUNA II").

B. Each of CE PUNA I and CE PUNA II is the record and beneficial owner of 50% of the partnership interests (collectively, the "CE PUNA LP Interests") of CE Puna Limited Partnership, a Maryland limited partnership ("CE PUNA LP").

C. CE PUNA I and CE PUNA LP are the record and beneficial owners of all of the partnership interests of Puna Geothermal Venture (collectively, the "PGV Interests"), a Hawaii general partnership ("PGV").

D. PGV owns the Plant (as defined in Section 1.1).

E. COSI PUNA operates the Plant pursuant to the O&M Agreement (as defined in Section 1.1).

F. The CE PUNA I Shares and the CE PUNA II Shares may sometimes be referred to herein collectively as the "Purchased Shares", the CE PUNA LP Interests and the PGV Interests may sometimes be referred to herein collectively as the "Partnership Interests" and CE PUNA I, CE PUNA II, CE PUNA LP and PGV may sometimes be referred to herein collectively as the "Companies."

G. CPI desire to sell to Purchaser, and Purchaser desires to purchase and acquire from CPI, all of the Purchased Shares on the terms and subject to the conditions hereinafter set forth.

H. COSI PUNA and PGV desire to terminate the O&M Agreement effective as of the Closing Date.

1

I. Seller and Purchaser are entering into this Agreement to evidence their respective duties, obligations and responsibilities in respect of the purchase and sale of the Purchased Shares contemplated hereby (the "Transactions");

J. The Parties desire that Purchaser's Parent support certain of the obligations of Purchaser hereunder as set forth herein.

NOW, THEREFORE, in consideration of the foregoing recitals and the agreements contained herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties, intending to be legally bound, do hereby agree as follows:

ARTICLE 1

DEFINITIONS

SECTION 1.1 Certain Defined Terms. The following terms when used in this Agreement (or in the Schedules and Exhibits to this Agreement) with initial letters capitalized have the meanings set forth below:

"338 Allocation Statement" has the meaning set forth in Section 7.5(b).

"IRS" means the Internal Revenue Service.

"Knowledge" or similar terms used in this Agreement with respect to a Party means: (a) in the case of Seller, the extent of the actual and current knowledge of the individuals listed in Schedule 1.1D (or their respective successors) as of the Effective Date (or, with respect to the officer's certificate delivered pursuant to Section 10.6, the date of delivery of the certificate); and (b) in the case of Purchaser, the extent of the actual and current knowledge as of the Effective Date (or, with respect to the officer's certificate delivered pursuant to Section 11.6, the date of delivery of the certificate) of any officer or employee of each of Purchaser or any Affiliate of Purchaser who has actually participated in the negotiation or review of this Agreement or due diligence with respect to the Transactions on Purchaser's behalf.

7

"Loan Documents" means, collectively, the Credit Agreement and all documents related and incidental thereto, including, but not limited to, the CSFB Swap Agreement, Dresdner Swap Agreement, Pledge Agreement, Debt Service Reserve Guaranty and the agreements and instruments identified in Item 1 of Schedule 5.9.

"Losses" has the meaning set forth in Section 9.2(a).

"Material Adverse Effect" means (a) any event, circumstance or condition materially impairing a Party's authority, right, or ability to (i) consummate the Transactions or (ii) transfer the Purchased Shares or the Partnership Interests, or (b) any change in, or effect on, the Plant that is materially adverse to the finances, operations or physical condition of the Plant, taken as a whole, but excluding:

(1) any change or effect generally affecting the State of Hawaii, the Big Island of Hawaii, or the international, national, or local electric generating, transmission or distribution industry as a whole;

(2) any change or effect resulting from changes in the State of Hawaii, the Big Island of Hawaii, or the international, national, or local wholesale or retail markets for electric power;

(3) any change in or effect on the State of Hawaii, the Big Island of Hawaii, or the North American, national, or local transmission system;

(4) any change or changes cured (including by the payment of money) before the earlier of the Closing and the termination of the Agreement pursuant to Section 12.1;

(5) any order or act of any Governmental Authority applicable to providers of generation, transmission or distribution of electricity generally that imposes restrictions, regulations or other requirements thereon, except to the extent specifically relating to PGV, the Plant or the Transactions;

(6) any change or effect resulting from one or more changes in the rules established by any independent system operator or regional

transmission organization with jurisdiction over PGV or the Plant;

(7) the financial or other condition of the purchaser under the Power Purchase Agreement or its Affiliates;

(8) any change or effect resulting from changes in the national or international securities markets; or

(9) any change or effect resulting from or associated with acts of war, national disaster, acts of God, or terrorism that does not directly affect the Plant.

8

Any determination as to whether any condition or other matter has a Material Adverse Effect shall be made only after taking into account proceeds received under all effective insurance coverages and effective third party indemnifications with respect to such condition or matter.

"Notice of Claim" has the meaning set forth in Section 9.4.

"O&M Agreement" means that certain Operation and Maintenance Agreement between PGV and COSI PUNA, dated as of December 2, 1996.

"ordinary course of business" means, with respect to PGV, the operation of the Plant in the ordinary course consistent with past custom and practice.

"Partnership Interests" has the meaning set forth in the Recitals to this Agreement.

"Party" has the meaning set forth in the introductory paragraph of this Agreement.

"Permits" has the meaning provided in Section 5.7.

"Permitted Encumbrances" means:

(a) liens for Property Taxes and other governmental charges and assessments which are not yet due and payable, or Taxes the validity of which are being contested in good faith by appropriate proceedings as listed on Schedule 5.15 and for which adequate provision is made on the Balance Sheet;

(b) all exceptions, restrictions, easements, charges, rights-of-way and monetary and non-monetary encumbrances which are set forth in any Permit;

(c) mechanics', carriers', workers', repairers' and other similar liens and the rights of customers, suppliers and subcontractors arising or incurred in the ordinary course of business for amounts that are not yet due and payable or that are contested in good faith by appropriate proceedings as listed on Schedule 5.8;

(d) purchase money security interests in respect of personal property arising or incurred in the ordinary course of business;

(e) zoning, entitlement, conservation restriction and other land use and environmental regulations of any Governmental Authority;

(f) Encumbrances of record (other than Encumbrances securing indebtedness of Seller for money borrowed which are not covered by any other clause of this definition);

(g) restrictions and regulations imposed by any Governmental Authority or any local, state, regional, national or international reliability council, or any independent system operator or regional transmission organization with jurisdiction over either PGV or the Plant;

(h) Encumbrances with respect to the assets of Plant created by or resulting from the acts or omissions of Purchaser;

(i) claims, equities and other Encumbrances arising under the Existing Contracts, or which will be and are discharged or released either prior to, or simultaneously with, the Closing;

(j) any restrictions contained in or imposed by Seller's and Purchaser's Required Regulatory Approvals and Seller's and Purchaser's Required Consents; and

(k) such other Encumbrances or imperfections in or failures of title that would not, individually or in the aggregate, have a Material Adverse Effect.

"Person" means an individual, partnership, joint venture, corporation, limited liability company, trust, association or unincorporated organization, any Governmental Authority, or any other entity.

"PGV" has the meaning set forth in the Recitals to this Agreement.

"PGV Interests" has the meaning set forth in the Recitals to this Agreement.

"Plant" means, to the extent of PGV's ownership interests therein, the geothermal electricity generation facilities located on the Big Island of Hawaii and all related personal and real property interests therein.

"Pledge Agreement" means that certain Stock Pledge Agreement (CEI) dated as of December 21, 1990, by CPI to Credit Suisse, New York Branch, as amended by that certain Confirmation and Amendment of Pledge Agreement - CPI, by CPI to Credit Suisse, New York Branch, dated as of December 2, 1996.

"Power Purchase Agreement" means that certain Power Purchase Contract for Unscheduled Energy Made Available From a Qualifying Facility, dated as of March 24, 1986, by and between PGV and Hawaii Electric Light Company, Inc., as amended on July 28, 1989, October 19, 1993, March 7, 1995, and February 12, 1996.

"Price Allocation" has the meaning set forth in Section 7.5(b).

"Property Taxes" means real, personal and intangible property Taxes.

"Purchase Price" has the meaning set forth in Section 3.3.

10

"Purchased Shares" has the meaning set forth in the Recitals to this Agreement.

"Purchaser" has the meaning set forth in the introductory paragraph of this Agreement.

"Purchaser Claims" has the meaning set forth in Section 9.2(a).

"Purchaser Indemnified Parties" has the meaning set forth in Section 9.2(a).

"Purchaser's Parent" has the meaning set forth in the introductory paragraph of this Agreement.

"Purchaser's Required Consents" means the consent of any Person specified in Schedule 1.1E, other than a Governmental Authority, necessary for Purchaser's consummation of the Transactions.

"Purchaser's Required Regulatory Approvals" means approval of the purchase and sale contemplated hereby by any Governmental Authority specified in Schedule 1.1F.

"Recognized Environmental Condition" means the presence or Release, or threatened Release, to the environment, at the Plant, of Hazardous Substances, including any migration of Hazardous Substances through air, soil or groundwater at, to or from the Plant regardless of when such presence or Release occurred or is discovered.

"Records" has the meaning set forth in Section 7.10(a).

"Release" means any release, spill, leak, discharge, abandonment, disposal, pumping, pouring, emitting, emptying, injecting, leaching, dumping, depositing, dispersing, allowing to escape or migrate into or through the environment (including ambient air, surface water, ground water, land surface and subsurface strata or within any building, structure, facility or fixture) of any Hazardous Substance, including the abandonment or discarding of Hazardous Substances in barrels, drums, or other containers.

"Remediation" means any action of any kind to address a Recognized Environmental Condition or Release or threatened Release or the presence of Hazardous Substances on or in the air, soil, surface water or groundwater, including the following: (a) monitoring, investigation, cleanup, containment, remediation, removal, mitigation, response or restoration work; (b) obtaining any permits, consents, approvals or authorizations of any Governmental Authority necessary to conduct any such work; (c) preparing and implementing any plans or studies for such work; (d) obtaining a written notice from a Governmental Authority with jurisdiction under applicable Environmental Laws that no material additional work is required by such Governmental Authority; (e) any response to, or preparation for, any inquiry, order, hearing or other proceeding by or

11

before any Governmental Authority with respect to any such Recognized Environmental Condition, Release or threatened Release or presence of Hazardous Substances; and (f) any other activities reasonably determined by Seller or PGV to be necessary or appropriate or required under Environmental Laws to address a Recognized Environmental Condition, the presence of or Release of Hazardous Substances in the air, soil, surface water or groundwater at the Plant or any other off-site location.

"Replacement Benefit Plans" has the meaning set forth in Section 7.14(d).

"Replacement Welfare Plans" has the meaning set forth in Section 7.14(c).

"Section 338(h)(10) Election" has the meaning set forth in Section 7.5(b).

"Securities Act" has the meaning set forth in Section 6.10.

"Seller" has the meaning set forth in the introductory paragraph of this Agreement.

"Seller's Claims" has the meaning set forth in Section 9.3(a).

"Seller's Indemnified Parties" has the meaning set forth in Section 9.3(a).

"Seller's Marks" means the name "Constellation," "Constellation Energy", "COSI" and all derivatives thereof and corresponding logos, excluding the name "Puna Geothermal Venture".

"Seller's Required Consents" means (a) the consent of any Person specified in Schedule 1.1G other than a Governmental Authority necessary for Seller's consummation of the Transactions, and (b) the consent of any Person required by any of the Existing Contracts or the Permits for Seller's consummation of the Transactions.

"Seller's Required Regulatory Approvals" means approval of the purchase and sale contemplated hereby by any Governmental Authority specified in Schedule 1.1H.

"Tax" or "Taxes" means (i) all taxes, charges, fees, levies, penalties or other assessments imposed by any federal, state or local or foreign taxing authority, including but not limited to, income, excise, real or personal property, sales, transfer, franchise, payroll, withholding, social security, receipts, license, stamp, occupation, employment or other taxes, and any payments to any state, local or foreign taxing authorities in lieu of any such taxes, charges, fees, levies or assessments, (ii) any interest, penalty or addition attributable thereto, whether disputed or not, and (iii) any item for which liability arises as a transferee or successor-in-interest, operation of law or Treasury regulation Section 1.1502-6(a) (or any predecessor or successor thereof or similar provision of law).

"Tax Proceeding" has the meaning set forth in Section 7.5(d).

12

"Tax Return" means any return, report, information return, declaration, claim for refund, or other document, together with all amendments and supplements thereto, required to be filed with any Governmental Authority responsible for the administration of Applicable Laws governing Taxes.

"Termination Date" has the meaning set forth in Section 12.1(b).

"Third Party Claim" means a claim by a Person that is not included among the Seller's Indemnified Parties or the Purchaser Indemnified Parties, including any claim for the costs of conducting Remediation, or seeking an order or demanding that a Person undertake Remediation.

"Transactions" has the meaning set forth in the Recitals to this Agreement.

"Transfer Tax" means any sales Tax, transfer Tax, conveyance fee, recording fee, use Tax, stamp Tax, stock transfer Tax or other similar Tax, including any related penalties, interest and additions thereto, but excluding for all purposes Income Taxes.

"Transferred Employees" has the meaning set forth in Section 7.14(a).

"Transition Period" means the period commencing with the execution of this Agreement by both Parties and ending upon Closing (or earlier termination of this Agreement).

"Transition Representative" has the meaning set forth in Section 8.2.

"Unaudited Financial Statements" has the meaning set forth in Section 5.17.

SECTION 1.2 Certain Interpretive Matters. In this Agreement, unless the context otherwise requires:

(a) the singular number includes the plural number and vice versa;

(b) reference to any Person includes such Person's successors and assigns but, if applicable, only if such successors and assigns are permitted by this Agreement, and reference to a Person in a particular capacity excludes such Person in any other capacity;

(c) reference to any agreement (including this Agreement), document or instrument means such agreement, document or instrument as amended or modified and in effect from time to time in accordance with the terms thereof and, if applicable, the terms hereof;

(d) reference to any Article, Section, Schedule or Exhibit means such Article, Section, Schedule or Exhibit of or to this Agreement, and references in any

13

Article, Section, Schedule, Exhibit or definition to any clause means such clause of such Article, Section, Schedule, Exhibit or definition;

(e) any accounting term used and not otherwise defined in this Agreement has the meaning assigned to such term in accordance with GAAP;

(f) "hereunder," "hereof," "hereto" and words of similar import are references to this Agreement as a whole and not to any particular Section or other provision hereof or thereof;

(g) "including" (and with correlative meaning "include") means including without limiting the generality of any description preceding or succeeding such term;

(h) relative to the determination of any period of time, "from" means "from and including," "to" means "to but excluding" and "through" means "through and including;"

(i) reference to any law (including statutes and ordinances) means such law as amended, modified codified or reenacted, in whole or in part, and in effect from time to time, including rules and regulations promulgated thereunder; and

(j) any agreement, instrument, insurance policy, statute, regulation, rule or order defined or referred to herein or in any agreement or instrument that is referred to herein means such agreement, instrument, insurance policy, statute, regulation, rule or order as from time to time amended, modified, or supplemented, including (in the case of agreements or instruments) by waiver or consent and (in the case of statutes, regulations, rules or orders) by succession of comparable successor statutes, regulations, rules or orders and references to all attachments thereto and instruments incorporated therein.

ARTICLE 2

PURCHASE AND SALE

SECTION 2.1 Purchase and Sale. Upon the terms and subject to the satisfaction of the conditions contained in this Agreement, at the Closing,

Seller shall sell and transfer to Purchaser, and Purchaser shall purchase and accept from Seller, all of the Purchased Shares; and (b) COSI PUNA and PGV shall terminate the O&M Agreement.

14

ARTICLE 3

CLOSING; PURCHASE PRICE

SECTION 3.1 Closing. Subject to the terms and conditions hereof, proceedings for the consummation of the Transactions (the "Closing") will take place at the offices of Constellation Energy Group, Inc., 750 East Pratt Street, Baltimore, Maryland, at 10:00 a.m. local time, on a mutually acceptable date within ten (10) Business Days following the date on which the conditions set forth in ARTICLE 10 and ARTICLE 11, other than those conditions that by their nature are to be satisfied at the Closing (and for purposes of setting the Closing Date, the matters contemplated by Section 11.9 shall be assumed to have been satisfied), have been either satisfied or waived by the Party for whose benefit such conditions exist, or at such other time and place as the Parties may mutually agree, and in no event later than the Termination Date. The date on which such proceedings actually occur is referred to herein as the "Closing Date." At the Closing, and subject to the terms and conditions hereof, the following will occur:

(a) Deliveries by Seller. At Closing, Seller shall execute and deliver, or cause to be executed and delivered, to Purchaser the following:

(i) an instrument of assignment from CPI which is in a form sufficient to evidence and effect the valid transfer of full title to the Purchased Shares free and clear of all Encumbrances and all of the original issued and outstanding Purchased Shares stock certificates;

(ii) the minute books, company records and files of the Companies and the records of COSI PUNA related to the Transferred Employees (as permitted by Applicable Laws) and those related to the operation and maintenance of the Plant; provided, however, that Seller shall not be required to deliver any of the foregoing to Purchaser to the extent that the same would (A) violate any court or administrative order, (B) disclose information about the activities of Seller, COSI PUNA or any of their Affiliates (other than the Companies) that is unrelated to the Companies, the Business or the Plant, or (C) disclose proprietary models of Seller or any of its Affiliates pertaining to energy project evaluation, energy or natural gas price curves or projections, or other economic predictive models;

(iii) those documents required to be delivered to Purchaser by Seller pursuant to ARTICLE 10;

(iv) evidence of termination of the O&M Agreement. the Credit Documents and the Intercompany Arrangements, reasonably satisfactory to Purchaser;

(v) a listing as of the Closing Date of (A) the amounts accrued, (B) the amounts actually paid, and (C) any remaining amounts anticipated to be incurred

15

but not yet accrued or paid, by any of the Companies in connection with the repairs contemplated by Item 1 of Schedule 5.19; and

(vi) any other documents or instruments as may be

reasonably necessary to effect the Transactions to the extent reasonably requested by Purchaser of Seller.

(b) Deliveries by Purchaser. At Closing, Purchaser shall deliver, or cause to be delivered, to Seller the following:

(i) the Initial Purchase Price, subject to the provisions of Section 3.3, if any, by wire transfer of immediately available funds to an account or accounts designated by Seller in writing prior to the Closing Date.

(ii) those documents required to be delivered to Seller by Purchaser pursuant to ARTICLE 11; and

(iii) any other documents or instruments as may be reasonably necessary to effect the Transactions to the extent requested by Seller of Purchaser a reasonable period of time prior to the Closing Date.

SECTION 3.2 Initial Purchase Price. The initial purchase price for the Purchased Shares shall be Seventy One Million Dollars (\$71,000,000) (the "Initial Purchase Price").

SECTION 3.3 Adjustment to Initial Purchase Price. The Initial Purchase Price shall be subject to such adjustments as are specified in Section 3.4, Section 3.5, Section 7.5, Section 7.6 and ARTICLE 9, if any (the Initial Purchase Price as so adjusted is herein referred to as the "Purchase Price").

SECTION 3.4 Estimated Adjustment Statement.

(a) By or before 10:00 a.m. on the third Business Day prior to the scheduled Closing Date, Seller shall prepare and deliver to Purchaser a statement (the "Estimated Adjustment Statement") that sets forth as of the close of business on the Closing Date the net working capital of the Companies as of the Closing Date as calculated as set forth on Schedule 3.4; provided, however the following shall be excluded from such calculation: (i) any and all liabilities under the Loan Documents; and (ii) any amounts related to Inventory; and (iii) the Intercompany Arrangements. In connection with the foregoing calculation, Seller shall also determine any and all costs, expenses or other liabilities paid by any of the Companies prior to the Closing Date and any of the foregoing accrued by any of the Companies prior to the Closing Date related to the repairs contemplated by Item 1 of Schedule 5.19 prior to the Closing Date and all such accrued unpaid amounts shall be included in the calculation of net working capital as provided above. Insurance proceeds to be paid under the Company Insurance Policies with regard to such repair shall be allocated among Seller and Purchaser as provided in

16

Section 7.7. In the event the Closing is not scheduled to occur on the last day of a given month, then the items that are included in the Estimated Adjustment Statement shall be prorated to the extent applicable as of the Closing Date by multiplying the amount of each such item representing the full calendar month by a fraction, the numerator of which is the Closing Date and the denominator of which is the number of days there are in the month in which the Closing occurs. The Estimated Adjustment Statement will be prepared in conformity with GAAP, applied on a basis consistent with the financial statements made available to Purchaser under Section 5.17, using the example and format set forth in Schedule 3.4.

(b) In the event the result of the Estimated Adjustment Statement is a negative number, then the Initial Purchase Price will be reduced by an amount equal to absolute value of such number and if the result is a positive number, then the Initial Purchase Price will be increased by an amount equal to such number.

SECTION 3.5 Final Adjustment Statement.

(a) Within forty-five (45) days following the Closing Date, Purchaser shall prepare and deliver to Seller a final statement (the "Final Adjustment Statement") that sets forth the same information as included in the Estimated Adjustment Statement provided pursuant to Section 3.4(a) above, adjusted to take into account the final figures as of 12:01 a.m. on the Closing Date determined in accordance with the standard set forth in Section 3.4. Seller shall provide to Purchaser copies of all invoices or other billing information actually received or sent by Seller during this forty-five (45) day period to allow Purchaser to prepare the Final Adjustment Statement in accordance with this Section. The Final Adjustment Statement shall be accompanied by such backup information and schedules as are reasonably required in order for Seller to understand and verify the accuracy of the computation of the amount(s) set forth therein. In the event the Closing does not occur on the last day of a given month, then the items that are included in the Final Adjustment Statement shall be prorated to the extent applicable as of the Closing Date by multiplying the amount of each such item representing the full calendar month by a fraction, the numerator of which is the Closing Date and the denominator of which is the number of days there are in the month in which the Closing occurs.

(b) The Parties shall attempt to agree upon the Final Adjustment Statement within thirty (30) days following the delivery thereof to Seller. If Seller disputes any item set forth on the Final Adjustment Statement, Seller shall give Purchaser written notice thereof within thirty (30) days following the delivery to Seller of the Final Adjustment Statement setting forth in reasonable detail the disputed item or items. If Seller has not delivered such notice to Purchaser within such thirty (30) day period, the Final Adjustment Statement shall be deemed to be final and, to the extent the Final Adjustment Statement reflects an adjustment to the Initial Purchase Price that is different from the adjustment calculated pursuant to Section 3.4(a), the Party that benefited from

17

the variance in the adjustment made on the Closing Date shall pay to the other Party the variance amount within five (5) days following the expiration of such thirty (30) day period. If Seller has delivered a notice of a dispute to Purchaser, the undisputed portion of the variance amount, if any, shall be paid to the Party entitled to receive the same within five (5) Business Days following the delivery of the notice by Seller to Purchaser, and the Parties shall jointly engage the Independent Accounting Firm and shall direct the Independent Accounting Firm to make a final, binding determination of all such disputes within forty-five (45) days of presentation to the Independent Accounting Firm by the Parties of the information that each such Party believes supports its position with respect to each disputed item. Such information shall be presented by each Party to the Independent Accounting Firm within ten (10) days following the selection thereof. The Parties will further direct the Independent Accounting Firm to deliver a written notice to Purchaser and Seller setting forth its determination with respect to each disputed item. The results of such determination will be final and binding, and the balance of the variance amount, if any, resulting from such determination will be paid to the Party entitled to receive the same within ten (10) days of the Independent Accounting Firm's notice of its determination. The fees and expenses of the Independent Accounting Firm shall be borne in equal parts by the Purchaser on the one hand, and the Seller, on the other, and further agree that in connection with the engagement of the Independent Accounting Firm, each of the Purchaser and the Seller will, if requested by the Auditors, execute a reasonable engagement letter including customary indemnities.

ARTICLE 4

REPRESENTATIONS AND WARRANTIES REGARDING THE SELLER

Except as set forth in the Schedules to this Agreement as noted below, or in the Due Diligence Materials, Seller represents and warrants to Purchaser as of the Effective Date as follows:

SECTION 4.1 Organization and Existence.

(a) CPI is a corporation, duly organized, validly existing and in good standing under the laws of the State of Maryland.

(b) COSI PUNA is a corporation, duly organized, validly existing and in good standing under the laws of the State of Maryland.

SECTION 4.2 Execution, Delivery and Enforceability. Each of Seller and COSI PUNA has all requisite corporate power and authority to execute and deliver, and perform their obligations under, this Agreement and to consummate the Transactions. The execution, delivery and performance by Seller and COSI PUNA of this Agreement and the consummation of the Transactions have been duly and validly authorized by all necessary corporate action required on the part of Seller and COSI PUNA and no other corporate proceedings on the part of Seller or COSI PUNA are necessary to authorize this Agreement or to consummate the Transactions. Assuming Purchaser's due authorization,

18

execution and delivery of this Agreement, this Agreement constitutes the valid and legally binding obligation of Seller and COSI PUNA, enforceable against Seller and COSI PUNA in accordance with its terms.

SECTION 4.3 No Violation. Subject to Seller obtaining Seller's Required Regulatory Approvals and Seller's Required Consents, and except for compliance with the requirements of the HSR Act, neither the execution or delivery by Seller or COSI PUNA of this Agreement, nor Seller's or COSI PUNA's compliance with any provision hereof, nor Seller's or COSI PUNA's consummation of the Transactions will:

(a) violate, or conflict with, or result in a breach of any provisions of the certificate of incorporation or by-laws of Seller or COSI PUNA;

(b) result in a default (or give rise to any right of termination, cancellation or acceleration) under, or conflict with any of the terms, conditions or provisions of, any note, bond, mortgage, indenture, license, or agreement (including, without limitation, the Existing Contracts) or other instrument or obligation to which Seller or COSI PUNA is a party or by which Seller or COSI PUNA may be bound, except for such defaults (or rights of termination or acceleration) as to which requisite waivers or consents have been, or prior to the Closing will have been, obtained;

(c) violate, contravene or conflict with, or result in a breach of, any law, rule, regulation, order, writ, injunction, license, permit or decree, applicable to Seller or COSI PUNA which would, individually or in the aggregate, have a Material Adverse Effect and will not affect the validity or enforceability of this Agreement or the validity of the Transactions; or

(d) require the consent or approval of, filing with, or notice to any Person which, if not obtained, would prevent Seller or COSI PUNA from performing its obligations hereunder.

SECTION 4.4 Litigation. There is no claim, action, proceeding or, investigation pending or, to Seller's or COSI PUNA's Knowledge, threatened against or relating to Seller or COSI PUNA before any court, arbitrator or Governmental Authority, or any judgment, decree or order of any court,

arbitrator or Governmental Authority, which would, individually or in the aggregate, reasonably be expected to result, or has resulted, in:

(a) the institution of legal proceedings to prohibit or restrain the performance of this Agreement or the consummation of the Transactions by Seller or COSI PUNA;

(b) a claim against Purchaser or its Affiliates for damages as a result of Seller or COSI PUNA entering into this Agreement or the consummation by Seller or COSI PUNA of the Transactions; or

19

(c) a material impairment of Seller's or COSI PUNA's ability to perform its obligations under this Agreement.

SECTION 4.5 Brokers. All negotiations relating to this Agreement or the Transactions for the benefit of Seller, COSI PUNA or the Companies have been carried on by Seller and COSI PUNA and in such a manner as not to give rise to any valid claim against Purchaser or Companies (by reason of Seller's, COSI PUNA's, the Companies' or any of their respective Affiliates' actions) for a brokerage commission, finder's fee or other like payment to any Person.

SECTION 4.6 Seller's and COSI PUNA's Qualifications. Neither Seller nor COSI PUNA has any Knowledge of any reason(s) that the Closing conditions set forth in Articles 10 and 11 (other than the closing conditions set forth in Section 10.4 as to Purchaser's Consents and Purchaser's Regulatory Approvals) cannot be satisfied. To Seller's Knowledge, Seller is qualified to sell the Purchased Shares and there are no conditions in existence which could reasonably be expected to delay, impede or condition the receipt by Seller of Seller's Required Regulatory Approvals or Seller's Required Consents. The provisions of this Section 4.6 are qualified to the extent that the receipt of any Seller's Required Regulatory Approval is subject to the discretion of the applicable Governmental Authority.

SECTION 4.7 Consents and Approvals. No consent, approval, authorization, or permit of, or filing with or notification to, any Person is required for or in connection with the execution and delivery of this Agreement by Seller or COSI PUNA or for or in connection with the consummation of the Transactions and performance of the terms and conditions contemplated hereby by Seller or COSI PUNA, except for: (a) Seller's Required Regulatory Approvals; (b) Seller's Required Consents; and (c) requirements under the HSR Act.

SECTION 4.8 Compliance with Laws. Neither Seller nor COSI PUNA is in violation of any laws, orders, ordinances, rules, regulations or judgments of any Governmental Authority which could result in a Material Adverse Effect.

ARTICLE 5

REPRESENTATIONS AND WARRANTIES REGARDING THE COMPANIES

Except as set forth in the Schedules to this Agreement as noted below, or in the Due Diligence Materials, Seller represents and warrants to Purchaser as of the Effective Date as follows:

SECTION 5.1 Organization and Existence

(a) CE PUNA I is a corporation, duly organized, validly existing and in good standing under the laws of the State of Maryland and has all requisite power and

authority to own, lease and operate its properties and to carry on its business as it is now being conducted.

(b) CE PUNA II is a corporation, duly organized, validly existing and in good standing under the laws of the State of Maryland and has all requisite power and authority to own, lease and operate its properties and to carry on its business as it is now being conducted.

(c) CE PUNA LP is a limited partnership, duly formed, validly existing and in good standing under the laws of the State of Maryland and has all requisite power and authority to own, lease and operate its properties and to carry on its business as it is now being conducted.

(d) PGV is a general partnership, duly formed and in good standing under the laws of the State of Hawaii and has all requisite power and authority to own, lease and operate its properties and to carry on its business as it is now being conducted.

(e) Each of the Companies is duly qualified to do business and is in good standing in each jurisdiction, if any, in which it is required to be so qualified except in those jurisdictions where the failure to be so duly qualified would not reasonably be expected to result in a Material Adverse Effect.

SECTION 5.2 Ownership.

(a) CPI owns beneficially and of record 100% of the CE PUNA I Shares which constitute all of the issued and outstanding capital stock of, and the only class of capital stock of, CE PUNA I.

(b) CPI owns beneficially and of record 100% of the CE PUNA II Shares which constitute all of the issued and outstanding capital stock of, and the only class of capital stock of, CE PUNA II.

(c) CE PUNA I and CE PUNA II each own 50% of the CE PUNA LP Interests which constitute all of the partnership interests of CE PUNA LP.

(d) CE PUNA I and CE PUNA LP own all of the PGV Interests which constitute all of the partnership interests of PGV.

(e) All of the Purchased Shares have been duly authorized and validly issued and are fully paid and nonassessable.

(f) At the Closing, (i) Seller will own all of the Purchased Shares, (ii) CE PUNA I and CE PUNA II will own all of the CE PUNA LP Interests, and (iii) CE PUNA I and CE PUNA LP will own all of the PGV Interests, free and clear of any

Encumbrances, except purchase rights granted to Purchaser pursuant to the terms of this Agreement.

SECTION 5.3 Capitalization. Other than this Agreement and except as set forth on Schedule 5.3, there are no outstanding options, warrants, purchase rights, subscription rights, conversion rights or other rights of any kind (preemptive or otherwise) to acquire any capital stock or partnership interests in the Companies, or securities convertible into or exchangeable for, or which otherwise confer on the holder thereof any right to acquire, any capital stock or partnership interests, nor is any of the Companies committed to issue, sell or otherwise cause to become outstanding any such option, warrant, right or security, except obligations to Purchaser under this Agreement and there are no

agreements or understandings concerning the ownership, voting, or disposition of the Purchased Shares or the Partnership Interests.

SECTION 5.4 No Violation. Except as set forth on Schedule 5.4 and subject to Seller obtaining Seller's Required Regulatory Approvals and Seller's Required Consents, and except for compliance with the requirements of the HSR Act, neither the execution or delivery by Seller of this Agreement, nor Seller's compliance with any provision hereof, nor Seller's consummation of the Transactions will:

(a) violate, conflict with, or result in a breach of any provisions of, as applicable, the certificate of incorporation or by-laws, or the certificate of partnership or partnership agreement, of the Companies;

(b) result in a default (or give rise to any right of termination, cancellation or acceleration) under, or conflict with any of the terms, conditions or provisions of, any note, bond, mortgage, indenture, license, or agreement (including, without limitation, the Existing Contracts) or other instrument or obligation to which the Companies are a party or by which the Companies may be bound;

(c) violate, contravene or conflict with, or result in a breach of, any law, rule, regulation, order, writ, injunction, license, permit or decree, applicable to the Companies which would, individually or in the aggregate, have a Material Adverse Effect.

SECTION 5.5 Business.

(a) The ownership of CE PUNA LP is the only business conducted by CE PUNA II, and, except as set forth on Schedule 1.1C, the 50% of the CE PUNA LP Interests owned by it are the only assets owned by and liability of CE PUNA II.

(b) The ownership of CE PUNA LP and PGV is the only business conducted by CE PUNA I and, except as set forth on Schedule 1.1C, the 50% of the CE PUNA LP Interests owned by it and its ownership of its portion of the PGV Interests are the only assets owned by and liability of CE PUNA I.

22

(c) The ownership of PGV is the only business conducted by CE PUNA LP and, except as set forth on Schedule 1.1C, its ownership of its portion of the PGV Interests is the only assets owned by and liability of CE PUNA LP.

(d) The only business engaged in by COSI PUNA has been the services carried out pursuant to the O&M Agreement and COSI PUNA owns and holds all interest of the Operator (as such term is defined in the O&M Agreement) under the O&M Agreement.

(e) The only business engaged in by PGV is the ownership, operation, and maintenance of the Plant, the generation and sale of electric energy and capacity from the Plant and any and all other activities related or incidental to the foregoing. As of the Closing, PGV will own all of the assets, Inventory, software licenses, properties and rights necessary to own, operate and maintain the Plant in substantially the same manner as it has been owned, operated and maintained prior thereto.

SECTION 5.6 Compliance with Laws. Except as set forth in Schedule 5.6, there is no uncured violation by any of the Companies of any laws, orders, ordinances, rules, regulations or judgments of any Governmental Authority, which would, individually, or in the aggregate, result in a Material Adverse Effect.

SECTION 5.7 Permits. Except as set forth in Schedule 5.7, PGV holds or has received all permits, registrations, notifications, franchises, licenses,

certificates, and other authorizations, consents and approvals of all Governmental Authorities required in order for PGV to own, operate and maintain the Plant and generate and sell electric energy and capacity as set forth in the Power Purchase Agreement (collectively, "Permits"), except for such Permits which if not held would not, individually or in the aggregate, result in a Material Adverse Effect.

SECTION 5.8 Litigation. There is no claim, action, proceeding, audit or investigation pending or, to Seller's Knowledge, threatened against or relating to PGV or the Plant before any court, arbitrator or Governmental Authority, nor has any judgment, decree or order of any court, arbitrator or Governmental Authority been issued to PGV or the Plant.

SECTION 5.9 Existing Contracts.

(a) Except for Existing Contracts (i) listed in Schedule 5.9(a), (ii) which will expire prior to the Closing Date, (iii) which do not require known or liquidated expenditures or payments by PGV in excess of one hundred thousand Dollars (\$100,000) within a twelve (12) month period (and such agreements within the scope of this clause (iii) in the aggregate not requiring known or liquidated expenditures or payments by PGV in excess of two hundred fifty thousand Dollars (\$250,000) within a twelve (12) month period), or (iv) which, if not performed by PGV, would not result in a

23

Material Adverse Effect, PGV is not a party to, and neither PGV nor the Plant is bound by, any Existing Contract.

(b) Except as set forth in Schedule 5.9(b), there is not under any of the Existing Contracts listed in Schedule 5.9(a) any default or event which, with notice or lapse of time or both, would constitute an event of default by PGV except for such events of default and other events as to which requisite waivers have been, or prior to Closing will have been, obtained or which would not, individually or in the aggregate, result in a Material Adverse Effect.

(c) No claim, action, proceeding or investigation is pending or, to Seller's Knowledge, threatened against PGV challenging the enforceability of any of the Existing Contracts specified in Schedule 5.9(a), as applicable.

(d) Seller has delivered or made available to Purchaser true and complete copies of all Existing Contracts listed in Schedule 5.9(a) including all amendments thereto. There are no oral amendments to any of the Existing Contracts listed in Schedule 5.9(a).

SECTION 5.10 Personal Property. Except as listed in Schedule 5.10, PGV has good and valid title to its personal property, including, without limitation, all improvements and fixtures located at the Plant, free and clear of all Encumbrances other than Permitted Encumbrances with regard to any fixtures included in such personal property.

SECTION 5.11 Real Property. PGV does not own any real property.

SECTION 5.12 Leases. Schedule 5.12 lists, as of the date of this Agreement, all leases pertaining to real property under which PGV is a lessee or lessor and other related agreements and which (a) provide for annual payments of more than \$100,000, or (b) are material to the Business of PGV. Except as set forth in Schedule 5.12, there is not, under any such leases, any event of default or event which, with notice or lapse of time or both, would constitute an event of default by PGV or, to Seller's Knowledge the lessors of such real property, as applicable, except for such events of default and other events as to which requisite waivers have been, or prior to Closing will have been, obtained or which would not, individually or in the aggregate, result in a

Material Adverse Effect. Except as set forth in Schedule 5.12, to Seller's Knowledge the owners of the real property being leased by PGV have good and valid title to that real property, free and clear of all Encumbrances other than Permitted Encumbrances.

SECTION 5.13 Intellectual Property. PGV owns, is licensed or otherwise possesses sufficient legally enforceable rights to use, all patents, copyrights, trademarks, service marks, technology, know-how, computer software programs and applications, databases and tangible or intangible proprietary information or materials that are currently used in the operation of the Plant except for such items for which the failure to

24

possess such rights would not, individually or in the aggregate, result in a Material Adverse Effect.

SECTION 5.14 Environmental Compliance. Except as disclosed in Schedule 5.14, or which would not, individually or in the aggregate, have a Material Adverse Effect:

(a) There has not been a Release of Hazardous Substances at or otherwise affecting the Plant that: (i) constitutes an unremediated violation of any Environmental Law if the effect of such violation imposes a current remediation obligation on the part of PGV; (ii) currently imposes any release-reporting obligations on PGV under any Environmental Law that have not been or are not being complied with; or (iii) currently imposes any clean-up or remediation obligations on PGV under any Environmental Law;

(b) PGV is currently in compliance with all Environmental Laws applicable to the Plant;

(c) PGV holds and is in compliance with all Permits required under applicable Environmental Laws, and has not received any written notice that: (i) any such existing Permit will be revoked; or (ii) any pending application for any new such Permit or renewal of any such existing Permit will be denied; and

(d) PGV has not received any currently outstanding written notice of any material proceedings, action, or other claim, liability or potential liability arising under any Environmental Laws from any Person or Governmental Authority regarding the Plant.

SECTION 5.15 Tax Matters. Except as set forth in Schedule 5.15, or as would not, individually or in the aggregate, have a Material Adverse Effect:

(a) for all periods ending prior to or on the Closing Date, all Tax Returns required to be filed by or with respect to the Companies have been or will be timely filed with the appropriate taxing authorities in all jurisdictions in which such Tax Returns are required to be filed;

(b) for all periods ending prior to or on the Closing Date, such Tax Returns are or will be true and correct in all material respects, and all Taxes legally due on or prior to the Closing Date have been or will be timely paid;

(c) none of the Companies have extended or waived the application of any statute of limitations of any jurisdiction regarding the assessment or collection of any Tax and no power of attorney has been granted by or with respect to any of the Companies with regard to any matters relating to Taxes thereof;

25

(d) no notice of deficiency or assessment has been received from or threatened by any taxing authority with respect to liabilities for Taxes of any of the Companies, which have not been fully paid or finally settled; provided, however, that any such deficiency shown in Schedule 5.15 is being contested in good faith through appropriate proceedings;

(e) for all periods prior to Closing, the Companies have withheld and paid over to the appropriate taxing authority all Taxes required to be withheld and paid over in connection with amounts paid or owing to any employee, independent contractor, creditor, stockholder, or other third party;

(f) the Companies do not conduct any business in or derive income from any state, local or foreign jurisdiction other than those jurisdictions for which Tax Returns have been duly filed by the Companies;

(g) Seller have delivered to Purchaser correct and complete copies of (i) the general excise/use tax returns for the period beginning January 1, 1999, (ii) all other Tax Returns for the periods beginning January 1, 1998, and (iii) all examination reports of the Companies and statements of deficiencies assessed against or agreed to by the Companies within the last 5 years;

(h) none of the Companies has made any payment or payments, is obligated to make any payment or payments or is a party to (or participating employer in) any agreement or plan that could obligate it or their successors or Affiliates to make any payment or payments that as a result of the transactions contemplated by this Agreement would constitute an "excess parachute payment" as defined in Section 280(G) of the Code (or comparable provisions of state or local law);

(i) the Companies have (i) never been a member of an affiliated group (within the meaning of Section 1504(a) of the Code) filing a consolidated federal income Tax Return (other than a group the common parent of which was either Baltimore Gas and Electric Company (prior to April 30, 1999) or Constellation Energy Group, Inc. (after May 1, 1999)), and (b) no liability for Taxes of any Person (other than Baltimore Gas and Electric Company (prior to April 30, 1999), Constellation Energy Group, Inc. (after May 1, 1999), or any of their respective subsidiary Affiliates) under Treasury regulation Section 1.1502-6 (or any similar provision of state, local or foreign law), as a transferee or successor, by contract or otherwise;

(j) CE Puna I and CE Puna II are members of an affiliated group of corporations filing a consolidated federal income tax return with Constellation Energy Group, Inc. as common parent; and

(k) the Partnerships are properly characterized as "partnerships" within the meaning of Section 7701(a)(2) of the Code and any comparable provision of state,

local or foreign law, and none of the Partnerships has ever been a "corporation" within the meaning of Section 7701(a)(3) of the Code.

SECTION 5.16 No Subsidiaries. Except as described in Section 5.2, none of the Companies own or hold, directly or indirectly, nor have any right or obligation to acquire, any equity or other ownership interest in any corporations, limited liability companies, partnerships, joint ventures, or other Person.

SECTION 5.17 Financial Statements. CPI has made available to Purchaser the unaudited financial statements of PGV, including a balance sheet as of December 31, 2003, and an income statement and a statement of cash flows for the 12 months ending December 31, 2003 (collectively, the "Unaudited Financial Statements"). The foregoing balance sheet is referred to herein as the "Balance Sheet". The Unaudited Financial Statements were prepared in accordance with GAAP consistently applied (except that the Unaudited Financial Statements do not include footnotes required by GAAP) and fairly present, in all material respects, the financial position and results of operations of PGV as of the date thereof and for the periods covered thereby. Seller has made available to Purchaser an unaudited balance sheet and income statement for the combination of CE PUNA I and CE PUNA II as of December 31, 2003 and such balance sheet and income statement were prepared in accordance with GAAP (except that such statements do not include footnotes required by GAAP and such statements do not reflect income taxes which were reported on the financial statements of Seller) and fairly present, in all material respects, the financial position and results of operations of the combination of CE PUNA I and CE PUNA II as of the date thereof and for the periods covered thereby. From January 1, 2004 to the Effective Date, none of the Companies have distributed any cash to Seller or any Affiliate of Seller other than as payment for goods and services rendered in the ordinary course of business or to satisfy the Intercompany Arrangements as provided herein. Either (i) the books and records in the possession of the Companies or Purchaser upon Closing will include the backup accounting and financial information reasonably necessary for an experienced certified public accountant to prepare audited financial statements for each of the Companies for the 2001, 2002 and 2003 calendar years and that portion of the 2004 calendar year prior to Closing or (ii) the Seller will provide the Purchaser with such backup accounting and financial information and records reasonably necessary for an experienced certified public accountant to prepare audited financial statements for each of the Companies for the 2001, 2002 and 2003 calendar years and that portion of the 2004 calendar year prior to Closing.

SECTION 5.18 Undisclosed Liabilities. To Seller's Knowledge and except as set forth in Schedule 5.18, none of the Companies has any liability or obligation, secured or unsecured, of a nature required by GAAP to be reflected on its respective balance sheet or disclosed in the notes thereto, which are not accrued or reserved against on its respective balance sheet or disclosed in the notes thereto, except those which either (i) were incurred in the ordinary course of business after the date of the respective balance sheet in accordance with Section 7.3, (ii) would not, individually or in the aggregate,

have a Material Adverse Effect or (iii) in the case of CE PUNA LP, are disclosed in the balance sheet for the combination of CE PUNA I and CE PUNA II.

SECTION 5.19 Absence of Certain Financial Changes or Events. Except as (a) set forth in Schedule 5.19, and (b) otherwise contemplated by this Agreement, there has not been : (i) since the date of the Unaudited Financial Statements any event or occurrence resulting in a Material Adverse Effect; (ii) since the date of the Unaudited Financial Statements and prior to the Effective Date any damage, destruction or casualty loss, whether covered by insurance or not, which had a Material Adverse Effect; (iii) since the date of the Unaudited Financial Statements any entry into any agreement, commitment or transaction (including, without limitation, any borrowing, capital expenditure or capital financing) by any of the Companies which is material to the Business of PGV or the business of such other Companies, except agreements, commitments or transactions in the ordinary course of business or as contemplated hereby; or (iv) since the date of the Unaudited Financial Statements any change by any of the Companies in accounting methods, principles or practices except as required or permitted by GAAP.

SECTION 5.20 Consents and Approvals. No consent, approval, authorization or permit of, or filing with or notification to, any Person is required for or in connection with the execution and delivery of this Agreement by Seller or for or in connection with the consummation of the Transactions and performance of the terms and conditions contemplated hereby by Seller, except for: (a) Seller's Required Regulatory Approvals; (b) Seller's Required Consents; (c) requirements under the HSR Act; and (d) consents, approvals, authorizations, permits, filings, or notices that, if not obtained or made, would not, individually or in the aggregate, have a Material Adverse Effect.

SECTION 5.21 Labor Matters. With respect to the ownership or operation of the Plant, and except for such matters as will not, individually or in the aggregate, create a Material Adverse Effect, COSI PUNA and each of the Companies are in compliance with all Applicable Laws respecting employment and employment practices, terms and conditions of employment and wages and hours. As of the date hereof, Seller has no knowledge of any claim of representation by a third party, organizing drive by a third party seeking to represent all or any portion of employees working at the Plant, or representation petition concerning the workforce at the Plant including, without limitation, the Transferred Employees.

SECTION 5.22 Insurance. All Company Insurance Policies are in full force and effect, all premiums with respect thereto covering all periods up to and including the date as of which this representation is being made have been paid, and no notice of cancellation or termination has been received with respect to any such policy which was not replaced on substantially similar terms prior to the date of such cancellation. The Company Insurance Policies cover the property damage to the Plant described in Schedule 5.19.

28

SECTION 5.23 Employee Benefit Plans. Schedule 5.23 contains a complete and accurate list of all Employee Benefit Plans in which a Transferred Employee is eligible to participate. The Companies do not have any agreement, arrangement, commitment or obligation to create, enter into or contribute to any additional Employee Benefit Plan or to modify any existing Employee Benefit Plan in connection with the Transferred Employees.

ARTICLE 6

REPRESENTATIONS AND WARRANTIES OF PURCHASER

Except as set forth in the Schedules to this Agreement, Purchaser represents and warrants to Seller as of the Effective Date as follows:

SECTION 6.1 Organization and Existence. Purchaser is a limited liability company, duly organized, validly existing and in good standing under the laws of State of Delaware, and has all requisite limited liability company power and authority to own, lease and operate its properties and to carry on its business as is now being conducted.

SECTION 6.2 Execution, Delivery and Enforceability. Purchaser has all requisite limited liability company power and authority to execute and deliver, and to perform its obligations under, this Agreement and to consummate the Transactions. The execution, delivery and performance of this Agreement and the consummation of the Transactions have been duly and validly authorized by all necessary limited liability company action required on the part of Purchaser, and no other limited liability company proceedings on the part of Purchaser are necessary to authorize this Agreement or to consummate the Transactions. Assuming the due authorization, execution and delivery of this Agreement by Seller, this Agreement constitutes the valid and legally binding obligations of Purchaser, enforceable against Purchaser in accordance with its terms.

SECTION 6.3 No Violation. Subject to Purchaser obtaining the

Purchaser's Required Regulatory Approvals and the Purchaser's Required Consents, and except for compliance with the requirements of the HSR Act, neither the execution or delivery by Purchaser of this Agreement, nor Purchaser's compliance with any provision hereof, nor Purchaser's consummation of the Transactions will:

(a) violate, or conflict with, or result in a breach of any provisions of the limited liability company organization documents of Purchaser;

29

(b) result in a default (or give rise to any right of termination, cancellation or acceleration) under or conflict with any of the terms, conditions or provisions of any note, bond, mortgage, indenture, license, or agreement or other instrument or obligation to which Purchaser is a party or by which Purchaser may be bound, except for such defaults (or rights of termination or acceleration) as to which requisite waivers or consents have been, or prior to the Closing will have been, obtained, or which would not, individually or in the aggregate, create a Material Adverse Effect;

(c) violate any law, rule, regulation, order, writ, injunction, or decree, applicable to Purchaser or any of its assets, except where such violations, individually or in the aggregate, would not create a Material Adverse Effect and will not affect the validity or enforceability of this Agreement or the validity of the Transactions; or

(d) require the consent or approval of, filing with, or notice to any Person which, if not obtained, would prevent Purchaser from performing its obligations hereunder.

SECTION 6.4 Compliance with Laws. Purchaser is not in violation of any laws, orders, ordinances, rules, regulations or judgments of any Governmental Authority which could result in a Material Adverse Effect.

SECTION 6.5 Litigation. There is no claim, action, proceeding or investigation pending or, to Purchaser's Knowledge, threatened against or relating to Purchaser or its Affiliates before any court, arbitrator or Governmental Authority, or any judgment, decree or order of any court, arbitrator or Governmental Authority, which would, individually or in the aggregate, reasonably be expected to result, or has resulted, in:

(a) the institution of legal proceedings to prohibit or restrain the performance of this Agreement or the consummation of the Transactions by Purchaser;

(b) a claim against Seller or its Affiliates for damages as a result of Purchaser entering into this Agreement or the consummation by Purchaser of the Transactions;

(c) a material impairment of Purchaser's ability to perform its obligations under this Agreement; or

(d) a Material Adverse Effect.

SECTION 6.6 Brokers. All negotiations relating to this Agreement or the Transactions for the benefit of Purchaser have been carried on by Purchaser in such a manner as not to give rise to any valid claim against Seller (by reason of Purchaser's actions) for a brokerage commission, finder's fee or other like payment to any Person.

SECTION 6.7 Financing. Purchaser has now, and at the Closing Purchaser will have, liquid capital or committed sources therefor sufficient to permit Purchaser to perform fully and timely its obligations under this Agreement and has provided evidence of same to Seller.

SECTION 6.8 Purchaser Qualifications. Purchaser has no Knowledge of any reason(s) that the Closing conditions set forth in Articles 10 and 11 cannot be satisfied. To Purchaser's Knowledge, Purchaser is qualified to obtain and there are no conditions in existence which could reasonably be expected to delay, impede or condition the receipt by Purchaser of Purchaser's Required Regulatory Approvals or Purchaser's Required Consents. The provisions of this Section 6.8 are qualified to the extent that the receipt of any Purchaser's Required Regulatory Approval is subject to the discretion of the applicable Governmental Authority.

SECTION 6.9 "As Is" Sale; Disclaimer of Representations and Warranties; Further Acknowledgements by Purchaser.

(a) "As Is" Sale. NOTWITHSTANDING ANYTHING TO THE CONTRARY IN ANY OTHER PROVISION OF THIS AGREEMENT AND EXCEPT FOR THE REPRESENTATIONS, WARRANTIES OR COVENANTS SET FORTH IN THIS AGREEMENT, PURCHASER UNDERSTANDS AND AGREES THAT SELLER IS NOT MAKING ANY REPRESENTATION, WARRANTY OR COVENANT WHATSOEVER, EXPRESS, IMPLIED, AT COMMON LAW, STATUTORY OR OTHERWISE, AND PURCHASER FURTHER UNDERSTANDS AND AGREES THAT THE ASSETS OF THE COMPANIES, INCLUDING THE PLANT AND ALL OF THE PARTNERSHIP INTERESTS, ACQUIRED THEREBY THROUGH ACQUISITION OF THE PURCHASED SHARES, ARE BEING ACQUIRED "AS IS, WHERE IS" ON THE CLOSING DATE, AND IN THEIR CONDITION ON THE CLOSING DATE "WITH ALL FAULTS," AND THAT PURCHASER IS RELYING ON ITS OWN EXAMINATION OF THE COMPANIES AND SUCH ASSETS IN PURCHASING THE PURCHASED SHARES HEREUNDER.

(b) Disclaimer of Representations and Warranties. WITHOUT LIMITING THE GENERALITY OF SECTION 6.9(a) AND EXCEPT FOR THE REPRESENTATIONS, WARRANTIES AND COVENANTS EXPRESSLY SET FORTH IN THIS AGREEMENT, PURCHASER UNDERSTANDS AND AGREES THAT SELLER EXPRESSLY DISCLAIMS AND NEGATES ANY REPRESENTATIONS, WARRANTIES OR COVENANTS, EXPRESS OR IMPLIED, AT COMMON LAW, STATUTORY, OR OTHERWISE AS TO (i) OPERATION OF THE ASSETS OF THE COMPANIES, INCLUDING THE PLANT, TITLE, CONDITION, VALUE OR QUALITY OF SUCH ASSETS OR THE BUSINESS, CONDITION (FINANCIAL OR OTHERWISE), OR PROSPECTS OF THE COMPANIES, RISKS AND OTHER INCIDENTS OF THE PURCHASED SHARES OR SUCH ASSETS, (ii) ANY REPRESENTATION OR WARRANTY OF

MERCHANTABILITY, USAGE, SUITABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE WITH RESPECT TO SUCH ASSETS OR ANY PART THEREOF, OR AS TO THE WORKMANSHIP THEREOF OR THE ABSENCE OF ANY DEFECTS THEREIN, WHETHER LATENT OR PATENT, (iii) THE PRESENCE OR ABSENCE OF ANY HAZARDOUS MATERIALS IN, ON, OR DISPOSED OR DISCHARGED FROM, THE PLANT AND OTHER ASSETS OF THE COMPANIES, OR (iv) ANY INFRINGEMENT BY SELLER, THE COMPANIES, OR ANY OF THEIR AFFILIATES OF ANY PATENT OR PROPRIETARY RIGHT OF ANY THIRD PARTY. PURCHASER FURTHER AGREES THAT NO INFORMATION OR MATERIAL PROVIDED BY OR COMMUNICATION MADE BY SELLER OR ANY REPRESENTATIVE OF SELLER WILL CONSTITUTE, CREATE OR OTHERWISE CAUSE TO EXIST ANY REPRESENTATION OR WARRANTY DISCLAIMED BY THE FOREGOING.

SECTION 6.10 Characteristics of Purchaser; No Distribution. Purchaser or its Affiliates are experienced and knowledgeable investors in the United States power generation and development business. Prior to entering into this Agreement, Purchaser was advised by its counsel, accountants, financial advisors, and such other Persons it has deemed appropriate concerning this Agreement and has relied solely on Seller's representations and warranties

expressly contained herein and its independent investigation and evaluation of, and appraisal and judgment with respect to, PGV, the Business, assets, including the Plant, liabilities, results of operations, condition (financial or otherwise), and prospects of PGV, and the revenue, price, and expense assumptions applicable thereto. Purchaser hereby acknowledges that the Purchased Shares are not registered under the Securities Act of 1933, as amended from time to time (the "Securities Act"), or registered or qualified for sale under any state securities laws and cannot be resold without registration thereunder or exemption therefrom. Purchaser is an "accredited investor," as such term is defined in Regulation D of the Securities Act and will acquire the Purchased Shares for its own account and not with a view to a sale or distribution thereof in violation of the Securities Act, and the rules and regulations thereunder, any applicable state "blue sky" laws or any other applicable securities laws. Purchaser has sufficient knowledge and experience in financial and business matters to enable it to evaluate the risks of investment in the Purchased Shares and has the ability to bear the economic risk of this investment for an indefinite period of time.

SECTION 6.11 Intentionally Omitted.

SECTION 6.12 Inspection. Purchaser acknowledges that, prior to its execution of this Agreement:

(a) it has been afforded access to and the opportunity to inspect each of the Plant, the Existing Contracts, the Permits, and all other Due Diligence Materials;

(b) it has inspected the Plant, and as of the Closing Date, it will have inspected the Plant and reviewed the Existing Contracts, the Permits, and all other Due

32

Diligence Materials to the extent it deems necessary or advisable in connection with its decision to enter into this Agreement, and to consummate the Transactions;

(c) it is relying upon Seller's representations and warranties expressly set forth in this Agreement and its own inspections and investigation in order to satisfy itself as to the condition and suitability of the Business, assets, including the Plant, liabilities, results of operations, condition (financial or otherwise), and prospects of the Companies. Purchaser has not relied upon any representation, warranty, statement, advice, Records, Due Diligence Materials, projections, or other information of any type provided by Seller, COSI PUNA, any of the Companies, their respective Affiliates, or any of their respective representatives, except for those expressly set forth in this Agreement. In deciding to enter into this Agreement, and to consummate the Transactions, Purchaser has relied solely upon its own knowledge, investigation, and analysis (and that of its representatives) and not on any disclosure or representation made by Seller, COSI PUNA, any of the Companies, their respective Affiliates, or any of their respective representatives, other than the representations and warranties of Seller expressly set forth herein; and

(d) it acknowledges and agrees that, except as provided in Articles 4 and 5, Seller makes no representation or warranty, express, implied, at common law, statutory or otherwise, with respect to the accuracy or completeness of the Records or Due Diligence Materials now, heretofore, or hereafter made available to Purchaser in connection with this Agreement (including any description of PGV or the Plant, revenue, price and expense assumptions, production forecasts, or environmental information, or any other information furnished to Purchaser by Seller, COSI PUNA, any of the Companies or any of their respective Affiliates or any director, officer, employee, counsel, agent, or advisor thereof).

SECTION 6.13 Consents and Approvals. No consent, approval, authorization, or permit of, or filing with or notification to, any Person is required for or in connection with the execution and delivery of this Agreement by Purchaser or for or in connection with the consummation of the Transactions and performance of the terms and conditions contemplated hereby by Purchaser, except for: (a) Purchaser's Required Regulatory Approvals; (b) Purchaser's Required Consents; and (c) requirements under the HSR Act.

SECTION 6.14 Bankruptcy. There are no bankruptcy, reorganization, or arrangement proceedings pending against, being contemplated by, or to the knowledge of Purchaser threatened against, Purchaser.

33

ARTICLE 7

COVENANTS OF EACH PARTY

SECTION 7.1 Efforts to Close.

(a) Subject to this Section 7.1, each of the Parties agrees to use its commercially reasonable efforts to consummate and make effective, as soon as reasonably practicable, and in any event on or prior to the date that is one hundred (100) days from the Effective Date, the Transactions, including, but not limited to, the satisfaction of all conditions thereto set forth herein. Such actions shall include exerting their commercially reasonable efforts to obtain the consents, authorizations and approvals of all private parties and any Governmental Authority whose consent is reasonably necessary to effectuate the Transactions, including, in the case of Seller, Seller's Required Regulatory Approvals and Seller's Required Consents, and in the case of Purchaser, Purchaser's Required Regulatory Approvals and Purchaser's Required Consents, and effecting all other necessary registrations and filings, including filings under Applicable Laws, including the HSR Act, and all other necessary filings with any Governmental Authority. In furtherance of this Section 7.1, each Party shall designate a representative to act as the primary point of contact for all communications between the Parties between the Effective Date and the Closing Date with respect to this Agreement and the Transactions.

(b) All appearances, presentations, briefs, and proposals made or submitted by or on behalf of either Party before any Governmental Authority in connection with the approval of this Agreement or the Transactions shall be subject to the joint approval or disapproval in advance and the joint control of the Parties, acting with the advice of their respective counsel, and each Party will consult and fully cooperate with the other Party, and consider in good faith the views of the other Party, in connection with any such appearance, presentation, brief, or proposal; provided, however, that nothing will prevent a Party from responding to a subpoena or other legal process as required by law or submitting factual information in response to a request therefor. Each Party will provide the other with copies of all written communications from Governmental Authorities relating to the approval or disapproval of this Agreement or the Transactions.

SECTION 7.2 Updating. Each Party shall promptly notify the other Party of any changes or additions to any of the Schedules to this Agreement provided by such Party, if any, to correct any matter that would constitute a breach of any representation or warranty of such Party in Articles 4, 5 or 6, as the case may be, of this Agreement as of a reasonably current date prior to the Closing, but in any event not later than three (3) Business Days prior thereto. Subject to Section 13.13, no such updates made pursuant to this Section 7.2 shall be deemed to cure any inaccuracy of any representation or warranty made in this Agreement as of the date hereof, unless the Party for whose benefit such representation or warranty was made specifically agrees thereto in writing, nor shall any

such notification be considered to constitute or give rise to a waiver by the Party for whose benefit such representation or warranty was made of any condition set forth in this Agreement; provided, however, that if the Closing shall occur, then all matters disclosed by either Party pursuant to any such change or addition at or prior to the Closing shall be deemed to be matters of which the other Party had Knowledge for purposes of Section 13.13. Each Party agrees to advise the other Party promptly in writing of any matter or occurrence of which it has or obtains Knowledge which may constitute a breach by either Party of any representation, warranty or covenant contained in this Agreement, or of any reason of which it has or obtains Knowledge why a condition to the performance of either Party's obligations hereunder may not be satisfied on or before the Closing Date.

SECTION 7.3 Conduct Pending Closing.

(a) Prior to the consummation of the Transactions or the termination or expiration of this Agreement pursuant to its terms, unless Purchaser shall otherwise consent in writing, which consent shall not be unreasonably withheld, conditioned or delayed, Seller shall cause each of the Companies, as applicable to, and Seller shall, in the case of subsection (x) below, and COSI PUNA shall in the case of subsection (i) and (vii) below, do the following:

(i) operate and maintain the Plant in accordance in all material respects with the ordinary course of business consistent with past practices;

(ii) except as required by their terms and except for the Loan Documents as provided in Section 7.18, not amend, terminate prior to the expiration date, renew, or renegotiate in any material respect any Existing Contract required to be listed in Schedule 5.9 or enter into any new contract or agreement that would (if it existed on the date hereof) have been required to be listed in Schedule 5.9, except in the ordinary course of business consistent with past practices and except for Intercompany Arrangements that will be terminated and paid in full at or before Closing, or fail to comply in all material respects with its obligations under any such Existing Contract;

(iii) other than pursuant to the requirements of any Existing Contract, not sell, lease, transfer or dispose of, or make any contract for the sale, lease, transfer or disposition of, any material assets or properties of PGV, except sales, leases, transfers or dispositions in the ordinary course of business and other than terminating the O&M Agreement as provided herein;

(iv) not (A) issue any ownership rights or securities convertible into ownership rights, or repurchase, redeem, or otherwise acquire any such ownership rights; (B) merge into or with or consolidate with any other Person or acquire all or substantially all of the business or assets of any Person; (C) make any material change in its partnership agreement; (D) purchase any securities of any Person, except for investments made in the ordinary course of business consistent with past practices; (E) incur any additional obligations for borrowed money or guarantee or otherwise become

liable for the obligations of, or make any loans or advances to, any Person, except obligations for loans or advances from Seller or any of its Affiliates; or (F) authorize, declare, or pay any cash dividend or any other similar

distribution to Seller or any Affiliate of Seller other than as payment for goods and services rendered in the ordinary course, including, but not limited to, payments made pursuant to Section 7.19.

(v) not take any action or enter into any commitment with respect to or in contemplation of any liquidation, dissolution, recapitalization, reorganization, or other winding up of its Business;

(vi) not change its accounting policies or practices (including, without limitation, any change in depreciation or amortization policies), except as required under GAAP;

(vii) not enter into any employment agreement not terminable at will and will not increase any compensation of the Transferred Employees other than in the ordinary course of business;

(viii) not grant any express Encumbrance on any assets of PGV, except to the extent (i) required or permitted incident to the operation of the assets of PGV and the business of PGV in the ordinary course of business of PGV, or (ii) required or evidenced by any Existing Contract;

(ix) maintain in force and effect the Company Insurance Policies; and

(x) not take any action which would cause any of Seller's representations and warranties set forth in Articles 4 and 5 to be incorrect in any material respect as of the Closing.

(b) Notwithstanding anything to the contrary in Section 7.3(a), Seller shall not be (i) obligated to make or cause PGV to make expenditures other than in the ordinary course of business consistent with past practices or to otherwise suffer any economic detriment, or (ii) precluded from, and PGV shall not be precluded from, instituting, participating in or completing any program designed to promote compliance or comply with Applicable Laws or other good business practices with respect to the Plant; provided, however, that notwithstanding anything to the contrary in Section 7.3(a), Seller may take or may cause PGV to take (w) actions which are required by Applicable Law, (x) reasonable actions in connection with any emergency or other force majeure event, or (y) actions otherwise contemplated by this Agreement or disclosed in Schedule 7.3(b) or any other Schedule to this Agreement.

SECTION 7.4 Regulatory Approvals.

(a) As promptly as practicable but in no event later than the twentieth (20th) day after the date of the execution and delivery of this Agreement, Seller and Purchaser shall each file or cause to be filed with the Federal Trade Commission and the Department of Justice all notifications required to be filed under the HSR Act and the rules and regulations promulgated thereunder with respect to the Transactions. The Parties shall consult with each other as to the appropriate time of filing such notifications and shall agree in good faith upon the timing of such filings, respond promptly to any requests for additional information made by either of such agencies, and cause the waiting periods under the HSR Act to terminate or expire at the earliest possible date after the date of filing. All filing fees to be paid in connection with such filing shall be borne by the Purchaser.

(b) Subject to Section 7.1, Seller and Purchaser shall cooperate with each other and (i) promptly prepare and file all necessary documentation, (ii) effect all necessary applications, notices, petitions and filings and execute all agreements and documents, and (iii) use all commercially reasonable efforts to obtain all necessary consents, approvals and authorizations of all other parties, in the case of each of the foregoing clauses (i), (ii) and (iii), necessary or advisable to consummate the

Transactions. Seller and Purchaser shall use their best efforts to file for all Seller's Required Regulatory Approvals and Purchaser Required Regulatory Approvals, respectively, within thirty (30) days after the Effective Date. Seller shall have the right to review and approve in advance all characterizations of the information relating to PGV or its assets; and each of Seller and Purchaser shall have the right to review in advance all characterizations of the information relating to the Transactions which appear in any filing made in connection with the Transactions.

(c) Without limiting the generality of Purchaser's undertakings pursuant to Sections 7.4(a) and 7.4(b):

(i) Purchaser shall promptly take any or all of the following actions to the extent necessary to eliminate any concerns on the part of any Governmental Authority regarding the legality of Purchaser's acquisition of the Purchased Shares under any Applicable Laws: (A) enter into negotiations; (B) provide information; (C) make proposals; or (D) enter into and perform agreements or submit to judicial or administrative orders, whether before or after the Closing; and

(ii) Purchaser and Seller shall use commercially reasonable efforts (including taking the steps contemplated by Section 7.4(b)(i)) to prevent the entry, in a judicial or administrative proceeding brought under any Applicable Laws by any Governmental Authority or any other party, of a permanent or preliminary injunction or other order that would make consummation of the Transactions unlawful or that would otherwise prevent or delay such consummation; and

37

(iii) Purchaser and Seller shall promptly take, in the event that such an injunction or order has been issued in such a proceeding, any and all reasonable steps, including the appeal thereof, the posting of a bond, or the steps contemplated by Section 7.4(b)(i), necessary to vacate, modify, or suspend such injunction or order so as to permit such consummation on a schedule as close as possible to that contemplated by this Agreement.

(d) Purchaser shall have the primary responsibility for securing any required transfer, reissuance or procurement of the Permits effective as of the Closing Date. Seller shall use commercially reasonable efforts to cooperate with Purchaser's efforts in this regard and assist in any transfer or reissuance of Permits.

SECTION 7.5 Tax Matters.

(a) All Transfer Taxes incurred in connection with this Agreement and the Transactions, whether levied on Purchaser or Seller, shall be paid by Purchaser when due. Purchaser will file, to the extent required by Applicable Laws, all necessary Tax Returns and other documentation with respect to all such Transfer Taxes. To the extent required by Applicable Laws, but subject to such review and approval, Seller or any of its Affiliates will join in the execution of any such Tax Returns or other documentation. Seller will be entitled to review in advance such Tax Returns as it or its Affiliates may be required to join and execute and such Tax Returns shall be subject to Seller's approval (which shall not be unreasonably withheld, conditioned or delayed).

(b) As soon as practicable after the Closing, Seller and Purchaser agree to join in making a timely, effective and irrevocable election under Section 338(h)(10) of the Code and the comparable election under the laws of the State of Hawaii with respect to CE PUNA I and CE PUNA II (the "Section 338(h)(10) Election"). At least two (2) days prior to the Closing Date, Seller shall deliver to Purchaser two Internal Revenue Service Forms 8023 with respect to CE PUNA I and CE PUNA II. At the Closing Seller shall deliver to Purchaser executed versions of such forms, which Purchaser shall counter-execute and file with the IRS within two (2) weeks thereafter. Purchaser shall use commercially

reasonable efforts to deliver to CPI within 90 days after the Closing Date, but in any event Purchaser shall deliver to CPI within 120 days after the Closing Date, a statement (the "338 Allocation Statement") allocating the ADSP (as such term is defined in Treasury regulations Section 1.338-4) of the assets of CE PUNA I and CE PUNA II in accordance with the Treasury regulations promulgated under Section 338 of the Code. Purchaser shall deliver a revised 338 Allocation Statement to account for any adjustment to the Purchase Price pursuant to Article 3 that was not previously taken into account in the preparation of the 338 Allocation Statement within 10 days after the payment of such Purchase Price adjustment. CPI shall have the right to review the 338 Allocation Statement for compliance with the Treasury regulations promulgated under Section 338 and Section 755 of the Code. The parties agree that the ADSP (including any revised ADSP) will be allocated in accordance with Schedule 7.5(b). If

38

CPI notifies Purchaser in writing within 30 days after receipt of the 338 Allocation Statement or a revised 338 Allocation Statement that the allocation of one or more items reflected in the 338 Allocation Statement or a revised 338 Allocation Statement does not comply with the Treasury regulations promulgated under Section 338 and Section 755 of the Code, Purchaser and CPI will negotiate in good faith to resolve such dispute. Upon resolution of the disputed items, the allocation reflected on the 338 Allocation Statement (as such may have been adjusted) shall be the "Price Allocation" and shall be binding on the parties except as set forth herein. Seller and Purchaser agree to act in accordance with the Price Allocation in the preparation, filing and audit of any Tax return. No Party hereto shall file any form or document required to effect a valid and timely Section 338(h)(10) Election (or similar state or local election), including Internal Revenue Service Forms 8023 and 8883, any similar form under any Applicable Laws and any schedules or attachments thereto, unless it shall have obtained the consent of the other Party hereto, which consent shall not be unreasonably withheld, conditioned or delayed, or otherwise required pursuant by a "determination" within the meaning of Section 1313 of the Code. As soon as practicable after the Closing, Seller will make a timely election under Section 754 of the Code for PGV and CE PUNA LP. Within two (2) weeks of making such elections, Seller will provide copies of such elections to Purchaser.

(c) Any Tax Return to be prepared pursuant to the provisions of this Section 7.5 shall be prepared in a manner consistent with practices followed in prior years with respect to similar Tax Returns, except for changes required by changes in Applicable Laws or fact. Purchaser shall not file an amended Tax Return for any period ending on or prior to the Closing Date without the consent of CPI, which consent shall not be unreasonably withheld, conditioned or delayed. The filing of any Tax Returns, or the payment of any Taxes, described in this Section 7.5 shall be made on a timely basis in accordance with Applicable Laws. The following provisions shall govern the allocation of responsibility as between the Parties for certain Tax matters following the Closing Date:

(i) CPI shall prepare or cause to be prepared and file or cause to be filed all Tax Returns for the Companies for all periods ending on or prior to the Closing Date regardless of when such Tax Returns are to be filed. CPI shall pay, or cause to be paid, the Taxes attributable to the Companies with respect to such periods (including any Income Taxes resulting from the 338(h)(10) Election), other than Transfer Taxes incurred in connection with this Agreement and the Transactions, which shall be the responsibility of Purchaser.

(ii) Purchaser shall prepare or cause to be prepared and file or cause to be filed any Tax Returns of the Companies for Tax periods which begin before or on the Closing Date and end after the Closing Date, excluding those returns for which a Tax Return must be filed for a short year return ending on or prior to the Closing Date, which shall be subject to subparagraph (i) above. To the extent that such Taxes have not been included as a liability

on the Final Adjustment Statement, Seller shall pay, or cause

39

to be paid, to Purchaser within fifteen (15) days after the date on which Taxes are paid with respect to such periods an amount equal to the portion of such Taxes, which relates to the portion of such Tax period ending on the Closing Date, other than Transfer Taxes incurred in connection with this Agreement and the Transactions, which shall be the responsibility of Purchaser.

(d) Each Party shall provide the other Party with such assistance as may reasonably be requested by the other Party in connection with the preparation of any Tax Return, or any audit or other examination by any taxing authority, or any judicial or administrative proceedings relating to any liability for Taxes (a "Tax Proceeding"), and each will retain and provide the requesting Party with any records or information which may be relevant to such Tax Return or Tax Proceeding. Any reasonable out-of-pocket expenses incurred in providing such assistance shall be borne by the requesting party. Any information obtained pursuant to this Section 7.5 or pursuant to any other Section hereof providing for the sharing of information relating to or review of any Tax Return or other schedule relating to Taxes shall be kept confidential by the Parties in accordance with the Confidentiality Agreement.

(e) After the Closing Date, in the case of any Tax Proceeding with respect to a Taxable period for which Seller is or may be liable for the Taxes pursuant to this Agreement, other than a claim for Taxes or a Purchaser Claim described in Section 7.5(f) or (g), Purchaser shall inform Seller within ten (10) days of the receipt of any notice of such Tax Proceeding, and shall afford Seller, at Seller's expense, the opportunity to control the conduct of such Tax Proceedings. Purchaser shall execute or cause to be executed powers of attorney or other documents necessary to enable Seller to take all actions desired by Seller with respect to such Tax Proceeding. Seller shall have the right to control, in its sole discretion, any such Tax Proceedings and to initiate any claim for refund, file any amended return, pay such Taxes, or enter into any settlement agreement with a Governmental Authority, or take any other action which it deems appropriate with respect to such Taxes; provided, however, that Seller shall not, without Purchaser's consent (which consent shall not be unreasonably withheld, conditioned or delayed) agree to any settlement with respect to any Tax if such settlement would adversely affect the Tax liability of Purchaser.

(f) Notwithstanding any other provision of this Agreement, this Section 7.5(f) and Section 7.5(g), the dollar limitations contained in Section 9.2(b), the dollar threshold contained in Section 9.7(c), and the time limitations contained in Section 9.10 shall apply to indemnifications by Seller to Purchaser for, and such indemnification shall be the sole remedy of Purchaser in respect of, the Losses in respect of Taxes. Seller shall indemnify and hold harmless Purchaser and the Companies from and against the entirety of any and all Losses that Purchaser may suffer for any Taxes attributable to the Companies with respect to any Tax year or portion thereof ending on or before the Closing Date (or for any Tax year beginning before and ending after the Closing Date to

40

the extent allocable to the portion of such period beginning before and ending on the Closing Date).

(g) The provisions of this Section 7.5(g) shall apply only to the indemnification provided for under Section 7.5(f) and a Purchaser Claim with respect to Taxes. If a Purchaser Claim exists for Taxes or if a claim for Taxes is made against Purchaser for which Purchaser intends to seek indemnity with respect thereto under Section 7.5(f), Purchaser shall promptly furnish written notice to Seller of such Purchaser Claim or claim. Failure of Purchaser to so

notify Seller within thirty (30) days of the claim being made against Purchaser shall release Purchaser's rights to indemnity by Seller with respect to such claim to the extent that such failure materially prejudiced Seller's ability to defend or settle such claim. Seller shall have fifteen (15) days after receipt of such notice to undertake, conduct, and control (through counsel of its own choosing and at its own expense) the settlement or defense thereof, and Purchaser shall cooperate with Seller in connection therewith. Seller shall permit Purchaser to participate in such settlement or defense through counsel chosen by Purchaser (but the fees and expenses of such counsel shall be paid by Purchaser). So long as Seller, at Seller's cost and expense, (i) have undertaken the defense of, and assumed full responsibility for all indemnified Losses with respect to, such claim, (ii) are contesting such claim in good faith, by appropriate proceedings, and (iii) have taken such action (including the posting of a bond, deposit, or other security) as may be necessary to prevent any action to foreclose a lien against or attachment of the property of Purchaser or Companies for payment of such claim so long as Purchaser shall not be subject to payment obligations in excess of the limits on Seller's indemnification set forth under this Agreement, Purchaser shall not pay or settle any such claim. Notwithstanding compliance by Seller with the preceding sentence, Purchaser may elect to pay or settle any such claim, but upon such election it shall thereby automatically, and without any further action by any Party, irrevocably waive any right to indemnity by Seller with respect to such claim. If within fifteen (15) days after the receipt of Purchaser's notice of a claim of indemnity hereunder, Seller do not notify Purchaser that it elects (at Seller's sole cost and expense) to undertake the defense thereof and assume full responsibility for all indemnified Losses with respect thereto, or gives such notice and thereafter fails to contest such claim in good faith or to prevent action to foreclose a lien against or attachment of Purchaser's or Companies' property or material harm to Purchaser or the Companies as provided above, Purchaser shall have the right to contest, settle, or compromise such claim and Purchaser shall not thereby waive any right to indemnity with respect to such claim under this Agreement.

(h) Any refund of Taxes paid or payable with respect to Taxes attributable to the Companies shall be promptly paid as follows (or to the extent payable but not paid due to offset against other Taxes shall be promptly paid by the Party receiving the benefit of the offset as follows): (i) to Seller if attributable to Taxes with respect to any Tax year or portion thereof ending on or before the Closing Date (or for any Tax year beginning before and ending after the Closing Date to the extent allocable

to the portion of such period beginning before and ending on the Closing Date), including, but not limited to, the potential tax refunds described on Schedule 7.5(h); and (ii) to Purchaser if attributable to Taxes with respect to any Tax year or portion thereof beginning after the Closing Date (or for any Tax year beginning before and ending after the Closing Date to the extent allocable to the portion of such period ending after the Closing Date).

(i) In the event that a dispute arises between Seller and Purchaser as to the amount of Taxes, the Parties shall attempt in good faith to resolve such dispute, and any amount so agreed upon shall be paid to the appropriate Party. If such dispute is not resolved within thirty (30) days thereafter, the Parties shall submit the dispute to the Independent Accounting Firm for resolution, which resolution shall be final, conclusive and binding on the Parties. The Independent Accounting Firm shall be instructed to deliver to the Parties a written resolution of the dispute within twenty (20) Business Days from the date of its engagement. For purposes of this Section 7.5(i), the Independent Accounting Firm may determine the issues in dispute following such procedures, consistent with the provisions of this Agreement, as it deems appropriate to the circumstances and with reference to the amounts in issue. The Parties do not intend to impose any particular procedures upon the Independent Accounting Firm, it being the desire of the Parties that any such disagreement

shall be resolved as expeditiously and inexpensively as reasonably practicable. The Independent Accounting Firm shall have no liability to the Parties in connection with such services except for acts of bad faith, willful misconduct or gross negligence, and the Parties shall provide such indemnities to the Independent Accounting Firm as it may reasonably request. Notwithstanding anything in this Agreement to the contrary, the fees and expenses of the Independent Accounting Firm in resolving the dispute shall be borne equally by Seller and Purchaser. Any payment required to be made as a result of the resolution of the dispute by the Independent Accounting Firm shall be made within ten (10) days after such resolution, together with any interest determined by the Independent Accounting Firm to be appropriate.

(j) Except as provided in Section 9.2(a), Section 9.2(b), Section 9.7(c), Section 9.8, and Section 9.10, from and after the Closing, the provisions of this Section 7.5 shall be the exclusive agreement among the parties (including Seller's indemnities and the Purchaser's indemnities), with respect to Tax matters, including, but not limited to, indemnification for Tax matters. In the event of any inconsistency between Section 7.5(g) and Sections 9.4 and 9.5 with respect to Tax matters, Section 7.5(g) shall control.

SECTION 7.6 Risk of Loss.

(a) Between the date hereof and the Closing Date, all risk of loss or damage to the assets and properties of PGV, including the Plant, shall be borne by Seller except as set forth in Section 8.3.

42

(b) If before the Closing Date all or any portion of the Plant becomes subject to any condemnation or eminent domain proceeding (the "Condemned Portion"), Seller shall notify Purchaser promptly in writing of such fact. If the fair market value of the Condemned Portion is less than twenty-five percent (25%) of the Initial Purchase Price and the remaining portion of the Plant may be operated and generate electricity in a manner and amount substantially similar to that in which the entire Plant was operated immediately prior to the Effective Date, Seller shall, at its option, either (i) reduce the Initial Purchase Price by the fair market value of the Condemned Portion (such value to be determined as of the date immediately prior to such condemnation or eminent domain proceeding), or (ii) assign to Purchaser at the Closing any claim, settlement, or proceeds thereof related to such proceeding to which Seller or any Affiliate of Seller may be entitled. Any failure of a condition to Closing related to any such proceeding of which Seller shall have so notified Purchaser shall be deemed not to exist, provided, that Seller exercises its election pursuant to the preceding sentence within a reasonable period of time. If, before the Closing Date, all or any portion of the Plant becomes subject to or is threatened with any condemnation or eminent domain proceeding and the fair market value of the Condemned Portion is greater than twenty-five percent (25%) of the Initial Purchase Price, then Purchaser may elect either to (x) require Seller upon the Closing to assign to Purchaser any claim, settlement, or proceeds thereof related to such proceeding to which Seller or any Affiliate of Seller may be entitled and proceed with the Transactions, or (y) terminate this Agreement.

(c) If before the Closing Date all or any portion of the Plant is damaged or destroyed (the "Damaged Portion") (whether by fire, theft, vandalism or other casualty) in whole or in part, and the fair market value of Damaged Portion or the cost of repair of the Damaged Portion is less than twenty-five percent (25%) of the Initial Purchase Price, and the undamaged portion of the Plant may be repaired so that the Plant may be operated and generate electricity in a manner and amount substantially similar to that in which it was operated immediately prior to the Effective Date, Seller shall, at its option, either (i) reduce the Initial Purchase Price by the lesser of the actual cash value of the Damaged Portion (such value to be determined as of the date immediately prior to such damage or destruction and calculated as the replacement cost of the Damaged Portion), or the estimated cost to repair or

restore the same, or (ii) bear the costs of repairing or restoring the Damaged Portion and, at Seller's election, delay the Closing and any right to terminate this Agreement for a reasonable time necessary to accomplish the same. Any failure of a condition to Closing related to any such damage or destruction of which Seller shall have so notified Purchaser shall be deemed not to exist, provided, that Seller exercises its election pursuant to the preceding sentence within a reasonable period of time. If the Plant is damaged or destroyed (whether by fire, theft, vandalism or other casualty) in whole or in part prior to the Closing and the lesser of the actual cash value of the Damaged Portion (determined as provided above) or the cost of repair of the Damaged Portion is greater than twenty-five percent (25%) of the Initial Purchase Price, then Purchaser may elect either to (x) require Seller upon the Closing to transfer to Purchaser the proceeds (or the right to the proceeds) of applicable insurance to

43

which Seller or any Affiliate of Seller (other than PGV) may be entitled and proceed with the Transactions, or (y) terminate this Agreement.

SECTION 7.7 Insurance. Purchaser shall be obligated at or before Closing to obtain at its sole cost and effective upon Closing insurance coverage for the Plant. The proceeds from any Company Insurance Policies (without reduction for the payment of any deductible related thereto) related to post-Closing expenses actually paid by Purchaser or the Companies (which shall exclude any such amounts that were previously accrued by the Companies prior to the Closing Date and included in the Estimated Adjustment Statement and/or the Final Adjustment Statement set forth in Sections 3.4 and 3.5) with regard to the repairs described in Item 1 of Schedule 5.19 (Purchaser shall submit invoices and other supporting documentation of such expenses to Seller) will be paid by Seller to Purchaser as soon as practicable after such proceeds are received by Seller or Seller's Affiliate from the insurance company. Seller and Seller's Affiliates shall be entitled to retain any additional proceeds they receive under such Company Insurance Policies with regard to such repairs. For the avoidance of doubt, Seller or Seller's Affiliate (other than the Companies) shall bear the cost of any deductible related to the foregoing.

SECTION 7.8 Announcements. Subject to Section 7.1, prior to the Closing Date no press release or other public announcement, or public statement or comment in response to any inquiry, relating to this Agreement or the Transactions shall be issued or made by Purchaser or Seller without the joint approval of both Purchaser and Seller; provided, however, that a press release or other public announcement, regulatory filing, statement or comment made without such joint approval shall not be in violation of this Section 7.8 if it is made in order to comply with Applicable Laws or stock exchange rules and in the reasonable judgment of the Party making such release or announcement, based upon advice of counsel, prior review and joint approval, despite reasonable efforts to obtain the same, would prevent dissemination of such release or announcement in a timely enough fashion to comply with such Applicable Laws or rules; provided, further, that in all instances prompt notice from one Party to the other shall be given with respect to any such release, announcement, statement or comment.

SECTION 7.9 Post Closing - Further Assurances. At any time or from time to time after the Closing, each Party will, upon the reasonable request of the other Party, execute and deliver any further instruments or documents, and exercise commercially reasonable efforts to take such further actions as may reasonably be required, to fulfill and implement the terms of this Agreement or realize the benefits intended to be afforded hereby. After the Closing, and upon prior reasonable request, each Party shall exercise commercially reasonable efforts to cooperate with the other, at the requesting Party's expense (including, but not limited to, out-of-pocket expenses to third parties incurred by any Party), in furnishing non-confidential and non-privileged Records, information, testimony and other assistance in connection with any inquiries, actions, audits, proceedings or disputes involving either of the Parties (other

disputes between the Parties) and based upon contracts, arrangements or acts of Seller or Purchaser, which were in effect or occurred on, prior to, or after Closing and which relate to PGV or the Plant, including, without limitation, arranging discussions with (and calling as a witness) officers, directors, employees, agents, and representatives of Purchaser or Seller. Without limiting the generality of the foregoing, Seller has provided to Purchaser copies of the audited financial statements (of the type described in Section 5.17) for PGV for each of the three full fiscal years prior to Closing and, upon Purchaser's request, will make the auditors for the Companies reasonably available to answer clarification questions regarding those financial statements and the financial statements of the other Companies that the Purchaser may have.

SECTION 7.10 Post Closing - Information and Records.

(a) For a period of five (5) years after the Closing (or, if requested in writing by Seller within five (5) years after the Closing, until the closing of any Tax Proceeding with respect to Seller's Tax Returns for all periods prior to and including the Closing, if later), Purchaser will not dispose of any books, records, documents, contracts, data or information, whether in electronic or physical form, and the software and computer hardware necessary to retrieve such data or information ("Records"), reasonably relating to the Companies delivered to it by Seller or in the possession of the Companies as of the Closing without first giving notice to Seller thereof and permitting Seller to retain or copy such books and records as it may select. During such period, Purchaser will permit Seller to examine (during normal business hours and upon reasonable notice) and make copies, at Seller's expense and subject to such confidentiality restrictions as Purchaser may reasonably impose, of such Records for any reasonable purpose, including any litigation now pending or hereafter commenced against Seller or its Affiliates, or the preparation of income or other Tax Returns.

(b) During such five (5) year time period, Purchaser will provide to Seller, at Seller's expense, copies of such Records reasonably relating to the Companies delivered to it by Seller or in the possession of the Companies as of the Closing for any reasonable purpose, including any litigation now pending or hereafter commenced against Seller or its Affiliates by any Person (including Purchaser). Seller will provide reasonable notice to Purchaser of its need to access such Records.

(c) If privileged and/or attorney work product documents or information, including communications between Seller or its Affiliates and any of their respective counsel, are disclosed to Purchaser in the Records delivered by Seller or in the possession of the Companies as of the Closing, then Purchaser agrees that (i) such disclosure is inadvertent, (ii) such disclosure will not constitute a waiver, in whole or in part, of any privilege or work product, (iii) such information will constitute confidential information subject to the provisions of Section 8.4, and (iv) it will promptly return to Seller all copies of such Records in the possession of the Companies, Purchaser or

Purchaser's Affiliates, agents, employees or representatives (including lenders and financial advisors).

SECTION 7.11 Use of Seller's Marks. Except as provided in the next sentence, Purchaser acknowledges and agrees that it does not have and, upon consummation of the Transactions shall not have, any right, title, interest, license, or any other right whatsoever to the Seller's Marks. As soon as

practicable and in no event later than thirty (30) days following the Closing Date, Purchaser shall (a) remove any Seller's Marks from, or cover or conceal the Seller's Marks on, the assets of the Companies, including signage at the Plant, and provide written verification thereof to Seller promptly after completing such removal, and (b) return or destroy (with proof of destruction) all other assets of the Companies that contain any Seller's Marks that are not removable or that cannot be permanently covered or concealed, other than in the case of the Companies' books and records transferred pursuant to this Agreement. Purchaser agrees never to challenge Seller's (or its Affiliates') ownership of the Seller's Marks or any application for registration thereof or any registration thereof or any rights of Seller or its Affiliates therein as a result, directly or indirectly, of its ownership of the Companies. Purchaser will not conduct any business or offer any goods or services under any Seller's Marks. Purchaser will not send, or cause to be sent, any correspondence or other materials to any Person on any stationery that contains any Seller's Marks or otherwise operate the Companies in any manner which would or might reasonably be expected to confuse any Person into believing that Purchaser has any right, title, interest, or license to use any Seller's Marks.

SECTION 7.12 Excluded Assets.

(a) Notwithstanding anything to the contrary contained in this Agreement, the Transactions shall exclude the following (the "Excluded Assets"):

(i) Except as required in Section 5.22 and Section 7.6(c)(x), all Company Insurance Policies and rights under any Company Insurance Policies in respect of any and all claims made under such policies whether such claims are asserted before or after the Closing Date and all rights to any proceeds payable under any such policy including, without limitation, any proceeds received by Seller or any of its Affiliates from any Company Insurance Policies related to Item 1 of Schedule 5.19; and

(ii) the Seller's Marks. Seller's representations and warranties in Articles 4 and 5 shall not apply to any of the items described in 7.12(a)(ii).

(b) Prior to the Closing Date, Seller may cause the Companies to transfer any Excluded Asset to Seller or any of its Affiliates; provided, however, that any Excluded Asset not so transferred prior to the Closing Date shall be deemed to have been transferred to Seller without any further action.

46

SECTION 7.13 Excluded Liabilities. Notwithstanding anything to the contrary contained in this Agreement, the Transactions shall exclude, and Seller hereby assumes as of the Closing Date, any liabilities or obligations of the Companies in respect of the following: (the "Excluded Liabilities"):

(a) any Excluded Asset;

(b) any Employee Benefit Plan;

(c) any Intercompany Arrangements; and

(d) any liability to the State of Hawaii for tax credit refunds received prior to Closing including, without limitation, the tax credit refunds identified in Schedule 5.15.

SECTION 7.14 Employees.

(a) Purchaser agrees to offer employment to, or cause Purchaser's Parent to offer employment, commencing as of the Closing Date, to all of the employees employed at, or whose work responsibilities involve

principally the operation of, the Plant, which employees are listed on Schedule 7.14(a), as amended between the date of this Agreement and the Closing Date to reflect any changes in the identities of work force personnel, it being understood that any such change shall not be deemed to be material for purposes of Section 10.5; provided, however, that such offer shall be subject to each such employee's satisfaction of reasonable customary hiring requirements of Purchaser or Purchaser's Parent, as the case may be, which shall be limited to background checks and post-offer drug screening and the execution of customary employee agreements regarding confidentiality, inventions and the like, and shall contain the base salary and incentive compensation and replacement welfare plans that are set forth on Schedule 7.14(c). Purchaser or Purchaser's Parent shall continue to provide base salary and incentive compensation at not less than then the levels set forth on Schedule 7.14(c) for a period of eighteen (18) months after the Closing Date and shall maintain replacement welfare plans that are substantially similar when considered in the aggregate to the replacement welfare plans set forth on Schedule 7.14(c) for a period of eighteen (18) months after the Closing Date. Each such employee who is offered and accepts employment with Purchaser or Purchaser's Parent will be referred to herein as a "Transferred Employee." With regard to the calendar year which includes the Closing Date, Purchaser shall pay Transferred Employees the amount of any annual incentive earned and payable under the terms of an annual incentive plan of Purchaser or Purchaser's Parent that offers incentive compensation in an amount and terms meeting the standards specified above, prorated based on the portion of the full calendar year from the Closing Date to December 31, 2004. Purchaser agrees that it shall also pay the reasonable relocation costs of any Transferred Employee who shall relocate at Purchaser's or Purchaser's Parent's request during the period of 18 months after the Closing Date.

47

(b) Any individual who is otherwise a Transferred Employee but who on the day immediately preceding the Closing Date is not actively at work due to an approved leave of absence due to illness, military leave or disability shall nevertheless be treated as Transferred Employees but only if he or she is able to perform the essential functions of his/her job, with or without a reasonable accommodation, within the period established under COSI PUNA's applicable leave of absence policy.

(c) As of the Closing Date, all Transferred Employees shall cease to participate in the employee welfare benefit plans (as such term is defined in Section 3(1) of ERISA) maintained or sponsored by Seller or its Affiliates and shall commence participation in the then-current employee welfare benefit plans of Purchaser, Purchaser's Parent or their Affiliates (the "Replacement Welfare Plans") which are included in the summary of benefit plans of Purchaser and Purchaser's Parent that are in effect as of the Effective Date and that are described in Schedule 7.14(c). Subject to the approval of Purchaser's or Purchaser's Parent's insurers and third party administrators, as needed (which approval shall be requested by Purchaser or Purchaser's Parent immediately after the Effective Date), Purchaser or Purchaser's Parent, as applicable shall (i) waive all limitations as to pre-existing condition exclusions and waiting periods with respect to the Transferred Employees under the Replacement Welfare Plans, other than, but only to the extent of, limitations or waiting periods that were in effect with respect to such employees under the welfare plans maintained by Seller or its Affiliates and that have not been satisfied as of the Closing Date, and (ii) provide each Transferred Employee with credit for any co-payments (if permitted under the applicable Replacement Welfare Plan) and deductibles paid prior to the Closing Date during a plan year under Seller's or its Affiliates' plan that has not ended as of the Closing Date, in satisfying any deductible or out of pocket requirements under the applicable Replacement Welfare Plans with respect to any plan year that has not ended as of the Closing Date.

(d) Purchaser shall give or cause Purchaser's Parent to give all Transferred Employees credit for all service recognized by Seller and its Affiliates immediately prior to the Closing Date under all Replacement Welfare

Plans and arrangements maintained by Purchaser or Purchaser's Parent, as applicable in which the Transferred Employees become participants. Prior to the Closing Date, Seller shall provide Purchaser with a description of all such service recognized by it and its Affiliates, itemized by individual Transferred Employee. Purchaser agrees that the service credit to be given to Transferred Employees by Purchaser and its Affiliates is for purposes of eligibility, and vesting, but not benefit accrual (except for vacation and severance benefits).

(e) To the extent allowable by Applicable Law, including, without limitation, ERISA's fiduciary provisions, and by the tax qualified 401(k) plan sponsored by the Seller or its Affiliates in effect for Transferred Employees immediately prior to the Closing Date (the "Seller's Savings Plan"), Purchaser shall take any and all necessary action to cause the trustee of any tax-qualified 401(k) plan of Purchaser or its Affiliates in

48

which any Transferred Employee becomes a participant to accept a direct "rollover" in cash (and any outstanding participant loans) of all or a portion of said employee's "eligible rollover distribution" within the meaning of Section 402 of the Code from the Seller's Savings Plan if requested to do so by the Transferred Employee, except in the case where a participant has an outstanding participant loan which in such case such participant shall "rollover" all of its "eligible rollover distribution". However, any tax-qualified 401(k) plan of Purchaser or its Affiliates accepting such a rollover shall not be required to permit any investment to be made in Constellation Energy Group, Inc. common stock on behalf of any Transferred Employee after the Closing Date or to adopt any other provision of Seller's Savings Plan except to the extent required by Applicable Law.

(f) Purchaser shall pay to each Transferred Employee whose employment is terminated without Cause by Purchaser or one of its Affiliates within eighteen months after the Closing Date a severance benefit package equal to:

- o Two weeks of base pay for each full year of service (including service with Purchaser or its Affiliates and service recognized by Seller or Seller's Affiliates immediately prior to Closing).
- o Insurance Benefits: Medical and dental coverage at active employee rates during the period equal to two weeks for each year of service (including service with Purchaser and service recognized by Seller or Seller's Affiliates immediately prior to the Closing); provided, however, that such coverage shall be provided during such period only to the extent that a Transferred Employee timely elects and continues to be eligible for such coverage under COBRA and the terms of the applicable benefit plans then maintained by Purchaser or its Affiliates.

For purposes of calculating the level of severance benefits above to which a terminated Transferred Employee is entitled, such calculation shall be made as though the Transferred Employee's termination date is the eighteenth month anniversary of the Closing Date, regardless of the actual date of termination. The relocation of a Transferred Employee's employment at Purchaser's or Purchaser's Parent's request from Purchaser or one of its Affiliates to another Affiliate of Purchaser shall not constitute termination without Cause for purposes of this Section.

(g) Seller shall notify Purchaser of (i) any increase in the rate of compensation granted by COSI PUNA or the Companies payable to or to

become payable prior to the Closing Date to any Transferred Employee, and (ii) any resignations or termination of any Transferred Employees prior to the Closing Date.

(h) Neither Purchaser nor its Affiliates shall have any liabilities or other obligations with respect to any Transferred Employees or other former employees

49

or consultants of COSI PUNA or its Affiliates arising from actions or inactions of COSI PUNA or its Affiliates during periods prior to the Closing Date.

(i) Seller and COSI PUNA shall cause the employment of all Transferred Employees by Seller, COSI PUNA or their Affiliates to be terminated, and all salaries, wages, benefits, severance payments and benefits or other amounts due and owing from Seller, COSI PUNA or their Affiliates to the Transferred Employees as of the Closing Date or as a result of such termination to be satisfied in full by Seller, COSI PUNA or their Affiliates of Seller, prior to or concurrently with the Closing.

SECTION 7.15 Additional Covenants of Purchaser. Purchaser hereby agrees with and covenants to Seller that prior to consummation of the Transactions or the termination or expiration of this Agreement pursuant to its terms, unless Seller shall otherwise consent in writing, Purchaser shall not take any action which would cause any of Purchaser's representations and warranties set forth in Article 6 to be false as of the Closing in any material respect.

SECTION 7.16 Assumption of Obligations. From and after the Closing, Purchaser shall cause the Companies to fully perform and fulfill all of their obligations and commitments, whether existing as of the Closing Date or arising or incurred thereafter.

SECTION 7.17 Company Guarantees. The Parties shall cooperate and use commercially reasonable efforts (which shall not include any obligation of Seller to pay any cost or expense or incur any obligation) in order that, effective as of the Closing Date, (a) the Company Guarantees identified in Item 3 of Schedule 1.1A and any liabilities related thereto shall be released as to Seller and its Affiliates, and (b) substitute arrangements, if required, of Purchaser or its Affiliates shall be in effect.

SECTION 7.18 Action Taken in connection with the Loan Documents. Between the Effective Date and the Closing Date, Seller shall take all actions and binding commitments necessary to irrevocably satisfy in full at the Closing the Debt Payoff Amount and any other amounts required to satisfy in full the Loan Documents (including, but not limited to, all fees, penalties, early termination payments, costs, and the like), terminate all of the Loan Documents and secure a release from all of the counterparties thereto, finally and forever releasing the Companies, Seller and its Affiliates under the Loan Documents and releasing all Encumbrances associated with the Loan Documents (such releases to be in form and substance reasonably satisfactory to Seller and Purchaser), including, but not limited to, the Debt Service Reserve Guaranty and the Pledge Agreement.

SECTION 7.19 Payment of Intercompany Arrangements. Seller shall cause all Intercompany Arrangements to be cancelled and terminated, and all amounts due and owing as of the Closing Date thereunder to be satisfied in full by the Companies to Seller or any Affiliates of Seller, prior to or concurrently with the Closing.

SECTION 7.20 Repair of Well KS-11R. Seller, at its expense, shall repair, or shall cause the Companies to repair, the injection well at the Plant known as KS-11R in accordance with the repair program identified in Schedule 5.7 (as the same may be modified as provided below) and Applicable Laws and the requirements of Governmental Authorities having jurisdiction. Any payables or liabilities of the Companies associated with such repairs that have not been paid as of Closing shall be accounted for as a Purchase Price adjustment pursuant to the procedures set forth in Sections 3.4 and 3.5. If such repairs have not been completed prior to Closing, Seller shall reimburse Purchaser or the Companies for any costs they reasonably incur after Closing to complete such repairs in accordance with the repair program identified in Schedule 5.7 (as the same may be modified as provided below). Purchaser shall have the right to propose modifications to the repair program identified in Schedule 5.7 which proposed modifications Seller will consider in good faith, but Seller may condition acceptance of any such modifications upon, among other things, the approval of its technical experts, the approval of such modifications by Governmental Authorities having jurisdiction and Purchaser agreeing to pay any additional costs and assuming any additional risk associated with implementing such modifications. If the Parties are unable to reach agreement upon any modifications proposed by Purchaser, then the repairs shall be conducted by or for Seller as provided in the first sentence of this Section.

ARTICLE 8

ACCESS AND CONFIDENTIALITY; TRANSITION PROCEDURES

SECTION 8.1 General Access. Subject to the provisions of Section 8.2, during the Transition Period, Seller shall permit (and Seller shall cause the Companies to permit) Purchaser and its representatives:

(a) to have reasonable access, at reasonable times and upon reasonable advance notice and in a manner so as not to interfere unduly with the business operations of Seller or the Companies, to the Records of the Companies relating to their Business and the Plant insofar as the same may be disclosed without (i) violating any legal constraints or any legal obligation, (ii) waiving any attorney/client, work product, or like privilege, (iii) disclosing information about the activities of Seller or its Affiliates (other than the Companies) that is unrelated to the Companies, their Business or the Plant, or (iv) disclosing proprietary models of Seller or any of its Affiliates pertaining to energy project evaluation, energy or natural gas price curves or projections, or other economic predictive models; and

(b) subject to Seller's receipt of any required consent of any third Person and upon reasonable advance notice to Seller, to conduct at reasonable times and at Purchaser's sole risk, cost, and expense, in the presence of representatives of Seller, reasonable inspections of the Plant; provided, however, that no soil, water, groundwater or other environmental testing shall be conducted.

SECTION 8.2 Transition Period Procedures. The Parties acknowledge and agree that in order to ensure that upon Closing the transition of the ownership of the Purchased Shares and the operation of the Plant is as smooth and orderly as is reasonably practicable, representatives of Purchaser shall be entitled to become familiar with the Plant and be introduced to, and have the opportunity to meet with, suppliers, other vendors and customers of any of the Companies. In order to facilitate such transitions, not later than five (5) Business Days following the Effective Date, Seller and Purchaser shall each designate a representative (each a "Transition Representative") to coordinate the activities contemplated by this Section 8.2 and shall provide the name and relevant contact information of their respective Transition Representatives to the other Party.

Either Party may designate a different Transition Representative at any time and from time to time by written notice to the other Party, which notice shall specify the name of the relevant individual and his or her contact information. Within ten (10) Business Days of their selection, the Transition Representatives shall meet (in person or by telephone) to develop such procedures as such persons determine to be reasonably necessary or appropriate under the circumstances to accomplish the transitions contemplated by this Section 8.2; provided, however, that any such procedures shall be consistent with the other provisions of this Agreement; and provided, further, that in no event shall any meetings with suppliers, other vendors or customers of any of the Companies relating in manner to the Companies, the Transactions, the Plant or the Existing Contracts be conducted prior to the Closing without Seller's Transition Representative or other representative of Seller being present, nor shall Purchaser or any of its Affiliates otherwise contact or communicate directly with any supplier, other vendor or customer of any of the Companies regarding the above-described matters prior to the Closing without Seller's prior written consent, which consent shall not be unreasonably withheld, conditioned or delayed, unless Seller's Transition Representative or other representative of Seller shall participate therein.

SECTION 8.3 Indemnification. Purchaser agrees to indemnify and hold harmless, release, and defend the Seller's Indemnified Parties and the Companies from and against any and all Losses arising, in whole or in part, from the acts or omissions of the Purchaser Indemnified Parties in connection with Purchaser's inspection or assessment of the Plant and other assets and Records of Seller or any of the Companies, including claims for personal injuries (including, but not limited to, injuries to employees of Seller), property damage (including, but not limited to, property damage to the Plant), and reasonable attorneys' fees and expenses, and all such inspections and assessments shall be at Purchaser's sole risk. Nothing in this Article 8 shall be construed to permit Purchaser or its representatives to have access to any Records of Seller or any of the Companies relating to the Transactions, including any bids or offers received by Seller or any of the Companies for the sale of the Purchased Shares or the Plant, it being agreed that all such bids or offers shall be the sole property of Seller. The provisions set forth in Sections 9.4, 9.5, 9.6, 9.7(a) and 9.7(b) shall apply to any indemnification by Purchaser under this Section 8.3. For the avoidance of doubt, Section 9.7(c) shall not apply to any indemnification by Purchaser under this Section 8.3.

52

SECTION 8.4 Confidential Information. Between the Effective Date and the Closing Date, Purchaser agrees to maintain all information made available to it under this Agreement confidential and to cause its officers, directors, agents, employees, representatives, consultants, and advisors to maintain all information made available to them under this Agreement confidential, all as provided in the Confidentiality Agreement, the terms of which are incorporated herein by reference and made a part of this Agreement.

SECTION 8.5 No Other Contact. Between the Effective Date and the Closing Date, Purchaser shall not in any way contact or correspond with any customer, employee, or other Person associated with any of the Companies or the Seller regarding the Companies, the Plant or the Existing Contracts, without the prior written consent of Seller.

ARTICLE 9

INDEMNIFICATION AND RELEASE

SECTION 9.1 Exclusivity. Except as provided in Section 7.5 and except for fraud, willful misconduct, willful misrepresentation, or willful breach of a representation, warranty, covenant or agreement hereunder, the rights and remedies of Seller and the Seller's Indemnified Parties, on the one hand, and Purchaser and the Purchaser Indemnified Parties, on the other hand, for money damages under this Article are, solely as between Seller and the Seller's

Indemnified Parties on the one hand, and Purchaser and the Purchaser Indemnified Parties on the other hand, exclusive and in lieu of any and all other rights and remedies for money damages which each of Seller and the Seller's Indemnified Parties on the one hand, and Purchaser and the Purchaser Indemnified Parties on the other hand, may have under this Agreement or under Applicable Laws with respect to any Indemnifiable Claim, whether at law or in equity.

SECTION 9.2 Indemnification by Seller.

(a) Purchaser Claims. Except as otherwise provided in Section 7.5(f), Seller will indemnify, defend and hold harmless Purchaser and its Affiliates, and each of their officers, directors, employees, attorneys, agents and successors and assigns (collectively, the "Purchaser Indemnified Parties"), from and against any and all demands, suits, penalties, fines, liens, judgments, obligations, damages, claims, losses, liabilities, payments, costs and expenses, including reasonable legal, accounting and other expenses in connection therewith and costs and expenses incurred in connection with investigations and settlement proceedings ("Losses"), which arise out of, are in connection with, or relate to, the following (collectively, "Purchaser Claims"):

(i) any breach or violation of any covenant, obligation or agreement of Seller set forth in this Agreement;

53

(ii) any breach or inaccuracy of the representations or warranties made, as of the Effective Date or the Closing Date, by Seller in Articles 4 and 5;

(iii) Seller's ownership, operation or use of the Excluded Assets after the Closing; or

(iv) if the Closing occurs, the Excluded Liabilities.

(b) Limitations on Seller Indemnification Obligation. As between the Parties, except in the case of fraud or willful misconduct on the part of Seller or its Affiliates, the Purchaser Indemnified Parties will not be entitled to any punitive, incidental, indirect, special or consequential damages resulting from or arising out of any Purchaser Claims, including damages for lost revenues, income, or profits, diminution in value of the Plant or any other damage or loss resulting from the disruption to or loss of operation of the Plant. The aggregate damages to which the Purchaser Indemnified Parties will be entitled for all Purchaser Claims shall be limited to ten percent (10%) of the Initial Purchase Price.

SECTION 9.3 Indemnification by Purchaser.

(a) Seller's Claims. Purchaser will indemnify, defend and hold harmless Seller and its Affiliates and each of their officers, directors, employees, attorneys, agents and successors and assigns (collectively, the "Seller's Indemnified Parties"), from and against any and all Losses which arise out of or relate to the following (collectively, "Seller's Claims"):

(i) any breach or violation of any covenant, obligation or agreement of Purchaser set forth in this Agreement;

(ii) any breach or inaccuracy of any of the representations or warranties made, as of the Effective Date or the Closing Date, by Purchaser in Article 6;

(iii) if the Closing occurs, the Business of PGV, the design, construction, ownership, operation or use of any of the assets of PGV, including the Plant (but excluding the Excluded Assets), the failure to pay, perform or discharge any liabilities or obligations of PGV (but excluding the Excluded Liabilities), or any other matter relating to or arising out of the

Business of PGV, the design, construction, ownership, operation or use of any of the assets of PGV, including the Plant (but excluding the Excluded Assets), whether relating to periods of time prior to or after the Closing Date, to the extent such Losses are not properly asserted by Purchaser under Section 7.5 or Section 9.2(a) (subject to the limitations in this Agreement); or

(iv) if the Closing occurs, without limiting the generality of Section 9.3(a)(iii), any liability, obligation or responsibility under or related to former,

54

current or future Environmental Laws, whether such liability or obligation or responsibility is known or unknown, contingent or accrued, arising as a result of or in connection with (A) any violation or alleged violation of Environmental Law, before or after the Closing Date, with respect to the ownership or operation of the Plant; (B) compliance with applicable Environmental Laws before or after the Closing Date with respect to the ownership or operation of the Plant; (C) loss of life, injury to persons or property or damage to natural resources caused (or allegedly caused) by any Recognized Environmental Condition on, in, under, adjacent to or migrating from the Plant before or after the Closing Date, including, but not limited to, Hazardous Substances contained in building materials at or adjacent to the Plant or in the soil, surface water, sediments, groundwater, landfill cells, or in other environmental media at the Plant; (D) the investigation and/or Remediation of Hazardous Substances that are present or have been Released before or after the Closing Date at, on, in, under, adjacent to or migrating from the Plant, including, but not limited to, Hazardous Substances contained in building materials at the Plant or in the soil, surface water, sediments, groundwater, landfill cells or in other environmental media at or adjacent to the Plant; and (E) the investigation and/or Remediation of Hazardous Substances that are disposed, stored, transported, discharged, Released, recycled, or the arrangement of such activities, in connection with the ownership or operation of the Plant, at any off-site location.

Purchaser acknowledges and agrees that the Losses described in Sections 9.3(a)(iii) and 9.3(a)(iv) shall be retained by PGV and transferred with the transfer of the Purchased Shares and shall continue to be the responsibility of PGV and Purchaser.

SECTION 9.4 Notice of Claim. Subject to the terms of this Agreement and upon a Party's receipt of notice of the assertion of a claim or of the commencement of any suit, action or proceeding made or brought by any Person who is not a Party to this Agreement or an Affiliate of either Party, the Party seeking indemnification hereunder (the "Indemnitee") will promptly notify the Party against whom indemnification is sought (the "Indemnitor") in writing of any damage, claim, loss, liability or expense which the Indemnitee has determined has given or could give rise to a claim under Section 9.2 or Section 9.3. Such written notice is herein referred to as a "Notice of Claim." A Notice of Claim will specify, in reasonable detail, the material facts known to the Indemnitee regarding the claim. Subject to the terms of this Agreement, the failure to provide (or timely provide) a Notice of Claim will not affect the Indemnitee's rights to indemnification; provided, however, that the Indemnitor is not obligated to indemnify the Indemnitee for the increased amount of any claim which would otherwise have been payable to the extent that the increase resulted from the Indemnitee's failure to timely deliver a Notice of Claim.

SECTION 9.5 Defense of Third Party Claims. The Indemnitor will defend, in good faith and at its expense, any claim or demand set forth in a Notice of Claim relating to a Third Party Claim and the Indemnitee, at its expense, may participate in the defense. The Indemnitee may not settle or compromise any Third Party Claim so long as the

Indemnitor is defending it in good faith. If the Indemnitor elects not to contest a Third Party Claim, the Indemnatee may undertake its defense, and the Indemnitor will be bound by the result obtained by the Indemnatee. The Indemnitor may at any time request the Indemnatee to agree to the abandonment of the contest of the Third Party Claim or to the payment or compromise by the Indemnitor of the asserted claim or demand. If the Indemnatee does not object in writing within fifteen (15) days of the Indemnitor's request, then the Indemnitor may proceed with the action stated in the request. If, within that fifteen (15) day period, the Indemnatee notifies the Indemnitor in writing that it has determined that the contest should be continued, the Indemnitor will be liable under this Article 9 only for an amount up to the amount which the Indemnitor had proposed as payment or compromise for such Third Party Claim. This Section 9.5 is subject to the rights of any insurance carrier of Indemnatee that is defending the Third Party Claim.

SECTION 9.6 Cooperation. The Party defending the Third Party Claim will: (a) consult with the other Party throughout the pendency of the Third Party Claim regarding the investigation, defense, settlement, trial, appeal or other resolution of the Third Party Claim; and (b) afford the other Party the opportunity to be associated in the defense of the Third Party Claim. The Parties will cooperate in the defense of the Third Party Claim. The Indemnatee will make available to the Indemnitor or its representatives all Records and other materials reasonably required by them for use in contesting any Third Party Claim (which Records and other materials shall be subject to the Confidentiality Agreement). If requested by the Indemnitor, the Indemnatee will cooperate with the Indemnitor and its counsel in contesting any Third Party Claim that the Indemnitor elects to contest or, if appropriate, in making any counterclaim against the Person asserting the claim or demand, or any cross-complaint against any Person. The Indemnitor will reimburse the Indemnatee for any expenses incurred by Indemnatee in cooperating with or acting at the request of the Indemnitor.

SECTION 9.7 Mitigation and Limitation of Claims. As used in this Agreement, the term "Indemnifiable Claim" means any Purchaser Claims or Seller's Claims. Notwithstanding anything to the contrary contained herein:

(a) the Indemnatee will take all commercially reasonable steps to mitigate all losses, damages and the like relating to an Indemnifiable Claim, including availing itself, to the extent the same are commercially reasonable, of any defenses, limitations, rights of contribution, claims against third Persons and other rights at law or equity, and will provide such evidence and documentation of the nature and extent of the Indemnifiable Claim as may be reasonably requested by the Indemnitor. The Indemnatee's reasonable steps include the reasonable expenditure of money to mitigate or otherwise reduce or eliminate any loss or expense for which indemnification would otherwise be due under this Article 9, and the Indemnitor will reimburse the Indemnatee for the Indemnatee's reasonable expenditures in undertaking the mitigation, together with interest thereon from the date of payment to the date of repayment at the "prime rate" in effect during such period as published in The Wall Street Journal;

(b) any Indemnifiable Claim shall be limited to the amount of actual out-of-pocket damages sustained by the Indemnatee by reason of such breach or nonperformance, net of insurance recoveries; provided, that, subject to the limitations set forth in Sections 9.2(b) and 9.7(c), a Seller Claim for a breach of this Agreement by Purchaser that results in a termination of this Agreement or other failure to consummate the Transactions may include any excess of the Initial Purchase Price over the (i) consideration to be received by Seller from the sale of the Purchased Shares to a third Person in any subsequent

transaction, or (ii) fair market value of the Purchased Shares if they are not subsequently sold; and

(c) if the Closing occurs, no Party shall have any liability or obligation to indemnify under Section 9.2(a)(ii) or Section 9.3(a)(ii), as the case may be, unless the aggregate amount for which such Party would be liable thereunder, but for this provision, exceeds one million Dollars (\$1,000,000), and recovery shall be limited only to such amounts as exceed one million Dollars (\$1,000,000). For purposes of the foregoing, individual claims of one hundred thousand Dollars (\$100,000) or less shall not be aggregated for purposes of calculating such deductible threshold amount or for calculating damages in excess of such amount. Nothing in this Section 9.7(c) is intended to modify or limit a Party's liability or obligation hereunder for other Indemnifiable Claims. Notwithstanding the foregoing, the limits in this Section 9.7(c) shall not apply to any claims relating to breach of Section 4.5 or Section 6.6.

SECTION 9.8 Adjustment to Purchase Price. Any and all payments required to be made under this Article 9 and Section 7.5 will be treated as an adjustment to the Purchase Price.

SECTION 9.9 Specific Performance.

(a) Seller acknowledges that the Transactions are unique and that Purchaser will be irreparably injured should such Transactions not be consummated in a timely fashion. Consequently, Purchaser will not have an adequate remedy at law if Seller shall fail to sell the Purchased Shares when required to do so hereunder. In such event, Purchaser shall have the right, in addition to any other remedy available in equity or law, to specific performance of such obligation by Seller, subject to Purchaser's performance of its obligations hereunder.

(b) Purchaser acknowledges that the Transactions are unique and that Seller will be irreparably injured should such Transactions not be consummated in a timely fashion. Consequently, Seller will not have an adequate remedy at law if Purchaser shall fail to purchase the Purchased Shares when required to do so hereunder. In such event, Seller shall have the right, in addition to any other remedy available in equity or law, to specific performance of such obligation by Purchaser, subject to Seller's performance of its obligations hereunder.

SECTION 9.10 Survival; Time Limitation for Indemnification. The terms and provisions of this Agreement shall survive the Closing. Notwithstanding the foregoing, after Closing, any assertion by Purchaser or any Purchaser Indemnified Party that Seller is liable to Purchaser or any Purchaser Indemnified Party, or any assertion by Seller or any Seller's Indemnified Party that Purchaser is liable to Seller or any Seller's Indemnified Party, for indemnification under the terms of this Agreement or otherwise in connection with the Transactions must be made in writing and must be given to Seller or Purchaser, as the case may be (or not at all) on or prior to the date that is twelve (12) months after the Closing Date, except, in the case of Purchaser, for matters addressed in Sections 5.23 and 7.5(e), which must be made in writing and must be given to Seller (or not at all) on or prior to the date that is ninety (90) days after the date on which the applicable statute of limitations expires with respect to the matters covered thereby.

SECTION 9.11 Release. Except for the Excluded Liabilities and Seller's obligations hereunder including, without limitation, under this Article 9 (including without limitation Seller's obligations under this Article 9 as the result of the breach of any provision of this Agreement), Purchaser on behalf of itself and each of its Affiliates, and on behalf of each of its and their

successors and assigns, hereby waives its right to recover from Seller and its Affiliates and any Person acting on behalf of Seller or any such Affiliates, and forever releases and discharges Seller, any such Affiliates and any such other Person, from any and all Losses (including, without limitation, attorneys' fees and costs), whether direct or indirect, known or unknown, foreseen or unforeseen, that may arise on account of or in any way be connected with any of the Companies or the Plant, including without limitation, (a) all liabilities or obligations under or related to Environmental Laws or relating to any claim in respect of Recognized Environmental Conditions or Hazardous Substances arising under Applicable Laws, including Environmental Laws, and (b) all liabilities that in any way arise out of or are related to or associated with the ownership, possession, use or operation of any of the assets of any of the Companies, including the Plant, before or after the Closing. In this regard, Purchaser, on behalf of itself and each of its Affiliates, and each of its and their successors and assigns, expressly waives any and all rights and benefits that it now has or they now have, or in the future may have, conferred upon it or them by virtue of any statute or common law principle which provides that a general release does not extend to claims which a party does not know or suspect to exist in its favor at the time of executing the release, if knowledge of such claims would have materially affected such party's settlement with the obligor. Purchaser, on behalf of itself and each of its Affiliates, and each of its and their successors and assigns, hereby further acknowledges that it is aware that factual matters now unknown to it or them may have given or may hereafter give rise to claims, losses and liabilities that are presently unknown, unanticipated and unsuspected, that the release contained herein has been negotiated and agreed upon in light of such awareness, and that it nevertheless hereby intends to be bound and to bind each of its Affiliates, and each of its and their successors and assigns, to the release set forth above.

58

ARTICLE 10

PURCHASER'S CONDITIONS TO CLOSING

The obligation of Purchaser to consummate the Transactions shall be subject to fulfillment at or prior to the Closing of the following conditions, except to the extent Purchaser waives such fulfillment in writing:

SECTION 10.1 Compliance with Provisions. Seller shall have performed or complied in all material respects with all covenants and agreements contained in this Agreement on its part required to be performed or complied with at or prior to the Closing.

SECTION 10.2 HSR Act. The waiting period under the HSR Act applicable to the consummation of the sale of the Purchased Shares contemplated hereby shall have expired or been terminated.

SECTION 10.3 No Restraint. There shall be no:

(a) injunction, restraining order or order of any nature issued and outstanding by any Governmental Authority of competent jurisdiction over the Parties which directs that the Transactions shall not be consummated as herein provided;

(b) suit, action or other proceeding by any Governmental Authority of competent jurisdiction over the Parties pending or threatened (pursuant to a written notification), wherein such complainant seeks the restraint or prohibition of the consummation of the Transactions; or

(c) action taken, or law enacted, promulgated or deemed applicable to the Transactions, by any Governmental Authority of competent jurisdiction over the Parties which would render the purchase and sale of the Purchased Shares illegal;

provided, that the Parties will use their commercially reasonable efforts to litigate against, and to obtain the lifting of, any such injunction, restraining or other order, restraint, prohibition, action, suit, law or penalty.

SECTION 10.4 Required Regulatory Approvals and Consents. Without limiting the applicability of Sections 7.1 and 7.4, Purchaser shall have received all of Purchaser's Required Regulatory Approvals and Purchaser's Required Consents and Seller shall have received all of Seller's Required Regulatory Approvals and Seller's Required Consents. In the event that any such Approval requires any modification to this Agreement or the Transactions, imposes any condition to the effectuation of the Transactions, or places any restrictions upon Purchaser's ownership of the Plant, then such modifications, conditions or restrictions shall be subject to Purchaser's approval to the extent that such modifications, conditions and restrictions, if any, are not contemplated by this Agreement and would, individually or in the aggregate, result in a Material Adverse Effect upon

59

Purchaser, its ownership of the Plant or the operation of the Plant after the Closing; provided, however, that Purchaser shall be deemed to have approved of any such modifications, conditions or restrictions to the extent that Purchaser fails to disapprove of same in a written notice to Seller received no later than fifteen (15) Business Days following in the case of a Purchaser's Required Regulatory Approvals the public announcement of the decision of the Governmental Authority imposing such modification, condition or restriction and in the case of a Seller's Required Regulatory Approvals Purchaser's receipt of written notice from Seller of the decision of the Governmental Authority imposing such modification, condition or restriction.

SECTION 10.5 Representations and Warranties. The representations and warranties of Seller set forth in this Agreement that are qualified with respect to materiality (whether by reference to Material Adverse Effect or otherwise) shall be true and correct, and the representations and warranties of Seller set forth in this Agreement that are not so qualified shall be true and correct in all material respects, on and as of the Closing Date, in each case as though made on and as of the Closing Date.

SECTION 10.6 Officer's Certificate. Purchaser shall have received a certificate from Seller, executed on its behalf by an authorized officer, dated the Closing Date, to the effect that the conditions set forth in Sections 10.1 and 10.5 have been satisfied by Seller.

SECTION 10.7 Material Adverse Effect. Except in the case of matters contemplated in Section 7.6 (which section shall, for the avoidance of doubt, control all matters discussed thereby), since the Effective Date, no Material Adverse Effect shall have occurred and be continuing with respect to the Plant or the Companies.

SECTION 10.8 Legal Opinion. Purchaser shall have received an opinion or opinions from Seller's in-house legal counsel dated as of the Closing Date substantially as to the matters set forth in Exhibit 10.8, subject to the conditions and limitations therein and to such other customary conditions and limitations as shall be reasonably acceptable to Purchaser and its legal counsel.

SECTION 10.9 No Termination. Neither Party shall have exercised any termination right such Party is entitled to exercise pursuant to Section 12.1.

SECTION 10.10 Receipt of Other Documents. Purchaser shall have received the following:

(a) A certificate of good standing with respect to Seller, as

of a recent date, issued by the Secretary of State of the State of Maryland;

(b) A copy of Seller's certificates of incorporation certified as of a recent date, by the Secretary of State of the State of Maryland, and a copy of Seller's by-laws certified by the Secretary or an Assistant Secretary of Seller, together with a

60

certificate of the Secretary or an Assistant Secretary of Seller that neither of such documents has been amended on or after the Effective Date;

(c) Copies, certified by the Secretary or an Assistant Secretary of Seller, of resolutions of Seller authorizing the execution and delivery by Seller of this Agreement, and authorizing or ratifying of all of the other agreements and instruments to be executed and delivered by Seller in connection herewith;

(d) A certificate of the Secretary or an Assistant Secretary of Seller identifying the name and title and bearing the signatures of the individuals authorized by Seller to execute and deliver this Agreement and the other agreements and instruments contemplated hereby;

(e) Written resignations or terminations of each of the directors and officers of each of the Companies, effective as of the Closing;

(f) A certificate of good standing with respect to each of the Companies, as of recent date, issued by the Secretary of State of each of their respective states of incorporation/formation and each other state in which the Companies are qualified to do business; and

(g) A listing of the items in Inventory.

SECTION 10.11 Loan Documents. Pursuant to Section 7.18, Seller shall have taken all steps and binding commitment necessary to irrevocably satisfy in full at the Closing the Debt Payoff Amount and any other amounts required to satisfy in full the Loan Documents (including, but not limited to, all fees, penalties, early termination payments, costs, and the like), terminate all of the Loan Documents and secure a release from all of the counterparties thereto, finally and forever releasing the Companies, Seller and their Affiliates under the Loan Documents and releasing all Encumbrances associated with the Loan Documents (such releases to be in form and substance reasonably satisfactory to Seller and Purchaser), including, but not limited to, the Debt Service Reserve Guaranty and the Pledge Agreement.

ARTICLE 11

SELLER'S CONDITIONS TO CLOSING

The obligation of Seller to consummate the Transactions shall be subject to fulfillment at or prior to the Closing of the following conditions, except to the extent Seller waives such fulfillment in writing:

SECTION 11.1 Compliance with Provisions. Purchaser shall have performed or complied in all material respects with all covenants and agreements contained in this Agreement on its part required to be performed or complied with at or prior to the

61

Closing, including but not limited to the payment of the Initial Purchase Price, as adjusted pursuant to Section 3.3, to Seller.

SECTION 11.2 HSR Act. The waiting period under the HSR Act applicable to the consummation of the sale of the Purchased Shares contemplated hereby shall have expired or been terminated.

SECTION 11.3 No Restraint. There shall be no:

(a) injunction, restraining order or order of any nature issued and outstanding by any Governmental Authority of competent jurisdiction over the Parties which directs that the Transactions shall not be consummated as herein provided;

(b) suit, action or other proceeding by any Governmental Authority of competent jurisdiction over the Parties pending or threatened (pursuant to a written notification), wherein such complainant seeks the restraint or prohibition of the consummation of the Transactions; or

(c) action taken, or law enacted, promulgated or deemed applicable to the Transactions, by any Governmental Authority of competent jurisdiction over the Parties which would render the purchase and sale of the Purchased Shares illegal;

provided, that the Parties will use their commercially reasonable efforts to litigate against, and to obtain the lifting of, any such injunction, restraining or other order, restraint, prohibition, action, suit, law or penalty.

SECTION 11.4 Required Regulatory Approvals and Consents. Without limiting the generality of Sections 7.1 and 7.4, Seller shall have received all of Seller's Required Regulatory Approvals and Seller's Required Consents and Purchaser shall have received all of Purchaser's Required Regulatory Approvals and Purchaser's Required Consents. In the event that any such Approval requires any modification to this Agreement or the Transactions, imposes any condition to the effectuation of the Transactions, or places any restrictions upon Seller's conveyance of the Purchased Shares, or the Companies' ownership of the Plant or the operation of the Plant prior to the Closing, then such modifications, conditions or restrictions shall be subject to Seller's approval to the extent that such modifications, conditions and restrictions, if any, are not contemplated by this Agreement and would, individually or in the aggregate, result in a Material Adverse Effect upon Seller, the Companies' ownership of the Plant or the operation of the Plant prior to the Closing; provided, however, that Seller shall be deemed to have approved of any such modifications, conditions or restrictions to the extent that Seller fail to disapprove of same in a written notice to Seller received no later than fifteen (15) Business Days following the public announcement of the decision of the Governmental Authority imposing such modification, condition or restriction.

62

SECTION 11.5 Representations and Warranties. The representations and warranties of Purchaser set forth in this Agreement that are qualified with respect to materiality (whether by reference to Material Adverse Effect or otherwise) shall be true and correct, and the representations and warranties that are not so qualified shall be true and correct in all material respects, on and as of the Closing Date, in each case as though made on and as of the Closing Date.

SECTION 11.6 Officer's Certificate. Seller shall have received a certificate from Purchaser, executed on its behalf by an authorized officer, dated the Closing Date, to the effect that the conditions set forth in Sections 11.1 and 11.5 have been satisfied by Purchaser.

SECTION 11.7 Legal Opinion. Seller shall have received an opinion or opinions from Purchaser's counsel dated the Closing Date substantially as to the

matters set forth in Exhibit 11.7, subject to the conditions and limitations therein and to such other customary conditions and limitations as shall be reasonably acceptable to Seller and its counsel.

SECTION 11.8 No Termination. Neither Party shall have exercised any termination right such Party is entitled to exercise pursuant to Section 12.1.

SECTION 11.9 Loan Documents. Pursuant to Section 7.18, Seller shall have taken all steps and binding commitment necessary to irrevocably satisfy in full at the Closing the Debt Payoff Amount and any other amounts required to satisfy in full the Loan Documents (including, but not limited to, all fees, penalties, early termination payments, costs, and the like), terminate all of the Loan Documents and secure a release from all of the counterparties thereto, finally and forever releasing the Companies, Seller and its Affiliates under the Loan Documents releasing all Encumbrances associated with the Loan Documents (such releases to be in form and substance reasonably satisfactory to Seller and Purchaser), including, but not limited to, the Debt Service Reserve Guaranty and the Pledge Agreement.

SECTION 11.10 Receipt of Other Documents. Seller shall have received the following:

(a) A certificate of good standing with respect to Purchaser, as of a recent date, issued by the appropriate government official of its jurisdiction of formation;

(b) Copies of the limited liability company agreement and certificate of formation of Purchaser certified as of a recent date by the appropriate government official of its jurisdiction of formation, together with a certificate of a duly authorized manager of Purchaser that none of such documents have been amended on or after the Effective Date;

63

(c) Copies, certified by the manager of Purchaser, of resolutions of Purchaser authorizing the execution and delivery by Purchaser of this Agreement, and authorizing or ratifying all of the other agreements and instruments, in each case, to be executed and delivered by Purchaser in connection herewith;

(d) A certificate of the manager of Purchaser identifying the name and title and bearing the signatures of the manager and officers of Purchaser authorized to execute and deliver this Agreement, and the other agreements and instruments contemplated hereby; and

(e) Insurance certificates evidencing compliance with Section 7.7.

ARTICLE 12

TERMINATION

SECTION 12.1 Termination.

(a) This Agreement may be terminated at any time prior to the Closing Date by mutual written consent of the Parties.

(b) This Agreement may be terminated by either Party if the Closing shall not have occurred on or before one hundred (100) days following the Effective Date (the "Termination Date"); provided, however, that the right to terminate this Agreement under this Section 12.1(b) shall not be available to a Party whose failure to fulfill any obligation under this Agreement has been the cause of, or resulted in, the failure of the Closing to occur on or before such date.

(c) This Agreement may be terminated by Purchaser if there has been a violation or breach by Seller of any agreement, covenant, representation or warranty contained in this Agreement which has not been waived by Purchaser and such violation or breach constitutes a Material Adverse Effect and is not cured within thirty (30) days after Seller's receipt of notice from Purchaser concerning such violation or breach.

(d) This Agreement may be terminated by Seller if there has been a violation or breach by Purchaser of any agreement, covenant, representation or warranty contained in this Agreement which has not been waived by Seller and such violation or breach constitutes a Material Adverse Effect and is not cured within thirty (30) days after Purchaser's receipt of notice from Seller concerning such violation or breach.

(e) There has been a material adverse change in the financial condition of Purchaser that constitutes a Material Adverse Effect.

(f) This Agreement may be terminated by either Party in accordance with the provisions of Sections 7.6(b) or 7.6(c).

64

SECTION 12.2 Procedure and Effect of Termination.

(a) If there has been a termination pursuant to Section 12.1, then this Agreement shall be deemed terminated, and all further obligations of the Parties hereunder shall terminate, except that the obligations set forth in Sections 7.8, 8.2, 8.3, and 8.4 and in Article 9, Article 12 and Article 13 shall survive. In the event of such termination of this Agreement, there shall be no liability for damages on the part of a Party to the other Party under and by reason of this Agreement or the Transactions except as set forth in Article 9 and except for fraud or willful misconduct of a Party, the remedies for which shall not be limited by the provisions of this Agreement. The foregoing provisions shall not, however, limit or restrict the availability of specific performance or other injunctive or equitable relief to the extent that specific performance or such other relief would otherwise be available to a Party hereunder.

(b) In the event a Party shall elect to terminate this Agreement pursuant to Section 12.1, such Party shall forthwith provide notice thereof to the other Party whereupon this Agreement shall terminate and the Transactions shall be abandoned. Upon any such termination, all filings, applications and other submissions made pursuant to this Agreement shall, to the extent practicable, be withdrawn from the respective Governmental Authority by the Party having filed or submitted the same.

ARTICLE 13

GENERAL PROVISIONS

SECTION 13.1 Expenses. Whether or not the Transactions are consummated, except as otherwise provided in any other provision of this Agreement, all costs and expenses (including attorneys' and consultants' fees, costs and expenses) incurred in connection with this Agreement and the Transactions shall be paid by the Party incurring such expenses; provided, however, all fees, charges and costs of economists and other experts, if any, jointly retained by the Parties in connection with submissions made to any Governmental Authority and advice in connection therewith respecting approval of the Transactions will be borne by Purchaser.

SECTION 13.2 Entire Document; Modification or Amendment. This Agreement (including the Exhibits and Schedules hereto), and the Confidentiality Agreement contain the entire agreement between the Parties with respect to the Transactions, and supersede all negotiations, representations, warranties,

commitments, offers, contracts and writings (except for the Confidentiality Agreement) prior to the execution date of this Agreement, written or oral. No modification or amendment of any provision of this Agreement shall be effective unless made in writing and duly signed by the Parties referring specifically to this Agreement.

65

SECTION 13.3 Schedules and Exhibits.

(a) The Parties agree and acknowledge that the Schedules in this Agreement may be incomplete or subject to revision prior to the Closing. The Parties will cooperate and work in good faith to complete and update such Schedules in a manner consistent with the provisions of Section 7.2 and the other requirements of this Agreement. For purposes of determining whether Purchaser's conditions set forth in Section 10.5 have been fulfilled, the Schedules shall be deemed to include only the information contained therein on the Effective Date, and shall be deemed to exclude all information contained in any update, supplement or amendment thereto to the extent such information relates to (i) periods prior to the "as of" dates of the Schedules attached to this Agreement on the Effective Date, or (ii) any conditions or matters that do not have a Material Adverse Effect; provided, however, that if Closing shall occur, then all matters disclosed by either Party pursuant to any such update, supplement or amendment at or prior to the Closing shall be deemed to be matters of which the other Party had Knowledge.

(b) All Schedules and Exhibits hereto which are referred to herein are hereby made a part hereof and incorporated herein by such reference. Each Schedule to this Agreement shall be deemed to include and incorporate all disclosures made on the other Schedules to this Agreement. Certain information set forth in the Schedules is included solely for informational purposes, is not an admission of liability with respect to the matters covered by the information, and may not be required to be disclosed pursuant to this Agreement. The specification of any dollar amount in the representations and warranties contained in this Agreement or the inclusion of any specific item in the Schedules is not intended to imply that such amounts (or higher or lower amounts) are or are not material, and no Party shall use the fact of the setting of such amounts or the fact of the inclusion of any such item in the Schedules in any dispute or controversy between the Parties as to whether any obligation, item, or matter not described herein or included in a Schedule is or is not material for purposes of this Agreement.

SECTION 13.4 Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

SECTION 13.5 Severability. Whenever possible, each provision of this Agreement shall be interpreted in such manner as to be valid, binding and enforceable under Applicable Laws, but if any provision of this Agreement is held to be invalid, void (or voidable) or unenforceable under Applicable Laws, such provision shall be ineffective only to the extent held to be invalid, void (or voidable) or unenforceable, without affecting the remainder of such provision or the remaining provisions of this Agreement. Upon such determination that any term or other provision is invalid, illegal, or incapable of being enforced, the Parties shall negotiate in good faith to modify this Agreement so as to effect the original intent of the Parties as closely as possible in an acceptable manner to

66

the end that the Transactions are fulfilled to the extent possible. To the extent permitted by Applicable Laws, the Parties waive any provision of

Applicable Law that renders any provision hereof prohibited or unenforceable in any respect.

SECTION 13.6 Assignability. The rights under this Agreement shall not be assignable or transferable nor the duties delegable by any Party without the prior written consent of the other Parties, which consent may be granted or withheld in such other Party's sole discretion.

SECTION 13.7 Captions. The captions of the various Articles, Sections, Exhibits and Schedules of this Agreement have been inserted only for convenience of reference and do not modify, explain, enlarge or restrict any of the provisions of this Agreement.

SECTION 13.8 Governing Law and Forum. This Agreement and the rights and obligations of the parties hereunder and the Transactions shall be governed by, and construed in accordance with, the law of the State of New York without respect to its conflict of laws provisions. THE PARTIES HERETO AGREE THAT VENUE IN ANY AND ALL ACTIONS AND PROCEEDINGS RELATED TO THE SUBJECT MATTER OF THIS AGREEMENT SHALL BE IN THE STATE AND FEDERAL COURTS IN NEW YORK, NEW YORK, WHICH COURTS SHALL HAVE EXCLUSIVE JURISDICTION FOR SUCH PURPOSE, AND THE PARTIES HERETO IRREVOCABLY SUBMIT TO THE EXCLUSIVE JURISDICTION OF SUCH COURTS AND IRREVOCABLY WAIVE THE DEFENSE OF AN INCONVENIENT FORUM TO THE MAINTENANCE OF ANY SUCH ACTION OR PROCEEDING. SERVICE OF PROCESS MAY BE MADE IN ANY MANNER RECOGNIZED BY SUCH COURTS. EACH OF THE PARTIES HERETO IRREVOCABLY WAIVES ITS RIGHT TO A JURY TRIAL WITH RESPECT TO ANY ACTION OR CLAIM ARISING OUT OF ANY DISPUTE IN CONNECTION WITH THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.

SECTION 13.9 Notices. All notices, requests, demands and other communications under this Agreement must be in writing and must be delivered in person or sent by certified mail, postage prepaid, by overnight delivery, or by telefacsimile and properly addressed as follows:

Any Party may from time to time change its address for the purpose of notices to that Party by a similar notice specifying a new address, but no such change is effective until it is actually received by the Party sought to be charged with its contents. Notices which are addressed as provided in this Section 13.9 given by overnight delivery or mail shall be effective (a) upon delivery, if delivered personally or by overnight delivery, (b) five (5) days following deposit in the United States mail, postage prepaid, if delivered by mail, or (c) at such time as delivery is refused by the addressee upon presentation. Notices which are addressed as provided in this Section 13.9 given by telefacsimile shall be effective upon actual receipt if received during the recipient's normal business hours, or at the beginning of the recipient's next business day after receipt if not received during the recipient's normal business hours. All notices by telefacsimile shall be confirmed promptly by the sender after transmission in writing by certified mail or overnight delivery.

SECTION 13.10 No Third Party Beneficiaries. Nothing in this Agreement, whether express or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any Persons other than the Parties and their respective permitted successors and assigns, nor is anything in this Agreement intended to relieve or discharge the obligation or liability of any third Persons to any Party, nor give any third Persons any right of subrogation or action against any Party.

SECTION 13.11 No Relationship. Nothing in this Agreement creates or is intended to create an association, trust, partnership, joint venture or any other entity or similar legal relationship between the Parties, or impose a trust, partnership or fiduciary duty, obligation, or liability on or with respect to either Party. Neither Party is or shall act as or be the agent or representative of the other Party.

SECTION 13.12 Construction of Agreement. This Agreement and any documents or instruments delivered pursuant hereto shall be construed without regard to the identity of the Person who drafted the various provisions of the same. Each and every provision of this Agreement and such other documents and instruments shall be construed as though the Parties participated equally in the drafting of the same. Consequently, the Parties acknowledge and agree that any

rule of construction that a document is to be construed against the drafting party shall not be applicable either to this Agreement or such other documents and instruments.

SECTION 13.13 Closing Over Breaches or Unsatisfied Conditions. If either Party elects to proceed with the Closing with Knowledge by such Party (evidenced in writing) of any failure of any condition to be satisfied in its favor or the breach of any

69

representation, warranty or covenant by the other Party, then the condition that is unsatisfied or the representation, warranty or covenant which is breached at the Closing Date will be deemed waived by such Party, and such Party shall be deemed to fully release and forever discharge the other Party on account of any and all claims, demands or charges, known or unknown, with respect to the same.

SECTION 13.14 Waiver of Compliance. Except as provided in Section 13.13, to the extent permitted by Applicable Laws, any failure of any of the Parties to comply with any obligation, covenant, agreement or condition set forth herein may be waived by the Party entitled to the benefit thereof only by a written instrument signed by such Party, but any such waiver shall not operate as a waiver of, or estoppel with respect to, any prior or subsequent failure to comply therewith. The failure of a Party to this Agreement to assert any of its rights under this Agreement or otherwise shall not constitute a waiver of such rights.

SECTION 13.15 Consents Not Unreasonably Withheld. Wherever the consent or approval of any Party is required under this Agreement, such consent or approval shall not be unreasonably withheld, delayed or conditioned unless such consent or approval is to be given by such Party at the sole or absolute discretion of such Party or is otherwise similarly qualified.

SECTION 13.16 Survival.

(a) The representations and warranties given or made by any Party in Articles 4, 5 or 6 hereof or in any certificate or other writing furnished in connection herewith shall survive the Closing for a period of twelve (12) months after the Closing Date and shall thereafter terminate and be of no further force or effect; provided, however, that:

(i) all representations and warranties relating to Taxes and Tax Returns shall survive the Closing (including for purposes of Section 7.5) for ninety (90) days after the date on which the applicable statutes of limitation (plus any extensions or waivers thereof) expires with respect to the matter covered thereby; and

(ii) any representation or warranty as to which a claim (including a contingent claim) shall have been asserted during the survival period shall continue in effect with respect to such claim until such claim shall have been finally resolved or settled.

Subject to Sections 6.9, 6.10, 6.13 and 13.13, each Party shall be entitled to rely upon the representations and warranties of the other Party set forth herein, notwithstanding any investigation or audit conducted before or after the Closing Date or the decision of any Party to complete the Closing.

70

(b) The covenants and agreements of the Parties contained in this Agreement, including those set forth in Article 9, shall survive the Closing until performed, unless otherwise specified herein.

SECTION 13.17 Time of Essence. Time is of the essence in the performance by the Parties of their obligations under this Agreement. If any date specified in this Agreement for giving any notice or taking any action is not a Business Day (or if the period during which any notice is required to be given or any action taken expires on a date which is not a Business Day), then the date for giving such notice or taking such action (and the expiration date of such period during which notice is required to be given or action taken) shall be the next day which is a Business Day.

SECTION 13.18 Purchaser's Parent Support. From the date hereof until the effectiveness of the Closing, Purchaser's Parent agrees to provide Purchaser any and all financial support necessary to permit Purchaser to perform its obligations hereunder. After Closing, Purchaser's Parent shall have no obligation or liability under this Agreement.

Exhibit 10.2.2

PURCHASE AGREEMENT

This Asset Purchase Agreement (this "Agreement") is made and entered into on July 15th, 2004, by and between Ormat Industries, Ltd., an Israeli Public corporation ("Seller"), and Ormat Systems Ltd., an Israeli corporation ("Buyer").

- WHEREAS, Seller is engaged, directly and through its subsidiaries, among other things, in the development, manufacturing, construction, operation, management and acquisition of geothermal power plants and power units (the "BUSINESS"); and
- WHEREAS, Buyer is an indirect wholly owned subsidiary of the Seller; and
- WHEREAS, Both parties have resolved that it would be in their best interest to enter into a restructuring process whereby Buyer will purchase and assume from Seller, and Seller will sell and assign to Buyer, certain assets and liabilities related to the Business, pursuant to the terms and subject to the conditions set forth herein.

NOW, THEREFORE, In consideration of the mutual representations, covenants and warranties contained herein, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Seller and Buyer intending to legally bound hereby, mutually agree as follows:

1. DEFINITIONS

- 1.1 Defined Terms. As used herein, the terms below shall have the following meanings:
- 1.2 "Assumed Contracts" shall mean all Contracts relating directly to the Purchased Business, unless included in the Excluded Contracts, to which Seller is a party and to which Buyer shall be a party in lieu of Seller after the Closing Date but as of the Effective Date, as defined below, and shall be assumed, performed and discharged by Buyer in place of Seller after the Closing Date as of the Effective Date, including all receivables derived from such Assumed Contracts.
- 1.3 "Assumed Liabilities" shall mean all direct and/or indirect liabilities and obligations, including contingent liabilities, of Seller in connection with the Purchased Business,

and those under the Assumed Contracts, including, without limitation, (a) to furnish services, and other non-cash benefits to another party after the Closing Date and (b) to pay for goods, services, licenses, royalties and other non-cash benefits that another party will have furnished to it after the Effective Date; and (c) to repay debts, to pay taxes, fines, judgments, all of which Buyer shall be responsible after the Closing Date as of the Effective Date.

- 1.4 "Books and Records" shall mean all records (or true and complete copies thereof), including computerized books and records, owned or used by Seller that are used by Seller for the operation of the Purchased Business and/or that are necessary for the continued operation of the Purchased Business and for the fulfillment of the Assumed Liabilities following the Closing, including engineering information (including written materials and machine-readable text subject to display and printout), including development documentation (i.e. documentation used in conjunction with source code in the development process) (collectively "DOCUMENTATION"), sales and promotional literature, manuals and data, all customer files (including tests data and other inputs and communications between Seller and its customers), all lists of customers, suppliers and vendors, copies of the Assumed Contracts, and any files relating to any action with respect to the Seller, but specifically excluding (i) corporate minute and stock books and financial information other than financial information relating specifically to the Purchased Business and/or Assumed Liabilities, and (ii) the foregoing books and records relating to the Excluded Assets, as defined below.
- 1.5 "Business Day" shall mean a day that is not a Friday or a Saturday or a statutory or civil holiday in the State of Israel.
- 1.6 "Contracts" shall mean any and all contracts, agreements, arrangements, leases, mortgages, bonds, notes and other instruments, commitments, undertakings and obligations, whether or not in writing, including all receivables and payables derived therefrom.
- 1.7 "Effective Date" shall mean July 1st, 2004.
- 1.8 "Assets" shall mean any tangible property, equipment, inventory, receivables, owned, used or held for use by Seller (including equipment, furniture, computers and computer supplies, servers, machinery, office materials and supplies and inventories

-3-

of any kind or nature), for the operation and/or the management of the Purchased Business but other than the Excluded Assets.

- 1.9 "Excluded Assets" shall mean certain assets set forth in SCHEDULE 1.9, which will not be transferred or conveyed to Buyer hereunder, but instead will be retained by Seller following the Closing Date.
- 1.10 "Excluded Business" shall mean the Excluded Assets together with the Excluded Liabilities and the Excluded Contracts, all of which does not form part of the Purchased Business. For the avoidance of any doubt, the Excluded Business shall include all of the Business which is owned and operated by Ormat Technologies Inc., directly or through its subsidiaries..
- 1.11 "Excluded Liabilities" and "Excluded Contracts" shall mean certain liabilities set forth in SCHEDULE 1.11 and certain contracts set forth in SCHEDULE 1.11A, respectively, which will not be transferred or conveyed to, nor assumed by, Buyer hereunder, but instead will be

retained by Seller following the Closing Date.

- 1.12 "Intangibles" shall mean all goodwill associated with the Purchased Business, together with the right to represent to third parties that Buyer is the successor to the Purchased Business.
- 1.13 "Person" shall mean any person or entity, whether an individual, trustee, corporation, general partnership, limited partnership, trust, unincorporated organization, limited liability company, business association, firm, joint venture, governmental agency or authority or otherwise.
- 1.14 "Purchased Business" shall mean all of the Business other than the Excluded Business, but including all of Seller's right, title and interest as of the Effective Date in the Assumed Contracts, the Assets, the Intangibles, the Assumed Liabilities, the Books and Records, Seller Intellectual Property, the accounts receivable and payable, transferred to Buyer upon Closing as of the Effective Date with respect to the Purchased Business and, to the extent transferable, (i) the rights under agreements with employees and consultants of Seller concerning confidentiality, and the assignment of inventions, (ii) all related claims, causes of action and similar rights against any Person arising out of, or related to, such rights and (iii) the solar pond assets and all related technology and knowhow owned by Solmat Systems Ltd., a

-4-

wholly owned subsidiary of the Seller, including contingent liabilities related to these assets.

- 1.15 "Seller Intellectual Property" shall mean any intellectual property owned or licensed by Seller with respect to the Purchased Business, including without limitation, (i) all of Seller's patents, patent applications, trademark applications, registered trademarks, trade names, logos, trade dress, service marks and all applications and registrations therefore, and all goodwill associated therewith, excluding those listed on SCHEDULES 1.15; (ii) all copyright (and author's rights, whether published or unpublished, including rights to prepare, reproduce and distribute copies, compilations and derivative works) used for the operation and management of the Purchased Business, including any such rights in any translation of Seller's documentation or interfaces made by or on behalf of Seller; (iii) trade secret rights, know-how, inventions (whether patentable or not), inventor's notes, drawings and designs and Inventor's lists (all as embodied in the form of written documentation generally used by the engineering group of Seller), proprietary processes or formulae, franchises, licenses, technology, technical data and customer lists, and all documentation relating to any of the foregoing and used for the operation and management of the Purchased Business; (iv) all computer programming code (including source code and object code, algorithms, display screens, layouts, firmware, development tools, files, records and data, all media on which any of the foregoing is recorded, all Web addresses, sites and domain names), and other intellectual property rights owned by Seller in or related to the Purchased Business; (v) all continuations, continuations in part, reissues, divisions, renewals, reexaminations or extensions of any kind with respect to the intellectual property rights described in (i) and (ii); and (iv) all Documentation, databases and data collections and all rights therein related to any of the foregoing; (vi) all the knowhow and other rights in the technology and solar pond assets owned by Solmat Systems Ltd, a wholly owned subsidiary of the Seller. The Seller Intellectual

Property Rights shall not include those rights which are not directly connected to the Purchased Business and those which are listed in SCHEDULES 1.15.

-5-

2. OTHER DEFINED TERMS.

2.1 The following terms shall have the meanings defined for such terms in the Sections set forth below:

Term	Section
-----	-----
Assumed Employees	5.1.1
Business	Recitals
Assignment Period	3.1.3
Closing	4.1
Documentation	1.4
License	3.1.7
Required Services	3.3
Closing and Closing Date	4.1
Unassigned Assets	3.1.4

2.2 For purposes of this Agreement, (a) "including" shall mean "including, but not limited to," "including, without limitation," and other phrases of similar import and (b) "hereof," "herein," and "hereunder," and words of similar import, refer to this Agreement as a whole (including the Exhibits and Schedules to this Agreement) and not to any particular Section hereof.

3. THE TRANSACTION

3.1 PURCHASE AND SALE OF PURCHASED BUSINESS.

3.1.1 Pursuant to the terms and subject to the conditions of this Agreement and Section 3.1.3 below, in exchange for the consideration set forth in Section 3.2 below, at the Closing but as of the Effective Date: (i) Seller shall sell, convey, transfer, assign and deliver to Buyer, and Buyer shall purchase from Seller, the Purchased Business, and (ii) Buyer shall assume all the Assumed Liabilities. Buyer and Seller hereby agree that Buyer shall not have any rights to or obligations under or with respect to the Excluded Assets or the Excluded Liabilities.

-6-

- 3.1.2 It is hereby agreed that the transactions contemplated herein, are executed on a "Going Concern" and "As-Is" basis with respect to the Purchased Business, Assumed Liabilities and the value of the Purchased Business.
- 3.1.3 Notwithstanding anything to the contrary in this Agreement and without any affect on the Effective Date, the parties hereby undertake to cooperate and use their best efforts to assign the Assumed Contracts and the Assumed Liabilities to the Buyer within 12 months from the Closing Date (the "Assignment Period").
- 3.1.4 During the Assignment Period and in the event that the Parties shall mutually determine in good faith that the consents required for the assignment of certain Assumed Contract(s) and/or certain Assumed Liabilities either (i) cannot be obtained, or (ii) may have an adverse affect on the business of the Parties, or (iii) taking into account the nature of such contracts and/or liabilities, their termination dates, their volumes and other relevant facts - it is not practical to engage in their formal assignment, then (a) such Contract(s) and/or Liabilities must not be formally assigned and assumed under Section 3.1.1 above but the provisions of Sections 3.1.5 and 3.1.6 will apply to them (hereinafter "UNASSIGNED ASSETS"); and (b) if Seller obtains such missing consents at any time in the future, Buyer shall assume such Unassigned Assets as if originally included in the assignment under Section 3.1.1, for no additional consideration whatsoever.
- 3.1.5 Any Unassigned Asset will be held in trust by Seller for the benefit of the Buyer solely and absolutely as from the Closing Date until such licenses and consents are obtained for its assignment to the Buyer or until its termination or its expiration, as the case may be, and Seller shall account to Buyer on a quarterly basis, and shall deliver to Buyer immediately upon receipt, any notice or other document concerning or relating to such Unassigned Assets or copy thereof, and Seller will permit Buyer to enforce its rights in respect of such Unassigned Assets in the name of Seller. Seller shall provide Buyer with an irrevocable power of attorney to enable Buyer to take any action it finds fit with respect to the Unassigned Assets.

-7-

- 3.1.6 As of the Effective Date, Buyer shall be solely responsible and liable for any action and/or omission and/or loss and/or expense arising out of or in connection with the Unassigned Assets and shall indemnify Seller, immediately upon Seller's written demand, for any such loss, expense or damage, sustained by Seller after the Effective Date in connection with the Unassigned Assets. Accordingly, all the business results of the Unassigned Assets shall belong as of the Effective Date to the Buyer.
- 3.1.7 Upon Closing Seller shall grant Buyer a worldwide, perpetual, exclusive, royalty free license for the use of the patents and trademarks listed in SCHEDULE 3.1.7(A) and a worldwide, perpetual, non-exclusive, royalty free license for the use of

the trademarks listed in Schedule 3.1.7(b) all in connection with Purchased Business pursuant to a license agreement in the form attached hereto as Schedule 3.1.7(c) (the "License") . Buyer shall be entitled to sublicense the License to its parent, which in turn shall be entitled to further sublicense the License to any of its other subsidiaries at its discretion. Notwithstanding anything to the contrary in this Agreement, the parties hereby undertake to cooperate and use their best efforts to convey and transfer to Buyer all of Seller's Intellectual Property which is connected to the Purchased Business.

3.2 CONSIDERATION.

- 3.2.1 In consideration of the (a) sale, transfer, assignment, conveyance and delivery by Seller to Buyer of the Purchased Business; and (b) the grant of the License; Buyer shall pay Seller the amount of USD11,000,000 (Eleven Millions US dollars) (the "PURCHASE PRICE") payable as provided for in Section 3.2.2 hereunder.
- 3.2.2 Payment of Purchase Price shall be made by (a) assigning to the account of Buyer of (i) all Seller's liabilities to Bank Continental Ltd. as of July 1st, 2004 with effect from that date, at the total amount of approximately USD5,440,000 and (ii) any amount due for retirement compensation which is in excess of the amounts that were provided for; and (b) the balance after the aforesaid assignments will be paid in cash by wire transfer of immediate

-8-

available funds to an account designated by Seller not later than 30 days from the Closing Date.

- 3.2.3 In further consideration of work and products orders from customers which are binding upon such customers and currently processed by the Seller and which are transferred under the terms of this Agreement to Buyer (the "ORDERS"), Buyer shall pay Seller a commission as follows:

- 3.2.3.1 A commission equal to 5% of all revenues derived after the Effective Date from Orders described in SCHEDULE 3.2.3.1;
- 3.2.3.2 A commission equal to 2.5% of all revenues derived after the Effective Date from Orders described in SCHEDULE 3.2.3.2.

Upon the recording of the aforesaid revenues in Buyer's books, Seller shall charge Buyer for the respective commission provided for above, which will be paid by Buyer upon to Seller upon actual receipt of such revenues by Buyer.

- 3.2.4 The Purchase Price assumes that the balance of the working capital items reflected on Seller's financial statements for the period ending June 30th, 2004 equals zero (0). If the balance of such working capital items is higher than, or

lower than zero, the Purchase Price shall be adjusted (the "Purchase Price Adjustment") in such a way that it will be increased if the balance is a positive number and decreased if the balance is a negative number, in each case by an amount equal to the difference between zero (0) and the actual balance of such working capital items. For purposes of this Section 3.2.4, the balance of the working capital items shall be the difference between (x) the value of the inventory plus the accounts receivable that form part of the Purchased Business, and (y) the accounts payable that form part of the Purchased Business, as reflected on the Seller's financial statements for the period ended June 30, 2004. The Parties shall agree on the Purchase Price Adjustment promptly following and on the basis of, the Seller's financial statements for the period ending June 30th, 2004, and any resulting payment by the Buyer, or refund by the Seller, shall be done no later than September 1st, 2004, by wire transfer of immediately

-9-

available funds to an account designated in writing by the party entitled to receive funds.

- 3.3 SERVICE AGREEMENT. Buyer hereby undertakes, following the closing of the transaction, to provide corporate, financial, secretarial and administrative services to the Seller as set forth in SCHEDULE 3.3 attached hereto (the "REQUIRED SERVICES"), for a total cost of USD 10,000 per month plus VAT at the applicable rate.

In addition to the Required Services Buyer hereby undertakes to provide Seller, at Sellers' request, with manpower possessing the engineering knowledge of the OrCrude technology, in consideration for Buyer's cost plus 10%.

Either party may, at its sole discretion, terminate the Required Services or the additional arrangements, or part thereof, at any time by delivering a six months prior written notice to the other party.

4. CLOSING

- 4.1 Closing. The closing of the transactions contemplated herein (the "CLOSING") shall be held on July 15th, 2004 at 10:00 a.m., Israel time, at the offices of M. Seligman & Co., or at such other place and time otherwise agree to by the Parties hereto (the "CLOSING DATE").
- 4.2 Deliveries at Closing. At the Closing the following items shall be delivered by the parties:

4.2.1 BY BUYER. Buyer shall deliver to Seller:

- 4.2.1.1 Board of Directors Resolution. Copies of a validly executed resolution of the Board of Directors of Buyer in the form attached hereto as SCHEDULE 4.2.1.1 approving the execution and delivery by Buyer of this Agreement and the ancillary agreements and the performance of Buyer's obligations hereunder and thereunder;

- 4.2.1.2 A duly executed Service Agreement providing for, inter alia, the matters set forth in Section 3.3 above.
- 4.2.1.3 All such other documents and instruments as Seller may reasonably request or as may be otherwise necessary or

-10-

desirable to evidence and effect assumption by Buyer of the Assumed Liabilities.

4.2.2 BY SELLER. Seller shall deliver to Buyer:

- 4.2.2.1 Board Resolutions. A copy of validly executed Seller's Board of Directors resolutions in the form attached hereto as Schedule 4.2.2.1, approving the execution and delivery of this Agreement and the ancillary agreements by Seller, and the performance of Seller's obligations hereunder and thereunder;
- 4.2.2.2 Consents. Evidence of all the consents of third parties and/or governmental authorities necessary to effect the transfer and assignment to Buyer of the Assumed Contracts;
- 4.2.2.3 The consents, waivers or approvals set forth in SCHEDULE 4.2.2.3, that will have been obtained by Seller with respect to the sale of the Purchased Business or the consummation of the transactions contemplated in this Agreement.
- 4.2.2.4 A duly executed license agreement in the form attached hereto as SCHEDULE 3.1.7(c) with respect to the License.
- 4.2.2.5 A duly executed Lease Agreement in the form attached hereto as SCHEDULE 4.2.2.5.
- 4.2.2.6 A copy of validly executed Solmat Systems Ltd. Board of Directors resolutions in the form attached hereto as SCHEDULE 4.2.2.6, approving and undertaking the sale by Solmat Systems Ltd. to Buyer of certain rights and assets as provided for in Section 1.14 above, and expressly providing that such sale shall be effected by OIL for and on behalf of Solmat Systems Ltd. under and pursuant to this Agreement, for no further consideration from Buyer to Seller or to Solmat Systems Ltd.
- 4.2.2.7 All such other, assignments and other instruments of assignment, transfer or conveyance as Buyer may reasonably request or as may be otherwise necessary to evidence and effect the sale, transfer, assignment, conveyance and delivery of

-11-

the Purchased Business and Assumed Liabilities to Buyer that will enable Buyer actual possession and/or control of the Purchased Business.

- 4.2.3 All acts and deliveries prescribed by this Section 4.2, regarding chronological sequence, will be deemed to occur contemporaneously and simultaneously on the occurrence of the last act or delivery, none of which shall be effective until the last has occurred.

5. CERTAIN COVENANTS

5.1 Employment Matters.

- 5.1.1 Employees. Buyer shall extend an offer to all of Seller's employees to continue and be employed by Buyer effective from the Effective Date and subject to Closing, with compensation, benefits, and responsibilities identical to those under which they were employed by Seller. The Employees who will be employed by Buyer following Closing are collectively referred to herein as the "ASSUMED EMPLOYEES".

- 5.1.2 Obligations. The employment with Seller of all Assumed Employees will be terminated immediately prior to the Closing, in such a way that other than payments actually due by Seller to such Assumed Employees in consideration for their employment until the Effective Date, including but not limited to, salaries, social security, provisions to pension funds, insurance policies, provisions to tax, reimbursements of expenses etc., Buyer shall assume all other liabilities whatsoever with respect to such Assumed Employees in connection with their employment period with Seller prior to the Effective Date and thereafter.

- 5.1.3 No Third Party Beneficiary Rights. Nothing contained in this Agreement shall confer upon any Employee any right with respect to continuance of employment by Buyer or Seller, nor shall anything herein interfere with the right of Buyer or Seller to terminate the employment of any of the Employees at any time, with or without cause, in accordance with the provisions of the respective employment agreement with any such

-12-

employee. No provision of this Agreement shall create any third party beneficiary rights in any Employee, or any beneficiary or dependents thereof, with respect to the compensation, terms and conditions of employment and benefits that may be provided to any Employee by Buyer or under any benefit plan which Buyer may maintain.

5.2 Consents.

As soon as practicable following the date hereof, the Parties shall commence all reasonable actions required hereunder to obtain all

applicable consents, approvals and agreements of, and to give all notices and make all filings with, any third parties and governmental authorities as may be necessary to authorize, approve or permit the consummation of the transactions contemplated hereunder. In addition, Seller undertakes to obtain all the necessary consents and approval by Solmat Systems Ltd. for the execution of the provisions concerning Solmat Systems Ltd.

5.3 Non-Competition

Seller undertakes that as long as it holds more than 50% of all controlling means in Buyer's parent, it shall not compete with Buyer's and/or Buyer's parent company's Business and accordingly shall not engage in any business which is in the same field of the Purchased Business and/or the Business. This undertaking shall be deemed as an undertaking for the benefit of Ormat Technologies, Inc.

6. MISCELLANEOUS

6.1 Assignment. Neither this Agreement nor any of the rights or obligations hereunder may be assigned by Buyer without the prior written consent of Seller or by Seller without the prior written consent of Buyer. Subject to the foregoing, this Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assignees with no other person having any right, benefit or obligation hereunder.

6.2 Notices. Unless otherwise provided herein, any notice, request, instruction or other document to be given hereunder by either party to the other shall be in writing and delivered by telecopy or other facsimile (with acknowledged receipt), delivered personally or mailed by certified or registered mail, postage prepaid (and by airmail if sent internationally), return receipt requested or by internationally recognized courier

-13-

(such as Federal Express or DHL) (such mailed or couriered notice to be effective on the date such receipt is acknowledged or refused), as follows:

If to Seller, addressed to:

Ormat industries Ltd.

Attn.:The CEO

Fax: +9728 9439901

If to Buyer, addressed to:

Ormat Systems Ltd.

Fax: +9728 9439901

Attn: The President

or to such other place and with such other copies as either party may designate as to itself by written notice to the other.

6.3 Choice of Law; Venue. This agreement shall be construed, interpreted and the rights of the parties determined in accordance with the laws of the State of Israel. Each of the parties to this Agreement consents to the exclusive jurisdiction and venue of the competent

courts of Tel-Aviv-Jaffa over all matters arising in connection with this Agreement.

- 6.4 Entire Agreement; Amendments and Waivers. This Agreement, together with all exhibits and schedules hereto between Seller and Buyer, constitute the entire agreement between the parties hereto pertaining to the subject matter hereof, and supersede all prior agreements, understandings, negotiations and discussions, whether oral or written, between the parties hereto with respect to such subject matter. No supplement, modification or waiver of this Agreement shall be binding unless executed in writing by the party to be bound thereby. No waiver of any of the provisions of this Agreement shall be deemed or shall constitute a waiver of any other provision hereof (whether or not similar), nor shall such waiver constitute a continuing waiver unless otherwise expressly provided.
- 6.5 Multiple Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

-14-

- 6.6 Invalidity. In the event that any one or more of the provisions contained in this Agreement or in any other instrument referred to herein shall, for any reason, be held to be invalid, illegal or unenforceable in any respect, then to the maximum extent permitted by law, such provision or provisions shall be judicially reformed consistent with the parties' intentions so as to be valid, legal and enforceable to the maximum extent possible and such invalidity, illegality or unenforceability shall not affect any other provision of this Agreement or any other such instrument.
- 6.7 Titles. The titles, captions or headings of the Sections herein are inserted for convenience of reference only and are not intended to be a part of or to affect the meaning or interpretation of this Agreement.

[Signature Page Follows]

-15-

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed on their respective behalf, by their respective duly authorized officers, in multiple originals, all as of the day and year first above written.

SCHEDULE 1.9

EXCLUDED ASSETS

Shares and Shareholder loans in OPTI Technologies BV, a Dutch company
Shares of and receivable from Ormat Investments Ltd., an Israeli company
Shares of Solmat Systems Ltd., an Israeli company and its payable to its parent
Shares of Bet Shemesh Engines Ltd, an Israeli company
Shares of Bet Shemesh Holdings Ltd, an Israeli company
Shares of Ormat Industries Ltd, an Israeli company
Shares OrTaas Ltd., an Israeli company
Shares of Orbotech Ltd., an Israeli company
Shares of OrAd Hi Tech Systems Ltd., an Israeli company
Shares of Caspit Telecom (1984) Ltd., an Israeli company
Shares of Guardian On Board Ltd., an Israeli company
Shares of Orlake Inc., a Canadian Company
Shares of Ormat Technologies Inc., a Delaware corporation
Shareholders loans to Ormat Technologies Inc.
Capital Note from Ormat Technologies Inc.
All the Intellectual Property related to the upgrading of heavy fuel
Investment in Polaris Fund
Investment in SKF TUC Fund
Investment in Peace Fund
All Land and buildings
All cash and cash equivalent as of June 30, 2004
All short term cash investments
Deferred tax assets and any receivable from any tax authority

-17-

SCHEDULE 1.11

EXCLUDED LIABILITIES AS AT JUNE 30, 2004

LIABILITIES TO BE RETAINED BY ORMAT INDUSTRIES LTD:

Bank payable

Debentures (series no. 9) issued December 21st, 2003 - principle and interest
Convertible Debentures (series no. 7 & 8) issued on May 28th, 2002 and June 5th,
2003, respectively, - principle and interest
Dividend payable
Deferred tax liabilities
Income tax payables

-18-

SCHEDULE 1.11A
EXCLUDED CONTRACTS

Any and all contracts between Seller and any entity listed on schedule 1.9.

1. PROJECT SUMMARY

This Contract is entered into between Southern California Edison Company ("Edison") and Republic Geothermal, Inc., a California Corporation ("Seller"). Seller is willing to construct, own, and operate a Qualifying Facility and sell electric power to Edison and Edison is willing to purchase electric power delivered by Seller to Edison at the Point of Interconnection pursuant to the terms and conditions set forth as follows:

1.1 All Notices shall be sent to Seller at the following address:

Republic Geothermal, Inc.
11823 East Slauson Avenue
Santa Fe Springs, CA 90670
Attn: President

1.2 Seller's Generating Facility:

- a. Nameplate Rating: 46,800 kW.
- b. Location: East Mesa, Imperial County, California
- c. Type (Check One):
 - ☐ Cogeneration Facility
 - ☒ Small Power Production Facility

1.3 Contract Capacity: 24,000 kW

1.3.1 Estimated as-available capacity: 0.

1.4 Expected annual production: 168,192,000 kWh.

1.5 Expected date of Firm Operation: April 1, 1986.

1.6 Contract Term: 30 years.

1.7 Operating Options pursuant to Section 5: (Check One)

☒ Operating Option I. Excess Generator output dedicated to Edison. No electric service or standby service required from Edison.

☐ Operating Option II. Entire Generator output dedicated to Edison with separate electric service required from Edison.

1.8 The Capacity Payment Option selected by Seller pursuant to section 8.1 shall be: (Check One)

☐ Option A -- As-available capacity based upon:

☐ Standard Offer No. 1 Capacity Payment Schedule, or

☐ Forecast of Annual As-Available Capacity Payment Schedule

☒ Option B -- Firm Capacity

☒ Standard Offer No. 2 Capacity Payment

Schedule in effect at time of Contract execution

☐ Standard Offer No. 2 Capacity Payment

Schedule in effect at time of Firm Operation

a. The Contract Capacity Price: \$158 kW-yr. (Firm Capacity)

1.9 The Energy Payment Option selected by Seller pursuant to Section 8.2 shall be: (Check One)

[x] Option 1 -- Forecast of Annual Marginal Cost of Energy in effect, at date of execution of this Contract. (Appendix B)

_____ Option 2 -- Levelized Forecast of Marginal Cost of Energy in effect at date of execution of this Contract. (Appendix C)

For the energy payment refund pursuant to Section 8.5 under Option 2, Edison's Incremental Cost of Capital is 15%.

Seller may change once between Options 1 and 2, provided Seller delivers written notice of such change at least 90 days prior to the date of Firm Operation.

For Option 1 or 2, Seller elects to receive the following percentages in 20% increments, the total of which shall equal 100%:

100 percent of Forecast of Annual Marginal Cost of Energy, and

0 percent of Edison's published avoided cost of energy as updated periodically and accepted by the Commission.

2

GENERAL TERMS AND CONDITIONS

2. DEFINITIONS

When used with initial capitalizations, whether in the singular or in the plural, the following terms shall have the following meanings:

2.1 Adjusted Capacity Price: The \$/kW-yr capacity purchase price based on the Capacity Payment Schedule in effect at the time of Contract execution for the time period beginning on the date of Firm Operation for the first generating unit and ending on the date of termination or reduction of Contract Capacity under Capacity Payment Option B.

2.2 Appendix A: Capacity Payment Schedule -- Forecast of Annual As-Available Capacity

2.3 Appendix B: Energy Payment Schedule -- Forecast of Annual Marginal Cost of Energy

2.4 Appendix C: Energy Payment Schedule -- Levelized Forecast of Marginal Cost of Energy

2.5 Capacity Payment Schedule(s): Published capacity payment schedule(s) as authorized by the Commission and in effect at the time of execution of this Contract for as-available or firm capacity.

2.6. Commission: The Public Utilities Commission of the State of California.

2.7 Contract: This document and Appendices, as amended from time to time.

2.8 Contract Capacity: The electric power producing capability of the Generating Facility which is committed to Edison.

2.9 Contract Capacity Price: The capacity purchase price from the Capacity Payment Schedule approved by the Commission and in effect on the date of execution of this Contract for Capacity Payment Option B.

2.10 Contract Term: Period in years commencing with date of Firm Operation during which Edison shall purchase electric power from Seller.

2.11 Current Capacity Price: The \$/kW-yr capacity price provided in the Capacity Payment Schedule determined by the year of termination or reduction of Contract

3

Capacity and the number of years from such termination or reduction to the expiration of the Contract Term for Capacity Payment Option B.

2.12 Edison: The Southern California Edison Company.

2.13 Edison Electric System Integrity: The state of operation of Edison's electric system in a manner which is deemed to minimize the risk of injury to persons and/or property and enables Edison to provide adequate and reliable electric service to its customers.

2.14 Emergency: A condition or situation which in Edison's sole judgment affects Edison Electric System Integrity.

2.15 Energy: Kilowatthours generated by the Generating Facility which are purchased by Edison at the Point of Interconnection.

2.16 Firm Operation: The date agreed on by the Parties on which each generating unit of the Generating Facility is determined to be a reliable source of generation and on which such unit can be reasonably expected to operate continuously at its Contract Capacity.

2.17 First Period: The period of the Contract Term specified in Section 3.1.

2.18 Forced Outage: Any outage other than a scheduled outage of the Generating Facility that fully or partially curtails its electrical output.

2.19 Generating Facility: All of Seller's generators, together with all protective and other associated equipment and improvements, necessary to produce electrical power at Seller's Facility excluding associated land, land rights, and interests in land.

2.20 Generator: The generator(s) and associated prime mover(s), which are a part of the Generating Facility.

2.21 Interconnection Facilities: The electrical interconnection facilities furnished, at no cost to Edison, by Seller, or by the Interconnecting Utility on the Seller's behalf, which are appurtenant to, and/or incidental to, the Project. The Interconnection Facilities shall include, but are not limited to, transmission lines and/or distribution lines between the Project and transmission lines and/or distribution lines of the Interconnecting Utility, relays, power-circuit breakers, metering devices, telemetering devices, and other control and protective devices specified by the Interconnecting Utility as necessary for operation of the Project in parallel with the Interconnecting Utility's electric system.

4

2.22 Interconnecting Utility: Any utility which takes delivery of

electrical energy generated by the Generating Facility and which transmits such electrical energy to the Point of Interconnection.

2.23 Operate: To provide the engineering, purchasing, repair, supervision, training, inspection, testing, protection, operation, use, management, replacement, retirement, reconstruction, and maintenance of and for the Generating Facility in accordance with applicable California utility standards and good engineering practices.

2.24 Operating Representatives: Individual(s) appointed by each Party for the purpose of securing effective cooperation and interchange of information between the Parties in connection with administration and technical matters related to this Contract.

2.25 Parties: Edison and Seller.

2.26 Party: Edison or Seller.

2.27 Peak Months: Those months which the Edison annual system peak demand could occur. Currently, but subject to change with notice, the peak months for the Edison system are June, July, August, and September.

2.28 Point of Interconnection: The point where the electrical energy generated by the Seller at the Project is delivered to the Edison electric system.

2.29 Project: The Generating Facility and Interconnection Facilities required to permit the Generator to deliver electric energy and make capacity available to Interconnecting Utility.

2.30 Qualifying Facility: Cogeneration or Small Power Production Facility which meets the criteria as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.

2.31 Renewable Resources: Wind parks, small hydroelectric, solar, and geothermal resources which produce electric power.

2.32 Second Period: The period of the Contract Term specified in Section 3.2.

2.33 Seller: The Party identified in Section 1.0.

2.34 Seller's Facility: The premises and equipment of Seller located as specified in Section 1.2.

2.35 Small Power Production Facility: The facilities and equipment which use biomass, waste, or Renewable Resources, including wind, solar, geothermal, and water, to produce electrical energy as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.

2.36 Summer Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the Commission.

2.37 Tariff Schedule No. TOU-8: Edison's time-of-use energy tariff for electric service exceeding 500 kW, as now in effect or as may hereafter be authorized by the Commission.

2.38 Uncontrollable Forces: Any occurrence beyond the control of a Party which causes that Party to be unable to perform its obligations hereunder and which a Party has been unable to overcome by the exercise of due diligence, including but not limited to flood, drought, earthquake, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, action or

inaction of government or other proper authority, which may conflict with the terms of this Contract, or failure, threat of failure or sabotage of facilities which have been maintained in accordance with good engineering and operating practices in California. The failure of the Interconnecting Utility to deliver electrical energy to the Point of Interconnection shall be an Uncontrollable Force only if such failure is beyond the control of the Interconnecting Utility.

2.39 Winter Period: Defined in Edison's Tariff Schedule No. TOC-8 as now in effect or as may hereafter be authorized by the Commission.

3. TERM

This Contract shall be effective upon execution by the Parties and shall remain effective until either Party gives 90 days prior written notice of termination to the other Party, except that such notice of termination shall not be effective to terminate this Contract prior to expiration of the Contract Term specified in Section 1.6.

3.1 The First Period of the Contract Term shall commence upon date of Firm Operation but not later than 5 years from the date of execution of this contract.

- a. If the Contract Term specified in Section 1.6 is 15 years, the first Period of the Contract Term shall be for 5 years.
- b. If the Contract Term specified in Section 1.6 is 20, 25, or 30 years, the First Period of the Contract Term shall be for 10 years.

6

3.2 The Second Period of the Contract Term shall commence upon expiration of the First Period and shall continue for the remainder of the Contract Term.

4. GENERATING FACILITY

4.1 Ownership

The Generating Facility shall be owned by Seller.

4.2 Design

4.2.1 Seller, at no cost to Edison, shall:

- a. Design the Generating Facility.
- b. Acquire all permits and other approvals necessary for the construction, operation, and maintenance of the Generating Facility.
- c. Complete all environmental impact studies necessary for the construction, operation, and maintenance of the Generating Facility.

4.2.2 Edison shall have the right to review the design of the Generating Facility's electrical system and the Seller's Interconnection Facilities. Edison shall have the right to request modifications to the design of the Generating Facility's electrical system and the Seller's Interconnection Facilities. Such modifications shall be required if necessary to maintain Edison Electric System Integrity. If Seller does not agree to such modifications, resolution of the difference between the Parties shall be made pursuant to Section 23.

4.3 Construction

Edison shall have the right to review, consult with, and make recommendations regarding Seller's construction schedule and to monitor the construction and start-up of the Project. Seller shall notify Edison, as far in advance of Firm Operation as reasonably possible, of changes in Seller's Construction Schedule which may affect the date of Firm Operation.

4.4 Operation

4.4.1. Edison shall have the right to monitor operation of the Project and may require changes in Seller's method of operation if such changes are necessary, in Edison's sole judgment, to maintain Edison Electric System Integrity.

7

4.4.2 Seller shall notify, in writing, Edison's Operating Representative at least 14 days prior to the initial delivery of electrical energy from the Project to the Point of Interconnection.

4.4.3 Edison shall have the right to require Seller to curtail or reduce the delivery of electrical energy from the Project to the Edison electric system whenever Edison determines, in its sole judgment, that such curtailment or reduction is necessary to facilitate maintenance of Edison's facilities, or to maintain Edison Electric System Integrity. If Edison requires Seller to curtail or reduce the delivery of electrical energy from the Project to the Edison electric system pursuant to this Section 4.4.3, Seller shall have the right to continue to serve its total electrical requirements. Each Party shall endeavor to correct, within a reasonable period, the condition on its system which necessitates the curtailment or the reduction of delivery of electrical energy from the Project. The duration of the curtailment or the reduction shall be limited to the period of time such a condition exists.

4.4.4 Each Party shall keep the other Party's Operating Representative informed as to the operating schedule of their respective facilities affecting each other's operation hereunder, including any reduction in Contract Capacity availability. In addition, Seller shall provide Edison with reasonable advance notice regarding its scheduled outages including any reduction in Contract Capacity availability. Reasonable advance notice is as follows:

SCHEDULED OUTAGE EXPECTED DURATION -----	ADVANTAGE NOTICE TO EDISON -----
Less than one day	24 Hours
One day or more (except major overhauls)	1 Week
Major overhaul	6 Months

4.4.5 Notification by each Party's Operating Representative of outage date and duration should be directed to the other Party's Operating Representative by telephone.

4.4.6 Seller shall not schedule major overhauls during Peak Months.

8

4.4.7 Seller shall maintain an operating log at Seller's Facility with records of: real and reactive power production; changes in operating status, outages, Protective Apparatus operations; and any unusual conditions found during inspections. Changes in setting shall also be logged for Generators which are "block-loaded" to a specific kW capacity. In addition, Seller shall maintain records applicable to the Generating Facility, including the electrical characteristics of the Generator and settings, adjustments of the Generator control equipment, and well-field information. Information maintained pursuant to this Section 4.4.7 shall, be provided to Edison, within 30 days of Edison's request.

4.4.8 At Edison's request, Seller shall make all reasonable effort to deliver power at an average rate of delivery at least equal to the Contract Capacity during periods of Emergency. In the event that the Seller has previously scheduled an outage coincident with an Emergency, Seller shall make all reasonable efforts to reschedule the outage. The notification periods listed in Section 4.4.4 shall be waived by Edison if Seller reschedules the outage.

4.4.9 Seller shall demonstrate the ability to provide Edison the specified Contract Capacity within 30 days of the date of Firm Operation. Thereafter, at least once per year at Edison's request, Seller shall demonstrate the ability to provide Contract Capacity for a reasonable period of time as required by Edison. Seller's demonstration of Contract Capacity shall be at Seller's expense and conducted at a time and pursuant to procedures mutually agreed upon by the Parties. If Seller fails to demonstrate the ability to provide the Contract Capacity, the Contract Capacity shall be reduced by agreement of the Parties pursuant to Section 8.1.2.5.

4.4.10 Seller warrants that, at the date of first electrical energy deliveries from the Project and during the term of this Contract, the Generating Facility shall meet the requirements established as of the effective date of this Contract by the Federal Energy Regulatory Commission's rules (Title 18, Code of Federal Regulations, Section 292.201 through 292.207) implementing the Public Utility Regulatory Policies Act of 1978 (16 U.S.C.A. 79696 et seq.).

4.4.11 The Seller warrants that the Generating Facility shall, at all times, conform to all applicable laws and regulations. Seller shall obtain and maintain any governmental authorizations and permits for the continued operation of the Generating Facility. If, at any time, Seller does not hold

9

such authorizations and permits, Seller agrees to reimburse Edison for any loss which Edison incurs as a result of the Seller's failure to maintain governmental authorization and permits.

4.4.12 In the event electrical energy from the Project is curtailed or

reduced pursuant to Sections 4.4.3, 16 or 8.4, the Seller, in its sole discretion, may elect to (i) sell said electrical energy to a third party or (ii) deliver said electrical energy to a third party for future delivery to Edison at times and at amounts agreeable to Edison. The Seller shall be responsible for making all such arrangements. The provisions in this Section 4.4.12 shall only apply for the duration of the curtailment or reduction.

- 4.4.13 Seller shall maintain operating communications with the Edison switching center designated by the Edison Operating Representative. The operating communications shall include, but not be limited to, system paralleling or separation, scheduled and unscheduled shutdowns, equipment clearances, levels of operating voltage, reactive power generation, and daily capacity and generation reports.

4.5 Maintenance

- 4.5.1 Seller shall maintain the Generating Facility in accordance with applicable California utility industry standards and good engineering and operating practices. Edison shall have the right to monitor such maintenance of the Generating Facility. Seller shall maintain and deliver a maintenance record of the Generating Facility to Edison's Operating Representatives upon request.
- 4.5.2 Seller shall make a reasonable effort to schedule routine maintenance during Off-Peak Months. Outages for scheduled maintenance shall not exceed a total of 30 peak hours for the Peak Months.
- 4.5.3 The allowance for scheduled maintenance is as follows:
- a. Outage periods for scheduled maintenance shall not exceed 840 hours (35 days) in any 12-month period. This allowance may be used in increments of an hour or longer on a consecutive or nonconsecutive basis.
 - b. Seller may accumulate unused maintenance hours on a year-to-year basis up to a maximum of 1,080 hours (45 days). This accrued time must be used consecutively and only for major overhauls.

4.6 Any review by Edison of the design, construction, operation, or maintenance of the Project is solely for the information of Edison. By making such review, Edison makes no representation as to the economic and technical feasibility, operational capability, or reliability of the Project. Seller shall in no way represent to any third party that any such review by Edison of the Project, including, but not limited to, any review of the design, construction, operation, or maintenance of the Project by Edison, is a representation by Edison as to the economic and technical feasibility, operational capability, or reliability of said facilities. Seller is solely responsible for economic and technical feasibility, operational capability, and reliability thereof.

4.7 Edison shall have access to the Seller's geothermal field and power-generating facilities for the purpose of gathering technical information and records. The technical information and records shall include, but not be limited to, drilling data, well-testing data,

well-production data and design, power plant performance data and design, environmental data, brine handling design, and operation and maintenance data. Edison agrees not to interfere with Seller's rules and operating regulations.

5. OPERATING OPTIONS

5.1 Seller shall elect in Section 1.7 to Operate its Generating Facility pursuant to one of the following options:

a. Operating Option I: Seller dedicates the excess Generator output to Edison with no electrical service or standby service required from Edison.

b. Operating Option II: Seller dedicates the entire Generator output to Edison with electrical service required from Edison.

5.2 After expiration of the First Period of the Contract Term, Seller may change the Operating Option, but not more than once per year upon at least 90 days prior written notice to Edison. A reduction in Contract Capacity as a result of a change in operating options shall be subject to Section 8.1.2.5. Edison shall not be required to remove or reserve capacity of Interconnection Facilities made idle by a change in operating options. Edison may dedicate any such idle Interconnection Facilities at any time to serve other customers or to interconnect with other electric power sources. Edison shall process requests for changes of operating option in the chronological order received.

6. INTERCONNECTION FACILITIES

6.1 Seller shall design, engineer, procure, construct, and test the Interconnection Facilities in accordance with applicable California utility standards and good

11

engineering practices and the rules and regulations of the Interconnecting Utility or shall contract with the Interconnecting Utility or an independent contractor acceptable to Edison to furnish such design, engineering, procurement, construction and testing.

6.2 The design, installation, operation, maintenance, and modifications of the Interconnection Facilities shall be at Seller's expense.

6.3 Seller, at no cost to Edison, shall acquire all permits and approvals and complete all environmental impact studies necessary for the design, installation, operation, and maintenance of the Interconnection Facilities.

7. METERING

7.1. All meters and equipment used for the measurement of electrical power for determining Edison's payments to Seller pursuant to this Contract shall be provided, owned, and maintained by Edison and/or the Interconnecting Utility at Seller's expense.

7.2 If Seller's Generating Facility is rated at a Capacity of 500 kW or greater, then Edison, at its option, may install at Seller's expense, generation metering and/or telemetering equipment.

7.3 Edison's or the Interconnecting Utility's meters shall be sealed and the seals shall be broken only when the meters are to be inspected, tested, or adjusted by Edison or Interconnecting Utility. Seller shall be given reasonable notice of testing and have the right to have its Operating Representative present on such occasions.

7.4 Edison's or Interconnecting Utility's meters installed pursuant to this Contract shall be tested by Edison or Interconnecting Utility, at Edison's or Interconnecting Utility's expense, at least once each year and at any reasonable time upon request by either Party, at the requesting Party's expense. If Seller makes such request, Seller shall reimburse said expense to Edison or Interconnecting Utility within thirty days after presentation of a bill therefor.

7.5 Metering equipment found to be inaccurate shall be repaired, adjusted, or replaced by Edison or Interconnecting Utility such that the metering accuracy of said equipment shall be within plus or minus two percent. If metering equipment inaccuracy exceeds plus or minus two percent, the correct amount of Energy and capacity delivered during the period of said inaccuracy shall be estimated by Edison and agreed upon by the Parties.

12

8. POWER PURCHASE PROVISIONS

Prior to the date of Firm Operation, Seller shall be paid for Energy only pursuant to Edison's published avoided cost of energy based on Edison's full avoided operating cost as periodically updated and accepted by the Commission. If at any time electrical energy can be delivered to Edison and Seller is contesting the claimed jurisdiction of any entity which has not issued a license or other approval for the Project, Seller, in its sole discretion and risk, may deliver electrical energy to Edison and for any electrical energy purchased by Edison Seller shall receive payment from Edison for (i) Energy pursuant to this Section, and (ii) as-available capacity based on a capacity price from the Standard Offer No. 1 Capacity Payment Schedule as approved by the Commission. Unless and until all required licenses and approvals have been obtained, Seller may discontinue deliveries at any time.

8.1 Capacity Payments

Seller shall sell to Edison and Edison shall purchase from Seller capacity pursuant to the Capacity Payment Option selected by Seller in Section 1.8. The Capacity Payment Schedules will be based on Edison's full avoided operating costs as approved by the Commission throughout the life of this Contract.

8.1.1 Capacity Payment Option A -- As-Available Capacity.

If Seller selects Capacity Payment Option A, Seller shall be paid a Monthly Capacity Payment calculated pursuant to the following formula:

$$\text{Monthly Capacity Payment} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8

D = The appropriate time differentiated capacity price from either the Standard Offer No. 1 Capacity Payment Schedule or Forecast of Annual As-Available Capacity Payment Schedule as specified by Seller in Section 1.8.

13

8.1.1.1 If Seller specifies the Standard Offer No. 1 Capacity Payment Schedule in Section 1.8, then the formula set forth in Section 8.1.1 shall be computed with D equal to the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the Contract Term.

8.1.1.2 If Seller specifies the Forecast of Annual As-Available Capacity Payment Schedule in Section 1.8, the formula set forth in section 8.1.1 shall be computed as follows:

- a. During the First Period of the Contract Term, D shall equal the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule.
- b. During the Second Period of the Contract Term, the formula shall be computed with D equal to the appropriate time differentiated capacity price from Standard Offer No. 1 Capacity Payment Schedule, but not less than the greater of (i) the appropriate time differentiated capacity price from the forecast of Annual As-Available Capacity Payment Schedule for the last year of the First Period, or (ii) the appropriate time differentiated capacity price from the Standard Offer No. 1. Capacity Payment Schedule for the first year of the Second Period.

8.1.2 Capacity Payment Option B--Firm Capacity Purchase

If Seller selects Capacity Payment Option B, Seller shall provide to Edison for the Contract Term the Contract Capacity specified in Section 1.3, or as adjusted pursuant to Section 8.1.2.6, and Seller shall be paid as follows:

8.1.2.1 If Seller meets the performance requirements set forth in Section 8.1.2.2, Seller shall be paid a Monthly Capacity Payment, beginning from the date of Firm Operation equal to the sum of the on-peak, mid-peak, and off-peak Capacity Period Payments. Each capacity period payment is calculated pursuant to the following formula:

Monthly Capacity Period = $A \times B \times C \times D$

Payment

Where A = Contract Capacity Price specified in Section 1.8 based on the Standard Offer No. 2 Capacity Payment Schedule as approved by

the Commission and in effect on the date of the execution of this Agreement.

B = Conversion factors to convert annual capacity prices to monthly payments by time of delivery as specified in Standard Offer No. 2 Capacity Payment Schedule and subject to periodic modifications as approved by the Commission.

C = Contract Capacity specified in Section 1.3.

D = Period Performance Factor, not to exceed 1.0,
calculated as follows:

Period Performance Factor = [Period kWh Purchased by Edison (Limited
by the Level of Contract Capacity)]

[0.8 x Contract Capacity x (Period Hours minus Maintenance Hours
Allowed in Section 4.5.)]

8.1.2.2 Performance Requirements

To receive the Monthly Capacity Payment in Section 8.1.2.1, Seller shall provide the Contract Capacity in each Peak Month for all on-peak hours as such peak hours are defined in Edison's Tariff Schedule No. TOU-8 on file with the Commission, except that Seller is entitled to a 20% allowance for Forced Outages for each Peak Month. Seller shall not be subject to such performance requirements for the remaining hours of the year.

- a. If Seller fails to meet the requirements specified in Section 8.1.2.2, Seller, in Edison's sole discretion, may be placed on probation for a period not to exceed 15 months. If Seller fails to meet the requirements specified in Section 8.1.2.2 during the probationary period, Edison may derate the Contract Capacity to the greater of the capacity actually delivered during the probationary period, or the capacity at which Seller can reasonably meet such requirements. A reduction in Contract Capacity as a result of this Section 8.1.2.2 shall be subject to Section 8.1.2.5.

15

- b. If Seller fails to meet the requirements set forth in this Section 8.1.2.2 due to a forced outage on the Edison system, or a request to reduce or curtail delivery under Section 8.4, Edison shall continue Monthly Capacity Payments pursuant to Capacity Payment Option B. The Contract Capacity curtailed shall be treated the same as scheduled maintenance outages in the calculation of the Monthly Capacity Payment.

8.1.2.3 If Seller is unable to provide Contract Capacity due to Uncontrollable Forces, Edison shall continue Monthly Capacity Payments pursuant to Capacity Payment Option B for 90 days from the occurrence of the Uncontrollable Force. Monthly Capacity Payments payable during a period of interruption or reduction by reason of an Uncontrollable Force shall be treated the same as scheduled maintenance outages.

8.1.2.4 Capacity Bonus Payment

For Capacity Payment Option B, Seller may receive a Capacity Bonus Payment as follows:

- a. Bonus During Peak Months

For a Peak Month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in

Section 8.1.2.2 have been met, and (ii) the on-peak capacity factor exceeds 85%.

b. Bonus During Non-Peak Months

For a non-peak month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 8.1.2.2 have been met, (ii) the on-peak capacity factor for each Peak Month during the year was at least 85%, and (iii) the on-peak capacity factor for the non-peak month exceeds 85%.

c. For any eligible month, the Capacity Bonus Payment shall be calculated as follows:

Capacity Bonus Payment = A x B x C x D

Where A = (1.2 x On-Peak Capacity Factor)-1.02

Where the On-Peak Capacity Factor, not to exceed 1.0, is calculated as follows:

16

(Period kWh Purchased by Edison (Limited by the Level of Contract Capacity))

On-Peak Capacity Factor = [(Contract Capacity) x (Period Hours minus Maintenance Hours Allowed in Section 4.5)]

B = Contract Capacity Price specified in Section 1.8 for Capacity Payment Option B

C = 1/12

D = Contract Capacity specified in Section 1.3

d. When Seller is entitled to receive a Capacity Bonus Payment, the Monthly Capacity Payment shall be the sum of the Monthly Capacity Payment pursuant to Section 8.1.2.1 and the Monthly Capacity Bonus Payment pursuant to this Section 8.1.2.4.

8.1.2.5 Capacity Reduction

a. Seller may reduce the Contract Capacity specified in Section 1.3, provided that Seller gives Edison prior written notice for a period determined by the amount of Contract Capacity reduced as follows:

Amount of Contract
Capacity Reduced

Length of
Notice Required

23,000 kW or under
25,001- 50,000 kW
50,001 - 100,000 kW
over 100,000 kW

12 months
36 months
48 months
60 months

b. Subject to Section 9.3, Seller shall refund to Edison with interest at the current published Federal Reserve Board three months prime

commercial paper rate, an amount equal to the difference between (i) the accumulated Monthly Capacity Payments paid by Edison pursuant to Capacity Payment Option B up to the time the reduction notice is received by Edison, and (ii) the total capacity payments which Edison would have paid if based on the Adjusted Capacity Price.

17

- c. From the date the reduction notice is received to the date of actual capacity reduction, Edison shall make capacity payments based on the Adjusted Capacity Price for the amount of Contract Capacity being reduced.
- d. Seller may reduce Contract Capacity without the notice prescribed in Section 8.1.2.5(a), provided that Seller shall refund to Edison the amount specified in Section 8.1.2.5(b) and an amount equal to: (i) the amount of Contract Capacity being reduced, times (ii) the difference between the Current Capacity Price and the Contract Capacity Price, times (iii) the number of years and fractions thereof (not less than one year) by which the Seller has been deficient in giving the prescribed notice. If the Current Capacity Price is less than the Contract Capacity Price, only payment under Section 8.1.2.5(b) shall, be due to Edison.

8.1.2.6 Adjustment to Contract Capacity

The Parties may agree in writing at any time to adjust the Contract Capacity. Seller may reduce the Contract Capacity pursuant to section 8.1.2.5. Seller may increase the Contract Capacity with Edison's approval and thereafter receive payment for the increased capacity in accordance with the Contract Capacity Price for the Capacity Payment Option selected by Seller for the remaining Contract Term.

8.1.2.7 Excess Capacity

For Capacity Payment Option B, Seller shall be paid for capacity in excess of Contract Capacity based on the as-available capacity price in Standard Offer No. 1 Capacity Payment Schedule, as updated and approved by the Commission.

8.2 Energy Payments -- First Period

During the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for the electrical energy delivered by the Seller and purchased by Edison at the Point of Interconnection pursuant to the Energy Payment Option selected by the Seller in Section 1.9, as follows.

- 8.2.1 Energy Payment Option 1 -- Forecast of Annual Marginal Cost of Energy. If Seller selects Energy Payment Option 1, then during the First Period of

the Contract Term, Seller shall be paid a Monthly Energy Payment for electrical energy delivered by Seller and purchased by Edison at the Point of Interconnection during

each month in the First Period of the Contract Term pursuant to the following formula:

$$\text{Monthly Energy Payment} = [(A \times D) + (B \times D) + (C \times D)] \times E$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of: (i) the appropriate time differentiated energy price from the Forecast of Annual Marginal Cost of Energy, multiplied by the decimal equivalent of the percentage of the forecast specified in Section 1.9, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.9.

E = Energy Loss Adjustment Factor For Remote Generating Sites*

*The Energy Loss Adjustment Factor For Remote Generating Sites shall be 1.0, subject to adjustment by Commission orders and rulings.

8.2.2 Energy Payment Option 2 -- Levelized Forecast of Marginal Cost of Energy. If Seller selects Energy Payment Option 2, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for electrical energy delivered

by Seller and purchased by Edison each month during the First Period of the Contract Term pursuant to the following formula:

$$\text{Monthly Energy Payment} = [(A \times D) + (B \times D) + (C \times D)] \times E$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of: (i) the appropriate time differentiated energy price from the Levelized Forecast of Marginal Cost of Energy, for the First Period of the Contract Term multiplied by the decimal equivalent of the percentage of the levelized forecast specified in

Section 1.9, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.9.

E = Energy Loss Adjustment Factor For Remote Generating Sites*

*The Energy Loss Adjustment Factor For Remote Generating Sites shall be 1.0, subject to adjustment by Commission orders or rulings.

8.2.2.1 Performance Recruitment for Energy Payment Option 2

During the First Period when the annual forecast referred to in Section 8.2.1 is greater than the levelized forecast referred to in Section 8.2.2, Seller shall deliver to Edison at least 70 percent of the average annual kWh delivered to Edison during those previous periods when the levelized forecast referred to in Section 8.2.2 is greater than the annual forecast referred to in section 8.2.1. If Seller does not meet the performance requirements of this Section 8.2.2.1, Seller shall be subject to Section 8.5.

8.3 Energy Payments -- Second Period

During the Second Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for electrical energy delivered by Seller and purchased by Edison at the Point of Interconnection at a rate equal to 100% of Edison's published avoided cost of energy based on Edison's full avoided operating cost as updated periodically and accepted by the Commission, pursuant to the following formula:

20

Monthly Energy Payment = kWh purchased by Edison for each on-peak, mid-peak, and off-peak time period defined in Edison's Tariff Schedule No. TOU-8

- x Edison's published avoided cost of energy by time of delivery for each time period
- x Energy Loss Adjustment Factor for Remote Generating Sites*

*The Energy Loss Adjustment Factor For Remote Generating Sites shall be 1.0, subject to adjustment by Commission orders or ruling.

8.4 Edison shall not be obligated to accept or pay for electrical energy generated by the Generating Facility, and may request Seller whose Generating Facility is one (1) MW or greater to discontinue or reduce delivery of electric energy, for not more than 300 hours annually during off-peak hours when (i) purchases would result in costs greater than those which Edison would incur if it did not purchase electrical energy from Seller but instead utilized an equivalent amount of electrical energy generated from another Edison source, or (ii) the Edison Electric System demand would require that Edison hydro-energy be spilled to reduce generation.

8.5 Energy Payment Refund

If Seller elects Energy Payment Option 2, Seller shall be subject to the following:

- 8.5.1 If Seller fails to perform the Contract obligations for any reason during the first Period of the Contract Term, or fails to meet the performance requirements set forth in Section 8.2.2.1, and at the time of such failure to perform, the net present value of the cumulative Energy payments received by Seller pursuant to Energy Payment Option 2 exceeds the net present value of what Seller would have been paid pursuant to Energy Payment Option 1, Seller shall make an energy payment refund equal to the difference in such net present values in the year in which the refund is due. The present value calculation shall be based upon the rate of Edison's incremental cost of capital specified in Section 1.9.
- 8.5.2 Not Less than 90 days prior to the date Energy is first delivered to the Point of Interconnection, Seller shall provide and maintain a performance bond, surety bond, performance insurance, corporate guarantee, or bank

21

letter of credit, satisfactory to Edison, which shall insure payment to Edison of the Energy Payment Refund at any time during the First Period. Edison may, in its sole discretion, accept another form of security except that in such instance a 1-1/2 percent reduction shall then apply to the levelized forecast referred to in Section 8.2.2 in computing payments for Energy. Edison shall be provided with certificates evidencing Seller's compliance with the security requirements in this Section which shall also include the requirement that Edison be given 90 days prior written notice of the expiration of such security.

- 8.5.3 If Seller fails to provide replacement security not less than 60 days prior to the date of expiration of existing security, the Energy Payment Refund provided in Section 8.5 shall be payable forthwith. Thereafter, payments for Energy shall be 100 percent of the Monthly Energy Payment provided in section 8.2.1.
- 8.5.4 If Edison at any time determines the security to be otherwise inadequate, and so notifies Seller, payments thereafter for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 8.2.1. If within 30 days of the date Edison gives notice of such inadequacies, Seller satisfies Edison's security requirements, Energy Payment Option 2 shall be reinstated. If Seller fails to satisfy Edison's security requirements within the 30-day period, the Energy Payment Refund provided in section 8.5 shall be payable forthwith.

9. PAYMENT AND BILLING PROVISIONS

9.1 For Energy and capacity purchased by Edison:

- 9.1.1 Edison shall mail to Seller no later than thirty days after the end of each monthly billing period (1) a statement showing

the Energy and capacity delivered to Edison during the on-peak, mid-peak, and off-peak periods, as those periods are specified in Edison's Tariff Schedule No. TOU-8 for that monthly billing period, (2) Edison's computation of the amount due Seller, and (3) Edison's check in payment of said amount.

- 9.1.2 If the monthly payment period involves portions of two different published Energy payment schedule periods, the monthly Energy payment shall be prorated on the basis of the percentage of days at each price.

22

- 9.1.3 If the payment period is less than 27 days or greater than 33 days, the capacity payment shall be prorated on the basis of the average days per month per year.

- 9.1.4 If, within thirty days of receipt of the statement, seller does not make a report in writing to Edison of an error, Seller shall be deemed to have waived any error in Edison's statement, computation, and payment, and they shall be considered correct and complete.

- 9.2 Edison shall bill the Seller, on a monthly basis, for the costs Edison has incurred in the transmission of the electrical energy from the Project to the Point of Interconnection pursuant to the provisions of Section 26.

9.3 Payments Due to Contract Capacity Reduction

- 9.3.1 The Parties agree that the refund and payments provided in Section 8.1.2.5 represent a fair compensation for the reasonable losses that would result from such reduction of Contract Capacity.
- 9.3.2 In the event of a reduction in Contract Capacity, the quantity, in kW, by which the Contract Capacity is reduced shall be used to calculate the refunds and payments due Edison in accordance with Section 8.1.2.5, as applicable.
- 9.3.3 Edison shall provide invoices to Seller for all refunds and payments due Edison under this Section 9 which shall be due within 60 days.
- 9.3.4 If Seller does not make payments as required in Section 9.2.3, Edison shall have the right to offset any amounts due it against any present or future payments due Seller and may pursue any other remedies available to Edison as a result of seller's failure to perform.

9.4 Energy Payment Refund

Energy Payment Refund is immediately due and payable upon Seller's failure to perform the contract obligations as specified in Section 8.5.

10. TAXES

- 10.1 Seller shall pay ad valorem taxes and other taxes properly attributable to the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.

- 10.2 Seller shall pay ad valorem taxes and other taxes properly attributed to land, land rights, or interest in land for the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.
- 10.3 Edison shall refer any requests for information regarding the Project from any taxing authority to Seller, and Seller shall not withhold any properly requested information from any requesting taxing authority.

11. TERMINATION

This Contract shall terminate if Firm Operation does not occur within 5 years of the date of contract execution.

12. SALE OF GENERATING FACILITY

- 12.1 If Seller desires to sell the Generating Facility, Seller shall promptly offer to Edison, or any entity designated by Edison in its sole discretion, the right to purchase the Generating Facility. Edison, or any such entity designated by Edison, shall have up to sixty days following the offer to accept Seller's offer or reach agreement with Seller.
- 12.2 If the Parties are unable to reach a satisfactory agreement within sixty days following the offer pursuant to Section 12.1, and the Generating Facility is offered to any third party or parties, Edison, or any such entity designated by Edison, has the right for thirty days following each offer to agree to purchase the Generating Facility under the same terms and conditions, if such terms and conditions are better to Edison than those offered in Section 12.1. Any offers to sell made more than two years after Edison's failure to accept a previous offer to sell under Section 12.1, shall again be subject to the terms of Sections 12.1 and 12.2.

13. ABANDONMENT OF PROJECT

- 13.1 The Generating Facility shall be deemed to be abandoned if Seller discontinues operation of the Generating Facility with the intent that such discontinuation be permanent. Such intent shall be conclusively presumed by either (i) Seller's notice to Edison of such intent, or (ii) Seller's operation of the Generating Facility in such a manner that no Energy is generated therefrom for 200 consecutive days during any period after Firm Operation of the first generating unit, unless otherwise agreed to in writing by the Parties. If the Project is prevented from generating Energy due to an Uncontrollable Force, then such

period shall be extended for the duration of the Uncontrollable Force, not to exceed one year.

- 13.2 If Seller abandons the Generating Facility during the term of this Agreement, Edison, or any entity designated by Edison in its sole discretion, shall have the right to purchase the Generating Facility pursuant to the provisions of Section 12.

14. LIABILITY

- 14.1 Each Party (First Party) releases the other Party (Second Party), its

directors, officers, employees and agents from any loss, damage, claim, cost, charge, or expense of any kind or nature (including any direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorney's fees and other costs of litigation incurred by the First Party, in connection with damage to property of the First Party caused by or arising out of the Second Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of Second Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to Second Party.

- 14.2 Each Party shall indemnify and hold harmless the other Party, its directors, officers, and employees or agents from and against any loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorney's fees and other costs of litigation, incurred by the other Party in connection with the injury to or death of any person or damage to property of a third party arising out of the indemnifying Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use, or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of the indemnifying Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to the indemnifying Party; provided, however, that each Party shall be solely responsible for and shall bear all cost of claims brought by its contractors or its own employees and shall indemnify and hold harmless the other Party for any such costs including costs arising out of any workers compensation law. Seller releases and shall defend and indemnify Edison from any claim, cost, loss, damage, or liability arising from any contrary representation concerning the effect of Edison's review of the design, construction, operation, or maintenance of the Project.

25

- 14.3 The provisions of this Section 14 shall not be construed so as to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.
- 14.4 Neither Party shall be indemnified by the other Party under Section 14.2 for its liability or loss resulting from its sole negligence or willful misconduct.

15. INSURANCE

- 15.1 Until Contract is terminated, Seller shall obtain and maintain in force as hereinafter provided comprehensive general liability insurance, including contractual liability coverage, with a combined single limit of not less than \$1,000,000 each occurrence. The insurance carrier or carriers and form of policy shall be subject to review and approval by Edison.
- 15.2 Prior to the date Seller's generating facility first delivers electrical energy to the Point of Interconnection, Seller shall (i) furnish certificate of insurance to Edison, which certificate shall provide that such insurance shall not be terminated nor expire except on thirty days prior written notice to Edison, (ii) maintain such insurance in effect for so long as Seller's Generating Facility is delivering electrical energy to the Point of Interconnection, and (iii) furnish to Edison an additional insured endorsement with respect to such insurance in substantially the following form: "In

consideration of the premium charged, Southern California Edison Company (Edison) is named as additional insured with respect to all liabilities arising out of Seller's use and ownership of Seller's Generating Facility.

"The inclusion of more than one insured under this policy shall not operate to impair the rights of one insured against another insured and the coverages afforded by this policy will apply as though separate policies had been issued to each insured. The inclusion of more than one insured will not, however, operate to increase the limit of the carrier's liability. Edison will not, by reason of its inclusion under this policy, incur liability to the insurance carrier for payment of premium for this policy.

"Any other insurance carried by Edison which may be applicable shall be deemed excess insurance and Seller's insurance primary for all purposes despite any conflicting provisions in Seller's policy to be contrary."

- 15.3 If Seller fails to comply with the provisions of this Section 15, Seller shall, at its own cost, defend, indemnify, and hold harmless Edison, its directors, officers, employees, agents, assigns, and successors in interest from and against any and

26

all loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense, including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of Edison, to the extent that Edison would have been protected had Seller complied with all of the provisions of this Section 15.

16. UNCONTROLLABLE FORCES

- 16.1 Neither Party shall be considered to be in default in the performance of any of the agreements contained in this Contract, except for obligations to pay money when and to the extent failure of performance shall be caused by an Uncontrollable Force.
- 16.2 If either Party, because of an Uncontrollable Force, is rendered wholly or partly unable to perform its obligations under this Contract, the Party shall be excused from whatever performance is affected by the Uncontrollable Force to the extent so affected provided that:
- (1) The non-performing Party, within two weeks after the occurrence of the Uncontrollable Force, gives the other Party written notice describing the particulars of the occurrence;
 - (2) The suspension of performance is of no greater scope and of no longer duration than is required by the Uncontrollable Force;
 - (3) The non-performing Party uses its best efforts to remedy its inability to perform (this subsection shall not require the settlement of any strike, walkout, lockout or other labor dispute on terms which, in the sole judgment of the party involved in the dispute, are contrary to its interest. It is understood and agreed that the settlement of strikes, walkouts, lockouts or other labor disputes shall be at the sole discretion of the Party having the difficulty);
 - (4) When the non-performing Party is able to resume performance of its obligations under this Contract, that Party shall give the

other Party written notice to that effect; and

- (5) Capacity payments during such periods of Uncontrollable Force on Seller's part shall be governed by Section 8.1.2.3.

27

16.3 In the event that either Party's ability to perform cannot be corrected when the Uncontrollable Force is caused by the actions or inactions of legislative, judicial or regulatory agencies or other proper authority, this Contract may be amended to comply with the legal or regulatory change which caused the nonperformance.

If a loss of Qualifying Facility status occurs due to an Uncontrollable Force and Seller fails to make the changes necessary to maintain its Qualifying Facility status, the Seller shall compensate Edison for any economic detriment incurred by Edison as a result of such failure.

17. NONDEDICATION OF FACILITIES

Neither Party, by this Contract, dedicates any part of its facilities involved in this Project to the public or to the service provided under the Contract, and such service shall cease upon termination of the Contract.

18. PRIORITY OF DOCUMENTS

If there is a conflict between this document and any Appendix, the provisions of this document shall govern. Each Party shall notify the other immediately upon the determination of the existence of any such conflict.

19. NOTICES AND CORRESPONDENCE

All notices and correspondence pertaining to this Contract shall be in writing and shall be sufficient if delivered in person or sent by certified mail, postage prepaid, return receipt requested, to Seller as specified in Section 1.1, or to Edison as follows:

Southern California Edison Company
Post Office Box 800
Rosemead, California 91770
Attention: Secretary

All notices sent pursuant to this Section 19 shall be effective when received, and each Party shall be entitled to specify as its proper address any other address in the United States upon written notice to the other Party.

20. PREVIOUS COMMUNICATIONS

This Contract contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this contract, and merges and supersedes all prior agreements, commitments, representations, and discussions

28

between the Parties. No Party shall be bound to any other obligations, conditions, or representations with respect to the subject matter of this Contract.

21. THIRD PARTY BENEFICIARIES

This Contract is for the sole benefit of the Parties and shall not be

construed as granting any rights to any person or entity other than the Parties or imposing obligations on either Party to any person or entity other than the Parties.

22. NONWAIVER

None of the provisions of the Contract shall be considered waived by either Party except when such waiver is given in writing. The failure of either Edison or Seller to insist in any one or more instances upon strict performance of any of the provisions of the Contract or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue to remain in full force and effect.

23. DISPUTES

23.1 Any dispute arising between the Parties relating to interpretation of the provisions of this Contract or to performance of the Parties hereunder, other than matters which may not be settled without the consent of an involved insurance company, shall be reduced to writing, by the complaining Party, stating the complaint and proposed solution and submitted to the other Party's manager responsible for the administration of this Contract. Such manager's interpretation and decision thereon shall be incorporated into a written document outlining his interpretation and decision and specifying that it is the final decision of such manager. A copy of such document shall be furnished to complaining Party within ten days following the receipt of complaining Party's written complaint.

23.2 The decision of such manager pursuant to Section 23.1 shall be final and conclusive from the date of receipt of such copy by the complaining Party, unless within thirty days complaining Party furnishes a written appeal to such manager. Following receipt of such appeal, a joint hearing shall be held within fifteen days of said appeal, at which time the Parties shall each be afforded an opportunity to present evidence in support of their respective positions. Such joint hearing shall be conducted by one authorized representative of Seller and one authorized representative of Edison and other necessary persons. Pending final decision of a dispute hereunder, the Parties shall proceed diligently with the performance of their obligations under this Contract.

29

23.3 The final decision by the Parties' authorized representatives shall be made within fifteen days after presentation of all evidence affecting the dispute, and shall be reduced to writing. The decision shall be final and conclusive.

23.4 If the authorized representatives cannot reach a final decision within the fifteen-day period set forth in Section 23.3, any remedies which are provided by law may be pursued.

24. SUCCESSORS AND ASSIGNS

Neither Party shall voluntarily assign its rights nor delegate its duties under this Contract, or any part of such rights or duties, without the written consent of the other Party, except in connection with the sale or merger of a substantial portion of its properties. Any such assignment or delegation made without such written consent shall be null and void. Consent for assignment shall not be unreasonably withheld. Such assignment shall include, unless otherwise specified therein, all of Seller's rights to any refunds which might become due under the Contract.

25. EFFECT OF SECTION READINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

26. TRANSMISSION

26.1 Edison shall endeavor to make arrangements with Interconnecting Utilities for the necessary transmission of the electrical energy from the Project to the Point of Interconnection. Seller shall be responsible for all such costs associated with such transmission of electrical energy, including the cost of transmission losses from the Project to the Point of Interconnection as provided for in the transmission arrangements between Edison and the Interconnecting Utilities.

26.2 If Edison is unable to secure firm transmission service or equivalent arrangements from Interconnecting Utilities which are required to transmit the electrical energy from the Project to the Point of Interconnection at terms and conditions satisfactory to Edison in its sole judgment, then Edison shall not be liable to the Seller for any damages arising from Edison's failure to secure said transmission service or arrangements nor will Edison be required to purchase Energy which is not delivered or capacity which is not made available at the Point of Interconnection.

30

26.3 If Edison is able to secure transmission service or equivalent arrangements from Interconnecting Utilities which are required to transmit the electrical energy from the Project to the Point of Interconnection, then Edison shall notify Seller of the costs, terms and conditions of such arrangements and Seller shall have 60 calendar days to accept or reject such service or arrangements. In the event Seller rejects such service or arrangements, then Edison shall not be obligated to seek other service or arrangements, nor will Edison be liable to the Seller for any damages arising from Seller's failure to accept such service or arrangements, nor will Edison be required to purchase Energy which is not delivered or capacity which is not made available at the Point of Interconnection.

21. GOVERNING LAW

This Contract shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

28. CONFIDENTIALITY

28.1 Except as provided herein, the Parties shall hold all information in this Contract and all information related to or received pursuant to this Contract as confidential.

28.2 Neither Party shall disclose any part nor the whole of this Contract to any third party without the express prior written consent of the other Party; such consent shall not be unreasonably withheld.

28.3 From time to time governmental and/or regulatory agencies may request disclosure of the Contract or Contract-related information from either Party or both Parties and if such is the case either Party or both Parties may consent to such disclosure provided, that (i) the requestor(s) be notified by the disclosing Party that the information being released is confidential, and that (ii) the disclosing Party inform the other Party to the extent practicable, 10 days prior to delivery of the information, in writing, as to the nature of the information to be disclosed and to whom disclosed.

29. MULTIPLE ORIGINALS

This Contract is executed in two counterparts, each of which shall be deemed an original.

Exhibit 10.3.2

AMENDMENT NO. 1
TO THE POWER PURCHASE CONTRACT BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY
AND
ORMESA GEOTHERMAL
QFID NO. 3010

This Amendment No. 1 to the Power Purchase Contract (Document No. 2044C) originally entered into between Republic Geothermal, Inc. and Southern California Edison Company ("Contract") is entered into by Ormesa Geothermal, a California general partnership ("Seller"), and Southern California Edison Company, a California corporation ("Edison") (individually "Party," collectively "Parties").

RECITALS

This Amendment No. 1 to the Contract is made with reference to the following facts, among others:

- 2.1 Republic Geothermal, Inc. and Edison executed the Contract as of the 18th day of July, 1984.
- 2.2 Republic Geothermal, Inc. assigned the Contract to Ormat Systems, Inc. on November 6, 1984, to which assignment Edison consented on December 19, 1984.
- 2.3 Ormat Systems, Inc. assigned the Contract to Seller on February 27, 1985, to which assignment Edison consented on July 22, 1985.
- 2.4 On June 17, 1988, Seller provided Edison with a new address for correspondence and the identity of the fiduciary to whom payments are to be mailed.
- 2.5 The Parties mutually desire to adjust the pattern of payments under the Contract in a manner that will give the Seller more certainty about its payment stream, but reduce the overall cost of energy to Edison. To that end, the Parties desire to increase the Contract Capacity from 24,000 kW to 31,500 kW, limit Contract energy deliveries to Edison to 38,000 kilowatthours per hour, and limit the Contract Capacity eligible for Capacity bonus Payment to 27,000 kW.

AGREEMENT

The Parties agree to amend the Contract as follows:

- 3.1 Delete Section 1.1 and replace it with the following:

"1.1 All notices and correspondence, except payments for Energy and capacity, shall be sent to Seller at the following address:

Ormesa Geothermal
P.O. Box 819
El Centro, CA 92244

All payments to Seller for Energy and capacity shall be sent to Seller's fiduciary at the following address:

First Interstate Bank
Corporate Trust Division
707 Wilshire Boulevard, W 10-2

2

Los Angeles, CA 90017
Account: SCE Payment
Account No. 8213132-000"

- 3.2 Delete Section 1.2.a and replace it with the following:

"a. Nameplate Rating: 38,000 kW"

- 3.3 Delete Section 1.3 and replace it with the following:

"1.3 Contract Capacity: 31,500 kW"

- 3.4 Delete Lines 5 and 6, Page 31, Section 8.1.2.4.c and replace it with the following:

"D. 27,000 kW"

3.5 Delete Section 9.1.1 and replace it with the following:

"9.1.1 Not later than thirty (30) days after the end of each monthly billing period, Edison shall mail to Seller: (1) statement showing the Energy and Contract Capacity delivered to Edison during the on-peak, mid-peak, and off-peak periods, as those periods are specified in Edison's Tariff Schedule No. TOU-8 for that monthly billing period; and (2) Edison's computation of the amount due Seller. Within the same thirty (30) days, Edison shall mail to Seller's facility, at the address provided in Section 1.1, Edison's check made payable to Seller, in payment of the amount due Seller."

3.6 Add the following subsection to Section 14:

"14.5 Seller shall indemnify and hold harmless Edison, its directors, officers, and employees or agents from and against any loss, damage, claim, cost, charge or expense (including direct, indirect, or consequential loss, damage, claim, cost, charge or expense), including attorney's fees and other costs of litigation, incurred by Edison and resulting from the mailing of payment to Seller's fiduciary as provided in Section 9.1.1."

3

OTHER CONTRACT TERMS AND CONDITIONS

Except as expressly amended herein, the terms and conditions of the original Contract shall remain in full force and effect.

EFFECTIVE DATE

This Amendment No. 1 shall become effective when it has been duly executed by the Parties.

SIGNATURE CLAUSE

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 1 to the Contract on behalf of the Party for whom they signed. This Agreement No. 1 to the Contract is hereby executed as of this 23rd day of December, 1988.

I. PROJECT SUMMARY

This Contract is entered into between Southern California Edison Company ("Edison") and Ormat Systems Inc., a Massachusetts Corporation

("Seller"). Seller is willing to construct, own, and operate a Qualifying Facility and sell electric power to Edison and Edison is willing to purchase electric power delivered by Seller to Edison at the Point of Interconnection pursuant to the terms and conditions set forth as follows:

1.1 All Notices shall be sent to Seller at the following address:

Ormat Systems Inc.
98 South Street
Hopkinton, MA 01748
Attn: President

1.2 Seller's Generating Facility:

- a. Nameplate Rating: 18,500 kw.
- b. Location: East Mesa, Imperial County, California

c. Type (Check One):

- ☐ Cogeneration Facility
- ☒ Small Power Production Facility

1.3 Contract Capacity: 15,000 kW

1.3.1 Estimated as-available capacity: 0 kW.

1.4 Expected annual production: 120,000,000 kWh.

1.5 Expected Date of Firm Operation: September 1, 1985

1.6 Contract Term: 30 years

1.7 Operating Options pursuant to Section 5: (Check One)

☒ Operating Option I. Excess Generator output dedicated to Edison. No electric service or standby service required from Edison.

☐ Operating Option II. Entire Generator output dedicated to Edison with separate electric service required from Edison.

1.8 The Capacity Payment option selected by Seller pursuant to Section 8.1 shall be: (Check One)

Option A As-available capacity based upon:

Standard Offer No. 1 Capacity Payment Schedule, or

Forecast of Annual As-Available Capacity Payment Schedule

☒ Option B - Firm Capacity

☒ Standard Offer No. 2 Capacity Payment Schedule in effect at time of Contract execution

☐ Standard Offer No. 2 Capacity Payment Schedule in effect at time of Firm Operation

a. The Contract Capacity Price: \$147 kW-yr. (Firm Capacity)

1.9 The Energy Payment Option selected by Seller pursuant to Section 8.2 shall be: (Check One)

☒ Option I - Forecast of Annual Marginal Cost of Energy in effect at date of execution of this Contract. (Appendix B)

Option 2 - Levelized Forecast of Marginal Cost of Energy in effect at date of execution of this Contract. (Appendix C)

2

For the energy payment refund pursuant to Section 8.5 under Option 2, Edison's Incremental Cost of Capital is 15 %.

Seller may change once between Options 1 and 2, provided Seller delivers written notice of such change at least 90 days prior to the date of Firm Operation.

For Option 1 or 2, Seller elects to receive the following percentages in 20% increments, the total of which shall equal 100%:

100 percent of Forecast of Annual Marginal Cost of Energy, and

0 percent of Edison's published avoided cost of energy as updated periodically and accepted by the Commission.

GENERAL TERMS AND CONDITIONS

2. DEFINITIONS

When used with initial capitalizations, whether in the singular or in the plural, the following terms shall have the following meanings:

2.1 Adjusted capacity Price: The \$/kW-yr capacity purchase price based on the Capacity Payment Schedule in effect at the time of Contract execution for the time period beginning on the date of Firm Operation for the first generating unit and ending on the date of termination or reduction of Contract Capacity under Capacity Payment Option B.

2.2 Appendix A: Capacity Payment Schedule - Forecast of Annual As-Available Capacity

3

2.3 Appendix B: Energy Payment Schedule - Forecast of Annual Marginal Cost of Energy

2.4 Appendix C: Energy Payment Schedule - Levelized Forecast of Marginal Cost of Energy

2.5 Capacity Payment Schedule(s): Published capacity payment schedule(s) as authorized by the commission and in effect at the time of execution of this Contract for as-available or firm capacity.

2.6 Commission: The Public Utilities Commission of the State of California.

2.7 Contract: This document and Appendices, as amended from time to time.

2.8 Contract Capacity: The electric power producing capability of the Generating Facility which is committed to Edison.

2.9 Contract Capacity Price: The capacity purchase price from the Capacity Payment Schedule approved by the commission and in effect on the date

of execution of this Contract for Capacity Payment Option B.

2.10 Contract Term: Period in years commencing with date of Firm Operation during which Edison shall purchase electric power from Seller.

2.11 Current Capacity Price: The \$/kw-yr capacity price provided in the Capacity Payment Schedule determined by the year of termination or reduction of Contract Capacity, and the number of years from such termination or reduction to the expiration of the Contract Term for Capacity Payment Option B.

4

2.12 Edison: The Southern California Edison Company.

2.13 Edison Electric System Integrity: The state of operation of Edison's electric system in a manner which is deemed to minimize the risk of injury to persons and/or property and enables Edison to provide adequate and reliable electric service to its customers.

2.14 Emergency: A condition or situation which in Edison's sole judgment affects Edison Electric System Integrity.

2.15 Energy: Kilowatthours generated by the Generating Facility which are purchased by Edison at the Point of Interconnection.

2.16 Firm Operation: The date agreed on by the Parties on which each generating unit of the Generating Facility is determined to be a reliable source of generation and on which such unit can be reasonably expected to operate continuously at its effective rating (expressed in kW).

2.17 First Period: The period of the Contract Term specified in Section 3.1.

2.18 Forced Outage: Any outage other than a scheduled outage of the Generating Facility that fully or partially curtails its electrical output.

2.19 Generating Facility: All of Seller's generators, together with all protective and other associated equipment and improvements, necessary to produce electrical power at Seller's Facility excluding associated land, land rights, and interests in land.

5

2.20 Generator: The generator(s) and associated prime mover(s), which are a part of the Generating Facility.

2.21 Interconnection Facilities: The electrical interconnection facilities furnished, at no cost to Edison, by Seller, or by the Interconnecting Utility on the Seller's behalf, which are appurtenant to, and/or incidental to, the Project. The Interconnection Facilities shall include, but are not limited to, transmission lines and/or distribution lines between the Project and transmission lines and/or distribution lines of the Interconnecting Utility, relays, power-circuit breakers, metering devices, telemetering devices, and other control and protective devices specified by the Interconnecting Utility as necessary for operation of the Project in parallel with the Interconnecting Utility's electric system.

2.22 Interconnecting Utility: The electric utility, or any other utility which takes delivery of electric energy generated by the Generating Facility.

2.23 Operate: To provide the engineering, purchasing, repair, supervision, training, inspection, testing, protection, operation, use, management, replacement, retirement, reconstruction, and maintenance of and for the Generating Facility in accordance with applicable California utility standards and good engineering practices.

2.24 Operating Representatives: Individual(s) appointed by each Party for the purpose of securing effective cooperation and interchange of information between the Parties in connection with administration and technical matters related to this Contract.

2.25 Parties: Edison and Seller.

2.26 Party: Edison or Seller.

6

2.27 Peak Months: Those months which the Edison annual system peak demand could occur. Currently, but subject to change with notice, the peak months for the Edison system are June, July, August, and September.

2.28 Point of Interconnection: The point where the electrical energy generated by the Seller, at the Project, is delivered to the Edison electric system.

2.29 Project: The Generating Facility and Interconnection Facilities required to permit the Generator to deliver electric energy and make capacity available to Interconnecting Utility.

2.30 Qualifying Facility: Cogeneration or Small Power Production Facility which meets the criteria as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.

2.31 Renewable Resources: Wind parks, small hydroelectric, solar, and geothermal resources which produce electric power.

2.32 Second Period: The period of the Contract Term specified in Section 3.2.

2.33 Seller. The Party identified in Section 1.0.

2.34 Seller's Facility: The premises and equipment of Seller located as specified in Section 1.2.

2.35 Small Power Production Facility: The facilities and equipment which use biomass, waste, or Renewable Resources, including wind, solar, geothermal, and

7

water, to produce electrical energy as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.

2.36 Summer Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the Commission.

2.37 Tariff Schedule No. TOU-8: Edison's time-of-use energy tariff for electric service exceeding 500 kW, as now in effect or as may hereafter be authorized by the Commission.

2.38 Uncontrollable Forces: Any occurrence beyond the control of a Party which causes that Party to be unable to perform its obligations hereunder and which a Party has been unable to overcome by the exercise of due diligence, including but not limited to flood, drought, earthquake, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, action or inaction of government or other proper authority, which may conflict with the terms of this Contract, or failure, threat of failure or sabotage of facilities which have been maintained in accordance with good engineering and operating practices in California. The failure of the Interconnecting Utility to deliver electrical energy to the Point of Interconnection shall be an Uncontrollable Force only if such failure is beyond the control of the Interconnecting Utility.

2.39 Winter Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the commission.

8

3. TERM

This Contract shall be effective upon execution by the Parties and shall remain effective until either Party gives 90 days prior written notice of termination to the other Party, except that such notice of termination shall not be effective to terminate this Contract prior to expiration of the Contract Term specified in Section 1.6.

3.1 The First Period of the Contract Term shall commence upon date of Firm Operation but not later than 5 years from the date of execution of this Contract.

a. If the Contract Term specified in Section 1.6 is 15 years, the First Period of the Contract Term shall be for 5 years.

b. If the Contract Term specified in Section 1.6 is 20, 25, or 30 years, the First Period of the Contract term shall be for 10 years.

3.2 The Second Period of the Contract Term shall commence upon expiration of the First Period and shall continue for the remainder of the Contract Term.

4. GENERATING FACILITY

4.1 Ownership

The Generating Facility shall be owned by Seller.

4.2 Design

4.2.1 Seller, at no cost to Edison, shall:

a. Design the Generating Facility.

b. Acquire all permits and other approvals necessary for the construction, operation, and maintenance of the Generating Facility.

9

c. Complete all environmental impact studies necessary for the construction, operation, and maintenance of the Generating Facility.

4.2.2 Edison shall have the right to review the design of the

Generating Facility's electrical system and the Seller's Interconnection Facilities. Edison shall have the right to request modifications to the design of the Generating Facility's electrical system and the Seller's Interconnection Facilities. Such modifications shall be required if necessary to maintain Edison Electric System Integrity. If Seller does not agree to such modifications, resolution of the difference between the Parties shall be made pursuant to Section 23.

4.3 Construction

Edison shall have the right to review, consult with, and make recommendations regarding Seller's construction schedule and to monitor the construction and start-up of the Project. Seller shall notify Edison, as far in advance of Firm Operation as reasonably possible, of changes in Seller's Construction Schedule which may affect the date of Firm Operation.

4.4 Operation

4.4.1 Edison shall have the right to monitor operation of the Project and may require changes in Seller's method of operation if such changes are necessary, in Edison's sole judgment, to maintain Edison Electric System Integrity.

10

4.4.2 Seller shall notify, in writing, Edison's Operating Representative at least 14 days prior to the initial delivery of electrical energy from the Project to the Point of Interconnection.

4.4.3 Edison shall have the right to require Seller to curtail or reduce the delivery of electrical energy from the Project to the Edison electric system whenever Edison determines, in its sole judgement, that such curtailment or reduction is necessary to facilitate maintenance of Edison's facilities, or to maintain Edison Electric System Integrity. If Edison requires Seller to curtail or reduce the delivery of electrical energy from the Project to the Edison electric system pursuant to this Section 4.4.3, Seller shall have the right to continue to serve its total electrical requirements. Each Party shall endeavor to correct, within a reasonable period, the condition on its system which necessitates the curtailment or the reduction of delivery of electrical energy from the Project. The duration of the curtailment or the reduction shall be limited to the period of time such a condition exists.

4.4.4 Each Party shall keep the other Party's Operating Representative informed as to the operating schedule of their respective facilities affecting each other's operation hereunder, including any reduction in Contract Capacity availability. In addition, Seller shall provide Edison with reasonable advance notice regarding its scheduled outages including any reduction in Contract Capacity availability. Reasonable advance notice is as follows:

11

SCHEDULED OUTAGE EXPECTED DURATION	ADVANCE NOTICE TO EDISON
Less than one day	24 Hours
One day or more (except major overhauls)	1 Week
Major overhaul	6 Months

4.4.5 Notification by each Party's Operating Representative of outage date and duration should be directed to the other Party's operating Representative by telephone.

4.4.6 Seller shall not schedule major overhauls during Peak Months.

4.4.7 Seller shall maintain an operating log at Seller's Facility with records of: real and reactive power production; changes in operating status, outages, Protective Apparatus operations; and any unusual conditions found during inspections. Changes in setting shall also be logged for Generators which are "block loaded" to a specific kW capacity. In addition, Seller shall maintain records applicable to the Generating Facility, including the electrical characteristics of the Generator and settings, adjustments of the Generator control equipment, and well-field information. Information maintained pursuant to this Section 4.4.7 shall be provided to Edison, within 30 days of Edison's request.

4.4.8 At Edison's request, Seller shall make all reasonable effort to deliver power at an average rate of delivery at least equal to the Contract Capacity during periods of Emergency. In the event that the Seller has previously scheduled an outage coincident

12

with an Emergency, Seller shall make all reasonable efforts to reschedule the outage. The notification periods listed in Section 4.4.4 shall be waived by Edison if Seller reschedules the outage.

4.4.9 Seller shall demonstrate the ability to provide Edison the specified Contract Capacity within 30 days of the date of Firm Operation. Thereafter, at least once per year at Edison's request, Seller shall demonstrate the ability to provide Contract Capacity for a reasonable period of time as required by Edison. Seller's demonstration of Contract Capacity shall be at Seller's expense and conducted at a time and pursuant to procedures mutually agreed upon by the Parties. If Seller fails to demonstrate the ability to provide the Contract Capacity, the Contract Capacity shall be reduced by agreement of the Parties pursuant to Section 8.1.2.5.

4.4.10 The Seller warrants that the Generating Facility meets the requirements of a Qualifying Facility as of the effective date of this Contract and continuing through the Contract Term.

4.4.11 The Seller warrants that the Generating Facility shall, at all times, conform to all applicable laws and regulations. Seller shall obtain and maintain any governmental authorizations and permits for the continued operation of the Generating Facility. If, at any time, Seller does not hold such authorizations and permits, Seller agrees to reimburse Edison for any loss which Edison incurs as a result of the Seller's failure to maintain governmental authorization and permits.

13

4.4.12 In the event electrical energy from the Project is curtailed or reduced pursuant to Sections 4.4.3, 16 or 8.4, the Seller, in its sole discretion, may elect to (i) sell said electrical energy to a third party or (ii) deliver said electrical energy to a third party for future delivery to Edison at times and at amounts agreeable to Edison. The Seller shall be responsible for making all such arrangements. The provisions in this Section 4.4.12 shall only apply for the duration of the curtailment or reduction.

4.4.13 Seller shall maintain operating communications with the Edison switching center designated by the Edison Operating Representative. The

operating communications shall include, but not be limited to, system paralleling or separation, scheduled and unscheduled shutdowns, equipment clearances, levels of operating voltage or power factors, and daily capacity and generation reports.

4.5 Maintenance

4.5.1 Seller shall maintain the Generating Facility in accordance with applicable California utility industry standards and good engineering and operating practices. Edison shall have the right to monitor such maintenance of the Generating Facility. Seller shall maintain and deliver a maintenance record of the Generating Facility to Edison's Operating Representatives upon request.

4.5.2 Seller shall make a reasonable effort to schedule routine maintenance during Off-Peak Months and expected minimal generation periods for renewable resources. Outages for scheduled maintenance shall not exceed a total of 30 peak hours for the Peak Months.

14

4.5.3 The allowance for scheduled maintenance is as follows:

a. Outage periods for scheduled maintenance shall not exceed 840 hours (35 days) in any 12-month period. This allowance may be used in increments of an hour or longer on a consecutive or nonconsecutive basis.

b. Seller may accumulate unused maintenance hours on a year-to-year basis up to a maximum of 1,080 hours (45 days). This accrued time must be used consecutively and only for major overhauls.

4.6 Any review by Edison of the design, construction, operation, or maintenance of the Project is solely for the information of Edison. By making such review, Edison makes no representation as to the economic and technical feasibility, operational capability, or reliability of the Project. Seller shall in no way represent to any third party that any such review by Edison of the Project, including, but not limited to, any review of the design, construction, operation, or maintenance of the Project by Edison, is a representation by Edison as to the economic and technical feasibility, operational capability, or reliability of said facilities. Seller is solely responsible for economic and technical feasibility, operational capability, and reliability thereof.

4.7 Edison shall have access to the Seller's geothermal field and power-generating facilities for the purpose of gathering technical information and records. The technical information and records shall include, but not be limited to, drilling data, well-testing data, well-production data and design, power plant performance data and design,

15

environmental data, brine handling design, and operation and maintenance data. Edison agrees not to interfere with Seller's rules and operating regulations.

5. OPERATING OPTIONS

5.1 Seller shall elect in Section 1.7 to Operate its Generating Facility pursuant to one of the following options:

a. Operating Option I: Seller dedicates the excess Generator output to Edison with no electrical service or standby service required from Edison.

b. Operating Option II: Seller dedicates the entire Generator output to Edison with electrical service required from Edison.

5.2 After expiration of the First Period of the Contract Term, Seller may change the Operating Option, but not more than once per year upon at least 90 days prior written notice to Edison. A reduction in Contract Capacity as a result of a change in operating options shall be subject to Section 8.1.2.5. Edison shall not be required to remove or reserve capacity of Interconnection Facilities made idle by a change in operating options. Edison may dedicate any such idle Interconnection Facilities at any time to serve other customers or to interconnect with other electric power sources. Edison shall process requests for changes of operating option in the chronological order received.

16

6. INTERCONNECTION FACILITIES

6.1 Seller shall design, engineer, procure, construct, and test the Interconnection Facilities in accordance with applicable California utility standards and good engineering practices and the rules and regulations of the Interconnecting Utility.

6.2 The design, installation, operation, maintenance, and modifications of the Interconnection Facilities shall be at Seller's expense.

6.3 Seller, at no cost to Edison, shall acquire all permits and approvals and complete all environmental impact studies necessary for the design, installation, operation, and maintenance of the Interconnection Facilities.

7. METERING

7.1 All meters and equipment used for the measurement of electrical power for determining Edison's payments to Seller pursuant to this Contract shall be provided, owned, and maintained by Edison and/or the Interconnecting Utility at Seller's expense.

7.2 If Seller's Generating Facility is rated at a Capacity of 500 kW or greater, then Edison, at its option, may install at Seller's expense, generation metering and/or telemetering equipment.

7.3 Edison's or the Interconnecting Utility's meters shall be sealed and the seals shall be broken only when the meters are to be inspected, tested, or adjusted by Edison or Interconnecting Utility. Seller shall be given reasonable notice of testing and have the right to have its Operating Representative present on such occasions.

17

7.4 Edison's or Interconnecting Utility's meters installed pursuant to this Contract shall be tested by Edison or Interconnecting Utility, at Edison's or Interconnecting Utility's expense, at least once each year and at any reasonable time upon request by either Party, at the requesting Party's expense. If Seller makes such request, Seller shall reimburse said expense to Edison or Interconnecting Utility within thirty days after presentation of a bill therefor.

7.5 Metering equipment found to be inaccurate shall be repaired, adjusted, or replaced by Edison or Interconnecting Utility such that the

metering accuracy of said equipment shall be within plus or minus two percent. If metering equipment inaccuracy exceeds plus or minus two percent, the correct amount of Energy and capacity delivered during the period of said inaccuracy shall be estimated by Edison and agreed upon by the Parties.

8. POWER PURCHASE PROVISIONS

Prior to the date of Firm operation, Seller shall be paid for Energy only pursuant to Edison's published avoided cost of energy based on Edison's full avoided operating cost as periodically updated and accepted by the Commission. If at any time electrical energy can be delivered to Edison and Seller is contesting the claimed jurisdiction of any entity which has not issued a license or other approval for the Project, Seller, in its sole discretion and risk, may deliver electrical energy to Edison and for any electrical energy purchased by Edison Seller shall receive payment from Edison for (i) Energy pursuant to this Section, and (ii) as-available capacity based on a capacity price

18

from the Standard Offer No. 1 Capacity Payment Schedule as approved by the Commission. Unless and until all required licenses and approvals have been obtained, Seller may discontinue deliveries at any time.

8.1 Capacity Payments

Seller shall sell to Edison and Edison shall purchase from Seller capacity pursuant to the Capacity Payment option selected by Seller in Section 1.8. The Capacity Payment Schedules will be based on Edison's full avoided operating costs as approved by the Commission throughout the life of this Contract.

8.1.1 Capacity Payment Option A -- As-Available Capacity.

If Seller selects capacity Payment Option A, Seller shall be paid a Monthly Capacity Payment calculated pursuant to the following formula:

$$\text{Monthly Capacity Payment} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The appropriate time differentiated capacity price from either the Standard Offer No. 1 Capacity Payment Schedule or Forecast of Annual As-Available Capacity Payment Schedule as specified by Seller in Section 1.8.

19

8.1.1.1 If Seller specifies the Standard Offer No. 1 Capacity Payment Schedule in Section 1.8, then the formula set forth in Section 8.1.1 shall be computed with D equal to the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the Contract Term.

8.1.1.2 If Seller specifies the Forecast of Annual As-Available

Capacity Payment Schedule in Section 1.8, the formula set forth in Section 8.1.1 shall be computed as follows:

a. During the First Period of the Contract Term, D shall equal the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule.

b. During the Second Period of the Contract Term, the formula shall be computed with D equal to the appropriate time differentiated capacity price from Standard Offer No. 1 Capacity Payment Schedule, but not less than the greater of (i) the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule for the last year of the First Period, or (ii) the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the first year of the Second Period.

8.1.2 Capacity Payment Option B--Firm Capacity Purchase

If Seller selects Capacity Payment Option B, Seller shall provide to Edison for the Contract Term the Contract Capacity specified in Section 1.3, or as adjusted pursuant to Section 8.1.2.6, and Seller shall be paid as follows;

20

8.1.2.1 If Seller meets the performance requirements set forth in Section 8.1.2.2, Seller shall be paid a Monthly Capacity Payment, beginning from the date of Firm Operation equal to the sum of the on-peak, mid-peak, and off-peak Capacity Period Payments. Each capacity period payment is calculated pursuant to the following formula:

$$\text{Monthly Capacity Period} = A \times B \times C \times D$$

Payment

Where A = Contract Capacity Price specified in Section 1.8 based on the Standard Offer No. 2 Capacity Payment Schedule as approved by the Commission and in effect on the date of the execution of this Agreement.

B = Conversion factors to convert annual capacity prices to monthly payments by time of delivery as specified in Standard Offer No. 2 Capacity Payment Schedule and subject to periodic modifications as approved by the Commission.

C = Contract Capacity specified in Section 1.3.

D = Period Performance Factor, not to exceed 1.0, calculated as follows:

Period Performance Factor = [Period kWh Purchased by Edison
(Limited by the Level of Contract Capacity)]

[0.8 x Contract Capacity x (Period Hours minus Maintenance Hours
Allowed in Section 4.5.)]

8.1.2.2 Performance Requirements

To receive the Monthly Capacity Payment in Section 8.1.2.1, Seller shall provide the Contract Capacity in each Peak Month for all on-peak hours as such peak hours are defined in Edison's Tariff Schedule No. TOU-8 on file with the Commission,

21

except that Seller is entitled to a 20% allowance for Forced Outages for each Peak Month. Seller shall not be subject to such performance requirements for the remaining hours of the year.

a. If Seller fails to meet the requirements specified in Section 8.1.2.2, Seller, in Edison's sole discretion, may be placed on probation for a period not to exceed 15 months. If Seller fails to meet the requirements specified in Section 8.1.2.2 during the probationary period, Edison may derate the Contract Capacity to the greater of the capacity actually delivered during the probationary period, or the capacity at which Seller can reasonably meet such requirements. A reduction in Contract Capacity as a result of this Section 8.1.2.2 shall be subject to Section 8.1.2.5.

b. If Seller fails to meet the requirements set forth in this Section 8.1.2.2 due to a Forced Outage on the Edison system, or a request to reduce or curtail delivery under Section 8.4, Edison shall continue Monthly Capacity Payments pursuant to Capacity Payment Option B. The Contract Capacity curtailed shall be treated the same as scheduled maintenance outages in the calculation of the Monthly Capacity Payment.

8.1.2.3 If Seller is unable to provide Contract Capacity due to Uncontrollable Forces, Edison shall continue Monthly Capacity Payments pursuant to Capacity Payment Option B for 90 days from the occurrence of the Uncontrollable Force. Monthly Capacity Payments payable during a period of interruption or reduction by reason of an Uncontrollable Force shall be treated the same as scheduled maintenance outages.

22

8.1.2.4 Capacity Bonus Payment

For Capacity Payment Option B, Seller may receive a Capacity Bonus Payment as follows:

a. Bonus During Peak Months

For a Peak Month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 8.1.2.2 have been met, and (ii) the on-peak capacity factor exceeds 85%.

b. Bonus During Non-Peak Months

For a non-peak month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 8.1.2.2 have been met, (ii) the on-peak capacity factor for each Peak Month during the year was at least 85%, and (iii) the on-peak capacity factor for the non-peak month exceeds 85%.

c. For any eligible month, the Capacity Bonus Payment shall be calculated as follows:

Capacity Bonus Payment = A x B x C x D
Where A = (1.2 x On-Peak Capacity Factor)-1.02

23

Where the On-Peak Capacity Factor, not to exceed 1.0, is

calculated as follows:

[Period kWh Purchased by Edison (Limited by the Level of Contract Capacity)]

On-Peak Capacity Factor = ((Contract Capacity) x (Period Hours minus Maintenance Hours Allowed in Section 4.5))

B = Contract Capacity Price specified in Section 1.8 for Capacity Payment Option B

C = 1/12

D = Contract Capacity specified in section 1.3

d. When Seller is entitled to receive a Capacity Bonus Payment, the Monthly Capacity Payment shall be the sum of the Monthly Capacity Payment pursuant to Section 8.1.2.1 and the Monthly Capacity Bonus Payment pursuant to this Section 8.1.2.4.

8.1.2.5 Capacity Reduction

a. Seller may reduce the Contract Capacity specified in Section 1.3, provided that Seller gives Edison prior written notice for a period determined by the amount of Contract Capacity reduced as follows:

Amount of Contract Capacity Reduced	Length of Notice Required
-----	-----
25,000 kW or under	12 months
25,001 - 50,000 kW	36 months
50,001 - 100,000 kW	48 months
over 100,000 kW	60 months

b. Seller shall refund to Edison with interest at the current published Federal Reserve Board three months prime commercial paper rate, an amount equal to the difference between (i) the accumulated Monthly Capacity Payments paid by Edison pursuant to Capacity Payment Option B up to the time the reduction notice is received by Edison, and (ii) the total capacity payments which Edison would have paid if based on the Adjusted Capacity Price.

c. From the date the reduction notice is received to the date of actual capacity reduction, Edison shall make capacity payments based on the Adjusted Capacity Price for the amount of Contract Capacity being reduced.

d. Seller may reduce Contract Capacity without the notice prescribed in Section 8.1.2.5(a), provided that Seller shall refund to Edison the amount specified in Section 8.1.2.5(b) and an amount equal to: (i) the amount of Contract Capacity being reduced, times (ii) the difference between the Current Capacity Price and the Contract Capacity Price, times (iii) the number of years and fractions thereof (not less than one year) by which the Seller has been deficient in giving the prescribed notice. If the Current Capacity Price is less than the Contract Capacity Price, only payment under Section 8.1.2.5(b) shall be due to Edison.

8.1.2.6 The Parties may agree in writing at any time to adjust the Contract Capacity. Seller may reduce the Contract Capacity pursuant to Section

8.1.2.5. Seller may increase the Contract Capacity with Edison's approval and thereafter receive

25

payment for the increased capacity in accordance with the Contract capacity Price for the Capacity Payment Option selected by Seller for the remaining Contract Term.

8.1.2.7 For Capacity Payment Option B, Seller shall be paid for capacity in excess of Contract Capacity based on the as-available capacity price in Standard Offer No. 1 Capacity Payment Schedule, as updated and approved by the Commission.

8.2 Energy Payments - First Period

During the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for the electrical energy delivered by the Seller and purchased by Edison at the Point of Interconnection pursuant to the Energy Payment Option selected by the Seller in Section 1.9, as follows.

8.2.1 Energy Payment Option 1 -- Forecast of Annual Marginal Cost of Energy.

If Seller selects Energy Payment Option 1, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for electrical energy delivered by Seller and purchased by Edison at the Point of Interconnection during each month in the First Period of the Contract Term pursuant to the following formula:

$$\text{Monthly Energy Payment} = [(A \times D) + (B \times D) + (C \times D)] \times E$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

26

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time differentiated energy price from the Forecast of Annual Marginal Cost of Energy, multiplied by the decimal equivalent of the percentage of the forecast specified in Section 1.9, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.9.

E Energy Loss Adjustment Factor For Remote Generating Sites*

8.2.2 Energy Payment Option 2 -- Levelized Forecast of Marginal Cost of Energy. If Seller selects Energy Payment Option 2, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for electrical energy delivered by Seller and purchased by Edison each month during the First Period of the Contract Term pursuant to the following formula:

$$\text{Monthly Energy Payment} = [(A \times D) + (B \times D) + (C \times D)] \times E$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff schedule No. TOU-8.

* The Energy Loss Adjustment Factor For Remote Generating Sites shall be 1.0, subject to adjustment by Commission orders and rulings.

27

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time differentiated energy price from the Levelized Forecast of Marginal Cost of Energy, for the First Period of the Contract Term multiplied by the decimal equivalent of the percentage of the levelized forecast specified in Section 1.9, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in section 1.9.

E = Energy Loss Adjustment Factor For Remote Generating Sites*

8.2.2.1 Performance Requirement for Energy Payment Option 2

During the First Period when the annual forecast referred to in Section 8.2.1 is greater than the levelized forecast referred to in Section 8.2.2, Seller shall deliver to Edison at least 70 percent of the average annual kWh delivered to Edison during those previous periods when the levelized forecast referred to in Section 8.2.2 is greater than

* The Energy Loss Adjustment Factor For Remote Generating Sites shall be 1.0, subject to adjustment by Commission orders and rulings.

28

the annual forecast referred to in Section 8.2.1. If Seller does not meet the performance requirements of this Section 8.2.2.1, Seller shall be subject to Section 8.5.

8.3 Energy Payment - Second Period

During the Second Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for electrical energy delivered by Seller and purchased by Edison at the Point of Interconnection at a rate equal to 100% of Edison's published avoided cost of energy as updated periodically and accepted by the Commission, pursuant to the following formula:

Monthly Energy Payment = kWh purchased by Edison for each on-peak, mid-peak, and off-peak time period defined in Edison's Tariff Schedule

x Edison's published avoided cost of energy by time of delivery for each time period

x Energy Loss Adjustment Factor for Remote Generating Sites*

8.4 Edison shall not be obligated to accept or pay for electrical energy generated by the Generating Facility, and may request Seller whose Generating Facility is one (1) MW or greater to discontinue or reduce delivery of electric energy, for not more than 300 hours annually during off-peak hours when (i) purchases would result in costs

* The Energy Loss Adjustment Factor For Remote Generating Sites shall be 1.0, subject to adjustment by Commission orders and rulings.

29

greater than those which Edison would incur if it did not purchase electrical energy from Seller but instead utilized an equivalent amount of electrical energy generated from another Edison source, or (ii) the Edison Electric System demand would require that Edison hydro-energy be spilled to reduce generation.

8.5 Energy Payment Refund

If Seller elects Energy Payment Option 2, Seller shall be subject to the following:

8.5.1 If Seller fails to perform the Contract obligations for any reason during the First Period of the Contract Term, or fails to meet the performance requirements set forth in section 8.2.2.1, and at the time of such failure to perform, the net present value of the cumulative Energy payments received by Seller pursuant to Energy Payment Option 2 exceeds the net present value of what Seller would have been paid pursuant to Energy Payment Option 1, Seller shall make an energy payment refund equal to the difference in such net present values in the year in which the refund is due. The present value calculation shall be based upon the rate of Edison's incremental cost of capital specified in Section 1.9.

8.5.2 Not less than 90 days prior to the date Energy is first delivered to the Point of Interconnection, Seller shall provide and maintain a performance bond, surety bond, performance insurance, corporate guarantee, or bank letter of credit, satisfactory to Edison, which shall insure payment to Edison of the Energy Payment Refund at any time during the First Period. Edison may, in its sole discretion, accept another form of

30

security except that in such instance a 1-1/2 percent reduction shall then apply to the levelized forecast referred to in Section 8.2.2 in computing payments for Energy. Edison shall be provided with certificates evidencing Seller's compliance with the security requirements in this Section which shall also include the requirement that Edison be given 90 days prior written notice of the expiration of such security.

8.5.3 If Seller fails to provide replacement security not less than 60 days prior to the date of expiration of existing security, the Energy

Payment Refund provided in Section 8.5 shall be payable forthwith. Thereafter, payments for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 8.2.1.

8.5.4 If Edison at any time determines the security to be otherwise inadequate, and so notifies Seller, payments thereafter for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 8.2.1. If within 30 days of the date Edison gives notice of such inadequacies, Seller satisfies Edison's security requirements, Energy Payment Option 2 shall be reinstated. If Seller fails to satisfy Edison's security requirements within the 30-day period, the Energy Payment Refund provided in Section 8.5 shall be payable forthwith.

9. PAYMENT AND BILLING PROVISIONS

9.1 For Energy and capacity purchased by Edison:

9.1.1 Edison shall mail to Seller no later than thirty days after the end of each monthly billing period (1) a statement showing the Energy and capacity delivered to Edison during the on-peak, mid-peak, and off-peak periods, as those periods are specified

31

in Edison's Tariff Schedule No. TOU-8 for that monthly billing period, (2) Edison's computation of the amount due Seller, and (3) Edison's check in payment of said amount.

9.1.2 If the monthly payment period involves portions of two different published Energy payment schedule periods, the monthly Energy payment shall be prorated on the basis of the percentage of days at each price.

9.1.3 If the payment period is less than 27 days or greater than 33 days, the capacity payment shall be prorated on the basis of the average days per month per year.

9.1.4 If, within thirty days of receipt of the statement, Seller does not make a report in writing to Edison of an error, Seller shall be deemed to have waived any error in Edison's statement, computation, and payment, and they shall be considered correct and complete.

9.2 Edison shall bill the Seller, on a monthly basis, for the costs Edison has incurred in the transmission of the electrical energy from the Project to the Point of Interconnection pursuant to the provisions of Section 26.

9.3 Payments Due to contract Capacity Reduction

9.3.1 The Parties agree that the refund and payments provided in Section 8.1.2.5 represent a fair compensation for the reasonable losses that would result from such reduction of Contract Capacity.

9.3.2 In the event of a reduction in Contract Capacity, the quantity, in kW, by which the Contract Capacity is reduced shall be used to calculate the refunds and payments due Edison in accordance with Section 8.1.2.5, as applicable.

32

9.3.3 Edison shall provide invoices to Seller for all refunds and payments due Edison under this Section 9 which shall be due within 60 days.

9.3.4 If Seller does not make payments as required in Section 9.2.3, Edison shall have the right to offset any amounts due it against any present or future payments due Seller and may pursue any other remedies available to Edison as a result of Seller's failure to perform.

9.4 Energy Payment Refund

Energy Payment Refund is immediately due and payable upon Seller's failure to perform the contract obligations as specified in Section 8.5.

10. TAXES

10.1 Seller shall pay ad valorem taxes and other taxes properly attributable to the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.

10.2 Seller shall pay ad valorem taxes and other taxes properly attributed to land, land rights, or interest in land for the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.

10.3 Seller or Edison shall provide information concerning the Project to any requesting taxing authority.

11. TERMINATION

This Contract shall terminate if Firm Operation does not occur within 5 years of the date of Contract execution.

33

12. SALE OF GENERATING FACILITY

12.1 If Seller desires to sell the Generating Facility, Seller shall promptly offer to Edison, or any entity designated by Edison in its sole discretion, the right to purchase the Generating Facility. Edison, or any such entity designated by Edison, shall have up to sixty days following the offer to accept Seller's offer or reach agreement with Seller.

12.2 If the Parties are unable to reach a satisfactory agreement within sixty days following the offer pursuant to Section 12.1, and the Generating Facility is offered to any third party or parties, Edison, or any such entity designated by Edison, has the right for thirty days following each offer to agree to purchase the Generating Facility under the same terms and conditions, if such terms and conditions are better to Edison than those offered in Section 12.1. Any offers to sell made more than two years after Edison's failure to accept a previous offer to sell under Section 12.1, shall again be subject to the terms of Sections 12.1 and 12.2

12.3 Notwithstanding the foregoing, Seller shall have the right at any time to sell or transfer the Generating Facility to an affiliate of Seller and an affiliate of Seller may sell, transfer, or lease to Seller without giving rise to any right of first refusal of Edison. An "affiliate" of Seller shall mean a Party's parent, a Party's subsidiary, or any company of which a Party's parent is a parent. An "affiliate" of Seller shall also mean a partnership or joint venture from which the Seller leases and operates the Generating

34

Facility. A "parent" shall mean a company which owns directly or indirectly not less than 51% of the shares entitled to vote in an election of directors of another company.

13. ABANDONMENT OF PROJECT

13.1 The Generating Facility shall be deemed to be abandoned if Seller discontinues operation of the Generating Facility with the intent that such discontinuation be permanent. Such intent shall be conclusively presumed by either (i) Seller's notice to Edison of such intent, or (ii) Seller's operation of the Generating Facility in such a manner that no Energy is generated therefrom for 200 consecutive days during any period after Firm Operation of the first generating unit, unless otherwise agreed to in writing by the Parties. If the Project is prevented from generating Energy due to an Uncontrollable Force, then such period shall be extended for the duration of the Uncontrollable Force, not to exceed one year.

13.2 If Seller abandons the Generating Facility during the term of this Agreement, Edison, or any entity designated by Edison in its sole discretion, shall have the right to purchase the Generating Facility pursuant to the provisions of Section 12.

14. LIABILITY

14.1 Each Party (First Party) releases the other Party (Second Party), its directors, officers, employees and agents from any loss, damage, claim, cost, charge, or expense of any kind or nature (including any direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorney's fees and other costs of litigation incurred by the First Party, in connection with damage to property of the First

35

Party caused by or arising out of the Second Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of Second Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to Second Party.

14.2 Each Party shall indemnify and hold harmless the other Party, its directors, officers, and employees or agents from and against any loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorney's fees and other costs of litigation, incurred by the other Party in connection with the injury to or death of any person or damage to property of a third party arising out of the indemnifying Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use, or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of the indemnifying Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to the indemnifying Party; provided, however, that each Party shall be solely responsible for and shall bear all cost of claims brought by its contractors or its own employees and shall indemnify and hold harmless the other Party for any such costs including costs arising out of any workers compensation law. Seller releases and shall defend and indemnify Edison from any claim, cost, loss, damage, or

liability arising from any contrary representation concerning the effect of Edison's review of the design, construction, operation, or maintenance of the Project.

14.3 The provisions of this Section 14 shall not be construed so as to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

14.4 Neither Party shall be indemnified by the other Party under Section 14.2 for its liability or loss resulting from its sole negligence or willful misconduct.

15. INSURANCE

15.1 Until Contract is terminated, Seller shall obtain and maintain in force as hereinafter provided comprehensive general liability insurance, including contractual liability coverage, with a combined single limit of not less than \$1,000,000 each occurrence. The insurance carrier or carriers and form of policy shall be subject to review and approval by Edison.

15.2 Prior to the date Seller's generating facility first delivers electrical energy to the Point of Interconnection, Seller shall (i) furnish certificate of insurance to Edison, which certificate shall provide that such insurance shall not be terminated nor expire except on thirty days prior written notice to Edison, (ii) maintain such insurance in effect for so long as Seller's Generating Facility is delivering electrical energy to the Point of Interconnection, and (iii) furnish to Edison an additional insured endorsement with respect to such insurance in substantially the following form:
"In consideration of the premium charged, Southern California Edison Company (Edison)

is named as additional insured with respect to all Liabilities arising out of Seller's use and ownership of Seller's Generating Facility.

"The inclusion of more than one insured under this policy shall not operate to impair the rights of one insured against another insured and the coverages afforded by this policy will apply as though separate policies had been issued to each insured. The inclusion of more than one insured will not, however, operate to increase the limit of the carrier's liability. Edison will not, by reason of its inclusion under this policy, incur liability to the insurance carrier for payment of premium for this policy.

"Any other insurance carried by Edison which may be applicable shall be deemed excess insurance and Seller's insurance primary for all purposes despite any conflicting provisions in Seller's policy to the contrary."

15.3 If Seller fails to comply with the provisions of this Section 15, Seller shall, at its own cost, defend, indemnify, and hold harmless Edison, its directors, officers, employees, agents, assigns, and successors in interest from and against any and all loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense, including attorney's fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of Edison, to the extent that Edison would have been protected had Seller complied with all of the provisions

16. UNCONTROLLABLE FORCES

16.1 Neither Party shall be considered to be in default in the performance of any of the agreements contained in this Contract, except for obligations to pay money, when and to the extent failure of performance shall be caused by an Uncontrollable Force.

16.2 If either Party, because of an Uncontrollable Force, is rendered wholly or partly unable to perform its obligations under this Contract, the Party shall be excused from whatever performance is affected by the Uncontrollable Force to the extent so affected provided that:

(1) The non-performing Party, within two weeks after the occurrence of the Uncontrollable Force, gives the other Party written notice describing the particulars of the occurrence;

(2) The suspension of performance is of no greater scope and of no longer duration than is required by the Uncontrollable Force;

(3) The non-performing Party uses its best efforts to remedy its inability to perform (this subsection shall not require the settlement of any strike, walkout, lockout or other labor dispute on terms which, in the sole judgment of the party involved in the dispute, are contrary to its interest. It is understood and agreed that the settlement of strikes, walkouts, lockouts or other labor disputes shall be at the sole discretion of the Party having the difficulty);

(4) When the non-performing Party is able to resume performance of its obligations under this Contract, that Party shall give the other Party written notice to that effect; and

(5) Capacity payments during such periods of Uncontrollable Force on Seller's part shall be governed by Section 8.1.2.3.

16.3 In the event that either Party's ability to perform cannot be corrected when the Uncontrollable Force is caused by the actions or inactions of legislative, judicial or regulatory agencies or other proper authority, this Contract may be amended to comply with the legal or regulatory change which caused the nonperformance.

If a Loss of Qualifying Facility status occurs due to an Uncontrollable Force and Seller fails to make the changes necessary to maintain its Qualifying Facility status, the Seller shall compensate Edison for any economic detriment incurred by Edison as a result of such failure.

17. NONDEDICATION OF FACILITIES

Neither Party, by this Contract, dedicates any part of its facilities involved in this Project to the public or to the service provided under the Contract, and such service shall cease upon termination of the Contract.

18. PRIORITY OF DOCUMENTS

If there is a conflict between this document and any Appendix, the provisions of this document shall govern. Each Party shall notify the other immediately upon the determination of the existence of any such conflict.

40

19. NOTICES AND CORRESPONDENCE

All notices and correspondence pertaining to this Contract shall be in writing and shall be sufficient if delivered in person or sent by certified mail, postage prepaid, return receipt requested, to Seller as specified in Section 1.1, or to Edison as follows:

Southern California Edison Company
Post Office Box 800
Rosemead, California 91770
Attention: Secretary

All notices sent pursuant to this Section 19 shall be effective when received, and each Party shall be entitled to specify as its proper address any other address in the United States upon written notice to the other Party.

20. PREVIOUS COMMUNICATIONS

This Contract contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this contract, and merges and supersedes all prior agreements, commitments, representations, and discussions between the Parties. No Party shall be bound to any other obligations, conditions, or representations with respect to the subject matter of this Contract.

21. THIRD PARTY BENEFICIARIES

This Contract is for the sole benefit of the Parties and shall not be construed as granting any rights to any person or entity other than the Parties or imposing obligations on either Party to any person or entity other than the Parties.

41

22. NONWAIVER

None of the provisions of the Contract shall be considered waived by either Party except when such waiver is given in writing. The failure of either Edison or Seller to insist in any one or more instances upon strict performance of any of the provisions of the Contract or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue to remain in full force and effect.

23. DISPUTES

23.1. Any dispute arising between the Parties relating to interpretation of the provisions of this Contract or to performance of the Parties hereunder, other than matters which may not be settled without the consent of an involved insurance company, shall be reduced to writing stating

the complaint and proposed solution and submitted to the appropriate Edison manager, whose interpretation and decision thereon shall be incorporated into a written document which shall specify Edison's position and that it is the final decision of such manager. A copy of such document shall be furnished to Seller within ten days following the receipt of Seller's written complaint.

23.2 The decision of such manager pursuant to Section 23.1 shall be final and conclusive from the date of receipt of such copy by the complaining Party, unless within thirty days Seller furnishes a written appeal to such manager. Following receipt of such appeal, a joint hearing shall be held within fifteen days of said appeal, at which time the Parties shall each be afforded an opportunity to present evidence in support of their

42

respective positions. Such joint hearing shall be conducted by one authorized representative of Seller and one authorized representative of Edison and other necessary persons. Pending final decision of a dispute hereunder, the Parties shall proceed diligently with the performance of their obligations under this Contract and in accordance with Edison's position pursuant to Section 23.1.

23.3 The final decision by the Parties' authorized representatives shall be made within fifteen days after presentation of all evidence affecting the dispute, and shall be reduced to writing. The decision shall be final, and conclusive.

23.4 If the authorized representatives cannot reach a final decision within the fifteen-day period, any remedies which are provided by law may be pursued.

24. SUCCESSORS AND ASSIGNS

Neither Party shall voluntarily assign its rights nor delegate its duties under this Contract, or any part of such rights or duties, without the written consent of the other Party, except in connection with the sale or merger of a substantial portion of its properties. Any such assignment or delegation made without such written consent shall be null and void. Consent for assignment shall not be unreasonably withheld. Such assignment shall include, unless otherwise specified therein, all of Seller's rights to any refunds which might become due under the Contract. Seller may assign all or any part of its interest under this Contract to a financing institution to facilitate financing for the Project by the Seller.

43

25. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

26. TRANSMISSION

26.1 Edison shall endeavor to make arrangements with third parties for the necessary transmission of the electrical energy from the Project to the Point of Interconnection. Seller shall be responsible for all costs associated with such transmission of electrical energy, including the cost of transmission losses from the Project to the Point of Interconnection as determined by Edison

in its sole judgement.

26.2 If Edison is unable to secure firm transmission service or equivalent arrangements from third parties which are required to transmit the electrical energy from the Project to the Point of Interconnection at terms and conditions satisfactory to Edison in its sole judgement, then Edison shall not be liable to the Seller for any damages arising from Edison's failure to secure said transmission service or arrangements nor will Edison be required to purchase Energy which is not delivered or capacity which is not made available at the Point of Interconnection.

27. AMENDMENT

If at any time during the term of this Agreement a change in circumstances not anticipated at the time this Agreement was executed significantly alters the rights or obligations of either Party, the terms of the Agreement which are directly affected by the change shall be amended by mutual agreement of Parties.

44

28. GOVERNING LAW

This Contract shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

29. CONFIDENTIALITY

29.1. Except as provided herein, the Parties shall hold all information in this Contract and all informatin related to or received pursuant to this Contract as confidential.

29.2 Neither Party shall disclose any part nor the whole of this Contract to any third party without the express prior written consent of the other Party; such consent shall not be unreasonably withheld.

29.3 From time to time governmental and/or regulatory agencies may request disclosure of the Contract or Contract-related information from either Party or both Parties and if such is the case either Party or both Parties may consent to such disclosure provided, that (i) the requestor(s) be notified by the disclosing Party that the information being released is confidential, and that (ii) the disclosing Party inform the other Party, in writing, as to the nature of the information disclosed and to whom disclosed.

30. MULTIPLE ORIGINALS

This Contract is executed in two counterparts, each of which shall be deemed an original.

45

SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have executed this Contract this 13th of June, 1984.

1. PARTIES

The Parties to this Agreement are Chevron U.S.A., Inc. a Delaware corporation, hereinafter referred to as "Seller", and Southern California Edison Company, a California corporation, hereinafter referred to as "Edison;" individually, "Party," and collectively, "Parties."

2. RECITALS

2.1 Seller is willing to construct and operate an electrical generating facility with a nameplate capacity rating of 52,000 kW (47,000 kW Net) located at Heber, California, and sell the capacity and associated net energy to Edison.

2.2 Edison is willing to purchase from the Seller, the Capacity made available and all Net Energy delivered to Edison at the Point of Interconnection on the terms and conditions set forth herein.

3. DEFINITIONS

When used with initial capitalizations, whether in the singular or in the plural, the following terms shall have the following meanings:

3.1 Adjusted Capacity Price: The capacity purchase price, expressed in \$/kW/year, in the Capacity Payment Schedule for the period beginning on the Date of Firm Operation and ending on the date of termination of this Agreement or reduction in Capacity.

3.2 Agreement: This Power Purchase and Sales Agreement as it may be amended from time to time.

1

3.3 Avoided Operating Cost: Edison's incremental cost of electric energy, that but for this Agreement, Edison would have generated from sources of electric energy within the Edison electric system. In the event any federal or state legislation, future Commission orders, rulings or guidelines are in conflict with the definition contained in this Section 3.3, this definition shall take precedence over such federal or state legislation, Commission orders, rulings or guidelines.

3.4 Capacity Payment Schedule: Edison's published Capacity Payment Schedule as authorized by the Commission and in effect at the time of execution of this Agreement.

3.5 Commission: The Public Utilities Commission of the State of California.

3.6 Capacity: That portion of the Project's electric power producing capability (initially 47,000 KW) which is dedicated to Edison and made available to Edison at the Point of Interconnection.

3.7 Capacity Price: The capacity purchase price, expressed in \$/kW/year, in the Capacity Payment Schedule for the Contract Term and Date of Firm Operation.

3.8 Contract Term: The term of this Agreement shall be thirty (30) years beginning on the Date of Firm Operation.

3.9 Control: To regulate the electrical output of the Project.

3.10 Current Capacity Price: The capacity price, expressed in \$/kW/year, in the Capacity Payment Schedule in effect at the time Edison receives a termination of this Agreement or reduction in Capacity notice for a term equal to the number of years from

2

the date of termination of this Agreement or reduction in Capacity to the end of the Contract Term.

3.11 Date of Firm Operation: The date established by the Operating Representatives on which the Project is determined to be a reliable source of generation as determined by a seventy-two (72) hour continuous demonstration test at 80% of the capacity rating (47,000 KW).

3.12 Edison Electric System Integrity: Operation of the Edison electric system in a manner which minimizes unreasonable risk of injury to persons and/or damage to property and enables Edison to provide safe, adequate and reliable electric service.

3.13 Emergency: A condition or situation which in Edison's sole judgment affects Edison's ability to maintain Edison Electric System Integrity.

3.14 Forced Outage: Any unscheduled outage on either the Edison electric system or the Project which results in a complete or partial curtailment in either the generation of Net Energy or the acceptance of Net Energy from the Project.

3.15 Generating Facilities: All of Seller's Generators and all protective and other associated equipment and improvements necessary for the Project to produce electrical energy, excluding associated land, land rights, geothermal leases, or interests in land.

3.16 Generator: The generator(s) and associated prime mover(s), which are a part of the Generating Facilities.

3

3.17 Interconnecting Utility: The electric utility or any other utility that is directly connected with the Project and which receives delivery of Net Energy from the Project.

3.18 Interconnection Facilities: The electrical interconnection facilities furnished, at no cost to Edison, by Seller, or by the Interconnecting Utility on Seller's behalf, which is appurtenant to, and/or incidental to, the Project. The Interconnection Facilities shall include, but are not limited to, transmission lines and/or distribution lines between the Project and transmission lines and/or distribution lines of the Interconnecting Utility, relays, power circuit breakers, metering devices, telemetering devices, and other control and protective devices specified by the Interconnecting Utility as necessary for operation of the Project in parallel with the Interconnecting Utility's electric system.

3.19 Net Energy: Kilowatthours generated by the Project which are purchased by Edison at the Point of Interconnection pursuant to this Agreement.

3.20 Operate: To provide the engineering, purchasing, repair, supervision, training, inspection, testing, protection, operation, use, management, replacement, retirement, reconstruction, and maintenance of, and for the Generating Facility in accordance with applicable utility standards and good

engineering practices.

3.21 Operating Representatives: Individual(s) appointed by each Party to secure effective cooperation and interchange of information between the Parties in connection with this Agreement.

4

3.22 Peak Months: Those months during which the annual system peak demand of the Edison electric system may occur. Currently, those months are June, July, August and September. Such designation is subject to change upon written notice consistent with Commission guidelines.

3.23 Point of Interconnection: The point where the transfer of Net Energy from Seller to Edison occurs.

3.24 Project: The Generating Facilities, Interconnection Facilities, the site for the Generating Facilities, and metering equipment necessary to permit the Generator to deliver Net Energy and make Capacity available to Edison at the Point of Interconnection.

3.25 Qualifying Facility: A Small Power Production Facility as defined in Title 18, Code of Federal Regulations Section 292.201 through 292.207 or a geothermal power producer under California Public Utilities Code Section 2801 and following.

3.26 Renewable Resources: Wind parks, small hydroelectric, solar and geothermal resources which produce electric power.

3.27 Summer Period: The Summer Period as defined in Tariff Schedule No. TOU-8 now in effect or as may hereafter be authorized by the Commission to be revised.

3.28 Tariff Schedule No. TOU-8: Edison's time-of-use energy tariff for electric loads of 500 kW or more as now in effect or as may hereafter be revised as authorized by the Commission.

5

3.29 Winter Period: The Winter Period as defined in Tariff Schedule No. TOU-8 now in effect or as may hereafter be authorized by the Commission to be revised.

4. TERM AND TERMINATION

4.1 This Agreement shall become effective upon execution and remain in effect for the Contract Term (30 years from Date of Firm Operation) unless sooner terminated as provided herein.

4.2 This Agreement shall terminate if the Date of Firm Operation does not occur by December 31, 1987. In the event the Date of Firm Operation is delayed due to an uncontrollable force, such date shall be extended for the period of such delay, not to exceed one (1) year.

4.3 This Section 4.3 shall apply if this Agreement is terminated or Capacity is reduced or terminated prior to the expiration of the Contract Term. The Parties agree that the amount Edison pays Seller for Capacity is based on the agreed value of Seller's performance of its obligations to provide Capacity during the full Contract Term.

4.3.1 The Parties agree that the refund and payments provided in Sections 4.4 and 4.5 represent a fair compensation for the reasonable losses that would result from termination of this Agreement or reduction in Capacity, and shall represent Edison's sole and exclusive remedy resulting from such termination of this Agreement or reduction in Capacity.

6

4.3.2 Edison shall provide Seller invoices for all amounts due Edison pursuant to this Section. Such amounts shall be due on presentation and paid within sixty (60) days of the invoice date.

4.3.3 If Seller does not make payments as specified in Section 4.3.2, Edison shall have the right to offset any amounts Seller owes Edison against any amounts Edison owes Seller or declare that all sums then due Edison under this Agreement are immediately due and payable.

4.4 Seller may terminate this Agreement or reduce Capacity, provided that Seller gives Edison (i) 12 months prior written notice for the reduction of all or part of the first 25,000 KW of Capacity and (ii) 36 months prior written notice for the termination of this Agreement or any reduction to Capacity which results in a total aggregate reduction in Capacity in excess of 25,000 KW. [See Amendment 1, Page 3 of Exhibit 10.3.5]

4.4.1 Upon termination of this Agreement or reduction in Capacity, Seller shall pay Edison, for the amount of Capacity reduction, an amount equal to the difference between (i) the total Capacity payments paid by Edison up to and including the date of receipt of notice and (ii) Capacity payments which Edison would have paid Seller for the period of Seller's actual performance at the Adjusted Capacity Price with interest compounded monthly at the current published Federal Reserve Board three (3) months prime commercial paper rate up to the date of the termination of this Agreement or reduction in Capacity.

7

4.4.2 From the date of receipt of a termination or reduction notice to the date of termination of the Agreement or reduction in Capacity, Edison shall pay Seller until the effective date of such termination or reduction at the Adjusted Capacity Price for the amount of Capacity reduced or terminated by said notice.

4.4.3 Edison shall pay Seller for the amount of Capacity not terminated, if any, at the Capacity Price.

4.5 If Seller terminates this Agreement or reduces the Capacity without providing the notice specified in Section 4.4, the provisions of Section 4.4 shall apply, and additionally Seller shall pay Edison an amount equal to the product of: (i) the amount of Capacity reduced or terminated times (ii) the difference between the Current Capacity Price and the Capacity Price times (iii) the period in years and fractions thereof (not less than one year) that the Seller was deficient in providing notice pursuant to Section 4.4. If the Current Capacity Price is less than the Capacity Price, no payment under this Section 4.5 shall be required.

4.6 In the event this Agreement is terminated and Capacity is immediately made available to Edison under the terms of a new agreement, the Seller's payments due Edison, pursuant to Sections 4.4 and 4.5 herein, may be repaid over the first eight (8) years of the new agreement term at the Seller's option. The unpaid balance of the Seller's payments shall draw interest monthly at an annual rate equal to the current published Bank of America prime

commercial rate plus 1%.

5. CURTAILMENT

Edison may interrupt or reduce the acceptance of Net Energy from the Project if such an interruption or reduction is required (i) to allow Edison to perform scheduled maintenance, tests, or repairs on the Edison electric system as required, in Edison's sole judgment, to maintain Edison Electric System Integrity or (ii) during an Emergency or Forced Outage on the Edison electric system when acceptance of Net Energy from the Project in Edison's sole judgment, would jeopardize Edison Electric System Integrity. Upon such Interruptions or reductions of the acceptance of Net Energy from the Project, Edison shall continue to make capacity payments pursuant to Sections 15.7.2 and 15.7.3. Each Party shall use its best efforts to correct, within a reasonable period, the conditions on its system or in its facilities necessitating such interruption or reduction of the acceptance of Net Energy from the Project. Such interruption or reduction shall be limited to the period of time such a condition exists.

6. DESIGN AND CONSTRUCTION OF THE PROJECT

6.1 Seller, at no cost to Edison, shall design, engineer, procure, construct and test the Project in accordance with applicable utility standards and good engineering practices

6.2 Seller, at no cost to Edison, shall design, engineer, procure, construct and test the Interconnection Facilities in accordance with applicable utility standards and good engineering practices and the rules and regulations of the Interconnecting Utility.

6.3 Except to the extent as previously obtained by Edison pursuant to the agreement between Edison and Chevron in the Contract for the Engineering and Construction of Heber Geothermal Generating Plant No. 1, executed on February 4, 1982 (E&C Contract), Seller, at no cost to Edison, shall acquire all permits and approvals, and complete, or have completed, all environmental impact studies necessary for the construction, operation, and maintenance of the Project.

6.4 Edison shall have the right to review the construction schedule and to monitor the construction, start-up, operation and maintenance of the Project. Seller shall notify Edison as far in advance of the Date of Firm Operation as reasonably possible, of changes in the construction schedule which may affect the Date of Firm Operation. Edison shall have the right to review technical data and technical records of the operation of the Project. Edison agrees not to interfere with the Seller's operations, and agrees to adhere to Seller's work rules and operating regulations. All information or data received by Edison under this Section 6 shall be treated in accordance with Section 30.

6.5 Seller, at no cost to Edison, shall make modifications to the Interconnecting Facilities as required to maintain Edison Electric System Integrity so that Edison can continue to accept Net Energy from the Project.

7. OPERATION OF THE PROJECT

7.1 Seller shall Operate, Control and maintain the Project in accordance with applicable utility standards and good engineering practices and shall produce the maximum electrical output from the Project consistent with such standards and practices.

7.2 Each Party shall keep the other Party's Operating Representative informed regarding the operating schedule of their respective facilities which affect the other Party's operations hereunder, including any reduction in Capacity availability. Each Party shall use its best efforts to provide the other Party with reasonable advance notice regarding scheduled outages of its facilities, including any reduction in Capacity availability as follows, unless otherwise agreed to by the Parties:

Scheduled Outage Expected Duration -----	Advance Notice Required -----
Less than one day	24 Hours
One day or more (except major overhaul)	1 Week
Major overhaul	6 Months

7.3 The Operating Representatives shall notify each other by telephone regarding outage dates and durations and shall use their best efforts to coordinate the schedule of such outages as to facilitate the maximum output of the Project.

7.4 Neither Seller nor Edison shall schedule major overhauls during Peak Months and shall make reasonable efforts to avoid scheduling routine maintenance during the Peak Months. Seller's and Edison's outages for scheduled maintenance shall not exceed an aggregate of 30 peak hours during the entire period encompassed by the Peak Months per year.

7.5 Seller shall maintain an operating log at Seller's Generating Facility with records of real and reactive power production, changes in operating status, outages,

protective apparatus operations and any unusual conditions found during inspections. Seller shall also maintain records applicable to the Generating Facility, including records regarding the electrical characteristics of the Generator and settings or adjustments of the Generator control equipment and protective devices. Seller shall, under provisions of Section 30 herein, make such information available to Edison upon request and provide copies of such logs and records, if requested, to Edison within thirty (30) days of Edison's request.

7.6 Seller shall use reasonable efforts to notify Edison at least 14 calendar days prior to initial energizing of the Point of Interconnection and initial parallel operation of the Project with the Edison electric system. Edison shall have the right to have a representative present at such times.

7.7 Seller shall use reasonable efforts to obtain Qualifying Facility status for the Project prior to the Date of Firm Operation and maintain such status during the term of this Agreement. If Seller fails to maintain Qualifying Facility status, Seller, at its sole discretion, may elect to (i) suspend the deliveries of Net Energy until such time the Qualified Facility status is reestablished, subject to the provisions of Sections 9 and 15 or (ii) continue the delivery of Net Energy and shall hold Edison harmless from any and all liability, loss, damage, claim, action, cause of action, cost, charge or expense resulting from such loss of Qualifying Facility status.

7.8 Seller and Edison, as applicable, shall obtain and maintain necessary government authorization(s) and permit(s). The Seller or Edison shall hold the other

12

party harmless from any and all liability, loss, damage, claim, action, cause of action cost, charge or expense resulting from the failure to obtain or maintain the necessary government authorization(s) and permit(s). Seller may elect to suspend the delivery of Net Energy until all necessary government authorization(s) and permit(s) are obtained or maintained by the Seller subject to Sections 9 and 15.

7.9 At Edison's request, Seller shall make all reasonable efforts to deliver Net Energy at an average rate of delivery at least equal to the Capacity during periods of Emergency. If the Seller has previously scheduled an outage coincident with an Emergency, Seller shall make all reasonable efforts to reschedule the outage. Edison shall waive the notification specified in Section 7.2 if Seller reschedules an outage.

8. SALE OF THE PROJECT

8.1 If Seller offers to sell its interest in the Project or relinquish its interest under any lease of the Project, Seller shall promptly offer to Edison, or any Edison subsidiary, the right to be substituted for Seller under the lease of the Project or the right to purchase Seller's interest in the Project. Edison shall have up to 60 days following any such offer to accept Seller's offer or otherwise reach agreement with Seller.

8.2 If the Parties are unable to reach a satisfactory agreement as specified in Section 8.1, and Seller offers to Sell its interest in the Project to any third party, Edison, or any Edison subsidiary, shall have the right for 30 days following each offer to agree to purchase Seller's interest in the Project under the same terms and conditions, if such terms and conditions are better to Edison than those offered in Section 8.1 herein. Any

13

offers to sell made more than two years after Edison's failure to accept a previous offer to sell, under Section 8.1, shall again be subject to the terms of Section 8.1 and 8.2.

8.3 Seller shall have the right to require Edison to purchase the Project if the average cost of electric energy and capacity to Edison based on the purchase price for the Project, and a projected price for geothermal heat would result in a cost to Edison of electric energy and capacity delivered to Edison's electric system in the aggregate below avoided costs for a consecutive three hundred sixty-five day period which is reasonably representative of a longer term. Such a purchase of the Project by Edison shall be subject to prior regulatory approval (e.g. Commission Certificate of Public Convenience and Necessity and rate base treatment of the investment) as required in Edison's sole judgment, and subject to prior negotiation and execution of contracts between Edison and Seller for the purchase of the Project and geothermal heat for the Project consistent with such objective.

8.4 If the Project is sold to a third party and said third party does not assume the obligations of this Agreement, as specified in Section 26, then this Agreement shall be considered terminated and the provisions set forth in Sections 4.4 and 4.5 shall apply.

8.5 If the Seller offers to sell the Project to Edison, or any Edison subsidiary, under the provisions of Section 8, then Edison, or any Edison subsidiary, shall establish a value of the Project to Edison. When determining

the value of the Project, Edison shall take into consideration any and all monies due Edison under the terms of this Agreement in event of a termination.

14

9. ABANDONMENT

9.1 The Project shall be deemed abandoned if Seller terminates operation of the Project with the intent that such termination be permanent. Such intent shall be presumed by either Seller's written notice to Edison of such intent or operation of the Project so that no Energy is generated therefrom for 730 consecutive days during any period after the Date of Firm Operation, unless otherwise agreed to in writing by the Parties. If the Project is prevented from generating energy due to an uncontrollable force, then such period shall be extended for the duration of the uncontrollable force, not to exceed one (1) year.

9.2 If Seller abandons the Project during the term of this Agreement, Edison, or any Edison subsidiary shall have the right to substitute itself for Seller under the Seller's lease arrangement with its lender or in the event the Project is to be sold subsequent to such abandonment, Edison shall have the right to purchase the Seller's interest in the Project under the terms of Section 8.1 and 8.2.

9.3 If Seller abandons the Project, this Agreement may be terminated and the provisions of Sections 4.4 and 4.5, as applicable, will control unless otherwise provided herein.

10. DISCLAIMER

Any review by Edison of the design, engineering, construction, operation, control, or maintenance of the Project is solely for the information of Edison. By making such review, Edison makes no representation as to the economic or technical feasibility,

15

operational capability, or reliability of the Project. Seller shall in no way represent to any third party that any such review by Edison of the Project , including but not limited to, any review of the design, engineering, construction, operation, or maintenance of the Project by Edison is a representation by Edison as to the economic or technical feasibility, operational capability, or reliability of the Project. Seller is solely responsible for economic feasibility, technical feasibility, operational capability or reliability of the Project. Edison shall not be liable to Seller for, and Seller shall, at its cost, defend, indemnify and hold harmless Edison, its directors, officers, employees, agents, assigns and successors from and against any loss, damage, claim, action, cause of action, cost, charge or expense arising from any contrary representation concerning the effect of Edison's review of the design, engineering, construction, operation or maintenance of the Project.

11. METERING

11.1 Seller shall install or shall cause the Interconnecting Utility to install and maintain metering equipment as specified and provided by the Interconnecting Utility at the Point of Interconnection, pursuant to an interconnection agreement to be entered into between Seller and the Interconnecting Utility, to allow monitoring by the Parties and the Interconnecting Utility and to record and measure kilowatthours and time. Edison shall not be liable or responsible for any costs of acquisition, installation, ownership or maintenance of such metering equipment, including costs incurred by Seller for inspecting and calibrating such equipment. This metering equipment shall be utilized for

the measurement of Net Energy and Capacity in order to determine Edison's payments to Seller pursuant to this Agreement.

11.2 Edison shall install, as required by Edison Electric System Integrity, at Seller's cost, generation telemetering equipment to monitor the Project's net generation. Seller shall install as required by Edison Electric System Integrity in order that Edison can accept Net Energy from the Project, additional meters at the Project to enable Seller to make daily telephone reports in the event telemetering equipment is inoperative. Seller shall bear all costs of additional meter equipment, installation, ownership and administration and all costs for inspecting and testing such equipment.

11.3 The Parties shall seal all meters used to determine billings hereunder. The seals shall be broken only when the meters are to be inspected, calibrated or adjusted. Edison shall, at Seller's cost, inspect and calibrate, or shall request that the Interconnecting Utility inspect and calibrate, all meters upon their installation and annually thereafter. If requested to do so by Seller, or if at any reading, the metering inaccuracy exceeds 2%, the meters shall be calibrated promptly. Each Party shall give reasonable notice, both oral and written, to the other Party, of at least five (5) working days of when any inspection or calibration is to take place. The other Party may have representatives present at the calibration or inspection. If metering equipment inaccuracy exceeds 2%, the Operating Representatives shall estimate and agree upon the correct amount of Net Energy delivered during the period of inaccuracy.

11.4 Each Party shall within ten (10) days after written notice to the other Party have the right of access during regular business hours to all metering and billing records relevant to the purchase of Net Energy under this Agreement.

12. AVAILABILITY

12.1 Seller shall make all reasonable efforts to limit Project outages.

12.2 If Seller fails to meet the performance requirements specified in Section 15, Edison shall have the right to require the Seller to demonstrate the ability of the Project to generate Capacity once a year and to observe said demonstration. The Seller shall, at its expense, conduct said demonstration at a time and under procedures mutually agreed upon by the Parties.

13. POWER PURCHASE AND SALE

13.1 Seller hereby agrees to sell to Edison, and Edison hereby agrees to accept and purchase from Seller, all Net Energy delivered by Seller to Edison hereunder at the Point of Interconnection regardless of economic dispatch or hydro-spill consideration. Edison may interrupt or reduce such deliveries due to scheduled or Forced Outages, Emergencies, and uncontrollable forces only. During any such interruption or reduction, Edison shall continue to make capacity payments to the Seller pursuant to Sections 15.7.2 and 15.7.3.

13.1.1 Seller shall begin delivery of Net Energy on or before the Date of Firm Operation.

13.1.2 If at any time, Seller can physically deliver Net Energy to Edison while it is contesting the claimed jurisdiction of any entity which has not issued a license or other approval for the Project, Seller, at its

sole discretion and risk, shall have the right to deliver Net Energy to Edison. Edison shall pay Seller for Net Energy pursuant to Section 14. However, unless and until all required licenses and approvals have been obtained, Seller may discontinue deliveries at any time, at no cost or liability to Seller.

13.1.3 In the event there has been an interruption or reduction in the deliveries of Net Energy pursuant to Section 5 and during such period Seller makes deliveries, with notice to Edison, of Net Energy to the Interconnecting Utility which are subsequently delivered to Edison pursuant to schedules agreed upon by Edison and the Interconnecting Utility, Edison shall notify Seller of such scheduled deliveries within thirty (30) business days of such scheduled deliveries, Edison shall pay Seller for such Net Energy at the price applicable at the time of scheduled delivery to Edison. In the event of an interruption or reduction in the deliveries of Net Energy pursuant to Section 5 and the Interconnecting Utility is either unable or unwilling to accept such Net Energy, the Seller may sell such Net Energy to a third party. During any such sale of Net Energy to a third party, Edison shall continue to make capacity payments to the Seller pursuant to Sections 15.7.2 and 15.7.3.

19

13.2 Seller shall sell to Edison, and Edison shall purchase from Seller, Capacity as specified in Section 2.1 or Capacity as adjusted pursuant to Section 13.3.

13.3 Seller may, with Edison's approval, which shall not be unreasonably withheld, increase the amount of Capacity. Edison shall pay for such additional Capacity at a rate equal to current Capacity Price for the remaining Contract Term. Seller may reduce the amount of Capacity at any time by giving written notice thereof to Edison pursuant to Section 4.4. Edison may reduce the amount of Capacity as a result of demonstration tests or prior performance. The amount by which Capacity is reduced shall be deemed a reduction in Capacity pursuant to Section 4. Either Party may request the other Party to agree in writing to a revised Capacity whenever it appears that Capacity has changed.

13.4 Monthly Payment

13.4.1 Edison shall determine from monthly meter readings Net Energy and Capacity purchased by Edison during the periods specified in Tariff Schedule No. TOU-8 for the preceding monthly billing period, and calculate the amount due Seller. Edison shall use its best efforts to read the meter on a regular, monthly interval

13.4.2 If a monthly payment period involves portions of different published Energy payment schedule periods, Edison shall prorate the monthly Energy payment on the basis of the percentage of days at each price.

20

13.4.3 Within 20 business days of each monthly meter reading, Edison shall mail a statement to Seller indicating the amount of Net Energy and Capacity purchased during the billing period and the amount to be paid. Edison shall prepare and mail a check to Seller within ten (10) business days of mailing of the statement.

14. PAYMENTS FOR ENERGY

14.1 Seller shall receive a monthly payment for Net Energy received and accepted by Edison at the Point of Interconnection. Seller shall have the

option, to be exercised by the Seller prior to Date of Firm Operation, to elect to sell Net Energy at a price based on the payment provisions described in Section 14.2, 14.3 or 14.4.

14.2 Edison's Standard Offer No. 2 for Firm Power Purchases (effective date February 14, 1983).

14.2.1 Seller shall receive monthly payments for Net Energy, based on Edison's Avoided Operating Cost, received by Edison during the on-peak, mid-peak and off-peak periods. These periods are defined and published in Edison Tariff Schedule No. TOU-8.

14.2.2 Monthly payment for Net Energy shall be calculated as follows:

Monthly Payment for Net Energy = A + B + C

where:

A = on-peak energy payment

B = mid-peak energy payment

21

C = off-peak energy payment

where, for each period:

Period Energy Payment = (Avoided Operating Cost/KwH) x (Period Net Energy, KwH) x energy loss adjustment factor.*

14.3 Edison's Standard Offer No. 5 for Firm Power Purchases. This option is valid only if Standard Offer No. 5 is approved and implemented by the Commission prior to the Date of Firm Operation.

14.4 Net Energy Payment Option No. 3.

14.4.1 For the first 15 years of the Contract Term, Seller shall receive monthly payments for Net Energy based on the pricing provisions specified in Section 14.4.2. For the second 15 years of the contract term, Seller shall receive monthly payments for Net Energy equal to 98% of Edison's full Avoided Operating Costs as specified in Section 14.2.

14.4.2 For the first 15 years of the Contract Term, Seller shall receive monthly payments for Net Energy based on the higher of (i) Edison's full Avoided Operating Cost as specified in Section 14.2 or (ii) the floor price. The floor price payments shall be calculated as follows:

* The energy loss adjustment factor shall be one (1), subject to adjustment by Commission orders or rulings.

22

Monthly Floor Payment (floor price/kwh) x (Net Energy, kwh) x energy loss adjustment factor*

where, the floor price is:

Year -----	Floor Price -----
1985	4.6(cent)/kwh
1986	5.1
1987	5.4
1988	5.4
1989	5.9
1990	5.9
1991	5.9
1992	7.0
1993	7.5
1994	7.5
1995	8.0
1996	8.0
1997	8.5

* The energy loss adjustment factor shall be one (1), subject to adjustment by Commission orders or rulings.

23

1998	8.5
1999	8.5

14.4.3 If Seller elects the payment provision specified in Section 14.4, then Edison shall pay for the transmission service costs, as specified in Section 34, which are incurred in delivering the Net Energy to the Point of Interconnection, for the first 5 years of the Contract Term and simultaneously enter an identical amount as a debit in the Payment Tracking Account specified Section 14.4.4.

14.4.4 Payment Tracking Account

14.4.4.1 Edison shall establish a Payment Tracking Account (PTA) to account for (i) transmission service costs described in Section 14.4.3 and (ii) the amount by which Edison's monthly payment for Net Energy to Seller exceeds the payment which would have been paid the Seller under Section 14.2. These entries shall be considered debits in the PTA. Sums in the PTA will draw interest monthly at an annual rate equal to the current published Bank of America prime commercial rate plus 1%.

14.4.4.2 The balance in the PTA, including accrued interest, shall not exceed \$5,000,000.

14.4.4.3 Whenever a balance exists in the PTA, the Seller shall repay the balance using credits in the form of reductions to Edison's

payment for Net Energy to Seller. PTA credits shall include, but not be limited to the following:

- a. When Edison's full Avoided Operating Cost exceeds the floor price, Edison shall make a monthly payment for Net Energy equal to one-half (1/2) of the sum of monthly payments calculated using Edison's full Avoided Operating Cost and the floor price. The difference between the monthly payment made in accordance with this Section 14.4.4.3 and the monthly payment pursuant to Section 14.2 shall be credited against the PTA balance.
- b. Seller shall at any time have the option of paying to Edison part or all of the existing balance in the PTA without incurring any penalties. To implement this each month, Seller shall notify Edison in writing within 20 business days after the monthly meter reading of its election to receive a reduced monthly payment for Net Energy and credit that reduction against the PTA balance.
- c. If the PTA balance reaches the \$5,000,000 limit, Edison's monthly payment for Net Energy to Seller shall be reduced by an amount which ensures the PTA balance does not exceed \$5,000,000. At no time shall the credits to the PTA exceed the current balance. When the PTA balance is zero, the monthly

payment for Net Energy to the Seller shall be made pursuant to Section 14.4.2.

14.4.4. If at the end of the first fifteen years the Contract Term a PTA balance remains, the said PTA balance shall be due and payable and paid within 60 days, including interest up to the date of payment.

15. PAYMENTS FOR CAPACITY

15.1 If the Seller selects the net energy payment provisions in Section 14.3, then the Seller shall be paid for Capacity delivered pursuant to the provision of Edison's Standard Offer No. 5 for Firm Power Purchases. This option is valid only if Standard Offer No. 5 is approved and implemented by the Commission prior to the Date of Firm Operation.

15.2 If the Seller selects the net energy payment provisions in either Section 14.2 or 14.4, then the Seller shall receive monthly payments for Capacity pursuant to Section 15.3.

15.3 Seller shall receive monthly payments for Capacity made available at the Point of Interconnection. Seller shall have the option, to be exercised prior to the Date of Firm Operation, to elect to sell the Capacity pursuant to the payment provisions specified in Section 15.4 or 15.5.

15.4 Payment Option 1 -- Performance Based on Availability/Dispatchability

15.4.1 Minimum Performance Requirement in Option 1 to receive full capacity payments.

15.4.1.1 The Generating Facility must be dispatchable to Edison upon

request, and meet the following conditions:

(i) The Generating Facility must be available during all on-peak hours of each Peak Month except during hours of allowable Forced Outage as specified in Section 15.4.1.3.

(ii) The Generating Facility must be available for all other hours of the year except during hours of allowable maintenance as specified in Section 15.6 and during hours of allowable maintenance as specified in Section 15.4.1.3.

15.4.1.2 The measure of availability shall be the performance during the hours that the Generating Facility is dispatched, ignoring energy produced in any hour in excess of the Capacity of the Generating Facility. Dispatching requests can only increase power production, and only up to Capacity.

15.4.1.3 The Seller is allowed a 20% Forced Outage rate for the on-peak hours of each Peak Month, a 20% Forced Outage rate for the mid- and off-peak hours of each Peak Month, and 20% Forced Outage rate for the hours of each non-Peak Month. Except during the Peak Months, Seller may accumulate and apply the 20% allowance for Forced Outage for any consecutive three month period.

15.4.2 Payment Provision in Option 1

27

15.4.2.1 When the requirements of Section 15.4.1 are met, the monthly payment is:

Monthly Capacity Payment =

$(\text{Capacity Price}) \times (1/12) \times (\text{Capacity})$

15.4.2.2 When the requirements of Section 15.4.1 are not met, the monthly payment is:

Monthly Capacity Payment*

$(\text{Capacity Price}) \times (1/12) \times (\text{Capacity}) \times (\text{Availability}/.8)^*$

15.4.3 Payments in excess of 100% of Capacity Price.

15.4.3.1. Bonus During Peak Months

For a Peak Month, the Seller will receive a bonus if

- 1) The performance requirements of Section 15.4.1 have been met; and,
- 2) The on-peak availability exceeds 85%.

15.4.3.2 Bonus During Non-Peak Months

In a non-Peak Month, the Seller will receive a bonus if

* (Availability/.8) cannot be greater than 1.0.

- 1) The performance requirements of Section 15.4.1 have been met;
- 2) The on-peak availability for each of the year's Peak Month was at least 85%; and
- 3) The on-peak availability exceeds 85%.

15.4.3.3 Bonus Payment

For any eligible month, the bonus payment will be calculated according to the following formula.

$$\text{Monthly Bonus Payment} = [(1.2 \times \text{on-peak availability}) - 1.02] \times (1/12) \text{ Capacity Price} \times \text{Capacity}$$

Where:

Availability =

kWh Purchased by Edison

(Capacity) x (Hours dispatched - Allowable Maintenance Hours)

15.4.3.4 Total monthly Capacity payment when a bonus is earned shall be the sum of the monthly Capacity payments specified in Section 15.4.2.1 and 15.4.3.3.

15.4.4 Only by mutual agreement can the kilowatthours used in the calculation of capacity payments specified in Section 15.4 be greater than a delivery rate equal to Capacity.

15.5 Payment Option 2 -- Performance Based on Capacity Factor

29

15.5.1 Minimum performance Requirement in Option 2 to receive full capacity payments.

15.5.1.1 The Capacity shall be available for all of the on-peak hours as defined in Tariff Schedule No. TOU-8 in each of the Peak Months subject to a 20% allowance for Forced Outages for each month.

15.5.1.2 There is no minimum performance requirement for the rest of the year.

15.5.2 Payment Provision in Option 2.

The monthly capacity payment shall be calculated as the sum of the on-peak, mid-peak, and off-peak capacity payments. Each capacity period payment is calculated as follows:

Monthly Capacity Period Payment =

(Capacity Price) x (Conversion to Monthly Payment) x (Capacity)
x (Period Performance Factor)

Where:

Period Performance Factor =

kWh Purchased by Edison

$$0.8 \times (\text{Capacity}) \times (\text{Period Hrs.} - \text{Allowable Maintenance Hrs.})$$

The Period Performance Factor cannot exceed

1. When the allowable maintenance hours equals the period hours, the period performance factor shall equal 1.0.

30

Conversion to Monthly Payments: The following factors convert Capacity Price to monthly payments by time period of delivery. These conversion factors will be subject to periodic change as approved by the Commission.

	Summer Period -----	Winter Period -----
On-peak	.13125	.02094
Mid-peak	.00267	.01054
Off-peak	.00000	.00127

15.5.3 Payments in Excess of 100% of Capacity Price

15.5.3.1 Bonus During Peak Months

For a Peak Month, the Seller will receive a bonus if

- 1) The Performance Requirements of Section 15.5.1 have been met;
- and
- 2) The on-peak capacity factor exceeds 85%.

15.5.3.2 Bonus During Non-Peak Months

- 1) The performance requirements of Section 15.5.1 have been met;
- 2) The on-peak capacity factor for each of the year's Peak Months was at least 85%;
- and
- 3) The on-peak capacity factor exceeds 85%.

15.5.3.3 Bonus Payment

For any eligible month, the bonus payment is the following:

Bonus Payment =

31

$$[(1.2 \times \text{on-peak capacity factor}) - 1.02]$$

x Capacity Price

x (1/12)

x Capacity

Where:

On-peak Capacity Factor =

kWh Purchased by Edison

(Capacity) x (Period Hrs. - Allowable Maintenance Hrs.)

15.5.3.4 The monthly capacity payment when a bonus is earned shall be the sum of the monthly capacity payment (Section 15.5.2) and the monthly bonus payment (Section 15.5.3.3).

15.5.4 Only by mutual agreement can the kilowatthours used in the calculation of capacity payments specified in Section 15.5 be greater than a delivery rate equal to Capacity.

15.6 Scheduled Maintenance Allowances

The allowance for scheduled maintenance is as follows:

15.6.1 Outage periods for scheduled maintenance shall not exceed 840 hours (35 days) in any 12-month period. This allowance may be used in increments of an hour or longer on a consecutive or non-consecutive basis.

15.6.2 Seller may accumulate unused maintenance hours on a year-to-year basis up to a maximum of 1,080 hours (45 days). This accrued time must be

32

used only for major overhauls, as such major overhauls are reasonably defined by the Seller.

15.7 Failure to Meet Minimum Performance Requirements

15.7.1 Except when caused by uncontrollable forces, if Seller fails to meet the minimum performance requirements as set forth in Sections 15.4.1 and 15.5.1. The following shall apply:

15.7.1.1 Seller may be placed on probation for a period not to exceed 15 months or as otherwise agreed to by the Parties. During this period, the monthly capacity payment will be based on the level of Capacity actually made available as calculated in Sections 15.4.2.2 and 15.5.2, as applicable.

15.7.1.2 If Seller meets or demonstrates to Edison pursuant to Section 12.2 that it can meet its minimum requirement during the probationary period, Edison shall reinstate regular capacity payments.

15.7.1.3 If Seller fails to meet its minimum requirements during the probationary period, Edison may derate the Capacity to the greater of the Capacity actually made available when the minimum requirements stated in Sections 15.4.1 and 15.5.1 were not met, or the Capacity at which Seller is reasonably likely to meet the minimum requirements. In either case, the quantity by which the Capacity is reduced shall be

considered terminated without prescribed notice as provided in Section 4.4.

33

15.7.2 If Seller is prevented from meeting the minimum performance requirement because of a schedule outage, a Forced Outage or an Emergency on the Edison electric system, Edison shall continue to make capacity payments to Seller. Under Option 2, the calculations of capacity payments will treat hours of Forced Outage and Emergency on the Edison system the same as scheduled maintenance outages.

15.7.3 If deliveries are interrupted or reduced because of uncontrollable forces, Edison shall continue to make capacity payments to Seller for 90 days from the occurrence of the uncontrolled force event. Under Option 2, the calculation of capacity payments will treat hours of interruption or reduction by reason of an uncontrollable force, the same as scheduled maintenance outages with reductions in Capacity treated on a pro rata basis.

16. TAXES: Seller shall pay ad valorem taxes and other taxes properly attributed to the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison the amount of such assessment or levy within thirty (30) days of presentation of documentation thereof. The Parties shall provide information concerning the Project to any requesting taxing authority.

17. LIABILITY

17.1 As used in this Section 17, the word "liability" shall mean "all liability, damages, costs, losses, claims, demands, actions, causes of action, attorneys' fees and expenses, or any of them."

34

17.2 Seller shall defend at its own cost and indemnify and hold harmless Edison, its officers, directors, employees, agents, contractors and subcontractors from and against any and all liability resulting directly or indirectly from or connected with the development and/or furnishing of Net Energy by Seller as provided herein (including but not limited to such liability arising from the death of or injury to an officer, director, agent or employee of Seller or Edison or damage to property of Seller or Edison or of any officer, director, agent or employee of Seller or Edison) to the extent caused by the negligent acts of Seller.

17.3 Edison shall defend at its own cost and indemnify and hold harmless Seller, its officers, directors, employees, agents, contractors and subcontractors from and against any and all liability resulting directly or indirectly from or connected with the utilization of Net Energy by Edison as provided herein (including but not limited to such liability arising from the death or injury to an officer, director, agent or employee of Seller or Edison or damage to property of Seller or Edison or of any officer, director, agent or employee of Seller or Edison) to the extent caused by the negligent acts of Edison.

17.4 Seller shall defend at its own cost and indemnify and hold harmless Edison, its officers, directors, employees, agents, contractors and subcontractors from or connected with an infringement of a patent by Seller in the performance or non-performance of this Agreement.

35

17.5 Edison shall defend at its own cost and indemnify and hold harmless Seller, its officers, directors, employees, agents, contractors and subcontractors from and against any and all liability resulting directly or indirectly from or connected with an infringement of a patent by Edison in the performance or non-performance of this Agreement.

17.6 Notwithstanding anything in this Agreement to the contrary, under no circumstances, whether arising in contract, equity, tort (including negligence) or otherwise, shall either Party hereto be responsible or liable to the other for loss of profit, loss of operating time or loss of use or reduction in the use of any equipment or facilities or any portion thereof, increased expense of operation or maintenance, cost of replacement power, claims of customers, third parties or for any special, indirect, incidental or consequential damages.

18. INSURANCE

18.1 During the term of this Agreement, Seller shall obtain and maintain in force as hereinafter provided comprehensive general liability insurance, including contractual liability coverage, with a combined single limit of not less than \$5,000,000 each occurrence. The insurance carrier or carriers and form of policy shall be subject to review and approval by Edison.

18.2 Prior to the date the Project is first operated in parallel with the Edison electric system, Seller shall furnish to Edison: (i) a certificate of insurance providing that such insurance shall not be terminated nor expire except on thirty (30) days prior written

36

notice to Edison, and (ii) an additional insured endorsement with respect to such insurance in substantially the following form:

"In consideration of the premium charged, Southern California Edison Company ("Edison") is named as additional insured with respect to all liabilities arising out of Seller's use and ownership of Seller's Generating Facility.

"The inclusion of more than one insured under this policy shall not operate to impair the rights of one insured against another insured and the coverages afforded by this policy will apply as though separate policies had been issued to each insured. The inclusion of more than one insured will not, however, operate to increase the limit of the carrier's liability. Edison will not, by reason of its inclusion under this policy, incur liability to the insurance carrier for payment of premium for this policy.

"Any other insurance carried by Edison which may be applicable shall be deemed excess insurance and Seller's insurance primary for all purposes despite any conflicting provisions in Seller's policy to the contrary."

18.3 Seller shall maintain such insurance in effect for so long as Seller's Generating Facility is operated in parallel with Edison's electric system. If Seller fails to comply with the provisions of this Section 18, Seller shall, at its own cost, defend, indemnify, and hold harmless Edison, its directors, officers, employees, agents, assigns, and successors from and against any and all liability, loss, damage, claim, action, cause of action, cost, charge, or expense of any kind of nature including attorneys' fees and other costs of litigation, resulting from death of, or injury to, any person or damage to any property, including the personnel and property of Edison, to the extent that Edison would have been protected had Seller complied with all of the provisions of this Section 18.

19. REGULATORY AUTHORITY

Seller and Edison shall at all times conform to all applicable laws and regulations.

20. DISPUTES

20.1 Any dispute arising between the Parties relating to interpretation of the provisions of this Agreement or to performance of the Parties hereunder, other than matters which may not be settled without the consent of an involved insurance company, shall be reduced to writing by the complaining party stating the complaint and proposed solution and submitted to the other party's manager responsible for the administration of this Agreement. Such manager's interpretation and decision shall be incorporated into a written document outlining his interpretation and decision and specifying that it is the final decision of such manager. A copy of such document shall be furnished to the complaining party within ten (10) days following the receipt of the complaining party's written complaint.

20.2 The decision of such manager pursuant to Section 20.1 shall be final and conclusive from the date of receipt of such copy by the complaining Party, unless, within a thirty (30) day period the complaining party furnishes a written appeal to such manager delivered pursuant to Section 21. The Parties shall hold a joint hearing within 15 days of receipt of such appeal. The Parties shall each be afforded an opportunity to present evidence in support of their respective positions at the hearing. One authorized representative of Seller and one authorized representative of Edison and other necessary

38

persons shall conduct such hearing. Pending final decision of a dispute hereunder, the Parties shall proceed diligently with the performance of their obligations under this Agreement

20.3 The authorized representatives shall make their final decision within 15 days of presentation of all evidence affecting the dispute and shall reduce their decision to writing. The decision shall be final and conclusive.

20.4 If the authorized representatives cannot reach a final decision within the 15 day period, any remedies which are provided by law may be pursued.

21. NOTICES

Except as otherwise specifically provided herein, any notice from one Party to the other, shall be given in writing and shall be deemed to be given as of the date the same is enclosed in a sealed envelope, addressed to the other by certified first class mail, postage prepaid, and deposited in the United States Mail. For the purposes of this Section 21, such notices shall be mailed to the following respective addresses or to such others as may be hereafter designated by either Party:

Southern California Edison Company
Post Office Box 800
Rosemead, California 91770
Attention: Secretary

Seller: Chevron U.S.A. Inc.
c/o Chevron Geothermal Company

Address: P.O. Box 7147
San Francisco, California 94119

Attention: Manager, Geothermal Operations

39

22. NON-DEDICATION OF FACILITIES

Neither Party by this Agreement dedicates any part of its facilities involved in this Project to the public or to the service provided under this Agreement, and such service shall cease upon termination of this Agreement.

23. PREVIOUS COMMUNICATIONS

This Agreement contains the entire agreement and understanding between the Parties, their agents and employees as to the subject matter of this Agreement, and merges and supersedes all prior agreements, commitments, representations and discussions between the Parties. No Party shall be bound to any other obligations, conditions, or representations with respect to the subject matter of this Agreement.

24. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

25. SUCCESSORS & ASSIGNS

This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties subject to the limitations on assignments set forth in Section 26.

40

26. ASSIGNMENT

26.1 A Party may assign all or part of its interests under this Agreement to an affiliate. An "Affiliate" shall mean a Party's parent, a Party's subsidiary, or any company of which a Party's parent is a parent. A "parent" shall mean a company which owns directly or indirectly more than 50% of the shares entitled to vote in an election of directors of another company.

26.2 Any assignment to a third party of all or any part of its interest under this Agreement shall be subject to the prior written consent of the non-assigning party. Consent shall not be unreasonably withheld. Any such assignment shall be to an assignee that (a) is a financially responsible entity, (b) is an experienced and prudent operating entity, and (c) has the rights, title and interest necessary to perform the assigned obligations. In this regard Seller intends to assign this Agreement to the Heber Geothermal Company (HGC) and by execution of this Agreement, Edison hereby consents to this assignment pursuant to this Section 26.2.

26.3 Any assignment by Chevron of its interest in this Agreement shall

not relieve Chevron as the assigning Party from liability for the duties and obligations of Seller under this Agreement, except to the extent such duties and obligations are expressly assumed by HGC, a general partnership of Centennial Geothermal, a wholly owned subsidiary of Centennial Energy, Inc. and Dravo Energy, Inc., a wholly owned subsidiary of Dravo Corporation under the assignment agreement between Chevron and HGC.

41

26.4 Whenever an assignment of a Party's interest in this Agreement is made, the assigning Party's assignee shall expressly assume in writing the duties and obligations of the assigning Party pursuant to this Agreement and, within 30 days after any such assignment and assumption of duties and obligations, the assigning Party shall furnish, or cause to be furnished, to the other Party a true and correct copy of such assignment and assumption of duties and obligations. Seller, or its assignee, may assign all or any part of its interest under this Agreement to a financing institution to facilitate financing for the project by Seller or its assignee.

27. NO THIRD PARTY BENEFICIARIES

Except as otherwise specifically provided in this Agreement or under separate agreements creating such rights, the Parties do not intend to create rights in, or grant remedies to, any third party as a beneficiary of this Agreement or of any duty, covenant, obligation or understanding established under this Agreement.

28. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

29. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the United States as applicable as if executed and to be performed wholly within the State of California.

42

30. CONFIDENTIALITY

30.1 Except as provided herein, the Parties shall hold all information in this Agreement and all information related to or received pursuant to this Agreement as proprietary and confidential.

30.2 Neither Party shall disclose any part nor the whole of this Agreement to any third party without the express prior written consent of the other Party, such consent shall not be unreasonably withheld.

30.3 From time to time governmental and/or regulatory agencies may request disclosure of the Agreement or Agreement-related information from either Party or both Parties and if such is the case either Party or both Parties may consent to such disclosure provided, that (i) the requestor(s) be notified by the disclosing Party that the information being released is confidential, and that (ii) the disclosing Party inform the other Party, in writing, as to the nature of the information disclosed and to whom disclosed.

31. UNCONTROLLABLE FORCES

31.1 Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement, other than an

existing obligation to pay money, when, and to the extent, failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" means any cause beyond the control of the Party failing to perform, including, but not limited to, flood, earthquake, storm, lightning, fire, epidemic, war, riot, civil disturbance or disobedience, labor dispute, labor or material shortage, sabotage, restraint by court order or public authority, and action or nonaction

43

by, or inability to obtain and maintain the necessary authorizations or approvals from, any governmental agency or authority, which by the exercise of due diligence such Party could not reasonably have been expected to avoid and which, by exercise of due diligence it has not overcome. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such facts to the other Party and shall exercise due diligence to remove such inability. Nothing contained herein shall be construed so as to require a Party to settle any strike or labor dispute in which it may be involved.

31.2 The failure of the Commission to approve the pass through to Edison's ratepayers of monies paid to Seller for Net Energy and Capacity under this Agreement, subject to the limitations of Sections 7.7 and 7.8, shall not be deemed to be an uncontrollable force.

31.3 In the event the applicable provisions of this Section 31 are invoked by Seller, Seller shall not be obligated to deliver Net Energy and Net Capacity and may interrupt or reduce deliveries to Edison, and Edison shall not be obligated to make any payments hereunder. In the event the applicable provisions of this Section 31 are invoked by Edison, except as provided in Section 15.7.3, Edison shall not be obligated to accept or pay for, and may require Seller to interrupt or reduce, deliveries of Net Energy.

32. PUBLICITY

Except as required for compliance with Commission rules and regulations, Edison shall not make any press releases, statements or other disclosures to the public

44

regarding the construction, construction schedule, start-up, operation and maintenance of the Project without the prior written consent of Seller.

33. WATER

Edison has entered into a Water Supply Agreement with Imperial Irrigation District (IID) dated December 22, 1981 which provides that IID will permit Edison to take from the Daffodil Canal, Delivery No. 1, water sufficient to satisfy the reasonable requirements of the Project. Pursuant to the E&C Contract referred to in Section 6.3 herein, Edison is required to assign the Water Supply Agreement to Seller. If for any reason whatsoever, Edison is unable to assign such Water Supply Agreement to Seller, then Edison shall maintain such Water Supply Agreement in effect and provide water to the Project in accordance with its terms. In such event, the cost of water for the Project paid by Edison shall be a credit against payments due Seller as calculated in accordance with Section 13.4

34. TRANSMISSION COST

34.1 Seller shall select the method for determining transmission service costs specified in Sections 34.2 or 34.3. Seller shall make this selection prior to the Date of Firm Operation.

34.2 Edison, with Seller's assistance, shall seek to contract with third parties in order to secure the most economic transmission path and service costs for the delivery of Net Energy from the Project to the Point of Interconnection at terms and conditions

45

acceptable to Seller. Seller shall be responsible for all costs incurred in the delivery of the Net Energy from the Project to the Point of Interconnection.

34.3 For the first 5 years of the Contract Term, the Seller shall pay for the transmission of the Net Energy from the Project to the Path of Interconnection at a transmission service cost based on a method comparable to the method which is in effect or will be negotiated for Edison's geothermal facilities at Brawley and Salton Sea. The exact, mutually agreed upon transmission service cost shall be established prior to the Date of Firm Operation and may be adjusted periodically as necessary. The transmission service cost shall consist of (i) a flat monthly service cost expressed in \$ per kilowatt per month and (ii) transmission losses expressed in % of Net Energy or delivery to the Point of Interconnection. The Seller may elect this Section 34.3 subject to the following conditions:

34.3.1 The date of initial delivery of Net Energy shall occur on or before August 1, 1985.

34.3.2 Seller shall upgrade Edison's 115/92 kV interconnection substation with the Interconnecting Utility by increasing its capacity by 25,000 kW. Seller shall pay the capital cost of the upgrade and pay the monthly charges related to the upgrade facilities under the terms and conditions of Edison's Rule No. 2 H for added facilities. If the Seller is unable to use the upgraded facilities, at any time, then Edison shall have the option to use such facilities and reduce the Seller's monthly charges accordingly. The upgrade must be complete prior

46

to Date of Firm Operation. At the end of 5 years, the transmission service costs shall be handled under the provisions of Section 34.2, unless the Seller elects to continue to use the provisions specified in is Section 34.3 after the first 5 years of the Contract Term absent the transmission service cost methodology contained in this Section 34.3. In the event of such election Section 34.4 shall not apply.

34.4 If the Seller exercises the provisions specified in Section 34.3 then for said five (5) year period, the applicable portion of the Interconnecting Utility electric system shall be considered part of the Edison electric system but only to the extent that the capacity payment provisions specified in Sections 15.7.2 and 15.7.3 apply.

35. RECORDS AND AUDITS

35.1 Edison and Seller shall maintain true and correct records in connection with this Agreement and all transactions related thereto and shall retain all such records for at least 24 months after termination of this Agreement.

35.2 No director, employee or agent of either Party shall give or receive any commission, fee, rebate, gift or entertainment of significant cost or value in connection with this Agreement, or enter into any business arrangement with any director, employee or agent of the other Party, except as a representative of one of the Parties, without prior written notification thereof to both Parties. Any representative(s) authorized by either Party may audit any and all records of the other Party pertaining to the administration of this

Agreement for the sole purpose of determining whether there has been compliance with this Section 35.2

47

35.3 Any representative(s) authorized by either party may from time to time and at any time after the date of this Agreement until 24 months after its termination make an audit of all records of the other Party in connection with payments made on a cost reimbursement basis under this Agreement. Audit may also cover procedures and controls with respect to such reimbursable costs. Upon completion of the audit, the Parties shall pay each other any amounts shown due by the audit. If the audited Party disagrees with the results of the audit, it may have an independent audit conducted, at its expense, by a third party acceptable to both Parties and pursuant to auditing instructions acceptable to both Parties. The findings of the audit shall be binding upon both Parties.

36. CONDITIONS PRECEDENT

This Agreement shall be effective upon execution of all the following documents:

36.1 1983 Geothermal Energy Contract between Chevron Geothermal Company of California and Southern California Edison.

36.2 Corporate Guarantee from Dravo Constructors, Inc. to Southern California Edison for the repayment of the Payment Tracking Account pursuant to Section 14.4.4.

36.3 Geothermal Sales Agreement between Chevron Geothermal Company of California and Heber Geothermal Company.

36.4 Geothermal Energy Agreement between Chevron Geothermal Company of California and Dravo Energy, Inc.

48

36.5 Assignment and Assumption Agreement between Chevron U.S.A., Inc. and Heber Geothermal Company.

36.6 The acceptance and execution of the final commitment letter from General Electric Credit Corporation to Heber Geothermal Company.

36.7 The approval of this Agreement by the Board of Directors or Management Committee, as appropriate, of the following entities:

36.7.1 Centennial Energy, Inc.

36.7.2 Dravo Corporation

36.7.3 General Electric Credit Corporation

37. AGREEMENT AND SIGNATURE

This Agreement is executed in multiple counterparts, each of which shall be deemed an original. The signatories hereto represent that they have been appropriately authorized to enter into this Agreement on behalf of the Party for whom they sign. This Agreement is hereby executed as of this 26th day of August, 1983.

AMENDMENT NO. 1 TO
POWER PURCHASE AND SALES AGREEMENT BETWEEN
HEBER GEOTHERMAL COMPANY AND
SOUTHERN CALIFORNIA EDISON COMPANY

1. PARTIES

The Parties to this Amendment No. 1 to the Power Purchase and Sales Agreement, hereinafter referred to as Amendment No. 1, are Heber Geothermal Company, a California partnership, hereinafter referred to as "HGC" and Southern California Edison Company, a California corporation, hereinafter referred to as "Edison," hereinafter sometimes referred to individually as "Party" and collectively as "Parties."

2. RECITALS

This Amendment No. 1 is made with reference to the following facts, among others:

2.1 On August 26, 1983, Edison and Chevron U.S.A Inc. executed the Power Purchase and Sales Agreement to provide the terms and conditions for the sale by Chevron and purchase by Edison of capacity and energy delivered to the Point of Interconnection from a 47 MW (net) electrical generating facility located at Heber, California utilizing geothermal steam as the prime mover energy source.

2.2 On August 26, 1983, Chevron assigned and HGC assumed Chevron's right, title and interest in the Power Purchase and Sales Agreement between Chevron and Edison, dated August 26, 1983.

2.3 On March 16, 1984, Chevron and HGC issued a Notice of Intention to Proceed to Edison. The Notice of Intention to Proceed stated Chevron and HGC's desire to construct the facilities necessary to proceed with the Power Purchase

and Sales Agreement, dated August 26, 1983.

2.4 The Public Utilities Commission of the State of California has issued Decision No. 83-09-054, which authorized the long-term power-purchase contract, to be known as Standard Offer No. 4, which established the terms and conditions of the sale of power produced by Qualifying Facilities and the purchase by Edison of electrical energy therefrom.

2.5 The Parties wish to provide definitive terms for the exercise of Seller's option to deliver Net Energy to the Point of Interconnection pursuant to the terms of Section 34.3 of the Power-Purchase and Sales Agreement by electing to pay for the upgrade of Edison's 115/92 kV substation facility and agreeing to pay the flat monthly transmission service cost, as specified in Section 34.3 of the Power-Purchase and Sales Agreement, commencing on August 1, 1985.

2.6 The Parties, therefore, desire to amend the Agreement to modify the provisions covering (i) payments by Edison for energy, (ii) payments by Edison for capacity and (iii) transmission cost to be paid by HGC as Seller.

3. Agreement: The Parties agree to amend the Power Purchase and Sales Agreement as follows:

2

4. Effective Date: This Amendment No. 1 shall become effective upon execution by the Parties and consent by Chevron U.S.A., Inc., represented by its agent Chevron Resources Company.

5. Amendment to Section 4:

The last sentence in Section 4.4 is deleted in its entirety and replaced with the following:

The prior written notice requirement in this Section 4.4 will apply in the event Edison reduces Seller's capacity as outlined in Sections 12.2, 13.3 and 15.4.1.3.

6. Amendment to Section 14:

Section 14 is deleted in its entirety and replaced with the following:

Seller shall receive a monthly payment for Net Energy received and accepted by Edison at the Point of Interconnection pursuant to the provisions of this Section 14.

14.1 Net Energy Payments - First Period

14.1.1 During the First Period of the Contract Term, which shall be defined as the first 10 years of the Contract Term commencing upon date of Firm Operation but not later than five years from the date of execution of this Contract, Seller shall be paid a Monthly Energy Payment for Net Energy received and accepted by Edison at the Point of Interconnection. The Monthly Energy Payment shall be based on the Energy Payment Option selected by the Seller prior to the date of Firm Operation. The Energy Payment Options shall be selected by the Seller prior to the date of Firm Operation in increments of 10% with a total equal to 100%.

3

[100] % Energy Payment Option No. 1 -- Forecast of Annual
Marginal Cost of Energy in effect at the date of

execution of this Amendment No. 1. (Appendix B)

[0] % Energy Payment Option No. 2 -- Edison's Avoided Operating Cost.

14.1.2 Seller shall be paid a Monthly Energy Payment for Net Energy received and accepted by Edison at the Point of Interconnection during each month in the First Period of the Contract Term pursuant to the following formula:

Monthly Energy Payment = $[(A \times D) + (B \times D) + (C \times D)] \times E$

Where A = kwh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kwh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kwh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time-differentiated energy price from the Forecast of Annual Marginal Cost of Energy, multiplied by the decimal equivalent of the percentage of the forecast specified in Section 14.1.1, and
(ii) the appropriate time-differentiated energy price from Edison's Avoided Operating Cost multiplied by the decimal equivalent of the percentage of Edison's Avoided Operating Cost specified in Section 14.1.1.

4

E = Energy Loss Adjustment Factor For Remote Generating Sites*

14.2 Net Energy Payments - Second Period

During the Second Period of the Contract Term, which shall be defined as the period commencing upon expiration of the First Period and continuing for the remainder of the Contract Term, Seller shall be paid a Monthly Energy Payment for Net Energy received and accepted by Edison at the Point of Interconnection based on Edison's Avoided Operating Cost. The Monthly Energy Payment shall be calculated by the following formula:

Monthly Energy Payment = kwh purchased by Edison for each on-peak, mid-peak, and off-peak time period defined in Edison's Tariff Schedule No. TOU-8

x Edison's Avoided Operating Cost by time of delivery for each time period

x Energy Loss Adjustment Factor For Remote Generating Sites*

7. Amendment to Section 15:

Section 15 is deleted in its entirety and replaced with the following:

Seller shall sell to Edison and Edison shall purchase from Seller Capacity pursuant to the Capacity Payment Option selected by the Seller in Section 15.1.

* The Energy Loss Adjustment Factor For Remote Generating Sites shall be 1.0, subject to adjustment by Commission orders and rulings.

5

15.1 The Seller hereby elects Option B from the following Capacity Payment Options:

[] Option A - As-Available capacity based upon Forecast of Annual As-Available Capacity Payment Schedule (Appendix A).

[X] Option B - Firm Capacity

Capacity Payment Schedule contained in Edison's Standard Offer No. 2 for Firm Power Purchases in effect at the time of Amendment No. 1 execution. Capacity Price (Firm Capacity): \$147/kW--Year.

15.2.1 Capacity Payment Option A -- As Available Capacity.

If Seller selects Capacity Payment Option A, Seller shall be paid a Monthly Capacity Payment calculated pursuant to the following formula:

Monthly Capacity Payment = (A x D) + (B x D) + (C x D)

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule (Appendix A) or the Capacity Payment Schedule contained in Edison's Standard Offer No. 1 for As-

6

Available Power Purchases, as updated periodically and accepted by the Commission.

15.2.1.1 During the First Period of the Contract Term, the formula shall be computed with D equal to the appropriate time-differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule (Appendix A).

15.2.1.2 During the Second Period of the Contract Term, the formula shall be computed with D equal to the appropriate time-differentiated capacity price from the Capacity Payment Schedule contained in Edison's Standard Offer No. 1 for As-Available Power Purchase as updated periodically and accepted by the Commission, but not less than the greater of (i) the appropriate time-differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule (Appendix A) in effect at the end of the First Period, or (ii) the appropriate time-differentiated capacity price from the Capacity Payment Schedule contained in Edison's Standard Offer No. 1 for As-Available Power Purchases for the beginning of the Second Period.

15.2.2 Capacity Payment Option B - Firm Capacity Purchase

If Seller selects Capacity Payment Option B, Seller shall provide to

Edison for the Contract Term the Capacity specified in Section 3.6, or as adjusted pursuant to Section 13.3, and Seller shall be paid as follows:

15.2.2.1 If Seller meets the performance requirements set forth in Section 15.2.2.2, Seller shall be paid a Monthly Capacity Payment, beginning from the date of

7

Firm Operation equal to the sum of the on-peak, mid-peak, and off-peak Capacity Period Payments. Each capacity period payment is calculated pursuant to the following formula:

Monthly Capacity Period = A x B x C x D Payment

Where A = Capacity Price specified in Section 15.1 based on the Capacity Payment Schedule contained in Edison's Standard Offer No. 2 for Firm Power Purchases in effect at the time of Amendment No. 1 execution.

B = Conversion factors to convert annual capacity prices to monthly payments by time of delivery as specified in Appendix C and subject to periodic modifications as approved by the Commission.

C = Capacity specified in Section 3.6 or as adjusted pursuant to Section 13.3.

D = Period Performance Factor: (Period kWh Purchased by Edison (Limited by the Level of

Period
Performance
Factor = Capacity))

(0.9 x Capacity x (Period Hours minus Allowable
Maintenance Hours)

The Period Performance Factor cannot exceed 1.0. When the allowable maintenance hours equal the period hours, the Period Performance Factor shall equal 1.0.

8

15.2.2.2 Minimum Performance Requirement in Capacity Payment Option B to Receive Full Capacity Payment:

a. The Capacity shall be available for all of the on-peak hours as defined in Tariff Schedule No. TOU-8 in each of the Peak Months subject to a 20% allowance for Forced Outages for each month.

b. There is no minimum performance requirement for the rest of the year.

15.2.2.3 Capacity Bonus Payment. For Capacity Payment Option B, Seller may receive a Capacity Bonus Payment as follows:

a. Bonus During Peak Months. For a Peak Month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 15.2.2.2

have been met, and (ii) the on-peak capacity factor exceeds 85%.

b. Bonus During Non-Peak Months

For a non-peak month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in section 15.2.2.2 have been met, (ii) the on-peak capacity factor for each Peak Month during the year was at least 85%, and (iii) the on-peak capacity factor for the non-peak month exceeds 85%.

c. For any eligible month, the Capacity Bonus Payment shall be calculated as follows:

Capacity Bonus Payment = A x B x C x D

Where A = (1.2 x On-Peak Capacity Factor) - 1.02

9

Where the On-Peak Capacity Factor, not to exceed 1.0, is calculated as follows:

On-Peak Capacity Factor = (Period kWh Purchased by Edison (Limited by the Level of Capacity))

[(Capacity) x (Period Hours minus Allowable Maintenance Hours)]

B = Capacity Price specified in Section 15.1 for Capacity Payment Option B

C = 1/12

D = Capacity specified in Section 3.6

d. When Seller is entitled to receive a Capacity Bonus Payment, the Monthly Capacity Payment shall be the sum of the Monthly Capacity Payment pursuant to Section 15.2.2.3 and the Monthly Capacity Bonus Payment pursuant to this Section 15.2.2.3.

15.2.2.4 For Capacity Payment Option B, Seller shall be paid for capacity in excess of Capacity as specified in Section 3.6, or as adjusted pursuant to Section 13.3, based on as-available capacity price contained in Edison's Standard Offer No. 1 for As-Available Power Purchases Capacity Payment Schedule, as updated and approved by the Commission.

15.3 Scheduled Maintenance Allowances

The allowance for scheduled maintenance is as follows:

10

15.3.1 Outage periods for scheduled maintenance shall not exceed 840 hours (35 days) in any 12-month period. This allowance may be used in increments of an hour or longer on a consecutive or nonconsecutive basis.

15.3.2 Seller may accumulate unused maintenance hours on a year-to-year basis up to a maximum of 1,080 hours (45 days). This accrued time must be used only for major overhauls, as such major overhauls are reasonably defined by the Seller.

15.4 Failure to Meet Minimum Performance Requirements

15.4.1 Except when caused by uncontrollable forces, if Seller fails to meet the minimum performance requirements as set forth in Section 15.2.2.2. The following shall apply:

15.4.1.1 Seller may be placed on probation for a period not to exceed 15 months or as otherwise agreed to by the Parties. During this period, the monthly capacity payment will be based on the level of Capacity actually made available as calculated in Section 15.2.2.1.

15.4.1.2 If Seller meets or demonstrates to Edison pursuant to Section 12.2 that it can meet its minimum requirement during the probationary period, Edison shall reinstate regular capacity payments.

15.4.1.3 If Seller fails to meet its minimum requirements during the probationary period Edison may derate the Capacity to the greater of the Capacity actually made available when the minimum requirements stated in Section 15.2.2.2 were not met, or the Capacity at which Seller is reasonably likely to meet the minimum

11

requirements. In either case, the quantity by which the Capacity is reduced shall be Considered terminated without prescribed notice as provided in Section 4.4.

15.4.2 If Seller is prevented from meeting the minimum performance requirement because of a schedule outage, a Forced Outage or an Emergency on the Edison electric system, Edison shall continue to make capacity payments to Seller. Under Option B, the calculations of capacity payments will treat hours of Forced Outage and Emergency on the Edison system the same as scheduled maintenance outages.

15.4.3 If deliveries are interrupted or reduced because of uncontrollable forces, Edison shall continue to make capacity payments to Seller for 90 days from the occurrence of the uncontrolled force event. Under Option B, the calculation of capacity payments will treat hours of interruption or reduction by reason of an uncontrollable force, the same as scheduled maintenance outages with reductions in Capacity treated on a pro rata basis.

8. Amendment to Section 34:

Section 34 is deleted in its entirety and replaced with the following:

34.1 Edison, with Seller's assistance, shall seek to contract with Interconnecting Utility and/or third parties in order to secure the most economic transmission path and service costs for the delivery of Net Energy from the Project to the Point of Interconnection during the Contract Term at terms and conditions acceptable to Seller. Seller shall be responsible for all costs including transmission losses, incurred in the delivery of the Net Energy from the Project to the Point of Interconnection.

12

The exact, mutually agreed-upon transmission service cost shall be established prior to the Date of Firm Operation and may be adjusted periodically as necessary. The transmission service payments shall consist of (i) a flat monthly service charge expressed in dollars per kilowatt per month and (ii) transmission losses expressed in percentage of Net Energy lost in the transmission of Net Energy from the Project to the Point of Interconnection.

34.2 Notwithstanding Section 34.1, for the first five years of the

Contract Term, the Seller shall pay for the transmission of the Net Energy from the Project to the Point of Interconnection at a transmission service cost based on a method of transmission comparable to the method which is then in use or would be negotiated for Edison's geothermal facilities at Brawley and Salton Sea utilizing transmission facilities in existence at that point in time. Power-exchange arrangements which are in effect or might be in effect for the transmission of the energy generated at Edison's geothermal facilities at Brawley and Salton Sea will apply to the provisions of this Section 34.2 only to the extent there is uncommitted capacity available in such exchange arrangements at the date of Firm Operation. The provisions of this Section 34.2 are subject to the following conditions:

34.2.1 The date of initial delivery of Net Energy shall occur on or before August 1, 1985. If Seller does not deliver Net Energy to the Point of Interconnection by August __, 1985, Seller shall commence making the flat monthly transmission service payments on August 1, 1985 to retain the benefit of this Section 34.2.1.

13

34.2.2 Seller shall upgrade Edison's 115/92 kV interconnection substation with the Interconnecting Utility by increasing its capacity by 25,000 kVA prior to Date of Firm Operation. Seller shall pay the capital cost of the upgrade and pay the monthly charges related to the upgrade facilities under the terms and condition of Edison's Rule No. 2 H for added facilities. If the Seller is unable to use the upgraded facilities, at any time, then Edison shall have the right to use such facilities.

34.3 For the first five years of the Contract Term, the applicable portion of the Interconnecting Utility electric system shall be considered part of the Edison electric system for the application of Sections 15.4.2. and 15.4.3.

34.4 Edison shall prepare and mail a bill to Seller for the transmission service payments provided for in Sections 34.1 and 34.2 within 30 days of the end of each month. Seller shall pay such bills within 20 calendar days of the receipt of said bill. The provisions contained within Section 35 shall apply to the records generated in the preparation and mailing of such bill.

9. Effect of this Amendment No. 1

Except as amended herein, all terms, covenants and conditions contained in the Power Purchase and Sales Agreement shall remain in full force and effect.

14

10. Signature Clause

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 1 on behalf of the Party for whom they sign. This Amendment No. 1 is hereby executed as of this 11th day of December, 1984.

Title Vice-President

Exhibit 10.3.6

SETTLEMENT AGREEMENT AND
AMENDMENT NO. 2 TO POWER
PURCHASE CONTRACT BETWEEN
HEBER GEOTHERMAL COMPANY AND

1. PARTIES

The Parties to this Settlement Agreement and Amendment No. 2 ("Amendment") to the Power Purchase and Sales Agreement ("Agreement"); are Heber Geothermal Company, a California partnership, hereinafter referred to as "HGC" or "Seller", and Southern California Edison Company, a California corporation, hereinafter referred to as "Edison," hereinafter sometimes referred to individually as "Party" and collectively as "Parties."

2. RECITALS

This Amendment No. 2 is made with reference to the following facts, among others:

2.1 On August 26, 1983, Edison and Chevron U.S.A., Inc. executed the Agreement to provide the terms and conditions for the sale by Chevron and purchase by Edison of Capacity and Energy delivered to the Point of Interconnection from a 47 MW (net) electrical generating facility located at Heber, California utilizing geothermal steam as the prime mover energy source.

2.2 On August 26, 1983, Chevron assigned and HGC assumed Chevron's right, title and interest in the Agreement between Chevron and Edison, dated August 26, 1983.

2.3 On December 11, 1984, the Parties executed Amendment No. 1 to the Agreement.

2.4 In June 1993, a dispute arose between the Parties regarding Seller's ability to deliver Capacity in accordance with the terms and conditions of the Agreement. On September 10, 1992, HGC performed a Capacity demonstration in accordance with Edison's procedures. HGC performed the demonstration under protest, as HGC contested Edison's right to request such demonstration. In a letter dated June 10, 1993, Edison informed HGC that, based on the results of the September 1992 demonstration, HGC's Capacity was reduced from 47 MW to 40 MW. Beginning in June 1993, and continuing to the present, Edison has calculated HGC's capacity payment based on a capacity of 40 MW. Edison also requested HGC to repay \$2,967,037.37 in capacity payments resulting from the capacity deration. On July 14, 1993, HGC performed a second capacity demonstration, which showed that the plant could generate 45 MW.

2.5 In March 1995, the Parties reached agreement on principles to resolve the dispute. These principles include the obligation of Seller to repay any capacity overpayments and Edison to adjust Statements of Energy Purchased pursuant to this Amendment.

2.6 The Parties desire to amend the Power Purchase and Sales Agreement to (i) reduce the Capacity from 47 MW to 45 MW, (ii) clarify the circumstances leading to performance of a Capacity demonstration, (iii) set forth the protocol for and

consequences of such demonstration, and (iv) modify certain aspects of the probation and deration provisions of this Agreement.

3. AGREEMENT

Therefore, in consideration of the mutual covenants and agreements set forth herein and for other good and valuable consideration, receipt of which is hereby acknowledged, the Parties agree as follows:

3.1 Edison hereby relinquishes its claims that (i) HGC's Capacity should be derated from 47,000 kW to 40,000 kW, and (ii) HGC must repay to Edison \$2,967,037.37 in unearned capacity payments plus interest.

3.2 The Parties agree that HGC's Capacity shall be 45,000 kW, effective as of May 1, 1993.

3.3 HGC agrees that it owes Edison \$926,310.86 in unearned Capacity Payments and interest resulting from the Capacity reduction set forth in Section 3.2, above. Edison agrees that it owes HGC \$764,856.96, representing the Capacity payments which HGC would have earned based on a Capacity of 45,000 kW effective as of May 1, 1993. The net difference of these amounts owed is \$161,453.90 which Edison shall offset against HGC's power purchase payment for the first full payment and billing cycle following execution of this Amendment in full satisfaction of all amounts owed as described in this Section.

3.4 Mutual Releases

3

3.4.1 Edison, on behalf of itself and each of its successors and assigns by operation of law or otherwise hereby releases and discharges HGC, its proprietors, parents, subsidiaries, partners, partnerships, limited partnerships, limited partners, affiliates, related entities, agents, attorneys, employees, successors and assigns by operation of law or otherwise, and each of them from any and all rights, claims, causes of action, damages, liabilities, losses, and costs, whether known or unknown, Edison may ever have had, may now have, or may hereafter acquire against HGC arising out of, relating to or in connection with the dispute described in Recital 2.4.

3.4.2 HGC, on behalf of itself and each of its successors and assigns by operation of law or otherwise hereby releases and discharges Edison, its proprietors, parents, subsidiaries, partners, partnerships, limited partnerships, limited partners, affiliates, related entities, agents, attorneys, employees, successors and assigns by operation of law, or otherwise, and each of them from any and all rights, claims, causes of action, damages, liabilities, losses, and costs, whether known or unknown, HGC may ever have had, may now have, or may hereafter acquire against Edison arising out of, relating to or in connection with the dispute described in Recital 2.4.

3.5 The Agreement is hereby amended as follows:

3.5.1 Replace Section 3.6 to read in its entirety as follows:

"3.6 Capacity: 45,000 kW, which is dedicated to Edison and shall be made available to Edison at the Point of Interconnection."

3.5.2 Replace Section 12.2 to read in its entirety as follows:

4

"12.2 If Seller fails to meet the performance requirements specified in Section 15 and is placed on probation, Edison shall have the right, at its sole discretion, to require the Seller to demonstrate the ability of the Project to generate Capacity during each peak hour of one peak day during the probationary period. The Seller shall, at its expense, conduct such demonstration at a time mutually agreed upon by the Parties. Such agreement shall not be unreasonably withheld. The demonstration shall be conducted in accordance with the annual firm capacity demonstration test procedures attached hereto as Exhibit I."

3.5.3 Replace Section 13.2 to read in its entirety as follows:

"13.2 Seller shall sell to Edison, and Edison shall purchase from Seller, Capacity as specified in Sections 3.6 or as adjusted pursuant to Section 13.3."

3.5.4 Replace Section 13.3 to read in its entirety as follows:

"13.3 Seller may reduce the amount of Capacity at any time by giving written notice thereof to Edison pursuant to Section 4.4. Edison may reduce the amount of Capacity as a result of a demonstration test pursuant to Section 12.2. The amount by which Capacity is reduced shall be deemed a reduction in Capacity pursuant to Section 4. Either Party may request the other Party to agree in writing to a new Capacity whenever it appears that Capacity has changed."

3.5.5 Replace Section 15.4.1.2 to read in its entirety as follows:

5

"15.4.1.2 If Seller is placed on probation, Edison shall remove Seller from probation and reinstate Seller's Capacity and regular capacity payments in the following events:

(a) Edison requires Seller to perform a capacity demonstration pursuant to Section 12.2 and Seller demonstrates that it can generate Capacity; or

(b) Edison does not require Seller to perform a capacity demonstration and Seller meets the minimum performance requirements as set forth in Section 15.2.2.2 during the probationary period."

3.5.6 Replace Section 15.4.1.3 to read in its entirety as follows:

"15.4.1.3 If Seller is placed on probation, Edison shall derate Seller's Capacity in the following events:

(a) Edison requires Seller to perform a capacity demonstration pursuant to Section 12.2 and Seller fails to demonstrate that it can generate Capacity, then Edison shall derate the Capacity to the lowest level generated by Seller and recorded by IID during any hour over the test period; or (b) Edison does not require Seller to perform a capacity demonstration and Seller fails to meet the minimum performance requirements as set forth in Section 15.2.2.2 during the probationary period, then Edison shall derate the Capacity to the greater of the Capacity actually made available when the minimum requirements stated in Section 15.2.2.2 were not met, or the Capacity at which Seller is reasonably likely to meet the minimum requirements. In either case, the quantity by

6

which the Capacity is reduced shall be considered terminated without prescribed notice as provided in Section 4.4.

4. SUCCESSORS AND ASSIGNS

Each Party agrees that this Agreement shall be binding on its respective successors and assigns. The Parties further agree that the Agreement shall remain fully effective even if the facts and assumptions upon which the parties are currently acting turn out to be different from what they now believe them to be.

5. PRIOR CORRESPONDENCE

The parties agree that this Amendment sets forth the entire agreement and understanding of the Parties concerning the subject matter of this Amendment, and that in entering into this Amendment, the Parties have not relied on any promises or representations that are not specifically described in this Amendment.

6. ACCEPTANCE OF TERMS

By the signatures below, both Parties confirm the acceptance of and the effectiveness of the terms and conditions set forth above.

7. OTHER PROVISIONS

Except as specifically set forth in this Amendment all other provisions of the Agreement are unchanged and unaffected.

7

8. EFFECTIVE DATE

This Amendment No. 2 shall be effective as of May 1, 1993, with regard to the change in Contract Capacity from 47 MW to 45 MW. All other provisions of this Amendment No. 2 shall be effective as of April 30, 1995.

9. SIGNATURE CLAUSE

This Amendment No. 2 is executed in two originals. The signatories hereto represent that they have been duly authorized to enter into this Amendment No. 2 on behalf of the Party for whom they sign.

SOUTHERN CALIFORNIA EDISON COMPANY

POWER PURCHASE CONTRACT

BETWEEN

SOUTHERN CALIFORNIA EDISON COMPANY

AND

SECOND IMPERIAL GEOTHERMAL COMPANY

I, Glenn S. Burns, Secretary of Second Dravo Geothermal, Inc. do hereby certify that the foregoing Special Power of Attorney is an exact duplicate of that executed on the 15th of April 1985.

In Witness Whereof, I hereby set my hand this 7th day of May 1985.

/s/ Glenn S. Burns

Secretary

Subscribed and sworn to before me this 7th day of May 1985.

/s/ Audrey J. Janosco

Notary Public

I, William C. Rickards, Secretary of Dravo Constructors, Inc. do hereby certify that the foregoing Power Purchase Contract between Southern California Edison Company and Second Imperial Geothermal Company is an exact duplicate of the original which is maintained by Dravo Constructors, Inc.

In Witness Whereof, I have hereunto set my hand and seal of said corporation this 7th day of May, 1985.

/s/ William C. Rickards

1. PROJECT SUMMARY

This Contract is entered into between Southern California Edison Company ("Edison") and Second Imperial Geothermal Company ("Seller"). Seller is

willing to construct, own, or lease, and operate a Qualifying Facility and sell electric power to Edison and Edison is willing to purchase electric power delivered by Seller to Edison at the Point of Interconnection pursuant to the terms and conditions set forth as follows:

1.1 All Notices shall be sent to Seller at the following address:
Second Imperial Geothermal Company
c/o Dravo Constructors, Inc.
226 West Brokaw Road
San Jose, California 95110
Attn: S.D. Hayward

1.2 Seller's Generating Facility:

a. Nameplate Rating: 44,000 kW.

b. Location: Heber, California

c. Type (check one):

 Cogeneration Facility

 x Small Power Production Facility

d. Delivery of power to Edison at a nominal 230,000 volts.

e. Seller shall commence construction of the Generating Facility by February, 1998.

f. Generating Facility Designation: Imperial Geothermal Unit 2.

1.3 Edison Customer Service District:

Eastern Division
Palm Springs District
Palm Springs, California

1.4 Location of Edison Operating Switching Center:
Devers Substation

1.5 Contract Capacity: 40,000 kW

1.5.1. Estimated as-available capacity: 0kW.

1.6 Expected annual production: 280,000,000 kW

1.7 Expected Firm Operation: May, 1989.

1.8 Contract term: 30 years.

1.9 Operating Options pursuant to Section 5: (Check One)

 x Operating Option I. Excess Generator output dedicated to
--- Edison. No electric service or standby service required
 from Edison.

1.10 The Capacity Payment Option selected by Seller pursuant to Section 8.1 shall be: (Check One)

 Option A - As-available capacity based upon:

 Standard Offer No. 1 Capacity Payment Schedule, or

 Forecast of Annual As-Available Capacity Payment
--- Schedule.

 The as-available capacity price (first year):

\$ kw-yr. (Appendix A)

x Option B - Firm Capacity (Check One)

2

x Standard Offer No. 2 Capacity Payment

Schedule in effect at time of Contract execution.

____ Standard Offer No. 2 Capacity Payment Schedule in effect at
time of Firm Operation of first generating unit.

1.11 The Energy Payment Option selected by Seller pursuant to
Section 8.2 shall be: (Check One)

x Option 1 - a Forecast of Annual Marginal Cost of Energy in
--- effect at date of execution of this Contract. (Appendix B)

Option 2 - Levelized Forecast of Marginal Cost of Energy
--- in effect at date of execution of this Contract.

Levelized Forecast for expected date of Firm
Operation is (cent)/kWh. If Seller's Generating
Facility is an oil/natural gas fueled cogenerator,
Seller may not select Option 2.

For the energy payment refund pursuant to Section 8.5 under
Option 2, Edison's Incremental Cost of Capital is 15%.
Seller may change once between Options 1 and 2, provided
Seller delivers written notice of such change at least 90
days prior to the date of First operation:

For Option 1 or 2, Seller elects to receive the following
percentages in 20% increments, the total of which shall
equal 100%:

3

100 Percent of Forecast of Marginal Cost of Energy (Annual
--- or Levelized), not to exceed 20% of the annual forecast
for oil/ natural gas fueled cogenerators, and

0 Percent of Edison's published avoided cost of energy
--- based on Edison's full avoided operating costs as
updated periodically and accepted by the Commission.

Option 3 - Incremental Energy Rate. Seller may select:

Forecast of Incremental Energy Rate in effect at date
--- of execution of this Contract (Appendix C),
or

A range in increments of 100 Btu/kWh above and below
--- the forecast of incremental energy rates for each
year during the First Period of the Contract Term as
follows:

Year	Range	Year	Range	Year

1.12 Metering Location (Check one)

4

Seller elects metering location pursuant to Section 7 as follows:

 x Edison's side of the Point of Interconnection

 Seller's side of the Point of Interconnection.
 Loss compensation factor is equal to _____
 pursuant to Section 7.2.

GENERAL TERMS & CONDITIONS

2. DEFINITIONS

When used with initial capitalizations, whether in the singular or in the plural, the following terms shall have the. following meanings:

- 2.1 Adjusted Capacity Price: The \$/kW-yr capacity purchase price based on the Capacity Payment Schedule in effect at time of Contract execution for the time period beginning on the date of Firm Operation for the first generating unit and ending on the date of termination or reduction of Contract Capacity under Capacity Payment Option B.
- 2.2 Appendix A: Forecast of Annual As Available Capacity Payment Schedule.
- 2.3 Appendix B: Forecast of Annual Marginal Cost of Energy
- 2.4 Appendix C: Forecast of Incremental Energy Rates.
- 2.5 Capacity Payment Schedule(s): Published capacity payment schedule(s) as authorized by the Commission for as-available or firm capacity.

5

- 2.6 Cogeneration Facility: The facility and equipment which sequentially generate thermal and electrical energy as defined in Title 18, Code of Federal Regulations, Section 292.202.
- 2.7 Commissions: The Public Utilities Commission of the State of California.
- 2.8 Contracts: This document and Appendices, as amended from time to time.

- 2.9 Contract Capacity: The electric power producing capability of the Generating Facility which is committed to Edison.
- 2.10 Contract Capacity Price: The capacity purchase price from the Capacity Payment Schedule approved by the Commission for Capacity Payment Option B.
- 2.11 Contract Term: Period in years commencing with date of Firm Operation for the first generating unit(s) during which Edison shall purchase electric power from Seller.
- 2.12 Current Capacity Price: The \$/kw-yr capacity price provided in the Capacity Payment Schedule determined by the year of termination or reduction of Contract Capacity and the number of years from such termination or reduction to the expiration of the Contract Term for Capacity Payment Option B.
- 2.13 Edison: The Southern California Edison Company.

6

- 2.14 Edison Electric System Integrity: The state of operation of Edison's electric system in a manner which is deemed to minimize the risk of injury to persons and/or property and enables Edison to provide adequate and reliable electric service to its customers.
- 2.15 Emergency: A condition or situation which in Edison's sole judgment affects Edison Electric System Integrity.
- 2.16 Energy: Kilowatthours generated by the Generating Facility which are purchased by Edison at the Point of Interconnection.
- 2.17 Firm Operation: The date agreed on by the parties to the PPA on which each Facility is determined to be a reliable source of generation and on which such unit can be reasonably expected to operate continuously at its effective rating (expressed in kW). Firm Operation shall be demonstrated by a seventy-two (72) hour continuous demonstration test at 85% of the Contract Capacity.
- 2.18 First Period: The period of the Contract Term specified in Section 3.1.
- 2.19 Forced Outages: Any outage other than a scheduled outage of the Generating Facility that fully or partially curtails its electrical output.

7

- 2.20 Generating Facility: All of Seller's generators, together with all metering, protective and other associated equipment and improvements, necessary to produce electrical energy at Seller's Facility and deliver such power to the Interconnecting Utility's electric system, excluding associated land, land rights, and interests in land.

- 2.21 Generator: The generator(s) and associated prime mover(s), which are a part of the Generating Facility.
- 2.22 Incremental Heat Rate(s): Those Edison system values expressed in Btu/kWh by time of delivery for the Summer and Winter Periods which are authorized and adopted by the Commission to be used in the calculation of Edison's published avoided cost of energy.
- 2.23 Interconnecting Utility: The electric utility, or any other utility which takes delivery of electrical energy generated by the Generating Facility.
- 2.24 KVAR: Reactive kilovolt-ampere, a unit of measure of reactive power.
- 2.25 Operate: To provide the engineering, purchasing, repair, supervision, training, inspection, testing, protection, operation, use, management, replacement, retirement, reconstruction, and

8

maintenance of and for the Generating Facility in accordance with applicable California utility standards and good engineering practices.

- 2.26 Operating Representatives: Individual(s) appointed by each Party for the purpose of securing effective cooperation and interchange of information between the Parties in connection with administration and technical matters related to this Contract.
- 2.27 Parties: Edison and Seller.
- 2.28 Party: Edison or Seller.
- 2.29 Peak Months: Those months which the Edison annual system peak demand could occur.

Currently, but subject to change with notice, the peak months for the Edison system are June, July, August, and September.

- 2.30 Point of Interconnection: The point where the electrical energy generated by the Seller, at the Generating Facility, is delivered to the Edison electric system.
- 2.31 Protective Apparatus: That equipment and apparatus installed by Seller and/or Interconnecting Utility necessary for proper and safe operation of the Generating Facility in parallel with the Interconnecting Utility's electric system.

9

- 2.32 Qualifying Facility: Cogeneration or Small Power Production Facility which meets the criteria as defined in Title 18, Code of Federal Regulations, Section 292.201 through 293.207.
- 2.33 Second Period: The period of the Contract Term specified

in Section 3.2.

- 2.34 Seller: The Party identified in Section 1.0.
- 2.35 Seller's Facility: The premises and equipment of Seller located as specified in Section 1.2.
- 2.36 Small Power Production Facility: The facilities and equipment which use biomass, waste, or Renewable Resources, including wind, solar, geothermal, and water, to produce electrical energy as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.
- 2.37 Summer Period: Defined in Edison's Tariff Schedule No. Tou-8 as now in effect or as may hereafter be authorized by the Commission.
- 2.38 Tariff Schedule No. TOU-8: Edison's time-of-use energy tariff for electric service exceeding 500 kW, as now in effect or as may hereafter be authorized by the Commission.
- 2.39 Uncontrollable Forces: Any occurrence beyond the control of a Party which causes that Party to be unable to perform its

10

obligations hereunder and which a Party has been unable to overcome by the exercise of due diligence, including but not limited to flood, drought, earthquake, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, action or inaction of legislative, judicial, or regulatory agencies, or other proper authority, which may conflict with the terms of this Contract, or failure, threat of failure or sabotage of facilities which have been maintained in accordance with good engineering and operating practices in California.

- 2.40 Winter Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the Commission.

3. TERM

This Contract shall be effective upon execution by the Parties and shall remain effective until either Party gives 90 days prior written notice of termination to the other Party, except that such notice of termination shall not be effective to terminate this Contract prior to expiration of the Contract Term specified in Section 1.8.

11

- 3.1 The First Period of the Contract Term shall commence upon date of Firm Operation but not later than five years from the date of execution of this Contract.
 - a. If the Contract Term specified in Section 1.8 is 15 years, the First Period of the Contract Term shall be for five years.

- b. If the Contract Term specified in Section 1.8 is 20, 25, or 30 years, the First Period of the Contract Term shall be for 10 years.
- c. For Energy Payment Option 3 only, the First Period of the Contract Term shall be 15 years, but shall not extend beyond 1998.

3.2 The Second Period of the Contract Term shall commence upon expiration of the First Period and shall continue for the remainder of the Contract Term.

4. GENERATING FACILITY

4.1 Ownership

The Generating Facility shall be owned or leased by Seller.

4.2 Design

4.2.1 Seller, at no cost to Edison, shall:

- a. Design the Generating Facility.

12

- b. Acquire all permits and other approvals necessary for the construction, operation, and maintenance of the Generating Facility.
- c. Complete all environmental impact studies necessary for the construction, operation, and maintenance of the Generating Facility.

4.2.2 Edison shall have the right to:

- a. Review the design of the Generating Facility's electrical system. Such review shall be required if necessary to maintain Edison Electric System Integrity when in parallel with the Edison electric system. Such review may include, but not be limited to the Generator, governor, excitation system, synchronizing equipment, protective relays, and neutral grounding. The Seller shall be notified in writing of the outcome of the Edison review within 30 days of the receipt of all specifications for the Generating Facility's electrical system. Any flaws perceived by Edison in the design shall be described in Edison's written notice.
- b. Edison shall have the right to request modifications to the design of the Generating Facility's electrical system. Such modifications shall be required if necessary to maintain

Edison Electric System Integrity when in parallel with the Edison electric system.

4.3 Construction

Edison shall have the right to review, consult with, and make recommendations regarding Seller's construction schedule and to monitor the construction and start-up of the Project. Seller shall notify Edison, at least one year prior to Firm Operation, of changes in Seller's Construction Schedule which may affect the date of Firm Operation.

4.4 Operation

4.4.1 The Generating Facility and Seller's Protective Apparatus shall be operated and maintained in accordance with applicable California utility industry standards and good engineering practices with respect to synchronizing, voltage and reactive power control. Edison shall have the right to monitor operation of the Project and may require changes in Seller's method of operation if such changes are necessary, in Edison's sole judgment, to maintain Edison Electric System Integrity.

4.4.2 Seller shall notify in writing Edison's Operating Representative at least 14 days prior to the initial delivery of electrical energy

from the Generating Facility to the Point of Interconnection. Edison shall have the right to have a representative present.

4.4.3 Edison shall have the right to require Seller to curtail or reduce the delivery of electrical energy from the Generating Facility to the Point of Interconnection, whenever Edison determines, in its sole judgment, that such curtailment or reduction is necessary to facilitate maintenance of Edison's facilities, or to maintain Edison Electric System Integrity. Each Party shall endeavor to correct, within a reasonable period, the condition on its system which necessitates the curtailment or reduction delivery of electrical energy from the Generating Facility. The duration of the curtailment or reduction of delivery of electrical energy from the Generating Facility shall be limited to the period of time such a condition exists.

4.4.4 Each Party shall keep the other Party's Operating Representative informed as to the operating schedule of their respective facilities affecting each other's operation hereunder, including any reduction in Contract Capacity availability. In addition, Seller shall provide

Edison with reasonable advance notice regarding its scheduled outages including any reduction

15

Contract Capacity availability. Reasonable advance notice is as follows:

SCHEDULED OUTAGE EXPECTIVE DURATION	ADVANCE NOTICE TO EDISON
Less than one day	24 Hours
One day or more (except major overhauls)	1 Week
Major overhaul	6 Months

- 4.4.5 Notification by each Party's Operating Representative of outage date and duration should be directed to the other Party's operating Representative by telephone.
- 4.4.6 Seller shall not schedule major overhauls during Peak Months.
- 4.4.7 Seller shall maintain an operating log at Seller's Facility with records of: real and reactive power production; changes in operating status, outages; and any unusual conditions found during inspections. Changes in setting shall also be logged for Generators which are "block-loaded" to a specific kW capacity. In addition, Seller shall maintain records applicable to the Generating Facility, including the electrical characteristics of the Generator and settings or adjustments of the Generator control equipment. Information maintained pursuant to this Section 4.4.7 shall be provided to Edison, within 30 days of Edison's request.

16

- 4.4.8 The Seller warrants that the Generating Facility meets the requirements of a Qualifying Facility as of the date of initial delivery of electrical energy from the Generating Facility to the Point of Interconnection and continuing through the Contract Term.
- 4.4.9 The Seller warrants that the Generating Facility shall at all times conform to all applicable laws and regulations. Seller shall obtain and maintain any governmental authorizations and permits for the continued operation of the Generating Facility. If at any time Seller does not hold such authorizations and permits, Seller agrees to reimburse Edison for any lots which Edison incurs as a result of the Seller's failure to maintain governmental authorization and permits.
- 4.4.10 At Edison's request, Seller shall make all reasonable

effort to deliver power at an average rate of delivery at least equal to the Contract Capacity during periods of Emergency. In the event that the Seller has previously scheduled an outage coincident with an Emergency, Seller shall make all reasonable efforts to reschedule the outage. The notification periods listed in Section 4.4.4 shall be waived by Edison if Seller reschedules the Outage.

17

- 4.4.11 Seller shall demonstrate the ability to provide Edison the specified Contract Capacity during the seventy-two (72) hour continuous demonstration test prior to the date of Firm Operation. Thereafter, at least once per year at Edison's request, Seller shall demonstrate the ability to provide Contract Capacity for a reasonable period of time as required by Edison. Seller's demonstration of Contract Capacity shall be at Seller's expense and conducted at a time and pursuant to procedures mutually agreed upon by the Parties. If Seller fails to demonstrate the ability to provide the Contract Capacity, the Contract Capacity shall be reduced by agreement of the Parties pursuant to Section 8.1.2.6.
- 4.4.12 Seller shall maintain operating communications with the Edison switching center designated by the Edison Operating Representative. The operating communications shall include, but not be limited to, system paralleling or separation, scheduled and unscheduled shutdowns, equipment clearances, levels of operating voltage or power factors, and daily capacity and generation reports.
- 4.5 Maintenance

18

- 4.5.1 Seller shall maintain the Generating Facility in accordance with applicable California utility industry standards and good engineering and operating practices. Edison shall have the right to monitor such maintenance of the Generating Facility. Seller shall maintain and deliver a maintenance record of the Generating Facility to Edison's Operating Representatives upon request.
- 4.5.2 Seller shall make a reasonable effort to schedule routine maintenance during Off-Peak Months. Outages for scheduled maintenance shall not exceed a total of 30 peak hours for the Peak Months.
- 4.5.3 The allowance for scheduled maintenance is as follows:
 - a. Outage periods for scheduled maintenance (shall not exceed 840 hours (35 days) in any 12-month

period. This allowance may be used in increments of an hour or longer on a consecutive or nonconsecutive basis.

- b. Seller may accumulate unused maintenance hours on a year-to-year basis up to a maximum of 1,080 hours (45 days). This accrued time must be used consecutively and only for major overhauls.

19

4.6 Any review by Edison, under the terms of this Contract, of the design, construction, operation, or maintenance of the Generating Facility is solely for the information of Edison. By making such review, Edison makes no representation as to the economic and technical feasibility, operational capability, or reliability of the Generating Facility. Seller shall in no way represent to any third party that any such review by Edison of the Generating Facility, including, but not limited to, any review of the design, construction, operation, or maintenance of the Generating Facility by Edison, is a representation by Edison as to the economic and technical feasibility, operational capability, or reliability of said facilities. Seller is solely responsible for economic and technical feasibility, operational capability, and reliability thereof.

4.7 Edison shall have access to Seller's power-generating facilities for the purpose of gathering technical information and records. The technical information and records shall include, but not be limited to, power plant performance data an design, and operation and maintenance data. Edison agrees not to interfere with Seller's rules and regulations.

5. OPERATING OPTIONS

20

5.1 Seller shall Operate its Generating Facility pursuant to the following options

- a. Operating Option I: Seller dedicates the excess Generator output to Edison with no electrical service required from Edison.

6. ELECTRIC LINES AND ASSOCIATED EASEMENTS

6.1 Edison shall, as it deems necessary or desirable, build electric lines, facilities and other equipment, both overhead and underground, on and off Seller's Facility, for the purpose of effecting the agreements contained in this Contract. The physical location such electric lines, facilities and other equipment on Seller's Facility shall be determined by agreement of the Parties.

6.2 Seller shall reimburse Edison for the cost of acquiring

property rights off Seller's Facility required by Edison to meet its obligations under this Contract.

- 6.3 Seller shall grant to Edison, without cost to Edison, and by an instrument of conveyance, acceptable to Edison, rights of way, easements and other property interests necessary to construct, reconstruct, use, maintain, alter, add to, enlarge, repair, replace, inspect and remove, at any time, the electric lines, facilities or

21

other equipment, both overhead and underground, which are required by Edison to effect the agreements contained in the Contract. The rights of ingress and egress at all reasonable times necessary for Edison to perform the activities contemplated in the Contract.

- 6.4 The electric lines, facilities, or other equipment referred to in this Section 6 installed by Edison on or off Seller's Facility shall be and remain the property of Edison.
- 6.5 Edison shall have no obligation to seller for any delay or cancellation due to inability to acquire a satisfactory right of way, easements, or other property interests.

7. METERING

- 7.1 All meters and equipment used for the measurement of electric power for determining Edison's payments to Seller pursuant to this Contract shall be provided, owned, and maintained by Edison at Seller's expense in accordance, with Edison's Tariff Rule No. 21.
- 7.2 The meters and equipment used for measuring the Energy sold to Edison shall be located on the side of the Point of Interconnection as specified by Seller in Section 1.12. If the

22

metering equipment is located on Seller's side of the Point of Interconnection, then a loss compensation factor agreed upon by the Parties shall be applied. At the written request of the Seller, and at Seller's sole expense, Edison shall measure actual transformer losses. If the actual measured value differs from the agreed upon loss compensation factor, the actual value shall be applied prospectively.

- 7.3 For purposes of monitoring the Generator operation, Edison shall have the right to require, at Seller's expense, the installation of generation metering. Edison may also require the installation of telemetering equipment at Seller's expense for Generating Facilities equal to or greater than 10 MW. Edison may require the installation of telemetering equipment at Edison's expense for Generating Facilities less than 10 MW.

- 7.4 Edison's meters shall be sealed and the seals shall be broken only when the meters are to be inspected, tested, or adjusted by Edison; Seller shall be given reasonable notice of testing and have the right to have its Operating Representative present on such occasions.
- 7.5 Edison's meters installed pursuant to this Contract shall be tested by Edison, at Edison's expense, at least once each year and at any

23

reasonable time upon request by either Party, at the requesting Party's expense. If Seller makes such request, Seller shall reimburse said expense to Edison within thirty days after presentation of a bill therefor.

- 7.6 Metering equipment found to be inaccurate shall be repaired, adjusted, or replaced by Edison such that the metering accuracy of said equipment shall be within two percent. If metering equipment inaccuracy exceeds two percent, the correct amount of Energy and Contract Capacity delivered during the period of said inaccuracy, and the appropriate compensation adjustments, shall be estimated by Edison and agreed upon by the Parties.

8. POWER PURCHASE PROVISIONS

Prior to the date of Firm Operation, Seller shall be paid for Energy only pursuant to Edison's published avoided cost of energy based on Edison's full avoided operating cost as periodically updated and accepted by the Commission. If at any time Energy can be delivered to Edison and Seller is contesting the claimed jurisdiction of any entity which not issued a license or other approval for the Project, Seller, in its sole discretion and risk, may deliver Energy to Edison and for any Energy purchased by Edison Seller shall receive payment from Edison for (i) Energy pursuant to this Section, and (ii) as-available capacity based on capacity price from the Standard Offer No. 1

24

Capacity Payment Schedule as approved by the Commission. Unless and until all required licenses and approvals have been obtained, Seller may discontinue deliveries at any time.

8.1 Capacity Payments

Seller shall sell to Edison and Edison shall purchase from Seller capacity pursuant to the Capacity Payment Option selected by Seller in Section 1.10. The Capacity Payment Schedules will be based on Edison's full avoided operating costs as approved by the Commission throughout the life of this Contract.

- 8.1.1 Capacity Payment Option A -- As Available Capacity. If Seller selects Capacity Payment Option A, Seller shall

be paid a monthly capacity payment calculated pursuant to the following formula:

MONTHLY CAPACITY PAYMENTS = (A x D)+(B x D)+(C x D)

Where A = kWh purchased by Edison at the Point of Interconnection during on-peak periods defined in Edison's Tariff Schedule No. TOU-8

B = kWh purchased by Edison at the Point of Interconnection during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

25

C = kWh purchased by Edison at the Point of Interconnection during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The appropriate time differentiated capacity price from either the Standard Capacity Payment Schedule or Forecast of Annual As-Available Capacity Payment Schedule as specified by Seller in Section 1.10.

8.1.1.1 If Seller specifies the Standard Offer No. 1 Capacity Payment Schedule in Section 1.10, then the formula set forth in Section 8.1.1 shall be computed with D equal to the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the Contract Term.

8.1.1.2 If Seller specifies the Forecast of Annual As-Available Capacity Payment Schedule in Section 1.10, the formula set forth in Section 8.1.1 shall be computed as follows:

- a. During the First Period of the Contract Term D shall equal the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule.
- b. During the Second Period of the Contract Term, the formula shall be computed with D equal to the appropriate time

26

differentiated capacity price from Standard Offer No. 1 Capacity Payment Schedule, but not less than the greater of (i) the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule for the last year of the First Period, or (ii) the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the first year of the Second Period.

8.1.2 Capacity Payment Option B -- Firm Capacity Purchase

If Seller selects Capacity Payment Option B, Seller shall provide to Edison for the Contract Term the Contract Capacity specified in Section 1.5, or as adjusted pursuant to Section 8.1.2.7, and Seller shall be paid as follows:

- 8.1.2.1 If Seller meets the performance requirements set forth in Section 8.1.2.2, Seller shall be paid a Monthly Capacity Payment, beginning from the date of Firm Operation equal to the sum of the on-peak, mid-peak, and off-peak Capacity Period Payments. Each capacity period

payment is calculated pursuant to the following, formula:

$$\text{MONTHLY PERIOD CAPACITY PAYMENT} = A \times B \times C \times D$$

27

Where A = Contract Capacity Price specified in Section 1.10 based on the Standard Offer No. 2 Capacity Payment Schedule as approved by the Commission and in effect on the date of the execution of this Contract.

B = Conversion factors to convert annual capacity prices to monthly payments by time of delivery as specified in Standard Offer No. 2 Capacity Payment Schedule and subject to periodic modifications as approved by the Commission.

C = Contract Capacity specified in Section 1.5.

D = Period Performance Factor, not to exceed 1.0, calculated as follows:

$$\text{Period Performance Factor} = \frac{(\text{Period kWh purchased by Edison at the Point of Interconnection limited by the level of Contract Capacity})}{(0.8 \times \text{Contract Capacity} \times (\text{Period Hours minus Maintenance Hours Allowed in Section 4.5.}))}$$

- 8.1.2.2 Performance Requirements

To receive the Monthly Capacity Payment in Section 8.1.2.1, Seller shall provide the Contract Capacity in each Peak Month for all on-peak hours as such peak hours are defined in Edison's Tariff Schedule No. TOU-8 on file with the Commission, except that Seller is entitled to a 20% allowance for Forced Outages for

28

each Peak Month. Seller shall not be subject to such performance requirements for the remaining hours of the year.

- a. If Seller fails to meet the requirements specified in Section 8.1.2.2, Seller, in Edison's sole discretion, may be placed on probation for a period not to exceed 15 months. If Seller fails to meet the requirements specified in Section 8.1.2.2 during the probationary period, Edison may derate the Contract Capacity to the greater of the capacity actually delivered during the probationary period, or the capacity at which Seller can reasonably meet such requirements. A reduction in Contract Capacity as a result of this Section 8.1.2.2 shall be subject to Section 8.1.2.6.
 - b. If Seller fails to meet the requirements set forth in Section 8.1.2.2 due to a Forced Outage on the Edison system or a request to reduce or curtail delivery under Section 8.4, Edison shall continue Monthly Capacity Payments pursuant to Capacity Payment Option B. The Contract Capacity curtailed shall be treated the same as scheduled maintenance outages in the Calculation of the Monthly Capacity Payment.
- 8.1.2.3 If Seller is unable to provide Contract Capacity due to Uncontrollable Forces, Edison shall continue Monthly Capacity

29

Payments for 90 days from the occurrence of the Uncontrollable Force. Monthly Capacity Payments payable during a period of interruption or reduction by reason of an Uncontrollable Force shall be treated the same as scheduled maintenance outages. An Uncontrollable Force on the Interconnecting Utility's electrical system which results in an interruption or a reduction in the delivery of electrical energy generated by the Generating Facility to the Point of Interconnection shall be specifically excluded from the provisions of this Section 8.1.2.3.

- 8.1.2.4 Hydroelectric facilities which have their Contract Capacity based on five dry-year average, shall not have their Contract Capacity derated when failure to meet the requirements set forth in Section 8.1.2.2 is due solely to the occurrence of a dry year which is drier than the five dry-year average.
- 8.1.2.5 Capacity Bonus Payment

For Capacity Payment Option B, Seller may receive a Capacity Bonus Payment as follows:

- a. Bonus During Peak Months -- For a Peak Month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 8.1.2.2

have been met, and (ii) the on-peak capacity factor exceeds 85%.

30

- b. Bonus During Non-Peak Months - For a non-peak month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 8.1.2.2 have been met, (ii) the on-Peak capacity factor for each Peak Month during the year was at least 85%, and (iii) the on-peak capacity factor for the non-peak month exceeds 85%.
- c. For any eligible month, the Capacity Bonus Payment shall be calculated as follows:

CAPACITY BONUS PAYMENT= A x B x C x D

Where A = (1.2 x On-Peak Capacity Factor) - 1.02

Where the On-Peak Capacity Factor, not to exceed 1.0, is calculated as follows:

On-Peak Capacity Factor =
$$\frac{\text{(Period kWh purchased by Edison at the Point of Interconnection limited by the level of Contract Capacity)}}{\text{((Contract Capacity) x (Period Hours minus Maintenance Hours Allowed in Section 4.5))}}$$

B = Contract Capacity Price specified in Section 1.10 for Capacity Payment Option B

C = 1/12

D = Contract Capacity specified in Section 1.5

31

- d. When Seller is entitled to receive a Capacity Bonus Payment, the Monthly Capacity Payment shall be the sum of the Monthly Capacity Payment pursuant to Section 8.1.2.1 and the Monthly Capacity Bonus Payment pursuant to this Section.

8.1.2.6 Capacity Reduction

- a. Seller may reduce the Contract Capacity specified in Section 1.5, provided that Seller gives Edison prior written notice for a period determined by the amount of Contract Capacity reduced as follows:

Amount of Contract Capacity Reduced	Length of Capacity Notice Required
-----	-----

25,000 kW or under
25,001 - 50,000 kW
50,001 - 100,000 kW
over 100,000 kW

12 months
36 months
48 months
60 months

- b. Subject to Section 9.2, Seller shall refund to Edison with interest at the current published Federal Reserve Board three months prime commercial paper rate an amount equal to the difference between (i) the accumulated Monthly Capacity Payments paid by Edison pursuant to Capacity Payment Option B up to the time the reduction notice is received by

32

Edison, and (ii) the total capacity payments which Edison would have paid if based on the Adjusted Capacity Price.

- c. From the date the reduction notice is received to the date of actual capacity reduction, Edison shall make capacity payments based on the Adjusted Capacity Price for the amount of Contract Capacity being reduced.
- d. Seller may reduce Contract Capacity without the notice prescribed in Section 8.1.2.6(a), provided that Seller shall refund to Edison the amount specified in section 8.1.2.6(b) and an amount equal to: (i) the amount of Contract Capacity being reduced, times (ii) the difference between the Current Capacity Price and the Contract Capacity Price, times (iii) the number of years and fractions thereof (not less than one year) by which the Seller has been deficient in giving prescribed notice. If the Current Capacity Price is less than the Contract Capacity Price only payment under Section 8.1.2.6(b) shall be due to Edison.

8.1.2.7 Adjustment to Contract Capacity The Parties may agree in writing at any time to adjust the Contract Capacity. Seller may reduce the Contract Capacity pursuant to Section 8.1.2.6. Seller may increase the Contract Capacity with Edison's approval and

33

thereafter receive payment for the increased capacity in accordance with the Contract Capacity Price for the Capacity Payment Option selected by Seller for the remaining Contract Term.

8.1.2.8 For Capacity Payment Option B, Seller shall be paid for capacity in excess of Contract Capacity based of the as-available capacity price in Standard Offer No. 1

Capacity Payment Schedule, as updated and approved by the Commission.

8.2 Energy Payments - First Period

During the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for the Energy delivered by the Seller to Edison at the Point of Interconnection pursuant to the Energy Payment Option selected by Seller in Section 1.11, as follows.

8.2.1 Energy Payment Option 1 -- Forecast of Annual Marginal Cost of Energy.

If Seller selects Energy Payment Option 1, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at the Point of Interconnection during each month in

34

the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison at the Point of Interconnection during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison at the Point of Interconnection during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison at the Point of Interconnection during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time differentiated energy price from the Forecast of Annual Marginal Cost of Energy, multiplied by the decimal equivalent of the percentage of the forecast specified in Section 1.11, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.11.

35

8.2.2 Energy Payment Option 2 -- Levelized Forecast of

Marginal Cost of Energy. If Seller selects Energy Payment Option 2, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at the Point of Interconnection each month during

the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison at the Point of Interconnection during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison at the Point of Interconnection during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison at the Point of Interconnection during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time differentiated energy price from the Levelized Forecast of Marginal Cost of Energy, for the First Period of the Contract Term multiplied by the decimal

36

equivalent of the percentage of the levelized forecast specified in Section 1.11, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.11.

8.2.2.1 Performance Requirement for Energy Payment Option 2
During the First Period when the annual forecast referred to in Section 8.2.1 is greater than the levelized forecast referred to in Section 8.2.2, Seller shall deliver to Edison at least 70 percent of the average annual kWh delivered to Edison during those previous periods when the levelized forecast referred to in Section 8.2.2 is greater than the annual forecast referred to in Section 8.2.1 as resource conditions permit for solar, wind, and hydro Generating Facilities and excluding uncontrollable forces. If Seller does not meet the performance requirements of this Section 8.2.2.1, Seller shall be subject to Section 8.5.

8.2.3 Energy Payment Option 3 - Forecast of Incremental Energy Rate (IER)

If Seller selects Energy Payment Option 3, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and

purchased by Edison at the Point of Interconnection each month during the First Period of the Contract Term based on the Forecast of Incremental Energy Rates authorized by the Commission as specified in Section 1.11. The Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at the Point of Interconnection shall be calculated pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison at the Point of Interconnection during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison at the Point of Interconnection during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison at the Point of Interconnection during off-peak periods defined in Edison's Tariff Schedule No, TOU-8.

D = appropriate time differentiated energy price equal to:

$$D = (i + ii + iii) \times iv$$

Where (i) = the proportion of time express in hours oil is expected to be the avoided fuel.

x = IER, converted to the appropriate time of delivery for Winter/Summer Periods, expressed in Btu/kWh

x Price of boiler oil fuel, expressed in \$/million Btu used in Edison's published avoided cost of energy

(ii) = The proportion of time expressed in hours gas is expected to be the avoided fuel

= IER, converted to the appropriate time of delivery for Winter/Summer Periods, expressed in Btu/kWh

x Gas IER conversion factor of 1.035

x Price of gas pursuant to Southern California Gas Co. Tariff Schedule No. GN-5, expressed in \$/million Btu used in Edison's published avoided cost of energy

(iii) = Variable Operating and Maintenance expense expressed in(cent)/kWh as accepted by the Commission

(iv) = Energy Loss Adjustment Factor as authorized by the Commission

- 8.2.3.1 Seller may elect during the First Period to specify a range in increments of 100 Btu/kwh above and below Edison's Forecast of Incremental Energy Rates in effect at the time of execution of this Contract as specified in Section 1.11 for the basis of calculation of Seller's Monthly Energy Payment.

39

- a. If the Incremental Heat Rates for the Edison system fall within the range of the forecast IER and increments specified in Section 1.11, Seller's Monthly Energy Payment shall be equal 100% of Edison's published avoided cost of energy as updated and authorized by the Commission pursuant to the formula set forth in Section 8.3.
- b. If the Incremental Heat Rates for the Edison system fall outside the range of the forecast IER and increments specified in Section 1.11, Seller's Monthly Energy Payment shall be calculated pursuant to the formula used in Section 8.2.3 using as the IER the following value:

IER = Forecast IER + IER increments as specified in Section 1.11.

8.3 Energy Payments - Second Period

During the Second Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at the Point of Interconnection at a rate equal to 100% of Edison's published avoided cost of energy based on Edison's full avoided operating cost as updated periodically and accepted by the Commission, pursuant to the following formula:

MONTHLY ENERGY PAYMENT = kwh purchased by Edison at the Point of Interconnection for each on-peak, mid-peak, and

40

off-peak time period defined in Edison's Tariff Schedule No. TOU-8

x Edison's published avoided cost of energy by time of delivery for each time period.

- 8.4 Edison shall not be obligated to accept or pay for Energy, and may request Seller whose Generating Facility is one (1) MW or greater to discontinue or reduce delivery of Energy, for not more than 300 hours annually during off-peak hours when (i) purchases would result in costs greater than those which Edison would incur if it did not purchase Energy from Seller but instead utilized an equivalent amount of Energy generated from another Edison source, or (ii) the Edison Electric System demand would require that Edison hydro-energy be spilled to

reduce generation.

8.5 Energy Payment Refund

If Seller elects Energy Payment Option 2, Seller shall be subject to the following:

- 8.5.1 If Seller fails to perform the Contract obligations for any reason during the First Period of the Contract Term, or fails to meet the performance requirements set forth in Section 1.2.2.1, and at the time of such failure to perform, the net present value of the cumulative Energy payments received by Seller pursuant

41

to Energy Payment Option 2 exceeds the net present value of what Seller would have been paid pursuant to Energy payment refund equal to the difference in such net present values in the year in which the refund is due. The present value calculation shall be based upon the rate of Edison's incremental cost of capital specified in Section 1.11.

- 8.5.2 Not less than 90 days prior to the date Energy is first delivered to the Point of Interconnection, Seller shall provide and maintain a performance bond, surety bond, performance insurance, corporate guarantee, or bank letter of credit, satisfactory to Edison, which shall insure payment to Edison of the Energy Payment Refund at any time during the First Period. Edison may, in its sole discretion accept another form of security except that in such instance a 1-1/2 percent reduction shall then apply to the levelized forecast referred to in Section 8.2.2 in computing payments for Energy. Edison shall be provided with certificates evidencing Seller's compliance with the security requirements in this Section which shall also include the requirement that Edison be given 90 days prior written notice of the expiration of such security.

42

- 8.5.3 If Seller fails to provide replacement security not less than 60 days prior to the date of expiration of existing security, the

Energy Payment Refund provided in Section 8.5 shall be payable forthwith. Thereafter, payments for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 8.2.1.

- 8.5.4 If Edison at any time determines the security to be otherwise inadequate, and so notifies Seller, payments thereafter for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 8.2.1. If within 30 days of the date Edison gives notice of such inadequacies, Seller satisfies Edison's security requirements, Energy Payment Option 2 shall be reinstated. If Seller fails to satisfy Edison's security requirements within the 30-day period, the Energy Payment Refund provided in Section 8 shall be payable forthwith.

9. PAYMENT AND BILLING PROVISIONS

- 9.1 For Energy and capacity purchased by Edison:

- 9.1.1 Edison shall mail to Seller not later than thirty days after the end of each monthly billing period (1) a statement showing the Energy and Contract Capacity delivered to Edison during the on-peak, mid-peak, and off-peak

43

periods, as those periods are specified in Edison's Tariff Schedule No. TOU-8 for that monthly billing period, (2) Edison's computation of the amount due Seller, and (3) Edison's check in payment of said amount.

- 9.1.2 If the monthly payment period involves portions of two different published Energy payment schedule periods, the monthly Energy payment shall be prorated on the basis of the percentage of days at each price.
- 9.1.3 If the payment period is less than 27 days or greater than 33 days, the capacity payment shall be prorated on the basis of the average days per month per year.
- 9.1.4 If within thirty days of receipt of the statement Seller does not make a report in writing to Edison of an error, Seller shall be deemed to have waived any error in Edison's statement, computation, and payment, and they shall be considered correct and complete.

9.2 Payments due to Contract Capacity Reduction

9.2.1 The Parties agree that the refund and payments provided in Section 8.1.2.6 represent a fair compensation for the reasonable losses that would result from such reduction of Contract Capacity.

44

9.2.2 In the event of a reduction in Contract Capacity, the quantity, in kW, by which the Contract Capacity is reduced shall be used to calculate the refunds and payments due Edison in accordance with Section 8.1.2.6, as applicable.

9.2.3 Edison shall provide invoices to Seller for all refunds and payments due Edison under this section which shall be due within 60 days.

9.2.4 If Seller does not make payments as required in Section 9.2.3, Edison shall have the right to offset any amounts due it against any present or future payments due Seller and may pursue any other remedies available to Edison as a result of Seller's failure to perform.

9.3 Energy Payment Refund

Energy Payment Refund is immediately due and payable upon Seller's failure to perform the contract obligations as specified in Section 8.5.

10. TAXES

10.1 Seller shall pay ad valorem taxes and other taxes properly attributable to the Generating Facility. If such taxes are assessed

45

or levied against Edison, Seller shall pay Edison for such assessment or levy.

10.2 Seller shall pay ad valorem taxes and other taxes properly attributed to land, land rights, or interest in Land for the Generating Facility. If such taxes are assessed or levied against Edison, seller shall pay Edison for such assessment or levy.

10.3 Seller or Edison shall provide information concerning the Generating Facility to any requesting taxing authority.

11. TERMINATION

- 11.1 This Contract shall terminate if Firm Operation does not occur within 5 years of the date of Contract execution.

12. LIABILITY

- 12.1 Each Party (First Party) releases the other Party (Second Party), its directors, officers, employees and agents from any loss, damage, claim, cost, charge, or/expense of any kind or nature (including any direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorneys' fees and other costs of litigation, incurred by the First Party in connection with damage to property of the First Party caused by or arising out of the Second Party's construction, engineering, repair, supervision, inspection, testing, protection, operation,

46

maintenance, replacement, reconstruction, use or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of Second Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to Second Party.

- 12.2 Each Party shall indemnify and hold harmless the other Party, its directors, officers, and employees or agents from and against any loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorney's fees and other costs of litigation, incurred by the other Party in connection with the injury to or death of any person or damage to property of a third party arising out of the indemnifying Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use, or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of the indemnifying Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to the indemnifying Party; provided, however, that each Party shall be solely responsible

47

for and shall bear all cost of claims brought by its contractors or its own employees and shall indemnify and hold harmless the other

Party for any such costs including costs arising out of any workers compensation law. Seller releases and shall defend and indemnify Edison from any claim, cost, loss, damage, or liability arising from any contrary representation concerning the effect of Edison's review of the design, construction, operation, or maintenance of the Generating Facility.

12.3 The provisions of this Section 12 shall not be construed so as to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

12.4 Neither Party shall be indemnified under this Section 12 for its liability or loss resulting from its sole negligence or willful misconduct.

13. INSURANCE

13.1 Until Contract is terminated, Seller shall obtain and maintain in force as hereinafter provided comprehensive general liability insurance, including contractual liability coverage, with a combined single limit of (i) not less than \$1,000,000 each occurrence for Generating Facilities 100 kW or greater; (ii) not less than \$500,000 for each occurrence for Generating Facilities

48

between 20 kW and 100 kW; and (iii) not less than \$100,000 for each occurrence for Generating Facilities less than 20 kW. The insurance carrier or carriers and form of policy shall be subject to review and approval Edison.

13.2 Prior to the date Seller's Generating Facility is first operated in parallel with Edison's electric system, Seller shall (i) furnish certificate of insurance to Edison, which certificate shall provide that such insurance shall not be terminated nor expire except on thirty days prior written notice Edison, (ii) maintain such insurance in effect for so long as Seller's Generating Facility is operated in parallel with Edison's electric system, and (iii) furnish to Edison an additional insured endorsement with respect to such insurance in substantially the following form:

"In consideration of the premium charged, Southern California Edison Company (Edison) is named as additional insured with respect to all liabilities arising out of Seller's use and ownership of Seller's Generating Facility." "The inclusion of more than one insured under this policy shall not operate to impair the rights of one insured against

another insured and the coverages afforded by this policy will apply as though separate

49

policies had been issued to each insured. The inclusion of more than one insured will not, however, operate to increase the limit of the carrier's liability. Edison will not, by reason of its inclusion under this policy, incur liability to the insurance carrier for payment of premium for this policy."

"Any other insurance carried by Edison which may be applicable shall be deemed excess insurance and Seller's insurance primary for all purposes despite any conflicting provisions in Seller's policy to the contrary."

If the requirement of Section 13.2(iii) prevents Seller from obtaining the insurance required in Section 13.1, then upon written notification by Seller to Edison Section 13.2(iii) shall be waived.

- 13.3 The requirements of this Section 13 shall not apply to Seller who is a self-insured governmental agency with established record of self-insurance. Edison agrees to review requests by Seller to waive the requirements of this Section 13 for Seller, who is a self-insured non-governmental agency with an established record of self-insurance. Edison's consent to such waiver shall not be unreasonably withheld.

50

- 13.4 If Seller fails to comply with the provisions of this Section 13, Seller shall, at its own cost, defend, indemnify, and hold harmless Edison, its directors, officers, employees, agents, assigns, and successors in interest from and against any and all loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense, including attorneys' fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of Edison, to the extent that Edison would have been protected had Seller complied with all of the provisions of this Section 13.

14. UNCONTROLLABLE FORCES

- 14.1 Neither Party shall be considered to be in default in the performance of any of the agreements contained in this Contract, except for obligations to pay money, when and to the

extent failure of performance shall be caused by an Uncontrollable Force.

- 14.2 If either Party because of an Uncontrollable Force is rendered wholly or partly unable to perform its obligations under this Contract, the Party shall be excused from whatever performance

51

is affected by the Uncontrollable Force to the extent so affected provided that:

- (1) the nonperforming Party, within two weeks after the occurrence of the Uncontrollable Force, gives the other Party written notice describing the particulars of the occurrence,
- (2) the suspension of performance is of no greater scope and of no longer duration than is required by the Uncontrollable Force,
- (3) the nonperforming Party uses its best efforts to remedy its inability to perform (this subsection shall not require the settlement of any strike, walkout, lockout or other labor dispute on terms which, in the sole judgment of the Party involved in the dispute, are contrary to its interest. It is understood and agreed that the settlement of strikes, walkouts, lockouts or other labor disputes shall be at the sole discretion of the Party having the difficulty),
- (4) when the nonperforming Party is able to resume performance of its obligations under this Contract, that Party shall give the other Party written notice to that effect, and

52

- (5) capacity payments during such periods of Uncontrollable Force on Seller's part shall be governed by Section 8.1.2.3.

- 14.3 In the event that either Party's ability to perform cannot be corrected when the Uncontrollable Force caused by the actions or inactions of legislative, judicial or regulatory agencies or other proper authority, this Contract may be amended to comply with the legal or regulatory change which caused the nonperformance.

If a loss of Qualifying Facility status occurs

due to an Uncontrollable Force and Seller fails to make the changes necessary to maintain its Qualifying Facility status, the Seller shall compensate Edison for any economic detriment incurred by Edison as a result of such failure.

15. NONDEDICATION OF FACILITIES

Neither Party, by this Contract, dedicates any part of its facilities involved in this Generating Facility to the public or to the service provided under the Contract, and such service shall cease upon termination of the Contract.

16. PRIORITY OF DOCUMENTS

If there is a conflict between this document and any Appendix, the provisions of this document shall govern. Each Party shall notify the

53

other immediately upon the determination of the existence of any such conflict.

17. NOTICES AND CORRESPONDENCE

All notices and correspondence pertaining to this Contract shall be in writing and shall be sufficient if delivered in person or sent by certified mail, postage prepaid, return receipt requested, to Seller as specified in Section 1.1, or to Edison as follows;

Southern California Edison Company
Post Office Box 500
Rosemead, California 91770
Attention: Secretary

All notices sent pursuant to this Section 17 shall be effective when received, and each Party shall be entitled to specify as its proper address any other address in the United States upon written notice to the other Party.

18. PREVIOUS COMMUNICATIONS

This Contract contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Contract, and merges and supersedes all prior agreements, commitments, representations, and discussions between the Parties. No Party shall be bound to any prior obligations,

54

conditions or representations with respect to the subject matter of this Contract.

19. NONWAIVER

None of the provisions of the Contract shall be considered waived by either Party except when such waiver is given in writing. The failure of either Edison or Seller to insist in any one or more instances upon strict performance of any of the provisions of the Contract or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue to remain in full force and effect.

20. SUCCESSORS AND ASSIGNS

Neither Party shall voluntarily assign its rights nor delegate its duties under this Contract, or any part of such rights or duties, without the written consent of the other Party, except in connection with the sale or merger of a substantial portion of its properties or except an assignment to an Affiliate. "Affiliate" shall mean a Party's parent, a Party's subsidiary or any company of which a Party's parent is a parent. "Parent" shall mean a company which owns directly or indirectly more than 50% of the shares entitled to vote in an election of directors of another company. Any such

55

assignment or delegation made without such written consent shall be null and void. Consent for assignment shall not be withheld unreasonably. Such assignment shall include, unless otherwise specified therein, all of Seller's rights to any refunds which might become due under this Contract.

21. EFFECT OF SECTION HEADINGS

Section headings appearing in this Contract are inserted for convenience only, and shall not be construed as interpretations of text.

22. GOVERNING LAW

This Contract shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

23. MULTIPLE ORIGINALS

This Contract is executed in two counterparts, each of which shall be deemed an original.

24. TRANSMISSION AND INTERCONNECTION

24.1 Seller shall be solely responsible, using all reasonable efforts, to negotiate and conclude all required transmission and interconnection agreements with the Interconnecting Utility. Such agreements shall provide for the transmission of electrical

56

energy generated by the Generating Facility to the Point of Interconnection.

24.2 It is contemplated that these agreements shall include:

24.2.1 An agreement between Seller and/or syndicate (which includes Seller), and the Interconnecting Utility to develop those facilities, as determined by the Interconnecting Utility, which are necessary to transmit electrical energy generated by the Generating Facility to the Point of Interconnection. Such agreement shall be executed no later than 36 months prior to the expected date of Firm Operation as specified in Section 1.7. Such agreement should include the following terms:

- a) Financial responsibility
- b) Default/Remedies;
- c) Facilities and scope of work associated thereto; and
- d) Scheduling provisions reflecting the development of the facilities.

24.2.2 An agreement between Seller and the Interconnecting Utility for the transmission services necessary to transmit the electrical energy generated by the Generating Facility to the Point of Interconnection. Such an agreement shall be executed no later

57

than three months prior to the expected date of Firm Operation as specified in Section 1.7.

24.2.3 An agreement between Seller and the Interconnecting Utility for the interconnection of the Generating Facility and the Interconnecting Utility. Such agreement shall be executed no later than three months prior to the expected date of Firm Operation as specified in Section 1.7.

24.2.4 Edison shall, in its reasonable judgement, determine if the proposed arrangements described in this Section 24.2 satisfies the requirement of transmitting the electrical energy generated by the Generating Facility to the Point of Interconnection pursuant to the dates and terms contained in this Contract.

24.3 Notwithstanding the provisions contained in

Section 24.2, Seller may pursue and/or develop alternate means, routes or agreements for the transmission of electrical energy generated by the Generating Facility to the Point of Interconnection. Should Seller obtain such alternative means, routes or agreements, Seller shall submit such alternative method to Edison for review and approval at least six months prior to the expected date of Firm Operation as specified in Section 1.7. Edison shall, in its reasonable judgement, determine if the

58

proposed alternative method satisfies the requirement of transmitting the electrical energy generated by the Generating Facility to the Point of Interconnection pursuant to the dates and terms contained in this Contract.

24.4 Should Seller be unable to comply with the provisions contained in Section 24.2 and 24.3, Seller shall have the option to either terminate this Contract without penalty of any type or abrogate its selection of Capacity Payment Option in Section 1.10 and select in its place Capacity Payment Option A, Forecast of Annual As-Available Capacity Payment Schedule. Further, should Seller select the later alternative, Section 8.1.1.2 shall be deleted in its entirety and replaced with the following:

"If Seller specifies the Forecast of Annual As-Available Capacity Payment Schedule pursuant to Section 24.4, then the formula set forth in Section 8.1.1 shall be computed as follows:

- a. During the First Period of the Contract Term, D shall equal 70% of the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule.
- b. During the first five years of the Second Period of the Contract Term, D shall equal 95% of the appropriate time

59

differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule for the last year of the First Period of the Contract Term.

- c. For the remainder of the Contract Term, D shall equal 70% of the appropriate time differentiated capacity price from the

Forecast of Annual As-Available Capacity
Payment Schedule for the last year of the
First Period of the Contract Term."

- 24.5 Nothing in Section 24 shall be construed to obligate Seller to enter into any transmission or interconnection agreements, or to participate in the financing and/or the construction of any electrical power transmission facility, except on terms and conditions satisfactory to Seller, in its reasonable judgement, nor to render Seller subject to any penalty for failure to do so.

SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have executed this Contract this 16th of April, 1985.

Exhibit 10.3.8

AMENDMENT NO. 1

TO THE

POWER PURCHASE CONTRACT

BETWEEN

SOUTHERN CALIFORNIA EDISON COMPANY

AND

SECOND IMPERIAL GEOTHERMAL COMPANY

QFID NO. 3021

AMENDMENT NO. 1 TO THE
POWER PURCHASE CONTRACT BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY AND
SECOND IMPERIAL GEOTHERMAL COMPANY

1. PARTIES

The Parties to this Amendment No. 1 to the Power Purchase Contract between Southern California Edison Company and Second Imperial Geothermal Company, executed on April 16, 1985 ("Contract"), are Southern California Edison Company, a California corporation, ("Edison") and Second Imperial Geothermal Company, a California general partnership, ("Seller") referred to individually as "Party" and collectively as "Parties".

2. RECITALS

This Amendment No. 1 is made with reference to the following facts, among others:

2.1 On April 16, 1985, Edison and Seller executed the Contract to provide the terms and conditions for the sale by Seller and the purchase by Edison of electrical power delivered by Seller to Edison at the Point of Interconnection from the 40.000 kW Contract Capacity electrical Generating Facility located at Heber, California.

2.2 The Parties wish to extend the expected date of Firm Operation and Termination Date.

2.3 Edison desires that Seller's Forecast of Annual Marginal Cost of Energy be shifted one year forward and that each year's price remain valid for 12 months after it first becomes effective.

2.4 The Parties wish to amend the Contract to provide for the changes listed above.

3. AGREEMENT

The Parties agree to amend the Contract as follows:

3.1 Section 1.2e is amended to change the data when construction shall start and shall now read as follows:

"a. Seller shall commence construction of the Generating Facility by September 1, 1989."

3.2 Section 1.7 is amended to change the date of Seller's Firm Operation and shall now read as follows:

"1.7 Firm Operation: December 31, 1990."

3.3 Section 2 is amended to add a new Section 2.11.1 which shall read as follows:

"2.11.1 Contract Year: Except for the first Contract Year, a Contract Year shall consist of twelve (12) monthly billing periods beginning on the first day of the billing period following the anniversary date of Firm Operation. At Edison's option, the first Contract Year may consist of either twelve or thirteen billing periods commencing on the date of Firm Operation. If the first billing period of the contract term is less than a normal billing month, then the Contract year may consist of thirteen billing periods. If the first billing period is greater than a normal billing month, then the first contract year shall consist of twelve billing periods.

3.4 Section 3.1 is amended to provide for a delayed development schedule and shall now read, in part, as follows:

"3.1 The First Period of the Contract Term shall commence upon date of Firm Operation but not later than December 31, 1990."

3.4 Section 11 is amended to provide for the extended date of Firm Operation and shall now read as follows:

"This Contract shall terminate if Firm Operation does not occur on or before April 16, 1991."

3.5 Appendix B is amended to reflect the Annual Marginal Cost of Energy that Seller shall be paid for the First Period and shall now read as follows:

3

SOUTHERN CALIFORNIA EDISON COMPANY

LONG-TERM STANDARD OFFER

ENERGY PAYMENT SCHEDULE -

FORECAST OF ANNUAL MARGINAL COST OF ENERGY(1)

Line No.	Year Payments Start	Contract Year	Annual Marginal Cost of Energy(2) (c/kWh)
1	1991	1	8.1
2	1992	2	8.6
3	1993	3	9.3
4	1994	4	10.1
5	1995	5	10.9
6	1996	6	11.8
7	1997	7	12.6
8	1998	8	13.6
9	1999	9	14.6
10	2000	10	15.6

- 1 This forecast to be used in conjunction with Energy Payment Option 1.
- 2 The annual energy payments in the table will be converted to seasonal time-of-delivery energy payment rates that are consistent with the time-of-delivery rates currently authorized by the Commission for Avoided Energy Cost Payments.

4. OTHER CONTRACT TERMS AND CONDITIONS

Except as amended herein, all terms, covenants, and conditions contained in the Contract shall remain in full force and effect.

4

5. SIGNATURE CLAUSE

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 1 on behalf of the Party for whom they sign. This Amendment No. 1 is hereby executed as of this 23rd day of October 1987.

Exhibit 10.3.9

AMENDMENT NO. 2
TO THE
POWER PURCHASE CONTRACT
BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY
AND
SECOND IMPERIAL GEOTHERMAL COMPANY
QFID NO. 3021

1. PARTIES

The Parties to this Amendment No. 2 to the Power Purchase Contract between Southern California Edison Company and Second Imperial Geothermal Company, executed on April 16, 1985 ("Contract"), are Southern California Edison Company, a California Corporation ("Edison"). and Second Imperial Geothermal Company, a California General Partnership ("Seller") referred to individually as "Party" and effectively as "Parties."

2. RECITALS

This Amendment No. 2 is made with reference to the following facts, among others:

2.1 On April 16, 1985, Edison and Seller executed the Contract to provide the terms and conditions for the sale by Seller and the purchase by Edison of electrical power delivered by Seller to Edison at the Point of Interconnection from Seller's electrical Generating Facility located at Heber, California.

2.2 On October 23, 1987, Edison and Seller executed Amendment No. 1 to the Contract. This Amendment No. 1 provides for the extension of the date of Firm Operation and the Termination Date, as well as amendment of the Forecast of Annual Marginal Cost of Energy.

2.3 The Parties desire to amend the Contract to:

a. Divide the project into two phases to achieve initial operation approximately one year apart.

b. Extend the project schedule by one year.

c. Reduce the Contract and Nameplate capacity values each to 37 MW.

d. Revise the forecast of energy payments to begin at a specified value and following achievement of Firm Operation, increase by a fixed percentage over a period of ten (10) years, followed by fixed values to be paid in addition to published avoided cost for an additional period of five (5)

years. Thereafter, energy payments will be based on Edison's published avoided cost of energy.

e. Seller will provide testimony and/or documentation as may reasonably be required by Edison to support this Amendment in regulatory proceedings.

2.4 The Parties wish to amend the Contract to provide for the changes listed above.

3. AGREEMENT

The Parties agree to amend the Contract as follows:

3.1 Section 1.1 is amended to read as follows:

"1.1 All notices shall be sent to Seller at the address:

Second Imperial Geothermal Company
c/o Ormat Energy Systems, Inc.
610 East Glendale Ave.
Sparks, NV 89831-5811"

3.2 Section 1.2a is amended to read as follows:

"a. Nameplate Rating: 37,000 kW"

3.3 Section 1.2e is amended to read as follows:

"e. Seller shall commence construction, as defined in the Qualifying Facilities Milestone Procedure of the Generating Facility by January 1, 1992."

3.4 Section 1.2f is amended to read as follows:

"f. Generating Facility Designation: Second Imperial Geothermal."

3.5 Section 1.5 is amended to read as follows:

"1.5 Contract Capacity: 37.000 kW"

3.6 Section 1.6 is amended to read as follows:

2

"1.6 Expected annual production: 259,000,000 kWh."

3.7 Section 1.7 is amended to read as follows:

"1.7 Firm Operation: April 16, 1993."

3.8 Add Section 1.2g to read as follows:

"g. The Generating Facility may deliver up to 20 MW of electric power during the period commencing on April 16, 1992, and ending on the date of Firm Operation. Such electric power shall be purchased on an energy only basis (no capacity payment) as further set forth in Section 8."

3.9 Section 1.10 is amended to read as follows:

"1.10 The Contract Capacity Price shall be \$187/kW-yr."

3.10 Add the following sentence to Section 2.17:

"Firm Operation shall not occur prior to April 16, 1993, nor later than December 31, 1993."

3.11 Section 3.1 is amended to read as follow:

"3.1 The first period of the Contract Term shall commence upon the date of Firm Operation but not later than December 31, 1993. The first period of the Contract Term shall be 15 years."

3.12 The first sentence of Section 8 is deleted and replaced with the following:

"Prior to April 26, 1992, Seller shall be paid for energy pursuant to Edison's published avoided cost of energy based on Edison's full avoided operating cost as periodically updated and accepted by the Commission; from April 16, 1992 to the date of Firm Operation. Seller shall be paid for energy at the rate of 8.1(cent)/kWh. Prior to the date of Firm Operation. Capacity shall not be purchased."

3.13 Section 8.1.2.1 is amended to read as follows:

"8.1.2.1 If Seller meets the performance requirements set forth in Section 8.1.2.2, Seller shall be paid a Monthly Capacity Payment, beginning from the date of Firm Operation equal to the sum of the on-peak, mid-peak, and off-peak Capacity

3

Period Payments. Each capacity period payment is calculated pursuant to the following formula:

MONTHLY PERIOD CAPACITY PAYMENT = A x B x C x D

Where A = Contract Capacity Price specified in Section 1.10 for Capacity Payment Option B.

B = Conversion factors to convert annual capacity prices to monthly payments by time of delivery as specified in Standard Offer No. 2 Capacity Payment Schedule and subject to periodic modifications as approved by the Commission.

C = Contract Capacity specified in Section 1.5.

D = Period Performance Factor, not to exceed 1.0, calculated as follows:

(Period kWh purchased by Edison at the Point of Interconnection limited by the level of Contract Capacity)

Period Performance Factor = $(0.8 \times \text{Contract Capacity} \times (\text{Period Hours minus Maintenance Hours Allowed in Section 4.5.}))$

3.14 Section 8.2.1 is amended to read as follows:

"8.2.1 Energy Payment Option 1 -- Forecast of Annual Marginal Cost of Energy.

8.2.1.1 If Seller selects Energy Payment Option 1, then during the first ten (10) Contract Years of the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at the Point of Interconnection during each month in the first ten (10) Contract Years of the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison at the Point of Interconnection during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison at the Point of Interconnection during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

4

C = kWh purchased by Edison at the Point of Interconnection during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) The appropriate time differentiated energy price from the Contract Annual Price of Energy as set forth in Appendix B, multiplied by the decimal equivalent of the percentage of the forecast specified in Section 1.11, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.11.

8.2.1.2 During the following five Contract Years of the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at the Point of Interconnection during each month in the following five Contract Years of the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison at the Point of Interconnection during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison at the Point of Interconnection during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison at the Point of Interconnection during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) The appropriate time differentiated energy price from Edison's published avoided cost of energy plus the appropriate time differentiated energy price from the Contract Annual Price of Energy as set forth in Appendix B, multiplied by the decimal equivalent of the percentage of the forecast specified in Section 1.11, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.11."

3.14 Section 11 is amended to read as follows:

"11. TERMINATION

5

11.1 This Contract shall terminate if Firm Operation does not occur on or before December 31, 1993."

3.15 Add a new Section 25 to read as follows:

"25. Seller agrees that, to the extent reasonably required by Edison pursuant to regulatory activities, Seller shall provide evidence by testimony and/or documentation in support of the reasonableness of this Amendment. In particular, Seller agrees to provide evidence by testimony and/or documentation in support of the viability of the second Imperial Geothermal project in the absence of this Amendment."

3.16 Appendix B. FORECAST OF ANNUAL MARGINAL COST OF ENERGY is deleted and replaced with the attached new Appendix B.

6

APPENDIX B

ENERGY PAYMENT SCHEDULE

7

SOUTHERN CALIFORNIA EDISON COMPANY
LONG-TERM STANDARD OFFER
ENERGY PAYMENT SCHEDULE(1)

Line No.	Calendar Year	Contract Annual Price of Energy
1	1992	8.10(cent)/kWh(2)
2	1993	8.10(cent)/kWh(2)
3	1994	8.44(cent)/kWh(2)
4	1995	8.80(cent)/kWh(2)
5	1996	9.18(cent)/kWh(2)
6	1997	9.57(cent)/kWh(2)
7	1998	9.97(cent)/kWh(2)
8	1999	10.40(cent)/kWh(2)
9	2000	10.84(cent)/kWh(2)
10	2001	11.30(cent)/kWh(2)
11	2002	11.78(cent)/kWh(2)
12	2003	(4)
13	2004	4.42(cent)/kWh(3)
14	2005	4.12(cent)/kWh(3)

15	2006	3.90(cent)/kWh(3)
16	2007	3.75(cent)/kWh(3)
17	2008	3.41(cent)/kWh(3)

(1) The annual energy payments in the table will be converted to seasonal time-of-delivery energy payment rates that are consistent with the time-of-delivery rates currently authorized by the Commission for Avoided Energy Cost Payments.

(2) These values are to be used in conjunction with Contract Section 8.2.1.1 during the first 10 Contract Years of the First Period of the Contract Term.

(3) These values to be used in conjunction with Contract Section 8.2.1.2 during the following 10 Contract Years of the First Period of the Contract Term and are added to Published Avoided Cost as set forth therein.

(4) During that portion of Calendar Year 2003 prior to the anniversary date of Firm Operation, the Contract Annual Price of Energy shall be 12.28(cent)/kWh. During that portion of Calendar Year 2003 subsequent to the anniversary date of First Operation, the Contract Annual Price of Energy shall be 4.60(cent)/kWh and applied in accordance with Footnote 3.

8

4. OTHER CONTRACT TERMS AND CONDITIONS

Except as amended in Amendment No. 1 and this Amendment No. 2, all terms, covenants and conditions contained in the Contract shall remain in full force and effect.

5. SIGNATURE CLAUSE

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 2 on behalf of the Party for whom they sign. This Amendment No. 2 is hereby executed as of this 27th day of July, 1990.

Exhibit 10.3.10

AMENDMENT NO. 3
TO THE
POWER PURCHASE CONTRACT
BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY
AND
SECOND IMPERIAL GEOTHERMAL COMPANY
QFID NO. 3021

1. PARTIES:

The Parties to this Amendment No. 3 to the Power Purchase Contract between Southern California Edison Company and Second Imperial Geothermal Company, executed on April 16, 1985 ("Contract"), are Southern California Edison Company, a California Corporation ("Edison"), and Second Imperial Geothermal Company, a California General Partnership ("Seller"), referred to individually as "Party" and collectively as "Parties."

2. RECITALS:

This Amendment No. 3 is made with reference to the following facts, among others:

2.1 On April 16, 1985, Edison and Seller executed the Contract to provide the terms and conditions for the sale by Seller and the purchase by Edison of electrical power delivered by Seller to Edison at the Point of Interconnection from Seller's electrical Generating Facility located at Heber, California.

2.2 On October 23, 1987, Edison and Seller executed Amendment No. 1 to the Contract. Amendment No. 1 provided, among other things, for the extension of the Firm Operation date to December 31, 1990 and extension of the Termination Date to April 16, 1991, as well as reducing the prices paid under the Forecast of Annual Marginal Cost of Energy.

2.3 On July 27, 1990, Edison and Seller executed Amendment No. 2 to the Contract. Amendment No. 2 provided, among other things, for the Project to achieve operation in two phases, extended the date of Firm Operation to April 16, 1993 and extended the Contract Termination Date to December 31, 1993, reduced Contract Capacity value from 40,000 kW to 37,000 kW and Nameplate Capacity value from 44,000 kW to 37,000 kW, and reduced the Forecast of Annual Marginal Cost of Energy payment.

2.4 Seller wishes to reduce the Contract Capacity from 37,000 kW to 32,000 kW to match Seller's project development plans.

3. AGREEMENT:

The Parties agree to amend the Contract as follows:

3.1 Section 1.5 is amended to read as follows:

"1.5 Contract Capacity: 32,000 kW."

4. OTHER CONTRACT TERMS AND CONDITIONS:

Except as amended in Amendment No. 1, Amendment No. 2, and this Amendment No. 3, all terms, covenants, and conditions contained in the Contract shall remain in full force and effect.

5. SIGNATURE CLAUSE:

The signatories hereto represent that they have been duly authorized to enter into this Amendment No. 3 on behalf of the Party for whom they sign. This Amendment No. 3 is hereby executed as of this 24th day of November, 1992.

AMENDED AND RESTATED
POWER PURCHASE AND SALES AGREEMENT

1. PARTIES:

1.1 The Parties to this Amended and Restated Power Purchase and Sales Agreement are: Mammoth-Pacific ("Seller"), a California general partnership, and Southern California Edison Company ("Edison"), a California corporation,

individually "Party", and collectively, "Parties."

2. RECITALS: This Agreement is made with reference to the following facts, among others:

2.1 This is an Amended and Restated Power Purchase and Sales Agreement which supercedes and replaces, in all terms and conditions, the original Mammoth Power Purchase and Sales Agreement between Mammoth Binary Power Company and Southern California Edison Company, executed on October 20, 1983, and assigned to Mammoth Pacific on October 20, 1983, and Amendment No. 1 thereto, executed on December 30, 1983;

2.2 This Amended and Restated Power Purchase and Sales Agreement provides for the following revisions, among others; restructuring of payment provisions for energy and capacity purchased by Edison, redefining the "Megawatt Hour Credit Accumulation," providing additional financial security to Edison and outlining Seller's option to supply power from the Generating Facility for operation of the Geothermal Facility and the Generating Facility;

2.3 This Amended a Restated Power Purchase and Sales Agreement is made and entered into with reference to the concurrent execution of that certain Power Purchase and Sales Termination Agreement, which is set forth as Exhibit E, attached hereto and made part hereof by this reference, by which Pacific Lighting Energy Systems, a California Corporation, the owner of all the capital stock of Pacific Geothermal Company, a California Corporation, (successor in interest to Pacific Energy Resources, Inc. a wholly owned subsidiary of Pacific Lighting Energy Systems), and general partner of Seller, will terminate those certain landfill project Power Purchase and Sales Agreements identified therein;

2.4. Seller desires to construct, own, operate and control a 10 MW (gross) generating facility to be located near Casa Diablo Hot Springs, California beginning in 1984 for a term of thirty years;

2.5 The Generating Facility is presently in operation, with a Date of Initial Delivery of November 26, 1984, and a date of Firm Operation of February 26, 1985;

2.6 Edison desires to purchase Net Energy and capacity to be made available by Seller to Edison from the Project;

2.7 The Parties desire that the Project be operated and maintained as a base load generating resource for the Edison electric system;

2.8 The Parties desire, by this Agreement, to establish the terms, conditions and obligations pursuant to which they can accomplish the above desires and needs.

3. AGREEMENT: The Parties agree as follows:

2

4. DEFINITIONS: When used with initial capitalization, whether in the singular or in the plural, the following terms shall have the following meanings:

4.1 Agreement: This "Amended and Restated Power Purchase and Sales Agreement Between Mammoth-Pacific and Southern California Edison Company," and Exhibits thereto, as may be amended from time to time.

4.2 Agreement Price: The price, expressed in cents per kilowatthour, paid by Edison to Seller for Net Energy delivered and Net Capacity made available under the terms of this Agreement. The Agreement Price includes the Base

Capacity Price.

4.3 Auxiliary Components: All equipment necessary for the operation and maintenance of the Project except the Geothermal Facilities.

4.4 Auxiliary Load: That energy necessary to meet the electrical requirements of the Auxiliary Components. Such requirements shall approximate 3,000 kilowatts (kW) as delivered over a period of time.

4.5 Avoided Cost: For the purposes of this Agreement, "Avoided Cost" shall be equal to the time period weighted average cost of energy as reflected in Edison's Published avoided cost plus the Base Capacity Price converted to d/kWh. If no applicable Published avoided cost of energy or Base Capacity Price is available, an avoided cost of energy and Base Capacity Price shall be determined in a manner consistent with the methodology used for the most current avoided cost of energy and Base Capacity Price.

3

4.6 Base Capacity Price: For the purposes of this Agreement, the Base Capacity Price shall be 1.94(cents) per kWh. The Base Capacity Price is the capacity price currently Published in the Annual Capacity-Payment Schedule for Standard Offer No: 2 Firm Power Purchases, effective February 14, 1983 for 30-year power purchase contracts with an initial date of operation in 1984. The Published capacity price (\$137 per kW per year) has been adjusted by a factor of 1.24 to conform with the change in capacity price methodology ordered by the Commission in Decision No. 82-12-120. The Base Capacity Price may change if the Date of Initial Delivery does not occur in 1984.

4.7 Commission: The Public Utilities Commission of the State of California.

4.8 Control: To establish the electrical output of the Project through dispatching procedures including shutdown and startup procedures.

4.9 Date of Initial Delivery: The date when Seller initially delivers Net Energy to the Point of Interconnection.

4.10 Date of Firm Operation: The applicable date mutually agreed upon by the Operating Representatives on which one or both generating units of the Project are determined to be a reliable source of generation and when such unit or units can reasonably be expected to operate continuously and reliably at the applicable Net Capacity.

4.11 Edison Electric System Integrity: A state of being which contemplates the normal operation of the Edison electric system in a manner which minimizes risks of

4

injury to persons and/or damage to, or loss of, property and enables Edison to provide reliable electric service.

4.12 Effective Net Capacity: A nominal value of Net Capacity, expressed in megawatts (MW), selected by the Operating Representatives for use in determining the Monthly Capacity Factor. The Effective Net Capacity shall be established and agreed upon by the Operating Representatives as set forth in Exhibit F, attached hereto and made part hereof by this reference.

4.13 Emergency: A condition or situation which, in Edison's sole judgment, affects Edison's ability to provide reliable electric service.

4.11 Generating Facility: All of Seller's generators, together with all protective and other associated equipment and improvements, necessary to produce electrical power at Seller's Facility excluding associated land, land rights, and interests in land.

4.15 Geothermal Facilities: The geothermal fluid gathering and disposal system, including all pipes, valves, pumps, meters and electrical equipment, which are utilized in conjunction with the Project.

4.16 Interconnection Facilities: Those protection, metering, electric line(s) and other Facilities required, in Edison's sole judgment, to permit connection of the Edison electric system and the Project at the Point of Interconnection.

4.17 Magma: Magma Energy, Incorporated, a Nevada corporation.

5

4.18 Magma Lease: The lease agreement between Holt Geothermal Company and Magma which has been, or is to be, assigned to Seller and is attached hereto as Exhibit D.

4.19 Magma Resource: The geothermal reservoir underlying the land owned in fee by Magma as described in the Magma Lease.

4.20 Monthly Capacity Factor: For each month, the Net Energy delivered to Edison, expressed in megawatthour (Kwh), divided by the product of Effective Net Capacity, expressed in megawatts (MW), and the sum representing the total hours in the month less the number of hours of curtailment in the month resulting from requests by Edison pursuant to Section 8.2, Uncontrollable Forces and Project scheduled outages. For the purpose of determining the Monthly Capacity Factor, scheduled outage hours shall be limited to a maximum of 480 hours per unit per year.

4.21 Net Capacity: Gross generating capacity of the Project less the capacity requirements of the Auxiliary Components, expressed in megawatts (MW). Net Capacity available to Edison will vary with ambient temperature, as set forth in Exhibit F, with one and two generating units in operation.

4.22 Net Energy: Total electrical energy, expressed in kilowatthours (kWh) or megawatthours (MWh), generated by the Project less all Auxiliary Load energy requirements provided by the Project.

4.23 Operating Representatives: Representatives of the Parties appointed pursuant to Section 18.

6

4.24 Point of Interconnection: The point at the Seller's 33 kilovolt (kV) dead end structure in the Project switchyard where Edison's electrical conductors connect with Seller's electrical conductors and where Net Energy is transferred from the Project to Edison.

4.25 Project: Seller's electric generating facility which shall consist of two (2) independent 5 MW (gross) binary cycle generating units with a total design rating of 10 MW (gross), including facilities appurtenant to, or incidental to, said units. The Project shall not include, among other things, the Interconnection Facilities or the Geothermal Facilities or any land, land rights or interests in land associated with such facilities.

4.26 Published: For the purposes of this Agreement, "Published" is defined as publication by, or for, Edison in accordance with any order or decision by the Commission.

4.27 Quarter: A calendar quarter of three months ending on the last day of March, June, September or December.

5. TERM AND TERMINATION:

5.1 This Agreement shall become effective when executed by the Parties and shall remain in effect until terminated pursuant to any of the following:

5.1.1 Upon not less than five (5) years prior written notification by either Party to the other Party, which notification shall not be given prior to the expiration of twenty-five years from the Date of Firm Operation; or

7

5.1.2 If the Date of Initial Delivery does not occur prior to January 1, 1985, or if the Date of Firm Operation does not occur prior to March 1, 1985, unless otherwise agreed to, in writing, by the Parties; or

5.1.3 Should Edison, or any Edison subsidiary or affiliate designated by Edison in its sole judgment, exercise Edison's rights pursuant to Section 13 or Section 14.2.

6. POWER SALES:

6.1 Subject to the terms and conditions of this Agreement, Seller hereby agrees to deliver and sell to Edison, and Edison hereby agrees to accept and purchase from Seller, all Net Energy delivered and all Net Capacity made available by Seller to Edison at the Point of Interconnection.

6.2 Upon request by Seller, Edison shall supply, and Seller shall purchase, capacity and energy in amounts necessary to meet the Project's start-up and Auxiliary Load requirements. Seller shall pay Edison for such capacity and energy in accordance with Edison's time-of-use energy tariff for electric service exceeding 500 kW, as now in effect or as may hereafter be authorized by the Commission to be revised ("Tariff Schedule TOU-8").

6.3 Seller shall use its best efforts to design, construct; operate and maintain the Project so as generate the maximum amount of Net Energy and associated Net Capacity.

8

6.4 Seller shall operate the Project as a base load facility with a planned long-term annual capacity factor of 75% in accordance with generally accepted practices in the electric utility industry in the State of California.

6.5 If Seller desires to develop any additional capacity from the Magma Resource, Edison shall have the right to Purchase such additional capacity and associated energy therefrom. If the Parties are unable to reach a satisfactory agreement and such additional capacity and associated energy is offered to any other party or parties, Edison shall have the right to purchase such capacity and energy under the same terms and conditions as those under which Seller is willing to sell, and another party or parties are willing to purchase, the additional capacity and associated energy.

6.6 Seller shall have an option to elect to provide power for the operation of the Geothermal Facilities from its own Generating Facility or to purchase such power from Edison. If Seller elects to exercise such option, Seller shall

give Edison prior written notice thereof. If Seller elects to exercise such option, this Agreement shall be amended to provide appropriate reimbursement to Edison for interconnection facilities. If metering changes are required to implement the exercise of such option, such changes shall be at the expense of Seller. If such option is exercised by Seller, then Seller shall repay unearned capacity payments in accordance with the following formula calculated for each year of delivery until the date Seller begins serving the Geothermal Facilities from its own generating facility:

9

Reduction in annual average contract capacity x
annual average contract capacity

(\$0.0194/kWh - annual as-available"
capacity price \$/kWh) x
(annual kWh purchased
by Edison)

" From Edison's Standard Offer No. 1 capacity table.

7. PROJECT LAND:

7.1 Seller, at no cost to Edison, shall acquire and own all land, land rights and interests in land necessary for Seller to construct, operate and maintain the Project.

7.2 Edison shall, as it deems necessary or desirable, build electric lines and facilities, both overhead and underground, and install metering and any other equipment, for the purpose of effecting the arrangements contemplated in this Agreement. The aforementioned shall be done after satisfaction of the requirements of Sections 7.3 and 7.4. The physical location of such electrical lines, facilities, metering and any other equipment shall be determined by agreement of the Parties.

7.3 Seller shall reimburse Edison for the cost of any property rights or interests which are required by Edison to meet its obligations under this Agreement.

7.4 Seller shall grant to Edison, without cost to Edison, and by a mutually acceptable instrument(s) the following:

7.4.1 Rights-of-way, licenses, easements and all other rights and interests necessary to construct, reconstruct, use, maintain, alter, add to, enlarge, repair, replace, inspect or remove, at any time, the electric lines and facilities, both overhead and

10

underground, or any other equipment installations required by Edison to effect the arrangements contemplated in this Agreement. The contemplated arrangements include those necessary to install, operate and maintain the meters for the Geothermal Facilities (Meters 1-A, 2-A and 1-B, 2-B) and the 33 kV meters, both as depicted in Exhibit A, and the arrangements necessary to supply capacity and energy to the Geothermal Facilities;

7.4.2 Rights of ingress and egress at all reasonable times necessary for Edison to perform any one or more of the activities contemplated in this Agreement;

7.5 The electric lines, facilities, metering and/or any other equipment referred to in this Section 7 installed by Edison, shall be, and shall remain,

the property of Edison; and

7.6 All rights or interests granted by Seller to Edison pursuant to this Section 7 shall be coterminous with this Agreement.

8. OWNERSHIP AND CONTROL OF PROJECT:

8.1 Seller, at no cost to Edison, shall own the Project and shall design, construct, operate and maintain the Project in accordance with good engineering and operating practices in California.

8.2 Seller shall Control the Project. However, to facilitate maintenance of Edison facilities, or during periods of Emergency, or to maintain Edison Electric System Integrity, Seller shall, if requested by Edison, and at no cost or obligation to Edison: (i) disconnect the Project from the Edison electric system or (ii) reduce the electrical output of the Project to the level of the Project's total electrical requirement, as appropriate.

11

Each Party shall endeavor to correct within a reasonable period the conditions on its facilities and/or system which necessitate such disconnection or reduction of output. Such disconnection or reduction of electrical output shall be limited to the period of time such condition exists.

9. DESIGN AND CONSTRUCTION OF PROJECT:

9.1 Seller, at no cost to Edison, shall acquire all permits and approvals, and complete, or have completed, all environmental impact studies required for the construction, operation and maintenance of the Project.

9.2 Edison shall have the right to review the electrical drawings pertaining to the design of the Project and the Point of Interconnection. Such review shall be done in a timely manner and may include, but not be limited to, the generator, governor, excitation system, synchronizing equipment, protective relays and neutral grounding.

9.3 Edison shall have the right to require modifications to the design of the Project and/or the Point of Interconnection as it deems necessary for proper and safe operation of the Project when in parallel with the Edison electric system. If Seller does not agree to such modifications, the differences between the Parties shall be resolved pursuant to Section 25 prior to design approval.

9.4 Seller shall furnish, install, operate and maintain in good order and repair and without cost to Edison, the relays, meters, power circuit breakers, synchronizer and other control and protective apparatus as shall be agreed to by the Parties pursuant to Section 9.3.

12

9.5 Future changes on the Edison electric system and/or to the Project may require modification of the design of the Project or the Point of Interconnection. Any such modification, whether proposed by Edison or Seller, shall be subject to the provisions of this Section 9.

9.6 Edison shall have the right to monitor the construction, start-up, operation and maintenance of the Project and have the right to consult with, and make recommendations, to Seller's Operating Representative.

9.7 Seller shall furnish to Edison the Project construction schedule and shall notify Edison, at last one (1) year prior to the Date of Firm Operation, of any changes in such schedule which affect the Date of Firm Operation.

9.8 Edison shall have full access to all Project operations and have the right to use, solely for itself, free of royalty payments, any technological innovations developed by Seller in producing Net Energy from the Magma Resource. Edison shall have full access to all operating data and input regarding operation of the Project and the Geothermal Facilities. Except as otherwise legally required, Edison shall not disclose such information to others without first obtaining written permission from Seller.

10. OPERATION OF PROJECT:

10.1 Seller shall operate and maintain the Project and the Project's protective apparatus in accordance with applicable electric utility industry standards and good engineering practices with respect to synchronizing, voltage and reactive power control. Seller shall operate the Project with all protective apparatus in service whenever the

13

Project is connected to, or is operated in parallel with, the Edison electric system. Any deviation for brief periods of emergency or maintenance shall only be by agreement of the Parties.

10.2 Each Party shall keep the other Party's Operating Representative informed as to the operating schedule of its respective facilities affecting the other Party's operation hereunder, including any reduction in Net Capacity. In addition, Seller shall provide Edison with reasonable advance notice regarding its scheduled outages, including any reduction in Net Capacity availability in accordance with the following:

SCHEDULED OUTAGE EXPECTED DURATION -----	ADVANCE NOTICE TO EDISON -----
Less than one day	24 Hours
One day or more (except major overhaul)	1 Week
Major Overhaul	6 Months

10.3 Notification by a Party's Operating Representative of outage date and duration should be provided to the other Party's Operating Representative by telephone.

10.4 Seller shall use its best efforts to schedule outages during the off-peak hours as specified in Edison's Tariff Schedule TOU-8 and during expected minimal generation periods as agreed upon by the Operating Representatives.

10.5 Seller shall maintain an operating log at the Project with records of: real and reactive power production, changes in operating status, outages, protective apparatus operations and any unusual conditions found during inspections. In addition, Seller shall maintain records applicable to the Project, including the electrical characteristics of the generator and settings or adjustments of the generator control equipment and protective

14

devices. Seller shall make such information available to Edison upon request and shall provide copies of such operating log and records, if requested, to Edison within thirty days of Edison's request.

10.6 If, at any time, Edison has reason to doubt the integrity of any of the Project's protective apparatus and believes that such loss of integrity would be hazardous to the Edison Electric System Integrity, Seller shall demonstrate, to Edison's satisfaction, the correct calibration and operation of the equipment in question.

10.7 Seller shall test all protective devices with qualified personnel at intervals not to exceed four (4) years.

10.8 Seller shall notify Edison at least fourteen calendar days prior to: (i) initial energizing of the Point of Interconnection; (ii) initial parallel operation of each of the Project's generators; and (iii) initial testing of the Project's protective apparatus. Edison shall have the right to have a representative present at such times.

10.9 Seller shall, to the extent possible, provide reactive power for its own requirements and, where applicable, the reactive power losses of interfacing transformers. Seller shall not deliver excess reactive power to Edison unless otherwise agreed upon by the Parties.

10.10 Edison shall install, at Seller's cost, telemetering equipment for the purpose of monitoring the operation of the Project generators. Seller shall, as required by Edison, install additional meters, at a location within the Project, as agreed upon by both Parties, to enable Seller to make daily telephone reports in the event telemetering

15

equipment is inoperative. All costs of additional meter equipment, installation, ownership and administration shall be borne by Seller, including costs incurred by Seller for inspecting and testing such equipment.

11. INTERCONNECTION FACILITIES:

11.1 Edison,, at no cost to Seller shall own the Interconnection Facilities and shall design, construct, operate and maintain said facilities in accordance with good engineering and operating practices in the State of California.

11.2 Edison shall use its best efforts to schedule maintenance of the Interconnection Facilities during the off-peak hours as specified in Edison's Tariff Schedule TOU-8, and during expected minimal generation periods as agreed upon by the Operating Representatives. The anticipated duration of any scheduled or unscheduled outages of said facilities shall be communicated promptly to Seller in a manner as directed in writing by Seller's Operating Representative.

11.3 This Section 11 shall be subject to Seller's option regarding provision of power for the operation of the Generating Facility and Geothermal Facilities as set forth in Section 6.6 of this Agreement.

12. DELIVERY AND MEASUREMENT OF NET ENERGY:

12.1 Seller shall make, and Edison shall accept, Net Energy deliveries at the Point of Interconnection. Such deliveries shall be measured at the Edison 33 kV metering arrangement as shown in Exhibit A. The 33 kV measurement meters shall be provided, owned and maintained at Edison's expense. Readings from such meters shall

16

be the basis for determining Edison's Net Energy payments to Seller. For billing purposes, Edison shall read and record the 33 kV meter measurements on a monthly basis.

12.2 Edison's meters shall be sealed, and the seals shall be broken only when the meters are to be inspected, tested or adjusted by Edison. Seller shall be given reasonable notice of testing and have the right to have its representative present on such occasions.

12.3 Edison shall test, at its expense, the Edison Meters installed pursuant to this Agreement at least once each year. Edison shall test the meters at any reasonable time upon the request of Seller at Seller's expense. If Seller requests such a test, Seller shall reimburse said expense to Edison within thirty days after presentation of a bill therefor.

12.4 Metering equipment found to be inaccurate shall be repaired, adjusted or replaced by Edison so that the metering accuracy of said equipment shall be within two percent (2%). If metering equipment inaccuracy exceeds two percent (2%), the correct amount of Net Energy delivered during the period of said inaccuracy shall be estimated by Edison and agreed upon by the Parties.

13. SALE OF PROJECT:

13.1 If Seller desires to sell the Project and/or Geothermal Facilities, Seller shall promptly first offer to Edison, or any Edison subsidiary or affiliate designated by Edison in its sole judgment, the right to purchase the Project and/or Geothermal Facilities

17

and to purchase brine pursuant to the Magma Lease. Edison, or any Edison subsidiary or affiliate designated by Edison in its sole judgment, shall have up to ninety days from receipt to accept Seller's offer or to negotiate with Seller to reach mutual agreement.

13.2 In the event the Parties are unable to reach a satisfactory agreement pursuant to Section 13.1 and the Project and/or Geothermal Facilities are offered to any other party or parties, Edison or any Edison subsidiary or affiliate designated by Edison in its sole judgment, shall have up to thirty days from receipt of written notice of such terms to purchase the Project under the same terms and conditions as those under which Seller is willing to sell, and another party or parties are willing to purchase, the Project and/or Geothermal Facilities.

13.3 Seller represents and warrants that it: (i) presently has, and shall maintain at all times during the term of this Agreement, interests and rights necessary for the engineering, design, ownership, construction, operation, maintenance and testing of the Project and the Geothermal Facilities, (ii) shall not assign any such rights or interests without the prior written consent of Edison during the term of this Agreement as provided in Section 24, (iii) shall not permit to be enforced against such rights or interests any liens or encumbrances, and (iv) shall provide Edison all of those interests and rights, including, but not limited to the Geothermal Facilities, necessary for the ownership, operation and maintenance of the Project and Geothermal Facilities for a term equal to that agreed upon pursuant to Section 13.1 in the event that Edison purchases the Project and Geothermal Facilities.

18

13.4 If Seller sells or otherwise conveys any interest in the Project and/or Geothermal Facilities, Seller shall pay immediately to Edison the accrued MWh Credit balance (converted to kWh) converted to dollars by multiplying said amount by the then current Avoided Cost for energy and capacity (converted to (cent)/kWh) together with any other sums then due Edison hereunder.

14. ABANDONMENT:

14.1 The Project and Geothermal Facilities shall be deemed abandoned if Seller terminates operation of the Project and Geothermal Facilities with the intent that such termination is permanent. Such intent shall be conclusively presumed by either (i) Seller's notice to Edison of such intent or (ii) Seller's operation or nonoperation of the Project and Geothermal Facilities such that no Net Energy is generated for two hundred consecutive days during any period after the Date of Firm Operation, unless otherwise agreed upon in writing by the Parties.

14.2 If Seller abandons the Project and Geothermal Facilities during the term of this Agreement, Edison, or any Edison subsidiary or affiliate designated by Edison in its sole discretion, shall have the first right to Purchase the Project and Geothermal Facilities at their fair market value or by assuming the construction/permanent loan from an institutional lender for the construction of the Project and Geothermal Facilities ("Project Loan"), existing at the time of purchase. Until the accrued MWh Credit, as provided for in Section 15.2.2 has been reduced to zero, the amount of the Project Loan shall not exceed eleven million dollars (\$11,000,000) unless otherwise agreed upon by

19

the Parties. The proceeds of the Project loan shall only be used in connection with the Project and Geothermal Facilities. Seller shall not extend or otherwise modify any term of the Project Loan without the prior written consent of Edison.

14.3 If Edison purchases the Project and Geothermal Facilities pursuant to Section 14.2, Seller shall, at the time of such purchase, provide Edison with those interests and rights necessary for the ownership, operation and maintenance of the Project and Geothermal Facilities, including, but not limited to those rights provided to Seller under the Magma Lease, necessary to produce and utilize geothermal energy in sufficient quantities to operate the Project and Geothermal Facilities at a level necessary to obtain and sustain the agreed-upon Net Capacity for the remaining term of this Agreement.

14.4 If Seller abandons the Project, Seller shall immediately repay to Edison the accrued MWh Credit balance (converted to kWh) converted to dollars by multiplying said amount by the then current Avoided Cost for energy and capacity (converted to (cent)/kWh) together with any other sums then due Edison hereunder.

14.5 If Seller abandons the Project pursuant to this Section 14, or fails to maintain this Agreement in effect for the term set forth in Section 5.1.1, Seller shall reimburse Edison for the Base Capacity Price payments which Seller did not earn because of early termination. Such reimbursement for Base Capacity Price payments received by Seller under this Agreement shall be in accordance with the following formula: $R = (1. - x/30)$ times the total value of Base Capacity Price payments paid for deliveries from the Project, where "x" equals the number of completed years of Project

20

Operation. If Edison does not exercise its option pursuant to Section 14.2, Seller shall make such reimbursement to Edison within thirty (30) days after presentation of a bill therefor.

15. AGREEMENT PRICE, MEGAWATTHOUR ("MWH") CREDIT
ACCUMULATION AND REPAYMENT, AND BASE
CAPACITY PRICE ADJUSTMENTS:

15.1 Agreement Price.

15.1.1 Edison shall pay for any Net Energy delivered by Seller to Edison at the Point of Interconnection prior to the Date of Firm Operation. Such payment shall be Edison's Published Avoided Cost of energy with no payment for capacity.

15.1.2 Except as provided in Section 15.1.1 and upon operation commencing with the Date of Firm Operation ("Project Operation"), Edison shall pay Seller an Agreement Price for all Net Energy delivered and for all Net Capacity made available to Edison at the Point of Interconnection as follows:

15.1.2.1 Commencing on the Date of Firm Operation and continuing to September 12, 1986, the Agreement Price shall be 12.5(cent)/kWh.

15.1.2.2 Commencing on September 12, 1986, and continuing through December 31, 1995, the Agreement Price shall be 8.94(cent)/kWh (the sum of 7(cent)/kWh energy payment plus 1.94(cent)/kWh capacity payment).

15.1.2.3 Commencing on January 1, 1996, and continuing through the remaining term of this Agreement, the Agreement Price shall be equal to the sum of 100% of Edison's Published Avoided Cost of energy plus 1.94(cent)/kWh capacity payment.

21

15.1.3 During the period from January 1, 1989, through December 31, 1995, Seller shall deliver to Edison at least 70% of the total Net Energy delivered to Edison during the period from September 12, 1986, through December 31, 1988. If the total Net Energy deliveries during the period from January 1, 1989, through December 31, 1995, are not at least 70% of the total Net Energy deliveries during the period from September 12, 1986, through December 31, 1988, then Seller shall be subject to Section 15.1.4 of this Agreement.

15.1.4 If Seller fails to meet the performance requirements set forth in Section 15.1.3, Seller shall, at Edison's request, make an energy payment refund equal to the greater of zero or the difference in the net present value, calculated at a discount rate of eight percent per annum, between:

- A. The present value of the net energy delivered to and purchased by Edison from September 12, 1986, to December 31, 1995, at the energy price specified herein, less;
- B. The present value of the net energy delivered to and purchased by Edison from September 12, 1986, to December 31, 1995, at an energy price appropriate for the year in which any energy payment refund is made, equal to the energy prices shown below:

22

Year ----	Energy Price (cents/kWh) -----
1986	6.0
1987	6.4
1988	6.9
1989	7.6
1990	8.1
1991	8.6

1992	9.3
1993	10.1
1994	10.9
1995	11.8

The energy payment refund, if required, will be based on present values calculated to the date of the refund or January 1, 1996, whichever occurs earlier.

15.1.5 Seller shall reimburse Edison for any energy and capacity payments made after September 12, 1986, that are in excess of the monthly energy and capacity payments to be paid to Seller under this Section 15 by means of a reduction in each monthly energy and capacity payment, commencing upon the effective date of this Agreement, up to the full amount of each monthly Payment, until all such excess payments are recovered by Edison.

15.2 MWh Credit Accumulation

15.2.1 If payments Pursuant to Section 15.1.2.1 exceed Edison's avoided cost for energy and capacity, such excess shall be treated as payment incentives to be repaid by Seller to Edison. The accumulation of the Monthly MWh Credit shall be calculated in accordance with the following formula:

$$\text{Monthly MWh Credit} = \text{Net energy Delivered} \times \frac{12.5 \text{ (cent)/kWh} - 8.94 \text{ (cent)/kWh}}{8.94 \text{ (cent)/kWh}}$$

23

Wherein 12.5 cents equals (cent)/kWh paid for total kWh delivered from February 26, 1985, to September 12, 1986, and 8.94(cent)/kWh equals 7(cent)/kWh for energy plus 1.94c/kWh for capacity. If the Monthly MWh Credit is negative, it shall not be included in the calculation of the accumulation of Monthly MWh Credit.

15.2.2 As of September 12, 1986, the accrued MWh credit shall be fixed and recalculated from the Date of Firm Operation through September 12, 1986, which shall be deemed to be to 34,642 MWh.

15.3 Security for Energy and Capacity Payments

15.3.1 Coincident with the effective date of this Amended and Restated Power Purchase and Sales Agreement, Seller shall provide and maintain security in the amount of \$1.3 million in the form of a letter of credit or corporate guarantee reasonably satisfactory to Edison, which shall insure payment to Edison of the energy payment refund and/or the accrued MWh credit as set forth herein. Seller shall provide Edison with certificates evidencing Seller's compliance with the security requirements in this section.

15.3.2 If Seller provides security in the form of a letter of credit, the following criteria must be met:

A. The letter of credit must be issued by a financial institution which is registered with the California banking commissioner and doing business in California.

B. The bank issuing the letter of credit must have assets in excess of \$250 million and maintain a rating of "BC" or better from Keefe, Bryette &

C. The issuing institution shall provide Edison with annual certification that it meets these criteria.

15.3.3 If Seller provides security in the form of a corporate guarantee as set forth in Exhibit G attached hereto and made part hereof by this reference, the following criteria must be met:

A. The corporate guarantee shall be supported by an audited financial statement and a Dun and Bradstreet credit report, acceptable to Edison in its sole judgment, for each year in which the security is required.

B. If a corporate guarantee is provided and accepted, Seller shall cause the party issuing such corporate guarantee to provide annual audited financial statements and Dun and Bradstreet reports for the period of time that the security is required. In addition to the foregoing, Edison shall have the right to utilize any other relevant information it may possess or obtain in order to evaluate the acceptability of the security.

C. If the Dun and Bradstreet credit rating, the annual audited financial statement or other relevant information change materially according to accepted business practices during the period the security is in effect, Edison shall have the right to require replacement security.

15.3.4 The security contemplated herein shall remain in full force and effect until the obligations of Seller as set forth in Sections 15.1 and 15.2 have been satisfied, at which time the requirement for security shall terminate.

15.3.5 The security contemplated herein may be reduced at Seller's option in accordance with the following criteria:

A. Security for the energy payment refund may be reduced by the amount of energy payment refund paid to Edison under the terms of this Agreement.

B. Security C or the accrued MWh credit may be reduced by \$37.53 for each MWh repaid to Edison from the accrued MWh bank.

15.3.6 Notwithstanding the foregoing Sections 15.3.1 through 15.3.4, the security provisions set forth in Section 22 or this Agreement shall remain in full force and effect.

15.4 MWh Credit Repayment

15.4.1 Seller, at its option, may prepay any MWh amount of the accrued MWh credit at any time. Notwithstanding the foregoing, commencing on January 1, 1996, and through the end of the term of the Agreement, all accrued MWh credit shall be repaid to Edison in the form of equal monthly deliveries to Edison of the remaining accrued MWh credit being repaid, prorated over the remaining term of this Agreement. If there is no prepayment of accrued MWh, then the accrued MWh credit of 34,642 MWh shall be repaid from 1996 to 2015 at the rate of 1732.1 MWh each year to Edison with no cash Payment for such energy. The accrued MWh Credit of 34,642 MWh shall be reduced by the amount of MWh credits repaid prior to January 1, 1996.

15.4.2 In the event that any accrued MWh credit residue exists as of December 31, 2015, such residue shall be paid in full pursuant to the Guaranty

Agreement, attached hereto as Exhibit G and made part hereof by this reference, but shall in no event be paid by further deliveries of power to Edison. The value of one (1) MWh of accrued MWh credit shall be deemed to be \$37.53.

15.5 Monthly Capacity Payment

The monthly capacity payment shall be calculated as follows:

$$\begin{aligned} \text{Monthly Capacity Payment} &= 1.94(\text{cent})/\text{kWh} \\ &\times (\text{Effective Net Capacity, kW}) \\ &\times (\text{Total hours in month, Hour}) \\ &\times (\text{Monthly Capacity Factor}) \\ &\times (\text{Hurdle Factor}) \\ &\times (\text{Availability Factor}) \end{aligned}$$

15.5.1 Hurdle Factor

The Hurdle Factor shall be either 1.0 if the Monthly Capacity Factor is equal to or greater than 51% or 0.5 if the Monthly Capacity Factor is less than 51%.

15.5.2 Availability Factor The Availability Factor shall equal 1.0 unless Seller fails to provide Net Capacity pursuant to Section 15.5.2.1 in which case the Availability Factor shall be 0.5.

15.5.2.1 At Edison's request., Seller shall, within 30 minutes of such request, make all reasonable effort to make available the Net Capacity according to the Table set forth in Exhibit F, attached hereto and made part hereof by this reference, during periods of Emergency. If Seller has previously scheduled an outage coincident with an

Emergency, Seller shall make all, reasonable efforts to reschedule the outage. Failure of Seller to provide Net Capacity during an Emergency when first requested by Edison following the Date of Firm Operation shall not result in a reduction of Monthly Capacity Payments. However, after said initial request by Edison, whether or not Seller has complied with such request, any subsequent failure by Seller to comply with a request for Net Capacity by Edison shall result in the Availability Factor becoming 0.5 for the month in which the request occurred. The Availability Factor shall continue to be 0.5 until Seller can demonstrate that the Project can comply with a request for Net Capacity by Edison.

16. TAXES:

16.1 Ad valorem taxes and other taxes properly attributed to the Project and Geothermal Facilities shall be paid by Seller. If such taxes are assessed or levied against Edison, Seller shall pay Edison the amount of such assessment or levy within thirty days of presentation of a bill therefor.

16.2 Ad valorem taxes and other taxes properly attributed to land, land rights or interests in land for the Interconnection Facilities shall be paid by Edison. If such taxes are levied against Seller, Edison shall pay Seller the amount of such assessment or levy within thirty days of presentation of a bill therefor.

17. BILLING AND PAYMENT

17.1 Billing for Net Energy shall be determined for each calendar month by application of the Agreement Price pursuant to Section 15, to monthly meter readings

28

taken on, or about, the last day of each month. Within fifteen days after such readings, Edison shall mail a monthly statement of Net Energy and the dollar amount, if any, to be paid by Edison to Seller for Net Energy for that month. Payment to Seller shall follow within fifteen days of the statement.

17.2 Seller shall pay Edison for energy delivered and capacity made available to the Project within thirty days of the mailing of the monthly billing statement from Edison. Seller shall pay for such energy and capacity in accordance with the provisions of Section 6.2.

17.3 Edison shall bill Seller for taxes pursuant to Section 16.1, excluding any penalties or interest, no later than three (3) months following the date of payment of such taxes by Edison, as Seller shall pay to Edison therefor within forty-five days of the mailing date of the bill to Seller.

17.4 Seller shall bill Edison for taxes pursuant to Section 16.2, excluding any penalties or interest, no later than three (3) months following the date of payment of such taxes by Seller, and Edison shall pay Seller therefor within forty-five days of the mailing date of the bill to Edison.

17.5 If any amount of money owed hereunder by either Party has not been paid when due, an interest charge computed at the rate of the then-current Bank of America prime rate plus 1% per annum, compounded daily, or the maximum legal rate, whichever is less, from the due date until paid shall be added thereto.

29

18. OPERATING REPRESENTATIVES:

18.1 Within thirty days after execution of this Agreement, each Party shall appoint an Operating Representative for the purpose of securing effective cooperation and interchange of information and providing consultation and coordination on a prompt and orderly basis between the Parties in connection with various administrative, technical and operating matters which may arise from time to time under this Agreement, including the performance of the functions and duties of said representative under this Agreement.

18.2 Each Party shall bear the cost of its designated Representative.

18.3 Each Party shall notify the other Party promptly of any change in the designation of its Operating Representative.

18.4 The Operating Representative shall have no authority to modify any of the terms, covenants or conditions of this Agreement.

19. LIABILITY:

19.1 Each Party (First Party) hereby releases the other Party (Second Party), its directors, officers, employees, and agents from any liability for any loss, damage, claim, cost, charge or expense (including direct, indirect or consequential loss, damage, claim, cost, charge or expense, including attorney's fees and other costs of litigation) incurred by the First Party in connection with damage to the property of the First Party arising out of the Second Party's construction, engineering, repair, supervision, inspection, testing, protection,

operation, maintenance, replacement, reconstruction, use or ownership of its facilities, to the extent such loss, damage, claim, cost, charge or expense is caused by the negligence of the Second Party, its directors, officers,

30

employees, agents or any person or entity whose negligence would be imputed to the Second Party.

19.2 Each Party shall indemnify and hold harmless the other Party, its directors, officers, employees and agents from and against any loss, damage, claim, cost, charge or expense (including direct, indirect or consequential loss, damage, claim, cost, charge or expense, including attorney's fees and other costs of litigation) incurred by the other Party in connection with injury to, or death of, any person or damage to property of third parties arising out of arising out of the indemnifying Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge or expense is caused by the negligence of the indemnifying Party, its directors, officers, employees, agents or any person or entity whose negligence would be imputed to the indemnifying Party; provided, however, that each Party shall be solely responsible for, and shall bear all costs of, claims brought by its contractors or its own employees and shall indemnify and hold harmless the other Party for any such costs including costs arising out of any worker's compensation law.

19.3 The provisions of this Section 19 shall not be construed so as to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

31

20. INSURANCE:

20.1 Seller shall procure and maintain, and shall require each of its contractors and subcontractors to maintain, the following insurance during the term of this Agreement.

20.1.1 Workers' Compensation and Employer's Liability Insurance in compliance with statutory requirements of the State of California. Named insureds shall require their insurers to waive all rights of subrogation against Edison.

20.1.2 Comprehensive Bodily Injury and Property Damage Liability Insurance, including owner's and contractor's protective, products/completed operations, blanket contractual and automobile liability coverages, with combined single limits of not less than \$5,000,000 per occurrence. Such insurance shall (i) acknowledge Edison as an additional insured but only for Seller's or Seller's contractor's acts or omissions, (ii) be primary for all purposes and (iii) contain standard cross-liability provisions.

20.1.3 Seller will use its best efforts to secure business interruption insurance in the amount of \$1,500,000 per year for the period commencing with the second year of Project Operation.

20.2 Prior to the commencement of work on the Project and during the term of this Agreement, Seller shall furnish a certificate of insurance to Edison evidencing the above coverage. Such certificate shall provide that such insurance shall not be terminated nor expire except on thirty days' prior written notice to Edison. Payments of premiums and deductible losses for the above insurance shall be at Seller's sole expense.

20.3 If Seller fails to comply with any of the provisions of this Section 20, Seller shall, at its own cost, defend, indemnify, and hold harmless Edison, its directors, officers, agents, employees, assigns and successors in interest from and against any and all liability, damages, losses, claims, demands, actions, causes of action, costs, including attorney's fees and expenses, and other costs and expenses of litigation, or any of them, resulting from death of, or injury to, any person or damage to, or loss of, any property, including personnel and property of Edison, to the extent Edison would have been protected had Seller complied with all of the provisions of this Section 20.

21. WAIVERS:

21.1 Any waiver at any time by either Party of its rights with respect to a default or any other matter arising in connection with this Agreement shall be in writing and shall not be deemed to be a waiver with respect to any subsequent default or matter.

22. SECURITY:

22.1 As security for any amounts payable by Seller to Edison pursuant to Section 15, Seller hereby grants Edison, a continuing lien and security interest in the Project and Geothermal Facilities subject and subordinate only to the lien and security interest of the lender providing construction of permanent financing for the Project contained in the Construction and Term Loan Agreement between Mammoth-Pacific and Pacific Lighting Leasing Company, dated September 7, 1983. The lien and security interest of Edison shall be evidenced by a Deed of Trust, Assignment of Rents, and

Security Agreement, and Financing Statement in the form attached hereto as Exhibit B and Exhibit C respectively, and by this reference made a part hereof.

22.2 As additional security for any amounts payable by Seller to Edison pursuant to Section 15, Seller hereby agrees that its leasehold interest covering the Project and Seller's right to produce geothermal fluid shall be subject to a lien in favor of Edison until the Total MWh Credit is repaid. Such lien shall be evidenced by a Deed of Trust, Assignment of Rents, and Security Agreement in the form attached hereto as Exhibit B and by this reference made a part hereof.

23. UNCONTROLLABLE FORCES:

23.1 Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement, other than the obligation to pay money for energy and capacity previously delivered and received, when, and to the extent, failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" means any cause beyond the control of the party failing to perform including, but not limited to, failure of facilities maintained in accordance with good engineering and operating practices in California, flood, earthquake, storm, lightning, fire, epidemic, war, riot, civil disturbance or disobedience, labor dispute, labor or material shortage, sabotage, restraint by court order or public authority, art action or nonaction by, or inability to obtain the necessary authorizations or approvals from, any governmental agency or authority, which by the exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has not overcome.

Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such facts to the other Party and shall exercise due diligence to remove such inability. Nothing contained herein shall be construed so as to require a Party to settle any strike or labor dispute in which it may be involved.

24. ASSIGNMENT OF RIGHTS

24.1 Neither Party shall assign any interest in the Agreement, the Project or in the Geothermal Facilities, other than to a subsidiary or affiliate or in connection with the merger or sale of substantially all of its assets, without the express written consent of the other Party. Any assignment without the consent of the other Party, which consent shall not be unreasonably withheld, shall be void.

24.2 Seller may not sell, transfer, assign, convey or further encumber any interest in the Agreement or in the Project or in the Geothermal Facilities or leasehold interest or any interest in the Magma Lease unless it promptly repays Edison the accrued MWh Credit balance (converted to kWh) converted to dollars by multiplying said amount by the then current Avoided Cost for energy and capacity (converted to (cent)/kWh) together with any other sums then due Edison.

24.3 Any assignment by a Party of its interest in this Agreement shall not relieve the assigned Party of primary liability for any of its duties and obligations under this Agreement, and in the event of such assignment, the assigning Party shall continue to remain primarily liable for payment of any and all money due the other Party as provided

under this Agreement, and for the performance and observance of all other covenants, duties and obligations to be performed and observed under this Agreement by the Party to the same extent as though an assignment had not been made.

25. DISPUTES:

25.1 Any dispute arising between the Parties or their Operating Representatives relating to interpretation of the provisions of this Agreement or to the performance of the Parties hereunder, on which the Operating Representatives cannot reach final agreement within thirty days of written notice from the disputing Party to the other Party of such a dispute, shall be referred to the signatories to this Agreement, or any successors thereto, for resolution.

25.2 The final decision by the signatories to this Agreement, or any successors thereto, shall be made within thirty days after presentation by the Operating Representatives of all evidence affecting the dispute, and shall be reduced to writing. The decision shall be final and conclusive; provided, that if said signatories or successors cannot reach a final agreement regarding the dispute within the thirty day period, any remedies which are provided by law may be pursued.

26. LIENS AND ENCUMBRANCES:

26.1 Seller shall not suffer or permit to be enforced against the Project or Project land, land rights, or interests in land, or in the Geothermal Facilities or in the Magma Lease or any part thereof, any mechanic's, materialman's, contractor's or subcontractor's liens arising from, or any claim for damage growing out of, the work of

any construction, repair, restoration, replacement, or improvement, or any other claim or demand howsoever the same may arise; provided, if the aforesaid should occur, Seller shall take any and all action necessary to cause any such lien to be released or discharged or the enforcement thereof against the Project or Project land, land rights or interests in land or the Geothermal Facilities or in the Magma Lease to be terminated; and Seller agrees to indemnify and hold Edison and said premises free and harmless from all liability for any and all such liens, claims and demands, together with reasonable attorney's fees and all costs and expenses in connection therewith.

27. DISCLAIMER:

27.1 Any review by Edison of the design, construction, operation or maintenance of the Project is solely for the information of Edison. By making such review, Edison makes no representation as to, and in no way shall be responsible for, the economic feasibility, technical feasibility, operational capability or reliability, technical feasibility, operational capability or reliability of the Project. Seller shall in no way represent to any third party that any such review or the Project by Edison, including but not limited to, any review of the design, construction, operation or maintenance of the Project by Edison is a representation by Edison as to the economic feasibility, technical feasibility, operational capability or reliability of said facilities. Seller is solely responsible for economic feasibility, technical feasibility, operational capability or reliability thereof. Edison shall not be liable to Seller or third parties for, and Seller shall defend and indemnify Edison from, any cost, loss, damage or liability arising from any

contrary representation regarding the design, construction, operation or maintenance of the Project.

28. CONFIDENTIAL AND PROPRIETARY INFORMATION

28.1 The Parties agree that the terms and conditions set forth in this Agreement are to be maintained in confidence, and neither Party shall disclose any such information to any third party without the prior consent of the other.

28.2 Edison shall maintain in confidence, and shall use only for the purposes of this Agreement, information it may receive from Seller concerning the production and treatment of geothermal energy; the extent, productivity and properties of the Magma Resource; the compositions and properties of the geothermal substances produced from said Magma Resource; and other geothermal operations conducted by Seller in the Magma Resource.

28.3 The obligations of confidentiality set forth in Section 28.2 shall not apply to (i) information already known to the receiving Party when received from the other Party; (ii) information which is known or becomes known to the general public through acts of others than the Party hereto charged with the obligation to maintain it in confidence; and (iii) information received from a third party without restriction who did not acquire it directly or indirectly from the other Party.

28.4 Any Party required by any law, rule, regulation or order to disclose information which is otherwise required to be maintained in confidence pursuant to this Section 28 or where such disclosure is required in connection with the assertion of any

claim or defense in judicial or administrative proceedings involving a Party, may make such disclosure, notwithstanding the provisions of this Section 28; provided, however, that the Party otherwise required to make such disclosure shall inform the other Party thereof and shall cooperate to the maximum extent practicable to minimize the disclosure of any such information. The Party so disclosing such information shall use its best efforts to obtain proprietary or confidential treatment of such information by the third party to whom such information is so disclosed, and will, to the extent such remedies are available, seek protective orders limiting the dissemination and use of such information. This Agreement does not alter the rights of either Party to object to any such disclosure to any third party, to the extent such rights are permitted by law, rule, regulation or order.

29. NO THIRD PARTY BENEFICIARIES:

29.1 This Agreement is for the sole benefit of the Parties and shall not be construed as granting rights to any person or entity other than the Parties or imposing obligations on either Party to any person or entity other than the Parties.

30. NONDEDICATION OF FACILITIES:

30.1 Nothing in this Agreement, and no undertaking under this Agreement shall be construed as constituting, a dedication by either Party or any of its properties or facilities, or any part thereof, to the other Party or to the customers of a Party, or to the public.

31. NOTICES:

31.1 Except as otherwise specifically provided herein, any demand, notice, or request from one Party to the other, shall be given in writing and shall be deemed properly given, if delivered in person or sent by registered or certified mail to the persons specified below:

Southern California Edison Company

32. GOVERNING LAW

32.1 This Agreement shall be interpreted, governed by, and construed under the laws of the State of California or the laws of the United States, as applicable, as if executed and to be performed wholly within the State of California.

33. GENERAL PROVISION:

33.1 This Agreement constitutes the entire agreement and understanding between the Parties as to the subject matter of this Agreement. Prior agreements, commitments or representations express or implied, and discussions

between the Parties shall not be construed to be a part of this Agreement unless contained in this Agreement.

Exhibit 10.3.12

AMENDMENT NO. 1 TO THE
AMENDED AND RESTATED
POWER PURCHASE AND SALES AGREEMENT
BETWEEN
MAMMOTH PACIFIC
AND
SOUTHERN CALIFORNIA EDISON COMPANY

1. PARTIES

The Parties to this Amendment No. 1 to the Amended and Restated Power Purchase and Sales Agreement between Mammoth Pacific and Southern California Edison Company, executed on December 2, 1986 ("Contract") are Mammoth Pacific, L.P., a California limited partnership ("Seller") and Southern California Edison Company ("Edison") referred to individually as "Party" and collectively as "Parties."

2. RECITALS

This Amendment No. 1 is made with reference to the following facts, among others:

2.1 On December 2, 1986, Mammoth-Pacific and Edison executed the Contract which supersedes and replaces, in all terms and conditions, the original Mammoth Binary Power Purchase and Sales Agreement executed on October 20, 1983, assigned to Mammoth Pacific on October 20, 1983, and Amendment No. 1 thereto, executed on December 30, 1983.

2.2 On January 29, 1990, Mammoth Pacific assigned its right, title, and interest in the Contract to Seller. Edison consented to this

assignment on January 26, 1990. As a condition of this assignment, Mammoth Pacific repaid to Edison the dollar equivalent of the accrued MWh Credit balance, pursuant to the terms and conditions of the Contract, on January 30, 1990.

2.3 The Parties desire to amend the Contract to delete references to the MWh Credit balance since this obligation has been discharged.

3. AGREEMENT

The Parties agree to amend the Contract as follows:

3.1 Section 1.1 is amended to read as follows:

"1.1 The Parties to this Amended and Restated Power Purchase and Sales Agreement are: Mammoth Pacific, L.P. ("Seller"), a California limited partnership, and Southern California Edison Company ("Edison"), a California corporation, individually "Party", and collectively, "Parties."

3.2 Section 2.2 is amended to read as follows:

"2.2 This Amended and Restated Power Purchase and Sales Agreement provides for the following revisions, among others; restructuring of payment provisions for energy and capacity purchased by Edison, providing additional financial security to Edison and outlining Seller's option to supply power from the Generating Facility for operation of the Geothermal Facility and the Generating Facility;"

3.3 Section 13.4 is amended to read as follows:

"13.4 If Seller sells or otherwise conveys any interest in the project and/or Geothermal Facilities, Seller shall pay immediately to Edison any monies then due Edison hereunder."

3.4 Section 14.2 is amended to read as follows:

"14.2 If Seller abandons the Project and Geothermal Facilities during the term of this Agreement, Edison, or any Edison subsidiary or affiliate designated by Edison in its sole discretion, shall have the first right to purchase the Project and Geothermal Facilities at their fair market value."

3.5 Section 14.4 is amended to read as follows:

"14.4 If Seller abandons the Project, Seller shall immediately repay to Edison any monies then due Edison hereunder."

3.6 Section 15 is amended to read as follows:

"15. AGREEMENT PRICE AND BASE CAPACITY PRICE ADJUSTMENTS:"

3.7 Section 15.2 is amended to read as follows:

"15.2 MWh Credit Accumulation

As of September 12, 1986, the accrued MWh Credit shall be fixed and recalculated from the Date of Firm Operation through September 12, 1986, which shall be deemed to be 34,642 MWh. In conjunction with the assignment of the Contract on

January 29, 1990, the accrued MWh Credit balance shall be converted to dollars which shall be deemed to be \$1,157,894.99 and shall be repaid to Edison on January 30, 1990, thus discharging all obligation of the Seller with regard to the accrued MWh Credit."

3.8 Section 15.3.1 is amended to read as follows:

"15.3.1 Coincident with the effective date of this Amended and Restated Power Purchase and Sales Agreement, Seller shall provide and maintain security in the amount of \$1.3 million in the form of a letter of credit or corporate guarantee from Pacific Energy, reasonably satisfactory to Edison, which shall insure payment to Edison of the energy payment refund and/or other monies as set forth herein. Seller shall provide Edison with certificates evidencing Seller's compliance with the security requirements in this section."

3.9 Section 15.3.5 is amended to read as follows:

"15.3.5 The security contemplated herein may be reduced at Seller's option in accordance with the following criteria:

A. Security for the energy payment refund may be reduced by the amount of energy payment refund paid to Edison under the terms of this Agreement."

3.10 Section 15.4 is amended to read as follows:

"15.4 MWh Credit Repayment

The accrued MWh Credit shall be deemed to be repaid to Edison effective as of January 30, 1990."

3.11 Section 22 is amended to read as follows:

"22. Security:

22.1 Pursuant to the repayment of the accrued MWh Credit, as set forth herein, Edison's lien and security interest in the Project and Geothermal Facilities shall be reconveyed to Seller effective as of January 30, 1990.

22.2 Pursuant to the repayment of the accrued MWh Credit, as set forth herein, Edison's lien evidenced by a Deed of Trust, Assignment of Rents, and Security Agreement shall be reconveyed to Seller effective as of January 30, 1990."

3.12 Section 24.2 is amended to read as follows:

3

"24.2 Seller may not sell, transfer, assign, convey, or further encumber any interest in the Agreement or in the Project or in the Geothermal Facilities or leasehold interest or any interest in the Magma Lease unless it promptly repays Edison any monies then due Edison."

3.13 Section 31.1 is amended to read as follows:

"31.1 Except as otherwise specifically provided herein, any demand, notice, or request from one Party to the other, shall be given in writing and shall be deemed properly given, if delivered in person or sent by registered or certified mail to the persons specified below:

Southern California Edison Company
2244 Walnut Grove Avenue

Post Office Box 800
Rosemead, CA 91770
Attention: Secretary

Mammoth Pacific, L.P.
6055 E. Washington Blvd.
Commerce, CA 90040
Attention: President, Pacific Geothermal Company."

3.14 Exhibit B; "Deed of trust, Assignment of Rents and Security Agreement" is deleted in its entirety.

3.15 Exhibit C; "Financing Statement" is deleted in its entirety.

3.16 Exhibit G; "Guaranty Agreement" is deleted and replaced with the attached "Guaranty Agreement" dated January 23, 1990.

4. OTHER CONTRACT TERMS AND CONDITIONS

Except as amended herein, all terms, covenants, and conditions contained in the Contract shall train in full force and effect.

4

5. SIGNATURE CLAUSE

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 1 on behalf of the Party for whom they sign. This Amendment No. 1 is hereby executed as of this 18th day of May, 1990.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

1. PROJECT SUMMARY

This Contract is entered into between Southern California Edison Company ("Edison") and Mammoth Pacific ("Seller"). Seller is willing to construct, own, and operate a Qualifying Facility and sell electric power to Edison and Edison is willing to purchase electric power delivered by Seller to Edison at the Point of Interconnection pursuant to the terms and conditions set forth as follows:

1.1 All notices shall be sent to Seller at the following address:

Mammoth Pacific
6055 East Washington Boulevard
Commerce, CA 90040

1.2 Seller's Generating Facility:

- a. Nameplate Rating: 12,000 kW.
- b. Location: Casa Diablo (Mammoth Lakes), California
- c. Type (Check One):
 - ☐ Cogeneration Facility
 - ☒ Small Power Production Facility
- d. Delivery of power to Edison at a nominal 33,000 volts.
- e. Seller shall commence construction of the Generating Facility by April 1986.

1.3 Edison Customer Service District:

Bishop District

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

374 Lagoon Street
Bishop, CA 93514

1.4 Location of Edison Operating Switching Center:

Bishop Hydro Division
Control Substation, Route 1
Bishop, CA 93514

1.5 Contract Capacity: 0 kW

1.5.1 Estimated as-available capacity: 9,100 kW.

1.6 Expected annual production: 48,000,000 kWh.

1.7 Expected Firm Operation for each generating unit(s): February 1987

1.8 Contract Term: 30 years

1.9 Operating Options pursuant to Section 5: (Check One)

[N/A] Operating Option I. Entire Generator output dedicated to Edison. No electric service or standby service required.

[N/A] Operating Option II. Entire Generator output dedicated to Edison with separate electric service required.

a. Electric service Tariff Schedule No. ____ pursuant to Section 10.2.

b. Contract demand: ____ kW.

[X] Operating Option III. Excess generator output dedicated to Edison with Seller serving own load.

a. Electric service Tariff Schedule No. TOU--8 pursuant to Section 10.2.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

b. Contract demand: 1,900 kW.

c. Standby Demand: 1,900 kW pursuant to Section 10.2.

d. Maximum electrical requirements expected: 1,900 kW.

e. Standby electric service Tariff Schedule No. SCG-1 pursuant

to section 10.2.

f. Minimum monthly charge for standby services: [N/A].

1.10 Interconnection Facilities Agreement pursuant to Section 6 shall be:
(Check One)

[N/A] - Added Facilities Basis (Appendix A.1)

[N/A] - Capital Contribution Basis (Appendix A.2)

[X] - Seller Owned and Operated Basis (Appendix A.3)

1.11 The Capacity Payment Option selected by Seller pursuant to Section 9.1 shall be: (Check One)

[X] Option A - As-available capacity based upon:

[N/A] Standard Offer No. 1 Capacity Payment

Schedule, or

[X] Forecast of Annual As-Available Capacity Payment Schedule. The as-available capacity price (first year): 194/kW--yr. (Appendix B)

[X] Option B - Firm Capacity (check one)

3

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

[N/A] Standard Offer No. 2 Capacity Payment Schedule in effect at time of Contract execution.

[N/A] Standard Offer No. 2 Capacity Payment Schedule in effect at time of Firm Operation of first generating unit.

Contract Capacity Price: \$___/kW-yr. (Firm Capacity).

1.12 The Energy Payment Option selected by Seller pursuant to Section 9.2 shall be: (Check One)

[X] Option 1 - Forecast of Annual Marginal Cost of Energy in effect at date of execution of this Contract. (Appendix C)

[N/A] Option 2 - Levelized Forecast of Marginal Cost of Energy in effect at date of execution of this Contract. Levelized Forecast for the expected date of Firm Operation is ___(cent)/kWh. If Seller's Generating Facility is an oil/natural gas fueled cogenerator, Seller may not select

Option 2.

For the energy payment refund pursuant to Section 9.5 under Option 2. Edison's Incremental Cost of Capital is ____%. Seller may change once between Options 1 and 2, provided Seller delivers written notice of such change at least 90 days prior to the date of Firm Operation. For Option 1 or 2, Seller elects to receive the following

percentages in 20% increments, the total of which shall equal 100%:

4

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

[100] Percent of Forecast of Marginal Cost of Energy (Annual or Levelized), not to exceed 20% of the annual forecast for oil/natural gas fueled cogenerators, and

[0] Percent of Edison's published avoided cost of energy based on Edison's full avoided operating costs as updated periodically and accepted by the Commission.

[N/A] Option 3 - Incremental Energy Rate. Seller may select:

[N/A] Forecast of Incremental Energy Rate in effect at date of execution of this Contract (Appendix D),
or

[NA] A range in increments of 100 Btu/kWh above and below the forecast of incremental energy rates for each year during the First Period of the Contract Term as follows:

Year	Range	Year	Range	Year	Range
-----	-----	-----	-----	-----	-----
-----	-----	-----	-----	-----	-----
-----	-----	-----	-----	-----	-----
-----	-----	-----	-----	-----	-----

1.13 Metering Location (Check one)

Seller elects metering location pursuant to Section 8 as follows:

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

[N/A] Seller's aide of the Interconnection Facilities. Loss compensation factor is equal to _____, pursuant to Section 8.3.

CENTRAL TERMS & CONDITIONS

2. DEFINITIONS

When used with initial capitalizations, whether in the singular or in the plural, the following terms shall have the following meanings:

- 2.1 Adjusted Capacity Price: The \$/kW-yr capacity purchase price based on the Capacity Payment Schedule in effect at time of Contract execution for the time period beginning on the date of Firm Operation for the first generating unit and ending on the date of termination or reduction of Contract Capacity under Capacity Payment Option B.
- 2.2 Appendix A.1: Interconnection Facilities Agreement -- Added Facilities Basis
- 2.3 Appendix A.2: Interconnection Facilities Agreement -- Capital Contribution Basis
- 2.4 Appendix A.3: Interconnection Facilities Agreement -- Seller Owned and Operated Basis
- 2.5 Appendix B: Forecast of Annual As Available Capacity Payment Schedule
- 2.6 Appendix C: Forecast of Annual Marginal Cost of Energy
- 2.7 Appendix D: Forecast of Incremental Energy Rates.
- 2.8 Capacity Payment Schedule(s): Published capacity payment schedule(s) as authorized by the Commission for as-available or firm capacity.

- 2.9 Commission: The Public Utilities Commission of the State of California.
- 2.10 Contract: This document and Appendices, as amended from time to time.
- 2.11 Contract Capacity: The electric power producing capability of the Generating Facility which is committed to Edison.
- 2.12 Contract Capacity Price: The capacity purchase price from the Capacity Payment Schedule approved by the Commission for Capacity Payment Option B.
- 2.13 Contract Term: Period in years commencing with date of Firm Operation for the first generating unit(s) during which Edison shall purchase electric power from Seller.
- 2.14 Current Capacity Price: The \$/kW-yr capacity price provided in the Capacity Payment Schedule determined by the year of termination or reduction of Contract Capacity and the number of years from such termination or reduction to the expiration of the Contract Term for Capacity Payment Option B.
- 2.15 Edison: The Southern California Edison Company.
- 2.16 Edison Electric System Integrity: The state of operation of Edison's electric system in a manner which is deemed to minimize the risk of injury to persons and/or property and enables Edison to provide adequate and reliable electric service to its customers.
- 2.17 Emergency: A condition or situation which in Edison's sole judgment affects Edison Electric System Integrity.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- 2.18 Energy: Kilowatthours generated by the Generating Facility which are purchased by Edison at the Point of Interconnection.
- 2.19 Firm Operation: The date agreed on by the Parties on which each generating unit(s) of the Generating Facility is determined to be a reliable source of generation and on which such unit can be reasonably expected to operate continuously at its effective rating (expressed in kW).
- 2.20 First Period: The period of the Contract Term specified in Section 3.1.
- 2.21 Forced Outage: Any outage other than a scheduled outage of the Generating Facility that fully or partially curtails its electrical output.
- 2.22 Generating Facility: All of Seller's generators, together with all protective and other associated equipment and improvements, necessary to produce electrical power at Seller's Facility

excluding associated land, land rights, and interests in land.

- 2.23 Generator: The generator(s) and associated prime mover(s), which are a part of the Generating Facility.
- 2.24 Interconnection Facilities: Those protection, metering, electric line(s), and other facilities required in Edison's sole judgment to permit an electrical interface between Edison's system and the Generating Facility in accordance with Edison's Tariff Rule No. 21 titled Cogeneration and Small Power Production Interconnection Standards filed with the Commission.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- 2.25 Interconnection Facilities Agreement: That document which is specified in Section 1.10 and is attached hereto.
- 2.26 KVAR: Reactive kilovolt-ampere, a unit of measure of reactive power.
- 2.27 Operate: To provide the engineering, purchasing, repair, supervision, training, inspection, testing, protection, operation, use, management, replacement, retirement, reconstruction, and maintenance of and for the Generating Facility in accordance with applicable California utility standards and good engineering practices.
- 2.28 Operating Representatives: Individual(s) appointed by each Party for the purpose of securing effective cooperation and interchange of information between the Parties in connection with administration and technical matters related to this Contract.
- 2.29 Parties: Edison and Seller.
- 2.30 Party: Edison or Seller.
- 2.31 Peak Months: Those months which the Edison annual system peak demand could occur. Currently, but subject to change with notice, the peak months for the Edison system are June, July, August, and September.
- 2.32 Point of Interconnection: The point where the transfer of electrical energy between Edison and Seller takes place.
- 2.33 Project: The Generating Facility and Interconnection Facilities required to permit operation of Seller's Generator in parallel with Edison's electric system.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- 2.34 Protective Apparatus: That equipment and apparatus installed by Seller and/or Edison pursuant to Section 4.2.
- 2.35 Qualifying Facility: Cogeneration or Small Power Production Facility which meets the criteria as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.
- 2.36 Second Period: The period of the Contract Term specified in Section 3.2.
- 2.37 Seller: The Party identified in Section 1.0.
- 2.38 Seller's Facility: The premises and equipment of Seller located as specified in Section 1.2.
- 2.39 Small Power Production Facility: The facilities and equipment which use biomass, waste, or renewable resources, including wind, solar, geothermal, and water, to produce electrical energy as defined in Title 18, code of Federal Regulations, Section 292.201 through 292.207.
- 2.40 Standby Demand: Seller's electrical load requirement that Edison is expected to serve when Seller's Generating Facility is not available.
- 2.41 Summer Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the Commission.
- 2.42 Tariff Schedule No. TOU-8: Edison's time-of-use energy tariff for electric service exceeding 500 kW, as now in effect or as may hereafter be authorized by the Commission.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- 2.43 Uncontrollable Forces: Any occurrence beyond the control of a Party which causes that Party to be unable to perform its obligations hereunder and which a Party has been unable to overcome by the exercise of due diligence, including but not limited to flood, drought, earthquake, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, action or inaction of legislative, judicial, or regulatory agencies, or other proper authority, which may conflict with the terms of this Contract, or failure, threat of failure or sabotage of facilities which have been maintained in accordance with good engineering and operating practices in California.
- 2.44 Winter Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the Commission.

3. TERM

This Contract shall be effective upon execution by the Parties and shall remain effective until either Party gives 90 days prior written notice of termination to the other Party, except that such notice of termination shall not be effective to terminate this Contract prior to expiration of the Contract Term specified in Section 1.8.

- 3.1 The First Period of the Contract Term shall commence upon date of Firm Operation but not later than five years from the date of execution of this Contract.

11

SCE STANDARD CONTRACT LONG-TERM POWER PURCHASE

- a. If the Contract Term specified in Section 1.8 is 15 years, the First Period of the Contract Term shall be for five years.
- b. If the Contract Term specified in Section 1.8 is 20, 25, or 30 years, the First Period of the Contract Term shall be for 10 years.

- 3.2 The Second Period of the Contract Term shall commence upon expiration of the First Period and shall continue for the remainder of the Contract Term.

4. GENERATING FACILITY

4.1 Ownership

The Generating Facility shall be owned by Seller.

4.2 Design

4.2.1 Seller, at no cost to Edison, shall:

- a. Design the Generating Facility.
- b. Acquire all permits and other approvals necessary for the construction, operation, and maintenance of the Generating Facility.
- c. Complete all environmental impact studies necessary for the construction, operation, and maintenance of the Generating Facility.
- d. Furnish and install the relays, meters, power circuit breakers, synchronizer, and other control and Protective Apparatus as shall

12

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

be agreed to by the Parties as being necessary for proper and safe operation of the Project in parallel with Edison's electric system.

4.2.2 Edison shall have the right to:

- a. Review the design of the Generating Facility's electrical system and the Seller's Interconnection Facilities. Such review may include, but not be limited to, the Generator, governor, excitation system, synchronizing equipment, protective relays, and neutral grounding. The Seller shall be notified in writing of the outcome of the Edison review within 30 days of the receipt of all specifications for both the Generating Facility and the Interconnection Facilities. Any flaws perceived by Edison in the design shall be described in Edison's written notice.
- b. Request modifications to the design of the Generating Facility's electrical system and the Seller's Interconnection Facilities. Such modifications shall be required if necessary to maintain Edison Electric System Integrity when in parallel with the Edison electric system.

4.2.3 If Seller's Generating Facility includes an induction-type generator(s), Seller shall provide individual power factor correction capacitors for each such generator. Such capacitors shall be switched on and off simultaneously with each of the associated induction-type

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

generator(s) of the Generating Facility. The KVAR rating of such capacitors shall be the highest standard value which will not exceed such generators no-load KVAR requirement. Seller shall not install power factor correction in excess of that required by this Section unless agreed to in writing by the Parties.

4.3 Construction

Edison shall have the right to review, consult with, and make recommendations regarding Seller's construction schedule and to monitor the construction and start-up of the Project. Seller shall

notify Edison, at least one year prior to Firm Operation, of changes in Seller's Construction Schedule which may affect the date of Firm operation.

4.4 Operation

- 4.4.1 The Generating Facility and Seller's Protective Apparatus shall be operated and maintained in accordance with applicable California utility industry standards and good engineering practices with respect to synchronizing, voltage and reactive power control. Edison shall have the right to monitor operation of the Project and may require changes in Seller's method of operation if such changes are necessary, in Edison's sole judgment, to maintain Edison Electric System Integrity.

14

SCE STANDARD CONTRACT LONG-TERM POWER PURCHASE

- 4.4.2 Seller shall notify in writing Edison's Operating Representative at least 14 days prior to:
- a. the initial testing of Seller's Protective Apparatus; and
 - b. the initial parallel operation of Seller's Generators with Edison's electrical system.

Edison shall have the right to have a representative present at each event.

- 4.4.3 Edison shall have the right to require Seller to disconnect the Generator from the Edison electric system or to reduce the electrical output from the Generator into the Edison electric systems whenever Edison determines, in its sole judgment, that such a disconnection is necessary to facilitate maintenance of Edison's facilities, or to maintain Edison Electric System Integrity. If Edison requires Seller to disconnect the Generator from the Edison electric system pursuant to this section 4.4.3, Seller shall have the right to continue to serve its total electrical requirements provided Seller has elected Operating Option III. Each Party shall endeavor to correct, within a reasonable period, the condition on its system which necessitates the disconnection or the reduction of electrical output. The duration of the disconnection or the reduction in electrical output shall be limited to the period of time such a condition exists.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

4.4.4 the Generating Facility shall be operated with all of Seller's Protective Apparatus in service whenever the Generator is connected to or is operated in parallel with the Edison electric system. Any deviation for brief periods of emergency or maintenance shall only be by agreement of the Parties.

4.4.5 Each Party shall keep the other Party's Operating Representative informed as to the operating schedule of their respective facilities affecting each other's operation hereunder, including any reduction in Contract Capacity availability. In addition, Seller shall provide Edison with reasonable advance notice regarding its scheduled outages including any reduction in Contract Capacity availability. Reasonable advance notice is as follows:

SCHEDULED OUTAGE EXPECTED DURATION	ADVANCE NOTICE TO EDISON
Less than one day	24 Hours
One day or more (except major overhauls)	1 Week
Major overhaul	6 Months

4.4.6 Notification by each Party's Operating Representative of outage date and duration should be directed to the other Party's Operating Representative by telephone.

4.4.7 Seller shall not schedule major overhauls during Peak Months.

4.4.8 Seller shall maintain an operating log at Seller's Facility with records of: real and reactive power production; changes in operating status, outages, Protective Apparatus operations; and any unusual conditions found during inspections. Changes in setting shall also be logged for Generators which are "block-loaded" to a specific kW capacity. In addition, Seller shall maintain records applicable to the Generating Facility, including the electrical characteristics of the Generator and settings or adjustments of the Generator control equipment and protective devices. Information maintained pursuant to this Section 4.4.8 shall be provided to Edison, within 30

days of Edison's request.

- 4.4.9 If, at any time, Edison doubts the integrity of any of Seller's Protective Apparatus and believes that such loss of integrity would impair the Edison Electric System Integrity, Seller shall demonstrate to Edison's satisfaction, the correct calibration and operation of the equipment in question.
- 4.4.10 Seller shall test all protective devices specified in Section 4.2 with qualified Edison personnel present at intervals not to exceed four years.
- 4.4.11 Seller shall, to the extent possible, provide reactive power for its own requirements, and where applicable, the reactive power losses of

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

interfacing transformers. Seller shall not deliver excess reactive power to Edison unless otherwise agreed upon between the Parties.

- 4.4.12 The Seller warrants that the Generating Facility meets the requirements of a Qualifying Facility as of the effective date of this Contract and continuing through the Contract Term.
- 4.4.13 The Seller warrants that the Generating Facility shall at all times conform to all applicable laws and regulations. Seller shall obtain and maintain any governmental authorizations and permits for the continued operation of the Generating Facility. If at any time Seller does not hold such authorizations and permits, Seller agrees to reimburse Edison for any loss which Edison incurs as a result of the Seller's failure to maintain governmental authorization and permits.
- 4.4.14 At Edison's request, Seller shall make all reasonable effort to deliver power at an average rate of delivery at least equal to the Contract Capacity during periods at Emergency. In the event that the Seller has previously scheduled an outage coincident with an Emergency, Seller shall make all reasonable efforts to reschedule the outage. The notification periods listed in Section 4.4.5 shall be waived by Edison if Seller reschedules the outage.
- 4.4.15 Seller shall demonstrate the ability to provide Edison the specified Contract Capacity within 30 days of the date of Firm Operation.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

Thereafter, at least once per year at Edison's request, Seller shall demonstrate the ability to provide Contract Capacity for a reasonable period of time as required by Edison. Seller's demonstration of Contract Capacity shall be at Seller's expense and conducted at a time and pursuant to procedures mutually agreed upon by the Parties. If Seller fails to demonstrate the ability to provide Contract Capacity, the Contract Capacity shall be reduced by agreement of the Parties pursuant to Section 9.1.2.5.

4.5 Maintenance

- 4.5.1 Seller shall maintain the Generating Facility in accordance with applicable California utility industry standards and good engineering and operating practices. Edison shall have the right to monitor such maintenance of the Generating Facility. Seller shall maintain and deliver a maintenance record of the Generating Facility to Edison's Operating Representatives upon request.
- 4.5.2 Seller shall make a reasonable effort to schedule routine maintenance during Off-Peak Months. Outages for scheduled maintenance shall not exceed a total of 30 peak hours for the Peak Months.
- 4.5.3 The allowance for scheduled maintenance is as follows:
 - a. Outage periods for scheduled maintenance shall not exceed 840 hours (35 days) in any 12-month period. This allowance may be

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

used in increments of an hour or longer on a consecutive or nonconsecutive basis.

- b. Seller may accumulate unused maintenance hours on a year-to-year basis up to a maximum of 1,080 hours (45 days). This accrued time must be used consecutively and only for major overhauls.

4.6 Any review by Edison of the design, construction, operation, or maintenance of the Project is solely for the information of

Edison. By making such review, Edison makes no representation as to the economic and technical feasibility, operational capability, or reliability of the Project. Seller shall in no way represent to any third party that any such review by Edison of the Project, including, but not limited to, any review of the design, construction, operation, or maintenance of the Project by Edison, is a representation by Edison as to the economic and technical feasibility, operational capability, or reliability of said facilities. Seller is solely responsible for economic and technical feasibility, operational capability, and reliability thereof.

5. OPERATING OPTIONS

5.1 Seller shall elect in Section 1.9 to Operate its Generating Facility in parallel with Edison's electric system pursuant to one of the following options:

a. Operating Option I: Seller dedicates the entire Generator output to Edison with no electrical service required from Edison.

20

SCE STANDARD CONTRACT LONG-TERM POWER PURCHASE

b. Operating Option II: Seller dedicates the entire Generator output to Edison with electrical service required from Edison.

c. Operating Option III: Seller dedicates to Edison only that portion of the Generator output in excess of Seller's electrical service requirements. As much as practicable, Seller intends to serve its electrical requirements from the Generator output and will require electrical standby from Edison as designated in Section 1.9.

5.2 After expiration of the First Period of the Contract Term, Seller may change the Operating Option, but not more than once per year upon at least 90 days prior written notice to Edison. A reduction in Contract Capacity as a result of a change in operating options shall be subject to Section 9.1.2.5. Edison shall not be required to remove or reserve capacity of Interconnection Facilities made idle by a change in operating options. Edison may dedicate any such idle Interconnection Facilities at any time to serve other customers or to interconnect with other electric power sources. Edison shall process requests for changes of operating option in the chronological order received.

5.2.1. When the Seller wishes to reserve Interconnection Facilities paid for by the Seller but idled by a change in operation option, Edison shall impose a special facilities charge related to the operation and maintenance of the Interconnection Facility. When the Seller no longer needs said facilities for which it has paid, the Seller shall

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

receive credit for the net salvage value of the Interconnection Facilities dedicated to Edison's use. If Edison is able to make use of these facilities to serve other customers, the Seller shall receive the fair market value of the facilities determined as of the date the Seller either decides no longer to use said facilities or fails to pay the required maintenance fee.

6. INTERCONNECTION FACILITIES

- 6.1 The Parties shall execute an Interconnection Facilities Agreement selected by Seller in Section 1.10, covering the design, installation, operation and maintenance of the Interconnection Facilities required in Edison's sole judgment, to permit an electrical interface between the Parties pursuant to Edison's Tariff Rule No. 21.
- 6.2 The cost for the Interconnection Facilities set forth in the appendices specified in Section 1.10, are estimates only for Seller's information and will be adjusted to reflect recorded costs after installation is complete; except that, upon Seller's written request to Edison, Edison shall provide a binding estimate which shall be the basis for the Interconnection Facilities cost in the Interconnection Facilities Agreement executed by the Parties.
- 6.3 The nature of the Interconnection Facilities and the Point of Interconnection shall be set forth either by equipment lists or appropriate one-line diagrams and shall be attached to the appropriate appendix specified in Section 1.10.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- 6.4 The design, installation, operation, maintenance, and modifications of the Interconnection Facilities shall be at Seller's expense.
- 6.5 Seller shall not commence parallel operation of the Generating Facility until written approval for operation of the Interconnection Facilities has been received from Edison. The Seller shall notify Edison at least forty-five days prior to the initial energizing of the Point of Interconnection. Edison shall have the right to inspect the Interconnection Facilities within thirty days of receipt of such notice. If the facilities do not pass Edison's inspection, Edison shall provide in writing the reasons for this failure within five days of the inspection.
- 6.6 Seller, at no cost to Edison, shall acquire all permits and

approvals and complete all environmental impact studies necessary for the design, installation, operation, and maintenance of the Interconnection Facilities.

7. ELECTRIC LINES AND ASSOCIATED EASEMENTS

- 7.1 Edison shall, as it deems necessary or desirable, build electric lines, facilities and other equipment, both overhead and underground, on and off Seller's Facility, for the purpose of effecting the agreements contained in this Contract. The physical location of such electric lines, facilities and other equipment on Seller's Facility shall be determined by agreement of the Parties.

23

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- 7.2 Seller shall reimburse Edison for the cost of acquiring property rights off Sellers's Facility required by Edison to meet its obligations under this Contract.
- 7.3 Seller shall grant to Edison, without cost to Edison, and by an instrument of conveyance, acceptable to Edison, rights of way, easements and other property interests necessary to construct, reconstruct, use, maintain, alter, add to, enlarge, repair, replace, inspect and remove, at any time, the electric lines, facilities or other equipment, both overhead and underground, which are required by Edison to effect the agreements contained in the Contract. Seller shall also provide the rights of ingress and egress at all reasonable times necessary for Edison to perform the activities contemplated in the Contract.
- 7.4 The electric lines, facilities, or other equipment referred to in this Section 7 installed by Edison on or off Seller's Facility shall be and remain the property of Edison.
- 7.5 Edison shall have no obligation to Seller for any delay or cancellation due to inability to acquire a satisfactory right of way, easements, or other property interests.

8. METERING

- 8.1 All meters and equipment used for the measurement of electric power for determining Edison's payments to Seller pursuant to this Contract shall be

24

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

provided, owned, and maintained by Edison at Seller's expense in accordance with Edison's Tariff Rule No. 21.

- 8.2 All meters and equipment used for billing Seller for electric service provided to Seller by Edison under Operating Options II or III shall be provided, owned, and maintained by Edison at Edison's expense in accordance with Edison's Tariff Rule No. 16.
- 8.3 The meters and equipment used for measuring the Energy sold to Edison shall be located on the side of the Interconnection Facilities as specified by Seller in Section 1.13. If the metering equipment is located on Seller's side of the Interconnection Facilities, then a loss compensation factor agreed upon by the Parties shall be applied. At the written request of the Seller, and at Seller's sole expense, Edison shall measure actual transformer losses. If the actual measured value differs from the agreed upon loss compensation factor, the actual value shall be applied prospectively. If the meters are placed on Edison's side of the Interconnection Facilities, service shall be provided at the available transformer high-side voltage.
- 8.4 For purposes of monitoring the Generator operation and the determination of standby charges, Edison shall have the right to require, at Seller's expense, the installation of generation metering. Edison may also require the installation of telemetering equipment at Seller's expense for Generating Facilities equal to

25

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

or greater than 10 MW. Edison may require the installation of telemetering equipment at Edison's expense for Generating Facilities less than 10 MW.

- 8.5 Edison's meters shall be sealed and the seals shall be broken only when the meters are to be inspected, tested, or adjusted by Edison. Seller shall be given reasonable notice of testing and have the right to have its Operating Representative present on such occasions.
- 8.6 Edison's meters installed pursuant to this Contract shall be tested by Edison, at Edison's expense, at least once each year and at any reasonable time upon request by either Party, at the requesting Party's expense. If Seller makes such request, Seller shall reimburse said expense to Edison within thirty days after presentation of a bill therefor.
- 8.7 Metering equipment found to be inaccurate shall be repaired, adjusted, or replaced by Edison such that the metering accuracy of said equipment shall be within two percent. If metering equipment inaccuracy exceeds two percent, the correct amount of Energy and Contract Capacity delivered during the period of said inaccuracy shall be estimated by Edison and agreed upon by the Parties.

9. POWER PURCHASE PROVISIONS

Prior to the date of Firm Operation, Seller shall be paid for Energy only pursuant to Edison's published avoided cost of energy based on Edison's full avoided operating cost as periodically updated and accepted by the

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

can be delivered to Edison and Seller is contesting the claimed jurisdiction of any entity which has not issued a license or other approval for the Project, Seller, in its sole discretion and risk, may deliver Energy to Edison and for any Energy purchased by Edison, Seller shall receive payment from Edison for (i) Energy pursuant to this Section, and (ii) as-available capacity based on a capacity price from the Standard Offer No. 1 Capacity Payment Schedule as approved by the Commission. Unless and until all required licenses and approvals have been obtained, Seller may discontinue deliveries at any time.

9.1 Capacity Payments

Seller shall sell to Edison and Edison shall purchase from Seller capacity pursuant to the Capacity Payment Option selected by Seller in Section 1.11. The Capacity Payment Schedules will be based on Edison's full avoided operating costs as approved by the Commission throughout the life of this Contract. Data used to derive Edison's full avoided costs will be made available to the Seller, to the extent specified by Seller upon request.

9.1.1 Capacity Payment Option A -- As Available Capacity.

If Seller selects Capacity Payment Option A, Seller shall be paid a monthly capacity payment calculated pursuant to the following formula:

MONTHLY
$$\text{CAPACITY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak

periods defined in Edison's Tariff
Schedule No. TOU-8.

D = The appropriate time differentiated capacity price from either the Standard Offer No. 1 Capacity Payment Schedule or Forecast of Annual As-Available Capacity Payment Schedule as specified by Seller in Section 1.11.

9.1.1.1 If Seller specifies the Standard Offer No. 1 Capacity Payment Schedule in Section 1.11, then the formula set forth in Section 9.1.1 shall be computed with D equal to the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the Contract Term.

9.1.1.2 If Seller specifies the Forecast of Annual As-Available Capacity Payment Schedule in Section 1.11, the formula set forth in Section 9.1.1 shall be computed as follows:

28

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- a. During the First period of the Contract Term, D shall equal the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule.
- b. During the Second Period of the Contract Term, the formula shall be computed with D equal to the appropriate time differentiated capacity price from Standard Offer No. 1 Capacity Payment Schedule, but not less than the greater of (i) the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule for the last year of the First Period, or (ii) the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the first year of the Second Period.

9.1.2 Capacity payment Option B -- Firm Capacity Purchase
If Seller selects Capacity Payment Option B, Seller shall provide to Edison for the Contract Term the Contract Capacity specified in Section 1.5, or as adjusted

pursuant to Section 9.1.2.6, and Seller shall be paid as follows:

29

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

9.1.2.1 If Seller meets the performance requirements set forth in Section 9.1.2.2, Seller shall be paid a Monthly Capacity Payment, beginning from the date of Firm Operation equal to the sum of the on-peak, mid-peak, and off-peak Capacity Period Payments. Each capacity period payment is calculated pursuant to the following formula:

MONTHLY PERIOD CAPACITY PAYMENT = $A \times B \times C \times D$

Where A = Contract Capacity Price specified in Section 1.11 based on the Standard Offer No. 2 Capacity Payment Schedule as approved by the Commission and in effect on the date of the execution of this Contract.

B = Conversion factors to convert annual capacity prices to monthly payments by time of delivery as specified in Standard Offer No. 2 Capacity Payment Schedule and subject to periodic modifications as approved by the Commission.

C = Contract Capacity specified in Section 1.5.

D = Period Performance Factor, not to exceed 1.0, calculated as follows:

Period kWh purchased by Edison limited by the level of Contract Capacity

30

$0.8 \times \text{Contract Capacity} \times (\text{Period Hours} - \text{Maintenance Hours Allowed in Section 4.5.})$

9.1.2.2 Performance Requirements to receive the Monthly Capacity Payment in Section 9.1.2.1,

Seller shall provide the Contract Capacity in each Peak Month for all on-peak hours as such peak hours are defined in Edison's Tariff Schedule No. TOU-8 on file with the Commission, except that Seller is entitled to a 20% allowance for Forced Outages for each Peak Month. Seller shall not be subject to such performance requirements for the remaining hours of the year.

- a. If Seller fails to meet the requirements specified in Section 9.1.2.2, Seller, in Edison's sole discretion, may be placed on probation for a period not to exceed 15 months. If Seller fails to meet the requirements specified in Section 9.1.2.2 during the probationary period, Edison may derate the Contract Capacity to the greater of the capacity actually delivered during the probationary period, or the capacity at which Seller can reasonably meet such requirements. A

31

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

reduction in Contract Capacity as a result of this Section 9.1.2.2 shall be subject to Section 9.1.2.5.

- b. If Seller fails to meet the requirements set forth in Section 9.1.2.2 due to a Forced Outage on the Edison system or a request to reduce or curtail delivery under Section 9.4, Edison shall continue Monthly Capacity Payments pursuant to Capacity Payment Option B. The Contract Capacity curtailed shall be treated the same as scheduled maintenance outages in the calculation of the Monthly Capacity Payment.

- 9.1.2.3 If Seller is unable to provide Contract Capacity due to Uncontrollable Forces, Edison shall continue Monthly Capacity Payments for 90 days from the occurrence of the Uncontrollable Force. Monthly Capacity Payments payable during a period of interruption or reduction by reason of an Uncontrollable Force shall be treated the same as scheduled maintenance outages.

9.1.2.4 Capacity Bonus Payment for Capacity Payment Option B, Seller may receive a Capacity Bonus Payment as follows:

- a. Bonus During Peak Months -- For a Peak Month, Seller shall receive a Capacity Bonus Payment if (i)

32

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

the requirements set forth in Section 9.1.2.2 have been met, and (ii) the on-peak capacity factor exceeds 85%.

- b. Bonus During Non-Peak Months -- For a non-peak month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 9.1.2.2 have been met (ii) the on-peak capacity factor for each Peak Month during the year was at least 85%, and (iii) the on-peak capacity factor for the non-peak month exceeds 85%.
- c. For any eligible month, the Capacity Bonus Payment shall be calculated as follows:

$$\text{CAPACITY BONUS PAYMENT} = A \times B \times C \times D$$

Where A = $(1.2 \times \text{On-Peak Capacity Factor}) - 1.02$
Where the On-Peak Capacity Factor, not to exceed 1.0, is calculated as follows:
Period kwh purchased by Edison limited by the level of Contract Capacity (Contract Capacity) $\times$ (Period Hours minus Maintenance Hours Allowed in Section 4.5)

B = Contract Capacity Price specified in Section 1.11 for Capacity Payment Option B

33

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

$$C = 1/12$$

$$D = \text{Contract Capacity specified in Section 1.5}$$

- d. When Seller is entitled to receive a Capacity Bonus Payment, the Monthly Capacity Payment shall be the sum of the Monthly Capacity Payment pursuant to Section 9.1.2.1 and the Monthly Capacity Bonus Payment pursuant to this Section.
- e. For Capacity Payment Option B, Seller shall be paid for capacity in excess of Contract Capacity based on the as-available capacity price in Standard Offer No. 1 Capacity Payment Schedule, as updated and approved by the Commission. Seller shall not receive any as-available capacity payment in excess of Contract Capacity if Seller's Generating Facility is a small hydro project.

9.1.2.5 Capacity Reduction

- a. Seller may reduce the Contract Capacity specified in Section 1.5, provided that Seller gives Edison prior written notice for a period determined by the amount of Contract Capacity reduced as follows:

34

SCE STANDARD CONTRACT LONG-TERM POWER PURCHASE

Amount of Contract Capacity Reduced	Length of Notice Required
25,000 kW or under	12 months
25,001 - 50,000 kW	36 months
50,001 - 100,000 kW	48 months
over 100,000 kW	60 months

- b. Subject to Section 10.4, Seller shall refund to Edison with interest at the current published Federal Reserve Board three months prime commercial paper rate an amount equal to the difference between (i) the accumulated Monthly Capacity Payments paid by Edison pursuant to Capacity Payment Option B up to the time the reduction notice is received by Edison, and (ii) the total capacity payments which Edison would have paid if based on the Adjusted Capacity Price.

- c. From the date the reduction notice is received to the date of actual capacity reduction, Edison shall make capacity payments based on the Adjusted Capacity Price for the amount of Contract Capacity being reduced.
- d. Seller may reduce Contract Capacity without the notice prescribed in Section 9.1.2.5(a), provided that

35

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

Seller shall refund to Edison the amount specified in Section 9.1.2.5(b) and an amount equal to: (i) the amount of Contract Capacity being reduced, times (ii) the difference between the Current Capacity Price and the Contract Capacity Price, times (iii) the number of years and fractions thereof (not less than one year) by which the Seller has been deficient in giving prescribed notice. If the Current Capacity Price is less than Contract Capacity Price, only payment under Section 9.1.2.5(b) shall be due to Edison.

- 9.1.2.6 Adjustment to Contract Capacity. The Parties may agree in writing at any time to adjust the Contract Capacity. Seller may reduce the Contract Capacity pursuant to Section 9.1.2.5. Seller may increase the Contract Capacity with Edison's approval and thereafter receive payment for the increased capacity in accordance with the Contract Capacity Price for the Capacity Payment Option selected by Seller for the remaining Contract Term.

9.2 Energy Payments - First Period

During the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for the Energy delivered by the Seller to Edison at the Point

36

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

of Interconnection pursuant to the Energy Payment Option selected by Seller in Section 1.12, as follows. (Data used to derive Edison's Energy payments for the First Period will be made available to the Seller, to the extent specified by Seller, upon request.)

- 9.2.1 Energy Payment Option 1 -- Forecast of Annual Marginal Cost of Energy. If Seller selects Energy Payment Option 1, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison during each month in the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

- Where
- A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.
 - B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.
 - C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.
 - D = The sum of:
 - (i) the appropriate time differentiated energy price from the Forecast of Annual Marginal Cost of Energy, multiplied by the decimal equivalent of the percentage of

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

the forecast specified in Section 1.12, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy

price specified in Section 1.12.

- 9.2.2 Energy Payment Option 2 -- Levelized Forecast of Marginal Cost of Energy. If Seller selects Energy Payment Option 2, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison each month

during the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time differentiated energy price from the Levelized Forecast of Marginal Cost of Energy, for

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

the First Period of the Contract Term multiplied by the decimal equivalent of the percentage of the levelized forecast specified in Section 1.12, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.12.

- 9.2.2.1 Performance Requirement for Energy Payment Option 2 During the First Period when the annual forecast referred to in Section 9.2.1 is greater than the levelized forecast referred to in Section 9.2.2, Seller shall deliver to Edison at least 70 percent of the average annual kWh delivered to Edison during those previous periods when the levelized forecast referred to in Section

9.2.2 is greater than the annual forecast referred to in Section 9.2.1 as resource conditions permit for solar, wind, and hydro Generating Facilities and excluding uncontrollable forces. If Seller does not meet the performance requirements of this Section 9.2.2.1, Seller shall be subject to Section 9.5.

9.3 Energy Payments - Second Period

During the Second Period of the Contract Term, Seller shall be paid a

39

SCE STANDARD CONTRACT LONG-TERM POWER PURCHASE

Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at a rate equal to 100% of Edison's published avoided cost of energy based on Edison's full avoided operating cost as updated periodically and accepted by the Commission, pursuant to the following formula:

MONTHLY ENERGY PAYMENT = kwh purchased by Edison for each on-peak, mid-peak, and off-peak time period defined in Edison's Tariff Schedule No. TOU-8.

x Edison's published avoided cost of energy by time of delivery for each time period.

Data used to derive Edison's full avoided costs will be made available to the Seller, to the extent specified by Seller, upon request.

- 9.4 Edison shall not be obligated to accept or pay for Energy, and may request Seller whose Generating Facility is one (1) MW or greater to discontinue or reduce delivery of Energy, for not more than 300 hours annually during off-peak hours when (i) purchases would result in costs greater than those which Edison would incur if it did not purchase Energy from Seller but instead utilized an equivalent amount of Energy generated from another Edison source, or (ii) the Edison Electric System demand would require that Edison hydro-energy be spilled to reduce generation.

40

9.5 Energy Payment Refund

If Seller elects Energy Payment Option 2, Seller shall be subject to the following:

- 9.5.1 If Seller fails to perform the Contract obligations for any reason during the First Period of the Contract Term, or fails to meet the performance requirements set forth in Section 9.2.2.1, and at the time of such failure to perform, the net present value of the cumulative Energy payments received by Seller pursuant to Energy Payment Option 2 exceeds the net present value of what Seller would have been paid pursuant to Energy Payment Option 1, Seller shall make an energy payment refund equal to the difference in such net present values in the year in which the refund is due. The present value calculation shall be based upon the rate of Edison's incremental cost of capital specified in Section 1.12.
- 9.5.2 Not less than 90 days prior to the date Energy is first delivered to the Point of Interconnection, Seller shall provide and maintain a performance bond, surety bond, performance insurance, corporate guarantee, or bank letter of credit, satisfactory to Edison, which shall insure payment to Edison of the Energy Payment Refund at any time during the First Period. Edison may, in its sole discretion accept another form of security except that in such instance a 1-1/2 percent

SCE STANDARD CONTRACT LONG-TERM POWER PURCHASE

reduction shall then apply to the levelized forecast referred to in Section 9.2.2 in computing payments for Energy. Edison shall be provided with certificates evidencing Seller's compliance with the security requirements in this Section which shall also include the requirement that Edison be given 90 days prior written notice of the expiration of such security.

- 9.5.3 If Seller fails to provide replacement security not less than 60 days prior to the date of expiration of existing security, the Energy Payment Refund provided in Section 9.5 shall be payable forthwith. Thereafter, payments for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 9.2.1.
- 9.5.4 If Edison at any time determines the security to be otherwise inadequate, and so notifies Seller, payments thereafter for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 9.2.1. If within 30 days of the date Edison gives notice of such inadequacies, Seller satisfies Edison's security

requirements, Energy Payment Option 2 shall be reinstated. If Seller fails to satisfy Edison's security requirements within the 30-day period, the Energy Payment Refund provided in Section 9.5 shall be payable forthwith.

10. PAYMENT AND BILLING PROVISIONS

10.1 For Energy and capacity purchased by Edison:

42

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- 10.1.1 Edison shall mail to Seller not later than thirty days after the end of each monthly billing period (1) a statement showing the Energy and Contract Capacity delivered to Edison during the on-peak, mid-peak, and off-peak periods, as those periods are specified in Edison's Tariff Schedule No. TOU-8 for that monthly billing period, (2) Edison's computation of the amount due Seller, and (3) Edison's check in payment of said amount.
- 10.1.2 If the monthly payment period involves portions of two different published Energy payment schedule periods, the monthly Energy payment shall be prorated on the basis of the percentage of days at each price.
- 10.1.3 If the payment period is less than 27 days or greater than 33 days, the capacity payment shall be prorated on the basis of coverage days per month per year.
- 10.1.4 If Within thirty days of receipt of the statement Seller does not make a report in writing to Edison of an error, Seller shall be deemed to have waived any error in Edison's statement, computation, and payment, and they shall be considered correct and complete.

10.2 For electric Service provided by Edison:

43

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

10.2.1 Under Operating Option III pursuant to Section 5.1, standby electric service shall be provided under terms and conditions of Edison's tariff schedule indicated below as now in effect or as may hereafter be authorized by the Commission to be revised. The applicable tariff schedules are:

STANDBY TARIFF SCHEDULE NO	ELECTRICAL SERVICE TARIFF
SCG-1	TOU-8 or GS-2
SCG-1	TOU-8
SCG-3	TOU-8

10.2.1.1 (Applicable to SCG-I only) The Standby Demand for calculation of the standby charge in SCG-1 is specified in Section 1.9. Edison reserves the right to adjust the Standby Demand based on recorded demand during periods standby power is required.

10.2.1.2 (Applicable to SCG-1 only) The capacity rating for determination of standby waiver qualifications shall be Contract Capacity plus the maximum electric load served by the Generating Facility during the on-peak time period recorded during the preceding 12-month time period.

44

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

10.2.1.3 A minimum monthly charge may be established for standby electric service as provided in the tariff schedule elected in Section 1.9. Said minimum monthly charge shall be specified in Section 1.9.

10.2.2 Under Operating Options II and III pursuant to Section 5.1, electric service shall be provided under terms, conditions, and rates of Edison's tariff schedule indicated below as now in effect or as may hereafter be authorized by the Commission to be revised.
The applicable tariff schedule is:

TOU-8, or

GS2

The contract demand for calculation of the minimum demand charge in the applicable tariff schedules is specified in Section 1.9.

10.2.3 Edison shall commence billing Seller for electric service rendered pursuant to the applicable tariff schedule on the date that the Point of Interconnection is energized.

10.3 Monthly charges associated with Interconnection Facilities shall be billed pursuant to the Interconnection Facilities Agreement contained in the Appendix specified in Section 1.10.

45

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

10.4 Payments due to Contract Capacity Reduction

10.4.1 The Parties agree that the refund and payments provided in Section 9.1.2.5 represent a fair compensation for the reasonable losses that would result from such reduction of Contract Capacity.

10.4.2 In the event of a reduction in Contract Capacity, the quantity, in kW, by which the Contract Capacity is reduced shall be used to calculate the refunds and payments due Edison in accordance with Section 9.1.2.5, as applicable.

10.4.3 Edison shall provide invoices to Seller for all refunds and payments due Edison under this section which shall be due within 60 days.

10.4.4 If Seller does not make payments as required in Section 10.4.3, Edison shall have the right to offset any amounts due it against any present or future payments due Seller and may pursue any other remedies available to Edison as a result of Seller's failure to perform.

10.5 Energy Payment Refund

Energy Payment Refund is immediately due and payable upon Seller's failure to perform the contract obligations as specified in Section 9.5.

46

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

11. TAXES

- 11.1 Seller shall pay ad valorem taxes and other taxes properly attributable to the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.
- 11.2 Seller shall pay ad valorem taxes and other taxes properly attributed to land, land rights, or interest in land for the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.
- 11.3 If the interconnection Facilities are owned by Edison, Edison shall pay ad valorem taxes and other taxes properly attributed to said facilities. If such taxes are assessed or levied against Seller, Edison shall pay Seller for such assessment or levy.
- 11.4 Seller or Edison shall provide information concerning the Project to any requesting taxing authority.

12. TERMINATION

This Contract shall terminate if Firm Operation does not occur within 5 years of the date of Contract execution.

13. LIABILITY

- 13.1 Each Party (First Party) releases the other Party (Second Party), its directors, officers, employees and agents from any loss, damage, claim, cost, charge, or expense of any kind or nature (including any direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorneys' fees and other costs of litigation incurred by the First Party in

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

connection with damage to property of the First Party caused by or arising out of the Second Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of Second Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to Second Party.

- 13.2 Each Party shall indemnify and hold harmless the other Party, its directors, officers, and employees or agents from and against any loss, damage, claim, cost, charge, (including

direct, indirect or consequential loss, damage, claim, cost, charge, or expense) including attorneys' fees and other costs of litigation, incurred by the other Party in connection with the injury to or death of any person or damage to property of a third party arising out of the indemnifying Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use, or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of the indemnifying Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to the indemnifying Party; provided, however, that each Party shall be solely responsible for and shall bear all cost of claims brought by its contractors or its own employees

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

and shall indemnify and hold harmless the other Party for any such costs including costs arising out of any workers compensation law. Seller releases and shall defend and indemnify Edison from any claim, cost, loss, damage, or liability arising from any contrary representation concerning the effect of Edison's review of the design, construction, operation, or maintenance of the Project.

13.3 The provisions of this Section 13 shall not be construed so as to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

13.4 Neither Party shall be indemnified under this Section 13 for its liability or loss resulting from its sole negligence or willful misconduct.

14. INSURANCE

14.1 Until Contract is terminated, Seller shall obtain and maintain in force as hereinafter provided comprehensive general liability insurance, including contractual liability coverage, with a combined single limit of (i) not less than \$1,000,000 each occurrence for Generating Facilities 100 kW or greater; (ii) not less than \$500,000 for each occurrence for Generating Facilities between 20 kW and 100 kW; and (iii) not less than \$100,000 for each occurrence for Generating Facilities less than 20 kW. The insurance carrier or carriers and form of policy shall be subject to review and approval by Edison.

- 14.2 Prior to the date Seller's Generating Facility is first operated in parallel with Edison's electric system, Seller shall (i) furnish certificate of insurance to Edison, which certificate shall provide that such insurance shall not be terminated nor expire except on thirty days prior written notice to Edison, (ii) maintain such insurance in effect for so long as Seller's Generating Facility is operated in parallel with Edison's electric system, and (iii) furnish to Edison an additional insured endorsement with respect to such insurance in substantially the following forms:

"In consideration of the premium charged, Southern California Edison Company (Edison) is named as additional insured with respect to all liabilities arising out seller's use and ownership of Seller's Generating Facility." "The inclusion of more than one insured under this policy shall not operate to impair the rights of one insured against another insured and the coverage afforded by this policy will apply as though separate policies had been issued to each insured. The inclusion of more than one insured will not, however, operate to increase the limit of the carrier's liability. Edison will not, by reason of its inclusion under this policy, incur liability to the insurance carrier for payment of premium for this policy."

50

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

"Any other insurance carried by Edison which may be applicable shall be deemed excess insurance and Seller's insurance primary for all purposes despite any conflicting provisions in Seller's policy to the contrary."

If the requirement of Section 14.2 (iii) prevents Seller from obtaining the insurance required in Section 14.1 then upon written notification by Seller to Edison, Section 14.2 (iii) shall be waived.

- 14.3 The requirements of this Section 14 shall not apply to Seller who is a self-insured governmental agency with established record of self-insurance.
- 14.4 If Seller fails to comply with the provisions of this Section 14, Seller shall, at its own cost, defend, indemnify, and hold harmless Edison, its directors, officers, employees, agents, assigns, and successors in interest from and against any and all loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense, including attorneys' fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of Edison, to the extent that Edison would have been protected had Seller complied with all of the provisions of this Section 14.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

15. UNCONTROLLABLE FORCES

- 15.1 Neither Party shall be considered to be in default in the performance of any of the agreements contained in this Contract, except for obligations to pay money, when and to the extent failure of performance shall be caused by an Uncontrollable Force.
- 15.2 If either Party because of an Uncontrollable Force is rendered wholly or partly unable to perform its obligations under this Contract, the Party shall be excused from whatever performance is affected by the Uncontrollable Force to the extent so affected provided that:
- (1) the nonperforming Party, within two weeks after the occurrence of the Uncontrollable Force, gives the other Party written notice describing the particulars of the occurrence,
 - (2) the suspension of performance is of no greater scope and of no longer duration than is required by the Uncontrollable Force,
 - (3) the nonperforming Party uses its best efforts to remedy its inability to perform (this subsection shall not require the settlement of any strike, walkout, lockout or other labor dispute on terms which, in the sole judgment of the Party involved in the dispute, are contrary to its interest. It is understood and agreed that the settlement of strikes, walkouts, lockouts or other labor disputes shall be at the sole discretion of the Party having the difficulty),

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- (4) when the nonperforming Party is able to resume performance of its obligations under this Contract, that Party shall give the other Party written notice to that effect, and
 - (5) capacity payments during such periods of Uncontrollable Force on Seller's part shall be governed by Section 9.1.2.3.
- 15.3 In the event that either Party's ability to perform cannot be corrected when the Uncontrollable Force is caused by the

actions or inactions of legislative, judicial or regulatory agencies or other proper authority, this Contract may be amended to comply with the legal or regulatory change which caused the nonperformance.

If a loss of Qualifying Facility status occurs due to an Uncontrollable Force and Seller fails to make the changes necessary to maintain its Qualifying Facility status, the Seller shall compensate Edison for any economic detriment incurred by Edison as a result of such failure.

16. NONDEDICATION OF FACILITIES

Neither Party, by this Contract, dedicates any part of its facilities involved in this Project to the public or to the service provided under the Contract, and such service shall cease upon termination of the Contract.

17. PRIORITY OF DOCUMENTS

If there is a conflict between this document and any Appendix, the provisions of

53

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

this document shall govern. Each Party shall notify the other immediately upon the determination of the existence of any such conflict.

18. NOTICES AND CORRESPONDENCE

All notices and correspondence pertaining to this contract shall be in writing and shall be sufficient if delivered in person or sent by certified mail, postage prepaid, return receipt requested, to Seller as specified in Section 1.1, or to Edison as follows:

Southern California Edison Company
Post Office Box 800
Rosemead, California 91770
Attention: Secretary

All notices sent pursuant to this Section 18 shall be effective when received, and each Party shall be entitled to specify as its proper address any other address in the United States upon written notice to the other Party.

19. PREVIOUS COMMUNICATIONS

This Contract contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this contract, and merges and supersedes all prior agreements, commitments, representations, and discussions between the Parties. No Party shall be bound to any other obligations, conditions, or representations with respect to the subject matter of this Contract.

20. NONWAIVER

None of the provisions of the Contract shall be considered waived by either Party

54

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

except when such waiver is given in writing. The failure of either Edison or Seller to insist on any one or more instances upon strict performance of any of the provisions of the Contract or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue to remain in full force and effect.

21. SUCCESSORS AND ASSIGNS

Neither Party shall voluntarily assign its rights nor delegate its duties under this Contract, or any part of such rights or duties, without the written consent of the other Party, except in connection with the sale or merger of a substantial portion of its properties. Any such assignment or delegation made without such written consent shall be null and void. Consent for assignment shall not be withheld unreasonably. Such assignment shall include, unless otherwise specified therein, all of Seller's rights to any refunds which might become due under this Contract.

22. EFFECT OF SECTION READINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

23 GOVERNING LAW

This Contract shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

55

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

24. MULTIPLE ORIGINALS

This Contract is executed in two counterparts, each of which shall be deemed an original.

SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have executed this Contract this 15th of April, 1985.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

AMENDMENT NO. 1
POWER PURCHASE CONTRACT BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY AND
MAMMOTH PACIFIC
(Mammoth Pacific II Project)

"Amendment No. 1
Power Purchase Contract Between Southern California
Edison Company and Mammoth Pacific"

1. PARTIES:

This Amendment No. 1 to the Power Purchase Contract between Southern California Edison Company and Mammoth Pacific ("Contract") for the Mammoth Pacific II project is entered into between Southern California Edison Company ("Edison") and Mammoth Pacific ("Seller"), individually, "Party," and collectively, "Parties."

2. RECITALS:

This Amendment No. 1 to the Contract is made with reference to the following facts, among others:

2.1 Edison and Mammoth Pacific executed the Contract on April 15, 1985.

2.2. Mammoth Pacific executed an Interconnection Facilities Agreement as Appendix A.3 to the Contract effective October 13, 1985 ("IFA").

2.3 Seller desires to amend the Contract to delete the IFA as Appendix A.3 to the Contract and replace it with the attached Interconnection Facilities Agreement as Appendix A to the Contract.

3. AGREEMENT:

The Parties agree to amend the Contract as follows:

3.1 The attached Interconnection Facilities Agreement shall replace and supersede the IFA as Appendix A to the Contract.

4. OTHER TERMS AND CONDITIONS:

Except as expressly amended by this Amendment No. 1, the terms and conditions of the Contract shall remain in full force and effect.

5. EFFECTIVE DATE:

This Amendment No. 1 shall become effective when it has been duly executed by the Parties.

6. SIGNATURE CLAUSE:

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 1 to the Contract on behalf of the Party for whom they sign. This Amendment No. 1 is hereby executed as of this 27th day of October, 1989.

Exhibit 10.3.15

AMENDMENT NO. 2

POWER PURCHASE CONTRACT BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY AND
MAMMOTH PACIFIC

1. PARTIES:

This Amendment No. 2 to the Power Purchase Contract between Southern California Edison Company and Mammoth-Pacific ("Contract") for the Mammoth-Pacific II project is entered into between Southern California Edison Company ("Edison") and Mammoth-Pacific ("Seller"), individually, "Party," and collectively, "Parties."

2. RECITALS:

This Amendment No. 2 to the Contract is made with reference to the following facts, among others:

2.1 Edison and Seller executed the Contract on April 15, 1985.

2.2 Edison and Seller executed Amendment No. 1 to the Contract on October 27, 1989.

2.3 The Contract was subject to Uncontrollable Forces which rendered Mammoth-Pacific unable to perform its obligations under the Contract for a period of five hundred fifty-three (553) days.

2.4 The Parties desire to amend the Contract to change the date of expected Firm Operation set forth at Section 1.7 of the Contract to reflect the effect of the Uncontrollable Force.

3. AGREEMENT:

The Parties agree to amend the Contract as follows:

(A) The expected Firm Operation date of "February 1967" set forth at Section 1.7 of the Contract is deleted, and replaced with "October 20, 1991."

(B) The First Period of the Contract Term set forth at Section 3.1 of the Contract shall commence upon date of Firm Operation, and the phrase "but not later than five years from the date of execution of this Contract" is deleted.

(C) The text of Section 12 should be deleted and replaced with: "This Contract shall terminate if Firm Operation does not occur by October 20, 1991."

4. OTHER TERMS AND CONDITIONS:

Except as expressly amended by this Amendment No. 2, the terms and conditions of the Contract shall remain in full force and effect.

5. EFFECTIVE DATE:

This Amendment No. 2 shall become effective when it has been duly executed by the Parties.

2

6. SIGNATURE CLAUSE:

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 2 to the Contract on behalf of the Party for whom they sign. This Amendment No. 2 is hereby executed as of this 20th day of December, 1989.

1. PROJECT SUMMARY

This Contract is entered into between Southern California Edison Company ("Edison") and Santa Fe Geothermal, Inc. ("Seller"). Seller is willing to construct, own, and operate a Qualifying Facility and sell electric power to Edison and Edison is willing to purchase electric power delivered by Seller to Edison at the Point of Interconnection pursuant to the terms and conditions set forth as follows:

1.1 All notices shall be sent to Seller at the following address:

Santa Fe Geothermal, Inc.
5001 East Commerce Center Drive
Bakersfield, CA 93309

1.2 Seller's Generating Facility:

a. Nameplate Rating: 10,000 kW.

b. Location: Section 9, T35, R28E, MDBM

c. Type (Check One):

N/A Cogeneration Facility

X Small Power Production Facility

d. Delivery of power to Edison at a nominal 33,000 volts.

e. Seller shall commence construction of the Generating Facility by 1987.

1.3 Edison Customer Service District;

Bishop District
374 Lagoon Street
Bishop, CA 93514

1.4 Location of Edison Operating Switching Center:

Bishop Hydro Division
Control Substation, Route 1
Bishop, CA 93514

4

1.5 Contract Capacity: 10,000 kW

1.5.1 Estimated as-available capacity: 0 kW.

1.6 Expected annual production: 74,460,000 kWh.

1.7 Expected Firm Operation for each generating unit(s): January 1988

1.8 Contract Term: 30 years

1.9 Operating Options pursuant to Section 5: (Check One)

N/A Operating Option I. Entire Generator output
--- dedicated to Edison. No electric service or
 standby service required.

N/A Operating Option II. Entire Generator output
--- dedicated to Edison with separate electric
 service required.

a. Electric service Tariff Schedule No. ____
 pursuant to Section 10.2.

b. Contract demand: ____ kW.

X Operating Option III. Excess generator output
 dedicated to Edison with Seller serving own load.

a. Electric service Tariff Schedule No. TOG-8
 pursuant to Section 10.2.

b. Contract demand: 1,500 kW.

c. Standby Demand: 1,500 kW pursuant to Section
 10.2.

d. Maximum electrical requirements expected: 1,500
 kW.

e. Standby electric service Tariff Schedule No.
 SCG-1 pursuant to Section 10.2.

f. Minimum monthly charge for standby service: N/A.

1.10 Interconnection Facilities Agreement pursuant to Section 6 shall
be: (Check One)

N/A - Added Facilities Basis (Appendix A.1)

5

X - Capital Contribution Basis (Appendix A.2)

N/A - Seller Owned and Operated Basis (Appendix A.3)

1.11 The Capacity Payment Option selected by Seller pursuant to Section
9.1 shall be: (Check One)

N/A Option A - As-available capacity based upon:

N/A Standard Offer No. 1 Capacity Payment Schedule,
--- or

N/A Forecast of Annual As-Available Capacity
--- Payment Schedule. The as-available capacity

price (first year): \$_____/kW-yr. (Appendix B)

X Option B - Firm Capacity (check one)

X Standard Offer No. 2 Capacity Payment Schedule
--- in effect at time of Contract execution.

N/A Standard Offer No. 2 Capacity Payment Schedule
--- in effect at time of Firm Operation of first
 generating unit.

Contract Capacity Price: \$165/kW-yr. (Firm Capacity).

1.12 The Energy Payment Option selected by Seller pursuant to Section 9.2 shall be: (Check One)

X Option 1 - Forecast of Annual Marginal Cost of Energy
--- in effect at date of execution of this Contract.
 (Appendix C)

N/A Option 2 - Levelized Forecast of Marginal Cost of
--- Energy in effect at date of execution of this
 Contract. Levelized Forecast for the expected date of
 Firm Operation is ____ (cent)/kWh. If Seller's
 Generating Facility is an oil/natural gas fueled
 cogenerator. Seller may not select Option 2.

For the energy payment refund pursuant to Section 9.5 under Option 2, Edison's Incremental Cost of Capital is ____%.

Seller may change once between Options 1 and 2, provided Seller delivers written notice of such change at least 90 days prior to the date of Firm Operation.

6

For option 1 or 2, Seller elects to receive the following percentages in 20% increments, the total of which shall equal 100%:

100 Percent of Forecast of Marginal Cost of Energy
--- (Annual or Levelized), not to exceed 20% of the
 annual forecast for oil/natural gas fueled
 cogenerators, and

0 Percent of Edison's published avoided cost of
--- energy based on Edison's full avoided operating
 costs as updated periodically and accepted by
 the Commission.

N/A Option 3 - Incremental Energy Rate. Seller may
--- select:

N/A Forecast of Incremental Energy Rate in effect
--- at date of execution of this Contract (Appendix
 D),

or

N/A A range in increments of 100 Btu/kWh above and
--- below the forecast of incremental energy rates

for each year during the First Period of the
Contract Term as follows:

Year	Range	Year	Range	Year	Range
----	-----	----	-----	----	-----
----	-----	----	-----	----	-----
----	-----	----	-----	----	-----
----	-----	----	-----	----	-----

1.13 Metering Location (Check one)

Seller elects metering location pursuant to Section 8 as
follows:

X Edison's side of the Interconnection Facilities

N/A Seller's side of the Interconnection Facilities. Loss
--- compensation factor is equal to _____, pursuant to
Section 8.3.

7

GENERAL TERMS & CONDITIONS

2. DEFINITIONS

When used with initial capitalizations, whether in the singular or in
the plural, the following terms shall have the following meanings:

2.1 Adjusted Capacity Price: The \$/kW-yr capacity purchase price based
on the Capacity Payment Schedule in effect at time of Contract execution for the
time period beginning on the date of Firm Operation for the first generating
unit and ending on the date of termination or reduction of Contract Capacity
under Capacity Payment Option B.

2.2 Appendix A.1: Interconnection Facilities Agreement -- Added
Facilities Basis

2.3 Appendix A.2: Interconnection Facilities Agreement -- Capital
Contribution Basis

2.4 Appendix A.3: Interconnection Facilities Agreement -- Seller Owned
and Operated Basis

2.5 Appendix B: Forecast of Annual As Available Capacity Payment
Schedule

2.6 Appendix C: Forecast of Annual Marginal Cost of Energy

2.7 Appendix D: Forecast of Incremental Energy Rates.

2.8 Capacity Payment Schedule(s): Published capacity payment
schedule(s) as authorized by the Commission for as-available or firm capacity.

2.9 Commission: The Public Utilities Commission of the State of
California.

2.10 Contract: This document and Appendices, as amended from time to time.

2.11 Contract Capacity: The electric power producing capability at the Generating Facility which is committed to Edison.

2.12 Contract Capacity Price: The capacity purchase price from the Capacity Payment Schedule approved by the Commission for Capacity Payment Option B.

2.13 Contract Term: Period in years commencing with date of Firm Operation for the first generating unit(s) during which Edison shall purchase electric power from Seller.

8

2.14 Current Capacity Price: The \$/kW-yr capacity price provided in the Capacity Payment Schedule determined by the year of termination or reduction of Contract Capacity and the number of years from such termination or reduction to the expiration of the Contract Term for Capacity Payment Option B.

2.15 Edison: The Southern California Edison Company.

2.16 Edison Electric System Integrity: The state of operation of Edison's electric system in a manner which is deemed to minimize the risk of injury to persons and/or property and enables Edison to provide adequate and reliable electric service to its customers.

2.17 Emergency: A condition or situation which in Edison's sole judgment affects Edison Electric System Integrity.

2.18 Energy: Kilowatthours generated by the Generating Facility which are purchased by Edison at the Point of Interconnection.

2.19 Firm Operation: The date agreed on by the Parties on which each generating unit(s) of the Generating Facility is determined to be a reliable source of generation and on which such unit can be reasonably expected to operate continuously at its effective rating (expressed in kW).

2.20 First Period: The period of the Contract Term specified in Section 3.1.

2.21 Forced Outage: Any outage other than a scheduled outage of the Generating Facility that fully or partially curtails its electrical output.

2.22 Generation Facility: All of Seller's generators, together with all protective and other associated equipment and improvements, necessary to produce electrical power at Seller's Facility excluding associated land, land rights, and interests in land.

2.23 Generator: The generator(s) and associated prime mover(s), which are a part of the Generating Facility.

2.24 Interconnection Facilities: Those protection, metering, electric line(s), and other facilities required in Edison's sole judgment to permit an electrical interface between Edison's system and the Generating Facility in accordance with Edison's Tariff Rule No. 21 titled Cogeneration and Small Power Production Interconnection Standards filed with the Commission.

2.25 Interconnection Facilities Agreement: That document which is specified in Section 1.10 and is attached hereto.

9

2.26 KVAR: Reactive kilovolt-ampere, a unit of measure of reactive power.

2.27 Operate: To provide the engineering, purchasing, repair, supervision, training, inspection, testing, protection, operation, use, management, replacement, retirement, reconstruction, and maintenance of and for the Generating Facility in accordance with applicable California utility standards and good engineering practices.

2.28 Operating Representatives: Individual(s) appointed by each Party for the purpose of securing effective cooperation and interchange of information between the Parties in connection with administration and technical matters related to this Contract.

2.29 Parties: Edison and Seller.

2.30 Party: Edison or Seller.

2.31 Peak Months: Those months which the Edison annual system peak demand could occur. Currently, but subject to change with notice, the peak months for the Edison system are June, July, August, and September.

2.32 Point of Interconnection: The point where the transfer of electrical energy between Edison and Seller takes place.

2.33 Project: The Generating Facility and Interconnection Facilities required to permit operation of Seller's Generator in parallel with Edison's electric system.

2.34 Protective Apparatus: That equipment and apparatus installed by Seller and/or Edison pursuant to Section 4.2.

2.35 Qualifying Facility: Cogeneration or Small Power Production Facility which meets the criteria as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.

2.36 Second Period: The period of the Contract Term specified in Section 3.2.

2.37 Seller: The Party identified in Section 1.0.

2.38 Seller's Facility: The premises and equipment of Seller located as specified in Section 1.2.

2.39 Small Power Production Facility: The facilities and equipment which use biomass, waste, or renewable resources, including wind, solar, geothermal, and water, to produce electrical energy as defined in Title 18, Code of Federal Regulations, Section 292.201 through 292.207.

10

2.40 Standby Demand: Seller's electrical load requirement that Edison is expected to serve when Seller's Generating Facility is not available.

2.41 Summer Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the Commission.

2.42 Tariff Schedule No. TOU-8: Edison's time-of-use energy tariff for electric service exceeding 500 kW, as now in effect or as may hereafter be authorized by the Commission.

2.43 Uncontrollable Forces: Any occurrence beyond the control of a Party which causes that Party to be unable to perform its obligations hereunder and which a Party has been unable to overcome by the exercise of due diligence,

including but not limited to flood, drought, earthquake, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, action or inaction of legislative, judicial, or regulatory agencies, or other proper authority, which may conflict with the terms of this Contract, or failure, threat of failure or sabotage of facilities which have been maintained in accordance with good engineering and operating practices in California.

2.44 Winter Period: Defined in Edison's Tariff Schedule No. TOU-8 as now in effect or as may hereafter be authorized by the Commission.

3. TERM

This Contract shall be effective upon execution by the Parties and shall remain effective until either Party gives 90 days prior written notice of termination to the other Party, except that such notice of termination shall not be effective to terminate this Contract prior to expiration of the Contract Term specified in Section 1.8.

3.1 The First Period of the Contract Term shall commence upon date of Firm Operation but not later than five years from the date of execution of this Contract.

- a. If the Contract Term specified in Section 1.8 is 15 years, the First Period of the Contract Term shall be for five years.
- b. If the Contract Term specified in Section 1.8 is 20, 25, or 30 years, the First Period of the Contract Term shall be for 10 years.

3.2 The Second Period of the Contract Term shall commence upon expiration of the First Period and shall continue for the remainder of the Contract Term.

11

4. GENERATING FACILITY

4.1 Ownership

The Generating Facility shall be owned by Seller.

4.2 Design

4.2.1 Seller, at no cost to Edison, shall:

- a. Design the Generating Facility.
- b. Acquire all permits and other approvals necessary for the construction, operation, and maintenance of the Generating Facility.
- c. Complete all environmental impact studies necessary for the construction, operation, and maintenance of the Generating Facility.
- d. Furnish and install the relays, meters, power circuit breakers, synchronizer, and other control and Protective Apparatus as shall be agreed to by the Parties as being necessary for proper and safe operation of the Project in parallel with Edison's electric system.

4.2.2 Edison shall have the right to:

- a. Review the design of the Generating Facility's electrical system and the Seller's Interconnection Facilities. Such review may include, but not be limited to, the Generator, governor, excitation system, synchronizing equipment, protective relays, and neutral grounding.

The Seller shall be notified in writing of the outcome of the Edison review within 30 days of the receipt of all specifications for both the Generating Facility and the Interconnection Facilities. Any flaws perceived by Edison in the design shall be described in Edison's written notice.

- b. Request modifications to the design of the Generating Facility's electrical system and the Interconnection Facilities. Such modifications shall be required if necessary to maintain Edison

12

Electric System Integrity when in parallel with the Edison electric system.

4.2.3 If Seller's Generating Facility includes an induction-type generator(s), Seller shall provide individual power factor correction capacitors for each such generator. Such capacitors shall be switched on and off simultaneously with each of the associated induction-type generator(s) of the Generating Facility. The KVAR rating of such capacitors shall be the highest standard value which will not exceed such generators no-load KVAR requirement. Seller shall not install power factor correction in excess of that required by this Section unless agreed to in writing by the Parties.

4.3 Construction

Edison shall have the right to review, consult with, and make recommendations regarding Seller's construction schedule and to monitor the construction and start-up of the Project. Seller shall notify Edison, at least one year prior to Firm Operation, of changes in Seller's Construction Schedule which may affect the date of Firm Operation.

4.4 Operation

4.4.1 The Generating Facility and Seller's Protective Apparatus shall be operated and maintained in accordance with applicable California utility industry standards and good engineering practices with respect to synchronizing, voltage and reactive power control. Edison shall have the right to monitor operation of the Project and may require changes in Seller's method of operation if such changes are necessary, in Edison's sole judgment, to maintain Edison Electric System Integrity.

4.4.2 Seller shall notify in writing Edison's Operating Representative at least 14 days prior to:

- a. the initial testing of Seller's Protective Apparatus; and
- b. the initial parallel operation of Seller's Generators with Edison's electrical system.

Edison shall have the right to have a representative present at each event.

4.4.3 Edison shall have the right to require Seller to disconnect the Generator from the Edison electric system or to reduce the electrical output from the Generator into the Edison electric system, whenever Edison determines, in its sole judgment, that such a disconnection is necessary to facilitate maintenance of Edison's facilities, or to maintain Edison Electric System Integrity. If Edison requires Seller to disconnect the

13

Generator from the Edison electric system pursuant to this Section 4.4.3, Seller shall have the right to continue to serve its total electrical requirements provided Seller has elected Operating Option III. Each Party shall endeavor to correct, within a reasonable period, the condition on its system which necessitates the disconnection or the reduction of electrical output. The duration of the disconnection or the reduction in electrical output shall be limited to the period of time such a condition exists.

4.4.4 The Generating Facility shall be operated with all of Seller's Protective Apparatus in service whenever the Generator is connected to or is operated in parallel with the Edison electric system. Any deviation for brief periods of emergency or maintenance shall only be by agreement of the Parties.

4.4.5 Each Party shall keep the other Party's Operating Representative informed as to the operating schedule of their respective facilities affecting each other's operation hereunder, including any reduction in Contract Capacity availability. In addition, Seller shall provide Edison with reasonable advance notice regarding its scheduled outages including any reduction in Contract Capacity availability. Reasonable advance notice is as follows:

SCHEDULED OUTAGE EXPECTED DURATION -----	ADVICE NOTICE TO EDISON -----
Less than one day	24 Hours
One day or more (except major overhauls)	1 Week
Major overhaul	6 Months

4.4.6 Notification by each Party's Operating Representative of outage date and duration should be directed to the other Party's Operating Representative by telephone.

4.4.7 Seller shall not schedule major overhauls during Peak Months.

4.4.8 Seller shall maintain in operating log at Seller's Facility with records of: real and reactive power production; changes in operating status, outages, Protective Apparatus operations; and any unusual conditions found during inspections. Changes in setting shall also be logged for Generators which are "block-loaded" to a specific kW capacity. In addition, Seller shall maintain records applicable to the Generating Facility, including the electrical characteristics of the Generator and settings or adjustments of the Generator control equipment and protective devices. Information maintained pursuant to this Section 4.4.8 shall be provided to Edison, within 30 days of Edison's request.

14

4.4.9 If, at any time, Edison doubts the integrity of any of

Seller's Protective Apparatus and believes that such loss of integrity would impair the Edison Electric System Integrity, Seller shall demonstrate, to Edison's satisfaction, the correct calibration and operation of the equipment in question.

4.4.10 Seller shall test all protective devices specified in Section 4.2 with qualified Edison personnel present at intervals not to exceed four years.

4.4.11 Seller shall, to the extent possible, provide reactive power for its own requirements, and where applicable, the reactive power losses of interfacing transformers. Seller shall not deliver excess reactive power to Edison unless otherwise agreed upon between the Parties.

4.4.12 Seller warrants that the Generating Facility meets the requirements of a Qualifying Facility as of the effective date of this Contract and continuing through the Contract Term.

4.4.13 The Seller warrants that the Generating Facility shall at all times conform to all applicable laws and regulations. Seller shall obtain and maintain any governmental authorizations and permits for the continued operation of the Generating Facility. If at any time Seller does not hold such authorizations and permits, Seller agrees to reimburse Edison for any loss which Edison incurs as a result of the Seller's failure to maintain governmental authorization and permits.

4.4.14 At Edison's request, Seller shall make all reasonable effort to deliver power at an average rate of delivery at least equal to the Contract Capacity during periods of Emergency. In the event that the Seller has previously scheduled an outage coincident with an Emergency, Seller shall make all reasonable efforts to reschedule the outage. The notification periods listed in Section 4.4.5 shall be waived by Edison if Seller reschedules the outage.

4.4.15 Seller shall demonstrate the ability to provide Edison the specified Contract Capacity within 30 days of the date of Firm Operation. Thereafter, at least once per year at Edison's request, Seller shall demonstrate the ability to provide Contract Capacity for a reasonable period of time as required by Edison. Seller's demonstration of Contract Capacity shall be at Seller's expense and conducted at a time and pursuant to procedures mutually agreed upon by the Parties. If Seller fails to demonstrate the ability to provide the Contract Capacity, the Contract Capacity shall be reduced by agreement of the Parties pursuant to Section 9.1.2.5.

15

4.5 Maintenance

4.5.1 Seller shall maintain the Generating Facility in accordance with applicable California utility industry standards and good engineering and operating practices. Edison shall have the right to monitor such maintenance of the Generating Facility. Seller shall maintain and deliver a maintenance record of the Generating Facility to Edison's Operating Representatives upon request.

4.5.2 Seller shall make a reasonable effort to schedule routine maintenance during Off-Peak Months. Outages for scheduled maintenance shall not exceed a total of 30 peak hours for the Peak Months.

4.5.3 The allowance for scheduled maintenance is as follows:

- a. Outage periods for scheduled maintenance shall not exceed 840 hours (35 days) in any 12-month period. This allowance may be used in increments of an hour or longer on a consecutive or nonconsecutive basis.
- b. Seller may accumulate unused maintenance hours on a

year-to-year basis up to a maximum of 1,080 hours (45 days). This accrued time must be used consecutively and only for major overhauls.

4.6. Any review by Edison of the design, construction, operation, or maintenance of the Project is solely for the information of Edison. By making such review, Edison makes no representation as to the economic and technical feasibility, operational capability, or reliability of the Project. Seller shall in no way represent to any third party that any such review by Edison of the Project, including, but not limited to, any review of the design, construction, operation, or maintenance of the Project by Edison, is a representation by Edison as to the economic and technical feasibility, operational capability, or reliability of said facilities. Seller is solely responsible for economic and technical feasibility, operational capability, and reliability thereof.

5. OPERATING OPTIONS

5.1 Seller shall elect in Section 1.9 to Operate its Generating Facility in parallel with Edison's electric system pursuant to one of the following options:

- a. Operating Option I: Seller dedicates the entire Generator output to Edison with no electrical service required from Edison.
- b. Operating Option II: Seller dedicates the entire Generator output to Edison with electrical service required from Edison.
- c. Operating Option III: Seller dedicates to Edison only that portion of the Generator output in excess of Seller's electrical service requirements. As much as practicable, Seller intends to serve its electrical requirements from the Generator output and will require electrical standby from Edison as designated in Section 1.9.

16

5.2 After expiration of the First Period of the Contract Term, Seller may change the Operating Option, but not more than once per year upon at least 90 days prior written notice to Edison. A reduction in Contract Capacity as a result of a change in operating options shall be subject to Section 9.1.2.5. Edison shall not be required to remove or reserve capacity of Interconnection Facilities made idle by a change in operating options. Edison may dedicate any such idle Interconnection Facilities at any time to serve other customers or to interconnect with other electric power sources. Edison shall process requests for changes of operating option in the chronological order received.

5.2.1 When the Seller wishes to reserve Interconnection Facilities paid for by the Seller but idled by a change in operation option, Edison shall impose a special facilities charge related to the operation and maintenance of the Interconnection Facility. When the Seller no longer needs said facilities for which it has paid, the Seller shall receive credit for the net salvage value of the Interconnection Facilities dedicated to Edison's use. If Edison is able to make use of these facilities to serve other customers, the Seller shall receive the fair market value of the facilities determined as of the date the Seller either decides no longer to use said facilities or fails to pay the required maintenance fee.

6. INTERCONNECTION FACILITIES

6.1 The Parties shall execute an Interconnection Facilities Agreement selected by Seller in Section 1.10, covering the design, installation, operation

and maintenance of the Interconnection Facilities required in Edison's sole judgment, to permit an electrical interface between the Parties pursuant to Edison's Tariff Rule No. 21.

6.2 The cost for the Interconnection Facilities set forth in the appendices specified in Section 1.10, are estimates only for Seller's information and will be adjusted to reflect recorded costs after installation is complete; except that, upon Seller's written request to Edison, Edison shall provide a binding estimate which shall be the basis for the Interconnection Facilities cost in the Interconnection Facilities Agreement executed by the Parties.

17

6.3 The nature of the Interconnection Facilities and the Point of Interconnection shall be set forth either by equipment lists or appropriate one-line diagrams and shall be attached to the appropriate appendix specified in Section 1.10.

6.4 The design, installation, operation, maintenance, and modifications of the Interconnection Facilities shall be a Sellers expense.

6.5 Seller shall not commence parallel operation of the Generating Facility until written approval for operation of the Interconnection Facilities has been received from Edison. The Seller shall notify Edison at least forty-five days prior to the initial energizing of the Point of Interconnection. Edison shall have the right to inspect the Interconnection Facilities within thirty days of receipt of such notice. If the facilities do not pass Edison's inspection, Edison shall provide in writing the reasons for this failure within five days of the inspection.

6.6 Seller, at no cost to Edison, shall acquire all permits and approvals and complete all environmental impact studies necessary for the design, installation, operation, and maintenance of the Interconnection Facilities.

7. ELECTRIC LINES AND ASSOCIATED EASEMENTS

7.1 Edison shall, as it deems necessary or desirable, build electric lines, facilities and other equipment, both overhead and underground, on and off Seller's Facility, for the purpose of effecting the agreements contained in this Contract. The physical location of such electric lines, facilities and other equipment on Seller's Facility shall be determined by agreement of the Parties.

7.2 Seller shall reimburse Edison for the cost of acquiring property rights off Sellers's Facility required by Edison to meet its obligations under this Contract.

7.3 Seller shall grant to Edison, without cost to Edison, and by an instrument of conveyance, acceptable to Edison, rights of way, easements and other property interests necessary to construct, reconstruct, use, maintain, alter, add to, enlarge, repair, replace, inspect and remove, at any time, the electric lines, facilities or other equipment, both overhead and underground, which are required by Edison to effect the agreements contained in the Contract. Seller shall also provide the rights of ingress and egress at all reasonable times necessary for Edison to perform the activities contemplated in the Contract.

7.4 The electric lines, facilities, or other equipment referred to in this Section 7 installed by Edison on or off Seller's Facility shall be and remain the property of Edison.

18

7.5 Edison shall have no obligation to Seller for any delay or cancellation due to inability to acquire a satisfactory right of way, easements, or other property interests.

8. METERING

8.1 All meters and equipment used for the measurement of electric power for determining Edison's payments to Seller pursuant to this Contract shall be provided, owned, and maintained by Edison at Seller's expense in accordance with Edison's Tariff Rule No. 21.

8.2 All meters and equipment used for billing Seller for electric service provided to Seller by Edison under Operating Options II or III shall be provided, owned, and maintained by Edison at Edison's expense in accordance with Edison's Tariff Rule No. 16.

8.3 The meters and equipment used for measuring the Energy sold to Edison shall be located on the side of the Interconnection Facilities as specified by Seller in Section 1.13. If the metering equipment is located on Seller's side of the Interconnection Facilities, then a loss compensation factor agreed upon by the Parties shall be applied. At the written request of the Seller, and at Seller's sole expense, Edison shall measure actual transformer losses. If the actual measured value differs from the agreed-upon loss compensation factor, the actual value shall be applied prospectively. If the meters are placed on Edison's side of the Interconnection Facilities, service shall be provided at the available transformer high-side voltage.

8.4 For purposes of monitoring the Generator operation and the determination of standby charges, Edison shall have the right to require, at Seller's expense, the installation of generation metering. Edison may also require the installation of telemetering equipment at Seller's expense for Generating Facilities equal to or greater than 10 MW. Edison may require the installation of telemetering equipment at Edison's expense for Generating Facilities less than 10 MW.

8.5 Edison's meters shall be sealed and the seals shall be broken only when the meters are to be inspected, tested, or adjusted by Edison. Seller shall be given reasonable notice of testing and have the right to have its Operating Representative present on such occasions.

8.6 Edison's meters installed pursuant to this Contract shall be tested by Edison, at Edison's expense, at least once each year and at any reasonable time upon request by either Party, at the requesting Party's expense. If Seller makes such request, Seller shall reimburse said expense to Edison within thirty days after presentation of a bill therefor.

8.7 Metering equipment found to be inaccurate shall be repaired, adjusted, or replaced by Edison such that the metering accuracy of said equipment shall be within two

19

percent. If metering equipment inaccuracy exceeds two percent, the correct amount of Energy and Contract Capacity delivered during the period of said inaccuracy shall be estimated by Edison and agreed upon by the Parties.

9. POWER PURCHASE PROVISIONS

Prior to the date of Firm Operation, Seller shall be paid for Energy only pursuant to Edison's published avoided cost of energy based on Edison's full avoided operating cost as periodically updated and accepted by the Commission. If at any time Energy can be delivered to Edison and Seller is

contesting the claimed jurisdiction of any entity which has not issued a license or other approval for the Project, Seller, in its sole discretion and risk, may deliver Energy to Edison and for any Energy purchased by Edison, Seller shall receive payment from Edison for (i) Energy pursuant to this Section, and (ii) as-available capacity based on a capacity price from the Standard Offer No. 1 Capacity Payment Schedule as approved by the Commission. Unless and until all required license; and approvals have been obtained, Seller may discontinue deliveries at any time.

9.1 Capacity Payments

Seller shall sell to Edison and Edison shall purchase from Seller capacity pursuant to the Capacity Payment Option selected by Seller in Section 1.11. The Capacity Payment Schedules will be based on Edison's full avoided operating costs as approved by the Commission through the life of this Contract. Data used to derive Edison's full avoided costs will be made available to the Seller, to the extent specified by Seller upon request.

9.1.1 Capacity Payment Option A -- As Available Capacity.

If Seller selects Capacity Payment Option A, Seller shall be paid a monthly, capacity payment calculated pursuant to the following formula:

$$\text{MONTHLY CAPACITY PAYMENT} = (A \times D) + (B \times D) / (C \times D)$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

*C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The appropriate time differentiated capacity price from either the Standard Offer No. 1 Capacity Payment Schedule or

20

Forecast of Annual As-Available Capacity Payment Schedule as specified by Seller in Section 1.11.

9.1.1.1 If Seller specifies the Standard Offer No. 1 Capacity Payment Schedule in Section 1.11, then the formula set forth in Section 9.1.1 shall be computed with D equal to the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the Contract Term.

9.1.1.2 If Seller specifies the Forecast of Annual As-Available Capacity Payment Schedule in Section 1.11, the formula set forth in Section 9.1.1 shall be computed as follows:

- a. During the First Period of the Contract Term, D shall equal the appropriate time differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule.
- b. During the Second Period of the Contract Term, the formula shall be computed with D equal to the appropriate time differentiated capacity price from Standard Offer No. 1 Capacity Payment Schedule, but not less than the greater of (i) the appropriate time

differentiated capacity price from the Forecast of Annual As-Available Capacity Payment Schedule for the last year of the First Period, or (ii) the appropriate time differentiated capacity price from the Standard Offer No. 1 Capacity Payment Schedule for the first year of the Second Period.

9.1.2 Capacity Payment Option B - Firm Capacity Purchase

If Seller selects Capacity Payment Option B, Seller shall provide to Edison for the Contract Term the Contract Capacity specified in Section 1.5, or as adjusted pursuant to Section 9.1.2.6, and Seller shall be paid as follows:

9.1.2.1 If Seller meets the performance requirements set forth in Section 9.1.2.2, Seller shall be paid a Monthly Capacity Payment, beginning from the date of Firm Operation equal to the sum of the on-peak, mid-peak, and off-peak Capacity Period Payments. Each capacity period payment is calculated pursuant to the following formula:

$$\text{MONTHLY CAPACITY PAYMENT} = A \times B \times C \times D$$

Where A = Contract Capacity Price specified in Section 1.11 based on the Standard Offer No. 2 Capacity Payment Schedule as approved

21

by the Commission and in effect on the date of the execution of this Contract.

B = Conversion factors to convert annual capacity prices to monthly payments by time of delivery as specified in Standard Offer No. 2 Capacity Payment Schedule and subject to periodic modifications as approved by the Commission.

C = Contract Capacity specified in Section 1.5.

D = Period Performance Factor, not to exceed 1.0, calculated as follows:

$$\frac{\text{Period kWh purchased by Edison limited by the level of Contract Capacity}}{0.8 \times \text{Contract Capacity} \times (\text{Period Hours minus Maintenance Hours Allowed in Section 4.5.})}$$

9.1.2.2 Performance Requirements

To receive the Monthly Capacity Payment in Section 9.1.2.1, Seller shall provide the Contract Capacity in each Peak Month for all on-peak hours as such peak hours are defined in Edison's Tariff Schedule No. TOU-8 on file with the Commission, except that Seller is entitled to a 20% allowance for Forced Outages for each Peak Month. Seller shall not be subject to such performance requirements for the remaining hours of the year.

- a. If Seller fails to meet the requirements specified in Section 9.1.2.2, Seller, in Edison's sole discretion, may be placed on probation for a period not to exceed 13 months. If Seller fails to meet the requirements specified in Section 9.1.2.2 during the probationary period, Edison may derate the Contract Capacity to the greater of the capacity actually delivered during the probationary period, or the capacity at which Seller can reasonably meet such requirements. A reduction in

Contract Capacity as a result of this Section 9.1.2.2 shall be subject to Section 9.1.2.5.

- b. If Seller fails to meet the requirements set forth in Section 9.1.2.2 due to a Forced Outage on the Edison system or a request to reduce or curtail delivery under Section 9.4. Edison shall continue Monthly Capacity Payments pursuant to Capacity Payment Option B. The Contract Capacity curtailed shall be

22

treated the same as scheduled maintenance outages in the calculation of the Monthly Capacity Payment.

9.1.2.3 If Seller is unable to provide Contract Capacity due to Uncontrollable Forces, Edison shall continue Monthly Capacity Payments for 90 days from the occurrence of the Uncontrollable Force. Monthly Capacity Payments payable during a period of interruption or reduction by reason of an Uncontrollable Force shall be treated the same as scheduled maintenance outages.

9.1.2.4 Capacity Bonus Payment For Capacity Payment Option B, Seller may receive a Capacity Bonus Payment as follows:

- a. Bonus During Peak Months -- For a Peak Month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 9.1.2.2 have been met, and (ii) the on-peak capacity factor exceeds 85%.
- b. Bonus During Non-Peak Months -- For a non-peak month, Seller shall receive a Capacity Bonus Payment if (i) the requirements set forth in Section 9.1.2.2 have been met, (ii) the on-peak capacity factor for each Peak Month during the year was at least 85%, and (iii) the on-peak capacity factor for the non-peak month exceeds 85%.
- c. For any eligible month, the Capacity Bonus Payment shall be calculated as follows:

CAPACITY BONUS PAYMENT = A x B x C x D

Where A = (1.2 On-Peak Capacity Factor) - 1.02

Where the On-Peak Capacity Factor, not to exceed 1.0, is calculated as follows:

Period kWh purchased by Edison limited by the level of Contract Capacity

(Contract Capacity) x (Period Hours minus Maintenance Hours Allowed in Section 4.5)

B = Contract Capacity Price specified in Section 1.11 for Capacity Payment Option B

C = 1/12

23

D = Contract Capacity specified in Section 1.5

- d. When Seller is entitled to receive a Capacity Bonus Payment, the Monthly Capacity Payment shall be the sum

of the Monthly Capacity Payment pursuant to Section 9.1.2.1 and the Monthly Capacity Bonus Payment pursuant to this Section.

- e. For Capacity Payment Option B, Seller shall be paid for capacity in excess of Contract Capacity based on the as-available capacity price in Standard Offer No. 1 Capacity Payment Schedule, as updated and approved by the Commission. Seller shall not receive any as-available capacity payment in excess of Contract Capacity if Sellers Generating Facility is a small hydro project.

9.1.2.5 Capacity Reduction

- a. Seller may reduce the Contract Capacity specified in Section 1.5, provided that Seller gives Edison prior written notice for a period determined by the amount of Contract Capacity reduced as follows:

Amount of Contract Capacity Reduced -----	Length of Notice Required -----
25,000 kW or under	12 months
25,001 - 50,000 kW	36 months
50,001 - 100,000 kW	48 months
over 100,000 kW	60 months

- b. Subject to Section 10.4, Seller shall refund to Edison with interest at the current published Federal Reserve Board three months prime commercial paper rate an amount equal to the difference between (i) the accumulated Monthly Capacity Payments paid by Edison pursuant to Capacity Payment Option B up to the time the reduction notice is received by Edison, and (ii) the total capacity payments which Edison would have paid if based on the Adjusted Capacity Price.

24

- c. From the date the reduction notice is received to the date of actual capacity reduction, Edison shall make capacity payments based on the Adjusted Capacity Price for the amount of Contract Capacity being reduced.
- d. Seller may reduce Contract Capacity without the notice prescribed in Section 9.1.2.5(a), provided that Seller shall refund to Edison the amount specified in Section 9.1.2.5(b) and an amount equal to: (i) the amount of Contract Capacity being reduced, times (ii) the difference between the Current Capacity Price and the Contract Capacity Price, times (iii) the number of years and fractions thereof (not less than one year) by which the Seller has been deficient in giving prescribed notice. If the Current Capacity Price is less than the Contract Capacity Price, only payment under Section 9.1.2.5(b) shall be due to Edison.

9.1.2. Adjustment to Contract Capacity. The Parties may agree in writing at any time to adjust the Contract Capacity. Seller may reduce the Contract Capacity pursuant to Section 9.1.2.5. Seller may increase the Contract Capacity with Edison's approval and thereafter receive payment for the increased capacity in accordance with the Contract Capacity Price for the Capacity Payment Option selected by Seller for the remaining Contract Term.

9.2 Energy Payments - First Period

During the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for the Energy delivered by the Seller to Edison at the Point of Interconnection pursuant to the Energy Payment Option selected by Seller in Section 1.12, as follows. (Data used to derive Edison's Energy payments for the First Period will be made available to the Seller, to the extent specified by Seller, upon request.)

9.2.1 Energy Payment Option 1 -- Forecast of Annual Marginal Cost of Energy. If Seller selects Energy Payment Option 1, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison during each month in the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

25

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time differentiated energy price from the Forecast of Annual Marginal Cost of Energy, multiplied by the decimal equivalent of the percentage of the forecast specified in Section 1.12, and (ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.12.

9.2.2 Energy Payment Option 2 -- Levelized Forecast of Marginal Cost of Energy. If Seller selects Energy Payment Option 2, then during the First Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison each month during the First Period of the Contract Term pursuant to the following formula:

$$\text{MONTHLY ENERGY PAYMENT} = (A \times D) + (B \times D) + (C \times D)$$

Where A = kWh purchased by Edison during on-peak periods defined in Edison's Tariff Schedule No. TOU-8.

B = kWh purchased by Edison during mid-peak periods defined in Edison's Tariff Schedule No. TOU-8.

C = kWh purchased by Edison during off-peak periods defined in Edison's Tariff Schedule No. TOU-8.

D = The sum of:

(i) the appropriate time differentiated energy price from the Levelized Forecast of Marginal Cost of Energy, for the First Period of the Contract Term multiplied by the decimal

26

equivalent of the percentage of the forecast levelized specified in Section 1.12, and

(ii) the appropriate time differentiated energy price from Edison's published avoided cost of energy multiplied by the decimal equivalent of the percentage of the published energy price specified in Section 1.12.

9.2.2.1 Performance Requirement for Energy Payment Option 2

During the First Period when the annual forecast referred to in Section 9.2.1 is greater than the levelized forecast referred to in Section 9.2.2, Seller shall deliver to Edison at least 70 percent of the average annual kWh delivered to Edison during those previous periods when the levelized forecast referred to in Section 9.2.2 is greater than the annual forecast referred to in Section 9.2.1 as resource conditions permit for solar, wind, and hydro Generating Facilities and excluding uncontrollable forces. If Seller does not meet the performance requirements of this Section 9.2.2.1, Seller shall be subject to Section 9.5.

9.3 Energy Payments - Second Period

During the Second Period of the Contract Term, Seller shall be paid a Monthly Energy Payment for Energy delivered by Seller and purchased by Edison at a rate equal to 100% of Edison's published avoided cost of energy based on Edison's full avoided operating cost as updated periodically and accepted by the Commission, pursuant to the following formula:

MONTHLY ENERGY PAYMENT = kWh purchased by Edison for each on-peak, mid-peak, and off-peak time period defined in Edison's Tariff Schedule No. TOU-8
x Edison's published avoided cost of energy by time of delivery for each time period.

Data used to derive Edison's full avoided costs will be made available to the Seller, to the extent specified by Seller, upon request.

9.4 Edison shall not be obligated to accept or pay for Energy, and may request Seller whose Generating Facility is one (1) MW or greater to discontinue or reduce delivery of Energy, for not more than 300 hours annually during off-peak hours when (i) purchases would result in costs greater than those which Edison would incur if it did not purchase Energy from Seller but instead utilized an equivalent amount of Energy generated from another Edison source, or (ii) the Edison Electric System demand would require that Edison hydro-energy be spilled to reduce generation.

27

9.5 Energy Payment Refund

If Seller elects Energy Payment option 2, Seller shall be subject to the following:

9.5.1 If Seller fails to perform the Contract obligations for any reason during the First Period of the Contract Term, or fails to meet the performance requirements set forth in Section 9.2.2.1, and at the time of such

failure to perform, the net present value of the cumulative Energy payments received by Seller pursuant to Energy Payment Option 2 exceeds the net present value of what Seller would have been paid pursuant to Energy Payment Option 1, Seller shall make an energy payment refund equal to the difference in such net present values in the year in which the refund is due. The present value calculation shall be based upon the rate of Edison's incremental cost of capital specified in Section 1.12.

9.5.2 Not less than 90 days prior to the date Energy is first delivered to the Point of Interconnection, Seller shall provide and maintain a performance bond, surety bond, performance insurance, corporate guarantee, or bank letter of credit, satisfactory to Edison, which shall insure payment to Edison of the Energy Payment Refund at any time during the First Period. Edison may, in its sole discretion accept another form of security except that in such instance a 1-1/2 percent reduction shall then apply to the levelized forecast referred to in Section 9.2.2 in computing payments for Energy. Edison shall be provided with certificates evidencing Seller's compliance with the security requirements in this Section which shall also include the requirement that Edison be given 90 days prior written notice of the expiration of such security.

9.5.3 If Seller fails to provide replacement security not less than 60 days prior to the date of expiration of existing security, the Energy Payment Refund provided in Section 9.5 shall be payable forthwith. Thereafter, payments for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 9.2.1.

9.5.4 If Edison at any time determines the security to be otherwise inadequate, and so notifies Seller, payments thereafter for Energy shall be 100 percent of the Monthly Energy Payment provided in Section 9.2.1. If within 30 days of the date Edison gives notice of such inadequacies, Seller satisfies Edison's security requirements, Energy Payment Option 2 shall be reinstated. If Seller fails to satisfy Edison's security requirements within the 30-day period, the Energy Payment Refund provided in Section 9.5 shall be payable forthwith.

10. PAYMENT AND BILLING PROVISIONS

10.1 For Energy and capacity purchased by Edison:

28

10.1.1 Edison shall mail to Seller not later than thirty days after the end of each monthly billing period (1) a statement showing the Energy and Contract Capacity delivered to Edison during the on-peak, mid-peak, and off-peak periods, as those periods are specified in Edison's Tariff Schedule No. TOU-8 for that monthly billing period, (2) Edison's computation of the amount due Seller, and (3) Edison's check in payment of said amount.

10.1.2 If the monthly payment period involves portions of two different published Energy payment schedule periods, the monthly Energy payment shall be prorated on the basis of the percentage of days at each price.

10.1.3 If the payment period is less than 27 days or greater than 33 days, the capacity payment shall be prorated on the basis of the average days per month per year.

10.1.4 If within thirty days of receipt of the statement Seller does not make a report in writing to Edison of an error, Seller shall be deemed to have waived any error in Edison's statement, computation, and payment, and they shall be considered correct and complete.

10.2 For electric service provided by Edison:

10.2.1 Under Operating Option III pursuant to Section 5.1,

standby electric service shall be provided under terms and conditions of Edison's tariff schedule indicated below as now in effect or as may hereafter be authorized by the Commission to be revised. The applicable tariff schedules are:

STANDBY TARIFF	ELECTRIC SERVICE TARIFF
-----	-----
SCHEDULE NO.	

SCG-1	TOU-8 or GS-2
SCG-2	TOU-8
SCG-3	TOU-8

10.2.1.1 (Applicable to SCG-1 only) The Standby Demand for calculation of the standby charge in SCG-1 is specified in Section 1.9. Edison reserves the right to adjust the Standby Demand based on recorded demand during periods standby power is required.

10.2.1.2 (Applicable to SCG-1 only) The capacity rating for determination of standby waiver qualifications shall be Contract Capacity plus the maximum electric load served by the Generating Facility during the on-peak time period recorded during the preceding 12-month time period.

29

10.2.1.3 A minimum monthly charge may be established for standby electric service as provided in the tariff schedule elected in section 1.9. Said minimum monthly charge shall be specified in Section 1.9.

10.2.2 Under Operating Options II and III pursuant to Section 5.1, electric service shall be provided under terms, conditions, and rates of Edison's tariff schedule indicated below as now in effect or as may hereafter be authorized by the Commission to be revised. The applicable tariff schedule is:

TOU-8, or
GS-2

The contract demand for calculation of the minimum demand charge in the applicable tariff schedules is specified in Section 1.9.

10.2.3 Edison shall commence billing Seller for electric service rendered pursuant to the applicable tariff schedule on the date that the Point of Interconnection is energized.

10.3 Monthly charges associated with Interconnection Facilities shall be billed pursuant to the Interconnection Facilities Agreement contained in the Appendix specified in Section 1.10.

10.4 Payments due to Contract Capacity Reduction

10.4.1 The Parties agree that the refund and payments provided in Section 9.1.2.5 represent a fair compensation for the reasonable losses that would result from such reduction of Contract Capacity.

10.4.2 In the event of a reduction in Contract Capacity, the quantity, in kW, by which the Contract Capacity is reduced shall be used to calculate the refunds and payments due Edison in accordance with Section 9.1.2.5, as applicable.

10.4.3 Edison shall provide invoices to Seller for all refunds and payments due Edison under this section which shall be due within 60 days.

10.4.4 If Seller does not make payments as required in Section 10.4.3, Edison shall have the right to offset any amounts due it against any present or future payments due Seller and may pursue any other remedies available to Edison as a result of Seller's failure to perform.

10.5 Energy Payment Refund

30

Energy Payment Refund is immediately due and payable upon Seller's failure to perform the contract obligations as specified in Section 9.5.

11. TAXES

11.1 Seller shall pay ad valorem taxes and other taxes properly attributable to the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.

11.2 Seller shall pay ad valorem taxes and other taxes properly attributed to land, land rights, or interest in land for the Project. If such taxes are assessed or levied against Edison, Seller shall pay Edison for such assessment or levy.

11.3 If the Interconnection Facilities are owned by Edison, Edison shall pay ad valorem taxes and other taxes properly attributed to said facilities. If such taxes are assessed or levied against Seller, Edison shall pay Seller for such assessment or levy.

11.4 Seller or Edison shall provide information concerning the Project to any requesting taxing authority.

12. TERMINATION

This Contract shall terminate if Firm Operation does not occur within 5 years of the date of Contract execution.

13. LIABILITY

13.1 Each Party (First Party) releases the other Party (Second Party), its directors, officers, employees and agents from any loss, damage, claim, cost, charge, or expense of any kind or nature (including any direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorneys' fees and other costs of litigation incurred by the First Party in connection with damage to property of the First Party caused by or arising out of the Second Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of Second Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to Second Party.

13.2 Each Party shall indemnify and hold harmless the other Party, its directors, officers, and employees or agents from and against any loss, damage, claim, cost, charge, (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense), including attorneys' fees and other costs of litigation, incurred by the other Party in connection with the injury to or death of any person or damage to property of a third party

31

arising out of the indemnifying Party's construction, engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use, or ownership of its facilities, to the extent that such loss, damage, claim, cost, charge, or expense is caused by the negligence of the indemnifying Party, its directors, officers, employees, agents, or any person or entity whose negligence would be imputed to the indemnifying Party; provided, however, that each Party shall be solely responsible for and shall bear all cost of claims brought by its contractors or its own employees and shall indemnify and hold harmless the other Party for any such costs including costs arising out of any workers compensation law. Seller releases and shall defend and indemnify Edison from any claim, cost, loss, damage, or liability arising from any contrary representation concerning the effect of Edison's review of the design, construction, operation, or maintenance of the Project.

13.3 The provisions of this Section 13 shall not be construed so as to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.

13.4 Neither Party shall be indemnified under this Section 13 for its liability or loss resulting from its sole negligence or willful misconduct.

14. INSURANCE

14.1 Until Contract is terminated, Seller shall obtain and maintain in force as hereinafter provided comprehensive general liability insurance, including contractual liability coverage, with a combined single limit of (i) not less than \$1,000,000 each occurrence for Generating Facilities 100 kW or greater; (ii) not less than \$500,000 for each occurrence for Generating Facilities between 20 kW and 100 kW; and (iii) not less than \$100,000 for each occurrence for Generating Facilities less than 20 kW. The insurance carrier or carriers and form of policy shall be subject to review and approval by Edison.

14.2 Prior to the date Sellers Generating Facility is first operated in parallel with Edison's electric system, Seller shall (i), furnish certificate of insurance to Edison, which certificate shall provide that such insurance shall not be terminated nor expire except on thirty days prior written notice to Edison, (ii) maintain such insurance in effect for so long as Seller's Generating Facility is operated in parallel with Edison's electric system, and (iii) furnish to Edison an additional insured endorsement with respect to such insurance in substantially the following form:

"In consideration of the premium charged, Southern California Edison Company (Edison) is named as additional insured with respect to all liabilities arising out of Sellers use and ownership of Seller's Generating Facility."

32

"The inclusion of more than one insured under this policy shall not operate to impair the rights of one insured against another insured and the coverages afforded by this policy will apply as though separate policies had been issued to each insured. The inclusion of more than one insured will not, however, operate to increase the limit of the carrier's liability. Edison will not, by reason of its inclusion under this policy, incur liability to the insurance carrier for payment of premium for this policy."

"Any other insurance carried by Edison which may be applicable shall be deemed excess insurance and Seller's insurance primary for all purposes despite any conflicting provisions in Seller's policy to the contrary."

If the requirement of Section 14.2(iii) prevents Seller from obtaining

the insurance required in Section 14.1 then upon written notification by Seller to Edison, Section 14.2(iii) shall be waived.

14.3 The requirements of this Section 14 shall not apply to Seller who is a self-insured governmental agency with established record of self-insurance.

14.4 If Seller fails to comply with the provisions of this Section 14, Seller shall, at its own cost, defend, indemnify, and hold harmless Edison, its directors, officers, employees, agents, assigns, and successors in interest from and against any and all loss, damage, claim, cost, charge, or expense of any kind or nature (including direct, indirect or consequential loss, damage, claim, cost, charge, or expense, including attorneys' fees and other costs of litigation) resulting from the death or injury to any person or damage to any property, including the personnel and property of Edison, to the extent that Edison would have been protected had Seller complied with all of the provisions of this Section 14.

15. UNCONTROLLABLE FORCE

15.1 Neither Party shall be considered to be in default in the performance of any of the agreements contained in this Contract, except for obligations to pay money, when and to the extent failure of performance shall be caused by an Uncontrollable Force.

15.2 If either Party because of an Uncontrollable Force is rendered wholly or partly unable to perform its obligations under this Contract, the Party shall be excused from whatever performance is affected by the Uncontrollable Force to the extent so affected provided that:

33

(1) the nonperforming Party, within two weeks after the occurrence of the Uncontrollable Force, gives the other Party written notice describing the particulars of the occurrence,

(2) the suspension of performance is of no greater scope and of no longer duration than is required by the Uncontrollable Force,

(3) the nonperforming Party uses its best efforts to remedy its inability to perform (this subsection shall not require the settlement of any strike, walkout, lockout or other labor dispute on terms which, in the sole judgment of the Party involved in the dispute, are contrary to its interest. It is understood and agreed that the settlement of strikes, walkouts, lockouts or other labor disputes shall be at the sole discretion of the Party having the difficulty),

(4) when the nonperforming Party is able to resume performance of its obligations under this Contract, that Party shall give the other Party written notice to that effect, and

(5) capacity payments during such periods of Uncontrollable Force, on Seller's part shall be governed by Section 9.1.2.3.

15.3 In the event that either Party's ability to perform cannot be corrected when the Uncontrollable Force is caused by the actions or inactions of legislative, judicial or regulatory agencies or other proper authority, this Contract may be amended to comply with the legal or regulatory change which caused the nonperformance.

If a loss of Qualifying Facility status occurs due to an Uncontrollable Force and Seller fails to make the changes necessary to maintain its Qualifying Facility status, the Seller shall compensate Edison for any economic detriment incurred by Edison as a result of such failure.

16. NONDEDICATION OF FACILITIES

Neither Party, by this Contract, dedicates any part of its facilities involved in this Project to the public or to the service provided under the Contract, and such service shall cease upon termination of the Contract.

17. PRIORITY OF DOCUMENTS

If there is a conflict between this document and any Appendix, the provisions of this document shall govern. Each Party shall notify the other immediately upon the determination of the existence of any such conflict.

34

18. NOTICES AND CORRESPONDENCE

All notices and correspondence pertaining to this Contract shall be in writing and shall be sufficient if delivered in person or sent by certified mail, postage prepaid, return receipt requested, to Seller as specified in Section 1.1, or to Edison as follows:

Southern California Edison Company
Post Office Box 800
Rosemead, California 91770
Attention: Secretary

All notices sent pursuant to this Section 18 shall be effective when received, and each Party shall be entitled to specify as its proper address any other address in the United States upon written notice to the other Party.

19. PREVIOUS COMMUNICATIONS

This Contract contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this contract, and merges and supersedes all prior agreements, commitments, representations, and discussions between the Parties. No Party shall be bound to any other obligations, conditions, or representations with respect to the subject matter of this Contract.

20. NONWAIVER

None of the provisions of the Contract shall be considered waived by either Party except when such waiver is given in writing. The failure of either Edison or Seller to insist on any one or more instances upon strict performance of any of the provisions of the Contract or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue to remain in full force and effect.

21. SUCCESSORS AND ASSIGNS

Neither Party shall voluntarily assign its rights nor delegate its duties under this Contract, or any part of such rights or duties, without the written consent of the other Party, except in connection with the sale or merger of a substantial portion of its properties. Any such assignment or delegation made without such written consent shall be null and void. Consent for assignment shall not be withheld unreasonably. Such assignment shall include, unless otherwise specified therein, all of Seller's rights to any refunds which might become due under this Contract.

22. EFFECT OF SECTION HEADINGS

35

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

23. GOVERNING LAW

This Contract shall be interpreted, governed, and construed under the laws of the State of California if executed and to be performed wholly within the State of California.

24. MULTIPLE ORIGINALS

This Contract is executed in two counterparts, each of which shall be deemed an original.

SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have executed this Contract this 16 of April, 1985.

Exhibit 10.3.17

AMENDMENT NO. 1

TO THE

POWER PURCHASE CONTRACT

BETWEEN

SOUTHERN CALIFORNIA EDISON COMPANY

AND

MAMMOTH PACIFIC

(CASA DIABLO GEOTHERMAL III)

1. PARTIES

The Parties to this Amendment No. 1 to the Power Purchase Contract are Mammoth Pacific, hereinafter referred to as "Mammoth Pacific", and Southern California Edison Company, a California corporation, hereinafter referred to as "Edison", individually "Party", collectively "Parties".

2. RECITALS

2.1 On April 15, 1985, the Parties executed an agreement entitled Power Purchase Contract between Mammoth Pacific and Southern California Edison Company (referred to in this Amendment as the "Original Contract").

2.2 The parties wish to amend the Original Contract to revise the date construction shall commence.

3. AGREEMENT

In consideration of the terms and conditions contained in this Amendment No. 1, the Parties agree as follows:

3.1 Effective Date

This Amendment No. 1 shall become effective when it has been duly executed by the Parties.

3.2 Changes to Contract Provisions

The date Seller shall commence construction of the Generating Facility, as specified on page 1a, Section 1.2.e, in the Original Contract, is hereby amended to be July 1987.

4. OTHER CONTRACT TERMS AND CONDITIONS

Except as expressly amended herein, all terms and conditions of the Original Contract shall remain in force and effect.

2

5. DUPLICATE ORIGINALS

This Amendment No. 1 is executed in two originals. The signatories

hereto represent that they have been appropriately authorized to enter into this Amendment on behalf of the Party for whom they sign. This Amendment is hereby executed as of this 25th day of October, 1985.

Exhibit 10.3.18

AMENDMENT NO. 2
POWER PURCHASE CONTRACT BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY
AND PACIFIC LIGHTING ENERGY SYSTEMS

1. PARTIES:

This Amendment No. 2 to the Power Purchase Contract between Southern California Edison Company and Pacific Lighting Energy Systems ("Contract") for the PLES I project is entered into between Southern California Edison Company ("Edison") and Pacific Lighting Energy Systems, renamed Pacific Energy ("Seller"), individually, "Party," and collectively, "Parties."

2. RECITALS:

This Amendment No. 2 to the Contract is made with reference to the following facts, among others:

2.1 Edison and Santa Fe Geothermal, Inc. ("Santa Fe") executed the Contract on April 16, 1985.

2.2 Santa Fe assigned the Contract to Seller effective April 2,

1986.

2.3 Edison and Seller executed Amendment No. 1 to the Contract on October 27, 1989.

2.4 The Contract was subject to Uncontrollable Force which rendered Pacific Energy unable to perform its obligations under the Contract for a period of five hundred forty-eight (548) days.

2.5 The Parties desire to amend the Contract to change the date of expected Firm Operation set forth at Section 1.7 of the Contract to reflect the effect of the Uncontrollable Force.

3. AGREEMENT:

The Parties agree to amend the Contract as follows:

(A) The Expected Firm Operation date of "February 1987" set forth at Section 1.7 of the Contract is deleted, and replaced with "October 16, 1991."

(B) The First Period of the Contract Term set forth at Section 3.1 of the Contract shall commence upon date of Firm Operation, and the phrase "but not later than five years from the date of execution of this Contract" is deleted.

(C) The text of Section 12 should be deleted, and replaced with: "This Contract shall terminate if Firm Operation does not occur by October 16, 1991."

4. OTHER TERMS AND CONDITIONS:

Except as expressly amended by this Amendment No. 2, the terms and conditions of the Contract shall remain in full force and effect.

5. EFFECTIVE DATE:

This Amendment No. 2 shall become effective when it has been duly executed by the Parties.

2

6. SIGNATURE CLAUSE:

The signatories hereto represent that they have been appropriately authorized to enter into this Amendment No. 2 to the Contract on behalf of the Party for whom they sign. This Amendment No. 2 is hereby executed as of this 20th day of December, 1989.

Exhibit 10.3.19

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

APPENDIX A
INTERCONNECTION FACILITIES AGREEMENT ("AGREEMENT")
SELLER OWNED AND OPERATED FACILITY

- A.1 Seller acknowledges that Seller has read Edison's Tariff Rule No. 21 and the Qualifying Facility Milestone Procedure ("QFMP") and understands Seller's obligations and the consequences to Seller for failure to meet any of the "milestones" in the QFMP which is in effect on the earlier of Seller's (1) payment of the Project Fee or to (2) execution of this Agreement.
- A.2 In the event Seller loses its priority for existing available Edison line capacity, Seller shall, pursuant to Tariff Rule No. 21., be obligated to pay any additional cost for upgrades or additions necessary to accommodate Seller's deliveries. In such event, Edison and Seller shall amend this Agreement to reflect the conditions resulting from the change in priority.
- A.3 Seller shall design, purchase, construct, operate and maintain Seller owned Interconnection Facilities as described on page A-10 herein, at its sole expense. Edison shall have the right to review the design as to the adequacy of the Protective Apparatus provided. Any additions or modifications required by Edison shall be incorporated by Seller.
- A.4 Notwithstanding the provisions of Section 13, Seller, having elected to own, operate, and maintain the Interconnection Facilities, shall accept all liability and release Edison from and indemnify Edison against any liability for faults or damage to Seller's

Interconnection Facilities, the Edison electric system and the public as a result of the operation of Seller's project.

- A.5 Edison shall have the right to observe the construction of the Interconnection Facilities, and inspect said facilities after construction is completed at the Seller's expense.
- A.6 Facilities which are deemed necessary by Edison for the proper and safe operation of the Interconnection Facilities and which Seller desires Edison to own and operate at Seller's expense shall be provided as appendant facilities. Edison shall own, operate and maintain any necessary appendant facilities which may be installed in connection with the Interconnection Facilities at Seller's expense. Edison may, as it deems necessary, modify the aforementioned facilities at Seller's expense.
- A.7 For the appendant facilities, Edison shall install, own, operate, and maintain a portion of the appendant facilities ("Edison Installed Appendant Facilities"), as described on page A-10 herein, and Seller shall, pay to Edison the total estimated cost for these appendant facilities prior to the start of construction of the appendant facilities. In addition, Seller shall install at Seller's expense its portion of the appendant facilities ("Seller Installed Appendant Facilities"), as described on page A-10 herein, in accordance with Rule 21. Within 30 days after installation is complete, Seller shall transfer ownership of the Seller Installed Appendant Facilities to Edison in a manner acceptable to Edison.

A-2

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

- A.8 Maintenance of facilities referred to in Section A.6 shall be paid by Seller pursuant to the attached Application and Contract for

Interconnection Facilities Plus Operation and Maintenance

("Application").
- A.9 To the extent that Edison deems it necessary to effect the arrangements contemplated by this Agreement, Edison may, from time to time, request the Seller to design, install, operate, maintain, modify, replace, repair or remove any or all of the Interconnection Facilities. Such equipment and/or Protective Apparatus shall be treated as Interconnection Facilities and added to the Agreement by amendment pursuant to Section A.6.
- A.10 Edison shall have the right to review any changes in the design of the Interconnection Facilities and recommend modification(s) to the design as it deems necessary for proper and safe operation of the Project when in parallel with the Edison electric system. The Seller shall be notified of the results of such review by Edison, in writing, within 30 days of the receipt of all specifications related to the proposed design changes. Any flaws perceived by Edison in the proposed design changes, shall be described in the written notice.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

APPLICATION AND CONTRACT FOR INTERCONNECTION FACILITIES
PLUS OPERATION AND MAINTENANCE

The undersigned Seller hereby requests the Southern California Edison Company ("Edison") to provide the appendant facilities described on the last page hereof and by this reference herein incorporated, hereinafter called "Interconnection Facilities." Interconnection Facilities as defined and used herein are a group of Added Facilities which have been designated as Interconnection Facilities, to accommodate negotiation and preparation of contracts for parallel generation projects. Interconnection Facilities, as are Added Facilities, shall be provided in accordance with the applicable Tariff Schedules of Edison. Such Interconnection Facilities are to be owned, operated and maintained by Edison.

In consideration of Edison's acceptance of this Application, Seller hereby agrees to the following:

1. Seller shall pay to Edison, prior to the start of construction of the Interconnection Facilities, the total estimated costs for the Interconnection Facilities as determined by Edison and entered on page A-11 hereof. In the event Seller abandons its plans for installation of such Interconnection Facilities, for any reason whatsoever, including failure to obtain any required permits, Seller shall reimburse Edison upon receipt of supporting documentation for any and all expenses incurred by Edison pursuant to this agreement with thirty (30) days after presentation of a bill.

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

2. Edison shall have the right to observe the construction of any Interconnection Facilities constructed by Seller and inspect and test said facilities after construction is completed at the Seller's expense.
3. The parties also understand and agree that due to equipment acquisition lead time and construction time requirements, Edison requires a minimum of six (6) months from the time of authorization to construct the aforementioned Interconnection Facilities and place them in operation. Edison shall have no obligation to Seller with regard to any target date established by Seller which is less than eighteen (18) months from the date this Application is executed. However, Edison shall exercise its best effort to meet Seller's projected operational date.
4. Seller shall pay a monthly charge for the Interconnection Facilities' operation and maintenance in the amount of 0.9% of the added equipment investment as determined by Edison and as entered by Edison on page A-11 hereof. The monthly charge shall be adjusted periodically in accordance with the pro-rata operation and maintenance charges for added facilities pursuant to Rule No. 2. The monthly charge may be based upon estimated costs of the Interconnection Facilities and when the recorded book cost of the Interconnection Facilities has been determined by Edison, the charges shall be adjusted retroactively to the date when service is first rendered by means of such

Interconnection Facilities. Additional charges resulting from such adjustment shall, unless other terms are

A-5

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

mutually agreed upon, be payable within thirty (30) days from the date of presentation of a bill therefor. Any credits resulting from such adjustment will, unless other terms are mutually agreed upon, be refunded upon demand of Seller.

5. Whenever a change is made in the Interconnection Facilities which results in changes in the added equipment investment, the monthly charge will be adjusted on the basis of the revised added equipment investment. The cost of such change shall be payable by Seller within sixty (60) days from the date of presentation of a bill thereof. The description of the Interconnection Facilities will be amended by Edison on page A-10 hereof to reflect any changes in equipment, installation and removal cost, amount of added equipment investment, and monthly charge resulting from any such change in the Interconnection Facilities or adjustment as aforesaid.
6. The monthly charges payable hereunder shall commence upon the date when said Interconnection Facilities are available for use but not before service is first established and rendered through Edison's normal facilities and shall first be payable when Edison shall submit the first energy bill after such date and shall continue until the abandonment of such Interconnection Facilities by Seller, subject to the provisions of Paragraphs 4 and 5 hereof.
7. Seller agrees to utilize said Interconnection Facilities in accordance with good operating practice and to reimburse Edison for damage to said Facilities occasioned or caused by the

A-6

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

Seller or any of his agents, employees or licensees. Failure so to exercise due diligence in the utilization of said Interconnection Facilities will give Edison the right to terminate this Agreement.

8. Edison's performance under this Contract is subject to the availability of materials required to provide the Interconnection Facilities provided for herein and to all applicable Tariff Schedules of Edison.
9. This Application and Contract for Interconnection Facilities supplements the appropriate application and contract(s) for electric service presently in effect between Seller and Edison.
10. This Agreement shall at all times be subject to such changes or modifications by the Public Utilities Commission of the State of California as said Commission may, from time to time, direct in the exercise of its jurisdiction.

EXHIBIT 10.3.20

LONG-TERM POWER PURCHASE CONTRACT

APPENDIX A.3

INTERCONNECTION FACILITIES AGREEMENT

SELLER OWNED AND OPERATED BASIS

BETWEEN

MAMMOTH--PACIFIC (II)

AND

SOUTHERN CALIFORNIA EDISON COMPANY

LONG-TERM POWER PURCHASE CONTRACT

APPENDIX A.3

INTERCONNECTION FACILITIES-- SELLER OWNED AND OPERATED FACILITY

A.3.1 Seller acknowledges that Seller has read Edison's Tariff Rule No. 21 and the Qualifying Facility Milestone Procedure ("QFMP") and understands Seller's obligations and the consequences to Seller for failure to meet any of the "milestones" in the QFMP which is in effect on the earlier of Seller's (1) payment of the Project Fee or (2) execution of this Interconnection Facilities Agreement ("This Agreement").

A.3.2 In the event Seller loses its priority for existing available Edison line capacity, Seller shall, pursuant to Tariff Rule No. 21, be obligated, to pay any additional cost for upgrades or additions necessary to accommodate Seller's deliveries. In such event, Edison and Seller shall amend this Agreement to reflect the conditions resulting from the change in priority.

A.3.3 Seller shall design, purchase, construct, operate and maintain Seller owned Interconnection Facilities at its sole expense. Edison shall have the right to review the design as to the adequacy of the protective Apparatus provided. Any additions or modifications required by Edison shall be incorporated by Seller.

A.3.4 Notwithstanding the provisions of Section 13, Seller, having elected to own, operate, and maintain the Interconnection Facilities, shall accept all liability and release Edison from and indemnify Edison against any liability for faults or damage to Seller's

A.3-1

LONG-TERM POWER PURCHASE CONTRACT

Interconnection Facility, the Edison electric system and the public as a result of the operation of Seller's project.

A.3.5 Edison shall have the right to observe the construction of the Interconnection Facilities, and inspect said facilities after construction is completed at the Seller's expense.

A.3.6 Facilities which are deemed necessary by Edison for the proper and safe operation of the Interconnection Facilities and which Seller desires Edison

to own and operate at Seller's expense shall be provided as appendant facilities. Edison shall own, operate and maintain any necessary appendant facilities which may be installed in connection with the Interconnection Facilities at Seller's expense. Edison may, as it deems necessary, modify the aforementioned facilities at Seller's expense.

A.3.7 For the appendant facilities, Seller elects (check one):

X

-- Option I: Edison shall install, own, operate and maintain the appendant facilities and Seller shall pay to Edison the total estimated cost for the appendant facilities prior to the start of construction of the appendant facilities.

-- Option II: Seller shall install at Seller's expense its portion of the appendant facilities in accordance with Rule 21. Within 30 days after installation is complete, Seller shall transfer ownership of the appendant facilities to Edison in a manner acceptable to Edison.

A.3-2

LONG-TERM POWER PURCHASE CONTRACT

A.3.8 Maintenance of facilities referred to in Section A.3.6 shall be paid by Seller pursuant to the attached Application and Contract for Interconnection Facilities Plus Operation and Maintenance ("Interconnection Facilities Contract").

A.3.9 To the extent that Edison deems it necessary to effect the arrangements contemplated by this Agreement, Edison may, from time to time, request the Seller to design, install, operate, maintain, modify, replace, repair or remove any or all of the Interconnection Facility. Such equipment and/or Protective Apparatus shall be treated as Interconnection Facilities and added to the Interconnection Facilities Contract by amendment pursuant to Section A.3.6.

A.3.10 Edison shall have the right to review any changes in the design of the Interconnection Facilities and recommend modification(s) to the design as it deems necessary for proper and safe operation of the Project when in parallel with the Edison electric system. The Seller shall be notified of the results of such review by Edison, in writing, within 30 days of the receipt of all specifications related to the proposed design changes. Any flaws perceived by Edison in the proposed design changes, shall be described in the written notice.

A.3-3

LONG-TERM POWER PURCHASE CONTRACT

APPLICATION AND CONTRACT FOR INTERCONNECTION FACILITIES

PLUS OPERATION AND MAINTENANCE

("INTERCONNECTION FACILITIES CONTRACT")

The undersigned Seller hereby requests the Southern California Edison Company (Edison) to provide the appendant facilities described on the last page hereof and by this reference herein incorporated, hereinafter called "Interconnection Facilities." Interconnection Facilities as defined and used

herein are a group of Added Facilities which have been designated as Interconnection Facilities, to accommodate negotiation and preparation of contracts for parallel generation projects. Interconnection Facilities, as are Added Facilities, shall be provided in accordance with the applicable Tariff Schedules of Edison. Such Interconnection Facilities are to be owned, operated and maintained by Edison.

In consideration of Edison's acceptance of this application, Seller hereby agrees to the following:

1. If Seller elects Option I in Section A.3.7, Seller shall pay to Edison, prior to the start of construction of the Interconnection Facilities, the total estimated costs for the Interconnection Facility as determined by Edison and entered on the last page hereof. In the event Seller abandons its plans for installation of such Interconnection Facility, for any reason whatsoever, including failure to obtain any required permits, Seller shall reimburse Edison upon receipt of supporting documentation for any and all expenses incurred by Edison pursuant to this Interconnection Facilities Contract within thirty (30) days after presentation of a bill.

-1-

LONG-TERM POWER PURCHASE CONTRACT

2. If Seller elects Option II in Section A.3.7, Edison shall have the right to observe the construction of the Interconnection Facilities and inspect and test said facilities after construction is completed at the Seller's expense.

3. The parties also understand and agree that due to equipment acquisition lead time and construction time requirements, Edison requires a minimum of six (6) months from the time of authorization to construct the aforementioned Interconnection Facility and place it in operation. Edison shall have no obligation to Seller with regard to any target date established by Seller which is less than eighteen (18) months from the date this application is executed. However, Edison shall exercise its best effort to meet Seller's projected operational date.

4. Seller shall pay a monthly charge for the Interconnection Facilities' operation and maintenance in the amount of 0.9% of the added equipment investment as determined by Edison and as entered by Edison on the last page hereof. The monthly charge shall be adjusted periodically in accordance with the pro-rata operation and maintenance charges for added facilities pursuant to Rule No. 2.H. The monthly charge may be based upon estimated costs of the Interconnection Facilities and when the recorded book cost of the Interconnection Facilities has been determined by Edison, the charges shall be adjusted retroactively to the date when service is first rendered by means of such Interconnection Facilities. Additional charges resulting from such adjustment shall, unless other terms are mutually agreed upon, be payable within thirty (30) days from the date of presentation of a bill

-2-

LONG-TERM POWER PURCHASE CONTRACT

therefor. Any credits resulting from such adjustment will, unless other terms are mutually agreed upon, be refunded upon demand of Seller.

5. Whenever a change is made in the Interconnection Facilities which results in changes in the added equipment investment, the monthly charge will be adjusted on the basis of the revised added equipment investment. The cost of

such change shall be payable by Seller within sixty (60) days from the date of presentation of a bill thereof. The description of the Interconnection Facilities will be amended by Edison on the last page hereof to reflect any changes in equipment, installation and removal cost, amount of added equipment investment, and monthly charge resulting from any such change in the Interconnection Facilities or adjustment as aforesaid.

6. The monthly charges payable hereunder shall commence upon the date when said Interconnection Facilities are available for use but not before service is first established and rendered through Edison's normal facilities and shall first be payable when Edison shall submit the first energy bill after such date and shall continue until the abandonment of such Interconnection Facilities by Seller, subject to the provisions of Paragraphs 5. and 6 hereof.

7. Seller agrees to utilize said Interconnection Facilities in accordance with good operating practice and to reimburse Edison for damage to said Facilities occasioned or caused by the Seller or any of his agents, employees or licensees. Failure so to exercise due

-3-

LONG-TERM POWER PURCHASE CONTRACT

diligence in the utilization of said Interconnection Facilities will give Edison the right to terminate this Agreement.

8. Edison's performance under this Interconnection Facilities Contract is subject to the availability of materials required to provide the Interconnection Facilities provided for herein and to all applicable Tariff Schedules of Edison.

9. This Application and Contract for Interconnection Facilities supplements the appropriate application and contract(s) for electric service presently in effect between Seller and Edison.

10. This Interconnection Facilities Contract shall at all times be subject to such changes or modifications by the Public Utilities commission of the State of California as said Commission may, from time to time, direct in the exercise of its jurisdiction.

Exhibit 10.3.21

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

APPENDIX A
INTERCONNECTION FACILITIES AGREEMENT ("AGREEMENT")
SELLER OWNED AND OPERATED FACILITY

- A.1 Seller acknowledges that Seller has read Edison's Tariff Rule No. 21 and the Qualifying Facility Milestone Procedure ("QFMP") and understands Seller's obligations and the consequences to Seller for failure to meet any of the "milestones" in the QFMP which is in effect on the earlier of Seller's (1) payment of the Project Fee or (2) execution of this Agreement.
- A.2 In the event Seller loses its priority for existing available Edison line capacity, Seller shall, pursuant to Tariff Rule No. 21, be obligated to pay any additional cost for upgrades or additions necessary to accommodate Seller's deliveries. In such event, Edison and Seller shall amend this Agreement to reflect the conditions resulting from the change in priority.
- A.3 Seller shall design, purchase, construct, operate and maintain Seller owned Interconnection Facilities as described on page A-10 herein, at its sole expense. Edison shall have the right to review the design as to the adequacy of the Protective Apparatus provided. Any additions or modifications required by Edison shall be incorporated by Seller.
- A.4 Notwithstanding the provisions of Section 13, Seller, having elected to own, operate, and maintain the Interconnection Facilities, shall accept all liability and release Edison from and indemnify Edison against any

A-1

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

liability for faults or damage to Seller's Interconnection Facilities, the Edison electric system and the public as a result of the operation of Seller's project.

- A.5 Edison shall have the right to observe the construction of the Interconnection Facilities, and inspect said facilities after construction is completed at the Seller's expense.
- A.6 Facilities which are deemed necessary by Edison for the proper and safe operation of the Interconnection Facilities and which Seller desires Edison to own and operate at Seller's expense shall be provided as appendant facilities. Edison shall own, operate and maintain any necessary appendant facilities which may be installed in connection with the Interconnection Facilities at Seller's expense. Edison may, as it deems necessary, modify the aforementioned facilities at Seller's expense.
- A.7 For the appendant facilities, Edison shall install, own, operate, and maintain a portion of the appendant facilities ("Edison Installed Appendant Facilities"), as described on page A-10 herein, and Seller shall pay to Edison the total estimated cost for these appendant facilities prior to the start of construction of the appendant facilities. In addition, Seller shall install at Seller's expense its portion of the appendant facilities ("Seller

A-2

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

Installed Appendant Facilities"), as described on page A-10 herein, in accordance with Rule 21. Within 30 days after installation is complete, Seller shall transfer ownership of the Seller Installed Appendant Facilities to Edison in a manner acceptable to Edison.

- A.8 Maintenance of facilities referred to in Section A.6 shall be paid by Seller pursuant to the attached Application and Contract for Interconnection Facilities Plus Operation and Maintenance ("Application").
- A.9 To the extent that Edison deems it necessary to effect the arrangements contemplated by this Agreement, Edison may, from time to time, request the Seller to design, install, operate, maintain, modify, replace, repair or remove any or all of the Interconnection Facilities. Such equipment and/or Protective Apparatus shall be treated as Interconnection Facilities and added to the Agreement by amendment pursuant to Section A.6.
- A.10 Edison shall have the right to review any changes in the design of the Interconnection Facilities and recommend modification(s) to the design as it deems necessary for proper and safe operation of the Project when in parallel with the Edison electric system. The Seller shall be notified of the results of such review by Edison, in writing, within 30 days of the receipt of all specifications related to the proposed design changes. Any flaws

A-3

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

perceived by Edison in the proposed design changes, shall be described

in the written notice.

A-4

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

APPLICATION AND CONTRACT FOR INTERCONNECTION FACILITIES
PLUS OPERATION AND MAINTENANCE

The undersigned Seller hereby requests the Southern California Edison Company ("Edison") to provide the appendant facilities described on the last page hereof and by this reference herein incorporated, hereinafter called "Interconnection Facilities." Interconnection Facilities as defined and used herein are a group of Added Facilities which have been designated as Interconnection Facilities, to accommodate negotiation and preparation of contracts for parallel generation projects. Interconnection Facilities, as are Added Facilities, shall be provided in accordance with the applicable Tariff Schedules of Edison. Such Interconnection Facilities are to be owned, operated and maintained by Edison.

In consideration of Edison's acceptance of this Application, Seller hereby agrees to the following:

1. Seller shall pay to Edison, prior to the start of construction of the Interconnection Facilities, the total estimated costs for the Interconnection Facilities as determined by Edison and entered on page A-11 hereof. In the event Seller abandons its plans for installation of such Interconnection Facilities, for any reason whatsoever, including failure to obtain any required permits, Seller shall reimburse Edison upon receipt of supporting

A-5

SCE STANDARD CONTRACT
LONG-TERM POWER PURCHASE

documentation for any and all expenses incurred by Edison pursuant to this agreement within thirty (30) days after presentation of a bill.

2. Edison shall have the right to observe the construction of any Interconnection Facilities constructed by Seller and inspect and test said facilities after construction is completed at the Seller's expense.
3. The parties also understand and agree that due to equipment acquisition lead time and construction time requirements, Edison requires a minimum of six (6) months from the time of authorization to construct the aforementioned Interconnection Facilities and place them in operation. Edison shall have no obligation to Seller with regard to any target date established by Seller which is less than eighteen (18) months from the date this Application is executed. However, Edison shall exercise its best effort to meet Seller's projected operational date.
4. Seller shall pay a monthly charge for the Interconnection Facilities' operation and maintenance in the amount of 0.9% of the added equipment investment as determined by Edison and as entered by Edison on page A-11 hereof. The monthly charge shall be adjusted periodically in accordance with the pro-rata operation and maintenance charges for added facilities

pursuant to Rule No. 2. The monthly charge may be based upon estimated

Exhibit 10.3.22

INTERCONNECTION AGREEMENT

BETWEEN

SOUTHERN CALIFORNIA EDISON COMPANY

AND

HEBER GEOTHERMAL COMPANY

INTERCONNECTION AGREEMENT BETWEEN
SOUTHERN CALIFORNIA EDISON COMPANY
AND HEBER GEOTHERMAL COMPANY

1. PARTIES: The Parties to this Interconnection Agreement, hereinafter referred to as "Agreement", are Southern California Edison Company, a California corporation, hereinafter referred to as "Edison", and Heber Geothermal Company, a California general partnership, hereinafter referred to as "Seller", hereinafter sometimes referred to individually as "Party" and collectively as "Parties".

2. RECITALS: This Agreement is made with reference to the following facts, among others:

2.1 On August 26, 1983, Edison and Chevron U.S.A. Inc., executed the Power Purchase and Sales Agreement to provide the terms and conditions for the sale by Chevron and purchase by Edison of capacity and energy delivered to the Point of Interconnection from a 47 MW (Net) electrical generating facility located at Heber, California, utilizing geothermal steam as the prime mover energy source.

2.2 On August 26, 1983, Chevron assigned and Heber Geothermal Company assumed Chevron's right, title, and interest in the Power Purchase and Sales Agreement between Chevron and Edison, dated August 26, 1983.

2.3 On March 16, 1984, Chevron and Heber Geothermal Company issued a Notice of Intention to Proceed to Edison. The Notice of Intention to Proceed stated Chevron and Heber Geothermal Company's desire to construct the facilities necessary to proceed with the Power Purchase and Sales Agreement, dated August 26, 1983.

2.4 On December 11, 1984, Edison and Heber Geothermal Company executed an Amendment No. 1 to the Power Purchase and Sales Agreement, dated August 26, 1983.

2

Amendment No. 1 provided for modifications to the terms of: (i) Payments for Energy; (ii) Payments for Capacity; and (iii) Transmission Cost.

2.5 Pursuant to Section 34.2.2 of the Power Purchase and Sales Agreement, these Parties desire to establish the terms and conditions for the design, construction, ownership, operation, maintenance, and cost responsibility for the 115/92 kV Mirage Substation, located near Thousand Palms, California ("Interconnection Facilities").

3. Edison shall, pursuant to the Edison Tariff Rule No. 21, engineer, design, construct, own, operate, and maintain the Interconnection Facilities, described in Exhibit A, and procure equipment, materials, and necessary rights-of-way for such facilities.

4. Seller shall pay Edison a pro rata share of the cost of the Interconnection Facilities to be constructed, owned, operated, and maintained by Edison as provided in this Section 4 and Exhibit A. The cost figures set forth in Exhibit A are estimates only and shall be adjusted to reflect the recorded

cost after installation is complete.

4.1 Not later than thirty (30) days after the date of execution of this Agreement, Seller shall pay Edison a pro rata share of the Total Estimated Installed Cost of the Interconnection Facilities as set forth in Exhibit A. The Seller's pro rata share is 25/65 of the total installed cost of the Interconnection Facilities and represents the Seller's 25,000 kVA portion of the total 65,000 kVA Interconnection Facilities.

4.2 Pursuant to Edison's Tariff Rule No. 2H for Seller-financed added facilities (Interconnection Facilities), Seller shall pay a monthly charge of 0.9% of the Seller's pro rata share of the Total Estimated Installed Cost of the Interconnection Facilities as set forth in Exhibit A. When the recorded book cost of the Interconnection Facilities has been determined by Edison, the charge to Seller shall be adjusted retroactively to the date when the Interconnection

3

Facilities were first available for use. Charges or credits to the Seller resulting from such adjustment shall, unless otherwise agreed to, be payable within thirty (30) days of the presentation of a statement therefor.

4.3 If Seller abandons its plans for the generating facility or otherwise terminates its need for the Interconnection Facilities prior to the Interconnection Facilities being placed in use, for any reason whatsoever, Seller shall pay Edison costs which Edison incurred as a direct result of such a termination. Such costs shall include the cost of engineering, design, procurement of equipment and materials, acquisition of rights-of-way, and construction of the Interconnection Facilities.

4.4 Pursuant to Edison's Tariff Rule No. 21, when a change in the Interconnection Facilities results in a change in the installed cost of the Interconnection Facilities, the charges provided herein shall be adjusted consistent with such change.

4.5 Monthly charges for Interconnection Facilities shall commence upon the date the Interconnection Facilities are available for use and shall be payable within thirty (30) days after Edison submits a statement therefor.

5. Edison's obligations under this Agreement shall be subject to the availability of materials required for construction of the Interconnection Facilities and all applicable Tariff Schedules of Edison.

6. Edison shall exercise its best efforts to provide the Interconnection Facilities to accommodate Seller's projected operation date.

7. This Agreement shall be subject to applicable tariff rules and modification of such rules as directed by the Public Utilities Commission of the State of California in the exercise of its jurisdiction.

4

8. This Agreement shall become effective upon execution by the Parties and consent by Chevron U.S.A. Inc. and shall remain in effect for the period the Seller uses the Interconnection Facilities.

9. SIGNATURE CLAUSE: The signatories hereto represent that they have been appropriately authorized to enter into this Interconnection Agreement on behalf of the Party for whom they sign. This Interconnection Agreement is hereby executed as of this 12th day of August, 1985.

1. PARTIES

The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT (IID), an irrigation district organized and operating under the laws of the State of California and HEBER GEOTHERMAL COMPANY (Heber Geothermal), a California Partnership (hereinafter individually Party, collectively Parties).

2. RECITALS

2.1 Heber Geothermal leases and operates a geothermal generating facility with a maximum 49.9 megawatt net output at the Heber known Geothermal Resource Area (KGRA) and sells the Electric Output From the Plant to Southern

California Edison Company (SCE).

2.1.1 Heber Geothermal intends to construct the Plant, and upon completion of such construction, sell the Plant to United States Trust Company of New York, a New York corporation, not in its individual capacity (except as expressly provided in the Participation Agreement and the Trust Agreement) but solely as Owner Trustee under the Trust Agreement, and its successors and assigns as such Owner Trustee (the "Owner Trustee") and lease back the Plant from the Owner Trustee pursuant to the Lease Agreement, dated the Lease Closing Date, between the Owner Trustee, as Lessor, and Heber Geothermal, as Lessee (the "Lease"). To finance construction of the Plant, Heber Geothermal proposes to borrow money from General Electric Credit Corporation, a New York corporation ("GECC"), pursuant to a loan agreement. Such borrowing will be secured in accordance with the Construction Deed of Trust, Assignment of Rents, Security Agreement and Fixture Filing, dated as of December 1, 1983, among Heber Geothermal, the deed trustee and GECC, and as it may be amended, modified and supplemented from time to time in accordance with the terms thereof (the "Mortgage")

by a first mortgage on the Plant and by an assignment (for security purposes only) of certain contractual rights of Heber Geothermal. Upon completion of such construction, Heber Geothermal intends to assign all of its rights under certain contracts outright to the Owner Trustee pursuant to the Bill of Sale and Assignment, dated the Lease Closing Date, from Heber Geothermal in favor of the Owner Trustee (the "Bill of Sale") in connection with the sale of the Plant to the Owner Trustee. Contemporaneously with such assignment and sale, Heber Geothermal intends to enter into the Lease pursuant to which all of the Owner Trustee's rights under such contracts will be assigned to Heber Geothermal during the term of the Lease and thereafter if Heber Geothermal purchases the Plant pursuant to the terms of the Lease. After giving effect to the aforesaid sale and leaseback, Heber Geothermal will be fully obligated to perform all of its obligations with respect to such contracts.

2.2 SCE has entered into the Power Purchase Agreement dated August 26, 1983, (Purchase Agreement) with Heber Geothermal to purchase all the Electric Output From the Plant.

2.3 SCE and Heber Geothermal agree that the terms and conditions regarding transmission of the Electric Output From the Plant to an IID/SCE point of interconnection shall be pursuant to an agreement to be entered between IID and SCE.

2.4 Since the Plant has been built in the IID service territory, it will be convenient to connect the Plant to the IID electric system.

Heber Geothermal hereby grants the IID the right to enter the Plant site for any reasonable purposes connected with this Agreement, by previous arrangements with the Plant manager. Those reasonable purposes included maintenance and

repairs to IID equipment in Heber Geothermal facilities, observing tests of said facilities, reading of kilowatt-hour meters, and the like.

2.5 Heber Geothermal desires to purchase and IID desires to sell the electrical energy necessary to satisfy all of the corporation and maintenance power consumption requirements of the Plant for the life of the Plant that is

not normally generated by the Plant itself, or portable generating equipment.

2.6 The Parties desire, by means of this Agreement, to interconnect the Plant to the IID electrical system and to establish the terms, conditions and obligations of the Parties relating to such interconnection.

3. AGREEMENT

The Parties agree as follows:

4. DEFINITIONS

4.1 Authorized Representative: The representative of a Party designated in accordance with Section 13.

4.2 Energy: Electric energy in excess of Heber Geothermal's electric energy requirements, expressed in kilowatt-hours, generated by the Plant and measured and delivered to the Point of Delivery.

4.3 Operation Date: The day on which the Plant Energy is accepted by IID for SCE's account.

4.4 Plant: A maximum of 49.9 MW net output geothermal generating facility owned by Heber Geothermal including all associated equipment and improvements necessary for generating electric energy and transmitting it to the high voltage side of the power transformer.

4.5 Point of Delivery: The point on the high voltage side of Heber Geothermal's switchyard where IID's metering equipment measures the delivery of Energy to the IID system as shown on Exhibit "B".

4.6 System Emergency: A condition on IID's system which is likely to result in imminent significant disruption of service to customers or is imminently likely to endanger life or property.

4.7 Electric Output From the Plant: For the purposes of this agreement, the Electric Output From the Plant shall be defined as the net metered output of the Plant plus the net metered usage of electric power by chevron, as shown on in Exhibit B.

4.8 Consumption of Energy From IID's Resources: For the purposes of this agreement, Consumption of Energy From IID's Resources shall be defined as the metered energy delivered to Heber Geothermal, less that metered energy consumed by Chevron during deliveries from IID. Demand charges will be computed in the same manner.

5. EFFECTIVE DATE AND TERM

This Agreement shall become effective when signed by the Parties and shall terminate at the earlier of (i) midnight December 31, 2015, or (ii) twenty-four (24) months from the date the plant has ceased to operate at the option of the IID or (iii) the date agreed to by the Authorized Representatives.

6. CONNECTION OF PLANT

6.1 Heber Geothermal may electrically connect its Plant, in accordance with the provisions of this Agreement, so that it can operate in parallel with the IID electric system.

6.2 Notwithstanding the provision that Heber Geothermal has furnished the high voltage switchyard complete, including the high voltage oil circuit breakers and disconnect

switches, the control of the high voltage oil circuit breakers and disconnect switches shall be under the control of the IID dispatcher.

7. ELECTRIC SERVICE TO HEBER GEOTHERMAL

IID shall provide electric service to Heber Geothermal pursuant to Section 12.

8. METERING OF ENERGY DELIVERIES

Metering for electric service to Heber Geothermal and for energy deliveries by Heber Geothermal to IID for SCE's account shall be at the Point of Delivery as shown on Exhibit "B". Four meters shall be installed which shall measure and record flows in each direction as shown on Exhibit "3".

9. HEBER GEOTHERMAL DELIVERY AND IID ACCEPTANCE OF ENERGY FROM PLANT

Whenever Electric Output From the Plant exceeds Heber Geothermal 's power requirements, Heber Geothermal shall deliver all such excess output to IID for the account of SCE and IID shall accept such output for the account of SCE and deliver such output to SCE pursuant to transmission service agreement to be entered into between Southern California Edison Company and Imperial Irrigation District.

10. HEBER GEOTHERMAL'S GENERAL OBLIGATIONS

Heber Geothermal shall:

10.1 Operate the Plant in a manner consistent with applicable electric utility industry standards, good engineering practice, and without degradation of quality or reliability of the IID system.

10.2 Deliver the Electric Output From the Plant to IID for the account of SCE at the Point of Delivery.

10.3 Each Party shall provide the reactive kilovolt ampere (KVA) requirements of its own system so that there will be no interchange of reactive KVA between systems. The Parties shall cooperate to control the flow of reactive KVA to prevent the introduction of objectionable operating conditions on the system of either Party.

10.4 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of the Plant with IID.

10.5 Give IID a written schedule on or before June 1, and December 1, each year of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each month of the succeeding twelve-month (12) period commencing July 1, and January 1.

10.6 Give IID a written schedule on or before the fifteenth (15th) day of each month of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each day of the succeeding calendar month.

10.7 Give IID a schedule on or before 12:01 p.m. on Tuesday of each seven-day (7) period of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each hour of the succeeding seven-day (7) period commencing at 12:01 a.m. on the following Monday; provided, however, that if any changes in the hourly deliveries so scheduled become necessary, Heber Geothermal shall notify IID of such changes as far in advance as possible.

10.8 Provide IID any reasonable rights-of-way and access required for testing and reading of meters by previous arrangement with the Plant manager.

10.9 When IID determines that it is necessary to utilize the transmission capability being utilized by Heber Geothermal to meet IID's load requirements,

a) pay its pro-rata share of the total costs associated with extensions or upgrades of IID's existing system and/or a new system required for delivery of Heber Geothermal's power, or

b) arrange for transmission capability exclusive of IID.

In any event, IID will give Heber Geothermal 60 months written notice of such determination.

11. IID'S GENERAL OBLIGATIONS

11.1 Accept the Electric Output From the Plant for the account of SCE at the Point of Delivery and concurrently deliver an equal amount of electric energy to the SCE system at IID/SCE point(s) of interconnection.

11.2 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of IID transmission facilities with Heber Geothermal and notify Heber Geothermal of any changes as far in advance as possible.

11.3 Carry out the directions of the Authorized Representative with respect to the matters set forth in this Agreement.

12. BILLING

12.1 IID shall read the meters monthly according to its regular meter reading schedule beginning no more than thirty (30) days after the date that electric energy is first supplied to Heber Geothermal. IID monthly shall send Heber Geothermal within ten (10) working days after the meter is read a bill for electric service. Heber Geothermal shall pay IID the total amount billed within thirty (30) days of receipt of the bill.

12.2 IID shall bill Heber Geothermal for Heber Geothermal's Consumption of Energy From IID's Resources in accordance with Rate Schedule A2, as it may be revised from time to time. Copy of current Rate Schedule A2 is attached as Exhibit "A".

12.3 If Heber Geothermal disputes a bill, payment shall be made as if no dispute existed pending resolution of the dispute by the Authorized Representatives. If the bill is determined to be in error, the disputed amount shall be refunded by IID including interest at the rate of one and one half percent (1-1/2%) per month, compounded monthly, from the date of payment to the date the refund check or adjusted bill is mailed.

13. AUTHORIZED REPRESENTATIVES

13.1 Within thirty (30) days after the date this Agreement is signed, each Party shall designate, by written notice to the other Party, an Authorized Representative who is authorized to act in its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities for the Authorized Representatives. Either Party may, at any time, change the designation of its Authorized Representative by written notice to the other Party.

13.2 IID's Authorized Representative shall develop detailed written

procedures necessary and convenient to administer this Agreement within six (6) months after the date signed. Such procedures shall be submitted to Heber Geothermal's Authorized Representative for review, comment, discussion and concurrence before they are put into effect. Such procedures shall include, without limitation: (i) communication between Heber Geothermal and IID's electric system dispatcher with regard to daily operating matters, (ii) billing and payments, (iii) specified equipment tests, and (iv) operating matters which affect or may affect quality and reliability of service to electric customers and continuity of deliveries to SCE.

13.3 The Authorized Representative shall have no authority to modify any of the provisions of this Agreement.

14. METERS

14.1 All meters shall be sealed and the seal shall be broken only upon occasions when the meters are to be inspected, tested or adjusted.

14.2 IID shall inspect and test all meters upon their installation and at least once every year thereafter. If requested to do so by Heber Geothermal, IID shall inspect or test a meter more frequently than every year, but the expense of such inspection or test shall be paid by Heber Geothermal unless the meter is found to register inaccurately by more than two percent (2%) from the measurement made by a standard meter. Each Party shall give reasonable notice to the other party of the time when any inspection or test shall take place and that Party may have representatives present at the test or inspection. If a meter is found to be inaccurate or defective, it shall be adjusted, repaired or replaced in order to provide accurate metering. All adjustments due to inaccurate meters shall be limited to the preceding six (6) months.

14.3 If a meter fails to register, or if the measurement made by a meter during a test varies by more than two percent (2%) from the measurement made by the standard meter used in the test, adjustment shall be made correcting all measurements made by the inaccurate meter for:

(i) the actual period during which inaccurate measurements were made, if the period can be determined, or if not,

(ii) the period immediately preceding the test of the meter equal the one-half (1/2) the time from the date of the last previous test of the meter; provided, however, that the period covered by the correction shall not exceed six (6) months.

14.4 Heber Geothermal shall telemeter information to IID's new dispatch center regarding the kilowatts, kilowatt-hours, kilovars and kilovar-hours delivered to or received from IID at the Point of Delivery, as well as voltage and breaker status over phone line leased by

Heber Geothermal. IID shall purchase, own, and shall design, install, operate, maintain, or cause to be designed, installed, operated, and maintained, equipment to automatically transmit from the Plant to IID's new dispatch center continuous values of Plant output expressed as megawatts, megavars and megawatt-hours. IID may thereupon bill and Heber Geothermal shall promptly pay IID's cost of design, purchase and installation of said equipment. Heber Geothermal shall have the right to audit IID's records and accounts to verify the cost of said equipment.

15. CONTINUITY OF SERVICE

IID shall not be obligated to accept and IID may require Heber Geothermal to temporarily curtail, interrupt or reduce deliveries of energy upon advance notice to Heber Geothermal, when such curtailment, interruption or

reduction is required in order for IID to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its system or if IID determines that such curtailment, interruption or reduction is necessary because of a System Emergency, forced outages or abnormal operating conditions on its system which IID in its sole judgment deems to jeopardize its system integrity. IID shall exercise due diligence to minimize the frequency and duration of such curtailments, interruptions or reductions.

16. LIABILITY

16.1 Neither Party shall hold the other Party, its officers, agents or employees liable for any loss, damage, claim, cost, or expense for less of or damage to property, or injury or death of persons, which arises out of the first Party's ownership, operation or maintenance of facilities on its own side of the Point of Delivery.

16.2 Each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or

damage to property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or willful misconduct.

17. UNCONTROLLABLE FORCE

Neither Party shall be considered to be in default with respect to any obligation hereunder, other than the obligations to pay money, if prevented from fulfilling such obligation by reason of an uncontrollable force. The term "uncontrollable force" means any cause beyond the control of the Party affected, including, but not limited to, failure or threat of imminent failure of facilities, flood, earthquake, storm, lightning, fire, epidemic, war, riot, civil disturbance, sabotage and restraint by court or public authority, which by exercise of due diligence and foresight could not reasonably have been avoided. Whichever Party is rendered unable to fulfill any obligation by reason of uncontrollable forces shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch. Nothing in this Agreement shall require a Party to settle any strike or labor dispute in which it is involved.

18. INTEGRATION AND AMENDMENTS

This Agreement constitutes the entire agreement between the Parties relating to the interconnection of Heber Geothermal's Plant to IID's electric system, the acceptance of energy by IID from Heber Geothermal and the providing of electric service by IID. No oral agreement or prior written agreement between the Parties shall be of any effect whatsoever; provided, however, that any arrangements agreed upon by the Authorized Representatives within the limits

of their authority, and consistent with this Agreement shall be binding upon the Parties. All changes to this Agreement shall be in writing and shall be signed by an officer of each Party.

19. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the

relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

20. NO DEDICATION OF FACILITIES

Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

21. SUCCESSORS AND ASSIGNS

21.1 This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties.

21.2 IID hereby consents to the assignment of this Agreement:

(i) by Heber Geothermal to GECC, as security, pursuant to the Mortgage;

(ii) by Heber Geothermal to the Owner Trustee pursuant to the Bill of Sale;

(iii) by the Owner Trustee to Heber Geothermal pursuant to the Lease or otherwise to Heber Geothermal in connection with the transactions contemplated by the Participation Agreement;

(iv) by any assignee permitted by this Section 21.2 (including any assignee permitted by this clause (iv) to any Person if such Person is, or has a binding contract for the operation of the Plant by, an experienced and prudent power plant operator and has a net worth (determined in accordance with generally accepted accounting principles) of at least \$100,000,000;

(v) by any assignee permitted by this Section 21.2 (including any assignee permitted by this clause (v) to any Person, unless IID shall have reasonably objected to such Person in writing within 30 days of notice to IID of the proposed assignment, which notice shall name the proposed assignee and the proposed operator of the Plant, such objection to be because such assignee either (a) is not a financially responsible entity, (b) is not, and does not have a contract for the operation of the Plant by, an experienced and prudent operating entity or (c) cannot obtain the rights, title and interest necessary to perform the assigned obligations.

22. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

23. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the laws of the United States, as applicable.

24. ARBITRATION

24.1 Any dispute arising out of or relating to this Agreement, or the breach thereof, which is not resolved by the Parties acting through their Authorized Representatives shall be settled by arbitration to the extent permitted by the laws applicable to the Parties; provided, however, that no Party to the dispute shall be bound to any greater extent than any other Party

to the dispute. Arbitration shall not apply to any dispute or matter that is within the jurisdiction of any regulatory agency.

24.2 Any demand for arbitration shall be made by written notice to the other Party setting forth in adequate detail the nature of the dispute, the issues to be arbitrated, the amount or amounts, if any, involved in the dispute, and the remedy sought. Within twenty (20) days from the receipt of such notice, the other Party may submit its own written statement of the dispute and may set forth in adequate detail any additional related matters or issues to be arbitrated.

24.3 Within thirty (30) days after delivery of the written notice demanding arbitration, the Parties acting through their Authorized Representatives shall meet for the purpose of selecting an arbitrator. The Parties may agree upon a single arbitrator, but in the event that they cannot agree, three arbitrators shall be used. Each Party shall designate one arbitrator, and the two arbitrators shall then select a third arbitrator. All arbitrators shall be persons skilled and experienced in the field in which the dispute has arisen and no person shall be eligible for appointment as an arbitrator who is or has been an officer or employee of either of the Parties or otherwise interested in the matter to be arbitrated. Should either party refuse or neglect to appoint an arbitrator or to furnish the arbitrators with any papers or information demanded, the arbitrators are empowered, by both Parties, to proceed without the participation or assistance of that Party.

24.4 Except as otherwise provided in this Section, the arbitration shall be governed by the rules and practices of the American Arbitration Association, or a similar organization if the American Arbitration Association should not at the time exist.

24.5 Arbitration proceedings shall be held in Imperial, California, at a time and place to be selected by the arbitrators. The arbitrators shall hear evidence submitted by the Parties and may call for additional information which shall be furnished by the Party having such information. The arbitrators shall have no authority to call for information not related to the issues included in the dispute or to determine other issues not in dispute.

24.6 If there is only one arbitrator, his decision shall be binding and conclusive on the Parties. If there are three arbitrators, the decision of any two shall be binding and conclusive. The decision of the arbitrators shall contain findings regarding the issues involved in the dispute, including the merits of the positions of the Parties, the materiality of any default, and the remedy or relief to which a Party shall be entitled. The arbitrators may not grant any remedy or relief which is inconsistent with this Agreement, nor shall the arbitrators make findings or decide issues not in dispute.

24.7 The fees and expenses of the arbitrators shall be shared equally by the Parties, unless the decision of the arbitrators specifies some other apportionment. All other expenses and costs of the arbitration shall be borne by the Party incurring such expenses and costs.

24.8 Any decision or award granted by the arbitrators shall be final and judgment may be entered on it in any court of competent jurisdiction. This agreement to arbitrate shall be specifically enforceable.

25. ENTIRE AGREEMENT

The complete agreement of the Parties is set forth in this Agreement and all prior

communications regarding subject interconnected operations whether oral or written, are hereby abrogated and withdrawn.

26. NOTICES

Any formal communication or notice in connection with this Agreement shall be in writing and shall be deemed properly given if delivered in person or sent first class mail, postage prepaid to the person specified below:

Heber Geothermal Company
226 West Brokaw Road
Suite 550
San Jose, California 95110

Imperial Irrigation District
c/o General Manager
P.O. Box 937
Imperial, California 92251

27. SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership, or joint venture, or impose a trust or partnership duty, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations under this Agreement.

28. SIGNATURE CLAUSE

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this 31st day of July, 1985.

ii

1. PARTIES

The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT ("IID"), organized under the Water Code of the State of California and SECOND IMPERIAL GEOTHERMAL COMPANY ("Producer"), hereinafter referred to individually as "Party", and collectively as "Parties".

2. RECITALS

2.1 Producer intends to construct and operate, as owner or lessee, a geothermal generating facility with a maximum 33.0 megawatt net operating capacity at the Heber KGRA, Imperial County, California, and to sell the Plant electrical output to Southern California Edison Company ("SCE").

2.2 SCE has entered into the Power Purchase Agreement dated April 16, 1985, ("Purchase Agreement") with Producer, to purchase all the electrical output from the Plant.

2.3 SCE and Producer agree that the terms and conditions regarding transmission of the Plant's Energy to an IID/SCE point of interconnection shall be pursuant to a Transmission Service Agreement to be entered into between IID

and Producer.

2.4 Since the Plant will be built in the IID service territory, it will be convenient to connect the Plant to the IID electric system.

Producer hereby grants the IID the right to enter the Plant site for any reasonable purposes connected with this Agreement, by previous arrangements with the

Plant manager. Those reasonable purposes include maintenance and repairs to IID equipment in Producer's facilities, observing tests of said facilities, reading of kilowatt-hour meters, and the like.

2.5 Producer desires to purchase and IID desires to sell the electrical energy necessary to satisfy their operation and maintenance power consumption requirements of the Plant for the life of the Plant that is not normally generated by the Plant itself, or portable generating equipment.

2.6 The Parties desire, by means of this Agreement, to interconnect the Plant to the IID electrical system and to establish the terms, conditions and obligations of the Parties relating to such interconnection.

3. AGREEMENT

The Parties agree as follows:

4. DEFINITIONS

4.1 Agreement. This Plant Connection Agreement between IID and Producer, and all Exhibits hereto, as may be amended from time to time.

4.2 Authorized Representative: The representative of a Party designated in accordance with Section 13.

4.3 Energy: Electric energy in excess of Producer's electric energy requirements, expressed in kilowatt-hours, generated by the Plant and measured and delivered to the Point of Delivery.

2

4.4 Operation Date: The day on which the Plant Energy is first accepted by IID for delivery to SCE.

4.5 Plant: A maximum of 33.0 MW net operating capacity geothermal facility operated by Producer, as owner or lessee, including all associated equipment and improvements necessary for generating electric energy and transmitting it to the high voltage side of the power transformer.

4.6 Point of Delivery: The point on the high voltage side of Producer's switchyard when IID's metering equipment measures the delivery of Energy to the IID system as shown on Exhibit "B".

4.7 System Emergency: A condition on IID's system which is likely to result in imminent significant disruption of service to customers or is imminently likely to endanger life or property.

5. EFFECTIVE DATE AND TERM

This Agreement shall become effective upon the Operation Date of the Plant, and shall remain in effect until the earlier of (i) thirty years after the plant achieves firm operation as such term is defined in Section 2.17 of the Power Purchase Contract dated April 16th, 1985 between Second Imperial Geothermal

Company and Southern California Edison Company, or (ii) thirty six (36) months from the date the Plant has ceased to operate at the option of IID. It is understood that if the Operation Date does not occur within five (5) years after the date this Agreement was executed, this Agreement shall be of no force or effect.

3

6. CONNECTION OF PLANT

6.1 Producer may electrically connect its Plant, in accordance with the provisions of this Agreement, so that it can operate in parallel with the IID electric system. Parallel operation will not commence until IID has inspected and approved the interconnection facilities and operational procedures.

6.2 Notwithstanding the provision that Producer has furnished the high voltage switchyard complete, including the high voltage oil circuit breakers and disconnect switches, the control of the high voltage oil circuit breakers and disconnect switches shall be under the control of the IID dispatcher.

7. ELECTRIC SERVICE TO PRODUCER

IID shall provide electric service to Producer pursuant to Section 12.

8. METERING OF ENERGY DELIVERIES

Metering for electric service to Producer and for energy deliveries by Producer to IID for delivery to SCE shall be at the Point of Delivery as shown on Exhibit "B." Four meters shall be installed which shall measure and record flows in each direction as shown on Exhibit "B."

9. PRODUCER'S DELIVERY AND IID ACCEPTANCE OF ENERGY FROM PLANT

Whenever electric output from the Plant exceeds Producer's power requirements, Producer shall deliver all such excess output to IID for delivery to SCE and IID shall accept such output for delivery to SCE and deliver such output to SCE pursuant to a transmission service agreement to be entered into between Producer and IID.

4

10. PRODUCER' S GENERAL OBLIGATIONS

Producer shall:

10.1 Operate the Plant in a manner consistent with applicable electric utility industry standards, good engineering practice, and without degradation of quality or reliability of service to IID customers.

10.2 Deliver the Plant's net electrical output to IID for the account of SCE at the Point of Delivery.

10.3 Each Party shall provide the reactive kilovolt-ampere (KVA) requirements of its own system so that there will be no interchange of reactive KVA between systems. The Parties shall cooperate to control the flow of reactive KVA to prevent the introduction of objectionable operating conditions on the system of either Party.

10.4 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of the Plant with IID.

10.5 Give IID a written schedule on or before June 1, and December 1, each year of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each month of the succeeding twelve-month (12) period commencing July 1, and January 1.

10.6 Give IID a written schedule on or before the fifteenth (15th) day of each month of the estimated amounts and rates of delivery of energy to be delivered to

5

IID for the account of SCE at the Point of Delivery during each day of the succeeding calendar month.

10.7 Give IID a schedule on or before 12:01 p.m. on Tuesday of each seven-day (7) period of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each hour of the succeeding seven-day (7) period commencing at 12:01 a.m. on the following Monday; provided, however, that if any changes in the hourly deliveries so scheduled become necessary, Producer shall notify IID of such changes as far in advance as possible.

10.8 Provide IID any reasonable rights-of-way and access required for testing and reading of meters by previous arrangement with the Plant manager.

10.9 Carry out the directions of the Authorized Representatives with respect to the matters set forth in this Agreement.

11. IID'S GENERAL OBLIGATIONS

IID shall:

11.1 Design, acquire, construct, operate and maintain, or cause to be designed, acquired, constructed, operated and maintained, and shall own, a connecting transmission line between IID's transmission system and the Plant. Following the completion of such line, IID may bill and Producer shall pay IID's costs of designing, acquiring and constructing such line. Producer shall have the right to audit IID's records and accounts to verify the cost of such line.

6

11.2 Accept the Plant's net electrical output for the account of SCE at the Point of Delivery and simultaneously deliver an equal amount of electric energy (less applicable transmission losses) to the SCE system at IID/SCE point(s) of interconnection.

11.3 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of IID transmission facilities with Producer and notify Producer of any changes as far in advance as possible.

11.4 Carry out the directions of the Authorized Representative with respect to the matters set forth in this Agreement.

11.5 Operate its system in a manner consistent with applicable utility industry standards and good engineering practices.

12. BILLING

12.1 IID shall read the meters monthly according to its regular meter reading schedule beginning no more than thirty (30) days after the date that electric energy is first supplied to Producer. IID monthly shall send Producer

within ten (10) working days after the meter is read a bill for electric service. Producer shall pay IID the total amount billed within thirty (30) days of receipt of the bill.

12.2 IID shall bill Producer for Producer's consumption of energy from IID's resources in accordance with Rate Schedule GL or Rate Schedule A-2, as applicable, as it may be revised from time to time. Copies of current Rate Schedule GL and current Rate Schedule A-2 are attached as Exhibit "A."

7

12.3 If Producer disputes a bill, payment shall be made as if no dispute existed pending resolution of the dispute by the Authorized Representatives. If the bill is determined to be in error, the disputed amount shall be refunded by IID including interest at the rate of one and one-half percent (1 1/2%) per month, compounded monthly, from the date of payment to the date the refund check or adjusted bill is mailed.

13. AUTHORIZED REPRESENTATIVES

13.1 Within thirty (30) days after the date this Agreement is signed, each Party shall designate, by written notice to the other Party, an Authorized Representative who is authorized to act in its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities for the Authorized Representatives. Either Party may, at any time, change the designation of its Authorized Representative by written notice to the other Party.

13.2 IID's Authorized Representative shall develop detailed written procedures necessary and convenient to administer this Agreement within six (6) months after the date signed. Such procedures shall be submitted to Producer's Authorized Representative for review, comment, discussion and concurrence before they are put into effect. Such procedures shall include, without limitation: (i) communication between Producer and IID's electric system dispatcher with regard to daily operating matters, (ii) billing and payments, (iii) specified equipment tests, and (iv) operating matters which affect or may affect quality and reliability of service to electric customers and continuity of deliveries to SCE.

8

13.3 The Authorized Representative shall have no authority to modify any of the provisions of this Agreement.

14. METERS

14.1 All meters shall be sealed and the seal shall be broken only upon occasions when the meters are to be inspected, tested or adjusted.

14.2 IID shall inspect and test all meters upon their installation and at least once every year thereafter. If requested to do so by Producer, IID shall inspect or test a meter more frequently than every year, but the expense of such inspection or test shall be paid by Producer unless the meter is found to register inaccurately by more than two percent (2%) from the measurement made by a standard meter. Each Party shall give reasonable notice to the other Party of the time when any inspection or test shall take place and that Party may have representatives, present at the test or inspection. If a meter is found to be inaccurate or defective, it shall be adjusted, repaired or replaced in order to provide accurate metering. All adjustments due to inaccurate meters shall be limited to the preceding six (6) months.

14.3 If a meter fails to register, or if the measurement made by a

meter during a test varies by more than two percent (2%) from the measurement made by the standard meter used in the test, adjustment shall be made correcting all measurements made by the inaccurate meter for:

- (i) the actual period during which inaccurate measurements were made, if the period can be determined, or if not,

9

- (ii) the period immediately preceding the test of the meter equal to one-half (1/2) the time from the date of the last previous test of the meter; provided, however, that the period covered by the correction shall not exceed six (6) months;

14.4 Producer shall telemeter information to IID's Dispatch Center regarding the kilowatts, kilowatt-hours, kilovars and kilovar-hours delivered to or received from IID at the Point of Delivery over phone line leased by Producer.

IID shall purchase, own, and shall design, install, operate, maintain, or cause to be designed, installed, operated, and maintained, equipment to automatically transmit from the Plant to IID's Dispatch Center continuous values of Plant output expressed as megawatts, megavars and megawatt-hours. IID may thereupon bill and Producer shall promptly pay IID's cost of design, purchase and installation of said equipment. Producer shall have the right to audit IID's records and accounts to verify the cost of said equipment.

15. CONTINUITY OF SERVICE

IID shall not be obligated to accept and IID may require Producer to temporarily curtail, interrupt or reduce deliveries of energy upon advance notice to Producer, when such curtailment, interruption or reduction is required in order for IID to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its system or if IID determines that such curtailment, interruption or reduction is necessary because of a System Emergency, forced outages or

10

abnormal operating conditions on its system. IID shall use reasonable efforts to keep interruptions and curtailments to a minimum time.

16. LIABILITY

16.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

16.2 For the purpose of this Section 16, Willful Action shall be defined as action taken or not taken by a Party at the direction of its

directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

11

16.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

16.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

16.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

16.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

16.4 The phrase "employees having management or administrative responsibility," as used in Section 16.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

16.5 Subject to the foregoing provisions of this Section 16, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to

12

property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

17. UNCONTROLLABLE FORCES

Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, which by exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either

Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give

13

prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

18. INTEGRATION AND AMENDMENTS

This Agreement constitutes the entire agreement between the Parties relating to the interconnection of Producer's Plant to IID's electric system, the acceptance of energy by IID from Producer and the providing of electric service by IID. No oral agreement or prior written agreement between the Parties shall be of any effect whatsoever; provided, however, that any arrangements agreed upon by the Authorized Representatives within the limits of their authority, and consistent with this Agreement shall be binding upon the Parties. All changes to this Agreement shall be in writing and shall be signed by an officer of each Party.

19. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

20. NO DEDICATION OF FACILITIES

Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the

14

Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

21. SUCCESSORS AND ASSIGNS

21.1 This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties.

21.2 This Agreement may be assigned by Producer only (i) to a purchaser or co-owner of the Plant or to a person who will operate the Plant pursuant to a contract or other arrangement with such purchaser and in either case with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for the Plant or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 21.2 may be amended, modified or waived without the prior written consent of each and every Party to the Funding and Construction Agreement (except for any Parties in default thereunder.)

22. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

23. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the laws of the United States as applicable.

15

24. ARBITRATION

24.1 Any dispute arising out of or relating to this Agreement, or the breach thereof, which is not resolved by the Parties acting through their Authorized Representatives shall be settled by arbitration to the extent permitted by the laws applicable to the Parties; provided, however, that no Party to the dispute shall be bound to any greater extent than any other Party to the dispute. Arbitration shall not apply to any dispute or matter that is within the jurisdiction of any regulatory agency.

24.2 Any demand for arbitration shall be made by written notice to the other Party setting forth in adequate detail the nature of the dispute, the issues to be arbitrated, the amount or amounts, if any involved in the dispute, and the remedy sought. Within twenty (20) days from the receipt of such notice, the other Party may submit its own written statement of the dispute and may set forth in adequate detail any additional related matters or issues to be arbitrated.

24.3 Within thirty (30) days after delivery of the written notice demanding arbitration, the Parties acting through their Authorized Representatives shall meet for the purpose of selecting an arbitrator. The Parties may agree upon a single arbitrator, but in the event that they cannot agree, three arbitrators shall be used. Each Party shall designate one arbitrator, and the two arbitrators shall then select a third arbitrator. All arbitrators shall be persons skilled and experienced in the field in which the dispute has arisen and no person shall be eligible for appointment as an arbitrator who is or has been an officer or employee of either of the Parties or otherwise interested in the

16

matter to be arbitrated. Should either party refuse or neglect to appoint an arbitrator or to furnish the arbitrators with any papers or information demanded, the arbitrators are empowered, by both Parties, to proceed without the participation or assistance of that Party.

24.4 Except as otherwise provided in this Section, the arbitration shall be governed by the rules and practices of the American Arbitration Association, or a similar organization if the American Arbitration Association should not at the time exist.

24.5 Arbitration proceedings shall be held in Imperial, California, at a time and place to be selected by the arbitrators. The arbitrators shall hear evidence submitted by the Parties and may call for additional information which shall be furnished by the Party having such information. The arbitrators shall have no authority to call for information not related to the issues included in the dispute or to determine other issues not, in dispute.

24.6 If there is only one arbitrator, his decision shall be binding and conclusive on the Parties. If there are three arbitrators, the decision of any two shall be binding and conclusive. The decision of the arbitrators shall contain findings regarding the issues involved in the dispute, including the merits of the positions of the Parties, the materiality of any default, and the remedy or relief to which a Party shall be entitled. The arbitrators may not

grant any remedy or relief which is inconsistent with this Agreement, nor shall the arbitrators make findings or decide issues not in dispute.

17

24.7 The fees and expenses of the arbitrators shall be shared equally by the Parties, unless the decision of the arbitrator specifies some other apportionment. All other expenses and costs of the arbitration shall be borne by the Party incurring such expenses and costs.

24.8 Any decision or award granted by the arbitrators shall be final and judgement may be entered on it in any court of competent jurisdiction. This agreement to arbitrate shall be specifically enforceable.

25. ENTIRE AGREEMENT

25.1. The complete agreement of the Parties is set forth in this Agreement and all communications regarding subject interconnected operations whether oral or written, are hereby abrogated and withdrawn.

26. NOTICES

Any formal communication or notice in connection with this Agreement shall be in writing and shall be deemed properly given if delivered in person or sent first class mail, postage prepaid to the person specified below:

SECOND IMPERIAL GEOTHERMAL COMPANY

27. SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership, or joint venture, or impose a trust or partnership duty, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations under this Agreement.

28. SIGNATURE CLAUSE

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this 27th day of October, 1992.

EXHIBIT I - DEVELOPMENTS AND METHODOLOGIES FOR TRANSMISSION SERVICE CHARGES AND SCHEDULING FEE		
EXHIBIT II - TRANSMISSION SERVICE FOR THE SIGC POWER PLANT		

1. PARTIES: The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT ("IID"), organized under the Water Code of the State of California and SECOND IMPERIAL GEOTHERMAL COMPANY, a "Producer"), hereinafter referred to individually as "Party", and collectively as "Parties".

2. RECITALS: This Agreement is made with reference to the following facts, among others:

2.1 Producer has caused to be constructed or intends to construct an alternative energy resource facility located in IID's service area.

2.2 Producer and IID have entered into a Plant connection Agreement.

2.3 Producer desires to purchase, and IID desires to sell firm transmission service of power from the Plant to Edison's Mirage Substation subject to the terms and conditions specified herein.

2.4 Producer is in the process of arranging for an institutional lender to

finance Producer's construction of the aforementioned alternative energy resource facility. Such financing is expected to occur pursuant to a closing on or prior to November 30, 1992 ("Closing"). Simultaneously with Closing, or immediately thereafter, Producer will execute documentation necessary to become a party to the Funding and Construction Agreement, dated June 29, 1987, providing for the funding and construction of transmission lines within IID's service area. It is agreed that this Agreement shall not become effective until the execution of such Funding and Construction Agreement.

3. AGREEMENT: The Parties agree as follows:

4. DEFINITIONS: The following terms when used herein with initial capitalization, whether in the singular or plural, shall have the meanings specified:

1

4.1 Agreement: This IID-SIGC Transmission Service Agreement for Alternative Resources between Second Imperial Geothermal Company and IID, and all Exhibits attached hereto, as such Agreement may subsequently be amended for firm transmission service between the Plant and Edison's Mirage Substation.

4.2 Authorized Representative: The representative of a Party designated in accordance with Section 12.

4.3 Date of Initial Service: The date when the output from the Plant is first available for delivery to Edison, as notified to IID pursuant to Section 5.2.

4.4 Edison: Southern California Edison Company.

4.5 Funding and Construction Agreement: The Funding and construction Agreement dated June 29, 1987 entered into by IID and others, to which a form of this Agreement is attached as Exhibit 2.

4.6 Maximum Transmission Service Entitlement: The Maximum Transmission Service Entitlement for the Plant, as specified in Exhibit II and in any subsequent Plant Amendments.

4.7 Normal Transmission Capacity: The maximum transfer capability, expressed in megawatts (MW), from the Point of Receipt to the Point of Delivery. Such transfer capability, as determined by IID, in its sole judgment shall be consistent with prudent operating procedures and with generally-accepted engineering and operating practices in the electrical utility industry.

4.8 Operating Transmission Capability: The maximum transfer capability, expressed in megawatts (MW), available to IID at any given time to transmit power from Point of Receipt to Point of Delivery. Such transfer capability shall be as determined by IID in its sole judgment, may vary from time-to-time depending on system conditions, and shall be consistent with

2

prudent operating procedures and generally-accepted engineering and operating practices in the electrical utility industry.

4.9 Plant: An electrical generating alternative energy resource facility developed by Producer for which IID shall provide transmission service, as specified in Exhibit II and in any subsequent Plant Amendments.

4.10 Plant Amendment: An agreement reached by the Parties, as an amendment to this Agreement, for transmission service to be provided by IID for the Plant added by Producer or for Producer's account subsequent to the execution of this Agreement.

4.11 Plant Connection Agreement: An agreement between IID and Producer providing for the connection of the Plant to IID's electrical system, as specified in Exhibit II and in any subsequent Plant Amendments.

4.12 Point(s) of Delivery: The 230 kV switchrack at the Mirage Substation site where Edison's 230 kV facilities are attached to IID's 230 kV Coachella-Mirage Line or other points as may be mutually agreed upon by the Authorized Representatives.

4.13 Point of Receipt: The point on the high voltage side of the Plant's transformer where IID's metering equipment measures the delivery of energy to the IID system.

4.14 Transmission Service Entitlement: The amount of transmission service, expressed in megawatts (MW), provided by IID for the Plant, from the applicable Point of Receipt to the applicable Point(s) of Delivery.

5. TERM:

5.1 Unless otherwise agreed to by the Parties, this Agreement shall be effective on the date on which it is executed and shall remain in effect until thirty years after the Plant achieves Firm Operation, as such term is defined in Section 2.17 of the Power Purchase Contract dated

3

April 16, 1985, between Second Imperial Geothermal Company and Southern California Edison Company.

5.2 The Transmission Service Entitlement to be provided by IID for the Plant shall be contingent on a Plant Connection Agreement being in effect. Transmission service for the Plant shall commence on the Date of Initial Service of such Plant. Producer's Authorized Representative shall give IID's Authorized Representative written notice of the Date of Initial Service at least thirty (30) days before the Date of Initial Service.

6. TRANSMISSION SERVICE:

6.1 Subject to the terms of this Agreement, IID shall provide to Producer and Producer shall purchase from IID transmission service over IID's transmission system for the Plant. IID shall make arrangements with Edison to provide, at Producer's or Edison's expense, for the transfer of the electrical power to be delivered to Edison hereunder from IID's transmission system to Edison's transmission system at the Point(s) of Delivery.

6.2 The Transmission Service Entitlement for the Plant shall be the Maximum Transmission Service Entitlement for such Plant specified in Exhibit II or any subsequent Plant Amendments, or such lesser amount as may be established as follows. Beginning on the Date of Initial Service for the Plant, Producer shall be entitled to specify a Transmission Service Entitlement by Advance written notice given to IID's Authorized Representative at least thirty (30) days prior to the Date of Initial Service. The Transmission Service Entitlement to be provided by IID subsequent to the Date of Initial Service may be adjusted at six (6) month intervals thereafter until two (2) years after the Date of Initial Service for such Plant (the "Trial Period"). Such adjustments shall be made by having Producers' Authorized Representative give IID's Authorized Representative a ninety (90) day advance written notice as to the adjustment

4

required. Beginning two (2) years after the Date of Initial Service for such

Plant, Producer shall be entitled to specify a Transmission Service Entitlement for each successive 2-year period during the remaining term of this Agreement by written notice from Producer's Authorized Representative to IID's Authorized Representative given at least ninety (90) days prior to the beginning of each 2-year period.

6.3 The Transmission Service Entitlement selected by Producer for the Plant in accordance with Section 6.2 may be any amount which is less than or equal to the Maximum Transmission Service Entitlement for such Plant specified in Exhibit II or any subsequent Plant Amendments, provided, however, that the following shall apply to the Plant after the Trial Period for such Plant has elapsed.

6.3.1 If (i) the sum of the Transmission Service Entitlements for all Plants which are no longer in their Trial Periods is less than the sum of the Maximum Transmission Service Entitlements for such Plants, as shown in Exhibit II and in any subsequent Plant Amendments, (the "Aggregate Maximum Transmission Service Entitlement"), and (ii) provided that IID requires additional capacity for transmitting electric power to Edison's transmission system for another person (or, following the Credit Installment Period as defined in the Funding and Construction Agreement, for itself) and (iii) IID's use of such required capacity would be in conflict with Producer's right as provided herein to increase the sum of the Transmission Service Entitlements for such Plants to the Aggregate Maximum Transmission Service Entitlement, then IID shall so notify Producer in writing, specifying in such notice the portion, expressed in megawatts (MW), of the excess of the Maximum Transmission Service Entitlement over the Transmission Service Entitlement for each such Plant which it desires to use as stated above. Producer shall have ninety (90) days after receipt of IID's notice to notify IID in writing that it

5

desires to increase the Transmission Service Entitlements of such Plants. To the extent that Producer does not elect to increase the Transmission Service Entitlement of each such Plant up to the Maximum Transmission Service Entitlement for such Plant, IID shall be entitled to use such unclaimed capacity to satisfy the transmission requirements specified in its notice to Producer, and to the extent that IID does so, Producer shall thereafter be foreclosed from increasing the Transmission Service Entitlement for such Plant in a manner which would conflict with such usage by IID.

6.3.2 IID shall treat Producer and each other person who has entered into a transmission service agreement similar in substance to this Agreement in a fair and nondiscriminatory manner in requesting additional transmission capacity as provided in this Section 6.3. Without limiting the generality of the foregoing, IID shall request additional transmission capacity from Producer and such other persons on a pro rata basis, in proportion to the aggregate Maximum Transmission Service Entitlement for each person less the sum of the Transmission Service Entitlements for each of such persons' generating plants which is no longer in a Trial Period.

6.4 In the event that the Original Capacity Nomination designated by Producer (or the Participant associated with Producer) is adjusted pursuant to Section 3.07 of the Funding and Construction Agreement, the Parties agree to amend this Agreement in such a way that the sum of the Maximum Transmission Service Entitlements for all Plants hereunder is equal to such Original Capacity Nomination as so adjusted. As used in this Section 6.4, the terms Original capacity Nomination and participant shall have the meanings assigned to them in Article I of the funding and Construction Agreement.

6

6.5 IID reserves the right to interrupt or curtail the transmission service provided hereunder as follows:

6.5.1 If the Operating Transmission Capability is reduced to less than Normal Transmission Capacity from a Point of Receipt to a Point of Delivery, and when continuity of service within IID's service area is not being jeopardized, IID may curtail the transmission service currently being provided from such Point of Receipt to such Point of Delivery, to an amount "A" determined by the following formula:

$$A = \frac{\text{Operating Transmission Capability}}{\text{Normal Transmission Capacity}} \times \text{Transmission Service Entitlement}$$

The transmission service for each Plant affected shall be curtailed by multiplying the Transmission Service Entitlement in accordance with Exhibit II and in any subsequent Plant Amendments by the same percentage (expressed as a decimal as used in the determination of "A". However, any such curtailment shall occur only after IID has made all reasonable efforts to eliminate the cause of the reduction in Operating Transmission Capability, and IID shall then employ reasonable efforts to eliminate expeditiously the cause of said reduction.

6.5.2 If continuity of service within IID's control area is being jeopardized, as determined by IID in its sole judgment, IID may interrupt or curtail the transmission service provided hereunder to the extent necessary to avoid or eliminate such jeopardy; provided that (i) such interruptions or curtailments may be made so that IID may fully utilize all generating resources owned by it or available to it under contract in order to avoid damage to IID's electrical system caused by overloading, (ii) such interruption or curtailment shall occur only after IID has made all reasonable efforts to avoid or eliminate such jeopardy and (iii) to the extent feasible any curtailment of transmission service provided hereunder from a Point of Receipt to a Point of Delivery shall be made in accordance with the formula set forth in Section 6.5.1.

7

6.6 If IID's efforts do not avoid or eliminate such jeopardy, the Parties shall endeavor to develop some other arrangement to avoid or eliminate such jeopardy and minimize the effects of IID's interruption or curtailment on both parties.

6.7 In the event of any curtailments or interruptions made pursuant to Section 6.5.1 or Section 6.5.2, Producer shall, immediately after being orally notified by IID, reduce the electrical output of the Plants by the amounts requested by IID.

6.8 The transmission service to be provided by IID and purchased by Producer for each Plant shall not exceed the Transmission Service Entitlement for that Plant.

6.9 Subject to Section 6.5, IID shall, during the periods that IID has agreed to provide the transmission service at the specified Transmission Service Entitlements, accept hourly scheduled energy deliveries at each Point of Receipt and simultaneously deliver the same amount of energy (less transmission losses as provided herein) at the Point(s) of Delivery mutually agreed upon by the Parties' dispatchers and/or schedulers.

6.10 Hourly scheduled energy deliveries at each Point of Receipt shall conform with the practices and procedures developed by the Parties dispatchers and schedulers and agreed to by the Authorized Representatives.

7. TRANSMISSION LOSSES:

7.1 IID shall determine, by transmission power flow analysis, the

electrical losses (expressed as a percent amount of hourly scheduled energy deliveries) associated with the electrical output from each Plant. Such analysis shall be performed by IID at its sole expense. The initial percent amount, for each Plant, representing the electrical losses as determined herein shall be as specified in Exhibit II and in any subsequent Plant Amendments.

8

7.2 Unless otherwise agreed to by Producer's and IID's schedulers and dispatchers, IID shall reduce the amount of all hourly scheduled energy deliveries for Producer or Producer's account by the percent amount of such hourly deliveries for each Plant in accordance with Exhibit II and in any subsequent Plant Amendments.

7.3 If either Party believes that there has been a significant change in IID's electrical system and the electrical losses associated with any Plant should be redetermined, either Party's Authorized Representative may submit a written request to the other Party's Authorized Representative that the electrical losses be redetermined. Following such request, a transmission flow analysis shall be performed by IID as approved by the Authorized Representatives and paid for by the requesting Party. Whenever the percent amount for electrical losses is redetermined, such percent amount shall become effective as of the first day of the month following the date of such redetermination; provided, that such a redetermination may be no sooner than twelve (12) months after the most recent redetermination. My redetermination of electrical losses made pursuant to this Section 7 shall be based on conditions in existence at the time of such redetermination.

7.4 Along with the monthly billing pursuant to Section 9.1, for the transmission service for each Plant, IID shall submit a monthly summary of hourly scheduled energy deliveries and of electrical losses for each Plant.

8. CHARGES:

8.1 For transmission service provided by IID, Producer shall pay IID at a rate to be determined by IID pursuant to the methodologies specified in Exhibit I. The initial rate is specified in Exhibit I-A and revisions thereto will be specified in any subsequent Plant Amendments. Any specific facility charge to Producer for connecting the Plant(s) to the IID

9

transmission system shall be included only in the Plant Connection Agreement(s) between IID and Producer.

8.2 The transmission rate shall be reviewed annually and may be revised. Any revision of the rates shall be based on the methodologies in Exhibit I.A and on the conditions in existence at the time of the revision. Producer shall have the right to review any exhibits or work papers prepared by IID to revise the rates.

8.3 An initial monthly scheduling fee, as specified in Exhibit II and revisions thereto specified in any subsequent Plant Amendments, shall be paid by Producer to IID for those months in which there were scheduled energy deliveries from the Plant. The initial scheduling fee has been determined by IID pursuant to the methodology specified in Exhibit I.B. The scheduling fee shall be reviewed annually and may be revised. Any revision of the scheduling fee shall be based on the methodology in Exhibit I.B and on the conditions in existence at the time of the revision. Producer shall have the right to review any exhibits or work papers prepared by IID to revise the scheduling fee.

9. BILLING AND PAYMENT:

9.1 IID shall render bills to Producer, beginning in the month of the Date of Initial Service, on or before the fifteenth (15th) day of each month for the transmission service to be provided during the month. Producer shall pay such bills within twenty (20) days after receipt thereof.

All payments by Producer shall be sent to:

Imperial Irrigation District
c/o Manager, Finance & Accounting
P.O. Box 937
Imperial, CA 92251

All billings by IID shall be sent to

10

Second Imperial Geothermal Company
343 Second Street, Suite N
Los Altos, CA 94022

9.2 Either Party's Authorized Representative may at any time, by advance written notice to the other Party's Authorized Representative, change the address to which payments or billings shall be sent.

9.3 Bills which are not paid in full by said due date shall thereafter bear an additional charge of one and one-half percent (1-1/2%) per month, or the maximum legal rate of interest, whichever is less, compounded monthly on the unpaid amount prorated by days from the due date until payment is received by IID.

9.4 In the event any portion of any bill is disputed, the disputed amount shall be paid when due under protest. If the protested portion of the payment is found to be incorrect by the Authorized Representatives, the dispute amount shall be paid by IID to Producer, including interest at the rate of 1-1/2% per month, or the maximum legal rate, whichever is less, compounded monthly from the date of payment by Producer to the date the refund check or adjusted bill is received by Producer.

9.5 For a fractional part of a calendar month at the beginning or end of the period for which the transmission service is provided hereunder, the charge pursuant to Section 8.1 shall be proportionately adjusted by the ratio of days that service is furnished by IID to Producer during such month to the total number of days in such month.

9.6 The charge for the transmission service pursuant to Section 8.1 shall be proportionately reduced to the extent the duration of the interruptions or curtailments of the transmission service which may concur pursuant to Section 6.5.1 or Section 6.5.2 exceed a cumulative total of twenty-four (24) hours during any calendar month based on 730 hours per month representing the full transmission service charge. The amount of such pro rata reduction

11

in any month shall reflect the duration and amount of such interruptions or curtailments which exceed said cumulative 24 hours. Such pro rata reduction shall be reflected as a credit to Producer as soon as possible in a subsequent monthly bill.

9.7 The charge for the transmission service shall not be reduced if IID can deliver, but Edison's transmission system cannot receive, the hourly scheduled energy deliveries independent of the duration of time this condition exists.

10. LIABILITY

10.1 Except for any loss, damage, claim, costs, charge or expanse resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

10.2 For the purpose of this Section 10, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

12

10.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

10.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

10.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

10.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

10.4 The phrase "employees having management or administrative responsibility," as used in Section 10.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

10.5 Subject to the foregoing provisions of this Section 16, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

13

11. AUDITING:

11.1 IID shall make its books, records, and other supporting information, as requested, available to Producer or to Producer's designated contracted representative(s) with a CPA firm, for the purpose of auditing any charges or

accounts to be kept by IID hereunder. All such audits shall be undertaken at reasonable times and in conformance with generally-accepted auditing standards.

11.2 If as a result of such audits Producer believes its charges or accounts should be adjusted, the findings shall be presented to the Authorized Representatives. If the Authorized Representatives agree that any audit finding should result in a revision of charges or accounts, such revisions shall be retroactive to the first billing for such charges and accounts and shall be made as soon as practical after determination.

11.3 The amount of any unresolved dispute shall accrue interest at the rate of one and one-half percent (1-1/2%) per month, or the maximum legal rate, whichever is less, compounded monthly for any amount of money ultimately refunded to Producer.

12. AUTHORIZED REPRESENTATIVES: Within thirty (30) calendar days after the Completion Date, as defined in Article I of the Funding and Construction Agreement, each Party shall designate by written notice to the other Party a representative who is authorized to act on its behalf in the implementation of this Agreement. Either Party may at any time change the designation of its Authorized Representative by written notice to the other Party.

13. NO DEDICATION OF FACILITIES: Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the Party to the public or to the other Party, and it is understood and agreed

14

that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

14. NON-WAIVER: None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

15. NO THIRD PARTY RIGHTS: The Parties do not intend to create rights in or to grant remedies to any Third Party or others as a beneficiary of this Agreement or of any duty, covenant, obligation or undertaking established hereunder.

16. UNCONTROLLABLE FORCES: Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, the failure or inability of Edison to receive the electric power to be transmitted hereunder at the Point(s) of Delivery, which by exercise of due diligence such

15

Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

17. ASSIGNMENTS:

17.1 Any assignment by Producer of its interest in this Agreement which is made without the written consent of IID (which shall not be unreasonably withheld) shall not relieve Producer from its primary liability for any of its duties and obligations hereunder, and in the event of any such assignment Producer shall continue to remain primarily liable for payment of any and all money due IID hereunder and for the performance and observance of all other covenants, duties and obligations to be performed and observed hereunder by it to the same extent as though no assignment has been made.

17.2 Notwithstanding any provision of Section 17.1 to the contrary, prior to the end of the Credit Installment Period, as defined in Article I of the Funding and Construction Agreement, Producer's right to transmission service under this Agreement with respect to the Plant may be assigned only (i) to a purchaser or co-owner of such Plant or to a person who will operate such plants pursuant to a contract or other arrangement with such purchaser and in either case only with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for such Plant or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 17.2 may be amended, modified or waived without the prior written consent of each and

16

every party to the Funding and Construction Agreement (except for any parties in default thereunder).

17.3 Whenever an assignment of Producer's interest in this Agreement is made with the written consent of IID, Producer's assignee shall expressly assume in writing the duties and obligations hereunder of Producer and, within thirty (30) days after any such assignment and assumption of duties and obligations, Producer shall furnish or cause to be furnished to IID a true and correct copy of such assignment and assumption of duties and obligations.

17.4 Subject to the foregoing restrictions on assignments, all of the terms of this Agreement shall be binding upon and inure to the benefit of both of the Parties and their respective successors, permitted assigns and legal representatives.

18. GOVERNING LAW: This Agreement shall be interpreted, governed by and construed under the laws of the State of California or the laws of the United States, as applicable.

19. NOTICES: Any notice, demand or request provided for in this Agreement, or served, given or made in connection with it, shall be in writing and shall be deemed properly served, given or made if delivered in person or sent by United States mail, postage prepaid, to the persons specified below unless otherwise provided for in this Agreement:

IMPERIAL IRRIGATION DISTRICT
c/o General Manager
P.O. Box 937
Imperial, California 92251

SECOND IMPERIAL GEOTHERMAL PLANT

343 Second Street, Suite N
Los Altos, CA 94022

Either Party may at any time, by notice to the other Party, change the designation or address of the person so specified as the one to receive notices pursuant to this Agreement.

20. SIGNATURE CLAUSE

17

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this 27th day of October, 1992.

1. PARTIES

The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT (IID), an irrigation district organized and operating under the laws of the State of California and ORMESA GEOTHERMAL (ORMESA), a California Partnership (hereinafter individually Party, collectively Parties).

2. RECITALS

2.1 ORMESA owns and operates a geothermal generating facility with a maximum 24 megawatt net output at the East Mesa Known Geothermal Resource Area (KGRA) and sells the Plant electrical output to Southern California Edison Company (SCE).

2.2 SCE has entered into the Power Purchase Agreement dated July 18, 1984, (Purchase Agreement) with ORMESA to purchase all the electrical output from the Plant.

2.3 SCE and ORMESA agree that the terms and conditions regarding transmission of the Plant's Energy to an IID/SCE point of interconnection shall be pursuant to the IID-Edison Transmission Service Agreement for Alternate Resources between IID and SCE of September 10, 1985.

2.4 Since the Plant has been built in the IID service territory, it will be convenient to connect the Plant to the IID electric system.

ORMESA hereby grants the IID the right to enter the Plant site for any reasonable purposes connected with this Agreement, by previous arrangements with the Plant manager. Those reasonable purposes included maintenance and repairs to IID equipment in ORMESA facilities, observing tests of said facilities, reading of kilowatt-hour meters, and the like.

2.5 ORMESA desires to purchase and IID desires to sell the electrical energy necessary to satisfy the operation and maintenance power consumption requirements of the Plant for the life of the Plant that is not normally generated by the Plant itself, or portable generating equipment.

2.6 The Parties desire, by means of this Agreement, to interconnect the Plant to the IID electrical system and to establish the terms, conditions and obligations of the parties relating to such interconnection.

3. AGREEMENT

The Parties agree as follows:

4. DEFINITIONS

4.1 Authorized Representative: The representative of a Party designated in accordance with Section 13.

4.2 Energy: Electric energy in excess of ORMESA's electric energy requirements, expressed in kilowatt-hours, generated by the Plant and measured and delivered to the Point of Delivery.

4.3 Operation Date: The day on which the Plant Energy is accepted by IID for SCE's account.

4.4 Plant: A maximum of 24 MW net output geothermal generating facility owned by ORMESA including all associated equipment and improvements necessary for generating electric energy and transmitting it to the high voltage side of the power transformer.

4.5 Point of Delivery: The point on the high voltage side of ORMESA's switchyard where IID's metering equipment measures the delivery of Energy to the IID system as shown on Exhibit "B".

4.6 System Emergency: A condition of IID's system which is likely to result in imminent significant disruption of service to customers or is imminently likely to endanger life or property.

5. EFFECTIVE DATE AND TERM

This Agreement shall become effective when signed by the Parties and shall terminate

at the earlier of (i) midnight December 31, 2015, or (ii) at the option of the IID, at the termination of a twenty-four (24) month period during which the Plant has failed to operate continuously, or (iii) the date agreed to by the Authorized Representatives.

6. CONNECTION OF PLANT

6.1 ORMESA may electrically connect its Plant, in accordance with the provisions of this Agreement, so that it can operate in parallel with the IID electric system.

6.2 Notwithstanding the provision that ORMESA has furnished the high voltage switchyard complete, including the high voltage oil circuit breakers and disconnect switches, the control of the high voltage oil circuit breakers and disconnect switches shall be under the control of the IID dispatcher.

7. ELECTRIC SERVICE TO ORMESA

IID shall provide electric service to ORMESA pursuant to Section 12.

8. METERING OF ENERGY DELIVERIES

Metering for electric service to ORMESA and for energy deliveries by ORMESA to IID for SCE's account shall be at the Point of Delivery as shown on Exhibit "B". Four meters shall be installed which shall measure and record flows in each direction as shown on Exhibit "B".

9. ORMESA DELIVERY AND IID ACCEPTANCE OF ENERGY FROM PLANT

Whenever electric output from the Plant exceeds ORMESA's power requirements, ORMESA shall deliver all such excess output to IID for the account of SCE and IID shall accept such output for the account of SCE and deliver such output to SCE pursuant to transmission service agreement to be entered into between Southern California Edison Company and Imperial Irrigation District.

10. ORMESA'S GENERAL OBLIGATIONS

ORMESA shall:

10.1 Operate the Plant in a manner consistent with applicable electric

utility industry standards, good engineering practice, and without degradation of quality or reliability of service to IID customers.

10.2 Deliver the Plant's net electrical output to IID for the account of SCE at the Point of Delivery.

10.3 Each Party shall provide the reactive K----- volt-ampere (KVA) requirements of its own system so that there will be no interchange of reactive KVA between systems. The Parties shall cooperate to control the flow of reactive KVA to prevent the introduction of objectionable operating conditions on the system of either Party.

10.4 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of the Plant with IID.

10.5 Give IID a written schedule on or before June 1, and December 1, each year of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each month of the succeeding twelve-month (12) period commencing July 1, and January 1.

10.6 Give IID a written schedule on or before the fifteenth (15th) day of each month of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each day of the succeeding calendar month.

10.7 Give IID a schedule on or before 12:01p.m . on Tuesday of each seven-day (7) period of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each hour of the succeeding seven-day (7) period commencing at 12:01 a.m. on the following Monday; provided, however, that if any changes in the

hourly deliveries so scheduled become necessary, ORMESA shall notify IID of such changes as far in advance as possible.

10.8 Provide IID any reasonable rights-of-way and access required for testing and reading of meters by previous arrangement with the Plant manager.

10.9 When IID determines that it is necessary to utilize the transmission capability being utilized by ORMESA to meet IID's load requirements,

a) pay its pro-rata share of the total costs associated with extensions or upgrades of IID's existing system and/or a new system required for delivery of ORMESA's power, or

b) arrange for transmission capability exclusive of IID. In any event, IID will give ORMESA 60 months written notice of such determination.

10.10 Carry out the directions of the Authorized Representatives with respect to the matters set forth in this Agreement.

11. IID'S GENERAL OBLIGATIONS

11.1 Accept the Plant's net electrical output for the account of SCE at the Point of Delivery and concurrently delivery an equal amount of electric energy to the SCE system at IID/SCE point(s) of interconnection.

11.2 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of IID transmission facilities with ORMESA and notify ORMESA of any changes as far in advance as possible.

11.3 Carry out the directions of the Authorized Representative with respect to the matters set forth in this Agreement.

11.4 Operate its system in a manner consistent with applicable utility industry standards and good engineering practices.

12. BILLING

12.1 IID shall read the meters monthly according to its regular meter reading schedule beginning no more than thirty (30) days after the date that electric energy is first supplied to ORMESA. IID monthly shall send ORMESA within ten (10) working days after the meter is read a bill for electric service. ORMESA shall pay IID the total amount billed within thirty (30) days of receipt of the bill.

12.2 IID shall bill ORMESA for ORMESA's consumption of energy from IID's resources in accordance with Rate Schedule A-2, as it may be revised from time to time. Copy of current Rate Schedule A-2, is attached as Exhibit "A".

12.3 If ORMESA disputes a bill, payment shall be made as if no dispute exists pending resolution of the dispute by the Authorized Representatives. If the bill is determined to be in error, the disputed amount shall be refunded by IID including interest at the rate of one and one-half percent (1-1/2%) per month, compounded monthly, from the date of payment to the date the refund check or adjusted bill is mailed.

13. AUTHORIZED REPRESENTATIVES

13.1 Within thirty (30) days after the date this Agreement is signed, each Party shall designate, by written notice to the other Party, an Authorized Representative who is authorized to act in its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities of the Authorized Representatives. Either Party may, at any time, change the designation of its Authorized Representative by written notice to the other Party.

13.2 IID's Authorized Representative shall develop detailed written procedures necessary and convenient to administer this Agreement within six (6) months after the date signed. Such procedures shall be submitted to ORMESA Authorized Representative for review, comment,

discussion and concurrence before they are put into effect. Such procedures shall include, without limitation: (i) communication between ORMESA and IID's electric system dispatcher with regard to daily operating matters, (ii) billing and payments, (iii) specified equipment tests, and (iv) operating matters which affect or may affect quality and reliability of service to electric customers and continuity of delivers to SCE.

13.3 The Authorized Representative shall have no authority to modify any of the provisions of this Agreement.

14. METERS

14.1 All meters shall be sealed and the seal shall be broken only upon occasions when the meters are to be inspected, tested or adjusted.

14.2 IID shall inspect and test all meters upon their installation and at least once every year thereafter. If requested to do so by ORMESA, IID shall inspect or test a meter more frequently than every year, but the expense of such inspection or test shall be paid by ORMESA unless the meter is found to register inaccurately by more than two percent (2%) from the measurement made by a standard meter. Each Party shall give reasonable notice to the other Party of the time when any inspection or test shall take place and that Party may have

representatives present at the test or inspections. If a meter is found to be inaccurate or defective, it shall be adjusted, repaired or replaced in order to provide accurate metering. All adjustments due to inaccurate meters shall be limited to the preceding six (6) months.

14.3 If a meter fails to register, or if the measurement made by a meter during a test varies by more than two percent (2%) from the measurement made by the standard meter used in the test, adjustment shall be made correcting all measurements made by the inaccurate meter for:

- (i) the actual period during which inaccurate measurements were made, if the period can be determined, or if not,
- (ii) the period immediately preceding the test of the meter equal the one-half (1/2) the time from the date of the last previous test of the meter; provided, however, that the period covered by the correction shall not exceed six (6) months.,

14.4 ORMESA shall telemeter information to IID's new dispatch center regarding the kilowatts, kilowatt-hours, kilovars and kilovar-hours delivered to or received from IID at the Point of Delivery over phone line leased by ORMESA.

IID shall purchase, own and shall design, install, operate, maintain, or cause to be designed, installed, operated, and maintained, equipment to automatically transmit from the Plant to IID's new dispatch center continuous values of Plant output expressed as megawatts, megavars and megawatt-hours. IID may thereupon bill and ORMESA shall promptly pay IID's cost of design, purchase and installation of said equipment which cost is estimated to be \$35,000.00. ORMESA shall have the right to audit IID's records and accounts to verify the cost of said equipment.

15. CONTINUITY OF SERVICE

IID shall not be obligated to accept and IID may require ORMESA to temporarily curtail, interrupt or reduce deliveries of energy upon advance notice to ORMESA, when such curtailment, interruption or reduction is required in order for IID to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its system or if IID determines that such curtailment, interruption or reduction is necessary because of a System Emergency, forces outages or abnormal operating conditions on its system. IID shall use reasonable efforts to

keep interruptions and curtailments to a minimum time.

16. LIABILITY

16.1 Neither Party shall hold the other Party, its officers, agents or employees liable for any loss, damage, claim, cost, or expense for loss of or damage to property, or injury or death of persons, which arises out of the first Party's ownership, operation or maintenance of facilities on its own side of the Point of Delivery, except as provided in Section 16.2.

16.2 Each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to or breach of or default under this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or willful misconduct.

17. UNCONTROLLABLE FORCE

Neither Party shall be considered to be in default with respect to any obligation hereunder, other than the obligations to pay money, if prevented from fulfilling such obligation by reason of an uncontrollable force. The term "uncontrollable force" means any cause beyond the control of the Party affected, including, but not limited to, failure or threat of imminent failure of facilities, flood, earthquake, storm, lighting, fire, epidemic, war, riot, civil disturbance, sabotage and restraint by court or public authority, which by exercise of due diligence and foresight could not reasonably have been avoided. Whichever Party is rendered unable to fulfill any obligation by reason of uncontrollable forces shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch. Nothing in this Agreement shall require a Party to settle any strike or labor dispute in which it is involved.

18. INTEGRATION AND AMENDMENTS

This Agreement constitutes the entire agreement between the Parties relating to the interconnection of ORMESA's Plant to IID's electric system, the acceptance of energy by IID from ORMESA and the providing of the electric service by IID. No oral agreement or prior written agreement between the Parties shall be of any effect whatsoever; provided, however, that any arrangements agreed upon by the Authorized Representatives within the limits of their authority, and consistent with this Agreement shall be binding upon the Parties. All changes to this Agreement shall be in writing and shall be signed by an officer of each Party.

19. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

20. NO DEDICATION OF FACILITIES

Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

21. SUCCESSORS AND ASSIGNS

21.1 This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties.

21.2 No assignment of this Agreement, or any part thereof, by either Party shall be

valid unless approved in writing in advance by the other Party. Such approval of assignment shall not be unreasonably withheld.

22. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

23. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the laws of the United States, as applicable.

24. ARBITRATION

24.1 Any dispute arising out of or relating to this Agreement, or the breach thereof, which is not resolved by the Parties acting through their Authorized Representatives shall be settled by arbitration to the extent permitted by the laws applicable to the Parties; provided, however, that no Party to the dispute shall be bound to any greater extent than any other Party to the dispute. Arbitration shall not apply to any dispute or matter that is within the jurisdiction of any regulatory agency.

24.2 Any demand for arbitration shall be made by written notice to the other Party setting forth in adequate detail the nature of the dispute, the issues to be arbitrated, the amount or amounts, if any, involved in the dispute, and the remedy sought. Within twenty (20) days from the receipt of such notice, the other Party may submit its own written statement of the dispute and may set forth in adequate detail any additional related matters or issues to be arbitrated.

24.3 Within thirty (30) days after delivery of the written notice demanding arbitration, the Parties acting through their Authorized Representatives shall meet for the purpose of selecting an arbitrator. The Parties may agree upon a single arbitrator, but in the event that they cannot agree, three arbitrators shall be used. Each Party shall designate one arbitrator, and the two

arbitrators shall then select a third arbitrator. All arbitrators shall be persons skilled and experienced in the field in which the dispute has arisen and no person shall be eligible for appointment as an arbitrator who is or has been an officer or employee of either of the Parties or otherwise interested in the matter to be arbitrated. Should either party refuse or neglect to appoint an arbitrator or to furnish the arbitrators with any papers or information demanded, the arbitrators are empowered, by both Parties, to proceed without the participation or assistance of that Party.

24.4 Except as otherwise provided in this Section, the arbitration shall be governed by the rules and practices of the American Arbitration Association, or a similar organization if the American Arbitration Association should not at the time exist.

24.5 Arbitration proceedings shall be held in Imperial, California, at a time and place to be selected by the arbitrators. The arbitrators shall hear evidence submitted by the Parties and may call for additional information which shall be furnished by the Party having such information. The arbitrators shall have no authority to call for information not related to the issues included in the dispute or to determine other issues not in dispute.

24.6 If there is only one arbitrator, his decision shall be binding and conclusive on the Parties. If there are three arbitrators, the decision of any two shall be binding and conclusive. The decision of the arbitrators shall contain findings regarding the issues involved in the dispute, including the merits of the positions of the Parties, the materiality of any default, and the remedy or relief to which a Party shall be entitled. The arbitrators may not grant any remedy or relief which is inconsistent with this Agreement, nor shall the arbitrators make findings or decide issues not in dispute.

24.7 The fees and expenses of the arbitrators shall be shared equally by the Parties, unless the decision of the arbitrators specifies some other apportionment. All other expenses and costs of the arbitration shall be borne by the Party incurring such expenses and costs.

24.8 Any decision or award granted by the arbitrators shall be final and judgement may be entered on it in any court of competent jurisdiction. This agreement to arbitrate shall be specifically enforceable

25, ENTIRE AGREEMENT

25.1 The complete agreement of the Parties is set forth in this Agreement and all communications regarding subject interconnected operations whether oral or written, are hereby abrogated and withdrawn.

25.2 IID shall not amend the IID-Edison Transmission Service Agreement for Alternate Resources between IID and SCE of September 10, 1985 to the extent that any such amendment shall apply to the Plant without the prior written consent of ORMESA.

25.3 Notwithstanding any other provision of the Agreement, if IID has or hereinafter enters into any plant connection agreement with any alternate resource developer, which agreement contains terms more favorable to that developer than the terms extended to ORMESA, IID shall, within thirty (30) days following execution of such an agreement, modify this Agreement content with those more favorable terms.

26. NOTICES

Any formal communication or notice in connection with this Agreement shall be in writing and shall be deemed properly given if delivered in person or sent first class mail, postage prepaid to the person specified below:

ORMESA GEOTHERMAL

27. SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership, or joint venture, or impose a trust or partnership duty, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations under this Agreement.

28. SIGNATURE CLAUSE

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this 1st day of October, 1985.

1. PARTIES

The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT ("IID"), organized under the Water Code of the State of California and ORMESA IE ("Producer"), hereinafter referred to individually as "Party", and collectively as "Parties".

2. RECITALS

2.1 Producer intends to construct and operate, as owner or lessee, a generating facility with a maximum 9 megawatt net operating capacity at the East Mesa (KGRA), Imperial County, California, and to sell the Plant electrical output to Southern California Edison Company ("SCE").

2.2 SCE entered into the Power Purchase Agreement dated July 18, 1984 ("Purchase Agreement"), with Republic Geothermal, Inc. ("Republic"). Republic assigned the Power Purchase Contract to Ormat Systems, Inc. on November 6, 1984 to which assignment SCE consented on December 19, 1984. Ormat Systems, Inc. assigned the Power Purchase Contract to Owners Geothermal on February 27, 1985 to which assignment SCE consented on July 22, 1985.

2.3 SCE and Producer agree that the terms and conditions regarding transmission of the Plant's Energy to an IID/SCE point of interconnection shall be pursuant to a Transmission Service Agreement to be entered into between IID and Ormesa Geothermal.

2.4 Since the Plant will be built in the IID service territory, it will be convenient to connect the Plant to the IID electric system.

Producer hereby grants the IID the right to enter the Plant site for any reasonable purposes connected with this Agreement, by previous arrangements with the Plant manager. Those reasonable purposes include maintenance and repairs to IID equipment in Producer's facilities, observing tests of said facilities, reading of kilowatt-hour meters, and the like.

2.5 Producer desires to purchase and IID desires to sell the electrical energy necessary to satisfy the operation and maintenance power consumption requirements of the Plant for the life of the Plant that is not normally generated by the Plant itself, or portable generating equipment.

2.6 The Parties desire, by means of this Agreement, to interconnect the Plant to the IID electrical system and to establish the terms, conditions and obligations of the Parties relating to such interconnection.

3. AGREEMENT

The Parties agree as follows:

4. DEFINITIONS

4.1 Agreement: This Plant Connection Agreement between IID and Producer, and all Exhibits hereto, as may be amended from time to time.

4.2 Authorized Representative: The representative of a Party designated in accordance with Section 13.

4.3 Energy: Electric energy in excess of Producer's electric energy requirements, expressed in kilowatt-hours, generated by the Plant and measured and delivered to the Point of Delivery.

4.4 Funding and Construction Agreement: An agreement entered into by IID and others dated June 29, 1987, providing for the funding and construction of the Heber-Mirage Transmission Project, to which a form of this Agreement is attached as Exhibit C.

4.5 Operation Date: The day on which the Plant Energy is first accepted by IID for delivery to SCE.

4.6 Plant: A maximum of 9 MW net operating capacity Geothermal facility operated by Producer, as owner or lessee, including all associated equipment and improvements necessary for generating electric energy and transmitting it to the high voltage side of the power transformer.

4.7 Point of Delivery: The point on the high voltage side of Producer's switchyard where IID's metering equipment measures the delivery of Energy to the IID system as shown on Exhibit "B".

4.8 System Emergency: A condition on IID'S system which is likely to result in imminent significant disruption of service to customers or is imminently likely to endanger life or property.

5. EFFECTIVE DATE AND TERM

This Agreement shall become effective upon the Operation Date of the Plant, and shall remain in effect until the earlier of (i) October 12, 2017, or (ii) thirty six (36) months from the date the Plant has ceased to operate at the option of IID. It is understood that (i) if the Completion Date, as the term Completion Date is defined In Article I of Funding and Construction Agreement does not occur, or (ii) if the Operation Date does not occur within five (5) years after the date this Agreement was executed, this Agreement shall be of no force or effect.

6. CONNECTION OF PLANT

6.1 Producer may electrically connect its Plant, in accordance with the provisions of this Agreement, so that it can operate in parallel with the IID electric system. Parallel operation will not commence until IID has inspected and approved the interconnection facilities and operational procedures.

6.2 Notwithstanding the provision that Producer has furnished the high voltage switchyard complete, including the high voltage oil circuit breakers and disconnect switches, the control of the high voltage oil circuit breakers and disconnect switches shall be under the control of the IID dispatcher.

2

7. ELECTRIC SERVICE TO PRODUCER

IID shall provide electric service to Producer pursuant to Section 12.

8. METERING OF ENERGY DELIVERIES

Metering for electric service to Producer and for energy deliveries by Producer to IID for delivery to SCE shall be at the Point of Delivery as shown on Exhibit "B." Four meters shall be installed which shall measure and record flows in each direction as shown on Exhibit "B."

9. PRODUCER'S DELIVERY AND IID ACCEPTANCE OF ENERGY FROM PLANT

Whenever electric output from the Plant exceeds Producer's power requirements, Producer shall deliver all such excess output to IID for delivery to SCE and IID shall accept such output for delivery to SCE and deliver such output to SCE pursuant to a transmission service agreement to be entered into between Ormesa Geothermal and IID.

10. PRODUCER'S GENERAL OBLIGATIONS

Producer shall:

10.1 Operate the Plant in a manner consistent with applicable electric utility industry standards, good engineering practice, and without degradation of quality or reliability of service to IID customers.

10.2 Deliver the Plant's net electrical output to IID for the account of SCE at the Point of Delivery.

10.3 Each Party shall provide the reactive kilovolt-ampere (KVA) requirements of its own system so that there will be no interchange of reactive KVA between systems. The Parties shall cooperate to control the flow of reactive KVA to prevent the introduction of objectionable operating conditions on the system of either Party.

10.4 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of the Plant with IID.

10.5 Give IID a written schedule on or before June 1, and December 1, each year of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each month of the succeeding twelve-month (12) period commencing July 1, and January 1.

10.6 Give IID a written schedule on or before the fifteenth (15th) day of each month of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each day of the succeeding calendar month.

10.7 Give IID a schedule on or before 12:01 p.m. on Tuesday of each seven-day (7) period of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each hour of the succeeding seven-day (7) period

3

commencing at 12:01 a.m. on the following Monday; provided, however, that if any changes in the hourly deliveries so scheduled become necessary, Producer shall notify IID of such changes as far in advance as possible.

10.8 Provide IID any reasonable rights-of-way and access required for testing and reading of meters by previous arrangement with the Plant manager.

10.9 Carry out the directions of the Authorized Representatives with respect to the matters set forth in this Agreement.

11. IID'S GENERAL OBLIGATIONS

IID shall:

11.1 Design, acquire, construct, operate and maintain, or cause to be designed, acquired, constructed, operated and maintained, and shall own, a connecting transmission line between IID's transmission system and the Plant. Following the completion of such line, IID may bill and Producer shall pay IID's costs of designing, acquiring and constructing such line. Producer shall have the right to audit IID's records and accounts to verify the cost of such line.

11.2 Accept the Plant's net electrical output for the account of SCE at the Point of Delivery and simultaneously deliver an equal amount of electric energy (less applicable transmission losses) to the SCE system at IID/SCE point(s) of interconnection.

11.3 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of IID transmission facilities with Producer and notify Producer of any changes as far in advance as possible.

11.4 Carry out the directions of the Authorized Representative with respect to the matters set forth in this Agreement.

11.5 Operate its system in a manner consistent with applicable utility industry standards and good engineering practices.

12. BILLING

12.1 IID shall read the meters monthly according to its regular meter reading schedule beginning no more than thirty (30) days after the date that electric energy is first supplied to Producer. IID monthly shall send Producer within ten (10) working days after the meter is read a bill for electric service. Producer shall pay IID the total amount billed within thirty (30) days of receipt of the bill.

12.2 IID shall bill Producer for Producer's consumption of energy from IID's resources in accordance with Rate Schedule GL or Rate Schedule A-2, as applicable, as it may be revised from time to time. Copies of current Rate Schedule GL and current Rate Schedule A-2 are attached as Exhibit "A."

4

12.3 If Producer disputes a bill, payment shall be made as if no dispute existed pending resolution of the dispute by the Authorized Representatives. If the bill is determined to be in error, the disputed amount shall be refunded by IID including interest at the rate of one and one-half percent (1 1/2%) per month, compounded monthly, from the date of payment to the date the refund check or adjusted bill is mailed.

13. AUTHORIZED REPRESENTATIVES

13.1 Within thirty (30) days after the date this Agreement is signed, each Party shall designate, by written notice to the other Party, an Authorized Representative who is authorized to act in its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities for the Authorized Representatives. Either Party may, at any time, change the designation of its Authorized Representative by written notice to the other Party.

13.2 IID's Authorized Representative shall develop detailed written procedures necessary and convenient to administer this Agreement within six (6) months after the date signed. Such procedures shall be submitted to Producer's Authorized Representative for review, comment, discussion and concurrence before they are put into effect. Such procedures shall include, without limitation: (i) communication between Producer and IID's electric system dispatcher with regard to daily operating matters, (ii) billing and payments, (iii) specified equipment tests, and (iv) operating matters which affect or may affect quality and reliability of service to electric customers and continuity of deliveries to SCE.

13.3 The Authorized Representative shall have no authority to modify any of the provisions of this Agreement.

14. METERS

14.1 All meters shall be sealed and the seal shall be broken only upon occasions when the meters are to be inspected, tested or adjusted.

14.2 IID shall inspect and test all meters upon their installation and at least once every year thereafter. If requested to do so by Producer, IID shall inspect or test a meter more frequently than every year, but the expense of such inspection or test shall be paid by Producer unless the meter is found to register inaccurately by more than two percent (2%) from the measurement made by a standard meter. Each Party shall give reasonable notice to the other Party of the time when any inspection or test shall take place and that Party may have representatives present at the test or inspection. If a meter is found to be inaccurate or defective, it shall be adjusted, repaired or replaced in order to provide accurate metering. All adjustments due to inaccurate meters shall be limited to the preceding six (6) months.

14.3 If a meter fails to register, or if the measurement made by a meter during a test varies by more than two percent (2%) from the measurement made by

the standard meter used in the test, adjustment shall be made correcting all measurements made by the inaccurate meter for:

- (i) the actual period during which inaccurate measurements were made, if the period can be determined, or if not,

5

- (ii) the period immediately preceding the test of the meter equal to one-half (1/2) the time from the date of the last previous test of the meter; provided, however, that the period covered by the correction shall not exceed six (6) months.

14.4 Producer shall telemeter information to IID's Dispatch Center regarding the kilowatts, kilowatt-hours, kilovars and kilovar-hours delivered to or received from IID at the Point of Delivery over phone line leased by Producer.

IID shall purchase, own, and shall design, install, operate, maintain, or cause to be designed, installed, operated, and maintained, equipment to automatically transmit from the Plant to IID's Dispatch Center continuous values of Plant output expressed as megawatts, megavars and megawatt-hours. IID may thereupon bill and Producer shall promptly pay IID's cost of design, purchase and installation of said equipment. Producer shall have the right to audit IID's records and accounts to verify the cost of said equipment.

15. CONTINUITY OF SERVICE

IID shall not be obligated to accept and IID may require Producer to temporarily curtail, interrupt or reduce deliveries of energy upon advance notice to Producer, when such curtailment, interruption or reduction is required in order for IID to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its system or if IID determines that such curtailment, interruption or reduction is necessary because of a System Emergency, forced outages or abnormal operating conditions on its system. IID shall use reasonable efforts to keep interruptions and curtailments to a minimum time.

16. LIABILITY

16.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of, any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

16.2 For the purpose of this Section 16, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

6

16.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

16.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

16.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

16.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

16.4 The phrase "employees having management or administrative responsibility," as used in Section 16.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

16.5 Subject to the foregoing provisions of this Section 16, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

17. UNCONTROLLABLE FORCES

Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, which by exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

18. INTEGRATION AND AMENDMENTS

This Agreement constitutes the entire agreement between the Parties relating to the interconnection of Producer's Plant to IID's electric system, the acceptance of energy by IID from Producer and the providing of electric service by IID. No oral agreement or prior written agreement between the Parties

shall be of any effect whatsoever; provided, however, that any arrangements agreed upon by the Authorized Representatives within the limits of their authority, and consistent with this Agreement shall be binding upon the Parties. All change to this Agreement shall be in writing and shall be signed by an officer of each Party.

19. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

20. NO DEDICATION OF FACILITIES

Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

21. SUCCESSORS AND ASSIGNS

21.1 This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties.

21.2 This Agreement may be assigned by Producer only (i) to a purchaser or co-owner of the Plant or to a person who will operate the Plant pursuant to a contract or other arrangement with such purchaser and in either case with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for the Plant or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 21.2 may be amended, modified or waived without the prior written consent of each and every Party to the Funding and Construction Agreement (except for any Parties in default thereunder).

22. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

23. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the laws of the United States, as applicable.

24. ARBITRATION

24.1 Any dispute arising out of or relating to this Agreement, or the breach thereof, which is not resolved by the Parties acting through their Authorized Representatives shall be settled by arbitration to the extent permitted by the laws applicable to the Parties; provided, however, that no Party to the dispute shall be bound to any greater extent than any other Party to the dispute. Arbitration shall not apply to any dispute or matter that is within the jurisdiction of any regulatory agency.

24.2 Any demand for arbitration shall be made by written notice to the other Party setting forth in adequate detail the nature of the dispute, the

issues to be arbitrated, the amount or amounts, if any, involved In the dispute, and the remedy sought. Within twenty (20) days from the receipt of such notice, the other Party may submit its own written statement of the dispute and may set forth in adequate detail any additional related matters or issues to be arbitrated.

24.3 Within thirty (30) days after delivery of the written notice demanding arbitration, the Parties acting through their Authorized Representatives shall meet for the purpose of selecting an arbitrator. The Parties may agree upon a single arbitrator, but in the event that they cannot agree, three arbitrators shall be used. Each Party shall designate one arbitrator, and the two arbitrators shall then select a third arbitrator. All arbitrators shall be persons skilled and experienced in the field in which the dispute has arisen and no person shall be eligible for appointment as an arbitrator who is or has been an officer or employee of either of the Parties or otherwise interested in the matter to be arbitrated. Should either party refuse or neglect to appoint an arbitrator or to furnish the arbitrators with any papers or information demanded, the arbitrators are empowered, by both Parties, to proceed without the participation or assistance of that Party.

24.4 Except as otherwise provided in this Section, the arbitration shall be governed by the rules and practices of the American Arbitration Association, or a similar organization if the American Arbitration Association should not at the time exist.

24.5 Arbitration proceedings shall be held in Imperial, California, at a time and place to be selected by the arbitrators. The arbitrators shall hear evidence submitted by the Parties and may call for additional information which shall be furnished by the Party having such information. The arbitrators shall have no authority to call for information not related to the Issues included in the dispute or to determine other issues not in dispute.

24.6 If there is only one arbitrator, his decision shall be binding and conclusive on the Parties. If there are three arbitrators, the decision of any two shall be binding and conclusive. The decision of the arbitrators shall contain findings regarding the issues involved in the dispute, including the merits of the positions of the Parties, the materiality of any default, and the remedy or relief to which a Party shall be entitled. The arbitrators may not grant any remedy or relief

9

which is inconsistent with this Agreement, nor shall the arbitrators make findings or decide issues not in dispute.

24.7 The fees and expenses of the arbitrators shall be shared equally by the Parties, unless the decision of the arbitrators specifies some other apportionment. All other expenses and costs of the arbitration shall be borne by the Party incurring such expenses and costs.

24.8 Any decision or award granted by the arbitrators shall be final and judgement may be entered on it in any court of competent jurisdiction. This agreement to arbitrate shall be specifically enforceable.

25. ENTIRE AGREEMENT

25.1 The complete agreement of the Parties is set forth in this Agreement and all communications regarding subject interconnected operations whether oral or written, are hereby abrogated and withdrawn.

26. NOTICES

Any formal communication or notice in connection with this Agreement shall be in writing and shall be deemed properly given if delivered in person or sent

first class mail, postage prepaid to the person specified below:

c/o Plant Manager
P.O. Box 819
El Centro, California 92244

IMPERIAL IRRIGATION DISTRICT
c/o General Manager
P.O. Box 937
Imperial, California 92251

27. SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership or joint venture, or impose a trust or partnership duty, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations under this Agreement.

10

28. SIGNATURE CLAUSE

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this _____ day of _____, 1988.

1. PARTIES

The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT ("IID"), organized under the Water Code of the State of California and ORMESA IH ("Producer"), hereinafter referred to individually as "Party", and collectively as "Parties".

2. RECITALS

2.1 Producer intends to construct and operate, as owner or lessee, a generating facility with a maximum 9 megawatt net operating capacity at the East Mesa (KGRA), Imperial County, California, and to sell the Plant electrical output to Southern California Edison Company ("SCE").

2.2 SCE entered into the Power Purchase Agreement dated July 18, 1984, ("Purchase Agreement") with Republic Geothermal, Inc. ("Republic"). Republic assigned the Power Purchase Contract to Ormat Systems, Inc. on November 6, 1984 to which assignment SCE consented on December 19, 1984. Ormat Systems, Inc. assigned the Power Purchase Contract to Ormesa Geothermal on February 27, 1985 to which assignment SCE consented on July 22, 1985.

2.3 SCE and Producer agree that the terms and conditions regarding transmission of the Plant's Energy to an IID/SCE point of interconnection shall be pursuant to a Transmission Service Agreement to be entered into between IID and Ormesa Geothermal.

2.4 Since the Plant will be built in the IID service territory, it will be convenient to connect the Plant to the IID electric system.

Producer hereby grants the IID the right to enter the Plant site for any reasonable purposes connected with this Agreement, by previous arrangements with the Plant manager.

1

Those reasonable purposes include maintenance and repairs to IID equipment in Producer's facilities, observing tests of said facilities, reading of kilowatt-hour meters, and the like.

2.5 Producer desires to purchase and IID desires to sell the electrical energy necessary to satisfy the operation and maintenance power consumption requirements of the Plant for the life of the Plant that is not normally generated by the Plant itself, or portable generating equipment.

2.6 The Parties desire, by means of this Agreement, to interconnect the Plant to the IID electrical system and to establish the terms, conditions and obligations of the Parties relating to such interconnection.

3. AGREEMENT

The Parties agree as follows:

4. DEFINITIONS

4.1 Agreement: This Plant Connection Agreement between IID and Producer, and all Exhibits hereto, as may be amended from time to time.

4.2 Authorized Representative: The representative of a Party designated in accordance with Section 13.

4.3 Energy: Electric energy in excess of Producer's electric energy requirements, expressed in kilowatt-hours, generated by the Plant and measured and delivered to the Point of Delivery.

4.4 Funding and Construction Agreement: An agreement entered into by IID and others dated June 29, 1987, providing for the funding and construction of the Heber-Mirage Transmission Project, to which a form of this Agreement is attached as Exhibit C.

2

4.5 Operation Date: The day on which the Plant Energy is first accepted by IID for delivery to SCE.

4.6 Plant: A maximum of 9 MW net operating capacity Geothermal facility operated by Producer, as owner or lessee, including all associated equipment and improvements necessary for generating electric energy and transmitting it to the high voltage side of the power transformer.

4.7 Point of Delivery: The point on the high voltage side of Producer's switchyard where IID's metering equipment measures the delivery of Energy to the IID system as shown on Exhibit "B".

4.8 System Emergency: A condition on IID's system which is likely to result in imminent significant disruption of service to customers or is imminently likely to endanger life or property.

5. EFFECTIVE DATE AND TERM

This Agreement shall become effective upon the Operation Date of the Plant, and shall remain in effect until the earlier of (i) October 12, 2017, or (ii) thirty six (36) months from the date the Plant has ceased to operate at the option of IID. It is understood that (i) if the Completion Date, as the term Completion Date is defined in Article I of Funding and Construction Agreement does not occur, or (ii) if the Operation Date does not occur within five (5) years after the date this Agreement was executed, this Agreement shall be of no force or effect.

6. CONNECTION OF PLANT

6.1 Producer may electrically connect its Plant, in accordance with the provisions of this Agreement, so that it can operate in parallel with the IID electric system. Parallel

3

operation will not commence until IID has inspected and approved the interconnection facilities and operational procedures.

6.2 Notwithstanding the provision that Producer has furnished the high voltage switchyard complete, including the high voltage oil circuit breakers and disconnect switches, the control of the high voltage oil circuit breakers and disconnect switches shall be under the control of the IID dispatcher.

7. ELECTRIC SERVICE TO PRODUCER

IID shall provide electric service to Producer pursuant to Section 12.

8. METERING OF ENERGY DELIVERIES

Metering for electric service to Producer and for energy deliveries by Producer to IID for delivery to SCE shall be at the Point of Delivery as shown on Exhibit "B." Four meters shall be installed which shall measure and record flows in each direction as shown on Exhibit "B." 9.

9. PRODUCER'S DELIVERY AND IID ACCEPTANCE OF ENERGY FROM PLANT

Whenever electric output from the Plant exceeds Producer's power requirements, Producer shall deliver all such excess output to IID for delivery to SCE and IID shall accept such output for delivery to SCE and deliver such out-put to SCE pursuant to a transmission service agreement to be entered into between Ormesa Geothermal and IID.

10. PRODUCER'S GENERAL OBLIGATIONS

Producer shall:

10.1 Operate the Plant in a manner consistent with applicable electric utility industry standards, good engineering practice, and without degradation of quality or reliability of service to IID customers.

4

10.2 Deliver the Plant's net electrical output to IID for the account of SCE at the Point of Delivery.

10.3 Each Party shall provide the reactive kilovolt-ampere (KVA) requirements of its own system so that there will be no interchange of reactive KVA between systems. The Parties shall cooperate to control the flow of reactive KVA to prevent the introduction of objectionable operating conditions on the system of either Party.

10.4 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of the Plant with IID.

10.5 Give IID a written schedule on or before June 1, and December 1, each year of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each month of the succeeding twelve-month (12) period commencing July 1, and January 1.

10.6 Give IID a written schedule on or before the fifteenth (15th) day of each month of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each day of the succeeding calendar month.

10.7 Give IID a schedule on or before 12:01 p.m. on Tuesday of each seven-day (7) period of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each hour of the succeeding seven-day (7) period commencing at 12:01 a.m. on the following Monday; provided, however, that if any changes in the hourly deliveries so scheduled become necessary, Producer shall notify IID of such changes as far in advance as possible.

10.8 Provide IID any reasonable rights-of-way and access required for testing and reading of meters by previous arrangement with the Plant manager.

5

10.9 Carry out the directions of the Authorized Representatives with respect to the matters set forth in this Agreement.

11. IID'S GENERAL OBLIGATIONS

IID shall:

11.1 Design, acquire, construct, operate and maintain, or cause to be designed, acquired, constructed, operated and maintained, and shall own, a connecting transmission line between IID's transmission system and the Plant. Following the completion of such line, IID may bill and Producer shall pay IID's costs of designing, acquiring and constructing such line. Producer shall have the right to audit IID's records and accounts to verify the cost of such line.

11.2 Accept the Plant's net electrical output for the account of SCE at the Point of Delivery and simultaneously deliver an equal amount of electric energy (less applicable transmission losses) to the SCE system at IID/SCE point(s) of interconnection.

11.3 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of IID transmission facilities with Producer and notify Producer of any changes as far in advance as possible.

11.4 Carry out the directions of the Authorized Representative with respect to the matters set forth in this Agreement.

11.5 Operate its system in a manner consistent with applicable utility industry standards and good engineering practices.

12. BILLING

12.1 IID shall read the meters monthly according to its regular meter reading schedule beginning no more than thirty (30) days after the date that electric energy is first supplied to Producer. IID monthly shall send Producer within ten (10) working days after the

6

meter is read a bill for electric service. Producer shall pay IID the total amount billed within thirty (30) days of receipt of the bill.

12.2 IID shall bill Producer for Producer's consumption of energy from IID's resources in accordance with Rate Schedule GL or Rate Schedule A-2, as applicable, as it may be revised from time to time. Copies of current Rate Schedule GL and current Rate Schedule A-2 are attached as Exhibit "A."

12.3 If Producer disputes a bill, payment shall be made as if no dispute existed pending resolution of the dispute by the Authorized Representatives. If the bill is determined to be in error, the disputed amount shall be refunded by IID including interest at the rate of one and one-half percent (1 1/2%) per month, compounded monthly, from the date of payment to the date the refund check or adjusted bill is mailed.

13. AUTHORIZED REPRESENTATIVES

13.1 Within thirty (30) days after the date this Agreement is signed, each Party shall designate, by written notice to the other Party, an Authorized Representative who is authorized to act in its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities for the Authorized Representatives. Either Party may, at any time, change the designation of its Authorized Representative by written notice to the other Party.

13.2 IID's Authorized Representative shall develop detailed written procedures necessary and convenient to administer this Agreement within

six (6) months after the date signed. Such procedures shall be submitted to Producer's Authorized Representative for review, comment, discussion and concurrence before they are put into effect. Such procedures shall include, without limitation: (i) communication between Producer and IID's electric system

7

dispatcher with regard to daily operating matters, (ii) billing and payments, (iii) specified equipment tests, and (iv) operating matters which affect or may affect quality and reliability of service to electric customers and continuity of deliveries to SCE.

13.3 The Authorized Representative shall have no authority to modify any of the provisions of this Agreement.

14. METERS

14.1 All meters shall be sealed and the seal shall be broken only upon occasions when the meters are to be inspected, tested or adjusted.

14.2 IID shall inspect and test all meters upon their installation and at least once every year thereafter. If requested to do so by Producer, IID shall inspect or test a meter more frequently than every year, but the expense of such inspection or test shall be paid by Producer unless the meter is found to register inaccurately by more than two percent (2%) from the measurement made by a standard meter. Each Party shall give reasonable notice to the other Party of the time when any inspection or test shall take place and that Party may have representatives present at the test or inspection. If a meter is found to be inaccurate or defective, it shall be adjusted, repaired or replaced in order to provide accurate metering. All adjustments due to inaccurate meters shall be limited to the preceding six (6) months.

14.3 If a meter fails to register, or if the measurement made by a meter during a test varies by more than two percent (2%) from the measurement made by the standard meter used in the test, adjustment shall be made correcting all measurements made by the inaccurate meter for:

- (i) the actual period during which inaccurate measurements were made, if the period can be determined, or if not,

8

- (ii) the period immediately preceding the test of the meter equal to one-half (1/2) the time from the date of the last previous test of the meter; provided, however, that the period covered by the correction shall not exceed six (6) months.

14.4 Producer shall telemeter information to IID's Dispatch Center regarding the kilowatts, kilowatt-hours, kilovars and kilovars-hours delivered to or received from IID at the Point of Delivery over phone line leased by Producer.

IID shall purchase, own, and shall design, install, operate, maintain, or cause to be designed, installed, operated, and maintained, equipment to automatically transmit from the Plant to IID's Dispatch Center

continuous values of Plant output expressed as megawatts, megavars and megawatt-hours. IID may thereupon bill and Producer shall promptly pay IID's cost of design, purchase and installation of said equipment. Producer shall have the right to audit IID's records and accounts to verify the cost of said equipment.

15. CONTINUITY OF SERVICE

IID shall not be obligated to accept and IID may require Producer to temporarily curtail, interrupt or reduce deliveries of energy upon advance notice to Producer, when such curtailment, interruption or reduction is required in order for IID to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its system or if IID determines that such curtailment, interruption or reduction is necessary because of a System Emergency, forced outages or abnormal operating conditions on its system. IID shall use reasonable efforts to keep interruptions and curtailments to a minimum time.

16. LIABILITY

16.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body,

9

officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

16.2 For the purpose of this Section 16, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

16.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

16.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

16.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

16.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

16.4 The phrase "employees having management or administrative responsibility," as used in Section 16.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

16.5 Subject to the foregoing provisions of this Section 16, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

17. UNCONTROLLABLE FORCES

Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor

dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, which by exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

18. INTEGRATION AND AMENDMENTS

This Agreement constitutes the entire agreement between the Parties relating to the interconnection of Producer's Plant to IID's electric system, the acceptance of energy by IID from Producer and the providing of electric service by IID. No oral agreement or prior written agreement between the Parties shall be of any effect whatsoever; provided, however, that any arrangements agreed upon by the Authorized Representatives within the limits of

their authority, and consistent with this Agreement shall be binding upon the Parties. All changes to this Agreement shall be in writing and shall be signed by an officer of each Party.

19. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions

12

or the relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

20. NO DEDICATION OF FACILITIES

Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

21. SUCCESSORS AND ASSIGNS

21.1 This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties.

21.2 This Agreement may be assigned by Producer only (i) to a purchaser or co-owner of the Plant or to a person who will operate the Plant pursuant to a contract or other arrangement with such purchaser and in either case with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for the Plant or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 21.2 may be amended, modified or waived without the prior written consent of each and every Party to the Funding and Construction Agreement (except for any Parties in default thereunder.)

22. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

13

23. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the laws of the United States, as applicable.

24. ARBITRATION

24.1 Any dispute arising out of or relating to this Agreement, or the breach thereof, which is not resolved by the Parties acting through their Authorized Representatives shall be settled by arbitration to the extent permitted by the laws applicable to the Parties; provided, however, that no Party to the dispute shall be bound to any greater extent than any other Party to the dispute. Arbitration shall not apply to any dispute or matter that is within the jurisdiction of any regulatory agency.

24.2 Any demand for arbitration shall be made by written notice to the other Party setting forth in adequate detail the nature of the dispute, the issues to be arbitrated, the amount or amounts, if any, involved in the dispute, and the remedy sought. Within twenty (20) days from the receipt of such notice, the other Party may submit its own written statement of the dispute and may set forth in adequate detail any additional related matters or issues to be arbitrated.

24.3 Within thirty (30) days after delivery of the written notice demanding arbitration, the Parties acting through their Authorized Representatives shall meet for the purpose of selecting an arbitrator. The Parties may agree upon a single arbitrator, but in the event that they cannot agree, three arbitrators shall be used. Each Party shall designate one arbitrator, and the two arbitrators shall then select a third arbitrator. All arbitrators shall be persons skilled and experienced in the field in which the dispute has arisen and no person shall be eligible for appointment as an arbitrator who is or has been an officer or employee of either of the Parties or otherwise interested in the matter to be arbitrated. Should either party refuse or neglect to

14

appoint an arbitrator or to furnish the arbitrators with any papers or information demanded, the arbitrators are empowered, by both Parties, to proceed without the participation or assistance of that Party.

24.4 Except as otherwise provided in this Section, the arbitration shall be governed by the rules and practices of the American Arbitration Association, or a similar organization if the American Arbitration Association should not at the time exist.

24.5 Arbitration proceedings shall be held in Imperial, California, at a time and place to be selected by the arbitrators. The arbitrators shall hear evidence submitted by the Parties and may call for additional information which shall be furnished by the Party having such information. The arbitrators shall have no authority to call for information not related to the issues included in the dispute or to determine other issues not in dispute.

24.6 If there is only one arbitrator, his decision shall be binding and conclusive on the Parties. If there are three arbitrators, the decision of any two shall be binding and conclusive. The decision of the arbitrators shall contain findings regarding the issues involved in the dispute, including the merits of the positions of the Parties, the materiality of any default, and the remedy or relief to which a Party shall be entitled. The arbitrators may not grant any remedy or relief which is inconsistent with this Agreement, nor shall the arbitrators make findings or decide issues not in dispute.

24.7 The fees and expenses of the arbitrators shall be shared equally by the Parties, unless the decision of the arbitrators specifies some other apportionment. All other expenses and costs of the arbitration shall be

borne by the Party incurring such expenses and costs.

15

24.8 Any decision or award granted by the arbitrators shall be final and judgement may be entered on it in any court of competent jurisdiction. This agreement to arbitrate shall be specifically enforceable.

25. ENTIRE AGREEMENT

25.1 The complete agreement of the Parties is set forth in this Agreement and all communications regarding subject interconnected operations whether oral or written, are hereby abrogated and withdrawn.

26. NOTICES

Any formal communication or notice in connection with this Agreement shall be in writing and shall be deemed properly given if delivered in person or sent first class mail, postage prepaid to the person specified below:

27. SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations and liabilities of the Parties are intended to be several and not joint or collective, Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership or joint venture, or impose a trust or partnership duty, obligation or liability on or

16

with regard to either Party. Each Party shall be individually and severally liable for its own obligations under this Agreement.

28. SIGNATURE CLAUSE

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this 3rd day of October, 1989.

1. PARTIES

The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT ("IID"), organized under the Water Code of the State of California and GEO EAST MESA LIMITED PARTNERSHIP ("Producer"), hereinafter referred to individually as "Party", and collectively as "Parties".

2. RECITALS

2.1 Producer intends to construct and operate, as owner or lessee, a megawatt generating facility with a maximum 27.5 megawatt net operating capacity at the East Mesa (KGRA), Imperial County, California, and to sell the Plant electrical output to Southern California Edison Company ("SCE").

2.2 SCE entered into the Power Purchase Agreement dated May 20, 1988, ("Purchase Agreement") with Producer, to purchase all the electrical output from the Plant.

2.3 SCE and Producer agree that the terms and conditions regarding transmission of the Plant's Energy to an IID/SCE point of interconnection shall be pursuant to a Transmission Service Agreement to be entered into between IID and Producer.

2.4 Since the Plant will be built in the IID service territory, it will be convenient to connect the Plant to the IID electric system.

Producer hereby grants the IID the right to enter the Plant site for any reasonable purposes connected with this Agreement, by previous arrangements with the Plant manager. Those reasonable purposes include maintenance and repairs to IID equipment in Producer's facilities, observing tests of said facilities, reading of kilowatt-hour meters, and the like.

2.5 Producer desires to purchase and IID desires to sell the electrical energy necessary to satisfy the operation and maintenance power consumption requirements of the Plant for the life of the Plant that is not normally generated by the Plant itself, or portable generating equipment.

2.6 The Parties desire, by means of this Agreement, to interconnect the Plant to the IID electrical system and to establish the terms, conditions and obligations of the Parties relating to such interconnection.

3. AGREEMENT -----

The Parties agree as follows:

4. DEFINITIONS -----

4.1 Agreement: This Plant Connection Agreement between IID and Producer, and all Exhibits hereto, as may be amended from time to time.

4.2 Authorized Representative: The representative of a Party designated accordance with Section 13.

4.3 Energy: Electric energy in excess of Producer's electric energy requirements, expressed in kilowatt-hours, generated by the Plant and measured and delivered to the Point of Delivery.

4.4 Funding and Construction Agreement: An agreement entered into by IID and others dated June 29, 1987, providing for the funding and construction of the Heber-Mirage Transmission Project, to which a form of this Agreement is attached as Exhibit C.

4.5 Operation Date: The day on which the Plant Energy is first accepted by IID for delivery to SCE.

4.6 Plant: A maximum of 27.5 MW net operating capacity Geothermal facility operated by Producer, as owner or lessee, including all associated equipment and improvements necessary for generating electric energy and transmitting it to the high voltage side of the power transformer.

4.7 Point of Delivery: The point on the high voltage side of Producer's switchyard where IID's metering equipment measures the delivery of Energy to the IID system as shown on Exhibit "B".

4.8 System Emergency: A condition on IID's system which is likely to result in imminent significant disruption of service to customers or is imminently likely to endanger life or property.

5. EFFECTIVE DATE AND TERM

This Agreement shall become effective upon the Operation Date of the Plant, and shall remain in effect until the earlier of (i) April 15, 2015, or (ii) thirty six (36) months from the date the Plant has ceased to operate at the option of IID. It is understood that (i) if the Completion Date, as the term Completion Date is defined in Article I of Funding and Construction Agreement does not occur, or (ii) if the Operation Date does not occur within five (5) years after the date this Agreement was executed, this Agreement shall be of no force or effect.

6. CONNECTION OF PLANT

6.1 Producer may electrically connect its Plant, in accordance with the provisions of this Agreement, so that it can operate in parallel with the IID electric system. Parallel operation will not commence until IID has inspected and approved the interconnection facilities and operational procedures.

6.2 Notwithstanding the provision that Producer has furnished the high voltage switchyard complete, including the high voltage oil circuit breakers and disconnect switches, the control of the high voltage oil circuit breakers and disconnect switches shall be under the control of the IID dispatcher.

3

7. ELECTRIC SERVICE TO PRODUCER

IID shall provide electric service to Producer pursuant to Section 12.

8. METERING OF ENERGY DELIVERIES

Metering for electric service to Producer and for energy deliveries by Producer to IID for delivery to SCE shall be at the Point of Delivery as shown on Exhibit "B." Four meters shall be installed which shall measure and record flows in each direction as shown on Exhibit "B."

9. PRODUCER'S DELIVERY AND IID ACCEPTANCE OF ENERGY FROM PLANT

Whenever electric output from the Plant exceeds Producer's power requirements, Producer shall deliver all such excess output to IID for delivery to SCE and IID shall accept such output for delivery to SCE and deliver such output to SCE pursuant to a transmission service agreement to be entered into between Producer and IID.

10. PRODUCER'S GENERAL OBLIGATIONS

Producer shall:

10.1 Operate the Plant in a manner consistent with applicable electric utility industry standards, good engineering practice, and without degradation of quality or reliability of service to IID customers.

10.2 Deliver the Plant's net electrical output to IID for the account of SCE at the Point of Delivery.

10.3 Each Party shall provide the reactive kilovolt-ampere (KVA) requirements of its own system so that there will be no interchange of reactive KVA between systems. The Parties shall cooperate to control the flow of reactive KVA to prevent the introduction of objectionable operating conditions on the system of either Party.

4

10.4 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of the Plant with IID.

10.5 Give IID a written schedule on or before June 1, and December 1, each year of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each month of the succeeding twelve-month (12) period commencing July 1, and January 1.

10.6 Give IID a written schedule on or before the fifteenth (15th) day of each month of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each day of the succeeding calendar month.

10.7 Give IID a schedule on or before 12:01 p.m. on Tuesday of each seven-day (7) period of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each hour of the succeeding seven-day (7) period commencing at 12:01 a.m. on the following Monday; provided, however, that if any changes in the hourly deliveries so scheduled become necessary, Producer shall notify IID of such changes as far in advance as possible.

10.8 Provide IID any reasonable rights-of-way and access required for testing and reading of meters by previous arrangement with the Plant manager.

10.9 Carry out the directions of the Authorized Representatives with respect to the matters set forth in this Agreement.

11. IID'S GENERAL OBLIGATIONS

IID shall:

11.1 Design, acquire, construct, operate and maintain, or cause to be designed, acquired, constructed, operated and maintained, and shall own, a connecting transmission line between

5

IID's transmission system and the Plant. Following the completion of such line, IID may bill and Producer shall pay IID's costs of designing, acquiring and constructing such line. Producer shall have the right to audit IID's records and accounts to verify the cost of such line.

11.2 Accept the Plant's net electrical output for the account of SCE at the Point of Delivery and simultaneously deliver an equal amount of electric energy (less applicable transmission losses) to the SCE system at IID/SCE point(s) of interconnection.

11.3 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of IID transmission facilities with Producer and notify Producer of any changes as far in advance as possible.

11.4 Carry out the directions of the Authorized Representative with respect to the matters set forth in this Agreement.

11.5 Operate its system in a manner consistent with applicable utility industry standards and good engineering practices.

12. BILLING

12.1 IID shall read the meters monthly according to its regular meter reading schedule beginning no more than thirty (30) days after the date that electric energy is first supplied to Producer. IID monthly shall send Producer within ten (10) working days after the meter is read a bill for electric service. Producer shall pay IID the total amount billed within thirty (30) days of receipt of the bill.

12.2 IID shall bill Producer for Producer's consumption of energy from IID's resources in accordance with Rate Schedule GL or Rate Schedule A-2, as applicable, as it may be revised from time to time. Copies of current Rate Schedule GL and current Rate Schedule A-2 are attached as Exhibit "A."

6

12.3 If Producer disputes a bill, payment shall be made as if no dispute existed pending resolution of the dispute by the Authorized Representatives. If the bill is determined to be in error, the disputed amount shall be refunded by IID including interest at the rate of one and one-half percent (1 1/2%) per month, compounded monthly, from the date of payment to the date the refund check or adjusted bill is mailed.

13. AUTHORIZED REPRESENTATIVES

13.1 Within thirty (30) days after the date this Agreement is signed, each Party shall designate, by written notice to the other Party, an Authorized Representative who is authorized to act in its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities for the Authorized Representatives. Either Party may, at any time, change the designation of its Authorized Representative by written notice to the other Party.

13.2 IID's Authorized Representative shall develop detailed written procedures necessary and convenient to administer this Agreement within six (6) months after the date signed. Such procedures shall be submitted to Producer's Authorized Representative for review, comment, discussion and concurrence before they are put into effect. Such procedures shall include, without limitation: (i) communication between Producer and IID's electric system dispatcher with regard to daily operating matters, (ii) billing and payments, (iii) specified equipment tests, and (iv) operating matters which affect or may affect quality and reliability of service to electric customers and continuity of deliveries to SCE.

13.3 The Authorized Representative shall have no authority to modify any of the provisions of this Agreement.

14. METERS

14.1 All meters shall be sealed and the seal shall be broken only upon occasions when the meters are to be inspected, tested or adjusted.

14.2 IID shall inspect and test all meters upon their installation and at least once every year thereafter. If requested to do so by Producer, IID shall inspect or test a meter more frequently than every year, but the expense of such inspection or test shall be paid by Producer unless the meter is found to register inaccurately by more than two percent (2%) from the measurement made by a standard meter. Each Party shall give reasonable notice to the other Party of the time when any inspection or test shall take place and that Party may have representatives present at the test or inspection. If a meter is found to be inaccurate or defective, it shall be adjusted, repaired or replaced in order to provide accurate metering. All adjustments due to inaccurate meters shall be limited to the preceding six (6) months.

14.3 If a meter fails to register, or if the measurement made by a meter during a test varies by more than two percent (2%) from the measurement made by the standard meter used in the test, adjustment shall be made correcting all measurements made by the inaccurate meter for:

- (i) the actual period during which inaccurate measurements were made, if the period can be determined, or if not,
- (ii) the period immediately preceding the test of the meter equal to one-half (1/2) the time from the date of the last previous test of the meter; provided, however, that the period covered by the correction shall not exceed six (6) months.

14.4 Producer shall telemeter information to IID's Dispatch Center regarding the kilowatts, kilowatt-hours, kilovars and kilovar-hours delivered to or received from IID at the Point of Delivery over phone line leased by Producer.

IID shall purchase, own, and shall design, install, operate, maintain, or cause to be designed, installed, operated, and maintained, equipment to automatically transmit from the Plant to IID's Dispatch Center continuous values of Plant output expressed as megawatts, megavars and megawatt-hours. IID may thereupon bill and Producer shall promptly pay IID's cost of design, purchase and installation of said equipment. Producer shall have the right to audit IID's records and accounts to verify the cost of said equipment.

15. CONTINUITY OF SERVICE

IID shall not be obligated to accept and IID may require Producer to temporarily curtail, interrupt or reduce deliveries of energy upon advance notice to Producer, when such curtailment, interruption or reduction is required in order for IID to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its system or if IID determines that such curtailment, interruption or reduction is necessary because

of a System Emergency, forced outages or abnormal operating conditions on its system. IID shall use reasonable efforts to keep interruptions and curtailments to a minimum time.

16. LIABILITY

16.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the

9

released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

16.2 For the purpose of this Section 16, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

16.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

16.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

16.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

16.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

16.4 The phrase "employees having management or administrative responsibility," as used in Section 16.2, means the employees of a Party who are responsible for one or more of the

10

executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

16.5 Subject to the foregoing provisions of this Section 16, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

17. UNCONTROLLABLE FORCES

Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, which by exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be

11

involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

18. INTEGRATION AND AMENDMENTS

This Agreement constitutes the entire agreement between the Parties relating to the interconnection of Producer's Plant to IID's electric system, the acceptance of energy by IID from Producer and the providing of electric service by IID. No oral agreement or prior written agreement between the Parties shall be of any effect whatsoever; provided, however, that any arrangements agreed upon by the Authorized Representatives within the limits of their authority, and consistent with this Agreement shall be binding upon the Parties. All changes to this Agreement shall be in writing and shall be signed by an officer of each Party.

19 NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

20. NO DEDICATION OF FACILITIES

Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any

12

provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

21. SUCCESSORS AND ASSIGNS

21.1 This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties.

21.2 This Agreement may be assigned by Producer only (i) to a purchaser or co-owner of the Plant or to a person who will operate the Plant pursuant to a contract or other arrangement with such purchaser and in either case with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for the Plant or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 21.2 may be amended, modified or waived without the prior written consent of each and every Party to the Funding and Construction Agreement (except for any Parties in default thereunder.)

22. EFFECT OF SECTION HEADINGS

Section heading appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

23. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the laws of the United States, as applicable.

24. ARBITRATION

24.1 Any dispute arising out of or relating to this Agreement, or the breach thereof, which is not resolved by the Parties acting through their Authorized Representatives shall be settled by arbitration to the extent permitted by the laws applicable to the Parties; provided,

13

however, that no Party to the dispute shall be bound to any greater extent than any other Party to the dispute. Arbitration shall not apply to any dispute or matter that is within the jurisdiction of any regulatory agency.

24.2 Any demand for arbitration shall be made by written notice of the other Party setting forth in adequate detail the nature of the dispute, the issues to be arbitrated, the amount or amounts, if any, involved in the dispute, and the remedy sought. Within twenty (20) days from the receipt of such notice, the other Party may submit its own written statement of the dispute and may set forth in adequate detail any additional related matters or issues to be arbitrated.

24.3 Within thirty (30) days after delivery of the written notice demanding arbitration the Parties acting through their Authorized Representatives shall meet for the purpose of selecting an arbitrator. The Parties may agree upon a single arbitrator, but in the event that they cannot agree, three arbitrators shall be used. Each Party shall designate one arbitrator, and the two arbitrators shall then select a third arbitrator. All arbitrators shall be persons skilled and experienced in the field in which the dispute has arisen and no person shall be eligible for appointment as an arbitrator who is or has been an officer or employee of either of the Parties or otherwise interested in the matter to be arbitrated. Should either party refuse or neglect to appoint an arbitrator or to furnish the arbitrators with any papers or information demanded, the arbitrators are empowered, by both Parties, to proceed without the participation or assistance of that Party.

24.4 Except as otherwise provided in this Section, the arbitration shall be governed by the rules and practices of the American Arbitration Association, or a similar organization if the American Arbitration Association should not at the time exist.

24.5 Arbitration proceedings shall be held in Imperial, California, at a time and place to be selected by the arbitrators. The arbitrators shall hear evidence submitted by the Parties and

14

may call for additional information which shall be furnished by the Party having such information. The arbitrators shall have no authority to call for information not related to the issues included in the dispute or to determine other issues not in dispute.

24.6 If there is only one arbitrator, his decision shall be binding and conclusive on the Parties. If there are three arbitrators, the decision of any two shall be binding and conclusive. The decision of the arbitrators shall contain findings regarding the issues involved in the dispute, including the merits of the positions of the Parties, the materiality of any default, and the remedy or relief to which a Party shall be entitled. The arbitrators may not grant any remedy or relief which is inconsistent with this Agreement, nor shall the arbitrators make findings or decide issues not in dispute.

24.7 The fees and expenses of the arbitrators shall be shared equally by the Parties, unless the decision of the arbitrators specifies some other apportionment. All other expenses and costs of the arbitration shall be borne by the Party incurring such expenses and costs.

24.8 Any decision or award granted by the arbitrators shall be final and judgment may be entered on it in any court of competent jurisdiction. This agreement to arbitrate shall be specifically enforceable.

25. ENTIRE AGREEMENT

25.1 The complete agreement of the Parties is set forth in this Agreement and all communications regarding subject interconnected operations whether oral or written, are hereby abrogated and withdrawn.

26. NOTICES

Any formal communication or notice in connection with this Agreement shall be in writing and shall be deemed properly given if delivered in person or sent first class mail, postage prepaid to the person specified below:

27. SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership, or joint venture, or impose a trust or partnership duty, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations under this Agreement.

28. SIGNATURE CLAUSE

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this 21st day of March, 1989.

ii

1. PARTIES

The parties to this Agreement are IMPERIAL IRRIGATION DISTRICT ("IID"), organized under the Water Code of the State of California and GEO EAST MESA LIMITED PARTNERSHIP ("Producer"), hereinafter referred to individually as "Party", and collectively as "Parties".

2. RECITALS

2.1 Producer intends to construct and operate, as owner or lessee, a megawatt generating facility with a maximum 27.5 megawatt net operating capacity at the East Mesa (KGRA), Imperial County, California, and to sell the Plant electrical output to Southern California Edison Company ("SCE").

2.2 SCE has entered into the Power Purchase Agreement dated May 20, 1988, ("Purchase Agreement") with Producer, to purchase all the electrical output from the Plant.

2.3 SCE and Producer agree that the terms and conditions regarding transmission of the Plant's Energy to an IID/SCE point of interconnection shall be pursuant to a Transmission Service Agreement to be entered into between IID and Producer.

2.4 Since the Plant will be built In the IID service territory, it will be convenient to connect the Plant to the IID electric system.

Producer hereby grants the IID the right to enter the Plant site for any reasonable purposes connected with this Agreement, by previous arrangements with the

Plant manager. Those reasonable purposes include maintenance and repairs to IID equipment in Producer's facilities, observing tests of said facilities, reading of kilowatt-hour meters, and the like.

2.5 Producer desires to purchase and IID desires to sell the electrical energy necessary to satisfy the operation and maintenance power consumption requirements of the Plant for the life of the Plant that is not normally generated by the Plant itself, or portable generating equipment.

2.6 The Parties desire, by means of this Agreement, to Interconnect the Plant to the IID electrical system and to establish the terms, conditions and obligations of the Parties relating to such Interconnection.

3. AGREEMENT

The Parties agree as follows:

4. DEFINITIONS

4.1 Agreement: This Plant Connection Agreement between IID and Producer, and all Exhibits hereto, as may be amended from time to time.

4.2 Authorized Representative: The representative of a Party designated in accordance with Section 13.

4.3 Energy: Electric energy in excess of Producer's electric energy requirements, expressed in kilowatt-hours, generated by the Plant and measured and delivered to the Point of Delivery.

2

4.4 Funding and Construction Agreement: An agreement entered into by IID and others dated June 29, 1987, providing for the funding and construction of the Heber-Mirage Transmission Project, to which a form of this Agreement is attached as Exhibit C.

4.5 Operation Date: The day on which the Plant Energy is first accepted by IID for delivery to SCE.

4.6 Plant: A maximum of 27.5 MW net operating capacity Geothermal facility operated by Producer, as owner or lessee, including all associated equipment and improvements necessary for generating electric energy and transmitting it to the high voltage side of the power transformer.

4.7 Point of Delivery: The point on the high voltage side of Producer's switchyard where IID's metering equipment measures the delivery of Energy to the IID system as shown on Exhibit "5".

4.8 System Emergency: A condition on IID's system which is likely to result in imminent significant disruption of service to customers or is imminently likely to endanger life or property.

5. EFFECTIVE DATE AND TERM

This Agreement shall become effective upon the Operation Date of the Plant, and shall remain in effect until the earlier of (i) April 15, 2015, or (ii) thirty six (36) months from the date the Plant has ceased to operate at the option of IID. It is understood that (i) if the Completion Date, as the term Completion Date is defined in Article I of Funding and Construction Agreement does not occur, or (ii) if the Operation Date does

3

not occur within five (5) years after the date this Agreement was executed, this Agreement shall be of no force or effect.

6. CONNECTION OF PLANT

6.1 Producer may electrically connect its Plant, in accordance with the provisions of this Agreement, so that it can operate in parallel with the IID electric system. Parallel operation will not commence until IID has inspected and approved the interconnection facilities and operational procedures.

6.2 Notwithstanding the provision that Producer has furnished the high voltage switchyard complete, including the high voltage oil circuit breakers and disconnect switches, the control of the high voltage oil circuit breakers and disconnect switches shall be under the control of the IID dispatcher.

7. ELECTRIC SERVICE TO PRODUCER

IID shall provide electric service to Producer pursuant to Section 12.

8. METERING OF ENERGY DELIVERIES

Metering for electric service to Producer and for energy deliveries by Producer to IID for delivery to SCE shall be at the Point of Delivery as shown on Exhibit "B." Four meters shall be installed which shall measure and record flows in each direction as shown on Exhibit "B."

9. PRODUCER'S DELIVERY AND IID ACCEPTANCE OF ENERGY FROM PLANT

Whenever electric output from the Plant exceeds Producer's power requirements, Producer shall deliver all such excess output to IID for delivery to SCE and

4

IID shall accept such output for delivery to SCE and deliver such output to SCE pursuant to a transmission service agreement to be entered into between Producer and IID.

10. PRODUCER'S GENERAL OBLIGATIONS

Producer shall:

10.1 Operate the Plant in a manner consistent with applicable electric utility industry standards, good engineering practice, and without degradation of quality or reliability of service to IID customers.

10.2 Deliver the Plant's net electrical output to IID for the account of SCE at the Point of Delivery.

10.3 Each Party shall provide the reactive kilovolt-ampere (KVA) requirements of its own system so that there will be no interchange of reactive KVA between systems. The Parties shall cooperate to control the flow of reactive KVA to prevent the introduction of objectionable operating conditions on the system of either Party.

10.4 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of the Plant with IID.

10.5 Give IID a written schedule on or before June 1, and December 1, each year of the estimated amounts and rates of delivery of energy

to be delivered to IID for the account of SCE at the Point of Delivery during each month of the succeeding twelve-month (12) period commencing July 1, and January 1.

5

10.6 Give IID a written schedule on or before the fifteenth (15th) day of each month of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each day of the succeeding calendar month.

10.7 Give IID a schedule on or before 12:01 p.m. on Tuesday of each seven-day (7) period of the estimated amounts and rates of delivery of energy to be delivered to IID for the account of SCE at the Point of Delivery during each hour of the succeeding seven-day (7) period commencing at 12:01 a.m. on the following Monday; provided, however, that if any changes in the hourly deliveries so scheduled become necessary, Producer shall notify IID of such changes as far in advance as possible.

10.8 Provide IID any reasonable rights-of-way and access required for testing and reading of meters by previous arrangement with the Plant manager.

10.9 Carry out the directions of the Authorized Representatives with respect to the matters set forth in this Agreement.

11. IID'S GENERAL OBLIGATIONS

IID shall:

11.1 Design, acquire, construct, operate and maintain, or cause to be designed, acquired, constructed, operated and maintained, and shall own, a connecting transmission line between IID's transmission system and the Plant. Following the completion of such line, IID may bill and Producer shall pay IID's costs of designing,

6

acquiring and constructing such line. Producer shall have the right to audit IID's records and accounts to verify the cost of such line.

11.2 Accept the Plant's net electrical output for the account of SCE at the Point of Delivery and simultaneously deliver an equal amount of electric energy (less applicable transmission losses) to the SCE system at IID/SCE point(s) of interconnection.

11.3 Coordinate, to the greatest extent practicable, major overhaul and inspection outages of IID transmission facilities with Producer and notify Producer of any changes as far in advance as possible.

11.4 Carry out the directions of the Authorized Representative with respect to the matters set forth in this Agreement.

11.5 Operate its system in a manner consistent with applicable utility industry standards and good engineering practices.

12. BILLING

12.1 IID shall read the meters monthly according to its regular meter reading schedule beginning no more than thirty (30) days after the date that electric energy is first supplied to Producer. IID monthly shall send Producer within ten (10) working days after the meter is read a bill for

electric service. Producer shall pay IID the total amount billed within thirty (30) days of receipt of the bill.

12.2 IID shall bill Producer for Producer's consumption of energy from IID's resources in accordance with Rate Schedule GL or Rate Schedule A-2, as applicable, as it

7

may be revised from time to time. Copies of current Rate Schedule GL and current Rate Schedule A-2 are attached as Exhibit "A."

12.3 If Producer disputes a bill, payment shall be made as if no dispute existed pending resolution of the dispute by the Authorized Representatives. If the bill is determined to be in error, the disputed amount shall be refunded by IID including interest at the rate of one and one-half percent (1 1/2%) per month, compounded monthly, from the date of payment to the date the refund check or adjusted bill is mailed.

13. AUTHORIZED REPRESENTATIVES

13.1 Within thirty (30) days after the date this Agreement is signed, each Party shall designate, by written notice to the other Party, an Authorized Representative who is authorized to act in its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities for the Authorized Representatives. Either Party may, at any time, change the designation of its Authorized Representative by written notice to the other Party.

13.2 IID's Authorized Representative shall develop detailed written procedures necessary and convenient to administer this Agreement within six (6) months after the date signed. Such procedures shall be submitted to Producer's Authorized Representative for review, comment, discussion and concurrence before they are put into effect. Such procedures shall include, without limitation: (i) communication between Producer and IID's electric system dispatcher with regard to daily operating matters, (ii) billing and payments, (iii) specified equipment tests, and (iv) operating matters which

8

affect or may affect quality and reliability of service to electric customers and continuity of deliveries to SCE.

13.3 The Authorized Representative shall have no authority to modify any of the provisions of this Agreement.

14. METERS

14.1 All meters shall be sealed and the seal shall be broken only upon occasions when the meters are to be inspected, tested or adjusted.

14.2 IID shall inspect and test all meters upon their installation and at least once every year thereafter. If requested to do so by Producer, IID shall inspect or test a meter more frequently than every year, but the expense of such inspection or test shall be paid by Producer unless the meter is found to register inaccurately by more than two percent (2%) from the measurement made by a standard meter. Each Party shall give reasonable notice to the other Party of the time when any inspection or test shall take place and that Party may have representatives present at the test or inspection. If a meter is found to be inaccurate or defective, it shall be adjusted, repaired or replaced in order to provide accurate metering. All adjustments due to accurate meters shall be limited to the preceding six (6) months.

14.3 If a meter fails to register, or if the measurement made by a meter during a test varies by more than two percent (2%) from the measurement made by the standard meter used in the test, adjustment shall be made correcting all measurements made by the inaccurate meter for:

9

- (i) the actual period during which inaccurate measurements were made, if the period can be determined, or if not,
- (ii) the period immediately preceding the test of the meter equal to one-half (1/2) the time from the date of the last previous test of the meter; provided, however, that the period covered by the correction shall not exceed six (6) months.

14.4 Producer shall telemeter information to IID's Dispatch Center regarding the kilowatts, kilowatt-hours, kilovars and kilovar-hours delivered to or received from IID at the Point of Delivery over phone line leased by Producer.

IID shall purchase, own, and shall design, install, operate, maintain, or cause to be designed, installed, operated, and maintained, equipment to automatically transmit from the Plant to IID's Dispatch Center continuous values of Plant output expressed as megawatts, megavars and megawatt-hours. IID may thereupon bill and Producer shall promptly pay IID's cost of design, purchase and installation of said equipment. Producer shall have the right to audit IID's records and accounts to verify the cost of said equipment.

15. CONTINUITY OF SERVICE

IID shall not be obligated to accept and IID may require Producer to temporarily curtail, interrupt or reduce deliveries of energy upon advance notice to Producer, when such curtailment, interruption or reduction is required in order for IID to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its

10

system or if IID determines that such curtailment, interruption or reduction is necessary because of a System Emergency, forced outages or abnormal operating conditions on its system. IID shall use reasonable efforts to keep interruptions and curtailments to a minimum time.

16. LIABILITY

16.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

16.2 For the purpose of this Section 16, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing

11

body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

16.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

16.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

16.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

16.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

16.4 The phrase "employees having management or administrative responsibility," as used in Section 16.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

16.5 Subject to the foregoing provisions of this Section 16, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees

12

against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

17. UNCONTROLLABLE FORCES

Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or

approvals from any governmental agency or authority, which by exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of

13

its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

18. INTEGRATION AND AMENDMENTS

This Agreement constitutes the entire agreement between the Parties relating to the interconnection of Producer's Plant to IID's electric system, the acceptance of energy by IID from Producer and the providing of electric service by IID. No oral agreement or prior written agreement between the Parties shall be of any effect whatsoever; provided, however, that any arrangements agreed upon by the Authorized Representatives within the limits of their authority, and consistent with this Agreement shall be binding upon the Parties. All changes to this Agreement shall be in writing and shall be signed by an officer of each Party.

19. NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future; but the same shall continue and remain in full force and effect.

14

20. NO DEDICATION OF FACILITIES

Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof by the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

21. SUCCESSORS AND ASSIGNS

21.1 This Agreement shall be binding upon and inure to the benefit of the respective successors and assigns of the Parties.

21.2 This Agreement may be assigned by Producer only (i) to a purchaser or co-owner of the Plant or to a person who will operate the Plant pursuant to a contract or other arrangement with such purchaser and in either case with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for the Plant or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 21.2 may be amended, modified or waived without the prior written consent of each and every Party to the Funding and Construction Agreement (except for any Parties in

default thereunder.)

22. EFFECT OF SECTION HEADINGS

Section headings appearing in this Agreement are inserted for convenience only, and shall not be construed as interpretations of text.

15

23. GOVERNING LAW

This Agreement shall be interpreted, governed and construed under the laws of the State of California or the laws of the United States, as applicable.

24. ARBITRATION

24.1 Any dispute arising out of or relating to this Agreement, or the breach thereof, which is not resolved by the Parties acting through their Authorized Representatives shall be settled by arbitration to the extent permitted by the laws applicable to the Parties; provided, however, that no Party to the dispute shall be bound to any greater extent than any other Party to the dispute. Arbitration shall not apply to any dispute or matter that is within the jurisdiction of any regulatory agency.

24.2 Any demand for arbitration shall be made by written notice to the other Party setting forth in adequate detail the nature of the dispute, the issues to be arbitrated, the amount or amounts, if any, involved in the dispute, and the remedy sought. Within twenty (20) days from the receipt of such notice, the other Party may submit its own written statement of the dispute and may set forth in adequate detail any additional related matters or issues to be arbitrated.

24.3 Within thirty (30) days after delivery of the written notice demanding arbitration, the Parties acting through their Authorized Representatives shall meet for the purpose of selecting an arbitrator. The Parties may agree upon a single arbitrator, but in the event that they cannot agree, three arbitrators shall be used. Each Party shall designate one arbitrator, and the two arbitrators shall then select a third arbitrator. All

16

arbitrators shall be persons skilled and experienced in the field in which the dispute has arisen and no person shall be eligible for appointment as an arbitrator who is or has been an officer or employee of either of the Parties or otherwise interested in the matter to be arbitrated. Should either party refuse or neglect to appoint an arbitrator or to furnish the arbitrators with any papers or information demanded, the arbitrators are empowered, by both Parties, to proceed without the participation or assistance of that Party.

24.4 Except as otherwise provided in this Section, the arbitration shall be governed by the rules and practices of the American Arbitration Association, or a similar organization if the American Arbitration Association should not at the time exist.

24.5 Arbitration proceedings shall be held in Imperial, California, at a time and place to be selected by the arbitrators. The arbitrators shall hear evidence submitted by the Parties and may call for additional information which shall be furnished by the Party having such

information. The arbitrators shall have no authority to call for information not related to the issues included in the dispute or to determine other issues not in dispute.

24.6 If there is only one arbitrator, his decision shall be binding and conclusive on the Parties. If there are three arbitrators, the decision of any two shall be binding and conclusive. The decision of the arbitrators shall contain findings regarding the issues involved in the dispute, including the merits of the positions of the Parties, the materiality of any default, and the remedy or relief to which a Party shall be entitled. The

17

arbitrators may not grant any remedy or relief which is inconsistent with this Agreement, nor shall the arbitrators make findings or decide issues not in dispute.

24.7 The fees and expenses of the arbitrators shall be shared equally by the Parties, unless the decision of the arbitrators specifies one other apportionment. All other expenses and costs of the arbitration shall be borne by the Party incurring such expenses and costs.

24.8 Any decision or award granted by the arbitrators shall be final and judgement may be entered on it in any court of competent jurisdiction. This agreement to arbitrate shall be specifically enforceable.

25. ENTIRE AGREEMENT

25.1 The complete agreement of the Parties is set forth in this Agreement and all communications regarding subject interconnected operations whether oral or written, are hereby abrogated and withdrawn.

26. NOTICES

Any formal communication or notice in connection with this Agreement shall be in writing and shall be deemed properly given if delivered in person or sent first class mail, postage prepaid to the person specified below:

27. SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership, or joint venture, or impose a trust or partnership duty, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations under this Agreement.

28. SIGNATURE CLAUSE

The Parties have caused this Agreement to be executed in their respective names, in duplicate, by their respective officers hereunto this 21st day of March, 1989.

EXHIBIT I - DEVELOPMENTS AND METHODOLOGIES FOR TRANSMISSION
SERVICE CHARGES AND SCHEDULING FEE

EXHIBIT II- TRANSMISSION SERVICE FOR ORMESA I, ORMESA IE, AND ORMESA IH
GEOTHERMAL POWER PLANTS

2

1. PARTIES: The Parties to this Agreement are Imperial Irrigation District, organized under the Water Code of the State of California ("IID"), and Ormesa Geothermal ("Producer"), hereinafter sometimes referred to individually as "Party," and collectively as "Parties."

2. RECITALS: This Agreement is made with reference to the following facts, among others:

2.1 Ormesa I, Ormesa IE and Ormesa IH have caused to be constructed alternate energy resource facilities located in IID's service area.

2.2 Ormesa I, Ormesa IE and Ormesa IH and IID have entered into Plant Connection Agreements.

2.3 Producer desires to purchase, and IID desires to sell firm transmission service of power from the Plants to Edison's Mirage Substation subject to the terms and conditions specified herein.

2.4 Producer and IID are parties to that certain Funding and Construction Agreement dated June 29, 1987, providing for the funding and construction of transmission lines within IID's service area.

3. AGREEMENT: The Parties agree as follows:

4. DEFINITIONS: The following terms, when used herein with initial capitalization, whether in the singular or plural, shall have the meanings specified:

4.1 AGREEMENT: This IID - Producer Transmission Service Agreement for Alternative Resources between Ormesa Geothermal and IID, and all Exhibits attached hereto, as

3

such Agreement may subsequently be amended for firm transmission service between each Plant and Edison's Mirage Substation.

4.2 Authorized Representative: The representative of a party designated in accordance with Section 12.

4.3 Date of Initial Service: The date when the output from each Plant is first available for delivery to Edison, as notified to IID pursuant to Section 5.2.

4.4 Edison: Southern California Edison Company.

4.5 Funding and Construction Agreement: An agreement entered into by LED and others dated June 29, 1987, providing for the funding and construction of the Heber-Mirage Transmission Project, to which a form of this agreement is attached as Exhibit III.

4.6 Maximum Transmission Service Entitlement: The Maximum Transmission Service Entitlement as specified in Exhibit[s] II, Transmission Service, and in any subsequent Plant Amendments.

4.7 Normal Transmission Capacity: The maximum transfer capability, expressed in megawatts (MW), from the Point of Receipt to the Point of Delivery. Such transfer capability, as determined by IID, in its sole judgment, shall be consistent with prudent operating procedures and with generally-accepted engineering and operating practices in the electrical utility industry.

4.8 Operating Transmission Capability: The maximum transfer capability, expressed in megawatts (MW), available to IID at any given time to transmit power from Point of Receipt to Point of Delivery. Such transfer capability shall be as determined by IID in its sole judgment,

4

may vary from time-to-time depending on system conditions, and shall be consistent with prudent operating procedures and generally-accepted engineering and operating practices in the electrical utility industry.

4.9 Plants: The electrical generating alternative energy resource facilities developed by Producer and Ormesa IH respectively for which IID shall provide transmission service, as specified in Exhibit(s) II, Transmission Service, and in any subsequent Plant Amendments.

4.10 Plant Amendment: An agreement reached by the Parties, as an amendment to this Agreement, for transmission service to be provided by IID for a Plant added by Producer or for Producer's account subsequent to the execution of this Agreement.

4.11 Plant Connection Agreements: The agreements between IID and Producer and between IID and Ormesa IH respectively providing for the connection of the Plants to IID's electrical system, as specified in Exhibit[s] II, Transmission Service, and in any subsequent Plant Amendments. The existing Ormesa I, Ormesa IE and the Ormesa IH Plant each operate under a separate Plant Connection Agreement. This 38 MW Transmission Service Agreement covers all facilities because all plants deliver energy to IID at the same point.

4.12 Point(s) of Delivery: The 230-kV switchrack at the Mirage Substation site where Edison's 230-kV facilities are attached to IID's 230-kV Coachella-Mirage Line or other points as may be mutually agreed upon by the Authorized Representatives.

4.13 Point of Receipt: The point on the high voltage side of the Plant's transformer where IID's metering equipment measures the delivery of energy to the IID system.

5

4.14 Transmission Service Entitlement: The amount of transmission service, expressed in megawatts (MW), provided by IID for the Plants, from the applicable Point of Receipt to the applicable Point(s) of Delivery.

5. TERM:

5.1 Unless otherwise agreed to by the Parties, this Agreement shall be effective on the Completion Date for the transmission lines being constructed pursuant to the Funding and Construction Agreement, as the term Completion Date is defined in Article I thereof, and shall remain in effect until October 12, 2017. It is understood that if such Completion Date does not occur, this Agreement shall be of no force or effect.

5.2 The Transmission Service Entitlement to be provided by IID for each Plant shall be contingent on Plant Connection Agreements being in effect. Transmission service for each Plant shall commence on the Date of Initial Service of such Plant. Producer's Authorized Representative shall give IID's Authorized Representative written notice of the Date of Initial Service at least thirty (30) days before the Date of Initial Service.

6. TRANSMISSION SERVICE:

6.1 Subject to the terms of this Agreement, IID shall provide to Producer and Producer shall purchase from IID transmission service over IID's transmission system for each Plant. IID shall make arrangements with Edison to provide, at Producer's or Edison's expense, for the transfer of the electrical power to be delivered to Edison hereunder from IID's transmission system to Edison's transmission system at the Point(s) of Delivery.

6

6.2 The Transmission Service Entitlement for the Plants shall be the Maximum Transmission Service Entitlement for such Plants specified in Exhibit(s) II, Transmission Service, or any subsequent Plant Amendments, or such lesser amount as may be established as follows. Beginning on the Date of Initial Service for each Plant, Producer shall be entitled to specify a Transmission Service Entitlement by advance written notice given to IID's Authorized Representative at least thirty (30) days prior to the Date of Initial Service. The Transmission Service Entitlement to be provided by IID subsequent to the Date of Initial Service may be adjusted at six (6) month intervals thereafter until two (2) years after the Date of Initial Service for such Plant (the "Trial Period"). Such adjustments shall be made by having Producer's Authorized Representative give IID's Authorized Representative a ninety (90) day advance written notice as to the adjustment required. Beginning two (2) years after the Date of Initial Service for such Plant, Producer shall be entitled to specify a Transmission Service Entitlement for each successive two-year period during the remaining term of this Agreement by written notice from Producer's Authorized Representative to IID's Authorized Representative given at least ninety (90) days prior to the beginning of each two-year period.

6.3 The Transmission Service Entitlement selected by Producer for the Plants in accordance with Section 6.2 may be any amount which is less than or equal to the Maximum Transmission Service Entitlement for such Plant specified in Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments, provided, however, that the following shall apply to each Plant after the Trial Period for such Plant has elapsed.

6.3.1 If (i) the sum of the Transmission Service Entitlements for all Plants which are no longer in their Trial Periods is less than the sum of the Maximum Transmission Service Entitlements for such Plants, as shown in Exhibit(s) II, Transmission Service and in any

7

subsequent Plant Amendments, (the "Aggregate Maximum Transmission Service Entitlement"), and (ii) provided that IID requires additional capacity for transmitting electric power to Edison's transmission system for another person (or, following the Credit Installment Period as defined in the Funding and Construction Agreement, for itself) and (iii) IID's use of such required capacity would be in conflict with Producer's right as provided herein to increase the sum of the Transmission Service Entitlements for such Plants to the Aggregate Maximum Transmission Service Entitlement, then IID shall so notify Producer in writing, specifying in such notice the portion, expressed in megawatts (MW), of the excess of the Maximum Transmission Service Entitlement over the Transmission Service Entitlement for each such Plant which it desires to use as stated above. Producer shall have ninety (90) days after receipt of IID's notice to notify IID in writing that it desires to increase the Transmission Service Entitlements of such Plants. To the extent that Producer does not elect to increase the Transmission Service Entitlement of each such Plant up to the Maximum Transmission Service Entitlement for such Plant, IID shall be entitled to use such unclaimed capacity to satisfy the transmission requirements specified in its notice to Producer, and to the extent that IID does so, Producer shall thereafter be foreclosed from increasing the Transmission Service Entitlement for such Plant in a manner which would conflict with such usage by IID.

6.3.2 IID shall treat Producer and each other person who has entered into a transmission service agreement similar in substance to this Agreement in a fair and nondiscriminatory manner in requesting additional transmission capacity as provided In this Section 6.3. Without limiting the generality of the foregoing, IID shall request additional transmission capacity from Producer and such other persons on a pro rata basis, in proportion to the Aggregate Maximum Transmission Service Entitlement for each person less the sum of the

8

Transmission Service Entitlements for each of such persons' generating plants which is no longer in a Trial Period.

6.4 In the event that the Original Capacity Nomination designated by Producer (or the Participant associated with Producer) is adjusted pursuant to Section 3.07 of the Funding and Construction Agreement, the Parties agree to amend this Agreement in such a way that the sum of the Maximum Transmission Service Entitlements for all Plants hereunder is equal to such Original Capacity Nomination as so adjusted. As used in this Section 6.4, the terms Original Capacity Nomination and Participant shall have the meanings assigned to them in Article I of the Funding and Construction Agreement.

6.5 IID reserves the right to interrupt or curtail the transmission service provided hereunder as follows:

6.5.1 If the Operating Transmission Capability is reduced to less than Normal Transmission Capacity from a Point of Receipt to a Point of Delivery, and when continuity of service within IID's service area is not being jeopardized, IID may curtail the transmission service currently being provided from such Point of Receipt to such Point of Delivery, to an amount "A" determined by the following formula:

$$\frac{A = \text{Operating Transmission Capability}}{\text{Normal Transmission Capacity}} \times \text{Transmission Service Entitlement}$$

The transmission service shall be curtailed by multiplying the Transmission Service Entitlement in accordance with Exhibit[s] II, Transmission

Service and in any subsequent Plant Amendments by the same percentage (expressed as a decimal) as used in the determination of "A." However, any such curtailment shall occur only after IID has made all reasonable efforts to

9

eliminate the cause of the reduction in Operating Transmission Capability, and IID shall then employ reasonable efforts to eliminate expeditiously the cause of said reduction.

6.5.2 If continuity of service within IID's control area is being jeopardized, as determined by IID in its sole judgment, ITO may interrupt or curtail the transmission service provided hereunder to the extent necessary to avoid or eliminate such jeopardy; provided that (i) such interruptions or curtailments may be made so that IID may fully utilize all generating resources owned by it or available to it under contract in order to avoid damage to IID's electrical system caused by overloading, (ii) such interruption or curtailment shall occur only after IID has made all reasonable efforts to avoid or eliminate such jeopardy and (iii) to the extent feasible any curtailment of transmission service provided hereunder from a Point of Receipt to a Point of Delivery shall be made in accordance with the formula set forth in Section 6.5.1.

6.6 If IID's efforts do not avoid or eliminate such jeopardy, the Parties shall endeavor to develop some other arrangement to avoid or eliminate such jeopardy and minimize the effects of IID's interruption or curtailment on both parties.

6.7 In the event of any curtailments or interruptions made pursuant to Section 6.5.1 or Section 6.5.2, Producer shall, immediately after being orally notified by IID, reduce the electrical output of the Plants by the amounts requested by IID.

6.8 The transmission service to be provided by IID and purchased by Producer for the Plants shall not exceed the Transmission Service Entitlement for the Plants.

6.9 Subject to Section 6.5, IID shall, during the periods that IID has agreed to provide the transmission service at the specified Transmission Service Entitlements, accept hourly

10

scheduled energy deliveries at each Point of Receipt and simultaneously deliver the same amount of energy (less transmission losses as provided herein) at the Point(s) of Delivery mutually agreed upon by the Parties' dispatchers and/or schedulers.

6.10 Hourly scheduled energy deliveries at each Point of Receipt shall conform with the practices and procedures developed by the Parties' dispatchers and schedulers and agreed to by the Authorized Representatives.

7. TRANSMISSION LOSSES:

7.1 IID shall determine, by transmission power flow analysis, the electrical losses (expressed as a percent amount of hourly scheduled energy deliveries) associated with the electrical output from the Plants. Such analysis shall be performed by IID at its sole expense. The initial percent amount, for each Plant, representing the electrical losses as determined herein shall be as specified in Exhibit(s) II, Transmission Service and in any subsequent Plant Amendments.

7.2 Unless otherwise agreed to by Producer's and IID's schedulers and dispatchers, IID shall reduce the amount of all hourly scheduled energy

deliveries for Producer or Producer's account by the percent amount of such hourly deliveries for each Plant in accordance with Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments.

7.3 If either Party believes that there has been a significant change in IID's electrical system and the electrical losses associated with any Plant should be redetermined, either Party's Authorized Representative may submit a written request to the other Party's Authorized Representative that the electrical losses be redetermined. Following such request, a transmission

11

flow analysis shall be performed by IID as approved by the Authorized Representatives and paid for by the requesting Party. Whenever the percent amount for electrical losses is redetermined, such percent amount shall become effective as of the first day of the month following the date of such redetermination; provided, that such a redetermination may be no sooner than twelve (12) months after the most recent redetermination. Any redetermination of electrical losses made pursuant to this Section 7 shall be based on conditions in existence at the time of such redetermination.

7.4 Along with the monthly billing pursuant to Section 9.1, for the transmission service for each Plant, IID shall submit a monthly summary of hourly scheduled energy deliveries and of electrical losses for each Plant.

8. CHARGES:

8.1 For transmission service provided by IID, Producer shall pay IID at a rate to be determined by IID pursuant to the methodologies specified in Exhibit I.A. The initial rate is specified in Exhibit[s] II, Transmission Service and revisions thereto will be specified in any subsequent Plant Amendments. Any specific facility charge to Producer for connecting the Plant(s) to the IID transmission system shall be included only in the Plant Connection Agreement(s) between IID and Producer.

8.2 The transmission rate shall be reviewed annually and may be revised. Any revision of the rates shall be based on the methodologies in Exhibit I.A and on the conditions in existence at the time of the revision. Producer shall have the right to review any exhibits or work papers prepared by IID to revise the rates.

12

8.3 An initial monthly scheduling fee, as specified in Exhibit[s] II, Transmission Service and revisions thereto specified in any subsequent Plant Amendments, shall be paid by Producer to IID for those months in which there were scheduled energy deliveries from the Plant(s). The initial scheduling fee has been determined by IID pursuant to the methodology specified in Exhibit I.B. The scheduling fee shall be reviewed annually and may be revised. Any revision of the scheduling fee shall be based on the methodology in Exhibit I.B and on the conditions in existence at the time of the revision. Producer shall have the right to review any exhibits or work papers prepared by IID to revise the scheduling fee.

9. BILLING AND PAYMENT:

9.1 IID shall render bills to Producer, beginning in the month of the Date of Initial Service, on or before the fifteenth (15th) day of each month for the transmission service to be provided during the month. Producer shall pay such bills within twenty (20) days after receipt thereof.

All payments by Producer shall be sent to:

Imperial Irrigation District
c/o Manager, Finance and Accounting
P.O. Box 937
Imperial, California 92251

All billings by IID shall be sent to:

Ormesa Geothermal
P.O. Box 819
El Centro, California 92244

9.2 Either Party's Authorized Representative may at any time, by advance written notice to the other Party's Authorized Representative, change the address to which payments or billings shall be sent.

13

9.3 Bills which are not paid in full by said due date shall thereafter bear an additional charge of one and one-half percent (1-1/2%) per month, or the maximum legal rate of interest, whichever is less, compounded monthly on the unpaid amount prorated by days from the due date until payment is received by IID.

9.4 In the event any portion of any bill is disputed, the disputed amount shall be paid when due under protest. If the protested portion of the payment is found to be incorrect by the Authorized Representatives, the disputed amount shall be paid by IID to Producer, including interest at the rate of 1-1/2% per month, or the maximum legal rate, whichever is less, compounded monthly from the date of payment by Producer to the date the refund check or adjusted bill is received by Producer.

9.5 For a fractional part of a calendar month at the beginning or end of the period for which the transmission service is provided hereunder, the charge pursuant to Section 8.1 shall be proportionately adjusted by the ratio of days that service is furnished by IID to Producer during such month to the total number of days in such month.

9.6 The charge for the transmission service pursuant to Section 8.1 shall be proportionately reduced to the extent the duration of the interruptions or curtailments of the transmission service which may occur pursuant to Section 6.5.1 or Section 6.5.2 exceed a cumulative total of twenty-four (24) hours during any calendar month based on 730 hours per month representing the full transmission service charge. The amount of such prorata reduction in any month shall reflect the duration and amount of such interruptions or curtailments which exceed said cumulative 24 hours. Such prorata reduction shall be reflected as a credit to Producer as soon as possible in a subsequent monthly bill.

14

9.7 The charge for the transmission service shall not be reduced if IID can deliver, but Edison's transmission system cannot receive, the hourly scheduled energy deliveries independent of the duration of time this condition exists.

10. LIABILITY:

10.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party)

from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

10.2 For the purpose of this Section 10, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

15

10.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

10.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

10.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

10.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

10.4 The phrase "employees having management or administrative responsibility," as used in Section 10.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

10.5 Subject to the foregoing provisions of this Section 10, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of persons, which directly or indirectly arise out of the Indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such

16

losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

11. AUDITING

11.1 IID shall make its books, records, and other supporting information, as requested, available to Producer or to Producer's designated contracted representative(s) with a CPA firm, for the purpose of auditing any charges or accounts to be kept by IID hereunder. All such audits shall be undertaken at reasonable times and in conformance with generally-accepted auditing standards.

11.2 If as a result of such audits Producer believes its charges or accounts should be adjusted, the findings shall be presented to the Authorized

Representatives. If the Authorized Representatives agree that any audit finding should result in a revision of charges or accounts, such revisions shall be retroactive to the first billing for such charges and accounts and shall be made as soon as practical after determination.

11.3 The amount of any unresolved dispute shall accrue interest at the rate of one and one-half percent (1-1/2%) per month, or the maximum legal rate, whichever is less, compounded monthly for any amount of money ultimately refunded to Producer.

12. AUTHORIZED REPRESENTATIVES: Within thirty (30) calendar days after the Completion Date, as defined in Article I of the Funding and Construction Agreement, each Party shall designate by written notice to the other Party a representative who is authorized to act on its behalf in the implementation of this Agreement. Either Party may at any time change the designation of its Authorized Representative by written notice to the other Party.

17

13. NO DEDICATION OF FACILITIES: Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof of the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

14. NON-WAIVER: None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

15. NO THIRD PARTY RIGHTS: The Parties do not intend to create rights in or to grant remedies to any Third Party or others as a beneficiary of this Agreement or of any duty, covenant, obligation or undertaking established hereunder.

16. UNCONTROLLABLE FORCES: Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities

18

and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, the failure or inability of Edison to receive the electric power to be transmitted hereunder at the Point(s) of Delivery, which by exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

17. ASSIGNMENTS:

17.1 Any assignment by Producer of its interest in this Agreement which is made without the written consent of IID (which shall not be unreasonably withheld) shall not relieve Producer from its primary liability for any of its duties and obligations hereunder, and in the event of any such assignment Producer shall continue to remain primarily liable for payment of any and all money due IID hereunder and for the performance and observance of all other covenants, duties and obligations to be performed and observed hereunder by it to the same extent as though no assignment has been made.

17.2 Notwithstanding any provision of Section 17.1 to the contrary, prior to the end of the Credit Installment Period, as defined in Article I of the Funding and Construction Agreement, Producer's right to transmission service under this Agreement with respect to one or more of the Plants may be assigned only (i) to a purchaser or co-owner of such Plants or to a person who will

19

operate such Plants pursuant to a contract or other arrangement with such purchaser and in either case only with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for such Plants or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 17.2 may be amended, modified or waived without the prior written consent of each and every party to the Funding and Construction Agreement (except for any parties in default thereunder).

17.3 Whenever an assignment of Producer's interest in this Agreement is made with the written consent of IID, Producer's assignee shall expressly assume in writing the duties and obligations hereunder of Producer and, within thirty (30) days after any such assignment and assumption of duties and obligations, Producer shall furnish or cause to be furnished to IID a true and correct copy of such assignment and assumption of duties and obligations.

17.4 Subject to the foregoing restrictions on assignments, all of the terms of this Agreement shall be binding upon and inure to the benefit of both of the Parties and their respective successors, permitted assigns and legal representatives.

18. GOVERNING LAW: This Agreement shall be interpreted, governed by and construed under the laws of the State of California or the laws of the United States, as applicable.

19. NOTICES: Any notice, demand or request provided for in this Agreement, or served, given or made in connection with it, shall be in writing and shall be deemed properly served, given or made if delivered in person or sent by United States mail, postage prepaid, to the persons specified below unless otherwise provided for in this Agreement:

20

All payments by Producer shall be sent to:

Imperial Irrigation District
c/o General Manager
P.O. Box 937
Imperial, California 92251

All billings by IID shall be sent to:

Ormesa Geothermal
c/o Plant Manager

P.O. Box 819
El Centro, California 92244

Either Party may at any time, by notice to the other Party, change the designation or address of the person so specified as the one to receive notices pursuant to this Agreement.

21

20. SIGNATURE CLAUSE: The signatories hereto represent that they have been appropriately authorized to enter into this IID-Ormesa Geothermal Transmission Service Agreement for Alternative Resources (Standard Form) on behalf of the Party for whom they signed. This Agreement is hereby executed as of the 3rd day of October, 1989.

EXHIBIT I	- DEVELOPMENTS AND METHODOLOGIES FOR TRANSMISSION SERVICE CHARGES AND SCHEDULING	
EXHIBIT II	- TRANSMISSION SERVICE FOR GEO EAST MESA LIMITED PARTNERSHIP	

1. PARTIES: The Parties to this Agreement are Imperial Irrigation District, organized under the Water Code of the State of California ("IID"), and Geo East Mesa Limited Partnership, L. P. ("Producer"), hereinafter sometimes referred to individually as "Party," and collectively as "Parties."

2. RECITALS: This Agreement is made with reference to the following facts, among others:

2.1 Producer has caused to be constructed or intends to construct an alternative energy resource facility located in IID's service area.

2.2 Producer and IID have entered into a Plant Connection Agreement.

2.3 Producer desires to purchase, and IID desires to sell firm transmission service of power from the Plant to Edison's Mirage Substation subject to the terms and conditions specified herein.

2.4 Producer and IID are parties to that certain Funding and Construction Agreement dated June 29, 1987, providing for the funding and construction of transmission lines within IID's service area.

3. AGREEMENT: The Parties agree as follows:

4. DEFINITIONS: The following terms, when used herein with initial capitalization, whether in the singular or plural, shall have the meanings specified:

4.1 Agreement: This IID - Producer Transmission Service Agreement for Alternative Resources between Geo East Mesa Limited Partnership, L. P. and IID, and all

1

Exhibits attached hereto, as such Agreement may subsequently be amended for firm transmission service between each Plant and Edison's Mirage Substation.

4.2 Authorized Representative: The representative of a party designated in accordance with Section 12.

4.3 Date of Initial Service: The date when the output from each Plant is first available for delivery to Edison, as notified to IID pursuant to Section 5.2.

4.4 Edison: Southern California Edison Company.

4.5 Funding and Construction Agreement: An agreement entered into by IID and others dated June 29, 1987, providing for the funding and construction of the Heber-Mirage Transmission Project, to which a form of this agreement is attached as Exhibit III.

4.6 Maximum Transmission Service Entitlement: The Maximum Transmission Service Entitlement for each Plant, as specified in Exhibit[s] II, Transmission Service, and in any subsequent Plant Amendments.

4.7 Normal Transmission Capacity: The maximum transfer capability, expressed in megawatts (MW), from the Point of Receipt to the Point of Delivery. Such transfer capability, as determined by IID, in its sole judgment, shall be consistent with prudent operating procedures and with generally-accepted engineering and operating practices in the electrical utility industry.

4.8 Operating Transmission Capability: The maximum transfer capability, expressed in megawatts (MW), available to IID at any given time to transmit

power from Point of Receipt to Point of Delivery. Such transfer capability shall be as determined by

2

IID in its sole judgment, may vary from time-to-time depending on system conditions, and shall be consistent with prudent operating procedures and generally-accepted engineering and operating practices in the electrical utility industry.

4.9 Plant: An electrical generating alternative energy resource facility developed by Producer for which IID shall provide transmission service, as specified in Exhibit[s] II, Transmission Service, and in any subsequent Plant Amendments.

4.10 Plant Amendment: An agreement reached by the Parties, as an amendment to this Agreement, for transmission service to be provided by IID for a Plant added by Producer or for Producer's account subsequent to the execution of this Agreement.

4.11 Plant Connection Agreement: An agreement between IID and Producer providing for the connection of a Plant to IID's electrical system, as specified in Exhibit[s] II, Transmission Service, and in any subsequent Plant Amendments.

4.12 Point(s) of Delivery: The 230-kV switchrack at the Mirage Substation site where Edison's 230-kV facilities are attached to IID's 230-kV Coachella-Mirage Line or other points as may be mutually agreed upon by the Authorized Representatives.

4.13 Point of Receipt: The point on the high voltage side of the Plant's transformer where IID's metering equipment measures the delivery of energy to the IID system.

4.14 Transmission Service Entitlement: The amount of transmission service, expressed in megawatts (MW), provided by IID for each Plant, from the applicable Point of Receipt to the applicable Point(s) of Delivery.

3

5. TERM:

5.1 Unless otherwise agreed to by the Parties, this Agreement shall be effective on the Completion Date for the transmission lines being constructed pursuant to the Funding and Construction Agreement, as the term Completion Date is defined in Article I thereof, and shall remain in effect until April 15, 2015. It is understood that if such Completion Date does not occur, this Agreement shall be of no force or effect.

5.2 The Transmission Service Entitlement to be provided by IID for each Plant shall be contingent on a Plant Connection Agreement being in effect. Transmission service for each Plant shall commence on the Date of Initial Service of such Plant. Producer's Authorized Representative shall give IID's Authorized Representative written notice of the Date of Initial Service at least thirty (30) days before the Date of Initial Service.

6. TRANSMISSION SERVICE:

6.1 Subject to the terms of this Agreement, IID shall provide to Producer and Producer shall purchase from IID transmission service over IID's transmission system for each Plant. IID shall make arrangements with Edison to

provide, at Producer's or Edison's expense, for the transfer of the electrical power to be delivered to Edison hereunder from IID's transmission system to Edison's transmission system at the Point(s) of Delivery.

6.2 The Transmission Service Entitlement for each Plant shall be the Maximum Transmission Service Entitlement for such Plant specified in Exhibit[s] II, Transmission

4

Service, or any subsequent Plant Amendments, or such lesser amount as may be established as follows. Beginning on the Date of Initial Service for each Plant, Producer shall be entitled to specify a Transmission Service Entitlement by advance written notice given to IID's Authorized Representative at least thirty (30) days prior to the Date of Initial Service. The Transmission Service Entitlement to be provided by IID subsequent to the Date of Initial Service may be adjusted at six (6) month intervals thereafter until two (2) years after the Date of Initial Service for such Plant (the "Trial Period"). Such adjustments shall be made by having Producer's Authorized Representative give IID's Authorized Representative a ninety (90) day advance written notice as to the adjustment required. Beginning two (2) years after the Date of Initial Service for such Plant, Producer shall be entitled to specify a Transmission Service Entitlement for each successive two-year period during the remaining term of this Agreement by written notice from Producer's Authorized Representative to IID's Authorized Representative given at least ninety (90) days prior to the beginning of each two-year period.

6.3 The Transmission Service Entitlement selected by Producer for each Plant in accordance with Section 6.2 may be any amount which is less than or equal to the Maximum Transmission Service Entitlement for such Plant specified in Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments, provided, however, that the following shall apply to each Plant after the Trial Period for such Plant has elapsed.

6.3.1 If (i) the sum of the Transmission Service Entitlements for all Plants which are no longer in their Trial Periods is less than the sum of the Maximum

5

Transmission Service Entitlements for such Plants, as shown in Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments, (the "Aggregate Maximum Transmission Service Entitlement"), and (ii) provided that IID requires additional capacity for transmitting electric power to Edison's transmission system for another person (or, following the Credit Installment Period as defined in the Funding and Construction Agreement, for itself) and (iii) IID's use of such required capacity would be in conflict with Producer's right as provided herein to increase the sum of the Transmission Service Entitlements for such Plants to the Aggregate Maximum Transmission Service Entitlement, then IID shall so notify Producer in writing, specifying in such notice the portion, expressed in megawatts (MW), of the excess of the Maximum Transmission Service Entitlement over the Transmission Service Entitlement for each such Plant which it desires to use as stated above. Producer shall have ninety (90) days after receipt of IID's notice to notify IID in writing that it desires to increase the Transmission Service Entitlements of such Plants. To the extent that Producer does not elect to increase the Transmission Service Entitlement of each such Plant up to the Maximum Transmission Service Entitlement for such Plant, IID shall be entitled to use such unclaimed capacity to satisfy the transmission requirements specified in its notice to Producer, and to the extent that IID does so, Producer shall thereafter be foreclosed from increasing the

Transmission Service Entitlement for such Plant in a manner which would conflict with such usage by IID.

6

6.3.2 IID shall treat Producer and each other person who has entered into a transmission service agreement similar in substance to this Agreement in a fair and nondiscriminatory manner in requesting additional transmission capacity as provided in this Section 6.3. Without limiting the generality of the foregoing, IID shall request additional transmission capacity from Producer and such other persons on a pro rata basis, in proportion to the Aggregate Maximum Transmission Service Entitlement for each person less the sum of the Transmission Service Entitlements for each of such persons' generating plants which is no longer in a Trial Period.

6.4 In the event that the Original Capacity Nomination designated by Producer (or the Participant associated with Producer) is adjusted pursuant to Section 3.07 of the Funding and Construction Agreement, the Parties agree to amend this Agreement in such a way that the sum of the Maximum Transmission Service Entitlements for all Plants hereunder is equal to such Original Capacity Nomination as so adjusted. As used in this Section 6.4, the terms Original Capacity Nomination and Participant shall have the meanings assigned to them in Article I of the Funding and Construction Agreement.

6.5 IID reserves the right to interrupt or curtail the transmission service provided hereunder as follows:

6.5.1 If the Operating Transmission Capability is reduced to less than Normal Transmission Capacity from a Point of Receipt to a Point of Delivery, and when continuity of service within IID's service area is not being jeopardized, IID may curtail

7

the transmission service currently being provided from such Point of Receipt to such Point of Delivery, to an amount "A" determined by the following formula:

$$A = \frac{\text{Operating Transmission Capability}}{\text{Normal Transmission Capacity}} \times \text{Transmission Service Entitlement}$$

The transmission service for each Plant affected shall be curtailed by multiplying the Transmission Service Entitlement in accordance with Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments by the same percentage (expressed as a decimal) as used in the determination of "A." However, any such curtailment shall occur only after IID has made all reasonable efforts to eliminate the cause of the reduction in Operating Transmission Capability, and IID shall then employ reasonable efforts to eliminate expeditiously the cause of said reduction.

6.5.2 If continuity of service within IID's control area is being jeopardized, as determined by IID in its sole judgment, IID may interrupt or curtail the transmission service provided hereunder to the extent necessary to avoid or eliminate such jeopardy; provided that (i) such interruptions or curtailments may be made so that IID may fully utilize all generating resources owned by it or available to it under contract in order to avoid damage to IID's electrical system caused by overloading, (ii) such interruption or curtailment

shall occur only after IID has made all reasonable efforts to avoid or eliminate such jeopardy and (iii) to the extent feasible any curtailment of transmission service provided hereunder from a Point of Receipt to a Point of Delivery shall be made in accordance with the formula set forth in Section 6.5.1.

8

6.6 If IID's efforts do not avoid or eliminate such jeopardy, the Parties shall endeavor to develop some other arrangement to avoid or eliminate such jeopardy and minimize the effects of IID's interruption or curtailment on both parties.

6.7 In the event of any curtailments or interruptions made pursuant to Section 6.5.1 or Section 6.5.2, Producer shall, immediately after being orally notified by IID, reduce the electrical output of the Plants by the amounts requested by IID.

6.8 The transmission service to be provided by IID and purchased by Producer for each Plant shall not exceed the Transmission Service Entitlement for that Plant.

6.9 Subject to Section 6.5, IID shall, during the periods that IID has agreed to provide the transmission service at the specified Transmission Service Entitlements, accept hourly scheduled energy deliveries at each Point of Receipt and simultaneously deliver the same amount of energy (less transmission losses as provided herein) at the Point(s) of Delivery mutually agreed upon by the Parties' dispatchers and/or schedulers.

6.10 Hourly scheduled energy deliveries at each Point of Receipt shall conform with the practices and procedures developed by the Parties' dispatchers and schedulers and agreed to by the Authorized Representatives.

7. TRANSMISSION LOSSES:

7.1 IID shall determine, by transmission power flow analysis, the electrical losses (expressed as a percent amount of hourly scheduled energy deliveries) associated with the electrical output from each Plant. Such analysis shall be performed by IID at its sole expense. The initial percent amount, for each Plant, representing the electrical losses as

9

determined herein shall be as specified in Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments.

7.2 Unless otherwise agreed to by Producer's and IID's schedulers and dispatchers, IID shall reduce the amount of all hourly scheduled energy deliveries for Producer or Producer's account by the percent amount of such hourly deliveries for each Plant in accordance with Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments.

7.3 If either Party believes that there has been a significant change in IID's electrical system and the electrical losses associated with any Plant should be redetermined, either Party's Authorized Representative may submit a written request to the other Party's Authorized Representative that the electrical losses be redetermined. Following such request, a transmission flow analysis shall be performed by IID as approved by the Authorized Representatives and paid for by the requesting Party. Whenever the percent amount for electrical losses is redetermined, such percent amount shall become effective as of the first day of the month following the date of such redetermination; provided,

that such a redetermination may be no sooner than twelve (12) months after the most recent redetermination. Any redetermination of electrical losses made pursuant to this Section 7 shall be based on conditions in existence at the time of such redetermination.

10

7.4 Along with the monthly billing pursuant to Section 9.1, for the transmission service for each Plant, IID shall submit a monthly summary of hourly scheduled energy deliveries and of electrical losses for each Plant.

8. CHARGES:

8.1 For transmission service provided by IID, Producer shall pay IID at a rate to be determined by IID pursuant to the methodologies specified in Exhibit I.A. The initial rate is specified in Exhibit[s] II, Transmission Service and revisions thereto will be specified in any subsequent Plant Amendments. Any specific facility charge to Producer for connecting the Plant(s) to the IID transmission system shall be included only in the Plant Connection Agreement(s) between IID and Producer.

8.2 The transmission rate shall be reviewed annually and may be revised. Any revision of the rates shall be based on the methodologies in Exhibit I.A and on the conditions in existence at the time of the revision. Producer shall have the right to review any exhibits or work papers prepared by IID to revise the rates.

8.3 An initial monthly scheduling fee, as specified in Exhibit[s] II, Transmission Service and revisions thereto specified in any subsequent Plant Amendments, shall be paid by Producer to IID for those months in which there were scheduled energy deliveries from the Plant(s). The initial scheduling fee has been determined by IID pursuant to the methodology specified in Exhibit I.B. The scheduling fee shall be reviewed annually and may be revised. Any revision of the scheduling fee shall be based on the methodology in Exhibit I.B and on the conditions in existence at the time of the revision. Producer shall

11

have the right to review any exhibits or work papers prepared by IID to revise the scheduling fee.

9. BILLING AND PAYMENT:

9.1 IID shall render bills to Producer, beginning in the month of the Date of Initial Service, on or before the fifteenth (15th) day of each month for the transmission service to be provided during the month. Producer shall pay such bills within twenty (20) days after receipt thereof.

All payments by Producer shall be sent to:

Imperial Irrigation District
c/o Manager, Finance and Accounting
P.O. Box 937
Imperial, California 92251

All billings by IID shall be sent to:

Geo East Mesa Limited Partnership
P.O. Box 748
Holtville, CA 92250

9.2 Either Party's Authorized Representative may at any time, by advance written notice to the other Party's Authorized Representative, change the address to which payments or billings shall be sent.

9.3 Bills which are not paid in full by said due date shall thereafter bear an additional charge of one and one-half percent (1-1/2%) per month, or the maximum legal rate of interest, whichever is less, compounded monthly on the unpaid amount prorated by days from the due date until payment is received by IID.

12

9.4 In the event any portion of any bill is disputed, the disputed amount shall be paid when due under protest. If the protested portion of the payment is found to be incorrect by the Authorized Representatives, the disputed amount shall be paid by IID to Producer, including interest at the rate of 1-1/2% per month, or the maximum legal rate, whichever is less, compounded monthly from the date of payment by Producer to the date the refund check or adjusted bill is received by Producer.

9.5 For a fractional part of a calendar month at the beginning or end of the period for which the transmission service is provided hereunder, the charge pursuant to Section 8.1 shall be proportionately adjusted by the ratio of days that service is furnished by IID to Producer during such month to the total number of days in such month.

9.6 The charge for the transmission service pursuant to Section 8.1 shall be proportionately reduced to the extent the duration of the interruptions or curtailments of the transmission service which may occur pursuant to Section 6.5.1 or Section 6.5.2 exceed a cumulative total of twenty-four (24) hours during any calendar month based on 730 hours per month representing the full transmission service charge. The amount of such prorata reduction in any month shall reflect the duration and amount of such interruptions or curtailments which exceed said cumulative 24 hours. Such prorata reduction shall be reflected as a credit to Producer as soon as possible in a subsequent monthly bill.

13

9.7 The charge for the transmission service shall not be reduced if IID can deliver, but Edison's transmission system cannot receive, the hourly scheduled energy deliveries independent of the duration of time this condition exists.

10. LIABILITY:

10.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and

employees from any such liability.

10.2 For the purpose of this Section 10, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

14

10.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

10.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

10.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

10.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

10.4 The phrase "employees having management or administrative responsibility," as used in Section 10.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing controlling and supervising such Party's performance under this Agreement with responsibility for results.

10.5 Subject to the foregoing provisions of this Section 10, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property,

15

or injury or death of persons, which directly or indirectly arise out of the indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

11. AUDITING

11.1 IID shall make its books, records, and other supporting information, as requested, available to Producer or to Producer's designated contracted representative(s) with a CPA firm, for the purpose of auditing any charges or accounts to be kept by IID hereunder. All such audits shall be undertaken at reasonable times and in conformance with generally-accepted auditing standards.

11.2 If as a result of such audits Producer believes its charges or accounts should be adjusted, the findings shall be presented to the Authorized Representatives. If the Authorized Representatives agree that any audit finding should result in a revision of charges or accounts, such revisions shall be retroactive to the first billing for such charges and accounts and shall be made

as soon as practical after determination.

11.3 The amount of any unresolved dispute shall accrue interest at the rate of one and one-half percent (1-1/2%) per month, or the maximum legal rate, whichever is less, compounded monthly for any amount of money ultimately refunded to Producer.

12. AUTHORIZED REPRESENTATIVES: Within thirty (30) calendar days after the Completion Date, as defined in Article I of the Funding and Construction Agreement, each Party shall designate by written notice to the other Party a representative who is

16

authorized to act on its behalf in the implementation of this Agreement. Either Party may at any time change the designation of its Authorized Representative by written notice to the other Party.

13. NO DEDICATION OF FACILITIES: Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof of the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

14. NON-WAIVER: None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

15. NO THIRD PARTY RIGHTS: The Parties do not intend to create rights in or to grant remedies to any Third Party or others as a beneficiary of this Agreement or of any duty, covenant, obligation or undertaking established hereunder.

16. UNCONTROLLABLE FORCES: Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted

17

to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, the failure or inability of Edison to receive the electric power to be transmitted hereunder at the Point(s) of Delivery, which by exercise of due diligence such Party could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force

shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

17. ASSIGNMENTS:

17.1 Any assignment by Producer of its interest in this Agreement which is made without the written consent of IID (which shall not be unreasonably withheld) shall not relieve Producer from its primary liability for any of its duties and obligations hereunder, and in the event of any such assignment Producer shall continue to remain primarily

18

liable for payment of any and all money due IID hereunder and for the performance and observance of all other covenants, duties and obligations to be performed and observed hereunder by it to the same extent as though no assignment has been made.

17.2 Notwithstanding any provision of Section 17.1 to the contrary, prior to the end of the Credit Installment Period, as defined in Article I of the Funding and Construction Agreement, Producer's right to transmission service under this Agreement with respect to one or more of the Plants may be assigned only (i) to a purchaser or co-owner of such Plants or to a person who will operate such Plants pursuant to a contract or other arrangement with such purchaser and in either case only with the prior written consent of IID (which shall not be unreasonably withheld) or (ii) for security purposes, to a bank or other entity which provides financing for such Plants or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 17.2 may be amended, modified or waived without the prior written consent of each and every party to the Funding and Construction Agreement (except for any parties in default thereunder).

17.3 Whenever an assignment of Producer's interest in this Agreement is made with the written consent of IID, Producer's assignee shall expressly assume in writing the duties and obligations hereunder of Producer and, within thirty (30) days after any such assignment and assumption of duties and obligations, Producer shall furnish or cause to be furnished to IID a true and correct copy of such assignment and assumption of duties and obligations.

19

17.4 Subject to the foregoing restrictions on assignments, all of the terms of this Agreement shall be binding upon and inure to the benefit of both of the Parties and their respective successors, permitted assigns and legal representatives.

18. GOVERNING LAW: This Agreement shall be interpreted, governed by and construed under the laws of the State of California or the laws of the United States, as applicable.

19. NOTICES: Any notice, demand or request provided for in this Agreement, or served, given or made in connection with it, shall be in writing and shall be deemed properly served, given or made if delivered in person or sent by United States mail, postage prepaid, to the persons specified below unless otherwise provided for in this Agreement:

Imperial Irrigation District
c/o General Manager
P.O. Box 937
Imperial, California 92251

Geo East Mesa Limited Partnership
P.O. Box 748
Holtville, California 92250

Either Party may at any time, by notice to the other Party, change the designation or address of the person so specified as the one to receive notices pursuant to this Agreement.

20

20. SIGNATURE CLAUSE: The signatories hereto represent that they have been appropriately authorized to enter into this IID-Geo East Mesa Limited Partnership Transmission Service Agreement for Alternative Resources (Standard Form) on behalf of the Party for whom they signed. This Agreement is hereby executed as of the 21st day of March, 1989.

EXHIBIT I - DEVELOPMENTS AND METHODOLOGIES FOR TRANSMISSION SERVICE CHARGES AND SCHEDULING FEE

EXHIBIT II - TRANSMISSION SERVICE FOR GEO EAST MESA LIMITED PARTNERSHIP

1. PARTIES: The Parties to this Agreement are Imperial Irrigation District, organized under the Water Code of the State of California ("IID") and Geo East Mesa Limited Partnership, L. P. ("Producer"), hereinafter sometimes referred to individually as "Party," and collectively as "Parties."

2. RECITALS: This Agreement is made with reference to the following facts, among others:

2.1 Producer has caused to be constructed or intends to construct an alternative energy resource facility located in IID's service area.

2.2 Producer and IID have entered into a Plant Connection Agreement.

2.3 Producer desires to purchase, and IID desires to sell firm transmission service of power from the Plant to Edison's Mirage Substation subject to the terms and conditions specified herein.

2.4 Producer and IID are parties to that certain Funding and Construction Agreement dated June 29, 1987, providing for the funding and construction of transmission lines within IID's service area.

3. AGREEMENT: The Parties agree as follows:

4. DEFINITIONS: The following terms, when used herein with initial capitalization, whether in the singular or plural, shall have the meanings specified:

4.1 Agreement: This IID - Producer Transmission Service Agreement for Alternative Resources between Geo East Mesa Limited Partnership, L. P. and IID, and all Exhibits attached hereto, as such Agreement may subsequently be amended for firm transmission service between each Plant and Edison's Mirage Substation.

4.2 Authorized Representative: The representative of a party designated in accordance with Section 12.

4.3 Date of Initial Service: The date when the output from each Plant is first available for delivery to Edison, as notified to IID pursuant to Section 5.2.

4.4 Edison: Southern California Edison Company.

4.5 Funding and Construction Agreement: An agreement entered into by IID and others dated June 29, 1987, providing for the funding and construction of the Heber-Mirage Transmission Project, to which a form of this agreement is attached as Exhibit III.

4.6 Maximum Transmission Service Entitlement: The Maximum Transmission Service Entitlement for each Plant, as specified in Exhibit(s) II, Transmission Service, and in any subsequent Plant Amendments.

4.7 Normal Transmission Capacity: The maximum transfer capability, expressed in megawatts (NMW), from the Point of Receipt to the Point of Delivery. Such transfer capability, as determined by IID, in its sole judgment, shall be consistent with prudent operating procedures and with generally-accepted engineering and operating practices in the electrical utility industry.

4.8 Operating Transmission Capability: The maximum transfer capability, expressed in megawatts (MW), available to IID at any given time to transmit power from Point of Receipt to Point of Delivery. Such transfer capability shall be as determined by IID in its sole judgment, may vary from time-to-time depending on system conditions, and shall be consistent with prudent operating procedures and generally-accepted engineering and operating practices in the electrical utility industry.

4.9 Plant: An electrical generating alternative energy resource facility developed by Producer for which IID shall provide transmission service, as specified in Exhibit(s) II, Transmission Service, and in any subsequent Plant Amendments.

4.10 Plant Amendment: An agreement reached by the Parties, as an amendment to this Agreement, for transmission service to be provided by IID for a Plant added by Producer or for Producer's account subsequent to the execution of this Agreement.

4.11 Plant Connection Agreement: An agreement between IID and Producer providing for the connection of a Plant to IID's electrical system, as specified in Exhibit(s) II, Transmission Service, and in any subsequent Plant Amendments.

4.12 Point(s) of Delivery: The 230-kV switchrack at the Mirage Substation site where Edison's 230-kV facilities are attached to IID's 230-kV Coachella-Mirage Line or other points as may be mutually agreed upon by the Authorized Representatives.

4.13 Point of Receipt: The point on the high voltage side of the Plant's transformer where IID's metering equipment measures the delivery of energy to the IID system.

4.14 Transmission Service Entitlement: The amount of transmission service, expressed in megawatts (MW), provided by IID for each Plant, from the applicable Point of Receipt to the applicable Point(s) of Delivery.

5. TERM:

5.1 Unless otherwise agreed to by the Parties, this Agreement shall be effective on the Completion Date for the transmission lines being constructed pursuant to the Funding and Construction Agreement, as the term Completion Date is defined in Article I thereof, and shall remain in effect until April 15, 2015. It is understood that if such Completion Date does not occur, this Agreement shall be of no force or effect.

5.2 The Transmission Service Entitlement to be provided by IID for each Plant shall be contingent on a Plant Connection Agreement being in effect. Transmission service for each Plant shall be contingent on the Date of initial Service of such Plant. Producer's Authorized

Representative shall give IID's Authorized Representative written notice of the Date of Initial Service at least thirty (30) days before the Date of Initial Service.

6. TRANSMISSION SERVICE:

6.1 Subject to the terms of this Agreement, IID shall provide to Producer and Producer shall purchase from IID transmission service over IID's transmission system for each Plant. IID shall make arrangements with Edison to provide, at Producer's or Edison's expense, for the transfer of the electrical power to be delivered to Edison hereunder from IID's transmission system to Edison's transmission system at the Point(s) of Delivery.

6.2 The Transmission Service Entitlement for each Plant shall be the Maximum Transmission Service Entitlement for such Plant specified in Exhibit(s) II, Transmission Service, or any subsequent Plant Amendments, or such lesser amount as may be established as follows. Beginning on the Date of Initial Service for each Plant, Producer shall be entitled to specify a Transmission Service Entitlement by advance written notice given to IID's Authorized Representative at least thirty (30) days prior to the Date of Initial Service. The Transmission Service Entitlement to be provided by IID subsequent to the Date of Initial Service may be adjusted at six (6) month intervals thereafter until two (2) years after the Date of Initial Service for such Plant (the "Trial

Period"). Such adjustments shall be made by having Producer's Authorized Representative give IID's Authorized Representative a ninety (90) day advance written notice as to the adjustment required. Beginning two (2) years after the Date of Initial Service for such Plant, Producer shall be entitled to specify a Transmission Service Entitlement for each successive two-year period during the remaining term of this Agreement by written notice from Producer's Authorized Representative to IID's Authorized Representative given at least ninety (90) days prior to the beginning of each two-year period.

6.3 The Transmission Service Entitlement selected by Producer for each Plant in accordance with Section 6.2 may be any amount which is less than or equal to the Maximum Transmission Service Entitlement for such Plant specified in Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments, provided, however, that the following shall apply to each Plant after the Trial Period for such Plant has elapsed.

6.3.1 If (i) the sum of the Transmission Service Entitlements for all Plants which are no longer in their Trial Periods is less than the sum of the Maximum Transmission Service Entitlements for such Plants, as shown in Exhibit(s) II, Transmission Service and in any subsequent Plant Amendments, (the "Aggregate Maximum Transmission Service Entitlement") and (ii) provided that IID requires additional capacity for transmitting electric power to Edison's transmission system for another person (or, following the Credit Installment Period as defined in the Funding and Construction Agreement, for itself) and (iii) IID's use of such required capacity would be in conflict with Producer's right as provided herein to increase the sum of the Transmission Service Entitlements for such Plants to the Aggregate Maximum Transmission Service Entitlement, then IID shall so notify Producer in writing, specifying in such notice the portion, expressed in megawatts (MW), of the excess of the Maximum Transmission Service Entitlement over the Transmission Service Entitlement for each such Plant which it desires to use as stated above. Producer shall have ninety (90) days after receipt of IID's notice to notify IID in writing that it desires to increase the Transmission Service Entitlements of such Plants. To the extent that Producer does not elect to increase the Transmission Service Entitlement of each such Plant up to the Maximum Transmission Service Entitlement for such Plant, IID shall be entitled to use such unclaimed capacity to satisfy the transmission requirements specified in its notice to Producer, and to the extent that IID does so, Producer shall thereafter be foreclosed from

increasing the Transmission Service Entitlement for such Plant in a manner which would conflict with such usage by IID.

6.3.2 IID shall treat Producer and each other person who has entered into a transmission service agreement similar in substance to this Agreement in a fair and nondiscriminatory manner in requesting additional transmission capacity as provided in this Section 6.3. Without limiting the generality of the foregoing, IID shall request additional transmission capacity from Producer and such other persons on a pro rata basis, in proportion to the Aggregate Maximum Transmission Service Entitlement for each person less the sum of the Transmission Service Entitlements for each of such persons' generating plants which is no longer in a Trial Period.

6.4 In the event that the Original Capacity Nomination designated by Producer (or the Participant associated with Producer) is adjusted pursuant to Section 3.07 of the Funding and Construction Agreement, the Parties agree to amend this Agreement in such a way that the sum of the Maximum Transmission Service Entitlements for all Plants hereunder is equal to such Original Capacity Nomination as so adjusted. As used in this Section 6.4, the terms Original Capacity Nomination and Participant shall have the meanings assigned to them in Article I of the Funding and Construction Agreement.

6.5 IID reserves the right to interrupt or curtail the transmission service provided hereunder as follows:

6.5.1 If the Operating Transmission Capability is reduced to less than Normal Transmission Capacity from a Point of Receipt to a Point of Delivery, and when continuity of service within IID's service area is not being jeopardized, IID may curtail the transmission service currently being provided from such Point of Receipt to such Point of Delivery, to an

amount "A" determined by the following formula:

$$A = \frac{\text{Operating Transmission Capability}}{\text{Normal Transmission Capacity}} \times \text{Transmission Service Entitlement}$$

The transmission service for each Plant affected shall be curtailed by multiplying the Transmission Service Entitlement in accordance with Exhibit[s] II, Transmission Service and in any subsequent Plant Amendments by the same percentage (expressed as a decimal) as used in the determination of "A." However, any such curtailment shall occur only after IID has made all reasonable efforts to eliminate the cause of the reduction in Operating Transmission Capability, and IID shall then employ reasonable efforts to eliminate expeditiously the cause of said reduction.

6.5.2 If continuity of service within IID's control area is being jeopardized, as determined by IID in its sole judgment, IID may interrupt or curtail the transmission service provided hereunder to the extent necessary to avoid or eliminate such jeopardy; provided that (i) such interruptions or curtailments may be made so that IID may fully utilize all generating resources owned by it or available to it under contract in order to avoid damage to IID's electrical system caused by overloading, (ii) such interruption or curtailment shall occur only after IID has made all reasonable efforts to avoid or eliminate such jeopardy and (iii) to the extent feasible any curtailment of transmission service provided hereunder from a Point of Receipt to a Point of Delivery shall be made in accordance with the formula set forth in Section 6.5.1.

6.6 If IID's efforts do not avoid or eliminate such jeopardy, the Parties shall endeavor to develop some other arrangement to avoid or eliminate such jeopardy and minimize the effects of IID's interruption or curtailment on both parties.

6.7 In the event of any curtailments or interruptions made pursuant to Section 6.5.1 or Section 6.5.2, Producer shall, immediately after being orally notified by IID, reduce the electrical output of the Plants by the amounts requested by IID.

6.8 The transmission service to be provided by IID and purchased by Producer for each Plant shall not exceed the Transmission Service Entitlement for that Plant.

6.9 Subject to Section 6.5, IID shall, during the periods that IID has agreed to provide the transmission service at the specified Transmission Service Entitlements, accept hourly scheduled energy deliveries at each Point of Receipt and simultaneously deliver the same amount of energy (less transmission losses as provided herein) at the Point(s) of Delivery mutually agreed upon by the Parties' dispatchers and/or schedulers.

6.10 Hourly scheduled energy deliveries at each Point of Receipt shall conform with the practices and procedures developed by the Parties' dispatchers and schedulers and agreed to by the Authorized Representatives.

7. TRANSMISSION LOSSES:

7.1 IID shall determine, by transmission power flow analysis, the electrical losses (expressed as a percent amount of hourly scheduled energy deliveries) associated with the electrical output from each Plant. Such analysis shall be performed by IID at its sole expense. The initial percent amount, for

each Plant, representing the electrical losses as determined herein shall be as specified in Exhibit(s) II, Transmission Service and in any subsequent Plant Amendments.

7.2 Unless otherwise agreed to by Producer's and IID's schedulers and dispatchers, IID shall reduce the amount of all hourly scheduled energy deliveries for Producer or Producer's

account by the percent amount of such hourly deliveries for each Plant in accordance with Exhibit(s) II, Transmission Service and in any subsequent Plant Amendments.

7.3 If either Party believes that there has been a significant change in IID's electrical system and the electrical losses associated with any Plant should be redetermined, either Party's Authorized Representative may submit a written request to the other Party's Authorized Representative that the electrical losses be redetermined. Following such request, a transmission flow analysis shall be performed by IID as approved by the Authorized Representatives and paid for by the requesting Party. Whenever the percent amount for electrical losses is redetermined, such percent amount shall become effective as of the first day of the month following the date of such redetermination; provided, that such a redetermination may be no sooner than twelve (12) months after the most recent redetermination. Any redetermination of electrical losses made pursuant to this Section 7 shall be based on conditions in existence at the time of such redetermination.

7.4 Along with the monthly billing pursuant to Section 9.1, for the transmission service for each Plant, IID shall submit a monthly summary of hourly scheduled energy deliveries and of electrical losses for each Plant.

8. CHARGES:

8.1 For transmission service provided by IID, Producer shall pay IID at a Exhibit I.A. The initial rate is specified in Exhibit[s] II, Transmission Service and revisions thereto will be specified in any subsequent Plant Amendments. Any specific facility charge to Producer for connecting the Plant(s) to the IID transmission system shall be included only In the Plant Connection Agreement(s) between IID and Producer.

8.2 The transmission rate shall be reviewed annually and may be revised. Any revision of the rates shall be based on the methodologies In Exhibit I.A and on the conditions in existence at the time of the revision. Producer shall have the right to review any exhibits or work papers prepared by IID to revise the rates.

8.3 An initial monthly scheduling fee, as specified in Exhibit[s] II, Transmission Service and revisions thereto specified in any subsequent Plant Amendments, shall be paid by Producer to IID for those months In which there were scheduled energy deliveries from the Plant(s). The initial scheduling fee has been determined by IID pursuant to the methodology specified in Exhibit I.B. The scheduling fee shall be reviewed annually and may be revised. Any revision of the scheduling fee shall be based on the methodology in Exhibit I.B and on the conditions in existence at the time of the revision. Producer shall have the right to review any exhibits or work papers prepared by IID to revise the scheduling fee.

9. BILLING AND PAYMENT:

9.1 IID shall render bills to Producer, beginning in the month of the Date of Initial Service, on or before the fifteenth (15th) day of each month for the transmission service to be provided during the month. Producer shall pay such bills within twenty (20) days after receipt thereof.

All payments by Producer shall be sent to:

Imperial Irrigation District
c/o Manager, Finance and Accounting
P.O. Box 937
Imperial, California 92251

All billings by IID shall be sent to:

Geo East Mesa Limited Partnership
P.O. Box 748
Holtville, CA 92250

9.2 Either Party's Authorized Representative may at any time, by advance written notice to the other Party's Authorized Representative, change the address to which payments or billings shall be sent.

9.3 Bills which are not paid in full by said due date shall thereafter bear an additional charge of one and one-half percent (1-1/2%) per month, or the maximum legal rate of interest, whichever is less, compounded monthly on the unpaid amount prorated by days from the due date until payment is received by IID.

9.4 In the event any portion of any bill is disputed, the disputed amount shall be paid when due under protest. If the protested portion of the payment is found to be incorrect by the Authorized Representatives, the disputed amount shall be paid by IID to Producer, including interest at the rate of 1-1/2% per month, or the maximum legal rate, whichever is less, compounded monthly from the date of payment by Producer to the date the refund check or adjusted bill is received by Producer.

9.5 For a fractional part of a calendar month at the beginning or end of the period for which the transmission service is provided hereunder, the charge pursuant to Section 8.1 shall be proportionately adjusted by the ratio of days that service is furnished by IID to Producer during such month to the total number of days in such month.

9.6 The charge for the transmission service pursuant to Section 8.1 shall be proportionately reduced to the extent the duration of the interruptions or curtailments of the

transmission service which may occur pursuant to Section 6.5.1 or Section 6.5.2 exceed a cumulative total of twenty-four (24) hours during any calendar month based on 730 hours per month representing the full transmission service charge. The amount of such prorata reduction in any month shall reflect the duration and amount of such interruptions or curtailments which exceed said cumulative 24 hours. Such prorata reduction shall be reflected as a credit to Producer as soon as possible in a subsequent monthly bill.

9.7 The charge for the transmission service shall not be reduced if IID can deliver, but Edison's transmission system cannot receive, the hourly scheduled energy deliveries independent of the duration of time this condition exists.

10. LIABILITY:

10.1 Except for any loss, damage, claim, costs, charge or expense resulting from Willful Action, neither Party (the "released Party"), its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from

the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to a Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of the released Party's electrical system, Plant(s) or associated facilities in connection with the implementation of this Agreement. Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

10.2 For the purpose of this Section 10, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

10.2.1 Action which is knowingly or intentionally taken or not taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

10.2.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

10.2.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

10.3 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

10.4 The phrase "employees having management or administrative responsibility," as used in Section 10.2, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing controlling and supervising such Party's performance under this Agreement with responsibility for results.

10.5 Subject to the foregoing provisions of this Section 10, each Party agrees to defend, indemnify and save harmless the other Party, its officers, agents, or employees against all losses, claims, demands, costs or expenses for loss of or damage to property, or injury or death of

persons, which directly or indirectly arise out of the Indemnifying Party's performance pursuant to this Agreement; provided, however, that a Party shall be solely responsible for any such losses, claims, demands, costs or expenses which result from its sole negligence or Willful Action.

11. AUDITING

11.1 IID shall make its books, records, and other supporting information, as requested, available to Producer or to Producer's designated contracted representative(s) with a CPA firm, for the purpose of auditing any charges or accounts to be kept by IID hereunder. All such audits shall be undertaken at reasonable times and in conformance with generally-accepted auditing standards.

11.2 If as a result of such audits Producer believes its charges or accounts should be adjusted, the findings shall be presented to the Authorized Representatives. If the Authorized Representatives agree that any audit finding should result in a revision of charges or accounts, such revisions shall be retroactive to the first billing for such charges and accounts and shall be made

as soon as practical after determination.

11.3 The amount of any unresolved dispute shall accrue interest at the rate of one and one-half percent (1-1/2%) per month, or the maximum legal rate, whichever is less, compounded monthly for any amount of money ultimately refunded to Producer.

12. AUTHORIZED REPRESENTATIVES: Within thirty (30) calendar days after the Completion Date, as defined in Article I of the Funding and Construction Agreement, each Party shall designate by written notice to the other Party a representative who is authorized to act on its behalf in the implementation of this Agreement. Either Party may at any time change the designation of its Authorized Representative by written notice to the other Party.

13. NO DEDICATION OF FACILITIES: Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof of the Party to the public or to the other Party, and it is understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder. 14. NON-WAIVER: None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

15. NO THIRD PARTY RIGHTS: The Parties do not intend to create rights in or to grant remedies to any Third Party or others as a beneficiary of this Agreement or of any duty, covenant, obligation or undertaking established hereunder.

16. UNCONTROLLABLE FORCES: Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement when a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and actions or

nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, the failure or inability of Edison to receive the electric power to be transmitted hereunder at the Point(s) of Delivery, which by exercise of due diligence such Party, could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

17. ASSIGNMENTS:

17.1 Any assignment by Producer of its interest in this Agreement which is made without the written consent of IID (which shall not be unreasonably withheld) shall not relieve Producer from its primary liability for any of its duties and obligations hereunder, and in the event of any such assignment Producer shall continue to remain primarily liable for payment of any and all money due IID hereunder and for the performance and observance of all other covenants, duties and obligations to be performed and observed hereunder by it

to the same extent as though no assignment has been made.

17.2 Notwithstanding any provision of Section 17.1 to the contrary, prior to the end of the Credit Installment Period, as defined in Article I of the Funding and Construction Agreement, Producer's right to transmission service under this Agreement with respect to one or more of the Plants may be assigned only (i) to a purchaser or co-owner of such Plants or to a person who will operate such Plants pursuant to a contract or other arrangement with such purchaser and in either case only with the prior written consent of IID (which shall not be unreasonably withheld) or (ii)

for security purposes, to a bank or other entity which provides financing for such Plants or any electrical transmission facilities associated therewith. Producer and IID agree that nothing in this Section 17.2 may be amended, modified or waived without the prior written consent of each and every party to the Funding and Construction Agreement (except for any parties in default thereunder).

17.3 Whenever an assignment of Producer's interest in this Agreement is made with the written consent of IID, Producer's assignee shall expressly assume in writing the duties and obligations hereunder of Producer and, within thirty (30) days after any such assignment and assumption of duties and obligations, Producer shall furnish or cause to be furnished to IID a true and correct copy of such assignment and assumption of duties and obligations.

17.4 Subject to the foregoing restrictions on assignments, all of the terms of this Agreement shall be binding upon and inure to the benefit of both of the Parties and their respective successors, permitted assigns and legal representatives.

18. GOVERNING LAW: This Agreement shall be interpreted, governed by and construed under the laws of the State of California or the laws of the United States, as applicable.

19. NOTICE: Any notice, demand or request provided for in this Agreement, or served, given or made in connection with it, shall be in writing and shall be deemed properly served, given or made if delivered in person or sent by United States mail, postage prepaid, to the persons specified below unless otherwise provided for In this Agreement:

Imperial Irrigation District
c/o General Manager
P.O. Box 937
Imperial, California 92251

Geo East Mesa Limited Partnership
P.O. Box 748

Holtville, California 92250

Either Party may at any time, by notice to the other Party, change the designation or address of the person so specified as the one to receive notices pursuant to this Agreement. 20. SIGNATURE CLAUSE: The signatories hereto represent that they have been appropriately authorized to enter Into this IID-Geo East Mesa Limited Partnership Transmission Service Agreement for Alternative Resources (Standard Form) on behalf of the Part/for whom they signed. This Agreement is hereby executed as of the 21st day of March, 1989.

IID - EDISON

TRANSMISSION SERVICE AGREEMENT

FOR ALTERNATIVE RESOURCES

1. PARTIES: The Parties to this Agreement are Imperial Irrigation District, organized under the Water Code of the State of California ("IID"), and Southern California Edison Company, a California corporation ("Edison"), hereinafter sometimes referred to individually as "Party," and collectively as "Parties".

2. RECITALS: This Agreement is made with reference to the following facts, among others:

2.1 Edison plans to develop its own alternative resource facilities and/or purchase the electrical output from Third Party alternative resource facilities located in IID's service area.

2.2 Edison and the Third Parties require transmission service from IID to deliver the output from such alternative resource facilities to Edison's electrical system.

2.3 In a Letter Agreement executed on November 22, 1983, the Parties agreed to establish an intertie connecting the Parties' electrical systems to facilitate exchanges of power. The Parties also agreed to develop and execute a transmission service agreement to provide transmission for Edison's power to its electrical system over IID's existing or upgraded electrical system.

2.4 In a Letter Agreement executed on December 7, 1982, the Parties agreed to develop certain transmission facilities at 230 kilovolts to provide for the export of alternative resource facilities electrical output from the Imperial Valley to Edison's electrical system.

2.5 Edison desires to purchase transmission service for the electrical output from the alternative resource facilities and IID is willing to sell said service to Edison.

3. AGREEMENT: The Parties agree as follows:

4. DEFINITIONS: The following terms, when used herein with initial capitalization, whether in the singular or the plural, shall have the meanings specified:

4.1. Agreement: This "IID-Edison Transmission Service Agreement for Alternative Resources" between Southern California Edison Company and Imperial Irrigation District, and all Exhibits, as such Agreement may subsequently be amended.

4.2 Authorized Representative: The representative of a Party designated in accordance with Section 12.

4.3 Blythe Substation: Western's electrical 161 kilovolt (kV) substation at Blythe, California where IID's existing 161 kV "F" transmission line terminates.

4.4 Coachella-Mirage Line: Approximately 20.6 miles of 230 kV transmission line that IID shall cause to be constructed and that shall be owned by IID. Such line is to

line is anticipated to be in operation on or before June 1, 1986, or as soon thereafter as practicable.

4.5 Coachella Valley Substation: IID's electrical substation located within its Control Area and scheduled to be a terminal point for the Coachella-Mirage Line.

4.6 Control Area: All or part of a Party's electrical generation resources, transmission facilities and distribution facilities, or a combination thereof with those of other utilities, agencies or pools to which a common automatic generation control scheme is applied.

4.7 Date of Initial Service: The date when the Plant output is first available for delivery to Edison and as provided to IID pursuant to Section 5.2. Such date shall be deemed to be May 1, 1986, for the Plants specified in Exhibits II, III, and IV.

4.8 Mirage Substation: Edison's electrical 230/115/92 kV substation located approximately eight miles west of the City of Indio and one and one-half miles north of Interstate Highway 10 where the Points of Interconnection are located and where the Coachella-Mirage Line terminates.

4.9 Normal Transmission Capacity: The maximum electrical power transfer ability, expressed in megawatts (MW), available to IID to transmit IID's electrical power and to provide the transmission service. Such transfer ability, as determined by IID, in its

3

sole judgment, shall be consistent with prudent operating procedures and with generally-accepted engineering and operating practices in the electrical utility industry.

4.10 Operating Transmission Capability: The maximum electrical power transfer ability, expressed in megawatts (MW), available to IID at any given time to transmit IID's electrical power and to provide the transmission service. Such transfer ability shall be as determined by IID in its sole judgment, may vary from time-to-time depending on system conditions, and shall be consistent with prudent operating procedures and generally-accepted engineering and operating practices in the electrical utility industry.

4.11 Plant(s): The electrical generating alternative resource facilities developed by Edison or Third Parties for which IID shall provide transmission service is specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendment(s).

4.12 Plant Amendment(s): The agreement(s) reached by the Parties, as amendments to this Agreement, for transmission service to be provided by IID for each Plant added by Edison or for Edison's account subsequent to the execution of this Agreement.

4.13 Plant Connection Agreement(s): The agreement(s) between IID and Third Parties or Edison providing for the connection of the Plant(s) to IID's electrical system as specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendment(s).

4

4.14 Point of Delivery: The Points of Interconnection, Blythe Substation or other points as agreed to by the Authorized Representatives as delivery points and as specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendments.

4.15 Points of Interconnection: The 115/92 kV switchrack at the Mirage

Substation site where Edison's 115 kV facilities are attached to IID's 92 kV facilities or the 230 kV switchrack where Edison's 230 kV facilities shall be attached to the Coachella-Mirage Line.

4.16 Point of Receipt: The point at which IID receives the electrical output from each Plant for Edison or for Edison's account, as specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendments.

4.17 Third Parties: Developers and/or operators of facilities using alternative resources including biomass, waste, wind, solar, geothermal and water to produce electrical energy. Such developers and/or operators are not signatories to this Agreement.

4.18 Transmission Service Entitlement: The amount of transmission service, expressed in megawatts (MW), provided by IID to Edison from a Point of Receipt to the Point(s) of Delivery.

4.19 Western: The United States Department of Energy Western Area Power Administration.

5

5. TERM:

5.1 Unless otherwise agreed to by the Parties, this Agreement shall be effective upon execution by the Parties and shall remain in effect until the earlier of December 31, 2015 or the termination date of the last Plant Connection Agreement.

5.2 The Transmission Service Entitlement to be provided by IID for each Plant shall be contingent on a Plant Connection Agreement being in effect. Transmission service shall commence on the Date of Initial Service of such Plant(s). If not already specified in Section 4.7, Edison's Authorized Representative shall provide the Date of Initial Service to IID's Authorized Representative in a thirty (30) days' written notice in advance of the Date of Initial Service.

6. TRANSMISSION SERVICE:

6.1 Subject to the terms of this Agreement, IID shall provide to Edison and Edison shall purchase from IID transmission service over IID's transmission system for the Plant(s) herein.

6.2 The Transmission Service Entitlement for each Plant shall be the amount either specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendment(s), or the amount provided to IID's Authorized Representative by Edison's Authorized Representative in a thirty (30)-day advance written notice prior to the Date of Initial Service. Except for the Plants specified in Exhibits II, III and IV, the Transmission

6

Service Entitlement to be provided by IID subsequent to the Date of Initial Service may be adjusted semi-annually until the Plant(s) has/have operated for two years. Such adjustment shall be made by having Edison's Authorized Representative give IID's Authorized Representative a ninety (90)-day advance written notice as to the adjustment required. At the end of the two-year operating period for such Plant(s), the Transmission Service Entitlement shall remain as established or as redetermined by the Authorized Representatives and shall subsequently be fixed for the remainder of the terms specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendment(s). The Transmission Service Entitlement shall not be changed unless otherwise agreed to by the Authorized Representatives.

6.3 IID reserves the right to interrupt or curtail the transmission service provided hereunder as follows:

6.3.1 If the Operating Transmission Capability is reduced to less than normal Transmission Capacity from a Point of Receipt to a Point of Delivery, and when continuity of service within IID's Control Area is not being jeopardized, IID may curtail the transmission service currently being provided from such Point of Receipt to such Point of Delivery, to an amount "A" determined by the following formula:

$$A = \frac{\text{Operating Transmission Capability}}{\text{Normal Transmission Capacity}} \times \text{Transmission Service Entitlement}$$

7

The transmission service for each Plant shall be curtailed by multiplying the Transmission Service Entitlement in accordance with Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendments by the same percentage (expressed as a decimal) as used in the determination of "A". However, any such curtailment shall occur only after IID has made all reasonable efforts to eliminate the cause of the reduction in Operating Transmission Capability, and IID shall then employ reasonable efforts to eliminate expeditiously the cause of said reduction.

6.3.2 If continuity of service within IID's Control Area is being jeopardized, as determined by IID in its sole judgment, IID may interrupt or curtail the transmission service provided hereunder to the extent necessary to avoid or eliminate such jeopardy; provided, (i) that such interruptions or curtailments may be made so that IID may fully utilize all generating resources owned by it or available to it under contract in order to avoid damage to IID's electrical system caused by overloading, (ii) that no such interruption or curtailment may be made by IID in order that IID may acquire all or any portion of Edison's capacity or energy available to Edison under contract without Edison's prior consent, and (iii) that such interruption or curtailment shall occur only after IID has made all reasonable efforts to avoid or eliminate such jeopardy.

6.4 If IID's efforts do not avoid or eliminate such jeopardy, the Parties shall endeavor to develop some other arrangements to avoid or eliminate such jeopardy and minimize the effects of IID's interruption or curtailment to both to Parties' Control Areas.

8

6.5 Subject to Section 6.8, and in the event of any curtailments or interruptions made pursuant to Section 6.3.1 or Section 6.3.2, Edison shall, immediately after being orally satisfied by IID, reduce its energy schedules by the amounts requested by IID.

6.6 The transmission service to be provided by IID and purchased by Edison for each Plant shall not exceed the Transmission Service Entitlement.

6.7 Subject to Section 6.3, IID shall, during the periods that IID has agreed to provide the transmission service at the specified Transmission Service Entitlements, accept hourly scheduled energy deliveries at the Point of Receipt and simultaneously deliver the same amount of energy to Edison or for Edison's account at the Point(s) of Delivery mutually agreed upon by the Parties' dispatchers and/or schedulers. Unless otherwise agreed to by the Authorized Representatives, the total sum of Transmission Service Entitlements to the

Points of Delivery specified below shall not exceed 150 MV. However, in no case shall the Transmission Service Entitlement to a specified Point of Delivery exceed the following:

Blythe Substation 161 kV: 110 MV
Mirage Substation 115/92 kV: 35 MW
Mirage Substation 230 kV: 150 MW'

Edison shall provide IID an executed copy of its transmission service agreement with Western.

9

6.8 Hourly scheduled energy deliveries shall be in accordance with the provisions of this Agreement. The hourly schedules shall conform with the practices and procedures developed by the Parties' dispatchers and schedulers and agreed to by the Authorized Representatives. IID shall coordinate the hourly scheduled energy deliveries from the Plant(s) until such time that dynamic scheduling may be arranged and procedures for such may be agreed to by the Authorized Representatives.

7. TRANSMISSION LOSSES: -----

7.1 IID shall determine, by transmission power flow analysis, the electrical losses (expressed as a percent amount of hourly scheduled energy deliveries) associated with the electrical output from each Plant. Such analysis may be performed by IID, at its sole expense, and as deemed necessary by changing conditions on IID's electrical system. The initial percent amount, for each Plant, representing the electrical losses as determined herein shall be as specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendment(s).

7.2 Unless otherwise agreed to by Edison's and IID's schedulers and dispatchers, IID shall reduce the amount of all hourly scheduled energy deliveries to Edison or for Edison's account by the percent amount of such hourly deliveries for each Plant in accordance with Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendment(s) plus a transformer loss percent amount if delivered at the Mirage Substation 115/92 kV switchrack.

10

7.3 If either Party believes that there has been a significant change in IID's electrical system and the electrical losses associated with any Plant should be redetermined, either Party's Authorized Representative may submit a written request _____ the other Party's Authorized Representative that the electrical losses be redetermined. Following such request, a transmission flow analysis may be performed by IID as approved by the Authorized Representatives and paid for by the requesting Party. If the percent amount for electrical losses is redetermined, such percent amount shall become effective as of the first day of the month following the date of such redetermination; provided, that such a redetermination may be no sooner than twelve (12) months after the most recent redetermination. Any redetermination of electrical losses made pursuant to this Section 7 shall be based on conditions in existence at the time of such redetermination.

7.4 Along with the monthly billing pursuant to Section 9.1, for the transmission service for each Plant, IID shall submit a monthly summary of hourly scheduled energy deliveries and of electrical losses for each Plant.

8. CHARGES:

8.1 For transmission service provided by IID, Edison shall pay IID at an initial rate of \$1.14 per kilowatt per month for transmission service over

IID's 92 kV-161 kV- 230 kV transmission system plus the appropriate initial rate specified in Exhibit I.B for transmission service over IID's 34.5 kV subtransmission system as applicable. The total

11

charge for transmission service shall be determined by the sum of the products of such applicable rates times the Transmission Service Entitlements. The initial rate for the 92 kV-161 kV-230 kV transmission system and the initial rate for the 34.5 kV subtransmission system has been determined by IID pursuant to the methodologies specified in Exhibit I.A and Exhibit I.B respectively. Any specific facility charge to the Third Parties or to Edison for connecting the Plant(s) to the IID transmission system(s) shall be included only in the Plant Connection Agreement(s) between IID and the Third Parties or Edison.

8.2 Both the 92 kV-161 kV-230 kV transmission and 34.5 kV subtransmission system rates shall be reviewed annually and may be revised. Such review and revision, if necessary, shall commence effective January 1, 1986. Any revision of the rates shall be based on the methodologies in Exhibit I.A-2 and Exhibit I.B.A and on the conditions in existence at the time of the revision. Edison shall have the right to review any exhibits or work papers prepared by IID to revise the rates prior to the effective date(s) of the revision.

8.3 An initial monthly scheduling fee, as specified in Exhibits II, III, IV, V, VI, VII, VIII and in any subsequent Plant Amendment(s), shall be paid by Edison to IID for those months in which there were scheduled energy deliveries from the Plant(s). The initial scheduling fee has been determined by IID pursuant to the methodology specified in Exhibit I.C. The scheduling fee shall be reviewed annually and may be revised. Such

12

review and revision, if necessary, shall commence effective January 1, 1986. Any revision of the scheduling fee shall be based on the methodology in Exhibit I.C and on the conditions in existence at the time of the revision. Edison shall have the right to review any exhibits or work papers prepared by IID to revise the scheduling fee prior to the effective date of the revision.

9. BILLING AND PAYMENT:

9.1 IID shall render bills to Edison, beginning in the month of the Date of Initial Service, on or before the fifteenth (15th) day of each month for the transmission service to be provided during the month. Edison shall pay such bills within twenty (20) days after receipt thereof.

All payments by Edison shall be sent to:

Imperial Irrigation District
c/c Manager, Finance & Accounting
P.O. Box 937
Imperial, CA 92251

All billings by IID shall be sent to:

Southern California Edison Company
c/o Manager of Cogeneration and Small Power Development
P.O. Box 800
Rosemead, CA 91770

13

9.2 Either Party's Authorized Representative may at any time, by advance written notice to the other Party's Authorized Representative, change the address to which payments or billings shall be sent.

9.3 Bills which are not paid in full by said due date shall thereafter bear an additional charge of one and one-half percent (1 1/2%) per month, or the maximum legal rate of interest, whichever is less, compounded monthly on the unpaid amount prorated by days from the due date until payment is received by IID.

9.4. In the event any portion of any bill is disputed, the disputed amount shall be paid when due under protest. If the protested portion of the payment is found to be incorrect by the Authorized Representatives, the disputed amount shall be paid by IID to Edison, including interest at the rate of 1-1/2% per month, or the maximum legal rate, whichever is less, compounded monthly from the date of payment by Edison to the date the refund check or adjusted bill is received by Edison.

9.5 For a fractional part of a calendar month at the beginning or end of the period for which the transmission service is provided hereunder, the charge pursuant to Section 8.1 shall be proportionately adjusted by the ratio of days that service is furnished by IID to Edison during such month to the total number of days in such month.

9.6 The charge for the transmission service pursuant to Section 8.1 shall be proportionately reduced to the extent the duration of interruptions or curtailments of the

14

transmission service which may occur pursuant to Section 6.3.2 exceed a cumulative total of twenty-four (24) hours during any calendar month based on 730 hours per month representing the full transmission service charge. The amount of such prorata reduction in any month shall reflect the duration and amount of such interruptions or curtailments which exceed said cumulative 24 hours. Such prorata reduction shall be reflected as a credit to Edison as soon as possible in a subsequent monthly bill.

9.7 The charge for the transmission service shall not be reduced if IID can deliver, but Edison cannot receive the hourly scheduled energy deliveries independent of the duration of time this condition exists.

10. LIABILITY:

10.1 Except for any loss, damage, claim, cost, charge or expense resulting from Willful Action, neither Party, its directors or other governing body, officers or employees shall be liable to the other Party for any loss, damage, claim, cost, charge, or expense of any kind or nature incurred by the other Party (including direct, indirect or consequential loss, damage, claim, cost, charge or expense; and whether or not resulting from the negligence of a Party, its directors or other governing body, officers, employees or any person or entity whose negligence would be imputed to such Party) from engineering, repair, supervision, inspection, testing, protection, operation, maintenance, replacement, reconstruction, use or ownership of such Party's electrical system in connection with implementation of this Agreement. Except for any loss, damage, claim, cost, charge or

15

expense resulting from Willful Action, each Party releases the other Party, its directors or other governing body, officers and employees from any such liability.

10.2 Except for liability resulting from Willful Action of the other Party, a Party whose electrical customer shall make a claim or bring an action for any death, injury, loss or damage arising out of delivery of, interruptions to or curtailment of electrical service to such customer caused by performance or nonperformance of a Party's obligations hereunder shall indemnify and hold harmless the other Party, its directors or other governing body, officers and employees from and against any liability for such death, injury, loss or damage. As used in this Agreement, the term "electrical customer" shall mean an electrical consumer, except an electrical utility system to whom power is delivered for resale.

10.3 For the purpose of this Section 10, Willful Action shall be defined as action taken or not taken by a Party at the direction of its directors or other governing body, officers or employees having management or administrative responsibility affecting its performance under this Agreement, as follows:

10.3.1 Action which is knowingly or intentionally taken or failed to be taken with conscious indifference to the consequences thereof or with intent that injury or damage would result or would probably result therefrom.

16

10.3.2 Action which has been determined by final arbitration award or final judgment or judicial decree to be a material default under this Agreement and which occurs or continues beyond the time specified in such arbitration award or judgment or judicial decree for curing such default or, if no time to cure is specified therein, occurs or continues thereafter beyond a reasonable time to cure such default.

10.3.3 Action which is knowingly or intentionally taken or not taken with the knowledge that such action taken or not taken is a material default under this Agreement.

10.4 Willful Action does not include any act or failure to act which is merely involuntary, accidental or negligent.

10.5 The phrase "employees having management or administrative responsibility", as used in Section 10.3, means the employees of a Party who are responsible for one or more of the executive functions of planning, organizing, coordinating, directing, controlling and supervising such Party's performance under this Agreement with responsibility for results.

11. AUDITING:

11.1 IID shall make its books, records, and other supporting information, as requested, available to Edison or to Edison's designated contracted representative(s) with a CPA firm, for the purpose of auditing any charges or accounts to be kept by IID

17

hereunder. All such audits shall be undertaken at reasonable times and in conformance with generally-accepted auditing standards.

11.2 If as a result of such audits Edison believes its charges or accounts should be adjusted, the findings shall be presented to the Authorized Representatives. If the Authorized Representatives agree that any audit finding should result in a revision of charges or accounts, such revisions shall be retroactive to the first billing for such charges and accounts and shall be made as soon as practical after determination.

11.3 The amount of any unresolved dispute shall accrue interest at the

rate of one and one-half percent (1 1/2%) per month, or the maximum legal rate, whichever is less, compounded monthly for any amount of money ultimately refunded to Edison.

12. AUTHORIZED REPRESENTATIVES: Within thirty (30) calendar days after the date of execution of this Agreement, each Party shall designate by written notice to the other Party a representative who is authorized to act on its behalf in the implementation of' this Agreement. Either Party may at any time change the designation of its Authorized Representative by written notice to the other Party.

13. NO DEDICATION OF FACILITIES: Any undertaking by one Party to the other Party under any provision of this Agreement shall not constitute the dedication of the system or any portion thereof of the Party to the public or to the other Party, and it is

18

understood and agreed that any such undertaking under any provision of this Agreement by a Party shall cease upon the termination of its obligations hereunder.

14. NON-WAIVER: None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of arty of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

15. NO THIRD PARTY RIGHTS: The Parties do not intend to create rights in or to grant remedies to any hird Party or others as a beneficiary of this Agreement or of any duty, covenant, obligation or undertaking established hereunder.

16. UNCONTROLLABLE FORCES: Neither Party shall be considered to be in default in the performance of any of its obligations under this Agreement where a failure of performance shall be due to an uncontrollable force. The term "uncontrollable force" shall mean any cause beyond the control of the Party affected including, but not restricted to, failure of or threat of failure of facilities which have been maintained in accordance with generally-accepted engineering and operating practices in the electrical utility industry, flood, drought, earthquake, tornado, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strike, labor

19

dispute, labor or material shortage, sabotage, government priorities and restraint by court order or public authority (whether valid or invalid) and action or nonaction by or inability to obtain or keep the necessary authorizations or approvals from any governmental agency or authority, which by exercise of due diligence such Party' could not reasonably have been expected to avoid and which by exercise of due diligence it has been unable to overcome. Nothing contained herein shall be construed as to require a Party to settle any strike or labor dispute in which it may be involved. Either Party rendered unable to fulfill any of its obligations under this Agreement by reason of an uncontrollable force shall give prompt written notice of such fact to the other Party and shall exercise due diligence to remove such inability with all reasonable dispatch.

17. ASSIGNMENTS:

17.1 Any assignment by Edison of its interest in this Agreement which

is made without the written consent of IID shall not relieve Edison from its primary liability for any of its duties and obligations hereunder, and in the event of any such assignment Edison shall continue to remain primarily liable for payment of any and all money due IID hereunder and for the performance and observance of all other covenants, duties and obligations to be performed and observed hereunder by it to the same extent as though no assignment has been made.

17.2 Whenever an assignment of Edison's interest in this Agreement is made with the written consent of' IID, Edison's assignee shall expressly assume in writing the duties

20

and obligations hereunder of Edison and, within thirty (30) days after any such assignment and assumption of duties and obligations, Edison shall furnish or cause to be furnished to IID a true and correct copy of such assignment and assumption of duties and obligations.

18. GOVERNING LAW: This Agreement shall be interpreted, governed by and construed under the laws of the State of California or the laws of the United States, as applicable.

19. NOTICES: Any notice, demand or request provided for in this Agreement, or served, given or made in connection with it, shall be in writing and shall be deemed properly served, given or made or delivered in person or sent by United States mail, postage prepaid, to the persons specified below unless otherwise provided for in this Agreement:

Imperial Irrigation District
c/a General Manager
P. O. Box 937
Imperial, California 92551

Southern California Edison Company
c/o Secretary
P.O. Box 800
Rosemead, California 91770

Either Party may at any time, by notice to the other Party, change the designation or address of the person so specified as the one to receive notices pursuant to this Agreement.

21

20. SIGNATURE CLAUSE: The signatories hereto represent that they have been appropriately authorized to enter into this IID-Edison Transmission Service Agreement for Alternative Resources on behalf of the Party for whom they sign. This Agreement is hereby executed as of the 26 day of September, 1985.

	EXHIBIT A - TRANSMISSION SERVICE FOR THE ORMESA GEOTHERMAL POWER PLANT UNIT NO. 2	

PLANT AMENDMENT NO. 1 TO
IID-EDISON
TRANSMISSION SERVICE AGREEMENT
FOR ALTERNATIVE RESOURCES

1. PARTIES: The Parties to this Plant Amendment No. 1, and to the IID-Edison transmission Service Agreement for Alternative Resources ("Agreement"), executed by the Parties as of September 26, 1985, are the Imperial Irrigation District, organized under the Water Code of the State of California ("IID") and Southern California Edison Company, a California corporation ("Edison"), hereinafter sometimes referred to individually as "Party," and collectively as "Parties."

2. RECITALS: This Plant Amendment No. 1 is made with reference to the following facts, among others:

2.1 The Agreement provides for, among other things, Edison to purchase transmission service from IID to deliver the electrical output from alternative resource facilities located in IID's service area either directly to Edison's electrical system or to a utility interconnected with IID's electrical system for ultimate delivery to Edison.

2.2 The Agreement also provides for transmission service for the output of additional alternative resource facilities added subsequent to the execution of the Agreement. The transmission service for the subsequent facilities is to be provided for by amending the Agreement.

2.3 On June 13, 1984, Edison and Ormat Systems, Inc. entered into an agreement providing for the purchase by Edison of capacity and associated energy from Ormat's Ormesa Geothermal Power Plant Unit No. 2.

3

2.4 The Parties, therefore, desire to amend the Agreement to enable Edison to purchase transmission service from IID for the electrical output from the Ormesa Geothermal Power Plant Unit No. 2. IID is willing to sell said service to Edison.

3. AGREEMENT: The Parties agree as follows:

4. EFFECTIVE DATE: This Plant Amendment No. 1 shall become effective upon the date executed by the Parties.

5. AMENDMENTS TO SECTION 4:

5.1 Section 4.14 is hereby deleted and replaced with the following:

"4.14 Point(s) of Delivery: The Points of Interconnection, Knob Substation, Blythe Substation, or any other points as agreed to by the Authorized Representatives as delivery points."

5.2 Section 4.20 is hereby added as follows:

"4.20 Knob Substation: The 161 kV electrical substation located approximately ten (10) miles northwest of Yuma, Arizona which is owned and operated by Western and where an electrical interconnection exists between Western's and IID's electrical systems."

6. AMENDMENT TO SECTION 6: That the portion of Section 6.7 listing the Points of Delivery and the maximum Transmission Service Entitlement assigned thereto, shall be deleted and replaced with the following:

"Blythe Substation 161 kVs:	110 MW
Mirage Substation 115/92 kVs:	35 MW
Mirage Substation 230 kV:	150 MW
Knob Substation 161 kVs:	20 MW"

7. ADDITION OF EXHIBIT A: Exhibit A as attached hereto shall be added to the Agreement as Exhibit IX.

4

8. EFFECT OF THIS PLANT AMENDMENT NO. 1: Except as amended herein, all terms, covenants and conditions contained in the IID-Edison Transmission Service Agreement for Alternative Resources shall remain in full force and effect.

9. SIGNATURE CLAUSE: The signatories hereto represent that they have been appropriately authorized to enter into this Plant Amendment No. 1 on behalf of the Party for whom they sign. This Plant Amendment No. 1 to the IID-Edison Transmission Service Agreement for Alternative Resources is hereby executed as of the 25th day of August, 1987.

LEYTE OPTIMIZATION PROJECT

BOT AGREEMENT

This Agreement made and executed on this 4th day of August, 1995 by and between:

1. PNOC-ENERGY DEVELOPMENT CORPORATION, hereinafter referred to as PNOC-EDC, a wholly-owned subsidiary of the Philippine National Oil Company, a corporation created and organized under Presidential Decree No. 334, as amended, with principal office address at PNOC Complex, Merritt Road, Fort Bonifacio, Makati, Metro Manila, Philippines, herein represented by its President Mr. NAZARIO C. VASQUEZ, who is duly authorized to represent it in this Agreement.

2. ORMAT INC., hereinafter referred to as the Operator, a private corporation duly organized and existing under the laws of the State of Delaware, U. S. A. licensed to do business in the Republic of the Philippines through its branch office at 8th Fl., Solid Bank Bldg., 777 Paseo de Roxas, Makati, Metro Manila, Philippines, represented herein by its Vice President, Mr. Jacob Menahem, who is duly authorized to represent it in this Agreement.

WITNESSETH THAT

WHEREAS, Republic Act 6957 dated July 9, 1990 as amended by RA 7718 (BOT Law) authorized government infrastructure agencies, including PNOC-EDC, to enter into contracts with private contractors for the financing, construction, operation and maintenance of infrastructure projects;

WHEREAS, NAPOCOR and PNOC-EDC have previously executed a Memorandum of Understanding for the Development of Geothermal Power Plants in PNOC-EDC Projects, including the geothermal resources of the Leyte Power Optimization Project Areas, where PNOC-EDC holds an existing Geothermal Service Contract.

WHEREAS, PNOC-EDC has invited several contractors to submit proposals for the design, construction, operation and maintenance of geothermal power plants on a build-operate-transfer (BOT) basis for the Leyte Geothermal Power Optimization Project Geothermal Service Contract Area, and these power plants will convert PNOC-EDC's geothermal energy into electricity for sale to NAPOCOR; and

WHEREAS, the Operator wishes to design, construct, own and operate geothermal electricity generating plants, utilizing the geothermal resources of the Leyte Geothermal Power Optimization Project Area and with a Contracted Capacity of 49.00 MW net and wishes to deliver electricity exclusively on behalf of PNOC-EDC on such terms and conditions as are set forth herein.

NOW, THEREFORE, for and in consideration of the foregoing presents and the mutual covenants hereinafter set forth, the Operator and PNOC-EDC have agreed as follows:

ARTICLE 1 DEFINITION OF TERMS

1.1 DEFINITIONS

When used in this Agreement, the terms below shall have the following meanings:

ACCESSION UNDERTAKING: The accession undertaking to be executed in accordance with Subsection 19(c) and in the form of Annex E.

AGREEMENT: This Agreement including attachments, as may be amended from time to time.

ATMOSPHERIC CONDITIONS: The atmospheric conditions specified in the Interface Data attached hereto as Annex C.

BILLING PERIOD: The time interval from 10:00 AM on the twenty-fifth (25th) day of the current month to 10:00 AM on the twenty fifth (25th) day of the following month where the Operator shall read meters and accumulate data needed for the purpose of billing capacity and energy delivered to NAPOCOR on behalf of PNOC-EDC.

BOI: The Board of Investments of the Republic of the Philippines.

BUYOUT DATE: The meaning specified in Section 9.3.

CAPACITY PAYMENT: The total capacity payments made pursuant to Section 8.3.1.

COMMERCIAL OPERATION DATE: The first day of the Billing Period following the Completion Date of each Plant as defined in Section 4.1(a).

COMMISSIONING PERIOD: The period of three months prior to the scheduled Completion Date of Plant 4. The period of four months prior to the scheduled Completion Date of Plants 1, 2 and 3.

COMPLETION DATE: With respect to each Plant, the day upon which the Operator certifies to PNOC-EDC that such Plant is capable of operating in accordance with the Operating Parameters

2

and has successfully completed testing in accordance with Article 5 or the date that such Plant is deemed completed in accordance with Section 5.4.

CONSTRUCTION PERFORMANCE SECURITY: The Performance Security described in Section 3.1(a).

CONTRACTED CAPACITY: Thirty-five and sixty-five hundredths (35.65) MW (net) for the period after the Completion Date for Plants 1, 2 and 3 and before the Completion Date of Plant 4 and forty-nine (49.00) MW (net) for the period after the Completion Date of Plant 4 and thereafter for any year during the Cooperation Period. Contracted Capacity contemplates availability for the duration of the Cooperation Period and assumes the continuous delivery and acceptance of Geothermal Fluid by PNOC-EDC as specified in the Geothermal Fluid Specifications. Said power shall be the aggregate power of all Plants measured per Plant at (a) the Interconnection Point MP1 for NAPOCOR Power and (b) the Interconnection Point MP2 for Steamfield Power, each as indicated in Figures C.1 - C.4 in Annex C and Annex C.

CONTRACT CAPACITY PRICE: The basic capacity purchase price per kilowatt (kW) per month for electric capacity nominated by the Operator consisting of the Contract Capacity Rate for Capital Costs (CCR), the Contract Capacity Rate for Fixed Operating Costs (OCR), and the Service Fee Rate to reflect Return on Investments (SFR).

CONTROL: To establish the electrical output of the Plants through dispatching procedures including shut-down and start-up.

COOPERATION PERIOD: The period of ten (10) years of commercial operation starting from the last Commercial Operation Date of Plants 1, 2 and 3 and continuing until the 10th anniversary of that Commercial Operation Date.

CORRECTION CURVES: The curves, set forth in Annex B, used to adjust the Power Plant performance for variation in the Geothermal Fluids and Atmospheric Conditions from those specified in the Geothermal Fluid Specifications and the Interface Data.

EFFECTIVITY DATE: The date upon which PNOC-EDC and the Operator agree that all conditions precedent set forth in Article 26 have been either duly fulfilled or waived to the satisfaction of the relevant Party.

ELECTIVE MODIFICATIONS: Modifications to the Operator's design of the Power Plant requested by PNOC-EDC that are not solely for the purpose of correcting design errors made by the Operator in its design of the Power Plant.

EMERGENCY: A condition or situation which in NAPOCOR's sole judgment affects NAPOCOR's ability to maintain safe, adequate, and continuous electrical service.

3

ENERGY DELIVERED: An amount of energy expressed in kilowatt hours (kWh) generated by the Power Plant which are delivered to NAPOCOR on behalf of PNOC-EDC at the Point of Interconnection plus those delivered to PNOC-EDC for its own use (points MP1 and MP2 as indicated in Figures C.1 - C.4 in Annex C).

ENERGY FEE: The fees payable pursuant to Subsection 8.3.2.

FORCE MAJEURE: An event specified in Section 14.1.

GENERATING UNIT: A single turbine generator unit, together with its associated auxiliaries and ancillary plant required to enable it to generate electricity and to be connected to and operate in parallel with NAPOCOR's electricity transmission system.

GEOTHERMAL FLUID: The geothermal steam to be supplied to the Operator by PNOC-EDC and the condensed steam and low pressure steam to be received from the Operator by PNOC-EDC.

GEOTHERMAL FLUID SPECIFICATIONS: The design point and other Interface Data specifications for and quantities of Geothermal Fluid set forth in Annex C including, without limitation, PNOC-EDC's undertakings to accept low pressure steam and to accept condensed steam from the Plants for reinjection and/or other proper disposal.

GOVERNMENT: The government of the Republic of the Philippines including all of its political subdivisions and the agencies and instrumentalities of the foregoing.

GUARANTEED COMMERCIAL OPERATION DATE: The dates set forth in Section 4.1 for each Plant opposite the terms "Guaranteed Commercial Operation Date", as such dates may be extended pursuant to this Agreement.

GUARANTEED NET PLANT STEAM RATE: With respect to each Plant, the Net Plant Steam Rate guaranteed by the Operator, which, for any year during the Cooperation Period, is the amount set forth in Annex I corresponding to such year, as corrected for variations in Atmospheric Conditions and in the Geothermal Fluid provided by PNOC-EDC using the Correction Curves.

INTERCONNECTION FAILURE: Any event, circumstance or state of facts located beyond the Power Plant side of the Points of Interconnection which curtails or eliminates the ability of NAPOCOR or PNOC-EDC to request and utilize power from the Power Plant including, without limitation, problems in interconnection or

transmission equipment located beyond the Points of Interconnection described in Annex C.

NAPOCOR: The National Power Corporation.

NAPOCOR ELECTRIC SYSTEM INTEGRITY: Operation of NAPOCOR's electric system in a manner which minimizes risks of injury to persons and/or property and enables NAPOCOR to provide

4

adequate and reliable electric service to its customers, all in accordance with generally and internationally-accepted utility practice.

NAPOCOR POWER: An amount of energy (in kWh) delivered to NAPOCOR on behalf of PNOC-EDC measured in each one of the Plants at the high voltage side of the transformer (MP1) at the relevant Point of Interconnection as indicated in Figures C.1.-C.4 in Annex C.

NET PLANT STEAM RATE: For each Plant, it is the total Geothermal Fluid flow into the that Plant over a given period of time, expressed in kilograms, divided by the Energy Delivered over the same period expressed in kWh. Any measurement of Net Plant Steam Rate shall be corrected for variations in the Atmospheric Conditions and in the Geothermal Fluid provided by PNOC-EDC during such period of time from the Geothermal Fluid Specifications using the Correction Curves.

NEWCO: The company organized under the laws of the Republic of the Philippines which will be a party to this Agreement by and under the terms of the Accession Undertaking.

NOMINATED CAPACITY: The capacity or amount of power that the Operator guarantees in accordance with Section 6.13 to deliver to NAPOCOR on behalf of PNOC-EDC for a period of one year, including the Steamfield Power.

OPERATING PARAMETERS: The operating parameters set forth in Annex B4 attached hereto.

OPERATING REPRESENTATIVE: Individual(s) appointed by each Party and by NAPOCOR for the purpose of securing effective cooperation and interchange of information between the Parties and NAPOCOR in connection with administration and technical matters related to this Agreement and the Power Purchase Agreement.

OPERATION PERFORMANCE SECURITY: The Performance Security described in Section 3.1(d).

OUTAGE: The inability of the Operator to meet a capacity up to the Nominated Capacity when requested by NAPOCOR, provided, that no Outage shall occur if:

- (a) the capacity adjusted per the Correction Curves which the Operator makes available to NAPOCOR is at least equal to current Nominated Capacity less Steamfield Power; or
- (b) PNOC-EDC fails to deliver or to accept Geothermal Fluid from any Plant or the Geothermal Fluid delivered to or accepted from any Plant varies from the Geothermal Fluid Specifications and such variation is outside the range of the Correction Curves, except that in as far as acceptance of Geothermal Fluid from the Operator is concerned, PNOC-EDC's obligation under the Geothermal Fluid Specifications is limited to the steam exit pressure only; or

5

- (c) an Interconnection Failure has occurred; or

- (d) the inability of the Operator is due to Force Majeure; or
- (e) the inability of the Operator is due to Scheduled Maintenance provided that the number of hours in any one year under this clause (e) shall not be considered an Outage, if it does not exceed the number of Scheduled Maintenance hours stated for that year; or
- (f) the failure by PNOC-EDC or NAPOCOR to request or utilize power from the Power Plant is due to any dispute between PNOC-EDC and NAPOCOR (under the Power Purchase Agreement or otherwise) which did not arise from any default of the Operator under this Agreement, including termination or expiration of the Power Purchase Agreement,

OUTAGE HOUR: Any hour in which, due to Outage, the Operator failed, for a continuous period of thirty (30) minutes, to deliver power adjusted per the Correction Curves at a level of at least ninety five percent (95%) of the Nominated Capacity. For the purpose of defining Outage Hour, if NAPOCOR requests dispatch of capacity in excess of the amount defined in Subsection (a) of the definition of Outage, failure to deliver such excess amount shall not constitute an Outage Hour. For purpose of calculating the Total Outage Hours (TOH) for any given period (including Billing Period), the following formula shall be used:

$$n \ 0.95 \times NC - (AC_i + NRC_i)$$

$$TOH = (\text{Sigma}) \text{ ----- } \times W_i$$

$$i=1 \text{ to } 0.95 \times NC$$

where:

TOH = Total outage hours in any Billing Period.

NC = Nominated Capacity for that Billing Period expressed in kW.

n = The number of hours in that Billing Period.

AC_i = The total power delivered during hour i expressed in kW adjusted per the Correction Curves.

6

NRC_i = NC less power requested by NAPOCOR in hour i, expressed in kW.

w_i = Variable for hour i defined as follows:

if,

1) (AC_i + NRC_i) (greater than or equal to) 0.95 x NC; or

2) (AC_i + NRC_i) (less than) 0.95 x NC for a period shorter than 30 continues minutes in hour i;

or

3) Any of the events defined in Subsections (a), (b), (c), (d), (e) and (f) of

the definition of Outage occurs during hour i ,

then $w_i = 0$

otherwise $w_i = 1$

PARTIES: The contracting parties in this Agreement, referring to the Operator and PNOC-EDC.

PERFORMANCE SECURITY: The Construction Performance Security required to be posted by the Operator to guarantee its performance during the construction of the Power Plant and to be converted into the Operation Performance Security to guarantee Operator's performance during the Cooperation Period in accordance with Section 3.1 hereof.

PLANT: Each of the power plants as described in Annex B and Annex C and identified as follows: Plant 1 is the power plant in Mahanagdong "A" Area; Plant 2 is the power plant in Mahanagdong "B" Area; Plant 3 is the power plant in Tongonan 1 Area; and Plant 4 is the power plant in Malitbog Area.

POINT OF INTERCONNECTION: The point at the interconnection facilities where the transfer and metering of electrical energy among PNOC-EDC, NAPOCOR and the Operator takes place, which point shall be the transformer high side terminals at each Plant.

POLITICAL FM: An event specified in Section 14.1(b).

POWER PLANT: The Operator's generating equipment consisting of four (4) Plants including all of the step-up transformers and switching facilities, together with all protective and other associated

7

equipment and improvements, necessary to produce electrical energy at the Point of Interconnection of each Plant excluding associated land, land rights and interests in land, which equipment shall include the proposed Generating Units with a total gross capacity of 49.59 MW, conforming to the technical specifications set forth in Annex B and Annex C.

POWER PURCHASE AGREEMENT: The contractual agreement dated March 04, 1994 and addendum agreement dated May 06, 1994 between NAPOCOR and PNOC-EDC for the sale by PNOC-EDC of electric capacity and energy from the Leyte project including this Power Plant to NAPOCOR.

PROTECTIVE APPARATUS: The equipment and apparatus installed by the Operator and/or NAPOCOR pursuant to Sections 6.8 hereof.

SCHEDULED MAINTENANCE: The maintenance referred to in Section 6.14 and approved in accordance with section 6.15 and 6.16.

SCHEDULED OUTAGE: A planned interruption of the Power Plant's generating capability that has been scheduled with PNOC-EDC in accordance with Sections 6.14 and 6.15 and is for maintenance, testing, inspection, repair, overhauls, replacement, improvement or similar activity.

SITE: The land located at the Leyte Power Project Expansion Geothermal Reservation to be provided by PNOC-EDC for the construction and operation (and purposes incidental thereto including all other areas reasonably required to perform the construction and operation) of the Power Plant as more particularly described in Annex A.

STEAMFIELD POWER: An amount of energy (in kWh) delivered to PNOC-EDC and measured in each one of the Plants at the relevant Points of Interconnection as indicated in Figures C.1 - C.4 of Annex C.

T-BILL RATE: The rate per annum, on any day, at which Philippine Treasury Bills (with terms of thirty (30) days or if no such bill with a term of thirty (30) days is issued such bill which is issued having the term nearest to thirty (30) days) were issued by the Government on the Friday immediately preceding such day, or, if no such bills were issued on such Friday then the day immediately preceding such Friday on which such bills were issued.

TERMINATION DATE: The date upon which this Agreement is terminated pursuant to Article 9 or 15.

TRANSFER DATE: The day following the last day of the Cooperation Period; provided, however, that in case of termination of this Agreement pursuant to Article 9, the Transfer Date shall be the date following full payment of the Buyout Price as defined in Section 9.2.

TRANSMISSION LINE: Has the meaning specified in Section 4.2.

8

1.2 INTERPRETATION

In this Agreement:

- (a) any reference to an "Article", "Section", or "Clause" is a reference to an article or section hereof or an annex hereto or a clause or section in an annex hereto;
- (b) the headings and sub-headings appear as a matter of convenience and shall not affect the construction of this Agreement;
- (c) the singular includes the plural and vice versa, and words importing any gender include the other genders;
- (d) a reference to a person includes a reference to a body corporate and to an unincorporated body of persons; and
- (e) references to any Party include the successors and any permitted assigns of that Party.

1.3 ABBREVIATIONS

In this Agreement:

- (a) "\$" and "dollar(s)" and "cents" denote lawful currency of the United States of America;
- (b) "Ps" and "peso(s)" denote lawful currency of the Republic of the Philippines;
- (c) "MW" denotes a megawatt;
- (d) "MWh" denotes a megawatt hour;
- (e) "kW" denotes a kilowatt;
- (f) "kwh" denotes a kilowatt hour;
- (g) "kV" denotes kilovolt;
- (h) "DC" denotes direct current; and
- (i) "AC" denotes alternating current.

9

ARTICLE 2 PROJECT

2.1 POWER FACILITY

The Operator shall be responsible for the finance, design, supply, construction, testing operation and maintenance of four (4) Plants with an aggregate gross capacity of approximately 51.00 MW to be installed on the Site, whose net generation (exclusive of the Steamfield Power) shall be delivered to NAPOCOR on behalf of PNOC-EDC during the Cooperation Period. The Power Plant shall be located on the Site which shall be made available by PNOC-EDC at no cost to the Operator and subject to the provisions of Subsection 4.3.

2.2 ENERGY CONVERSION

PNOC-EDC, at no cost to the Operator, shall supply and deliver all Geothermal Fluid and receive all Geothermal Fluid in conformity to the Geothermal Fluid Specifications needed by the Operator for each Plant to generate the electric capacity and energy required by NAPOCOR and PNOC-EDC for Steamfield Power up to the Nominated Capacity. The Operator shall convert such Geothermal Fluid and, on behalf of PNOC-EDC, deliver all electrical capacity and energy generated by the Power Plant to NAPOCOR less (i) energy required by the Operator for auxiliary purposes; and (ii) the Steamfield Power. PNOC-EDC shall pay the Operator conversion fees as provided in Section 5.4 or Article 8, as the case may be. It is the intention of the Parties, without creating a contractual obligation under this Agreement, that PNOC-EDC shall exercise its best effort to increase the Geothermal Fluid inlet pressure to Plants 1,2 and 3 as per Geothermal Fluid Specifications to allow, to the extent possible, an increase in the Contracted Capacity of the Power Plant.

2.3 OWNERSHIP

- (a) From the Effectivity Date until the Transfer Date, the Operator shall own the Power Plant and all the fixtures, fittings, machinery and equipment on the Site and used in connection with the Power Plant which have been supplied by it or at its cost, and the Operator shall operate and manage the Power Plant for the purpose of converting the Geothermal Fluid delivered by PNOC-EDC in accordance with this Agreement into electric capacity and energy.
- (b) On the Transfer Date, ownership, management and operation of the Power Plant shall be transferred by the Operator to PNOC-EDC in accordance with Article 9 or 13 or 15, as applicable.

10

- (c) Ownership of the Site shall remain with PNOC-EDC at all times during the term of this Agreement.

2.4 COMMENCEMENT AND PROSECUTION OF THE PROJECT

The Operator shall develop and construct the Power Plant, with such resources, construction equipment and temporary facilities as, in the judgment of the Operator, are sufficient to complete the Power Plant on or before the corresponding Guaranteed Commercial Operation Date. The capacity of the construction equipment and temporary facilities, sequence of operations, method of operations, and resources employed shall be such, in the judgment of the Operator, as to insure that the Commercial Operation Date of each Plant occurs on or before the relevant Guaranteed Commercial Operation Date.

ARTICLE 3 GENERAL RESPONSIBILITIES OF THE OPERATOR

3.1 CONSTRUCTION PERFORMANCE SECURITY

- (a) To guarantee the faithful performance by the Operator of its obligation to completely construct the Power Plant in accordance with the terms and conditions of this Agreement, within ten (10) days of the Effectivity Date the Operator shall post and deliver the Construction Performance Security in a form acceptable to PNOC-EDC in a sum equivalent to One Hundred Dollars (US\$100) per kilowatt (kW) of total Contracted Capacity for all the Plants or its equivalent in Philippine Pesos or other currencies. Prior to such delivery, the Operator shall ensure that the Bid Security required under the bid documents shall be extended until such time the Construction Performance Security shall have been posted and delivered; provided that, in the event that the Effectivity Date does not occur on or before March 01, 1996, the Parties shall discuss and agree on any further extension of the Bid Security. PNOC-EDC shall have recourse to the Construction Performance Security to satisfy the final judgment in an arbitral proceeding in accordance with Article 21.
- (b) The Construction Performance Security shall be in any of the following forms: (i) cash; (ii) irrevocable letter of credit issued in a form and by a bank acceptable to PNOC-EDC, provided that if the letter of credit is issued by a foreign bank it must be confirmed by an acceptable local bank or offshore banking unit; (iii) a bank draft guarantee issued by an accredited local bank, or if the issuing bank is a foreign bank, such guarantee shall be confirmed by a local bank acceptable to PNOC-EDC; or, (iv) surety bond, callable on demand, from the Government Service Insurance System (GSIS). All foreign banks issuing a letter of credit or bank guarantee shall be required to submit itself to the jurisdiction of Philippine courts.

11

- (c) This Construction Performance Security shall be valid and in effect from ten (10) days after the Effectivity Date until the earlier of (i) the Guaranteed Commercial Operation Date plus six (6) months thereafter or (ii) such time it is converted into the Operation Performance Security..
- (d) Effective on the Completion Date, the Operator shall either convert the Construction Performance Security into or post and deliver an Operation Performance Security which shall be in any of the forms provided above for the Construction Performance Security in an amount equivalent to Sixty-Six Dollars (\$66) per kilowatt (kW) of Contracted Capacity, or its equivalent in Philippine pesos or other currencies. The Operation Performance Security shall guarantee the faithful performance by the Operator of its obligations during the Cooperation Period and, in case of abandonment, shall be forfeited in full in favor of PNOC-EDC.
- (e) If any security furnished in connection with this Agreement subsequently becomes unacceptable to PNOC-EDC in its reasonable discretion, or if the issuing company fails to furnish reports as to its financial condition from time to time as requested by PNOC-EDC, the Operator shall promptly furnish an additional security or a replacement security as may be required to protect the interests of PNOC-EDC in the Project.

3.2 RESPONSIBILITY FOR DAMAGE AND LOSSES

- (a) The Operator shall be responsible for and shall promptly repair all damage to property belonging to PNOC-EDC, NAPOCOR, private parties or the Government caused by the negligent acts or omissions of Operator, its employees, agents, representatives, contractors and

subcontractors.

- (b) Except as set forth herein, any and all losses and damages to the Power Plant, due to any cause or causes, whatsoever, that are the responsibility of the Operator, its employees, agents, representatives, contractors and subcontractors during the prosecution of the Agreement shall not relieve the Operator from any of its obligations under this Agreement.
- (c) Except as otherwise provided for in this Agreement and except for causes attributable to PNOC-EDC, PNOC-EDC shall not be responsible for any damage due to any increased difficulty in the performance of the obligations under this Agreement on account of any hindrance or delay due to any cause whatsoever in the progress of the development, construction, operation or maintenance of the Power Plant. Except as otherwise set forth herein or to the extent arising from causes attributable to PNOC-EDC, no adjustment in the prices as set forth in

12

Article 8 shall be made on account of any such damage, increased difficulty, hindrance or delay, but said hindrance or delay may entitle the Operator to an extension of time for completing the construction of the Power Plant as herein provided.

3.3 ENVIRONMENT AND CHANGE OF LAWS

- (a) Prior to the Effectivity Date, the Operator and PNOC-EDC shall mutually agree upon which requirements of the Environmental Compliance Certificate issued in respect of the Power Plant are to be performed by the Operator, and which requirements are to be performed by PNOC-EDC. The Operator shall keep the Site in a sanitary condition and in compliance with the environmental requirements and mitigation measures to be performed by the Operator pursuant to such Environmental Compliance Certificate, Authority to Construct, Permit to Operate, and in accordance with the laws of the Republic of the Philippines in effect as of the date hereof.

The costs for compliance with the environmental requirements shall be charged to the account of the Operator except that (i) with respect to H₂S emissions, if any control of such emissions will be required from Operator, then Operator will charge all costs related to the installation of necessary equipment and facilities for such control as well as all additional costs of operation and maintenance, to PNOC-EDC who agrees to pay Operator all such additional costs and PNOC-EDC shall have the right to approve the manner, method and associated proposed costs of compliance with such requirements and (ii) the Operator will comply with any environmental or non-environmental laws, rules and regulations (and official interpretations thereof) affecting the construction, operation or maintenance of the Power Plant or the Operator's costs that are adopted or changed after the date of this Agreement; provided that if such compliance would:

- (i) result in the Plants being unable to operate at the Guaranteed Net Plant Steam Rate in accordance with the Operating Parameters, or otherwise in accordance with the specifications set forth in this Agreement; or
- (ii) result in the interest of the Operator in the Power Plant and/or the Operator's expectation of its economic return (net of tax or other imposition) on its investment being reduced or otherwise adversely affected; or

(iii) result in the scheduled Completion Date being delayed;

13

PNOC-EDC shall pay to the Operator the additional capital costs and expenses necessary to comply with such new requirements and PNOC-EDC shall have the right to approve the manner, method and associated proposed costs of compliance with such requirements. With respect to any disagreement or to other impacts resulting therefrom the Parties shall meet and endeavor to agree on amendments to this Agreement and if after sixty (60) days no such approval or agreement has been reached, then the provisions of Article 9 shall apply.

- (b) If it is necessary, in the development, construction, operation or maintenance of the Power Plant, to interrupt or obstruct the natural flow of rivers or streams, the drainage of the surface, or the flow of artificial drains, the Operator shall provide adequate measures to prevent damage to either public or private properties. The Operator shall be liable for all damages caused by its negligence or willful misconduct with respect to such interruption or obstruction.
- (c) Subject to Section 3.3 (a) and except for any liability which may arise from emissions of H₂S prior to the installation of any H₂S abatement system, the Operator shall assume responsibility for any costs and liabilities arising from any adverse environmental damage or health impacts that are caused by the Operator's negligence or willful misconduct in the construction, operation, and maintenance of the Plants and their related facilities.

3.4 ORGANIZATION

- (a) The Operator shall maintain at the Site an efficient and capable organization with an adequate capacity and amount of construction, operating and maintenance equipment and facilities to satisfactorily develop, construct, operate or maintain the Power Plant in a safe, efficient, environmentally sound and professional manner.
- (b) The Operator shall assign to the Site English-speaking foreign personnel. Any interpreters required shall be provided by the Operator at its expense.
- (c) The Operator shall employ an engineer(s) appropriately licensed to practice in the Philippines who shall participate in the supervision of the development, construction, operation or maintenance of the Power Plant.

14

ARTICLE 4 CONSTRUCTION OF THE POWER PLANT

4.1 MILESTONE DATES

- (a) The Operator shall in good faith use all reasonable efforts to construct the Power Plant in accordance with the following schedule:

Activity	Date
Target Effectivity Date	March 1, 1996
Ordering of long lead items (turbogenerators)	the later of (i) July 1, 1996 or (ii) 120 days after the Effectivity Date

Start of Commissioning Period of Plants 1, 2, and 3.	May 1, 1997
Start of Commissioning Period of Plant 4	October 1, 1997
Scheduled Completion Date for Plants 1, 2, and 3	September 1, 1997
Scheduled Completion Date for Plant 4	January 1, 1998
Guaranteed Commercial Operation Date for Plants 1, 2 and 3	September 25, 1997
Guaranteed Commercial Operation Date for Plant 4	January 25, 1998

If the Commercial Operation Date of any Power Plant does not occur on or before the relevant Guaranteed Commercial Operation Date, the Operator shall be subject to the penalty provisions set forth in Section 4.11.

- (b) Each of the dates set forth in Section 4.1(a) shall be extended by the duration of any event of Force Majeure or any breach by PNOC-EDC of any of its obligations under this Agreement or any delays as a result of requirements upon the Operator by PNOC-EDC or by any relevant Government authority to install an H2S abatement system. In addition, if the date for ordering the long-lead items is after July 1, 1996 as provided in clause (a) above, each of the dates set

15

forth in Section 4.1(a) shall be extended day for day for the period between July 1, 1996 and such date.

4.2 TRANSMISSION LINE, INTERCONNECTION AND GEOTHERMAL FLUID

- (a) PNOC-EDC shall ensure that on or before each of the dates specified in Section 4.1(a), for the Start of Commissioning of each Plant as such dates may be extended pursuant to Section 4.1(b) for reason of Force Majeure, a 230 kV transmission line, including all interconnection facilities up to and including the Point of Interconnection for such Plant on the side of the transmission line (collectively, the "Transmission Line"), is installed and is capable of being connected to the Plants and receiving all power generated by those Plants which are about to be commissioned, plus any Plants already in operation.
- (b) PNOC-EDC shall likewise ensure that on each of the dates specified in Subsection 4.1(a) for the Start of Commissioning Period for each Plant Geothermal Fluid and the acceptance of the down stream Geothermal Fluid from the Plants complying with the Geothermal Fluid Specifications are made available to the Operator.
- (c) The Operator shall construct and maintain all interconnection facilities on the Plants' side of the Point of Interconnection.

4.3 SITE PROVISION

- (a) PNOC-EDC shall make the Site available exclusively to the Operator for the purpose of building and operating the Power Plant, free and clear of liens and encumbrances that could interfere with the Operator's

construction or operation of the Plants and at no cost to the Operator, and the Operator shall have the right to possess, use and enjoy the Site for the period from the Effectivity Date until the Transfer Date. The inability of PNOC-EDC to comply with its obligations under this Section 4.3 shall constitute a Political Force Majeure. Ownership and administration of the Site shall remain with PNOC-EDC throughout the effectivity of this Agreement. PNOC-EDC shall be responsible for, and hold the Operator and its successors and assigns harmless from, all claims by third parties relating to the land provided for the Site, including, without limitation, claims under colour of ownership of any interest in such land, real estate and other taxes or other claims that might give rise to any lien on the land or any improvements to it (other than those claims arising out of the Operator's construction, operation or maintenance of the Power Plant). If PNOC-EDC fails to duly satisfy such claims on a timely basis, the Operator

16

may do so (at his sole discretion and upon prior consultation with PNOC-EDC) and PNOC-EDC shall promptly reimburse such expenses.

- (b) The Operator shall not obstruct any existing road or drainage or disturb existing structures and facilities on the land so furnished for construction purposes unless and until given written permission by appropriate authorities. Unreasonable withholding or delay of such permission shall constitute Force Majeure.
- (c) PNOC-EDC shall make available to the Operator, free and clear of liens and encumbrances that could interfere with the Operator's construction or operation of the Plants and at no cost to the Operator, all other lands, easements, and rights-of-way for developing, constructing, operating, or maintaining the Plants (including areas and temporary access for the disposal of spoils) or such other purposes which the Parties agree are necessary in the implementation of this Agreement for the period from the Effectivity Date until the Transfer Date.

4.4 INGRESS AND EGRESS RIGHTS OF OPERATOR

PNOC-EDC shall ensure that all necessary access to and from the Site is made available to the Operator, its employees, contractors, subcontractors and advisers, at no cost to the Operator, for the period from the date of this Agreement until the Transfer Date.

4.5 EQUIPMENT IMPORTATION

- (a) The Operator shall be responsible for the importation and transportation to the Site of all equipment for development and operation of the Power Plant, and construction of the Power Plant. It is the responsibility of the Operator to secure from the Government, its agencies and instrumentalities, the necessary permits, licenses, and other documents for the importation of the Operator-owned construction or maintenance equipment that it may decide to bring into the country for use in connection with this Agreement. PNOC-EDC shall use its best efforts in assisting the Operator to obtain all such licenses and documents.
- (b) PNOC-EDC shall use its best efforts to cause the Government to grant the Operator exemptions from all custom duties or other importation or exportation tax in respect of all items of plant, machinery and ancillary items, including consumables and spare parts, required for the construction, operation, maintenance and repair of the Power Plant, provided however that if such exemptions are not obtained, the provisions of Section 8.6 shall apply.

- (c) Any delays caused by meeting customs procedures for material equipment and supplies or in obtaining necessary permits, licenses, and other documents caused by an event of Force Majeure and to the extent that they affect the Operator's ability to undertake its performance under this Agreement shall extend the project milestone dates set forth in Subsection 4.1(a) equivalent to the period of the delay in obtaining such permits, licenses and other documents. The Operator or PNOC-EDC shall promptly notify the other Party of each such delay, and the Parties shall cooperate to promptly satisfy the relevant authority and remove the cause of the delay. Any delay in excess of sixty (60) days after notification by the Operator to PNOC-EDC shall cause Article 9 to apply. The Operator shall not be subject to delay penalties as a result of such a delay.

4.6 PERMITS

Following the Effectivity Date, the Operator, at no cost to PNOC-EDC, shall be responsible for securing from the Government all requisite authorizations, licenses and permits not previously provided under the provisions of Article 26 for the construction and operation of the Plants, their associated facilities, and related waste management facilities, except the Environmental Compliance Certificate, which shall be obtained by PNOC-EDC. PNOC-EDC shall cooperate with and use its best efforts to assist the Operator in obtaining such authorization, licenses and permits.

Any delays, caused by an event of Force Majeure and to the extent that they materially affect the Operator's ability to undertake its performance under this Agreement, caused in obtaining requisite authorizations, licenses and permits shall extend the Completion Date and other benchmark dates day for day. The Operator or PNOC-EDC shall promptly notify the other Party of each such delay, and the Parties shall cooperate to promptly satisfy the relevant Authority and remove the cause of delay. Any delay in excess of sixty (60) days after notification shall cause Article 9 to apply. The Operator shall not be subject to delay penalties as a result of such a delay.

4.7 DRAWINGS, DOCUMENTS, DATA & INSTRUCTIONS

The Operator shall comply with the following on matters of drawings and other documentary information, and PNOC-EDC rights thereto:

4.7.1 SUBMISSION OF DRAWINGS AND DATA

The Operator shall submit to PNOC-EDC copies of all drawings, plans, calculations, operating and maintenance instructions and, in general, copies of all material documents related to the Power Plant reasonably requested for reference and information. Prior to the start of construction,

within thirty (30) working days following receipt thereof, PNOC-EDC shall describe to the Operator in writing any flaws perceived by PNOC-EDC in the designs. Failure by PNOC-EDC to describe any flaws in such designs within such thirty (30) day period shall be deemed PNOC-EDC's waiver of its right to describe such flaws.

The Operator shall also advise PNOC-EDC of the names of potential suppliers of material components or material services who have been shortlisted by the Operator. Within thirty (30) working days following

receipt of such advice, PNOC-EDC shall advise the Operator of any such potential suppliers to which PNOC-EDC objects, together with the reasons for objection and may request the Operator to exclude such suppliers from the shortlist. The Operator shall comply with such requests by PNOC-EDC as it shall deem reasonable.

Following the start of construction by the Operator on the Site, and in any case not earlier than 120 days after the Effectivity Date, the above-mentioned thirty (30) working days periods shall be reduced to fifteen (15) working days.

4.7.2 MODIFICATION RIGHTS

During the same thirty (30) or fifteen (15) working day period following the receipt of the documents or list of such suppliers under Section 4.7.1, PNOC-EDC shall have the right to require modifications to the design as it deems necessary within the scope of work set forth in Annex B and Annex C for proper and safe operation of the Power Plant as it affects the operation of the PNOC-EDC geothermal fluid collection and disposal system and the NAPOCOR power system. In the event PNOC-EDC requests any Elective Modifications, then the Parties shall negotiate in good faith (i) to adjust the Contract Capacity Price to maintain the Operator's economic return on its investment as if no such Elective Modifications were performed and (ii) adjust the dates set forth in Section 4.1 to reflect any delays in designing such Elective Modifications and any additional time required by the Operator to complete such Elective Modifications; provided that the Operator shall not be required to make such Elective Modifications if such Elective Modifications would likely impair the Operator's ability to perform its obligations hereunder. In the event the Parties are unable to reach agreement on such adjustments within sixty (60) days following PNOC-EDC's request, PNOC-EDC may withdraw such request. Thereafter, if such request is not withdrawn, the Operator shall either comply with such request or terminate this

19

Agreement by giving written notice of termination to the PNOC-EDC; provided, however, that if the Operator gives such a written notice of termination to PNOC-EDC, PNOC-EDC shall have five (5) working days following delivery of such notice of termination to again withdraw its request. If such request is withdrawn by PNOC-EDC such written notice of termination will be of no effect. Upon such termination, the provisions of Article 9 shall apply. If, following the process as described in this Subsection 4.7.2, in the Operator's reasonable judgment a delay has been caused to its construction schedule, and such a delay is not due to a flaw in the Operator's drawings, the dates set forth in Subsection 4.1(a) shall be extended and adjusted proportionally to such a delay.

4.7.3 FUTURE MODIFICATION

All changes to the design of the Power Plant desired by the Operator shall be subject to the review and approval of PNOC-EDC and such approval shall not be unreasonably withheld. Except as set forth in Section 4.7.2 and this section, neither Party shall have the right to make or require any changes in the design of the Power Plant without the prior written consent of the other Party.

4.7.4 CONSTRUCTION SCHEDULE

The Operator shall submit to PNOC-EDC a detailed construction schedule of the Power Plant within three (3) months following the Effectivity Date. This schedule shall contain, in particular, dates for the

submission of all drawings, documents and data, acceptance thereof, witnessing of tests and the overall procurement schedule. PNOC-EDC shall have the right to review and approve, which approval shall not be unreasonably withheld, the construction schedule of the Power Plant. Failure to disapprove such schedule within thirty (30) days following receipt of the same shall be deemed PNOC-EDC's approval of the same.

4.7.5 MONITORING RIGHTS

PNOC-EDC shall be entitled at its own cost to monitor the progress and quality of the construction and installation work. For this purpose, the Operator shall:

- (a) submit to PNOC-EDC a monthly progress report in such detail and format as may be reasonably requested by PNOC-EDC;

20

- (b) ensure that PNOC-EDC and any experts appointed by PNOC-EDC in connection with the Power Plant are afforded reasonable access to the Site at times to be agreed with PNOC-EDC provided that such access does not materially interfere with the development, construction, operation or maintenance of the Power Plant or expose any person on the Site to any danger; and
- (c) make available for inspection at the Site copies of all plans and designs.

4.7.6 DRAWINGS AND DOCUMENTS TO BE PROVIDED

The Operator shall furnish PNOC-EDC drawings and technical details that are prepared by or on behalf of the Operator such as, but not limited to, the following:

- (a) arrangement plans for the general layout of machinery and equipment;
- (b) general and detailed drawings and specifications for electromechanical works;
- (c) general and detailed drawings and specifications for civil and architectural works; and
- (d) operation and maintenance manuals

in accordance with the construction schedule as submitted and approved in accordance with Section 4.7.4.

Within six (6) months following the Commercial Operation Date of the last Plant, the Operator shall supply PNOC-EDC with three (3) copies of all "as built" plans, drawings, and design calculations related to construction and the performance of the Power Plant as well as quality assurance records, one of which copies shall be reproducible.

4.8 DISCLAIMER

The following disclaimer shall be recognized in this Agreement:

- (a) Any engineering review by PNOC-EDC of the Power Plant is solely for its information. By making such review PNOC-EDC makes no representation as to the engineering soundness of the Power Plant.
- (b) The Operator shall in no way represent to any third party the engineering soundness of the Power Plant as a result of the review made by PNOC-EDC.

- (c) Subject to the other provisions of this Agreement, the Operator is solely responsible for the economic and technical feasibility, operational capability and reliability of the Power Plant.
- (d) PNOC-EDC shall not be liable to the Operator for, and the Operator shall defend, hold harmless, and indemnify PNOC-EDC from, any claim, cost, loss, damage, or liability arising from any contrary representation made by the Operator concerning the effect of PNOC-EDC's engineering review of the Power Plant.

4.9 RESPONSIBILITY FOR UTILITIES

The Operator and PNOC-EDC shall be each responsible for the provision of needed utilities, such as electric service, water, communications and the like, necessary during the construction and operation of the Power Plant according to the requirements of Annex B2.3 and Annex B3 respectively.

4.10 DELAYS

Should the Operator be obstructed or delayed at any time in the progress of the construction work due to any of the following causes:

- (i) Failure of the Operator to obtain the necessary access to the Site, or failure of PNOC-EDC to deliver and accept geothermal fluid meeting the Geothermal Fluid Specifications; or the failure of PNOC-EDC to fulfill any of its other obligations that at Operator's reasonable judgment will cause a delay in the scheduled Completion Date; or the failure of the Operator, for reasons not attributable to the Operator, to obtain the Authorization to Construct and Permit to Operate; or
- (ii) Any delay described in Sections 4.5 and 4.6, or any delay caused by a PNOC-EDC directed modification in accordance with Subsection 4.7.2 other than a modification which is necessitated by a flaw in the Operator's drawings or any delays as a result of requirements upon the Operator by PNOC-EDC or by any relevant Government authority to install an H2S abatement system; or
- (iii) Delays due to Force Majeure conditions:

the Operator shall promptly notify PNOC-EDC of such delay, including details and supporting documents reasonably calculated to describe the problem, steps taken to resolve it and any proposed cooperative solution. Any delay under the terms of this

Section 4.10 shall extend day for day, unless otherwise agreed between the Parties, the Guaranteed Commercial Operation Date and all other related target dates directly related to the delay and within the responsibility of Operator.

4.11 PENALTY DUE TO DELAYS

- (a) In the event the Commercial Operation Date of any individual Plant does not occur on or before the relevant Guaranteed Commercial Operation Date (as the same may be extended pursuant to this Agreement or by mutual agreement), the Operator shall pay PNOC-EDC an amount as defined in Annex 13. If the Operator fails to pay such amount within

five (5) working days after due, PNOC-EDC shall have the right to draw on the Construction Performance Security to the extent of the amount defined in Annex E. In no event shall the aggregate amount of penalties for delay exceed the sum of \$5,700,000.

- (b) In the event that the Commercial Operation Date of any Plant does not occur within one hundred fifty (150) calendar days following the Guaranteed Commercial Operation Date for that Plant (as the same may be extended pursuant to this Agreement or by mutual agreement) then Section 15.4.1 shall apply.

4.12 LIGHTS AND BARRIERS

During construction, the Operator shall put up and maintain at the Site such danger lights and barriers as the Operator deems reasonably necessary to prevent all accidents in consequence of the development or construction of the Power Plant. If work is done at night, the Operator shall maintain from sunset to sunrise during the performance of such work such adequate lighting on or about the Site and on the work area as the Operator deems necessary for the safety of the construction forces and for the proper observance and inspection of the construction and erection activities.

ARTICLE 5 TESTING OF THE FACILITY

5.1 TESTING PROCEDURES

The procedures for the testing of the Power Plant set forth in Annex F shall be followed by the Operator.

5.2 TEST SCHEDULES

- (a) The Operator and PNOC-EDC shall agree on test schedules and schedules of Geothermal Fluid requirements for the tests for the Power Plants. The schedules shall take into consideration the operational requirements of PNOC-

23

EDC and NAPOCOR, provided, however, that the Operator shall not be delayed by more than 7 calendar days in his proposed test schedules.

- (b) In so far as Plants 1, 2 and 3 are concerned, the Operator agrees to accept Geothermal fluid for a total period of three (3) months during the commissioning period. Over these three (3) months the Operator, at Operator's request, shall be entitled to two (2) months of Geothermal Fluid supply for plant 3 and two (2) months of Geothermal Fluid supply for Plants 1 and 2.

5.3 NOTICE OF TESTS

The Operator shall notify PNOC-EDC at least fifteen (15) calendar days prior to carrying out any tests on the Power Plant and prior to:

- (a) the initial parallel operation of each of the Operator's Plants; and
- (b) all testing of the Protective Apparatus.

5.4 TESTS BEFORE COMPLETION

- (a) PNOC-EDC reserves the right to witness all tests, including equipment testing at the Operator's or other subcontractor's or equipment supplier's premises during the course of this Agreement. NAPOCOR shall have the right to have a representative present at all tests of the Protective Apparatus.

- (b) The representatives of PNOC-EDC shall have the right to be present during any test activity done by the Operator on the Power Plant. Tests conducted without the presence of PNOC-EDC's representative shall not be valid for the purposes of this Agreement; provided that if the Operator has complied with the notice provisions of Section 5.3 and PNOC-EDC representative fails to be available for such tests at the scheduled time, the Operator may conduct such tests and such tests shall be valid for the purpose of this Agreement and the Operator shall have the right to issue, without need of PNOC-EDC's concurrence, the certificates required by Section 5.4(c).
- (c) Upon completion of any test, the Operator and PNOC-EDC shall jointly issue a certificate that testing has been done on each Plant and that agreed testing procedures shown in Annex F had been followed.
- (d) The Operator shall use best efforts to demonstrate the Power Plant's ability to provide to NAPOCOR on behalf of PNOC-EDC the Contracted Capacity. If, pursuant to the tests performed pursuant to this Article 5, any Plant is unable to demonstrate a capacity equal to its proportional portion of the Contracted

24

Capacity, then the Operator shall perform the tests required by this Article 5 at such other capacity as the Operator elects. Upon completion of such tests, the Parties shall certify the Completion Date for the relevant Plant.

- (e) No later than seven (7) calendar days after the Completion Date of each Plant, the Operator shall notify PNOC-EDC of the adjusted Nominated Capacity of the Power Plant for the first year of operation. The total Nominated Capacity of the Power Plant for the first year of operation shall be adjusted upon the Completion Date of each Plant in order to include the proportional portion of the Nominated Capacity related to that completed Plant.
- (f) All costs, excluding Geothermal Fluid, incurred during the testing of the Power Plant shall be borne by the Operator.
- (g) Energy generated during testing shall be delivered to NAPOCOR on behalf of PNOC-EDC and paid for by PNOC-EDC at fifty percent (50%) of the rate actually paid by NAPOCOR to PNOC-EDC. The Operator shall bill PNOC-EDC for such energy in accordance with Section 8.4.
- (h) Notwithstanding anything to the contrary in this Agreement, in the event that, from and after the date set forth in Section 4.1 for the start of commissioning of a Plant, that Plant is capable of being tested, but performance tests required under Section 5.4(d) cannot be performed because of:
 - (i) an Interconnection Failure; or
 - (ii) PNOC-EDC's failure to deliver or accept Geothermal Fluid as specified in the Geothermal Fluid Specifications; or
 - (iii) the Operator's failure to receive all permits, licenses, other governmental approvals and utilities required for operation of the Power Plant, notwithstanding its reasonable efforts to obtain the same, and assuming the Operator has complied with the scope of work set forth in Annex B; or
 - (iv) PNOC-EDC or NAPOCOR's failure to provide any personnel or resource necessary to witness and approve such testing; or

- (v) any dispute between PNOC-EDC and NAPOCOR (under the Power Purchase Agreement or otherwise) which did not arise from any default of the Operator under this Agreement, including the termination or expiration of the Power Purchase Agreement, then, in any such events, the Completion Date for such Plant(s) shall be deemed to have occurred and

25

PNOC-EDC shall be obligated to commence payments of the Capacity Payments and the Energy Fee to the Operator on and from the Completion Date provided, however, that Completion Date for such payments shall not occur prior to August 1, 1997. The capacity for purposes of calculating the Capacity Payments payable under this Subsection shall be deemed to be delivery of Nominated Capacity equal to the Contracted Capacity of such Plant(s).

At such time when all events described in subparagraphs (i), (ii), (iii), (iv) and (v), above have been cured and no longer exist regarding the affected Plant, the Operator shall perform the performance tests required under Section 5.4(d) and advise PNOC-EDC of the adjusted Nominated Capacity of the Power Plant and thereafter shall receive Capacity Payments based on the adjusted Nominated Capacity.

In the event that the Operator is unable to pass all of the Plant's performance tests as set forth herein and provided that such tests are conducted within six (6) months from the Completion date of the affected Plant, the Operator will be obligated to refund or credit against future capacity made available and actually delivered to PNOC-EDC that amount of Capacity Payment actually received by the Operator prior to and during such tests which exceeds the amount of Capacity Payment which the Operator would have been paid at the lower capacity rating actually demonstrated in testing the Plant.

In the event there is a difference of opinion about test results before or during the Cooperation Period, which cannot be resolved by the Parties within seven (7) days, the controversy shall be resolved by a reputable engineering firm chosen in advance as provided herein after. The Operator shall propose the engineering firm, acceptable to PNOC-EDC which acceptance shall not be unreasonably withheld, and the Parties will agree on such engineering firm not later than six (6) months prior to the estimated start of the Commissioning Period for the first Plant. The Parties shall equally share any costs associated with this procedure.

5.5 TESTS DURING COOPERATION PERIOD

The net plant capacity and the Net Plant Steam Rate shall be tested every year in the presence of PNOC-EDC personnel following the procedures set forth in Annex F. This test shall be performed at the Operator's election within six (6) months after completion of the annual maintenance on each individual Plant and shall form the basis for determining the Nominated Capacity for the following year under Section 6.13. The Operator shall be entitled to repeat any of the aforesaid tests. If any of the events described in Subsection 5.4(h) affect the results of any such tests, the provisions of Subsection 5.4(h) shall apply for purposes of determining Nominated Capacity for such year.

26

6.1 COMPLETION DATE

- (a) Upon the substantial completion of the Power Plant and subject to confirmation by PNOC-EDC (which confirmation shall not be unreasonably withheld), the Operator may certify that the Completion Date of the Power Plant has occurred notwithstanding that the Power Plant is unable to produce the Contracted Capacity adjusted per the Correction Curves or to achieve the Guaranteed Net Plant Steam Rate, but in that event adjustments shall be made to the Capacity Payments in accordance with the penalty provisions of Subsection 8.3.1; provided, however, that such certification may not be made if the Power Plant is unable to produce at least seventy percent (70%) of the Contracted Capacity, after application of the Correction Curves.
- (b) On the Completion Date of the Power Plant, the Operator shall commence the delivery of electric capacity and energy to NAPOCOR on behalf of PNOC-EDC and shall be paid for such delivery in accordance with the provisions of Section 8.3. All other related provisions on the operation of the Power Plant and the tariffs, discounts, bonuses, and penalties on the regular sale of electric capacity and energy shall also take effect on this date.

6.2 POWER RATES FOR INITIAL DELIVERY

In the event that the Completion Date of any Plant falls on a date other than the Commercial Operation Date, PNOC-EDC shall pay the Contract Capacity Price for the Power Plant to the Operator on a prorated basis based on the number of days elapsed from the Completion Date.

6.3 DEDICATION OF FACILITY

The Operator shall operate and dedicate all energy and capacity of the Power Plant (net of Operator's and PNOC-EDC's usage allowed hereunder) to NAPOCOR.

6.4 OPERATING PARAMETERS

The Operator shall operate the Power Plant following the Operating Parameters as stipulated in Annex B(4).

27

6.5 DISPATCH PROCEDURE

It is the expectation of the Parties that the Plant(s) will be operated as base-load plant(s). However, the Operator shall Control and operate the Plant(s) consistent with NAPOCOR's dispatch requirements and the Plant(s) shall be so capable.

6.6 ENGINEERING STANDARDS

The Power Plant shall be designed, operated and maintained by the Operator in accordance with prudent industry standards and good engineering practices.

6.7 ENVIRONMENTAL STANDARDS

Subject to the provisions of Section 3.3(a), the Power Plant shall be designed, constructed, operated and maintained by the Operator in accordance with R.A. 6969 and DENR Administrative Orders 14, 34 and 35, and other applicable environmental standards and regulations, and in particular with the requirements of the Environmental Compliance Certificate, the Authority to Construct, and the Permit to Operate issued in respect of the Power Plant. In case of any changes in law or official interpretation of law, Section 3.3 shall apply.

6.8 PROTECTIVE DEVICES

The Operator shall install Protective Apparatus in accordance with general specifications for such equipment and as approved by PNOC-EDC, NAPOCOR and the Operator conforming to the specifications set forth in Annex B and Annex C, to ensure the NAPOCOR Electrical System Integrity. The Power Plant shall be operated by the Operator with all of the Protective Apparatus in service whenever it is connected to or is operated in parallel with the NAPOCOR electric system.

6.9 INTEGRITY LOSS

If, at any time, NAPOCOR reasonably doubts the integrity of any of the Operator's Protective Apparatus and reasonably suspects that such loss of integrity would be hazardous to the NAPOCOR Electric System integrity, the Operator shall demonstrate, to NAPOCOR's and PNOC-EDC's reasonable satisfaction, the correct calibration and operation of the equipment in question. If not so reasonably satisfied, NAPOCOR shall have the right to disconnect the Operator and refuse to receive the energy delivered by the Power Plant and, for the duration of such disconnection, the Power Plant shall be deemed to have suffered an Outage for billing purposes. The inability of the Operator to meet capacity by reason of any demonstration made by the Operator under this

28

Section 6.9 shall not be an Outage if the Operator is able to show correct calibration and operation of Protective Apparatus.

6.10 SETTINGS OF PROTECTIVE DEVICES

All settings of all Protective Apparatus shall be subject to the reasonable approval of NAPOCOR. Tests and calibration of this Protective Apparatus shall be at the expense of the Operator.

6.11 SERVICE COMMITMENT

At NAPOCOR's request, the Operator shall make all reasonable efforts on behalf of PNOC-EDC to deliver energy during periods of Emergency.

6.12 MAINTENANCE DURING EMERGENCY

In the event that the Scheduled Maintenance coincides with an Emergency, the Operator shall make all reasonable efforts to reschedule such Scheduled Maintenance.

6.13 ANNUAL CAPACITY NOMINATION

- (a) The Nominated Capacity of the Power Plant shall be specified by the Operator for the second year and each subsequent year of the Cooperation Period no later than thirty (30) calendar days prior to the anniversary of the first Commercial Operation Date of the Power Plant.
- (b) If, for a particular year, the Operator fails to specify a Nominated Capacity, then the lower of the Contracted Capacity, the last Nominated Capacity or the last capacity demonstrated in testing in accordance with Section 5.5 adjusted per Correction Curves shall be the Nominated Capacity for that particular year.

6.14 MAINTENANCE SCHEDULE

The Operator shall submit a written maintenance schedule for the necessary

overhaul, maintenance, inspection and repair of the Power Plant no later than one hundred (100) calendar days prior to the start of each calendar year following the Commercial Operation Date of the Power Plant setting forth the Operator's proposed Scheduled Maintenance for such year provided, however, that each Plant shall not be scheduled for Scheduled Maintenance for more than twenty-one (21) days per year in which a major overhaul of that Plant occurs, and seven (7) days per year in which no major overhaul occurs, and the interval between major overhauls of each Plant shall not be less than a cycle of two years.

29

6.15 APPROVAL OF MAINTENANCE SCHEDULE

PNOC-EDC shall notify the Operator, within forty-five (45) calendar days after receipt of each maintenance schedule from the Operator, whether the requested maintenance schedule is approved, which approval shall not be unreasonably withheld. If not approved, the Parties shall promptly and in good faith negotiate an alternative mutually-agreeable maintenance schedule.

6.16 APPROVAL OF OVERHAULS

The Operator shall not schedule major overhauls without the prior approval of PNOC-EDC and such approval shall not be unreasonably withheld or delayed.

6.17 COMPLIANCE WITH APPROVED MAINTENANCE SCHEDULE

The Operator shall perform Scheduled Maintenance on the Power Plant during the periods set forth in the maintenance schedule approved pursuant to Section 6.15, unless such other times are approved by PNOC-EDC, and such approval shall not be unreasonably withheld.

6.18 UNSCHEDULED OUTAGE

The Operator shall immediately notify PNOC-EDC, and NAPOCOR on behalf of PNOC-EDC, of any unscheduled Outage and the estimated duration of such Outage.

6.19 DAILY OPERATING REPORT

For record purposes, the Operator shall keep PNOC-EDC and NAPOCOR's power management center regularly informed as to the daily results of operation and generation capability of the Power Plant, including, without limitation, any Outages.

6.20 OPERATING RECORDS

The Operator shall maintain an operating log for each Plant with records of:

- (a) real and reactive power production,
- (b) changes in operating status,
- (c) Outages,
- (d) Protective Apparatus operations, and

30

- (e) any unusual conditions found during inspections.

Changes in the setting of Protective Apparatus shall also be logged. In addition, the Operator shall maintain customary records applicable to the Power Plant, including maintenance and overhaul records, the electrical characteristics of the generator and settings or adjustments of the generator control equipment and Protective Apparatus. At the end of the Cooperation Period, such records shall be turned over to PNOC-EDC at no cost.

6.21 PNOC-EDC ACCESS TO THE POWER PLANT

Upon at least twenty four (24) hours advance notice under normal circumstances, PNOC-EDC shall have rights of access to the Power Plant at mutually agreed upon times for the purpose of monitoring the Operator's operation and maintenance of the Power Plant, subject only to any reasonable restrictions that the Operator may impose for reasons of personnel and equipment safety and to avoid any impairment to the operations or maintenance of the Power Plant. However, in the event of an emergency, no advance notice shall be required provided that PNOC-EDC representative shall be accompanied by the Operator's representative. The Operator shall make the necessary arrangements to allow free access at any time to PNOC-EDC equipment.

ARTICLE 7 GEOTHERMAL FLUIDS

7.1 GEOTHERMAL FLUID SUPPLY

- (a) PNOC-EDC shall supply and accept at no cost to the Operator the total Geothermal Fluid requirements and output of the Power Plant. Such Geothermal Fluid shall conform to the Geothermal Fluid Specifications.
- (b) If neither Party shall have reason to believe that any Geothermal Fluid delivered to or accepted from the Site do not comply with the Geothermal Fluid Specifications, that Party shall promptly notify the other Party. Such notice shall be reasonably detailed and focused on possible solutions to the problem.

7.2 NON-CONDENSIBLE GASES & NON-GEOTHERMAL WASTE

Except as provided for in Sections 3.3 and 11.2, the Operator shall be responsible for disposal of non-condensable gases resulting from the operation of Plant 4 and all non-Geothermal Fluid related waste arising from the Operator's construction, operation or maintenance of the Power Plant. If requested by the Operator, PNOC-EDC shall dispose of such waste at the Operator's cost, such disposal to be in accordance with applicable law. The disposal activities of PNOC-EDC on behalf of Operator shall be subjected to a

31

separate Waste Disposal Agreement between PNOC-EDC and the Operator. This disposal shall be in accordance with the requirements of the Environmental Compliance Certificate issued in respect of the Power Plant and attached hereto as Annex L.

7.3 SURPLUS CONDENSATE

The Operator shall deliver to PNOC-EDC and PNOC-EDC shall accept for disposal at no cost to the Operator all surplus condensed geothermal steam, including cooling tower blowdown; provided, however, such surplus condensate complies with the specifications set forth in Annex C.

7.4 OTHER GEOTHERMAL WASTE

Except as set forth in Section 7.2, PNOC-EDC shall be responsible at no

cost to the Operator for the disposal of all waste products related to the Geothermal Fluid and/or steam supplied by PNOC-EDC for the operation or testing of the Power Plant. This disposal shall be in accordance with the requirements of the Environmental Compliance Certificate issued in respect of the Power Plant and attached hereto as Annex L.

7.5 ENERGY MANAGEMENT

The Operator shall use its reasonable efforts to optimize steam and electricity use and shall exercise due diligence in the operation and management of main and auxiliary machinery so as to minimize energy consumption and waste.

ARTICLE 8 DELIVERY OF CAPACITY AND ENERGY

8.1 OBLIGATIONS OF THE PARTIES

- (a) The Operator hereby agrees to convert PNOC-EDC's Geothermal Fluid into electric energy and PNOC-EDC hereby agrees to sell to NAPOCOR, at the Point of interconnection, the Nominated Capacity and energy delivered by the Operator to NAPOCOR on behalf of PNOC-EDC during the Cooperation Period less any Steamfield Power. PNOC-EDC agrees to pay the Operator for the Nominated Capacity and energy delivered by the Operator at the Points of Interconnection for NAPOCOR Power and Steamfield Power.
- (b) During the testing prior to the Completion Date of each Plant, the Operator shall not receive any payments for Contracted Capacity or Nominated Capacity for that Plant but shall receive payments for energy as set forth in Section 5.4(g).
- (c) From and after the Completion Date of each Plant, the Operator shall make available electric capacity of that Plant and shall deliver energy in accordance with

32

this Agreement and receive the Capacity Payments and receive or make the Energy Fee described in Section 8.3.2.

8.2 METERING

8.2.1 METER MAINTENANCE AND OWNERSHIP

- (a) PNOC-EDC shall supply, own and maintain as part of the interconnection facilities at the Point of Interconnection and at the point of supply of the Steamfield Power, meters and related equipment reasonably satisfactory to the Operator for the measurement of electricity. Billing under this Agreement shall use the readings of these meters.
- (b) NAPOCOR may also supply, own and maintain as part of the interconnection facilities at the Point of Interconnection, meters and related equipment for the measurement of electric power and energy.
- (c) PNOC-EDC shall supply, own and maintain meters and related equipment reasonably satisfactory to the Operator for the measurement of Geothermal Fluid flow. These meters and equipment shall be located in the Geothermal Fluid piping upstream of the interface point of Geothermal Fluid supply from PNOC-EDC to the Operator. Billing under this Agreement shall use the readings of these meters
- (d) The Operator shall supply, own and maintain equipment for the measurement, calculation and recording of those parameters required for the application of the Correction Curves. The equipment used for

measuring Atmospheric Conditions shall be located close to the air intake of the cooling tower of Plant 4, in accordance with the Cooling Tower Institute (CTI) Standards.

8.2.2 PLANT MONITORING EQUIPMENT

For the purpose of monitoring the Power Plant's operation, the Operator shall make reasonable provisions for the installation of other metering and telemetering devices at the generation side of the step-up transformers at the Point of Interconnection as part of the PNOC-EDC Supervisory Control and Data Acquisition (SCADA) system.

8.2.3 METER SEALS AND INSPECTION

PNOC-EDC's meters shall be sealed and the seals shall be broken only when the meters are to be inspected or tested by PNOC-EDC. The Operator shall be given reasonable notice of such occasions and shall have the right to have a representative present at such tests.

33

8.2.4 METER TESTS

- (a) PNOC-EDC's electricity meters, installed in pursuance to this Agreement, shall be tested by PNOC-EDC at its own expense every six months. Other tests may be conducted at any reasonable time upon request by either Party, at the requesting Party's expense (subject to the next sentence). If the Operator makes such request, the Operator shall reimburse said expense to PNOC-EDC within thirty (30) days after presentation of a bill therefore, unless such tests demonstrate that such meters are not 100% accurate plus or minus one percent (1%), in which case PNOC-EDC shall bear the expense for such tests.
- (b) The Operator's equipment for the calculation and recording of theoretical Geothermal Fluid consumption shall be tested by the Operator at its own expense, in the presence of PNOC-EDC, every six months.

8.2.5 METER ACCURACY

Electric metering equipment found to be inaccurate pursuant to Section 8.2.4 or otherwise shall be repaired, adjusted, or replaced by PNOC-EDC such that the accuracy of said equipment shall be within 100% plus or minus one percent (1%). Should the inaccuracy exceed plus or minus one percent (1%), the correct amount of energy delivered during the current and previous Billing Periods shall be estimated by PNOC-EDC subject to agreement by the Parties. Adjustments for meter inaccuracy shall be made only for the current Billing Period and the Billing Period immediately preceding it except when such meter inaccuracy is due to fraud.

8.3. TERMS OF PAYMENT

8.3.1 CAPACITY PAYMENTS

The total Capacity Payments shall be the sum of the Capital Cost Recovery Fee, the Fixed Operating Cost Recovery Fee, and the Service Fee to reflect Return on Investment. The Capacity Payments shall be computed on the basis of the following formulae:

- (a) Capital Cost Recovery Fee (A) to be paid in Dollars.

$$A = [(CCR \times NC)(1 - TOH/Nh)] - [(y \times 0.2)(CCR)(CC - NC)]$$

- (b) Fixed Operating Cost Recovery Fee (B) to be paid in Philippine Peso

and Dollars.

$$B = [(OCR \times NC)(1 - TOH/Nh)] - [(y \times 0.2)(OCR)(CC - NC)]$$

34

- (c) Service Fee for Return on Investment (C) stated in Dollars and payable, at the option of PNOC-EDC, either in Dollars or in equivalent Philippine Pesos using the same day telegraphic transfer selling rate for Dollars of the Philippine National Bank at the time of payment. In no case shall the Service Fee be lower than 8% of the sum of the Capital Cost Recovery Fee and the Fixed Operating Cost Recovery Fee.

$$C = \{[(SFR \times NC) (1 - TOH/Nh)] - [(y \times 0.2)(SFR)(CC-NC)]\}$$

where,

A = Capacity Payment to recover capital cost for the Billing Period.

B = Capacity Payment to recover fixed operating cost for the Billing Period.

C = Capacity Payment to reflect return on investment of the Operator for the Billing Period

CCR = \$10.42 per kW per month.

OCR = Ps28.90 per kW per month and \$1.97 per kW per month.

SFR = \$6.42 per kW per month.

CC = Contracted Capacity, in kW.

TOH = Total Outage Hours in the Billing Period.

Nh = Total number of hours in the Billing Period.

NC = Nominated Capacity for the year, in kW.

y = variable, defined as follows:

if $0.95 \times CC$ (less than) NC (less than) $1.05 \times CC$, then $y = 0$

otherwise $y = 1$

8.3.2 ENERGY FEE

Energy Fee (D) shall be computed on the basis of the following formula and be paid in Philippine Pesos. (Energy Fee will be paid by PNOC-EDC

35

to the Operator in case D is positive and by the Operator to PNOC-EDC in case D is negative.)

$$D = \sum_{i=1}^4 U_i (V_{gi} - V_{ti}) \times Z_i$$

i=1

where:

D = Energy Fee for the Billing Period.

U_i = Steam Price for Plant as set forth in Annex I.

V_{gi} = Cumulative theoretical steam consumption of Plant i during Relevant Hours for the Billing Period in metric tons computed on the basis of the Guaranteed Net Plant Steam Rate for each hour (SR_g), using the formula:

$$V_{gi} = 0 \quad \sum_{j=1}^n ED_{ij} \times SR_{gij}$$

where:

j = Any Relevant Hours during the Billing Period.

n = Number of Relevant Hours hours in the Billing Period.

ED_{ij} = Energy Delivered during the Billing Period from Plant i in hour j expressed in kilowatt hours (kWh).

Sr_{gij} = Guaranteed Net Plant Steam Rate of Plant i for each hour j adjusted for variations from Geothermal Fluid Specifications, Atmospheric

Conditions and load change using the formula:

Guaranteed Net Plant Steam Rate

36

$$Sr_{gij} = \frac{F_{1ij} \times F_{2ij} \times F_{3ij} \times F_{aij} \times F_{gij}}{}$$

where:

F_{1ij} = Steam pressure correction factor per Correction Curves for Plant i in hour j.

F_{2ij} = Partial load correction factor per Correction Curves for Plant i in hour j.

F_{3ij} = Steam flow correction factor per Correction Curves for Plant i in hour j.

F_{aij} = Ambient wet bulb temperature correction factor per Correction Curves for Plant 4 in hour j.

F_{aij} = 1 for Plants 1, 2, and 3.

Fgij = NCG content in steam flow correction factor
per Correction Curves for Plant i in hour j.

Vti = Measured steam consumption of Plant i for the Billing
Period in metric tons minus steam consumed by Plant i
during Non Relevant Hour in metric tons.

Non Relevant Hour = (a) Any hour in which, for Plants 1, 2 and 3
only, the Plant is in partial load
operation mode (75% of that Plant's
portion of the Contracted Capacity or
less, when the load reduction is
achieved by throttling the supply of
steam to one or more of the Generating
Units which are then delivering
electricity) due to dispatch and: (i)
the steam inlet pressure is different
from the Geothermal Fluid Specifications
by 2% or more; or (ii) the steam outlet
pressure is different from the
Geothermal Fluid Specifications by 3% or
more; or

(b) Any hour in which an event described in
sub-paragraph (b) of the definition of
Outage Hour occurs.

Relevant Hour = Any hour other than Non Relevant Hour.

37

Zi = Variable for Plant i, defined as follows:

if $0.95 \times V_{gi}$ (less than) V_{ti} (less than) $1.05 \times V_{gi}$
then $Z_i = 0$

otherwise $Z_i = 1$

8.3.3 ESCALATION

In the Billing Periods commencing January 25th and July 25th of each
year (using the indices for the prior months of December and June,
respectively), the amount of :

- (i) Fixed Operating Cost Recovery Fee (OCR); and
- (ii) Service Fee for Return on Investment (SFR)

shall be increased proportionately by the increase in the index
applicable to each component, as specified in Annex K as appropriate,
as from the levels of such indices prevailing in January 1995.

8.4 BILLING PROCEDURES

The Operator shall bill PNOC-EDC for the delivery of electric power and
energy as adjusted on a monthly basis until the termination of this
Agreement.

Operator shall arrange its billing schedule in accordance with the billing
system of PNOC-EDC. The Billing Period shall cover the period from 10:00 AM

on the twenty-fifth (25) day of the current month to 10:00 AM of the twenty-fifth (25th) day of the following month. Any changes in the billing system of PNOC-EDC shall be followed by the Operator in billing PNOC-EDC. The Operator shall send PNOC-EDC its bills within five (5) days reckoned from the last day of the Billing Period. PNOC-EDC shall be required to settle its monthly bills to the Operator within thirty (30) days from receipt of billing to avoid penalties.

8.5 DISPUTES

If PNOC-EDC disputes the amount specified in any invoice it shall so inform the Operator within seven (7) days following receipt of such invoice. If the dispute is not resolved by the due date PNOC-EDC shall pay the undisputed amount on or before such date and the disputed amount shall be resolved as soon as is reasonably practicable following the due date for such invoice.

38

8.6 TAXES

- (a) All payments made to the Operator pursuant to this Agreement shall be paid together with all taxes, duties, fees, levies and other assessments to be paid by the Operator in respect of such payments, the Power Plant or this Agreement, including "value added taxes" and all other taxes but excluding national income taxes assessed after the expiration of the tax holiday that would be applicable to the Operator if it were granted pioneer enterprise status under the Omnibus Investments Code of 1987 (whether or not the Operator is granted such pioneer enterprise status) and excluding Philippine withholding taxes imposed on the Operator not in excess of fifteen percent (15%) (which shall be separately stated in all invoices) in dollars in respect of the dollar portion and in pesos in respect of the peso portion and each sum payable shall be increased so as to ensure that after PNOC-EDC has deducted therefrom any and all taxes or charges required to be deducted therefrom by PNOC-EDC there remains a sum equal to the amount that would have been payable to the Operator had there been no requirement to deduct or withhold such taxes or other charges.
- (b) PNOC-EDC shall promptly reimburse the Operator upon demand for all custom duties, national internal revenue taxes, value added taxes and other taxes actually paid by the Operator with respect to the importation of capital equipment, or spare parts related to the Power Plant, provided that the Operator shall avail of the applicable import incentives granted to it by the Board Of Investment.
- (c) PNOC-EDC shall be responsible for the payment of all taxes imposed by the Government on the Operator or the Power Plant during the period of construction and Cooperation Period including without limitation, value added taxes, real estate taxes in respect of the Site and the buildings and other improvements thereon, including the Power Plant, but except as set forth in Sections 8.6(a) and (e) or elsewhere in this Agreement not (i) corporate 4.7 or 14.3 (or any other applicable provisions of this Agreement) make Article 9 applicable or, in the reasonable opinion of PNOC-EDC or the income tax on the Operator, (ii) taxes on dividends or profit remitted from the Philippines by the Operator, and (iii) reasonable construction and permit fees and charges not exceeding \$50,000, and (iv) any and all taxes, fees, documentary stamps and charges, as well as all costs and expenses, incurred and paid by the Operator in connection with or arising from any loan or financing agreement, mortgages and security interests. The Capacity Payments do not include custom duties, national internal revenue taxes, value added taxes and other taxes with respect to the importation of capital equipment or spare parts related to the Power Plant by the Operator.

- (d) PNOC-EDC will be responsible for covering any new or increased taxes due to changes in the Omnibus Investments Code of 1987, the BOI rules and future regulations, or due to new or amended laws, rules and regulations.
- (e) The Operator shall apply for and shall use good-faith efforts to obtain all exemptions from any such taxes available to the Operator.

8.7 PAYMENT PROCEDURES

All payments to be made to the Operator under this Agreement shall be paid in the applicable currency as specified in this Agreement without any deductions for set-off or counterclaims and shall be wire transferred in immediately available same Day funds not later than 11:00 AM on the due date to the account(s) within or outside the Republic of the Philippines as designated by the Operator from time to time by notice given in accordance with Subsection 17.3. Without limiting any other rights of the Operator, any payments not paid by PNOC-EDC to the Operator when due under this Agreement shall bear interest at the rate equal to "one month Libor" for Dollar + 3%, determined and compounded daily, from the date due until the date paid.

ARTICLE 9 BUYOUT

9.1 BUYOUT CONDITIONS

If,

- (a) during the Cooperation Period in the reasonable opinion of PNOC-EDC or the Operator, changes in or adoption of new policies, laws and regulations, including taxes, or any interpretations thereof of the Government adversely affect the operation or maintenance of the Power Plant or the after tax cash flow of the Operator, or
- (b) prior to the Cooperation Period, the provisions of Subsections 3.3(a), 4.5, 4.6, 4.7 or 14.3 (or any other applicable provisions of this Agreement) make this Article 9 applicable or, in the reasonable opinion of PNOC-EDC or the Operator, changes in or adoption of new policies, laws and regulations, including taxes, or any interpretations thereof of the Government adversely affect the construction of the Power Plant or the after tax cash flow of the Operator; or
- (c) PNOC-EDC fails to make any payments when due to the Operator under this Agreement including without limitation the Capacity Payments and the Energy Fees; or

- (d) at any time during the effectivity of this Agreement, PNOC-EDC or NAPOCOR is privatized in whole or in part or reorganized, or the events defined in Article 20 shall occur,

then PNOC-EDC or the Operator as the case may be shall notify the other Party of the occurrence of any of the foregoing events and the Parties shall promptly meet and endeavor to make amendments to the Agreement and agree to such amendments. If, after ninety (90) calendar days or sixty (60) calendar days in case of Section 9.1(c), since the occurrence of such events, no such agreement has been reached, either party may require a buyout of the Operator's Power Plant by PNOC-EDC. If either Party determines that such an impasse has been reached, that Party may deliver

written notice to the other Party requiring a buyout under this Article 9 provided that for purposes of Section 9.1(a) above an adverse effect on the Operator's after-tax cash flow (after taxes) for any taxable year, as confirmed by an independent auditor agreeable to both Parties and provided that in case of Section 9.1(c) above, only the Operator shall have the right to require a buyout. If the Parties cannot promptly reach a definitive, written agreement embodying the terms of a buyout (notably the Buyout Price and payment terms Article 21 shall apply.

9.2 BUYOUT PRICE

The purchase price (Buyout Price), payable in Dollars, of the Power Plant as a result of the buyout shall be

- (a) If the provisions of Sections 9.1 or 15.4.1 apply prior to the Commercial Operation Date of the last Plant, the purchase price payable, in United States dollars, shall be an amount equal to the aggregate of all the costs and expenses (including without limitation accrued interest and other costs incurred in financing the development of the Power Plants) incurred by the Operator in connection with the performance of its obligations under this Agreement as estimated by an independent accountant jointly appointed by the Parties plus an amount equal to ten percent (10%) of such aggregate costs.
- (b) During the Cooperation Period the net present value of the remaining stream of payments for the Capacity Payments less Fixed Operating Cost Recovery fees for the rest of the Cooperation Period on the basis of the last Nominated Capacity, and using an annual discount rate equal to the last published Commercial Interest Reference Rate (CIRR) having the shortest maturity term for United States dollars published by the Organization for Economic Cooperation and Development (OECD) provided however that such discount rate shall not exceed nine point two six percent (9.26%) per annum.

41

In calculating aggregate costs in accordance with clause (a), amounts disbursed by lenders shall be prima facie evidence of actual disbursements of costs and interest accrued (whether or not paid) shall be deemed actual disbursements. The actual rates of interest payable to lenders shall be the interest rate attributable to that portion of the Buyout Price.

9.3 PAYMENT TERMS

- (a) Completion of a buyout pursuant to Sections 9.1 or 15.4.1 shall take place on the date that is sixty (60) days following delivery of the notice specified in this Agreement (the "Buyout Date") at which time (i) PNOC-EDC will pay to the Operator the purchase price calculated in accordance with Section 9.2 and payable in United States dollars and return all security held by PNOC-EDC in connection with this Agreement, including any bid securities, the Performance Security, letters of credit and bank guarantees, and (ii) the Operator shall transfer to PNOC-EDC all of the Operator's rights, title and interest in the Power Plant and shall warrant that upon such buyout the Power Plant shall be free from any lien or encumbrance created by the Operator.
- (b) In the event that the provisions of Sections 9.1 or 15.4.1 apply as a result of Section 14.3(c), then there shall be deducted from the sum payable pursuant to Section 9.2 an amount equal to the value, if any, of any insurance proceeds received by the Operator in respect of such event of Force Majeure, but only to the extent that such insurance proceeds were not used by the Operator in an attempt to correct the damage caused by such event of Force Majeure.

9.4 TRANSFER PROVISION

In respect of any transfer of ownership of the Power Plant pursuant to the conditions stated above, the provisions on transfer of ownership in Article 13 hereof shall apply thereto.

ARTICLE 10 REPRESENTATIONS & WARRANTIES OF THE PARTIES

10.1 CORPORATE EXISTENCE

- (a) The Operator represents for itself that it is a corporation duly organized and existing under and by virtue of the laws of the state of Delaware, U.S.A. licensed to do business in the Philippines through its branch office and that it has the corporate power and authority to execute, deliver and carry out the terms and conditions of this Agreement.

42

- (b) PNOC-EDC represents that it is a wholly-owned subsidiary of the Philippine National Oil Company, a corporation created and organized under Presidential Decree No. 334, as amended, and that it has the power and authority to execute, deliver and carry out the terms and conditions of this Agreement.

10.2 AUTHORIZATIONS

- (a) The Operator represents and warrants for itself that it has taken all necessary corporate action to enter into this Agreement and to perform its obligations hereunder with the exception that it has not obtained final approval of the terms of this Agreement from its Board of Directors prior to signing the Agreement. The Operator represents that it will use its best efforts to obtain such approval in the shortest possible time following signature.
- (b) PNOC-EDC represents and warrants for itself that it has taken all necessary corporate action to enter into this Agreement and to perform its obligations hereunder.

10.3 WARRANTY AGAINST CORRUPTION

The Operator hereby warrants for itself that it or its representative acting on behalf of it has not given or promised to give any money or gift to any employee or official of PNOC-EDC to influence the decision regarding the awarding of this Agreement, nor has it and/or its representatives acting on behalf of it exerted or utilized any unlawful influence to solicit or secure this Agreement through any agreement to pay a commission, percentage, brokerage or contingent fee. The Operator agrees that breach of this warranty shall be sufficient ground for the Philippine National Oil Company or its affiliate to deduct, at its discretion, such commission, percentage, brokerage or contingent fees from the contract price without prejudice to it or any person's civil or criminal liability under the Anti-Graft Law and other applicable laws.

10.4 NO SOVEREIGN IMMUNITY

PNOC-EDC acknowledges and agrees that this Agreement, the Accession Undertaking and the consent of PNOC-EDC specified in the last sentence of Section 19(a) and the transactions contemplated thereby and hereby constitute commercial activities of PNOC-EDC in respect of which PNOC-EDC is subject to set-off, suit, judgment and execution. PNOC-EDC acknowledges and agrees that it does not have, nor is it entitled to, any immunity, whether characterized as sovereign immunity or otherwise, from any legal proceedings, whether in the United States of America or elsewhere, to enforce or collect upon such agreements (including without limitation

immunity from service of process, immunity from jurisdiction of any court or tribunal, and immunity of any of its property

43

from attachment prior to entry of judgment and from attachment in aid of execution, or from execution upon a judgment) in respect of itself or its property.

10.5 GEOTHERMAL SERVICES CONTRACT

PNOC-EDC represents and warrants that it is a party to the Geothermal Services Contract, dated May 14, 1981, between PNOC-EDC and the Republic of the Philippines, which sets forth the rights of the parties thereto to the Site. PNOC-EDC agrees to take any and all actions necessary to ensure that the Operator's right to use the Site (and the interests of any secured parties or the Operator in the Site) are not adversely affected by the rights and obligations of PNOC-EDC under the Geothermal Services Contract, as amended from time to time.

ARTICLE 11 INDEMNIFICATION

11.1 OPERATOR INDEMNIFICATION

- (a) The Operator shall hold free and harmless and defend PNOC-EDC its officers, contractors, and employees from any and all claims, liabilities and suits for losses and damages to properties of third parties arising from the negligence of the Operator in the prosecution of the Agreement, except to the extent caused by the negligence, gross negligence or willful misconduct of PNOC-EDC.
- (b) The Operator shall hold free and harmless and defend PNOC-EDC, its officers, contractors and employees from liabilities, damages or obligations of any nature or kind, including costs and expenses, on account of any copyrighted or uncopyrighted composition, secret process, patented or unpatented invention, article, method or appliance manufactured or used by the Operator in the performance of the Agreement.
- (c) Any fines or other penalties incurred by the Operator or its officers, employees or contractors for non-compliance by the Operator, its officers, its employees, or contractors with the laws, rules, regulations or ordinances of the Republic of the Philippines shall be the exclusive responsibility of the Operator.

11.2 PNOC-EDC INDEMNIFICATION

PNOC-EDC shall hold free and harmless and defend the Operator, its officers, employees and contractors harmless against any claims of any person who directly or indirectly suffers or is injured by the performance by the Operator or its officers, employees or contractors of the obligations under this Agreement, including damage or injury as a result of an interruption of electricity supply or Geothermal Fluid delivery or acceptance

44

or any other disruption or surge of electricity supply or Geothermal Fluid delivery or acceptance (including without limitation interruptions or disruptions related to plants operating upstream or downstream from the Power Plant) or emissions of H₂S prior to the installation of any H₂S abatement system in accordance with Section 3.3(a), and the Operator's, its

officers', employees' or contractors' actions or omissions in connection therewith, except to the extent caused by the negligence, gross negligence or willful misconduct of the Operator.

ARTICLE 12 INSURANCE

12.1 APPLICABLE TERMS

The Operator shall, at its own expense, obtain and maintain in force insurances as specified in Sections 12.2 and 12.3. The Operator shall provide to PNOC-EDC evidence of these insurances. In particular, evidence of the insurance specified to be held during the Cooperation Period shall be furnished prior to commencing initial testing of the Power Plant.

12.2 INSURANCE DURING CONSTRUCTION

From the applicable date that the exposure to the subject risk being insured under such coverage arises until the commissioning of the Power Plant, the Operator shall, at own expense, obtain and maintain in force the following insurances:

- (a) All Risks Marine Insurance for the full value of each plant and equipment to be imported into the Philippines;
- (b) All Risks "Builder's Risk Insurance" to cover the full value of the entire works from any and all kinds of damages customarily covered; and, covering at least the Contractor's All Risk (CAR) Insurance for civil works, electro mechanical works and transformer installations.
- (c) "Third Party Liability Insurance" to cover injury to or death of persons including those of PNOC-EDC or physical damage to tangible property including those of PNOC-EDC caused by the works or by the Operator's vehicles, tools and/or equipment or personnel including its subcontractors.

Such insurance shall provide for at least the following recoveries:

- a) Bodily Injury Ps 250,000 per person
 Ps 250,000 per incident

45

- b) Property Damage Ps 1,000,000 per property
 Ps 1,000,000 per incident

12.3 INSURANCE DURING COOPERATION PERIOD

From the completion of the Power Plant, the Operator, at its own expense, shall keep the Power Plant insured against accidental damage from all normal risks and to a level normal for prudent operators of facilities similar to the Power Plant. In addition, the Operator shall secure adequate insurance cover for its employees as may be required by law.

The insurance coverages that the Operator shall secure and maintain should at least include an All-Risks Insurance (All Natural Perils including Fire), and Comprehensive General Liability and a Machinery Breakdown Coverage during the last year of the Cooperation Period.

12.4 APPROVAL BY PNOC-EDC

Certified true copies of insurance policy certificates for all the above coverages and official receipts of premium payments on the above shall be filed with PNOC-EDC within fifteen (15) working days from the issuance of the policies or of the receipts of premium payments and shall be subject to

PNOC-EDC's approval as to the enumeration of items covered under Sections 12.2 and 12.3.

12.5 EQUITABLE ADJUSTMENT

PNOC-EDC agrees that it shall not unreasonably withhold its consent to any amendments to this Agreement which are proposed by the Operator in order to make equitable adjustments to this Agreement in the event that as a result of the application of insurance proceeds (including without limitation such application pursuant to a security assignment by the Operator contemplated by the last sentence of Section 19(a)) such proceeds are not made available to the Operator to repair or restore the Power Plant.

ARTICLE 13 TRANSFER OF OWNERSHIP

13.1. TRANSFER OF TITLE

Title to the Power Plant shall automatically vest to PNOC-EDC on the Transfer Date provided that PNOC-EDC has made (i) a payment equivalent to the net present value of the remaining Capacity Payments less Fixed Operating Cost Recovery Fees for Plant 4 for the period commencing on the Transfer Date until the date which is one hundred twenty (120) months from the Commercial Operation Date for Plant 4 on the basis of the last Nominated Capacity of Plant 4, and using an annual discount rate equal to the last

46

published Commercial Interest Reference Rate (CIRR) having the shortest maturity term for United States dollars published by the OECD, provided, however, that such discount rate shall not exceed nine point two six percent (9.26%) per annum, and (ii) all other payments required to be made by it pursuant to this Agreement, and returned to the Operator all security held by PNOC-EDC in connection with this Agreement, including any bid securities, the Performance Security, letters of credit and bank guarantees. The Operator shall execute such documents as may be necessary to effect the transfer of the title to PNOC-EDC, including, without limitation, assignments of all contract rights, claims and other rights related to the Power Plant that are being assigned by the Operator to PNOC-EDC.

13.2. DOCUMENTATION COSTS

The Parties shall pay their own costs and expenses, including but not limited to documentation, fees and taxes, incurred in connection with the transfer referred to in Section 13.1 hereof. In no event shall the Operator be obligated to pay more than \$50,000 under this Section 13.2.

13.3 TRAINING OF PNOC-EDC STAFF

- (a) During a minimum period of twelve (12) months prior to the Transfer Date, the Operator shall provide training in operation and maintenance of the Power Plant for PNOC-EDC's staff. This training shall be provided in accordance with a program to be agreed between PNOC-EDC and the Operator and shall be provided at no cost to PNOC-EDC.
- (b) PNOC-EDC shall endeavor to offer to the Operator that PNOC-EDC take over the employment of such of the Operator's operating and maintenance staff employed on the Power Plant at the end of the Cooperation Period as PNOC-EDC may, at its sole discretion, consider suitable for employment with PNOC-EDC and under such terms and conditions of employment as PNOC-EDC shall consider acceptable.

13.4 CONDITION OF POWER PLANT ON TRANSFER

- (a) Within a period of six (6) months prior to the Transfer Date, the Operator shall undertake performance and efficiency testing of the Power Plant as specified in Annex F to demonstrate the condition of the Power Plant at the Transfer Date.
- (b) Notwithstanding any testing performed pursuant to Section 13.4(a), the Power Plant and all other equipment transferred pursuant to this Agreement shall be transferred on an "as is" basis and any warranties which would otherwise be

47

implied by statute or otherwise, including, without limitation, warranties as to its fitness for the purpose, the absence of patent or inherent defects, description or otherwise of whatsoever nature will be excluded; provided, however, that upon transfer the Operator shall warrant that, on the Transfer Date, the Power Plant will be free from all liens and encumbrances created by the Operator. After the Transfer Date, the Operator shall be under no liability whatsoever to PNOC-EDC the respect of the operation or otherwise of the Power Plant by PNOC-EDC or a person designated by PNOC-EDC and PNOC-EDC shall indemnify and keep indemnified the Operator against any liability to any person or damage to any property arising from the use or operation of the Power Plant after the Transfer Date, provided, however, that the Operator shall subrogate or assign to PNOC-EDC any and all rights and benefits which it is able to subrogate or assign of any unexpired warranties in respect of the building, plant and equipment of the Power Plant under applicable laws or otherwise.

ARTICLE 14 FORCE MAJEURE

14.1 FORCE MAJEURE

- (a) Force Majeure" means any event or circumstance beyond the reasonable control of a Party which affects the performance by such Party of its obligations hereunder including but not limited to any war, declared or not, or hostilities, or belligerence, blockade, revolution, insurrection, riot, public disorder, expropriation, requisition, confiscation or nationalization, export or import restrictions by any governmental authorities, closing of harbors, docks, canals, or other assistances to or adjuncts of shipping or navigation of or within any place, rationing or allocation, whether imposed by law, decree or regulation by, or with the compliance of industry at the insistence of any governmental authority, or fire, unusual flood, earthquake, volcanic activity, storm, typhoons, lightning, tide (other than normal tides), tsunamis, perils of the sea, accidents of navigation or breakdown or injury of vessels, accidents to harbors, docks, canals, or other assistances to or adjuncts of shipping or navigation, epidemic, quarantine, strikes or combination of workmen, lockouts or other labor disturbances, or any other event, matter or thing, wherever occurring, which shall not be within the reasonable control of the Party affected thereby.
- (b) "Political FM" means any event of Force Majeure to the extent such event satisfies the following requirements: war, declared or not, or hostilities occurring in or involving the Republic of the Philippines, or belligerence, blockade, revolution, insurrection, riot, public disorder, expropriation, requisition, confiscation or nationalization by or involving and occurring in the Republic of the Philippines, export or import restrictions by any governmental authorities,

48

regional or municipal authorities of or within the Republic of the Philippines, closing of harbors, docks, canals, or other assistances to or adjuncts of shipping or navigation of or within the Republic of the Philippines, rationing or allocation, whether imposed by law, decree or regulation by, or with the compliance of industry at the insistence of any governmental authority of or within the Republic of the Philippines, or any other event, matter or thing, wherever occurring, which shall be within the reasonable control of PNOC-EDC or the Government.

14.2 EFFECT OF FORCE MAJEURE

- (a) Neither Party shall be responsible nor liable for nor deemed in breach or default hereof or give rise to any claim by any Party against any other Party (including without limitation any claims to pay damages or penalties for delays) because of their respective failure or omission to perform or delay in the performance of their respective obligations hereunder due to Force Majeure provided that:
 - (i) The non-performing Party gives the other Party within forty-eight (48) hours or as soon thereafter as reasonably practicable a written notice describing the particulars of the occurrence;
 - (ii) The suspension of performance and the extension of scheduled and guaranteed dates are of no greater scope and of no longer duration than is required by the Force Majeure;
 - (iii) The affected Party uses reasonable efforts to remedy its inability to perform; and
 - (iv) When the affected Party is able to resume performance of its obligations under this Agreement, that Party shall give the other Party written notice to that effect.
- (b) Notwithstanding anything to the contrary in Section 14.2(a), PNOC-EDC shall not be excused from any of its obligations under this Agreement including its obligation to make the Capacity Payments, the Energy Fee and any other payments to the Operator under this Agreement by the occurrence of any Political FM, an Interconnection Failure or any condition or event that affects the ability of PNOC-EDC to deliver or accept Geothermal Fluid from any Plant as provided under this Agreement, including any dispute between PNOC-EDC and NAPOCOR (under the Power Purchase Agreement or otherwise) which did not arise from any default of the Operator under this Agreement, including termination or expiration of the Power Purchase Agreement.

49

- (c) Notwithstanding Section 8.3.1, and subject to Sections 14.2(b) and 14.3(c), PNOC-EDC shall be relieved of its obligations to make Capacity Payments in respect of any Power Plant which is unable to deliver energy due to a Force Majeure affecting that Power Plant for the duration of such Force Majeure; provided, however, that in such an event the Cooperation Period shall be extended by the same number of days as the duration of such Force Majeure.

14.3 REMEDIES

- (a) Except as otherwise provided, in no event shall any condition of Force Majeure extend this Agreement beyond its stated term.
- (b) The Parties shall consult with each other and take all reasonable

steps to minimize the losses of or delays incurred by either Party resulting from Force Majeure.

- (c) If any one or more conditions of Force Majeure delay a Party's performance for a time period that is: (i) if before the Completion Date, greater than ninety (90) days in the aggregate in any twelve (12) consecutive months, or (ii) if after the Completion Date, greater than (x) ninety (90) consecutive days, or (y) one hundred twenty (120) days in the aggregate during any twelve (12) consecutive months where the interval between the occurrence of any two (2) consecutive events of Force Majeure conditions is not more than six (6) months, either Party may, after such period, either (a) suspend this Agreement by giving written notice of suspension to the other Party or (b) upon thirty (30) days written notice, terminate this Agreement and the provisions of Article 9 shall apply. Except that in case of such delay as a result of conditions of Force Majeure after the Completion Date, the parties agree that during the required thirty (30) day notice period as provided for under this Subsection 14.3(c) (ii) (b), each party has the right to initiate a consultation between the Parties, to take place during such thirty (30) day notice period, in order to try and agree on conditions for eventual waiving of the recourse to the provisions of Article 9 and provided that if an agreement can not be reached during same thirty (30) day notice period, the provisions of Article 9 shall apply at the end of such 30 day notice period. (The period set forth above for termination shall satisfy the ninety (90) day period specified in the second sentence of Section 9.1.

ARTICLE 15 SUSPENSION, TERMINATION AND ABANDONMENT

15.1 TERMINATION PRIOR TO EFFECTIVITY DATE

- (a) Each Party shall use good-faith efforts to cause the conditions set forth in Article 26 to be satisfied as promptly as practicable after the date of this Agreement and

50

each Party will exercise reasonable discretion in electing to terminate this Agreement pursuant to this Section 15.1.

- (b) If the Effectivity Date has not occurred by March 1, 1996, or within such longer period as the Parties may agree to, due to a failure of the conditions set forth in Section 26.1 to have been satisfied prior to such date, if such conditions have not been waived in writing by PNOC-EDC, the Parties shall consult with each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either Party shall have the right to terminate this Agreement by giving written notice to the other Party. Upon such termination, PNOC-EDC shall return to the Operator all security held by PNOC-EDC in connection with this Agreement, including any bid securities, letters of credit and bank guarantees, the Operator shall reimburse PNOC-EDC for all costs and expenses incurred by PNOC-EDC as of the date of and in connection with this Agreement except those of PNOC-EDC related to the preparation of the request for proposals and the bid evaluation until such termination, and thereafter, neither Party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.
- (c) If the Effectivity Date has not occurred by March 1, 1996, or within such longer period as the Parties may agree to, due to a failure of

the conditions set forth in Section 26.2 to have been satisfied prior to such date, if such conditions have not been waived in writing by the Operator, the Parties shall consult with each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either Party shall have the right to terminate this Agreement by giving written notice to the other Party. Upon such termination, PNOC-EDC shall return to the Operator all security held by PNOC-EDC in connection with this Agreement, including any bid securities, letters of credit and bank guarantees, PNOC-EDC shall reimburse the Operator for all costs and expenses incurred by the Operator as of the date of and in connection with this Agreement, and thereafter, neither Party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

- (d) If the Effectivity Date has not occurred by March 1, 1996, or within such longer period as the Parties may agree to, due to a failure of the conditions set forth in

51

Section 26.3 to have been satisfied prior to such date, if such conditions have not been waived in writing by both Parties, the Parties shall consult with each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, each Party shall bear its own costs and expenses. In the event, however, of the failure of the condition in Section 26.3 (a) (ii) other than for reasons due to adverse economic or political conditions in the Philippines, and the Parties do not waive the fulfillment of this condition, either Party may terminate this Agreement by giving written notice to the other Party, and the Operator shall reimburse PNOC-EDC for all costs and expenses incurred by PNOC-EDC as of the date of and in connection with this Agreement except those of PNOC-EDC related to the preparation of the request for proposals and the bid evaluation until such termination. Neither Party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

- (e) Costs and expenses referred to in this Section 15.1 shall not include any consequential or special damages (including without limitation lost profits, lost revenues, increased operating costs or loss of revenues from the Power Plant), whether such liability arises in contract, warranty, tort (including negligence) or otherwise.
- (f) The amount of costs and expenses to be reimbursed by either Party to the other Party under this Section 15.1 shall be estimated by an independent accountant jointly appointed by the Parties and the costs associated with such estimation shall be paid by the Party making the reimbursement.

15.2 TERMINATION FOR DEFAULT AND SUSPENSION OF DELIVERY

- (a) PNOC-EDC may temporarily suspend receipt of electricity from the Operator for:
 - (i) Tampering with meters by the Operator; or

- (ii) A condition on the Operator's side of the Point of Interconnection, dangerous to life or property.

Such condition shall be subject to confirmation by an independent third party expert satisfactory to both Parties. If so confirmed, PNOC-EDC shall be excused payment of capacity and energy charges for the duration

52

of such suspension and such suspension shall cease on rectification of the initiating condition.

- (b) Subject to the Operator's cure rights set forth in paragraph (c) below, upon the material breach by the Operator of any of its obligations hereunder, PNOC-EDC may, as its sole remedy, terminate this Agreement. Upon such termination, (i) if termination occurs prior to the Commercial Operation Date, the entire proceeds of the Construction Performance Security shall be forfeited in favor of PNOC-EDC and the Operator shall transfer, at no cost, all of the Operator's right, title and interest in the Power Plants to PNOC-EDC and (ii) if termination occurs after the Commercial Operation Date of the Power Plant, the Operator shall transfer, at no cost all of the Operator's right, title and interest in the Power Plants to PNOC-EDC. Upon such termination and forfeiture and/or transfer, as the case may be, the Operator shall have no further liability hereunder.
- (c) No such termination shall be made by PNOC-EDC without thirty (30) days (or longer pursuant to this paragraph) prior written notice to the Operator. Such notice shall be delivered, personally or by registered mail, stating in particular the provision of this Agreement which has been violated. If the Operator fails to correct any default within the thirty (30) day period from its receipt of the notice, or such period exceeding thirty (30) days as reasonably necessary to accomplish such cure provided the Operator has commenced curing such default within such thirty (30) day period and continues to diligently proceed to cure such default until cured, PNOC-EDC may terminate this Agreement; provided, however, that any dispute by the Operator in good faith as to the correctness of any bill from PNOC-EDC shall not be a cause to terminate this Agreement. Any suspension of the deliveries of electricity to NAPOCOR on behalf of PNOC-EDC or termination of this Agreement upon any authorized grounds shall in no way relieve the Operator of its liability to compensate PNOC-EDC for any amounts owed by the Operator to PNOC-EDC under this Agreement less any amounts owed by PNOC-EDC to Operator under this Agreement.

15.3 SUSPENSION OF PAYMENT

Subject to the provisions of Section 14, payments under this Agreement, upon written request of the Operator, and for a period reasonably required to replace or repair the Power Plant, may be suspended if the Operator is temporarily unable to produce the electric capacity or energy contracted for due to physical destruction of or damage to the Power Plant.

53

15.4 ABANDONMENT

15.4.1 ABANDONMENT DURING CONSTRUCTION

The construction of any or all of the Plants shall be deemed abandoned to the extent set forth below under any of the following circumstances:

- (a) If the Operator, through a written notice to PNOC-EDC, terminates construction of the Plants other than by reason of Force Majeure or for reasons not attributable to the Operator with the intent that such termination be permanent;
- (b) If the Operator fails (other than by reason of Force Majeure or for reasons not attributable to the Operator) to place a confirmed order for the long lead items in turbo-generators) within one hundred twenty (120) days period following the Effectivity Date;
- (c) If the Operator fails (other than by reason of Force Majeure or for reasons not attributable to the Operator) to resume work (i) within one hundred twenty (120) calendar days following receipt of insurance proceeds relating to, and in amounts sufficient to cover loss or damage arising from, a Force Majeure situation affecting one or more of the Plants provided, however, that in case of release to the Operator of partial insurance proceeds, the Operator shall resume work to the extent of the amounts so collected, or (ii) in case no material damage to such Plants has occurred, within one hundred twenty (120) calendar days following the termination or cessation of such Force Majeure situation, provided that a notice of such termination or cessation was given by PNOC-EDC to the Operator; or
- (d) Subject to the provisions of Section 14 and except for reasons not attributable to the Operator, if the Commercial Operation Date of any Plant does not occur within one hundred fifty (150) calendar days following the relevant Guaranteed Commercial Operations Date (as the same may be adjusted in accordance with this Agreement or by mutual agreement).

If construction of one or more Plants is deemed abandoned as set forth above, PNOC-EDC may terminate this Agreement by giving the Operator not less than fifteen (15) days prior written notice of its intention to so terminate this Agreement. If the Operator has not commenced work under clause (b) or (c), as the case may be, of this Section 15.4.1 before the expiration of such fifteen (15) day period, this Agreement shall immediately and automatically terminate. Upon such termination, the Operator shall forfeit the portion of the Construction Performance Security relating to such abandoned Plants to PNOC-EDC and transfer, upon payment by PNOC-EDC of a purchase price calculated pursuant to Section 9.2 for the Plants not so abandoned, all of the Operator's right, title

and interest in the Power Plant to PNOC-EDC. Upon such termination, forfeiture and transfer, the Operator shall have no further liability hereunder.

15.4.2 ABANDONMENT DURING COOPERATION PERIOD

The Power Plant shall be deemed abandoned during the Cooperation Period under the following circumstances:

- (a) If the Operator, through a written notice to PNOC-EDC terminates operation of the Power Plant with the intent that the termination be permanent except for (i) Force Majeure or (ii) reasons not attributable to the Operator;
- (b) If the Operator fails to deliver energy to NAPOCOR on behalf of PNOC-EDC for a period of one hundred twenty (120) consecutive calendar days other than as a result of an Outage, without written notice of temporary suspension, except for (i) Force Majeure or (ii) reasons not attributable to the Operator; or

- (c) Subject to the provisions of Section 14 and except for reasons not attributable to the Operator, if within one hundred twenty (120) calendar days following receipt of insurance proceeds relating to, and in an amount sufficient to cover loss or damage arising from, a Force Majeure situation, the Operator fails to resume reconstruction of the damaged Plants provided, however, that in case of release to the Operator of partial insurance proceeds, the Operator shall resume work to the extent of the amounts so collected, or, in case no material damage to the Plants has occurred; within one hundred twenty (120) days following the termination or cessation of a Force Majeure situation, the Operator fails to resume delivery of energy to NAPOCOR on behalf of PNOC-EDC, provided that a notice of such termination or cessation shall have been given by PNOC-EDC to the Operator.

If the Plants are deemed abandoned during the Cooperation Period as set forth above, PNOC-EDC may terminate this Agreement by giving the Operator not less than fifteen (15) days prior written notice of its intention to so terminate this Agreement. If the Operator has not commenced work under clause (b) or (c), as the case may be, of this Section 15.4.2 before the expiration of such fifteen (15) day period, this Agreement shall immediately and automatically terminate. Upon such termination, the Operator shall transfer, at no cost to PNOC-EDC, all of the Operator's right, title and interest in the Power Plant to PNOC-EDC. Upon such termination and transfer, the Operator shall have no further liability hereunder.

55

ARTICLE 16 SEVERAL OBLIGATIONS

Except where specifically stated in this Agreement to be otherwise, the duties, obligations, and liabilities of the Parties are intended to be several and not joint or collective. Nothing contained in this Agreement shall ever be construed to create an association, trust, partnership, or joint venture among the Parties. Each Party shall be liable individually and severally for its own obligations under this Agreement.

ARTICLE 17 COMMUNICATIONS AND NOTICES

17.1 COORDINATION MEETINGS

- (a) Coordination meetings between the Operator, PNOC-EDC and NAPOCOR personnel shall be conducted for purposes of clarifying problems that may arise during the prosecution of the construction work and throughout the Cooperation Period.
- (b) The site of such meetings shall be mutually agreed upon by all Parties. All expenses to be incurred by any Party shall be at such Party's own account.

17.2 COMMUNICATIONS AMONG PARTIES

All orders and formal communications shall be made in writing.

17.3 NOTICES

Any notice or communication required to be in writing hereunder shall be given by: registered mail, telex, telefax, courier or personal delivery. Such notice or communication shall be sent to the respective Parties at the address listed below. Any notice given by registered mail shall be considered sent upon posting and the same shall be considered received upon its acknowledgment.

In the case of Operator to:

Mr. Nessim Forte
Resident Manager
Ormat Inc. Manila Branch
Solid Bank Building, 8th Floor
777 Paseo de Roxas
Makati City 1200
Metro Manila
The Philippines
Telefax No. (632) 812-5638

56

with a copy to:

Ormat Inc.
Attn: Ms. Y. Bronicki President (or such other officer of Operator as may be authorized by her in writing and notified to PNOC-EDC)
980 Greg Street
Sparks, NV 89431-6039
U.S.A.
Telefax No. (702) 356.9039

In the case of PNOC-EDC to:

Mr. Nazario C. Vasquez
President (or such other officer of PNOC-EDC as may be authorized by him in writing and notified to the Operator)
PNOC-Energy Development Corporation
Merritt Road
Fort Bonifacio
Makati City
Metro Manila
The Philippines
Telex No. 22666 EDC PH
Telefax No. (632)815-2747

Either Party may, by written notice to the other, change the representative or the address to which such notices and communications are to be sent.

ARTICLE 18 NON-WAIVER

None of the provisions of this Agreement shall be considered waived by either Party except when such waiver is given in writing. The failure of either Party to insist, in any one or more instances, upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

ARTICLE 19 ASSIGNMENT

- (a) Except as set forth in paragraphs (b) or (c) below, the Operator shall not assign or transfer any or all of its rights and obligations under this Agreement without the written consent of PNOC-EDC. Any such assignment or

57

transfer made without such written consent shall be null and void. Consent for such assignment or transfer shall not be unreasonably withheld, provided that, in the opinion of PNOC-EDC, the assignee or transferee possesses all the legal, financial and technical qualifications required to operate and maintain the Power Plant.

- (b) Notwithstanding the foregoing, the Operator may assign or create a security interest over its rights and interests in this Agreement for the purpose of financing the design, construction, ownership and operation of the Power Plant. PNOC-EDC agrees to execute such consents to or acknowledgements of such assignments as the Operator or its lenders reasonably require and under such terms and conditions acceptable to PNOC-EDC. In addition, PNOC-EDC agrees to reasonably cooperate with the Operator's proposed lenders and agrees to amend this Agreement as reasonably required by such lenders provided such amendments do not materially increase PNOC-EDC's obligations or materially decrease PNOC-EDC's rights hereunder.
- (c) All obligations under this Agreement which the Operator agrees to be responsible for hereunder shall be assumed by NEWCO which shall undertake to perform the Operator's obligations to perform such work and in consideration of which shall be paid all fees payable to the Operator under this Agreement. NEWCO, in carrying out such work and receiving the fees payable to the Operator under this Agreement, shall act on its own behalf and for its own benefit, and not as an agent or representative of the Operator. For such purpose, PNOC-EDC, the Operator and NEWCO shall execute and deliver the Accession Undertaking, upon the effectiveness of which NEWCO shall become a party hereto without the need of any further action on the part of the Operator and the rights and obligations of PNOC-EDC and the Operator under this Agreement shall be transferred and amended in accordance with the terms of the Accession Undertaking, as fully as if NEWCO had executed this Agreement as amended by the terms of the Accession Undertaking.
- (d) Without limiting the generality of Subsection 19(b), PNOC-EDC shall in the consent of PNOC-EDC specified in the Subsection 19(b) acknowledge and agree that (i) it has been informed of and consents to the execution, delivery and performance of the assignment and security agreements between the Operator and the lenders, and the terms thereof including any provisions relating to the assignment and application of the proceeds of insurance policies described in the Agreement and (ii) to give the lenders notice of any default under or breach by the Operator of any provision of this Agreement or the Accession Undertaking and of any abandonment under Article 15 of this Agreement and agree to not terminate this Agreement or the Accession Undertaking on the basis of such breach, default or abandonment without providing the lenders designated in such consent with at least ninety (90) days within which to cure such breach, default or abandonment,

58

which period will commence on the later of (x) the lenders' receipt of the aforesaid notice and (y) expiration of the period provided in this Agreement for the cure of such breach, default or abandonment by the Operator.

ARTICLE 20 PRIVATIZATION ASSURANCES

In the event that either of the common stock or other equity interests in PNOC-EDC, or NAPOCOR, or any other portion of their assets or business activities are sold or otherwise transferred or announced to be sold or otherwise transferred, or any merger or other corporate reorganization (or a series of any of the above):

- (i) results in a real or purported assignment of rights or assumption of obligation under this Agreement; or
- (ii) substantially and adversely changes the net assets, projected

profits, projected net cash flow from operations, or otherwise would prompt a reasonable person to conclude that the ability of the relevant entity to duly perform its obligations hereunder on a timely basis had been materially and adversely affected;

then the Operator shall have the right to request reasonable assurances from PNOC-EDC, NAPOCOR and the Government that the Operator's rights and net economic returns under this Agreement are preserved and that PNOC-EDC's ability to fully and satisfactorily comply with its obligations under this Agreement is not impaired. If no mutually agreed, written resolution of the issues is reached within ninety (90) days, then the provisions of Article 9 shall apply. Without limiting PNOC-EDC's obligation to make such buyout if the ability of PNOC-EDC to fund any resulting buyout is in question, PNOC-EDC shall exercise any rights it may have to cause NAPOCOR or other third-party to assume PNOC-EDC's rights and obligations under this Agreement, paying the proceeds directly to the Operator.

ARTICLE 21 DISPUTE RESOLUTION; JURISDICTION

- (a) As much as possible, all disputes shall be settled amicably between the Parties. The Parties each hereby elect binding arbitration as their sole and exclusive remedy for any claim arising under this Agreement or in any way related to the Project.
- (b) The Parties agree that in the event that there is any dispute or difference between them arising out of this Agreement or in the interpretation of any of the provisions hereof, they shall endeavor to meet together in an effort to resolve such dispute by discussion between them. But failing such resolution, the Chief executives of

59

PNOC-EDC and the Operator shall meet to resolve such dispute or difference, and the joint decision of such Chief Executives shall be binding upon the parties hereto. In the event that a settlement of any such dispute or difference is not reached pursuant to this subclause, then arbitration under the next following subclause shall apply.

- (c) Where any dispute is not resolved as provided for in the preceding subclause, then the Parties shall enter into binding arbitration procedures under the rules of conciliation and arbitration of the International Chamber of Commerce. Such arbitration shall take place in Paris, France before a tribunal of three arbitrators, one to be chosen by each of the Operator and PNOC-EDC, and the third to be chosen by the two first selected. The arbitration proceedings shall be conducted in the English language.
- (d) To the extent that in any jurisdiction of (i) PNOC-EDC may claim for itself or its assets or revenues immunity from suit, execution, attachment or other legal process or (ii) there may be attributed to PNOC-EDC or its assets or revenues such immunity (whether or not claimed), PNOC-EDC agrees not to claim and unconditionally and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction. PNOC-EDC consents generally in respect of the enforcement of any judgment against it in any such proceedings in any jurisdiction to the giving of any relief or the issue of any process in connection with such proceedings (including, without limitation, the making, enforcement or execution against any property of PNOC-EDC).

ARTICLE 22 ENTIRE AGREEMENT AND SEPARABILITY

This Agreement constitutes the entire agreement between the Parties hereto

and supersedes all prior negotiations and agreements, whether written or oral. If any part or parts of this Agreement shall be declared invalid by competent courts, the other parts hereof shall not thereby be affected or impaired.

ARTICLE 23 GOVERNING LAW

This Agreement shall be governed and construed in accordance with Philippine Law.

ARTICLE 24 LIMITATION LIABILITY

Except for the penalty provisions in respect of Capacity Payments and Energy Fee, any claim under the Bid Security, the Construction Performance security and the Operation Performance Security pursuant to this Agreement and the penalty described in Annex E, the Operator and its contractors and subcontractors shall not be liable for any

60

consequential or special damages (including without limitation lost profits, lost revenue, increased operating costs or loss revenues from the Power Plant), whether such liability arises in contract, warranty, tort (including negligence) or otherwise. Further, except as expressly set forth in this Agreement, the Operator make no warranties or guarantees, express or implied, with regard to the Power Plant and PNOC-EDC hereby waives any and all implied warranties imposed under applicable Law.

ARTICLE 25 DURATION OF THE AGREEMENT

25.1 TERM

Except as set forth in Section 15.1, this Agreement shall be effective from the Effectivity Date up to the Transfer Date or Termination Date, whichever comes first.

25.2 SURVIVABILITY

Notwithstanding anything to the contrary contained in this Agreement, (i) the rights and obligations of the Parties set out in Articles 9, 11, 13, 15, 21, and 24, shall survive the termination of this Agreement, and (ii) the rights and obligations set out in Section 8.3 shall survive the termination of this Agreement until all amounts to be paid by PNOC-EDC and/or the Operator pursuant to this Agreement have been paid.

ARTICLE 26 EFFECTIVITY

26.1 PNOC-EDC CONDITIONS ON THE OPERATOR

It shall be a condition precedent to the effectivity of this Agreement that the following are submitted by or on behalf of the Operator to PNOC-EDC (except for such documents the submission of which is waived by PNOC-EDC).

- (a) a copy of the license to do business in the Philippines issued to the Operator by the Securities and Exchange Commission, as certified by an authorized officer of the Operator in a manner satisfactory to PNOC-EDC.
- (b) a copy of the certificate of registration of NEWCO with the Board of Investments, as certified by an authorized officer of the Operator in a manner satisfactory to PNOC-EDC.
- (c) a copy of the Articles of Incorporation of NEWCO as registered with the Securities and Exchange Commission, certified by the corporate

26.2 OPERATOR CONDITIONS ON PNOC-EDC

It shall be a condition precedent to the effectivity of this Agreement that the following are submitted by or on behalf of PNOC-EDC to the Operator (except for such documents the submission of which is waived by the Operator):

- (a) copies of the Articles of Incorporation and By-Laws of PNOC-EDC, and of resolutions of its Board of Directors authorizing the execution, delivery and performance by PNOC-EDC of this Agreement and the Accession Undertaking, each certified by the corporate secretary of PNOC-EDC in a manner satisfactory to the Operator;
- (b) a certificate of the corporate secretary of PNOC-EDC confirming that all necessary corporate and other approvals and action have been duly obtained and taken for the execution, delivery and performance by PNOC-EDC of this Agreement and the Accession Undertaking;
- (c) a true copy of the Power Purchase Agreement executed between PNOC-EDC and NAPOCOR, less such sections that PNOC-EDC deems to be of a confidential nature and do not relate or pertain to the rights of the Operator under this Agreement;
- (d) copies of resolutions of the Board of Directors of each of PNOC-EDC and NAPOCOR authorizing the execution, delivery and performance by each of PNOC-EDC and NAPOCOR of the Power Purchase Agreement;
- (e) confirmation that PNOC-EDC has ownership of or the right to use the Site and that the Operator has the right to use the Site from the Effectivity Date to the Transfer Date;
- (f) copies of such consents, licenses, permits, approvals and registration by or with the Government may be necessary to ensure the validity and enforceability of this Agreement and to permit PNOC-EDC to perform its obligations of this Agreement, including
 - (i) a Performance Undertaking executed on behalf of the Republic of the Philippines by the Secretary or any of the Undersecretaries of Finance named in the President of the Republic of the Philippines' Full Powers Authorization, to guarantee the performance by PNOC-EDC of its obligations under this Agreement, such Performance Undertaking to be substantially in the form of Annex K and acceptable to the Operator;

- (ii) an opinion by the Department of Justice confirming the validity, enforceability and binding effect of the Performance Undertaking;
- (iii) Registration of this Agreement and the Power Plant project with the Bangko Sentral ng Pilipinas ("Central Bank");
- (iv) the Environmental Compliance Certificate issued by the Department of Environment and Natural Resources for the Leyte project covering the Power Plant;
- (v) registration of PNOC-EDC as a Block Power Production Facility under Executive Order No. 215;

- (vi) an opinion by the National Electrification Administration and the Energy Regulatory Board confirming that the operation by the Operator of the Power Plant will not constitute a public utility so as to require a franchise, certificate of public convenience and other similar license;
- (vii) National Economic Development Authority certification that the project is a high priority economic project for power development which is financed by or through foreign funds;
- (viii) an endorsement by the City or Regional Development Council for the City or Region of the Power Plant project and endorsement of the Power Plant project by the relevant local government unit.

26.3 OTHER CONDITIONS

It shall be a condition precedent to the effectivity of this Agreement that the following is obtained or delivered by:

(a) The Operator:

- (i) Board of Investments registration of NEWCO as a pioneer enterprise, approval for the incentives set forth in Annex J and endorsement to by the Department of Justice for foreign nationals to be employed in supervisory, technical and advisory positions in the Power Plant.
- (ii) confirmation by the Operator of the availability of financing or funding, at terms and conditions acceptable to the Operator, such as written commitments or letters of intent, in accordance with the practice of each lender and of insurance for the Operator's equity investments.

63

- (iii) Central Bank approval for the Operator to establish offshore dollar accounts for the purpose of receiving payments under this Agreement and for any foreign currency loans to be made by financial institutions for the purpose of repaying any bridge loans extended to the Operator and for meeting the capital requirements of the Power Plant project.

(b) by PNOC-EDC:

- (i) NEDA Board/Investment Coordinating Committee approval of this Agreement.

26.4 FULFILLMENT OR WAIVER

- (a) Upon the fulfillment or waiver of each individual condition precedent enumerated in Sections 26.1, 26.2 and 26.3, each of PNOC-EDC and the Operator shall certify in writing within seven (7) days the fulfillment or waiver of such a condition precedent.
- (b) Upon the fulfillment or waiver of all the conditions precedent enumerated in Sections 26.1, 26.2, and 26.3, each of PNOC-EDC and the Operator shall certify in writing that all the conditions enumerated in Section 26.1 (in the case of PNOC-EDC) and Sections 26.2 and 26.3 (in the case of the Operator) have been fulfilled or waived.
- (c) In the event that the BOI denies NEWCO/Operator's registration as a pioneer enterprise, including its availment of tax incentives under the Omnibus Investments Code of 1987, for causes not attributable to the Operator, and the Parties agree to waive such condition under

Section 26.3, PNOC-EDC shall pay all national income taxes of the Operator for a period of six (6) years from the Commercial Operation Date.

IN WITNESS WHEREOF, the parties hereto have set their hands this 4th day of August, 1995 at Makati, Metro Manila, Philippines.

FIRST AMENDMENT TO LEYTE OPTIMIZATION PROJECT BOT AGREEMENT

THIS FIRST AMENDMENT to LEYTE OPTIMIZATION PROJECT BOT AGREEMENT (this "Amendment") is made as of February 29, 1996, between PNOC-ENERGY DEVELOPMENT CORPORATION, a wholly owned subsidiary of the Philippine National Oil Company, organized and existing under Philippine law ("PNOC-EDC") and ORMAT LEYTE CO. LTD. a Philippine limited partnership ("Operator").

A. PNOC-EDC and ORMAT INC. a Delaware Corporation executed that certain Leyte Optimization Project BOT Agreement dated August 4, 1995 which has been assigned to the Operator (the "Original Agreement"), concerning the development and operation of a 49 MW (net) geothermal power production facilities in Leyte Province, the Philippines. All capitalized terms not defined herein shall have the meanings given them in the Original Agreement.

B. PNOC-EDC and Operator each acknowledge that some but not all of the conditions to "Effectivity" of the Original Agreement set forth in Sections 26.1, 26.2 and 26.3 of the Original Agreement have been fulfilled.

C. PNOC-EDC and Operator recognize that additional time is needed in order to fulfill the remaining conditions to Effectivity set forth in Sections 26.1, 26.2 and 26.3 of the Original Agreement.

D. Section 15.1 of the Original Agreement provides, inter alia, that if by the Effectivity Date of March 1, 1996, one or more of the conditions set forth in Sections 26.1, 26.2 and 26.3 have not been fulfilled or waived by PNOC-EDC or the Operator, as the case may be, the parties shall consult in good faith with a view to achieving Effectivity. Furthermore, Section 3.1(a) states that if the Effectivity Date does not occur on or before March 01, 1996, the parties shall discuss and agree on any further extension of the Bid Security.

E. PNOC-EDC and Operator wish to amend the Original Agreement and the Bid Security as more fully set forth in this Amendment.

NOW THEREFORE, the parties hereto, intending to be legally bound, and to bind their successors and assigns, agree as follows:

1. Amendment of Section 3.1(a) of the Original Agreement.

Section 3.1(a) of the Original Agreement is hereby amended to read in its entirety as follows:

(a) To guarantee the faithful performance by the Operator of its obligation to completely construct the Power Plant in accordance with the terms and conditions of this Agreement, within ten (10) days of the Effectivity Date the Operator shall post and deliver the Construction Performance Security in a form

acceptable to PNOC-EDC in a sum equivalent to One Hundred Dollars (US \$100) per kilowatt (kW) of total Contracted Capacity for all the Plants or its equivalent in Philippine Pesos or other currencies. Prior to such delivery, the Operator shall ensure that the Bid Security required under the bid documents shall be extended until such time the Construction Performance Security shall have been posted and delivered; provided that, in the event that the Effectivity Date does not occur on or before April 10, 1996, the parties shall discuss and agree on any further extension of the Bid Security. PNOC-EDC shall have recourse to the Construction Performance Security to satisfy the final judgment in an arbitral proceeding in accordance with Article 21.

2. Amendment of Section 4.1(a) of the Original Agreement

Section 4.1(a) of the Original Agreement is hereby amended to read in its entirety as follows:

(a) The Operator shall in good faith use all reasonable efforts to construct the Power Plant in accordance with the following schedule:

Activity	Date
Target Effectivity Date	April 10, 1996
Ordering of long lead items (turbogenerators)	the latter of (i) July 1, 1996 or (ii) 120 days after the Effectivity Date
Start of Commissioning Period of Plants 1, 2 and 3	May 1, 1997
Start of Commissioning Period of Plant 4	October 1, 1997
Scheduled Completion Date for Plants 1, 2 and 3	September 1, 1997
Scheduled Completion Date for Plant 4	January 1, 1998
Guaranteed Commercial Operation Date for Plants 1, 2 and 3	September 25, 1997

2

Guaranteed Commercial Operation Date for Plant 4	January 25, 1998

If the Commercial Operation Date of any Power Plant does not occur on or before the relevant Guaranteed Commercial Operation Date, the Operator shall be subject to the penalty provisions set forth in Section 4.11. The Operator, however, may request for an extension of the relevant milestone dates.

3. Amendment of Section 15.1(b) of the Original Agreement

Section 15.1(b) of the Original Agreement is hereby amended to read in its entirety as follows:

(b) If the Effectivity Date has not occurred by April 10, 1996, or within such longer period as the parties may agree to, due to a failure of the conditions set forth in Section 26.1 to have been satisfied prior to such date, if such conditions have not been waived in writing by PNOC-EDC, the parties shall consult with each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either party shall have the

right to terminate this Agreement by giving written notice to the other party. Upon such termination, PNOC-EDC shall return to the Operator all security held by PNOC-EDC in connection with this Agreement, including any bid securities, letters of credit and bank guarantees, the Operator shall reimburse PNOC-EDC for all costs and expenses incurred by PNOC-EDC as of the date of and in connection with this Agreement except those of PNOC-EDC related to the preparation of the request for proposals and the bid evaluation until such termination, and thereafter, neither party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

4. Amendment of Section 15.1(c) of the Original Agreement

Section 15.1(c) of the Original Agreement is hereby amended to read in its entirety as follows:

(c) If the Effectivity Date has not occurred by April 10, 1996, or within such longer period as the parties may agree to, due to a failure of the conditions set forth in Section 26.2 to have been satisfied prior to such date, if such conditions have not been waived in writing by the Operator, the parties shall consult each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either party shall have the

3

right to terminate this Agreement by giving written notice to the other party. Upon such termination, PNOC-EDC shall return to the Operator all security held by PNOC-EDC in connection with this Agreement, including any bid securities, letters of credit and bank guarantees, PNOC-EDC shall reimburse the Operator for all costs and expenses incurred by the Operator as of the date of and in connection with this Agreement, and thereafter, neither party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

5. Amendment of Section 15.1(d) of the Original Agreement

(d) If the Effectivity Date has not occurred by April 10, 1996, or within such longer period as the parties may agree to, due to a failure of the conditions set forth in Section 26.3 to have been satisfied prior to such date, if such conditions have not been waived in writing by both parties, the parties shall consult each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either party shall bear its own costs and expenses. In the event, however, of the failure of the condition in Section 26.3(a)(ii) other than for reasons due to adverse economic or political conditions in the Philippines, and the parties do not waive the fulfillment of this condition, either party may terminate this Agreement by giving written notice to the other party, and the Operator shall reimburse PNOC-EDC as of the date of and in connection with this Agreement except those of PNOC-EDC related to the preparation of the request for proposals and the bid evaluation until such termination. Neither party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

6. General Ratification. Except as expressly amended hereby, all the terms and provisions of the Original Agreement are hereby ratified and confirmed and remain in full force and effect.

IN WITNESS WHEREOF, the parties have executed this First Amendment to Leyte Optimization Project BOT Agreement as of the date first above written.

Exhibit 10.3.38

SECOND AMENDMENT TO LEYTE
OPTIMIZATION PROJECT BOT AGREEMENT

THIS SECOND AMENDMENT to LEYTE OPTIMIZATION PROJECT BOT AGREEMENT (this "Amendment") is made as of April 1, 1996, between PNOC-ENERGY DEVELOPMENT CORPORATION, a wholly owned subsidiary of the Philippine National Oil Company, organized and existing under Philippine law ("PNOC-EDC") and ORMAT LEYTE CO. LTD. a Philippine limited partnership ("Operator").

A. PNOC-EDC and ORMAT LEYTE CO. LTD., a Philippine Partnership executed that certain Leyte Optimization Project BOT Agreement dated August 4, 1995 which has been assigned to the Operator (the "Original Agreement"), concerning the development and operation of a 49 MW (net) geothermal power production facilities in Leyte Province, the Philippines. All capitalized terms not defined herein shall have the meanings given them in the Original Agreement.

B. PNOC-EDC and Operator each acknowledge that some but not all of the conditions to "Effectivity" of the Original Agreement set forth in Sections 26.1, 26.2 and 26.3 of the Original Agreement have been fulfilled.

C. PNOC-EDC and Operator recognize that additional time is needed in order to fulfill the remaining conditions to Effectivity set forth in Sections 26.1, 26.2 and 26.3 of the Original Agreement.

D. Section 15.1 of the Original Agreement and its First Amendment provides, inter alia, that if by the Effectivity Date of April 10, 1996, one or more of the conditions set forth in Sections 26.1, 26.2 and 26.3 have not been fulfilled or waived by PNOC-EDC or the Operator, as the case may be, the parties shall consult in good faith with a view to achieving Effectivity. Furthermore, Section 3.1(a) states that if the Effectivity Date does not occur on or before April 10, 1996, the parties shall discuss and agree on any further extension of the Bid Security.

E. PNOC-EDC and Operator wish to amend the Original Agreement and the Bid Security as more fully set forth in this Amendment.

NOW THEREFORE, the parties hereto, intending to be legally bound, and to bind their successors and assigns, agree as follows:

1. Amendment of Section 3.1(a) of the Original Agreement. Section 3.1(a) of the Original Agreement is hereby amended to read in its entirety as follows:

(a) To guarantee the faithful performance by the Operator of its obligation to completely construct the Power Plant in accordance with the terms and conditions of this Agreement, within ten (10) days of the Effectivity Date the Operator shall post and deliver the Construction Performance Security in a form acceptable to PNOC-EDC in a sum equivalent to One Hundred Dollars (US \$100) per kilowatt (kW) of total Contracted Capacity for all the Plants or its equivalent in Philippine Pesos or other currencies. Prior to such delivery, the Operator shall ensure that the Bid Security required under the bid documents shall be extended until such time the Construction Performance Security shall have been posted and delivered; provided that, in the event that the Effectivity Date does not occur on or before April 22, 1996, the parties shall discuss and agree on any further extension of the Bid Security. PNOC-EDC shall have recourse to the Construction Performance Security to satisfy the final judgment in an arbitral proceeding in accordance with Article 21.

2. Amendment of Section 4.1(a) of the Original Agreement Section 4.1(a) of the Original Agreement is hereby amended to read in its entirety as follows:

(a) The Operator shall in good faith use all reasonable efforts to construct the Power Plant in accordance with the following schedule:

Activity	Date
Target Effectivity Date	April 22, 1996
Ordering of long lead items (turbogenerators)	the later of (i) July 1, 1996 or (ii) 120 days after the Effectivity Date
Start of Commissioning Period of Plants 1, 2 and 3	May 1, 1997
Start of Commissioning Period of Plant 4	October 1, 1997
Scheduled Completion Date for Plants 1, 2 and 3	September 1, 1997
Scheduled Completion Date for Plant 4	January 1, 1998
Guaranteed Commercial Operation Date for Plants 1, 2 and 3	September 25, 1997

If the Commercial Operation Date of any Power Plant does not occur on or before the relevant Guaranteed Commercial Operation Date, the Operator shall be subject to the penalty provisions set forth in Section 4.11. The Operator, however, may request for an extension of the relevant milestone dates.

3. Amendment of Section 15.1(b) of the Original Agreement Section 15.1(b) of the Original Agreement is hereby amended to read in its entirety as follows:

(b) If the Effectivity Date has not occurred by April 22, 1996, or within such longer period as the parties may agree to, due to a failure of the conditions set forth in Section 26.1 to have been satisfied prior to such date, if such conditions have not been waived in writing by PNOC-EDC, the parties shall consult with each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either party shall have the right to terminate this Agreement by giving written notice to the other party. Upon such termination, PNOC-EDC shall return to the Operator all security held by PNOC-EDC in connection with this Agreement, including any bid securities, letters of credit and bank guarantees, the Operator shall reimburse PNOC-EDC for all costs and expenses incurred by PNOC-EDC as of the date of and in connection with this Agreement except those of PNOC-EDC related to the preparation of the request for proposals and the bid evaluation until such termination, and thereafter, neither party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

4. Amendment of Section 15.1(c) of the Original Agreement Section 15.1(c) of the Original Agreement is hereby amended to read in its entirety as follows:

(c) If the Effectivity Date has not occurred by April 22, 1996, or within such longer period as the parties may agree to, due to a failure of the conditions set forth in Section 26.2 to have been satisfied prior to such date, if such conditions have not been waived in writing by the Operator, the parties shall consult each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either party shall have the right to terminate this Agreement by giving written notice to the other party. Upon such termination, PNOC-EDC shall return to the Operator all security held by PNOC-EDC in connection with this Agreement, including any bid securities, letters of credit and bank guarantees, PNOC-EDC shall reimburse the Operator for all costs and expenses incurred by the Operator as of the date of and in connection with this Agreement, and

thereafter, neither party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

5. Amendment of Section 15.1(d) of the Original Agreement Section 15.1 (d) of the Original Agreement is hereby amended to read in its entirety as follows:

(d) If the Effectivity Date has not occurred by April 22, 1996, or within such longer period as the parties may agree to, due to a failure of the conditions set forth in Section 26.3 to have been satisfied prior to such date, if such conditions have not been waived in writing by both parties, the parties shall consult each other in good faith with the view to achieving the Effectivity Date. If a mutually acceptable arrangement is not reached and implemented within fifteen (15) days thereafter, either party shall bear its own costs and expenses. In the event, however, of the failure of the condition in Section 26.3(a)(ii) other than for reasons due to adverse economic or political conditions in the Philippines, and the parties do not waive the fulfillment of this condition, either party may terminate this Agreement by giving written notice to the other party, and the Operator shall reimburse PNOC-EDC as of the date of and in connection with this Agreement except those of PNOC-EDC related to the preparation of the request for proposals and the bid evaluation until such termination. Neither party shall have any further liability to the other and this Agreement shall immediately and automatically become null and void. Notwithstanding anything to the contrary in this Agreement, this provision shall become effective upon execution of this Agreement and shall remain effective until the Effectivity Date.

6. General Ratification. Except as expressly amended hereby, all the terms and provisions of the Original Agreement are hereby ratified and confirmed and remain in full force and effect.

IN WITNESS WHEREOF, the parties have executed this Second Amendment to Leyte Optimization Project BOT Agreement as of the date first above written.

EFFECTIVITY CERTIFICATE

Reference is made to (i) the Leyte Optimization Project - BOT Agreement dated August 4, 1995 (the "BOT Agreement") between PNOC Energy Development Corporation ("PNOC EDC") and Ormat, Inc., and (ii) the Accession Undertaking dated as of February 15, 1996 between PNOC EDC, Ormat, Inc. and Ormat Leyte Co. Ltd. (the "Operator"). All capitalized terms used but not defined herein have the respective meanings assigned to such terms in the BOT Agreement.

1. PNOC EDC, does hereby certify, that each of the conditions set forth in Section 26.1 (PNOC EDC Conditions on Operator) and Section 26.3(a) [Other Conditions] of the BOT Agreement have been satisfied by the

Operator or waived by PNOC EDC.

2. The Operator does hereby certify, that each of the conditions set forth in Section 26.2 (Operator Conditions on PNOC EDC) and Section 26.3(b) [Other Conditions] of the BOT Agreement have been satisfied by PNOC-EDC or waived by the Operator.
3. The BOT Agreement is hereby declared effective in accordance with its terms and the Effectivity Date is hereby declared to be April 30, 1996.
4. Notwithstanding the above Effectivity Date, the milestones and commitments of the Operator referred to under Section 4.1 of the BOT Agreement remain unchanged.

IN WITNESS WHEREOF, PNOC EDC and Ormat Leyte Co. Ltd have signed this certificate as of this 30th day of April, 1996.

Ormesa
BLM Geothermal Resources Lease
CA 966

Form 3200-21
(May 1974)

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT

Serial Number: CA 966
USGS - KGRA Determination:
EAST MESA KGRA

GEOTHERMAL RESOURCES LEASE
[X] Competitive [] Noncompetitive

In consideration of the terms and conditions contained herein, and the grant

made hereby, this lease is entered into by the UNITED STATES OF AMERICA (hereinafter called the "Lessor"), acting through the Bureau of Land Management (hereinafter called the "Bureau") of the Department of the Interior (hereinafter called the "Department"), and REPUBLIC GEOTHERMAL INC. and CITY OF BURBANK, each as to an undivided 1/2 interest (hereinafter called the "Lessee").

This Lease is made pursuant to the Geothermal Steam Act of 1970 (84 Stat. 1566; 30 U.S.C. 1001--1025) (hereinafter called "the Act") to be effective on August 1, 1974 (hereinafter called the "effective date"). It is subject to all the provisions of the Act and to all the terms, conditions, and requirements of (a) all regulations promulgated by the Secretary of the Interior (hereinafter called "the Secretary") in existence upon the effective date, specifically including, but not limited to, 43 CFR Parts 3000 and 3200 and 30 CFR Parts 270 and 271, (b) all geothermal resources operational orders (hereinafter called "GRO orders") issued pursuant thereto, all of which are incorporated herein and by reference made a part hereof, and (c) any regulations hereafter issued by the Secretary (except those inconsistent with any specific provisions of this lease other than regulations incorporated herein by reference) all of which shall, be upon their effective date, incorporated herein and, by reference, made a part hereof.

Sec. 1. GRANT - The Lesser hereby grants and leases to the Lessee the exclusive right and privilege to drill for, extract, produce, remove, utilize, sell, and dispose of geothermal steam and associated geothermal resources, (hereinafter called "geothermal resources"), in or under the following described lands situated within the County of IMPERIAL, State of California.

Total Area		2549.09	Total Area	

Containing 2549.09 acres (hereinafter called the "leased area" or "leased lands"), together with:

- (a) The nonexclusive right to conduct within the leased area geological and geophysical exploration in accordance with applicable regulations; and
- (b) The right to construct or erect and to use, operate, and maintain within the leased area, together with ingress and egress thereupon all wells, pumps, pipes, pipelines, buildings, plants, sumps, brine pits, reservoirs, tanks, waterworks, pumping stations, roads, electric power generating plants, transmission lines, industrial facilities, electric, telegraph or telephone

lines, and such other works and structures and to use so much of the surface of the land as may be necessary or reasonably convenient for the production, utilization, and processing of geothermal resources or to the full enjoyment of the rights granted by this lease, subject to compliance with applicable laws and regulations; Provided that, although the use of the leased area for an electric power generating plant or transmission facilities or a commercial or industrial facility is authorized hereunder, the location of such facilities and the terms of occupancy therefor shall be under separate instruments issued under any applicable laws and regulations; and

(c) The nonexclusive right to drill potable water wells in accordance with state water laws within the leased area and to use the water produced therefrom for operations on the leased lands free of cost, provided that such drilling and development

3

are conducted in accordance with procedures approved by the Supervisor of the Geological Survey (hereinafter called "Supervisor"); and

(d) The right to convert this lease to a mineral lease under the Mineral Leasing Act of February 25, 1920, as amended, and supplemented (30 U.S.C. 181--287) or under the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351--359), whichever is appropriate, if the leasehold is primarily valuable for the production of one or more valuable by-products which are leasable under those statutes, and the lease is incapable of commercial production or utilization of geothermal steam: Provided that, an application is made therefor prior to the expiration of the lease extension by reason of by-product production as hereinafter provided, and subject to all the terms and conditions of said appropriate Acts. The Lessee is also granted the right to locate mineral deposits under the mining laws (30 U.S.C. 21-54), which would constitute by-products if commercial production or utilization of geothermal steam continued, but such a location to be valid must be completed within ninety (90) days after the termination of this lease. Any conversion of this lease to a mineral lease or a mining claim is contingent on the availability of such lands for this purpose at the time of the conversion. If the lands are withdrawn or acquired to aid of a function of any Federal Department or agency, the mineral lease or mining claim shall be subject to such additional terms and conditions as may be prescribed by such Department or agency for the purpose of making operations thereon consistent with the purposes for which these lands are administered; and

(e) The right without the payment of royalties hereunder, to reinject into the leased lands geothermal resources and condensates to the extent that such resources and condensates are not utilized, but their reinjection is necessary for operations under this lease in the recovering or processing of geothermal resources. If the Lessee, pursuant to any approved plan, disposes of the unusable brine and produced waste products into underlying formations, he may do so without the payment of royalties.

Sec. 2. TERM

(a) This lease shall be for a primary term of ten (10) years from the effective date and so long thereafter as geothermal steam is produced or utilized in commercial quantities but shall in no event continue for more than forty (40) years after the end of the primary term. However, if at the end of that forty-year period geothermal steam is being produced or utilized in commercial quantities, and the leased lands are not needed for other purposes, the Lessee shall have a preferential right to a renewal of this lease for a second forty-year term in accordance with such terms and conditions as the Lessor deems appropriate.

(b) If actual drilling operations are commenced on the leased lands or under an approved plan or agreement on behalf of the leased lands prior to the

end of the

4

primary term, and are being diligently prosecuted at the end of the primary term, this lease shall be extended for five (5) years and so long thereafter, but not more than thirty-five (35) years, as geothermal steam is produced or utilized in commercial quantities. If at the end of such extended term geothermal steam is being produced or utilized in commercial quantities, the Lessee shall have a preferential right to a renewal for a second term as in (a) above.

(c) If the Lessor determines at any time after the primary term that this lease is incapable of commercial production and utilization of geothermal steam, but one or more valuable by-products are or can be produced in commercial quantities, this lease shall be extended for so long as such by-products are produced in commercial quantities but not for more than five (5) years from the date of such determination.

Sec. 3. RENTALS AND ROYALTIES

(a) Annual Rental - For each lease year prior to the commencement of production of geothermal resources in commercial quantities on the leased lands, the Lessee shall pay the Lessor on or before the anniversary date of the lease a rental of \$2.00 for each acre or fraction thereof.

(b) Escalating Rental - Beginning with the sixth lease year and for each year thereafter until the lease year beginning on or after the commencement of production of geothermal resources in commercial quantities, the Lessee shall pay on or before the anniversary date of the lease an escalated rental in an amount per acre or fraction thereof equal to the rental per acre for the preceding year and an additional sum of one (1) dollar per acre or fraction thereof. If the lease is extended beyond ten (10) years for reasons other than the commencement of production of geothermal resources in commercial quantities, the rental for the eleventh year and for each lease year thereafter until the lease year beginning on or after the commencement of such production will be the amount of rental for the tenth lease year. If any expenditures are made in any lease year for diligent exploration on the leased lands in excess of the minimum required expenditures for that year, the excess may be credited against any rentals in excess of \$6.00 per acre or fraction thereof due the Lessor for that or any future year.

(c) Royalty - On or before the last day of the calendar month after the month of commencement of production in commercial quantities of geothermal resources and thereafter on a monthly basis, the Lessee shall pay to the Lessor:

(1) A royalty of 10 percent on the amount or value of steam, or any other form of heat or other associated energy produced, processed, removed, sold, or utilized from this lease or reasonably susceptible to sale or utilization by the Lessee.

5

(2) A royalty of 5 percent of the value of any by-product derived from production under this lease, produced, processed, removed, sold, or utilized from this lease or reasonably susceptible of sale or utilization by the Lessee, except that as to any by-product which is a mineral named in Sec. 1 of the Mineral Leasing Act of February 25, 1920, as amended, (30 U.S.C. 181), the rate of royalty for such mineral shall be the same as that provided in that statute and the maximum rate of royalty for such mineral shall not exceed the maximum royalty applicable under that statute.

(3) A royalty of 5 percent of the value of commercially demineralized water which has been produced from the leased lands, and has been sold or utilized by the Lessee or is reasonably susceptible of sale or utilization by the Lessee. In no event shall the Lessee pay to the Lessor, for the lease year beginning on or after the commencement of production in commercial quantities on the leased lands or any subsequent lease year, a royalty of less than two (2) dollars per acre or fraction thereof. If royalty paid on production during the lease year has not satisfied this requirement, the Lessee shall pay the difference on or before the expiration date of the lease year for which it is paid.

(d) Waiver and Suspension of Rental and Royalties - Rentals or royalties may be waived, suspended, or reduced pursuant to the applicable regulations on the entire leasehold or any portion thereof in the interest of conservation or for the purpose of encouraging the greatest ultimate recovery of geothermal resources if the Lessor determines that it is necessary to do so to promote such development, or because the lease cannot be successfully operated under the terms fixed herein.

(e) Undivided Fractional Interests - Where the interest of the Lessor in the geothermal resources underlying any tract or tracts described in Sec. 1 is an undivided fractional interest, the rentals and royalties payable on account of each such tract shall be in the same proportion to the rentals and royalties provided in this lease as the individual fractional interest of the Lessor in the geothermal resources underlying such tract is to the full fee interest.

(f) Readjustments - Rentals and royalties hereunder may be readjusted in accordance with the Act and regulations to rates not in excess of the rates provided therein, and at not less than twenty (20) year intervals beginning thirty-five (35) years after the date geothermal steam is produced from the lease as determined by the Supervisor.

Sec. 4. PAYMENTS - It is expressly understood that the Secretary may establish the values and minimum values of geothermal resources to compute royalties in accordance with the applicable regulations. Unless otherwise directed by the Secretary, all payments to the Lessor will be made as required by the regulations. If there is no well on the leased

6

lands capable of producing geothermal resources in commercial quantities, the failure to pay rental on or before the anniversary date shall cause the lease to terminate by operation of law except as provided by Sec. 3244.2 of the regulations. If the time for payment falls on a day on which the proper office to receive payment is closed, payment shall be deemed to be made on time if made on the next official working day.

Sec. 5. BONDS - The Lessee shall file with the Authorized Officer of the Bureau (hereinafter called the "Authorized Officer") shall maintain at all times the bonds required under the regulations to be furnished as a condition to the issuance of this lease or prior to entry on the leased lands in the amounts established by the Lessor and to furnish such additional bonds or security as may be required by the Lessor upon entry on the lands or after operations or production have begun.

Sec. 6. WELLS

(a) The Lessee shall drill and produce all wells necessary to protect the leased land from drainage by operations on lands not the property of the Lessor, or other lands of the Lessor leased at a lower royalty rate, or on lands as to which royalties and rentals are paid into different funds from those into which royalties under this lease are paid. However, in lieu of any part of such drilling and production, with the consent of the Supervisor, the Lessee may compensate the Lessor in full each month for the estimated loss of royalty

through drainage in the amount determined by said Supervisor.

(b) At the Lessee's election, and with the approval of the Supervisor, the Lessee shall drill and produce other wells in conformity with any system of well spacing or production allotments affecting the field or area in which the leased lands are situated, which is authorized by applicable law.

(c) After due notice in writing, the Lessee shall diligently drill and produce such wells as the Supervisor shall require so that the leased lands may be properly and timely developed and for the production of geothermal steam and its by-products, including commercially demineralized water for beneficial uses in accordance with applicable state laws. However, the Supervisor may waive or modify the requirements of this subparagraph (c) in the interest of conservation of natural resources or for economic feasibility or other reasons satisfactory to him. If the products or by-products of geothermal production from wells drilled on this lease are susceptible of producing commercially demineralized water for beneficial uses, and a program therefor is not initiated with due diligence, the Lessor may at its option elect to take such products or by-products and the Lessee shall deliver all or any portion thereof to the Lessor at any point in the Lessee's geothermal gathering or disposal system without cost to the Lessee, if the Lessee's activities, under the lease, would not be impaired and such delivery would otherwise be consistent with field and operational requirements. The retention of this

7

option by the Lessor shall in no way relieve the Lessee from the duty of producing commercially demineralized water where required to do so by the Lessor, except when the option is being exercised and then only with respect to wells where it is being exercised, or limit the Lessor's right to take any action under Sec. 25 to enforce that requirement.

Sec. 7. INSPECTION - The Lessee shall keep open at all reasonable times for the inspection of any duly authorized representative of the Lessor the leased lands and all wells, improvements, machinery, and fixtures thereon and all production reports, maps, records, books, and accounts relative to operations under the lease, and well logs, surveys, or investigations of the leased lands.

Sec. 8. CONDUCT OF OPERATIONS - The Lessee shall conduct all operations under this lease in a workmanlike manner and in accordance with all applicable statutes, regulations, and GRO orders, and all other appropriate directives of the Lessor to prevent bodily injury, danger to life or health, or property damage, and to avoid the waste of resources, and shall comply with all requirements which are set forth in 43 CFR Group 3200, including, but not limited to, Sub-part 3204, or which may be prescribed by the Lessor pursuant to the regulations, and with the special stipulations which are attached to the lease, all of which are specifically incorporated into this lease. A breach of any term of this lease, including the stipulations attached hereto, will be subject to all the provisions of this lease with respect to remedies in case of default. Where any stipulation is inconsistent with a regular provision of this lease, the stipulation shall govern.

Sec. 9. INDEMNIFICATION

(a) The Lessee shall be liable to the Lessor for any damage suffered by the Lessor in any way arising from or connected with the Lessee's activities and operations conducted pursuant to this lease, except where damage is caused by employees of the Lessor acting within the scope of their authority.

(b) The Lessee shall indemnify and hold harmless the Lessor from all claims arising from or connected with the Lessee's activities and operations under this lease.

(c) In any case where liability without fault is imposed on the Lessee

pursuant to this section, and the damages involved were caused by the action of a third party, the rules of subrogation shall apply in accordance with the law of the jurisdiction where the damage occurred.

Sec. 10. CONTRACTS FOR SALE OR DISPOSAL OF PRODUCTS - The Lessee shall file with the Supervisor not later than thirty (30) days after the effective date thereof any

8

contract, or evidence of other arrangement for the sale or disposal of geothermal resources.

Sec. 11. ASSIGNMENT OF LEASE OR INTEREST THEREIN - Within ninety (90) days from the date of execution thereof, the Lessee shall file for approval by the Authorized Officer any instruments of transfer made of this lease or of any interest therein, including assignments of record title and working or other interests.

Sec. 12. REPORTS AND OTHER INFORMATION - At such times and in such form as the Lessor may prescribe, the Lessee shall comply with all reporting requirements of the geothermal resources leasing, operating, and unit regulations and shall submit quarterly reports containing the data which it has collected through the monitoring of air, land, and water quality and all other data pertaining to the effect on the environment by operations under the lease. The Lessee shall also comply with such other reporting requirements as may be imposed by the Authorized Officer or the Supervisor. The Lessor may release to the general public any reports, maps, or other information submitted by the Lessee except geologic and geophysical interpretations, maps, or data subject to 30 CFR 270.79 or unless the Lessee shall designate that information as proprietary and the Supervisor or the Authorized Officer shall approve that designation.

Sec. 13. DILIGENT EXPLORATION - In the manner required by the regulations, the Lessee shall diligently explore the leased lands for geothermal resources until there is production in commercial quantities applicable to this lease. After the fifth year of the primary term the Lessee shall make at least the minimum expenditures required to qualify the operations on the leased lands as diligent exploration under the regulations.

Sec. 14. PROTECTION OF THE ENVIRONMENT (LAND, AIR AND WATER) AND IMPROVEMENTS - The Lessee shall take all mitigating actions required by the Lessor to prevent: (a) soil erosion or damage to crops or other vegetative cover on Federal or non-Federal lands in the vicinity; (b) the pollution of land, air, or water; (c) land subsidence, seismic activity, or noise emissions; (d) damage to aesthetic and recreational values; (e) damage to fish or wildlife or their habitats; (f) damage to or removal of improvements owned by the United States or other parties; or (g) damage to or destruction or loss of fossils, historic or prehistoric ruins, or artifacts. Prior to the termination of bond liability or at any other time when required and to the extent deemed necessary by the Lessor, the Lessee shall reclaim all surface disturbances as required, remove or cover all debris or solid waste, and, so far as possible, repair the offsite and onsite damage caused by his activity or activities incidental thereto, and return access roads or trails and the leased lands to an acceptable condition including the removal of structures, if required. The Supervisor or the Authorized Officer shall prescribe the steps to be taken by Lessee to protect the surface and the environment and for the restoration of the leased lands and other lands affected by operations on the leased lands and

9

improvements thereon, whether or not the improvements are owned by the United States. Timber or mineral materials may be obtained only on terms and conditions

imposed by the Authorized Officer.

Sec. 15. WASTE - The Lessee shall use all reasonable precautions to prevent waste of natural resources and energy, including geothermal resources, or of any minerals, and to prevent the communication of water or brine zones with any oil, gas, fresh water, or other gas or water bearing formations or zones which would threaten destruction or damage to such deposits. The Lessee shall monitor noise, air, and water quality conditions in accordance with any orders of the Supervisor.

Sec. 16. MEASUREMENTS - The Lessee shall gauge or otherwise measure all production, sales, or utilization of geothermal resources and shall record the same accurately in records as required by the Supervisor. Reports on production, sales, or utilization of geothermal resources shall be submitted in accordance with the terms of this lease and the regulations.

Sec. 17. RESERVATIONS TO LESSOR - All rights in the leased area not granted to the Lessee by this lease are hereby reserved to the Lessor. Without limiting the generality of the foregoing such reserved rights include:

(a) Disposal - The right to sell or otherwise dispose of the surface of the leased lands or any resource in the leased lands under existing laws, or laws hereafter enacted, subject to the rights of the Lessee under this lease;

(b) Rights-of-way - The right to authorize geological and geophysical explorations on the leased lands which do not interfere with or endanger actual operations under this lease, and the right to grant such easements or rights-of-way for joint or several use upon, through or in the leased area for steam lines and other public or private purposes which do not interfere with or endanger actual operations or facilities constructed under this lease;

(c) Mineral Rights - The ownership of and the right to extract oil, hydrocarbon gas, and helium from all geothermal steam and associated geothermal resources produced from the leased lands;

(d) Casing - The right to acquire the well and casing at the fair market value of the casing where the Lessee finds only potable water, and such water is not required in lease operations; and

(e) Measurements - The right to measure geothermal resources and to sample any production thereof.

10

Sec. 18. ANTIQUITIES AND OBJECTS OF HISTORIC VALUE - The Lessee shall immediately bring to the attention of the Authorized Officer any antiquities or other objects of historic or scientific interest, including but not limited to historic or prehistoric ruins, fossils, or artifacts discovered as a result of operations under this lease, and shall leave such discoveries intact. Failure to comply with any of the terms and conditions imposed by the Authorized Officer with regard to the preservation of antiquities may constitute a violation of the Antiquities Act (16 U.S.C. 431-433). Prior to operations, the Lessee shall furnish to the Authorized Officer a certified statement that either no archaeological values exist or that they may exist on the leased lands to the best of the of the Lessee's knowledge and belief and that they might be impaired by geothermal operations. If the Lessee furnishes a statement that archaeological values may exist where the land is to be disturbed or occupied, the Lessee will engage a qualified archaeologist, acceptable to the Authorized Officer, to survey and salvage, in advance of any operations, such archaeological values on the lands involved. The responsibility for the cost for the certificate, survey, and salvage will be borne by the Lessee, and such salvaged property shall remain the property of the Lessor or the surface owner.

Sec. 19. DIRECTIONAL DRILLING - A directional well drilled under the leased area

from a surface location on nearby land not covered by the lease shall be deemed to have the same affect for all purposes of this lease as a well drilled from a surface location on the leased area. In such circumstances, drilling shall be considered to have been commenced on the nearby land for the purposes of this lease, and production of geothermal resources from the leased area through any directional well located on nearby land, or drilling or reworking of any such directional well shall be considered production or drilling or reworking operations (as the case may be) on the leased area for all purposes of this lease. Nothing contained in this section shall be construed as granting to the Lessee any right in any land outside the leased area.

Sec. 20. OVERRIDING ROYALTIES - The Lessee shall not create overriding royalties of less than one-quarter (1/4) of one percent of the value of output nor in excess of 50 percent of the rate of royalty due to the Lessor specified in Sec. 3 of this lease except as otherwise authorized by the regulations. The Lessee expressly agrees that the creation of any overriding royalty which does not provide for a prorated reduction of all overriding royalties so that the aggregate rate of royalties does not exceed the maximum rate permissible under this section, or the failure to suspend an overriding royalty during any period when the royalties due to the Lessor have been suspended pursuant to the terms of this lease, shall constitute a violation of the lease terms.

Sec. 21. READJUSTMENT OF TERMS AND CONDITIONS - The terms and conditions of this lease other than those related to rentals and royalties may be readjusted in accordance with the Act at not less than ten-year intervals beginning ten (10) years

11

after the date geothermal steam is produced from the leased premises as determined by the Supervisor.

Sec. 22. COOPERATIVE OR UNIT PLAN - The Lessee agrees that it will on its own, or at the request of the Lessor where it is determined to be necessary for the conservation of the resource or to prevent the waste of the resource, subscribe to and operate under any reasonable cooperative or unit plan for the development and operation of the, area, field, or pool, or part thereof embracing the lands subject to this lease as the Secretary may determine to be practicable and necessary or advisable in the interest of conservation. In the event the leased lands are included within a unit, the terms of this lease shall be deemed to be modified to conform to such unit agreement. Where any provision of a cooperative or unit plan of development which has been approved by the Secretary, and which by its terms affects the leased area or any part thereof, is inconsistent with a provision of this lease, the provisions of such cooperative or unit plan shall govern.

Sec. 23. RELINQUISHMENT OF LEASE - The Lessee may relinquish this entire lease or any officially designated subdivision of the leased area in accordance with the regulations by filing in the proper BLM office a written relinquishment, in triplicate, which shall be effective as of the date of filing. No relinquishment of this lease or any portion of the leased area shall relieve the Lessee or its surety from any liability for breach of any obligation of this lease, including the obligation to make payment of all accrued rentals and royalties and to place all wells in the leased lands to be relinquished in condition for suspension or abandonment, and to protect or restore substantially the surface or subsurface resources in a manner satisfactory to the Lessor.

Sec. 24. REMOVAL OF PROPERTY ON TERMINATION OR EXPIRATION OF LEASE

(a) Upon the termination or expiration of this lease in whole or in part, or the relinquishment of the lease in whole or in part, as herein provided, the Lessee shall within a period of ninety (90) days (or such longer period as the Supervisor may authorize because of adverse climatic conditions) thereafter remove from the leased lands, no longer subject to the lease all structures,

machinery, equipment, tools, and materials in accordance with applicable regulations and orders of the Supervisor. However, the Lessee shall, for a period of not more than six (6) months, continue to maintain any such property needed in the relinquished area, as determined by the Supervisor, for producing wells or for drilling or producing geothermal resources on other leases.

(b) Any structures, machinery, equipment, tools, appliances, and materials, subject to removal by the Lessee, as provided above, which are allowed to remain on the leased lands shall become the property of the Lessor on expiration of the 90-day period or any extension of that period which may be granted by the Supervisor. If the Supervisor

12

directs the Lessee to remove such property, the Lessee shall do so at its own expense, or if it fails to do so within a reasonable period, the Lessor may do so at the Lessee's expense.

Sec. 25. REMEDIES IN CASE OF DEFAULT

(a) Whenever the Lessee fails to comply with any of the provisions of the Act, or the terms and stipulations of this lease, or of the regulations issued under the Act, or of any order issued pursuant to those regulations, and that default shall continue for a period of thirty (30) days after service of notice by the Lessor, the Lessor may (1) suspend operations until the requested action is taken to correct the noncompliance, or (2) cancel the lease in accordance with Sec. 12 of the Act (30 U.S.C. 1011). However, the 30-day notice provision applicable to this lease under Sec. 12 of the Act shall also apply as a prerequisite to the institution of any legal proceedings by the Lessor to cancel this lease while it is in a producing status. Nothing in this subsection shall be construed to apply to, or require any notice with respect to any legal action instituted by the Lessor other than an action to cancel the lease pursuant to Sec. 12 of the Act.

(b) Whenever the Lessee fails to comply with any of the provisions of the Act, or of this lease, or the regulations, or of any GRO Orders, or other orders, and immediate action is required, the Lessor without waiting for action by the Lessee may enter on the leased lands and take such measures as it may deem necessary to correct the failure, including a suspension of operations or production, all at the expense of the Lessee.

(c) A waiver of any particular violation of the provisions of the Act, or of this lease, or of any regulations promulgated by the Secretary under the Act, shall not prevent the cancellation of this lease or the exercise of any other remedy or remedies under paragraphs (a) and (b) of this section by reason of any other such violation, or for the same violation occurring at any other time.

(d) Nothing herein shall limit or effect the Lessee's right to a hearing and appeal as provided in Sec. 12 of the Act and in the regulations promulgated thereunder.

(e) Upon cancellation, the Lessee shall remove all property in accordance with Sec. 24 hereof, and shall restore the leased lands in a manner acceptable to the Lessor or as may be otherwise required by the Lessor.

Sec. 26. HEIRS AND SUCCESSORS IN INTEREST - Each obligation hereunder shall extend to and be binding upon, and every benefit hereof shall inure to, the heirs, executors, administrators, successors, or assigns, of the respective parties hereto.

13

Sec. 27. UNLAWFUL INTEREST - No Member of, or Delegate to Congress, or Resident Commissioner, after his election or appointment, either before or after he has qualified, and during his continuance in office, and no officer, agent, or employee of the Department shall be admitted to any share or part in this lease or derive any benefit that may arise therefrom; and the provisions of Sec. 3741 of the Revised Statutes (41 U.S.C. Sec. 22), as amended, and Sections 431, 432, and 433 of Title 18 of the United States Code, relating to contracts made or entered into, or accepted by or on behalf of the United States, form a part of this lease so far as the same may be applicable.

Sec. 28. MONOPOLY AND FAIR PRICES - The Lessor reserves full power and authority to protect the public interest by promulgating and enforcing all orders necessary to insure the sale of the production from the leased lands at reasonable prices, to prevent monopoly, and to safeguard the public interest.

Sec. 29. EQUAL OPPORTUNITY CLAUSE - The Lessee agrees that, during the performance of this contract:

(1) The Lessee will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Lessee will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising, layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Lessee agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Lessor setting forth the provisions of this Equal Opportunity clause.

(2) The Lessee will, in all solicitations or advertisements for employees placed by or on behalf of the Lessee, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Lessee will send to each labor union or representative of workers with which Lessee has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the Lessor, advising the labor union or workers' representative of the Lessee's commitments under this Equal Opportunity clause, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

14

(4) The Lessee will comply with all provisions of Executive Order No. 11246 of September 24, 1965, as amended, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Lessee will furnish all Information and reports required by Executive Order No. 11246 of September 24, 1965, as amended, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the Secretary of the Interior and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Lessee's noncompliance with the Equal Opportunity clause of this lease or with any of said rules, regulations, or orders, this lease may be canceled, terminated or suspended in whole or in part and the Lessee may be declared ineligible for further Federal Government contracts or leases in accordance with procedures authorized in Executive Order No. 11246 of September 24, 1965, as amended, and such other sanctions as may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, as amended, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Lessee will include the provisions of Paragraphs (1) through (7) of this Section (29) in every contract, subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor Issued pursuant to Section 204 of Executive Order No. 11246 of September 24, 1965. as amended, so that such provisions will be binding upon each contractor, subcontractor, or subcontract, or purchase order as the Secretary may direct as a means of enforcing such provisions including sanctions for noncompliance; provided, however, that in the event the Lessee becomes involved in, or is threatened with, litigation with a contractor, subcontractor, or vendor as a result of such direction by the Secretary, the Lessee may request the Lessor to enter into such litigation to protect the interests of the Lessor.

Sec. 30. CERTIFICATION OF NONSEGREGATED FACILITIES - By entering into this lease, the Lessee certifies that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not and will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Lessee agrees that a breach of this certification is a violation of the Equal Opportunity clause of this lease. As used in this certification, the term "segregated facilities" means, but is not limited to, any waiting rooms, work areas, rest rooms and wash rooms, or restaurants or other eating areas, time clocks, or locker rooms, and other storage or dressing rooms, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive, or are in fact segregated on the basis of race, color, religion, or national origin because of habit, local

15

custom, or otherwise. Lessee further agrees that (except where it has obtained identical certifications from proposed contractors and subcontractors for specific time periods) it will obtain identical certifications from proposed contractors and subcontractors prior to the award of contracts or subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity clause; that it will retain such certifications in its files; and that it will forward the following certification to such proposed contractors and subcontractors (except where the proposed contractor or subcontractor has submitted identical certifications for specific time periods); it will notify prospective contractors and subcontractors of requirement for certification of nonsegregated facilities. A Certification of Nonsegregated Facilities, as required by the May 9, 1967 Order (32 F.R. 7439, May 19, 1967) on Elimination of Segregated Facilities, by the Secretary of Labor, must be submitted prior to the award of a contract or subcontract exceeding \$10,000 which is not exempt from the provisions of the Equal Opportunity clause. The certification may be submitted either for each contract and subcontract or for all contracts and subcontracts during a period (i.e., quarterly, semiannually, or annually).

Serial No. CACA 24678

LICENSE FOR ELECTRIC POWER PLANT SITE

UTILIZING GEOTHERMAL RESOURCES

This license, entered into on September 18, 1989, by the United States of America, the Licenser, through the Bureau of Land Management (BLM), and Ormesa Geothermal, the Licensee, is hereby issued under the Geothermal Steam Act of 1970 (30 U.S.C. 1001-1025) and is subject to all applicable Federal, State, and local laws and regulations including Title 43 CFR Group 3200.

SECTION 1. RIGHTS UNDER LICENSE

This license confers the right to construct, operate, and maintain a 10 MW electric generating plant and related facilities or appurtenant structures in accordance with the terms and conditions of this license, the approved plan of utilization, and the applicable regulations, on those certain lands situated in the County of Imperial, State of California,

described below excepting that prior to commencing any surface disturbance activities allowed under this license, a permit to construct a utilization facility shall be obtained from the authorized officer as required by 43 CFR 3250.6-1(b):

Geothermal Power Plant Site Land Description

That portion of the Southeast one quarter of Section 6, Township 16 South, Range 17 East, San Bernardino Meridian, County of Imperial; State of California, being more particularly described as follows:

Beginning at Southeast corner of said Section 6:

Thence along the East line of said Southeast one quarter Section 6 North 00(0)06' 54" West 712.00 feet to a point;

Thence leaving said East line North 89(0) 59' 18" West 33.00 feet to a point, said point being the true point of beginning;

Thence continuing North 89(0)59' 18" West 890.80 feet to an angle point;

Thence North 00(0)00' 00" East 552.75 feet to an angle point;

Thence South 89(0)49' 44" East 382.80 feet to an angle point;

Thence North 00(0)01' 00" West 86.96 feet to an angle point;

Thence North 89(degree)55' 13" East 289.76 feet to an angle point;

Thence South 00(degree)04' 47" East 66.00 feet to an angle point;

Thence North 89(degree)55' 13" East 125.00 feet to the beginning of a tangent 92.08 foot radius curve concave Southwesterly;

Thence Easterly and Southeasterly along said curve through a central angle of 89(0) 57' 53" an arc distance of 144.58 feet to a point, said point being 33.00 feet Westerly of the East line of of said Southeast one quarter of Section 6.

Thence along a line parallel with and 33.00 feet Westerly of said East line South 00(0) 06' 54" East 481.44 feet to the true point of beginning.

Containing 11.93 acres, more or less.

This license is for a primary term of 30 years, with a preferential right of renewal of such license under such terms and conditions as the Licensor may deem appropriate, provided that the license may be terminated as provided in Section 7 hereof.

SECTION 2. OPERATIONS

- A. License shall comply with the regulations of the Secretary of the Interior as set forth in 43 CFR Part 3250.
- B. Licensee shall comply with the provisions of the operating regulations in 43 CFR Part 3260 and all orders issued pursuant thereto. Copies of the operating regulations may be obtained from the Authorized Officer.
- C. Prior to commencement of any activities relating to plant operations, the Licensee shall file with the Authorized Officer a copy of any utility commission license or other Federal, State, or local license or permit incident to the operation of the facilities authorized herein.
- D. Licensee shall allow inspection of the premises and operations by duly authorized representatives of the Department of the Interior or other Federal agency administering the lands and shall provide for the ingress or egress of government officers, and for users of the lands under authority of the United States.
- E. Licensee hereby agrees to hold harmless and indemnify the United States, its officers, agents, employees, successors, or assigns from and against all claims,

3

demands, costs, losses, causes of action, damages, or liability of whatsoever kind or nature arising out of or resulting from the utilization of the property by the Licensee hereunder. The United States shall not be liable for any damages or injuries to persons or property in, or about, said premises from any cause other than the negligent acts or omissions of its officers, agents, or employees.

SECTION 3. RENTALS

The Licensee shall pay to the Licensor a rental of \$1200.00 on or before the date of issuance of the license and on each anniversary thereafter. Said rental shall be reassessed at the discretion of the Authorized Officer at not less than ten-year intervals beginning with the tenth year of the term of this license.

SECTION 4. BOND

The Licensee shall file with the Authorized Officer and shall maintain at all times the bond required under the regulations to be furnished as a condition to the issuance of this license in the amount established by the Licensor and to furnish such additional bond or security as may be required by the Licensor upon entry on the lands or after operations have begun.

SECTION 5. EQUAL OPPORTUNITY CLAUSE

This license is subject to the provisions of Executive Order No. 11246 of September 24, 1965, as amended, which sets forth the nondiscrimination clauses. A copy of this Order may be obtained from the Authorized Officer.

6. ASSIGNMENTS AND TRANSFERS

- A. This license shall be binding upon and inure to the benefit of the successors and assigns of the parties hereto. Any proposed transfer in whole or in part of any right, title, or interest in the licensed plant or facility or this license must be filed with the Authorized Officer. The application for transfer must be accompanied by the same showing of qualifications of the transferee as is required of the applicant, and must be supported by a stipulation that the assignee will comply with and must be bound by all the terms and conditions of this license. No transfer will be valid unless and until it is approved in writing by the Authorized Officer.
- B. An application for approval of an assignment or transfer shall be accompanied by a nonrefundable fee as specified by the regulations at 43 CFR 3250.8(b).

SECTION 7. TERMINATION AND RELINQUISHMENT

- A. The Licensee may surrender this license by filing a written relinquishment, in triplicate, with the Authorized Officer. The relinquishment shall include a statement as to whether the land covered by the license has been disturbed and, if so, whether it has been restored as prescribed by the terms and conditions of the license. The relinquishment will not be accepted until the requirements for reclamation of the land have been met.
- B. The license may be cancelled upon written order of the Authorized Officer for violation of the terms and conditions hereof, or of any of the regulations or

orders applicable hereto, subject to notice and a right of appeal as provided in the regulations.

- C. Following relinquishment, expiration, or cancellation, the Licensee shall within one year following the termination of the license remove all structures, machinery, and other equipment from the above described lands, and restore the land in accordance with Section 7(D) of this license. Additional time may be granted by the Authorized Officer upon a showing of good cause by the Licensee. The bond required by this license shall not be released until the reclamation process has been completed to the satisfaction of the Authorized Officer.
- D. Prior to the termination of bond liability and to the extent deemed necessary by the Licenser, the Licensee shall reclaim all surface disturbances as required, remove or cover all debris or solid waste, and, so far as possible, repair the offsite and onsite damage caused by its activity or activities incidental thereto, and return access roads or trails and the licensed lands to an acceptable condition, including the removal of structures, if required. The Authorized Officer shall prescribe the steps to be taken by the Licensee to protect the surface and the environment and for the restoration of the licensed lands and other lands affected by operations on; the licensed lands and improvements thereon, whether or not the improvements are owned by the United States.

SECTION 8. UNLAWFUL INTEREST

No Member of, or Delegate to, Congress or Resident Commissioner, after his election or appointment, or either before or after he has qualified and during his continuance in office, and no officer, agent, or employee of the Department of the Interior, except as provided in 43 CFE 7.3(a)(1), shall be admitted to any share or part in this license or derive any benefit that may arise therefrom; and the provisions of Section 3741 of the Revised Statutes of the United States, as amended (41 U.S.C. Sec. 22) and Sections 431, 432, and 433, Title 18 U.S.C., relating to contracts, enter into and form a part of this license so far as the same may be applicable.

SECTION 9. CERTIFICATION OF NONSEGREGATED FACILITIES

By entering into this license, the Licensee certifies that Licensee does not and will not maintain or provide for Licensee's employees any segregated facilities at any of Licensee's establishments, and that Licensee does not and will not permit Licensee's employees to perform their services at any location, under Licensee's control, where segregated facilities are maintained. The Licensee agrees that a breach of this certification is a violation of the Equal Opportunity Clause of this license. As used in this certification, the term "segregated facilities" means, but is not limited to, any waiting rooms, work rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact

7

segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. Licensee further agrees that (except where Licensee has obtained identical certification from proposed contractors and subcontractors for specific time periods) Licensee will obtain identical certifications from proposed contractors and subcontractors prior to the award of contracts or subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause; that Licensee will retain such certifications in Licensee's files; and that Licensee will forward the following notice to such proposed contractors and subcontractors (except where the proposed contractor or subcontractor has submitted identical certifications for specific time periods); Licensee will notify prospective contractors and subcontractors of the requirement for certification of nonsegregated facilities. A Certification of Nonsegregated Facilities, as required by the May 9, 1967, Order (32 F.R. 7439, May 19, 1967) on Elimination of Segregated Facilities, of the Secretary of Labor, must be submitted prior to the award of a contract or subcontract exceeding \$10,000 which is not exempt from the provisions of the Equal Opportunity Clause. The certification may be submitted either for each contract and subcontract or for all contracts and subcontracts during a period (i.e. quarterly, semi-annually, or annually).

STATE OF HAWAII

DEPARTMENT OF LAND AND NATURAL - RESOURCES

GEOHERMAL RESOURCES MINING LEASE NO. R-2

THIS INDENTURE OF LEASE, made this 20th day of February, 1981, pursuant to Chapter 182, Hawaii Revised Statutes, and the rules and regulations promulgated thereunder, by and between the STATE OF HAWAII, by its Board of Land and Natural Resources, hereinafter called the "Lessor", and KAPOHO LAND PARTNERSHIP, a Hawaii Limited Partnership, whose business and post office address is P.O. Box 374, Hilo, Hawaii 96720 respectively, hereinafter called the "Lessee",

W I T N E S S E T H :
- - - - -

1. LEASE

Subject to the provisions of paragraph 23 entitled "No Warranty of Title", Lessor, in consideration of the royalties, rental, and other monetary considerations, agreements and stipulations herein contained, does hereby lease unto the Lessee the right to develop geothermal resources and geothermal by-products in and under that certain parcel of land, hereinafter designated as the "leased lands", described in Exhibit "A" containing approximately 815.7997 acres situated at Kapoho, Puna, Hawaii, as shown on the map marked Exhibit "B", which exhibits are attached and made a part hereof.

The Lessee shall have the sole and exclusive right to drill for, produce and take geothermal resources from the leased lands and occupy and use so much of the surface of the leased lands as may be reasonably required pursuant to the provisions of section 182-3 of the Hawaii Revised Statutes and section 6.1 of the regulations. Lessee agrees to comply with these provisions and to save and hold the Lessor harmless with respect to the claims made under said

statute and regulations by the owners and occupiers of the surface of the leased lands. This Lease does include the right to reinject beneath the leased lands geothermal fluids subject to the prior written approval of the Lessor and upon such terms and conditions as the Lessor considers to be in the public interest and include any other right as may be necessary to produce the geothermal resources. This Lease does not confer upon the Lessee the privilege or right to store hydrocarbon gas beneath the leased lands; nor does this Lease confer upon the Lessee any other privilege or right not expressly given herein.

This Lease is entered into with the agreement that its purposes are and its administration shall be consistent with the principle of multiple use of public lands and resources; this Lease shall allow co-existence of other permits or leases of the same lands for deposits of other minerals under applicable laws, and the existence of this Lease shall not preclude other uses of the leased lands. However, operations under such other permits or leases or other such uses shall not unreasonably interfere with or endanger operations under this Lease, nor shall operations under this Lease unreasonably interfere with or endanger operations under any permit, lease, or other entitlement for use issued or held pursuant to the provisions of any other law. Nor shall this Lease be construed as superseding the authority which the head of any State department or agency has with respect to the management, protection, and utilization of the State lands and resources under his jurisdiction. The State may prescribe in its rules and regulations those conditions it deems necessary for the protection of resources.

2. RESERVATION TO LESSOR

All rights in the leased lands not granted to the Lessee by this Lease are hereby reserved to the Lessor. Without limiting the generality of the foregoing such reserved rights include:

2

A. Disposal - If the State owns the surface of the land, the right to sell or otherwise dispose of the surface of the leased lands owned by the State or to sell or dispose of any other resource in the leased lands under existing laws, or laws hereafter enacted subject to the rights of the Lessee under this Lease. Nothing provided herein shall be construed to authorize or provide for the sale or disposition of the surface of reserved or other privately owned lands.

B. Rights-of-way - The right to authorize geological and geophysical explorations on the leased lands which do not interfere with or endanger present operations or reasonable prospective operations under this Lease, and if the State owns the surface of the land the right to grant such easements or rights-of-way for joint or several use upon, through or in the leased lands for steam lines and other public or private purposes which do not interfere with or endanger present operations or reasonable prospective operations or facilities constructed under this Lease. Nothing provided herein shall be construed as a grant or the right to grant an easement or right-of-way upon reserved or other privately owned lands.

C. Certain Mineral Rights - The right to extract at its sole cost and expense and own oil, hydrocarbon gas, and helium from all geothermal steam and associated geothermal resources produced from the leased lands; provided, however that such extraction and ownership rights shall be exercised by Lessor in such manner as will not unduly interfere with the rights of Lessee under this Lease.

D. Casing - If the State owns the surface of the land, the right to acquire the well and casing when the Lessee finds only potable water, and such water is not required in lease operations; and

3

E. Measurements - The right to measure geothermal resources and to sample any production thereof.

3. TERM

A. Primary Term, Extended Term, Maximum Term

This Lease shall be for a term of ten (10) years from and after the effective date of this Lease pursuant to Rule 3.11 of the Regulations, (hereinafter referred to as the "primary term"), and for so long thereafter as geothermal resources are produced or utilized in commercial quantities, provided that the maximum term of this Lease shall not exceed sixty-five (65) years; provided, however, that if the primary term or the maximum term for geothermal leases should be extended by statute, retroactively, such extended terms shall be applicable to this Lease, or should said terms be extended generally by statute, such extended terms may be made applicable to this Lease upon such other terms and conditions as the Board may determine. Production or utilization of geothermal resources in commercial quantities shall be deemed to include the completion of one or more wells capable of producing geothermal resources for delivery to or utilization by a facility or facilities not yet installed but scheduled for installation not later than fifteen (15) years from the date of commencement of the primary term of this Lease.

B. Extension of Lease Beyond Primary Term by Drilling Operations

If at the expiration of the primary term hereof geothermal resources in commercial quantities are not being produced from the leased lands, but the Lessee is actively engaged in drilling operations designed to drill below the depth of 1,000 feet, or, to a production zone at a lesser depth in a diligent manner, this Lease shall be continued for so long thereafter as such operations are continued with no cessation thereof for more than 180 days, but not to exceed a period of five (5) years, and if such drilling operations are successful, as long thereafter

4

as geothermal resources are being produced or utilized in commercial quantities except for the sixty-five (65) year limit provided above.

C. Shut-in Production

If the Lessee has voluntarily shut-in production for lack of a market, but is proceeding diligently to acquire a contract to sell or to utilize the production or is progressing with installations needed for production, this Lease shall continue in force upon payment of rentals for the duration of the primary term or for five (5) years after shut-in, whichever is longer. The Chairman shall continue to review this Lease every five (5) years until production in commercial quantities occurs or this Lease is terminated by Lessor for Lessee's lack of due diligence or is surrendered by the Lessee. When production and sale or utilization of geothermal resources in commercial quantities has been established, the term of this Lease shall continue as provided in Paragraph A of this paragraph 3.

D. Drilling or Reworking Operations After Cessation of Production

If production of geothermal resources should cease by reason of a deadline in the productive capacity of existing wells after expiration of the primary term, or before the end of the primary term if production has commenced, this Lease shall continue so long as Lessee actively and continuously engages in drilling or reworking operations which shall be commenced within One Hundred Eighty (180) days after cessation of production. Continuous drilling or reworking operations shall be deemed to have occurred where not more than One Hundred Eighty (180) days elapse between cessation of operations on one well and commencement of operations on the same or another well. If such operations are continued and if they are successful, this Lease shall continue as long thereafter as geothermal resources are being produced in commercial quantities, except for the sixty-five (65) year limit provided above.

5

4. RENTALS

A. Amount and Time of Payment

The first year's annual rent shall be paid pursuant to Rule 3.12. Thereafter, Lessee shall pay to Lessor at the Department, in advance each year on or before the anniversary date hereof, the annual rental of EIGHT HUNDRED AND SIXTEEN DOLLARS (\$816.00)

B. Credits Against Royalties

The annual rental due and paid for each year shall be credited against any production royalties due and accrued during the same year. Annual rentals paid for a given year shall not be credited against production royalties due in future years.

5. ROYALTIES

A. For Period of Initial Thirty-five Years

For the primary ten (10) year term and during the first twenty-five (25) years thereafter Lessee shall pay to Lessor the following royalties on production measured and computed in accordance with the regulations:

1. Geothermal Resources (Excluding Geothermal By-products)
A royalty of ten (10%) percent of the gross proceeds received by the Lessee from the sale or use of geothermal resources produced from the leased lands and measured at the wellhead without any deduction for treating, processing and transportation cost, notwithstanding Rule 3.13b. of Regulation 8.
2. Geothermal By-Products
Five (5%) percent of the gross proceeds received by the Lessee from the sale of any such by-product produced under this Lease, including demineralized or desalted water, after deducting the treating, processing and transportation costs incurred.

In the event that geothermal resources hereunder is not sold to a third party but is used or furnished to a plant owned or controlled by the Lessee, the gross proceeds of such production for the purposes of computing royalties hereunder shall be that which is reasonably

6

equal to the gross proceeds being paid to other geothermal producers for geothermal resources of like quality under similar conditions without deducting any treating, processing and transportation costs incurred, notwithstanding Rule 3.13b. of Regulation 8.

No payment of royalty will be required on water if it is used in plant operation for cooling or generation of electric energy or is reinjected into the sub-surface. No royalty shall be paid for geothermal by-products used or consumed by Lessee in his production operations.

Gross proceeds shall not be deemed to include excise, production, severance or sales taxes or other taxes imposed on the Lessee by reason of the production, severance or sale of geothermal resources or geothermal by-products.

B. Readjustment After Thirty-five Years

Royalty rates on geothermal resources and geothermal by-products shall be readjusted, subject to the limitations specified in the regulations and in accordance with the procedures prescribed therein at the expiration of the

thirty-fifth (35th) and fiftieth (50th) years of the Lease; provided, however, that such readjustment shall be only as to the royalty rate and not as to the basis for determining payment to the Lessor.

If the royalty rates for any ensuing period have not been determined prior to the expiration of the preceding period, the Lessee shall continue to pay the royalty rates effective for the previous period, but the Lessee shall, within thirty (30) days after the new royalty rates have been so determined, pay the deficiency, if any.

C. Deadline for Royalty Payments

The Lessee shall make payments of royalties to the Lessor within thirty (30) days after the end of each calendar month following such production and accompany such payment with a certified true and correct written statement by the Lessee, showing the amount of geothermal resource and geothermal by-product produced, sold, used and/or otherwise disposed

7

of and the basis for computation and determination of royalties. The Lessee shall furnish such other data as may be necessary to enable the Lessor to audit and verify all royalties due and payable to the Lessor.

D. Royalties-Production (absolute open flow potential)

If the Lessee supplies steam to any electrical generating facility from wells on both the leased lands and other lands and there is producible from all such wells in aggregate a quantity of steam greater than the maximum quantity utilizable by said electrical generating facility, Lessee agrees to produce and sell or use steam from the leased lands in a proportion no less than the proportion that the absolute open flow potential (the absolute open flow potential as used herein is the rate of flow in pounds of steam per hour that would be produced by a well if the only pressure against the face of the producing formation in the well bore were atmospheric pressure) of the wells on the leased lands bears to the total absolute open flow potential of all such wells from which Lessee supplies steam to such electrical generating facility. For purposes of this section it shall be deemed that the Lessee supplies steam from a well to an electrical generating facility when such well is capable of producing geothermal resources in commercial quantities to such facility. The absolute open flow potential of all such wells whether on the leased lands or other lands shall be determined by the Lessor and shall be based upon tests performed by the Lessee as prescribed by the Lessor. In this regard, Lessee shall, upon completion of each of such wells, and prior to the placing of such wells on commercial production, perform, and deliver to the Lessor the results of, the following tests:

1. Pressure Test - Pressure-buildup tests to determine static reservoir pressure and well bore conditions. If pressure-buildup tests are based on shut-in wellhead data, then static well bore temperature surveys must also be conducted:

8

2. Isochronal Flow Tests - Isochronal flow tests or two rate flow tests to establish a back pressure curve and the absolute open flow potential;

3. Other Tests-Static Reservoir Pressure - Other tests as deemed to be necessary by the Lessor.

After commencement of commercial production from each of such wells, Lessee shall annually, or more frequently if requested by the Lessor, determine static reservoir pressure and complete any other

tests as specified by the Lessor.

E. Geothermal By-Products Testing

The Lessee shall furnish the Chairman the results of periodic tests showing the content of by-products in the produced geothermal resources. Such tests shall be taken as specified by the Chairman and by the method of testing approved by him, except that tests not consistent with industry practice shall be conducted at the expense of the Lessor.

F. Interest and Penalties

1. Interest - It is agreed by the parties hereto that any royalties, rentals, or other monetary considerations arising under the provisions of this Lease and not paid when due as provided in this Lease, shall bear interest from the day on which such royalties, rentals, or other monetary consideration were due at the rate of 12% per annum or such higher rates as may be permitted by law until such royalties, rentals, or other monetary considerations shall be paid to the Lessor.

2. Penalty - It is agreed by the parties hereto that any royalties, rentals or other monetary considerations arising under the provisions of this Lease and not paid when due as provided in this Lease, shall be subject to a five (5%) percent penalty on the amount of any such royalties, rentals, percentage of net profits, or other monetary considerations arising under the provisions of this Lease.

9

3. Definition of Royalties, etc. - It is agreed by the parties hereto that, for the purpose of this section, "royalties, rentals or other monetary considerations arising under the provisions of this Lease and not paid when due" includes but is not limited to any amounts determined by the Lessor to have been due to the Lessor if, in the judgment of the Lessor, an audit by the Lessor of the accounting statement required by paragraph 28 below shows that inaccurate, unreasonable or inapplicable information contained or utilized in the statement resulted in the computation and payment to the Lessor of less royalties, rentals, or other monetary considerations than actually were due to the Lessor.

6. REQUIREMENT TO COMMENCE MINING OPERATIONS

Lessee shall commence mining operations upon the leased lands within three years from the effective date of this Lease, excluding any research period which has been granted; provided, that so long as the Lessee is actively and on a substantial scale engaged in mining operations on at least one geothermal resources mining lease, the covenant to commence mining operations shall be suspended as to all other leases held by the Lessee, covering lands on the same island.

7. TAXES

A. Real Property Taxes

Lessee shall pay any real property taxes levied on that portion of the surface of the leased lands utilized by Lessee, according to the value allocated thereto by Lessor or other appropriate State or County agency based on the use of the surface of the portion of the land by Lessee and the use of the remainder of the land by others entitled thereto. Lessee shall also pay any real property taxes levied on the structures and improvements placed thereon and utilized by Lessee; provided that all subsurface rights and any geothermal resources underlying the leased lands under this Lease shall be deemed to have only nominal value for real property tax

assessment purposes until such time, if any, as specifically authorized by law. If Lessor has exercised its rights under paragraph 2 herein, said taxes shall be prorated according to Lessee's interests.

B. Other Taxes

Royalties paid hereunder shall be in lieu of any severance or other similar tax on the extracting, producing, winning, beneficiating, handling, storage, treating or transporting of geothermal resources or any product into which the same may be processed in the State of Hawaii; nevertheless, if any such tax should be assessed, then such tax shall be deducted from any royalties otherwise due hereunder. As to any and all other taxes of any nature assessed upon geothermal resources or geothermal by-products therefrom or assessed on account of the production or sale of geothermal resources or geothermal by-products from the leased land, Lessor and Lessee each shall bear such tax in proportion to its respective fractional share of the value of such production.

8. UTILITY SERVICE

Lessee shall be responsible for all charges, duties and rates of every description, including water, electricity, sewer, gas, refuse collection or any other charges, arising out of or in connection with Lessee's operations hereunder.

9. SANITATION

Lessee shall keep its operations and improvements in a strictly clean, sanitary and orderly condition.

10. WASTE: USE OF PREMISES

a. Lessee shall not commit, suffer or permit to be committed any waste, nuisance, strip mining or unlawful use of the leased lands or any part thereof.

11

b. Negligence - Breach - Non-Compliance - Lessee shall use all reasonable precautions to prevent waste of, damage to, or loss of natural resources including but not limited to gasses, hydrocarbons and geothermal resources, or reservoir energy on or in the leased lands, and shall be liable to the Lessor for any such waste, damage or loss to the extent that such waste, damage, or loss is caused by (1) the negligence of Lessee, its employees, servants, agents or contractors; (2) the breach of any provision of this Lease by Lessee, its employees, servants, agents or contractors, or non-compliance with applicable federal, state or county statutes or rules and regulations; provided, however, that nothing herein shall diminish any other rights or remedies which the Lessor may have in connection with any such negligence, breach or non-compliance. With respect to any other such waste damage or loss, Lessee agrees to indemnify, save the Lessor harmless and, at the option of the Lessor, defend the Lessor from any and all losses, damages, claims, demands or actions caused by, arising out of, or connected with the operations of the Lessee hereunder as more specifically provided under paragraph 16 hereof. Lessee shall not be obligated to defend the Lessor's title to geothermal resources.

11. COMPLIANCE WITH LAWS

Lessee shall comply with all valid requirements of all municipal, state and federal authorities and observe all municipal, state and federal laws and regulations pertaining to the leased lands and Lessee's operations hereunder, now in force or which may hereafter be in force, including, but not limited to, all water and air pollution control laws, and those relating to the

environment; provided, however, no revision or repeal of the regulations as defined in paragraph 34 subsequent to the effective date hereof shall change the rental, royalty rate, term, or otherwise substantially change the economic terms under this Lease; provided, further, however, that the State of Hawaii, acting in its governmental capacity, may by such regulations or amendments thereto made at any time regulate the drilling, location, spacing, testing, completion, production,

12

operation, maintenance and abandonment of a well or wells or similar activity as well as the construction, operation and maintenance of any power plant or other facilities in the exercise of its police powers to protect the public health, welfare and safety as provided in the regulations.

Lessee shall have the right to contest or review, by legal procedures or in such other manner as Lessee may deem suitable, at its own expense, any order, regulation, direction, rule, law, ordinance, or requirement, and if able, may have the same cancelled, removed, revoked, or modified. Such proceeding shall be conducted promptly and shall include, if Lessee so decides, appropriate appeals. Whenever the requirements become final after a contest, Lessee shall diligently comply with the same. Lessee also agrees that in its employment practices hereunder it shall not discriminate against any person because of race, color, religion, sex, ancestry or national origin.

12. INSPECTION OF PREMISES AND RECORDS

Lessor, or persons authorized by the Lessor, shall have the right, at all reasonable times, to go upon the leased lands for the purpose of inspecting the same, for the purpose of maintaining or repairing said premises, for the purpose of placing upon the leased lands any usual or ordinary signs, for fire or police purposes, to protect the premises from any cause whatever, or for purposes of examining and inspecting at all times the operations of Lessee with respect to wells, improvements, machinery, and fixtures used in connection therewith, all without any rebate of charges and without any liability on the part of the Lessor for any loss of occupation or quiet enjoyment of the premises thereby occasioned.

Lessor or its agents may at reasonable times inspect the books and records of Lessee with respect to matters pertaining to the payment of royalties to Lessor. Complete information shall be made available to Lessor. In addition, qualified representatives and/or consultants designated by Lessor may examine the reports specified in this Lease and all other

13

pertinent data and information regarding wells on the leased lands and production therefrom. In the event of surrender of all or a part of the leased lands Lessee shall furnish Lessor all data with respect to such surrendered lands including interpretations of such data for use in future lease negotiations with third parties. Lessee agrees on written request to furnish copies of such information to Lessor's qualified representatives or consultants.

13. GEOTHERMAL OPERATIONS

Lessee shall carry on all work hereunder with due regard for the preservation of the property covered by this Lease and with due regard to the safety and environmental impact of its operations and in accordance with the following terms and conditions:

A. Removal of Derrick. Lessee shall remove the derrick and other equipment and facilities within sixty (60) days after Lessee has ceased making use thereof in its operations.

B. Operating Sites. All permanent operating sites shall be landscaped or fenced so as to screen them from public view to the maximum extent possible, as required in the discretion of the Department of Land and Natural Resources. Such landscaping or fencing shall be approved in advance by the Lessor and kept in good condition.

C. Site Selection. Prior to commencing a particular operation on the surface of the leased lands, Lessee will consult with the occupier and submit the details concerning the proposed operation, such as the location or route of any drill site, facility site, installation site, surface area, road, pond, pipeline, power line, or transmission line, as the case may be, to the occupier by certified mail for the occupier's approval. If the occupier does not approve such proposal, occupier will submit within thirty (30) days an alternate written proposal. If occupier does not submit an alternate proposal, Lessee may proceed with its operation as originally proposed, subject to the provisions of paragraph 23. If the occupier and Lessee cannot agree, the matter will be submitted to arbitration.

14

D. Drilling Operations. All drilling and production operations shall be conducted in such manner as to eliminate as far as practicable dust, noise, vibration, or noxious odors. The operating site shall be kept neat, clean and safe. Drilling dust shall be controlled to prevent widespread deposition of dust. Detrimental material deposited on trees and vegetation shall be removed. Lessee will take such steps as may be required to prevent damage to crops. The determination as to what is detrimental will be made by the Lessor.

No well shall be drilled within five hundred (500) feet of any residence or building on the leased lands without first obtaining the occupier's written consent.

In any well drilled by Lessee hereunder sufficient casing shall be set and cemented so as to seal off surface and subsurface waters, any of which would be harmful to agricultural or other operations.

E. Water Quality - Waste Disposal. Lessee shall file with the Lessor a report of any proposed waste discharge.

Wastes shall be discharged in accordance with requirements and prohibitions prescribed by the Lessor. The Lessor and any other state agency having jurisdiction over the affected lands shall also approve the place and manner of such waste disposal.

F. Fish and Game Notice - Interference. Lessee shall communicate with the Division of Fish and Game prior to any operations which may adversely affect fish and wildlife resources. Lessee shall conduct its operations in a manner which will not interfere with the right of the public to fish upon and from the public lands of the State and in the waters thereof or will not preclude the right of the public to use of public lands and waters.

G. Damage to Terrain. Any operations disturbing the soil surface, including road building and construction and movement of heavy equipment in support of or relating to specific

15

geothermal exploration or development activities shall be conducted in such manner as will not result in unreasonable damage to trees and plant cover, soil erosion, or in degradation of waters of the State, including fish and aquatic life habitat. Lessee will conduct its operations in a manner that will not unreasonably interfere with the enjoyment of the leased lands by the occupier or persons residing on or near the leased lands.

H. Pollution. Pollution of the ocean and tidelands, rivers, or other bodies of water, and all impairment of and interference with bathing, fishing, or navigation in the waters of the ocean or any bay or inlet thereof is prohibited, and no brine, minerals, or any refuse of any kind from any well or works shall be permitted to be deposited on or pass into waters of the ocean, any bay or inlet thereof, rivers, lakes or other bodies of water, without specific written State authorization.

No Leased Substances which may be produced from any well drilled upon the leased lands shall be blown, flowed, or allowed to escape into the open air or on the ground in such a manner as to create a nuisance, which shall specifically include but not be limited to noise, air or other pollution, and other activities which disturb the occupier's or his Tenant's use of the leased lands. Subject to the foregoing, Lessee may bleed Leased Substances to the atmosphere so long as such operations are lawfully and prudently conducted in accordance with good geothermal drilling and production practices and are not otherwise violative of the provisions of this Lease.

I. Filled Lands. No permanent filled lands, piers, platforms, or other fixed or floating structures in, on, or over any tide and submerged lands covered by this Lease or otherwise available to Lessee shall be permitted to be constructed, used, maintained, or operated without obtaining any and all permits required under applicable State and Federal law, rules and

16

regulations, and complying with all valid ordinances of cities and counties applicable to Lessee's operations, and without securing the written permission of the Lessor specifically authorizing the activity.

J. Road Maintenance. Lessee will take such steps at Lessee's own expense as are necessary to insure that its roads, well sites, plant sites and other operation areas will be kept as dust free as is practicable so that dust will not decrease the market value of adjacent growing crops or interfere with the occupier's or his tenant's uses.

Lessee will use existing roads where such are available for its operations. All roads, bridges and culverts used by Lessee will be maintained by it and roads surfaced or treated in a manner that will prevent dust from interfering with agricultural or residential use of the leased lands. Lessee shall be responsible for the maintenance of and repair of damages caused to roads used by Lessee on or serving the leased lands. The occupier and Lessor and their agents, tenants and licensees shall have the full use of roads constructed by Lessee but shall be responsible for the repair of any unusual damage caused to such roads by their use. In constructing roads, Lessee shall install necessary culverts or bridges so as not to interfere with the irrigation or drainage of the leased lands.

K. Timber Damaged. In the absence of any agreement to the contrary, timber damaged, destroyed, or used on the leased lands shall be compensated for at market value to the surface owner. Borrow pit material shall not be obtained from the leased lands without permission and payment of market value to the surface owner.

L. Improvements - Protection from Damage. Improvements, structures, telephone lines, trails, ditches, pipelines, water developments, fences, crops and other property of

17

the State or surface owners, other lessees or permittees shall be protected from damage and repaired or replaced by Lessee when damaged by Lessee.

M. Damages - Payment. In the event any buildings or personal

property or crops shall be damaged or destroyed because of Lessee's operations on the leased lands, then Lessee shall be liable for all damages occasioned thereby. Lessee in its operations on the leased lands shall at all times have due and proper regard for the rights and convenience, and the health, welfare and safety of the occupier and of all tenants and persons lawfully occupying the leased lands. In the event that Lessee's operations result in any condition, including but not limited to water table or deposition of chemicals, or harmful substances, which adversely affects the continued production of crops or then beneficial uses and purposes of the land, occupier at his option may require Lessee to reimburse the occupier, his tenants and persons lawfully occupying the leased lands as to the affected acreage in accordance with subparagraphs N 1 and 2 of this paragraph 13.

N. Damages to Surface or Condition of Land. Lessee shall pay the surface owner for the surface of each acre of land or fraction thereof utilized, taken or used or rendered substantially unusable by the Lessee in its operations, pursuant to the terms of this Lease, for farming or stock raising operations or other uses or purposes for which the land is then being used or for which the surface owner had made other plans, which shall include, but not be limited to, the lands occupied by drill sites, facility sites, roadways constructed by Lessee, ponds, pipelines, utility lines, power and transmission lines, production facilities, and other facilities and structures, together with other uses of the surface, save and except certain plants and buildings provided for in subparagraph O below, in accordance with one of the following methods to be elected by surface owner.

18

1. Lessee shall pay the surface owner annually from the date of acquisition a rental equivalent to the fair rental value which is being paid each year for like property.

2. Lessee shall pay surface owner severance damages if any to the surrounding land and purchase the surface acreage required by Lessee for its fair market value with right of surface reverter in the surface owner when no longer utilized by Lessee in its operations.

O. Power Plants. In the event Lessee, or a public utility, pursuant to Lessee's operations hereunder, desires to construct any plant or building site and is required to have fee title for such purpose, then Lessee shall pay occupier the fair market value for the surface of such plant or building site and the severance damages, if any, to the parcel from which such plant or building site is taken.

P. Agreement with Surface Owner. In the event that the Lessor does not own the surface of the leased lands and if the geothermal developer who is responsible for developing the resources on the leased lands enters into a lease with the surface owner, then the provisions of such lease from the surface owner shall supercede the foregoing paragraphs 13.K. through 13.O and 14 relating to surface use, and such paragraphs shall thereafter have no force and effect where it is inconsistent with the lease with the surface owner.

Q. Drilling Mud. Drilling mud shall be ponded in a safe manner and place, and where required by the Lessor, posted with danger signs, and fenced to protect persons, domestic animals, and wildlife. Upon completion of drilling, the mud shall be disposed of, or after drying in place, covered with a protective layer of soil.

Lessee agrees to fence all sump holes and excavations and all other improvements, works, or structures which might interfere with or be detrimental to the activities

19

of the occupier or other adjacent or nearby users of the land, and to build sumps and to take all reasonable measures to prevent pollution of surface or subsurface waters on or in the leased lands. Upon abandonment of any well on the leased lands, or on the termination of this Lease, or upon quitclaim or reverter of any leased land by Lessee, then as to such leased land Lessee shall level and fill all sump holes and excavations shall remove all debris, and shall leave those areas of the leased lands used by Lessee in a clean and sanitary condition suitable for farming or in the condition it was at the inception of this Lease if its use was other than farming, and shall pay the occupier for all damages to occupier's buildings, structures, or other property caused by Lessee.

R. Facility Sites. Areas cleared and graded for drilling and production facility sites shall be kept to a reasonable number and size, and be subject to Lessor's approval.

Unless economic and technological considerations will not permit, wells will be drilled directionally in order to minimize the number of drill sites required. Well sites and facility sites will be shaped and located to the extent practicable to interfere as little as possible with the occupier's operations including the spacing, location and operation of the occupier's improvements, planned and contemplated uses, grading, utility and drainage systems, and roads, and to prevent undue interference or danger to the occupier's or his tenant's farming and other operations. Where economically and technologically feasible, wells shall be drilled directionally from a single well site. Drill sites may also be located on unused portions of the leased lands. The drill sites will not ordinarily exceed five (5) acres in size but will vary in accordance with the number of wells drilled from such site and the amount of production equipment placed thereon. Plant or facility sites will be limited in size to approximately ten (10) acres per site.

S. Construction of Terms. The above are in addition to, and not to be construed as limitations upon, all other

20

rules, regulations, restrictions, mitigation measures and all other measures designed to restrict, limit, modify or minimize the environmental impact of operations carried out pursuant to this Lease as set forth in this Lease.

T. Spacing, Production, Etc. The Lessor may determine the spacing of wells and the rate of development and production of such wells to prevent the waste of geothermal resources and to promote the maximum economic recovery from, and the conservation of reservoir energy in, each zone or separate underground source of geothermal resources. Such determination shall be based on recognized engineering standards and shall be consistent with prevailing economic and market conditions.

U. Drilling - Notice - Plan - Lessee, before commencing the drilling of a well, shall notify the Lessor of its intention to drill, and such notice shall contain the location and elevation above sea level of derrick, proposed depth, bottom hole location, casing program, proposed completion program and the size and shape of drilling site, excavation and grading planned, and location of existing and proposed access roads. Where the surface of the leased lands is under the jurisdiction of a State agency other than the Department of Land and Natural Resources, Lessee shall provide at the same time such information listed above as is pertinent to that agency.

V. Drilling, etc. - Circulating Medium - All drilling, redrilling, perforating, or work-over operations within the leased lands shall be done with an accepted circulating medium.

W. Generating Plants - Approval - No generating plants, buildings, structures, production equipment, metering systems, pipelines or roads for the production, sale or use of geothermal resources (hereinafter referred to as "geothermal facilities") shall be installed or constructed except on prior

Lessor's approval and the approval of any other governmental agency having jurisdiction over such installation or construction. Any contract entered into by Lessee

21

with a Public Utility or any other person or entity for the installation or construction of geothermal facilities shall contain provisions requiring the Public Utility, or other person or entity to obtain the approval of the Lessor and other governmental agencies before installation or construction of geothermal facilities.

14. LIENS

Lessee will not commit or suffer any act or neglect whereby the estate of the Lessor or the surface owner or occupier of the leased lands shall become subject to any attachment, lieu, charge or encumbrance whatsoever, and shall indemnify and hold harmless the Lessor, surface owner and occupier, against all such attachments, liens, charges and encumbrances and all expenses resulting from any such act or neglect on the part of the Lessee.

Lessee will, before commencing construction of any improvements or any drilling operations or laying any pipe lines or doing any other work on or within the leased lands, deposit with Lessor, surface owner and occupier of such lands a bond or certificate thereof naming Lessor, said surface owner and occupier as obligees in a penal sum of not less than one hundred per cent (100%) of the cost of such construction, drilling or pipe line work and in form and with surety satisfactory to Lessor, the surface owner and occupier guaranteeing the completion of such work free and clear of all mechanics' and materialmen liens.

15. ASSIGNMENT OR SUBLEASE

Lessee shall have the right to transfer this lease to any person qualified under the applicable law and regulations by assignment, sublease, or other transfer, of any nature including the creation of security interests in Lessee's interest in this Lease and Lessee's rights hereunder, in whole or in part, and as to all or a part of the leased lands, subject to the approval of the Lessor, which approval will not unreasonably be withheld. Upon approval, Lessor may release

22

the transferor from any liabilities or duties except for any liability or duty which arose prior to such approval.

16. INDEMNITY

The Lessee agrees to hold harmless and indemnify the State of Hawaii and its divisions, departments, agencies, officers, agents and employees, together with the owner or lessee of the surface of the leased lands, if any, from any and all liabilities and claims for damages and/or suits for or by reason of death or injury to any person or damage to property of any kind whatsoever, whether the person or property of Lessee, his agents, employees, contractors, or invitees, or third persons, from any cause or causes whatsoever caused by any occupancy, use, operation or any other activity on the leased lands or its approaches, carried on by the Lessee, his agents, employees, contractors, or invitees, in connection therewith; and the Lessee agrees to indemnify and save harmless the State of Hawaii, the Board, the Chairman, the Department, owner or lessee of the surface if there be one, and their officers, agents, and employees from all liabilities, charges, expenses (including counsel fees) and costs on account of or by reason of any such death or injury, damage, liabilities, claims, suits or losses.

The foregoing indemnity specified in this Lease and in the regulations is not intended to nor shall it be construed to require the Lessee to defend the Lessor's title to geothermal resources and in case of litigation involving the titles of the Lessee and the Lessor, Lessee and the Lessor will join in defending their respective interests, each bearing the cost of its own defense.

17. LIABILITY INSURANCE

Prior to entry upon the leased lands the Lessee or transferee shall obtain, at its own cost and expense, and maintain in force during the entire term of this Lease, a policy or policies of comprehensive general public liability and property damage insurance from any

23

company licensed to do business in the State of Hawaii covering liability for injuries to persons, wrongful death, and damages to property caused by any occupancy, use, operations or any other activity on leased lands carried on by Lessee or transferee, its agents or contractors in connection therewith, in the following minimum amounts:

- a. Comprehensive General Bodily Injury Liability - \$300,000.00 each occurrence, \$1,000,000.00 aggregate.
- b. Comprehensive General Property Damage \$50,000.00 each occurrence, \$100,000.00 aggregate.

Liability coverage for injury or damage to persons or property caused by explosion, collapse and underground hazards are to be included prior to initiation of operations to drill a well for geothermal discovery, evaluation or production. Lessee shall evidence such additional coverage to the Chairman prior to initiation of drilling operations. If the land surface and improvements thereon covered by this Lease are owned or leased by a person other than the State of Hawaii, the owner and lessee, if any, of the surface and improvements shall be a named insured. The State of Hawaii, the Hawaii State Board of Land and Natural Resources, the Chairman of the Board of Land and Natural Resources, and the Department of Land and Natural Resources, shall also be named insureds.

No cancellation provision in any insurance policy shall release the Lessee of the duty to furnish insurance during the term of this Lease. A signed and complete certificate of insurance, containing the special endorsement prescribed in the regulations and indicating the coverage required by this paragraph, shall be submitted to the Chairman prior to entry upon the leased lands. At least thirty (30) days prior to the expiration of any such policy, a signed and

24

complete certificate of insurance, indicating the coverage required by this paragraph, showing that such insurance coverage has been renewed or extended, shall be filed with the Chairman.

18. BOND REQUIREMENTS

The Lessee and every assignee, sublessee or transferee hereof shall file with the Board, a bond in the amount of \$10,000.00 in a form approved by the Board and made payable to the State of Hawaii, conditioned upon faithful performance of all requirements of Chapter 182, Hawaii Revised Statutes, the regulations thereunder and of this Lease, and also conditioned upon full payment by the Lessee of all damages suffered by the occupiers of the leased lands for which Lessee is legally liable. If the Lessee holds more than one (1) geothermal resources mining lease from the State of Hawaii, it may file with the Board, in

lieu of separate bonds for each lease, a blanket bond in the amount of \$50,000.00.

19. REVOCATION

This Lease may be revoked by the Board if the Lessee fails to pay rentals and/or royalties when due or fails to comply with any of the other terms of this Lease, law, or regulations, or if the Lessee wholly ceases all mining operations for a period of one year without the written consent of the Board for reasons other than force majeure or the production of less than commercial quantities of geothermal resources or by-products. However, before revocation of this Lease for defaults other than the failure to pay rents and/or royalties when due, the Board shall give the Lessee written notice of the claimed default and an opportunity to be heard within thirty(30) days of such notice. The Lessee shall be allowed sixty (60) days to correct such default or, if the default is one that cannot be corrected within sixty (60) days, to commence in good faith and thereafter proceed diligently to correct such default, following written notice of a determination after hearing by the Board that such default exists. Failure to comply with the foregoing shall be deemed sufficient cause for revocation. Defaults arising because of failure to

25

pay rents and/or royalties when due must be cured within sixty (60) days of a written notice of default; otherwise this Lease may be revoked. In the alternative the Lessee may surrender this Lease as hereinafter provided.

Upon the revocation of this Lease, Lessor shall have the right to retain the improvements or require the Lessee to remove the same and restore the leased lands to a similar condition prior to any development or improvements, to the extent reasonably possible and, upon failure by the Lessee to do so, the Lessor may recover the cost thereof, in addition to imposing any penalties as provided by law or regulations.

20. SURRENDER

If Lessee has complied fully with all the terms, covenants and conditions of this Lease and the Regulations, Lessee may surrender, at any time and from time to time, this Lease in its entirety or with respect to any portion of the land described in this Lease. For the purposes hereof, if there are no deficiencies with respect to the land to be surrendered pertaining to public health, safety, conservation of resources and preservation of the environment, Lessee will be deemed to have complied fully with all of the terms, covenants and conditions of this Lease and the Regulations if Lessee shall have paid all rents and royalties due hereunder and an additional two years' rent for all of the leased lands or, in the event of a partial surrender, two years' rent prorated by reference to that portion of land described in this Lease which is to be surrendered. No deficiencies shall be deemed to exist unless, within sixty (60) days after delivery of the document of surrender, the Lessor has notified the Lessee in writing of any deficiency claimed to exist. If there are no deficiencies as aforesaid, such surrender shall be effective as of the delivery to Lessor of the document of surrender executed by Lessee describing this Lease or that portion of the leased lands which is to be surrendered. If there are claimed deficiencies with respect to the land to be surrendered pertaining to public health, safety, conservation of resources and

26

preservation of the environment at the time of delivery of the document, such surrender shall not become fully effective until such time as such deficiencies have been corrected or determined not to exist. However, provided that if Lessee corrects such deficiencies within sixty (60) days of notification thereof, or if the deficiencies cannot be corrected within sixty (60) days, commences in good faith and thereafter proceeds diligently to correct

such deficiencies, then, in such case, although the surrender shall not be fully effective upon delivery of the document of surrender, the Lessee shall be relieved of any other or further obligations and liability as to this Lease or as to that portion of the leased lands which has been submitted for surrender, whether such liabilities or duties arise out of this Lease or the Regulations, including, without limiting the generality of the foregoing, all obligations to pay rent, to commence mining operations or to be diligent in exploration or development of geothermal resources. During the notification and correction periods above described, this Lease shall not be subject to revocation by the Lessor except for a failure by the Lessee after notification to correct such deficiencies within the time period and in the manner hereinabove described or a breach of the terms of this Lease as to any of the remaining leased lands or rights retained by the Lessee; provided, however, that should Lessee contest the validity of any claimed deficiency, the Lessee's obligations to correct shall be suspended pending appeal to and determination by a court of final jurisdiction. Except as aforesaid, nothing herein contained shall constitute a waiver of any liability or duty the Lessee may have with respect to the land or Lease surrendered as a result of any activity conducted on the leased land or under this Lease prior to such surrender. Upon the surrender of this Lease as to all or any portion of the land covered thereby, or upon any other termination of this Lease except by revocation, the Lessee shall be entitled to all equipment, buildings, and plants placed in and on the leased lands and the Lessor may require the Lessee to remove the same and restore

27

the premises to a similar condition prior to any development or improvements, to the extent reasonably possible. This Lease may also be surrendered if as a result of a final determination by a court of competent jurisdiction, the Lessee is found to have acquired no rights in or to the minerals on reserved lands, nor the right to exploit the same, pursuant to this Lease, and, in such event, the Lessor shall pay over to the person entitled thereto the rentals, royalties and payment paid to the Lessor pursuant to this Lease.

21. ACCEPTANCE OF RENT AND ROYALTIES NOT A WAIVER

The acceptance of rent or royalties by the Lessor shall not be deemed a waiver of any breach by the Lessee of any term, covenant or condition of this Lease, nor of the Lessor's right to give notice of default and to institute proceedings to cancel this Lease in the manner set out in paragraph 19, and the failure of the Lessor to insist upon strict performance of any such term, covenant or condition, or to exercise any option conferred, in any one or more instances, shall not be construed as a waiver or relinquishment of any such term, covenant, condition or option.

22. EXTENSION OF TIME OF PERFORMANCE

That notwithstanding any provision contained herein to the contrary wherever applicable, the Lessor may for good cause, as determined by the Board, allow additional time beyond the time or times specified herein to the Lessee, in which to comply, observe and perform any of the terms, conditions, and covenants contained herein.

23. NO WARRANTY OF TITLE

The Lessor does not warrant title to the leased lands or the geothermal resources and geothermal by-products which may be discovered thereon; this Lease is issued only under such title as the State of Hawaii may have as of the effective date of this Lease or may thereafter acquire. If the interest owned by the State in the leased lands includes less than the entire

28

interest in the geothermal resources and geothermal by-products, for which

royalty is payable, as determined by the courts or otherwise, then the bonus, if any, rentals, royalties and other monetary considerations paid or provided for herein shall be paid to the Lessor only in the proportion which its interest bears to said whole for which royalty is payable, and the Lessor shall be liable to such persons for any prior payments made and adjudged by the courts or otherwise; provided, however, that the Lessor shall not be liable for any damages sustained by the Lessee.

This Lease is issued subject to all existing valid rights at the date hereof and such rights shall not be affected by the issuing of this Lease. In the event the leased lands have been sold by the State, subject to mineral reservation, Lessee agrees to follow such conditions and limitations prescribed by law providing for the State, and persons authorized by the State to drill for, produce and take geothermal resources, and occupy and use so much of the surface of the leased lands as may be required for all purposes reasonably connected therewith. Without limiting the effects of the foregoing, where Lessee is not the surface owner, Lessee agrees that before entering, occupying, or using any of the surface of the leased lands, for any or all purposes authorized by this Lease, Lessee will first secure the written consent or waiver of the owner of the surface of the leased lands or occupier; second, make payment of the damages to crops or other tangible improvements to the owner thereof; or third, in lieu of either of the foregoing provisions, execute a good and sufficient bond or undertaking, payable to and in an amount specified by the Lessor for the use and benefit of the surface owner or occupier of such land, to secure payment of such damages to the crops or tangible improvements of the surface owner or occupier of said land as may be determined and fixed in an action brought upon the bond or undertaking in a court of competent jurisdiction against the principal and sureties

29

thereon, such bond or undertaking to be in the form and in accordance with the rules and regulations. In the event that the State owns only the mineral resources, this Lease is issued subject to any and all right, title and interest of the purchaser, title holder or owner of the surface of the leased lands, and any successor in interest to any such purchaser, title holder or owner of the leased lands, any other provision in this Lease to the contrary notwithstanding.

24. COMMINGLED PRODUCTION - PLANS - APPROVALS - ACCURACY

Subject to testing the absolute open flow potential of wells, whether on the leased lands or other lands, as set forth in paragraph 5D hereof, geothermal resources from any two or more wells, regardless of whether such wells are located on the leased lands, may be commingled when the metering system used to measure geothermal resources has been approved by the Lessor. Prior to the installation of the metering system, Lessee shall submit for approval a schematic drawing of the proposed system and specifications of the major equipment components. The Lessor will determine if acceptable standards of accuracy for measuring geothermal resources have been obtained, and may approve commingling of geothermal resources. The metering equipment shall be maintained and operated in such a manner as will meet acceptable standards of accuracy. Use of the equipment shall be discontinued at any time upon determination by the State that standards of measurement accuracy or quality are not being maintained, with such commingling stopped until measurement accuracy has been obtained. In the event that the quality and composition of the geothermal resources to be commingled are substantially different, it shall not be approved by the Lessor until acceptable standards and methods of payments are established. If less than the total flow is to be utilized in a plant or facility, then the reduction in flow for each well shall be in the proportion which the total open flow of each contributing well bears to the total open flows of all contributing wells.

30

25. SUSPENSION OF OPERATIONS

In the event of any disaster or pollution, or likelihood of either, having or capable of having a detrimental effect on public health, safety, welfare, or the environment caused in any manner or resulting from operations under this Lease, the Lessee shall suspend any testing, drilling and production operations, except those which are corrective, or mitigative, and immediately and promptly notify the Chairman. Such drilling and production operations shall not be resumed until adequate corrective measures have been taken and authorization for resumption of operations has been made by the Chairman.

26. DILIGENT OPERATIONS REQUIRED

The Lessee shall be diligent in the exploration and development of the geothermal resources on the leased lands. Failure to perform diligent operations may subject this Lease to revocation by the Board. Diligent operations mean exploratory or development operations on the leased lands including without limitation geothermal surveys, heat flow measurements, core drilling, or the drilling of a well for discovery, evaluation, or production of geothermal resources.

The provisions hereof shall be construed and applied with reference and in relation to geological and engineering determinations and economic and market conditions with respect to geothermal resources in the area or field in which the leased lands is situated. In the event Lessor believes, based on reasonable cause, that Lessee has failed to perform diligently, Lessee may request a hearing and determination, in accordance with paragraph 19 hereof, of the particulars in which Lessee has failed to conduct diligent operations, and if after such hearing Lessee is found not to be diligent in its operations, then if Lessee does not, within ninety (90) days thereafter, commence and in good faith continue remedying such finding of lack of diligence, Lessor may revoke this Lease as herein provided.

31

27. PRODUCTION OF BY-PRODUCTS

Lessee shall have no obligation to save or process any geothermal by-products unless such saving or processing, independent of revenues or value received from the production of other geothermal resources, including other geothermal by-products, is economically feasible.

28. RECORDS AND REPORTS

(a) Accounting Data. No later than the twenty-fifth (25th) day of every calendar month following the effective date of this Lease, Lessee shall submit a detailed accounting statement for lease operations specifying all charges paid and credits received under this Lease, including but not limited to information showing the amount of gross revenue derived from all geothermal resources produced, shipped, used or sold and the amount of royalty due. The Lessee shall, at the option of the Lessor, provide more detailed statements and explanatory materials to aid the Lessor in interpreting and evaluating Lessee's accounting statement. All such statements are subject to audit and revision by the Lessor and Lessee agrees that the Lessor may inspect all Lessee's books, records and accounts relating to operations under this Lease, including but not limited to the development, production, sale, use or shipment of geothermal resources at all reasonable times. Any statutory or other rights that Lessee may have to object to such inspection by the Lessor are hereby waived.

(b) Exploration Data. Lessee agrees to supply to the Lessor within thirty (30) days of the completion thereof, or the completion of any recorded portion thereof, all physical and factual exploration results, logs, surveys and any other data in any form resulting from operations under this Lease or from any surveys, tests, or experiments conducted on the leased lands by Lessee or

any person or entity acting with the consent of Lessee or with information or data provided by Lessee. Lessee agrees to supply to the Lessor within thirty (30) days of the completion thereof, or the completion of any recorded portion thereof, the results of all

32

geological, geophysical or chemical tests, experiments, reports and studies, including but not limited to reservoir studies and tests, experiments, reports or studies relating to reinjection or reservoir depletion irrespective of whether the result of such tests, experiments, reports or studies contain sensitive or proprietary or confidential information or trade secrets. Lessee further agrees that any statutory or other rights or objections it may have to prevent disclosure of any such tests, experiments, reports or studies referred to in this paragraph by the Lessor are hereby waived. Notwithstanding any provisions hereof, however, all data and documents supplied by Lessee pursuant to this section shall be deemed to have been "obtained in confidence" and may be disclosed to other persons only with the written consent of Lessee or upon a determination by the Lessor that such disclosure is in the public interest or as otherwise provided by law or regulation.

(c) Waiver by Lessee. Lessee hereby waives any and all rights and objections it may have to prevent an examination of the books and records at reasonable times of any individual, association, or corporation which has transported for, or received from Lessee, any geothermal resources produced from the leased lands. Further, Lessee waives any and all rights and objections it may have to prevent an examination and inspection of the books and records, at reasonable times, of any such individual, association or corporation with respect to such individual's, association's, or corporation's, or to Lessee's operations, wells, improvements, machinery and fixtures used on or in connection with the leased lands.

Lessee does hereby waive any statutory or other right or objection to prevent disclosure to the Lessor or a duly authorized employee or representative of the Lessor of any information, reports, data, or studies of any kind, filed by Lessee with any public agency, federal, state or local, relating to the leased lands, the geothermal resources thereunder, or any operations

33

carried out in connection with this Lease irrespective of whether such information, reports, data, or studies of any kind contain sensitive or proprietary or confidential information or trade secrets. Any and all such information, reports, data, or studies of any kind filed by Lessee with any public agency, federal, state or local, including all information filed with the Lessor pursuant to any paragraph of this Lease, shall be available at all times for the use of the Lessor or its duly authorized representatives for any purpose. Notwithstanding any provisions hereof, however, any information, reports, data or studies obtained by the Lessor from any public agency and which are not public records shall be deemed to have been "obtained in confidence" and may be disclosed to other persons only with the written consent of Lessee or upon a determination by the Lessor that such disclosure is in the public interest.

29. FORCE MAJEURE

If the Lessee is rendered unable to wholly or in part by force majeure to carry out its obligations under this Lease, Lessee shall give to Lessor prompt written notice of the force majeure. Thereupon, any obligations of the Lessee to perform so far as they are affected by the force majeure shall be suspended during the continuance of the force majeure and the primary term or any continuation period shall be extended for a period equal to the period of suspended performance caused by the force majeure. Lessee shall use all possible

diligence to remove or correct the force majeure, but this shall not require the settlement of strikes, lockouts or other labor difficulties. In no event shall any extension affect the sixty-five (65) year maximum term of this Lease.

30. UNIT OR COOPERATIVE PLANS

The Lessee may, with the written consent of the Board, utilize the leased lands or portions thereof under a unit, cooperative or other plan of development or operation with other

34

State, Federal or privately owned lands for the drilling and production of one or more wells in accordance with Rule No. 3.15 of the Regulations.

31. NOTICES

Pursuant to Rule 8.2 of the Regulations, Lessor may give any notice or deliver any document hereunder to Lessee by mailing the same by registered mail addressed to Lessee at P.O. Box 374, Hilo, Hawaii 96720 or by delivering the same in person to any officer of Lessee. Lessee may give any notice or deliver any document hereunder to Lessor by mailing the same by registered mail addressed to Lessor at P.O. Box 621, Honolulu, Hawaii 96709 or by delivering the same to Lessor in person. For the purposes of this paragraph, either party may change its address by written notice to the other. In case of any notice or document delivered by registered mail, the same shall be deemed delivered when deposited in any United States Post Office, property addressed as herein provided, with postage fully prepaid.

32. RESTORATION OF PREMISES

Upon the revocation, surrender or expiration of this Lease, the Lessor or surface owner may require the Lessee to restore the leased lands to their original condition insofar as it is reasonable to do so within ninety (90) days thereof, except for such roads, excavations, alterations or other improvements which may be designated for retention by the surface owner, the Lessor or its agency having jurisdiction over said lands. When determined by the Lessor, surface owner or such State agency, cleared sites and roadways shall be replanted with grass, shrubs, or trees by the Lessee.

33. HEADINGS

The paragraph headings throughout this Lease are for the convenience of the Lessor and the Lessee and are not intended to construe the intent or meaning of any of the provisions thereof.

35

34. REFERENCE

Unless specifically indicated otherwise, the regulations referred to in and governing this Lease shall be Regulation No. 8 relating to Regulations on Leasing of Geothermal Resources and Drilling for Geothermal Resources in Hawaii approved and adopted by the Board on March 10, 1978, and all terms used herein shall be given the meaning as set out in Rule 1.5 of said Regulation 8.

35. INSOLVENCY

In the event the Lessee at any time during the term hereof is insolvent under any of the provisions of the Federal Bankruptcy Act, or makes a voluntary assignment of his assets for the benefit of creditors, or is adjudged a bankrupt, either upon Lessee's voluntary petition in bankruptcy, or upon the involuntary petition of Lessee's creditors, or any of them, or should an attachment be levied and permitted to remain for any unreasonable length of time

upon or against the interest, rights or privileges of Lessee in or to any geothermal resources produced from the wells drilled by Lessee upon the leased lands, then, upon election by the Lessor, all of the interests, rights, and privileges of Lessee in and to all geothermal resources produced and saved from the leased lands by reason of Lessee's operations thereon, shall terminate upon receipt of written notice from the Lessor advising that the State has so elected. In such event the Lessor shall have, and Lessee, by the acceptance hereof, hereby gives the Lessor the right, option and privilege to cancel and terminate this Lease and all of the terms and provisions granted hereby, and all of the rights and privileges of Lessee in and to or upon the leased lands and in and to any geothermal resources produced and saved from the leased lands by reason of Lessee's operations thereon, and all of Lessee's rights and privileges granted by this Lease shall terminate immediately upon receipt of written notice from the Lessor that the Lessor has so exercised its option.

36

36. SUBSIDENCE. Any subsidence to the leased or adjacent lands shall be considered pursuant to 7.7 of Regulation 8.

37. WORKMEN'S COMPENSATION INSURANCE

Lessee shall at all times in any and all operations under this Lease and in any and all work in and upon the leased lands carry full and complete Workmen's Compensation Insurance covering all employees.

38. SUCCESSORS

The term "Lessor" herein shall mean and include Lessor, its legal successors and assigns, and the term "Lessee" herein or any pronoun used in place thereof shall mean and include the masculine or feminine, the singular or plural number, and jointly and severally individuals, firms or corporations, and their and each of their respective heirs, successors, personal representatives and permitted assigns, according to the context hereof.

39. SEVERABILITY

If any provision herein is judicially determined, to be invalid, it shall be considered deleted herefrom and shall not invalidate the remaining provisions.

40. GEOTHERMAL OWNERSHIP

If the Lessee hereunder is the surface landowner it is mutually agreed that issuance of this Lease by the Lessor and acceptance thereof by the Lessee shall not be deemed or construed to be a waiver of, and shall be without prejudice to, any claim of ownership to the geothermal resources by the Lessee and Lessor incidental thereto.

41. LEASE TERMS VS. REGULATION 8

Unless indicated otherwise herein, Regulation 8 shall supersede any of the lease provisions herein which conflicts with said Regulation.

37

AND KAPOHO LAND AND DEVELOPMENT CO., LTD., a Hawaii corporation, and fee simple owner of the land described in Exhibit "A" attached hereto does hereby consent to the issuance of the foregoing Lease to the Lessee, pursuant to an assignment of its occupier's rights to the Lessee.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be executed the 20th day of February, 1981.

Exhibit 10.4.4

SBS-10
Original

GEOTHERMAL LEASE

THIS LEASE AND AGREEMENT entered into this 20th day of OCTOBER, 1975 by and between RUTH WALKER COX, A Married Woman, and BETTYE M. SMITH, A Widow, (hereinafter called "Lessor" whether one or more) and GULF OIL CORPORATION, a Pennsylvania corporation (hereinafter called "Lessee");

W I T N E S S E T H :

Lessor, in consideration of the sum of Ten Dollars (\$10.00) cash in hand paid, the receipt and sufficiency of which is hereby acknowledged, and of the covenants and agreements hereinafter contained on the part of the Lessee to be paid, kept and performed, does hereby grant, demise, lease and let unto the Lessee the following described land together with any reversionary right therein (hereinafter called the "Leased Land") situated in the County of WASHOE, State of NEVADA, and containing approximately 142.71 acres:

For a description of the demised premises, see Exhibit A.

For the purpose of and together with the sole and exclusive right and privilege of exploring, drilling for, producing, extracting, removing, utilizing, selling and disposing of Geothermal Resources and of extracting minerals therefrom (hereinafter called "Extractable Minerals") and artificially injecting fluids and gases into the Leased Land; and constructing, erecting, using, operating and maintaining upon the Leased Land any and all Facilities as the Lessee may deem necessary in order to produce, save, utilize and process Geothermal Resources and Extractable Minerals and in order to generate electricity from Geothermal Resources; together with ingress and egress upon the Leased Land in order to exercise any of the rights granted herein. For the purpose of this Lease "facilities" shall include but not be limited to, wells, pumps, pipes, pipelines, buildings, plants, sumps, tanks, brine pits, reservoirs, watertanks, pumping stations, roads, electric power generation plants, transmission lines, electric, telegraph and telephone lines.

For the purpose of this Lease: (a) The term "Geothermal Resources" shall mean all products of geothermal processes, embracing indigenous steam, hot water and hot brines; steam and other gases, hot water and hot brines resulting from water, gas, or other fluids artificially introduced into geothermal formations; and heat or other associated energy found in geothermal formations. (b) The term "Extractable Minerals" shall mean any mineral or minerals (exclusive of oil and hydrocarbon gases) which are produced in solution with Geothermal Resources from

any well drilled by Lessee on the Leased Land. Seven (Please Initial) (7) RWC

This Lease shall be for a term of xxxxxx30 years from the date hereof (herein called "Primary Term") and so long thereafter as Geothermal Resources or Extractable Minerals are

being produced in commercial quantities or drilling operations are conducted either on the Leased Land or on land pooled therewith; all subject to the following terms and conditions:

1. Lessee shall pay to the Lessor on or before the last day of the calendar month after the month of commencement of production in commercial quantities of Geothermal Resources or Extractable Minerals or both and thereafter on a monthly basis: (a) A royalty of ***% of the value of the *** produced from the Leased Land or allocated thereto; and (b) A royalty of ***% of the value of the *** produced from the Leased Land or allocated thereto.

It is agreed that "value" shall be deemed to be the gross proceeds from the sale of the Geothermal Resources or Extractable Minerals, or, if not sold, their fair market value at the well head if they are used by the Lessee for commercial purposes other than in the producing or processing of other Geothermal Resources or Extractable Minerals. If the Lessee elects to process any Extractable Minerals prior to sale, then the Lessor's royalty shall bear its proportionate share of the cost of such processing.

2. Lessee has paid to Lessor the rental in full for a period of one (1) year from the date hereof. Commencing with the second year of the term hereof and on each anniversary date thereafter during the Primary Term, if during the preceding year Lessee has not conducted drilling operations on or if there was no production from the Leased Land or land pooled therewith then, subject to the provisions of paragraph 4 hereof, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of See Exhibit "B" (Par. 16) Dollars (\$RWC). For the purposes of calculating any payments hereunder based on acreage, Lessee may act as if the Leased Land contains the number of acres set forth above unless the Lessor or Lessee shall obtain a final adjudication that the acreage is different at which time Lessee shall, as of the next due date, adjust his payments accordingly but without retroactive obligation. Lessee shall make any payments hereunder by mailing or delivering a check or draft to Lessor at 105 E. Edgewater Avenue, Balboa, Ca. 92661.

3. If Geothermal Resources or Extractable Minerals are found in commercial quantities in any well or wells drilled on the Leased Land or land pooled therewith, Lessee may, at any time and from time to time, either before or after production, suspend or shut-in the operations of such well or wells and production therefrom. If operations are not being conducted hereunder or if there is no paying production attributable to this Lease, then commencing with the first day of the calendar month following the expiration of thirty (30) days from the date of such suspension or shut-in and on each Lease anniversary date thereafter, Lessee shall pay Lessor annually an amount equal to the rental provided for in paragraph 2 above, based upon the number of acres then covered by this Lease in absence of pooling or unitization, as shut-in royalty until such time as the operation of one such well is resumed or operations or paying production attributable to this Lease take place, whichever shall first occur. The maximum payment for such shut-in royalty in any Lease year shall in no event be greater than the amount computed for rental in paragraph 2 above regardless of the number of wells shut-in or suspended in any Lease year. Such shut-in royalty shall be deemed to be an advance royalty to be repaid to Lessee from royalties thereafter payable to Lessor hereunder. Any shut-in well for which the foregoing payment is being paid shall be considered under all the provisions of this Lease as a producing well.

*** Confidential material redacted and filed separately with the Commission.

4. Lessee may at any time release or surrender this Lease in whole or in part or as to any zone, strata or depth, by placing of record a release or quitclaim deed in the county office where this Lease is recorded, and thereupon Lessee shall be released of all further obligations and duties as to the portion of the Leased Land so surrendered or released; and thereafter all payments to Lessor provided for herein, except royalties on actual production, shall be reduced in the same proportion that the acreage covered hereby is reduced. All land so surrendered or released shall remain subject to rights-of-way and easements for facilities necessary or convenient for Lessee's operations on the Leased Land retained or on land pooled therewith.

5. No well shall be drilled nearer than 300 feet to any house, barn or structure now existing on the Leased Land, without the prior written consent of Lessor. Lessee shall pay for damages caused by its operation to growing crops and presently existing buildings and roads on the Leased Land. Lessee shall have the right at any time to remove all facilities placed on the Leased Land including the right to draw and remove casing. In addition to the right to produce Geothermal Resources and Extractable Minerals, Lessee shall have the right to use such water or water rights in, on, produced from or appurtenant to or crossing the Leased Land as Lessee may reasonably require in connection with its operations, provided that such use by Lessee of any water or water rights, as aforesaid, existing as of the date hereof, shall not interfere with Lessor's requirements for Lessor's own use thereof for domestic or agricultural purposes on the Leased Land and shall not be in violation of any applicable governmental law or regulation. Any brine, fluid or surplus water resulting from Lessee's activities or operations may be disposed of by reinjection or may be utilized or dealt with by Lessee in such lawful manner as Lessee shall deem appropriate.

6. Lessee shall pay all taxes levied against its improvements on the Leased Land. All Taxes assessed against the Geothermal Resources and Extractable Minerals covered by this Lease, and all taxes, assessments or charges of whatever kind now or hereafter assessed, levied or collected by reason of the production, sale or removal of Geothermal Resources or Extractable Minerals from the Leased Land shall be borne by the parties hereto in the proportion of the royalty share by Lessor and the remainder by Lessee. Lessor shall pay, before delinquency, all other taxes and assessments on the Leased Land and improvements thereon.

7. Lessee may, at any time and from time to time during the Primary Term hereof, pool and combine the Leased Land, or any portion thereof, into an operating unit with other lands in the vicinity, another lease or other leases, or any portion thereof, when, in the Lessee's judgment, it is necessary or advisable to do so in order to properly explore or develop or operate the Leased Land or to prevent waste or to avoid drilling unnecessary wells or to comply with applicable governmental laws, regulations or orders, provided that the total acreage in such pooled unit shall not exceed 2,560 acres. Such pooling shall be effected by Lessee executing and filing in the office where this Lease is recorded an instrument describing and identifying the pooled acreage. The production of Geothermal Resources or Extractable Minerals so pooled, and the development of and operation on any portion of the pooled unit shall be considered and construed and shall have the same effect, except for the payment of royalties, as production, development and operation on the Leased Land under the terms of this Lease. The royalties herein provided shall accrue and be paid to Lessor on pooled substances produced from any unit in the proportion that Lessor's interest in the land covered hereby and placed in the unit bears to the total acreage placed in each unit.

8. Lessee shall have the right at any time to commingle for the purpose of utilizing, storing, selling or processing Geothermal Resources or Extractable Minerals produced from the Leased Land or land pooled therewith with like

substances produced from other lands or units.

9. Upon the violation of any of the terms or conditions of this Lease, by Lessee and the failure to begin to remedy the same with due diligence within ninety (90) days after written notice from Lessor so to do, then, at the option of Lessor, this Lease shall forthwith cease and terminate, and all rights of Lessee in and to the Leased Land shall be at an end, saving and excepting the drill site for each producing well in respect of which Lessee is not in default, and saving and excepting rights-of-way necessary for Lessee's operations. The drill site referred to shall consist of a tract, designated by Lessee, of forty (40) acres, if there be so much, surrounding each producing well.

10. The obligations of Lessee hereunder shall be suspended while Lessee is prevented from complying therewith, in whole or in part, by strike, lockout, action of the elements, accidents, rules and regulations of the federal, state, municipal, or other governmental agencies, inability to obtain materials or supplies in the open market, or other matters or conditions beyond the control of Lessee, whether similar to matters or conditions herein specifically enumerated or not.

11. If Lessor owns less than the entire and undivided fee simple interest in the Leased Land or the Geothermal Resources and Extractable Minerals, then royalties and rentals shall be paid to Lessor only in the proportion that his interest bears to the whole and undivided fee. If Lessor hereafter acquires any additional interest in the Leased Land, then this Lease shall cover such after-acquired interest, provided that Lessor's share of rentals shall be increased to cover the interest so acquired at the next succeeding rental paying date after Lessee has been notified of such after-acquired interest or of any reversion having occurred. Any interest in the production from the Leased Land to which the interest of Lessor may be subject shall be deducted from the royalties provided for herein.

12. Lessor hereby warrants and agrees to defend the title to the Leased Land and agrees that Lessee may at its option pay and discharge any mortgage, taxes, assessments, or liens or encumbrances existing, levied or assessed upon the Leased Land and be subrogated to the rights of the holder thereof, and Lessee shall have the right to apply to Lessee's repayment any rentals or royalties accruing to the Lessor hereunder.

13. Any notice from Lessor to Lessee shall be given by sending the same by registered or certified mail, addressed to Lessee at Gulf Building, 1730 So. Bellaire St., Denver, Colo. 80222, Attn: Geothermal Operations and any notice from Lessee to Lessor shall be given by sending the same by registered or certified mail, addressed to Lessor at 105 E. Edgewater, Balboa, Cal. 92661. The address of either party may be changed by written notice as provided for above.

14. If the estate of either party hereto is assigned, and the privilege of assigning in whole or in part or as to any zone, strata or to any depth is expressly allowed, the covenants hereof shall extend to such assignee, his heirs, devisees, executors, administrators, successors, and assigns, but no change in the ownership of the Leased Land or assignment of rentals or

royalties shall be binding on the Lessee until thirty (30) days after Lessee has been furnished with a written transfer or assignment or certified copy thereof. Rentals hereunder shall not be apportioned upon an assignment as to a particular zone, strata or depth, but shall continue as a single obligation to be paid by either party. In the event of any partial assignment, production in commercial quantities on any portion of the Leased Land shall continue the Lease in force as a whole to the same extent as if no assignment had been made. Any assignment shall, as to the extent of the assignment, relieve and discharge Lessee of all obligations hereunder and, should the assignee default in any of the obligations of this Lease, such default shall not operate to invalidate or affect this Lease insofar as it covers any part of the Leased Land or interest therein not

included in the assignment.

15. This Lease shall be binding upon the parties hereto, their heirs, devisees, executors, administrators, successors and assigns, and may be executed in any number of counterparts with the same force and effect as if all parties had executed the same instrument. The failure of any person owning an interest in the Leased Land to execute a geothermal lease covering all or a portion of the Leased Land or the failure of any person named as a Lessor herein to execute a counterpart hereof, shall not affect the binding force of this Lease as to those who have executed or shall execute a counterpart hereof.

IN WITNESS WHEREOF, this Lease and Agreement is executed as of the date first above written.

5

CONFIDENTIAL TREATMENT REQUESTED. CONFIDENTIAL PORTIONS OF THIS DOCUMENT HAVE BEEN REDACTED AND HAVE BEEN SEPARATELY FILED WITH THE COMMISSION.

Exhibit 10.4.5

THIS LEASE, made in duplicate this 1st day of August, 1976, by and between SOUTHERN PACIFIC LAND COMPANY, a California corporation, hereinafter called "Lessor" and PHILLIPS PETROLEUM COMPANY, a Delaware corporation, hereinafter called "Lessee".

W I T N E S S E T H:

1. Lessor hereby grants, leases and lets, subject to the provisions hereof, the exclusive right to explore, prospect, drill for, produce, treat, extract, take, process, remove and utilize all products of geothermal processes, including, but not limited to, hot brine, hot water, hot rock, and indigenous steam; steam and other gases; hot water and hot brines resulting from water, gas or other fluids (whether liquid or gaseous) artificially introduced into geothermal formations hereinafter referred to as "geothermal energy"; and any mineral or minerals (exclusive of oil, petroleum and hydrocarbon gas) which are found in solution or in association with or entrained in such steam, hot water or hot brines, hereinafter referred to as "substances", and storing, taking, removing, transporting, and disposing of same, an undivided 50 percent interest in that certain land situated, lying and being in the County of Churchill, State of Nevada, hereinafter referred to as "Leased Premises", more particularly described on Exhibit "A" attached hereto and made a part hereof.

TOGETHER with the right to inject and reinject geothermal effluents from operations hereunder in the leased premises and use so much of the leased premises as may be required by Lessee for the drilling and operation of wells thereon for the purposes hereof, and to construct and maintain thereon buildings, structures and equipment, including, but not limited to generation and transmission of electric power, mineral processing, waste water disposal, pipe lines, transmission lines, power lines, ponds and roads, in connection with operations hereunder;

provided however, that Lessee agrees to use for such purpose only so much of the leased premises as shall be reasonably necessary for Lessee's operations thereon.

Subject to easements, leases, licenses and restrictions affecting the leased premises. Reserving unto Lessor, its successors and assigns, the following:

(a) The right to construct, maintain and use tracks, roads, trails, ditches, pipe lines, communication devices, and facilities relating thereto in, upon, over and across the leased premises, and

(b) The right to use the leased premises for all other purposes not inconsistent with or which shall not interfere with the right of the Lessee hereunder to use the leased premises.

(c) The exclusive right to all minerals other than those leased hereunder, including, but not limited to, oil, petroleum, natural hydrocarbon gas, and other hydrocarbons.

2. This lease shall be for a primary term of ten years from and after the date first herein written and for so long thereafter, as there:

(a) shall be commercial production of said geothermal energy and substances from the leased premises and/or

(b) drilling, re-drilling, deepening or remedial operations are being prosecuted on a continuous basis on the leased premises.

3. Lessee agrees to pay to Lessor in advance as of the date of this lease the sum of \$*** per acre of the leased premises as rental for the first year of this lease and to pay to Lessor in advance for the second year of the lease on or before the 1st day of August 1977, and annually thereafter during the remaining period this lease is in effect, on or before the same day and month of each succeeding year, an annual advance minimum royalty at the rate of \$*** per acre for each acre then covered by this lease.

*** Confidential material redacted and filed separately with the Commission.

2

In the event Lessee uses the surface of a portion or portions of the leased premises for the construction and operation of facilities for mineral processing, electric or power generation or waste water disposal, ponds or plants, exclusive of the portions of the leased premises used for the drilling and operation of wells and construction and maintenance of pipe lines, transmission lines, roads and ditches, Lessee agrees to pay to Lessor, in addition to the above minimum royalty, an annual advance surface rental during the period of such use equivalent to 9 1/2 % of the current value used in the assessment by the County in which lands are located as to the portions of the leased premises so used, which is in effect for each year the use is made.

4. Lessee shall commence drilling a well for said geothermal energy and substances on the leased premises within the primary term, and shall continue the work of drilling said well with due diligence until completion, and thereafter shall commence and drill such other wells as may be required to assure Lessee of a supply of said geothermal energy and substances or any of them in such amounts as its requirements from the leased premises may demand, provided that the spacing of wells drilled upon the leased premises shall not be less than the spacing of wells drilled upon adjoining land, and provided further that this lease shall terminate at the end of the tenth year from the date hereof as to the acreage hereunder then in excess of the result of multiplying the number of wells then capable of producing said geothermal energy and

substances in paying quantities times six hundred and forty acres, and that the locations of the portions of the leased premises which shall remain subject to this lease shall be selected by Lessee.

Lessee shall keep each well drilled on the leased premises producing at the rate deemed by Lessee to be most conducive to efficient operation of the well and to maximum production of said geothermal energy and substances covered hereby; provided, however, that if Lessee's well

3

or wells on land adjoining the leased premises are not produced to capacity, then Lessee may produce from the wells on the leased premises at the same ratio that the actual production bears to potential production of Lessee's well or wells being produced on adjoining land.

In the event Lessee fails to commence drilling a well within the primary term of this lease or the leased premises or land pooled therewith as provided herein, this lease shall terminate except as otherwise provided.

5. A well shall be deemed completed:

(a) when formations or mechanical difficulties are encountered which, in Lessee's judgment, render further drilling of such well unprofitable or unsuccessful and because of such fact further drilling operations thereon are discontinued;

(b) when a well has been drilled to a depth of at least five thousand feet and the drilling operation is discontinued, or

(c) Lessee has ceased drilling a well and it is tested and deemed capable of producing said geothermal energy and substances or any of them in quantities deemed by Lessee sufficient to warrant the continuance of its operation.

6. Lessee agrees to pay to Lessor as royalty:

(a) *** received by Lessee from the *** at the point of sale.

(b) on all other leased substances produced therefrom, *** during the first ten years of the commercial production of said substance and *** thereafter received by Lessee. ***, for the purpose of this lease, shall be ***

*** Confidential material redacted and filed separately with the Commission.

4

Lessor shall have the right to receive its royalty in kind.

7. Lessor does hereby lease to Lessee the exclusive right to use said leased premises for the slant drilling of wells having their surface locations upon either the leased premises or adjoining land and having their well bores passing through the subsurface of the leased premises, for the production of said geothermal energy and substances, and having their production intervals beneath land other than the leased premises or land included in any unit created under provisions of Section 11 hereof, such wells being hereinafter referred to as "slant wells", together with the exclusive right to drill core holes through the subsurface of the leased premises to other land to obtain geological information.

Unless sooner terminated, either in whole or in part as hereinafter provided, the primary term of this lease of rights for slant wells shall be contemporaneous with the primary term of this lease, and for as long thereafter as said geothermal energy and substances are produced in paying quantities from

land other than the leased premises by slant wells, or Lessee in good faith conducts slant drilling operations in the leased premises.

As payment for the slant well rights, hereby leased, Lessee agrees to pay to Lessor, at the times and in the manner hereinafter provided, an overriding royalty on the production from each slant well, drilled by Lessee as follows:

(a) *** percent of the *** received by Lessee from the ***, at the point of sale.

(b) *** percent of the *** received by Lessee on all other leased substances produced therefrom. ***, for the purpose of this lease, shall be ***.

*** Confidential material redacted and filed separately with the Commission.

5

The advance minimum royalty paid by Lessee to Lessor, under the provisions of Section 3 hereof, shall not be credited against any overriding royalties from production from slant wells drilled under the provisions hereof.

Lessor agrees to pay a pro rata share, which shall be in the proportion that its overriding royalty bears to the total production from slant wells drilled under this section, of the amount of any license, severance, or production tax levied by any governmental agency on, or measured by, the substances produced. Lessor agrees to pay the same pro rata share of the mineral rights taxes upon the land beneath which slant wells have their producing intervals. Lessee agrees to pay, or cause to be paid, the remainder of any and all such taxes.

The obligation of Lessee hereunder with respect to the drilling and operating of all slant wells, and its right to suspend or delay operations therein, shall be those provided in such leases in which Lessee has or may acquire an interest embracing the land beneath which slant wells drilled hereunder have their producing intervals.

Lessee shall keep true and correct records of its operations conducted in, and of the production from, slant wells. Lessee shall, when requested to do so by Lessor, furnish to Lessor a copy of the drilling log and electric log, and of the directional survey of the bore of, each slant well drilled by Lessee hereunder. Lessee shall furnish Lessor, with each overriding royalty payment, a statement of the production from each slant well showing in detail the computation of Lessor's overriding royalty. Lessee's records shall be open for inspection by Lessor at all reasonable times.

8. Lessee shall have the right to commingle, for the purpose of utilizing, selling or processing minerals, geothermal energy and substances produced from the leased land, with geothermal energy and substances produced from other land and to meter or gauge the

6

production of said geothermal energy and substances from the leased premises, and to compute and pay royalty to Lessor on the basis of such production as so determined. Lessee agrees to pay to Lessor on or before the last day of each and every month the royalties accrued and payable hereunder for the preceding calendar month, and in making such royalty payments Lessee shall deliver to Lessor statements setting forth the basis for determination of such royalty. In the event that the production of said geothermal energy and substances from the leased premises or from land in the general area of the leased premises should at any time exceed the demand therefor or the facilities for use thereof, and Lessee elects to reduce the total volume of said geothermal energy and substances produced or consumed, then in that event, wells participating on a

commingling basis shall be reduced in a percentage amount equal to the proportion of the whole in light of good engineering practices.

In the event all or any part of the leased premises is pooled (as provided for in Section 11), with other land, then Lessor shall receive as royalty on production from the pooled acreage only such portion of the royalty as the amount of Lessor's acreage placed in the unit, bears to the total acreage so pooled in the unit involved.

Lessee shall not be required to account to Lessor for, or to pay royalty on said geothermal energy and substances produced by Lessee on the leased premises which are not utilized, saved or sold, or on power generated by Lessee and used by Lessee in Lessee's operations on or with respect to the leased premises for or in connection with the development, processing and production of said geothermal energy and substances.

The annual advance minimum royalty provided in Section 3 payable by Lessee to Lessor shall be credited against the obligation of Lessee to pay the royalties which accrue only during the annual period for which paid, but the annual surface rental provided for in Section 3 shall not

7

be so credited. The surface rental and royalties hereinabove provided for shall be a lien upon any and all of said geothermal energy and substances removed from or stored upon the leased premises and upon any improvements or personal property of Lessee upon the leased premises.

9. In the event Lessor at the time of making this lease owns a less interest in the leased premises than one hundred per cent of the rights herein leased to Lessee, then the rentals and royalties accruing hereunder shall be paid to Lessor only in the same proportions which Lessor's interest bears to a one hundred per cent interest in the leased premises. Notwithstanding the foregoing, should Lessor hereafter acquire any additional right, title or interest in or to the leased premises, it shall be subject to the provisions hereof to the same extent as if owned by Lessor at the date hereof, and any increase in payments of money hereunder necessitated thereby shall commence with the payment next following receipt by Lessee of satisfactory evidence of Lessor's acquisition of such additional interest.

10. In the event Lessee shall, except by Lessor, be lawfully deprived of possessing, or rights hereunder to, the leased premises, or any portion or portions thereof, Lessee shall notify Lessor as to the circumstances thereto; whereupon Lessor may, at Lessor's option, either reinstall Lessee in possession as to said rights or terminate this lease as to the leased premises, or the portion or portions thereof, as to which Lessee is so deprived, by notice to Lessee to that effect and the tender of the sum of One Hundred Dollars, plus the total amount of any sums other than taxes, theretofore paid by the Lessee hereunder, for said rights; whereupon no claims for damages whatsoever kind or character incurred by Lessee by reason of such de-possession shall be chargeable against Lessor.

11. Lessee is hereby given the right to combine or pool all or part of said leased premises with land either adjoining the leased premises or in the immediate vicinity thereof, so as to create

8

by such combining or pooling one or more operating units of contiguous acreage for the production of said substances; provided, however, that no such unit shall substantially exceed 2,560 acres, or the land embraced in four sections of land according to United States survey and that the designation of such unit shall be made of the land to be pooled not later than thirty days after the first well drilled on the unit is placed upon production, and shall define the

area which shall constitute the pool. In the event production of said geothermal energy and substances is obtained from any land included within any such unit, whether or not from land covered by this lease, there shall be allocated to the leased premises included in such unit, for the purpose of royalty determination, only that proportion of the entire production from such unit that the acres of the leased premises in such unit bears to the total acres in such unit, and royalty payable under this lease with respect to leased premises included in such unit shall be computed only on that portion of such production so allocated to the leased premises. In the event of the failure of Lessor's or any other owner's title as to any portion of the land included in such pooled unit, such portion of such land shall be excluded in allocating production from such pooled unit; provided, however, Lessee shall not be held to account for any production allocated to any land excluded from any such pooled unit unless and until Lessee has actual knowledge of the circumstances requiring such exclusion. For the purpose of determining drilling obligations in such unit, the entire acreage so pooled shall be treated as if it were covered by one lease and the drilling of a well in any part of such unit, whether or not on land covered by this lease, shall fulfill Lessee's drilling obligations under this lease to the same extent as if it were drilled on the leased premises and no offset obligations shall accrue as between the several tracts of land included within any pooled unit. As to such unit (unless a producing well is located on such pooled unit at the time the unit is created), Lessee agrees to commence drilling operations within one year after it is so

created, but in any event within the primary term of this lease, and shall be obligated to drill at least one well for each six hundred and forty acres in the unit.

12. Lessee shall have the right to use such water in, on, from or appurtenant to the leased premises as Lessee may reasonably require in connection with Lessee's operations hereunder on the leased premises, without payment therefor to Lessor other than such cost as Lessor may have incurred therefor; provided that such use by Lessee shall not interfere with Lessor's requirements with respect to the use thereof on the land subject to this lease or Lessor's contractual commitments for the use thereof on land other than the leased premises, and that Lessee shall obtain any necessary governmental permission therefor and shall comply with applicable statutes, ordinances and governmental orders and regulations with respect thereto. Applications to governmental agencies for permission to appropriate water and geothermal energy within and underlying the leased premises shall be made on behalf of Lessor and shall be made for beneficial use appurtenant to Lessor's land described in Section 1 hereof. The permission so granted shall be subject to the leasehold interest of Lessee and all the terms, covenants and conditions under this lease.

13. If at any time during the term of this lease, a well is drilled for said geothermal energy and substances upon land not in the ownership of Lessor, which is adjacent to the leased premises and within 1,320 feet of the boundary lines of a unit into which the leased premises or portions thereof may be pooled, and said well is placed in commercial production for a period of six months, Lessee shall commence drilling within six months thereafter on the leased premises and within 1,320 feet from the common boundary line, an offset well within approximately the same distance from the common boundary line as said well on adjoining land is located, but in any event either on the leased premises or on land with which the leased premises may be

pooled, and to proceed diligently to drill to completion said offset well to the zone or horizon from which said well on the adjacent land is producing, provided, however, that Lessee shall not be required to commence drilling said offset well if there is already a well being drilled or there is a producing well on the leased premises or on land with which the leased premises is pooled

within such offset distance of said well on adjoining land.

14. Lessee may, at Lessee's option, at any time surrender and quitclaim Lessee's rights under this lease in and to all or any portion of the leased premises and shall be released thereupon from all obligations thereafter with respect to the land surrendered and quitclaimed.

15. Lessee's obligations hereunder, except for payment of taxes, advance annual minimum royalty and surface rentals under Section 3, and to drill wells under Section 13, shall be suspended and the primary term of this lease shall be extended, while Lessee is prevented from complying therewith by strikes, lockouts, riots, action of the elements, accidents, delays in transportation, inability to secure labor or materials in the open market, laws, rules or regulations by any governmental agency, authority or representative having jurisdiction, inability to secure or absence of a market for commercial sale of substances developed on or from the leased premises, or other matters or conditions beyond the reasonable control of Lessee, whether or not similar to the conditions or matters in this paragraph specifically enumerated.

16. If at the expiration of the primary term or at any time or times thereafter while this lease shall remain in force and effect, Lessee has discovered on the leased premises geothermal energy and substances in quantities which in Lessee's opinion, may be commercially produced, but said leased geothermal energy and substances are not being produced, processed or marketed because of technical or other problems or due to lack of market for such geothermal energy and substances which is acceptable to Lessee and Lessee is not then engaged in operations for the

11

purpose of producing, processing or marketing leased geothermal energy and substances, Lessee may pay as a minimum royalty for the next ensuing twelve months on or before the expiration date of the primary term hereof or within ninety days from the suspension of all operations contemplated hereby, the sum of one dollar per acre for each acre then covered by this lease and if such payment is made or tendered, it will be considered that the geothermal energy and substances covered by this lease are being produced from said premises in paying quantities. In like manner and upon like payments annually this lease may be extended for additional twelve month periods, provided, however, that this lease cannot be extended beyond the primary term by reason of the royalty payments provided in this paragraph for a longer term than five consecutive years.

17. Upon the violation by Lessee of any of the terms, covenants or conditions of this lease, and failure to take steps to remedy the default within sixty days after receipt of written notice from Lessor to do so, then at the option of Lessor, this lease shall forthwith cease and terminate, and all rights of Lessee in and to said leased premises shall be at an end, except that Lessee shall have the right to retain and hold under this lease any forty acre subdivision in which a well is producing commercially or is being drilled, and with respect to which Lessee is not in default. The waiver by Lessor of any breach of any covenant or condition hereof shall not be a waiver of any other or subsequent breach hereof, nor of any other covenant or condition hereof.

18. Upon surrender by Lessee of Lessee's rights hereunder in whole or in part, or upon termination of Lessee's rights hereunder, or any part hereof, in any manner herein provided, Lessee shall peaceably surrender possession thereof to Lessor and Lessee shall quitclaim to Lessor all right, title and interest of Lessee in the leased premises in the condition received.

12

19. Derricks, buildings, structures, improvements, equipment, machinery, appliances and personal property placed by Lessee upon the leased

premises shall be and remain the property of Lessee, and Lessee shall have the obligation, at the option of the Lessor at any time prior to the expiration of six months after the termination of this lease, to remove the same.

20. Lessee agrees to keep full records of the operations on, and production and sales of said geothermal energy and substances from the leased premises independently of and separate from any other property operated by Lessee and to notify Lessor promptly of discovery of any of said geothermal energy and substances on the leased premises, and to furnish to Lessor on or before the last day of each month a true statement of all production and sales of said geothermal energy and substances during the preceding month in a form satisfactory to Lessor. All records of such production and sales shall, at all reasonable times, be open to the inspection of Lessor's agents and representatives.

21. Lessee will keep an accurate log and casing record showing the progress of drilling, character of formations encountered or drilled through, and casing in each well in which drilling shall have been done on the leased premises, and furnish Lessor a copy thereof upon the completion of or the abandonment of each well, and a true copy of all surface and subsurface surveys made of each well drilled under this lease. Lessor's duly appointed agents and representatives shall have access at all reasonable times to all of the wells and to Lessee's property in and upon said leased premises. Lessor shall make such observations and measurements at its sole risk and expense and agrees to indemnify and hold Lessee harmless against all claims and demands of such agents and representatives arising as a result of such observations and measurements.

13

Lessee shall carry on Lessee's operations hereunder in a careful and workmanlike manner, and in accordance with all laws, ordinances and governmental orders and regulations governing the same.

22. Lessee agrees to pay before delinquency all taxes and assessments which have been or shall be lawfully levied and assessed on the mineral rights covered hereunder in the leased premises, and on the buildings, structures, equipment and other personal property or improvements placed, maintained or used by Lessee on the leased premises, and on the geothermal energy and substances stored thereon and not belonging to Lessor. Lessee may deduct the royalty proportion of the taxes and assessments on mineral rights covered hereunder in the leased premises in each fiscal year, paid by Lessee, from the royalties due and payable to Lessor for production during each successive twelve months' period subsequent to the day and month in such fiscal year on which the first installment of such taxes and assessments become delinquent. The above amount of the taxes and assessments for a particular fiscal year so paid shall be deductible only from the royalties due and payable during the twelve months' period which immediately succeeds the date of delinquency of the first installment in such fiscal year. Lessee agrees to pay to Lessor annually, within fifteen days after demand, an amount equal to the working interest proportion of the real property taxes and assessments paid by Southern Pacific Land Company or Southern Pacific Transportation Company on the land overlying or occupied by the leased premises (except on buildings, structures and other improvements thereon not owned, maintained or used by Lessee) each fiscal year of the term of this lease, prorated from the date of this lease, for the first such year and for each fiscal year thereafter during the term of this lease. Lessee shall pay any production or severance tax computed or based upon production of geothermal energy and substances which may be imposed by the Federal Government, the State

14

of Nevada, or any of its political subdivisions, and Lessor shall reimburse Lessee for the same proportion of said taxes as Lessor's shares of the taxes on the mineral rights covered hereunder.

23. All labor performed and materials furnished for purposes of the operations of Lessee hereunder shall be at the cost and expense of Lessee and Lessee shall give reasonable notice to Lessor before commencement of operations hereunder. Lessor shall not be chargeable with, or liable for, any part thereof, and Lessee agrees to protect the leased premises against liens of every character and to indemnify Lessor against liens of every character and to indemnify Lessor against all liability, cost and expense incurred by Lessor due to such liens arising from Lessee's operations thereon.

Lessee further agrees to indemnify Lessor against claims, causes of action, and liability and for injuries to, or deaths of persons and destruction or loss of, or damage to property arising out of the operations of Lessee hereunder.

24. In the event any buildings or personal property of Lessor shall be damaged, destroyed or required to be removed because of Lessee's operations on the leased premises, Lessee shall be liable for payment of the reasonable values thereof. In the event Lessee shall elect to locate a well site and an access road thereto on agricultural land of Lessor's at the time under cultivation, Lessee shall pay to Lessor the fair value of the crop destroyed. Upon the written request of Lessor, Lessee agrees to lay below plow depth all pipe lines, except steam-gathering and transmission lines or other hot water lines, which Lessee constructs through cultivated fields, and to fence all sump holes or other excavations to safeguard livestock on the land subject to this lease. Upon completion or abandonment of any well drilled on the leased premises, or upon the termination of this lease, Lessee shall abandon all wells in accord with applicable regulations level and fill all sump holes and excavations and shall remove all debris

15

and shall leave the premises in a clean and sanitary condition. Lessee, in Lessee's operations, on the leased premises shall at all times have due and proper regard for the health, welfare and safety of Lessor and of Lessor's tenants occupying the land subject to this lease. Any wells drilled by Lessee hereunder shall be drilled in such manner so as not to affect any existing potable water well or water wells of Lessor on the leased premises. Sufficient casing shall be set and cemented in such wells drilled by Lessee so as to seal off and protect known potable waters developed in any such water well or water wells.

25. In the event Lessor deems it necessary to file an action to enforce Lessor's rights hereunder, the prevailing party shall be entitled to recover reasonable attorney's fees and court costs for the prosecution or defense of the litigation.

26. Any notice or statement herein requested or required to be given by one party to the other shall be in writing. Delivery of such written notice or statement to Lessor shall be conclusively taken as sufficient if and when deposited in the United States mail, with the postage thereon fully prepaid, certified, addressed to Lessor at:

Southern Pacific Land Company
Southern Pacific Building
One Market Plaza - Room 200
San Francisco, California 94105

Payments to Lessor shall be made at the above address. Delivery of such notice or statement to Lessee shall be conclusively taken as sufficient if and when deposited in the United States mail, with postage thereon fully prepaid, certified, addressed to Lessee at:

Phillips Petroleum Company
Attn: Manager, Geothermal Operations
P.O. Box 752

Any party hereto may, by written notice, change their address to any other location for the above purposes.

16

27. If Lessee is adjudicated a bankrupt, or shall make an assignment for the benefit of creditors, or file a voluntary petition under any law having for its purpose the adjudication of Lessee a bankrupt, or the extension of time of payment, composition, adjustment, modification, settlement or satisfaction of the liabilities of Lessee, or a receiver be appointed for the property of Lessee by reason of the insolvency of Lessee, notwithstanding anything to the contrary elsewhere in this lease, Lessor shall have the right to terminate this lease and to take exclusive possession of the leased premises. The acceptance of rent or other payments for the use of the leased premises shall not constitute a waiver of Lessor's right to terminate this lease as above set forth.

28. This instrument is a lease and is not and shall not ever be held or interpreted to be a mining partnership or partnership of any kind, or in any sense whatsoever, the intention of the parties hereto being to establish and create between themselves only the relationship of Lessor and Lessee in accordance with the provisions hereof.

29. The rate of \$*** per acre in Sections 3 and 16 hereof and the obligation of Lessee to reimburse Lessor for real property taxes and assessments equal to Lessee's working interest proportion in Section 22 hereof shall be subject to pro-rata in the same percentage as the undivided interest of Lessee specified in Section 1 hereof.

30. This lease shall not be assigned nor sublet, in whole or in part without the prior written consent of Lessor, which consent shall not be unreasonably withheld. Subject to the above, the provisions hereof shall inure to the benefit of, and be binding upon the successors and assigns of the parties hereto.

31. The parties hereto agree to enter into a memorandum form of this lease for recording purposes which shall incorporate by reference the provisions hereof.

*** Confidential material redacted and filed separately with the Commission.

17

32. Time and specific performance are the essence of this lease.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be executed as of the day and year first hereinabove written.

AMENDMENT TO GEOTHERMAL LEASE
DESERT PEAK, NEVADA

THIS AGREEMENT, made and entered into this 25th day of February 1998, by and between DAVID P. FRASE, TIMOTHY D. FRASE AND JAMES W. ROBERTS, hereinafter collectively referred to as "Lessor" or "Frase" and WESTERN STATES GEOTHERMAL COMPANY, a Delaware corporation, hereinafter referred to as "Lessee" or "Western".

W I T N E S S E T H:

WHEREAS, Southern Pacific Land Company ("SPL"), predecessor in interest to Frase, as Lessor, and Phillips Petroleum Company ("Phillips"), predecessor in interest to Western, as Lessor, entered into two (2) geothermal leases (the "Leases"), the first lease dated February 14, 1974, a Memorandum of which first lease was recorded on August 15, 1974, as Document No. 138533, in Book 72, Pages 575, et seq. and the second lease dated August 1, 1976, a Memorandum of which second lease was recorded on September 27, 1976 as Document No. 148247 in Book 102, Pages 467, et seq., both in the Official Records of the County of Churchill, State of Nevada, covering and affecting 42,433.44 acres, more or less, situated in said County and State, whereby SPL leased to Phillips and Phillips became Lessee of SPL for certain geothermal resources described in the Leases; and

WHEREAS, by Assignment dated June 28, 1985 and recorded on December 16, 1985 as Document No. 217089 in the Official Records of the County of Churchill, State of Nevada, Phillips assigned the Leases to Western, then a wholly owned subsidiary of Phillips; and

WHEREAS, by Amendment and Termination agreement dated May 1, 1986, SPL and Western consolidated the lands leased under the February 14, 1974 lease and the August 1, 1976 lease under the provisions of the August 1, 1976 lease (hereinafter referred to as "Said Lease"),

and terminated the February 14, 1974 lease, a copy of which Amendment and Termination agreement was recorded on April 23, 1987 as document No. 227434 in the Official Records of the County of Churchill, State of Nevada; and

WHEREAS, Phillips and Chevron U.S.A. Inc. ("Chevron") entered into an agreement dated as of February 7, 1986, whereby Phillips agreed to sell to Chevron, and Chevron agreed to purchase from Phillips, as a single transaction, all of the stock of Western which would constitute an assignment to Chevron of all of Phillips' interest in Said Lease and the Desert Peak electrical generating facility and its associated geothermal steam production wells and plant. SPL granted its consent to the transfer of the stock of Western, and all assets of Western, to Chevron on condition that an amendment to the Lease be entered into to address the payment of royalties in situations not contemplated by Phillips and SPL when they first entered into the Leases. Said transfer occurred on or about February 21, 1986; and

WHEREAS, Southern Pacific Land Company and Western States Geothermal Company entered into that certain unrecorded Amendment to Geothermal Lease dated and effective February 21, 1986 amending the method used to calculate, measure and divide royalties owing under Said Lease, as amended; and

WHEREAS, Chevron USA Inc ("CUSA") acting through its agent Chevron Resources Company, a division of Chevron Industries Inc. sold certain assets to California Energy Company, Inc ("CECI") effective March 28, 1991. CUSA, owner of all of the common stock of Western States Geothermal Company, sold its entire interest in the shares of the common stock of Western States Geothermal Company to CECI. CECI designated its subsidiary CE Geothermal to hold the assets of Western States Geothermal Company; and

WHEREAS, it is the desire of the parties hereto that Said Lease, as heretofore amended, be further amended as hereinafter set forth:

NOW, THEREFORE, for and in consideration of \$12,800 and other good and valuable consideration accruing unto the parties hereto, the receipt and sufficiency of all of which are hereby acknowledged, Said Lease is hereby amended as follows, to wit:

1. Specifically subject to Section 11 and subject to other Sections of that certain Geothermal Lease dated August 1, 1976, the first paragraph of Section 3 is hereby deleted in its entirety and the following paragraph is hereby substituted therefore:

Lessee agrees to pay to Lessor in advance as of the date of this lease the sum of \$*** per acre of the leased premises as rental for the first year of this lease and to pay to Lessor in advance for the second year of the lease on or before the first day of August, 1977, and annually thereafter through July 31, 1998 the sum of \$*** per acre of the leased premises then subject to this lease. Commencing August 1, 1998 and annually throughout the term of this lease, on or before the same day and month of each succeeding year, Lessee agrees pay to Lessor in advance an annual rental payment at the rate of \$*** per acre for each acre then covered by this lease. It is acknowledged and agreed that the rental provided in this paragraph shall apply only to that portion of the leased premises not then committed to an approved geothermal unit, as provided in said Section 11 hereof.

Lessor hereby agrees that Said Lease, as amended herein, is a valid and subsisting Geothermal Lease and is in full force and effect.

Lessor does hereby ratify, affirm and acknowledge that Said Lease, as amended herein, is and shall remain in full force and effect as to all its terms, conditions and provisions.

It is further agreed by and between Lessor and Lessee, that except for the amendments as hereinabove set forth, Said Lease, as amended, shall in all other respects remain in full force as originally executed.

*** Confidential material redacted and filed separately with the Commission.

In the event any inconsistency exists between this Amendment and Said Lease, the terms of this Amendment shall prevail, and any such inconsistent terms contained herein shall be construed as superseding and amending the terms of Said Lease. Except as expressly modified by this Amendment, Said Lease shall be unchanged and shall remain in full force and effect.

This Amendment may be executed in any number of counterparts or on

counterpart signature pages, and all such counterparts shall together be deemed to constitute a single Amendment. The execution of one counterpart by either Party or any Person comprising such Party shall have the same force and effect as if such Party or Person had signed all the other counterparts.

IN WITNESS WHEREOF, the parties have executed this Amendment as of the date first hereinabove written.

COUNTERPART "A"

CONFIDENTIAL TREATMENT REQUESTED. CONFIDENTIAL PORTIONS OF THIS DOCUMENT HAVE BEEN REDACTED AND HAVE BEEN SEPARATELY FILED WITH THE COMMISSION.

Exhibit 10.4.6

GEOTHERMAL RESOURCES LEASE

THIS LEASE is entered into this 18th day of November, 1983, by and between s SIERRA PACIFIC POWER COMPANY, a Nevada corporation ("Lessor"), and GEOTHERMAL DEVELOPMENT ASSOCIATES, a Nevada corporation ("Lessee").

1. INTEREST GRANTED:

In consideration of the covenants and agreements contained herein, Lessor hereby grants and leases to Lessee the exclusive right and privilege to drill for, extract, produce, remove, utilize, sell, and dispose of geothermal steam and associated geothermal resources as defined in NRS 322.005, (hereinafter called "geothermal resources"), in or under that certain parcel of property located in Washoe County, Nevada, and consisting of approximately thirty (30) acres, as more particularly described in Exhibit "A," which is attached hereto and incorporated herein by reference, together with:

(a) The non-exclusive right to conduct within the leased area

geological and geophysical exploration;

(b) The right to construct or erect and to use, operate, and maintain within the leased area, together with ingress and egress thereupon, all wells, pumps, pipes, pipe lines, buildings, plants, sumps, brine pits, reservoirs, tanks, waterworks, pumping stations, roads, electric power generating plants, transmission lines, industrial facilities, electric telegraph or telephone lines, and such other works and structures and to use so much of the surface of the land as may be necessary or reasonably convenient for the production, utilization, and processing of geothermal resources or for the full enjoyment of the rights granted by this Lease, subject to applicable laws and regulations. Although the use of the leased area for an electric generating plant and/or transmission facilities is authorized hereunder, the location of such facilities and the terms of occupancy therefor shall be set forth in a separate agreement between the parties.

(c) The non-exclusive right to drill potable water wells in accordance with Nevada statutory water laws within the leased area and to use the water produced therefrom for operation of the leased lands, free of costs, provided

that such drilling and development are conducted in such a way that they do not interfere with Lessor's activities on the leased land.

(d) The right, without the payment of royalties hereunder, to reinject into the leased lands geothermal resources and condensates to the extent that such resources and condensates are not utilized, but their reinjection is necessary for operation under this Lease in the recovery or processing of geothermal resources. If the Lessee, pursuant to a plan approved by the Nevada Division of Environmental Protection, disposes of the useable brine and waste products into underlying formations, it may do so without the payment of royalties.

All of the activities described above shall be conducted for the primary purpose of the generation of electrical power through the use of geothermal resources. Nothing in this Lease shall be construed as prohibiting the use, for other purposes, of spent geothermal resources produced on the leased property.

2. TERM:

The term of this Lease shall commence upon the date of its execution and subject to the conditions set forth below shall continue for a term of twenty (20) years and for so long thereafter as geothermal resources are produced or utilized in commercial quantities on the leased property, or lands pooled or unitized therewith.

3. RENTALS AND ROYALTIES:

(a) Annual Rental. For each lease year prior to the commencement of production of geothermal resources in commercial quantities on the leased lands, the Lessee shall pay the Lessor on or before the anniversary date of the lease a rental of *** Dollars (\$***) per acre or a fraction thereof. If no production of electrical energy has been achieved on the leased property by the end of the third year of the lease term, and the parties have not entered into a written agreement to extend the lease term, this Lease shall automatically terminate as to both parties.

(b) After Lessee has commenced the production of electrical energy, Lessee may, at its option, suspend or defer such production. If Lessee does not then resume production within one year, Lessee shall pay rent for the year, in arrears, as described in Paragraph 3(a) hereinabove. If production is suspended

*** Confidential material redacted and filed separately with the Commission.

-2-

for more than eighteen (18) months at any one time, this agreement shall terminate automatically as to both parties.

(c) Royalty. On or before the last day of the calendar month after the month of commencement of production in commercial quantities of geothermal resources and thereafter on a monthly basis, the Lessee shall pay to the Lessor:

(i) A royalty of ***

(ii) A royalty of ***

(iii) A royalty of ***, and utilized by Seller for the ***
The value of said resource shall be considered ***

(iv) A royalty of ***. In the event Lessee elects to process ***, Lessor's royalty share shall bear its proportionate share of such ***. For the purpose of this Lease, the ***

4. TAXES AND ASSESSMENTS:

Lessee shall pay all taxes levied against its improvements on the leased land. Lessor shall pay its royalty share, and Lessee shall pay the remaining portion of any and all taxes assessed on geothermal resources from the leased land in the following manner:

(a) Commencing with the effective date of this Lease and prior to the actual production of geothermal resources, Lessor shall pay and bear its royalty share,

*** Confidential material redacted and filed separately with the Commission.

-3-

and Lessee shall pay and bear the remaining portion of any and all taxes attributable to an assessment of geothermal resources on said leased land.

(b) After the commencement of production of geothermal resources from the leased land, Lessor shall pay its royalty share, and Lessee shall pay the remaining portion of any and all taxes assessed upon geothermal resources and also of all severance, production, license, and other taxes and assessments levied or assessed on account of the production of geothermal resources from the leased land.

In the event Lessor's royalty share of such taxes exceeds one-half of the amount of Lessor's rental shut-in royalty and/or royalty payments hereunder for the year in which such taxes are payable, Lessee shall advance such excess on Lessor's behalf and recoup such advance out of one-half of Lessor's royalty income once commercial production has commenced on the leased lands. Lessor shall pay before delinquency all other taxes and assessments on the leased land and improvements. However, Lessee is hereby

authorized to pay any taxes and assessments on behalf of Lessor and may, if it so desires, deduct the amounts so paid from royalties or monies due Lessor hereunder.

5. WELLS:

(a) Lessee shall not drill or operate water wells or take water in such a way as to injure water wells, ponds or reservoirs of Lessor or interfere with or restrict the supply of water to Lessor or its tenants for domestic, livestock or agricultural use. If Lessee elects to permanently abandon any well drilled by Lessee or the leased land, Lessor shall have the option of requiring in writing that Lessee turn over such well to Lessor, and at that time Lessor shall pay Lessee for the salvage value of the material and equipment in and on said well. If Lessor so elects, Lessee agrees to plug such well at the bottom of the surface casing according to the requirements of the State Engineer in order to prevent contamination of freshwater bearing formations as a result of Lessee's drilling operations.

(b) Subject to the terms of this Paragraph 5, within six (6) months after abandonment of any well, including those abandonments resulting from termination of this Lease, Lessee shall remove all machinery, material and

-4-

structures used in connection with said well and not used in its other operations, if any, on the leased land, and shall fill in and level off all excavations, pits, or other alterations to the surface of the leased land caused in connection with said well, and, insofar as practical, shall restore the leased land and the means of ingress and egress to as good a condition as existed when Lessee commenced operations under this Lease, except reasonable wear and tear, acts of nature and conditions beyond the control of Lessee.

6. COMINGLING, POOLING AND UNITIZATION:

(a) Lessee shall have the right to comingle (for purposes of storing, transporting, handling, utilizing, selling or processing) geothermal resources produced or extracted from the leased land and lands pooled, unitized or combined therewith, with similar substances produced or extracted from other lands or units. In the event of such comingling, Lessee shall meter, gauge or measure, according to prevalent industry standards, the production from the leased land, or from the unit or units including the leased land or other units or lands, as applicable, and compute and pay Lessor's royalty attributable to Lessor's land on the basis of such production as so determined or allocated.

(b) Lessee may, as a recurring right for drilling, development or operating purposes, pool, unitize, or combine all or part of the leased land into a unit with any other land or lands (whether held by Lessee or others), whether or not adjacent or contiguous, which Lessee desires to develop or operate as a unit. Such a unit shall be officially created upon Lessee's filing in the official records of Washoe County a notice of such unitization, describing said unit. Any well (whether or not Lessee's well) commenced, drilled, drilling and/or producing or being capable of producing in any part of such unit shall for all purposes of this Lease be deemed a well commenced, drilled, drilling and/or producing on the leased land, and the Lessee shall have the same rights and

obligations with respect thereto and the drilling and producing operations upon the lands from time to time included within any such unit as Lessee would have if such lands constituted the leased lands; provided, however, that

-5-

notwithstanding this or any other provision or provisions of this Lease to the contrary:

(i) Production as to which royalty is payable from any such well or wells drilled upon any such unit, whether located on the leased land or other lands, shall be allocated to the leased land in the proportion that the acreage of the leased land in such unit bears to the total acreage of such unit. Such allocated portion thereof shall for all purposes be considered as having been produced from the leased land, and the royalty payable under this Lease with respect to the leased land in such unit shall be payable only upon that proportion of production so allocated, and

(ii) If taxes of any kind are levied or assessed (other than taxes on the surface and on Lessor's improvements), any portion of which is chargeable to Lessor under the provisions of this Lease, then this share of such taxes to be borne by Lessor shall be in proportion to the share of the production from such unit allocated to the leased land.

7. RESERVATIONS TO LESSOR:

All rights in the leased area not granted to Lessee by this Lease are hereby reserved to Lessor. Without limiting the generality of the foregoing, such reserved rights include:

(a) Disposal - the right to sell or otherwise dispose of the surface of the leased lands or any resource in the leased lands under existing laws, or laws hereinafter enacted, subject to the rights of the Lessee under this Lease.

(b) Rights of Way - the right to authorize geological and geophysical explorations on the leased land which do not interfere with or endanger actual operations under this Lease and the right to grant such easements or rights of way for joint or several use upon, through, or in the leased area for steam lines and other public or private purposes which do not interfere with or endanger planned or actual operations or facilities constructed under this Lease.

(c) Mineral Rights - the ownership of the right to extract minerals, oil, hydrocarbon gas, and helium from the leased lands.

-6-

(d) Casing - the right to acquire the well and casing at the fair market value of the casing where the Lessee finds only potable water, and such water is not required in lease operations.

(e) Measurements - the right to measure geothermal resources and to sample any production thereof.

8. DEFAULT AND TERMINATION:

Whenever the Lessee fails to comply with any of the terms and provisions of this Lease, and does not commence to remedy such failure within

ninety (90) days after receipt of written notice from Lessor, the Lessor may (a) suspend operations until the requested action is taken to correct the non-compliance, or (b) cancel this Lease by delivering written notice of its intent to do so to Lessee. Such cancellation shall be effective immediately upon delivery of said notice. The following property shall be excepted from any Lease termination hereunder as a result of default: (a) each and any well then capable of producing in commercial quantities the substances covered by this Lease, and in respect to which Lessee is not in default; and (b) rights of way and easements across lands subject to such Lease termination, which rights of way and easements are necessary for conducting Lessee's operations on or in the vicinity of the lands retained, including sites for electric generating units.

Lessee may terminate this Lease at any time upon six (6) months written notice to Lessor. During the six-month period, Lessee shall remove all generation equipment and plant, treat all wells in accordance with the appropriate provisions of Paragraph 5 above, and return the leased land to a condition as near as possible to its state prior to Lessee's entry thereon.

9. INDEMNIFICATION:

The Lessee shall indemnify and hold harmless Lessor, its officers, agents and employees from any and all claims for liability of any kind arising from or connected with Lessee's activities and operations under this Lease. Lessee shall pay to the person beneficially interested in the damaged object all damages caused by Lessee's operations on the surface of the leased land, including but not limited to damages to growing crops, pasture and improvements on the leased land, or to animals or livestock. Lessee agrees to take reasonable steps to prevent its operations from:

(a) Causing or contributing to soil erosion, or to the injury to soil conserving structures on the leased land;

-7-

(b) Polluting the waters of reservoirs, springs, streams or water wells on the leased land;

(c) Damaging crops or pasture, consistent with the purposes of this Lease; or

(d) Harming or injuring in any way the animals or livestock owned by Lessor or his tenants, or kept or pastured on the leased land, including the erection and maintenance of fences, gates and cattle guards where necessary for such purposes.

In no event shall Lessor be indemnified for liability or loss resulting from its sole negligence.

10. CONDEMNATION:

Eminent domain proceedings resulting in the condemnation of a part of the premises leased herein, but leaving the remaining premises reasonably useable by Lessee for the purposes of the activities described in Paragraph 1 above, will not terminate this Lease unless Lessor and Lessee mutually agree to such termination. The effect of any such partial condemnation will be to terminate the Lease as to the portion of the premises condemned, and the Lease of the remainder of the premises shall remain intact. Lessee hereby assigns and transfers to Lessor any claim it may have to compensation for damages or award as a result of any condemnation, that does not materially impair its ability to carry out the activities described in Paragraph 1.

11. PERMITTING:

Lessee shall obtain and maintain any and all permits, licenses, and governmental approvals necessary for the conduct of Lessee's activities on

the leased land. All labor to be performed and material to be furnished in the operations hereunder shall be at the sole cost and expense of Lessee, and Lessee shall hold Lessor free and harmless from liability thereunder. Lessee shall keep the leased premises fully protected against any and all liens of every character arising from or connected with Lessee's operations hereunder.

12. ASSIGNMENTS AND SUBLEASES:

(a) Neither party shall voluntarily assign this Lease without the prior written consent of the other party, unless the assignment is to a partnership in which one of the parties to this Lease is a general partner.

-8-

(b) In the event that either party to this Lease wishes to assign this Lease to a corporation or other entity, which does not fall into subsection (a) above, said party shall provide the other party with written notice of such intent. Said written notice shall describe the financial structure and assets of the potential assignee in sufficient detail to permit the noticed party to evaluate the effect of the assignment on its interest in this Lease and the even-dated Agreement For the Purchase and Sale of Electricity executed by the parties hereto. The noticed party shall have thirty (30) days from its receipt of the notice to consent or refuse to consent to the assignment. Failure to give written consent or refusal within said thirty-day period shall be deemed consent by the noticed party. In no event shall consent to any assignment be unreasonably withheld.

(c) In the event Lessee is contemplating an assignment such as described in subsection (b) above, Lessor shall have a prior right to regain Lessee's rights under the Lease, together with any and all related improvements, at the price and on the terms of the intended assignment. Lessor may exercise this right by notifying Lessee of its intent to do so by the end of the thirty-day period described in subsection (b) above. Such notice shall also be deemed a refusal of consent to the assignment of Lessee's rights to a third party.

Subject to the provisions of this Paragraph, all obligations hereunder shall be binding upon, and every benefit hereof shall inure to, the heirs, executors, administrators, successors and assigns of the respective parties hereto.

13. NOTICES:

Lessor may give any notice or deliver any document hereunder to Lessee by mailing the same by registered mail addressed to Lessee at:

Geothermal Development Associates
251 Ralston Street
Reno, Nevada 89503

or by delivering the same in person to the above-referenced address Lessee. Lessee may give any notice or deliver any document hereunder to Lessor by mailing the same by registered mail addressed to Lessor at:

Sierra Pacific Power Company
Attention: Max Jones

-9-

P.O. Box 10100

or by delivering the same to Lessor in person. For purposes of this Paragraph, either party may change its address by written notice to the other. In case of any notice or document delivered by registered mail, the same shall be deemed delivered when deposited in any U.S. Post Office, properly addressed as herein provided, with postage fully prepaid. Lessee may make any payment due Lessor to Lessor personally or by mail at the address of Lessor given above.

14. CONDITION:

The obligations of both parties under this Lease are conditioned upon the Public Service Commission of Nevada's approval of the pricing provisions in the parties' even-dated Agreement for the Purchase and Sale of Electricity as a portion of Lessor's purchased power costs. If such approval is not received, this Lease shall be considered null and void.

THIS AGREEMENT is entered into as of the date of its execution by and between SIERRA PACIFIC POWER COMPANY, A Nevada Corporation ("Lessor") and FAR WEST HYDROELECTRIC FUND, LTD., a Utah Limited Partnership ("Lessee").

1. RECITALS. This Amendment is based on the following facts:

a. On November 18, 1983, Lessor and Geothermal Development Associates entered into an Agreement for the Purchase and Sale of Electricity ("the Original Power Purchase Agreement") and a Geothermal Resources Lease ("the Lease") for a geothermal generation project to be located near Steamboat Springs, Nevada. The parties amended the Lease on January 7, 1985, and the Original Power Purchase Agreement on March 6, 1987. Both the Original Power Purchase Agreement, as amended, and the Lease, as amended, are currently in effect.

b. Through a series of assignments, to which Lessor consented, Far West Hydroelectric Fund, Ltd. is the current Lessee under the Lease, as well as the Seller under the Original Power Purchase Agreement.

c. Far West Capital, Inc. wishes to construct a geothermal generating facility which consists of a 2.0 MW gross (1.8 MW net) expansion at the Steamboat Project ("Plant") on the land subject to the Lease, the output of which will be sold to Lessor pursuant to a new Long-Term Agreement for the Purchase and Sale of Electricity of even date herewith ("the New Power Purchase Agreement"). Lessor and Lessee wish to amend the Lease to accommodate the Plant on the leased property and delineate a method of calculating royalty payments to be made by Lessee on the output of the Plant.

d. Lessee intends to sublease a portion of the leased property to Far West Capital, Inc.

In consideration of these facts, the parties agree as follows:

2. AMENDED PROVISION. Section 3(c) (i) of the Lease is hereby amended to read as follows:

1

3.(c) ROYALTY - At the end of the Billing Period during which the initial production of geothermal resources in commercial quantities from the Plant ("the Initial Operation") occurs and at the end of each monthly Billing Period thereafter, the Lessee shall pay Lessor royalties calculated as follows:

(i) A royalty of *** percent (***) on the ***, plant which is the subject of the Original Power Purchase Agreement.

(ii) A royalty, calculated *** from the Plant for the previous Billing Period which is the subject of the New Power Purchase Agreement.

(iii) A royalty of *** percent (***) on the *** from any other power plant built upon or utilizing geothermal resources from the leased lands, or land pooled or unitized therewith.

A "Billing Period" shall mean the time period between established meter reading dates.

3. STATUS OF AMENDMENT. It is expressly understood and agreed by the parties hereto that this Amendment is supplemental to the Lease. It is further understood and agreed that all the terms, conditions and provisions of the Lease, unless specifically modified herein, are to apply to this Amendment and are made a part of this Amendment as though they were expressly written, incorporated and included herein.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment this 29th day of October 1988.

3

THIRD AMENDMENT TO
GEOTHERMAL RESOURCES LEASE

THIS THIRD AMENDMENT to Geothermal Resources Lease is entered into as of the date of its execution, by and between Sierra Pacific Power Company, a Nevada corporation ("Lessor") and Far West Electric Energy Fund, L.P., a Delaware limited partnership (formerly Far West Hydroelectric Fund, Ltd. a Utah limited partnership before its change of name and change of domicile) ("Lessee").

RECITALS.

a. On November 13, 1983, Lessor and Geothermal Development Associates entered into an Agreement for the Purchase and Sale of Electricity (the "Original Power Purchase Agreement"). As the result of a series of assignments consented to by Lessor, Lessee has become the seller under the Original Power Purchase Agreement, which Agreement was amended on March 6, 1987.

b. An unrecorded Geothermal Resources Lease dated November 18, 1983, was executed by Sierra Pacific Power Company as Lessor, and Geothermal Development Associates, as Lessee, as disclosed by a Memorandum of Lease by and between Sierra Pacific Power Company and Geothermal Development Associates dated January 7, 1985, and recorded in Book 2115, page 321, as Document No. 971913 of said Official Records (the "Lease"). Said Lease was amended by an unrecorded Letter Amendment by and between Sierra Pacific Power Company and Geothermal Development

Associates dated January 7, 1985, as disclosed by the above Memorandum of Lease and by an Amended Memorandum of Lease by and between the same parties dated January 7, 1985, and recorded in Book 2116, page 812, as Document No. 972684 of said Official Records. Said Lease was assigned by Geothermal Development Associates to Ormat Systems Inc. by an Assignment of Lease dated September 26, 1985, and recorded in Book 2272, page 643 as Document 1043163 of said Official Records, further assigned by Ormat Systems Inc. to Bonneville Pacific Corporation by an Assignment of Lease dated September 26, 1985, and recorded in Book 2272, page 647 as Document No. 1043164 of said Official Records, further assigned by Bonneville Pacific Corporation to Far West Capital, Inc. ("FWC") by an Assignment of Lease dated December 12, 1985, and recorded in Book 2272, page 750 as Document No. 1043167 of said Official Records, and further assigned by FWC to Far West

1

Hydroelectric Fund, Ltd. by Assignment of lease dated December 12, 1985, and recorded in Book 2272, page 756, as Document No. 1043168 of said Official Records, all of said assignments being disclosed by that certain Memorandum of Lease, Assignments of Lease and Purchase Agreement by and among Geothermal Development Associates, Ormat Systems Inc., Bonneville Pacific Corporation, FWC, Far West Hydroelectric Fund, Ltd. and Sierra Pacific Power Company dated December 31, 1985, and recorded in Book 2317, page 368 as Document 1062824 of said Official Records. Said Lease was further amended by a Second Amendment to Geothermal Resources Lease by and between Sierra Pacific Power Company and Far West Hydroelectric Fund, Ltd. dated October 29, 1988.

c. Lessee constructed and is operating a five megawatt geothermal power plant ("Original Power Plant") on the leased property which is delivering power to the Lessor under the Original Power Purchase Agreement.

d. Lessor entered into a Long Term Agreement for the Purchase and Sale of Electricity with FWC (the "1-A Power Purchase Agreement") dated October 29, 1988, and a Special Facilities Agreement ("Special Facilities Agreement") dated October 29, 1988. The 1-A Power Purchase Agreement, and the Special Facilities Agreement both relate to the 1.8 MW expansion of the Original Power Plant (the "1-A Expansion"). The 1-A Expansion is located on the leased property which is subleased to FWC. FWC has now assigned its rights and interests in the 1-A Power Purchase Agreement and the Special Facilities Agreement to 1-A Enterprises, a Nevada General Partnership ("1-A") and Lessor consented to said assignments on August 18, 1989.

e. Lessee and 1-A have requested and Lessor has agreed that certain portions of the Lease be modified or clarified.

NOW THEREFORE, in consideration of the foregoing and the mutual covenants contained herein, the parties agree as follows:

1. Section 3(c) of the Lease is hereby amended to add the following:

(v) Any such payments made under this section shall be made by Lessee within thirty (30) days of receipt of an invoice from Lessor requesting said payment. Should Lessee fail to pay the amount of such invoice, Lessor may offset future payments to Lessee under the applicable Original Power Purchase Agreement or the 1-A Power Purchase Agreement by such amount. Such rights shall apply only to amounts that become due and payable pursuant to this Lease, as amended.

2

2. Section 12 of the Lease is hereby amended to read as follows:

12. ASSIGNMENTS AND SUBLEASES:

a. Neither party shall voluntarily assign this Lease without the prior written consent of the other party, unless the assignment is to a partnership in which one of the parties to this Lease is a general partner.

b. In the event that either party to this Lease wishes to assign this Lease to a corporation or other entity, which does not fall into subsection (a) above, said party shall provide the other party with written notice of such intent. Such written notice shall describe the financial structure and assets of the potential assignee in sufficient detail to permit the noticed party to evaluate the effect of the assignment on its interest in this Lease and the even-dated Agreement For The Purchase and Sale of Electricity executed by the parties hereto. The noticed party shall have thirty (30) days from its receipt of the notice to consent or refuse to consent to the assignment. Failure to give written consent or refusal within said thirty-day period shall be deemed consent by the noticed party. In no event shall consent to any assignment be unreasonably withheld.

c. In the event Lessee is contemplating an assignment such as described in subsection (b) above, Lessor shall have a prior right to regain Lessee's rights under the Lease, together with any and all related improvements, at the price and on the terms of the intended assignment. Lessor may exercise this right by notifying Lessee of its intent to do so by the end of the thirty-day period described in subsection (b) above. Such notice shall also be deemed a refusal of consent to the assignment of Lessee's rights to a third party. Subject to the provisions of this paragraph, all obligations under this Lease as amended shall be binding upon, and every benefit hereof shall inure to, the heirs, executors, administrators, successors, and assigns of the respective parties thereto.

d. Subject to subsections (a), (b), and (c) above, which refer to a complete assignment of interest, from time to time and with prior written notice to Lessor and without Lessor's consent, Lessee's leasehold estate in the leased land and Lessee's right, title and interest as tenant in the Lease as amended may be assigned for security purposes and be encumbered by one or more deeds of trust, mortgages, security agreements, sale-and-leaseback arrangements, leveraged leases or other security instruments or devices to secure a debt or debts or other similar obligation or obligations.

3

e. From time to time and with the prior written consent of the Lessor, the Lessee or its Sublessee may enter into Subleases of the leased property. Any Sublessee may with notice to the Lessor and the Lessee but without their consent may encumber its subleasehold interest by one or more deeds of trust, mortgages, security agreements, sale-and-leaseback arrangements, leveraged leases or other security instruments or devices to secure a debt or debts or other similar obligation or obligations.

3. Lessor hereby grants to Lessee and its successors, assigns and sublessees the right to use the easement, 45.0 feet in width described in that certain Basement Agreement dated October 18, 1971, and recorded November 3, 1971, as Document No. 224422 at Book 589, page 533 in the Official Records of Washoe County, Nevada, for roadway and electric utility purposes over, upon and across the property described therein and subject to the terms thereof, which Easement Agreement is attached hereto as Exhibit C and made a part hereof.

4. It is expressly understood and agreed by the parties hereto that this Amendment is supplemental to the Lease. It is further understood and agreed that all of the terms, conditions and provisions of this Lease, as amended, unless specifically modified herein, are to apply to this Amendment and are made a part of this Amendment as though they were expressed, incorporated and included herein.

IN WITNESS WHEREOF, the parties hereto have executed this Lease as of the day and year first above written.

Exhibit 10.4.7

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 1st day of November, 1969, by and between Chrisman B. Jackson and Sharon Jackson Husband and Wife hereinafter called "Lessor" (whether one or more) and Standard Oil Company of California, a corporation, hereinafter called "Lessee,"

W I T N E S S E T H

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and

other lands in the vicinity on said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

The North half of Tract No. 41 1/2, Township 16 South, Range 14 East, S. B. B. & M., containing 80 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions contained, this lease shall remain in force for a period of ten (10) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all, lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

4. Lessee agrees to commence drilling, extraction or processing

operations on said land or on the unit area within the period of ten (10) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 1st day of November, 1970, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of Forty and No/100 ----- Dollars (\$40.00) (each of such annual periods being hereinafter referred to as rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and

b. That if within 15 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or

products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such well and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and

exclusive excepting only that lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee say deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others -- rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a

4

market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provision of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated, to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default,

Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed

5

on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefore to Lessor at 1075 So. 19th St. El. Centro, California, or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to

_____, at
_____,
_____, its
successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at P.O. Box 3495 San Francisco, California 94120 of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee

simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event

6

Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder. In regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

7

19.(a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated.

Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any

weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 1st day of April, 1976, by and between CHRISMAN B. JACKSON and MARY ANGELA, his wife, hereinafter called "Lessor", and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereafter called "Lessee";

W I T N E S S E T H:

THAT, WHEREAS, by that certain Lease Agreement dated November 1, 1969 and recorded in the Office of the County Recorder of Imperial County, California, in Book 1286 at Page 643, et. seq. of Official Records, Lessors did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State, particularly described in such lease; such lease being hereinafter referred to as "said lease"; and

WHEREAS, Lessor and Lessee have agreed to amend said lease as hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of One Dollar (\$1.00) and other valuable consideration, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. The following paragraph is hereby added to said lease, as amended, insofar as it covers said land:

"23. Lessee agrees that when it physically occupies and uses the surface of said land, it shall pay Lessor rental in the amount of Two Hundred and No/100 Dollars (\$200.00) per acre per year for so much of Lessor's surface acreage actually occupied and used. Such rental shall be payable annually in advance so long as said use continues. Said rental shall be comparable with rentals in general paid for other lands in the area for agricultural purposes and may be increased in the future to conform to any general increase in rentals for agricultural purposes."

2. Lessor hereby ratifies said lease, as amended, and acknowledges full performance by Lessee of all of its obligations thereunder to the date hereof and, as herein amended, said lease shall remain in full force and effect and, to implement this amendment, Lessor does hereby lease, let and demise unto Lessee said lands pursuant to the terms of said lease, as amended.

3. The provisions of this agreement shall be binding upon and shall inure to the benefit of the respective heirs, executors, administrators, successors and assigns of the parties hereto.

4. Lessor hereby acknowledges receipt of rental in full for surface use by Lessee referred to in Paragraph 1 hereof for the period June 30, 1974 to June 30, 1976.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 1st day of October, 1979, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and CHEVRON U.S.A. INC. successor in interest to STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H:

THAT, REFERENCE IS HEREBY HAD to certain Lease Agreement dated November 1, 1969 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1286, at Page 643, et seq., of

Official Records), whereby CHRISMAN B. AND SHARON JACKSON did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease, such lease being hereinafter referred to as "said lease";

AND, WHEREAS, by amendment of Lease Agreement dated April 1, 1976, a short form of which was recorded in Book 1387, Page 1064 Official Records Imperial County, California said Lease Agreement was amended;

AND, WHEREAS, by Grant Deed dated December 14, 1977, and recorded in Book 1410, Page 216 Official Records Imperial County, California, Lessor became the owner and holder of Lessor's interest under said Lease Agreement as amended;

AND, WHEREAS, by amendment of lease agreement dated October 23, 1978, a short form of which was recorded in B-1430, P-1585, et seq. of official records of Imperial County, California, said lease was amended;

AND, WHEREAS, Lessor and Lessee have agreed to further amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. Effective with the rental period that begins in 1979, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of Six Hundred & No/100 DOLLARS (\$600.00)"

shall be and hereby is amended to read as follows:

"...., the sum of One Thousand & No/100 DOLLARS (\$1,000.00)...."

2. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to November 1, 1980.

3. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 23rd day of October, 1978 between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and CHEVRON U.S.A. INC. successor in interest to STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H:

THAT, REFERENCE IS HEREBY HAD to that certain Lease Agreement dated November 1, 1969 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1236 at Page 643, et seq., of Official Records), whereby CHRISMAN B. and Sharon Jackson did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease, such lease; being hereinafter referred to as "said lease";

AND, WHEREAS, by amendment of Lease Agreement a short form of which was recorded in Book 1387, Page 1064 Official Records Imperial County, California said Lease Agreement was amended;

AND, WHEREAS, by Grant Deed dated December 14, 1977 and recorded in Book 1410, Page 216 Official Records Imperial County, California, Lessor became the owner and holder of Lessor's interest under said Lease Agreement as amended;

AND, WHEREAS, Lessor and Lessee have agreed to further amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of ten (10) years from the date hereof, called the 'primary term',...."

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of fifteen (15) years from the date hereof, called the 'primary term',...."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof...."

shall be and hereby is amended to read as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of fifteen (15) years from the date hereof...."

3. Effective with the rental period that begins in 1979, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of Forty and NO/100 DOLLARS (\$40.00)...."

shall be and hereby is amended to read as follows:

"...., the sum of Six Hundred and NO/100 DOLLARS (\$600.00)...."

4. That part of Section 4a. of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 15 years...."

5. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

"b. That if within 20 years...."

6. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and

effect. Lessor acknowledges receipt of rental in full under said lease to November 1, 1980.

7. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

Exhibit 10.4.8

L E A S E A G R E E M E N T

THIS AGREEMENT, made and entered into as of the 22nd day of SEPTEMBER, 1976, by and between THE UNDERSIGNED

_____, hereinafter called "Lessor" (whether one or more) and STANDARD OIL COMPANY OF CALIFORNIA, hereinafter called "Lessee,"

W I T N E S S E T H

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products". For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof.

The said land included in this lease is situated in the County of IMPERIAL, State of CALIFORNIA and is described as follows, to wit:

ALL THAT PORTION OF THE EAST HALF OF TRACT 45, TOWNSHIP 16 SOUTH, RANGE 14 EAST, S.B.M., IN THE COUNTY OF IMPERIAL, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT OF RE-SURVEY APPROVED FEBRUARY 6, 1909, AND FILED IN THE DISTRICT LAND OFFICE, LYING EAST OF THE EAST LINE OF THE RIGHT OF WAY OF THE SOUTHERN PACIFIC RAILROAD COMPANY, EXCEPTING THEREFROM THE EAST 30 FEET AS CONVEYED TO THE COUNTY OF IMPERIAL BY DEED RECORDED IN BOOK 470, PAGE 507 OF OFFICIAL RECORDS.

containing 28.00 -----

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's Option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of ten (10) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together

with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in

2

its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of twenty (20) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land, provided that, commencing with the 22ND day of SEPTEMBER, 1977, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of FIVE HUNDRED SIXTY AND NO/100THS -----DOLLARS (\$ 560 00) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area

It is expressly understood and agreed by the parties hereto:

a. That it within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any

thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and

b. That if within 15 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease

3

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessor shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division.

4

If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission or any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall, be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and it such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If Lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

5

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of

any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at P.O. Box "6" Heber, CA 92249 or Lessee may, its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to _____ at _____ its successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority in behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at P.O. Box 3495 San Francisco, CA 94119, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all, liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or

6

disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole, and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this

paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be released of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of

7

this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

19.(a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall, fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive.

In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby

8

leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction there thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purposes of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

22. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

23. Subject to Lessee's right to surrender this lease as provided in Paragraph 16 hereof and notwithstanding anything else to the contrary contained herein, Lessee agrees to pay Lessor the annual rental as provided in Paragraph 6 hereof until such time as royalty producing production occurs on said land or land pooled or unitized with said land or this lease terminates.

Exhibit 10.4.9

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 17th day of February, 1977, by and between the undersigned hereinafter called "Lessor" (whether one or more) and CHEVRON U.S.A. INC., a corporation, hereinafter called "Lessee."

W I T N E S S E T H

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of

way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

The NW-1/4 of the E-1/2 of Tract No. 45, Township 16 South, Range 14 East, S.B.M.

That portion of the E-1/2 of the E-1/2 West of the Railroad, Tract No. 45, Township 16 South, Range 14 East, S.B.M.

The SW-1/4 of the E-1/2 of Tract No. 45, Township 16 South, Range 14 East, S.B.M.

containing 122 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of five (5) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting,

manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from

said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of five (5) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 17th day of February __, 1978, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of THREE THOUSAND AND FIFTY DOLLARS (\$3,050.00) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

- a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and
- b. That if within 15 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at has option, terminate this lease.

3

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time-to-time and during such periods as there as no market at the wells or plant for any lease product or products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well, or wells are situated, but in conformity with any reasonable conservation program affecting the drilling of walls or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable to the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any

4

part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays on transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental, agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

5

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether time same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share," as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at 911 Lacy Street, Santa Ana, California 92701, or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to _____ at _____ its successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at Land Dept., P.O. Box 7643, San Francisco, CA 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties

6

or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

7

17. Lessee shall have the right at any time and from time-to-time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

19.(a) Lessee is given the sole right and option by written declaration of pooling at any time or from time-to-time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the

pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner

8

terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling

in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. It is understood and agreed by and between the parties hereto that at any time during the primary term of this agreement if Lessee shall acquire by the lease purchase, or assignment an interest in any lease executed after the date of this agreement and covering private lands located within five (5) miles of the land covered hereby, which lease shall contain a greater Lessor's royalty or a greater annual per acre rental than is provided by this agreement, the Lessee shall immediately increase the corresponding terms of this agreement so as to afford the Lessor herein equal terms. In the event of such increase, the Lessee shall promptly tender to Lessor for his execution an instrument in writing which shall contain such increased terms.

22. Notwithstanding anything to the contrary contained herein, the possession by Lessee of said land shall be sole and exclusive; provided, however, except for the surface use hereinafter specifically provided for, Lessee shall have no right to use the

9

surface of any of said land. Lessee, after prior consultation and approval of Lessor (which approval shall not be unreasonably withheld), shall have the right to conduct geological and geophysical operations on said land. Additionally, Lessor shall make available to Lessee on the surface of said land three (3) drill sites, each to be limited to a maximum of two (2) acres in size. Lessor shall also make available to Lessee one (1) site for the construction of a plant for the conversion of geothermal resources into commercial products, such site to be limited to a maximum of five (5) acres. Lessor shall also make available to Lessee ingress and egress rights to all such sites together with rights of way for pipelines, power lines, and telephone lines. All such sites, ingress and egress rights, and rights of way shall be selected by Lessee subject to approval thereof by Lessor in writing. Lessor agrees not to unreasonably withhold approval of any such selections made by Lessee. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops and irrigation and drainage systems. In addition, Lessee shall pay to Lessor the sum of TWO HUNDRED FIFTY DOLLARS (\$250.00) per acre per year for each acre occupied by Lessee with respect to the aforementioned drill sites set aside for drilling purposes; provided, however, that at the end of each two-year period of such occupancy of such sites, the site rental payable hereunder shall be increased to be comparable to rental paid for agricultural purposes on like lands in the same vicinity if such rental is found to be in excess of the site rental then being paid hereunder.

With respect to the aforementioned site set aside for plant use, if such site is selected by Lessee and approved by Lessor, Lessee shall purchase said site, paying to the Lessor the fair market value thereof. Said fair market value shall be based upon the highest and best use of said site, notwithstanding the fact that the same may then be devoted to agricultural purposes. If the parties cannot agree upon the fair market value of such land within thirty (30) days after Lessee's receipt of written approval from Lessor, such value shall be determined by three qualified appraisers, one to be selected by each of the parties and the third by any judge of the Imperial County Superior Court. The rules of the American Arbitration Association shall apply and be binding upon the parties as to any such valuation. In the event of such sale, Lessor shall retain all geothermal and mineral rights under said site.

23. Notwithstanding anything to the contrary contained herein, in the event any or all of the lands covered by this Lease are included in a unit as provided for in Paragraph 19(b) hereof, such unit shall not exceed 5120 acres in areal extent, plus or minus 10%.

24. Should the Lessor cause any of said land to be used for other than agricultural purposes, Lessor shall have the right, at its own risk and expense,

to cause any existing easements and rights of way referred to in Paragraph 22 hereof to be relocated in a manner that will not unreasonably interfere with Lessee's operations hereunder.

10

25. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

26. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

IN WITNESS WHEREOF, the parties hereto have executed this agreement.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 21 day of May, 1973, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H:

THAT, REFERENCE IS HEREBY HAD to that certain Lease Agreement dated March 28, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book ____, at Page ____, et seq., of Official Records), whereby Lessor did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease; such lease being hereinafter referred to as "said lease";

AND, WHEREAS, Lessor and Lessee have agreed to amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

".... this lease shall remain in force for a period of twenty (20) years from the date hereof, called the 'primary term'"

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of thirty (30) years from the date hereof, called the 'primary term',..."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of twenty (20) years from the date hereof...."

shall be and hereby is amended to read as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of thirty (30) years from the date hereof...."

3. Effective with the rental period that begins in 1974, that part of the first sentence of Section 4 of said lease which now reads as follows:

13

"..., the sum of Forty and. No/100 DOLLARS (\$40.00)...."

shall be and hereby is amended to read as follows:

"...., the sum of Four Hundred and No/100 DOLLARS (\$400.00)...."

4. That part of Section 4a. of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 20 years...."

5. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

"b. That if within 25 years...."

6. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to March 28, 1975.

7. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

[County Recorder]

AMENDMENT OF LEASE AGREEMENT (SHORT FORM)

THIS AGREEMENT, made this 16th day of February, 1982, between the party whose name is subscribed hereto under the designation of "Lessor", hereinafter called "Lessor", and CHEVRON GEOTHERMAL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee,"

W I T N E S S E T H:

THAT REFERENCE IS HEREBY HAD to that certain Lease Agreement, dated February 17, 1977 (the short form of which is on record in the Office of the County Recorder of Imperial County, California, in Book 1401, Page 923, et seq., of Official Records), whereby Lessor did grant, let and lease unto Lessee's predecessor in interest for the purposes therein described in such lease; such lease being hereinafter referred to as "said lease;"

NOW THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of five (5) years from the date hereof, called the 'primary term'...."

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of six (6) years from the date hereof, called the 'primary term'...."

2. This Amendment of Lease agreement (Short Form) is made upon the terms, covenants and conditions set forth in that certain Amendment of Lease Agreement bearing even date herewith by and between the said parties hereto which Amendment of Lease Agreement is by this reference incorporated herein and made a part hereof in all respects as though the same were fully set forth herein.

3. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 16, 1983.

19

4. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 16th day of February, 1982, between the party whose name is subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" and CHEVRON GEOTHERMAL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee,"

WITNESSETH:

THAT REFERENCE IS HEREBY HAD to that certain Lease Agreement, dated February 17, 1977 (the short form of which is on record in the Office of the County Recorder of Imperial County, California, in Book 1401, Page 923, et seq., of Official Records), whereby Lessor did grant, let and lease unto Lessee's predecessor in interest for the purposes therein described in such lease; such lease being hereinafter referred to as "said lease;"

NOW THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of five (5) years from the date hereof, called the 'primary term'...."

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of six (6) years from the date hereof, called the 'primary term'...."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of five (5) years from the date hereof...."

shall be hereby amended to read as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of six (6) years from the date hereof...."

21

3. There is added to said lease the following Section 27:

"27. Subject to Lessor's rights under Section 4b. hereof and notwithstanding anything else to the contrary contained herein, if lessee completes a well or wells or a processing plant on said land or on the unit area capable of producing or processing lease products in quantities and quality deemed paying quantities by Lessee, Lessee may continue to pay or tender to Lessor, annually in advance of each lease anniversary date, rental until Lessee has made a sale of lease products produced from or allocated to said land. So long as such annual rental payments are paid or tendered, this lease shall remain in force and effect even though extended thereby beyond the primary term, and all payments so paid or tendered after the expiration of said primary term shall be deemed advance royalties, and so long as same are paid, each well or wells shall be deemed to be actually producing lease products in paying quantities under the terms hereof." The above mentioned advance royalties shall not be recoverable by lessee out of any future production of said lease products.

Lessee agrees to exercise due diligence in the drilling and development of wells and the production of lease products in paying quantities, provided however that unit operations conducted under the terms of the Heber Geothermal Unit Agreement (recorded an Book 1437, page 1262 et seq. Official Records of Imperial County, California) without cessation of 180 consecutive days for reasons other than those stated in Article XIV therein shall be considered as due diligence under this Section 27.

4. Lessee confirms that Section 21 of said lease shall remain in full force and effect throughout the primary term as extended hereby.

5. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 16, 1983.

6. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

22

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

EXHIBIT 10.4.10

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 11th day of March, 1964, by and between JOHN D. JACKSON and FRANCES JONES JACKSON, also known as FRANCES J. JACKSON, husband and wife hereinafter called "Lessor" (whether one or more) and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee,"

W I T N E S S E T H

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemical, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said, land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any and all of the above mentioned purposes. Lessee shall, also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased, land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose or maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

Parcel 1:

The South Half of Tract 52, Township 16 South, Range 14 East, S.B.M.,

Parcel 2:

The West 40 acres of the North Half of Tract 52, Township 16 South, Rang 14 East, S.B.M.,

Parcel 3:

The West Half of the South Half of Tract 51, Township 16 South, Range 14 East, S.B.M.,

Parcel 4:

The East Half of the North Half of Tract 52, Township 16 South, Range 14 East, S.B.M.,

Parcel 5:

Tract 48 1/2, Township 16 South, Range 13 and 14 East, S.B.M.,

Parcel 6:

The West 22 acres of Tract 47, Township 16 South, Ranges 13 and 14 East, S.B.M.
containing 240.00 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purposes of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of ten (10) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such

2

payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and

otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 11th day of March, 1965, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of Three Thousand Six Hundred Thirty and No/100 Dollars (\$3,630.00) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

3

It is expressly understood and agreed by the parties hereto:

- a. That if within 20 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and
- b. That if within 25 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is

in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall

4

pay all damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land, as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land, by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

7A. Notwithstanding anything to the contrary contained herein, Lessee agrees not to use the surface of the lands as described in Parcels One, Two and Four (1-2 & 4), that lay within a distance of 750 feet from the main residence of the Lessor.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental, agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended, until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at P.O. Box 78 El Centro, California, or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a Check therefor to BANK OF AMERICA, N. T. & S. A., El Centro Branch at EL CENTRO, California its

successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rental or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act

as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at P.O. Box 3495, San Francisco, California, 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

7

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a daily executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of

Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

19. (a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The

8

entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an

instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the

9

drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

22. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

IN WITNESS WHEREOF, the parties hereto have executed this agreement.

10

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 9th day of July, 1973, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee";

W I T N E S S E T H

THAT, REFERENCE IS HEREBY HAD to that certain Lease Agreement dated March 11, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1193., at Page 33, et seq., of Official Records), whereby Lessor and Jackson Feed Mill, Inc. did grant, let and lease

unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease; such lease being hereinafter referred to as "said lease";

AND, WHEREAS, Lessor and Lessee have agreed to amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of ten (10) years from the date hereof, called the 'primary term',...."

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of twenty (20) years from the date hereof, called the 'primary term',...."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof...."

shall be and hereby is amended to read as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of twenty (20) years from the date hereof...."

11

3. Effective with the rental period that begins in 1974, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of One Hundred Seventy-Two and No/100-----DOLLARS (\$172.00)...."

shall be and hereby is amended to read as follows:

"...., the sum of Thirty-Six Hundred/Thirty and No/100 Dollars (\$3,630.00)...."

4. That part of Section 4a, of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 20 years...."

5. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

b. That if within 25 years...."

6. Lessor does hereby grant, demise, lease and let unto Lessee only those certain lands included in said lease, situated in the County of Imperial, State of California, that are particularly described as follows:

Parcel 1: The South 1/2 of Tract 52, Township 16 South, Range 14 East, S.B.M.

Parcel 2: The West 40 acres of the North 1/2 of Tract 52, Township 16 South, Range 14 East, S.B.M.

Parcel 3: The West 1/2 of the South 1/2 of Tract 51, Township 16 South, Range 14 East, S.B.M.

Parcel 4: The East 1/2 of the North 1/2 of Tract 52, Township 16 South, Range 14 East, S.B.M.

containing 240 acres of land more or less, for the term and purposes and subject to all of the other provisions of said lease as hereby amended, and Lessor and Lessee further agree

12

that all provisions of that certain lease agreement above referred to shall apply separated and distinctly to the above-described lands and this amendment shall constitute and create a separate and distinct holding under that certain lease agreement above referred to. Lessor further agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledge receipt of rental in full under said lease to March 11, 1975.

7. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 1st day of October, 1979, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter

called "Lessor" (whether one or more), and Chevron U.S.A. INC. successor in interest to STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H

THAT, REFERENCE IS HEREBY HAD to certain Lease Agreement dated March 11, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1193, at Page 33 et seq., of Official Records), whereby Lessor and Jackson Feed Mill, Inc. did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease; such lease being hereinafter referred to as "said lease";

AND, WHEREAS, by amendment of lease agreement dated July 9, 1973, a short form of which was recorded in B-1353, P-34, et seq. of official records of Imperial County, California, said lease was amended;

AND, WHEREAS, Lessor and Lessee have agreed to further amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. Effective with the rental period that begins in 1980, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of Thirty Six Hundred Thirty & No/100 DOLLARS (\$3,630.00)...."

shall be and hereby is amended to read as follows:

"...., the sum of Six Thousand Fifty & No/100 DOLLARS (\$6,050.00)...."

2. Lessor does hereby grant, demise, lease and let unto Lessee only those certain lands included in said lease, situated in the County of Imperial, State of California, that are particularly described as follows:

Parcel 1: The South 1/2 of Tract 52, Township 16 South, Range 14 East, S.B.M.

14

Parcel 2: The West 40 acres of the North 1/2 of Tract 52, Township 16 South, Range 14 East, S.B.M.

Parcel 3: The West 1/2 of the South 1/2 of Tract 51, Township 16 South, Range 14 East, S.B.M.

Parcel 4: The East 1/2 of the North 1/2 of Tract 52, Township 16 South, Range 14 East, S.B.M.

containing 240 acres of land more or less, for the term and purposes and subject to all of the of the provisions of said lease as hereby amended, and Lessor and Lessee further agree that all provisions of that certain lease agreement above referred to shall apply separately and distinctly to the above-described lands and this amendment shall constitute and create a separate and distinct holding under that certain lease agreement above referred to.

Lessor further agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to March 11, 1980.

3. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 16th day of February, 1964, by and between JOHN D. JACKSON, Conservator for the Estate of APHIA JACKSON WALLAN hereinafter called "Lessor" (whether one or more) and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee,"

W I T N E S S E T H :

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

The E 1/2 of the S 1/2 of Tract No. 51, Township 16 South,
Range 14 East, S.B.M. containing 80 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of ten (10) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 16th day of February, 1965, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of Forty and 00/100 DOLLARS (\$40.00) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

- a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and
- b. That if within 15 years from the date hereof Lessee has not made

or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well, with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well, or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall, be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

3

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the

control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail, to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee a share of all severance, production and license taxes or other taxes or assessments levied or assessed on

4

account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share," as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at P.O. Box 78, EL CENTRO, California or lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to BANK of AMERICA, N.T.& S.A., El Centro Branch at EL CENTRO, California its successors and assigns, herein designated by lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators,

successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depositary until both Lessee and the depositary have been furnished with written evidence thereof satisfactory to them. Said depositary above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depositary and notify Lessee in writing at P.O. Box 3495, San Francisco, California 94120, of the name and address of such new depositary. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depositary designated herein or to any other depositary hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depositary of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire end undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which

5

Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depositary bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depositary bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

19. (a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and

6

royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or

contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall, mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

7

22. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

IN WITNESS WHEREOF, the parties hereto have executed this agreement.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 9th of July, 1973, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H :

THAT, REFERENCE IS HEREBY HAD to that certain Lease Agreement dated February 16, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1193, at Page 106 et seq., of Official Records), whereby Lessor did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease, such lease being hereinafter referred to as "said lease";

AND, WHEREAS, Lessor and Lessee have agreed to amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

".... this lease shall remain in force for a period of ten (10) years from the date hereof, called the 'primary term' , ..."

shall be and hereby is amended to read as follows:

".... this lease shall remain in force for a period of twenty (20) years from the date hereof, called the 'primary term' , ..."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof...."

shall be and hereby is amended to read as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of twenty (20) years from the date hereof...."

3. Effective with the rental period that begins in 1974, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of Forty and 00/100 DOLLARS (\$40.00).."

shall be and hereby is amended to read as follows:

"...., the sum of Twelve Hundred and No/100 DOLLARS (\$1,200.00)...."

4. That part of Section 4a. of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 20 years...."

5. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

"b. That if within 25 years...."

6. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 16, 1975.

7. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto;

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 1st day of October, 1979, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and CHEVRON U.S.A. INC. successor in interest to STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H :

THAT, REFERENCE IS HEREBY HAD to certain Lease Agreement dated February 16, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1193, at Page 106, et seq., of Official Records), whereby Lessor did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease; such lease being hereinafter referred to as "said lease";

AND, WHEREAS, by amendment of lease agreement dated July 9, 1973, a short form of which was recorded in B-1354, P-385, et seq. of official records of Imperial County, California, said lease was amended;

AND, WHEREAS, Lessor and Lessee have agreed to further amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. Effective with the rental period that begins in 1980, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of Twelve Hundred and No/100 DOLLARS (\$1,200.00)...."

shall be and hereby is amended to read as follows:

"...., the sum of Two Thousand and No/100 DOLLARS (\$2,000.00)...."

2. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 16, 1980.

3. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

Estate of Aphia Jackson Wallan

Exhibit 10.4.12

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 17 day of March, 1964, by and between HELEN S. FUGATE, a widow hereinafter called "Lessor" (whether one or more) and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee,"

W I T N E S S E T H

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in

the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

Tract No. 44 Township 16 South, Range 14 East, S.B.M. containing 80 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of twenty (20) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of thirty (30) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land provided that, commencing with the 17th day of March, 1965, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of Eight-hundred and no/100 DOLLARS (\$800.00) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the

surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

2

It is expressly understood and agreed by the parties hereto:

- a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and
- b. That if within 15 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land and to pay all, other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at 515 - Sandalwood Drive, El Centro, California, or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to Bank of America at El Centro, California its successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at P.O. Box 3495, San Francisco, California, 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in

regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge

of any such mortgage or other lien, or to the reimbursement to lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depositary bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depositary bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

19. (a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by

this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no

production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be

7

undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

22. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

IN WITNESS WHEREOF, the parties hereto have executed this agreement.

CONFIDENTIAL TREATMENT REQUESTED. CONFIDENTIAL PORTIONS OF THIS DOCUMENT HAVE BEEN REDACTED AND HAVE BEEN SEPARATELY FILED WITH THE COMMISSION.

EXHIBIT 10.4.13

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 16 day of February, 1964, by and between JOHN D. JACKSON and FRANCES J. JACKSON, husband and wife hereinafter called "Lessor" (whether one or more) and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee,"

W I T N E S S E T H

1. Lessor, for and in consideration of the \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any and all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for

that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

The NE 1/4 of the N 1/2 of Tract No. 51, Township 16 South, Range 14 East, according to the United States Government Plat of Resurvey, approved and on file in the United States Land Office at Los Angeles, California containing 40 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of ten (10) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor ***

*** Confidential material redacted and filed separately with the Commission.

2

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 16th day of February, 1965, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of *** (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of

producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and

b. That if within 25 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or products, Lessee's

*** Confidential material redacted and filed separately with the Commission.

3

obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said plant shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without

impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any

4

Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

5

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to

Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at P.O. Box 78, EL CENTRO, California, or Lessee may, at its option, pay any and all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to BANK OF AMERICA, N.T. & S.A., El Centro Branch its successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing as P.O. Box 3495, San Francisco, California, 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any

portion of said, land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's so interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee stay at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as

to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient or Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

7

19.(a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease. So as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land molded in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase

or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits

8

of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom may be dissolved by Lessee's filing for record an instrument so declaring. A copy of instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

22. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

IN WITNESS WHEREOF, the parties hereto have executed this agreement.

AMENDMENT OF LEASE AGREEMENT (SHORT FORM)

THIS AGREEMENT, made this 9th day of July, 1973, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H :

THAT, REFERENCE IS HEREBY HAD to that certain Lease Agreement dated February 16, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1193, at Page 298 et seq., of Official Records), whereby Lessor did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease such lease being hereinafter referred to as "said lease";

AND, WHEREAS, Lessor and Lessee have agreed to amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of ten (10) years from the date hereof, called the 'primary term', ..."

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of twenty (20) years from the date hereof, called the 'primary term'...."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof...."

shall be and hereby is amended to read as follows:

10

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of twenty (20) years from the date hereof...."

3. That part of Section 4a. of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 20 years...."

4. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

"b. That if within 25 years....."

5. Said lease is further amended as set forth in that certain Amendment of Lease Agreement bearing even date herewith by and between the parties hereto and covering the lands described in Section 1 of said lease, and by this reference incorporated into this Amendment of Lease Agreement.

6. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 16, 1975.

7. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

11

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 20th day of February, 1964, by and between John A. Straub and Edith D. Straub, also known as John A. Straub and Edythe D. Straub, husband and wife hereinafter called "Lessor" (whether one or more) and Standard Oil Company of California, a

corporation, hereinafter called "Lessee,"

W I T N E S S E T H

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products " For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land, and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

Tract 42 and the South Half of Tract 41-1/2, Township 16 South, Range 14 East, S.B.M., containing 239.76 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of twenty (20) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operation or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

2

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period twenty (20) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 20th day of February, 1965, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated the lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of One Hundred Nineteen and 88/100 DOLLARS (\$119.88) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and

b. That if within 15 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing,

extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or

3

products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders

4

of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said

land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default, provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and Located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

5

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at 705 Desert Gardens Drive EL CENTRO, California or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to SECURITY FIRST NATIONAL BANK OF LOS ANGELES, El Centro Branch at EL CENTRO California its

successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the Land or minerals covered by this Lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at 3495, San Francisco, California, 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the some proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument

of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

7

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

19.(a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the Unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease

8

provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth

therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, In the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

22. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

AMENDMENT OF LEASE AGREEMENT (SHORT FORM)

THIS AGREEMENT, made this 9th day of July, 1973, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee";

W I T N E S S E T H :

- - - - -

THAT, REFERENCE IS HEREBY HAD to that certain Lease Agreement dated February 20, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1193, at Page 74 et seq., of Official Records), whereby Lessor's predecessor in interest did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease; such lease being hereinafter referred to as "said lease";

AND, WHEREAS, Lessor and Lessee have agreed to amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of ten (10) years from the date hereof, called the 'primary term',...."

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of twenty (20) years from the date hereof, called the 'primary term'...."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof...."

shall be and hereby is amended to read as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of twenty (20) years from the date hereof...."

3. That part of Section 4a. of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 20 years...."

4. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

"b. That it within 25 years...."

5. Said Lease is further amended as set forth in that certain Amendment of Lease Agreement bearing even date herewith by and between the parties hereto and covering the lands described in Section 1 of said lease, and by this reference incorporated into this Amendment of Lease Agreement.

6. Lessor does hereby grant, demise, lease and let unto Lessee only those certain lands included in said lease, situated in the County of Imperial, State of California, that are particularly described as follows:

Tract 42, Township 16 South, Range 14 East, S.B.M.

containing 160 acres of land more or less, for the term and purposes and subject to all of the other provisions of said lease as hereby amended, and Lessor and Lessee further agree that all provisions of that certain lease agreement above referred to shall apply separately and distinctly to the above-described lands and this amendment shall constitute and create a separate and distinct holding under that certain lease agreement above referred to. Lessor further agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 20, 1975.

7. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

AMENDMENT OF LEASE AGREEMENT (SHORT FORM)

THIS AGREEMENT, made this 14th day of March, 1975, by and between JOHN D. JACKSON, JR. and CAROLE JACKSON, his wife, hereinafter called "Lessor", and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee";

W I T N E S S E T H :

- - - - -

THAT, WHEREAS, by that certain Lease Agreement dated February 20, 1964 and recorded in this Office of the County Recorder of Imperial County, California, in Book 1193, at Page 74 et seq. of Official Records, John A. Straub and Edith D. Straub, his wife, as Lessors, therein did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease; such lease being hereinafter referred to as "said lease"; and

WHEREAS, by instrument dated June 11, 1969 and recorded in the Office of the County Recorder of Imperial County California, in Book 1279 at Page 799 of Official Records, Lessor became the owner and holder of the Lessor's interest under said lease only as to those certain lands included in said lease described as follows: Tract 42, Township 16 South, Range 14 East, SBM, County of Imperial, State of California, containing 160 acres of land more or less, hereinafter referred to as "said land"; and

WHEREAS, by that certain amendment of Lease Agreement dated July 9, 1973, a Short Form of which was recorded in the Office of the County Recorder of Imperial County, California, in Book 1353 at Page 25, et. seq. of Official Records, said lease was amended as therein provided insofar as it covered said land; and

WHEREAS, Lessor and Lessee have agreed to further amend said lease as hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of One Dollar (\$1.00) and other valuable consideration, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. Said Lease is further amended as set forth in that certain Amendment of Lease Agreement bearing even date herewith by and between the parties hereto and covering the lands above as said land and by this reference incorporated into this Amendment of Lease Agreement.

2. Lessor hereby ratifies said lease, as amended, insofar as it covers said land and acknowledges full performance by Lessee of all of its obligations thereunder to

the date hereof and, as herein amended, said lease shall remain in full force and effect and, to implement this amendment, Lessor does hereby lease, let and demise unto Lessee said lands pursuant to the terms of said lease, as amended.

3. The provisions of this agreement shall be binding upon and shall inure to the benefit of the respective heirs, executors, administrators, successors and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

LESSOR

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land

hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products". For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all, of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

The North Half of Tract No. 49, Township 16 South, Range 14 East, S.B.B.&M., containing 160 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of ten (10) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and

expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operation or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

2

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 1st day of July, 1972, if Lessee has not terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of Eight Hundred and no/100 DOLLARS (\$ 800.00) (each of such annual periods being hereinafter referred to as "rental period") until royalty is payable on said land or lands, which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and

b. That if within 15 years from the date hereof Lessee has not made or arrange for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or

products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a

market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily

subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed

5

on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at 2122 Westwood, Santa Ana, California or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to _____ at _____ its successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the Land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder

shall in writing designate a different depository and notify Lessee in writing at P.O. Box 3495, San Francisco, California 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or

6

invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee

shall protect said land from liens arising from Lessee's operations thereon.

7

19.(a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any

8

weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument

THIS AGREEMENT, made this 1st day of July, 1981 between the party or parties whose names are subscribed hereto under the designation of "Lessor",

hereinafter called "Lessor" (whether one or more), and CHEVRON U.S.A. INC., successor in interest to Standard Oil Company of California, a corporation, hereinafter called "Lessee",

W I T N E S S E T H:

THAT REFERENCE IS HEREBY HAD to that certain Lease Agreement, dated July 1, 1971 (the short form of which is of record in the Office of the County Recorder of Imperial County, California, in Book 1315, at Page 107, et seq., of Official Records), whereby Lessor and/or Lessor's predecessor in interest did grant, let and lease unto Lessee for the purposes therein described in such lease; such lease being hereinafter referred to as "said lease";

AND, WHEREAS, Lessor and Lessee have agreed to amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of ten (10) years from the date hereof, called the 'primary term'...."

shall be and hereby is amended to read as follows:

"...., this lease shall remain in force for a period of fifteen (15) years from the date hereof, called the 'primary term'...."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof...."

shall be and hereby is amended to read as follows:

11

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of fifteen (15) years from the date hereof...."

3. Effective with the rental period that begins in 1982, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of Eight Hundred and no/100 (\$800.00)...."

shall be and hereby is amended to read as follows:

"...., the sum of Four Thousand and no/100 (\$4,000.00)...."

4. That part of Section 4a. of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 15 years...."

5. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

"b. That it within 20 years...."

6. There is added to said lease the following Section 24:

"24. Subject to Lessor's rights under Section 4b. hereof and notwithstanding anything else to the contrary contained herein, if Lessee completes a well or wells or a processing plant on said land or on the unit area capable of producing or processing lease products in quantities and quality deemed paying quantities by Lessee, Lessee may continue to pay or tender to Lessor, annually in advance of each lease anniversary date, rental until Lessee has made a sale of lease products produced from or allocated to said land. So long as such annual rental payments are paid or tendered, this lease shall remain in force and effect even though extended thereby beyond the primary term, and all payments so paid or tendered after the expiration of said primary term shall be deemed advance royalties, and so long as same are paid, each well or wells shall be deemed to be actually producing lease products in paying quantities under the terms hereof."

12

7. To Implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to July 1, 1982.

8. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

LESSEE

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of the 28 day of February 1964, by and between GUS KURUPAS and GUADALUPE KURUPAS, Husband and Wife hereinafter called "Lessor" (whether one or more) and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee,"

W I T N E S S E T H

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all, rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

The West 80 acres of the North Half of Tract 51, Township 16 South, Range 14 East S.B.M. containing 80 acres of land more or less.

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period ten (10) years from the date hereof, called the "primary term," and thereafter so long as lease products, or any one or more of them, is produced from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or

unitized with said land, as provided in Section 19 hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area").

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 10% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well. If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

2

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 28th day of February, 1965, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of Forty and no/100 (\$40.00) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraph 19 hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 16 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

- a. That if within 10 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and

- b. That if within 15 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all, operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations or production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is

3

recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agricultural, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn now on said land without written consent of Lessor. Lessee shall pay all damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease. If Lessee elects to use all or any part of the surface of said land for evaporation or settling basins or extraction, power, or processing plants Lessee may, at its option, purchase the surface rights to the land so utilized by it at the actual market value or going price for similar rights in the vicinity.

8. The rights of Lessor and Lessee hereunder may be assigned in whole or in part. No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

9. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof)

while Lessee is

4

prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan of orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plan which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation.

10. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid, said 15-day period shall be extended until 5 days after such dispute is settled by final, court decree, arbitration or agreement.

If lessee shall be in default in the performance of any obligations under this lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

11. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

12. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any

5

thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

13. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to

deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

14. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at Route 2, Box 63, El Centro, California or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to SECURITY FIRST NATIONAL BANK of LOS ANGELES, El Centro Branch at El Centro, California its successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at P.O. Box 3495, San Francisco, California 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

6

15. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

16. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In

the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

17. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittees.

7

18. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

19.(a) Lessee is given the sole right and option by written declaration of pooling at any time or from time to time, within twenty (20) years from the date hereof, to combine, pool or unitize in whole or in part as to any stratum or strata all or any part of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating units for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and the lands covered hereby, in whole or in part or as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by

Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease

8

provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

20. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

21. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

22. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the heirs, executors, administrators, successors and assigns of Lessor and Lessee.

IN WITNESS WHEREOF, the parties hereto have executed this agreement.

AMENDMENT OF LEASE AGREEMENT

THIS AGREEMENT, made this 18th day of April, 1973, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and STANDARD OIL COMPANY OF CALIFORNIA, a corporation, hereinafter called "Lessee",

W I T N E S S E T H:

THAT, REFERENCE IS HEREBY HAD to that certain Lease Agreement dated February 28, 1964 (such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1193, at Page 129, et seq., of Official Records), whereby Lessor did grant, let and lease unto Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease, such lease being hereinafter referred to as "said lease";

AND, WHEREAS, Lessor and Lessee have agreed to amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. That part of the first sentence of Section 2 of said lease which now reads as follows:

"...., this lease shall remain in force for a period of ten (10) years from the date hereof, called the `primary term,...."

shall be and hereby is amended to read as follows:

".... this lease shall remain in force for a period of twenty (20) years from the date hereof, called the `primary term' ,...."

2. That part of the first sentence of Section 4 of said lease which now reads as follows:

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of ten (10) years from the date hereof...."

shall be and hereby is amended to read as follows:

11

"4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of twenty (20) years from the date hereof...."

3. Effective with the rental period that begins in 1974, that part of the first sentence of Section 4 of said lease which now reads as follows:

"...., the sum of Forty and no/100 DOLLARS (\$40.00)...."

shall be and hereby is amended to read as follows:

"...., the sum of Four Hundred and no/100 DOLLARS (\$400.00)...."

4. That part of Section 4a. of said lease which now reads as follows:

"a. That if within 10 years...."

shall be and hereby is amended to read as follows:

"a. That if within 20 years...."

5. That part of Section 4b. of said lease which now reads as follows:

"b. That if within 15 years...."

shall be and hereby is amended to read as follows:

"b. That if within 25 years...."

6. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 28, 1975.

7. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

12

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

1. Lessor, for and in consideration of the sum of \$10 in hand paid, and of the royalties herein provided and of the covenants and agreements hereinafter contained, hereby grants, demises, leases and lets unto Lessee, the land hereinafter described with the sole and exclusive right to Lessee to drill for, produce, extract, take and remove therefrom water, brine, steam, steam power, minerals in solution or suspension in liquid or steam (other than oil), salts, chemicals, gases (other than gas associated with oil), and other products produced or extracted by Lessee from any thereof. Each of the foregoing is hereinafter sometimes termed "a lease product" and all thereof are sometimes termed "the lease products." For the same consideration Lessee is hereby granted the right to store, utilize, process, convert, and otherwise use such lease products upon said land and to sell the same or any part thereof off said land during the term hereof, with the right of entry thereon at all times for said purposes, and to construct, use, maintain, erect, repair and replace thereon, and to remove therefrom all roads, pipelines, ditches and lanes, telephone and telegraph lines, utility installations, power lines, poles, tanks, evaporation or settling basins, extraction or processing plants, machinery, equipment, buildings, electric power plants, and equipment for generation and transmission of steam power, and electric power, and for the handling, treatment or storage of lease products, and all structures and facilities relating thereto, which Lessee may desire to erect, construct or install in carrying on Lessee's business and operations on or from said land and other lands in the vicinity of

said land; and Lessee shall have the further right to erect, maintain, operate and remove a plant or plants, structures and facilities, with all necessary appurtenances for the conversion of steam to electric power, and for the extraction of lease products from steam, brine or water produced from said land, and other lands in the vicinity of said land, including all rights necessary or convenient thereto, together with rights of way for passage over, upon and across and ingress and egress to and from said land for any or all of the above mentioned purposes. Lessee shall also have the right to dispose of waste brine and other waste products in a well or wells drilled or converted for that purpose on the leased land or on other land in the vicinity, and the right to inject water, brine, steam and gases in a well or wells on said land or such other land for the purpose of maintaining or restoring pressure in the productive zones beneath said land or other land in the vicinity thereof. The said land included in this lease is situated in the County of Imperial, State of California, and is described as follows, to wit:

The West Half of Tract No. 45, Township 16 South,
Range 14 East, S.B.B. & M.,

containing 160 acres of land, more or less;
without right of entry, however, upon the surface or the upper 500 feet of the subsurface thereof except as to four (4) two-acre surface use sites as described hereinafter, together with necessary and convenient ingress and egress rights and pipeline, power and communication rights of way in, on, over, under and through said West Half of Tract No. 45 for the purposes and uses provided herein.

Said surface use sites are described as follows:

Beginning at the southwest corner of Tract 45, Township 16 South, Range 14 East, S.B.B. & M; thence easterly along the southerly line of said Tract, 512 feet; thence northerly at right angles 85 feet to the true point of beginning; thence continuing northerly 295.16 feet; thence easterly parallel with said southerly line, 295.16 feet; thence southerly at right angles, 295.16 feet to a point 85 feet northerly of the said southerly line; thence westerly parallel with said southerly line 295.16 feet to the point of beginning, containing 2.00 acres.

Beginning at the southeast corner of the west one-half of Tract 45, Township 16 South, Range 14 East, S.B.B. & M; thence westerly along the southerly line of said Tract, 512 feet; thence northerly at right angles 85 feet to the true point of beginning; thence continuing northerly 295.16 feet; thence westerly parallel with said southerly line, 295.16 feet; thence southerly at right angles, 295.16 feet to a point 85 feet northerly of the said southerly line; thence easterly, parallel with said southerly line 295.16 feet to the point of beginning, containing 2.00 acres.

Beginning at the northwest corner of Tract 45, Township 16 South, Range 14 East, S.B.B. & M.; thence easterly along the northerly line of said Tract, 512 feet; thence southerly at right angles 85 feet to the true point of beginning; thence continuing southerly 295.16 feet; thence easterly parallel with said northerly line, 295.16 feet; thence northerly at right angles, 295.16 feet to a point 85 feet southerly of the said northerly line; thence westerly parallel with said northerly line 295.16 feet to the point of beginning, containing 2.00 acres.

Beginning at the northeast corner of the west one-half of Tract 45, Township 16 South, Range 14 East, S.B.B. & M.; thence westerly along the northerly line of said Tract, 512 feet, thence southerly at right angles 85 feet to the true point of beginning; thence continuing southerly 295.16

feet; thence westerly parallel with said northerly line, 295.16 feet; thence northerly at right angles, 295.16 feet to a point 85 feet southerly of the said northerly line; thence easterly, parallel with said northerly line 295.16 feet to the point of beginning, containing 2.00 acres,

all of which subsurface and surface lands are herein referred to collectively as "said land".

This lease shall cover all the interest in said land now owned or hereafter acquired by Lessor, even though greater than the undivided interest (if any) described above. For the purpose of calculating any payments based on acreage, Lessee at Lessee's option, may act as if said land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

1.A. As rental, in addition to the other rental provisions and the damage compensation provisions of this lease, Lessee agrees to pay Lessor \$100.00 per acre per year for so much of Lessor's surface acreage described in Paragraph 1 hereof actually used or occupied by Lessee at any time or times during such annual periods. Payments required under this paragraph shall be made within thirty (30) days following the first anniversary of the initial such surface use or occupancy and at like annual periods thereafter for so long as any such use or occupancy continues.

2. Subject to the other provisions herein contained, this lease shall remain in force for a period of five (5) years from the date hereof, called the "primary term", and thereafter so long as lease products, or any one or more of them, is produced in commercial quantities (as hereinafter defined) from, or Lessee is engaged in drilling, extraction, processing or reworking operations on said land hereunder or on land pooled or unitized with said land, as provided in Paragraphs 21(a) and 21(b) hereof, (said land, together with such pooled or unitized land, being hereinafter sometimes called "the unit area"). The phrase "commercial quantities" is hereby defined (for the purposes of this paragraph and this paragraph only) as those quantities of lease products which would provide Lessor an annual royalty equal to no less than a 6% annual return on an amount constituting four (4) times the assessed value of said land.

3. Lessee shall pay to Lessor, on or before the last day of each calendar month, the royalties accrued and payable for the preceding calendar month, and in making such payments Lessee shall furnish to Lessor statements setting forth the basis for computation of such royalty.

As royalty and rental, Lessee shall pay to Lessor 12 1/2% of the value at the well of all lease products produced, saved and sold. As used herein, the term "value at the well" shall mean the actual price received by Lessee for the sale of lease products at the well.

If such products are not sold by Lessee at the well but are sold at a plant or plants on or in the vicinity of said land, then the value at the well shall be determined by deducting from the actual price received by Lessee for the sale of such lease products all costs and expenses incurred by Lessee in transporting, manufacturing, processing and otherwise handling such lease products prior to the actual sale thereof. If lease products are not sold by Lessee at the well or at such a plant but are otherwise used by Lessee in its chemical operations or disposed of for value, then the value of such lease products at the well shall be determined by deducting from the price thereof at the nearest point where the same or similar products are sold in substantial quantities, the cost of transporting, manufacturing, processing and otherwise handling such lease

products prior to sale thereof. Lessee shall meter, gauge or otherwise determine the volume and quality of all lease products commingled and such metering or gauging shall furnish the basis for computing Lessor's royalties hereunder. Lessee may use, free of royalty, steam, steam power, electric power, and water developed from said land by Lessee, for all operations hereunder, and Lessee shall not be required to account to Lessor for, or pay royalty on any lease product or products reasonably lost or consumed in operations hereunder.

4. Lessee agrees to commence drilling, extraction or processing operations on said land or on the unit area within the period of five (5) years from the date hereof and to prosecute such operations with reasonable diligence until lease products or any thereof shall have been found, extracted and processed in quantities deemed paying quantities by Lessee, or until further operations would, in the judgment of Lessee, be unprofitable or impracticable, or Lessee may at any time within said primary term terminate this lease and surrender said land; provided that, commencing with the 7th day of April, 1973, if Lessee has not theretofore commenced any such operations on said land or on the unit area or terminated this lease, Lessee shall pay or tender to Lessor annually, in advance, as rental, the sum of ONE THOUSAND SIX HUNDRED AND NO/100 DOLLARS (\$1,600.00) (each of such annual periods being hereinafter referred to as "rental period") until operations are commenced on said land or lands which have been pooled or unitized therewith, pursuant to paragraphs 21(a) and 21(b) hereof, or this lease terminated as herein provided; it being understood that in the event of the surrender or termination of this lease as to any portion or portions of the land covered thereby, said rental shall be reduced proportionately as provided in paragraph 18 hereof. The consideration expressed in paragraph 1 hereof covers all rental to the date last above mentioned. If Lessee shall elect not to commence operations on said land or on the unit area during the primary term, as above provided, this lease shall terminate.

It is expressly understood and agreed by the parties hereto:

- a. That if within 5 years from the date hereof Lessee has not completed one or more wells or a processing plant on the unit area or on said land, capable of producing or processing lease products or any thereof

4

in quantities and quality deemed paying quantities by Lessee, then Lessor may, at his option, terminate this lease; and

- b. That if within 10 years from the date hereof Lessee has not made or arranged for a sale or sales of lease products or any thereof, produced from or allocated to said land, then Lessor may, at his option, terminate this lease.

5. If at any time or times after the primary term or within three (3) months before expiration of the primary term, all operations and all production hereunder on said land or on the unit area shall cease for any cause other than those for which specific provision is made herein, this lease shall not terminate if Lessee shall commence or resume drilling, processing, extraction or reworking operations of production within three (3) months after such cessation.

6. Lessee shall be obligated to produce only such quantity or quantities of lease products as it may be able to market at the well or wells, plant or plants. It is recognized that the market demand for lease products may vary from time to time and during such periods as there is no market at the wells or plant for any lease product or products, Lessee's obligation to produce, process and extract such lease product or products shall be suspended. If such period or periods occur after royalty producing production is first commenced, Lessee shall pay Lessor monthly in advance the sum of \$250.00, which payments, shall continue until royalty producing production has been reestablished or the lease has been surrendered in accordance with its terms.

Subject to the foregoing and except as herein otherwise provided, it is agreed that the Lessee shall drill such wells and operate each completed well with reasonable diligence and in accordance with good operating practice so long as such wells shall produce lease products in paying quantities while this lease is in force as to the portion of said land on which such well or wells are situated; but in conformity with any reasonable conservation program affecting the drilling of wells or the production of lease products from said land, which the Lessee may either voluntarily or by order of any authorized governmental agency adopt, subscribe to or be subject to.

7. Subject to the provisions of Paragraph 10 hereinafter, and all other provisions of this lease notwithstanding, Lessee agrees, as additional consideration for this lease, to commence actual drilling on said land of an "initial exploratory well" within one year of the date of this lease and to diligently pursue the drilling of said well to a depth of 1500 feet or to a depth at which temperatures of 212(0) F or more are encountered, whichever depth as the lesser. Lessee's obligation to drill such well shall not be avoided by any prior purported surrender of rights, payment of annual delay rental or otherwise, and neither commencement of drilling nor any operations whatsoever of said "initial

5

exploratory well" shall avoid Lessee's obligation to pay rental under the provisions of Paragraph 4 hereinabove. Lessee further agrees, as aforesaid, that in the event Lessee, in Lessee's sole opinion, determines that the results of said "initial exploratory well" warrants the drilling of a well for the production of lease products as provided for in said Paragraph 4, Lessee shall complete the drilling of said second well on said land within one year after the date of completion of drilling of said "initial exploratory well". In the event said second well is capable of producing lease products in commercial quantities and quality, Lessee shall pay Lessor, in absence of royalty producing production, an annual "shut-in" payment in the amount of \$6,000.00, subject to Lessee's right of surrender hereunder. Said payment shall be made annually in advance beginning two years after the date of this lease. Said payment shall continue, in absence of surrender by Lessee, until royalty producing production as first commenced, either from said second well or from any subsequently drilled well on said land or on lands pooled or unitized with said land under the provisions of Paragraphs 21(a) and 21(b) hereinafter.

8. The possession by Lessee of said land shall be sole and exclusive excepting only that Lessor reserves the right to occupy and use or to lease the surface of said land for agriculture, horticultural or other surface uses, except those granted to Lessee hereunder, which uses shall be carried on by Lessor subject to, and with no interference with, the rights or operations of Lessee hereunder. No well shall be drilled closer than 100 feet to any residence or barn new on said land without written consent of Lessor. Lessee shall pay for damages caused by Lessee's operations to houses, barns, growing crops, fences and irrigation systems. Lessee shall have the right to drill such wells on said land as Lessee may deem desirable for the purposes hereof and Lessee shall utilize or use only so much of said land as is necessary or reasonably convenient for Lessee's operations hereunder and shall interfere as little as reasonably necessary with the use and occupancy of said land by Lessor. No default of Lessee hereunder with respect to any well, or portion of this lease, shall impair Lessee's rights with respect to any other well or portion of this lease. Lessee shall exercise all reasonable care in Lessee's operations on said land to avoid damage to the fresh water table.

9. The rights of Lessor and Lessee hereunder may be assigned in whole or in part, provided that in absence of Lessor's further written consent, no assignment shall be made of all or any part of the Lessee's estate in this lease to any person or entity having a net worth of less than Ten Million Dollars (\$10,000,000.00).

No present or future division of Lessor's ownership as to different portions or parcels of said land shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee's operations may be conducted without regard to any such division. If all or any part of this lease is assigned, no leasehold owner shall be liable for any act or omission of any other leasehold owner, and failure by one to pay rental shall not affect the rights of others--rental being apportionable in proportion to acreage.

6

10. The obligations of Lessee hereunder shall be suspended (but without impairment of Lessor's rights under (a) and (b) of paragraph 4 hereof) while Lessee is prevented or hindered from complying therewith in part or in whole, by strikes, lockouts, labor disturbances, acts of God, unavoidable accidents, laws, rules, regulations or orders of any Federal, state, municipal or other governmental agency, acts of war or conditions arising out of or attributable to war, shortage of necessary material, equipment or labor, or restrictions in, or limitations upon the use thereof, inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land, delays in transportation, and also matters beyond the control of Lessee, whether similar to the matters herein specifically enumerated or not. This lease shall remain in full force and effect during any suspension of Lessee's obligations under any provisions of this paragraph, and for a reasonable time thereafter, provided that after the removal of the cause or causes preventing or hindering the performance of such obligation, Lessee, subject to the other provisions of this Lease, diligently commences or resumes the performance of such obligation. Notwithstanding anything to the contrary herein provided, if any of Lessee's obligations hereunder conflict with or violate the provisions of any reasonable conservation program or plan or orderly development, whether now or hereafter adopted, to which Lessee may voluntarily subscribe, or of any conservation program or plans which is now or may hereafter be prescribed by any order of any governmental agency, Lessee shall not be obligated to perform such obligation. If the permission or approval of any governmental agency is necessary before drilling operations may be commenced on said land, then if such permission or approval has been applied for at least 30 days prior to the date upon which such operations must be commenced under the terms hereof, the obligation to commence such operations shall be suspended until thirty (30) days after the governmental permit is granted or approval given, or if such permit or approval is denied initially, then so long as Lessee in good faith appeals from such denial or conducts further proceedings in an attempt to secure such permit or approval and thirty (30) days thereafter. However, in no case whatsoever shall Lessee's obligations under this lease be suspended in any individual instance under this paragraph for more than three (3) years. Notwithstanding anything to the contrary herein provided, the inability to secure or absence of a market for the sale of lease products which can be produced or recovered in commercial quantities from said land shall not suspend the obligation of Lessee as to the monthly payments provided for in Paragraph 6 or the annual shut-in payment provided for in Paragraph 7 hereof.

11. If Lessee shall fail to pay any installment of royalty or rental when due and if such default shall continue for a period of 15 days after receipt by Lessee of written notice thereof from Lessor to Lessee, then at the option of Lessor, this lease shall terminate as to the portion or portions thereof as to which Lessee is in default; provided, however, that if there be a bona fide dispute as to the amount due and all undisputed amounts are paid,

7

said 15-day period shall be extended until 5 days after such dispute as settled by final court decree, arbitration or agreement.

If Lessee shall be in default in the performance of any obligations under this Lease, other than the payment of rentals or royalties, and if, for a period of 90 days after written notice is given to Lessee by Lessor of such default, Lessee shall fail to commence and thereafter diligently and in good faith prosecute action to remedy such default, Lessor may terminate this Lease.

12. Lessee agrees to defend and indemnify Lessor against, and to hold Lessor harmless from, all claims for damages to or destruction of property and injury to or death of persons that result from Lessee's operations in or on said land or from a condition caused by Lessee.

13. Lessee shall pay all taxes that may be levied against the improvements, plant, machinery and personal property owned by Lessee and located upon any part of said land.

14. Lessee shall also pay Lessee's share of any and all taxes assessed during the term of this lease upon any products of Lessee's operations hereunder, together with Lessee's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products or any thereof on or from said land, or on or from such portion of said land as Lessee may be holding under this lease on the date of such tax lien.

15. Lessor agrees to pay Lessor's share of any and all taxes assessed upon any products of Lessee's operations hereunder, together with Lessor's share of all severance, production and license taxes or other taxes or assessments levied or assessed on account of the production of lease products from said land, and to pay all other taxes assessed against said land, whether the same are assessed to Lessor or Lessee or otherwise, and Lessee is hereby authorized to pay all such taxes and assessments on behalf of Lessor and to deduct the amount so paid from any royalties or moneys due Lessor hereunder. "Lessee's share" and "Lessor's share", as used above refers to Lessee's and Lessor's respective proportionate parts of the gross proceeds from the sale of any and all lease products produced, saved and sold from said land by Lessee or allocated to said land under the terms of any unit or pooling plan during the preceding calendar year.

16. All royalties, rentals and other payments payable in money hereunder shall be paid to Lessor by Lessee mailing or delivering a check therefor to Lessor at c/o Miss G. Nowlin, 1031 East Mountain Drive, Santa Barbara, California 93108, or Lessee may, at its option, pay any or all royalties, rentals and other payments payable in money hereunder by mailing or delivering a check therefor to Crocker National Bank, Santa

Barbara Main Office at 1001 State Street, Santa Barbara, California 93101 its successors and assigns, herein designated by Lessor as depository, hereby granting to said depository full power and authority on behalf of Lessor and on behalf of the heirs, executors, administrators, successors and assigns of Lessor, and each of them, to collect and receipt for all sums of money due and payable from Lessee to Lessor hereunder, and to settle all accounts and accounting of rentals, royalties and other payments payable in money hereunder. No change in the ownership of the land or minerals covered by this lease and no assignment of rentals or royalties shall be binding upon Lessee or the depository until both Lessee and the depository have been furnished with written evidence thereof satisfactory to them. Said depository above named shall continue to act as such until the owners and holders of at least two-thirds of Lessor's estate hereunder shall in writing designate a different depository and notify Lessee in writing at 225 Bush Street, San Francisco, CA 94120, of the name and address of such new depository. The payment of any and all rentals, royalties and other payments hereunder by Lessee to the depository designated herein or to any other depository hereafter designated by Lessor, as aforesaid, shall be a full acquittance and discharge of Lessee of and from any and all

liability to Lessor, and to the heirs, executors, administrators, successors and assigns of Lessor, and each of them, for any part of such rentals, royalties or other payments, and Lessee will not be responsible at any time for the disposition or disbursement by any such depository of all or any part of any moneys received by it hereunder.

17. It is agreed that if Lessor owns a less interest in the sole and exclusive rights herein granted Lessee, than the entire and undivided fee simple estate therein, then any royalties, rentals and other payments herein provided for shall be paid Lessor only in the proportion which Lessor's interest bears to the whole and undivided fee. In the event Lessee's estate hereunder shall fail, for a cause other than Lessee's default hereunder, in regard to any portion of said land or any interest therein, such failure shall not affect or invalidate Lessee's estate hereunder in regard to the remaining portions of said lands or the remaining interests therein and this lease shall nevertheless continue in full force and effect with respect to said remaining portions of said land or remaining interests therein, and Lessee shall not be accountable to Lessor for any payment theretofore made with respect to said portion of said land or such interest in regard to which Lessee's estate hereunder has failed. If and whenever it shall be necessary so to do in order to protect Lessee's interest under this lease, Lessee may at its option pay and discharge at any time any mortgage or other lien now or hereafter attaching to said land or any part thereof and in such event Lessee shall be subrogated to all of the rights of the owner or holder of such mortgage or other lien and Lessee may in addition thereto, at its option, apply to the discharge of any such mortgage or other lien, or to the reimbursement to Lessee for any amount so paid by it, any rentals, royalties or other sums accruing or payable hereunder, to the owner of the lands to which such mortgage or other lien attaches.

9

18. Lessee may at any time or times surrender this lease as to all or any portion of said land and be relieved of all obligations thereafter accruing as to the acreage surrendered, and thereafter the rental shall be reduced in the same proportion that the acreage covered hereby is reduced. In the event this lease shall be surrendered under the provisions of this paragraph, or assigned as hereinabove provided as to any portion or portions of said land, Lessee shall have such rights of way or easements hereunder, over, upon and across the land as to which this lease is so surrendered or assigned as shall be necessary or convenient for Lessee's operations on the land retained by it and other lands in the vicinity thereof. Upon any surrender or assignment of this lease as to all or any portion of said land, Lessee shall be relieved of all further obligations hereunder with respect to the lands so surrendered or assigned. Any such surrender shall become effective upon delivery to Lessor, or to the depository bank herein designated, or the deposit in the United States mail, postage prepaid, of a duly executed duplicate of an instrument of surrender properly addressed to Lessor or to such depository bank. Within a reasonable time thereafter, Lessee shall record the original of such instrument of surrender.

19. Lessee shall have the right at any time and from time to time during the continuance hereof and within a reasonable time after the surrender or any termination of this lease, to remove from said land all equipment, machinery, installations, and any other property or improvements belonging to or furnished by Lessee or Lessee's permittee. In the abandonment of any and all wells drilled by Lessee under the terms hereunder, Lessee shall comply with the regulations of all governmental authorities having jurisdiction over such abandonments.

20. All labor to be performed and material to be furnished in the operations of Lessee hereunder shall be at the cost and expense of Lessee, and Lessor shall not be chargeable with nor liable for any part thereof. Lessee shall protect said land from liens arising from Lessee's operations thereon.

21. (a) Lessee is given the sole right and option by written declaration of

pooling at any time or from time to time, within twenty (20) years from the date hereof (provided this lease is still in effect) to combine, pool or unitize in whole or in part as to any stratum or strata all (and no less than all) of said lands with other lands not subject to this lease so as to create one or more reasonably compact operating unit for any operating or producing purpose. Such written declaration of pooling shall describe the pooled lands and shall become effective when recorded in the Office of the County Recorder in the county where the land is situated. Lessee shall give written notice of such pooling to those Lessors whose lands are so pooled. Lessors agree that with respect to all lease products obtained from any lands included within any such operating unit, whether or not from lands covered by this lease, there shall be allocated to and deemed to have been produced from the lands covered by this lease and included in such operating unit, only that proportion of the entire production from such operating unit that the amount of acreage

10

within the lands herein leased and included in such operating unit bears to the total acreage of all of the land in such operating unit, and royalty payable under this lease with respect to leased land included in such operating unit shall be computed only on that portion of such production so allocated to such leased lands. The entire acreage so pooled or unitized shall be treated as if it were covered by one lease and the drilling of a well or performance of any other obligations in any part of such operating unit, whether or not on land subject to this lease, shall fulfill Lessee's drilling and other obligations under this lease to the same extent as if such well were drilled and other obligations performed on land subject to this lease. No offset obligation shall accrue under this lease as a result of any well drilled within any such operating unit. Lessee may, at its sole option, at any time when there is no production in such operating unit of lease products in quantities deemed paying by Lessee terminate such operating unit by a written declaration thereof, in the same manner in which it was created.

(b) Lessee is hereby granted the right at any time or times within the period hereinafter provided to unitize this lease and all (and no less than all) of the lands covered hereby, in whole, or in part as to any stratum or strata, with other lands and leases and to increase or decrease the size of any such unit. Any change in the amount of Lessor's royalties resulting from unitization of this lease or from any increase or decrease in the size of any such unit shall not be retroactive. In the event of any such unitization, this lease, unless sooner terminated by Lessee, shall continue in effect for so long as any of the lands hereby leased remain subject to such unit. The drilling and producing operations conducted on any of the unitized lands shall constitute full compliance with the drilling and producing obligations of Lessee hereunder and Lessor shall be entitled to the royalties in this lease provided, on the fractional part only, if any, of the unit production allocated to this lease in accordance with the provisions of said unit. The method of allocation of production from lands subject to said unit shall be set forth therein and may be based upon the surface acreage or the estimated volumetric content of recoverable lease products, or any weighing of either or both thereof, of lands within such unit or within the estimated productive limits of such unit, or such allocation may be made upon any other basis approved by State or Federal authorities having jurisdiction thereof; except that any use whatsoever of volumetric content as a method of allocation shall be contingent on the further written consent by Lessor prior to such use. The provisions of this paragraph authorizing the establishment and enlargement or contraction of such unit and change of the ratio of participation thereunder shall not extend beyond the period of twenty (20) years from the date of this lease; provided, however, that if such unit is established before the expiration of said twenty-year period, such unit may continue in effect beyond said twenty-year period. Any such unit may be established, enlarged, or diminished, and, in the absence of production therefrom, may be dissolved by Lessee's filing for record an instrument so declaring. A copy of such instrument shall be delivered to Lessor or to the depository.

22. Whenever used herein, the expression "drilling operations" shall mean, for all purposes hereof, any work or actual operations undertaken or commenced for the purpose of drilling of a well, including without limiting the generality hereof, the preparation of the ground therefor, the building of roads and other facilities therefor, the construction of a derrick and other necessary structures for the drilling of a well followed by the actual operation of drilling in the ground. Any such work or operations preliminary to the drilling in the ground may be undertaken in any order Lessee shall see fit. All such work and operations shall be prosecuted with reasonable diligence.

23. This agreement may be executed in any number of counterparts with the same force and effect as if all parties signed the same document.

24. This lease shall be binding upon all who execute it, whether or not they are named in the granting clause hereof and whether or not all parties named in the granting clause execute this lease. All the provisions of this lease shall inure to the benefit of and be binding upon the successors and assigns of Lessor and Lessee.

IN WITNESS WHEREOF, the parties hereto have executed this agreement,

LESSOR

UNION

THIS GEOTHERMAL LEASE AND AGREEMENT, (herein sometimes referred to as "Lease") made and entered into as of this 18th day of July, 1979, by and between CHARLES K. CORFMAN, an unmarried man as his sole and separate property, hereinafter referred to as "Lessor", whether one or more, and UNION OIL COMPANY OF CALIFORNIA, a California corporation, hereinafter referred to as "Lessee";

WITNESSETH:

1. That Lessor, for and in consideration of Ten Dollars (\$10.00) in hand paid to Lessor by Lessee, the rentals provided for hereinafter, and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, and in consideration of the covenants and agreements hereinafter contained, to be kept and performed, Lessor has granted, leased, let and demised and by these presents does grant, lease, let and demise exclusively to Lessee, its grantees, successors and assigns, upon and subject to the terms and conditions hereinafter set forth, all that certain land

(herein sometimes referred to as the "leased land") situate, in the County of Imperial,

State of California, and more particularly described as follows, to-wit:

Reference is made to Exhibit "A" attached hereto and made a part hereof.

containing 80.0, acres, more or less, including all accretions thereto and all lakes, streams, canals, waterways, dikes, roads, streets, alleys, easements and rights of way, on, within, or adjoining the lands above described and including all strips or parcels of land contiguous, adjacent to or adjoining the above described land, and owned or claimed by Lessor. This lease shall cover all the interest in tire leased land now owned or hereinafter acquired by Lessor. For the purpose of calculating any payments based on acreage, Lessee, at Lessee's option, may act as if the leased land and its constituent parcels contain the acreage above stated, whether they actually contain more or less.

By the use of such methods as Lessee may desire, Lessee shall have the soil and exclusive right to explore for, drill for, test, develop, operate, produce, extract, take,

remove and sell Hot Water, Steam and Thermal Energy and Extractable Minerals from the leased land, and to store, utilize, process, convert and otherwise treat such Hot Water, Steam and Thermal Energy upon the leased land, end to extract any Extractable Minerals during the term hereof and to transport same from the leased land, and to inject or reinject in the leased land effluents from wells located on the leased lands or on lands in the vicinity thereof; or inject water, gas or other fluids or substances by artificial means into formations containing Hot Water, Steam or Thermal Energy, with the right of entry on the leased lands and use and occupancy thereof at all times for said purposes and the furtherance thereof, including the right to construct, use and maintain thereon roads, ponds, pipelines, utility lines, power and transmission lines, plants, structures, facilities and installations and to remove same. Further, the Lessee or anyone purchasing Leased Substances (as hereinafter defined) from Lessee is hereby granted the use of the roads and ponds on the leased land, together with such rights of way and easements across said land, for the construction of such roads, ponds, pipelines, utility lines, power and transmission lines, plants, structures, facilities and installations as are necessary or convenient for the exploration, drilling, testing, operation, production, development, extraction, taking, processing, conversion, removal, sales and transportation of Leased Substances and/or Geothermal Resources (as hereinafter defined) on the leased lands or lands in the vicinity thereof. In the event this lease should terminate with respect to a portion of the rights

granted Lessee, it shall nevertheless continue in full force and effect with respect to those roads, ponds, pipelines, utility lines, power and transmission lines, plants, structures, facilities and installations, as well as the rights of way and/or easements appurtenant thereto that are being used at the time of such termination and shall continue in effect so long as such roads, ponds, pipelines, utility lines, power and transmission lines, plants, structures, facilities, installations and rights of way and/or easements or any of them are being used for the purposes above described or for the production and utilization of Geothermal Resources from lands in the vicinity thereof by Lessee, or anyone formerly purchasing Leased Substances from Lessee, their successors and assigns. The possession by Lessee of the leased land shall be sold and exclusive for the purposes hereof and for purposes incident or related thereto, except that Lessor reserves the right to use and occupy said land or to lease or otherwise deal with the same for mining or extraction and utilization of minerals lying on the surface or in vein deposits on or in said land or for the extraction of oil, natural hydrocarbon gas and other hydrocarbon substances, or for any and all uses other than the use and rights permitted to Lessee hereunder; provided that such use and occupancy does not interfere with Lessee's rights hereunder. Lessee agrees to conduct its activities in a manner which will not unreasonably interfere with the rights reserved to Lessor.

For the purposes hereof the following definitions shall apply:

(a) The terms "Hot Water", "Steam" and "Thermal Energy" each shall mean natural geothermal water and/or steam, and shall also mean the natural heat of the

2

earth and the energy present in, resulting from or created by, or which may be extracted from, the natural heat of the earth or the heat present below the surface of the earth, in whatever form such heat or energy occurs;

(b) The term "Extractable Minerals" shall mean any minerals in solution in the well effluence and all minerals and gases produced from or by means of any well or wells on the leased land or by means of condensing steam or processing water produced from or the effluence from any such well or wells; said term shall also include any water so produced or obtained from condensation of steam; and further provided that the term "gases" shall not include hydrocarbon gases that can be produced separately from the well effluents;

(c) The term "Leased Substances" shall collectively mean the matter, substances and resources defined in subsections 1 (a) and 1 (b) that are the subject of this lease;

(d) The term "Geothermal Resources" shall collectively mean the matter, substances and resources defined in subsections 1 (a) and 1 (b) that are not subject to this lease but are located on adjacent land or lands in reasonable proximity thereto;

(e) The term "Power Potential" shall mean, when used herein with respect to any well or wells, the quantity, or units, of energy capable of being recovered from the Hot Water, Steam or Thermal Energy produced therefrom by means of any energy conversion or utilization facility (including, but not limited to, electrical generating facilities) or equipment designed for use thereof;

(f) The term "Sufficient Power Potential" shall mean that Power Potential which, in the judgment of Lessee shall be sufficient for the commercial sale or utilization thereof, or shall warrant the construction of facilities for the commercial sale or other utilization thereof, or shall justify additional drilling or other operations on the leased land;

(g) The term "Commercial" shall mean those quantities of leased

Substances produced, sold or used, the value of which, after determining Lessee's direct operating costs (or extraction costs in the case of extractable minerals) will be capable of providing a sufficient return to cause Lessee, its sole judgment, to continue production thereof or to elect to proceed with further development or exploratory operations on the leased land.

2. This lease shall be for a term of five (5) years from and after the date hereof (herein called "primary term") and so long thereafter as Leased Substances, or any of them, be derived or produced in Commercial quantities from the leased land or lands

3

pooled, unitized or combined therewith, and for so long as Lessee is prevented from producing same, or the obligations of Lessee hereunder are suspended, for the causes hereinafter set forth, or this lease is continued in force by reason of any other provision hereof.

If at the expiration of the primary term Lessee has not completed one or more wells on the leased land or lands pooled, unitized or combined therewith, separately or collectively producing or being capable of producing Hot Water, Steam or Thermal Energy of Sufficient Power Potential and/or Extractable Minerals in Commercial quantities but Lessee is then engaged in operations for drilling, reworking, recompleting or redrilling of any well on the leased land or lands pooled, unitized or combined therewith, this lease shall remain in force so long as drilling, reworking, recompleting or redrilling operations are prosecuted (whether on the same or different wells) with no cessation of more than six (6) months, and if they result in production or the establishment to the satisfaction of the Lessee of the existence of Sufficient Power Potential and/or Extractable Minerals in Commercial quantities, such well or wells will be deemed to have been completed and such existence so established during the primary term of this lease.

3. It is understood and agreed that the initial consideration paid upon the execution hereof, covers both the rental in full hereunder for a period of one (1) year from the date of this Lease and for all other rights conferred hereunder. If on or before one (1) year from the date hereof Lessee has not drilled a well or wells on the leased land or lands pooled, unitized or combined therewith as to indicate or establish to the satisfaction of Lessee the existence of Sufficient Power Potential and/or Extractable Minerals in Commercial quantities, then, but subject to Lessee's right of surrender, on or before said anniversary date, Lessee shall pay or tender to Lessor an annual rental in the amount of Two Thousand Eight Hundred and no/100 Dollars (\$2,800.00), which shall constitute rental until the next anniversary date hereof, and thereafter Lessee shall, on or before each succeeding anniversary date during the primary term hereunder, pay or tender to Lessor an annual rental in the aforesaid amount, this until such time as from the drilling of a well or wells on the leased land, or lands pooled, unitized or combined therewith, there has been established to the satisfaction of the Lessee the existence of Sufficient Power Potential and/or Extractable Minerals in Commercial quantities. Upon such establishing as aforesaid, Lessee may nevertheless continue to pay or tender annual rental payments on or before each anniversary date, this until Lessee has commenced the actual sale of one or more Leased Substances, and so long as such annual rental payments be so paid or tendered this lease shall remain in force and effect, even though thereby extended past the primary term, and all payments so paid or tendered after the expiration of said primary term shall be deemed advance royalties, and Lessee Shall have the right to reimburse itself for any such payment out of one-half (1/2) of any royalties which shall thereafter become payable hereunder, and so long as same are paid each well or wells

4

shall be deemed to be actually producing one or more Leased Substances in Commercial quantities under the terms hereof; provided, however, that if within five (5) years from the date of expiration of the primary term hereof Lessee shall have failed to make, or make arrangements for by executed contract or contracts, a bona fide Commercial sale of one or more Leased Substances then Lessor, at its option, may consider Lessee in default hereunder. Additionally, should Lessee fail to make any annual payment herein provided for on or before a particular anniversary date, Lessor may, at its option, consider Lessee in default hereunder.

4. Lessee shall pay to Lessor as royalty Ten Percent (10%) of the gross proceeds received by Lessee from the sale of Hot Water, Steam or Thermal Energy, as such, produced from the leased land at and as of the point of origin on the leased land; royalty on Hot Water, Steam or Thermal Energy may be computed and paid for on the basis of the amount produced, saved and sold by Lessee, or may be computed on the basis of the number of kilowatt hours of electric power generated by the use of such Hot Water, Steam or Thermal Energy, but shall be computed and paid for on whatever basis which shall properly reflect the royalty portion of the gross proceeds received by Lessee from the sale of Hot Water, Steam and Thermal Energy, as such, produced from the leased land at and as of the point of origin on the leased land. With respect to Extractable Minerals, Lessee shall pay as royalty to Lessor Ten Percent (10%) of the net proceeds received by Lessee from the sale of any gases (as herein defined) and from the sale of effluence (containing minerals and/or minerals in solution) produced and sold from any well or wells on the leased land, or, in the event Lessee extracts from the effluence minerals and/or minerals in solution, Ten Percent (10%) of the proceeds received by Lessee from the sale of minerals and/or minerals in solution contained in and extracted from the effluence produced and sold from such well or wells less costs of transportation and extraction. If Lessee consumes Leased Substances or electric power generated therefrom, by either use or exchange, for purposes other than its operations on or with respect to the leased land, then such Leased Substances or electric power generated therefrom shall be deemed sold for royalty purposes and the above described royalty shall be paid on the same value basis as of such Leased Substances or electric power generated therefrom had been sold by Lessee at the time of production under Lessee's then existing sales contract. Lessee shall pay to Lessor on or before the twenty-fifth day of each month the royalties accrued and payable for the preceding calendar month, or on or before the twenty-fifth day of the month next following that in which Lessee receives payment therefor from the purchaser thereof, whichever method shall apply, and in making such royalty payments Lessee shall deliver to Lessor statements setting forth the basis for computation and determination of such royalty.

Lessee shall not be required to account to Lessor for or to pay any royalty on Hot Water, Steam, Thermal Energy or Extractable Minerals produced by Lessee on the leased land which is not utilized, saved and sold, or which is used by Lessee in its

operations on or with respect to the leased land for or in connection with the developing, recovering, producing, extracting and/or processing of Hot Water, Steam, Thermal Energy and/or minerals in solution or in facilities used in connection therewith, including operations of facilities for the generation of electric power, or which are unavoidably lost.

Lessee shall have the right from time to time and at any time to commingle (for purposes of storing, transporting, utilizing, selling or processing, or any of them) the Leased Substances or any of them that are produced or extracted from the leased land or lands pooled, unitized or combined therewith with Geothermal Resources or any of them produced from other lands or units in the vicinity of the leased land, and in the event of such commingling, Lessee shall meter, gauge, or measure the production from the leased land, or from the unit or units, including leased land and other units or lands, as the

case may be, and compute and pay Lessor's royalty payable under the provision, hereof on the basis of such production so determined or allocated, as the case may be.

5. Lessee shall have the right to drill such well or wells on the leased land as Lessee may deem desirable, including wells for injection or reinjection purposes, and shall have the further right to dispose in any such wells waste brine, water and other substances, waste products from a well or wells, power plants or other facilities, located on the leased lands or from wells, power plants or other facilities, located in the vicinity of the leased lands. Lessee shall further have the right for testing purposes, to freely transfer Leased Substances and Geothermal Resources produced from wells located on the leased lands or lands in the vicinity thereof to and from the leased lands and to inject such geothermal substance into a well or wells located on the leased lands.

6. Lessee may, at any time or from time to time, as a recurring right within twenty (20) years from the date hereof, for drilling, development, production or operating purposes pool, unitize or combine all or any part of the leased land into a unit with any other land or lands or lease or leases (whether held by Lessee or others) adjacent, adjoining or in the immediate vicinity of the leased land which Lessee desires to develop or operate as a unit, provided that the total acreage to be embraced within any such drilling, development, production, or operating unit shall not exceed one thousand nine hundred twenty (1,920) acres, plus an acreage tolerance of Ten Percent (10%), except that a larger unit may be created to conform to State or Federal regulations. In the event a unit is so created, either Lessee shall record in the office of the county recorder in the county in which the leased land is situated a written declaration of such unit or Lessee shall give written notice of such declaration to Lessor. Any well (whether or not Lessee's well) commenced, drilled, drilling and/or producing or being capable of producing in any part of such unit shall for all purposes of this lease be deemed a well commenced, drilled, drilling and/or producing on the leased land, and Lessee shall have the same rights and obligations with respect thereto and to drilling and producing operations upon the lands from time to time included within any such unit as Lessee would have if such lands

6

constituted the leased land; provided, however, that notwithstanding this or any other provision or provisions of this lease to the contrary:

(a) production as to which royalty is payable from any such well or wells drilled upon any such unit, whether located upon the leased land or other lands, shall be allocated to the leased land in the proportion that the surface acreage of the leased land in such unit bears to the total surface acreage of such unit, and such allocated portion thereof shall for all purposes of this lease be considered as having been produced from the leased land and the royalty payable under this lease with respect to the leased land included in such unit shall be payable only upon that proportion of such production so allocated thereto, and

(b) if any taxes of any kind are levied or assessed (other than taxes on the land and on Lessor's improvements), any portion of which is chargeable to Lessor under Section 15 hereof, then the share of such taxes to be borne by Lessor as provided in this lease, shall be in proportion to the share of the production from such unit allocated to the leased land.

Allocation of production from any such unit, whether to the leased land or in like manner to other lands therein, shall continue notwithstanding any termination, either in whole or in part (by surrender, forfeiture or otherwise), of this or any other lease covering lands in such unit until such time as the owner of such lands so terminated shall enter into an agreement to drill for or produce or shall drill for or produce or permit or cause the

drilling for or production from any part of such lands, whereupon all such lands formerly included in such unit and as to which the lease covering the same shall have terminated shall be excluded in determining the production to be allocated to the respective lands in such unit; additionally, in the event of the failure of Lessor's, or any other owner's, title as to any portion of the land included in any such unit, such portion of such land shall likewise be excluded in allocating production from such unit; provided, however, Lessee shall not be held to account for any production allocated to any lands excluded from any such operating unit unless and until Lessee has actual knowledge of the circumstances requiring such exclusion. Any exclusion shall be deemed effective the first day of the month next following the date upon which such exclusion becomes finally established.

Lessee may, at its sole option, at any time when there is no Commercial production in such unit, terminate such unit by a written declaration thereof, in the same manner in which it was created.

7. No well shall be drilled within Three Hundred (300) feet of any residence or barn now on leased land without Lessor's consent. Lessee shall have free use of water from leased land for all operations thereon or on land or lands pooled, unitized or

7

combined therewith, provided that such free use shall not interfere with Lessor's own use for domestic, commercial, stock or agricultural purposes, nor interfere with any contractual commitments of Lessor relating thereto and existing on the date hereof. Lessee shall not be entitled to free use of any water which has been or is being purchased by Lessor.

Lessee agrees to fence all sump holes or other excavations, and upon abandonment of any well on the leased land, or the termination of the lease, Lessee shall level and fill all sump holes and excavations, shall remove all debris and shall leave the locations or premises used by Lessee in a clean and sanitary condition, and farmable condition.

Lessee shall protect Lessor's interest in the leased land against liens of every character arising from its operations thereon. Lessee, at its own expense, prior to commencing operations on the leased land shall obtain, and thereafter while this lease is in effect shall maintain, adequate Workmens Compensation Insurance. Lessee shall protect and hold harmless Lessor against damages of every kind and character arising out of the operations or working of Lessee or those under Lessee's control upon the leased land, but Lessee shall not be liable hereunder in the event of the negligence or willful misconduct of parties other than Lessee. In the event any building or personal property be damaged or destroyed, or grazing or agricultural lands be damaged by Lessee's operations, then Lessee shall be liable for such damages.

Lessee shall have the right at any time and from time to time to remove from the leased land any and all casing, machinery, equipment, structures, installations and property of every kind and character placed upon said leased land by or pursuant to permission of Lessee, provided that if such removal should occur after termination of all rights granted herein same shall be completed within a reasonable time thereafter.

8. If Lessee or anyone purchasing Leased Substances or Geothermal Resources from Lessee constructs a plant on the leased land for the conversion of Leased Substances or Geothermal Resources into heat, power or another form of energy or for the extraction and processing of by-products or both, and production from the leased land subsequently ceases or this Lease expires, terminates or is forfeited, then Lessee or such purchaser upon payment of an annual rental equal to 10% of the market value as determined from the previous year's tax assessment attributable to Lessor's interest in the surface of the lands so occupied shall have the continuing right to retain the plant on the

leased land together with the right and easement to go over, upon and across said land together with rights of ingress and egress for purposes of maintaining and operating such plant and connected pipelines, transmission lines and other associated facilities so long as such plant utilizes Leased Substances or Geothermal Resources from other lands in the vicinity thereof.

8

9. For the consideration paid at the time of execution of this Lease and without any additional consideration to be paid therefor, except as provided below, Lessor hereby grants to Lessee, its successors and assigns, the following rights, rights of way and easements in, under, upon, through and across the leased land or other lands contiguous, adjacent to or adjoining the leased lands which may be exercised at any time or from time to time during the duration of this lease and as long thereafter as Lessee exercises any of the rights granted in this section:

(a) The sole and exclusive right to locate a well or wells on the surface of the leased land and to slant drill said well or wells into, under, across and through the leased land and into and under lands other than the leased land together with the right to repair, redrill, deepen, maintain, inject in, rework and operate or abandon such well or wells for the production of Geothermal Resources from such other lands together with the right to develop water from the leased land for any of Lessee's operations pursuant to this Section and together with the right to construct, erect, maintain, use, operate, replace, or remove all roads, ponds, pipelines, utility lines, power and transmission lines, plants, structures, facilities and installations, together with all other rights necessary or convenient for Lessee's operations under this Section and together with rights of way for passage over and upon and across and ingress and egress to and from the leased land or other lands contiguous, adjacent to or adjoining the leased lands;

(b) The sole and exclusive right to drill into and through the leased land below a depth of five hundred feet (500') from the surface thereof, by means of a well or wells drilled from the surface of lands other than the leased land, and the right to abandon or repair, redrill, deepen, maintain, inject in, rework and operate such well or wells for the production of Geothermal Resources from lands other than the leased lands;

(c) The sole and exclusive right to move Leased Substances and Geothermal Resources to, from and across leased lands when Lessee or anyone purchasing Leased Substances or Geothermal Resources is required to comply with the laws and regulations of Federal, State, County, Municipal or other governmental agencies, authority, or representative.

If Lessee exercises the rights granted by Lessor in subsection (a) hereof, Lessee shall pay to Lessor an annual rental computed at the rate of One Hundred Dollars (\$100.00) per acre for each surface acre of the leased land being exclusively occupied by Lessee pursuant to such grant. If Lessee exercises the rights granted in subsection (b) hereof, and thereafter completes a well capable of producing Geothermal Resources in quantities deemed Commercial by Lessee or the well is operated by Lessee as an injection well, then Lessee shall within sixty (60) days after such completion pay Lessor

9

an annual rental computed at the rate of One Dollar (\$1.00) per rod of horizontal projection of the survey course of that part of the bore hole of such well traversing the subsurface of the leased land. Any such rentals shall continue until such well is abandoned. Any well drilled under the provisions of this Section shall be drilled so that the producing or injecting interval thereof shall lie wholly outside the boundary of the leased land and Lessor recognizes and agrees that Lessor has no interest in any such well or wells

drilled pursuant to this Section or any production therefrom.

Any surrender or termination under any other provision of this lease shall be effective notwithstanding the fact that Lessee in and by such surrender or termination reserves the rights granted to Lessee under this Section, and regardless of such surrender or termination, the rights granted under this Section shall continue for the term hereinabove granted in this Section.

10. Lessor, or its agents, at Lessor's sole risk, may during hours of operation examine the leased land and the workings, installations and structures thereon and operations of Lessee thereon, and may at reasonable times inspect the books and records of Lessee with respect to matters pertaining to the payment of royalties to Lessor.

11. Upon the violation of any of the terms and conditions of this lease by Lessee (including but not limited to payment of rental, advance royalty and/or royalty) and the failure of Lessee to, as to monetary matters, make payment, and as to other violations begin in good faith to remedy the same, within sixty (60) days after written notice from Lessor so to do, specifying in said notice the nature of such default, then at the option of Lessor this lease shall forthwith cease and terminate and all rights of Lessee in and to the leased land shall be at an end, save and excepting five (5) acres surrounding each and any well then being drilled, or capable of producing or injecting, or producing or injecting, and in respect to which Lessee shall not be in default, together with the rights, rights of way and easements which may be retained by Lessee by virtue of the granting clause of this lease, and together with rights granted Lessee in Sections 8 and 9 hereof.

12. Notwithstanding any other provisions of this lease, and in consideration of the payment made by the Lessee to the Lessor for the execution of this lease, Lessee shall have the right at any time prior to or after default hereunder, to quitclaim and surrender to Lessor all right, title and interest of Lessee in and to the leased land, or any part thereof, and thereupon all rights and obligations of the parties hereto one to the other shall cease and terminate as to the lands or areas so quitclaimed and surrendered, save and except as to any then accrued monetary obligations or royalty obligations of Lessee then payable as to which Lessee shall remain liable to Lessor, and save and except the rights, rights of way and easements which may be retained by Lessee by virtue of the granting clause of this lease and Sections 8 and 9, and provided that in the event of a

10

partial quitclaim and surrender, any future rentals will be reduced proportionately by the number of acres in the area so quitclaimed and surrendered.

13. In the event Lessor at the time of making this lease owns a less interest in the leased land than One Hundred Percent (100%) of the right, title and interest herein granted or leased to Lessee, then any payments due Lessor hereunder shall be paid to Lessor only in the proportions which Lessor's interest bears to a One Hundred Percent (100%) interest therein in the leased land. Notwithstanding the foregoing, should Lessor hereafter acquire any additional right, title or interest in or to the leased land, it shall be subject to the provisions hereof to the same extent as if owned by Lessor at the date hereof, and any increase in payments of money hereunder necessitated thereby shall commence with the payment next following receipt by Lessee of satisfactory evidence of Lessor's acquisition of such additional interest. In the event Lessor has no interest in the Leased Substances produced hereunder, but has an interest in said land, Lessee shall pay Lessor an annual rental equal to 10% of the market value as determined from the previous year's tax assessment for the proportionate part attributable to Lessor's interest in the surface occupied by Lessee in the conduct of its operations hereunder.

14. Lessor hereby warrants and agree, to defend title to the leased land and agrees that Lessee, at its option, may pay and discharge any taxes, mortgages, trust deeds or other liens or encumbrances existing, levied or assessed on or against the leased land, and in the event Lessee exercises such option, Lessee shall be subrogated to the rights of any holder or holders thereof, and shall have, among other rights, the right of applying to the discharge of any such mortgage, tax or other lien or encumbrance any payments accruing to Lessor hereunder.

15. Lessee shall pay all taxes levied on Lessee's structures and improvements placed on the leased land by Lessee. Lessee shall pay Ninety Percent (90%) and the Lessor shall pay Ten Percent (10%) of any taxes assessed against any Leased Substances stored on the leased land. In the event any taxes are levied or assessed against the right to produce Leased Substances from the leased land or in the event any Increase in the taxes levied or assessed against the leased land shall be based upon the production from the leased land of Leased Substances, then in either such event Lessee shall pay Ninety Percent (90%) of any such taxes or increase, as the case may be, and Lessor shall pay Ten Percent (10%) thereof. Lessor shall pay all taxes levied or assessed against the leased land as such without reference to the production of Leased Substances therefrom and shall pay all taxes levied and assessed against any and all rights in or to or with respect to the leased land not covered by this lease and shall pay all taxes levied and assessed against all structures and improvements owned by Lessor or placed on the leased land by or pursuant to permission of Lessor.

11

16. The rights of either party hereunder may be assigned in whole or in part, and the right and privilege so to do is hereby reserved by each party, and the provisions hereof shall extend to the heirs, personal representatives, successors and assigns of the parties hereto, but no change or division in ownership of the land, rentals or royalties, however accomplished, shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee may continue to operate the leased land and to pay and settle rentals or royalties as an entirety, and no such change in ownership shall be binding upon Lessee until the expiration of thirty (30) days after Lessee is furnished with written notice of such transfer or assignment, together with a certified copy of the instruments of transfer or assignment. In the event of assignment of this lease as to a segregated portion of said land, the rentals payable hereunder shall be apportionable between the several leasehold owners ratably according to the surface area of each, and default in rental payment by one shall not alter the rights of other leasehold owners hereunder.

17. The obligation of the Lessee hereunder shall be suspended and the terms of this lease shall be extended as the case may be, while Lessee is prevented from complying therewith, in whole or in part, by strikes, lockouts, riots, war or the results thereof, acts of God or the elements, fire, flood, accidents, delay in transportation, inability to secure labor or material in the open market, laws, orders, rules, or regulations of Federal, State, County, Municipal, or other governmental agencies, authority, or representative, or any other matter or condition beyond reasonable control of Lessee, whether or not similar to the conditions or matters herein specifically enumerated, or while litigation contesting Lessor's title to the leased land or the rights granted Lessee hereunder or litigation involving Lessee's operations hereunder shall be pending and undetermined or during any period when Lessee has no market for the products it is then capable of producing from the leased land or the market price then available for such products will not produce an acceptable profit, Lessee, without impairment of its rights hereunder, shall be excused from performance of all obligations hereunder except payment of taxes and protection of the leased land. It is expressly agreed that the prevention or settlement of any litigation or strike or labor disturbance shall not be considered a matter subject to Lessee's control within the meaning of this Section.

If the permission or approval of any governmental agency is necessary before drilling or producing operations may be commenced on the leased

land, then if such permission or approval has been applied for at least thirty (30) days prior to the date upon which such operations must be commenced under the terms hereof, the obligation to commence such operations shall be suspended until ninety (90) days after the governmental permit is granted or approval given, or if such permit or approval is denied initially, then so long as Lessee in good faith appeals from such denial or conducts further proceedings in an attempt to secure such permit or approval and ninety (90) days thereafter. Lessor agrees to fully support and cooperate with Lessee in securing permits and authorization to conduct geothermal operations on the leased lands.

12

If at any time after the expiration of fifteen (15) years from date hereof the production of all Leased Substances ceases for any cause other than one or more of the causes hereinabove enumerated, this lease shall nevertheless remain in full force and effect for an additional period of one (1) year from cessation and thereafter if, and so long as, Lessee commences and continues diligently and in good faith the steps, operations or procedures to cause a resumption of such production until such production be resumed.

18. All statements of production and royalty and all payments to be made by Lessee to Lessor hereunder shall be sent to the persons hereinafter set forth, respectively, at the addresses indicated and each such person shall be entitled to receive that portion of the total rentals and royalty payable hereunder as is hereinafter set forth after the name of such person:

		Taxpayer's Ident. No. -----
Charles K. Corfman 1590 Nichols Road El Centro, CA 92243	100%	560-42-5407

Lessee shall, upon notification of change of ownership in the lands or in rentals or royalties hereunder, as provided in Section 16 hereof, divide and distribute the same to the new owners of such interest; provided, however, that if at any time there are three or more persons entitled to rentals or royalties hereunder, Lessee may, at its option, withhold payment of such rentals or royalties until a majority in interest of such persons designate in writing in a recordable instrument delivered to Lessee, a bank, trust company or corporation, as a common agent and depository, to receive all payments due hereunder to such persons. Such designation may be changed at any time in the same manner. Delivery of all statements and payments hereunder may be made by depositing the same in the United States mail duly addressed to Lessor at the above address or addresses or to such agent and depository which shall constitute full performance of Lessee's obligation to make such delivery. In the event that the amount payable under this lease shall result in a payment of less than Ten Dollars (\$10.00) becoming due Lessor, Lessee may, at its option, withhold and accrue sufficient periodic payments until the total due Lessor exceeds Ten Dollars (\$10.00).

19. Any notice herein required or permitted to be given or furnished by one party to the other shall be in writing. Delivery of such written notice to Lessor shall be made by depositing the same in the United States mail duly certified and addressed to Lessor at same as set forth in paragraph 18 and delivery of such written notice to Lessee shall be made by depositing the same in the United States mail duly certified and addressed to Lessee at Union Oil Center, 461 South Boylston Street, Los Angeles, California 90017.

13

Either party hereto may by written notice to the other party change its address to any other location.

20. All express and implied covenants of this lease shall be made subject to all applicable laws, governmental orders, rules and regulations. In the event any part or portion or provision of this instrument shall be found or declared to be null, void or unenforceable for any reason whatsoever by any Court of competent jurisdiction, then and in such event only such part, portion or provision shall be affected thereby, and such finding, ruling or decision shall not in any way affect the remainder of this instrument or any of the other terms or conditions hereof; which said remaining terms and conditions shall remain binding, valid and subsisting and in full force and effect between the parties hereto, it being specifically understood and agreed that the provisions hereof are severable to, the purposes of the provisions of this clause. In this connection, this lease shall not in any event extend beyond such term as may be legally permissible under present applicable laws, and should any such applicable law limit the term hereof to less than that herein provided, then this lease shall not be void but shall be deemed to be in existence for such term and no longer.

21. If more than one person is named as a Lessor herein and one or more of them fails to execute this lease, said lease shall nevertheless (when accepted by Lessee) become effective as a lease from such of said named parties Lessor as may have executed the same.

22. This lease may be executed in any number of counterparts and all such counterparts shall be deemed to constitute a single lease and the execution of one counterpart by any party Lessor shall have the some force and effect as if such party had signed all the other counterparts.

23. This Geothermal Lease and Agreement and all of the terms, covenants and conditions hereof shall extend to the benefit of and be binding upon the respective heirs, personal representatives, successors and assigns of the parties hereto.

See Addendum attached hereto and made a part of.

IN WITNESS WHEREOF, the parties have caused this instrument to be duly executed as of the date hereinabove first written.

EXHIBIT 10.4.19

Lease and Agreement
Union Oil Company of California

[LOGO]

THIS LEASE AND AGREEMENT, made and entered into as of this 1st day of January, 1972, by and between HOLLY OBERLY THOMSON, also known as HOLLY F. OBERLY THOMSON, also known as HOLLY FELICIA THOMSON, hereinafter referred to as "Lessor", whether one or more, and UNION OIL COMPANY OF CALIFORNIA, a California corporation, hereinafter referred to as "Lessee".

WITNESSETH: That Lessor, for and in consideration of Ten Dollars (\$10.00) in hand paid to Lessor by Lessee, the rentals provided for hereinafter and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, and in consideration of the covenants and agreements hereinafter contained by the Lessee to be kept and performed, Lessor has granted, leased, let and demised and by these presents does grant, lease, let and demise to Lessee, its grantees, successors and assigns, upon and subject to the terms and conditions hereinafter set forth, all that certain land (herein sometimes referred to as the "leased land") situate in the County of Imperial, State of California, and more particularly described as follows, to wit:

TRACT 1: 131.72 acres more or less being the Southwest Quarter of Section 4, Township 17 South, Range 14 East, S.B.M., EXCEPT that portion lying South of the South line of Parcel "A" as shown on Licensed Survey Map filed in Book 10, Page 7 of Licensed Surveys.

TRACT 2: 169.00 acres more or less being Portion of S/2 of School Sec. 36, T16S, R13E and Lots 3 & 8 and portion of Lot 4 Sec. 31; and Tr. 150 and portion of Tr. 292 T16S R14E described as follows: Beg. at a point on S 1/2 of S/2 of School Sec. 36 T16S R13E shown as portion of Sec. 31 T16S R14E 2174.54 ft. E of SW cor thereof; th N 00(0) 03'W 2476.94 ft; th Ely to a pt. 20 ft. Sly of cor #5; th Nly 20 ft. to sd cor; th Ely to Wly li of Tr. 40; th Sly alg sd Wly li to SE cor of sd School Sec. 36; th Wly alg S li thereof to P.O.B. and Lots 3 & 8 of Sec. 31 and Tr. 150 and that portion of Lot 4 of Sec. 31 ly Ely of Sly ext of E. li of sd W 2174.54 ft. of S/2 of School Sec. 36 and that por. of Tr. 292 ly Ely of Sly ext of E li of sd W 2174.54 ft of S/2 of School Sec. 36.

TRACT 3: 240.00 acres more or less being Tract 89, and North 1/2 of West 1/2 of Tract 90, Township 16 South, Range 13 East, S.B.M.

(deemed to contain, for the purposes hereof, 540.72 acres, whether there be more or less) with the sale and exclusive right to Lessee to explore for (by such methods as it may desire), drill for, produce, extract, take, remove and sell hot water, steam and thermal

energy and extractable minerals from, and to store, utilize, process, convert and otherwise treat such hot water, steam and thermal energy upon, said land, and to extract any extractable minerals during the term hereof, and to inject or reinject in the leased land effluence from wells located on the leased land or on lands in the vicinity thereof, with the right of entry on the leased land and

use and occupancy thereof at all times for said purposes and the furtherance thereof, including the right to construct, use and maintain thereon and to remove therefrom structures, facilities and installations, pipe lines, utility lines, power and transmission lines. Further, the Lessee is hereby granted the use of roads and ponds on said land together with such rights of way and easements across said land for the construction of roads, ponds, pipe lines, power and telephone transmission lines as are necessary or convenient for the exploration, operation and development of Leased Substances on the leased land or in the vicinity thereof. The possession by Lessee of the leased land shall be sole and exclusive for the purposes hereof and for purposes incident or related thereto, excepting that Lessor reserves the right to use and occupy said land, or to lease or otherwise deal with the same, without unreasonable interference with Lessee's rights, for mining or extraction and utilization of minerals lying on the surface of or in vein deposits on or in said land, or for the extraction of oil, natural hydrocarbon gas and other hydrocarbon substances, or for any and all uses other than the use and rights permitted to Lessee hereunder. Lessee agrees to conduct its activities in a manner which will not unreasonably interfere with the rights reserved to Lessor. The leased land includes also any rights of Lessor, presently owned or hereafter acquired, in and under roads, underlying ditches, and rights of way traversing or adjacent to said land.

For the purposes hereof the following definitions shall apply:

(a) The terms "hot water", "steam" and "thermal energy" shall mean natural geothermal water and/or steam, and shall also mean the natural heat of the earth and the energy present in, resulting from or created by, or which may be extracted from, the natural heat of the earth or the heat present below the surface of the earth, in whatever form such heat or energy occurs;

(b) The term "extractable minerals" shall mean any minerals in solution in the well effluence and all minerals and gases produced from or by means of any well or wells on the leased land or by means of condensing steam or processing water produced from or the effluence from any such well or wells; said term shall also include any water so produced or obtained from condensation of steam; and further provided that the term "gases" shall not include hydrocarbon gases that can be produced separately from the hot water, steam and associated minerals;

(c) The term "Leased Substances" shall collectively refer to the matter, substances and resources, defined in (a) and (b) above, that are the subject of this lease;

2

(d) The term "power potential" as used herein with respect to any well or wells shall mean the quantity, or units, of energy capable of being recovered from the hot water, steam or thermal energy produced therefrom by means of any energy conversion or utilization facility (including, but not limited to, electrical generating facilities) or equipment designed for use thereof;

(e) The term "sufficient power potential" as used herein shall be deemed to mean that power potential which, in the judgment of Lessee shall be sufficient for the commercial sale or utilization thereof, or shall warrant the construction of facilities for the commercial sale or other utilization thereof, or shall justify additional drilling or other operations on the leased land;

(f) The word "commercial" used in connection with various phrases herein shall mean those quantities of Leased Substances produced, sold or used, the value of which, after deducting Lessee's operating costs (or extraction costs in case of extractable minerals), will provide to Lessee a net return over such costs sufficient to cause Lessee to continue production thereof or to elect to proceed with further development or exploratory operations on the leased land.

The terms and conditions of this Lease and Agreement are as follows, to wit:

1. This lease shall be for a term of five (5) years from and after the date hereof (herein called "primary term") and so long thereafter as Leased Substances, or any of them, be derived or produced in commercial quantities from the leased land and for so long, as well, as Lessee is prevented from producing same, or the obligations of Lessee hereunder are suspended, for the causes hereinafter set forth.

If at the expiration of the primary term Lessee has not completed one or more wells on the leased land, separately or collectively producing or being capable of producing steam of sufficient power potential and/or extractable minerals in commercial quantities but Lessee is then engaged in operations for drilling or reworking of any well on the leased land; this lease shall remain in force so long as drilling or reworking operations are prosecuted (whether on the same or different wells) with no cessation of more than six (6) months, and if they result in production or the establishment to the satisfaction of the Lessee of the existence of sufficient power potential and/or extractable minerals in commercial quantities, such well or wells will be deemed to have been completed and such existence so established during the primary term of this lease.

2. It is understood and agreed that the initial consideration paid upon the execution hereof covers not only the privileges granted to the date when a rental is payable as hereinafter provided, but any and all other rights conferred hereunder. On or before one (1) year from the date of this lease, Lessee shall pay or tender to Lessor an

*** Confidential material redacted and filed separately with the Commission.

3

annual rental in the amount of *** Dollars (\$***), which shall constitute rental until the next anniversary date hereof, and thereafter Lessee shall, on or before each succeeding anniversary date during the primary term hereunder, pay or tender to Lessor an annual rental in the aforesaid amount. The obligation to pay rentals during the primary term hereunder is a firm obligation of Lessee and must be paid even in the event of the abandonment, cancellation or quitclaim of this lease. If at the expiration of the primary term, a well or wells has been completed on the leased land as above provided then in such event Lessee may continue to pay or tender annual rental payments on or before each anniversary date, until Lessee has commenced the actual sale of one or more Leased Substances, and so long as such annual rental payments be so paid or tendered this lease shall remain in force and effect and all payments so paid or tendered after the expiration date of said primary term shall be deemed advance royalties, and so long as same are paid each well or wells shall be deemed to be actually producing one or more Leased Substances in commercial quantities under the terms hereof; provided, however, that if within five (5) years from the date of expiration of the primary term hereof Lessee shall have failed to make, or make arrangements for by executed contract or contracts, a bona fide commercial sale of one or more Leased Substances then Lessor, at its option, may consider Lessee in default hereunder. Additionally, should Lessee fail to make any annual payment herein provided for on or before a particular anniversary date, Lessor may, at its option, consider Lessee in default hereunder.

3. Lessee shall pay to Lessor as royalty ***. Lessee shall pay to Lessor on or before the twenty-fifth day of each month the royalties, accrued and payable for the preceding calendar month, or on or before the twenty-fifth day of each month next following that in which Lessee

*** Confidential material redacted and filed separately with the Commission.

4

receives payment therefor from the purchase thereof, whichever method shall apply, and in making such royalty payments Lessee shall deliver to Lessor statements setting forth the basis for computation and determination of such royalty.

Lessee shall not be required to account to Lessor for or to pay any royalty on hot water, steam, thermal energy or extractable minerals produced by Lessee on the leased land which are not utilized, saved and sold, or which are used by Lessee in its operations on or with respect to the leased land for or in connection with the developing, recovering, producing, extracting and/or processing of hot water, steam and/or minerals in solution or in facilities used in connection therewith, including operations of facilities for the generation of electric power, or which are unavoidably lost.

Lessee shall have the right, from time to time and at any time, to commingle (for purposes of storing, transporting, utilizing, selling or processing, or any of them) the or any of the Leased Substances produced or extracted from production from the leased land with like Leased Substances, or any of them, produced from other lands or units in the vicinity of the leased land, and in the event of such commingling Lessee shall meter, gauge or measure the production from the leased land, or from the unit or units including same or other units or lands, as the case may be, and compute and pay Lessor's royalty payable under the provisions hereof on the basis of such production so determined or allocated, as the case may be.

Royalties payable hereunder shall never be less than *** Dollars (\$***) per acre per year for the lands then covered by this Lease plus the amount of taxes levied or assessed against production or the right to produce Leased Substances from the lands covered by this Lease that are paid by Lessor pursuant to Paragraph 12 hereof.

4. In the event of any disagreement between the parties as to the application of any provision of this lease or as to any of the factors involved in such application, that shall be determined by arbitration, for which purpose the parties shall, when determination of such question becomes necessary, each promptly appoint a qualified disinterested arbitrator who, in addition to other qualifications, shall be knowledgeable in the field of geothermal operations if the question to be determined shall involve such operations as distinguished from agricultural rental value. The two thus appointed shall promptly proceed with determination of the question involved and if they shall be unable to agree with respect thereto they shall promptly appoint a third such qualified, disinterested arbitrator. The determination of the question involved by any two of said arbitrators shall be final and binding upon the parties who shall bear the expense of such arbitration in inverse proportion to that in which their respective contentions on such arbitration shall prevail (and the arbitrators shall likewise determine that proportion). Should any arbitrator so appointed fail to act the party or parties appointing him shall promptly appoint another in his place.

*** Confidential material redacted and filed separately with the Commission.

In the event it becomes desirable to construct a generating plant or other generating facility on the leased land, Lessee shall purchase the surface of such plant or facility site together with the necessary rights of way, servitudes and other surface easements required to service production from the leased land or lands in the vicinity thereof, for twice the fair market value of such lands with right of reverter in Lessor without payment.

5. At such time as Lessee shall have drilled and completed such well or wells on the leased land which shall indicate to the satisfaction of Lessee a sufficient power potential, or the existence of extractable minerals in

commercial quantities, Lessee may at any time thereafter construct and install on the leased land facilities for the commercial sale or use of hot water, steam or thermal energy produced from the leased land or lands in the vicinity thereof or for the extraction of extractable minerals, or for development of electric power from the use of steam or thermal energy produced from the leased land or lands in the vicinity thereof.

In the event it becomes desirable to construct a generating plant or other generating facility on the leased land, Lessee shall purchase the surface of such plant or facility site together with the necessary rights of way, servitudes and other surface easements required to service production from the leased land or lands in the vicinity thereof, for twice the fair market value of such lands with right of reverter in Lessor without payment.

6. Lessee shall have the right to drill such well or wells on the leased land as Lessee may deem desirable for the purposes hereof, including wells for injection or re-injection purposes; provided, however, that Lessee agrees to utilize for such purpose or purposes only so much of the leased land as shall be reasonably necessary for Lessee's operations and activities thereon. No well shall be drilled within one hundred (100) feet of any residence or barn now on said land without Lessor's consent. Lessee shall have free use of water from said land for all operations thereon, provided that such free use shall not interfere with Lessor's own use for domestic, commercial, stock or agricultural purposes, nor interfere with any contractual commitments of Lessor relating thereto and existing on the date hereof. Lessee shall not be entitled to free use of any water which has been or is being purchased by Lessor or his tenants.

Lessee agrees to conduct drilling operations hereunder from such location or locations on the leased land as Lessor shall designate, together with adequate right-of-way from a county road to such drill sites. Lessor agrees to make such designation within fifteen (15) days after receipt of written request from Lessee to make such designations. The failure by Lessor to act within the time prescribed shall be deemed a waiver of such right and Lessee may then designate the location and right-of-way. Further, Lessee shall not have the right to construct any new roads upon

6

the leased property except roads necessary for ingress and egress from presently existing roads to such drill sites as Lessor may designate. In the event pipe lines, utility lines, power and/or transmission lines are deemed necessary, Lessee agrees to secure Lessor's consent as to the location of same.

Lessee shall pay Lessor for using the surface of any of the leased lands for well locations, roads constructed solely and used principally by Lessee, rights-of-way, ponds, production facilities or other facilities and structures (except generating plants or facilities) or other surface uses by Lessee in its operations herein at one of the following rates to be chosen by Lessor:

a. Lessee shall pay Lessor for the actual surface acreage to be used at the applicable rental rate determined annually then being paid in the area for the use of the surface of like or similar lands; or

b. Lessee shall purchase the surface acreage required for its operations at twice its fair market value with right of reverter in Lessor without payment.

Lessee shall reimburse Lessor for any loss of all or a part of any agricultural rental due Lessor from a surface tenant where such loss is caused by Lessee's operations hereunder.

Should the agricultural rental value of the leased land (exclusive of any portion thereof devoted exclusively to Lessee's use and for which rental is separately payable under other provisions of this lease) be impaired or diminished as a result of Lessee's operations, then for the period of such

impairment or diminution Lessee shall pay Lessor the difference between the top agricultural rental value for comparable land in the area (including only comparable land unaffected by conditions such as those resulting from Lessee's operations) and the amount of the agricultural rental value of Lessor's land as impaired or reduced by such operations; which payment shall be made for time to time in like installments as the agricultural rental for the affected period is payable for Lessor's land -- the amounts so payable to be adjusted and determined annually on such basis.

Lessee agrees that if because of its operations it becomes necessary to relocate any of the concrete irrigation ditches, tile lines or other appurtenances to the land, it shall do so at Lessee's expense.

Lessee agrees to fence all sump holes or other excavations, and upon abandonment of any well on the leased land, or the termination of the lease, Lessee shall level and fill all sump excavations, shall remove all debris and shall restore the surface to as near its original condition as is practicable.

7

Lessee shall protect said land against liens of every character arising from its operations thereon. Lessee, at its own expense, prior to commencing operations on the leased land, shall obtain, and thereafter while this lease is in effect shall maintain, adequate Workmens Compensation Insurance. Lessee shall protect Lessor against damages of every kind and character arising out of the operations or working of Lessee or those under Lessee's control upon the leased land, but Lessee shall not be liable hereunder in the event of the negligence or willful misconduct of parties other than Lessee. In the event any building or personal property be damaged or destroyed, or grazing or agricultural lands be destroyed by Lessee's operations, then Lessee shall be liable for, and to the extent of, the reasonable value thereof.

Lessee shall have the right at any time and from time to time to remove from the leased land any and all casing, machinery, equipment, structures, installations and property of every kind and character placed upon said leased land by or pursuant to permission of Lessee, provided that if such removal should occur after termination hereof same shall be completed within a reasonable time thereafter.

7. Lessor, or its agents, at Lessor's sole risk, may at all times examine said land and the workings, installations and structures thereon and operations of Lessee thereon, and may at reasonable times inspect the books and records of Lessee with respect to matters pertaining to the payment of royalties to Lessor.

8. Upon the violation of any of the terms and conditions of this lease by Lessee (including but not limited to payment of rental and/or advance royalty) and the failure of Lessee to, as to monetary matters, make payment, and as to other violations begin in good faith to remedy the same, within sixty (60) days after written notice from Lessor so to do, specifying in said notice the nature of such default, then at the option of Lessor this lease shall forthwith cease and terminate and all rights of Lessee in and to the leased land shall be at an end, save and excepting five (5) acres surrounding each and any well then producing or capable of producing or being drilled, and in respect to which Lessee shall not be in default, together with the rights, rights of way and easements which may be retained by Lessee by virtue of the granting clause of this lease, and together with rights granted Lessee in Paragraph 5, hereof.

9. Notwithstanding any other provisions of this lease, and in consideration of the payment made by the Lessee to the Lessor for the execution of this lease, Lessee shall have the right at any time prior to or after default hereunder, to quitclaim and surrender to Lessor all right, title and interest of Lessee in and to the leased land, or any part thereof, and thereupon all rights and obligations of the parties hereto one to the other shall cease and terminate as

to the lands or areas so quitclaimed and surrendered, save and except as to any then accrued monetary obligations or royalty obligations of Lessee then payable as to which Lessee shall remain liable to Lessor.

8

10. In the event Lessor at the time of making this lease owns a less interest in the leased land than One Hundred Percent (100%) of the rights and interests herein granted or leased to Lessee, then the rentals and royalties accruing hereunder shall be paid to Lessor only in the proportions which Lessor's interest bears to a One Hundred Percent (100%) interest therein in the leased land. Notwithstanding the foregoing, should Lessor hereafter acquire any additional right, title or interest in or to the leased land, it shall be subject to the provisions hereof to the same extent as if owned by Lessor at the date hereof, and any increase in payments of money hereunder necessitated thereby shall commence with the payment next following receipt by Lessee of satisfactory evidence of Lessor's acquisition of such additional interest.

11. Lessor hereby warrants and agrees to defend title to the leased land and agrees that Lessee, at its option, may pay and discharge any taxes, mortgages, trust deeds or other liens or encumbrances existing, levied or assessed on or against the leased land, and in the event Lessee exercises such option, Lessee shall be subrogated to the rights of any holder or holders thereof, and shall have, among other rights, the right of applying to the discharge of any such mortgage, tax or other lien or encumbrance any royalties or rentals accruing to Lessor hereunder.

12. Lessee shall pay all taxes levied on Lessee's structures and improvements placed on the leased land by Lessee. Lessee shall pay 90% and the Lessor shall pay 10% of any taxes assessed against any Leased Substances stored on the leased land. In the event any taxes are levied or assessed against the right to produce Leased Substances from the leased land or in the event any increase in the taxes levied or assessed against the leased land shall be based upon the production from the leased land of Leased Substances, then in either such event prior to the date Lessor receives from Lessee its first royalty payment, Lessee will pay all such taxes without right of recoupment; after which date Lessee shall pay 90% of any such taxes or increase as the case may be, and Lessor shall pay 10% thereof. Lessor shall pay all taxes levied or assessed against the leased land as such without reference to the production of Leased Substances therefrom and shall pay all taxes levied and assessed against any and all rights in or to or with respect to the leased land not covered by this lease and shall pay all taxes levied and assessed against all structures and improvements owned by Lessor or placed on the leased land by or pursuant to permission of Lessor.

13. The rights of either party hereunder may be assigned in whole or in part, and the right and privilege so to do is hereby reserved by each party, and the provisions hereof shall extend to the heirs, successors and assigns of the parties hereto, but no change or division in ownership of the land, rentals or royalties, however accomplished, shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee may continue to operate the leased land and to pay and settle rentals or royalties as an entirety, and no such change in ownership shall be binding upon Lessee until the expiration of

9

thirty (30) days after Lessee is furnished with satisfactory written evidence thereof. In the event of assignment of this lease as to a segregated portion of said land, the rentals payable hereunder shall be apportionable between the several leasehold owners ratably according to the surface area of each, and default in rental payment by one shall not affect the rights of other leasehold

owners hereunder.

14. The obligations of Lessee hereunder shall be suspended and the term of this lease shall be extended, as the case may be, while Lessee is prevented from complying therewith, in whole or in part, by strikes, lockouts, riots, actions of the elements, accidents, delays in transportation, inability to secure labor or materials in the open market, laws, rules or regulations of any federal, state, municipal or other governmental agency, authority or representative, or other matters or conditions beyond the reasonable control of Lessee, whether or not similar to the conditions or matters herein specifically enumerated.

If at any time after the expiration of fifteen (15) years from date hereof the production of all Leased Substances ceases for any cause other than one or more of the causes hereinabove enumerated, this lease shall nevertheless remain in full force and effect for an additional period of one (1) year from cessation and thereafter if, and so long as, Lessee commences and continues diligently and in good faith the steps, operations or procedures to cause a resumption of such production (either through the existing wells or the drilling of new wells), until such production be resumed.

15. All statements of production and royalty and all payments to be made by Lessee to Lessor hereunder shall be sent to persons hereinafter set forth, respectively, at the addresses indicated and each such person shall be entitled to receive that portion of the total rentals and royalty payable hereunder as is hereinafter set forth after the name of such person:

Holly Oberly Thomson
3278 Wilshire Boulevard
Los Angeles, California 90005

100%

Tax Payer Identification No.
569-03-0771

Lessee shall, upon notification of change of ownership in the lands or in rentals or royalties hereunder, as provided in Paragraph 13 hereof, divide and distribute the same to the new owners of such interests; provided, however, that if at any time there are three or more persons entitled to rentals or royalties hereunder, Lessee may, at its option, withhold payment of such rentals or royalties until a majority in interest of such persons designate in writing in a recordable instrument delivered to Lessee, a bank, trust company or corporation, as a common agent and depository, to receive all payments due hereunder to such persons. Such designation may be changed at any time in the same manner. Delivery of all statements and payments hereunder may be made by depositing the same

10

in the United States mail duly addressed to Lessor at the above address or addresses or to such agents and depository which shall constitute full performance of Lessee's obligation to make such delivery. In the event that the amount payable under this lease shall result in a payment of less than Five Dollars (\$5.00) becoming due Lessor, Lessee may, at its option, withhold and accrue sufficient periodic payments until the total due Lessor exceeds Five Dollars (\$5.00).

16. Any notice herein required or permitted to be given or furnished by one party to the other shall be in writing. Delivery of such written notice to Lessor shall be made by depositing the same in the United States mail duly certified and addressed to Lessor at 3278 Wilshire Boulevard, Los Angeles, California 90005 and delivery of such written notice to Lessee shall be made by depositing the same in the United States mail duly certified and addressed to Lessee at Union Oil Center, 461 South Boylston Street, Los Angeles, California 90017. Either party hereto may by written notice to the other party change its address to any other location.

17. In the event any part or portion or provision of this instrument shall be found or declared to be null, void or unenforceable for any reason whatsoever by any Court of competent jurisdiction or any governmental agency having authority thereover then, and in such event only such part, portion or provision shall be affected thereby, and such finding, ruling or decision shall not in any way affect the remainder of this instrument or any of the other terms or conditions hereof, which said remaining terms and conditions shall remain binding, valid and subsisting and in full force and effect between the parties hereto, it being specifically understood and agreed that the provisions hereof are severable for the purposes of the provisions of this clause. In this connection, this lease shall not in any event extend beyond such term as may be legally permissible under present applicable laws, and should any such applicable law limit the term hereof to less than that herein provided, then this lease shall not be void but shall be deemed to be in existence for such term and no longer.

18. If more than one person is named as a Lessor herein and one or more of them fails to execute this lease, said lease shall nevertheless (when accepted by Lessee) become effective as a lease from such of said named parties Lessor as may have executed the same.

19. This lease may be executed in any number of counterparts and all such counterparts shall be deemed to constitute a single lease and the execution of one counterpart by any party Lessor shall have the same force and effect as if such party had signed all the other counterparts.

11

20. This Lease and Agreement and all of the terms, covenants and conditions hereof shall extend to the benefit of and be binding upon the respective heirs, successors and assigns of the parties hereto.

IN WITNESS WHEREOF, the parties have caused this instrument to be duly executed as of the date hereinabove first written.

AMENDMENT TO GEOTHERMAL LEASE AND AGREEMENT

THIS AGREEMENT made and entered into as of this 21st day of June, 1976, by and between HOLLY OBERLY THOMSON, also known as Holly F. Oberly Thomson, also known as Holly Felicia Thomson hereinafter called "Lessor" and UNION OIL COMPANY OF CALIFORNIA, a California corporation, hereinafter called "Lessee";

W I T N E S S E T H:

THAT WHEREAS, Lessee presently holds all of the Lessee's right, title and interest under that certain Geothermal Lease and Agreement dated January 1, 1972, entered into by and between Lessor and Lessee herein, covering 540.72 acres, more or less, situate in Imperial County, California, more particularly described in said lease, a Memorandum of which was recorded April 11, 1972, in Book 1325, at Page 1037, Official Records of said County and State; and

WHEREAS, it is the desire of the parties hereto to amend said lease by modifying the primary term, rental rider, royalty rider and quitclaim clause thereof as hereinafter provided;

NOW, THEREFORE, in consideration of Ten Dollars (\$10.00) in hand paid by Lessee to Lessor and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Lessor does hereby lease said land to Lessee

Heber 603422

for the same purposes and upon all the same terms, provisions and conditions, as contained in said lease of January 1, 1972, and the parties hereto agree:

1. That the first paragraph of the habendum clause which appears on Page 2 of said lease is hereby deleted in its entirety and the following is hereby substituted therefor:

"This lease shall be for a term of ten (10) years from and after the date hereof (herein called "primary term") and so long thereafter as Leased Substances, or any of them, be derived or produced in commercial quantities from the leased land and for so long as well, as Lessee is prevented from producing same, or the obligations of Lessee hereunder are suspended, for the causes hereinafter set forth or this lease is continued in force by reason of any other provision hereof."

2. The rental payments due hereunder have been paid by Lessee and received by Lessor and operate to defer the commencement of drilling operations until January 1, 1977.
3. That the rental clause rider which appears on Page 2 of said lease is hereby deleted in its entirety and the following is hereby substituted therefor:

"It is understood and agreed that the initial consideration paid upon the execution hereof covers not only the privileges granted to the date when a rental is payable as hereinafter provided, but any and all other rights conferred hereunder. If on or before one (1) year from January 1, 1976 Lessee has not drilled such well or wells on the leased land as to indicate or establish to the satisfaction of Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities, then, but subject to Lessee's right of surrender, on or before said anniversary date, Lessee shall pay or tender to Lessor an annual rental in the amount of *** Dollars (\$***)

which shall constitute rental until the next anniversary date hereof, and thereafter Lessee shall, on or before each succeeding anniversary date during the primary term hereunder, pay or tender to Lessor an annual rental in the

*** Confidential material redacted and filed separately with the Commission.

2

aforesaid amount, this until such time as from the drilling of well or wells on the leased land, there has been established to the satisfaction of the Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities. Upon such establishing as aforesaid, Lessee may nevertheless continue to pay or tender annual rental payments on or before each anniversary date, this until Lessee has commenced the actual sale of one or more Leased Substances, and so long as such annual rental payments be so paid or tendered this lease shall remain in force and effect, even though thereby extended past the primary term, and all payments so paid or tendered after the expiration of said primary term shall be deemed advance royalties, and so long as same are paid each well or wells shall be deemed to be actually producing one or more Leased Substances in commercial quantities under the terms hereof; provided, however, that if within five (5) years from the date of expiration of the primary term hereof Lessee shall have failed to make, or make arrangements for by executed contract or contracts, a bona fide commercial sale of one or more Leased Substances then Lessor, at its option, may consider Lessee in default hereunder. Additionally, should Lessee fail to make any annual payment herein provided for on or before a particular anniversary date, Lessor may, at its option, consider Lessee in default hereunder."

4. That the royalty clause rider which appears on Page 3 of said lease is hereby deleted in its entirety and the following is hereby substituted therefor:

"Royalties payable hereunder shall never be less than Fifteen Dollars (\$15.00) per acre per year for the lands then covered by this Lease plus the amount of taxes levied or assessed against production or the right to produce Leased Substances from the lands covered by this Lease that are paid by Lessor pursuant to Paragraph 12 hereof."

5. That the quitclaim clause which appears on Page 4 of said lease is hereby deleted in its entirety and the following is hereby substituted therefor:

"9. Notwithstanding any other provisions of this lease, and in consideration of the payment made by the Lessee to the Lessor for the execution of this lease, Lessee shall have the right at any time prior to or after default hereunder, to quitclaim and surrender to Lessor all right, title

3

and interest of Lessee in and to the leased land, and thereupon all rights and obligations of the parties hereto one to the other shall cease and terminate as to the lands or areas so quitclaimed and surrendered, save and except as to any then accrued monetary obligations or royalty obligations of Lessee then payable as to which Lessee shall remain liable to Lessor.

As hereby amended said lease shall be and remain in full force and effect

as to all its terms and provisions.

This agreement shall be binding upon and shall inure to the benefit of the heirs personal representatives, successors and assigns of the parties hereto.

This agreement may be executed in any number of counterparts with the same force and effect as though all parties signed the same document.

IN WITNESS WHEREOF, the parties hereto have executed this instrument the day and year first hereinabove written.

EXHIBIT 10.4.20

Lease and Agreement
Union Oil Company of California

[UNION LOGO]

THIS LEASE AND AGREEMENT, made and entered into as of this 14th day of June, 1971, by and between FITZHUGH LEE BREWER, JR., a married man as his separate property, DONNA HAWK, a married woman as her separate property, and TED DRAPER and HELEN DRAPER, husband and wife hereinafter referred to as "Lessor", whether one or more, and UNION OIL COMPANY OF CALIFORNIA, a California corporation, hereinafter referred to as "Lessee".

WITNESSETH: That Lessor, for and in consideration of Ten Dollars (\$10.00) in hand paid to Lessor by Lessee, the rentals provided for hereinafter, and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged and in consideration of the covenants and agreements hereinafter contained by the Lessee to be kept and performed. Lessor has granted, leased, let and demised and by these presents does grant, lease, let and demise to Lessee, its grantees, successors and assigns, upon and subject to the terms and conditions hereinafter set forth, all that certain land (herein sometimes referred to as the "leased land") situate in the County of Imperial, State of California, and more particularly described as follows, to-wit:

Tract 47-1/2 and Lot 7, Subdivision of Tract 48, Township 16 South, Range 14 East, S.B.M., as per Licensed Surveyor's Map filed in Book 2, Page 7, Record of Surveys, in the office of the County Recorder of said County.

(deemed to contain, for the purposes hereof, 640.00 acres, whether there be more or less) with the sole and exclusive right to Lessee to explore for (by

such methods as it may desire), drill for, produce, extract, take, remove and sell hot water, steam and thermal energy and extractable minerals from, and to store, utilize, process, convert and otherwise treat such hot water, steam and thermal energy upon, said land, and to extract any extractable minerals during the term hereof, and to inject or reinject in the leased land effluence from wells located on the leased land or on lands in the vicinity thereof, with the right of entry on the leased land and use and occupancy thereof at all times for said purposes and the furtherance thereof, including the right to construct, use and maintain thereon and to remove therefrom structures, facilities and installations, pipe lines, utility lines, power and transmission lines. Further, the Lessee is hereby granted the use of roads and ponds on said land together with such rights of way and easements across said land for the construction of roads, ponds, pipe lines, power and telephone transmission lines as are necessary or convenient for the exploration, operation and development of Leased Substances on the leased land or in the vicinity thereof. In the event this lease should terminate with respect to all other rights for any reason, the rights herein granted with respect to such roads, ponds, rights of way and/or easements as are being used at the time of such termination shall remain in effect so long as such roads, ponds, rights of way and/or easements are being used by the Lessee, its successors and assigns. Following such termination, Lessee agrees to pay an annual rental during the period of use at the rate of ten per cent (10%) of the then current value used in tax assessments of the land occupied by such roads, ponds, rights of way and/or easements being used. The possession by Lessee of the leased land shall be sole and exclusive for the purposes hereof and for purposes incident or related thereto, excepting that

Lessor reserves the right to use and occupy said land, or to lease or otherwise deal with the same, without unreasonable interference with Lessee's rights, for mining or extraction and utilization of minerals lying on the surface of or in vein deposits on or in said land, or for the extraction of oil, natural hydrocarbon gas and other hydrocarbon substances, or for any and all uses other than the use and rights permitted to Lessee hereunder. Lessee agrees to conduct its activities in a manner which will not unreasonably interfere with the rights reserved to Lessor. The leased land includes also any rights of Lessor, presently owned or hereafter acquired, in and under roads, underlying ditches, and rights of way traversing or adjacent to said land.

For the purposes hereof the following definitions shall apply:

(a) The terms "hot water", "steam" and "thermal energy" shall mean natural geothermal water and/or steam, and shall also mean the natural heat of the earth and the energy present in, resulting from or created by, or which may be extracted from, the natural heat of the earth or the heat present below the surface of the earth, in whatever form such heat or energy occurs;

(b) The term "extractable minerals" shall mean any minerals in solution in the well effluence and all minerals and gases produced from or by means of any well or wells on the leased land or by means of condensing steam or processing water produced from or the effluence from any such well or wells; said term shall also include any water so produced or obtained from condensation of steam; and further provided that the term "gases" shall not include hydrocarbon gases that can be produced separately from the hot water, steam and associated minerals;

(c) The term "Leased Substances" shall collectively refer to the matter, substances and resources, defined in (a) and (b) above, that are the subject of this lease;

(d) The term "power potential" as used herein with respect to any well or wells shall mean the quantity, or units, of energy capable of being recovered from the hot water, steam or thermal energy produced therefrom by means of any energy conversion or utilization facility (including, but not limited to, electrical generating facilities) or equipment designed for use thereof;

(e) The term "sufficient power potential" as used herein shall be deemed to mean that power potential which, in the judgment of Lessee shall be sufficient for the commercial sale or utilization thereof, or shall warrant the construction of facilities for the commercial sale or other utilization thereof, or shall justify additional drilling or other operations on the leased land;

(f) The word "commercial" used in connection with various phrases herein shall mean those quantities of Leased Substances produced, sold or used, the value of which, after deducting Lessee's operating costs (or extraction costs in case of extractable minerals), will provide to Lessee a net return over such costs sufficient to cause Lessee to continue production thereof or to elect to proceed with further development or exploratory operations on the leased land.

The terms and conditions of this Lease and Agreement are as follows, to-wit;

1. This lease shall be for a term of ten (10) years from and after the date hereof (herein called "primary term") and so long thereafter as Leased Substances, or any of them, be derived or produced in commercial quantities from the leased land or lands pooled or combined therewith,

2

and for so long, as well, as Lessee is prevented from producing same, or the obligations of Lessee hereunder are suspended, for the causes hereinafter set forth.

If at the expiration of the primary term Lessee has not completed one or more wells on the leased land, or land pooled therewith, separately or collectively producing or being capable of producing steam of sufficient power potential and/or extractable minerals in commercial quantities but Lessee is then engaged in operations for drilling or reworking of any well on the leased land or land pooled therewith, this lease shall remain in force so long as drilling or reworking operations are prosecuted (whether on the same or different wells) with no cessation of more than six (6) months, and if they result in production or the establishment to the satisfaction of the Lessee of the existence of sufficient power potential and/or extractable minerals in commercial quantities, such well or wells will be deemed to have been completed and such existence so established during the primary term of this lease.

2. It is understood and agreed that the initial consideration paid upon the execution hereof covers not only the privileges granted to the date when a rental is payable as hereinafter provided, but any and all other rights conferred hereunder. If on or before one (1) year from the date hereof Lessee has not drilled such well or wells on the leased land or land pooled therewith as to indicate or establish to the satisfaction of Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities, then, but subject to Lessee's right of surrender, on or before said anniversary date, Lessee shall pay or tender to Lessor an annual rental in the amount of *** Dollars (\$***), which shall constitute rental until the next anniversary date hereof, and thereafter Lessee shall, on or before each succeeding anniversary date during the primary term hereunder, pay or tender to Lessor an annual rental in the aforesaid amount, this until such time as from the drilling of well or wells on the leased land, or land pooled therewith, there has been established to the satisfaction of the Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities. Upon such establishing as aforesaid, Lessee may nevertheless continue to pay or tender annual rental payments on or before each anniversary date, this until Lessee has commenced the actual sale of one or more Leased Substances, and so long as such annual rental payments be so paid or tendered this lease shall remain in force and effect, even though thereby extended past the primary term, and all payments so paid or tendered after the expiration of said primary term shall be deemed advance royalties, and so long as same are paid each well or wells shall be

deemed to be actually producing one or more Leased Substances in commercial quantities under the terms hereof; provided, however, that if within five (5) years from the date of expiration of the primary term hereof Lessee shall have failed to make, or make arrangements for by executed contract or contracts, a bona fide commercial sale of one or more Leased Substances then Lessor, at its option, may consider Lessee in default hereunder. Additionally, should Lessee fail to make any annual payment herein provided for on or before a particular anniversary date, Lessor may, at its option, consider Lessee in default hereunder.

3. Lessee shall pay to Lessor as royalty ***

*** Confidential material redacted and filed separately with the Commission.

3

*** Lessee shall pay to Lessor on or before the twenty-fifth day of each month the royalties accrued and payable for the preceding calendar month, or on or before the twenty-fifth day of the month next following that in which Lessee receives payment therefor from the purchaser thereof, whichever method shall apply, and in making such royalty payments Lessee shall deliver to Lessor statements setting forth the basis for computation and determination of such royalty.

Lessee shall not be required to account to Lessor for or to pay any royalty on hot water, steam, thermal energy or extractable minerals produced by Lessee on the leased land which are not utilized, saved and sold, or which are used by Lessee in its operations on or with respect to the leased land for or in connection with the developing, recovering, producing, extracting and/or processing of hot water, steam and/or minerals in solution or in facilities used in connection therewith, including operations of facilities for the generation of electric power, or which are unavoidably lost.

Lessee shall have the right, from time to time and at any time, to commingle (for purposes of storing, transporting, utilizing, selling or processing, or any of them) the or any of the Leased Substances produced or extracted from production from the leased land or lands pooled therewith with like Leased Substances, or any of them, produced from other lands or units in the vicinity of the leased land, and in the event of such commingling Lessee shall meter, gauge or measure the production from the leased land, or from the unit or units including same or other units or lands, as the case may be, and compute and pay Lessor's royalty payable under the provisions hereof on the basis of such production so determined or allocated, as the case may be.

4. Lessee may, at any time or from time to time as a recurring right, either before or after production but within twenty (20) years from the date hereof, for drilling, development, or operating purposes, pool, unitize or combine all or any part of the leased land into a unit with any other land or lands or lease or leases (whether held by Lessee or others) adjacent, adjoining or in the immediate vicinity of the leased land which Lessee desires to develop or operate as a unit, provided that the total acreage to be embraced within any such drilling, development, or operating unit shall not exceed one thousand nine hundred twenty (1,920) acres, plus an acreage tolerance of Ten Percent (10%). Such a unit shall become in existence upon Lessee's filing in the office of the County Recorder in the county in which the leased land is situated a notice of such unitization, describing said unit. Lessee shall also mail a copy of such notice to Lessor. Any well (whether or not Lessee's well) commenced, drilled, drilling and/or producing or being capable of producing in any part of such unit shall for all purposes of this lease be deemed a well commenced, drilled, drilling and/or producing on the leased land, and Lessee shall have the same rights and obligations with respect thereto and to drilling and producing operations upon the

*** Confidential material redacted and filed separately with the Commission.

lands from time to time included within any such unit as Lessee would have if such lands constituted the leased land; provided, however, that notwithstanding this or any other provision or provisions of this lease to the contrary:

(1) production as to which royalty is payable from any such well or wells drilled upon any such unit, whether located upon the leased land or other lands, shall be allocated to the leased land in the proportion that the surface acreage of the leased land in such unit bears to the total surface acreage of such unit, and such allocated portion thereof shall for all purposes of this lease be considered as having been produced from the leased land, and the royalty payable under this lease with respect to the leased land included in such unit shall be payable only upon that proportion of such production so allocated thereto, and,

(2) if any taxes of any kind are levied or assessed (other than taxes on the land and on Lessor's improvements), any portion of which is chargeable to Lessor under Paragraph 12 hereof, then the share of such taxes to be borne by Lessor as provided in this lease, shall be in proportion to the share of the production from such unit allocated to the leased land.

Allocation as aforesaid of production from any such unit, whether to the leased land or in like manner to other lands therein, shall continue notwithstanding any termination, either in whole or in part (by surrender, forfeiture or otherwise), of this or any other lease covering lands in such unit until such time as the owner of such lands so terminated shall enter into an agreement to drill for or produce or shall drill for or produce or permit or cause the drilling for or production from any part of such lands, whereupon all such lands formerly included in such unit and as to which the lease covering the same shall have terminated shall be excluded in determining the production to be allocated to the respective lands in such unit; additionally, in the event of the failure of Lessor's, or any other owner's, title as to any portion of the land included in any such unit, such portion of such land shall likewise be excluded in allocating production from such unit; provided, however, Lessee shall not be held to account for any production allocated to any lands excluded from any such operating unit unless and until Lessee has actual knowledge of the aforesaid circumstances requiring such exclusion. Any exclusion shall be deemed effective the first day of the month next following the date upon which such exclusion becomes finally established.

Lessee may, at its sole option, at any time when there is no production in such unit of Leased Substances in quantities deemed paying by Lessee, terminate such unit by a written declaration thereof, in the same manner in which it was created.

5. At such time as Lessee shall have drilled and completed such well or wells on the leased land or land pooled therewith which shall indicate to the satisfaction of Lessee a sufficient power potential, or the existence of extractable minerals in commercial quantities, Lessee may at any time thereafter construct and install on the leased land facilities for the commercial sale or use of hot water, steam or thermal energy produced from the leased land or lands in the vicinity thereof or pooled therewith, or for the extraction of extractable minerals, or for development of electric power from the use of steam or thermal energy produced from the leased land or lands in the vicinity thereof or pooled therewith.

6. Lessee shall have the right to drill such well or wells on the leased land as Lessee may deem desirable for the purposes hereof, including wells for injection or re-injection purposes; provided, however, that Lessee agrees to utilize to such purpose or purposes only so much of the leased land as shall be

reasonably necessary for Lessee's operations and activities thereon. No well shall be drilled within one hundred (100) feet of any residence or barn now on said land without Lessor's consent. Lessee shall have free use of water from said land for all operations thereon or on land pooled therewith, provided that such free use shall not interfere with Lessor's own use for domestic, commercial, stock or agricultural purposes, nor interfere with any contractual commitments of Lessor relating thereto and existing on the date hereof. Lessee shall not be entitled to free use of any water which has been or is being purchased by Lessor.

Lessee agrees to fence all sump holes or other excavations, and upon abandonment of any well on the leased land, or the termination of the lease, Lessee shall level and fill all sump holes and excavations, shall remove all debris and shall leave the locations or premises used by Lessee in a clean and sanitary condition.

Lessee shall protect said land against liens of every character arising from its operations thereon. Lessee, at its own ex-_____ shall obtain and thereafter while this lease is in effect shall main-_____

6A Notwithstanding anything to the contrary contained herein, Lessee agrees to hold Lessor harmless as to all losses of agricultural rental and all claims and demands of any nature whatsoever, including damages, expenses, costs and attorneys' fees, in any claim against or loss by Lessor based upon or caused by Lessee's activities on the leased land.

7. Lessor, or its agents, at Lessor's sole risk, may at all times examine said land and the workings, installations and structures thereon and operations of Lessee thereon, and may at reasonable times inspect the books and records of Lessee with respect to matters pertaining to the payment of royalties to Lessor.

8. Upon the violation of any of the terms and conditions of this lease by Lessee (including but not limited to payment of rental and/or advance royalty) and the failure of Lessee to, as to monetary matters, make payment, and as to other violations begin in good faith to remedy the same, within sixty (60) days after written notice from Lessor so to do, specifying in said notice the nature of such default, then at the option of Lessor this lease shall forthwith cease and terminate and all rights of Lessee in and to the leased land shall be at an end, save and excepting five (5) acres surrounding each and any well then producing or capable of producing or being drilled, and in respect to which Lessee shall not be in default, together with the rights, rights of way and easements which may be retained by Lessee by virtue of the granting clause of this lease, and together with rights granted Lessee in Paragraph 5, hereof.

9. Notwithstanding any other provisions of this lease, and in consideration of the payment made by the Lessee to the Lessor for the execution of this lease, Lessee shall have the

6

right at any time prior to or after default hereunder, to quitclaim and surrender to Lessor all right, title and interest of Lessee in and to the leased land or any part thereof, and thereupon all rights and obligations of the parties hereto one to the other shall cease and terminate as to the lands or areas so quitclaimed and surrendered, save and except as to any then accrued monetary obligations or royalty obligations of Lessee then payable as to which Lessee shall remain liable to Lessor, and save and except the rights, rights of way and easements which may be retained by Lessee by virtue of the granting clause of this lease, and provided that in the event of a partial quitclaim and surrender, any future rentals will be reduced proportionately by the number of acres in the area so quitclaimed and surrendered.

10. In the event Lessor at the time of making this lease owns a less interest in the leased land than One Hundred Percent (100%) of the rights and

interests herein granted or leased to Lessee, then the rentals and royalties accruing hereunder shall be paid to Lessor only in the proportions which Lessor's interest bears to a One Hundred Percent (100%) interest therein in the leased land. Notwithstanding the foregoing, should Lessor hereafter acquire any additional right, title or interest in or to the leased land, it shall be subject to the provisions hereof to the same extent as if owned by Lessor at the date hereof, and any increase in payments of money hereunder necessitated thereby shall commence with the payment next following receipt by Lessee of satisfactory evidence of Lessor's acquisition of such additional interest.

11. Lessor hereby warrants and agrees to defend title to the leased land and agrees that Lessee, at its option, may pay and discharge any taxes, mortgages, trust deeds or other liens or encumbrances existing, levied or assessed on or against the leased land, and in the event Lessee exercises such option Lessee shall be subrogated to the rights of any holder or holders thereof, and shall have, among other rights, the right of applying to the discharge of any such mortgage, tax or other lien or encumbrance any royalties or rentals accruing to Lessor hereunder.

12. Lessee shall pay all taxes levied on Lessee's structures and improvements placed on the leased land by Lessee. Lessee shall pay 90% and the Lessor shall pay 10% of any taxes assessed against any Leased Substances stored on the leased land. In the event any taxes are levied or assessed against the right to produce Leased Substances from the leased land or in the event any increase in the taxes levied or assessed against the leased land shall be based upon the production from the leased land of Leased Substances, then in either such event Lessee shall pay 90% of any such taxes or increase, as the case may be, and Lessor shall pay 10% thereof. Lessor shall pay all taxes levied or assessed against the leased land as such without reference to the production of Leased Substances therefrom and shall pay all taxes levied and assessed against any and all rights in or to or with respect to the leased land not covered by this lease and shall pay all taxes levied and assessed against all structures and improvements owned by Lessor or placed on the leased land by or pursuant to permission of Lessor.

13. The rights of either party hereunder may be assigned in whole or in part, and the right and privilege so to do is hereby reserved by each party, and the provisions hereof shall extend to the heirs, successors and assigns of the parties hereto, but no change or division in ownership of the land, rentals or royalties, however accomplished, shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee may continue to operate the leased land and to pay and settle rentals or royalties as an entirety, and no such change in ownership shall be binding upon Lessee until the expiration of thirty (30) days after Lessee is furnished with

7

satisfactory written evidence thereof. In the event of assignment of this lease as to a segregated portion of said land, the rentals payable hereunder shall be apportionable between the several leasehold owners ratably according to the surface area of each, and default in rental payment by one shall not affect the rights of other leasehold owners hereunder.

14. The obligations of Lessee hereunder shall be suspended and the term of this lease shall be extended, as the case may be, while Lessee is prevented from complying therewith, in whole or in part, by strikes, lockouts, riots, actions of the elements, accidents, delays in transportation, inability to secure labor or materials in the open market, laws, rules or regulations of any federal, state, municipal or other governmental agency, authority or representative or other matters or conditions beyond the reasonable control of Lessee, whether or not similar to the conditions or matters herein specifically enumerated.

If at any time after the expiration of fifteen (15) years from date hereof the production of all Leased Substances cease for any cause other than one or

more of the causes hereinabove enumerated, this lease shall nevertheless remain in full force and effect for an additional period of one (1) year from cessation and thereafter if, and so long as, Lessee commences and continues diligently and in good faith the steps, operations or procedures to cause a resumption of such production (either through the existing wells or the drilling of new wells), until such production be resumed.

8

15. All statements of production and royalty and all payments to be made by Lessee to Lessor hereunder shall be sent to the persons hereinafter set forth, respectively, at the addresses indicated and each such person shall be entitled to receive that portion of the total rentals and royalty payable hereunder as is hereinafter set forth after the name of such person:

Lessee shall, upon notification of change of ownership in the lands or in rentals or royalties hereunder, as provided in Paragraph 13 hereof, divide and distribute the same to the new owners of such interests; provided, however, that if at any time there are three or more persons entitled to rentals or royalties hereunder, Lessee may, at its option, withhold payment of such rentals or royalties, until a majority in interest of such persons designate in writing in a recordable instrument delivered to Lessee, a bank, trust company or corporation, as a common agent and depository, to receive all payments due hereunder to such persons. Such designation may be changed at any time in the same manner. Delivery of all statements and payments hereunder may be made by depositing the same in the United States mail duly addressed to Lessor at the above address or adds or to such agent and depository which shall constitute full performance of Lessee's obligation to make such delivery. In the event that the amount payable under this lease shall result in a payment of less than Five Dollars (\$5.00) becoming due Lessor, Lessee may, at its option, withhold and accrue sufficient periodic payments until the total due Lessor exceeds Five Dollars(\$5.00).

16. Any notice herein required or permitted to be given or furnished by one party to the other shall be in writing. Delivery of such written notice to Lessor shall be made by depositing the same in the United States mail duly certified and addressed to Lessor at 1121 North Cerritos, Fullerton California and delivery of such written notice to Lessee shall be made by depositing the same in the United States mail duly certified and addressed to Lessee at Union Oil Center, 461 South Boylston Street, Los Angeles, California 90017. Either party hereto may by written notice to the other party change its address to any other location.

17. In the event any part or portion or provision of this instrument shall be found or declared to be null, void or unenforceable for any reason whatsoever by any Court of competent jurisdiction or any governmental agency having authority thereover, then and in such event only

9

such part, portion or provision shall be affected thereby, and such finding, ruling or decision shall not in any way affect the remainder of this instrument or any of the other terms or condition hereof, which said remaining terms and conditions shall remain binding, valid and subsisting and in full force and effect between the parties hereto, it being specifically understood and agreed that the provisions hereof are severable for the purposes of the provisions of this clause. In this connection, this lease shall not in any event extend beyond such term as may be legally permissible under present applicable laws, and should any such applicable law limit the term hereof to less than that herein provided, then this lease shall not be void but shall be deemed to be in existence for such term and no longer.

18. If more than one person is named as a Lessor herein and one or more of them fails to execute this lease, said lease shall nevertheless (when accepted by Lessee) become effective as a lease from such of said named parties Lessor as may have executed the same.

19. This lease may be executed in any number of counterparts and all such counterparts shall be deemed to constitute a single lease and the execution of one counterpart by any party Lessor shall have the same force and effect as if such party had signed all the other counterparts.

20. This Lease and Agreement and all of the terms, covenants and conditions hereof shall extend to the benefit of and be binding upon the respective heirs, successors and assigns of the parties hereto.

21. Any portion of the surface of the leased land used by Lessee in its operations shall be subject to an annual rental payment, payable in advance on the date the use begins and yearly thereafter until the use is terminated, equal to rentals paid for comparable lands in the area for agricultural purposes, but such rental shall not exceed \$100.00 per acre per year. Further, the Lessee recognizes that surface of the leased land is now subject to an unrecorded lease for agricultural purposes, and agrees to recognize the rights of the Lessee of said agricultural lease so long as his present lease is valid together with any extensions of the lease period and/or amendments thereto. The Lessee herein agrees with the Lessor to enter into negotiations with the Lessee of said agricultural lease regarding the use of the surface prior to any operations on the leased land by the Lessee herein.

IN WITNESS WHEREOF, the parties have caused this instrument to be duly executed as of the date hereinabove first written.

Exhibit 10.4.21

Lease and Agreement
Union Oil Company of California

[COMPANY LOGO]

THIS LEASE AND AGREEMENT, made and entered into as of this 13th day of May, 1971, by and between MATHEW J. LA BRUCHERIE and JANE E. LA BRUCHERIE, HUSBAND AND WIFE; and ROBERT T. O'DELL and PHYLLIS M. O'DELL, husband and wife hereinafter referred to as "Lessor", whether one or more, and UNION OIL COMPANY OF CALIFORNIA, a California corporation, hereinafter referred to as "Lessee",

WITNESSETH: That Lessor, for and in consideration of Ten Dollars (\$10.00) in hand paid to Lessor by Lessee, the rentals provided for hereinafter, and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged and in consideration of the covenants and agreements hereinafter contained by the Lessee to be kept and performed, Lessor has granted, leased, let and demised and by these presents does grant, lease, let and demise to Lessee, its grantees, successors and assigns, upon and subject to the terms and conditions hereinafter set forth, all that certain land (herein sometimes referred to as the "leased land") situate in the County of IMPERIAL, State of CALIFORNIA, and more particularly described as follows, to-wit:

PARCEL 1: Lot 29, subdivision of Tract 48, Township 16 South, Range 14 East,
----- S.B.B. & M., 71.30 Acres, more or less, lying Southwesterly of
Southern Pacific Railroad.

PARCEL 2: Lot 28, subdivision of Tract 48, Township 16 South, Range 14 East,
----- S.B.B. & M., 82.20 Acres, more or less, lying Northwesterly of
Southern Pacific Railroad.

(deemed to contain, for the purposes hereof, 154 acres, whether there be more or less) with the sole and exclusive right to Lessee to explore for (by such methods as it may desire), drill for, produce, extract, take, remove and sell hot water, steam and thermal energy and extractable minerals from, and to store, utilize, process, convert and otherwise treat such hot water, steam and thermal energy upon, said land, and to extract any extractable minerals during the term hereof, and to inject or reinject in the leased land effluence from wells located on the leased land or on lands in the vicinity thereof, with the right of entry on the leased land and use and occupancy thereof at all times for said purposes and the furtherance thereof, including the right to construct, use and maintain thereon and to remove therefrom structures, facilities and

installations, pipe lines, utility lines, power and transmission lines. Further, the Lessee is hereby granted the use of roads and ponds on said land together with such rights of way and easements across said land for the construction of roads, ponds, pipe lines, power and telephone transmission lines as are necessary or convenient for the exploration, operation and development of Leased Substances on the leased land or in the vicinity thereof. In the event this lease should terminate with respect to all other rights for any reason, the rights herein granted with respect to such roads, ponds, rights of way and/or easements as are being used at the time of such termination shall remain in effect so long as such roads, ponds, rights of way and/or easements are being used by the Lessee, its successors and assigns. Following such termination, Lessee agrees to pay an annual rental during the period of use at the rate of ten per cent (10%) of the then current value used in tax assessments of the land occupied by such roads, ponds, rights of way and/or easements being used. The possession by Lessee of the leased land shall be sole and exclusive for the purposes hereof and for purposes incident or related thereto, excepting that Lessor reserves the right to use and occupy said land, or to lease or otherwise deal with the same, without unreasonable interference with Lessee's rights, for mining or extraction and utilization of minerals lying on the surface of or in vein deposits on or in said land, or for the extraction of oil, natural hydrocarbon gas and other hydrocarbon substances, or for any and all uses other than the use and rights permitted to Lessee hereunder. Lessee agrees to conduct its activities in a manner which will not unreasonably interfere with the rights reserved to Lessor. The leased land includes also any rights of Lessor, presently owned or hereafter acquired, in and under roads, underlying ditches, and rights of way traversing or adjacent to said land.

For the purposes hereof the following definitions shall apply:

(a) The terms "hot water", "steam" and "thermal energy" shall mean natural geothermal water and/or steam, and shall also mean the natural heat of the earth and the energy present in, resulting from or created by, or which may be extracted from, the natural heat of the earth or the heat present below the surface of the earth, in whatever form such heat or energy occurs;

(b) The term "extractable minerals" shall mean any minerals in solution in the well effluence and all minerals and gases produced from or by means of any well or wells on the leased land or by means of condensing steam or processing water produced from or the effluence from any such well or wells; said term shall also include any water so produced or obtained from condensation of steam; and further provided that the term "gases" shall not include hydrocarbon gases that can be produced separately from the hot water, steam and associated minerals;

(c) The term "Leased Substances" shall collectively refer to the matter, substances and resources, defined in (a) and (b) above, that are the subject of this lease;

(d) The term "power potential" as used herein with respect to any well or wells shall mean the quantity, or units, of energy capable of being recovered from the hot water, steam or thermal energy produced therefrom by means of any energy conversion or utilization facility (including, but not limited to, electrical generating facilities) or equipment designed for use thereof;

(e) The term "sufficient power potential" as used herein shall be deemed to mean that power potential which, in the judgment of Lessee shall be sufficient for the commercial sale or

utilization thereof, or shall warrant the construction of facilities for the commercial sale or other utilization thereof, or shall justify additional

drilling or other operations on the leased land;

(f) The word "commercial" used in connection with various phrases herein shall mean those quantities of Leased Substances produced, sold or used, the value of which, after deducting Lessee's operating costs (or extraction costs in case of extractable minerals), will provide to Lessee a net return over such costs sufficient to cause Lessee to continue production thereof or to elect to proceed with further development or exploratory operations on the leased land.

The terms and conditions of this Lease and Agreement are as follows, to-wit;

1. This lease shall be for a term of ten (10) years from and after the date hereof (herein called "primary term") and so long thereafter as Leased Substances, or any of them, be derived or produced in commercial quantities from the leased land or lands pooled or combined therewith, and for so long, as well, as Lessee is prevented from producing same, or the obligations of Lessee hereunder are suspended, for the causes hereinafter set forth.

If at the expiration of the primary term Lessee has not completed one or more wells on the leased land, or land pooled therewith, separately or collectively producing or being capable of producing steam of sufficient power potential and/or extractable minerals in commercial quantities but Lessee is then engaged in operations for drilling or reworking of any well on the leased land or land pooled therewith, this lease shall remain in force so long as drilling or reworking operations are prosecuted (whether on the same or different wells) with no cessation of more than six (6) months, and if they result in production or the establishment to the satisfaction of the Lessee of the existence of sufficient power potential and/or extractable minerals in commercial quantities, such well or wells will be deemed to have been completed and such existence so established during the primary term of this lease.

2. It is understood and agreed that the initial consideration paid upon the execution hereof covers not only the privileges granted to the date when a rental is payable as hereinafter provided, but any and all other rights conferred hereunder. If on or before one (1) year from the date hereof Lessee has not drilled such well or wells on the leased land or land pooled therewith as to indicate or establish to the satisfaction of Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities, then, but subject to Lessee's right of surrender, on or before said anniversary date, Lessee shall pay or tender to Lessor an annual rental in the amount of *** Dollars (\$***), which shall constitute rental until the next anniversary date hereof, and thereafter Lessee shall, on or before each succeeding anniversary date during the primary term hereunder, pay or tender to Lessor an annual rental in the aforesaid amount, this until such time as from the drilling of well or wells on the leased land, or land pooled therewith, there has been established to the satisfaction of the Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities. Upon such establishing as aforesaid, Lessee may nevertheless continue to pay or tender annual rental payments on or before each anniversary date, this until Lessee has commenced the actual sale of one or more Leased Substances, and so long as such annual rental payments be so paid or tendered this lease shall remain in force and effect, even though thereby extended past the primary term, and all payments so paid or tendered after the expiration of said primary term shall be deemed advance royalties, and so long as same are paid each well or wells

*** Confidential material redacted and filed separately with the Commission.

-3-

shall be deemed to be actually producing one or more Leased Substances in commercial quantities under the terms hereof; provided, however, that if within five (5) years from the date of expiration of the primary term hereof Lessee shall have failed to make, or make arrangements for by executed contract or contracts, a bona fide commercial sale of one or more Leased Substances then Lessor, at its option, may consider Lessee in default hereunder. Additionally,

should Lessee fail to make any annual payment herein provided for on or before a particular anniversary date, Lessor may, at its option, consider Lessee in default hereunder.

3. Lessee shall pay to Lessor as royalty ***. Lessee shall pay to Lessor on or before the twenty-fifth day of the month next the royalties accrued and payable for the preceding calendar month, or on or before the twenty-fifth day of the month next following that in which Lessee receives payment therefore from the purchaser thereof, whichever method shall apply, and in making such royalty payments Lessee shall deliver to Lessor statements setting forth the basis for computation and determination of such royalty.

Lessee shall not be required to account to Lessor for or to pay any royalty on hot water, steam, thermal energy or extractable minerals produced by Lessee on the leased land which are not utilized, saved and sold, or which are used by Lessee in its operations on or with respect to the leased land for or in connection with the developing, recovering, producing, extracting and/or processing of hot water, steam and/or minerals in solution or in facilities used in connection therewith, including operations of facilities for the generation of electric power, for its own consumption, or which are unavoidably lost.

Lessee shall have the right, from time to time and at any time, to commingle (for purposes of storing, transporting, utilizing, selling or processing, or any of them) the or any of the Leased Substances produced or extracted from production from the leased land or lands pooled therewith with the Leased Substances, or any of them, produced from other lands or units in the vicinity of the leased land, and in the event of such commingling Lessee shall meter, gauge or measure the production from the leased land, or from the unit or units including same or other units or lands, as the case may be, and compute and pay Lessor's royalty payable under the provisions hereof on the basis of such production so determined or allocated, as the case may be.

*** Confidential material redacted and filed separately with the Commission.

-4-

4. Lessee may, at any time or from time to time as a recurring right, either before or after production but within twenty (20) years from the date hereof, provided this lease is then in effect and Lessee is not in default, for drilling, development, or operating purposes, pool, utilize or combine all of the leased land into a unit with any other land or lands or leased or leases (whether held by Lessee or others) adjacent, adjoining or in the immediate vicinity of the leased land which Lessee desires to develop or operate as a unit, provided that the total acreage to be embraced within any such drilling, development, or operating unit shall not exceed one thousand nine-hundred twenty (1,920) acres, plus an acreage tolerance of Ten Percent (10%). Such a unit shall become in existence upon Lessee's filing in the office of the County Recorder in the county in which the leased land is situated a notice of such unitization, describing said unit. Lessee shall also mail a copy of such notice to Lessor. Any well (whether or not Lessee's well commenced, drilled, drilling and/or producing or being capable of producing in any part of such unit shall for all purposes of this lease be deemed a well commenced, drilled, drilling and/or producing on the leased land, and Lessee shall have the same rights and obligations with respect thereto and to drilling and producing operations upon the lands from time to time include within any such unit as Lessee would have if such lands constituted the leased land; provided, however, that notwithstanding this or any other provision or provisions of this lease to the contrary:

(1) production as to which royalty is payable from any such well or wells drilled upon any such unit, whether located upon the leased land or other lands, shall be allocated to the leased land in the proportion that the surface acreage of the leased land in such unit bears to the total surface acreage of such unit, and such allocated portion thereof shall for all purposes of this lease be considered as having been produced from the leased land, and the royalty payable under this lease with respect to the leased land included in

such unit shall be payable only upon that proportion of such production so allocated thereto, and

(2) if any taxes of any kind are levied or assessed (other than taxes on the land and on Lessor's improvements), and a portion of which is chargeable to Lessor under Paragraph 12 hereof, then the share of such taxes to be borne by Lessor as provided in this lease, shall be in proportion to the share of the production from such unit allocated to the leased land.

Allocation as aforesaid of production from any such unit, whether to the leased land or in like manner to other land therein, shall continue notwithstanding any termination, either in whole or in part (by surrender, forfeiture or otherwise), on this or any other lease covering lands in such unit until such time as the owner of such lands so terminated shall enter into an agreement to drill for or produce or shall drill for or produce or permit or cause the drilling for or production from any part of such lands, whereupon all such lands formerly included in such unit and as to which the lease covering the same shall have terminated shall be excluded in determining the production to be allocated to the respective lands in such unit; additionally, in the event of the failure of Lessor's, or in any other owner's, title as to any portion of the land included in any such unit, such portion of such land shall likewise be excluded in allocating production from such unit; provided, however, Lessee shall not be held to account for any production allocated to any lands excluded from any such operating unit unless and until Lessee has actual knowledge of the aforesaid circumstances requiring such exclusion. Any exclusion shall be deemed effective the first day of the month next following the date upon which such exclusion becomes finally established.

-5-

Lessee may, at its sole option, at any time when there is no production in such unit of Leased Substances in quantities deemed paying by Lessee, terminate such unit by a written declaration thereof, in the same manner in which it was created.

5. At such time as Lessee shall have drilled and completed such well or wells on the leased land or land pooled therewith which shall indicate to the satisfaction of Lessee a sufficient power potential, or the existence of extractable minerals commercial quantities, Lessee may at any time thereafter construct and install in the leased land facilities for the commercial sale or use of hot water, steam or thermal energy produced from the leased land or lands in the vicinity thereof or pooled therewith, or for the extraction of extractable minerals, or for development of electric power from the use of steam or thermal energy produced from the leased land or lands in the vicinity thereof or pooled therewith.

6. Lessee shall have the right to drill such well or wells on the leased land as Lessee may deem desirable for the purposes hereof, including wells for injection or re-injection purposes; provided, however, that Lessee agrees to utilize for such purpose or purposes only so much of the leased land as shall be reasonably necessary for Lessee's operations and activities thereon. No well shall be drilled within one hundred (100) feet of any residence or barn now on said land without Lessor's consent. Lessee shall have free use of water from said land for all operations thereon or on land pooled therewith, provided that such free use shall not interfere with Lessor's own use for domestic, commercial, stock or agricultural purposes, nor interfere with any contractual commitments of Lessor relating thereto and existing on the date hereof. Lessee shall not be entitled to free use of any water which has been or is being purchased by Lessor, Lessee shall not allow the fluid level of any effluence it may inject or re-inject hereunder to be less than a depth of 200 feet below the present surface of the leased land.

Lessee agrees to fence all sump holes or other excavations, and upon abandonment of any well on the leased land, the termination of the lease, Lessee shall level and fill all sump holes and excavations, shall remove all

debris and shall leave the locations or premises used by Lessee in a clean and sanitary condition. Abandonment of any well drilled by Lessee on the leased land shall be accomplished in accordance with all applicable laws or regulation of the governing municipality

Lessee shall protect said land against liens of every character arising from its operations thereon. Lessee, at its own expense, prior to commencing operations on the leased land, shall obtain, and thereafter while this lease is in effect shall maintain, adequate Workmen's Compensation Insurance. Lessee shall protect Lessor against damages of every kind and character arising out of the operations or working of Lessee or those under Lessee's control upon the leased land, but Lessee shall not be liable hereunder in the event of the negligence or willful misconduct of parties other than Lessee. In the event any building or personal property be damaged or destroyed, or grazing or agricultural lands be damaged or destroyed by Lessee's operations, then Lessee shall be liable for, and to the extent of, the reasonable value thereof.

Lessee shall have the right at any time and from time to time to remove from the leased land any and all casing, machinery, equipment, structures, installations and property of every kind and character placed upon said leased land by or pursuant to permission of Lessee,

-6-

provided that if such removal should occur after termination hereof same shall be completed within a reasonable time thereafter.

7. Lessor, or its agents, at Lessor's sole risk, may at all times examine said land and the workings, installations and structures thereon and operations of Lessee thereon, and may at reasonable times inspect the books and records of Lessee with respect [MISSING TEXT]

6-a Any provision contained in Paragraph 6 hereof notwithstanding, Lessee shall drill no well from the, surface of the leased land except from drillsites thereon to be designated by Lessor. Lessor agrees to designate, with fifteen (15) days after receiving Lessee's written request to do so, one (1) such drillsite for every forty (40) acres or major fraction thereof of the leased land together with adequate rights of way from such drill site to a public roadway. Such drillsites shall be, as near as practicable in the form of a square containing five (5) acres. In the event pipelines, utility lines, power and/or transmission lines are deemed necessary, Lessee agrees to secure Lessor's consent as to the location of same.

6-b Lessee agrees that upon entering upon the surface of the leased land as provided in Paragraph 6-a hereof, it shall pay Lessor a rental in an amount equal to rentals paid for comparable lands in the area for agricultural purposes but not to exceed *** Dollars (\$**) per acre per year. Such rentals shall be payable annually in advance until Leased Substances are produced from the leased land in commercial quantities, until Lessee shall quitclaim its right to enter upon the surface of said land or until this lease shall terminate, whichever shall first occur.

12. Lessee shall pay all taxes levied on Lessee's structures and improvements placed on the leased land by Lessee. Lessee shall pay 90% and the Lessor shall pay 10% of any taxes assessed against any Leased Substances stored on the leased land. In the event any taxes are levied or assessed against the

right to produce Leased Substances from the leased land or in the event any increase in the taxes levied or assessed against the leased land shall be based upon the production from the leased land of Leased Substances, then in either such event Lessee shall pay 90% of any such taxes or increase, as the case may be, and Lessor shall pay 10% thereof. Lessor shall pay all taxes levied or assessed against the leased land as such without reference to the production of Leased Substances therefrom and shall pay all taxes levied and assessed against any and all rights in or to or with respect to the leased land not covered by this lease and shall pay all taxes levied and assessed against all structures and improvements owned by Lessor or placed on the leased land by or pursuant to permission of Lessor.

13. The rights of either party hereunder may be assigned in whole or in part, and the right and privilege so to do is hereby reserved by each party, provided, however, that the Lessee shall not assign all or any part of its interest except to a major oil or utility company, and the provisions hereof shall extend to the heirs, successors and assigns of the parties hereto, but no change or division in ownership of the land, rentals or royalties, however accomplished, shall

*** Confidential material redacted and filed separately with the Commission.

-7-

operate to enlarge the obligations or diminish the rights of Lessee, and Lessee may continue to operate the leased land and to pay and settle rentals or royalties as an entirety, and no such change in ownership shall be binding upon Lessee until the expiration of thirty (30) days after Lessee is furnished with satisfactory written evidence thereof. In the event of assignment of this lease as to a segregated portion of said land, the rentals payable hereunder shall be apportionable between the several leasehold owners ratably according to the surface area of each, and default in rental payment by one shall not affect the rights of other leasehold owners hereunder.

14. The obligations of Lessee hereunder shall be suspended and the term of this lease shall be extended, as the case may be, while Lessee is prevented from complying therewith, in whole or in part, by strikes, lockouts, riots, actions of the elements, accidents, delays in transportation, inability to secure labor or materials in the open market, laws, rules or regulations of any federal, state, municipal or other governmental agency, authority or representative, or other matters or conditions beyond the reasonable control of Lessee, whether or not similar to the conditions or matters herein specifically enumerated.

If any time after the expiration of fifteen (15) years from date hereof the production of all Leased Substances ceases for any cause other than one or more of the causes hereinabove enumerated, this lease shall nevertheless remain in full force and effect for an additional period of one (1) year from cessation and thereafter if, and so long as, Lessee commences and continues diligently and in good faith the steps, operations or procedures to cause a resumption of such production (either through the existing wells or the drilling of new wells), until such production be resumed.

15. All statements of production and royalty and all payments to be made by Lessee to Lessor hereunder shall be sent to the persons hereinafter set forth, respectively, at the addresses indicated and each such person shall be entitled to receive that portion of the total rentals and royalty payable hereunder as is hereinafter set forth after the name of such person:

Mathew J. LaBrucheri and Jane E. LaBrucherie	50%	Taxpayer's Indent
Robert T. O'Dell and Phyllis M. O'Dell	50%	No. 558 24 7862

P.O. Box 1420

Taxpayer's Indent

Lessee shall, upon notification of change of ownership in the lands or in rentals or royalties hereunder, as provided in Paragraph 13 hereof, divide and distribute the same to the new owners of such interests; provided, however, that if at any time there are three or more persons entitled to rentals or royalties hereunder, Lessee may at its option, withhold payment of such rentals or royalties until a majority in interest of such persons designate in writing in a recordable instrument delivered to Lessee, a bank, trust company or corporation, as a common agent and depository to, receive all payments due hereunder to such persons. Such designation may be changed at any time in the same manner. Delivery of all statements and payments hereunder may be made by depositing the same in the United States mail duly addressed to Lessor at the above address or addresses or to such agent and depository which shall constitute full performance of Lessee's obligation to make such delivery. In the event that the amount payable under this lease shall result in a payment of less than Five Dollars (\$5.00) becoming due Lessor,

-8-

Lessee may, at its option, withhold and accrue sufficient periodic payments until the total due Lessor exceeds Five Dollars (\$5.00).

16. Any notice herein required or permitted to be given or furnished by one party to the other shall be in writing, Delivery of such written notice to Lessor shall be made by depositing the same in the United States mail duly certified and addressed to Lessor at P.O. Box 1420 El Centro, California, 92243 and delivery of such written notice to Lessee shall be made by depositing the same in the United States mail duly certified and addressed to Lessee at Union Oil Center, 461 South Boylston Street, Los Angeles, California 90017. Either party hereto may by written notice to the other party change its address to any other location.

17. In the event any part or portion or provision of this instrument shall be found or declared to be null, void or unenforceable for any reason whatsoever by any Court of competent jurisdiction or any governmental agency having authority thereover, then and in such event only such part, portion or provision shall be affected thereby, and such finding, ruling or decision shall not in any way affect the remainder of this instrument or any of the other terms or condition hereof, which said remaining terms and conditions shall remain binding, valid and subsisting and in full force and effect between the parties hereto, it being specifically understood and agreed that the provisions hereof are severable for the purposes of the provisions of this clause. In this connection, this lease shall not in any event extend beyond such term as may be legally permissible under present applicable laws, and should any such applicable law limit the term hereof to less than that herein provided, then this lease shall not be void but shall be deemed to be in existence for such term and no longer.

18. If more than one person is named as a Lessor herein and one or more of them fails to execute this lease, said lease shall nevertheless (when accepted by Lessee) become effective as a lease from such of said named parties Lessor as may have executed the same.

19. This lease may be executed in any number of counterparts and all such counterparts shall be deemed to constitute a single lease and the execution of one counterpart by any party Lessor shall have the same force and effect as if such party had signed all the other counterparts.

20. This Lease and Agreement and all of the terms, covenants and conditions hereof shall extend to the benefit of and be binding upon the respective heirs, successors and assigns of the parties hereto.

-9-

IN WITNESS WHEREOF, the parties have caused this instrument to be duly executed as of the date hereinabove first written.

AMENDMENT TO GEOTHERMAL LEASE AND AGREEMENT

THIS AGREEMENT made and entered into as of this fifth day of April, 1976, by and between MATHEW J. LA BRUCHERIE and JANE E. LA BRUCHERIE, husband and wife; and ROBERT T. O'DELL and PHYLLIS M. O'DELL, husband and wife, hereinafter called "Lessor" and UNION OIL COMPANY OF CALIFORNIA, a California corporation, hereinafter called "Lessee";

W I T N E S S E T H:

THAT WHEREAS, Lessee presently holds all of the Lessee's right, title and interest under that certain Geothermal Lease and Agreement dated May 13, 1971, entered into by and between Lessor and Lessee herein, covering 154.00 acres, more or less, situate in Imperial, more particularly described in said lease; a Memorandum of which was recorded July 1, 1971 in Book 1311, at Page 996, Official Records of said County and State; and

WHEREAS, it is the desire of the parties hereto to amend said lease by modifying the primary term and rental clause thereof as hereinafter provided;

NOW, THEREFORE, in consideration of Ten Dollars (\$10.00) in hand paid by Lessee to Lessor and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Lessor does hereby lease said land to Lessee for the same purposes and upon all the same terms, provisions and conditions, as contained in said lease of May 13, 1971, and the parties hereto agree:

1. That the first paragraph of the habendum clause which appears on Page 2 of said lease is hereby deleted in its entirety and the following is hereby substituted therefor:

"This lease shall be for a term of ten (10) years from and after the date hereof (herein called "primary term") and so long thereafter as Leased Substances, or any of them, be derived or produced in commercial quantities from the leased land or lands pooled or combined therewith, and for so long, as well, as Lessee is prevented from producing same, or the obligations of Lessee hereunder are suspended, for the causes hereinafter set forth or this lease is continued in force by reason of any other provision hereof."

2. The words and numbers "****" appearing in the 6th and 7th printed lines of Paragraph 2 are hereby deleted and the words and numbers "****" are hereby substituted therefor.
3. The rental payments due hereunder have been paid by Lessee and received by Lessor and operate to defer the commencement of drilling operations until May 13, 1977.

As hereby amended said lease shall be and remain in full force and effect as to all its terms and provisions.

This agreement shall be binding upon and shall inure to the benefit of the heirs, personal representatives, successors and assigns of the parties hereto.

This agreement may be executed in any number of counterparts with the same force and effect as though all parties signed the same document.

IN WITNESS WHEREOF, the parties hereto have executed this instrument the day and year first hereinabove written.

EXHIBIT 10.4.22

Lease and Agreement
Union Oil Company of California

UNION

THIS LEASE AND AGREEMENT, made and entered into as of this 2nd day of June 1971, by and between DOROTHY GISLER, a widow, JOAN C. HILL and JEAN C. BROWNING

hereinafter referred so as "Lessor", whether one or more, and UNION OIL COMPANY OF CALIFORNIA, a California corporation, hereinafter referred to as "Lessee".

WITNESSETH: That Lessor, for and in consideration of Ten Dollars (\$10.00) in hand paid to Lessor by Lessee, the rentals provided for hereinafter, and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, and in consideration of the covenants and agreements hereinafter contained by the Lessee to be kept and performed. Lessor has granted, leased, let and demised and by these presents does grant, lease, let and demise to Lessee, its grantees, successors and assigns, upon end subject to the terms and conditions hereinafter set forth, all that certain land (herein sometimes referred to as the "leased land") situate in the County of Imperial, State of California, and more particularly described as follows, to-wit:

(deemed to contain, for the purposes hereof, 204.52 acres, whether there be more or less) with the sole and exclusive right to Lessee to explore for (by such methods as it may desire), drill for, produce, extract, take, remove and sell hot water, steam and thermal energy and extractable

Lease No. Weber 602051

minerals from, and to store, utilize, process, convert and otherwise treat such hot water, steam and thermal energy upon, said land, and to extract any extractable minerals during the term hereof, and to inject or reinject in the leased land effluence from wells located on the leased land or on lands in the vicinity thereof, with the right of entry on the leased land and use and occupancy thereof-at all times for said purposes and the furtherance thereof, including the right to construct, use and maintain thereon and to remove therefrom structures, facilities and installations, pipe lines, utility lines, power and transmission lines. Further, the Lessee is hereby granted the use of roads and ponds on said land together with such rights of way and easements across said land for the construction of roads, ponds, pipe lines, power and telephone transmission lines as are necessary or convenient for the exploration, operation and development of Leased Substances on the leased land or in the vicinity thereof. In the event this lease should terminate with respect to all other rights for any reason, the rights herein granted with respect to such roads, ponds, rights of way and/or easements as are being used at the time of such termination shall remain in effect so long as such roads, ponds, rights of way and/or easements are being used by the Lessee, its successors and assigns. Following such termination, Lessee agrees to pay an annual rental during the period of use at the rate of ten per cent (10%) of the then current value used in tax assessments of the land occupied by such roads, ponds, rights of way and/or easements being used. The possession by Lessee of the leased land shall be sole and exclusive for the purposes hereof and for purposes incident or related thereto, excepting that Lessor reserves the right to use and occupy said land, or to lease or otherwise deal with the same, without unreasonable interference with Lessee's rights, for mining or extraction and utilization of minerals lying on the surface of or in vein deposits on or in said land, or for the extraction of oil, natural hydrocarbon gas and other hydrocarbon substances, or for any and all uses other than the use and rights permitted to Lessee hereunder. Lessee agrees to conduct Its activities in a manner which will not unreasonably interfere with the rights reserved to Lessor. The leased land includes also any rights of Lessor, presently owned or hereafter acquired, in and under roads, underlying ditches, and rights of way traversing or adjacent to said land.

For the purposes hereof the following definitions shall apply:

(a) The terms "hot water", "steam" and "thermal energy" shall mean natural geothermal water and/or steam, and shall also mean the natural heat of the earth and the energy present in, resulting from or created by, or which may be extracted from, the natural heat of the earth or the heat present below the surface of the earth, in whatever form such heat or energy occurs;

(b) The term "extractable minerals" shall mean any minerals in solution in the well effluence and all minerals and gases produced from or by means of any

well or wells on the leased land or by means of condensing steam or processing water produced from or the effluence from any such well or wells; said term shall also include any water so produced or obtained from condensation of steam; and further provided that the term "gases" shall not include hydrocarbon gases that can be produced separately from the hot water, steam and associated minerals;

(c) The term "Leased Substances" shall collectively refer to the matter, substances and resources, defined in (a) and (b) above, that are the subject of this lease;

(d) The term "power potential" as used herein with respect to any well or wells shall mean the quantity, or units, of energy capable of being recovered from the hot water, steam or thermal energy produced therefrom by means of any energy conversion or utilization facility (including, but not limited to, electrical generating facilities) or equipment designed for use thereof;

(e) The term "sufficient power potential" as used herein shall be deemed to mean that power potential which, in the judgment of Lessee shall be sufficient for the commercial sale or utilization thereof, or shall warrant the construction of facilities for the commercial sale or other utilization thereof, or shall justify additional drilling or other operations on the leased land;

(f) The word "commercial" used in connection with various phrases herein shall mean those quantities of Leased Substances produced, sold or used, the value of which, after deducting Lessee's operating costs (or extraction costs in case of extractable minerals), will provide to Lessee a net return over such costs sufficient to cause Lessee to continue production thereof or to elect to proceed with further development or exploratory operations on the leased land.

The terms and conditions of this Lease and Agreement are as follows, to-wit:

1. This lease shall be for a term of ten (10) years from and after the date hereof (herein called "primary term") and so long thereafter as Leased Substances, or any of them, be derived or produced in commercial quantities from the leased land or lands pooled or combined therewith, and for so long, as well, as Lessee is prevented from producing same, or the obligations of Lessee hereunder are suspended, for the causes hereinafter set forth.

If at the expiration of the primary term Lessee has not completed one or more wells on the leased land, or land pooled therewith, separately or collectively producing or being capable of producing steam of sufficient power potential and/or extractable minerals in commercial quantities but Lessee is then engaged in operations for drilling or reworking of any well on the leased land or land pooled therewith, this lease shall remain in force so long as drilling or reworking operations are prosecuted (whether on the same or different wells) with no cessation of more than six (6) months, and if they result in production or the establishment to the satisfaction of the Lessee of the existence of sufficient power potential and/or extractable minerals in commercial quantities, such well or wells will be deemed to have been completed and such existence so established during the primary term of this lease.

2. It is understood and agreed that the initial consideration paid upon the execution hereof covers not only the privileges granted to the date when a rental is payable as hereinafter provided, but any and all other rights conferred hereunder. If on or before one (1) year from the date hereof Lessee has not drilled such well or wells on the leased land or land pooled therewith as to indicate or establish to the satisfaction of Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities, then, but subject to Lessee's right of surrender, on or before said anniversary date, Lessee shall pay or tender to Lessor an annual rental in the amount of One Thousand Twenty-Two and 60/100 - - - - - Dollars (\$1,022.60), which shall constitute rental until the next anniversary date hereof, and thereafter Lessee

shall, on or before each succeeding anniversary date during the primary term hereunder, pay or tender

to Lessor an annual rental in the aforesaid amount, this until such time as from the drilling of well or wells on the leased land, or tend pooled therewith, there has been established to the satisfaction of the Lessee the existence of sufficient power potential and/or extractable minerals in commercial quantities. Upon such establishing as aforesaid, Lessee may nevertheless continue to pay or tender annual rental payments on or before each anniversary date, this until Lessee has commenced the actual sale of one or more Leased Substances, and so long as such annual rental payments be so paid or tendered this lease shall remain in force and effect, even though thereby extended past the primary term, and all payments so paid or tendered after the expiration of said primary term shall be deemed advance royalties, and so long as same are paid each well or wells shall be deemed to be actually producing one or more Leased Substances in commercial quantities under the terms hereof; provided, however, that if within five (5) years from the date of expiration of the primary term hereof Lessee shall have failed to make, or make arrangements for by executed contract or contracts, a bona fide commercial sale of one or more Leased Substances then Lessor, at its option, may consider Lessee in default hereunder. Additionally, should Lessee fail to make any annual payment herein provided for on or before a particular anniversary date, Lessor may, at its option, consider Lessee in default hereunder.

3. Lessee shall pay to Lessor a royalty Ten Percent (10%) of the gross proceeds received by Lease from the sale of hot water, steam or thermal energy, as such, produced from the leased land at and as of the point of origin on the leased land; royalty on steam may be computed and paid for on the basis of pounds of steam produced, saved and sold by Lessee, or may be computed on the basis of the number of kilowatt hours of electric power generated by the use of such steam, but shall be computed and paid for on whatever basis which shall properly reflect the royalty portion of the gross proceeds received by Lessee from sale of hot water, steam and thermal energy, as such, produced from the leased land at and as of the point of origin on the leased land. With respect to extractable minerals, a royalty Lessee shall pay to Lessor Ten Percent (10%) of the net proceeds received by Lessee from the sale of any gas (as herein defined) and from the sale of effluence (containing minerals and/or minerals in solution) produced and sold from any well or walls on the leased land, or, in the event Lessee extracts from the effluence minerals and/or minerals in solution Ten Percent (10%) of the proceeds received by Lessee from the sale of minerals and/or minerals in solution contained in and extracted from the effluence produced and sold from such well or wells less costs of transportation and extraction. Lessee shall pay to Lessor on or before the twenty-fifth day of each month the royalties accrued and payable for the preceding calendar month, or on or before the twenty-fifth day of the month next following that in which Lessee receives payment therefor from the purchaser thereof, whichever method shall apply, and in making such royalty payments Lessee shall deliver to Lessor statements setting forth the basis for computation and determination of such royalty.

Lessee shall not be required to account to Lessor for or to pay any royalty on hot water, steam, thermal energy or extractable minerals produced by Lessee on the leased land which are not utilized, saved and sold, or which are used by Lessee in its operations on or with respect to the leased land for or in connection with the developing, recovering, producing, extracting and/or processing of hot water, steam and/or minerals in solution or in facilities used in connection therewith, including operations of facilities for the generation of electric power, or which are unavoidably lost.

Lessee shall have the right, from time to time and at any time, to commingle (for purposes of storing, transporting, utilizing, selling or

processing, or any of them) the or any of the Leased Substances produced or extracted from production from the leased land or lands pooled therewith with like Leased Substances, or any of them, produced from other lands or units in the vicinity of the leased land, and in the event of such commingling Lessee shall meter, gauge or measure the production from the leased land, or from the unit or units including same or other units or lands, as the case may be, and compute and pay Lessor's royalty payable under the provisions hereof on the basis of such production so determined or allocated, as the case may be.

4. Lessee may, at any time or from time to time as a recurring right, either before or after production but within twenty (20) years from the date hereof, for drilling, development, or operating purposes, pool, unitize or combine all or any part of the leased land into a unit with any other land or lands or lease or leases (whether held by Lessee or others) adjacent, adjoining or in the immediate vicinity of the leased land which Lessee desires to develop or operate as a unit, provided that the total acreage to be embraced within any such drilling, development, or operating unit shall not exceed one thousand nine hundred twenty (1,920) acres, plus an acreage tolerance of Ten Percent (10%). Such a unit shall become in existence upon Lessee's filing in the office of the County Recorder in the county in which the leased land is situated a notice of such unitization, describing said unit. Lessee shall also mail a copy of such notice to Lessor. Any well (whether or not Lessee's well) commenced, drilled, drilling and/or producing or being capable of producing in any part of such unit shall for all purposes of this lease be deemed a well commenced, drilled, drilling and/or producing on the leased land, and Lessee shall have the same rights and obligations with respect thereto and to drilling and producing operations upon the lands from time to time included within any such unit a Lessee would have if such lands constituted the leased land; provided, however, that notwithstanding this or any other provision or provisions of this lease to the contrary:

(1) production as to which royalty is payable from any such well or wells drilled upon any such unit, whether located upon the leased land or other lands, shall be allocated to the leased land in the proportion that the surface acreage of the leased land in such unit bears to the total surface acreage of such unit, and such allocated portion thereof shall for all purposes of this lease be considered as having been produced from the leased land, and the royalty payable under this lease with respect to the leased land included in such unit shall be payable only upon that proportion of such production so allocated thereto, and,

(2) if any taxes of any kind are levied or assessed (other than taxes on the land and on Lessor's improvements), any portion of which is chargeable to Lessor under Paragraph 12 hereof, then the share of such taxes to be borne by Lessor as provided in this lease, shall be in proportion to the share of the production from such unit allocated to the leased land.

Allocation as aforesaid of production from any such unit, whether to the leased land or in like manner to other lands therein, shall continue notwithstanding any termination, either in whole or in part (by surrender, forfeiture or otherwise), of this or any other lease covering lands in such unit until such time as the owner of such lands so terminated shall enter into an agreement to drill for or produce or shall drill for or produce or permit or cause the drilling for or production from any part of such lands, whereupon all such lands formerly included in such unit and as to which the lease covering the same shall have terminated shall be excluded in

determining the production to be allocated to the respective lands in such unit; additionally, in the event of the failure of Lessor's, or any other owner's, title as to any portion of the land included in any such unit, such portion of such land shall likewise be excluded in allocating production from such unit; provided, however, Lessee shall not be held to account for any production allocated to any lands excluded from any such operating unit unless and until Lessee has actual knowledge of the aforesaid circumstances requiring such exclusion. Any exclusion shall be deemed effective the first day of the month

next following the date upon which such exclusion becomes finally established.

Lessee may, at its sole option, at any time when there is no production in such unit of Leased Substances in quantities deemed paying by Lessee, terminate such unit by a written declaration thereof, in the same manner in which it was created.

5. At such time as Lessee shall have drilled and completed such well or wells on the leased land or land pooled therewith which shall indicate to the satisfaction of Lessee a sufficient power potential, or the existence of extractable minerals in commercial quantities, Lessee may at any time thereafter construct and install on the leased land facilities for the commercial sale or use of hot water, steam or thermal energy produced from the leased land or lands in the vicinity thereof or pooled therewith, or for the extraction of extractable minerals, or for development of electric power from the use of steam or thermal energy produced from the leased land or lands in the vicinity thereof or pooled therewith.

6. Lessee shall have the right to drill such well or wells on the leased land as Lessee may deem desirable for the purposes hereof, including wells for injection or re-injection purposes; provided, however, that Lessee agrees to utilize for such purpose or purposes only so much of the leased land as shall be reasonably necessary for Lessee's operations and activities thereon. No well shall be drilled within one hundred (100) feet of any residence or barn now on said land without Lessor's consent. Lessee shall have free use of water from said land for all operations thereon or on land pooled therewith, provided that such free use shall not interfere with Lessor's own use for domestic, commercial, stock or agricultural purposes, nor interfere with any contractual commitments of Lessor relating thereto and existing on the date hereof. Lessee shall not be entitled to free _____ which has been or is being purchased by Lessor.

6-a. Notwithstanding any provisions to the contrary contained herein, this lease and all rights granted to Lessee hereunder are expressly limited to those depths lying below 500 feet below the surface of the leased lands and Lessee shall not have the right to enter upon or use any portion of said leased lands lying above said depth.

Lessee shall protect said land against liens of every character arising from its operation thereon. Lessee, at its own expense, prior to commencing operations on the leased land, shall obtain, and thereafter while this lease is in effect shall maintain, adequate Workmens Compensation Insurance. Lessee shall protect Lessor against damages of every kind and character arising out of the operations or working of Lessee or those under Lessee's control upon the leased land, but Lessee shall not be liable hereunder in the event of the negligence or willful misconduct of parties other than Lessee. In the event any building or personal property be

damaged or destroyed, or grazing or agricultural lands be destroyed by Lessee's operations, then Lessee shall be liable for, and to the extent of, the reasonable value thereof.

Lessee shall have the right at any time and from time to time to remove from the leased land any and all casing, mach-

6-a. Notwithstanding any provisions to the contrary contained herein, this lease and all rights granted to Lessee hereunder are expressly limited to those depths lying below 500 feet below the surface of the leased lands and Lessee shall not have the right to enter upon or use any portion of said leased lands lying above said depth.

then producing or capable of producing or being drilled, and in respect to which Lessee shall not be in default, together with the rights, rights of way and easements which may be retained by Lessee by virtue of the granting clause of

this lease, and together with rights granted Lessee in Paragraph 5, hereof.

9. Notwithstanding any other provisions of this lease, and in consideration of the payment made by the Lessee to the Lessor for the execution of this lease, Lessee shall have the right at any time prior to or after default hereunder, to quitclaim and surrender to Lessor all right, title and interest of Lessee in and to the leased land, or any part thereof, and thereupon all rights and obligations of the parties hereto one to the other shall cease and terminate as to the lands or areas so quitclaimed and surrendered, save and except as to any then accrued monetary obligations or royalty obligations of Lessee then payable as to which Lessee shall remain liable to Lessor, and save and except the rights, rights of way and easements which may be retained by Lessee by virtue of the granting clause of this lease, and provided that in the event of a partial quitclaim and surrender, any future rentals will be reduced proportionately by the number of acres in the area so quitclaimed and surrendered.

10. In the event Lessor at the time of making this lease owns a less interest in the leased land than One Hundred Percent (100%) of the rights and interests herein granted or leased to Lessee, then the rentals and royalties accruing hereunder shall be paid to Lessor only in the proportions which Lessor's interest bears to a One Hundred Percent (100%) interest therein in the leased land. Notwithstanding the foregoing, should Lessor hereafter acquire any additional right, title or interest in or to the leased land, it shall be subject to the provisions hereof to the same extent as if owned by Lessor at the date hereof, and any increase in payments of money hereunder necessitated thereby shall commence with the payment next following receipt by Lessee of satisfactory evidence of Lessor's acquisition of such additional interest.

11. Lessor hereby warrants and agrees to defend title to the leased land and agrees that Lessee, at its option, may pay and discharge any taxes, mortgages, trust deeds or other liens or encumbrances existing, levied or assessed on or against the leased land, and in the event Lessee exercises such option, Lessee shall be subrogated to the rights of any holder or holders thereof, and shall have, among other rights, the right of applying to the discharge of any such mortgage, tax or other lien or encumbrance any royalties or rentals accruing to Lessor hereunder.

12. Lessee shall pay all taxes levied on Lessee's structures and improvements placed on the leased land by Lessee. Lessee shall pay 90% and the Lessor shall pay 10% of any taxes

assessed against any Leased Substances stored on the leased land. In the event any taxes are levied or assessed against the right to produce Leased Substances from the leased land or in the event any increase in the taxes levied or assessed against the leased land shall be based upon the production from the leased land of Leased Substances, then in either such event Lessee shall pay 90% of any such taxes or increase, as the case may be, and Lessor shall pay 10% thereof. Lessor shall pay all taxes levied or assessed against the leased land as such without reference to the production of Leased Substances therefrom and shall pay all taxes levied and assessed against any and all rights in or to or with respect to the leased land not covered by this lease and shall pay all taxes levied and assessed against all structures and improvements owned by Lessor or placed on the leased land by or pursuant to permission of Lessor.

13. The rights of either party hereunder may be assigned in whole or in part, and the right and privilege so to do is hereby reserved by each party, and the provisions hereof shall extend to the heirs, successors and assigns of the parties hereto, but no change or division in ownership of the land, rentals or royalties, however accomplished, shall operate to enlarge the obligations or diminish the rights of Lessee, and Lessee may continue to operate the leased land and to pay and settle rentals or royalties as an entirety, and no such change in ownership shall be binding upon Lessee until the expiration of thirty (30) days after Lessee is furnished with satisfactory written evidence thereof. In the event of assignment of this lease as to a segregated portion of said

land, the rentals payable hereunder shall be apportionable between the several leasehold owners ratably according to the surface area of each, and default in rental payment by one shall not affect the rights of other leasehold owners hereunder.

14. The obligations of Lessee hereunder shall be suspended and the term of this lease shall be extended, as the case may be, while Lessee is prevented from complying therewith, in whole or in part, by strikes, lockouts, riots, actions of the elements, accidents, delays in transportation, inability to secure labor or materials in the open market, laws, rules or regulations of any federal, state, municipal or other governmental agency, authority or representative, or other matters or conditions beyond the reasonable control of Lessee, whether or not similar to the conditions or matters herein specifically enumerated.

If at any time after the expiration of fifteen (15) years from date hereof the production of all Leased Substances ceases for any cause other than one or more of the causes hereinabove enumerated, this lease shall nevertheless remain in full force and effect for an additional period of one (1) year from cessation and thereafter if, and so long as, Lessee commences and continues diligently and in good faith the steps, operations or procedures to cause a resumption of such production (either through the existing wells or the drilling of new wells), until such production be resumed.

15. All statements of production and royalty and all payments to be made by Lessee to Lessor hereunder shall be sent to the persons hereinafter set forth, respectively, at the addresses indicated and each such person shall be entitled to receive that portion of the total rentals and royalty payable hereunder as is hereinafter set forth after the name of such person:

Lessee shall, upon notification of change of ownership in the lands or in rentals or royalties hereunder, as provided in Paragraph 13 hereof, divide and distribute the same to the new owners of such interests; provided, however, that if at any time there are three or more persons entitled to rentals or royalties hereunder, Lessee may, at its option, withhold payment of such rentals or royalties until a majority in interest of such persons designate in writing in a recordable instrument delivered to Lessee, a bank, trust company or corporation, as a common agent and depository, to receive all payments due hereunder to such persons. Such designation may be changed at any time in the same manner. Delivery of all statements and payments hereunder may be made by depositing the same in the United States mail duly addressed to Lessor at the above address or addresses or to such agent and depository which shall constitute full performance of Lessee's obligation to make such delivery. In the event that the amount payable under this lease shall result in a payment of less than Five Dollars (\$5.00) becoming due Lessor, Lessee may, at its option, withhold and accrue sufficient periodic payments until the total due Lessor exceeds Five Dollars (\$5.00).

16. Any notice herein required or permitted to be given or furnished by one party to the other shall be in writing. Delivery of such written notice to Lessor shall be made by depositing the same in the United States mail duly certified and addressed to Lessor at c/o James R. Moore, Rutan & Tucker, 401 Civic Center Drive West, Santa Ana, California 92701 and delivery of such written notice to Lessee shall be made by depositing the same in the United States mail duly certified and addressed to Lessee at Union Oil Center, 461 South Boylston Street, Los Angeles, California 90017. Either party hereto may by written notice to the other party change its address to any other location.

17. In the event any part or portion or provision of this instrument shall be found or declared to be null, void or unenforceable for any reason whatsoever by any Court of competent jurisdiction or any governmental agency having authority thereover, then and in such event only such part, portion or provision shall be affected thereby, and such finding, ruling or decision shall not in any way affect the remainder of this instrument or any of the other terms or

condition hereof, which said remaining terms and conditions shall remain binding, valid and subsisting and in full force and effect between the parties hereto, it being specifically understood and agreed that the provisions hereof are severable for the purposes of the provisions of this clause. In this connection, this lease shall not in any event extend beyond such term as may be legally permissible under present applicable laws, and should any such applicable law limit the term hereof to less than that herein provided, then this lease shall not be void but shall be deemed to be in existence for such term and no longer.

18. If more than one person is named as a Lessor herein and one or more of them fails to execute this lease, said lease shall nevertheless (when accepted by Lessee) become effective as a lease from such of said named parties Lessor as may have executed the same.

19. This lease may be executed in any number of counterparts and all such counterparts shall be deemed to constitute a single lease and the execution of one counterpart by any party Lessor shall have the same force and effect as if such party had signed all the other counterparts.

20. This Lease and Agreement and all of the terms, covenants and conditions hereof shall extend to the benefit of and be binding upon the respective heirs, successors and assigns of the parties hereto.

IN WITNESS WHEREOF, the parties have caused this instrument to be duly executed as of the date hereinabove first written.

		Lessee

THIS LEASE AND AGREEMENT is made this 15th day of February, 1977, by and between the undersigned WALTER J. HOLTZ, as Lessor, and MAGMA ENERGY, INC., a corporation, as Lessee.

1. WITNESSETH: For and in consideration of ten dollars (\$10.00) to the Lessor paid and other good and valuable consideration, the receipt of which is hereby acknowledged and in consideration of the covenants and agreements as herein provided, the Lessor does grant, lease, let and demise unto the Lessee, its successors and assigns, the land and premises hereinafter described, with the sole and exclusive right to the Lessee to enter upon and to use and occupy the said land to explore for, drill for, develop, mine, produce and utilize geothermal steam, geothermal fluids, hot water, brines, electric energy and the heat and energy of the Earth in all its forms (hereinafter called "Geothermal Resources"), and by-products thereof and products associated therewith (except oil, gas and other hydrocarbons), and to take, store, remove, dispose of and use same and for uses and purposes incidental thereto, together with the right to utilize the leased land and to construct, maintain and use any and all facilities thereon and therein as may be necessary for Lessee's operations on the leased land or other land in the vicinity of the leased land and for utilization of the geothermal resources and other products produced therefrom, including but not limited to well sites, pipelines, power stations and transmission lines, roads, structures and installations relating thereto, service facilities,

tanks, ponds, wells for injection or reinjection of waste geothermal resources, gases and other residual products.

2. Lessor reserves the exclusive right to utilize said land for all other purposes which do not unreasonably interfere with Lessee's operations. If Lessee's operations on the land cause damage or loss of stock, crops, or property, Lessee shall compensate the injured party for such loss within 90 days after demand therefore, Lessee agrees to indemnify and hold Lessor harmless from any loss or injury to any party not a party hereto, by reason of any act or omission of Lessee during its tenancy hereunder. Lessee before commencing any operations on the leased land shall procure public liability and property damage insurance with limits not less than \$500,000.00 as to public liability and \$100,000.00 as to property damage, naming Lessor as a co-insured and shall deliver a certificate of such insurance to Lessor. Lessee through its actions shall not permit any mechanics lien, or other claim of any kind to become an encumbrance upon Lessor's title to the leased land. If Lessee fails to take action to remove any lien or claim that may be filed within 30 days after demand by Lessor, Lessor at its option, may terminate this lease upon 10 days written notice.

3. This lease shall be for a period of five (5) years from the date hereof (hereinafter called "primary term") and so long thereafter as rent or royalty is being paid hereunder or any of the aforesaid substances is produced therefrom or from land pooled or unitized therewith, or drilling, development, testing or producing operations are conducted thereon, or excused under the terms hereof.

2

4. In addition to the initial consideration, the first year's rental of \$*** will be paid to Lessor upon the execution of this Lease. Thereafter, commencing with the first anniversary of the term hereof, Lessee shall pay to Lessor as rental yearly in advance the sum of *** dollars (\$***) per acre per year for so much of said land as may then still be under this Lease, until such time as royalties paid to Lessor are equal to or greater than *** dollars (\$***) per acre per year.

5. The land covered hereby is described in Exhibit "A" attached hereto and made a part hereof.

6. Notwithstanding any other provision of this Lease, it is specifically understood and agreed that if at the end of five (5) years from date of expiration of the primary term hereof, Lessee has not commenced production and sale in commercial quantities of geothermal resources, or any other upon which royalty is payable to Lessor hereunder, or if after commencing production and sale of such substances, Lessee shall discontinue same for a period of six months in any calendar year, then Lessee shall default under this Lease and at Lessor's Option, this Lease may be terminated if Lessee shall fail to remedy such default as herein provided or written notice of default from Lessor to Lessee; provided, however, that no default shall be deemed to exist where such discontinuance of production or sale is caused by governmental regulations or restrictions, shutdown for repairs, maintenance, modification or enlargement of Lessee's electric generating facilities, or because of any of the conditions as set forth in paragraph 15 below.

*** Confidential material redacted and filed separately with the Commission.

3

7. Any lands required by Lessee for location of well or wells, easements, rights of way, egress, ingress, pipelines, or other surface or subsurface facilities of any kind, hereinafter called "Occupied Land", excepting, however, those facilities referred to in paragraph 9 below, shall be submitted to Lessor for his consent and approval before operations on such lands or use thereof are commenced. Unless Lessor dissents to the location or locations submitted within five days, and offers a substitute location within 10 days of receiving notice of Lessee's proposed location, Lessee may consider the request as submitted approved and may proceed with its planned locations on such lands or use thereof. Lessor shall not be unreasonable or arbitrary as to the selection or approval of such sites.

Should Lessor cause the leased land or any portion thereof to be used for other than agricultural purposes he shall have the right, at his expense, with the exception of any well or wells, to cause the aforesaid easements, _____ to be relocated. Any well site shall consist of not more than two sites and there shall be a limit of one site per 40 acres of leased land. _____ Lessee shall continue to pay all royalties attributable to Occupied site.

8. Lessee shall pay Lessor yearly rental for Occupied Land adjusted annually, equal to farming rentals being paid per acre to owners of adjacent or adjoining farm land, but in no case less than \$*** per acre per year. The parties acknowledge that said farming rental is presently \$*** per acre per year.

*** Confidential material redacted and filed separately with the Commission.

4

9. Lessor shall also make available to the Lessee one site of not more than five acres in size for a facility or facilities for the generation of electric power and/or the processing of geothermal resources or by-products thereof. The location of said site shall be submitted to Lessor for his consent and approval as provided for in paragraph 7 above in the same manner as though said site constituted "Occupied Land". In such event, Lessee shall purchase said site, paying to the Lessor the fair market value thereof. Said fair market value shall be based upon the highest and best use of said site notwithstanding the fact that the same may then be devoted to agricultural purposes. If the parties cannot agree upon the fair market value of such land within 30 days after exercise of Lessee's option, such value shall be determined by three qualified appraisers, one to be selected by each of the parties and the third by any judge of the Imperial County Superior Court. The rules of the American Arbitration Association shall apply and be binding upon the parties as to any such valuation. In the event of such sale Lessor shall retain all geothermal and

mineral rights under said site.

10. Lessee shall pay to Lessor as royalty *** hereof. Should Lessee process its *** before sale, Lessor's royalties shall bear its proportionate share of ***. Lessee shall pay to Lessor said royalty on the 25th day of each month for accrued royalties for the preceding calendar month. Lessee shall have the right to co-mingle the geothermal resources and other substances produced from the leased land or lands pooled therewith with such substances produced from other lands

*** Confidential material redacted and filed separately with the Commission.

5

and to pay Lessor's royalty on the basis of production allocable to the leased land as determined by metering or gauging same. Lessee shall not be required to account to the Lessor for, or pay royalty on, any product produced by Lessee from said land and used by it in its operations hereunder. Except for taxes chargeable to Lessor no deduction from royalties due Lessor will be made without written approval of Lessor, except as herein provided.

11. It is understood and agreed by and between the parties hereto that at any time during the primary term of this Agreement if Lessee shall acquire by purchase or assignment an interest in any lease executed after the date of this Agreement and covering lands located within five miles of the land covered hereby, which lease shall contain a greater Lessor's royalty or a greater annual per acre rental than is provided by this Agreement, the Lessee shall immediately increase the corresponding terms of this Agreement so as to afford the Lessor herein equal terms. In the event of such increase, the Lessee shall promptly tender to the Lessor for his execution an instrument in writing which shall contain such increased terms.

12. In valuing amounts realized or received by Lessee for any thing or substance sold, utilized or disposed of by Lessee upon which royalty is payable to Lessor, such amount in no event shall be less than would be obtained as between parties dealing at arms length and not under substantial common control.

13. If the Lessor or any party Lessor owns a less interest in the geothermal resources or by-products hereunder than the entire and undivided fee estate therein, then

6

the royalty and rental herein provided shall be paid the Lessor or such party Lessor only in the proportion which his ownership bears to the whole and undivided fee.

14. Lessee may, at any time during the life of this Lease, pool, unitized or combine all or any part of the leased land into a unit (hereinafter called "Unit") with any other land or lands or leases adjacent, adjoining or in the immediate vicinity of the leased land for drilling, development, producing or operating purposes, provided that the total acreage within any such drilling or operating unit shall not exceed 5,120 acres, plus or minus 10%. Such a Unit shall be created upon Lessee's filing with the County Recorder, in the county where the leased land is located, a notice or declaration of creation of such unit, describing the lands and acreage to be embraced there, and the names of the lessors and the dates of the respective leases covering such lands. Notice of and a copy of the creation of a Unit shall be sent to Lessor.

15. Production as to which royalty is payable from any wells drilled upon any such Unit, whether located upon the leased land or other lands, shall be credited to the leased land in the proportion that the acreage of the leased

land in such Unit bears to the total acreage of such Unit. The royalty paid as herein provided shall be deemed to be the royalty payable to Lessor with respect to the leased lands hereunder, and all drilling, developing, producing or other operation by Lessee on any of the unitized land shall for purposes of this Lease, be deemed to be performed on the leased land.

16. The obligations of Lessee hereunder shall be suspended, and the Primary Term shall be extended until expiration of ninety (90) days after removal of cause for

7

suspension, while the Lessee is prevented or delayed from complying therewith, in whole or in part, by strikes, lockouts, actions of the elements, accidents, inability to obtain services or equipment, rules, regulations or restrictions of any federal, state, municipal or other governmental entity or agency, procedures relating to environmental matters, the delay in issuance of permits to Lessee required with respect to any of Lessee's operations hereunder, provided that application for any such permits shall have been made not less than 30 days prior to the time for performing any act required of Lessee hereunder or matters or conditions beyond the reasonable control of the Lessee (including, but not limited to, inability to obtain a market for the geothermal resources produced from the leased land) whether or not similar to the matters or conditions herein specifically enumerated.

17. Lessee will keep Occupied Land in a clean and weed-free condition at all times. If Lessor so desires, he may do the work required and bill Lessee for his actual costs.

18. Lessee agrees to put forward its best efforts in overcoming obstacles that may prevent or delay the expeditious and successful geothermal development of the leased lands.

19. The Lessee shall pay all property taxes on its improvements and property and ninety percent (90%) of the taxes if any, levied against Geothermal Resources rights and rights as to other products covered by this lease. Lessor shall pay all taxes levied and assessed against the land as such and Lessor's property and ten percent (10%) of the taxes

8

levied and assessed against Geothermal Resources rights and rights as to other products covered by this lease. In the event the State, United States, or any municipality or other governmental agency levies a license, severance, production or other tax on the products hereunder, or on Lessee's right to operate or produce or sell products, then and in that event the Lessee shall pay ninety percent (90%) of such tax and Lessor shall pay ten percent (10%) thereof. Lessee is hereby authorized to pay any taxes and assessments on behalf of Lessor and may, if it so desires, deduct the amount so paid from royalties or monies due Lessor hereunder. Any taxes (other than taxes on the leased land as such and Lessor's improvements), a portion of which are chargeable to Lessor under this Lease, which are levied against the Unit or the pooled lands as a Unit, shall be chargeable to Lessor only in the proportion thereof that the share of production from such Unit is allocated to the leased land.

20. In the event any taxes are levied or assessed against Geothermal Resources rights or rights as to other products covered by this lease prior to the production and sale of geothermal resources or by-products thereof, then Lessee shall pay all said taxes levied and assessed against said rights for Lessor's account, until such time as geothermal resources or any of the substances covered by the lease are produced and sold in commercial quantities.

21. The Lessee or the owner thereof shall have the right at any time to remove from said land all machinery, equipment, pipes, casing, structures and other property and improvements belonging to or placed on the land by or under agreement with the Lessee,

9

providing that such removal shall be completed no later than a reasonable time after the termination of this lease. Lessee agrees after termination of this lease to return said land to as near its original condition as is practical.

22. If Lessee shall violate any provision, condition or covenant hereof, Lessee shall take corrective action to diligently remedy such violation within 60 days of written notice thereof by Lessor. If Lessee shall fail to do so, Lessor at his option may cancel this lease by written notice to Lessee, and all rights of the Lessee in and to said land shall be at an end, save and excepting each well completed or being drilled and one surrounding each such well, and saving and excepting rights of way, easements, surface areas and ingress and egress to surface areas necessary for Lessee's operation for operation and maintenance of such wells and operation and maintenance of electric generating and power transmission facilities or other facilities for utilization or processing of other products covered hereby, and as to which the person or persons owning or operating such facilities are not in default under the agreement or agreements pursuant to which such facilities were installed on the leased land. If, upon termination of this lease, Lessee does not, within 30 days thereafter, leave the leased land in a clean and farmable condition and remove from said land all machinery, equipment, pipes, structures and other property or improvements placed on the land by Lessee and not permitted to remain thereon, then Lessor shall have the right to remove all such items and Lessee will pay to Lessor actual cost for such removal and disposal.

10

23. Lessee may, at any time and upon payment of the sum of \$10.00 to Lessor as and for fixed and liquidated damages, quitclaim to the Lessor all of the right, title and interest of Lessee in and to the leased lands or any part thereof, and thereupon all rights and obligations of the parties hereto one to the other shall cease and terminate as to the premises quitclaimed, except:

a. No quitclaim shall relieve Lessee of any debt or obligation for the payment of money due Lessor at time of quitclaim, or any indemnity or old harmless obligation in Lessor's favor or any obligation of Lessee to restore or repair the land quitclaimed in accordance with the provisions of this lease.

b. Quitclaims will not reduce Lessor's percentage in a unit formed prior to date of quitclaim; and, in the event no Unit has been created, will not reduce the royalty payments to which he would otherwise be entitled.

24. In the event of any litigation under this lease, the prevailing party shall be entitled to reasonable attorney's fees and costs of suit as fixed by the court.

25. This Lease and Agreement supersedes that certain lease and agreement between the parties dated December 10, 1971, a short form of which was recorded in Book 1321, Page 1194, Official Records of Imperial County, California. It is understood and agreed that the wells, property, facilities and improvements heretofore drilled or placed on the leased land by Lessee under said lease and agreement dated December 10, 1971, are and shall continue to be the property of Lessee and subject to the provisions of this Lease and Agreement.

11

27. Any notice from the Lessor to the Lessee must be given by sending the same by registered or certified mail, postage prepaid, addressed to the office of Lessee at 631 South Witmer Street, Los Angeles, California 90017; and any notice from the Lessee to Lessor must be given in the same manner addressed to the Lessor at 1550 Orange Avenue, El Centro, California 92243. The parties may, upon notice, change their said respective addresses for notice.

AMENDMENT TO GEOTHERMAL LEASE AND AGREEMENT

This Amendment to Geothermal Lease and Agreement ("Amendment") is entered into this 14th day of April, 1982, by and between WALTER J. HOLTZ ("Holtz") and NEW ALBION RESOURCES CO., a California corporation ("NARCO"), with reference to the following facts:

A. On February 15, 1977, Holtz entered into a "Geothermal Lease and Agreement" (the "Holtz Lease") with Magma Energy, Inc , a corporation, for the lands therein described, to explore for, drill for, develop, mine, produce and utilize geothermal resources and by-products and products associated therewith. A short form of the Holtz Lease was recorded April 29, 1977, at Book 1400, Page 1487 of Official Records of Imperial County, California. The Holtz Lease was assigned by Magma Energy, Inc , to NARCO by "Assignment of Interest in Lease," dated February 15, 1978, and recorded February 22, 1978, at Book 1412, Page 1083 of Official Records of Imperial County, California.

14

B. The "primary term" of the Holtz Lease is for a period of five years, commencing February 15, 1977.

C. The parties desire to extend the primary term of the Holtz Lease for an additional one-year period, commencing February 15, 1982, and amend the Holtz Lease in other respects.

NOW, THEREFORE, in consideration of the promise of rent to be paid, the mutual covenants of the parties herein contained, and other good and valuable consideration, the parties agree as follows:

1. The "primary term" of the Holtz Lease, set forth in Paragraph 3 of said lease, is hereby extended for a twelve-month period commencing February 15, 1982, and terminating at Midnight, February 14, 1983.

2. The following is hereby added to the Holtz Lease as Paragraph 28 thereof:

"28. Subject to Lessor's right under Paragraph 6 hereof and notwithstanding anything else to the contrary contained herein, or in the Holtz Lease, if Lessee completes a well or wells or a processing plant on the leased lands or on the Unit area capable of producing or processing Geothermal Resources in quantities and quality deemed paying quantities by Lessee, Lessee may continue to pay or tender to Lessor, annually in advance of each lease anniversary date, rental until Lessee has made a sale of Geothermal Resources produced from or allocated to the leased lands. So long as such annual rental payments are paid or tendered, this Lease shall remain in force and effect even though extended thereby beyond the primary term, and all payments so paid or tendered after the expiration of said primary

term shall be deemed advance royalties, and so long as same are paid, each well or wells shall be deemed to be actually producing Geothermal Resources in paying

15

quantities under the terms hereof. The entire amount of any such advance royalty(ies) paid to Lessor may be retained by Lessor and shall not be subject to recapture by Lessee. Lessee agrees to exercise due diligence in the development and drilling of wells and the production of Geothermal Resources in paying quantities; provided, however, that Unit Operations conducted under the terms of the Heber Geothermal Unit Agreement, recorded in Book 1437, Page 1272, Imperial County, California, without a cessation of 180 consecutive days for reasons other than those stated in Article 14 of said Unit Agreement, shall be considered as due diligence under this Paragraph 28.

3. Notwithstanding any provision herein or in the Holtz Lease to the contrary, and notwithstanding extension hereby of the "primary term" of the Holtz Lease (i) the five (5) year period described in Paragraph 6 of the Holtz Lease shall not be hereby extended beyond February 15, 1987, as originally set forth in the Holtz Lease, and (ii) Paragraph 11 of the Holtz Lease shall remain in full force and effect throughout the primary term as extended hereby.

4. The signature original of this Amendment may be filed for recordation by either party in the Office of the County Recorder for Imperial County, California.

5. This Amendment to Geothermal Lease and Agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors and assigns of the parties hereto.

6. The Holtz Lease as hereby amended is confirmed.

The parties have executed this Amendment to Geothermal Lease and Agreement at San Diego, California, as of the date set forth at the beginning hereof.

AMENDMENT of GEOTHERMAL LEASE AND AGREEMENT

THIS AGREEMENT, made this 14th day of March, 1986, between the party or parties whose names are subscribed hereto under the designation of "Lessor", hereinafter called "Lessor" (whether one or more), and CHEVRON GEOTHERMAL COMPANY OF CALIFORNIA AND UNION OIL COMPANY OF CALIFORNIA, hereinafter called "Lessee",

W I T N E S S E T H :

THAT, REFERENCE IS HEREBY HAD to that certain Geothermal Lease and Agreement dated February 15, 1977 (a short form of such lease being of record in the Office of the County Recorder of Imperial County, California, in Book 1400, at Page 1487 et seq., of Official Records), whereby Lessor did grant, let and lease unto Magma Energy, Inc., a predecessor in interest to Lessee for the purposes therein described certain lands situate in said County and State particularly described in such lease and agreement, such lease and agreement being hereinafter referred to as "said lease";

AND, WHEREAS, by assignment dated February 15, 1978, recorded in Book 1412, Page 1083 of said official records, Magma Energy, Inc. assigned its interest in said lease to New Albion Resources Co. ("NARCO");

AND, WHEREAS, by assignment dated April 14, 1982, recorded in Book 1483, page 678 of said official records, said lease was amended;

AND, WHEREAS, by assignment dated April 14, 1982, a memorandum of which was recorded in Book 1488, Page 1749 of said official records, Narco assigned its interest in said lease to Union Oil Company of California, ("UNION");

AND, WHEREAS, by assignment dated September 1, 1982, a memorandum of which was recorded in Book 1493, Page 601 of said official records, Union assigned a 67,238 percent undivided interest in said lease to Chevron Geothermal Company of California;

AND, WHEREAS, Lessor and Lessee have agreed to further amend said lease in the particulars hereinafter set forth:

NOW, THEREFORE, in consideration of the sum of ONE DOLLAR (\$1.00) and other valuable consideration paid to Lessor by Lessee, receipt of which is hereby acknowledged, Lessor and Lessee agree as follows:

1. The last sentence of Paragraph 8 of said lease which now reads as follows: shall be and hereby is amended to read as follows:

"The parties acknowledge that said farming rental is \$*** per acre effective February 15, 1985. Commencing with the rental period that begins in 1986, the annual rental payment for occupied land for succeeding annual periods shall be determined by the increase, if any, in the *** as compared to the calendar month in which the 1985 rental payment was made ("Beginning Index"). In the event the Ending Index is a number greater than the Beginning Index, the amount of said rental payment shall be increased in the same ratio that the Ending Index bears to the Beginning Index."

*** Confidential material redacted and filed separately with the Commission.

2. To implement the foregoing, Lessor does hereby grant, demise, lease and let unto Lessee all those certain lands particularly described in said lease for the term and purposes and subject to all of the other provisions of said lease as hereby amended. Lessor agrees that said lease as hereby amended is in good standing and in full force and effect. Lessor acknowledges receipt of rental in full under said lease to February 15, 1988.

3. This agreement shall bind and inure to the benefit of the respective heirs, executors, administrators, successors, and assigns of the parties hereto.

IN WITNESS WHEREOF, this agreement has been executed as of the day and year first herein written.

CONFIDENTIAL TREATMENT REQUESTED. CONFIDENTIAL PORTIONS OF THIS DOCUMENT HAVE BEEN REDACTED AND HAVE BEEN SEPARATELY FILED WITH THE COMMISSION.

EXHIBIT 10.4.24

GEOTHERMAL LEASE

THIS LEASE is made this 31st day of August, 1983, by and between MAGMA ENERGY, INC., ("Lessor") a Nevada corporation, as Lessor, and HOLT GEOTHERMAL COMPANY, ("Lessee") a California corporation, as Lessee.

Recitals

Lessor has heretofore drilled certain wells and developed certain geothermal resources on the land and premises hereinafter described. Lessee desires to undertake to develop additional geothermal resources on said land and to construct thereon facilities to utilize geothermal resources for the generation of electric power, utilizing the Magmamax power process, a proprietary and patented process owned by Lessor for generating electric power utilizing geothermal resources, the U.S. patent number thereon being 3,757,516, Lessee desires, in addition to a non-exclusive license to utilize on and limited to the leased land the Magmamax power process, to use a portion of said land for electric power generating facilities and to obtain, on a continuing basis and subject to License Agreement, the benefit of Lessor's continuing knowledge and experience with respect to the Magmamax process and to have the non-exclusive right to utilize any new developments or improvements of the Magmamax process on and limited to the leased land.

1. WITNESSETH: that in consideration of the agreements contained herein, the parties hereby enter into a lease of the hereinafter described land (the "leased land") by Lessor to Lessee and concurrently herewith, and as part of one integrated transaction, the parties shall enter into a License Agreement with respect to the leased land and with respect to the use by Lessee of the Magmamax power process. In consideration of the agreements contained herein, the Lessor does grant, lease, let and demise unto the Lessee, its successors and assigns, the leased land with the sole and exclusive right to the Lessee to enter upon and to use and occupy the leased land to explore for, drill for, develop, mine, produce and use the natural heat of the earth, the energy, in whatever form, below the surface of the earth present in, resulting from, or created by, or which may be extracted from, such natural heat, and all minerals in solution or other products obtained from naturally heated fluids, brines, associated gases, and steam, in whatever form, found below the surface of the earth ("geothermal resources") and to take, store, remove, dispose of and use same and for uses and purposes incidental thereto, together with the right to use the leased land and to construct and maintain any and all facilities thereon and therein as may be necessary for Lessee's operations on the leased land or other lands in the vicinity of the leased land, and for use of the geothermal resources including but not limited to well sites, pipelines, power plants, power transmission lines, power stations, tanks, ponds, wells for injection or reinjection of waste water, gases and other residual products, roads, and other structures and installations. Lessor retains all rights to use and occupy the surface and subsurface of the leased land for all purposes, provided that such use or occupancy shall not unreasonably interfere with the rights of Lessee under this Lease.

2. Description. The leased land is described in Exhibit "A" attached hereto and made a part hereof. In addition to the above-described leased land, this Lease also covers

-2-

accretions and any small strips or parcels of land now or here after owned by Lessor which are contiguous or adjacent to the above-described leased land. Lessor agrees to execute at Lessee's request any additional or supplemental instruments for a more complete or accurate description of the land so covered.

3. Term. TO HAVE AND TO HOLD the leased land for a period of thirty (30) years from the date hereof ("primary term") and so long thereafter as any geothermal resources are produced therefrom, or are capable of being produced therefrom, or drilling or producing operations are conducted thereon, or excused under the terms hereof.

4. Commencement of Operations. Within eighteen (18) months after the effective date of this Lease, Lessee shall Commence and diligently continue the drilling of one or more wells for production of geothermal resources from the

leased land until Lessee shall have satisfied itself that sufficient geothermal resources are obtainable to supply the needs of a Power plant or power plants of a gross capacity of ten (10) or more megawatts. If, within six (6) months after commencement of drilling the first well on the leased land, Lessee determines in its sole judgment that it is not able to develop on the leased land a sufficient quantity of geothermal resources to warrant installation of one or more power plants for generating electricity therefrom, Lessee may, upon notice given to Lessor within thirty (30) days after expiration of such six (6) month period, terminate and be freed of all obligations under this Lease. If Lessee elects not to so terminate this Lease, Lessee shall proceed with the drilling of such well or wells as it deems appropriate to supply the requisite quantity of geothermal resources for operation of a power plant or power plants and shall proceed diligently and in good faith with construction of a power plant or power plants on the leased land for generation of electricity utilizing the geothermal resources.

5. Royalty. Lessee shall pay to Lessor as royalty during the full term of this Lease compensations as follows: (a) As to ***, Lessee shall pay to Lessor *** received by Lessee. The said payment shall be deemed to embrace a payment of *** and *** as payment for the said non-exclusive license, for surface land use and for Lessee's agreement to make available to Lessor subject to License Agreement its continuing knowledge and experience with respect to the *** and the right to utilize new developments or improvements thereof on the leased land; (b) ***, Lessee shall pay to Lessor *** received by Lessee. The said payment shall be deemed to embrace a payment of *** as payment for the said non-exclusive license, for surface land use and for Lessor's agreement to make available to Lessee subject to License Agreement its continuing knowledge and experience with respect to the *** and the right to utilize new developments or improvements thereof on the leased land; (c) The payment by Lessee to Lessor of the total compensations provided for in subparagraphs (a) and (b) hereof, when due, for the full term of this Lease is a condition to the continuation of Lessee's rights under this Lease and its right to use or occupy the leased land or any part thereof. In the event Lessee Shall

*** Confidential material redacted and filed separately with the Commission.

-3-

default under any covenant or condition of this Lease and fail to remedy such default or to commence in good faith remedy such default, if such default cannot be remedied within the notice period, Lessor shall have the right, upon expiration of sixty (60) days written notice of default, to terminate this Lease and all of Lessee's rights hereunder. The term ***. Lessee shall pay to Lessor royalty on the last day of each month for accrued royalties for the preceding calendar month. If the geothermal resources produced from the leased land are insufficient for operation of Lessee's plant or plants at a ***, at the request of Lessee, Lessor may supply geothermal resources from other land and the ***% royalty rate shall apply to ***. If Lessor is unable to provide sufficient geothermal resources, Lessee may secure geothermal resources from other lands without paying royalty to Lessor on the geothermal resources so secured. Lessee shall have the right to *** and to pay Lessor's royalty ***. Lessee shall not be required to pay royalty on any ***.

6. License Agreement. Lessor agrees to grant to Lessee, by separate agreement entered into concurrently herewith, a non-exclusive license to utilize on and limited to the leased land for the term of this Lease Lessor's patented Magmamax power process and improvements thereof. Together with said license, Lessor will agree to make available to Lessee without additional consideration, Lessor's continuing knowledge and experience with respect to said process. In the event Lessee shall develop any patentable improvements to the Magmamax power process, Lessor shall be entitled to a non-exclusive royalty free license with respect thereto.

7. Plant Expansion. Lessee shall have the right to increase the capacity of its plant or build additional plants on the leased land if

operations under this Lease demonstrate the availability of an adequate supply of geothermal resources on the same terms and conditions as set forth herein. Lessee shall have the right of first refusal for the development of electricity available from geothermal resources on adjacent or nearby lands leased or otherwise controlled by Lessor, in the event Lessee's operation proves the adequacy of the geothermal resources and the commercial feasibility of producing electricity therefrom. Lessee shall have four (4) years from the date of firm operation of the plant to determine if an increase in plant and production capacity is warranted by the geothermal resources underlying the leased land on the basis of its operations. Lessee will notify Lessor of its determination on or before the fourth anniversary of said date. If an increase in the size of the plant or construction of additional plants is not warranted in Lessee's sole judgment, Lessee will relinquish its rights to the surface area not actually used for the original plant or plants, gathering and injection lines, and wells, Lessor shall assume full responsibility for compliance with any necessary governmental approvals of such a relinquishment by Lessee. A release of surface rights to any part of the leased land shall not constitute a release of any part of the geothermal resources underlying the leased land.

8. Reinjection. Lessee shall have the right to drill such well or wells on the leased land as Lessee may deem desirable, including wells for injection or reinjection purposes, and shall have the right to dispose in any such wells waste brine, water and other substances, waste

*** Confidential material redacted and filed separately with the Commission.

-4-

products from a well, or wells, power plants or other facilities, located on the leased land or from wells, power plants or other facilities, located in the vicinity of the leased land. Lessee shall have the right to freely transfer geothermal resources from wells located on the leased land, or other lands in the vicinity of the leased land, to and from the leased land and to inject geothermal resources into a well or wells located on the leased land.

9. Inspection by Lessor. Lessor, or its agents, at Lessor's sole risk, may during hours of operation examine the leased land and the workings, installations and structures thereto and operations of Lessee thereon, and may at reasonable times inspect the books and records of Lessee with respect to production and operations and matters pertaining to the payment of royalties to Lessor. Lessee shall make available to Lessor all of Lessee's information and operating experience as to producing and injection wells and the installed electric generating facilities. Lessee shall also furnish to Lessor all drilling, engineering and geological reports, tests and logs as to all wells drilled on said land. Lessor retains the right to utilize the leased land for any and all purposes provided that such use shall not unreasonably interfere with Lessee's operations thereon. Lessor, its employees, representatives and permittees retain the right at all times to enter upon the leased land and to view all operations and activities of Lessee thereon, provided that Lessee shall not be liable to Lessor or to any such persons for personal injury or property damage not resulting from any negligent act or omission of Lessee. Lessor shall maintain all information gained by such inspection in strict confidence and shall not disclose any of such information to third parties without advance written permission of Lessee.

10. Warranty of Title. Lessor hereby warrants that it has clear title to the leased land and the geothermal resources contained therein, agrees to defend title conveyed to Lessee under this Lease, and agrees that Lessee, at Lessee's option, may pay and discharge any taxes, mortgages or liens existing, levied or assessed on or against the leased land. If Lessee exercises such option, Lessee shall be subrogated to the rights of the party to whom payment is made to the extent of all payments costs and expenses, including attorneys' fees, and, in addition to its other rights, may reimburse itself out of any royalties otherwise payable to Lessor. In the event Lessee is made aware of any

claim inconsistent with Lessor's title, Lessee may suspend the payment of royalties under this Lease, without interest, until Lessee has been furnished satisfactory evidence that such claim has been resolved.

11. Lesser Interest. If the Lessor or any party Lessor owns a lesser interest in the geothermal resources under this Lease than the entire and undivided fee estate herein, then the royalty herein provided as to geothermal resources shall be paid to the Lessor or such party Lessor only in the proportion which his ownership bears to the whole and undivided fee. Lessor shall bear the entire cost of any underlying royalty interest in the fee estate or otherwise.

12. Removal. Lessee shall have the right at any time and from time to time to remove from the leased land any and all casing, machinery, equipment, structures, installations and property of every kind and character placed upon the leased land by or pursuant to permission of Lessee, provided that if such removal should occur after termination of all rights granted herein, it shall be completed within a reasonable time thereafter. Lessee agrees after termination of this Lease to leave the leased land in a clean condition and to level sump holes or excavations.

-5-

13. Implied Covenants. This Lease constitutes and expresses the entire agreement between the parties and no implied covenant of any kind shall be read into it and in particular there shall not be read into it any implied covenant requiring Lessee to commence or to continue to conduct more drilling or other operations on the leased land or to drill more wells thereon or fixing any greater measure of diligence than Lessee has herein expressly agreed to.

14. Ancillary Rights. In exploring for, developing, producing, using and marketing geothermal resources on the leased land, Lessee shall have the right of ingress and egress along with the right to conduct such operations on the leased land as may be reasonably necessary for such purposes, including but not limited to geophysical operations, the drilling of wells, and the construction and use of roads, canals, pipelines, tanks, water wells, disposal wells, injection wells, pits, electric and telephone lines, power stations and plants, and other facilities deemed necessary by Lessee to discover, produce, store, treat or transport geothermal resources and easements necessary thereto. Lessee may use in such operations, free of cost, any water or other substances produced on the leased land. The right of ingress and egress granted hereby shall apply to the entire leased land described, notwithstanding any partial release or other termination of this Lease with respect thereto.

15. Breach or Default. In the event at any time after four (4) years from the date hereof Lessee shall sell electrical power from said leased land in any amount less than two (2) megawatts gross generating capacity and if such condition continues for a period of one (1) year (the generating output would be computed on an average for said one year), Lessor shall have the right to consider the aforesaid event a default under this Lease, provided that Lessee shall not be required to produce and sell electricity in excess of the reservoir capability of the leased land. If Lessee at any time during the term of this Lease and Agreement determines in good faith that it is uneconomic or not feasible to continue its operations on the leased land, Lessee shall have the right to terminate this Lease and to relinquish its rights under this lease. In the event of termination Lessee shall execute and deliver appropriate instruments to clear title to the leased land and shall remove surface facilities and provide for wells as herein provided in the event of termination due to Lessee's default. No litigation shall be initiated by Lessor with respect to any breach or default by Lessee under this Lease, for a period of at least ninety (90) days after Lessor has given Lessee written notice fully describing the breach or default, and then only if Lessee fails to begin to remedy the breach or default within such period. In the event the matter is litigated and there is a final judicial determination that a breach has occurred, this Lease shall not be forfeited or cancelled in whole or in part unless Lessee is given a

reasonable time after such judicial determination to remedy the breach or default and Lessee fails to do so.

16. Forbearance by Lessor. If any default shall occur which entitles Lessor to terminate this Lease, Lessor shall have no right to terminate this Lease unless, following the expiration of the period of time given to Lessee to cure such default, Lessor shall notify any beneficiary under a deed of trust covering all or any part of the leased land ("Mortgagee") of Lessor's intent to so terminate at least thirty (30) days in advance of the proposed effective date of such termination (the "Termination Notice"). Lessor shall have no right to terminate this Lease if after delivering the Termination Notice to Mortgagee any of the following occurs: (a) In the case of a default in the payment of royalties, Mortgagee shall notify Lessor of Mortgagee's desire to cure such default, and Mortgagee shall pay or cause to be paid all royalties, and any other payments then due and in arrears as specified in the Termination Notice, as well as such

-6-

sums which may become due during such thirty day period, or extended period as provided in subsection (c) below; (b) In the case of a default which does not involve the payment of money but is reasonably susceptible of being cured by Mortgagee, Mortgagee shall notify Lessor of Mortgagee's desire to cure such default, and Mortgagee shall comply, or in good faith and with reasonable diligence commence to comply, with all such nonmonetary requirements of this Lease then in default and diligently pursue such cure to completion, subject to paragraph 17; (a) In the case of a default not reasonably susceptible of being cured by Mortgagee, including failure of production, or in the event Mortgagee is complying with the requirements of subsections (a) or (b) above, this Lease shall not terminate provided (i) within ninety (90) days after the giving by Lessor of the Termination Notice, Mortgagee gives written notice to Lessor of Mortgagee's intention to foreclose its deed of trust, and (ii) Mortgagee, within ninety (90) days after the giving of the Termination Notice commences foreclosure or similar proceedings under its deed of trust for the purpose of acquiring Lessee's interest in this Lease and thereafter diligently prosecutes the same (provided however, that if Mortgagee is restrained by a court of competent jurisdiction from so proceeding, the time periods set forth above shall be tolled), and (iii) either Mortgagee or any other purchaser of Lessee's interest under this Lease, within a reasonable time after the acquisition of such interest, commences production, or otherwise cures all defaults hereunder susceptible of being cured by Mortgagee or such purchaser. No cancellation, surrender or modification of this Lease shall be effective unless consented to in writing by any Mortgagee.

17. Force Majeure. Lessee's obligations under this Lease shall be suspended until expiration of ninety (90) days after removal of cause for suspension and the term of this Lease and the period for removal of Lessee's property in the event of termination shall be extended while Lessee is prevented from complying therewith by strikes, lockouts, riots, action of the elements, accidents, delays in transportation, inability to secure labor or materials in the open market, laws, rules, or regulations of any Federal, State, Municipal or other governmental agency, authority, or representative having jurisdiction, inability to secure or absence of a market for commercial sale of geothermal resources from the leased land; or by other matters or conditions beyond the reasonable control of Lessee, whether or not similar to the conditions or matters specifically enumerated in this Paragraph.

18. Liens, Taxes and Insurance. Lessee shall hold harmless, indemnify and defend Lessor against all claims, demands, actions and causes of action for injury or death to persons, damage or destruction of property unless caused by the negligence or misconduct of Lessor, mechanic's and material man's liens arising out of or by virtue of Lessee's rights or exercise of any rights under this Lease, operations on the leased land or any acts or omissions by Lessee, and Lessee undertakes and agrees to obtain and maintain insurance coverage,

naming Lessor as additional insured, in an amount not less than ten million dollars (\$10,000,000) principal amount to protect Lessor against any such claims. Lessee shall pay all taxes levied and assessed against all structures, improvements and personal property placed upon the leased land by Lessee. Lessor shall pay all taxes levied and assessed against the leased land as such including the geothermal resources and the right to production thereof and against any rights therein not covered by this Lease and shall pay all taxes levied and assessed against all structures and improvements placed on the leased land by Lessor. Lessee, at its own expense, prior to commencing operations on the leased land, shall obtain, and thereafter while this Lease is in effect shall maintain, adequate Workers' Compensation Insurance.

-7-

19. Assignment. Except as provided in this Paragraph, the interest of either Lessor or Lessee under this Lease may be assigned, devised or otherwise transferred in whole or in part, by area and by depth or zone and the rights and obligations shall extend to their respective heirs, devisees, executors, administrators, successors and assigns. No change in Lessor's ownership shall have the effect of reducing the rights or enlarging the obligations of Lessee under this Lease and no change in ownership shall be binding on Lessee until sixty (60) days after Lessee has been furnished the original or certified or duly authenticated copies of the documents establishing such change of ownership to the satisfaction of Lessee, Lessee shall not transfer, assign or reassign its interest in whole or in part in this Lease without the consent of Lessor, which consent shall not be unreasonably withheld, provided that this Lease may be hypothecated for the benefit of any creditor of Lessee or Lessee's successor in interest. If Lessee transfers its interest under this Lease in whole or in part, Lessee shall be relieved of all obligations thereafter arising with respect to the transferred interest, and failure of the transferee to satisfy such obligations with respect to the transferred interest shall not affect the rights of Lessee with respect to any interest not so transferred.

20. Notice. Any notice from the Lessor to the Lessee must be given by sending the same by registered or certified mail, postage prepaid, addressed to its office at 1301 Chelton Way, South Pasadena, California 91030, and any notice from the Lessee to the Lessor must be given in the same manner addressed to the Lessor at 631 South Witmer Street, Los Angeles, California 90017. The parties may, upon notice, change their said respective addresses for notice.

21. Severability. If any provision of this Lease shall be found or declared to be null, void or unenforceable for any reason whatsoever by any Court of competent jurisdiction, then and in such event only such provision shall be affected thereby, and such finding, ruling or decision shall not in any way affect the remainder of this instrument or any of the other terms or conditions hereof, which remaining terms and conditions shall remain binding, valid and subsisting and in full force and effect between the parties, it being specifically understood and agreed that the provisions of this Lease are severable for the purposes of the provisions of this Paragraph. This Lease shall not in any event extend beyond such term as may be legally permissible under applicable laws, and should any such applicable law limit the term to less than that provided in Paragraph 3, then this Lease shall not be void but shall be deemed to be in existence for such term and no longer.

22. Integration. This Lease constitutes the entire agreement between the parties and supersedes all other agreements and understandings, whether oral or written, the parties may have in connection therewith, including the March 3, 1982, Letter of Intent to enter into this Lease, and say be modified or terminated only by a writing signed by the parties.

23. Binding Effect. This Lease shall extend to and be binding upon the heirs, executors, administrators, grantees, successors and assigns of the parties.

IN WITNESS WHEREOF the parties hereto have executed this Lease effective as of the date first written above.

FIRST AMENDMENT
TO GEOTHERMAL LEASE

THIS FIRST AMENDMENT TO GEOTHERMAL LEASE (the "Amendment") is made and entered into effective as of April 30, 1987 (the "Effective Date") by and between Magma Energy, Inc., a Nevada corporation (the "Lessor") and Mammoth-Pacific, a California general partnership (the "Lessee"), collectively referred to herein as the "Parties".

Recitals

WHEREAS, the Parties made and entered into that certain Geothermal Lease dated the 31st day of August, 1983, by and between Lessor and Holt Geothermal Company, to which Lessee is the successor-in-interest as Lessee (the "Lease"), a copy of which is attached as Exhibit "A" to this Amendment and incorporated by reference herein; and

WHEREAS, the Parties now desire to modify the Lease with respect to the royalties to be paid by Lessee to Lessor in connection with the operation of one or more electric power plants fueled by geothermal resources underlying the leased land, the expansion of the existing electric power plant and the construction of additional electric power plants, and any other matters referred to herein.

NOW THEREFORE, in consideration of the mutual promises and covenants contained herein, and other good and valuable consideration, receipt and sufficiency of which are hereby acknowledged, Lessor and Lessee agree to amend the Lease as follows:

1. Paragraph 3 of the Lease is hereby deleted in its entirety and a new Paragraph 3, reading as follows, is substituted in its place instead:

3. Term. TO HAVE AND TO HOLD the leased land for a period of thirty (30) years from the date hereof (the "primary term") and so long thereafter as electricity is produced on the leased land from the geothermal resources therein, or excused under the terms of Paragraph 17 of this Lease.

2. Paragraph 5 of the Lease is hereby deleted in its entirety and a new Paragraph 5, reading as follows, is substituted in its place instead:

5. Royalty. Lessee shall pay to Lessor as royalty during the balance of the full term of this Lease compensation as follows:

5.1 *** Royalty. As to electricity or other energy generated by *** Lessee shall pay to Lessor as royalties during the balance of the full term of the Lease the following percentage of the "****", as such term is defined below, received by Lessee from ***, together with *** as such term is defined at Subparagraph 5.3 below:

*** Confidential material redacted and filed separately with the Commission.

(a) From April 1, 1987, and for a period of twenty-four (24) consecutive months thereafter, *** as such term is defined at Subparagraph 5.3 below, and applicable "****" as such term is defined at Subparagraph 5.3 below;

(b) From the date following the conclusion of the period set out in Subparagraph 5.1(a), above, and for a period of twelve (12) consecutive months thereafter, *** as such term is defined at Subparagraph 5.3 below, and applicable "****" as such term is defined at Subparagraph 5.3 below;

(c) From the date following the conclusion of the period set out in Subparagraph 5.1(b), above, and for a period of twelve (12) consecutive months thereafter, *** and applicable "****" as such term is defined at Subparagraph 5.3 below; and,

(d) From the date following the conclusion of the period set out in Subparagraph 5.1(c), above, and for the balance of the term of this Lease, *** as such term is defined at Subparagraph 5.3 below.

For all purposes herein, the term "Gross Proceeds" shall mean (i) with respect to the Existing Plant, all accounts received by Lessee, directly or indirectly, from the sale to others of electricity, including energy and

capacity payments, or energy in any other form, produced on the leased land from the geothermal resources therein or, if applicable, the "Adjacent Lease", as such term is defined at Subparagraph 5.8 below, and (ii) with respect to the "New Plants", as such term is defined at Subparagraph 5.2 below, all accounts received by Lessee, directly and indirectly, from the sale to others of electricity, including energy and capacity payments, or energy in any other form produced from any lands or geothermal resources without regard to ownership thereof.

5.2 *** Royalty. As to electricity or other energy generated by all additional plants utilizing the *** Lessee shall pay to Lessor for the balance of the full term of the Lease *** together with applicable "****" as such term is defined at Subparagraph 5.3 below.

5.3 *** Royalties. The *** payable by Lessee to Lessor with respect to the Existing Plant and each new Plant pursuant to Subparagraphs 5.1 and 5.2 above, shall be augmented by additional *** attached to this Amendment and incorporated by reference herein. Except as otherwise provided at Subparagraph 5.1(a), (b) and (c) above, the *** shall be applied to ***. The term "****" for each such plant shall mean the forecasts of ***

*** Confidential material redacted and filed separately with the Commission.

-9-

determined as set forth in *** to this Amendment. For all *** from the *** and each of the ***, respectively in excess of the *** (the "****") for such plants, the Bonus Royalties shall be applied to calculate the total amount of royalty payable to Lessor.

5.4 Inflation Adjustment. The applicable Baseline Revenue for each of the plants shall not be subject to adjustment during the fixed price period of any power purchase agreement associated with such plant. The Baseline Revenue for each of the plants shall be adjusted annually for all years after expiration of the period of firm prices provided in the power purchase agreement associated with such plant to account for the difference between an assumed inflation rate of five percent (5%) per annum and the actual inflation experienced (the "Inflation Adjustment"). For the purpose of the Inflation Adjustment, the "Actual Inflation" shall be determined from comparison of the value of the Producer Price Index for Finished Goods Excluding Food (the "Inflation Index") on December 31st of the then current year to the value of the Inflation Index on December 31, 1986. The Actual Inflation shall be equal to the ratio of the value of the Inflation Index on December 31, of the then current year to the value of the Inflation Index on December 31, 1986. The "Assumed Inflation" shall be equal to one and five hundredths ("1.05") raised to a power equal to the number of years between 1986 and the then current year. The "Inflation Adjustment Factor" shall be equal to the Actual Inflation divided by the Assumed Inflation. The "Adjusted Baseline Revenue" for each year shall be determined by multiplying the Baseline Revenue for each year by the Inflation Adjustment Factor.

In determining the foregoing Inflation Adjustment, the percentage of increase or decrease in the Inflation Index shall be calculated to the nearest one hundredth of one percent (1/100th of 1%). Percentage changes in the Inflation Index shall be calculated based on the original released United States Department of Labor, Bureau of Labor Statistics published data with the base "1967-100" until a new base period is established. Calculations shall be made based on data on the new base period from that time forward. If, for any reason, the statistics compiled by the United States Department of Labor, Bureau of Labor Statistics and referred to above, are not available for use for the foregoing adjustment, an adjustment shall be made by mutual agreement of Lessor and Lessee. If the United States Department of Labor, Bureau of Labor Statistics designates an index with a new title and/or code number as being continuous with the Inflation Index then such new index shall be used for the foregoing adjustment.

5.5 Consequences of Default by Lessee. The payment when due by Lessee to Lessor of the total compensation provided for in this Paragraph 5, for the balance of the full term of the Lease, is a condition to the continuation of Lessee's rights under the Lease and its right to use or occupy the leased land or any part thereof. In the event that Lessee shall default under any covenant or condition of the Lease and shall fail to remedy such default or to commence in good faith to remedy such default, if such default cannot be remedied within the notice period, Lessor shall have the right, upon expiration of sixty (60) days written notice of default, to terminate the Lease and all of Lessee's rights hereunder.

5.6 Payment of Royalties. Lessee shall pay to Lessor the Base Royalties, and any applicable Bonus Royalties, on the last day of each month for accrued royalties for the preceding calendar month. Lessee shall calculate the amount of actual Bonus Royalties due under the Lease at the end of each calendar year during the term of the Lease, and shall make payment of

*** Confidential material redacted and filed separately with the Commission.

-10-

any underpayment to Lessor or Lessor shall make payment of any overpayment to Lessee, as the case may be, for any amount due (the "Additional Royalties") and payable no later than forty-five (45) days after the end of each calendar year during the term of the Lease. When applicable under Subparagraph 5.4 above, Inflation Adjustments to the Baseline Revenue resulting from application of the Inflation Index shall be made on a dollar basis by each January 31st during the term of the Lease before calculating the actual Bonus Royalties. The Baseline Revenue for the first year of operation for any New Plant shall be prorated from the date of first delivery to the end of the calendar year to adjust for differences in actual and forecasted revenue set forth in the schedules of Baseline Revenue established for such plant.

5.7 Insufficiency of Geothermal Resources. (a) With respect to both the Existing Plant and any New Plants or any "Additional Plants," as such term is defined at Subparagraph 5.9 below, built on the leased land or the "Adjacent Lease", as such term is defined at Subparagraph 5.8 below, Lessee shall utilize geothermal resources produced from the leased land and/or the "Adjacent Lease". If the geothermal resources obtainable from the leased land and the Adjacent Lease are insufficient for operation of the Existing Plant, any New Plant, or any Additional Plant at their respective average capacity during the preceding three (3) calendar years, Lessor may, but shall not be obligated to, make available geothermal resources from other lands at the applicable royalty rates provided in Subparagraphs 5.1, 5.2 and 5.3 above. In such cast, Lessor shall pay all underlying, overriding, or other form of royalty or production payment, net revenue interest, or other form of compensation payable to the United States of America or any other third party on geothermal resources supplied from such other land. If Lessor is unwilling or unable, as provided above, to make available sufficient geothermal resources for the Existing Plant or for any such New Plant or any such Additional Plant, Lessee may secure geothermal resources from other lands ("Other Lands") for any such plant without paying royalty to Lessor on the geothermal resources so secured. In such a case, Lessee shall have the right to commingle the geothermal resources provided with geothermal resources provided from such Other Lands and to pay Lessor's royalty on the basis of production allocable to the leased land and the Adjacent Lease, and the Other Lands made available by Lessee, as determined by metering or gauging same.

(b) With respect to any New Plant built on land other than the leased land or the Adjacent Lease, Lessee shall pay Lessor the full royalty due under Subparagraphs 5.2 and 5.3 above regardless of the source of the geothermal resources, in accordance with definition of Gross Proceeds in Subparagraph 5.1 above and the last sentence of Subparagraph 7.1 below, and the provisions of Subparagraph 5.7 (a) above shall have no application.

5.8 Unitization of Geothermal Resources. Lessor may not voluntarily commit federal Geothermal Lease Number CA-11667-A (the "Adjacent Lease") to any unit or cooperative agreement without the prior written consent of Lessee and shall cooperate fully with Lessee, at no cost to Lessor, in accepting or opposing, as determined by Lessee any attempt to compel unitization or other form of joinder, of the Adjacent Lease pursuant to applicable laws and regulations including, but not limited to, the Geothermal Steam Act of 1970, and implementing regulations published at Title 43 Code of Federal Regulations, Part 3200, et seq., with all reasonable expenses thereof to be borne by Lessee. In the event that the Adjacent Lease becomes unitized or otherwise joined with any other land leased or otherwise controlled by Lessee, Lessor may not propose, or make any election with respect to, any "Participating Area",

-11-

as such term is defined in applicable laws and regulations without the prior written consent of Lessee.

5.9 Additional Plants. As to electricity or other energy generated by all additional plants built on the leased land or, if applicable, the Adjacent Lease from geothermal resources therein, other than the Existing Plant or the New Plants (the "Additional Plants"), Lessee shall pay to Lessor during the remainder of the full term of the Lease, royalties as provided at Subparagraphs 5.2, 5.3, 5.4, 5.6 and 5.7 above.

5.10 Minimum Royalty. Notwithstanding Subparagraph 5.7 hereof, Lessee shall pay to Lessor during the remainder of the full term of the Lease, a minimum royalty of 3% of gross proceeds from the sale to others of electricity, including energy and capacity payments, or energy in any other form generated by plants built on the leased land or when applicable, the Adjacent Lease.

5.11 No Guaranteed Internal Rate of Return. Lessor shall not be deemed to have guaranteed Lessee a minimum internal rate of return with respect to the Existing Plant, any New Plant, or any Additional Plant.

3. Paragraph 7 of the Lease is hereby deleted in its entirety and a new Paragraph 7, reading as follows, is substituted in its place instead.

7. Plant Expansion. Lessee shall have the right to expand its operations on the leased land, the Adjacent Lease, or any other lands without regard to ownership thereof beyond the capacity of the Existing Plant as follows:

7.1 Plant Expansion. Subject to the provisions of Subparagraph 7.2 below, Lessee shall have the right to increase the capacity of the Existing Plant or build the New Plants on the leased land, if operations under the Lease demonstrate the availability of an adequate supply of geothermal resources, on the terms and conditions set forth herein. Subject to the provisions of Subparagraph 7.2 below and the first and second provisos to this sentence, Lessee shall have the right of first refusal for the development of electricity available from utilization of geothermal resources underlying the Adjacent Lease; provided that Lessee's operation proves the adequacy of the geothermal resources and the commercial feasibility of producing electricity therefrom; and provided further, that Lessee shall have committed to construction of or more of the New Plants associated with the Standard Offer Number Four Power Purchase Contracts between Lessee and Southern California Edison Company bearing Document Numbers 2433H and 2435H (the "Standard Offer Number Four Contracts") or expanded the Existing Plant in an amount of no less than ten (10) megawatts nameplate rating prior to the expiration of the Standard Offer Number Four Contracts.

Lessee hereby agrees to exercise good faith efforts to obtain all necessary governmental permits, authorizations, and approvals to build and operate two (2) New Plants on the leased land or on adjacent land leased or otherwise controlled by Lessor and, if it obtains governmental permits, authorizations, and approvals which, in its sole discretion, are such that make

construction of the two New Plants economically viable, agrees to seek all necessary internal corporate and partnership authorizations, and sufficient financing for the construction of such

-12-

two New Plants. In the event that Lessee is unable, in the exercise of good faith efforts, to obtain all necessary external and internal permits, authorizations, approval and financing to build and operate any New Plants or determine not to build any New Plants for any reason or no reason, Lessee shall proceed in accordance with the terms of Subparagraph 7.2, below. Regardless of ownership of the land or geothermal resource dedicated to any New Plant, Lessee shall pay Lessor royalties on the Gross Proceeds of such New Plants as provided in Subparagraphs 5.2 and 5.3, above.

7.2 Consequences of Failure to Expand. If Lessee shall fail to complete prior to the expiration of the Standard Offer Number Four Contracts an increase in the capacity of the Existing Plant of no less than ten (10) megawatts nameplate rating or the construction of at least one (1) New Plant, Lessee shall relinquish to Lessor its rights under the Lease to the surface and subsurface area not actually used for the Existing Plant, gathering and injection lines, and wells and shall further relinquish its right to use the geothermal resource underlying the leased land or the Adjacent Lease for any purpose other than operating the Existing Plant as provided herein. If Lessee so relinquishes its rights to the surface and subsurface area and the geothermal resource, with respect to the surface and subsurface actually used for the Existing Plant, gathering and injection lines and wells, Lessee and Lessor shall jointly hold such rights on a non-interference basis. If Lessee so relinquishes the foregoing rights, Lessor shall have the right to utilize (i) the surface and subsurface not actually used for the Existing Plant, gathering and injection lines, and wells and the geothermal resources underlying the leased land, and (ii) the Adjacent Lease, for any purpose; provided, however, Lessor may not exercise any of the foregoing reserved rights which, in the reasonable opinion of Lessee, might interfere with the operation of the Existing Plant.

4. A new Paragraph number 24 is hereby added to the Lease as follows:

24. Upon request, Lessee shall provide Lessor with full access to review, and, with respect to Lessor operations on the leased land or Adjacent Lease, to use without charge all geotechnical data, geotechnical reports, and documents containing geotechnical information of any kind related to Lessee's operations on the leased land.

5. A new Paragraph number 25 is hereby added to the Lease as follows:

25. Lessee hereby waives, discharges and releases Lessor from any and all claims of Lessee against Lessor, its directors, officers, employees or agents which have accrued prior to April 1, 1987 and which arose out of, in connection with, or relate to the negotiations of Lessees entering into, or Lessor's performance or nonperformance of the Lease.

6. As modified or added to by the terms of this Amendment, all terms and conditions of the Lease shall remain in full force and effect. All capitalized terms contained herein, unless otherwise defined, shall have the meaning ascribed to such terms in the Lease.

IN WITNESS WHEREOF, this Amendment has been executed on the first date written above by the duly authorized representatives of the parties.

Los Angeles, California 90067-3271

SECOND AMENDMENT TO GEOTHERMAL LEASE

THIS AMENDMENT TO GEOTHERMAL LEASE ("Amendment") is made and entered into effective as of January 1, 1990, by and among MAGMA POWER COMPANY, a Nevada corporation ("Lessor") and MAMMOTH-PACIFIC, L.P., a California limited partnership ("Lessee"), with reference to the following facts:

A. Magma Energy, Inc., a Nevada corporation, and Holt Geothermal Company, a California corporation, entered into that certain Geothermal Lease dated August 31, 1983, and recorded in memorandum form on September 6, 1983, in Book 389, Page 37 of Official Records of Mono County, California (the "Lease").

B. Magma Energy, Inc. has merged with and into Lessor, and Lessor is the successor-in-interest to Magma Energy, Inc., by operation of law, as fee owner of the real property covered by the Lease.

C. By an Assignment of Lease dated August 31, 1983, and recorded in memorandum form on September 20, 1983, in Book 390, Page 90 of Official Records of Mono County, California, Holt Geothermal Company assigned all of its right, title and interest in the Lease to Mammoth-Pacific, a California general partnership.

D. The Lease was previously amended by the First Amendment to Geothermal Lease dated April 30, 1987 between Magma Energy, Inc. and Mammoth-Pacific, a California general partnership.

-15-

E. Pacific Geothermal Company, a California corporation and a general partner of Lessee, subsequently succeeded to all of Mammoth-Pacific, a California general partnership's right, title and interest in the Lease. By an assignment dated January 29, 1990 and recorded in memorandum form on January 29, 1990 as Instrument No. 665, Official Records of Mono County, California, Pacific Geothermal Company assigned an undivided 50% of all of its right, title and interest in the Lease to Lessee, and the remaining undivided fifty percent (50%) of all of its right, title and interest in the Lease in equal shares to CD

Mammoth Lakes I, Inc., a Maryland corporation and _____ Mammoth Lakes II, Inc., a Maryland corporation (collectively, the CD Companies); and the CD Companies in the same assignment subsequently assigned all of such right, title and interest in the Lease to Lessee.

F. Exhibit "A" to the Lease contains the following exception in the description of Parcel B of the leased premises EXCEPTING THEREFROM the surface of the Southwesterly three (3) acres, more or less, occupied by a lumberyard as of the date of this Lease.

The area covered by this exception is referred to in this Amendment as the "Excepted Acreage."

G. Lessor and Lessee desire to amend the Lease to include the Excepted Acreage in the leased premises, without, however, any warranty of title by Lessor.

NOW, THEREFORE, in consideration of the above-referenced facts, the agreements of Lessor and Lessee contained herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Lessor and Lessee agree as follows:

1. The following language is deleted from Exhibit "A" to the Lease:

-16-

EXCEPTING THEREFROM the surface of the Southwesterly three (3) acres, more or less, occupied by a lumberyard as of the date of this Lease.

2. From and after the date of this Amendment, the Excepted Acreage shall be part of the leased premises covered by the Lease, subject to all of the terms and conditions of the Lease, as amended, except as provided in paragraph 3 below.

3. Notwithstanding anything set forth in the Lease, Lessor is leasing the Excepted Acreage to Lessee without any warranties or representations of title whatsoever, including, without limitation, any warranty or representation that the Excepted Acreage is free and clear of leases and tenancies by others.

EVIDENCING their agreement, Lessor and Lessee have executed this Amendment as of the date first written above.

THIRD AMENDMENT TO GEOTHERMAL LEASE

THIS THIRD AMENDMENT TO GEOTHERMAL LEASE (the "Third Amendment") is made and entered into as of April 12, 1991, by and between MAGMA POWER COMPANY, a Nevada corporation ("Lessor") and MAMMOTH-PACIFIC, L.P., a California limited partnership ("Lessee") with reference to the foregoing facts:

A. Magma Energy, Inc., a Nevada corporation, and Holt Geothermal Company, a California corporation, entered into that certain Geothermal Lease dated August 31, 1983, and recorded in memorandum form on September 6, 1983, in Book 389, Page 37 of Official Records of Mono County, California (the "Original Lease").

B. Magma Energy, Inc. has merged with and into Lessor, and Lessor is the successor-in-interest to Magma Energy, Inc., by operation of law, as fee owner of the real property covered by the Original Lease.

C. By an Assignment of Lease dated August 31, 1983, and recorded in memorandum form on September 20, 1983, in Book 390, Page 90 of the Official Records of Mono County, California, Holt Energy Company assigned all of its right, title and interest in the Original Lease to Mammoth-Pacific, a California general partnership ("MPGP").

D. The Original Lease was previously amended by the First Amendment to Geothermal Lease dated as of April 30, 1987 between Magma Energy, Inc and MPGP (the "First Amendment") and by the Second Amendment to Geothermal Lease dated as of January 1, 1990 between Lessor and MPGP (the "Second Amendment") (the Original Lease, the First Amendment and the Second Amendment are referred to collectively herein as the "Lease").

E. MPGP has dissolved and, as a result of such dissolution, Pacific Geothermal Company, a California corporation ("PGC"), succeeded to 100% of MPGP's interest in the Lease.

F. PGC is a general partner of Lessee, holding not less than 50% interests in both partnership capital and profits.

G. By an Assignment and Assumption Agreement dated as of January , 1990 (the "Assignment Agreement"), PGC assigned an undivided 50% interest in the Lease to Lessee and an undivided 50% in the Lease to the CD Companies (as defined in the Assignment Agreement) (the "CD Companies"). Said Assignment Agreement was recorded in memorandum form on January 29, 1990 in Book 548, Page 592 of the Official Records of Mono County, California.

H. Concurrently with the Assignment to the CD Companies described in Recital G, the CD Companies assigned their entire interest in the Lease to Lessee.

I. Lessor and Lessee now desire to modify the Lease for purpose of, among other things, modifying and/or clarifying certain rights and obligations of Lessor and Lessee under the Lease.

NOW, THEREFORE, in consideration of the mutual promises and covenants contained herein, and for other good and valuable consideration the receipt and sufficiency of which are hereby acknowledged, Lessor and Lessee agree to amend

the Lease as follows:

1. Definitions. All capitalized terms contained herein, unless otherwise defined, shall have the meanings ascribed to such terms in the Lease.

2. Modification of Exhibit "A-1". Lessor and Lessee agree to amend Exhibit "A-1" to the First Amendment promptly upon the occurrence of "firm operation" of each New Plant, which amendment(s) shall be prepared on the basis of the same assumptions used for purposes of initially preparing said Exhibit "A-1", but which amendment(s) shall accurately reflect the appropriate commencement date for the effectiveness thereof.

3. Modification of Exhibit "A-2". Exhibit "A-2" to the First Amendment is hereby deleted in its entirety and Exhibit "A-2" hereto is substituted in its place.

4. Property Taxes. Paragraph 18 of the Lease is hereby amended by adding the following before the last sentence of Paragraph 18:

In this regard, all property taxes assessed by the Assessor on the respective property interests of the parties hereunder in respect of the leased land shall be shared by Lessee and Lessor in proportion to which the Assessor allocates the assessment of value among structures, improvements and personal property made or placed upon the leased land by Lessee, on the one hand, and the leased land as such (including the geothermal resources and the right to production thereof), on the other hand; provided, however, that any increase in tax assessments which arise after the date hereof by reason change in control of or ownership interests in Lessee shall be paid by "Lessee", and/"Lessee" shall indemnify and hold Lessor harmless therefor, including, without limitation, changes in control or of ownership interests in Lessee arising by reason of redemptions or transfers of interest. In addition, from and after January 1, 1990, Lessor and Lessee shall cooperate in good faith to pursue a joint strategy of settling on an agreed-upon methodology with the Assessor for valuation and allocation of property taxes, both historically and prospectively during the term of this Lease. Lessor and Lessee agree that each party shall represent its own interests as they shall appear and shall bear its own fees and costs, but shall seek, in good faith and to the extent reasonably practicable, to present a common position to the Assessor in a good faith effort to achieve the lowest overall property tax assessment applicable to both parties.

5. Indemnification. Paragraph 18 of the Lease is hereby further amended by adding the following after the first sentence of Paragraph 18:

Without limiting the generality of the foregoing or any other provision of this Lease (including, without limitation, Paragraphs 12 and 15 hereof) and in furtherance thereof, Lessee acknowledges that Lessor has not itself utilized or monitored Lessee's activities on the leased land and Lessee (i) acknowledges and agrees that Lessee is relying solely on its own investigation of the leased land with respect to the effect of (a) the presence, if any, of any underground tanks on the leased land or of any "hazardous substances", "hazardous materials" or "hazardous wastes" (as defined under federal or California Law) (collectively, the "Hazardous Materials"), (ii) assumes the risk of all liabilities, claims, demands, actions and causes of action arising out of any such storage tanks or Hazardous Materials on, at, in, under or about the leased

-19-

land whether placed there now or at any point in the future while this Lease is in affect and, (iii) agrees to hold harmless, indemnify and defend Lessor against all claims with respect to the foregoing.

6. Assignment of BLM Lease. Concurrently with the execution and delivery hereof, Lessor is assigning to Lessee all of Lessor's right, title and interest in and to that certain Geothermal Resource Lease (Mono-Long Valley Parcel #12)

dated March 1, 1982, between the United States and Magma Energy, as assigned to Lessor (the "BLM Lease"). In consideration for such Assignment, Lessee shall pay to Lessor, on the date hereof, the amount of \$89,468.06 by wire transfer of immediately available funds.

7. BLM Approval. Lessee shall, within 180 days following the date hereof, obtain from the Department of Interior, Bureau of Land Management ("BLM") such approvals to the Assignment of the BLM Lease described in Paragraph 6 of this Third Amendment as may be required in accordance with 43 C.F.R. 3241.2, and either (a) Lessee shall post a bond satisfactory to BLM if required thereby or (b) if Lessor has heretofore posted a bond with BLM, then Lessee shall replace such bond and cause such bond to be released to Lessor. In the event Lessee fails to perform its obligations under this Paragraph 7, Lessee shall, upon request of Lessor, assign the BLM Lease to Lessor.

8. Cross Default. Lessee shall be deemed to be in material breach of the Lease, as amended hereby, in the event Lessee fails for any reason whatsoever to pay within five (5) days when due all royalties payable by Lessee for Lessor under the Lease, as amended hereby, in respect of the BLM Lease, including without limitation in the event the payment of all or any part of said royalties are determined to constitute impermissible overriding royalties. If Lessee or any lender or other party holding a beneficial interest in the BLM Lease fails to pay any royalty due under the ELM Lease within sixty (60) days after such royalty comes due, Lessor shall have the right to terminate the Lease upon written notice to Lessee.

9. BLM Lease Property Taxes. From and after the date hereof, Lessee shall pay all property taxes payable in respect of the BLM Lease property and all rental and royalties payable under the BLM Lease, as though Lessee were the direct and original lessee thereunder, and lessee shall indemnify and hold harmless Lessor for all losses, liabilities, costs and expenses (including without limitation reasonable attorneys' fees) in respect thereof.

10. Matters Concerning the BLM Leases. To the best of Lessor's knowledge, without any review of title reports but based solely on Lessor's not having received any notice, certificate or document to the contrary, Lessor has no reason to believe there are any defects in Lessor's title to the BLM Lease. In addition, Lessor represents that all rental Payments and taxes attributable to the BLM Lease which have become due and payable have been paid in full.

11. Effectiveness of Third Amendment. This Third Amendment shall be effective and become of full force and effect only upon receipt by Lessor of insurance binders or certificates in a form reasonably satisfactory to Lessor evidencing the maintenance by Lessee of all policies of insurance required to be maintained pursuant to Paragraph 18 of the Lease.

12. Continued Effectiveness. Except as specifically provided in this Third Amendment, the Lease shall remain in full force and effect in accordance with its original terms

-20-

and conditions, except that the term "Lease" as used in the Lease shall hereafter mean the Lease as amended hereby.

13. Counterparts. This Third Amendment may be executed simultaneously in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute a single original instrument.

14. Entire Agreement-Amendments. This Third Amendment, together with the Lease and those certain letter agreements date of even date herewith, between Lessor and Lessee, constitute the entire agreement of the parties with respect to the matters set forth herein, and the provisions hereof, together with the

other documents enumerated in this Paragraph 14, shall supersede any and all prior agreements or understandings relating to the same subject matter. The Lease, as amended hereby, may be further amended only by a writing signed by a duly authorized representative of both parties.

IN WITNESS WHEREOF, the parties hereto have caused this Third Amendment to be signed by their duly authorized officers as of the day and year first above written.

UNPROTECTED LEASE AGREEMENT

Made in Yavne, Israel as of this 15th day of July, 2004
BY AND BETWEEN:

Ormat Industries Ltd.
Public Company No. 52-003671-6
Of the Industrial Area of Yavne
(hereinafter: "OIL")

OF THE FIRST PART;

AND:

Ormat Systems Ltd.
Private Company No. 51-159723-9
Of the Industrial Area of Yavne
(hereinafter: "OSL")

OF THE SECOND PART;

WHEREAS OIL leases from the Israeli Land Administration (hereinafter: "ILA") a 65,655 sqm of land in the Industrial Area of Yavneh, known as Block no. 5403 Plots 8 & 9 (in part), Block 4921 Plots D & 10 (in part) and Block no. 5170 Plot 107 (hereinafter: "THE REAL ESTATE"), under lease contracts expiring between 2018 through 2047 (hereinafter: "THE LEASE CONTRACTS") and on which OIL's production and manufacturing facilities, headquarters, the technical school and other permanent constructions and fixtures used by OIL are located as well as the plot on which the Guest House is located at 7 Brosh St., Yavne (hereinafter, together: "THE PLANT"); and

WHEREAS OIL and OSL have agreed on the sale of certain assets and liabilities of OIL to OSL, including the activities of the Plant but excluding the Real Estate and the Plant, and for that purpose are entering, simultaneously with their entering into this Agreement, into a Purchase Agreement (hereinafter: "THE PURCHASE AGREEMENT"); and

WHEREAS OSL wishes to lease the Real Estate and the Plant for the Term (as hereinafter defined), and OIL wishes to lease the Real Estate and the Plant to OSL for said period, provided, however that the terms of the Law for the Protection of Tenants [Consolidated Version], 1972 and/or any other law which will replace it or add to it, will not apply to this Agreement and that OSL will not be protected by such laws;

THEREFORE, IN CONSIDERATION OF THE FOREGOING, THE PARTIES, INTENDING TO BE LEGALLY BOUND, AGREE AS FOLLOWS:

1. DEFINITIONS

In this Agreement, except where the context otherwise requires, the following terms shall have the meaning ascribed to them hereunder:

- 1.1 "THE LEASED PROPERTY" - the Real Estate and the Plant, depicted in blue and red respectively in the drawing attached as EXHIBIT A to this Agreement. For the removal of doubt, the Leased Property will include any permanent constructions and fixtures located in the Real Property, which may not under Israeli law be sold apart from the Real Estate, while it is the intention of the Parties that all detachable, removable and/or temporary fixtures and constructions will be sold to OSL under the Purchase Agreement.
- 1.2 "QUARTER" - any three-months-period beginning on January 1st, April 1st, July 1st or October 1st.
- 1.3 "BUSINESS DAY" - a day in which most of the five largest banks in Israel are open to transact business with the public.
- 1.4 "THE REPRESENTATIVE RATE OF EXCHANGE" - the representative rate of exchange of the USD published by the Bank of Israel, and if such rate will not be published, then any rate which will replace it and in the absence of such rate - the average of the two largest banks in Israel buy and sale rates for transfers of USD.
- 1.5 "ASSIGNMENT" - whether by way of assignment, conveyance, transfer, sale, sublet, lease, pledge, lien, or license, whether with or with no consideration.
- 1.6 "PERMITTED TRANSFEREE" - an entity Controlling, under the Control of, or under common Control with, the transferor.
- 1.7 "CONTROL" - the ability to direct the operations and activities of a corporation, except an ability stemming only from the fulfillment of a position of a director or another office in the corporation, and it is presumed that a person controls a corporation if the person holds half or more of the voting rights in the corporation, or half or more of the rights to nominate the directors of the corporation.

-3-

2. LEASE AND TERM

- 2.1 Subject to the conditions specified herein, OIL hereby leases to OSL and OSL hereby leases from OIL, the Leased Property, for a period of 4 years and 11 months, commencing on July 1st, 2004 (hereinafter: the "TERM"). If necessary, OIL will apply to the ILA for its consent to extend the Term to a period of up to a total of 25 years (less one day) and, should such approval be granted or if such an approval is not required, the Term will be extended accordingly. For the purpose of this Agreement, the Term shall include any extension thereof.
- 2.2 If required, the Parties will exert their best efforts to register the Lease with the Land Registry Office and will do so with respect to any other registry where such registration is deemed necessary or beneficial by the Parties.
- 2.3 Possession of the Leased Property will be granted to OSL effective as of July 1st, 2004 (hereinafter: the "EFFECTIVE DATE").

2.4 Should OIL's Lease Contracts, or part thereof, be terminated and/or not be renewed, then the Term with respect to the relevant plot, will terminate, and the provisions of section 12.3 hereunder will apply, accordingly. The parties agree that other than for gross negligence, willful misconduct, or a breach by OIL of its Lease Contracts, OIL shall not be liable to OSL for damage and/or loss which results from the termination of the Lease by the ILA or the denial of any extension by the ILA.

3. USE OF THE LEASED PROPERTY

3.1 OIL hereby leases the Leased Property to OSL for the purpose of operating the Plant and/or any other type of legal activity.

3.2 OSL declares that it is familiar with, and has seen and inspected, the Leased Property, its surroundings and the regulatory framework applicable to the Leased Property (including the plans ("taba") and the designation of the Leased Property thereunder) and has found the Leased Property and its surroundings to be in good and proper condition, and the Leased Property and the regulatory framework suitable for its purposes and needs. Subject to OIL's complying with its obligations hereunder, OSL hereby waives any claim of defect or unsuitability regarding the Leased Property, and any other claim of any kind regarding the Leased Property or this Agreement.

-4-

3.3 The Plant and/or any other business will be operated by OSL in the Leased Property at its sole cost. Beginning on the Effective Date, OSL will be solely responsible for obtaining any licenses, permits and authorizations necessary for the use and operation of its business in the Leased Property. Notwithstanding the above, if required, OIL will assist OSL in obtaining any such authorizations, provided OSL will reimburse OIL for any expenses incurred by it in connection therewith. For the removal of doubt, failure to obtain the necessary authorizations or their termination, shall not grant OSL the right to terminate this Agreement or the lease hereunder, prior to the termination of the Lease Period.

4. OWNERSHIP OF LEASED PROPERTY

OIL hereby declares and warrants that it is the sole legal lessor and holder of the Leased Property and that it is legally entitled to lease the Leased Property pursuant to the terms and conditions of this Agreement.

5. RENT

5.1 In consideration for the lease of the Leased Property, OSL will pay OIL a monthly rent of USD52,250 (hereinafter: "THE RENT"), together with VAT as stated in clause 5.5 hereunder. The Rent will be paid every Quarter in advance, on the first Business Day of such Quarter, with the Rent for the period commencing on the Effective Date to be paid on the date of signing of this Agreement.

5.2 The Rent will be adjusted every year, beginning on January 1st, 2005, by the same rate of increase of the Israeli Consumer Price Index ("CPI") during the previous calendar year. In any event, the Rent with respect to each year during the Term and any extension thereof shall not be lower than the Rent paid during the previous year.

- 5.3 At OSL's choice, Rent will be paid either in USD or in NIS. If Rent is paid in NIS, it will be paid according to the Representative Rate of Exchange most recently published by the Bank of Israel prior to the time of payment.
- 5.4 Payment of Rent will be effected in cash by wire transfer of immediately available funds to an account designated by OIL, in writing, or by check, or in any other manner approved by the Parties' CEOs.

-5-

- 5.5 Value Added Tax, at the appropriate rate, shall be paid by OSL with respect to any Rent payment, and in the same manner and on the same date such payment is made, against issuance of a VAT invoice by OIL.
6. TAXES AND OTHER PAYMENTS IMPOSED ON OSL
- 6.1 OSL shall pay during the Term any tax, levy, charge or other compulsory payments, whether state or municipal and of any kind, imposed on the date hereof and/or in the future, on the lessee and/or occupant and/or possessor of the Leased Property, and/or applicable on the business or operations of OSL in the Leased Property, including municipal tax ("arnona"), business tax, licenses fees etc., but excluding payments which pursuant to this Agreement are the liability of OIL.
- 6.2 OSL will pay all the required payments relating to the operation of the Leased Property, including electricity, water, gas, telephone (including faxes) etc. OIL may demand OSL to register itself during the Term as the debtor of such payments with the appropriate entities, and OSL will do so. Upon the termination of the Lease Agreement, OIL (or whomever it may order) will be re-registered as the debtor.
- 6.3 OSL will timely and fully remit all taxes and other payments imposed on it as aforesaid. Notwithstanding the above, in any event of late payment, OSL will bear any interest (including arrears interest), linkage differences, fines and other costs imposed in connection with such late payment.
- 6.4 Within reasonable time of OIL's demand, OSL will provide it with all the receipts or other certifications proving its full and timely compliance with its payment obligations under this clause. OIL will be entitled, but not obligated, to pay any such payment which has been due for over 60 Business Day and has not been paid by OSL at the time OIL remits such payment, and in such event OSL will reimburse OIL for its expenses, immediately upon OIL's demand, together with interest (as set forth in clause 14.1 hereunder).

-6-

7. TAXES AND OTHER PAYMENTS IMPOSED ON OIL

OSL shall indemnify OIL, immediately upon OIL's demand, for any taxes, levies or charges imposed upon OIL, including any payments to the ILA, in

connection with Leased Property and/or the Rent, but excluding any income taxes or other taxes imposed by reference to revenues of OIL or earnings of OIL derived from the Rent.

8. INAPPLICABILITY OF TENANCY PROTECTION LAWS

OSL hereby declares, warrants and certifies that:

- 8.1 The Tenant Protection Law [Consolidated Version], 1972 (hereinafter: "THE TENANT LAW") does not apply to the lease under this Agreement.
- 8.2 This Agreement, the lease hereunder, OSL, and the Leased Property are not and will not be protected under the provisions of the Tenant Law nor under any other law that may amend or add to or replace the Tenant Law, nor under any other law that now grants or in any time in the future will grant tenants or tenancies protection similar to those mentioned in the Tenant Law. Any such laws, or any regulation, directive or legislation that has been or will be passed or promulgated in the future under such laws, shall not apply to OSL, the Leased Property, this Agreement or the lease hereunder.
- 8.3 OSL has not paid, nor has it been required to pay or undertook to pay OIL any amount whatsoever, directly or indirectly, whether in money or its equivalent, with respect to "key monies" for the lease. OSL hereby warrants and declares that any repair and/or change executed in the Leased Property, if at all, will be executed in the course of ongoing maintenance of the Leased Property and shall not constitute fundamental changes in the Leased Property. Hence, upon surrender of the Leased Property, OSL shall not be entitled to claim or receive any amount or benefit with respect to key monies or goodwill.
- ## 9 OSL'S UNDERTAKINGS
- 9.1 OSL will fully and timely comply with all laws, regulations, directives and other legislation, as well as any licenses, permits and authorizations issued by the authorities or required by them, applicable to the maintenance and operation of the Leased Property, its use and the activities taking place therein.

-7-

- 9.2 OSL will look after the intactness of the Leased Property, will operate its business only within the boundaries of the Leased Property and will not cause or allow its employees, managers, invitees, customers or any one on its behalf to cause any hazard, nuisance, trespassing, noise, shocks, filth, smoke or other unpleasantness to the users of the Leased Property and/or its surroundings, which is unreasonable considering the character of the Leased Property and the character of its surroundings.
- 9.3 OSL will use the Leased Property in a reasonable and careful manner. Without derogating from the generality of the above, OSL:
- 9.3.1 Will keep the Leased Property in a good and proper shape, except for reasonable wear and tear.
- 9.3.2 Will keep the Leased Property clean.

- 9.3.3 Will use the Leased Property for legal activities.
- 9.3.4 Will not act in a manner causing harm to the Leased Property.
- 9.3.5 Will inform OIL of any defect, damage or loss caused to the Leased Property, immediately upon their occurring.
- 9.3.6 Will without delay repair, at its own expense, any loss or damage caused to the Leased Property. Should OSL fail to do so within 10 Business Days of the occurrence of such loss or damage, OIL may (but will not be obligated to) execute such repair works, at OSL's expense, and OSL will reimburse OIL for any out of pocket expenses borne by it with respect thereto immediately upon OIL's demand. The expenses will bear interest, as set forth in clause 14.1 hereunder.
- 9.4 OSL shall obtain and maintain, at its own cost and

responsibility, with financially and professionally reputable insurers, the insurance policies detailed in EXHIBIT B to this Agreement, which will cover the Leased Property and its contents at their full value. Both OIL and OSL shall be named as beneficiaries of such insurance policies. OSL will keep its insurance policies in full force and effect throughout the Lease period and will pay the premiums in full and in a timely manner. Upon OIL's demand, OSL will present it with proof of its compliance with this undertaking. Should OSL fail to obtain or maintain insurance policies as aforesaid, OIL may do so

-8-

at OSL's expense, and OSL shall indemnify OIL, upon its demand, for all its expenses in connection therewith. In any event of damage, OSL shall take reasonable measures to activate the policies and will use any monies received in connection with such policies only to repair, with no delay, the damage covered.

10. OSL INDEMNIFICATION UNDERTAKINGS

- 10.1 In addition to any liability imposed on OSL under law, OSL will repair, at its expense, any damage or loss which results from defective construction of the Plant. Such repair works will be executed by OSL within reasonable time of being notified by OIL of the damage or loss. Should OSL fail to execute any such repair works within 10 Business Days of being notified of the damage or loss, OIL may notify OSL of its intent to repair the damage or loss, and in the absence of action on the part of OSL within 5 Business Days, OIL may (but will not be obligated to) repair any such damage or loss at OSL's expense. OSL will reimburse OIL for any out-of-pocket expenses borne by it with respect thereto immediately upon OIL's demand. The expenses will bear interest as set forth in clause 14.1 hereunder.
- 10.2 Notwithstanding the above, and in addition to any liability imposed on OSL under law as possessor and/or occupant and/or lessee of the Leased Property, OSL will be solely responsible for any damages of any type or kind caused to the Leased Property and/or OIL and/or a third party present in the Leased Property (including bodily injury or damages to property), as a result of OSL's negligent acts or omissions, including the negligent acts or omissions of its employees, invitees or any other person or entity acting on behalf of OSL. OSL hereby releases OIL from any liabilities under any law to indemnify and/or compensate and/or be liable to such damage. OSL will indemnify OIL, immediately upon its

demand, for any loss or expenses (including legal expenses) it paid as a result of OSL's negligence, including loss or expenses incurred by as a result of any demand, motion or law suit derived, directly or indirectly, from OSL's said negligence.

11. MODIFICATIONS AND ALTERATIONS

11.1 Subject to clause 11.4 hereunder, OSL will not build or construct on or otherwise develop, modify, alter or effect a change in the Leased Property (hereinafter: "A CHANGE") without the advance written consent of OIL, which will not be unreasonably withheld.

-9-

11.2 In case of any request or requirement for a Change by OSL, OSL will provide OIL in writing all the information regarding the requested Change, including all information reasonably required by OIL.

11.3 If OIL authorizes a Change, OSL will be permitted to execute such Change, provided it corresponds to the authorization and all other reasonable limitations or restrictions imposed by OIL.

11.4 Notwithstanding the provisions of clause 11.1 above, OSL shall be entitled to remodel, redecorate, refurbish and make improvements and replacements (hereinafter: "IMPROVEMENTS") to the interior structure of the Plant as OSL may deem desirable. OIL will have no objection to the same, provided that none of the Improvements will have any permanent effect whatsoever on the structure or construction of the Plant.

11.5 OSL will bear the responsibility and all costs and expenses involved in executing the Change or Improvement, and the maintenance thereof, and will not be entitled to any compensation, consideration or indemnification for such Change or Improvement, whether upon its execution or any time thereafter, including at the termination of this Agreement. Neither will OSL be entitled to any reduction in the Rent on account of such Change or Improvement. For the removal of doubt, OSL alone will be responsible to obtain any necessary approvals or authorizations for the execution of the Change or Improvement.

11.6 Any Change or Improvement made will be considered an integral part of the Leased Property and deemed owned by OIL for all intents and purposes, and will accordingly be surrendered to OIL, together with the Leased Property, upon termination of this Agreement (for no consideration). Provided however, that subject to clause 13 hereunder, said provision will not apply to equipment and furniture belonging to OSL (including phones and computer systems) which are not permanently attached to the Leased Property and whose detachment will not have a permanent effect on the construction or structure of the Plant.

Notwithstanding the above, OIL shall be entitled at the end of the Term or upon the termination of this Agreement, to demand that OSL remove any Change or Improvement and return the Leased Property to its previous condition, at OSL's expense and OSL will do so, within a

reasonable time after being so demanded. If OSL fails to do so within 30 Business Days of receipt of such a demand, OIL may return the Leased Property to its previous condition, at OSL's expense, and OSL will reimburse OIL for all its expenses in connection therewith, together with interest as set forth in clause 14.1 hereunder, immediately upon OIL's demand.

12. CEASING OF OPERATION AND TERMINATION

- 12.1 OSL may cease its activities in the Leased Property at any time during the Term, provided however, it continues to fully comply with its obligations under this Agreement.
- 12.2 OIL will have the right to terminate this Agreement upon the occurrence of any one of the followings: (i) the dissolution or winding up of OSL (ii) an appointment of a special manager, trustee or receiver, over OSL or its material assets, if such appointment is not cancelled within 90 days (iii) a breach by OSL of any of its payment obligations to OIL under this Agreement which is not remedied within 30 days after being notified in writing of the breach by OIL, or a breach of OSL of any of its other undertakings under this Agreement which is not remedied within 90 days after being notified in writing of the breach by OIL.
- 12.3 Upon OIL request and at OIL's sole discretion, the area of the Leased Property shall be reduced in order to accommodate the needs of OIL; provided, however, that any such reduction does not have an adverse affect on the operation of the business of OSL in the Leased Property. If OIL exercises its aforesaid right, the Rent and all OSL's liabilities with respect to the Leased Property shall be adjusted proportionately to such reduction.

13. SURRENDER OF THE LEASED PROPERTY

- 13.1 OSL undertakes upon expiration or termination of the Agreement to restore possession of the Leased Property to OIL free of any property, equipment and fixtures not belonging to OIL (subject to clause 11 above). The Leased Property will be in as good, clean, orderly, and proper condition as on the date of this Agreement, except for ordinary wear and tear resulting from ordinary and reasonable use of the Leased Property in accordance with the purpose of the lease.

Should OSL fail to comply with its obligation, it will reimburse OIL all the expenses incurred by it in the course of restoring the Leased Property to such condition.

- 13.2 Should OSL fail to vacate as aforesaid the Leased Property at the time set forth above,
- 13.2.1 OSL shall be obligated to pay OIL liquidated damages of USD 3,000 for each day of delay in vacating the Leased Property. Such penalty will not be considered as Rent payment and will not create any lessor-lessee relationship between OIL and OSL.

13.2.2 Upon a 7 days prior written notice, OIL may vacate the Leased Property at OSL's expense, and transfer and store any equipment and furniture belonging to OSL, all at OSL's expense. OIL shall not be liable to any damage to OSL or the Leased Property or the equipment or furniture vacated, caused in connection with such actions on its part, except damage caused willfully or negligently.

All this, without derogating from any other remedies OIL may be entitled to under this Agreement or under law.

14. ARREARS INTEREST

14.1 Any payment imposed on a Party under this Agreement for the benefit of the other Party, which was not remitted by it on the date due for payment, shall bear interest at the rate of Prime plus 5% per annum, for the period during which such payment remained unpaid.

14.2 The right to receive or the payment of arrears interest will not impair OIL's right to receive, in addition to such payment, any other or additional remedy OIL may be entitled to under this Agreement or under law for such delay in payment, and will not constitute any waiver by OIL of its right to such remedies.

15. MISCELLANEOUS

15.1 Each of the Parties hereby declares and confirms, that all actions and resolutions necessary in order to give effect to its entering into this Agreement, have

-12-

been taken, and that there is no restriction and/or limitation and/or hindrance on its signing this Agreement, and such signature and/or the execution of this Agreement by it shall not constitute a breach by it of any applicable contract and/or law and/or its documents of incorporation.

15.2 Each party will cooperate with the other party, in good faith, and exert its best efforts in order to assist the other party in achieving the purposes of this Agreement and complying with the other party's undertakings hereunder.

15.3 Monetary obligations owed by the Parties hereto to one another, which have become due, may be offset by a written notice provided by the offsetting Party to the other Party.

15.4 Assignment. Neither this Agreement nor any of the rights or obligations hereunder may be assigned by OSL without the prior written consent of OIL. Provided however, such assignment may be made to a Permitted Transferee, without OIL's consent. OIL may, at any time and at its full discretion, assign this Agreement or any of its rights or obligations hereunder, as well as sell, transfer, pledge or otherwise assign its rights (in whole or in part) in the Leased Property or any part thereof, without obtaining OSL's consent, provided however, OSL's rights pursuant to this Agreement will not be impaired. OIL will notify OSL of such act within reasonable time after its being carried out. OSL

will then comply with all its obligations pursuant to this Agreement to any such transferee of OIL. Any assignment maybe subject to the prior consent of the ILA, which the assigning party shall be responsible to obtain.

In any event, the transferee (whether of OSL or of OIL), will sign this Agreement with the remaining Party, or will otherwise affirm its assumption of the transferor's obligations and undertakings under this Agreement in a manner satisfactory to the remaining Party.

Subject to the foregoing, this Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assignees with no other person having any right, benefit or obligation hereunder.

- 15.5 Notices. Unless otherwise provided herein, any notice, request, instruction or other document to be given hereunder by either party to the other shall be in writing and delivered by telecopy or other facsimile (with acknowledged

-13-

receipt), delivered personally or mailed by certified or registered mail, postage prepaid (and by airmail if sent internationally), return receipt requested or by internationally recognized courier (such as Federal Express or DHL) (such mailed or couriered notice to be effective on the date such receipt is acknowledged or refused), as follows:

If to OSL, addressed to:
Ormat Systems Ltd.
Yavne Industrial Area
Attn.: President
Fax: 08-9439901

If to OIL, addressed to:
Ormat Industries Ltd.
Yavne Industrial Area
Attn: CEO
Fax: 08-9439901

or to such other place and with such other copies as either party may designate as to itself by written notice to the other.

- 15.6 Choice of Law; Venue. This Agreement shall be construed, interpreted and the rights of the parties determined in accordance with the laws of the State of Israel. Each of the parties to this Agreement consents to the exclusive jurisdiction and venue of the competent courts of Tel-Aviv-Jaffa over all matters arising in connection with this Agreement.

- 15.7 Entire Agreement; Amendments and Waivers. This Agreement, together with all exhibits and schedules hereto, constitutes the entire agreement between the parties hereto pertaining to the subject matter hereof, and supersedes all prior agreements, understandings, negotiations and discussions, whether oral or written, between the parties hereto with respect to such subject matter. No supplement, modification or waiver of this Agreement shall be binding unless executed in writing by the party to be bound thereby. No waiver of any

of the provisions of this Agreement shall be deemed or shall constitute a waiver of any other provision hereof (whether or not similar), nor shall such waiver constitute a continuing waiver unless otherwise expressly provided.

-14-

15.8 Multiple Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

15.9 Invalidity. In the event that any one or more of the provisions contained in this Agreement or in any other instrument referred to herein shall, for any reason, be held to be invalid, illegal or unenforceable in any respect, then to the maximum extent permitted by law, such provision or provisions shall be judicially reformed consistent with the parties' intentions so as to be valid, legal and enforceable to the maximum extent possible and such invalidity, illegality or unenforceability shall not affect any other provision of this Agreement or any other such instrument.

15.10 Titles. The titles, captions or headings of the Sections herein are inserted for convenience of reference only and are not intended to be a part of or to affect the meaning or interpretation of this Agreement.

[Signature Page Follows]

-15-

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed on their respective behalf, by their respective duly authorized officers, in multiple originals, all as of the day and year first above written.

This ENGINEERING, PROCUREMENT AND CONSTRUCTION CONTRACT is made and entered into this [] th day of August, 2002 by and between Tuaropaki Power Company Limited, a New Zealand corporation wholly owned by the Tuaropaki Trust with offices at Taupo, New Zealand ("Owner") and Ormat Pacific Inc., a Delaware corporation acting through its New Zealand branch with offices at Taupo, New Zealand ("Contractor").

RECITALS

1. Owner owns and operates a geothermal power plant at Mokai, New Zealand (Mokai I) using a part of the total geothermal fluid available underlying the land at Mokai.

2. Owner holds or will hold rights to use land at Mokai, New Zealand, administered by the Tuaropaki Trust, and to use all of the geothermal resource underlying the land, resource consents and all other associated rights, consents, commitments and facilities necessary for the construction, testing, generation and maintenance of an additional 39 MW net geothermal power plant.

3. Owner desires Contractor to construct or arrange for the design, engineering, procurement, construction, fabrication, installation, commissioning, start-up and testing of a new 39 MW net geothermal power plant at Owner's site located in Mokai, New Zealand.

4. Ormat Industries Ltd. has agreed to design, manufacture and supply certain equipment necessary for the construction of the geothermal power plant under the terms and conditions of the Supply Contract (as defined below) with Owner entered into contemporaneously with this agreement .

5. Contractor is willing to supply certain other equipment and perform the services set forth herein, upon the terms and conditions hereinafter set

forth.

NOW, THEREFORE, in consideration of the foregoing and the mutual covenants hereinafter contained, the parties hereby agree as follows:

1

ARTICLE 1 - DEFINITIONS

Unless the context otherwise requires, capitalized terms when used herein shall have the meanings set forth below:

"ASSETS"

The rights to access to and use of land at Mokai, New Zealand administered by the Tuaropaki Trust, and to use of the geothermal resource underlying the land and to reinject brine and condensate, resource consents and all other rights, consents, commitments and facilities necessary for the engineering, construction, testing, generation and maintenance of the Project belonging to Owner and/or the Tuaropaki Trust.

"BBR"

BBR is defined in Section 6.4.

"CHANGE IN LAW"

The enactment, adoption, promulgation, modification or repeal after the date of this EPC Contract of any Law (except regarding taxation) that establishes requirements adversely affecting Contractor's costs or schedule for performing the Work.

"CHANGE IN THE WORK"

A variation, requested and agreed in accordance with Article 8, in the design, quality or quantity of the Work specified or required in Exhibit A and including without limitation:

- (a) additions, omissions, substitutions, alterations in design and changes in quality, form, character, kind, position, dimension, level or line; and
- (b) changes to any part of the Project Site or access thereto.

"DESIGN CONDITIONS"

The design operating conditions for the Project as set forth in Article 1.5 of Exhibit A.

2

"DESIGN INFORMATION"

The specifications, drawings, performance specifications and construction field documents for the Project.

"DISPUTE"

Any dispute or difference of any kind whatsoever which shall arise between Owner and Contractor in connection with or arising out of this EPC Contract (including without limitation any disputes or differences concerning the terms of the Supply Contract) or the carrying out of the Work, including any dispute or difference as to any instruction, order, direction, certificate or valuation by the Owner's Representative, whether during the progress of the Work

or after its completion and whether before or after the termination, abandonment or breach of this EPC Contract.

"DRAWINGS AND SPECIFICATIONS"

Drawings, technical specifications, system descriptions and start-up and testing procedures prepared and provided by the Contractor, as described in Exhibits C and D.

"ELECTRICAL INTERCONNECTION FACILITIES"

All means required and apparatus installed to interconnect and deliver power from the Project to the Electric Power Distributor as described in Exhibit C, including, but not limited to, connection, switching, metering, communications, and protection equipment required to protect (1) the Electric Power Distributor's system and its customers from faults occurring at the Project and (2) the Project from faults occurring on the Electric Power Distributor's system or on the systems of others to which the Electric Power Distributor's system is directly or indirectly connected, including any necessary transmission line(s), and step-up transformer(s).

"ELECTRIC POWER DISTRIBUTOR"

The entities selected and designated by Owner to transport and/or receive the electric power generated by the Project.

3

"EPC CONTRACT"

This Engineering, Procurement and Construction Contract together with the Exhibits attached hereto, which shall, taken as a whole, define the rights and obligations of the parties hereunder.

"EPC CONTRACT PRICE"

The total firm fixed lump sum price, , payable to Contractor by Owner as set forth in Section 6.1 hereof and as adjusted pursuant to the provisions of this EPC Contract.

"EQUIPMENT"

The equipment which are to be provided by Supplier to Owner pursuant to the Supply Contract.

"FINAL ACCEPTANCE"

Satisfaction by Contractor or waiver by Owner of the conditions set forth in Section 7.2.

"FINAL ACCEPTANCE TESTS"

The Final Acceptance Performance Test and the Reliability Run of the Project as set forth in Exhibit D hereof.

"FORCE MAJEURE"

Force Majeure is defined in Article 22.

"GEOTHERMAL FLUID"

The geothermal steam and brine to be supplied at the Geothermal Fluid Interface Point in accordance with the interface data set forth in Article 1.4 of Exhibit A.

"GEOTHERMAL FLUID INTERFACE POINT"

The Geothermal Fluid interface point defined in Article 1.4 of Exhibit A.

4

"GEOTHERMAL FLUID SPECIFICATIONS"

The specifications for the Geothermal Fluid set forth in Article 1.5 and 1.6.1 and 1.6.2 of Exhibit A.

"GEOTHERMAL WELL CLEANING PERIOD"

The period after completion of Owner's vertical discharges of the Geothermal Fluid production wells for the Project that (a) starts upon the date that the Geothermal Fluid is run through the Project geothermal fluid gathering system, bypassing the power plant, for the initial cleaning of sand, rocks and other debris from the Geothermal Fluid and (b) ends upon the earlier of (i) the declaration of Contractor that the Geothermal Fluid is sufficiently clear of such sand, rock and debris to permit testing and operation of the Project and (ii) the declaration of the Owner's Representative that the Geothermal Fluid is sufficiently clear of such sand, rocks and debris to permit testing and operation of the Project; provided, that if Contractor disagrees with such declaration, the accuracy of such declaration is confirmed by the results of the impact of the steam separated from such Geothermal Fluid on the target plate installed by Contractor in the steam line of the Project before the inlet to the steam turbine after allowing two (2) days for flushing the inlet piping for the steam turbine.

"GUARANTEED CAPACITY"

The level of net electrical generating capacity for the Project guaranteed by Contractor, equal to 39 MW as corrected to the Design Conditions using the correction curves and formulas set forth in Exhibit D, as measured at the high voltage interface point defined in Article 1.4, number 5 of Exhibit A.

"KW"

Kilowatts.

5

"LAW"

Statutes, regulations, codes, consents, ordinances, permits, rules, orders, judicial and administrative decisions and interpretations to the extent they have jurisdiction on performance of the Work under this EPC Contract.

"LENDER"

Any entity or entities providing construction or permanent debt financing for the Project that is identified by Owner in a written notice to Contractor in accordance with this EPC Contract.

"LIBID"

LIBID is defined in Section 6.4.

"MILESTONE PAYMENT SCHEDULE"

The milestone payment schedule for payment of the EPC Contract Price, as set forth in Exhibit B hereto.

"MOKAI I"

The existing Mokai geothermal power plant supplied and constructed under the Amended and Restated Supply and EPC Contracts dated December 15 1997.

"MW"

Megawatts.

"NOTICE TO PROCEED"

Owner's written notice to Contractor directing Contractor to commence and complete all Work hereunder, as set forth in Article 5.

6

"OWNER'S REPRESENTATIVE"

The person designated by Owner to act as its representative in all respects to this EPC Contract under Section 4.1(k) and having the powers contained in Section 4.2.

"PROJECT"

The power production plant and related equipment to be designed, engineered, and constructed by Contractor and its Subcontractors for Owner at Mokai, New Zealand as set forth herein.

"PROJECT SCHEDULE"

The completion schedule for the Project as set forth in Exhibit H, as it may be amended from time to time as set forth in Section 3.1(k).

"PROJECT SITE"

The site on which the Project will be located, which is on land held and administered by the Tuaropaki Trust in Mokai, New Zealand for its beneficial owners, and as is more specifically described in Article 1.2 of Exhibit A.

"SCHEDULED FINAL ACCEPTANCE DATE"

The date by which the Project is required to achieve Final Acceptance, which shall be the later of (a) ninety seven (97) days from Substantial Completion or deemed Substantial Completion, according to the case, and (b) such later date as may be established in accordance with Section 5.3 and 5.4.

"SCHEDULED SUBSTANTIAL COMPLETION DATE"

The later of (a) nineteen (19) months from the Notice to Proceed, and (b) such later date as may be established in accordance with Section 5.4.

7

"SUBCONTRACTOR"

Any party (other than Contractor's employees) engaged by Contractor to perform any of the services or supply any item of goods or material pursuant to this EPC Contract.

"SUBSTANTIAL COMPLETION"

Satisfaction by Contractor or waiver by Owner of all of the conditions set forth in Section 7.1.

"SUPPLIER"

Ormat Industries Ltd., an Israeli corporation.

"SUPPLY CONTRACT"

The Supply Contract of even date herewith, together with the Exhibits attached thereto, by and between Supplier and Owner, as the same may be amended from time to time, under which, among other things, Supplier is providing the Equipment and services to Owner for use in connection with the development, construction, start-up, testing, commissioning and completion of the Project.

"WORK"

Material, goods and services which are the responsibility of Contractor under this EPC Contract.

ARTICLE 2 - EPC CONTRACT DOCUMENTS

2.1 DOCUMENTS INCLUDED

This EPC Contract shall include the documents listed below, which are hereby incorporated herein by reference.

Exhibit A	Scope of Work
Exhibit B	Milestone Payment Schedule
Exhibit C	Drawings and Specifications
8	
Exhibit D	Tests
Exhibit E	Ormat Industries Ltd. Guarantee
Exhibit F	Tuaropaki Trust Guarantee
Exhibit G	Warranty Procedures
Exhibit H	Project Schedule
Exhibit I	Approved Major Subcontractor List
Exhibit J1 & J2	Form of Performance Bonds
Exhibit K	Form of Continuity Guarantee for Subcontractors

2.2 CONFLICTS

In the event of any conflict between the text of this EPC Contract and any of the Exhibits listed in Section 2.1, the text hereof shall govern.

ARTICLE 3 - CONTRACTOR RESPONSIBILITIES

3.1 GENERAL RESPONSIBILITIES

In order for Contractor to complete the Work, except as provided elsewhere in this EPC Contract, Contractor shall:

(a) Perform, or cause to be performed the Work, including labour, materials, tools, supplies, equipment, transportation, engineering, insurance, technical services and other services necessary and required to satisfactorily design (including the specification of the Equipment and all other goods, materials and plant to be incorporated in the Project), engineer, procure, construct, install, commission, start up and test the Project, all in accordance with the requirements of Exhibit A.

(b) Provide supervisory personnel necessary for commissioning, start-up and performance testing of the Project as described herein.

9

(c) Prosecute the Work continuously and diligently in accordance with the Project Schedule, using qualified and competent personnel, and complete the Work in accordance with good engineering practice and prudent electrical and mechanical engineering and in accordance with the provisions of this EPC Contract.

(d) Monitor on behalf of Owner as authorized in the Supply Contract the manufacture and delivery of the Equipment by Supplier, arrange for complete handling of all goods and material supplied under this EPC Contract and for the Equipment after delivery under the Supply Contract including, but not limited to inspection, expediting, shipping, unloading, receiving, customs clearance and customs claims. In connection herewith, Owner hereby grants to Contractor the authority to administer the Supply Contract and to enforce Supplier's obligations there under, and Contractor shall administer the Supply Contract in the same way as if the Supplier was a Subcontractor.

(e) Commission, start-up and performance test the Project in accordance with the acceptance and performance tests herein and in Exhibit D hereto. Any after-tax revenue received from the sale of electricity shall be divided equally between Owner and Contractor (and shall be paid by Owner to Contractor within 10 (ten) days of Owner's receipt of such revenue) until the earlier of the Scheduled Final Acceptance Date and Final Acceptance, when all revenues shall be for the account of Owner.

(f) Designate a project manager who will have full responsibility to oversee prosecution of the Work and to act as a single point of contact with Owner in all matters on behalf of Contractor. Owner may require replacement of Contractor's project manager on reasonable grounds which shall be described to Contractor.

(g) Comply in all material respects with the standards described in Exhibits A or C and with all applicable Laws, relating to the Project and the performance of the Work.

(h) Procure the building consent for the Project and comply in all material respects with such building consent and such other applicable consents and

Owner in accordance with Section 4.1(c).

(i) Provide temporary construction materials, equipment and supplies necessary for operation and maintenance of the Project until Final Acceptance and replace any spare parts used during the construction, start-up, testing and operation and maintenance of the Project until achievement of Final Acceptance.

(j) Pay for construction utilities (electricity only) required to achieve Substantial Completion except for initial connection and disconnection costs.

(k) Amend and update the Project Schedule from time to time, as Contractor deems reasonably necessary or when requested by the Owner's Representative after the occurrence of a material deviation from the Project Schedule.

(l) Clear the Project Site of temporary structures, surplus materials and tools upon completion of field work.

(m) Train up to 16 (sixteen) operating and maintenance personnel, of whom up to 3 (three) are senior personnel, designated by Owner at the Project Site during the commissioning and start-up phase of the Project construction. Such training shall be in conjunction with the normal commissioning and start-up activities employed by Contractor. Each person designated for training by Owner shall be a qualified technician and said trainees shall not be deemed employees or Subcontractors of Contractor.

(n) Use effective quality assurance programs in performing the Work.

(o) Prepare detailed monthly progress reports on progress of the Work for the period ended on the last day of the previous month to Owner as reasonably required by Lender or Owner.

(p) Provide special tools, and operating and commissioning supplies which are required for commissioning, start-up, and performance testing of the Project until Final Acceptance.

11

(q) Provide at least 2 (two) copies of job books, operation and maintenance manuals (which shall incorporate manuals of the Equipment), operating data and detailed as-built Drawings and Specifications to Owner prior to Final Acceptance.

(r) Exercise, in the design and specification of the Work and the specification of the Equipment, the skill and care to be expected of a qualified and competent turnkey contractor experienced in work of similar nature and scope as the Work.

(s) Design, install, construct, commission, test and complete the Work using proven up to date good practices which are consistent with the provisions of the Supply Contract and this EPC Contract.

3.2 EMERGENCIES

In emergencies affecting the safety or protection of persons or the Work, Contractor, without special instruction or authorization from Owner, may take all reasonable actions to prevent such threatened damage, injury, or loss. This provision is not intended to limit Contractor's rights under any other provisions hereof, including, without limitation, Article 8 hereof.

3.3 HEALTH AND SAFETY IN EMPLOYMENT ACT ("HSEA")

3.3.1 Contractor warrants to Owner that during Contractor's activity on the Project Site, up to and including Final Acceptance, Contractor shall take all practical steps to ensure that no act or omission:

(a) in contravention of the HSEA causes a significant hazard, harm or serious harm to any employee of Contractor or any person at or in the immediate vicinity of the Project Site; or

(b) is a breach of any duty or obligation of Contractor under the HSEA; or

12

(c) does or is likely to give rise to the issue of an improvement or prohibition notice, enforcement proceedings or a prosecution under the HSEA against Owner, Contractor, or the Subcontractor.

The words and phrases used in this clause shall have the same meaning as is ascribed to them in the HSEA.

3.3.2 Contractor undertakes that before a Subcontractor commences work on the Project Site Contractor shall obtain similar warranties as those stated in Subsection 3.3.1 from that Subcontractor in relation to the subcontracted Work.

3.3.3 Contractor shall indemnify and keep indemnified Owner from all costs, damages, fines, penalties and expense incurred or suffered by Owner in respect of any breach of the HSEA and/or conviction or proceedings instigated against Owner pursuant to the HSEA directly or indirectly related to a breach by Contractor of any of the warranties set out in Subsection 3.3.1.

3.3.4 If Contractor becomes aware that it is or may be in breach, or is likely to be in breach of any of the warranties in Subsection 3.3.1 or any Subcontractor is or may be in breach of or is likely to breach the matters set out in the agreement between the Contractor and Subcontractors pursuant to Subsection 3.3.2, then Contractor shall immediately notify Owner of such a breach or anticipated breach and, in relation to any breach or anticipated breach in relation to any of the Work or subcontracted Work, Contractor shall consult with the Owner's Representative to avoid, remedy or mitigate such breach or anticipated breach.

3.3.5 Contractor, pursuant to the warranties given in Subsection 3.3.1, shall have regard to the contents of the safety programme agreed between Owner and Contractor in accordance with Exhibit A, Article 2.3.5.6. A copy of the agreed safety programme shall be kept at the office of Contractor.

3.4 PROJECT REPRESENTATION

Contractor has reviewed the provisions of the Supply Contract and undertakes to Owner that the combination of the Work and the Equipment are adequate so that the

13

Project, when completed in accordance with this EPC Contract, will meet the requirements of Owner set forth in Exhibit A.

ARTICLE 4 - OWNER RESPONSIBILITIES

4.1 GENERAL RESPONSIBILITIES

Owner shall, at Owner's cost and expense and not as part of the EPC Contract Price payable to Contractor:

(a) Be responsible for making any and all arrangements for any sale and purchase of electricity to be generated by the Project, and for ensuring that the Electric Power Distributor accepts the connection of the Project and the delivery of electricity generated by the Project at the high voltage interface point specified in Article 1.4, number 5 of Exhibit A in good time to permit commissioning, start-up, testing and operation of the Project in accordance with the Project Schedule.

(b) Arrange for and enter into all necessary agreements for completion of financing for the entire Project with Lender(s) on terms acceptable in all respects to Owner and, in addition, on terms consistent with this EPC Contract.

(c) Arrange for and obtain all consents and permits required (including without limitation all environmental, air, water, zoning, use, construction for any part of the Project, but specifically excluding the building consent) and provide the other items described in Article 3 of Exhibit A, each in good time as required by Contractor to permit Contractor to proceed with the Work in accordance with the Project Schedule, on terms acceptable to Owner, and in accordance with the terms of this EPC Contract, and to pay for all fees associated therewith. Without derogating from the aforesaid, Contractor, upon Owner's specific request, will provide all necessary technical information to Owner regarding the Project to aid Owner in its efforts to obtain such consents and permits.

(d) Provide the Project Site, including space for all Project construction facilities, lay-down, storage and disposal areas, roads and other means of access to Contractor in good time to permit Contractor to proceed with the Work in accordance with the Project Schedule, after and in accordance with Contractor notification to Owner

14

of its reasonable requirements regarding amount, weight and dimensions of equipment to be transported and size and layout of the lay down areas.

(e) Obtain all consents, way leaves and approvals in connection with the regulations and by-laws of any local or other authority which are applicable to the Work on the Project Site in good time to permit Contractor to proceed with the Work in accordance with the Project Schedule, on terms acceptable to Owner, and in accordance with the terms of this EPC Contract.

(f) Obtain and provide all other lands, easements, and rights of way necessary for the construction of the Project and the Electrical Interconnection Facilities in good time to permit Contractor to proceed with the Work in accordance with the Project Schedule, on terms acceptable to Owner, and in accordance with the terms of this EPC Contract.

(g) Obtain and provide the supply of Geothermal Fluid in accordance with the Geothermal Fluid Specifications to the Geothermal Fluid Interface Point in good time to permit commissioning, start-up, testing and operation of the Project in accordance with the Project Schedule.

(h) Provide reinjection wells that are sufficient to accept reinjection of the brine and the condensate at the flow rates defined in Article 1.4 of Exhibit A or provide an alternative solution in accordance with the Law and the Project consents and permits, all of which will enable performance testing of the Project in accordance with the Project Schedule and operation and maintenance of the Project. .

(i) Provide the Equipment as provided herein, including without limitation performing the obligations of Owner under the Supply Contract and providing the Equipment furnished by Supplier there under to Contractor immediately upon receipt in accordance with Section 3.1(d). Nothing in this EPC Contract shall make or imply that Owner is in any way responsible for the specification, design or performance of the Equipment.

(j) Obtain and provide electricity, water and communications required at the Project Site as specified in Article 3.3 of Exhibit A on terms acceptable to Owner,

15

and in accordance with the terms of this EPC Contract and in good time to permit construction, commissioning, start-up, testing and operation of the Project in accordance with the Project Schedule and to obtain and provide electricity, water, communications and any other utilities or facilities required at the Project Site in good time to permit Contractor to perform all of its warranty obligations.

(k) Designate an Owner's Representative who shall act as a single point of contact with Contractor in all matters on behalf of Owner. Contractor may require replacement of Owner's Representative on reasonable grounds which shall be described to Owner.

(l) At least 4 (four) months prior to commencement of Contractor's commissioning activities, provide up to 3 (three) senior operating and maintenance personnel and at least 2 (two) months prior to commencement of Contractor's commissioning activities, provide up to 13 (thirteen) regular operating and maintenance personnel, all for training by Contractor as provided pursuant to Section 3.1(m), and for commissioning, start-up, performance testing, and operation through Final Acceptance. Owner and Owner's operation and maintenance personnel shall cooperate with Contractor in allowing Contractor to conduct all testing activities, including the Final Acceptance Performance Test, to complete the Work and to perform all of Contractor's warranty obligations in a timely and cost efficient manner.

(m) Pay the fees in connection with obtaining the building consent in excess of the sum of \$5000 N.Z. (Five Thousand New Zealand Dollars), and for all New Zealand sales, use, excise, value added, goods and services tax, customs and similar taxes payable with respect to the Project and payment of the EPC Contract Price, and pay all real property taxes or other taxes assessed against the Work or the Project Site, provided that Owner's obligation to pay such taxes shall not extend to any personal income or withholding tax assessed against Contractor in respect of income received for performing the Work under this EPC Contract.

(n) Promptly (but not later than 15 days from delivery) approve, or provide written comments to the extent necessary to, all Design Information submitted to Owner for approval or comment pursuant to Article 9 hereto.

16

(o) Owner shall be the importer of record and consignee for all goods and materials supplied under this EPC Contract and the Equipment and shall be responsible for all New Zealand taxes, duties and levies associated therewith. Owner hereby grants to Contractor the right to act as Owner's agent, including executing documentation on Owner's behalf, for purposes of

accomplishing the importation of all goods and materials for the Project into New Zealand under this EPC Contract and the Supply Contract, including the Equipment, and the processing of such goods and materials through customs.

(p) Owner and/or the Tuaropaki Trust shall retain or obtain, according to the case, all the rights to Assets for the duration of this EPC Contract.

Contractor has been chosen by Owner and by the Tuaropaki Trust as their contractor for the Project and for the development of the second, 40 MW of geothermal resource on or utilizing the Assets. Any transfer, mortgage, assignment, sale or other disposition of Assets or rights to Assets to a third party, any further undertakings on behalf of Owner and/or the Tuaropaki Trust regarding the Project, and any introduction of an equity participant, joint venture partner or other participant in any manner in the Project by Owner and/or the Tuaropaki Trust shall be subject to Contractor's rights to develop the second, 40 MW of geothermal resource on or utilizing the Assets as aforesaid and to all of Contractor's rights under this EPC Contract, and Owner and/or the Tuaropaki Trust shall provide Contractor with said new participant's acknowledgment and consent to said conditions.

4.2 RESPONSIBILITIES OF OWNER'S REPRESENTATIVE

The Owner's Representative shall be authorized to carry out the specific duties specified in this EPC Contract. In carrying out such duties, and in exercising any other authority he/she may have under this EPC Contract, the Owner's Representative shall be entitled to seek the advice and assistance of Owner, Lender and their respective consultants employed from time to time.

Wherever under this EPC Contract the Owner's Representative is required to exercise his/her discretion by:

17

- (a) giving a decision, opinion or consent; or
- (b) expressing satisfaction or disapproval; or
- (c) determining value; or
- (d) otherwise taking action which may affect the rights and obligations of Owner or Contractor;

the Owner's Representative shall consult with Contractor in an endeavour to reach an agreement before exercising such discretion. If agreement is not achieved, the Owner's Representative shall exercise such discretion fairly, reasonably and in accordance with the terms of this EPC Contract having regard to all the circumstances.

If Contractor has a Dispute with the determination or discretion made by the Owner's Representative, such Dispute shall be resolved as provided in Article 16. Until any contrary determination is made pursuant to Article 16, Contractor shall proceed with the decisions and instructions given by the Owner's Representative in accordance with his/her range of authority and with this EPC Contract.

Owner shall be entitled to replace the Owner's Representative from time to time upon giving prior written notice to Contractor.

ARTICLE 5 - NOTICE TO PROCEED

5.1 PROVISION OF NOTICE TO PROCEED

Immediately upon fulfilling all its obligations under Sections 4.1(a) and (b) and the Tuaropaki Trust providing the guarantee pursuant to Section

13.2, Owner shall provide Contractor a Notice to Proceed directing Contractor to commence and complete the Work under this EPC Contract and Owner shall provide Supplier a Notice to Proceed directing Supplier to commence and complete the Work under the Supply Contract.

5.2 CONTRACTOR COMMENCEMENT OF ACTIVITIES

Contractor shall commence performance of the Work for the Project upon Contractor's and Supplier's receipt of the Notices to Proceed issued in accordance with

18

Section 5.1 above and the Supply Contract. Subject to the terms and conditions of this EPC Contract, Contractor shall (i) complete the Work necessary to comply with the requirements of Exhibit A, Scope of Work, and (ii) procure that the Project satisfactorily meets the requirements for Final Acceptance by the Scheduled Final Acceptance Date.

5.3 DELAY IN PROVISION OF NOTICE TO PROCEED

(a) If the Notices to Proceed are not issued under Section 5.1 above by December 31, 2002, Contractor shall have the right to extend the Project Schedule, Scheduled Substantial Completion Date, Scheduled Final Acceptance Date and related dates by up to 3 (three) months.

(b) If the Notices to Proceed are not issued under Section 5.1 above by December 31, 2004, and the conditions in Sections 4.1(a) and (b) have not been fulfilled despite Owner's best endeavours, either of the parties shall have the right to terminate, or by mutual agreement the parties may agree to extend, or amend, this EPC Contract.

5.4 EXTENSION OF TIME

5.4.1 Contractor shall be entitled to an extension to the Scheduled Substantial Completion Date and the Scheduled Final Acceptance Date to the extent that Contractor is or will be delayed either before or after such dates by any of the following causes:

- (a) a Change in the Work (other than a change in the Work requested by Contractor under Section 8.6);
- (b) a Change in Law;
- (c) a Force Majeure event;
- (d) physical conditions or circumstances at the Project Site, which are materially adverse and would not be reasonably foreseeable by an experienced contractor;

19

- (e) delay to any tests required for Substantial Completion or Final Acceptance as a result of:
 - (i) the failure of Owner to provide the Geothermal Fluid that meets the Geothermal Fluid Specifications or to accept the Geothermal Fluid after it has been run through the Project for reinjection or other disposal; or

- (ii) the failure by a Electric Power Distributor (arising other than as a result of a breach or failure by Contractor or Supplier to comply with their respective obligations under this EPC Contract and Supply Contract, as appropriate) to transport and/or take the electrical power generated by the Project as a result of carrying out such tests or Project commissioning;
- (f) any delay, impediment or prevention by Owner;
- (g) the Geothermal Well Cleaning Period (it is agreed that there will be a day-for-day extension for such period);
- (h) any other entitlement under a provision of this EPC Contract; or
- (i) a delay to Supplier for which Supplier is entitled to an extension of its Delivery Schedule pursuant to Section 5.4 of the Supply Contract.

5.4.2 If Contractor believes that it is entitled to an extension of time under this Section 5.4, Contractor shall give notice to the Owner's Representative of the same as soon as reasonably practicable and in any event within 28 (twenty-eight) days of the day when Contractor learns of the delay. Contractor shall keep such contemporary records as may be reasonably necessary and feasible to substantiate such delay, either at the Project Site or at another location reasonably acceptable to the Owner's Representative and shall provide such information to the Owner's Representative as he or she shall reasonably require. Contractor shall permit the Owner's Representative to

20

inspect such records during Contractor's normal business hours, and shall (if requested) provide the Owner's Representative with a copy of such records.

5.4.3 Within 28 (twenty-eight) days of such notice (or such other period as may be agreed by the Owner's Representative), Contractor shall submit supporting details of the delay. Except that, if Contractor cannot submit all relevant details within such period because the cause of delay is continuing or such details are not yet reasonably available, Contractor shall submit interim details at intervals of not more than 28 (twenty-eight) days (from the first day of such delay) and final supporting details of its application within 21 (twenty-one) days of the last day of delay. Contractor's failure to meet any of the time periods specified in this Section 5.4 shall not affect Contractor's right to the extension of time unless such failure has materially prejudiced the ability of Owner to rectify the causes of a delay arising from a cause identified in Section 5.4.1(e) or (f), in which case the extension of time granted to Contractor shall not include any periods of delay that could reasonably have been avoided if not for such failure to give notice.

5.4.4 The Owner's Representative shall proceed in accordance with Section 4.2 to agree upon or determine such extension of time as may be due. The Owner's Representative shall promptly notify Contractor accordingly. When determining each extension of time, the Owner's Representative shall review his or her previous determinations and may revise, but shall not decrease, the total extension of time. If Contractor has a Dispute with the determination or discretion made by the Owner's Representative, such Dispute shall be resolved as provided in Article 16.

6.1 EPC CONTRACT PRICE

For the performance of the Work, Owner shall pay Contractor, in the manner and at the times hereinafter specified, the EPC Contract Price in the amount of \$ 3,462,000 US (Three Million Four Hundred Sixty two Thousands United States Dollars) and \$ 14,460,000 NZ (Fourteen Million Four Hundred Sixty Thousands New Zealand Dollars) which amount shall be subject to adjustment only in accordance with the terms of this EPC Contract. The EPC Contract Price is net of all New Zealand taxes, duties and levies.

21

6.2 INDEXING OF EPC CONTRACT PRICE

If the Notice to Proceed occurs after January 15, 2003 , each milestone payment amount set forth in the Payment Schedule (will be adjusted in accordance with changes in the price index for the applicable currency from January 15, 2003 to that for the date of the Notice to Proceed, as per the Price Index of United States Dollars for the United States Dollars portion of the EPC Contract Price and New Zealand Dollars for the New Zealand Dollars portion of the EPC Contract Price from the International Financial Statistics (line 63) as published by the International Monetary Fund.

6.3 PAYMENT

6.3.1 Exhibit B hereto sets forth the Milestone Payment Schedule, which is intended to cause payments to approximate the value of Work performed by Contractor. The Payment Schedule shall be used as the basis for preparation of invoices, certificates and payments. Each payment shall be allocated pro rata between the United States Dollar and the New Zealand Dollar portions of the EPC Contract Price (and paid in such currency).

6.3.2 Upon receipt of the Notice to Proceed, Contractor may issue its first invoice for payment of the first milestone under the Milestone Payment Schedule. Thereafter on or before the tenth day of each month, Contractor shall furnish Owner's Representative a detailed progress invoice for payment based on milestones achieved , during the period ending on the last day of the previous month accompanied by the documents described under the Payment Schedule for which payment is demanded (such invoice to include Contractor's New Zealand registration number for tax purposes).

6.3.3 Upon Final Acceptance, Contractor shall submit an invoice to Owner's Representative, summarizing and reconciling all previous invoices and payments in the amount of the EPC Contract Price less payments to date. Owner shall pay the amount of the EPC Contract Price outstanding in full within 10 (ten) business days of receipt of such invoice or 30 (thirty) days of Final Acceptance, whichever occurs later, subject to Subsections 6.3.4 and 6.3.5 below.

22

6.3.4 Owner's Representative shall verify that the progress invoice, the final invoice submitted under Section 6.3.3 and the documents submitted for payment are in accordance with the documentation required under the Payment Schedule, and shall, within 7 (seven) days of their receipt, either approve said invoice or give written notice within such period of errors in said documentation. If Owner's Representative fails to approve the invoice for release of the progress payment or to provide the notice regarding errors in the documentation within such period, in the absence of the invoice and the documents being patently false or inaccurate, the invoice and the accompanying documentation shall be deemed conclusive evidence sufficient for the release of such progress payment. In the case Owner's Representative provides written notice of errors in said documentation within the period described herein, and

the contents of Owner's Representative's notice is not in dispute, Contractor shall resubmit the corrected progress invoice and/or documentation, and the above described approval process shall reapply. The invoice as approved by the Owner's Representative shall comprise a tax invoice for the purposes of New Zealand goods and services tax.

6.3.5 Owner shall pay Contractor the first payment due under the payment Schedule within 14 (fourteen) of the receipt of Contractor invoice. With respect to all invoices thereafter, Owner shall pay Contractor on or before the first business day of the following month the amount owed as set forth in Contractor's invoice plus the goods and services tax, subject to Subsections 6.3.2 and 6.3.4 above, less any set-off for amounts which are due and owing to the Owner from the Contractor under this EPC Contract and which are not legitimately in dispute.

6.3.6 If any punch list items remain to be completed upon Final Acceptance, Owner's Representative may determine to withhold an amount from the final milestone payment equal to up to one and a half times the reasonably estimated value of all punch list items remaining on an agreed upon punch list, with each such withheld amount to be paid to Contractor upon satisfactory completion of each such punch list item.

6.3.7 If there is any Dispute about amounts invoiced and not paid, and the Dispute is not resolved within 14 (fourteen) days of notice of Contractor of such Dispute, Contractor shall have the right to suspend the Work in accordance with Section 20.4 hereunder until payment is received or resolution of the dispute, whichever occurs earlier.

23

6.4 INTEREST FOR LATE PAYMENTS

Amounts not paid by Owner when due in accordance with Section 6.3 shall bear a late payment charge from the date payment was due to the date of payment at a rate per annum equal to the following rates for the applicable currency published on the date due for payment, but not in excess of the maximum amount permitted by Law provided that no such interest shall be payable by Owner to the extent the delay in payment is caused as a result of Contractor's default:

- (a) for lateness in payments of United States Dollars -- 90 (ninety) day LIBID rate + 3% (three percent).

LIBID means the London Eurodollar Deposit rate displayed at or about 11:00 A.M. London Standard Time on the Reuter monitor Screen on page RMEY in London.

- (b) for lateness in payments of New Zealand Dollars -- 90 (ninety) day BBR rate + 4% (four percent).

BBR means the New Zealand 90 (ninety) Day Bank Bill Rate displayed at or about 10:45 A.M. New Zealand time on page "BKBM" in Wellington, New Zealand.

6.5 INTEREST DURING CONSTRUCTION

In view of the fact that the parties have agreed upon the Payment Schedule, the EPC Contract Price will be reduced as described below to compensate Owner in whole or in part for the costs to Owner for interest during construction. Commencing after 15% (fifteen percent) of the EPC Contract Price is received by Contractor, there shall be at the time of payment a reduction from the United States Dollar portion and the New Zealand Dollar portion of each Payment Schedule payment made thereafter until, but not

including, the payment of the milestone payment due upon Substantial Completion, in the applicable amounts described below:

For the United States Dollar portion of the payment, the amount calculated under the following formula:

$$\text{US\$R} = \text{US\$P} \times \text{USI} \times \text{D}/365$$

Where:

US\\$R = the amount of the reduction in the United States Dollar portion of the applicable Payment Schedule payment

US\\$P = the United States Dollar portion of the applicable Payment Schedule payment

USI = the interest rate factor for the United States Dollar portion of the applicable Payment Schedule payment which shall be the 90 (ninety) day LIBID Rate (for the business day immediately preceding the payment date) + 1 1/5% (one and one-fifth percent) per annum

D = the number of days between the payment date and the then current Scheduled Substantial Completion Date

For the New Zealand Dollar portion of the payment, the amount calculated under the following formula:

$$\text{NZ\$R} = \text{NZ\$P} \times \text{NZI} \times \text{D}/365$$

Where:

NZ\\$R = the amount of the reduction in the New Zealand Dollar portion of the applicable Payment Schedule payment NZ\\$P = the New Zealand Dollar portion of the applicable Payment Schedule payment instalment)

NZI = the interest rate factor for the New Zealand Dollar portion of the applicable Payment Schedule payment which shall be the 90 (ninety) day

BBR Rate (for the business day immediately preceding the payment date) + 2% (two percent) per annum

D = the number of days between the payment date and the then current Scheduled Substantial Completion Date

ARTICLE 7 - SUBSTANTIAL COMPLETION AND FINAL ACCEPTANCE

7.1 SUBSTANTIAL COMPLETION

7.1.1 When:

- (a) the Project is substantially complete and Contractor

has complied with all provisions of this EPC Contract relating to the installation of all components and systems of the Project (except for completion of insulation, painting, final grading and any other portion of the Work not affecting the operability, safety, mechanical and/or electrical integrity of the Project);

- (b) the Project is mechanically and electrically sound;
- (c) the Project has completed initial operation, adjustment and testing for Substantial Completion, as defined in Exhibit D hereto; and
- (d) Contractor has submitted draft as-built drawings and operation and maintenance manuals to the Owner's Representative, such drafts to be in sufficient detail for Owner to operate and maintain the Project;

Contractor shall serve notice on the Owner's Representative to that effect.

7.1.2 The Owner's Representative shall inspect the Work within 14 (fourteen) days of receipt of Contractor's notice under Subsection 7.1.1, and shall either:

- (a) countersign Contractor's notice as described in Exhibit B hereto, at which stage, Substantial Completion shall have occurred as of the date of Contractor's notice; or

26

- (b) issue a notice to Contractor specifying the Work which is required to be done to comply with the requirements of Subsection 7.1.1 before Substantial Completion is achieved, in which case Contractor shall be entitled to receive the Owner's Representative's countersignature within 14 (fourteen) days of completion of the Work specified in such notice, and Substantial Completion shall occur on the date of completion of such Work.

7.1.3 Notwithstanding any other provision of this EPC Contract, if the Project has met the requirements set forth in Sections 7.1.1(a), (b) and (d), but due to the occurrence of any of the events described in Section 5.4.1(e) or (f) Contractor is unable to carry out the testing for Substantial Completion as defined in Exhibit D hereto within 60 (sixty) days after the Scheduled Substantial Completion Date (not taking into account any extensions of the Scheduled Substantial Completion Date by virtue of the occurrence of the events described in Section 5.4.1(e) or (f)), then Substantial Completion shall be deemed to have occurred, and Contractor shall be entitled to payments corresponding to Substantial Completion under the Milestone Payment Schedule.

7.2 FINAL ACCEPTANCE

When construction of the Project is completed as specified in this EPC Contract (including completion of the uncompleted Work described in Section 7.1.1(a), but excluding punch list items which shall be handled as provided in Section 6.3.6 and, in the case of clause (b) below, not including any construction that cannot reasonably be completed due to the occurrence of any of the events described in Section 5.4.1(e) or (f)), Final Acceptance of the Project shall occur upon the earlier of:

(a) the date upon which:

- (i) There is satisfactory completion of the Final Acceptance Tests under Exhibit D, or compliance with the associated remedy set forth in Section 12.2, according to the case; and

27

- (ii) Contractor has submitted final as-built drawings and operation and maintenance manuals to the Owner's Representative; and
- (iii) Contractor has paid all liquidated damages due pursuant to Sections 12.1 and 12.2; or

(b) a date which is 97 (ninety-seven) days after Substantial Completion or 37 (thirty-seven) days after deemed Substantial Completion under Section 7.1.3, as appropriate, if the Final Acceptance Tests have not been satisfactorily completed under this EPC Contract due to the occurrence of any of the events described in Section 5.4.1(e) or (f).

7.3 DELAYED TESTS

7.3.1 If the Final Acceptance Tests have not been performed and Final Acceptance has been deemed to have occurred pursuant to Section 7.2(b):

- (a) the Project shall be properly maintained by Owner at Owner's expense in accordance with:
 - (i) good industry practices; and
 - (ii) operation and maintenance manuals, instructions and specific recommendations provided by Contractor to Owner; and
- (b) once every 6 (six) weeks until the Final Acceptance Tests can be performed Contractor may conduct an inspection of the Project to ensure proper maintenance of the Project, at Owner's expense, is being carried out.

7.3.2 If geothermal fluid has been run through any part of the Project or the Project has otherwise been operated by Owner, for a cumulative period of more than 6 (six) weeks, Contractor may require that the parties jointly open and inspect the Project prior to the Final Acceptance Tests being carried out.

28

7.3.3 Subject to Subsection 7.3.5, if the events that prevented the commencement of the testing cease, the parties shall inspect the Project and:

- (a) if the Project is in good, clean and as-installed condition, Contractor will proceed within a reasonable period of time to conduct the Final Acceptance Tests not previously completed; or
- (b) if the Project is not in good, clean and as-installed

condition, prior to the conduct of the Final Acceptance Tests, Contractor will within a reasonable period of time clean and repair the Project (as Contractor reasonably deems appropriate) at Owner's expense and then conduct such tests; and

- (c) if the Project can not be cleaned and/or repaired to a standard to enable the Final Acceptance Tests to be carried out, the testing protocols and requirements shall be revised accordingly to adjust for the constraints which prevent such tests from being performed as originally defined and within a reasonable period of time Contractor shall conduct such revised tests.

7.3.4 Contractor shall be paid all costs and expenses arising directly from such prevention and delay, including without limitation those costs and expenses reasonably incurred for demobilization and remobilization and increased costs and expenses incurred for rescheduling of the testing.

7.3.5 Contractor's obligations under this Section 7.3 shall cease upon the end of the earlier of (a) 8 (eight) months after the date of the deemed Substantial Completion under Subsection 7.1.3 or (b) 7 (seven) months after the date of deemed Final Acceptance under Section 7.2(b), if Contractor has not been able to commence the testing for Final Acceptance before the end of the applicable period.

29

ARTICLE 8 - CHANGES IN THE WORK

8.1 CHANGE IN THE WORK

All Changes in the Work shall be recorded in a written instrument signed by the Owner's Representative and Contractor and shall not be implemented by Contractor without such written instrument.

8.2 EFFECT OF CHANGE IN THE WORK

No Change in the Work shall in any way vitiate or invalidate this EPC Contract.

8.3 REQUEST

In addition to the mandatory Changes in the Work as provided in Article 22, either party may request a Change in the Work by written request to the other party, provided however, that neither party may request or require changes or deletions which, in the aggregate, reduce the EPC Contract Price by more than 15% (fifteen percent).

8.4 ADJUSTMENTS

Should any Change in the Work cause an increase or decrease in the cost of or time required for performance of this EPC Contract or otherwise affect any provision of this EPC Contract (save as provided in Section 8.6), an adjustment will be made to the EPC Contract Price, including for added expenses for interest during construction, Project Schedule, Scheduled Substantial Completion Date, Scheduled Final Acceptance Date, performance warranties and any other provision of this EPC Contract which is thereby affected. Any increased cost in the EPC Contract Price due to such Change in the Work shall be payable subject to a progress payment schedule to be submitted by Contractor as part of the proposed written Change in the Work order.

8.5 CHANGE IN THE WORK ORDER

When Contractor is notified of or proposes a Change in the Work, Contractor shall promptly prepare and submit to Owner an estimate of the increase or decrease, if any, in the cost and time required to complete the Project, together with an explanation of the

30

basis therefore, and shall inform Owner whether, in Contractor's opinion, such Change in the Work should result in an adjustment to the Scheduled Substantial Completion Date, Scheduled Final Acceptance Date or any other provision of this EPC Contract. A written Change in the Work order signed by Owner and Contractor and describing the Change in the Work, its effect, if any, on the EPC Contract Price, Payment Schedule, Scheduled Substantial Completion Date, Scheduled Final Acceptance Date, Project Schedule, and any other provision of this EPC Contract which is affected must be entered into by the parties in order for the Change to be effective. If Contractor refuses to sign a written Change in the Work order which has been signed by Owner's Representative and Owner's Representative considers such refusal to be arbitrary or unreasonable, then the matter shall be referred for resolution according to the Dispute Resolution mechanism under Article 16 hereto.

8.6 CONTRACTOR CHANGES

Notwithstanding the foregoing, or anything expressed or implied in this EPC Contract, if Contractor requests a Change in the Work so as to make the Project meet the Design Conditions, or to otherwise comply with its obligations under this EPC Contract and such request does not involve any other cause or event that would otherwise entitle Contractor to such Change in the Work under this EPC Contract, such Change in the Work shall be at Contractor's own cost and expense and shall be subject to the consent of the Owner's Representative (which consent shall not be unreasonably withheld). If the Owner's Representative withholds its consent to such Change in the Work, and Contractor remains of the view that it is necessary for the completion of the Work in accordance with this EPC Contract, then the matter shall be referred for resolution under Article 16.

8.7 SOURCES OF PAYMENT

Notwithstanding the foregoing, Contractor shall not be required to implement any Change in the Work in excess of an aggregate value of NZ\$25,000 (Twenty Five Thousand New Zealand Dollars) for all Changes in the Work until adequate assurances have been provided to Contractor by Owner of sources of payment by means acceptable to Contractor to pay for any increased costs and any extensions in time.

31

8.8 EFFECT OF CHANGES ON WARRANTIES AND SAFETY

If Contractor reasonably believes that a proposed Change in the Work may negatively affect any express or implied warranty of the Work, Contractor shall serve Owner notice within 14 (fourteen) days of the receipt of such proposal of its belief and the believed effect. If Owner insists, despite Contractor's notice, to require the execution of such proposal, Contractor shall comply with Owner's requirement to execute the proposal, but Contractor may void negatively affected warranties or performance guarantees, but only to the extent related to or derived from Owner's proposal.

If Contractor believes that a proposed Change in the Work may negatively affect safety of the Work or persons in its vicinity, Contractor shall serve Owner notice within 14 (fourteen) days of such proposal of its

belief and the believed effect, and Contractor shall not be required by Owner to execute such proposal.

8.9 OTHER PROVISIONS UNAFFECTED

Except to the extent a Change in the Work specifically amends one or more provisions hereof, all provisions hereof shall apply to all Changes in the Work, and no Change in the Work shall be implied as a result of any other Change in the Work.

ARTICLE 9 - ACCESS AND REVIEW BY OWNER

9.1 RESPONSIBILITY FOR DESIGN

Contractor shall be responsible for the development of all technical data, design and other documentation required for the performance of the Work (including the specification of the Equipment).

9.2 INSPECTION OF WORK

Owner and Owner's Representative shall have the right to timely inspect any item of the Work to be provided hereunder.

32

9.3 ACCESS TO PROJECT SITE

Owner and Owner's Representative shall have access to the Project Site, at reasonable times and upon reasonable notice, shall have the right to be present during all on-site and off-site test procedures and shall have the right to receive, upon request, a single copy of test procedures, quality control reports, and test reports and data. Contractor shall notify Owner at least 21 (twenty-one) days prior to the testing of major equipment items and systems at the Project Site. While at the Project Site, Owner and its representatives shall comply with all of Contractor's safety rules and other job site rules and regulations.

9.4 DESIGN REVIEW

9.4.1 Design Information reasonably requested by the Owner's Representative shall be submitted to him in accordance with this Section 9.4.

9.4.2 Contractor shall submit to Owner's Representative 1 (one) hard and 1 (one) electronic copy of such material Design Information in sufficient time to enable Owner's Representative to review such Design Information in accordance with this Section 9.4. In the event that a re-submission of Design Information is required as provided in this Section 9.4, such re-submission shall be made as soon as reasonably practicable after Contractor's receipt of the relevant statement of objections.

9.4.3 Following receipt of a submission of Design Information in accordance with Subsection 9.4.2, the Owner's Representative shall within 15 (fifteen) days from receipt return one copy of the Design Information to Contractor together with either:

- (a) a notice stating that he/she has no objections to the Design Information as submitted (for the purposes of this Article 9, a "notice of no objection"); or
- (b) a statement of objections which shall identify with due particularity the aspects of the Design Information which do not materially comply with the

provisions of Exhibit A or C and/or accord in any material respect with any Design Information previously submitted by Contractor.

If the Owner's Representative fails to respond within the 15 (fifteen) day period, then he/she will be deemed to have issued a notice of no objection.

9.4.4 If the Owner's Representative returns any Design Information under Subsection 9.4.3(a) or is deemed to have issued a notice of no objection under Section 9.4.3, Contractor may, subject to Subsection 9.4.5, proceed with the Work in accordance with this EPC Contract.

9.4.5 If the Owner's Representative considers that revisions to a submission of Design Information are appropriate, but that such revisions are of minor design significance, the Owner's Representative may issue a notice of no objection subject to an appended schedule of comments identifying the relevant revisions. Subject to the restrictions set forth in Subsection 9.4.6, Contractor shall cause such Design Information to be revised in accordance with such comments, but shall not be obliged to re-submit such Design Information solely on account of such revisions.

9.4.6 If the Owner's Representative returns any Design Information under Subsection 9.4.3(b), Contractor shall cause the Design Information to be revised so as to take account of the properly stated objections and as soon as reasonably practicable shall re-submit such Design Information to Owner's Representative, provided, however, that Contractor shall not be required to make any modifications or changes which are not in accordance with Exhibit A and/or C or prudent engineering practice.

9.4.7 Neither a proper objection raised under Section 9.4.3(b) nor a comment made under Section 9.4.5 shall constitute a Change in the Work.

9.4.8 Except in the case of a Change in the Work, approved Design Information shall not be departed from.

9.4.9 Owner and/or Owner's Representative shall have the right to inspect all of Contractor's Drawings and Specifications and the Design Information at Contractor's premises, for any part of the Work.

9.5 DRAWINGS NOT TO BE PROVIDED

Notwithstanding any other provisions of this EPC Contract, Contractor shall not be required to provide shop drawings nor any of Contractor's or Supplier's confidential manufacturing drawings, designs or know-how nor the confidential details of manufacturing practices, processes or operations.

9.6 USE OF DRAWINGS

Documents, drawings and information supplied by Contractor may be used by Owner, its representatives, assignees and transferees, only for the purposes of completing, operating, maintaining, adjusting and repairing the Work. No license is granted to copy or use documents, drawings or information so supplied in order to make or have made spare parts except as expressly provided in the Supply Contract with respect to the Equipment. Documents, drawings or information so supplied by Contractor shall be subject to the confidentiality clause contained herein in Article 23 and shall not be used, copied or communicated to a third party otherwise than as strictly necessary and permitted under this EPC Contract.

ARTICLE 10 - TESTING

10.1 TEST PROCEDURES

The tests described in Exhibit D hereto shall be performed as described therein, and test results shall be adjusted in accordance with the correction curves as set forth in Exhibit D.

10.2 NOTICE OF TESTING

Contractor shall give Owner's Representative at least 14 (fourteen) days' notice prior to the date(s) on which Contractor will be ready to perform the initial Substantial Completion and Final Acceptance tests under Exhibit D; provided that for any repeated test the notice period shall be at least twenty-four (24) hours before the time established by Contractor for such test. Owner's Representative shall be entitled to have, at its own cost, a suitably qualified independent party present during all such tests. If Owner's

35

Representative and/or such independent party fails to attend at the time and place appointed for the tests, Contractor shall be entitled to proceed with the tests in the Owner's Representative's and/or such party's absence. The tests shall then be deemed to have been made in the presence of the Owner's Representative and such party and the results of the tests shall be accepted as accurate. Contractor shall make copies of the test results available to the Owner's Representative as soon as reasonably practicable after completion of such tests.

If major equipment items fail to pass any test, the Owner's Representative may request such test to be repeated on the same terms and conditions and Contractor shall determine whether or not repeated testing shall be executed.

10.3 CONDUCT AND REPETITION OF TESTS

Contractor may at any time prior to Final Acceptance repeat, one or more times, any of the tests described in Exhibit D where Contractor, in its sole discretion, believes that the results of the prior tests are unsatisfactory. Further, Contractor may undertake remedial actions in connection with such repeated tests, provided that such remedial action does not depart from previously approved Design Information without the Owner's Representative's prior consent, which shall not be unreasonably withheld and the response shall be given promptly but not later than (48) forty-eight hours after Contractor's request.

ARTICLE 11 - WARRANTIES

11.1 WARRANTY

Contractor warrants that:

(a) the Work and the Equipment shall conform in all material respects to Laws, permits obtained by Owner pursuant to Section 4.1(c), and the other applicable description, specifications and criteria set forth in this EPC Contract and the Supply Contract;

(b) the Work shall be performed in a workmanlike and skilful manner;

36

(c) the Work and the Equipment shall be of good quality and will, on Final Acceptance, be free from defects in workmanship, material, design and title; and

(d) All materials and other items when incorporated in the Work and the Equipment shall be new (except for the diesel generator, which may be reconditioned or second-hand) and of a suitable grade of its respective kind for its intended use.

Contractor makes no warranty regarding the performance of the wells and/or of the performance of the Geothermal Fluid (e.g., chemical composition, temperature, pressure and flow rates) or 110 kV line losses.

11.2 WARRANTY PERIOD

The warranties set forth in Section 11.1 shall inure for the benefit of Owner and its successors and assigns (including the Lender) and, except as expressly provided below in this Section 11.2, shall be in effect from Final Acceptance for the duration of:

(a) 12 (twelve) months (without limiting the longer warranty periods specifically described below in this Section 11.2);

(b) 18 (eighteen) months for the steam turbine/generator and the Ormat turbine/generators included in the Equipment;

(c) 36 (thirty six) months for any defect in the steam turbine blades, nozzles and rotor that results in corrosion or erosion thereof that is materially in excess of the corrosion and erosion that would normally be expected to occur under the circumstances (this extended warranty is conditional upon Owner (i) operating and maintaining the Project in accordance with the operation and shutdown procedures set forth in the operation and maintenance manuals provided by Contractor under this EPC Contract and (ii) maintaining records of the steam quality data (e.g., pH, purity and wetness) collected on a daily basis for the steam entering into the steam turbine and providing copies of such records to Contractor upon its request); and

(d) 36 (thirty six) months for any defect in the Work of the kind described in Section 11.1 that was caused by the gross misconduct of Contractor and

which would not have been disclosed by a reasonable examination prior to the expiry of the above described applicable warranty period (for purposes of this paragraph, "gross misconduct" does not comprise each and every lack of care or skill but means an act or omission on the part of Contractor which implies either a failure to pay due regard to the serious consequences which a conscientious and responsible contractor would normally foresee as likely to ensue or a wilful disregard of any consequences of such act or omission).

The warranty period set forth in paragraphs (a) or (b) above with respect to any item of the Work that is repaired, replaced, modified, or otherwise altered after Final Acceptance by Contractor shall extend until the date of expiration of the original warranty, or a period of 6 (six) months from the date of completion of such alteration, whichever is later, provided, however, that in no case shall the warranty extended hereunder exceed the maximum period of 6 (six) months beyond the end of the original warranty period.

11.3 CORRECTION OF IMPROPER WORK

Owner shall notify Contractor immediately upon discovery of any failure

which, at the time of discovery, appears to give rise to a Contractor warranty claim. A written "failure report", which includes available technical and logistic information to assist Contractor to assess the damage to the Work or Equipment and to evaluate appropriate corrective action, shall be provided to Contractor within 5 (five) days of the occurrence. Owner shall supply, upon request by Contractor, all relevant information relating to past maintenance, repair and operational data relating to the failed Work or Equipment. Contractor's responsibility for any such warranty claim shall be limited to the obligation to, as soon as reasonably possible following Contractor's receipt of notice from Owner during the applicable warranty period at its own cost and expense to correct non-compliance with the warranty. All costs incidental to any warranty correction and remedying shall be borne by Contractor, provided, however, that Contractor shall have the obligation in connection with the performance of any warranty work to provide any special rigging, cranes or heavy equipment or any labour required in connection with operating such Work or Equipment, except where such items or labour are readily available at the Project Site, in which case such items or labour shall be provided by

38

Owner or Owner's operator, and Contractor shall pay reasonable compensation therefore, and provided that Contractor shall have no obligation in connection with the performance of non-warranty repair and maintenance work, including the cost incidental to the replacement of parts which are not defective but which are replaced in conjunction with a warranty repair at the request of Owner and Owner's operator. Owner or Owner's operator shall provide Contractor with access to Project equipment and workshop space in connection with Contractor's performance of any warranty work. If (a) Contractor requests Owner to perform corrective action under this warranty, or (b) Contractor does not promptly correct and remedy such non-compliance and damage, Owner has the discretion to do so and Contractor shall reimburse Owner the reasonable costs Owner has incurred as a result of such corrective action by Owner.

The liabilities and obligations of Contractor under this Section 11.3 shall not extend to replenishment of normal consumables or any repairs, adjustments, or replacements to the extent required as a result of corrosion and erosion (save as provided in Section 11.2), or wear and tear in the operation of the Project or as a result of failure, other than Contractor's failure to properly store, install, operate and/or maintain the Work, Equipment or parts in accordance with good industry practices, operation and maintenance manuals, instructions, and specific recommendations made by Contractor and/or any changes or modifications made to such equipment or parts without Contractor's express written consent prior to such changes or modifications, or by neglect, abuse, malicious mischief, vandalism, Force Majeure (other than a warranty failure) or by the repair and maintenance of the equipment having been performed or supervised by personnel other than Contractor's personnel or Owner's certified personnel trained or approved by Contractor.

11.4 IMPLEMENTATION OF WARRANTY

The warranty shall be implemented in accordance with the Warranty Procedures in Exhibit G.

39

11.5 DISCLAIMER AND RELEASE

11.5.1 EXCEPT FOR GROSS NEGLIGENCE OR FRAUD ON THE PART OF
CONTRACTOR:

AND
(A) THE WARRANTIES, OBLIGATIONS AND LIABILITIES OF CONTRACTOR,

(B) AND RIGHTS AND REMEDIES OF OWNER,

SET FORTH IN THIS EPC CONTRACT WITH RESPECT TO ANY NON-CONFORMANCE OR DEFECT IN ANY WORK OR EQUIPMENT ARE EXCLUSIVE.

11.5.2 OWNER HEREBY WAIVES, RELEASES AND RENOUNCES ALL OTHER WARRANTIES, OBLIGATIONS, REPRESENTATIONS AND LIABILITIES ON THE PART OF CONTRACTOR, TOGETHER WITH ALL OTHER RIGHTS, CLAIMS AND REMEDIES OF OWNER AGAINST CONTRACTOR, EXPRESS OR IMPLIED, ARISING BY LAW OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY:

(A) WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE;

(B) WARRANTY ARISING FROM COURSE OF PERFORMANCE, COURSE OF DEALING OR USAGE OF TRADE;

(C) OBLIGATION, LIABILITY, RIGHT, CLAIM OR REMEDY IN TORT, WHETHER OR NOT ARISING FROM THE NEGLIGENCE OF CONTRACTOR, ACTUAL, PASSIVE OR IMPUTED;

(D) OBLIGATION, LIABILITY, RIGHT, CLAIM OR REMEDY FOR LOSS OF OR DAMAGE TO ANY PRODUCT OR PART OF THE PROJECT;

(E) LIABILITY OF OWNER TO ANY THIRD PARTY; AND

(F) INCIDENTAL OR CONSEQUENTIAL DAMAGES.

40

11.5.3 CONTRACTOR'S WARRANTY UNDER THIS EPC CONTRACT DOES NOT APPLY TO ANY NON-CONFORMANCE OR DEFECT IN ANY PRODUCT, EQUIPMENT OR PART OF THE PROJECT, TO THE EXTENT SUCH NON-CONFORMANCE OR DEFECT HAS BEEN DIRECTLY OR INDIRECTLY CAUSED BY:

(A) FAILURE BY OWNER OR ITS EMPLOYEES OR CONTRACTORS TO COMPLY WITH ALL OPERATING PROCEDURES;

(B) ALTERATION OF ANY PRODUCT OR PART OF THE PROJECT WITHOUT THE PRIOR WRITTEN CONSENT OF CONTRACTOR, SUPPLIER OR AN AUTHORIZED SERVICE REPRESENTATIVE OF CONTRACTOR OR SUPPLIER;

(C) OPERATION OF ANY PRODUCT, EQUIPMENT OR PART OF THE PROJECT OTHERWISE THAN IN ACCORDANCE WITH THE OPERATION AND MAINTENANCE MANUALS SUPPLIED BY CONTRACTOR OR SUPPLIER;

(D) ABUSE, MISUSE OR NEGLIGENT OPERATION OF ANY PRODUCT, EQUIPMENT OR PART OF THE PROJECT; OR

(E) ANY OTHER INTENTIONAL OR NEGLIGENT ACT OR OMISSION OF OWNER.

ARTICLE 12 - REMEDIES

12.1 LIQUIDATED DAMAGES FOR DELAY IN FINAL ACCEPTANCE

12.1.1 After the Scheduled Final Acceptance Date, Contractor shall pay to Owner as liquidated damages, and not as a penalty, for each day or part of a day which shall elapse between the Scheduled Final Acceptance Date and the date of Final Acceptance a sum equal to 0.137% (one hundred thirty-seven

thousandths of one percent) of both the United States Dollar portion and the New Zealand Dollar portion of the EPC Contract Price per day (plus goods and services tax on such amounts if any) up to a total aggregate sum of 30.54% (thirty and fifty-four hundredths percent) of the EPC Contract

41

Price; provided, however, that if the Project does not accomplish Final Acceptance by the Scheduled Final Acceptance Date, but nevertheless is generating electricity, then the liquidated damages payable by Contractor under this Section 12.1.1 shall be reduced (but not to less than zero) by the amount of the revenue (including payments under any hedge agreement) realized by Owner in excess of \$18,000 N.Z. (Eighteen Thousand New Zealand Dollars) per day, if any, during the period starting on the date Owner is entitled to receive such revenue as a result of the partial completion of the Project until the date Final Acceptance occurs.

12.1.2 Owner may, without prejudice to any other method of recovery, deduct the amount of such liquidated damages from any monies due, or to become due, to Contractor under this EPC Contract. In the event of an extension of time being granted under this EPC Contract, the amount due under this Section shall be recalculated accordingly, and any over-payment refunded. The payment or deduction of such damages shall not relieve Contractor from its obligation to complete the Work, or from any other of its duties, obligations or responsibilities under this EPC Contract.

12.1.3 If at any time after the Scheduled Final Acceptance Date, Contractor is delayed in carrying out the Work as a result of any event identified in Section 5.4.1 which would have entitled Contractor to an extension of time had it occurred prior to the Scheduled Final Acceptance Date, Contractor's obligation to pay liquidated damages under Section 12.1.1 shall be suspended for such period as represents the extension of time to which Contractor would have been entitled had Section 5.4 applied.

12.2 LIQUIDATED DAMAGES FOR PERFORMANCE DEFICIENCY

If the Project has failed to satisfy the Guaranteed Capacity upon completion of the Final Acceptance Performance Test used to establish Final Acceptance, Contractor shall pay to Owner as liquidated damages, and not as a penalty, the following sum:

\$3,600 N.Z. (Three Thousand Six Hundred New Zealand Dollars) per kilowatt (plus goods and services tax on such amounts, if any), up to a total aggregate sum of 45% (forty-five percent) of the EPC

42

Contract Price, for each kW of capacity deficiency, as determined in the Final Acceptance Performance Test set forth in Exhibit D hereto, below the Guaranteed Capacity.

12.3 PERFORMANCE BONUS

If the Project has exceeded the requirements of the Final Acceptance Performance Test set forth in Exhibit D as is shown in the final test results, the Tuaropaki Trust shall negotiate in good faith with Contractor and/or its assigns for the supply and erection of the third development of the Mokai geothermal resource undertaken by the Tuaropaki Trust, its successors or assigns after seeking approval from the beneficial owners to so negotiate and subject to receipt of their approval. In the event that the parties cannot conclude a

contract as a result of the aforementioned negotiations within 90 (ninety) working days of the commencement of such negotiations, Contractor shall have the right to participate in any tender process undertaken by the Tuaropaki Trust, its successors or assigns regarding such development.

12.4 MAKE RIGHT OBLIGATION

Notwithstanding that Contractor may have paid liquidated damages for the performance deficiency pursuant to Section 12.2:

(a) Contractor may carry out such remedial Work and repeat the Final Acceptance Performance Test, in accordance with Article 10, for a period of 120 (one hundred and twenty) days following Final Acceptance, which period shall be extended to take into account any event described in Section 5.4.1;

(b) if the results of the last such repeated Final Acceptance Performance Test show that:

(i) such performance deficiency has been reduced or rectified, Owner shall refund such performance related liquidated damages, or a proportionate amount up to the amount calculated and paid or owing pursuant to Section 12.2; or

43

(ii) such performance deficiency has been increased, Contractor shall pay to Owner a further amount, in respect of the increased deficiency, calculated under Section 12.2 as liquidated damages.

All such remedial Work and repeat tests shall be conducted in such a way and at such times as to minimize so far as reasonably possible interference or disruption to the normal operation of the Project.

12.5 EXCLUSIVITY

Notwithstanding the warranties set forth in Section 11.1, but subject to Sections 12.1 and 12.6 and Owner's right to terminate under Section 21.1.1(d) for gross delays or deficiencies, the remedies described in this Article 12 shall constitute Owner's sole and exclusive remedies for liabilities arising from schedule delays (up to 223 days) and performance shortfalls up to 5 MW hereunder. If the performance shortfall is greater than 5 MW, then Owner must within thirty (30) days of completion of the relevant tests elect to either receive the liquidated damages described in Section 12.2 as its sole and exclusive remedy for liabilities arising there from or alternatively exercise its termination rights under Section 21.1.1(d) and, subject to the limitations set forth in Article 11 and Section 12.7 of this EPC Contract, seek to recover damages from Contractor. If the schedule delays exceed 223 days, then Owner must within thirty (30) days of such 224th day elect to either receive the liquidated damages described in Section 12.1 as its sole and exclusive remedy for liabilities arising there from or alternatively exercise its termination rights under Section 21.1.1(d) and, subject to the limitations set forth in Article 11 and Section 12.6 of this EPC Contract, seek to recover damages from Contractor in which case any liquidated damages previously received or setoff by Owner shall be taken into consideration and/or refunded as appropriate based upon the final determination of damages caused by such delay and payable by Contractor to Owner.

12.6 GENERAL LIMITATION OF LIABILITY

(a) Notwithstanding any other provision to the contrary in this EPC Contract, Contractor shall in no event be liable to Owner, by way of indemnity or by reason of any breach of this EPC Contract or in tort, including

liability, or otherwise, for loss of use of any part (or all) of the Project or for the cost of substitute equipment or materials or for loss of production, loss of profit or loss of contract or for any indirect, consequential loss or damage which may be suffered by Owner, except that this Section 12.6(a) shall not limit the liability of Contractor under Section 12.1 or 12.2 (liquidated damages for delay and performance deficiency).

(b) The total liability of Contractor to Owner on all claims of any kind (other than under Section 17.1(b)) shall in no case exceed the aggregate of the EPC Contract Price and the Supply Contract Price provided however that if Owner shall receive any amount from Supplier directly for any claims under the Supply Contract, the maximum liability of Contractor shall be reduced accordingly.

(c) Owner is not permitted to sell, assign or otherwise transfer all or any part of the Work without obtaining an acknowledgment and undertaking in writing from the third party that it will afford Contractor and its Subcontractors with the protection of this Section 12.6.

(d) Contractor agrees that Supplier's and Supplier's Subcontractors' liability on all claims of any kind regarding the Equipment shall be subject to the terms of limitation of liability described in this Section 12.6.

ARTICLE 13 - SECURITIES

13.1 SECURITY PROVIDED ON BEHALF OF CONTRACTOR

(a) Contractor's obligations under this EPC Contract shall be secured by a performance bond in the form of a standby letter of credit provided by a reputable surety company or financial institution (reasonably acceptable in all respects to Owner) in the form attached hereto as Exhibit J-1 in the maximum amount equal to 30% (Thirty Percent) of the New Zealand dollar portion of the EPC Contract Price (the "NZ\$ Denominated L/C"). The NZ\$ Denominated L/C shall be provided prior to receipt of the first NZ\$ payment under the Milestone Payment Schedule, shall become effective upon Contractor's receipt of the first NZ\$ payment under the Milestone Payment Schedule and shall be increased from time to time by the New Zealand dollar amounts received by

Contractor from Owner under the Milestone Payment Schedule up to the 30% (Thirty Percent) maximum NZ dollar amount specified above.

(b) Further, Contractor's obligations under this EPC Contract and Supplier's obligations to deliver Equipment under the Supply Contract shall be secured by a performance bond in the form of a standby letter of credit provided by a reputable surety company or financial institution (reasonably acceptable in all respects to Owner) in the form attached hereto as Exhibit J-2 (the "US\$ Denominated L/C"). The US\$ Denominated L/C shall be provided prior to receipt of the first US\$ payment under the Milestone Payment Schedule of the Supply Contract, shall become effective upon Supplier's receipt of the first US\$ payment under the Milestone Payment Schedule of the Supply Contract and shall be increased from time to time by (i) the United States dollar amounts received by Contractor from Owner under the EPC Contract Milestone Payment Schedule for Payment Milestones nos. 1-20 up to a maximum sum of \$1,038,600 US (One million thirty eight thousand six hundred United States Dollars) and (ii) the amounts

received by Supplier from Owner under the Supply Contract Milestone Payment Schedule for Payment Milestones nos. 1-19 up to a maximum sum of \$20,129,540 US (Twenty million one hundred twenty nine thousand five hundred and forty United States Dollars). The US\$ Denominated L/C shall be reduced from time to time upon Supplier's delivery of Equipment or parts thereof under the Supply Contract by the amounts computed as described in Exhibit J-2, so that the US\$ Denominated L/C will be reduced to 30% (Thirty Percent) of the sum of the US dollar denominated portion of the EPC Contract Price and the Supply Contract Price upon the completion of delivery of the Equipment.

(c) Both the NZ\$ Denominated L/C and the US\$ Denominated L/C shall remain valid until Final Acceptance. If the NZ\$ Denominated L/C or the US\$ Denominated L/C by its terms will expire before Final Acceptance, then Contractor shall provide to Owner evidence of the renewal or replacement of said performance bond at least ten (10) business days before such expiration date.

(d) Upon Final Acceptance, the NZ\$ Denominated L/C and the US\$ Denominated L/C shall be reduced to nil and replaced by a performance bond in the form

46

of a standby letter of credit provided by a reputable surety company or financial institution (reasonably acceptable in all respects to Owner) in the amount of 5% (five percent) of the combined EPC Contract Price and the Supply Contract Price to secure the performance of Contractor's warranty obligations, which shall remain valid for the Warranty Period defined in Section 11.2.

(e) Ormat Industries Ltd. shall provide a guarantee in the form described in Exhibit E hereto, upon execution of this EPC Contract, to guarantee Contractor's obligations to perform hereunder.

13.2 SECURITY PROVIDED ON BEHALF OF OWNER

The Tuaropaki Trust shall provide a guarantee in the form described in Exhibit F hereto, upon execution of this EPC Contract, to guarantee its and Owner's obligations under Sections 4.1(p) and 12.3 hereunder.

ARTICLE 14 - CARE OF THE WORK; TITLE

14.1 RISK OF LOSS

Except to the extent caused by the negligence or wilful misconduct of Owner and not covered by the insurance required to be maintained pursuant to this EPC Contract, Contractor shall bear the risk of physical loss or destruction of or damage to the Equipment from the point in time such items are delivered FOB (Incoterms 2000) until Final Acceptance, and to the Work and shall retain care of the Work prior to Final Acceptance, provided, however, that (a) in the case Owner assumes said responsibility prior to the completion of any or all testing under Exhibit D, Owner makes best efforts to permit Contractor to proceed with all commissioning, testing, and related activities, provided that, all Work so conducted by Contractor shall be conducted in a fashion to minimize interference with the normal operation of the Work, and (b) any actual proceeds of insurance payable with respect to such loss, damage, or destruction are handled as provided in Section 15.5

47

14.2 DELIVERY

Contractor shall be responsible to assure safe delivery of all materials, equipment, tools, supplies and other items to the Project Site related to the Work including all of the Equipment.

14.3 TITLE

Title to the Work shall pass from Contractor to Owner upon the earlier of delivery to the Project Site or payment to Contractor under this EPC Contract for the applicable Work.

ARTICLE 15 - INSURANCE

15.1 CONTRACTOR PROVIDED INSURANCE

Contractor shall provide the following insurance with the indicated limits, with its insurance carriers, naming all Subcontractors, Owner and Lender(s) as additional insured and shall maintain such insurance in full force and effect until Final Acceptance. In the event this insurance or any portion of it becomes commercially unavailable on commercially reasonable rates and terms Owner and Contractor shall cooperate in their efforts to obtain such replacement insurance as may be available and this EPC Contract shall be modified accordingly:

(a) Comprehensive General Liability - \$10,000,000 N.Z. (Ten Million New Zealand Dollars) combined single limit;

(b) Equipment and Contractor's plant, goods and materials loss in transit, including ocean marine shipment (replacement value);

(c) Accident Rehabilitation Compensation and Insurance Act (where required by law, statutory limits); and

(d) Contract Works Insurance for the full value of the Project including earthquake, provided however, that the aggregate cost for acquiring and maintaining such cover does not exceed \$ 250,000 US (two hundred fifty thousand United States Dollars), and as available August 14 2002. Cover for fire, collapse, flood and any other catastrophic perils shall be in such sub limits that

48

are commercially available at reasonable rates in the commercial insurance market.

15.2 OWNER PROVIDED INSURANCE

Owner shall provide the following insurance with the indicated limits, with its insurance carriers, naming Contractor and Lender(s) as additional insured and shall maintain such insurance in full force and effect through the end of the warranty period or such later period as Lender(s) may reasonably require. In the event this insurance or any portion of it becomes commercially unavailable on commercially reasonable terms Owner and Contractor shall cooperate in their efforts to obtain such replacement insurance as may be available and this EPC Contract shall be modified accordingly:

(a) Control of wells insurance - (repair and replacement value); and

(b) All other insurances reasonably required by Lender(s).

15.3 POLICIES

All policies of insurance maintained pursuant to this Article 15 shall:

(a) require 45 (forty-five) days' prior notice (15 (fifteen) days' prior notice in the event of non-payment of premium) to the additional insured parties of cancellation, non-renewal or material change in coverage;

(b) provide that such insurance is primary without right of contribution from any other insurance which might otherwise be available to the insured party;

(c) provide that any such policy referred to in Section 15.1(d) shall not be cancelled or payment refused in the event of any unintentional failure to make full disclosure (material or otherwise) of any matter or change in circumstance on the part of Lender(s);

(d) provide that, in the event of any loss payment under a policy, the insurer shall waive any rights of subrogation against the insured party and shall waive any setoff or counterclaim or any other deduction whether by attachment or otherwise; and

49

(e) include a cross-liability endorsement providing that inasmuch as the policies are written to cover more than one insured, all terms and conditions, insuring agreements and endorsements, with the exception of limits of liability, shall operate in the same manner as if there were a separate policy covering each insured.

15.4 EVIDENCE OF INSURANCE

Upon request by Owner, Contractor shall furnish Owner with the policy wording and a Certificate of Insurance as evidence that Contractor provided insurance is being maintained. Upon request by Contractor, Owner shall similarly furnish Contractor with the policy wording and a Certificate of Insurance as evidence that Owner provided insurance is being maintained.

15.5 APPLICATION OF INSURANCE PROCEEDS

In the event of any loss, damage, or destruction to the Project or any part thereof which may give rise to a claim under the insurance maintained by Contractor under Section 15.1:

(a) where the insurance proceeds for the Work and/or the Equipment are equal or less than \$200,000 N.Z. (Two Hundred Thousand New Zealand Dollars), such proceeds shall be paid directly to Contractor.

(b) where the insurance proceeds for the Work and/or Equipment are in an amount exceeding an aggregate amount of NZ\$200,000 (Two Hundred Thousand New Zealand Dollars), Contractor shall:

- (i) give notice of such event to Owner;
- (ii) pursue all such insurance claims with due diligence;
and
- (iii) procure that any such insurance proceeds for events occurring under Subsections 15.1(b) and (d) shall be paid into an interest bearing escrow account nominated by Owner and agreed upon by Contractor, which agreement shall not be unreasonably withheld, at

the expense of Owner, in the joint names of Owner, Supplier and Contractor for the purposes of the Project.

Directions will be placed with the escrow agent that the monies will be released from the account within 48 (forty-eight) hours against presentation by Contractor or Supplier of an invoice and/or shipping documents verified by Owner's Representative as provided below, representing the supply of replacement goods and/or completion of the rectification of the relevant parts of the Work which had been lost, damaged or destroyed. The documents shall first be submitted to Owner's Representative who shall verify and countersign in accordance with the procedures contained in Subsection 6.3.4. Upon completion of the Project all monies remaining in the escrow account relating to the Work shall be immediately released to Contractor.

If this EPC Contract is terminated prior to completion of the Project, the parties shall direct the escrow agent to apply any monies standing to the credit of the escrow account as follows:

- (i) to Owner to the value of the relevant parts of the Work which are lost, damaged or destroyed, which have not been replaced or rectified as of the date of termination and to the extent Contractor or Supplier had been previously paid by Owner for such Work;
- (ii) to Owner any such insurance proceeds paid for other loss or damages of Owner arising out of events giving rise to the claim; and
- (iii) the balance to Contractor;

provided that, in the event of any shortfall in the proceeds of the insurance to cover the payments due under paragraph (i) above, such shortfall shall represent a debit due to Owner from Contractor.

51

ARTICLE 16 - DISPUTE RESOLUTION

16.1 CLAIMS

(a) If Contractor intends to claim any additional payment under this EPC Contract, Contractor shall give notice to the Owner's Representative as soon as reasonably practicable and in any event within 28 (twenty-eight) days of the date that Contractor learns of the event giving rise to the claim and its payment implications.

(b) Contractor shall keep such contemporary records as may be reasonably necessary and feasible to substantiate any such claim, either on the Project Site or at another location reasonably acceptable to the Owner's Representative. Without admitting Owner's liability, the Owner's Representative shall, on receipt of such notice, inspect such records and may instruct Contractor to continue keeping such records. Contractor shall permit the Owner's Representative to inspect such records during Contractor's normal business hours and shall (if requested) submit a copy of such records to the Owner's Representative.

(c) Within 28 (twenty-eight) days of such notice, or such later time as may be agreed by the Owner's Representative, Contractor shall send to the Owner's Representative an account, giving then known detailed particulars of the amount and basis of the claim. Where the event giving rise to the claim has a continuing effect, such account shall be considered as interim. Contractor shall then, at such intervals, as the Owner's Representative may reasonably require, but in no event more frequently than bi-weekly, send further interim

accounts giving the accumulated amount of the claim and any further particulars. Where interim accounts are sent to the Owner's Representative, Contractor shall send a final account within 28 (twenty-eight) days of the end of the effects resulting from the event.

(d) The Owner's Representative shall proceed in accordance with Section 4.2 to agree upon or determine such additional payment as may be due. The Owner's Representative shall promptly notify Contractor accordingly. If Contractor has a Dispute with the determination or discretion made by the Owner's Representative, such Dispute shall be resolved as provided in Sections 16.3 and 16.4.

52

16.2 PAYMENT OF CLAIMS

Contractor shall be entitled to have included in any progress payment such amount for any claim as the Owner's Representative considers due. If the particulars supplied are insufficient to substantiate the whole of the claim, Contractor shall be entitled to payment for such part of the claim as has been substantiated.

16.3 RESOLUTION BY PARTIES

Owner and Contractor desire that this EPC Contract operate between them fairly and reasonably. If during the term of this EPC Contract, a Dispute arises between Owner and Contractor, or one party perceives the other as acting unfairly or unreasonably, or a question of interpretation arises hereunder, then Owner's Representative and Contractor's project manager shall promptly confer and exert their best efforts in good faith to reach a reasonable and equitable resolution of the Dispute. If the Owner's Representative and the project manager are unable to resolve the Dispute within 20 (twenty) business days, the matter shall be referred within 2 (two) business days of the lapse of the aforementioned 20 (twenty) business days to the parties' responsible corporate officers for resolution. Neither party shall seek resolution by arbitration of any Dispute arising in connection with this EPC Contract until both parties' responsible corporate officers, who shall be identified by each party from time to time, have had at least 20 (twenty) business days to resolve the Dispute following referral of the Dispute to such responsible corporate officers.

16.4 RESOLUTION BY ARBITRATION

If the responsible corporate officers are unable to resolve the Dispute within the above described period, then Owner and Contractor shall enter into binding arbitration as set forth herein. Notice of the demand for arbitration shall be delivered to the other party and the Dispute shall be referred to such arbitrator, if the parties agree upon one, within 20 (twenty) business days of receipt of demand, and if not to 3 (three) arbitrators, one appointed by each party, within 20 (twenty) business days of receipt of demand, each of whom shall be an expert in the construction and power generation field and a third independent arbitrator appointed by the (2) two arbitrators. If a party fails to appoint an arbitrator, then the other party's appointee shall become the sole arbitrator.

53

The parties shall proceed with the arbitration expeditiously and shall conclude all proceedings there under in order that a decision may be rendered within 120 (one hundred and twenty) days or, in the case of a payment Dispute, 45 (forty-five) days from service of the demand for arbitration.

Each party shall bear its own expenses in connection with any arbitration, including but not limited to counsel fees, and all joint expenses shall be apportioned in the award of the arbitrators.

Any arbitration shall be conducted in Auckland, New Zealand in accordance with the provisions of the Arbitration Act 1996 (as amended or substituted from time to time).

ARTICLE 17 - INDEMNIFICATION

17.1 CONTRACTOR'S INDEMNITY

(a) Contractor shall defend, indemnify and hold harmless Owner from any and all claims, demands and liabilities arising from the death, sickness or accident of employees of Contractor or of Subcontractors or from damage to their property or from damage to Contractor's property as a result of performance of this EPC Contract, except only to the extent that such deaths, injuries, sickness or accidents are shown to have been caused by the intentional or grossly negligent conduct of Owner.

(b) Contractor shall defend, indemnify and hold harmless Owner from any claims, demands, penalties or liabilities for injury or death to third parties or damage to third party property and/or in respect of any Contractor breach of the Resource Management Act 1991, to the extent directly caused by the negligence of Contractor and/or Subcontractors in activities connected with the Project and/or performance of this EPC Contract.

17.2 OWNER'S INDEMNITY

(a) Owner shall defend, indemnify and hold harmless Contractor from any and all claims, demands and liabilities arising from the death, sickness or accident of employees of Owner or of Owner's subcontractors or from damage to their property or

54

from damage to Owner's property as a result of performance of this EPC Contract, except only to the extent that such deaths, injuries, sickness or accidents are shown to have been caused by the intentional or grossly negligent conduct of Contractor.

(b) Owner shall defend, indemnify and hold harmless Contractor from any claims, demands, penalties or liabilities for injury or death to third parties or damage to third party property and/or in respect of any Owner breach of the Resource Management Act 1991, to the extent directly caused by the negligence of Owner and/or Owner's subcontractors in activities connected with the performance of this EPC Contract.

17.3 PATENT INDEMNITY

Contractor shall indemnify Owner from and against all third party claims and proceedings for or on account of infringement of any patent rights, registered design, copyright, design, trademark, trade secret, name, know-how or other intellectual property rights in respect of the Work and the Equipment and from and against all claims, demands, proceedings, damages, costs, charges and expenses whatsoever in respect of or in relating to such rights, except for any use of the Work other than for the original purpose for which it is intended or any infringement which is due to the use of the Work in association or combination with any other plant or item not supplied by Contractor or Supplier.

17.4 NOTICE AND SETTLEMENT OF CLAIMS

A party seeking the benefit of an indemnity shall give the other party prompt notice of any claim giving rise to the indemnity. The other party may at its own cost conduct negotiations for the settlement of such claim and any litigation that may arise there from. The party claiming the benefit of the

indemnity shall not make any admission which might be prejudicial to the other party unless the other party fails to take over the conduct of the negotiations or litigation within a reasonable time after having been so requested.

The other party may not, however, conduct such negotiations or litigation before it has given the party claiming the benefit of the indemnity a reasonable security in circumstances where the party claiming the benefit of the indemnity does not possess such

55

reasonable security. The security shall be for an amount which is an assessment of the compensation, damages, expenses and costs for which the party claiming the benefit of the indemnity may become liable and which are the subjects of the indemnity under this Article 17.

The party claiming the benefit of the indemnity shall, at the request of the other party, provide all available assistance for the purpose of contesting any such claim or action, and shall be paid all reasonable costs incurred in doing so.

ARTICLE 18 - ASSIGNMENT

18.1 ASSIGNMENT BY OWNER

(a) Any assignment by Owner shall be subject to Contractor's status as chosen contractor as described in Section 4.1(p) and to all of Contractor's rights under this EPC Contract.

(b) Owner hereby unconditionally and irrevocably assigns all of its rights and obligations for the receipt of liquidated damages from Supplier, as described in Article 11 of the Supply Contract, warranties and remedies from Supplier, as described in Article 10 of the Supply Contract, indemnification, as described in Section 16.3 of the Supply Contract, and remedies for delay under the Supply Contract, to Contractor. Owner further agrees that all its rights and obligations with respect therewith shall inure to the benefit of Contractor as if Contractor were a party to the Supply Contract, and that this assignment shall inure to the benefit of and shall be binding upon the parties' respective successors and assigns. Notwithstanding the foregoing, Owner retains its indemnification rights against Supplier as provided in Section 16.1 of the Supply Contract.

(c) Subject to Sections 18.1(a) and (b), Owner may assign all of its rights, title and interest in and to or arising out of or in connection with this EPC Contract as security for financing of the Project for benefit of Lender(s), provided, however, that any such assignment shall not relieve Owner of any obligation hereunder.

(d) Unless specifically permitted in this Section 18.1, Owner may not assign any or all of its obligations, right, title and/or interest in and to or arising out of or

56

in connection with this EPC Contract without the prior written approval of Contractor which approval will not be arbitrarily or unreasonably withheld. Any such assignment shall not relieve Owner of any obligation hereunder.

18.2 ASSIGNMENT BY CONTRACTOR

(a) Contractor may assign all of its right, title and interest in and to or arising out of or in connection with this EPC Contract as security for the Project for benefit of Lender(s) or, for financing of the Work, provided, however, that any such assignment shall not relieve Contractor of any obligation hereunder.

(b) Except to a related company (as defined in Section 2(3) of the Companies Act 1993) or as specifically permitted under Section 18.2(a), Contractor may not assign any or all of its obligations, right, title and/or interest in and to or arising out of or in connection with this EPC Contract without the prior written approval of Owner which approval will not be arbitrarily or unreasonably withheld. No assignment shall relieve Contractor of any obligation hereunder.

18.3 SUCCESSION

This EPC Contract shall inure to the benefit of and be binding upon the successor and permitted assigns (as provided for by Sections 18.1 and 18.2) of the parties hereto. Owner agrees to cause any assignees or transferees of its interest or any portion thereof in this EPC Contract or in the Project, including any lien holder or party holding a security interest with respect thereto, to be bound by Contractor's right to recourse regarding such interest or portion thereof and by the releases and limitations of liability set forth herein.

ARTICLE 19 - SUBCONTRACTORS

19.1 SUBCONTRACTS

Contractor may enter into subcontracts for the performance of parts of the Work and shall be solely responsible for the management and satisfactory performance of all its Subcontractors in their performance of the Work. Contractor shall request that its Subcontractors under subcontracts requiring payment of more than One Hundred Fifty

57

Thousand United States Dollars (US\$150,000) execute a Continuity Guarantee in the form attached hereto as Exhibit K. Contractor shall not subcontract any major components of Work (other than for the purchase of proprietary goods and materials or for the provision of labour on a piecework basis) except to Subcontractors appearing on the Approved Major Subcontractors List (as described below). Contractor shall be responsible for the acts, defaults and neglects of any Subcontractor, its agents or employees in their performance of the Work as if they were the acts, defaults or neglects of Contractor, its agents or employees. The issuance of any subcontract shall not relieve Contractor of any of its obligations under this EPC Contract.

19.2 APPROVED MAJOR SUBCONTRACTOR LIST

The Approved Major Subcontractors List attached hereto as Exhibit I is preliminary, and may be amended in the following manner. In the case the need arises to add a Subcontractor to the Approved Major Subcontractors List, in Contractor's opinion, Contractor shall propose such addition to Owner's Representative in writing identifying the type of Work that could be subcontracted to such Subcontractor. Within 15 (fifteen) days after receipt of Contractor's proposal, Owner's Representative shall have the right to advise Contractor of any such potential Subcontractors to which it reasonably objects, together with the reasons for objection and may propose additional Subcontractors based on his or her experience concerning such potential Subcontractor. Contractor shall not add any potential Subcontractor to the list to which Owner's Representative so reasonably objects and shall give due consideration to adding to the list any Subcontractors proposed by the Owner's

Representative. If Owner's Representative fails to respond within such 15 (fifteen) day period, Contractor shall have the right to add said potential Subcontractor to the list.

ARTICLE 20 - SUSPENSION

20.1 RIGHT OF OWNER TO SUSPEND WORK

Owner's Representative may suspend performance of the Work by Contractor hereunder, in whole or in part, upon 10 (ten) days' prior written notice of such suspension to Contractor.

58

Such suspension shall continue for the period specified in the suspension notice.

20.2 INITIAL PAYMENTS TO CONTRACTOR

Provided that suspension does not arise as a result of a default on the part of Contractor under this EPC Contract or on the part of Supplier under the Supply Contract, which has not been corrected, Contractor shall be entitled to be paid within 10 (ten) business days of its issuance of an invoice to Owner for all Work carried out up to the date of such suspension (excluding any work of correction) and for payments owing by Contractor to its Subcontractors for commitments made before such suspension which cannot be reasonably avoided.

20.3 EXTENDED SUSPENSION

In the event suspensions by Owner exceed 90 (ninety) days in the aggregate and provided that such suspensions do not arise as a result of default on the part of Contractor under this EPC Contract or on the part of Supplier under the Supply Contract, which has not been corrected, then Contractor may give notice to the Owner's Representative of permission to proceed within 28 (twenty-eight) days. If permission is not granted within that time, Contractor may terminate its obligations under this EPC Contract by so notifying Owner in writing and Contractor shall be entitled to be paid:

- (a) the proportion of the EPC Contract Price consistent with the progress of the Work up to the date of suspension; and
- (b) any costs reasonably incurred by Contractor which are attributable to the suspension and termination of the Work, including cancellation charges owed to third parties; and
- (c) loss of profit calculated at the rate of 9.5% (nine and one-half percent) of the proportion of the EPC Contract Price which will remain unpaid following such termination.

59

20.4 RIGHT OF CONTRACTOR TO SUSPEND

Subject to Section 6.3.7, Contractor may suspend performance of the Work hereunder, in whole or in part, upon 10 (ten) days' prior written notice of such suspension where Owner has not paid any amount invoiced by Contractor unless Owner places any unpaid or disputed amount in an interest bearing escrow account for the sole benefit of and immediate payment to Contractor pending resolution of the Dispute in Contractor's favour. Any interest carried on any monies held in escrow shall be paid to the party in whose favour the Dispute is resolved.

Such suspension shall continue for the period specified in the suspension notice.

20.5 ADDITIONAL CHANGES RESULTING FROM SUSPENSIONS

Provided that suspension does not arise as a result of default by Contractor under this EPC Contract or by Supplier under the Supply Contract, the EPC Contract Price shall be adjusted for costs reasonably incurred and profits on such costs at a fixed rate of 12% (twelve percent) as a result of the suspension (including without limitation costs for the purpose of safeguarding and/or storage, personnel, Subcontractors or rented equipment costs, demobilization and re-mobilization costs and increased costs or charges incurred for rescheduling) and the Scheduled Final Acceptance Date and all other dates and milestones herein by which Contractor's responsibilities are measured shall be adjusted to reflect any delays resulting from such suspension (including without limitation a period equal to the suspension period, a period for demobilization and re-mobilization plus any additional period required).

If Contractor shall, solely in consequence of such suspension, be required to perform any obligations under the warranty at a time which exceeds the original schedule for warranty obligations which would have been applied if there had been no suspension, the additional cost of complying with the warranty obligations shall be added to the EPC Contract Price.

60

20.6 RESUMPTION OF WORK

Upon receipt of notice to resume the Work in accordance with this EPC Contract, Contractor shall examine the Project and the Work affected by the suspension.

Contractor shall make good any deterioration or defect in or loss of such Project or Work that may have occurred during suspension, and costs incurred in making such examinations and making good and resuming Work shall be added to this EPC Contract Price, if suspension was not necessary by reason of a default on the part of Contractor which has not been corrected.

ARTICLE 21 - TERMINATION

21.1 TERMINATION BY OWNER

21.1.1 Owner may, in its sole discretion, terminate the Work after the occurrence of one or more of the following events of default and if, following a written notice from Owner to cure such event of default, said event of default continues to exist for 10 (ten) days in the circumstances described in (a) and (b) below, and 30 (thirty) days in the circumstances described in (c) and (d) below:

(a) Contractor becomes insolvent or admits in writing its inability to pay its debts or makes an assignment for the benefit of creditors; or

(b) Insolvency, receivership or bankruptcy proceedings are commenced by or against Contractor; or

(c) Contractor defaults in its performance under a material provision of this EPC Contract, provided, however, that Owner may not terminate this EPC Contract if, after notice of the event of default and prior to expiration of the thirty (30) day period set forth above, Contractor has commenced and is diligently pursuing efforts to cure such breach in accordance with a cure plan agreed upon between the parties.

(d) Contractor defaults in its performance of the Performance Obligations as described below.

For the purpose of this paragraph "Performance Obligations" shall mean: (i) the Final Acceptance Performance Test (as repeated under Section 12.4) has established that the level of net electrical generating capacity of the Project equals or exceeds 34 (thirty four) MW, as corrected to the Design Conditions using the correction curves and formulas set forth in Exhibit D, as measured at the high voltage interface point defined in Article 1.4, number 5 of Exhibit A or (ii) Final Acceptance shall occur within 223 days of the Scheduled Final Acceptance Date.

21.1.2 Notwithstanding anything expressed or to be implied to the contrary in this EPC Contract, in the event that the Supply Contract, or the Supplier's employment under it, is terminated for any reason other than the breach of Owner there under, Owner shall be entitled to terminate this EPC Contract forthwith upon notice to Contractor in writing.

21.1.3 Upon termination, Contractor shall deliver to Owner possession of the Work in its then condition, including Drawings and Specifications and contracts with Subcontractors, and construction supplies and aids dedicated solely to construction of the Project. In the event of termination neither party shall be liable to the other hereunder except to the extent that obligations by their terms expressly survive termination.

21.1.4 In the event of termination as provided in Section 21.1.1, Owner shall have the right, at its sole option, to assume and become liable for any reasonable written obligations and commitments that Contractor may have in good faith undertaken with third parties in connection with the Work, which obligations and commitments are by law or by their terms assumable by Owner. If Owner elects to assume any obligation of Contractor as described in this Section 21.1.4, then as a condition precedent to Owner's compliance with any subsection of this Article 21, Contractor shall execute all papers and take all other reasonable steps requested by Owner which may be required to vest in Owner all rights, set-offs, benefits and titles necessary to such assumption by Owner of such obligations. Owner agrees to indemnify and hold Contractor harmless against any liability under any obligations assumed by Owner pursuant hereto.

21.2 TERMINATION BY CONTRACTOR

21.2.1 Contractor may, in its sole discretion, terminate the Work after the occurrence of one or more of the following events of default and if, following a written notice from Contractor to Owner to cure such event of default (copied to the Lender at the address specified in Section 24 below), said event of default continues to exist for 10 (ten) days in the circumstances described in (a) and (b) below, and 30 (thirty) days in the circumstances described in (c) below, and subject to Section 21.2.3:

(a) Owner becomes insolvent or admits in writing its inability to pay its debts or makes an assignment for the benefit of creditors; or

(b) Insolvency, receivership or bankruptcy proceedings are commenced by or against Owner; or

(c) Owner defaults in its performance under a material provision of this EPC Contract, including the obligation to make any payment hereunder; provided, however, that Contractor may not terminate this EPC Contract if, for all cases except for the obligation to make or complete any payment, after notice of the event of default and prior to expiration of the 30 (thirty) day period set forth above, Owner has commenced and is diligently

pursuing efforts to cure such breach in accordance with a cure plan agreed upon between the parties.

21.2.2 In the event of termination as provided in Section 21.2.1, Owner shall pay to Contractor a pro rata portion of the EPC Contract Price consistent with Contractor's progress on the Project up to the date of Owner's receipt of notice of termination plus any costs attributable to and incurred in terminating the Work, including cancellation charges owed to third parties, and compensation for loss of profit in the amount of 9.5% (nine point five percent) for the uncompleted portion of this EPC Contract Price.

21.2.3 In the event of the occurrence of one or more of the events of default, if, following Contractor's written notice to Owner and the Lender to cure such default and before the close of the cure period in Section 21.2.1 above, Lender(s) provide written notice to Contractor of its/their intent to take over the Project and cure such event

63

of default, the 30 (thirty) day cure period determined in Section 21.2.1 shall be extended by an additional 30 (thirty) days.

ARTICLE 22 - FORCE MAJEURE

22.1 FORCE MAJEURE

(a) Force Majeure as used in this EPC Contract shall be an event beyond the control of Owner, Contractor or Supplier which either Owner or Contractor (for purposes of this Section 22.1, the "affected party") is unable to prevent or provide against by the exercise of reasonable diligence and which materially affects the affected party's performance of its obligations under this EPC Contract, and shall include, but not be limited to, the following events:

war, declared or not, or hostilities, or belligerence, blockade, revolution, insurrection, riot, expropriation, requisition, confiscation, or nationalization, export or import restrictions by any authorities, closing of harbours, docks, canals, or other assistances to or adjuncts of the shipping or navigation of or within any place, rationing or allocation, whether imposed by law, decree or regulation by, or by compliance of industry at the insistence of any governmental authority, or fire, unusual flood, earthquake, hydrothermal eruption, volcanic eruption, storm, lightning, tide (other than normal tides), tidal wave, perils of the sea, accidents of navigation or breakdown or injury of vessels, accidents to harbours, docks, canals or other assistance to or adjuncts of the shipping or navigation, epidemic, quarantine, strikes or combination of workmen, lockouts or other labour disturbances (except for strike or other labour disturbances by Contractor's employees), or governmental acts and decrees that in fact delay the Work or increase the cost of the Project.

(b) To the extent that the affected party is prevented from or delayed in complying with any of its obligations under this EPC Contract by reason of an event of Force Majeure, such obligation shall be suspended for the duration of the impact of such event upon the affected party.

64

22.2 ADJUSTMENTS TO DATES AND COST

In the event Contractor is delayed by Force Majeure, or the cost of the

Work shall be increased, Contractor shall be entitled to an extension of time under Section 5.4 and the EPC Contract Price shall be increased to reflect the increase in the cost of the Work (including warranty) and added expenses incurred by Contractor including those described in Section 6.5.

22.3 OWNER FAILURES

Although not a Force Majeure event, Owner shall be responsible for any increased cost of Contractor, and Contractor shall be entitled to an extension of time under Section 5.4 and to adjustments to the EPC Contract Price under the terms of Section 22.2, due to the failure or delay of Owner (or its representatives, agents, subcontractors or suppliers other than Contractor and Supplier and Contractor's and Supplier's Subcontractors, agents, and employees) to meet its obligations under this EPC Contract, to the extent such failure or delay in fact delays the Work or increases Contractor's cost and/or due to a Change in Law to the extent such change in fact delays the Work or increases Contractor's cost.

22.4 EXTENDED FORCE MAJEURE

If circumstances of Force Majeure have occurred and shall continue for a period of 180 (one hundred and eighty) days then, notwithstanding that Contractor may by reason thereof have been granted an extension of time for completion of the Work, either party shall be entitled to serve upon the other party 28 (twenty-eight) days written notice to terminate this EPC Contract. If at the expiry of the period of 28 (twenty-eight) days the Force Majeure event shall still continue then this EPC Contract shall terminate and Contractor shall be entitled to the payments contained in Subsection 21.2.2 except for compensation for loss of profit.

65

22.5 FRUSTRATION

In the event of this EPC Contract being frustrated whether by Force Majeure or by any other supervening event which may occur independently of the will of the parties, Owner shall pay to Contractor in so far as such items have not already been covered by interim payments made to Contractor, for all Work executed prior to the date of termination at the prices and rates provided in this EPC Contract and in addition:

(a) the sums payable in respect of preliminary items in so far as the Work or service comprised therein has been carried out or performed and a proper proportion as certified by the Owner's Representative of all such items; and

(b) the cost of plant, goods and materials reasonably ordered for the Work which shall have been delivered to Contractor or of which Contractor is legally liable to accept delivery, such plant, goods and materials becoming the property of Owner upon such payment being made by Owner.

ARTICLE 23 - CONFIDENTIALITY

Any information disclosed by one party to the other ("the transferee") incident to the performance of the Work which is designated in writing as proprietary is disclosed in confidence and the transferee shall restrict its use of such information solely to uses related to the Project or performance of this EPC Contract. Contractor and Owner shall treat such information as private and confidential and neither of them shall transfer, copy, list or disclose the same or any particulars thereof without the previous written consent of the other, provided that nothing in this Article shall prevent the publication or disclosure of any such information that has come within the public domain otherwise than by breach of this Article.

ARTICLE 24 - NOTICES

All notices and other communications required or permitted by this Contract shall be in writing and shall become effective when delivered by hand (including by messenger or courier) or received by telex, telecopier, facsimile, telegram or such other method of telecommunication capable of creating a writing, at the addresses set forth below or at

66

such other addresses as the party receiving notice shall subsequently designate by written notice to the other party. Without obviating the obligation to timely provide such notice to both Contractor addressees set forth below, a notice or communication to Contractor hereunder shall become effective upon the first date of delivery to or receipt of such notice by either Contractor addressee set forth below.

ARTICLE 25 - MISCELLANEOUS

25.1 APPLICABLE LAW

Throughout the course of performance of this EPC Contract, the parties shall comply with all applicable Laws relating to this EPC Contract and its performance. This EPC Contract shall be interpreted under and governed by the laws of New Zealand.

25.2 SEVERABILITY

In the event that any of the provisions or portions, or applications thereof, of this EPC Contract are held to be unenforceable or invalid by any court of competent jurisdiction, Owner and Contractor shall negotiate an equitable adjustment in the provisions of this EPC Contract with a view toward effecting the purpose of this EPC Contract, and the validity and enforceability of the remaining provisions or portions, or applications thereof, shall not be affected thereby.

25.3 AMENDMENTS AND WAIVERS

This EPC Contract may not be changed or amended orally, and no waiver hereunder may be oral, but any change or amendment hereto or any waiver hereunder must be in writing and signed by the party or parties against whom such change, amendment, or waiver is sought to be enforced.

25.4 COUNTERPARTS

This EPC Contract may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

25.5 ENTIRE CONTRACT

This EPC Contract constitutes the entire agreement between the parties hereto relating to the subject matter hereof, and supersedes any previous agreements or understandings between the parties..

68

25.6 EFFECT OF WAIVERS

Either party's waiver of any breach or failure to enforce any of the terms, covenants, conditions or other provisions of this EPC Contract at any time shall not in any way affect, limit, modify or waive that party's right thereafter to enforce or compel strict compliance with every term, covenant, condition or other provision hereof, any course of dealing or custom of the trade notwithstanding. The waiver by Supplier or Owner of any breach or failure to enforce any of the terms, covenants, conditions or other provisions of the Supply Contract at any time shall not in any way affect, limit, modify or waive Owner's or Contractor's right thereafter to enforce or compel strict compliance with every term, covenant, condition or other provision of this EPC Contract, any course of dealing or custom of the trade notwithstanding.

25.7 REPRESENTATIONS

By their execution hereof, the parties warrant that they are authorized to enter into this EPC Contract, that it does not conflict with any agreement, lease, instrument or other obligation to which either is a party or by which either is bound, and that it represents their valid and binding obligation, enforceable in accordance with its terms.

25.8 HEADINGS

The headings contained herein are not part of this Contract and are included solely for the convenience of the parties.

25.9 PUBLICITY

When reasonably practical, Owner shall acknowledge the role of Contractor as the contractor of the Project and the use of the Ormat equipment

in the Project in the press releases and other publications issued by Owner about the Project.

69

IN WITNESS WHEREOF, the parties have caused this EPC Contract to be executed as of the date first above written.

Exhibit 10.5.2

AMENDMENT NO. 1

TO

ENGINEERING

PROCUREMENT AND CONSTRUCTION CONTRACT

This AMENDMENT NO.1 TO THE ENGINEERING, PROCUREMENT AND CONSTRUCTION CONTRACT (the "Amendment") is made and entered into as of 2003 by and between Tuaropaki Power Company Limited, a New Zealand corporation with offices at Taupo, New Zealand ("Owner"), and Ormat Pacific Inc., a Delaware corporation

acting through its New Zealand branch with offices at Taupo, New Zealand ("Contractor").

RECITALS

- A. Owner and Contractor are parties to the Engineering, Procurement and Construction Contract dated as of August 23, 2002, (the "EPC Contract") pursuant to which Contractor agreed to arrange for the design, engineering, procurement, construction, fabrication, installation, commissioning, start-up and testing of a geothermal power plant at Owner's site located in Mokai, New Zealand.
- B. Owner and Contractor wish to amend certain provisions of the EPC Contract to clarify certain matters.

AGREEMENT

1. DEFINED TERMS

Terms defined in the EPC Contract shall have the same meaning when used in this Amendment, unless specifically defined otherwise herein.

2. AMENDMENT TO EPC CONTRACT

With effect from the date of this Amendment:

- (a) The definition of "Guaranteed Capacity" in Article 1 is amended to read as follows:

"The level of net electrical generating capacity for the Project guaranteed by Contractor, equal to 39 MW as corrected to the Design Conditions using the Correction Curves and formulas set forth in Exhibit D, as measured at the Power Measuring Point of the switch yard as per Drawing 0.002.95.641.0 and adjusted to include the 110/220kV transformer (T9) losses at Whakamaru but excluding line losses."

- (b) Article 9.1 will be amended by adding at the end of that Article the following:

"Contractor acknowledges that construction and operational experience from Mokai I may be relevant to the development of technical data, design and other

documentation required for the performance of the Work (including specification of the Equipment). Contractor agrees to provide to Owner prior to the Owner giving a Notice to Proceed under Article 5.1 a detailed listing of lessons learned during the construction and operation of Mokai I, together with details of the various design changes that have been or are proposed to be implemented in respect of the Project and/or the Equipment. Contractor further agrees that, to the extent not already incorporated in the design of the Project and/or the Equipment, it shall address those issues raised as part of the design review process."

- (c) The last sentence of subclause 13.1(b) appearing under Article 13.1 (Security Provided on Behalf of Contractor) will be amended by replacing it as follows:

"The US\$ Denominated L/C shall be reduced from time to time

upon arrival at the port of destination in New Zealand of Equipment or parts thereof (as may be evidenced by a notice of arrival issued by the shipping line agent) by the amounts computed as described in Exhibit J-2, so that the US\$ Denominated L/C will be reduced to 30% (Thirty Percent) of the sum of the US dollar denominated portion of the EPC Contract Price and the Supply Contract Price upon the completion of arrival of the Equipment at the New Zealand port. The US\$ Denominated L/C shall also be reduced from time to time by the amount of insurance proceeds received for any goods lost, destroyed or irrevocably damaged in marine transit and which were paid into escrow pursuant to Article 15.5".

- (d) Article 15.1 shall be amended by adding at the end of the clause the following paragraph:

"The insurance to be maintained pursuant to sub-paragraph (b) above shall include terrorism and war risk".

- (e) Article 15.5 (Application of Insurance Proceeds) will be amended as follows:

- (i) after sub-clause (a), by adding a new sub-clause (b):

"where the insurance proceeds arise as a result of a claim under the ocean marine shipment insurance maintained pursuant to Article 15.1(b) and the milestone payment for shipment of goods affected by the event of loss was not received by Contractor or Supplier, according to the case, (irrespective of whether the obligation to pay has arisen) an amount equal to the difference between the total insurance proceeds paid in respect of the event of loss or damage and the value of milestone payments under the Milestone Payment Schedule or the Supply Contract Milestone Payment Schedule paid by the Owner to the Contractor or the Supplier as the case may be in respect of that Equipment or other goods lost or damaged shall be paid directly to Contractor."

- (ii) by relettering sub-clause (b) as sub-clause (c), and amending its sub-clause (iii) by replacing "under Subsections 15.1(b) and (d)" with:

"under insurance referred to in Subsection 15.1(d), and all insurance proceeds for events occurring and covered by the insurance maintained under Subsection 15.1(b) in excess of amounts payable directly to Contractor under

Section 15.5 (b) above".

- (iii) by replacing the first sentence of the full paragraph following renumbered sub-clause (c)(iii) as follows:

"Directions will be placed with the escrow agent that the monies will be released from the account for each milestone payment within 48 (forty-eight) hours against presentation by Contractor or Supplier of documents in accordance with the Milestone Payment Schedule or the Supply Contract Milestone Payment Schedule, as applicable (as such shall be adapted for

goods or works not specifically mentioned there) verified by Owner's Representative as provided below, and so that payment in full is due no later than the supply (delivered to the New Zealand port as evidenced by a notice of arrival issued by the shipping line agent) of replacement goods and/or completion of the rectification of the relevant parts of the Work which had been lost, damaged or destroyed."

- (iv) at the end of Article 15.5 add the following:

"and provided further that the amount of the insurance proceeds payable to the Owner under sub-clauses (i) and (ii) above (in respect of any Equipment lost, damaged or destroyed that has not been replaced or rectified as of the date of termination or in respect of other loss or damages arising out of events giving rise to the claim) shall be reduced by the amount received by the Owner as a result of any claim on the US\$ Denominated L/C provided by Contractor pursuant to Article 13.2."

- (f) Exhibit A shall be amended by adding to the end of the sixth paragraph of clause 1.1 the words:

"Contractor acknowledges that construction and operational experience from Mokai I may be relevant to the development of technical data and design of the Project (including specification of the Equipment) and has included in the design of the Project those design revisions and modifications that were implemented for Mokai I or an appropriate equivalent or, to the extent not already implemented, will address those issues in the design review process in accordance with Article 9.1."

- (g) Exhibit A shall be amended by adding a new bullet point to clause 3.3 as follows:

"Description of operational experience from Mokai I to be addressed during the design review for the Project."

- (h) Exhibit A shall be amended by adding a new section 4.11 as follows:

"4.11 Interface with Mokai I

The Contractor acknowledges that Mokai I is an operational plant and that in performing the Work the Contractor will schedule all activities that involve direct interface with Mokai I plant or systems in a manner to be mutually agreed upon to accommodate the operational requirements of Mokai I and shall at all times conduct the Work with a view to minimising disruption to the operation of Mokai I"

- (i) Schedule B to Exhibit D is amended by deleting the Correction Curves contained therein and substituting the Correction Curves attached as the Schedule to this Amendment.

- (j) Exhibit J-2 (Form of Performance Bond) shall be amended as follows:

- (i) At the end of paragraph 2 (under the heading "Special Conditions") add the words "and/or as payments from insurance monies which were escrowed as a result of a

claim of loss under the ocean marine shipment policy and which were received in connection with milestone payments prior to shipment payments for replacement goods."

(ii) In Paragraph 3 (under the heading "Special Conditions"):

(aa) renumbering paragraph (a) as paragraph (a1);

(bb) adding a new subparagraph (a1)(3) after subparagraph (a1)(2) as follows:

"(3) Copy of Notice of arrival of the shipment of the equipment referred to in the Bill of Lading issued by the shipping line agent"

(cc) Adding the following after " IA = the total amount of the Invoices supporting such reduction request."

"And/or

(a2) By an amount equal to a sum not to exceed the amount stated in the escrow account agent's statement under (2) below in a reduction request to be presented to us by ORMAT in writing, together with of the following documents:

(1) Copy of ORMAT's certificate certifying that amounts have been claimed from the marine cargo insurer for an event of loss of goods in transit under the insurance maintained by ORMAT or OPI.

(2) Copy of the escrow agent's statement confirming the amount of the insurance proceeds deposited into the escrow account."

3. MISCELLANEOUS

3.1 This Amendment shall be effective on the date of execution.

3.2 This Amendment may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

3.3 Except as amended by this Amendment the EPC Contract remains in full force and effect.

IN WITNESS WHEREOF, the parties have caused this Amendment to be executed as of the date first above written.

LIST OF SCHEDULES

Schedule A	Owner's Technical Requirements
Schedule B	Contractor's Technical Proposal
Schedule C	Milestone Payment Schedule
Schedule D	Performance Tests
Schedule E	Project Schedule
Schedule F	Warranty Procedures
Schedule G	ORMAT Industries Ltd. Guaranty
Schedule H	Form of Performance Bond
Schedule I	Cancellation Fee
Schedule J	Drawings

iii

This ENGINEERING, PROCUREMENT AND CONSTRUCTION CONTRACT is made and entered into this ____ the day of _____, 2003 by and between Contact Energy Limited, a New Zealand limited liability company with offices at Wellington, New Zealand ("Owner") and ORMAT Pacific Inc., a Delaware corporation acting through its New Zealand branch with offices at Taupo, New Zealand ("Contractor").

RECITALS

A. Owner holds or will hold rights to use land at Wairakei, New Zealand, and to use certain of the geothermal resource underlying the land, resource consents and certain other associated rights, consents, commitments and facilities necessary for the construction, testing, generation and maintenance of an 14.38 MW (net) geothermal power plant.

B. Owner desires Contractor to design, engineer, procure, construct, fabricate, install, commission, start-up and test a new 14.38 MW (net) geothermal power plant at Owner's site located in Wairakei, New Zealand.

C. ORMAT Industries Ltd. has agreed to design, manufacture and supply certain equipment necessary for the construction of the geothermal power plant under the terms and conditions of the Supply Contract (as defined below) with Owner entered into contemporaneously with this agreement.

D. Contractor is willing to supply certain other equipment and perform the services set forth herein, upon the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the foregoing and the mutual covenants hereinafter contained, the parties hereby agree as follows:

ARTICLE 1 - DEFINITIONS

Unless the context otherwise requires, the following terms when used herein or in any Schedule hereof shall have the meanings set forth below:

"APPLICATION SOFTWARE" means all application programs, whether in electronic read only devices or otherwise, including data and utilities designed, developed or created by or on behalf of Contractor to be installed and/or supplied as part of the Works and its associated documentation.

"BANK BILL BID RATE" means the average New Zealand dollar 90 day bank bill bid rate (rounded upwards to the nearest second decimal place) as appearing at 11.00 am or as soon as practicable thereafter on the relevant day in Wellington on page BKBM of the Reuters screen.

"BASE DATE" means June 23, 2003.

"BEST ENDEAVOURS" means that the party shall promptly and diligently use all the resources and take all steps available to it which a prudent, determined and reasonable person, acting in its own interests and with a genuine desire to achieve the intended outcome, would take.

"BRINE RETURN TEMPERATURE" means the half-hourly arithmetic average of the temperature of the Geothermal Fluid measured every minute over a half hour period downstream of the Binary Plant at the Terminal Point where it is returned to the reinjection system.

"BINARY PLANT" means the binary power plant and all related and ancillary work to be provided by Contractor and the Supplier, and taken over by Owner under this EPC Contract as part of the Permanent Works.

"CHANGE" means any change to the requirements or obligations of this EPC Contract.

"CHANGE IN LAW" means the enactment, adoption, promulgation, modification or repeal after the Base Date of any Law (except regarding taxation) or to the Designation or any Standard that establishes requirements adversely affecting Contractor's costs or schedule for performing the Work.

"COMMENCEMENT DATE" means the date of this EPC Contract.

"CONSENT" means any consent, permit, licence, approval or the like, including the Owner's Consents.

"CONTRACTOR'S CHANGE" means a Change requested by the Contractor and agreed by Owner in terms of ARTICLE 8 (Changes).

"CONTRACTOR'S EQUIPMENT" means all equipment, apparatus, machinery, vehicles and other things required for the execution and completion of the Works and the remedying of any defects, but excludes Temporary Works, Plant and Permanent Works.

"CONTRACTOR'S REPRESENTATIVE" means the person designated by Contractor pursuant to SECTION 19A.2 (Contractor's Representative) to act as its representative.

"CONTRACTOR'S TECHNICAL PROPOSAL" means Contractor's proposal for meeting the Owner's Technical Requirements, and comprises the Contractor's preliminary design and specification for the Binary Plant and Contractor's proposals generally for carrying out the Works as set forth in SCHEDULE B.

"CORRECTED NET POWER OUTPUT" means the lowest of the Measured Net Power Output results, as corrected for deviations from the Guarantee Conditions using the Correction Curves, of the six tests comprising a single Net Power Output Performance Test as described in section 1.5.9 of EXHIBIT D (Performance Tests).

"CORRECTED PRESSURE DROP" means the highest of the Measured Pressure Drop results, as corrected for deviations from the Guarantee Conditions using the Correction Curves, of the six tests comprising a single Net Power Output Performance Test as described in section 1.5.9 of EXHIBIT D (Performance Tests).

"CORRECTION CURVES" means the curves and mathematical formulae set forth in SCHEDULE D (Tests) and used for the purposes of calculating the Corrected Net Power Output and the Corrected Pressure Drop.

"COST" means all expenditure necessarily, reasonably, properly and actually incurred (or to be incurred) by Contractor, whether on or off the Site, excluding any allowance for overhead, margin, profit and similar charges. Overhead for these purposes

3

means expenses required for the general overall running of Contractor's business, including administrative, financial and office expenses and supervision.

"DAY" means a calendar day.

"DEFAULT RATE" means, in any month, the Bank Bill Bid Rate appearing on the first business day of the month (namely the first day of the month in which banks in Wellington are ordinarily open for business) plus three percent per annum, calculated daily and capitalised monthly.

"DEFECTS CORRECTION PERIOD" means the period referred to in SUBSECTION 11.2.1.

"DESIGN RANGE" means the design range of operating conditions for the Binary Plant as set forth in section 1.3.1 of SCHEDULE A (Owner's Technical Requirements).

"DESIGN AND OTHER INFORMATION" means the documents specified in SUBSECTION 9.4.1.

"DESIGNATION" means the Taupo District Council's designation for road under the Resource Management Act 1991 and relevant accompanying conditions relating to the ETA, as described section 1.3.2(v) and Exhibit B9 of SCHEDULE A (Owner's Technical Requirements).

"DISPUTE" means any dispute or difference of any kind whatsoever which shall arise between Owner and Contractor in connection with or arising out of this EPC Contract (including without limitation any disputes or differences concerning the terms of the Supply Contract) or the carrying out of the Works, including any dispute or difference as to any instruction, order, direction, certificate or valuation by the Owner's Representative, whether during the progress of the Works or after its completion and whether before or after the termination, abandonment or breach of this EPC Contract.

"DOCUMENT" means: (a) any writing on any material; (b) any information recorded or stored by whatever means including electronically or on tape; and (c) sound recordings and visual recordings (including photographs and films).

4

"DRAFT AS-BUILT DRAWINGS" means markups (through hand interlineations or other similar means) of Contractor's major construction drawings for the Binary Plant marked to show as-built details of control and electrical systems and approximate locations of other material components of the Binary Plant that are reasonably relevant to the operation and maintenance of the Binary Plant.

"DRAWINGS" means the drawings in SCHEDULE A (Owner's Technical Requirements), SCHEDULE B (Contractor's Technical Proposal), SCHEDULE J (Drawings) and such other major drawings related to the Works provided by Contractor to Owner under this EPC Contract.

"FAIL SAFE" means a feature which ensures that the absence of any critical control or safety component, system, signal or function will not result in any unsafe condition.

"EPC CONTRACT" means this Engineering, Procurement and Construction Contract together with the Schedules attached hereto, which shall, taken as a whole, define the rights and obligations of the parties hereunder.

"EPC CONTRACT PRICE" means the total firm fixed lump sum price, payable to Contractor by Owner as set forth in SECTION 6.1 hereof and as adjusted pursuant to the provisions of this EPC Contract.

"EQUIPMENT" means the equipment that is to be provided by Supplier to Owner pursuant to the Supply Contract.

"ETA" means the Eastern Taupo Arterial Highway to be constructed by the Taupo District Council and Transit New Zealand, part of which is to run through the Wairakei Station and close to and/or through parts of Site 3 and Site 4.

"FINAL ACCEPTANCE" means satisfaction by Contractor or waiver by Owner of the conditions set forth in SUBSECTION 11.2.6, which will occur on the date specified in the Final Acceptance Certificate.

"FINAL ACCEPTANCE CERTIFICATE" means the certificate issued under SUBSECTION 11.2.6.

5

"FORCE MAJEURE" shall have the meaning assigned to that term in ARTICLE 22.

"GEOTHERMAL FLUID" means the geothermal brine to be supplied at the Geothermal Fluid Terminal Point in accordance with the interface data set forth in section 1.3.1 of SCHEDULE A (Owner's Technical Requirements).

"GEOTHERMAL FLUID TERMINAL POINT" means the Geothermal Fluid interface point defined in section 1.2.3 and Exhibit A2 of SCHEDULE A (Owner's Technical Requirements).

"GEOTHERMAL GROUP CONTROL ROOM" or "GGC" means Owner's existing control room which forms part of the Wairakei Station and which contains control facilities and personnel for operation and management of Owner's geothermal power stations and associated facilities.

"GRID" means the transmission network including related substations currently owned and operated by Transpower.

"GST" means Zealand Goods and Services Tax pursuant to the Goods and Services Tax Act 1985.

"GUARANTEE CONDITIONS" means the conditions and parameters in section 1.3.4 of SCHEDULE A (Owner's Technical Requirements).

"GUARANTEED NET POWER OUTPUT" means 14,380 kW being the minimum net amount of power measured in kW produced by the Binary Plant at Guarantee Conditions measured at the plant's revenue meters when all the Binary Plant's

auxiliaries are operating as normal with no supplementary power supply.

"GUARANTEED PRESSURE DROP" means 2.2 barg being the maximum brine system pressure drop across the Binary Plant as measured at the applicable Terminal Points for Geothermal Fluid supply and return at Guarantee Conditions.

"HAZOP REVIEW" (otherwise known as a hazard and operating review) means a formal, systematic examination of the design for the Binary Plant and interconnected

6

systems to identify matters which could lead to hazards, operability problems, nuisances or environmental harm in respect of the Binary Plant, Wairakei Station or their surroundings.

"INDUSTRY ARRANGEMENTS" means the applicable electricity industry arrangements and includes:

- (a) the New Zealand Electricity Market rules, the Metering and Reconciliation Information Agreement, and the Multilateral Agreement on Common Quality Standards; or
- (b) the electricity rulebook governed by an electricity governance board established by electricity industry participants (to the extent such rulebook supersedes the arrangements in paragraph (a)); or
- (c) industry rules made by an Electricity Governance Board established under the Electricity Act 1992 (to the extent such rules supersede the arrangements in paragraph (a)).

"INTELLECTUAL PROPERTY RIGHTS" means any right to, and any interest in, any patent, design, trade mark, copyright, trade secret and any other proprietary right or form of intellectual property (protectable by registration or not) in respect of any know-how, technology, concept, idea, data, program or other software (including in source and object codes), specification, formula, drawing, programme, design, system, process, logo, mark, style or other thing, conceived, used, developed or produced by any person.

"KW" means kilowatts.

"LAW" means statutes, regulations, codes, consents, ordinances, district and regional plan requirements, grid operator standards and codes, permits, rules, orders, judicial and administrative decisions and interpretations to the extent they have jurisdiction on performance of the Works under this EPC Contract, including Transpower's "Connection Policy" or substitute or equivalent document from time to time, the "Asset Owner Performance Obligations" (AOP0), Transpower's requirements as owner and operator of the Grid and the Industry Arrangements.

7

"LOCAL CONTROL ROOM" means the HMI control room for the operation of the Binary Plant which is to be designed and constructed by Contractor and to be located adjacent to the Binary Plant.

"MEASURED NET POWER OUTPUT" means net amount of power in kW produced by the Binary Plant measured at the Binary Plant's revenue meters when all the Binary Plant's auxiliaries are operating as normal with no supplementary power supply.

"MEASURED PRESSURE DROP" means the brine system pressure drop across the Binary Plant measured at the Terminal Points for supply and return of Geothermal Fluid.

"MILESTONE" means the completion of a discrete part of the Works or the occurrence of an event identified as such in the Milestone Payment Schedule.

"MILESTONE PAYMENT SCHEDULE" means the milestone payment schedule for payment of the EPC Contract Price, as set forth in SCHEDULE C.

"MW" means megawatts.

"OPERATING CONSUMABLES" means electric power, working fluid, water, chemicals, lubricants, filters, lamps, light bulbs and other consumable materials used to construct, commission, test and operate the Binary Plant.

"OPERATING PERSONNEL" means the Owner's Personnel hired by Owner to operate the Binary Plant and to be trained by Contractor under SECTION 3.1(0).

"OWNER'S CHANGE" means a Change requested by Owner and agreed by Contractor in terms of ARTICLE 8 (Changes) or other Change or event designated as an Owner's Change in this EPC Contract.

"OWNER'S CONSENTS" means the Consents obtained or to be obtained by Owner for the Works identified in SCHEDULE A (Owner's Technical Requirements).

"OWNER'S PERSONNEL" means the staff, labour and other employees of Owner, including the Owner's Representative, and any other personnel notified to Contractor by Owner from time to time.

8

"OWNER'S PLANNED OUTAGE SCHEDULE" means Owner's schedule of planned outages of the Wairakei Station, as updated and provided by the Owner to the Contractor from time to time.

"OWNER'S REPRESENTATIVE" means the person designated by Owner to act as its representative in all respects to this EPC Contract under SECTION 4.1(H) and having the powers contained in SECTION 4.2.

"OWNER'S TECHNICAL REQUIREMENTS" means the purpose, scope, design, performance expectations and other technical criteria for the Works specified in SCHEDULE A.

"PERFORMANCE GUARANTEES" means Guaranteed Net Power Output, Guaranteed Pressure Drop and the performance guarantees for reliability for the Binary Plant set forth in SCHEDULE D (Performance Tests).

"PERFORMANCE TESTS" means the handling trials, Net Power Output and Pressure Drop tests, and Reliability Run set out in SCHEDULE D (Performance Tests) to demonstrate that the Binary Plant meets the Performance Guarantees.

"PLANT" means all materials, supplies, apparatus, machinery, parts, tools, components, spares, appliances, vehicles and appurtenances intended to form or forming part of the Permanent Works.

"PERMANENT WORKS" means the permanent works to be designed, specified, procured, manufactured, assembled, installed, tested, completed, commissioned and repaired by Contractor in accordance with this EPC Contract, and includes the Binary Plant and all related and ancillary work identified in or to be reasonably inferred as being within the work required of the Contractor under this EPC Contract.

"POST-TAKE OVER WORKS" means the Works described in SECTION 7.9 (Post-Take Over Works).

"PROJECT SCHEDULE" means the completion schedule for the Plant set forth in SCHEDULE F and as it may be amended from time to time as set forth in SECTION 3.8 (Project Schedule).

"PROPRIETARY SOFTWARE" means all computer programs, whether in electronic read only devices or otherwise, including operating systems, data and utilities, supplied without modification by a third party software publishing house (not employed in any capacity to develop application software for the Works) as standard proprietary software available on standard licence terms and conditions, to be installed and/or supplied as part of the Works and its associated documentation.

"PUNCHLIST" means a list of minor incomplete or defective items which remain to be completed, prepared in accordance with SECTION 7.1 (Readiness for commissioning) and SECTION 7.2(A)(C) (Take Over).

"RELIABILITY RUN" means the reliability run test described in paragraph 1.5.12 of SCHEDULE D (Performance Tests) to establish that the Binary Plant can run reliability for a minimum period of 21 consecutive days.

"SCHEDULED TAKE OVER DATE" means the date by which the Binary Plant is required to achieve Take Over, which shall be the later of (a) June 20, 2005 and (b) such later date as may be established in accordance with SECTION 5.1.

"SITE" means the site on which the Permanent Works will be located, which is on land more specifically described in section 1.1.3 and 1.1.5 of SCHEDULE A (Owner's Technical Requirements).

"SITE 3" means:

- (a) the cross hatched area labelled "Site 3" as shown on Site Drawing WRK0262 in exhibit A3 of SCHEDULE A (Owner's Technical Requirements) and
- (b) the hatched areas labelled "Construction/Laydown Area" shown on Site Drawing WRK0262 in exhibit A3 of SCHEDULE A (Owner's Technical

Requirements) together with such additional areas as may, from time to time, be designated by Owner by notice to Contractor for Contractor's use.

"SITE 4" means the hatched area labelled "Site 4" shown on Site Drawing WRK 0262 in exhibit A3 of SCHEDULE A (Owner's Technical Requirements)) together with such additional areas as may, from time to time, be designated by Owner by notice to Contractor for Contractor's use. The hatched area labelled "Site 4" includes the construction/laydown area allocation for Site 4.

"SOFTWARE" means all computer programs, whether in electronic read only devices or otherwise, including Application Software, Proprietary Software, operating systems, data and utilities and any other software which is not included in Application Software or Proprietary Software installed and/or supplied as part of the Works, and its associated documentation (including user manuals).

"STANDARD" means any technical standard, code of practice, specification, rule, industry certification requirement, the Industry

Arrangements or the like relevant to the Works, including those specified in the Schedules.

"STATION CONTROLLER" means the individual whom is controller of the Wairakei Station from time to time or his or her authorised representative notified by Owner to Contractor from time to time.

"SUBCONTRACTOR" means any party (other than Contractor's employees) engaged by Contractor to perform any of the services or supply any item of goods or material pursuant to this EPC Contract.

"SUPPLIER" means ORMAT Industries Ltd., an Israeli corporation.

"SUPPLY CONTRACT" means the Supply Contract of even date herewith, together with the Schedules attached thereto, by and between Supplier and Owner, as the same may be amended from time to time, under which, among other things, Supplier is providing the Equipment and services to Owner for use in connection with the development, construction, start-up, testing, commissioning and completion of the Permanent Works.

11

"TAKE OVER" means satisfaction by Contractor or waiver by Owner of the conditions set forth in SECTION 7.2 (Take Over) and the taking over by Owner of the Binary Plant, which will occur on the date specified in the Take Over Certificate or the deemed Take Over pursuant to SECTION 7.5 (Delayed Tests).

"TAKE OVER CERTIFICATE" means the certificate issued under SECTION 7.3 (Request for Take Over Certificate).

"TEMPORARY WORKS" means all temporary works of every kind required for the carrying out of the Works but not forming part of the Permanent Works.

"TERMINAL POINT" means a location where Contractor connects certain elements of the Permanent Works provided under this EPC Contract to Owner's existing plant and equipment forming part of Wairakei Station. All Terminal Points are defined in paragraph 1.2.3 and Exhibit A2 of SCHEDULE A (Owner's Technical Requirements).

"THIRD PARTY" means any neighbour, statutory or regulatory authority, or other individual, and/or body which is either provided with goods or services by Owner or is affected or influenced by Owner's activities. Third Parties include but are not limited to Taupo District Council, Transit New Zealand, Her Majesty the Queen acting by and through the Commissioner of Crown Lands, Transpower, Hawke's Bay Network Limited, the Prawn Farm, Huka Jet, NETCOR and the Wairakei Tourist Hotel.

"TRANSPower" means Transpower New Zealand Limited, or such other owner/s and/or body/bodies appointed to operate or control the Grid.

"WAIRAKEI STATION" means Owner's land and improvements in the vicinity of the Site, including the existing geothermal power station, the GGC, the steamfield and all associated facilities (including services provided to Third Parties).

"WORKS" means all work which Contractor is required to carry out under this EPC Contract including the provision of all material, goods, things and services which are the responsibility of Contractor under this EPC Contract, including all things of a permanent or temporary nature necessary for the works and whether stated or reasonably implied as being within the work required of the Contractor under this EPC Contract including,

12

without limitation, the design, engineering, and procurement construction of a 14.38 MW (net) binary power plant on the Site in accordance with this EPC Contract and the administration of the Supply Contract and dealing with the Equipment to be supplied under the Supply Contract as provided herein.

"YEAR" means 365 days.

ARTICLE 2 - EPC CONTRACT DOCUMENTS

2.1 DOCUMENTS INCLUDED

This EPC Contract shall include the documents listed below, which are hereby incorporated herein by reference and which, in the event of conflict, are to be interpreted in accordance with the priority listed below.

- o These Terms and Conditions
- o the Owner's Technical Requirements
- o the other Schedules
- o any other documents forming part of this EPC Contract.

ARTICLE 3 - CONTRACTOR RESPONSIBILITIES

3.1 GENERAL RESPONSIBILITIES

Except as provided elsewhere in this EPC Contract, Contractor shall:

(a) Perform, or cause to be performed the Works, including providing all labour, materials, tools, supplies, Temporary Works, Contractor's Equipment, documents, Operating Consumables, equipment, transportation, engineering, insurance, technical services and all other things and services necessary and required to satisfactorily design, engineer, procure, construct, install, commission, start up and test the Binary Plant, including verification of the adequacy of the specification of the Equipment, and rectify any defects in the Binary Plant all in accordance with the requirements of this EPC Contract.

13

(b) Provide personnel necessary for commissioning, start-up and performance testing of the Permanent Works as described herein.

(c) Prosecute the Works continuously and diligently in accordance with the Project Schedule (including achievement of Take Over as provided in SECTION 7.2 (Take Over) by the Scheduled Take Over Date), using qualified and competent personnel, and complete the Works in accordance with good design and engineering practice and prudent electrical and mechanical engineering and in accordance with the provisions of this EPC Contract.

(d) Ensure that when completed, the Works (and the Equipment) are fit for the purposes for which the Works (and the Equipment) are intended namely the provision to Owner of a 14.38 MW (net, at Guarantee Conditions) binary plant capable to operate safely and lawfully on the Site using Owner-supplied Geothermal Fluid meeting the Design Range and capable of dispatching electricity to the Grid interface with the Wairakei Station all in accordance with the requirements set out in SCHEDULE A (Owner's Technical Requirements).

(e) Rectify defects in the Works as soon as practicable during the Defects Correction Period in accordance with SUBSECTION 11.12.3 (Defects Warranty); and

(f) Monitor on behalf of Owner as authorized in the Supply Contract the manufacture and delivery of the Equipment by Supplier, arrange for complete handling of all goods and material supplied under this EPC Contract and for the Equipment after delivery under the Supply Contract including, but not limited to inspection, expediting, shipping, unloading, receiving, customs clearance and customs claims. In connection herewith, Owner hereby grants to Contractor the authority to administer the Supply Contract and Contractor agrees to administer the Supply Contract and to enforce on behalf of Owner the Supplier's obligations there under, and Contractor shall administer the Supply Contract in the same way as if the Supplier was a Subcontractor under this EPC Contract. As between Owner and Contractor, Contractor shall be responsible for its acts or omissions in relation to its administration of the Supply

14

Contract, and shall be responsible for enforcing and obtaining performance by the Supplier of Supplier's obligations under the Supply Contract.

(g) Commission, start-up and performance test the Permanent Works in accordance with the Performance Tests.

(h) Comply in all material respects with all applicable Standards (including those described in SCHEDULE A (Owner's Technical Requirements) and SCHEDULE B (Contractor's Technical Proposal) and with all applicable Laws and Consents, relating to the Plant and the performance of the Works and be responsible for the adequacy and safety of all Site operations and of all methods of construction.

(i) Procure all Consents required for the Works, other than the Owner's Consents, and comply in all material respects with all Consents. Contractor shall not, without Owner's approval, seek to vary or modify any of the Owner's Consents or any of the conditions attaching to them, or to obtain any Consent which is inconsistent in any respect with any of the Owner's Consents or communicate with consent authorities in relation to the Owner's Consents. If it appears that any Consent that Contractor is in the process of obtaining may be issued subject to conditions that will affect the ability of Contractor to comply with any of its obligations under this EPC Contract including on Owner's ability to lawfully and conveniently use the Binary Plant and/or the Wairakei Station, Contractor must notify Owner as soon as reasonably practicable to enable Owner, if Owner elects, to confer with the authorities regarding such possible conditions. Such action by Owner shall not relieve Contractor of any of its obligations under this EPC Contract.

(j) complete the Works so the Binary Plant:

(i) is capable of being operated in all modes within the Design Range in compliance with the Consents; and

(ii) will not hinder or interfere with the ability of the Wairakei Station to operate in accordance with the resource Consents or other statutory or regulatory Consents applicable to the Wairakei Station and in force at the Base Date.

15

(k) If Contractor becomes aware that an act or omission of Contractor related to the Works is, or is likely to breach any applicable Law, or result in any fine, sanction or enforcement action (whether under the Resource Management Act 1991 or any other law), then Contractor shall immediately notify Owner and Owner may, in its reasonable discretion and without relieving the Contractor of any responsibility in respect of that event issue instructions to Contractor as it reasonably considers appropriate to mitigate

the risk identified and Contractor shall comply with such instructions issued by Owner at the expense in all respects of Contractor.

(l) Provide all temporary and permanent construction materials, equipment and supplies necessary for commissioning and testing of the Permanent Works until Take Over.

(m) Pay for construction utilities (electricity only) required to achieve Take Over except for any initial connection and disconnection costs.

(n) Train up to 25 operating and maintenance personnel, of whom up to 5 are senior personnel, designated by Owner at the Site over the time periods identified in SECTION 4.1(I) and during the commissioning and start-up phase of the Binary Plant construction. Such training shall be in conjunction with the normal commissioning and start-up activities employed by Contractor. Each person designated for training by Owner shall be a qualified for their role at the site and shall not be deemed employees or Subcontractors of Contractor. Training shall be conducted as described in section 1.12 of SCHEDULE A (Owner's Technical Requirements).

(o) Have a quality system/s that meets the requirements of the ISO9000 series of standards or equivalent in relation to the Works, provide copies and details of that system/s to Owner upon request from time to time and for review and acceptability prior to Take Over, ensure compliance by all Subcontractors with the quality system/s, and implement a system/s that ensures traceability of all critical parts and components of the supplied Plant and equipment and the associated quality records.

16

(p) Prepare detailed monthly progress reports on progress of the Works for the period ended on the last day of the previous month to Owner as reasonably required by Owner. Such reports shall include without limitation:

(i) all work achieved during the preceding month including Milestones achieved;

(ii) any significant events or achievements in the Works including the results of any tests;

(iii) significant events planned for the following month;

(iv) progress of the Works against programme, identifying any actual or potential slips in progress against programme and the likelihood that Take Over will be achieved by the Scheduled Take Over Date;

(v) means of rectifying any delay;

(vi) any notices of non-conformance and the extent to which there is any outstanding non-conformance.

(q) Provide special tools, and operating and commissioning supplies which are required for commissioning, start-up, and performance testing of the Permanent Works until Take Over.

(r) Not less than six (6) months prior to the Scheduled Take Over Date, provide to Owner draft operation and maintenance manuals (which shall incorporate the manuals of the Equipment) and prior to Take Over, provide at least two (2) copies of job books, operation and maintenance manuals (which shall incorporate manuals of the Equipment), operating data and Draft As-Built Drawings to Owner in a sufficient state of completion and containing sufficient detail to enable Owner to operate and maintain the Binary Plant properly,

safely, lawfully and without hindrance and without reliance in any way on Contractor and not later than six (6) months after Take Over, provide to Owner four copies of the final operation and maintenance manuals (which shall incorporate

17

manuals of the Equipment), operating data and detailed as-built Drawings and specifications.

(s) Exercise, in the design and specification of the Works and the verification of the adequacy of the specifications of the Equipment, and generally in connection with Contractor's responsibilities under this EPC Contract the skill and care to be expected of a qualified and competent designer, engineer and contractor experienced in work of similar nature and scope as the Binary Plant.

(t) Design, install, construct, commission, test and complete the Binary Plant using proven up to date good practices and which are consistent with the provisions of the Supply Contract and this EPC Contract.

(v) At Owner's request, at any reasonable time up to Take Over, Contractor shall participate in the conceptual design review and in the subsequent Site located dedicated design review with Owner's Personnel regarding the design of the means of integrating the Binary Plant with Owner's existing Wairakei Station HMI system, and provide at the Site one control engineer for a period of up to one week in the 12 months following Take Over to assist and advise Owner regarding Owner's coordination and integration of the Binary Plant with the existing Wairakei Station HMI system.

3.2 EMERGENCIES

In emergencies affecting the safety or protection of persons or the Work, Contractor, without special instruction or authorization from Owner, may take all reasonable actions to prevent such threatened damage, injury, or loss. This provision is not intended to limit Contractor's rights under any other provisions hereof, including, without limitation, ARTICLE 8 (Changes).

3.3 HEALTH AND SAFETY IN EMPLOYMENT ACT ("HSEA")

3.3.1 Contractor warrants to Owner that during Contractor's activity on the Site, up to and including Take Over of the Binary Plant, Contractor shall ensure that no act or omission by Contractor:

18

(a) in contravention of the HSEA causes a significant hazard, harm or serious harm to any employee of Contractor or any person at or in the immediate vicinity of the Site; or

(b) is a breach of any duty or obligation of Contractor under the HSEA; or

(c) does or is likely to give rise to the issue of an improvement or prohibition notice, enforcement proceedings or a prosecution under the HSEA against Owner, Contractor, or the Subcontractor.

The words and phrases used in this clause shall have the same meaning as is ascribed to them in the HSEA.

3.3.2 Contractor undertakes that before a Subcontractor commences work on the Site Contractor shall obtain similar warranties as those

stated in SUBSECTION 3.3.1 from that Subcontractor in relation to the subcontracted Work.

3.3.3 Contractor shall indemnify and keep indemnified Owner from all costs, damages, fines, penalties and expense incurred or suffered by Owner in respect of any breach of the HSEA and/or conviction or proceedings instigated against Owner pursuant to the HSEA directly or indirectly related to a breach by Contractor of any of the warranties set out in SUBSECTION 3.3.1.

3.3.4 If Contractor becomes aware that it is or may be in breach, or is likely to be in breach of any of the warranties in SUBSECTION 3.3.1 or any Subcontractor is or may be in breach of or is likely to breach the matters set out in the agreement between Contractor and Subcontractors pursuant to SUBSECTION 3.3.2, then Contractor shall immediately notify Owner of such a breach or anticipated breach and, in relation to any breach or anticipated breach in relation to any of the Work or subcontracted Work, Contractor shall consult with the Owner's Representative to avoid, remedy or mitigate such breach or anticipated breach.

3.3.5 Contractor, pursuant to the warranties given in SUBSECTION 3.3.1, shall have regard to the contents of the safety programme agreed

19

between Owner and Contractor in accordance with SCHEDULE A (Owner's Technical Requirements). The safety plan submitted shall meet the requirements of HSEA and any other applicable Laws, be suitable for the conditions of the Site, the Works, the Wairakei Station and be consistent with Owner's site and safety rules. A copy of the agreed safety programme shall be kept at the office of Contractor.

3.3.6 Contractor shall nominate a safety officer who shall be approved by Owner, which approval shall not be unreasonably withheld, to be responsible for the safety at the Site and in respect of Contractor's operations in the Wairakei Station, and such officer shall be available or be represented by a designee on the Site during business hours after the commencement of the Works at the Site and on call after hours.

3.3.7 If Contractor fails to comply with the obligations set out in this clause, Owner may require Contractor to suspend the Works until the failure is rectified. In the event of such suspension Contractor shall comply with its obligations under ARTICLE 20 (Suspension) but Contractor shall not be entitled to any extension of time under SECTION 5.1 (Extension of Time) or otherwise, payment of any costs (including Cost) or any adjustment of the EPC Contract Price as a result of such suspension.

3.3.8 Contractor shall ensure that all its employees and Subcontractors that will be working in the Wairakei Station:

- (i) attend the local induction course and receive training on Owner's safety procedures;
- (ii) are advised of any revision to Owner's safety procedures that are provided to Contractor;
- (iii) comply at all times with Owner's safety procedures;
and
- (iv) request clarification of any of Owner's safety procedures, including all access authorisations, that they do not understand.

If Owner reasonably considers any person employed by Contractor or any Subcontractor is not complying with Owner's site safety procedures, Owner may, or may require Contractor to, remove that person from the Wairakei Station.

3.4 PROJECT REPRESENTATION

Contractor has reviewed the provisions of the Supply Contract and warrants that the combination of the Works and the Equipment are adequate so that the Permanent Works, when completed in accordance with this EPC Contract, will meet the Owner's Technical Requirements.

3.5 ACCESS CONDITIONS

(a) Contractor shall have investigated and satisfied itself as to the suitability and availability of access routes to the Site and the Wairakei Station.

(b) Where Contractor wishes to have other access or intrusion onto or over land adjoining either the Site or the Wairakei Station, then arrangements must be made by Contractor and such access or intrusion will be entirely at Contractor's risk and cost. Contractor shall keep Owner informed in respect of negotiations for any such arrangements and Owner's consent shall be required for any such arrangements (which consent shall not be unreasonably withheld).

3.6 CONDITIONS AFFECTING THE CARRYING OUT OF THE WORKS

(a) Contractor shall be deemed to have:

(i) inspected the Site and surrounding locations, including surface conditions to the extent a qualified and competent designer, engineer, and contractor experienced in works in similar nature and scope as the Binary Plant would have; and

(ii) familiarised and satisfied itself with respect to:

(1) the nature of the Works and the areas where the Works is to be carried out;

21

(2) the Designation and the effect that it will have on the Wairakei Station, the Site and the Works;

(3) the general and local conditions with respect to weather, environment, transportation, access, waste disposal, lay down areas, handling and storage of materials and residue, availability and conditions of roads, climatic conditions and seasons, surface physical conditions at the Site, the Wairakei Station and the surrounding area;

(4) the location of all pipes, cables, utilities works and similar hazards on or about the Site, the Wairakei Station and the surrounding area; and

(5) hydrological and geotechnical matters as identified in Site hydrological and

geotechnical studies which may affect the carrying out of the Works,

in existence at or before the Commencement Date and to have taken all such matters into account in the EPC Contract Price such as qualified and competent designer, engineer, and contractor experienced in works in similar nature and scope as the Binary Plant would have.

(b) Except as otherwise expressly provided for in clause (c) below and elsewhere in this EPC Contract, Contractor shall not be entitled to an extension of time under SECTION 5.1 (Extension of Time) or otherwise, payment of any costs (including Cost) or to any adjustment of the EPC Contract Price as a result of any unforeseen difficulties or costs.

(c) Notwithstanding clauses (a) and (b), Contractor shall have no responsibility for, and shall be entitled to an Owner's Change under ARTICLE 8 (Changes) for, any material delays or costs resulting from the discovery of subsurface conditions being materially different from that ordinarily and reasonably expected at the Site, including load bearing of the subsoil being materially less than one would ordinarily and reasonably expect in the locality of the Site, or for unforeseen obstructions, or for the

22

presence of any hazardous materials, or from any material inaccuracy in any material designs, drawings or other information provided by Owner; provided, however, that if such event would also constitutes an event of Force Majeure then Owner may elect to not proceed with the Owner's Change in having Contractor remedy the consequences of such event and instead deal with impact of such event in accordance with the provisions of ARTICLE 22 (Force Majeure). For the avoidance of doubt, based upon the September 26, 2003 geotech study of the Site provided by Owner, Supplier and Owner acknowledge that Site ground stabilization work (e.g., pilings) is required to remedy the soil and subsurface conditions identified in that report and that such Works will be performed by Contractor as an Owner's Change to be implemented pursuant to ARTICLE 8 (Changes) (except that Contractor notes that there will be no change to the Scheduled Take Over Date) on an open book basis (both as to Costs and scope of work) with Owner paying Contractor its Costs for such Works plus 10% plus GST in accordance with SECTION 8.5 (Adjustments), which amounts shall be in addition to the EPC Contract Price specified in SECTION 6.1 (EPC Contract Price).

3.7 [INTENTIONALLY OMITTED]

3.8 PROJECT SCHEDULE

(a) Contractor shall maintain the relationship between progress and payment established by Contractor's draft Project Schedule contained in SCHEDULE E (Project Schedule) and the Milestone Payment Schedule contained in SCHEDULE C (Milestone Payment Schedule).

(b) At the end of the first month after the date of this EPC Contract and monthly after that, Contractor shall submit to Owner in terms of SECTION 9.4 (Design and other Information Review) a three month rolling Project Schedule detailing the work to be carried out during the following three months. The initial updated Project Schedule shall reflect the Scheduled Take Over Date and other dates specified in this EPC Contract. In addition, all Project Schedule updates shall, without limitation, show significant events for the following three months, reflect the timing of Contractor's planned interfaces with the various interface points identified in SCHEDULE A (Owner's Technical Requirements), demonstrate how any delay is to be recovered and show activities for rectifying any

defects and addressing any relevant matters raised in Contractor's monthly progress report under SECTION 3.1(P).

(c) In the event that:

(i) the Scheduled Take Over Date is extended in terms of SECTION 5.1 (Extension of Time) or

(ii) Owner instructs an Owner's Change in terms of ARTICLE 8 (Changes); or

(iii) Contractor or Owner considers for any reason that there is or will be a significant deviation between the actual or anticipated progress of the Works and the Project Schedule,

Contractor shall submit a further Project Schedule to Owner (subject, with respect to schedule issues arising out of clause (iii) above, to review by Owner pursuant to SECTION 9.4 (Design and Other Information)) revised to take account of such circumstance. Such revised Project Schedule shall identify the likely dates upon which the Project Works will be completed, Milestones achieved and how Contractor proposes to achieve Take Over in terms of Section 7.2 (Take Over) by the Scheduled Take Over Date.

3.9 HAZOP REVIEW

(a) Contractor shall:

(i) conduct a Hazop Review after the conceptual design and layout stage, and before the issue of process and instrumentation diagrams and single line drawings for construction;

(ii) engage appropriately qualified third parties to:

(1) train personnel participating in the Hazop Review in the methodology of a Hazop Review; and

(2) facilitate the Hazop Review;

(b) Owner will make available, at its cost and in good time as required to permit Contractor to proceed with the Hazop Review in accordance with the Project Schedule, appropriate Owner's Personnel to participate in the training in the Hazop Review methodology and in the Hazop Review. Contractor shall bear all other costs of the Hazop Review and shall make any changes in design identified by the Hazop Review as being required.

(c) The participation of the Owner's Personnel in terms of this SECTION 3.9 shall under no circumstances give rise to an entitlement to Cost, an adjustment to the EPC Contract Price or the extension of time under ARTICLE 5 (Extension of Time) or otherwise, nor shall it give rise to any entitlement to a Change.

3.10 INFORMATION TO BE SUPPLIED BY CONTRACTOR

(a) Contractor shall keep Owner informed, as reasonably required by Owner, on matters relating to the Works.

(b) Until issue of the Take Over Certificate, Contractor shall promptly

answer all enquiries reasonably made by and received from Owner, and thereafter through Final Acceptance use reasonable endeavors to assist Owner in any matter which may affect the operation and maintenance of the Binary Plant, if requested to do so by Owner, and at the reasonable cost of Owner unless such matter is part of the Works.

3.11 RETENTION OF DOCUMENTS AND INSPECTION

(a) Contractor shall ensure that adequate records are kept to verify that the Works are being carried out in accordance with this EPC Contract, including in accordance with all applicable Laws, Consents and Standards.

(b) Contractor shall maintain on the Site until Take Over all material documents in relation to the carrying out of the Works. In addition, Contractor shall retain all such documents for a period of 10 years following Take Over.

(c) Contractor acknowledges Owner's right, at Owner's expense and upon reasonable coordination with Contractor, to inspect and take copies of any of the

25

documents referred to in paragraph (b) for any reason in connection with this EPC Contract, and shall assist Owner, its representatives and any authorised public officers to inspect such documents and shall answer queries or supply information that is reasonably requested by such persons.

(d) To the extent that any documents referred to in this SECTION 3.11 are maintained on computer or other electronic storage device, then Contractor shall agree with Owner and adhere to a procedure for backup and off the Site storage of copies of such documents, in an electronic format accessible by Owner.

3.12 INSTRUCTIONS

Contractor shall comply with Owner's instructions, directions and notices reasonably in relation to the Works. If Contractor forms the view that any such instruction, direction or notice comprises an Owner's Change under this EPC Contract or a change under the Supply Contract then Contractor shall notify Owner promptly in terms of ARTICLE 8 (Changes) and in any event before giving effect to such instructions. To avoid doubt, no instruction, direction or notice by Owner that is not an Owner's Change shall give rise to an entitlement to any costs (including Cost), an adjustment to the EPC Contract Price or an extension of time under ARTICLE 5 (Extension of Time) or otherwise.

3.13 ATTENDANCE AT MEETINGS

Contractor shall attend or be represented (by such on-Site personnel reasonably requested by Owner) at all meetings described in the Schedules (if any) and at all other meetings prior to Take Over reasonably convened by Owner to which Contractor may be summoned. Such meetings will be held as reasonably requested by Owner and coordinated with Contractor to avoid unreasonably interference in the performance of the Works, but not less frequently than once a month. At such meetings Contractor shall advise Owner on all material matters relating to the Works.

3.14 CONSENT OF TAUPŌ DISTRICT COUNCIL & TRANSIT NEW ZEALAND

(a) Contractor acknowledges that one of the Owner's Consents required is the approval of the Taupo District Council to Contractor's proposal setting out the exact

location, design and construction methods expected to be required for Geothermal Fluid pipelines to cross the area of the ETA in order to connect the Binary Plant to the existing reinjection system. This approval will also be required for any other Works that may be proposed upon the ETA.

(b) Provided that Contractor has fulfilled in all material respects its obligations in the Schedules to assist Owner in gaining the required approval for Contractor's proposal and Owner has failed to secure that approval from the Taupo District Council by the deadline specified for such item in the Project Schedule, such matter shall be treated as an Owner's Change pursuant to SECTION 8.4 (Owner's Change).

3.15 COMMUNICATION

Contractor shall direct all of the following communications (whether written or oral) through Owner:

- (a) communications with Waikato Regional Council and Taupo District Council or other Third Parties relating to the Owner's Consents and where the Works may affect or be affected by the proposed ETA;
- (b) communications with Transpower relating to the Works, the Site and/or the Binary Plant (including in relation to dispatch of electricity from the Binary Plant);
- (c) communications with Transit New Zealand relating to the Works, (except for matters or permits associated with the transportation of equipment to the Site).
- (d) communications relating to the Works, the Site and/or the Binary Plant with any other person or entity reasonably designated by the Owner from time to time where the Owner (acting reasonably) considers that such communications may affect the Owner's interests.

Owner shall use its Best Endeavors to promptly and diligently conduct such communications with such Third Parties in good time as required to permit Contractor to proceed with the Works in accordance with the Project Schedule.

3.16 EMERGENCY ACTION

(a) If any emergency arises in relation to the Works and Contractor cannot be contacted or is unable or unwilling to take appropriate and timely remedial action, Owner may take any emergency action it considers necessary.

(b) Where Contractor was obliged, under this EPC Contract or otherwise, to take emergency action and Owner takes such action on Contractor's behalf as a result of Contractor's failure to take such action as described in paragraph (a), such action by Owner shall not relieve Contractor of any such obligations and the cost of taking such action shall be recoverable by Owner as a debt due from Contractor.

3.17 CO-EXISTING USE OF THE WAIRAKEI STATION

(a) Contractor acknowledges that:

- (i) Contractor is required to carry out part of the Works

in the vicinity of the Site and in the Wairakei Station; and

- (ii) the Wairakei Station and Owner's power stations at Wairakei, Ohaaki and Poihipi, which are controlled from the GGC, are in use by Owner for the generation and dispatch of electricity onto the Grid, disruption to which has the potential to cause loss to Owner and impose material financial and social costs on others; and
- (iii) Third Parties rely on Wairakei Station and its environs to provide goods and services including prawn farming and tourism, disruption to which has the potential to have adverse implications for Owner and/or those Third Parties.

(b) Contractor shall not interfere with or disrupt Owner's, or the Third Parties' (referred to above), use of the Wairakei Station, which includes an obligation not to interfere with or disrupt the Owner's use of its power stations at Wairakei, Ohaaki and Poihipi, given that the GGC is used to operate those power stations remotely. Without limitation, where any work under this EPC Contract may reasonably interfere with or

28

disrupt Owner's use of the Wairakei Station, Contractor shall only carry out such work during a planned outage in terms of the Owner's Planned Outage Schedule; provided, however, that Owner shall develop the Owner's Planned Outage Schedule in a manner so as to reasonably permit Contractor to proceed with such Works in accordance with the Project Schedule. If Owner makes any changes to Owner's Planned Outage Schedule and Contractor suffers delay or incurs Cost as a result, Contractor shall be entitled to an Owner's Change therefor pursuant to ARTICLE 8 (Changes):

(c) Contractor shall give Owner 7 days notice of Contractor's intention to undertake any activities in the Wairakei Station or to undertake any activities which may reasonably impact on the use or operation of the Wairakei Station, including details of such intended activities.

(d) Contractor shall keep Owner updated on a daily basis as to:

- (i) any changes to Contractor's intentions notified under paragraph (c) (any material changes shall require a further 5 days notice under paragraph (c)); and
- (ii) once Contractor commences such activities, the progress of such activities.

(e) Owner shall be entitled to have an observer present during the carrying out of activities required to be notified by Contractor under paragraph (c);

(f) if Owner reasonably considers that there is a real risk that an act or omission by Contractor may disrupt or interfere with Owner's use of the Wairakei Station, and/or Owner's use of its power stations at Wairakei, Ohaaki or Poihipi, given that the GGC is used to operate those power stations remotely, or the dispatch of electricity into the Grid:

- (i) Owner may instruct Contractor to do or omit anything that Owner, acting reasonably, considers is required in order to overcome such potential disruption or interference. Such instruction may include an

instruction to cease all work, to remove any part of the Works and/or to undertake any work;

- (ii) Contractor shall immediately comply with any such instruction; and
- (iii) such instruction shall, if appropriate in the circumstances, be treated as an Owner's Change for the purposes of ARTICLE 8 (Changes).

3.18 CO-EXISTING USE OF THE GGC

Without limiting SECTION 3.17 (Co-existing use of the Wairakei Station), Contractor:

(a) acknowledges that the Owner will be integrating and connecting the Binary Plant to the GGC, and that eventually the Binary Plant will be controlled from the GGC;

(b) acknowledges that the GGC is also used to control Owner's power stations at Wairakei, Ohaaki, and Poihipi so that disruption of the GGC has the potential to cause material financial loss to, and have other adverse implications on, Owner;

(c) will avoid any interference with or disruption to Owner's remote control of the Wairakei, Ohaaki and Poihipi power stations from the GGC;

(d) will co-operate with Owner and comply with the Schedules in relation to any activities it carries out at or in relation to, the GGC;

(e) use competent employees, contractors and Subcontractors who are experienced in work of a similar nature and scope in carrying out all activities at, or in relation to, the GGC. Without limitation to ARTICLE 19 (Subcontractors), Owner will have the right to reasonably approve all such employees, contractors and subcontractors at any time.

3.19 CO-OPERATION

(a) Contractor acknowledges that during the carrying out of the Works Owner or a Third Party may wish to carry out work on or adjacent to the Site and/or the Wairakei Station. Contractor shall co-operate and co-ordinate with Owner and any such Third

Party to allow them the reasonable opportunity to carry out any such work with the approval of Owner, provided, however, that Contractor shall not be obligated under this clause to undertake any activity that will unreasonably interfere with Contractor's performance and completion of the Works in accordance with the Project Schedule.

(b) Contractor acknowledges that:

- (i) Taupo District Council and/or Transit New Zealand may wish to construct the ETA in future adjacent to the Site as shown on Site Drawing number WRK 0262 in exhibit A3 of SCHEDULE A (Owner's Technical Requirements) and as described in the Designation. The

designating authority or its contractors or agents may therefore wish to undertake investigations, design or construction works for the proposed road at the same time as Contractor is carrying out the Works;

- (ii) concessionaires and others may from time to time undertake improvements to their facilities on neighbouring lands including neighbouring Wairakei Tourist Park land at the same time as Contractor is carrying out the Works;
- (iii) and in all cases Contractor shall co-operate with and co-ordinate its activities with Owner and with Third Parties as appropriate and take such actions as are set out in the Schedules or as are reasonable to accommodate these requirements with the approval of Owner.

(c) Any Change required by Contractor as a result of complying with its obligations under paragraphs (a) or (b) shall be treated as an Owner's Change pursuant to ARTICLE 8 (Changes).

(d) If the Binary Plant is capable of producing electricity prior to Take Over then:

- (i) Contractor shall either (at Owner's option) allow Owner to generate and dispatch electricity from the Binary Plant onto the Grid, or shall

31

comply with Owner's instructions in relation to generation and dispatch of electricity from the Binary Plant; and

- (ii) if Contractor suffers delay or incurs Cost as a result, Contractor shall be entitled to an Owner's Change therefor pursuant ARTICLE 8 (Changes).

3.20 SECURITY

Contractor shall be responsible for security of the Site prior to Take Over. This obligation includes keeping unauthorised persons off the Site.

3.21 CONTRACTOR'S OPERATIONS ON THE SITE AND WAIRAKEI STATION

(a) Contractor shall confine all of its operations (including Contractor's Equipment and all its personnel) to the Site and, only to the extent necessary for carrying out the Works, the Wairakei Station.

(b) Contractor shall comply with all reasonable security requirements of Owner in relation to the Wairakei Station.

(c) During the carrying out of the Works Contractor shall keep the Site and the Wairakei Station free from all wreckage, rubbish, unnecessary obstruction, and shall store or remove from the Site and the Wairakei Station any Contractor's Equipment, surplus materials and Temporary Works which are no longer required.

(d) Upon the issue of the Take Over Certificate and as part of the Post-Take Over Works, Contractor shall:

- (i) clear away and remove all Contractor's Equipment,

surplus materials, wreckage, rubbish and Temporary Works relating to the Works;

- (ii) leave the Site and the Binary Plant, and with respect to the Works, the Wairakei Station, in a clean and safe condition; and
- (iii) reinstate all construction/laydown areas relating to the Works.

32

However, Contractor may retain on the Site, in a tidy and orderly manner in a place designated by Owner for the duration of the Defects Correction Period, such Contractor's Equipment as is required for Contractor to fulfill its obligations under this EPC Contract.

ARTICLE 4 - OWNER RESPONSIBILITIES

4.1 GENERAL RESPONSIBILITIES

Owner shall, at Owner's cost and expense and not as part of the EPC Contract Price payable to Contractor:

(a) Be responsible for making any and all arrangements for any sale and purchase of electricity to be generated by the Binary Plant, and for ensuring that Transpower enters into agreements allowing for the connection of the Binary Plant and the delivery of electricity generated by the Binary Plant at the high voltage interface point specified in SCHEDULE A (Owner's Technical Requirements) in good time to permit commissioning, start-up, testing and operation of the Binary Plant in accordance with the Project Schedule.

(b) Arrange for and obtain all Owner's Consents in good time as required by Contractor to permit Contractor to proceed with the Work in accordance with the Project Schedule, on terms acceptable to Owner, and in accordance with the terms of this EPC Contract, and to pay for all fees associated therewith. Without derogating from the aforesaid, Contractor, upon Owner's specific request, will provide all necessary technical information to Owner regarding the Works to aid Owner in its efforts to obtain such consents and permits.

(c) Provide the Site, including space for all construction facilities, lay-down, storage and disposal areas, roads and other means of access to Contractor in good time to permit Contractor to proceed with the Work in accordance with the Project Schedule, subject to ARTICLE 3 (Contractor Responsibilities) and in particular SECTION 3.5 (Access Conditions) and SECTION 3.6 (Condition affecting the carrying out of the Works).

(d) Obtain and provide the supply of Geothermal Fluid in accordance with the Design Range to the Geothermal Fluid Terminal Point after being given the

33

requisite 3 day prior notice of testing under SECTION 10.2 (Notice of Testing) and in good time to permit commissioning, start-up, testing and operation of the Binary Plant in accordance with the Project Schedule. If Contractor notified Owner in its Commissioning and Performance Testing PLAN provided pursuant to paragraph 1.2.1 of SCHEDULE D (Performance Tests) that it requires Geothermal Fluid in addition to the volume per hour specified in the Design Range and Owner has confirmed to Contractor the technical feasibility and cost of making the additional supply if any, Owner shall on demand of Contractor supply up to the

agreed additional volume of Geothermal Fluid and Contractor shall pay Owner the agreed cost of providing it. Owner shall be entitled to interrupt the supply of Geothermal Fluid but such interruption shall be treated as an Owner's Change pursuant to ARTICLE 8 (Changes).

(e) Accept the Geothermal Fluid for return to the reinjection system or other disposition following its use by Contractor at the Terminal Point, provided the temperature exceeds the minimum Brine Return Temperature of 85(Degree) C.

(f) Perform the obligations of Owner under the Supply Contract so that Supplier can make available the Equipment furnished by Supplier in accordance with the Supply Agreement to Contractor (on behalf of Owner), for incorporation in the Works.

(g) Provide access to electricity, water and communications at the Terminal Points specified in SCHEDULE A (Owner's Technical Requirements) in good time to permit construction, commissioning, start-up, testing and operation of the Binary Plant in accordance with the Project Schedule.

(h) Designate an Owner's Representative who shall act as a single point of contact with Contractor in all matters on behalf of Owner. Contractor may require replacement of Owner's Representative on reasonable grounds, which shall be described to Owner. Owner may from time to time appoint alternative or additional persons to act in place of the Owner's Representative and shall give Contractor written notice of such appointment. Contractor shall act on the instructions of the following people, and no others:

34

- (i) the Owner's Representative (or any alternate or additional persons notified by Owner to Contractor under this clause); and
- (ii) in relation to any matter which may affect the Wairakei Station, the Station Controller or the Owner's Representative (or any alternate or additional persons notified by Owner to Contractor under this clause).

(i) At least four (4) months prior to commencement of Contractor's commissioning activities, provide up to 5 senior operating and maintenance personnel and at least two (2) months prior to commencement of Contractor's commissioning activities, provide up to 25 regular operating and maintenance personnel, all for training by Contractor as provided pursuant to SECTION 3.1(N), and for commissioning, start-up, performance testing, and operation through Take Over. Owner and Owner's operation and maintenance personnel shall provide reasonable cooperation with Contractor in allowing Contractor to conduct all testing activities, including the Performance Tests, to complete the Work and to perform all of Contractor's warranty obligations in a timely and cost efficient manner.

(j) Promptly (but not later than ten (10) days from delivery) approve, or provide written comments to the extent necessary to, all Design and Other Information submitted to Owner for approval or comment pursuant to ARTICLE 9 (Access and Review by Owner).

(k) Owner shall be the importer of record and consignee for all goods and materials supplied under this EPC Contract and the Equipment and shall be responsible for all New Zealand taxes, duties and levies associated therewith. Owner hereby grants to Contractor the right to act as Owner's agent, including executing documentation on Owner's behalf, for purposes of accomplishing the importation of all goods and materials for the Binary Plant into New Zealand

under this EPC Contract and the Supply Contract, including the Equipment, and the processing of such goods and materials through customs.

35

4.2 RESPONSIBILITIES OF OWNER'S REPRESENTATIVE

The Owner's Representative is authorized to:

- (a) give a decision, opinion or consent; or
- (b) express satisfaction or disapproval; or
- (c) determine value; or
- (d) otherwise take action which may affect the rights and obligations of Owner or Contractor.

The Owner's Representative shall consult with Contractor in an endeavour to reach an agreement before exercising such authority. If agreement is not achieved, the Owner's Representative shall exercise such authority reasonably.

If Contractor has a Dispute with the determination made by the Owner's Representative, such Dispute shall be resolved as provided in ARTICLE 16 (Dispute Resolution). Until any contrary determination is made pursuant to ARTICLE 16 (Dispute Resolution), Contractor shall proceed with the decisions and instructions given by the Owner's Representative.

Owner shall be entitled to replace the Owner's Representative from time to time upon giving prior written notice to Contractor.

ARTICLE 5 - EXTENSION OF TIME

5.1 EXTENSION OF TIME

5.1.1 In addition to any of its rights to recover additional Costs it incurs upon the occurrence of the following events as provided in other provisions of this EPC Contract, Contractor shall be entitled to an extension to the Scheduled Take Over Date and other dates in this EPC Contract to the extent that Contractor is or will be delayed either before or after such dates by any of the following causes:

- (a) an Owner's Change;
- (b) a Change in Law;
- (c) a Force Majeure event;
- (d) subject to ARTICLE 3 (Contractor Responsibilities), physical conditions or circumstances at the Site, which are materially adverse and would not be reasonably foreseeable by an experienced contractor;
- (e) delay to any tests required for Take Over as a result of:
 - (i) the failure of Owner to provide the Geothermal Fluid that meets the Design Range or to accept Geothermal Fluid not less than 85(Degree) C after it has been run through the Binary Plant for reinjection or other disposal; or

36

- (ii) the failure by Transpower (arising other than as a result of a breach or failure by Contractor or Supplier to comply with their respective obligations under this EPC Contract and Supply Contract, as appropriate) to transport and/or take the electrical power generated by the Binary Plant as a result of carrying out such tests or Binary Plant commissioning;
- (f) any unreasonable delay, impediment or prevention by Owner other than the exercise of Owner's rights under this EPC Contract or the Supply Contract;
- (h) a delay to Supplier for which Supplier is entitled to an extension of its Delivery Schedule pursuant to Section 5.1 of the Supply Contract,

provided that:

- (i) the delay does not arise as a result of a default or failure by Contractor or Supplier;
- 37
- (ii) the ability of Contractor to achieve Take Over by the Scheduled Take Over Date is actually affected by the delay. Contractor will only be entitled to an extension of the Scheduled Take Over Date to the extent of such effect;
 - (iii) the delay could not have been prevented or overcome by the exercise of foresight, care and diligence of a professionally qualified and competent contractor experienced in work of a similar nature and scope as the Works;
 - (iv) Contractor and/or Supplier as the case may be has used its Best Endeavours to mitigate the delay, including making such reasonable changes to the timing, method, and sequence of the Project as Owner may propose and finding alternative suppliers, and offering them assistance; and
 - (v) Contractor and/or Supplier as the case may be has advised Owner of the potential for delay as soon as the potential became apparent, or would have become apparent to a qualified and competent contractor experienced in work of a similar nature and scope to the particular work in question.

Notwithstanding that Contractor has not claimed an extension of time, Owner may at any time and from time to time by notice to Contractor as an Owner's Change pursuant to ARTICLE 8 (Changes) extend the Scheduled Take Over Date.

5.1.2 If Contractor believes that it is entitled to an extension of time under this SECTION 5.1, Contractor shall give notice to the Owner's Representative of the same as soon as reasonably practicable and in any event within 5 days of the day when Contractor learns of the delay. Contractor shall keep such contemporary records as may be reasonably necessary and feasible to substantiate such delay, either at the Site or at another location reasonably acceptable to the Owner's Representative and shall provide such information to the Owner's Representative as he or she shall reasonably require.

Contractor shall permit the Owner's Representative to inspect such records during Contractor's normal business hours, and shall (if requested) provide the Owner's Representative with a copy of such records

5.1.3 Within 14 days of such notice (or such other period as may be agreed by the Owner's Representative), Contractor shall submit supporting details of the delay. Except that, if Contractor cannot submit all relevant details within such period because the cause of delay is continuing or such details are not yet reasonably available, Contractor shall submit interim details at intervals of not more than 14 days (from the first day of such delay) and final supporting details of its application within 14 days of the last day of delay. If Contractor fails to meet any such time periods, Contractor shall notify Owner as soon as reasonably practicable. Contractor's failure to meet the time periods specified in this SECTION 5.1 shall not affect Contractor's right to the extension of time unless such failure has materially prejudiced the ability of Owner to rectify or mitigate the causes or consequences of the delay in which case the extension of time granted to Contractor shall not include any periods of delay that could reasonably have been avoided if not for such failure to give notice.

5.1.4 The Owner's Representative shall proceed to agree upon or determine such extension of time as may be due. The Owner's Representative shall promptly notify Contractor accordingly.

ARTICLE 6 - COMPENSATION AND PAYMENT

6.1 EPC CONTRACT PRICE

6.1.1 For the performance of the Work, Owner shall pay Contractor, in the manner and at the times hereinafter specified, the EPC Contract Price in the amount of Eight Hundred Thirty Thousand United States Dollars (U.S. \$830,000) and Seven Million Five Hundred Twenty-Two Thousand Four Hundred Forty-Seven New Zealand Dollars (NZ\$7,522,447). The EPC Contract Price is net of all applicable New Zealand taxes (other than the New Zealand income taxes of Contractor, and New Zealand employee-related taxes of Contractor, all of which the Contractor shall be responsible to pay), duties and levies including without limitation any New Zealand property taxes such as rates

assessed against the Works or the Plant and the payment of any such taxes, duties and levies (other than the New Zealand income taxes, and New Zealand employee-related taxes, of Contractor) shall be the responsibility of Owner. Contractor shall provide reasonable cooperation to Owner to reduce Owner's exposure to any tax, duty or levy.

6.1.2 The EPC Contract Price (plus any GST, and less any withholding required by law) shall be full payment for performance of all of Contractor's obligations under and in connection with this EPC Contract, and Contractor shall be deemed to have satisfied himself as to the correctness and sufficiency of the EPC Contract Price. The EPC Contract Price includes Contractor's income taxes and employee-related taxes of the Contractor and withholding taxes that Owner may be required by law to withhold from any payment due to Contractor.

6.1.3 The EPC Contract Price shall be adjusted only as

expressly provided for in this EPC Contract and shall not be adjusted for other changes in the cost of equipment, materials, labour or other inputs or currency exchange rates.

6.1.4 The parties agree:

(a) That they are independent parties dealing at arm's length with each other in relation to the matters contemplated by this Contract.

(b) For the purposes of Division 2 of Subpart EH of the Income Tax Act 1994, the parties confirm that the EPC Contract Price does not include any capitalised interest and it is the consideration the parties would have agreed, on the Commencement Date, if payment was required in full at the time the first right in the contracted property was transferred or the services were provided.

6.1.5 For the avoidance of doubt, the parties acknowledge and agree that:

(a) any interest on overdue payments is separate from and does not form part of the EPC Contract Price; and

40

(b) the gross EPC Contract Price includes any early completion payment under SECTION 6.5 (Early Completion Payment), taxes, levies or duties paid by the Owner under this Contract.

6.2 PAYMENT

6.2.1 Schedule C hereto sets forth the Milestone Payment Schedule, which is intended to cause payments to approximate the value of Works performed by Contractor. Contractor shall invoice Owner on achievement of Milestones in accordance with the Milestone Payment Schedule. Each payment shall be allocated pro rata between the United States Dollar and the New Zealand Dollar portions of the EPC Contract Price (and paid in such currency).

6.2.2 Upon the execution of this EPC Contract by the parties, Contractor may issue its first invoice for payment of the first milestone under the Milestone Payment Schedule. Thereafter on or before the tenth (10th) day of each month, Contractor shall furnish Owner's Representative a detailed progress invoice for payment based on Milestones achieved or due under SECTION 6.5 (Early Completion Payment), during the period ending on the last day of the previous month accompanied by the documents described under the Milestone Payment Schedule for which payment is demanded and any other documents as required under SECTION 6.4 (Preconditions to Milestone payments) (such invoice, and each invoice under this contract, is to include Contractor's New Zealand registration number for GST purposes, and other information to comply with the requirements for a "tax invoice" in section 24 of the Goods and Services Tax Act 1985).

6.2.3 Upon accomplishment of the Milestone entitled "Delivery of Final Documentation" in the Milestone Payment Schedule, Contractor shall submit an invoice to Owner's Representative, summarizing and reconciling all previous invoices and payments in the amount of the EPC Contract Price less payments to date. Owner shall pay the amount of the EPC Contract Price outstanding in full within ten (10) days of receipt of such invoice, subject to SUBSECTIONS 6.2.4 and 6.2.5 below.

6.2.4 Owner's Representative shall verify that the invoices submitted under SUBSECTION 6.2.2 OR 6.2.3 and the documents submitted pursuant to

SUBSECTION 6.2.2 in support of the claim for payment, and shall, within ten (10) days of their receipt, either approve said invoice or give written notice within such period of errors or disputes with said documentation. Contractor shall be entitled to payment of an instalment only when it has met the applicable pre-conditions, if any, in SECTION 6.4 (Preconditions to Milestone Payments) and achieved all of the requirements of the relevant Milestone in conformity with the requirements of this EPC Contract. If Owner's Representative fails to approve the invoice for release of the Milestone payment or to provide the notice regarding errors or Disputes in the documentation within such period, in the absence of the invoice and the documents being patently false or inaccurate, the invoice and the accompanying documentation shall be deemed conclusive evidence sufficient for the release of such Milestone payment. In the case Owner's Representative provides written notice of errors or Disputes in said documentation within the period described herein Contractor shall resubmit the corrected progress invoice and/or documentation, and the above described approval process shall reapply.

6.2.5 Subject to meeting the requirements of SECTION 6.4(A) and (B), Owner shall pay Contractor the first payment due under the Milestone Payment Schedule within ten (10) days of the receipt of Contractor's invoice. With respect to all invoices thereafter, Owner shall pay Contractor on or before the 5th business day following Owner's approval or deemed approval of the invoice or any undisputed portion thereof pursuant to SUBSECTION 6.2.4 plus the GST, less any set-off for amounts which are due and owing to Owner from Contractor under this EPC Contract. When a set-off sum is in Dispute the parties shall promptly refer the matter for determination under the Disputes resolution procedure set forth in ARTICLE 16 (Dispute Resolution) and any moneys set-off and subsequently determined to be payable shall thereupon be paid together with interest for late payment.

6.2.6 If any Punchlist items remain to be completed upon Take Over, Owner's Representative may determine to withhold an amount from the remaining Milestone payments equal to up to one and a half times the reasonably estimated value of all Punchlist items remaining on an agreed upon punch list, with each such withheld amount to be paid to Contractor upon satisfactory completion of each such Punchlist item,

42

Contractor to accumulate claims and send invoices to Owner therefor no more frequently than on a monthly basis.

6.2.7 If there is any Dispute about amounts invoiced and not paid, and the Dispute is not resolved within ten (10) days of notice by Contractor of such Dispute, the parties shall promptly refer the matter for determination under the disputes procedure in this EPC Contract and any moneys set-off and subsequently determined to be payable shall thereupon be paid together with interest for late payment from the date payment was originally due to the date of payment at the Default Rate.

6.3 INTEREST

All monies not paid under this EPC Contract (including liquidated damages) by the due date for payment shall bear a late payment charge from the date payment was due to the date of payment at the Default Rate, unless such payment has been disputed and the Dispute has been resolved in favour of the paying party.

6.4 PRECONDITIONS TO MILESTONE PAYMENTS

The preconditions referred to in SUBSECTION 6.2.4 are:

- (a) Contractor must have provided to Owner prior to the first Milestone payment the NZ\$ Denominated L/C and the US\$ Denominated L/C and the parent company guaranty to Owner as provided in ARTICLE 13 (Securities);
- (b) Contractor must have produced to Owner evidence confirming that Contractor has in place the insurances required in SECTION 15.1(A) (Contractor's Insurances) prior to the payment of the first Milestone payment, evidence that Contractor has in place the insurance required in SECTION 15.1(B) prior to the payment of Milestone payments occurring immediately prior to the date that Supplier is scheduled to first deliver Equipment to Owner FOB (Incoterms 2000) pursuant to the Supply Contract and evidence that Contractor has in place the insurance required in SECTION 15.1(C) and (D) prior to the payment of Milestone payments

43

occurring after Contractor has commenced performance of the Works at the Site; and

- (c) Contractor is current in providing the monthly progress reports pursuant to SECTION 3.1(Q), provided, however, that any issues regarding the adequacy of the contents of such reports shall be resolved pursuant to ARTICLE 16 (Dispute Resolution) or other provisions of this EPC Contract and shall not be a basis for withholding or delaying payment of any Milestone.

6.5 EARLY COMPLETION PAYMENT

In addition to the EPC Contract Price, Owner shall pay to Contractor upon the successful completion of the Reliability Run the sum of One Hundred Eighty Nine Thousand New Zealand Dollars (NZ\$189,000) (plus GST if any and less any withholding required by law) if Contractor commences a Reliability Run prior to May 1, 2005 (as that date may be extended pursuant to ARTICLE 5 (Extension of Time) or ARTICLE 8 (Changes)) and successfully completes that Reliability Run. For purposes of this SECTION 6.5, Contractor may commence the Reliability Run when it has successfully accomplished the handling trials, satisfied the Performance Guarantees for the net power output and brine pressure drop output performance tests described in SUBSECTION 1.5.9 of SCHEDULE D (Performance Tests), and the Binary Plant can be operated lawfully, provided, however, that the noise test set forth in SECTION 1.5.13 of SCHEDULE D (Performance Tests) does not need to be completed prior to the commencement of the Reliability Run.

ARTICLE 7 - COMMISSIONING AND TAKE OVER

7.1 COMMISSIONING

7.1.1 READINESS FOR COMMISSIONING

Not earlier than 7 days (but not later than 4 days) before Contractor considers the Binary Plant will be ready for commissioning, Contractor shall give notice to Owner indicating the date on which Contractor believes the Binary Plant will be ready for commissioning. The Binary Plant is ready for commissioning when:

44

(a) Contractor has completed the Works up to commissioning in accordance with this EPC Contract, apart from completion of insulation, painting, final grading and gravel, drainage or any other incomplete or defective items which do not affect the mechanical, electrical or structural integrity, or the safe and lawful operation, of the Binary Plant. Contractor shall participate in an inspection of the Works with Owner in order to jointly identify such incomplete or defective items;

(b) Contractor has included the incomplete or defective items referred to in paragraph (a) in an initial Punchlist and Owner has approved (in its reasonable discretion) the initial Punchlist (the same time period and procedure set forth in SECTION 9.4 shall apply to Owner's review, approval or objections to the initial Punchlist proposed by Contractor);

(c) the Binary Plant may be operated in accordance with all applicable Laws, Consents and Standards, and without damage to the Works generally (including the Binary Plant itself), the Grid, the Wairakei Station, or anything else on or off the Site, and without injury to any person;

(d) Contractor has complied with its obligations under SCHEDULE A (Owner's Technical Requirements) in relation to commissioning;

(e) the Binary Plant is ready for initial operation, adjustment and testing;

(f) Contractor has submitted, in accordance with SECTION 9.4 (Design and Other Information Review), a detailed Commissioning and Performance Testing Plan pursuant to paragraph 1.2.1 of SCHEDULE D (Performance Tests), including Contractor's requirements regarding the volume of Geothermal Fluid to be supplied by Owner at specified times, and Owner has issued or pursuant to SECTION 9.4.3 is deemed to have issued a notice of no objection in respect of it; and

(g) Contractor has provided to Owner all test certificates, approvals and the like required from statutory or regulatory authorities before the Binary Plant may be commissioned.

45

7.1.2 NOTICE BY OWNER

Within 7 days after receipt of notice pursuant to SUBSECTION 7.1.1 (Readiness for commissioning), Owner shall give notice to Contractor advising either that Owner:

(a) has no objection to Contractor commissioning the Binary Plant (with or without conditions); or

(b) objects to Contractor commissioning the Binary Plant because any of the conditions in SUBSECTION 7.1.1 (Readiness for commissioning) have not been satisfied and specifying the conditions objected to and the basis for such objection.

If Owner fails to provide such notice within such 7 day period, Owner shall be deemed to have no objection to Contractor commissioning the Binary Plant (with or without conditions).

7.1.3 COMMISSIONING/CORRECTIVE MEASURES

(a) If Owner gives or is deemed pursuant to SUBSECTION 7.1.2 (Notice by Owner) to have given notice that it has no objection to Contractor

commissioning the Binary Plant, Contractor shall proceed to commission the Binary Plant in accordance with any conditions attaching to the notice and the Commissioning and Performance Testing Plan.

(b) If Owner gives notice that it objects to Contractor commissioning the Binary Plant, Contractor shall undertake corrective measures and/or perform any work required to comply with the conditions of SUBSECTION 7.1.1 (Readiness for commissioning), then give notice to Owner again under SUBSECTION 7.1.1 (Readiness for commissioning).

7.2 TAKE OVER

The Binary Plant shall be ready for Take Over when:

46

- (a) Contractor has completed all Performance Tests and the results are within or better than the thresholds for performance identified in SECTION 10.5 (Failure to pass the Performance Tests);
- (b) Contractor has completed the Binary Plant, except for (i) the Post-Take Over Works, (ii) completion of the final as-built drawings and operation and maintenance manuals; and (iii) any construction that cannot reasonably be completed due to the occurrence of any of the events described in SUBSECTION 5.1.1(E) OR (F) (Extension of Time);
- (c) the Binary Plant can be used for its intended purposes and operated properly and conveniently by Owner, without further reliance on Contractor and in accordance with all applicable Laws, Consents and Standards;
- (d) Contractor has furnished Owner with or has obtained such Consents or waivers from governmental authorities having jurisdiction that permit Owner under applicable Law, Consents, and Standards to operate the Binary Plant
- (e) Contractor has paid all delay and performance related liquidated damages to Owner due in terms of ARTICLE 12 (Remedies) save only those subject to a Dispute then submitted for resolution pursuant to ARTICLE 16 (Dispute Resolution) and, if the Binary Plant has been accepted under SECTION 10.5(A)(3) (Failure to pass the Performance Tests), Contractor has paid to Owner any amount due to Owner to reflect the adjustment to the EPC Contract Price under SECTION 10.5(B) (Failure to pass the Performance Tests);
- (f) Contractor has trained all operation and maintenance personnel as required under SECTION 3.1(N);
- (g) Contractor has given Owner the following documents and information:

- (i) draft operating and maintenance manuals;

47

- (ii) training manuals;

- (iii) software end user licences, passwords, codes and other similar items necessary for the operation and maintenance of the Binary Plant;

- (iv) Draft As-Built Drawings; and
- (v) documents required to satisfy all applicable regulatory approvals necessary for Owner's operation of the Binary Plant;
- (h) The Hazop Review has been carried out and any issues identified have been rectified.

7.3 REQUEST FOR TAKE OVER CERTIFICATE

7.3.1 Not earlier than 7 days before Contractor considers the provisions of SECTION 7.2 (Take Over) will be met, Contractor shall give notice to Owner requesting a Take Over Certificate. Such request shall contain all such documentary evidence and other information in sufficient detail to enable Owner to determine whether the provisions of SECTION 7.2 (Take Over) have or will be (as applicable) met.

7.3.2 Owner shall within 7 days after receiving Contractor's request:

- (a) if Contractor has met all of the requirements of SECTION 7.2 (Take Over), issue a Take Over Certificate to Contractor stating the date on which Contractor met the requirements of SECTION 7.2 (Take Over);
- (b) if Contractor has not met one or more of the requirements of SECTION 7.2 (Take Over), reject the request, giving reasons and identifying the work required to be done by Contractor to enable the Take Over Certificate to be issued. Contractor shall then complete this work before issuing a further notice under SECTION 7.3 (Request for Take Over Certificate); or
- (c) if Contractor has not met all of the requirements of SECTION 7.2 (Take Over) but Owner wishes to take over the Permanent Works notwithstanding such failure, Owner may issue a Take Over Certificate stating the date on which the Owner took over the Permanent Works identifying those requirements of SECTION 7.2 (Take Over) which remain outstanding. In the event of Take Over in these circumstances, Contractor shall not be relieved of the obligation to meet all of the requirements of SECTION 7.2 (Take Over) and shall meet such requirements as soon as practicable following Take Over.

48

7.4 RESPONSIBILITY FOR THE PERMANENT WORKS

Owner shall take complete possession and control of the Permanent Works and assume responsibility for the daily operation of the Binary Plant upon Take Over. Owner and Contractor shall reasonably coordinate and cooperate with each other to provide Contractor access to the Site at reasonable times to avoid unreasonable interference with Owner's operation and maintenance of the Binary Plant for the purpose of completing Punchlist items, remedying any defects, fulfilling any other outstanding obligations of Contractor under this EPC Contract or performing the corrective work described in SECTION 12.8 (Make Right Obligation).

7.5 DELAYED TESTS

(a) If the Performance Tests are not satisfactorily completed by the Scheduled Take Over Date due to the occurrence of any of the events described in SUBSECTION 5.1.1(D) OR (E) (Extension of Time) (solely for purposes of this Section, the term "Scheduled Take Over Date" shall not be extended due to the occurrence of such SUBSECTION 5.1.1(D) OR (E) events, but shall reflect any other extensions thereof made pursuant to the other provisions of this EPC Contract) then Contractor shall be entitled to issue a notice to Owner under SECTION 8.5 as if the failure to complete the tests was an Owner's Change.

49

(b) In the event that SUBSECTION 5.1.1(E) or (F) applies and the Owner fails or refuses to remedy the relevant SUBSECTION 5.1.1(E) or (F) event within 30 days of such Scheduled Take Over Date then Contractor shall be entitled to payment of the relevant Milestone(s) as if the Performance Tests had been successfully completed and Take Over had occurred. If Owner is able to remedy the relevant event within 90 days of such Scheduled Take Over Date, Contractor shall, subject to SECTION 7.6 (Binary Plant Degradation) and upon Owner's request, conduct the delayed Performance Tests and otherwise comply with the provisions of SECTION 7.2 (Take Over) and ARTICLE 10 (Testing). If Contractor is required to incur additional Costs as a result of maintaining personnel and equipment on standby to do so it shall be entitled to claim for reasonable reimbursement of those Costs as an Owner's Change pursuant to ARTICLE 8 (Changes). In the event that Owner is unable to remedy the relevant event within 90 days of the Scheduled Take Over Date then Take Over and the successful full completion of all of the Performance Tests shall be deemed to have occurred and Contractor shall be entitled to payment of the relevant Milestone(s) for Take Over, the accomplishment of such Performance Tests and related matters.

7.6 BINARY PLANT DEGRADATION

(a) If geothermal fluid has been run through any part of the Binary Plant due to a request by Owner to operate the Binary Plant under SECTION 3.19(D) resulting in a cumulative operating period of more than six (6) weeks, Contractor may require that the parties jointly open and inspect the Binary Plant prior to the Performance Tests being carried out.

Subsequent to the inspection:

- (i) if the Binary Plant is in good, clean and reasonably as-installed condition, Contractor will proceed within a reasonable period of time to conduct the Performance Tests not previously completed; or
- (ii) if the Binary Plant is not in good, clean and reasonably as-installed condition, prior to the conduct of the Performance Tests,

50

Contractor will notify Owner accordingly and with the agreement of Owner (not to be unreasonably withheld) within a reasonable period of time clean and repair the Binary Plant (as Contractor reasonably deems appropriate) at Owner's expense and then conduct such tests; and

- (iii) if the Parties agree that the Binary Plant can not be cleaned and/or repaired to a standard to enable the Performance Tests to be carried out, the testing protocols and requirements shall be revised accordingly to adjust for the constraints which

prevent such tests from being performed as originally defined and within a reasonable period of time Contractor shall conduct such revised tests.

7.7 REPLACEMENT PERFORMANCE BOND

Upon Take Over Contractor may submit to Owner a replacement performance bond issued by the same bank, provided that it has the same or better credit rating, or other financial institution meeting the criteria specified in SECTION 13.1 (Security Provided on Behalf of Contractor) and in the same form as the performance bonds issued under SECTIONS 13.1(A) and 13.1(B) but for an amount representing 5% of the sum of the EPC Contract Price and the Supply Contract Price at Take Over. Upon receipt of such bond, Owner shall release the NZ\$ Denominated L/C and the US\$ Denominated L/C issued under SECTIONS 13.1(A) and 13.1(B).

7.8 INDUSTRY AND GRID REQUIREMENTS

If the Binary Plant upon Take Over does not satisfy the technical requirements of all Industry Arrangements Contractor shall, if requested by Owner, provide all information necessary for Owner to seek an equivalence arrangement or dispensation. Contractor shall also reimburse all Owner's reasonable out-of-pocket costs associated with both any application for an equivalence arrangement or dispensation and any charges imposed thereafter. Owner shall not be obliged to apply for an equivalence arrangement or dispensation and any application, or decision not to apply for an equivalence arrangement or dispensation shall not limit Owner's rights or remedies.

51

7.9 POST-TAKE OVER WORKS

After Take Over, Contractor shall promptly and diligently perform the following Works to completion:

- (a) Upon Take Over, Contractor shall prepare a final Punchlist that identifies all incomplete or defective items of the Works and present the same for approval by Owner (acting reasonably) applying the same time period and approval procedure set forth in SUBSECTION 7.1.2 to the final Punchlist proposed by Contractor and the parties referring any Dispute over the composition of the final Punchlist for resolution pursuant to ARTICLE 16 (Dispute Resolution) without delaying Take Over. Approval by Owner of the Punchlist shall not relieve Contractor of any of its obligations under this EPC Contract and Contractor shall promptly and diligently complete all items of the Works included in the final Punchlist approved by Owner as provided above.
- (b) Contractor shall transfer all applicable Consents related to the Works and Binary Plant to Owner in a form which enables the benefit of them to be used by Owner, including:
 - (i) Building Act 1991 code compliance certificate(s);
 - (ii) all certification under the Electricity Act 1992 and Hazardous Substances and New Organisms Act 1996;
 - (iii) all certification of pressure equipment and cranes; and
 - (iv) all other certificates required for operation or maintenance of the Works which are within Contractor's obligations;

(h) Contractor shall give Owner all documents and information required to be provided under this EPC Contract, including:

(i) all documents required by the Schedules; and

52

(ii) Plant specifications and descriptions.

(i) Contractor shall provide to Owner all special tools identified in the Contractor's Technical Proposal;

(j) Contractor shall remove all Contractor's and Subcontractor's personnel, supplies, equipment, waste materials, rubbish and temporary facilities, except those reasonably required for performance of correction work during the Defects Correction Period, from the Site and the Wairakei Station;

(k) Contractor shall give Owner all information required as specified in SCHEDULE A (Owner's Technical Requirements) for Owner's final fixed asset register with respect to the Binary Plant;

7.10 FINAL DOCUMENTATION

Not later than six (6) months after Take Over, Contractor shall provide to Owner four copies of the final operation and maintenance manuals (which shall incorporate manuals of the Equipment) and detailed as-built Drawings and specifications for the Binary Plant.

ARTICLE 8 - CHANGES

8.1 CHANGE

All Changes shall be recorded in a written instrument signed by the Owner's Representative and Contractor and shall not be implemented by Contractor without such written instrument.

8.2 EFFECT OF CHANGE

No Change shall in any way vitiate or invalidate this EPC Contract.

53

8.3 REQUEST

Either party may request a Change under this ARTICLE 8 (Changes) by written request to the other party, provided however, that neither party may request or require changes or deletions which, in the aggregate, reduce the combined EPC and Supply Contract Prices by more than fifteen percent (15%).

8.4 OWNER'S CHANGES

(a) At any time prior to issuing the Take Over Certificate, Owner may instruct Owner's Changes. Contractor shall promptly implement any such Owner's Change.

(b) If Owner requests a proposal in respect of a contemplated Owner's Change, or if Contractor is of the view that an instruction given by Owner comprises an Owner's Change, the following provisions shall apply:

(i) within 14 days after Owner's request, or such longer period as Owner allows, Contractor shall prepare and

submit to Owner a detailed proposal relating to the contemplated Owner's Change, including:

- (1) a description of how the Change would be implemented, including (where relevant) the proposed design and/or work to be performed;
- (2) any additional Cost or Cost saving and Contractor's proposal for any adjustment to the EPC Contract Price for such Cost (and if relevant Supplier's proposal for any adjustment in the Supply Contract Price under the Supply Contract) as a result;
- (3) any additional time that would be involved or any time saving and Contractor's proposal for any adjustment to the Scheduled Take Over Date as a result;

54

- (4) Contractor's proposal for any consequential adjustment to the programme, construction method statement and the Milestone Payment Schedule; and
 - (5) advice as to the effect of the Owner's Change on the ability of Contractor to perform its obligations under this EPC Contract;
 - (6) advice as to the effect of the Owner's Change on the Supply Contract and/or the Equipment;
- (ii) Contractor and Owner shall then take reasonable steps to reach agreement on the Owner's Change. Upon agreement being reached Owner may then issue an instruction to Contractor to implement the Owner's Change. Any such agreement shall be conditional upon Owner being able to reach an agreement with the Supplier for any related change under the Supply Agreement and upon terms acceptable to Owner (acting reasonably);
- (iii) no agreement between Owner and Contractor as to the terms upon which an Owner's Change may be implemented shall have any contractual or other legal effect unless it is in writing and a written instruction to implement the Owner's Change has been issued pursuant to this clause;
- (iv) any such written agreement shall be binding upon Contractor and Owner according to its terms and Contractor will have no further or other entitlement under this EPC Contract in respect of such Owner's Change;
- (v) if the parties fail to reach agreement within 7 days Owner may either:
- (1) instruct Contractor under paragraph (a) to implement the Owner's Change in which case the parties shall resolve any

Dispute regarding the extension of time, compensation or other issues regarding such Change in accordance with ARTICLE 16 (Dispute Resolution); or

- (2) choose not to proceed with the Owner's Change, in which event Contractor shall have no claim of any kind whatsoever arising out of or in connection with the request for the proposal. If Owner elects to not proceed with the Owner's Change, Owner reserves the right, subject to the terms of this EPC Contract, to proceed with the work behind the proposed Change directly or through a third party.

8.5 ADJUSTMENTS

Should any Owner's Change or the occurrence of an event described in SUBSECTION 5.1.1 (other than where the occurrence of such event is due to an event of Force Majeure and Owner elects to address such failure pursuant to the terms of ARTICLE 22 (Force Majeure)) cause a material increase or decrease in the Cost of or time required for Contractor's performance of this EPC Contract or otherwise affect any provision of this EPC Contract, then after Contractor has given to Owner the required information under SECTION 8.4 of the likely effect of the Change and corresponding proposed adjustments, and Owner elects to continue with the proposed Change then the Scheduled Take Over Date and other dates in this EPC Contract shall be adjusted as provided in ARTICLE 5 (Extension of Time) and an adjustment that is reasonable in the circumstances will be made to the EPC Contract Price for the Costs of such Change plus a ten percent allowance thereon for overhead and profit (with regard to SUBSECTION 5.1.1 events, Contractor's rights under this SECTION 8.5 with regard to recovery of Costs shall be subject to the conditions set forth in SUBSECTION 5.1.1(I), (III), (IV) and (V) which provisions shall be read as if references to "delay" refer to "Costs"), and to performance warranties (where performance of the Works is attested and subject to SECTION 8.7 (Effect of Changes on Warranties and Safety) and any other provision of this EPC Contract which is thereby affected. Any increase in the EPC Contract Price due to such Change

shall be payable subject to a progress payment schedule to be submitted by Contractor as part of the proposed written Change order. Any Dispute relating to any such Change shall be determined in terms of ARTICLE 16 (Dispute Resolution), but Contractor shall continue to implement any Owner's Change notwithstanding the Dispute.

8.6 CONTRACTOR CHANGES

8.6.1 Notwithstanding the foregoing, or anything expressed or implied in this EPC Contract, if Contractor requests a Change so as to make the Binary Plant meet the Performance Guarantees, or to otherwise comply with its obligations under this EPC Contract and such request does not involve any other cause or event that would otherwise entitle Contractor to such Change under this EPC Contract, such Change shall be at Contractor's own cost and expense and shall be subject to the consent of the Owner's Representative (which consent shall not be unreasonably withheld). If the Owner's Representative withholds its

consent to such Change, and Contractor remains of the view that it is necessary for the completion of the Work in accordance with this EPC Contract, then the matter shall be referred for resolution under ARTICLE 16 (Dispute Resolution). Provided always in no event shall Owner be obliged to accept a Contractor's Change that Owner considers to be detrimental to Owner's overall interests in relation to the Plant.

8.6.2 The requirements of SECTION 8.4(B) shall apply to every request made by Contractor for a Change under this SECTION 8.6, and the provisions of SECTION 8.4(B) shall be read as if references to "Owner's Change" are to "Contractor's Change" and SECTION 8.4(B)(V) shall be read so that if the parties fail to reach agreement within 7 days the Dispute shall be determined in terms of ARTICLE 16 (Dispute Resolution).

8.7 EFFECT OF CHANGES ON WARRANTIES AND SAFETY

8.7.1 If Contractor reasonably believes that a proposed Owner's Change will result in Contractor not being able to comply with any express or implied warranty of the Works, Contractor shall serve Owner notice within fourteen (14) days of the receipt of such proposal of its belief and the believed effect together with such supporting technical data and other information as is reasonably required to confirm to Owner (acting reasonably) the predicted effect of the proposed change in the Works. If the parties are

57

unable to agree upon the Owner's Change and its predictive effect and Owner wishes to proceed with the Owner's Change then the matter shall be referred for immediate resolution by a suitably qualified expert either agreed by the parties or appointed by the President or nominee of the Institute of Professional Engineers of New Zealand within 7 days of being requested to do so under this EPC Contract. The expert shall be required to make the determination within 7 days of appointment. If Owner insists, despite the expert determination to require the execution of such proposal in circumstances where the expert determines the change will result in Contractor not being able to comply with any express or implied warranty of the Works, Contractor shall comply with Owner's requirement to execute the proposal, but Contractor shall not be responsible for the resulting non compliance with affected warranties or performance guarantees, but only to the extent related to or derived from Owner's proposal.

8.7.2 If a proposed Owner's Change will cause or result in an unlawful activity or may negatively affect safety of the Binary Plant or persons in its vicinity, Contractor shall serve Owner notice within fourteen (14) days of such proposal of its belief and the believed effect, and Contractor shall not be required by Owner to unlawfully execute such proposal.

8.8 OTHER PROVISIONS UNAFFECTED

Except to the extent a Change specifically amends one or more provisions hereof, all provisions hereof shall apply to all Changes, and no Change shall be implied as a result of any other Change.

ARTICLE 9 - ACCESS AND REVIEW BY OWNER

9.1 RESPONSIBILITY FOR DESIGN

Contractor shall be responsible for the development of all technical data, design and other documentation required for the performance of the Works (including the verification of the design specification of the Equipment) and its suitability or otherwise to achieve Contractor's obligations in SECTION 3.1 (General Responsibilities), particularly relating to fitness for purpose as described in SECTION 3.1(D).

9.2 INSPECTION OF WORK

(a) In addition to inspection and testing required elsewhere under this EPC Contract (including those noted in section 1.7 of SCHEDULE A (Owner's Technical Requirements)), Owner shall have the right at all reasonable times to inspect and test, on the Site, any item of equipment, material, engineering, service or workmanship to be provided as part of the Works and to inspect and test any such major items that are being specially fabricated for Contractor in New Zealand. Alternatively, Owner shall have the right to require Contractor to demonstrate to Owner, by testing or otherwise, that any such work complies with this EPC Contract or the Supply Contract as the case may be. Contractor shall, at the request of Owner, arrange for any such inspection, testing or demonstration at the relevant location. Owner shall coordinate such requested inspections and tests with Contractor to avoid unnecessary duplication of inspections and testing and interference with the performance of the Works. Where any such matter inspected, tested or the subject of a demonstration under this clause:

- (i) does not conform with this EPC Contract or the Supply Contract, Contractor shall be responsible for all costs in respect of such inspection, testing or demonstration and the Contractor shall not be relieved of its obligations to carry out the Works in accordance with the requirements of this EPC Contract;
- (ii) conforms with this EPC Contract or the Supply Contract, such inspection, testing or demonstration shall be treated as an Owner's Change pursuant to ARTICLE 8 (Changes).

(b) Contractor shall be responsible for all costs in respect of any inspection, testing or demonstration required by any authority, other statutory or regulatory body or other authorised third party in relation to the Works and/or the Site.

(c) Contractor shall give notice to Owner whenever any work is ready for inspection or testing and before it is materially covered up, put out of sight, or packaged for storage or transport. If Contractor fails to give notice then notwithstanding

SECTION 9.2(A) (Inspection of Work) Contractor shall, if and when required by Owner, uncover the work and thereafter reinstate and make good, all at Contractor's cost.

9.3 ACCESS TO THE SITE

Owner shall have the right to access the Site at all times, shall have the right, at Owner's expense, to be present during all on-site and off-site test procedures and shall have the right to receive, upon request, a single hard copy and electronic copy of inspection and test procedures, quality control reports, and test reports and data. Contractor shall notify Owner at least ten (10) days prior to the testing of major equipment items and systems at the Site. While at the Site, Owner and its representatives shall comply with all of Contractor's safety rules and other job site rules and regulations.

9.4 DESIGN AND OTHER INFORMATION REVIEW

9.4.1 Contractor shall submit to Owner for review 4 hard copies or 1 electronic copy of the documents listed in Exhibit A01 of SCHEDULE A (Owner's Technical Requirements) and any other information reasonably requested by the Owner's Representative for the purposes of enabling commissioning and Take Over of the Permanent Works.

9.4.2 Contractor shall submit to Owner's Representative one (4) hard or one (1) electronic copy of the Design and Other Information in sufficient time to enable Owner's Representative to review such Design and Other Information in accordance with this SECTION 9.4. In the event that a re-submission of Design and Other Information is required as provided in this SECTION 9.4, such re-submission shall be made as soon as reasonably practicable after Contractor's receipt of the relevant statement of objections.

9.4.3 Following receipt of a submission of Design and Other Information in accordance with SUBSECTION 9.4.2, the Owner's Representative shall within ten (10) days from receipt return to the Contractor either:

- (a) a notice stating that he/she has no objections to the Design and Other Information as submitted (for the purposes of this ARTICLE 9, a "notice of no objection"); or

60

- (b) a statement of objections which shall identify with due particularity the aspects of the Design and Other Information which do not materially comply with the provisions of this EPC Contract and/or accord in any material respect with any Design and Other Information previously submitted by Contractor.

If the Owner's Representative fails to respond within the ten (10) day period, then he/she will be deemed to have issued a notice of no objection.

9.4.4 If the Owner's Representative returns any Design and Other Information under SUBSECTION 9.4.3(A) or is deemed to have issued a notice of no objection under SUBSECTION 9.4.3, Contractor may, subject to SUBSECTION 9.4.5, proceed with the Works in accordance with this EPC Contract.

9.4.5 If the Owner's Representative considers that revisions to a submission of Design and Other Information are appropriate, but that such revisions are of minor design significance, the Owner's Representative may issue a notice of no objection subject to an appended schedule of comments identifying the relevant revisions. Subject to the restrictions set forth in SUBSECTION 9.4.6, Contractor shall cause such Design and Other Information to be revised in accordance with such comments, but shall not be obliged to re-submit such Design and Other Information solely on account of such revisions.

9.4.6 If the Owner's Representative returns any statement under SUBSECTION 9.4.3(B), Contractor shall cause the Design and Other Information to be revised so as to take account of the properly stated objections and as soon as reasonably practicable shall re-submit such Design and Other Information to Owner's Representative, provided, however, that Contractor shall not be required to make any modifications or changes which are not in accordance with this EPC Contract.

9.4.7 Submission of a document under SUBSECTION 9.4.1, and the issue of notice of objection or the issue of a notice of no objection by Owner:

- (a) does not in any way place responsibility for the document or the matters to which the document relates upon Owner or restrict any

remedy Owner would have otherwise have had with respect to the relevant Works, or any other related submission of a document by Contractor; and

- (b) shall not relieve Contractor from any of its obligations under this EPC Contract or any liability arising from the document.

In particular, without limitation, Owner shall not be obliged to review a document submitted under SUBSECTION 9.4.1 and a notice of objection does not imply that Owner has undertaken such a review.

9.4.8 Neither a proper objection raised under SUBSECTION 9.4.3(B) nor a comment made under SUBSECTION 9.4.5 shall constitute a Change.

9.4.9 Except in the case of an Owner's Change or agreed Contractor's Change, approved Design and Other Information shall not be departed from.

9.4.10 Owner and/or Owner's Representative shall have the right to inspect all of the Design and Other Information at Contractor's premises, for any part of the Works, includes as contemplated in section 1.5.1 of SCHEDULE A (Owner's Technical Requirements). Owner shall coordinate such requested inspections with Contractor to avoid unnecessary duplication of inspections and interference with the performance of the Works.

9.5 DRAWINGS NOT TO BE PROVIDED

Notwithstanding any other provisions of this EPC Contract, Contractor shall not be required to provide shop drawings nor any of Contractor's or Supplier's confidential manufacturing drawings, designs or know-how nor the confidential details of manufacturing practices, processes or operations.

9.6 USE OF DRAWINGS

Documents, drawings and information supplied by Contractor may be used by Owner, its representatives, assignees and transferees, only for the purposes of completing, operating, maintaining, adjusting and repairing the Binary Plant. No license is granted to

copy or use documents, drawings or information so supplied in order to make or have made spare parts. Documents, drawings or information so supplied by Contractor shall be subject to the confidentiality clause contained herein in ARTICLE 23 (Confidentiality) and shall not be used, copied or communicated by Owner to a third party otherwise than as strictly necessary and permitted under this EPC Contract.

ARTICLE 10 - TESTING

10.1 TEST PROCEDURES

Once Contractor has achieved commissioning of the Plant as provided in SECTION 7.1 (Commissioning), Contractor shall conduct the Performance Tests described in SCHEDULE D (Performance Tests) hereto as described therein, and test results shall be adjusted in accordance with the Correction Curves as applied in accordance with SCHEDULE D (Performance Tests). Contractor shall provide everything necessary to conduct the Performance Tests apart from the obligations of Owner under this EPC Contract (e.g., supplying the Geothermal

Fluid).

10.2 NOTICE OF TESTING

Contractor shall give Owner's Representative at least three (3) days' notice prior to the date(s) on which Contractor will be ready to perform the initial Performance Tests under SCHEDULE D (Performance Tests); provided that for any repeated test the notice period shall be at least twenty-four (24) hours before the time established by Contractor for such test. Owner's Representative shall be entitled to have, at its own cost, a suitably qualified independent party present during all such tests. If Owner's Representative and/or such independent party fails to attend at the time and place appointed for the tests, Contractor shall be entitled to proceed with the tests in the Owner's Representative's and/or such party's absence. The tests shall then be deemed to have been made in the presence of the Owner's Representative and such party and the results of the tests shall except for manifest error be accepted as accurate. Reporting the results of the tests shall be in accordance with the requirements of SCHEDULE D (Performance Tests).

63

If any aspect of the Works fails to pass any test, the Owner's Representative may require such test to be repeated on the same terms and conditions and such testing shall be executed by Contractor.

10.3 CONDUCT AND REPETITION OF TESTS

Contractor may at any time prior to Take Over repeat at its cost, one or more times, any of the tests described in SCHEDULE D (Performance Tests) where Contractor, in its sole discretion, believes that the results of the prior tests are unsatisfactory. Further, Contractor may undertake remedial actions at its cost in connection with such repeated tests, provided that such remedial action does not depart from previously approved Design and Other Information without the Owner's Representative's prior consent, which shall not be unreasonably withheld and the response shall be given promptly but not later than forty-eight (48) hours after Contractor's request.

10.4 POST PERFORMANCE TESTS ALTERATIONS

(a) If Contractor alters the setting, configuration or the like of the Binary Plant during or after the successful completion of a Performance Test in a manner that would materially affect the integrity of such Performance Test, save where such alteration is part of the normal operating practice of the Binary Plant or is approved/waived by Owner in its reasonable discretion, then the results of such affected successful Performance Test shall, at the option of Owner, be invalidated.

(b) Contractor shall notify Owner of any defects in the Binary Plant discovered during the conduct of any Performance Test.

10.5 FAILURE TO PASS THE PERFORMANCE TESTS

(a) If:

(i) the Corrected Net Power Output in respect of the final Performance Test for net power output set forth in section 1.5.9 of SCHEDULE D (Performance Tests) is less than 90% of the Guaranteed Net Power Output; or

64

(ii) the Corrected Pressure Drop in respect of the final Performance Test for pressure drop set forth in SCHEDULE D (Performance Tests) is greater than the

2.7 barg; or

- (iii) the Binary Plant fails to pass the Reliability Run (following any rescheduled run/s of the Reliability Run permitted by SCHEDULE D (Performance Tests) or this EPC Contract),

Owner shall be entitled to:

- (1) order Contractor to carry out corrective work and a repetition of the relevant Performance Test(s);
- (2) reject the Binary Plant, in which event Owner shall, without prejudice to any other rights or remedies under this EPC Contract or otherwise have the same remedies as are provided in SECTION 21.1 (Termination for Cause), SUBSECTION 21.1.3 (Consequences of Termination), and SUBSECTION 21.1.4 (Payment After Termination); or
- (3) accept the Binary Plant at the reduced performance level, subject to reduction of the EPC Contract Price in terms of paragraph (b) below.

(b) In the event Owner accepts the Binary Plant in terms of SECTION 10.5(A)(3) then the EPC Contract Price shall be reduced by the amount appropriate to cover the reduced value of the Binary Plant to Owner (and SECTION 8.3 (Request) shall not apply) having regard to:

- (i) an acceptable return to Owner on the revised EPC Contract Price, having regard to the electricity that can be generated from the Binary Plant and the cost of its operation; and
- (ii) any other matter which would be reasonably relevant to Owner's consideration of the price it would be prepared to pay for the

65

Binary Plant given its performance, economic life and its whole of life cost,

provided always that if Owner accepts the Binary Plant in terms of SECTION 10.5(A)(3) without having agreed upon a revised EPC Contract Price with Contractor, the EPC Contract Price shall be determined in accordance with ARTICLE 16 (Dispute Resolution). Upon the determination of the reduction in the EPC Contract Price in accordance with ARTICLE 16 (Dispute Resolution), Owner shall be entitled to a further opportunity to exercise either of the options in SECTION 10.5(A)(1) or 10.5(A)(2) and not take over the Binary Plant for the reduced price so determined.

(c) In the event Owner has already paid Contractor more than the reduced EPC Contract Price, Owner may recover the amount of the overpayment as a debt due from Contractor. The acceptance of the Binary Plant by Owner, and the reduction of the EPC Contract Price shall not otherwise relieve Contractor of its obligations under this EPC Contract, save in relation to those consequences which necessarily arise as a result of the failure which gave rise to the reduction in the EPC Contract Price; provided, however, that if Owner receives any amount from Supplier for a similar claim under the Supply Contract, the

liability of Contractor under this clause shall be reduced accordingly .

(d) If the final applicable Performance Tests (which to avoid doubt must be carried out prior to the Reliability Run that is the basis for Take Over) establish that:

- (i) the Corrected Net Power Output is less than 100% (but not less than 90%) of the Guaranteed Net Power Output; or
- (ii) the Corrected Pressure Drop is more than the Guaranteed Pressure Drop (but not more than the 2.7 barg),

Contractor shall pay liquidated damages in accordance with SECTION 12.2 (Liquidated Damages for Performance Deficiency).

66

ARTICLE 11 - WARRANTIES

11.1 GENERAL WARRANTY

Contractor warrants that:

- (a) the Works and the Equipment shall conform in all material respects to Laws, Owner's Consents, and the other applicable descriptions, specifications and criteria set forth in this EPC Contract and the Supply Contract;
- (b) the Works shall be performed in a workmanlike and skilful manner;
- (c) the Works and the Equipment shall be of good quality and will, on Take Over, be free from defects in workmanship, material, design and title and, as specified in SECTION 3.1(D) (General Responsibilities), fit for the purposes for which the Works are intended, each in accordance with this EPC Contract.
- (d) All materials and other items when incorporated in the Works and the Equipment shall be new and of a suitable grade of its respective kind for its intended use;
- (e) it is a corporation duly organised, validly existing and in good standing under the laws of its home country, and has full power to engage in the business it presently conducts and contemplates conducting, and is and will be duly licensed or qualified and in good standing under the laws of each jurisdiction in which it transacts business;
- (f) there are no actions, suits, proceedings or investigations pending or, to Contractor's knowledge, threatened against it, which individually or in the aggregate could result in any materially adverse effect on

67

Contractor or in any impairment of its ability to perform its obligations under this EPC Contract;

- (g) it has no knowledge of any violation or default with respect to any order, writ, injunction or any decree of any court or any governmental department commission, board, agency or instrumentality which may result in any such materially adverse effect or such impairment;
- (h) it owns or has the right to use all Intellectual Property Rights necessary to perform this EPC Contract and to carry on its business as presently conducted and presently planned to be conducted without conflict with the rights of others;
- (i) it has knowledge of all of the legal requirements, business practices and other matters specific to New Zealand that must be followed or complied with in performing this EPC Contract and this EPC Contract will be performed in conformity with such requirements and practices.
- (j) it will employ, or contract with, suitably expert and experienced employees and Subcontractors to strictly discharge Contractor's obligations under this EPC Contract;
- (k) it has audited the Owner's Technical Requirements and any design provided by Owner and is unaware of any inaccuracy or defect in the same that should have been apparent to a qualified and competent contractor experienced in work of similar nature and scope as the Works;
- (l) it has exercised and will continue to exercise in the design of the Works all the skill and care to be expected of a professionally qualified and competent designer experienced in work of similar nature and scope as the Works;

68

- (m) it understands the Owner's Technical Requirements and the Works will, when completed, comply in all respects with the Owner's Technical Requirements;
- (n) the Binary Plant has been or will be designed and constructed using proven up-to-date good practice and to standards appropriate to the development which are consistent with the Owner's Technical Requirements and with the intended use of the Binary Plant;
- (o) no goods or materials generally known to be deleterious or otherwise not in accordance with good engineering practice have been or will be specified or selected by Contractor or any one acting on its behalf and no goods or materials which, after their specification or selection by or on behalf of Contractor but before being incorporated into the Binary Plant, become generally known to be deleterious or otherwise not in accordance with good engineering practice, will be incorporated into the Works; and

- (p) the design of the Permanent Works has taken or will take full account of the effects of the intended construction methods, Temporary Works and Contractor's Equipment.

11.2 DEFECTS CORRECTION WARRANTY PERIOD

11.2.1 DURATION

The warranties set forth in SECTION 11.1 (General Warranty) shall inure for the benefit of Owner and its successors and assigns and, except as expressly provided below in this SECTION 11.2, the warranties set forth in SECTION 11.1 (other than the warranties set forth in SECTION 11.1(D)-(I) and (K) and (N) which are made and in effect as of the Commencement Date) shall be in effect from Take Over for the duration of:

- (a) twenty four (24) months; and

69

- (b) thirty six (36) months for any defect in the Binary Plant of the kind described in SECTION 11.1 (General Warranty) that was caused by the gross misconduct of Contractor and which would not have been disclosed by a reasonable examination prior to the expiry of the above described applicable warranty period (for purposes of this paragraph, "gross misconduct" does not comprise each and every lack of care or skill but means an act or omission on the part of Contractor which implies either a failure to pay due regard to the serious consequences which a conscientious and responsible contractor would normally foresee as likely to ensue or a willful disregard of any consequences of such act or omission);

the time periods specified in paragraphs (a) and (b) being the Defects Correction Period.

The Defects Correction Period set forth in paragraph (a) above with respect to any item of the Works that is repaired, replaced, modified, or otherwise altered after Take Over by Contractor shall extend for a period of twenty four (24) months from the date of completion of such alteration, provided, however, that in no case shall the warranty extended hereunder exceed the maximum period of thirty-six (36) months from Take Over.

11.2.2 PUNCHLIST AND DEFECTS

In order that the Permanent Works, including the Binary Plant, and the documents to be provided by Contractor under this EPC Contract are in the condition required by this EPC Contract by the expiry date of the Defects Correction Period Contractor shall, as soon as practicable after the issue of the Take Over Certificate and at its own risk and cost:

- (a) complete all items on the Punchlist and any other Works that is outstanding at Take Over; and
- (b) execute all work required to remedy defects or damage or other non-conformance in the Permanent Works, provided that where such defect, damage or non-conformance arises as a result of a

failure by Owner to comply with the operation and maintenance manuals issued by Contractor under this EPC Contract, in which event Owner shall reimburse Contractor the Cost of such work plus a ten percent allowance for overhead and profit.

11.2.3 DEFECTS WARRANTY

(a) If within the Defects Correction Period a defect in the Works occurs and Owner notifies Contractor of the defect, Contractor will promptly reperform, repair or replace, as Contractor (acting reasonably) determines is appropriate under the circumstances, the portion of the Works that has been determined to be defective. This warranty will not cover repairs or alterations (not being normal maintenance work required to be carried out by Owner under the operating and/or maintenance manuals provided by Contractor under this EPC Contract) made by Owner or a third party without Contractor's written consent. Owner shall cooperate to provide reasonable access thereto and working and workshop spaces in order to enable the Contractor to perform the repair. Further, if special rigging, cranes or heavy equipment or any labour required in connection with operating such equipment is available at the Site and necessary for the performance of such repairs, Owner shall provide Contractor with access to such equipment and labour and Contractor shall pay reasonable compensation therefor.

(b) The warranties in this EPC Contract do not extend or apply to damage, deterioration or failure resulting after Take Over from:

- (i) normal wear and tear but excluding any wear and tear attributable to a defect in the Works;
- (ii) abnormal environment over and above that which would ordinarily be expected for the site in which the Binary Plant is operated;
- (iii) failure of Owner to store, operate and maintain the Works in accordance with the Design Range or the operation and maintenance manuals furnished by Contractor in accordance

with SCHEDULE A (Owner's Technical Requirements) including, but not limited to, the fuel, lube oil and water specifications; or

- (iv) an event of Force Majeure.

11.2.4 FAILURE TO REMEDY DEFECTS

(a) If Contractor fails to remedy any defect and directly resulting damage as soon as reasonably practicable, Owner may give written notice to Contractor requiring Contractor to remedy the defect or damage within a specified reasonable time.

(b) If Contractor fails to remedy the defect and directly resulting damage by this notified date, the failure shall constitute a fundamental breach of Contractor's obligations under this EPC Contract and Owner may:

- (i) carry out the work itself or by others and

the Contractor shall pay to the Owner the costs reasonably incurred by the Owner in remedying the defect or damage, or

- (ii) if the defect and directly resulting damage deprives the Owner of substantially the whole benefit of the Works or any major part of the Works, exercise the Owner's rights under ARTICLE 21 (Termination).

(c) In connection with the warranty provisions set forth in this ARTICLE 11 (Warranties), the parties shall comply with the provisions of SCHEDULE F (Warranty Procedures).

11.2.5 REMOVAL OF DEFECTIVE WORK

If the defect or damage cannot be remedied expeditiously on the Site and Owner gives consent, Contractor may remove from the Site for the purposes of repair such items of the Works as are defective or damaged. As a condition of such consent Owner may require Contractor to provide a performance bond or other appropriate security.

72

11.2.6 FURTHER TESTS

As part of the work of remedying of any defect or damage after Take Over, Owner (acting reasonably) may require Contractor to test the replaced component or, where reasonably appropriate, related system or subsystem to substantiate that such defect or damage has been properly remedied. The requirement shall be made by notice within 28 days after the defect or damage is remedied. The parties shall use reasonable endeavours to agree upon the nature and extent of the testing reasonably required in the circumstances and in the event that they are unable to agree either party may request the nature and extent of the testing reasonably required in the circumstances be fixed by an expert appointed by the President or nominee of the Institute of Professional Engineers New Zealand and the determination of that expert shall be final and binding upon the parties

The agreed or expert determined repeat tests shall be carried out in accordance with the terms applicable to the previous tests at the risk and cost of Contractor with due allowance for degradation as is appropriate. For the avoidance of doubt ARTICLE 12 (Liquidated Damages) shall not apply.

11.2.7 FINAL ACCEPTANCE CERTIFICATE

(a) Owner shall issue the Final Acceptance Certificate within 10 days after the end of the Defects Correction Period (not taking into account the period specified in SUBSECTION 11.2.1(B) but including any extension of the period specified in SUBSECTION 11.2.1(A) as provided in SUBSECTION 11.2.1), or within 10 days of Contractor completing all items on the Punchlist, remedying any defects or damage and otherwise completing all of the Works required by this EPC Contract, whichever is the later.

(b) On the issuance of the Final Acceptance Certificate Owner shall release the replacement performance bond provided under SECTION 7.4 (Replacement Performance Bond) and the parent company guaranty provided under SECTION 13.1(D) (Security Provided by Contractor). Further, upon the end of the twenty-four month period after Take Over, the replacement performance bond shall be reduced to the amount mutually agreed upon by the parties that reasonably reflects the value of the Works that

were replaced or corrected by Contractor during the Defects Correction Period prior to such date. If the parties are unable to agree upon such values, then the parties shall promptly refer the matter for determination under the Disputes resolution procedure set forth in ARTICLE 16 (Dispute Resolution).

11.2.8 REMEDIES

The guarantees and warranties provided in this EPC Contract are exclusive and are given and accepted in lieu of:

- (a) any and all other warranties and/or guarantees, statutory, or implied (including, without limitation, the implied warranties of merchantability and fitness for a particular purpose, and all warranties arising from course of dealing or usage of trade);
- (b) any warranties or conditions implied by the Sale of Goods Act 1908 relating to quality and suitability.

The remedies of Owner for any breach of guarantees and warranties shall be limited to those permitted in this EPC Contract, to the exclusion of any and all other remedies. No agreement varying or extending the foregoing guarantees, warranties, remedies or limitations will be binding upon Contractor unless in writing and signed by a duly authorized representative of Contractor.

11.2.9 CLEARANCE OF SITE

Within two weeks of receiving the Final Acceptance Certificate, Contractor shall have removed any remaining Contractor's Equipment, surplus material, wreckage, rubbish and Temporary Works from the Site.

11.3 DISCLAIMER AND RELEASE

11.3.1 EXCEPT FOR GROSS NEGLIGENCE OR FRAUD ON THE PART OF CONTRACTOR:

74

- (A) THE WARRANTIES, OBLIGATIONS AND LIABILITIES OF CONTRACTOR,
- (B) AND RIGHTS AND REMEDIES OF OWNER,

SET FORTH OR PERMITTED IN THIS EPC CONTRACT WITH RESPECT TO ANY NON-CONFORMANCE OR DEFECT IN ANY WORKS OR EQUIPMENT ARE EXCLUSIVE.

11.3.2 OWNER HEREBY WAIVES, RELEASES AND RENOUNCES ALL OTHER WARRANTIES, OBLIGATIONS, AND LIABILITIES ON THE PART OF CONTRACTOR, TOGETHER WITH ALL OTHER RIGHTS, AND REMEDIES OF OWNER AGAINST CONTRACTOR, EXPRESS OR IMPLIED, ARISING BY LAW OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY:

(A) WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE;

(B) WARRANTY ARISING FROM COURSE OF PERFORMANCE, COURSE OF DEALING OR USAGE OF TRADE;

(C) OBLIGATION, LIABILITY, RIGHT, CLAIM OR REMEDY IN TORT, WHETHER OR NOT ARISING FROM THE NEGLIGENCE OF CONTRACTOR, ACTUAL, PASSIVE OR IMPUTED;

(D) OBLIGATION, LIABILITY, RIGHT, CLAIM OR REMEDY FOR LOSS OF OR DAMAGE TO ANY PRODUCT OR PART OF THE WORKS;

(E) LIABILITY OF OWNER TO ANY THIRD PARTY; AND

(F) INCIDENTAL OR CONSEQUENTIAL DAMAGES.

11.3.3 CONTRACTOR'S WARRANTY UNDER THIS EPC CONTRACT DOES NOT APPLY TO ANY NON-CONFORMANCE OR DEFECT IN ANY PRODUCT, EQUIPMENT OR PART OF THE PLANT, TO THE EXTENT SUCH

75

NON-CONFORMANCE OR DEFECT HAS BEEN DIRECTLY OR INDIRECTLY CAUSED BY ANY OTHER NEGLIGENT ACT OR OMISSION OF OWNER.

ARTICLE 12 - REMEDIES

12.1 LIQUIDATED DAMAGES FOR DELAY IN TAKE OVER

12.1.1 After the Scheduled Take Over Date, Contractor shall pay to Owner as liquidated damages, and not as a penalty, for each day or part of a day which shall elapse between the Scheduled Take Over Date and the date of the Take Over a sum equal to NZ\$18,000 (plus GST if any) per day; provided, however, that if Take Over does not occur by the Scheduled Take Over Date, but nevertheless the Binary Plant is generating electricity, then the liquidated damages payable by Contractor under this SUBSECTION 12.1.1 shall be reduced (but not to less than zero) by the amount of the net revenue (including payments under any hedge agreement, to the extent such hedge agreement is applicable to the Binary Plant) received by Owner until the date Take Over occurs.

12.1.2 Owner may, without prejudice to any other method of recovery, deduct the amount of such liquidated damages from any monies due, or to become due, to Contractor under this EPC Contract. The payment or deduction of such damages shall not relieve Contractor from its obligation to complete the Works, or from any other of its duties, obligations or responsibilities under this EPC Contract.

12.1.3 If at any time after the Scheduled Take Over Date, Contractor is delayed in carrying out the Works as a result of any event identified in SUBSECTION 5.1.1 (Extension of Time) which would have entitled Contractor to an extension of time had it occurred prior to the Scheduled Take Over Date, Contractor's obligation to pay liquidated damages under SUBSECTION 12.1.1 shall be suspended for such period as represents the extension of time to which Contractor would have been entitled had SUBSECTION 5.1.1 (Extension of Time) applied.

76

12.2 LIQUIDATED DAMAGES FOR PERFORMANCE DEFICIENCY

If:

(a) the Corrected Net Power Output in respect of the Net Power Output Performance Test described in SCHEDULE D (Performance Tests) upon which Take Over is based is less than 100% (but not less than 90%) of the Guaranteed Net Power Output then Contractor shall pay Owner liquidated damages of NZ\$4,575 (plus GST if any) per kilowatt for each kilowatt that the Corrected Net Power Output is below 100% of the Guaranteed Net Power Output; and

(b) the Corrected Pressure Drop in respect of the Pressure Drop Performance Tests described in SCHEDULE D (Performance Tests) upon which Take Over is based is more than the Guaranteed Pressure Drop (but not more than

the 2.7 barg), then Contractor shall pay Owner liquidated damages of NZ\$145,200 (plus GST if any) for each 0.1 barg that the Corrected Pressure Drop exceeds the Guaranteed Pressure Drop.

12.3 MAXIMUM LIQUIDATED DAMAGES

In no event shall the aggregate amount of liquidated damages payable by Contractor pursuant to SECTION 12.1 (Liquidated Damages for Delay in Take Over) and SECTION 12.2 (Liquidated Damages for Performance Deficiency) exceed twenty-five percent of the sum of the EPC Contract Price and the Supply Contract Price (as that term is defined in the Supply Contract) provided however that if Owner shall receive any liquidated damages from Supplier under the Supply Contract, the aggregate amount of liquidated damages payable by Contractor as specified above shall be reduced accordingly.

12.4 EVENT CHARGES

If at any time before Take Over, Owner incurs an instantaneous reserve event charge (or like charge) under its Grid operator services arrangement with Transpower (or equivalent arrangement from time to time) due to any act or omission of Contractor or defect in the Works or the Equipment, Contractor shall pay liquidated damages calculated in accordance with the calculation for such instantaneous reserve event charge (net of any

77

rebates) in Transpower's posted terms for Grid operator services (or equivalent document) from time to time.

12.5 PAYMENT

Owner shall be entitled to demand payment of any liquidated damages which accrue under this ARTICLE 12 (Remedies) at any time after they have accrued. Contractor shall pay the amount so demanded (plus GST if any) within 21 days after receipt of such notice.

12.6 GENUINE ESTIMATE

Contractor acknowledges that the liquidated damages under this ARTICLE 12 reflect genuine estimates of the losses Owner is likely to suffer in the event of a default by Contractor of a type referred to in this ARTICLE 12.

12.7 EXCLUSIVE REMEDY

(a) Subject to paragraph (b) and to Owner's right to reject under SECTION 10.5 (Failure to Pass the Performance Tests) and to recover losses during retesting under SECTION 12.8 (Make Right Obligation]

- (i) liquidated damages net of any net generation revenue received from Owner under Section 12.1 (Liquidated Damages for Delay in Take Over) shall be the only damages payable by Contractor for failing to achieve Take Over in terms of SECTION 7.2 (Take Over) by the Scheduled Take Over Date, but shall not otherwise limit the Owner's rights and remedies under this EPC Contract for claims other than for delays, and
- (ii) liquidated damages under SECTION 12.2 (Liquidated Damages for Performance Deficiency) shall be Owner's sole and exclusive remedy for failure by Contractor to achieve the Guaranteed Net Power Output and the Guaranteed Pressure Drop or other Binary Plant output or operating performance.

(b) In the event the EPC Contract is terminated by Owner pursuant to ARTICLE 21 (Termination), liquidated damages shall apply up to the date of such termination and general damages shall apply from the date of such termination.

12.8 MAKE RIGHT OBLIGATION

Notwithstanding that Contractor may have paid liquidated damages for the performance deficiency pursuant to SECTION 12.2 (Liquidated Damages for Performance Deficiency):

(a) Contractor may carry out such remedial Work and repeat the Net Power Output and/or Pressure Drop Performance Test, in accordance with ARTICLE 10 (Testing), within 120 days following Take Over;

(b) if the results of the last such repeated Performance Test show that such performance deficiency has been reduced or rectified or that the liquidated damages payable thereon have been reduced, Owner shall refund ninety percent of the difference between the amount of liquidated damages previously paid by Contractor for such performance deficiency and the amount of liquidated damages, if any, payable by Contractor under SECTION 12.2 (Liquidated Damages for Performance Deficiency) based upon the results of such last repeated Performance Test; and

(c) All such remedial Work and repeat tests shall be coordinated with Owner and conducted by Contractor in such a way and at such times as to minimize so far as reasonably possible interference or disruption to the normal operation of the Binary Plant. To the extent that such remedial work requires power generation from the Binary Plant to be reduced to effect the remedial work, Contractor shall reimburse Owner for this lost generation on a pro rata basis of NZ\$18,000 per day /14.38 MW (plus GST if any) for each MW lost.

12.9 GENERAL LIMITATION OF LIABILITY

(a) Without prejudice to the Contractor's liquidated damages obligations in this Contract or its obligations in SECTION 12.9(C), Contractor shall in no event be liable to Owner, by way of indemnity or by reason of any breach of this EPC

Contract or in tort, including negligence and strict liability, or otherwise, for loss of profit or revenues or similar, claims of the Owner's customers or other damages or losses not being direct damages for losses.

(b) The total liability of Contractor to Owner on all claims of any kind (other than under SECTION 17.3) shall in no case exceed the aggregate of the EPC Contract Price and the Supply Contract Price (as that term is defined in the Supply Contract) provided however that if Owner shall receive any amount from Supplier directly for any claims under the Supply Contract, the maximum liability of Contractor shall be reduced accordingly.

(c) Nothing in this SECTION 12.9 shall limit the liability of Contractor for general damages in any case of fraud or gross misconduct.

ARTICLE 13 - SECURITIES

13.1 SECURITY PROVIDED ON BEHALF OF CONTRACTOR

(a) Contractor's obligations under this EPC Contract shall as

an essential term of this EPC Contract be secured by a performance bond in the form of a standby letter of credit provided or confirmed by a reputable investment grade surety company or financial institution as assessed by Moody's Investors Service from time to time (reasonably acceptable in all respects to Owner) substantially in the form attached hereto as SCHEDULE H-1 (any material changes in such form shall be subject to the approval of Owner (acting reasonably)) in the maximum amount equal to ten percent of the New Zealand dollar portion of the EPC Contract Price (initially, Seven Hundred Fifty-Two Thousand Two Hundred Forty-Five New Zealand Dollars (NZ\$752,245)) (the "NZ\$ Denominated L/C"). The NZ\$ Denominated L/C shall be provided prior to receipt of the first NZ\$ payment under the Milestone Payment Schedule, shall become effective upon Contractor's receipt of the first NZ\$ payment under the Milestone Payment Schedule and shall be increased from time to time by the New Zealand dollar amounts received by Contractor from Owner under the Milestone Payment Schedule up to the foregoing maximum amount.

80

(b) Contractor's obligations under this EPC Contract and Supplier's obligations to deliver Equipment under the Supply Contract shall as an essential term of this EPC Contract be secured by a performance bond in the form of a standby letter of credit provided or confirmed by a reputable investment grade surety company or financial institution as assessed by Moody's Investors Services from time to time (reasonably acceptable in all respects to Owner) substantially in the form attached hereto as SCHEDULE H-2 (the "US\$ Denominated L/C") (any material changes in such form shall be subject to the approval of Owner (acting reasonably)) . The US\$ Denominated L/C shall be provided prior to receipt of the first US\$ payment under either the Milestone Payment Schedule of this EPC Contract or the Supply Contract, shall become effective upon the earlier of Contractor's receipt of the first US\$ payment under this EPC Contract or Supplier's receipt of the first payment under the Milestone Payment Schedule of the Supply Contract and shall be increased from time to time by (i) the United States dollar amounts received by Contractor from Owner under this EPC Contract up to a maximum of Eighty-Three Thousand United States Dollars (US\$83,000) plus (ii) the amounts received by Supplier from Owner under the Supply Contract Milestone Payment Schedule for payment Milestones nos. 1-18. The US\$ Denominated L/C shall be reduced from time to time upon Supplier's delivery to the Site of Equipment or parts thereof under the Supply Contract as evidenced by a delivery acknowledgment document (either a packing slip or other delivery document from the carrier delivering such item to the Site) that is countersigned by Owner's Representative or his designee (or if such individual fails to countersign within 24 hours of Contractor's request, countersigned by SGS New Zealand Limited or such other independent third party mutually agreed upon by Owner and Supplier, with Contractor paying the expenses of such third party) after such third party's confirmation of delivery by the applicable Supply Contract Milestone Payment Schedule amounts for such delivered items; provided, however, that the US\$ Denominated L/C shall not be reduced below the sum equal to ten percent of the sum of the U.S. Dollar portion of the EPC Contract Price and the Supply Contract Price (initially, One Million Seven Hundred Twenty-Nine Thousand Four Hundred Ninety United States Dollars (US\$1,729,490)). Contractor shall provide contemporaneous written notice to Owner of each request that Contractor submits to the financial institution issuing the US\$ Denominated L/C for a reduction in the amount of the same as provided above.

81

(c) Both the NZ\$ Denominated L/C and the US\$ Denominated L/C shall remain valid until the earlier of (i) issue of the Take Over Certificate or (ii) the termination of this EPC Contract; provided, however, that if at such

termination Owner has a Dispute with Contractor that is in the process of being resolved in accordance with ARTICLE 16 (Dispute Resolution), then the release of the NZ\$ Denominated L/C and the US\$ Denominated L/C shall be subject to Contractor posting a replacement bond, letter of credit or other security acceptable to Owner (acting reasonably) in an amount mutually agreed upon by the parties that reasonably reflects the value of claim(s) of Owner that are the subject of such Dispute. If the parties are unable to agree upon such amount, then the parties shall promptly refer the matter for determination under the Disputes resolution procedure set forth in ARTICLE 16 (Dispute Resolution) with such replacement security being released upon resolution or satisfaction of such Dispute. If the NZ\$ Denominated L/C or the US\$ Denominated L/C by its terms will expire before the issue of the Take Over Certificate, then Contractor shall provide to Owner evidence of the renewal or replacement of said performance bond at least ten (10) business days before such expiration date.

(d) Contractor shall as an essential term of this EPC Contract, procure that ORMAT Industries Ltd. shall provide a parent company guaranty in the form in SCHEDULE G (ORMAT Industries Ltd. Guaranty) hereto upon execution of this EPC Contract, to guarantee Contractor's obligations to perform hereunder.

13.2 EPC CONTRACT AND SUPPLY CONTRACT

The Supply Contract shall be collateral to this EPC Contract to the intent that:

(a) any default by Supplier under the Supply Contract shall be a default by Contractor under this EPC Contract and the Owner may exercise its rights on such default in respect of either or both of the Supply Contract and this EPC Contract as Owner (acting reasonably) deems appropriate,

(b) any default by Owner under the Supply Contract shall be a default by Owner under this EPC Contract and on such default Contractor may exercise its rights under this EPC Contract, as Contractor (acting reasonably) deems appropriate;

82

(c) any termination of the Supply Contract, whether for cause, convenience, extended suspension or force majeure, shall unless otherwise agreed upon by the parties be a similar termination of this EPC Contract; and

(d) Contractor shall cooperate and coordinate with Supplier so that pursuant to the terms of this EPC Contract and the Supply Contract Owner is provided at Take Over 14.38 MW (net, at Guarantee Conditions) binary plant capable to operate safely and lawfully on the Site using Owner-supplied Geothermal Fluid meeting the Design Range and capable of dispatching electricity to the Grid interface with the Wairakei Station all in accordance with the requirements set out in SCHEDULE A (Owner's Technical Requirements).

ARTICLE 14 - CARE OF THE WORK; TITLE

14.1 RISK OF LOSS

Contractor shall bear the risk of physical loss or destruction of or damage to the Equipment from the point in time such items are delivered FOB (Incoterms 2000) until Take Over Certificate is issued. Contractor shall bear the risk of physical loss or destruction of or damage to the Works (excluding Equipment) and shall retain care of the Works until the issue of the Take Over Certificate.

14.2 CONTRACTOR'S CARE OF THE BINARY PLANT

(a) Contractor shall take full responsibility for the care of the Binary Plant until the Take Over Certificate is issued when, subject to paragraph (b), responsibility for the care of the Binary Plant shall pass to Owner.

(b) Notwithstanding that responsibility may have passed to Owner under paragraph (a), Contractor shall remain responsible for the repair of any aspect of the Binary Plant which is defective or outstanding on the date stated in the Take Over Certificate, until this defective or outstanding work has been completed in accordance with this EPC Contract.

83

(c) If any loss or damage happens to the Binary Plant prior to the issue of the Take Over Certificate, or if loss or damage happens to any aspect of the Binary Plant for which Contractor remains responsible for the repair of under paragraph (b), Contractor shall rectify the loss or damage at Contractor's risk and cost, so that the Binary Plant is provided to Owner in accordance with this EPC Contract.

(d) Contractor shall be liable for any loss or damage to the Works caused by any act or omission of Contractor after the Take Over Certificate has been issued until the later of Final Acceptance or the completion of Contractor's performance of Works at the Site, except to the extent that the same was caused by Owner. Contractor shall also be liable for any loss or damage to the Works which occurs after the Take Over Certificate has been issued and which arose from a previous event for which Contractor was liable, except to the extent that such loss or damage was caused by Owner.

14.3 DELIVERY

Contractor shall be responsible to assure safe delivery of all materials, equipment, tools, supplies and other items to the Site related to the Works including all of the Equipment.

14.4 TITLE

Contractor warrants that it has good title to the Works and shall procure that title to the Works shall pass to Owner free of all liens, claims, charges, security interests (including security interests under the Personal Property Securities Act 1999) and encumbrances upon the earlier of delivery to the Site or payment to Contractor or Supplier as the case may be under this EPC Contract or the Supply Contract for the applicable Works or Equipment.

14.5 TITLE TO ELECTRICITY

Owner has title to and is entitled to the commercial benefit of all electricity produced from the Binary Plant, including electricity produced during commissioning and testing.

84

ARTICLE 15 - INSURANCE

15.1 CONTRACTOR PROVIDED INSURANCE

Contractor shall provide the following insurance no later than the times specified in SECTION 6.4(B) (Preconditions to Milestone payments) with the indicated limits, with its insurance carriers, naming Owner as an additional insured and shall maintain such insurance in full force and effect until Take

Over. In the event this insurance or any portion of it becomes commercially unavailable on commercially reasonable rates and terms Owner and Contractor shall cooperate in their efforts to obtain such replacement insurance as may be available and this EPC Contract shall be modified accordingly:

(a) Comprehensive General Liability - with combined single limits of NZ\$10,000,000 per occurrence and in the aggregate;

(b) Equipment and Contractor's plant, goods and materials loss in transit to the Site, including ocean marine shipment (replacement value);

(c) New Zealand Statutory Liability Insurance - NZ\$1,000,000, and

(d) Contract Works Insurance for the full value of the Works including earthquake. Cover for earthquake, fire, collapse, flood and any other catastrophic perils shall be in such sub-limits that are commercially available at reasonable rates in the commercial insurance market.

15.2 POLICIES

All policies of insurance maintained pursuant to this ARTICLE 15 shall:

(a) require forty-five (45) days' prior notice to the additional insured parties of cancellation, non-renewal or material change in coverage;

(b) provide that such insurance is primary without right of contribution from any other insurance which might otherwise be available to the insured party;

85

(c) provide that, in the event of any loss payment under a policy, the insurer shall waive any rights of subrogation against the insured party and shall waive any setoff or counterclaim or any other deduction whether by attachment or otherwise; and

(d) include a cross-liability endorsement providing that inasmuch as the policies are written to cover more than one insured, all terms and conditions, insuring agreements and endorsements, with the exception of limits of liability, shall operate in the same manner as if there were a separate policy covering each insured.

15.3 EVIDENCE OF INSURANCE

Upon request by Owner, Contractor shall furnish Owner with the policy wording and a Certificate of Insurance, issued by the Insurer, as evidence that Contractor provided insurance is being maintained..

ARTICLE 16 - DISPUTE RESOLUTION

16.1 RESOLUTION BY PARTIES

Owner and Contractor desire that this EPC Contract operate between them fairly and reasonably. If during the term of this EPC Contract, a Dispute arises between Owner and Contractor, or one party perceives the other as acting unfairly or unreasonably, or a question of interpretation arises hereunder, then either party identifying the Dispute shall serve notice on the other (a "Notice of Dispute") stating the nature of the Dispute, together with brief particulars of the facts and circumstances relied on by the party serving the Notice of Dispute and the Owner's Representative and Contractor's Representative shall then promptly confer and exert their best efforts in good faith to reach a reasonable and equitable resolution of the Dispute. If the Owner's Representative and the Contractor's Representative are unable to resolve the

Dispute (whether because of a disagreement between them or because they did not communicate or respond) within five (5) business days after the Notice of Dispute, the matter shall be referred after notice by either party to the other within two (2) business days of the lapse of the aforementioned five (5) business days to the parties' responsible corporate officers for resolution. Neither party shall seek resolution by arbitration of any Dispute arising in connection with this EPC Contract until at least ten (10) business days after the above-referenced referral to the

86

parties' responsible corporate officers, who shall be identified by each party from time to time, to provide them an opportunity during such period to resolve the Dispute.

16.2 RESOLUTION BY ARBITRATION

If the Dispute is not resolved within the above described period for resolution by the responsible corporate officers, then at the request of either party Owner and Contractor shall enter into binding arbitration as set forth herein. Notice of the demand for arbitration shall be delivered to the other party and the Dispute shall be referred to three arbitrators, one each appointed by the parties and the third appointed by the parties' appointees by agreement between the parties' appointees or if they are not able to agree within ten (10) business days of service of notice referring the dispute to arbitration, then by the President of the New Zealand District Law Society on request of either party.

The parties shall proceed with the arbitration expeditiously and shall conclude all proceedings there under in order that a decision may be rendered within forty (40) days from service of the demand for arbitration.

Each party shall bear its own expenses in connection with any arbitration, including but not limited to counsel fees, and all joint expenses shall be apportioned in the award of the arbitrators.

Any arbitration shall be conducted in Wellington, New Zealand in accordance with the provisions of the Arbitration Act 1996 (as amended or substituted from time to time).

16.3 URGENT RELIEF

Nothing in this ARTICLE 16 shall preclude either party from bringing court proceedings seeking urgent interlocutory relief.

16.4 CONDITIONS PRECEDENT

Each step in the Dispute resolution process in this ARTICLE 16 shall be a condition precedent to proceeding to the next step. In particular, a party may not commence arbitration in respect of a Dispute unless that Dispute has first been negotiated, mediated

87

and discussed by the parties' responsible corporate officer in accordance with SECTION 16.1 (Resolution by Parties). The parties may, however, agree otherwise in relation to any particular Dispute.

16.5 CONTINUED PERFORMANCE

The parties shall continue to perform their obligations under this EPC Contract pending the final settlement or determination of any dispute.

ARTICLE 17 - INDEMNIFICATION

17.1 CONTRACTOR'S INDEMNITY

Contractor shall defend, indemnify and hold harmless Owner and its directors, officers, agents, employees, shareholders and affiliates from any and all third party claims, suits, actions and proceedings and all costs, expenses and other liabilities (including reasonable attorney fees) related thereto arising out of any actual or alleged injury or death of persons or damage to property arising out of (i) the negligence, willful misconduct or default of Contractor, its Subcontractors or their employees (except only to the extent that the same have been caused by the negligence or default of Owner or its employees) or (ii) the violation of any Law, Consents or Standards by Contractor, its Subcontractors or their employees.

17.2 OWNER'S INDEMNITY

Owner shall defend, indemnify and hold harmless Contractor and its Subcontractors and their respective joint venture partners, directors, officers, agents, employees, shareholders and affiliates from any and all third party claims, suits, actions and proceedings and all costs, expenses and other liabilities (including reasonable attorney fees) related thereto arising out of (i) any actual or alleged injury or death of persons or damage to property arising out of the negligence, willful misconduct or default of Owner (except only to the extent that the same have been caused by the negligence or default of Contractor, its Subcontractors or their employees); (ii) the violation of any Law, Consents or Standards by Owner or its employees; or (iii) the use of the Site or the use or disposal of the Geothermal Fluid as contemplated in this EPC Contract (except only to the extent

88

that the same has been caused by the failure of Contractor, its Subcontractors or their employees to comply with the applicable Consents with regard to such disposal).

17.3 PATENT INDEMNITY

Contractor shall indemnify Owner from and against all third party claims and proceedings for or on account of infringement of any Intellectual Property Rights in respect of the Works and from and against all claims, demands, proceedings, damages, costs, charges and expenses whatsoever in respect of or in relating to such rights, except for any use of the Works other than for the original purpose for which it is intended or any infringement which is due to the use of the Works in association or combination with any other plant or item not supplied by Contractor or Supplier.

17.4 NOTICE AND SETTLEMENT OF CLAIMS

17.4.1 A party seeking the benefit of an indemnity shall give the other party prompt notice of any claim giving rise to the indemnity. The indemnifying party may at its own cost conduct negotiations for the settlement of such claim and any litigation that may arise there from. The party claiming the benefit of the indemnity shall not make any admission (other than appropriate admissions in strict liability actions) which might be prejudicial to the indemnifying party unless the indemnifying party fails to take over the conduct of the negotiations or litigation within a reasonable time after having been so requested. The party claiming the benefit of the indemnity shall have the right to have its own counsel, at its expense, participate in the defense and negotiation of the claim or action.

17.4.2 The party claiming the benefit of the indemnity shall, at the request of the indemnifying party, provide reasonable assistance for the purpose of contesting any such claim or action, and shall be paid all reasonable costs incurred in doing so.

89

ARTICLE 18 - ASSIGNMENT

18.1 ASSIGNMENT BY OWNER

(a) Owner may assign any or all of Owners rights, obligations or interests under this EPC Contract. Owner will nevertheless be responsible to discharge Owner's obligations under this EPC Contract in the event that the assignee fails to do so.

(b) Where default of the Supply Contract has occurred or a remedy or obligation been triggered so as to entitle Owner to claim under the Supply Contract, and Contractor has at Owner's request remedied the default or provided the remedies or performed the obligation in question under this EPC Contract such that further remedies or performance of such obligation under the Supply Contract would comprise an unreasonable duplication, Owner unconditionally and irrevocably assign all of its rights and obligations to the additional Supply Contract obligation or remedies in relation to the claim in question to Contractor. Owner further agrees that all its rights and obligations with respect therewith shall inure to the benefit of Contractor as if Contractor were a party to the Supply Contract, and that this assignment shall inure to the benefit of and shall be binding upon the parties' respective successors and assigns.

18.2 NO ASSIGNMENT BY CONTRACTOR

(a) Contractor may assign all of its right, title and interest in and to or arising out of or in connection with this EPC Contract as security for the benefit of its lender(s) or to a related company (as defined in clause (b) below) for which ORMAT Industries Ltd. is the ultimate parent provided that such related company signs a document assuming and agreeing to perform all of Contractor's obligations under this EPC Contract. No such assignment shall relieve Contractor of any obligation hereunder.

(b) Contractor shall not assign any of Contractor's rights, interests or obligations under this EPC Contract. For the purposes of this SECTION 18.2, assignment shall include the transfer of shares in any related company (within the meaning of section 2(3) of the Companies Act 1993) of the Contractor that directly or indirectly results in a change of control of the Contractor such that ORMAT Industries Ltd. is no longer its ultimate parent.

90

18.3 SUCCESSION

This EPC Contract shall inure to the benefit of and be binding upon the successor and permitted assigns (as provided for by SECTION 18.1 (Assignment by Owner) or SECTION 18.2 (Assignment by Contractor)) of the parties hereto. Owner shall cause any assignees or transferees of its interest or any portion thereof in this EPC Contract or in the Works, including any lien holder or party holding a security interest with respect thereto, to be bound by the releases and limitations of liability set forth herein.

ARTICLE 19 - SUBCONTRACTORS

19.1 SUBCONTRACTS

Contractor may enter into subcontracts for the performance of parts of the Work and shall be solely responsible for the management and satisfactory performance of all its Subcontractors in their performance of the Work. Contractor shall not subcontract any major components of Work (other than for the purchase of proprietary goods and materials or for the provision of labour on a piecework basis) except to Subcontractors appearing on the Approved Major Subcontractors List (as described below). Contractor shall be responsible for the acts, defaults and neglects of any Subcontractor, its agents or employees in their performance of the Work as if they were the acts, defaults or neglects of Contractor, its agents or employees. The issuance of any subcontract shall not relieve Contractor of any of its obligations under this EPC Contract.

19.2 SUBCONTRACTING

(a) Contractor shall provide all such information (other than price and other proprietary information) relating to its Subcontractors as Owner may reasonably require.

(b) No subcontract or purchase order shall bind or purport to bind Owner.

19.3 CONTRACTOR'S RESPONSIBILITY

Contractor shall be responsible for performance by all Subcontractors under their respective subcontracts and for the acts or defaults of its Subcontractors and its

91

Subcontractors' personnel, agents and employees, and any other entity employed by any of them in connection with the Works, as if they were the acts or defaults of Contractor.

19.4 APPROVED MAJOR SUBCONTRACTOR LIST

The Approved Major Subcontractors List in SCHEDULE B (Contractor's Technical Proposal) is preliminary, and may be amended in the following manner. In the case the need arises to add a Subcontractor to the Approved Major Subcontractors List, in Contractor's opinion, Contractor shall propose such addition to Owner's Representative in writing identifying the type of Work that could be subcontracted to such Subcontractor and details of the Subcontractor, including relevant experience. Within ten (10) days after receipt of Contractor's proposal, Owner's Representative shall have the right to advise Contractor of any such potential Subcontractors to which it reasonably objects, together with the reasons for objection and may propose additional Subcontractors based on his or her experience concerning such potential Subcontractor. Contractor shall not add any potential Subcontractor to the list to which Owner's Representative so reasonably objects and shall give due consideration to adding to the list any Subcontractors proposed by the Owner's Representative. If Owner's Representative fails to respond within such ten (10) day period, Contractor shall have the right to add said potential Subcontractor to the list.

19.5 SUBCONTRACT TERMS

(a) Contractor shall cause each subcontract entered into by Contractor with a value of NZ\$500,000 or more to contain terms that entitle Contractor to disclose the subcontract (excluding price and other proprietary information) to Owner, that acknowledge that the subcontract works are being carried out by the Subcontractor for the benefit of Owner in terms of the Contracts (Privity) Act 1982 and to agree that upon termination of this EPC Contract for due to

Contractor's default:

- (i) Owner may upon the default of Contractor and termination of this EPC Contract pursuant to SECTION 21.1.2 (Termination for Cause) take an assignment or novation of the benefit of the subcontract (together with a term that the Subcontractor acknowledges that it by signing the subcontract it has agreed to such novation); and

92

- (ii) upon assignment or novation under paragraph (i):
 - (1) Owner shall not become responsible for any outstanding obligations or liabilities of Contractor to the Subcontractor under the subcontract relating to the period prior to the such assignment or novation, including payments due to the Subcontractor for work carried out; and
 - (2) Owner will be responsible to pay the Subcontractor only for all action taken by the Subcontractor at the written instruction of Owner at the prices in the subcontract.

(b) Contractor acknowledges that:

- (i) it will, if requested by Owner, disclose the existence of any subcontract with a value of NZ\$500,000 to Owner;
- (ii) it consents to an assignment or novation to Owner under SECTION 19.5(A)(I);
- (iii) upon such assignment or novation Owner may exercise all of the rights of Contractor under or in relation to the subcontract as if it were Contractor;
- (iv) upon such assignment or novation Contractor shall not be relieved of, and subject to the agreement of such Subcontractor, Owner shall not become liable for, the obligations or liabilities of Contractor relating to the period prior to such assignment or novation. If Subcontractor's agreement as referred to in this SECTION 19.5(B)(IV) is not forthcoming, Contractor agrees and acknowledges that it shall promptly reimburse Owner for any amounts Owner is required to pay to Subcontractor for any obligations or liabilities of Contractor relating to the period prior to such assignment or novation.

93

19.6 PAYMENT OF SUBCONTRACTORS

(a) Contractor shall pay all sums due to Subcontractors by the due date for payment and nothing in this EPC Contract shall require Contractor to pay any sums to a Subcontractor that are being disputed in good faith by Contractor in accordance with applicable Law.

(b) Contractor shall, at its option, either provide confirmation from Subcontractors that such Subcontractors have been paid or other reasonable

evidence of payment of Subcontractors if requested by Owner.

19.7 ASSIGNMENT OF SUBCONTRACTOR WARRANTIES

Upon Final Acceptance, Contractor shall assign to Owner all warranties or guarantees which Contractor has received from Subcontractors in respect of the Works.

19.8 COMPLIANCE WITH CONSTRUCTION CONTRACTS ACT 2002 (CCA)

(a) Contractor shall ensure that compliance with the requirements of CCA are not breached but if any notice of suspension of any part of the Works is received by Contractor from any Subcontractor Contractor shall immediately notify the Owner's Representative including the amount that Contractor allegedly owes to any Subcontractor who exercises any lawful right to suspend work in accordance with section 72 of the CCA (the subcontractor's debt).

(b) Owner shall be entitled but not obliged to pay the subcontractor debt when due directly to the Subcontractor in order to avert any lawful suspension of work by that Subcontractor under the CCA. If payments are made by Owner direct to any Subcontractor under this clause such payment shall be deemed to be in satisfaction of the Owner's obligation to pay Contractor such amounts due under this EPC Contract. The value of payments made direct to any Subcontractor under this clause shall be deducted from future progress payments made to Contractor.

94

(c) Contractor shall indemnify Owner against any cost, losses, liabilities or damages suffered by Owner which may arise out of or in consequence of any lawful suspension of all or any part of the Works by any Subcontractor under the CCA.

ARTICLE 19A - PERSONNEL

19A.1 CONTRACTOR'S RESPONSIBILITY

Contractor shall be responsible for the acts and defaults of its employees and agents as if they were the acts or defaults of Contractor.

19A.2 CONTRACTOR'S REPRESENTATIVE

(a) Contractor shall designate a Contractor's Representative who shall act as a single point of contact with Owner in all matters (including administration of the Supply Agreement) on behalf of Contractor. The Contractor's Representative shall be available or be represented on the Site during business hours after the commencement of the Works at the Site, and on call after hours, to receive all instructions from Owner and shall be authorised by Contractor to act on its behalf in relation to all matters arising under this EPC Contract. Owner shall not be obliged to issue instructions to any other person.

(b) Contractor shall not remove the Contractor's Representative without first consulting with Owner about such removal unless such persons (or any replacements as aforesaid) become incapacitated or no longer in the employment of Contractor. Contractor shall give the Owner notice forthwith on becoming aware of any such event.

(c) Any replacement Contractor's Representative shall have appropriate qualifications, experience and expertise and shall be subject to Owner's approval (which shall not be unreasonably withheld).

19A.3 REMOVAL OF PERSONNEL

(a) Owner shall be entitled, after consultation with Contractor, to

require the removal from the carrying out of the Works of any person employed by Contractor or any Subcontractor whose performance or conduct, in the reasonable opinion of Owner, is unsatisfactory.

95

(b) In the event that any personnel is removed under SECTION 19A.3(A), Contractor shall at no cost to Owner replace such person with a person with appropriate qualifications, experience and expertise.

19A.4 LABOUR ISSUES

Contractor shall immediately notify Owner of any and all events and circumstances giving rise to claims, disputes, grievances, bans, disruptions, work stoppages and other labour issues which affect or have the potential to affect Contractor's workforce, the workforce of any Subcontractor, or the workforce of any other contractors, or which constitutes a project wide concern.

ARTICLE 20 - SUSPENSION

20.1 RIGHT OF OWNER TO SUSPEND THE WORKS

Owner's Representative may suspend performance of the Works by Contractor hereunder, in whole or in part, by written notice of such suspension to Contractor. If Owner elects to suspend Supplier's performance of the Supply Contract, Owner shall notify Contractor and, unless Contractor otherwise agrees, Owner shall be deemed to suspend performance of the Works by Contractor hereunder. During such suspension, Contractor shall protect, store and secure the Works or such part of the Works, including any affected Equipment, against any deterioration, loss or damage. Upon receipt of permission, instruction or notice to resume the Works in accordance with this EPC Contract, the parties shall jointly examine the Equipment and the Works affected by the suspension and determine an orderly, reasonable and safe plan for implementing such suspension. Such suspension shall continue for the period specified in the suspension notice.

20.2 CONSEQUENCES OF SUSPENSION

(a) If Contractor suffers delay as a result of complying with Owner's instructions under SECTION 20.1 (Right of Owner to Suspend Work), Contractor shall be entitled, subject to ARTICLE 5 (Extension of Time), to an extension of time for any such delay.

96

(b) If as a result of complying with Owner's instructions under SECTION 20.1 (Right of Owner to Suspend the Works) Contractor incurs or will incur Cost:

- (i) in protecting, storing and securing the Works, or any part of the Works, against any deterioration, loss or damage;
- (ii) for personnel, Subcontractors or rented Contractor's Equipment, the payments of which, with Owner's prior written agreement, is continued during the suspension period; and/or
- (iii) for demobilisation and re-mobilisation,

Contractor shall be entitled to payment of such Cost plus an allowance of ten percent thereon for overhead and profit.

(c) Contractor shall not be entitled to an extension of time, payment of any costs (including Cost) or an adjustment of the EPC Contract Price for

making good the consequences of Contractor's faulty design, workmanship or materials, or of Contractor's failure to protect, store or secure in accordance with SECTION 19.1 (Right of Owner to Suspend the Works).

20.3 EXTENDED SUSPENSION

In the event suspensions by Owner exceed one hundred and twenty (120) days in the aggregate and provided that such suspensions do not arise as a result of default on the part of Contractor under this EPC Contract or on the part of Supplier under the Supply Contract or an event of Force Majeure (in which case SECTION 22.5 (Extended Force Majeure) shall apply), then Contractor may give notice to the Owner's Representative requesting permission to proceed within twenty-eight (28) days. If permission is not granted within that time, Contractor may by giving notice to Owner and treat the suspension as an Owner's Change omitting the affected part of the Works. The provisions of SECTION 8.3 (Requests) relating to reduction of the EPC Contract Price shall not apply to the suspension. If the suspension affects the whole of the Works, Contractor may terminate its obligations under this EPC Contract by so notifying Owner in writing

97

and Contractor shall be entitled to be paid as provided in SUBSECTION 21.1.5 (Termination for convenience) or, if applicable, SECTION 22.5 (Extended Force Majeure).

20.4 RIGHT OF CONTRACTOR TO SUSPEND

Contractor may suspend performance of the Work hereunder, in whole or in part, upon 10 days' prior written notice of such suspension where Owner has not paid by the due date any amount invoiced by Contractor unless Owner places any unpaid or disputed amount in an interest bearing escrow account for the benefit of and immediate payment to the party in whose favour the Dispute is ultimately resolved. Any interest carried on any monies held in escrow shall be paid to the party in whose favour the Dispute is resolved. Such suspension shall continue until the money is put into escrow.

ARTICLE 21 - TERMINATION

21.1 TERMINATION BY OWNER

21.1.1 NOTICE TO CORRECT

Within 10 days from the issue of a notice of any breach of this EPC Contract from the Owner's Representative, Contractor shall either remedy such breach or provide to Owner a plan acceptable to Owner (acting reasonably) for the remedy of the breach complained of. Such plan shall address both the actions that Contractor is proposing to undertake and the timeframe for such actions, which timeframe shall be that period reasonably necessary and practicable for remedying such breach. Contractor must promptly and diligently commence and continue to effect the remediation measures specified in the agreed upon plan in accordance with the timeframe or particular programme agreed. To avoid doubt, Owner shall be under no obligation under this SUBSECTION 21.1.1 to agree to an extension of the Scheduled Take Over Date.

21.1.2 TERMINATION FOR CAUSE

Owner shall be entitled to terminate this EPC Contract immediately by notice to Contractor, if the Supply Contract is terminated other than as a result of default by Owner, or if Contractor:

- (a) fails, within the 10 day period specified in SUBSECTION 21.1.1, to either (i) remedy the breach or (ii) provide the plan for remediation that is acceptable to Owner (acting reasonably) as required under SUBSECTION 21.1.1;
- (b) fails to diligently commence and continue to effect the cure of a breach of this EPC Contract in accordance with the agreed upon plan of remediation as described in SUBSECTION 21.1.1 or Owner does not accept the remediation plan provided by Contractor pursuant to SUBSECTION 21.1.1 and in each case does not rectify such failure within 2 days of receipt of notice of such failure from Owner; or
- (c) becomes bankrupt or insolvent, goes into liquidation, has a receivership or administration order made against it, compounds with its creditors, or carries on business under a receiver, trustee or manager for the benefit of its creditors, or if any act is done or event occurs which under any Law has a similar effect to any of these acts or events.

Each of (a) to (c) of this SUBSECTION 21.1.2 is a "Default". The Owner's election to terminate this EPC Contract under this SUBSECTION 21.1.2 shall not prejudice any other rights or remedies of the Owner, under this EPC Contract or otherwise.

21.1.3 CONSEQUENCES OF TERMINATION

Upon termination under SECTION 21.1.2 (Termination for cause):

- (a) Contractor shall immediately comply with any instructions included in the notice of termination for the protection of life or property or for the safety of the Plant;
- (b) Contractor shall then leave the Site and:
 - (i) deliver to Owner all Contractor's Equipment then at the Site (only if Owner elects to complete the Binary Plant as provided in clause (c) below, Equipment (including Equipment off site) and Temporary Works;
 - (ii) deliver to Owner all documents (in whatever state of completion) and information created by or on behalf of Contractor that Contractor would have been required to submit or provide to Owner under this EPC Contract but for the termination and for avoidance of doubt excluding all documents which Contractor was not otherwise obligated to provide under this EPC Contract; and
 - (iii) comply with any instructions included in the notice of termination for the novation of any subcontract with any Subcontractor;
- (c) Owner may (but shall not be obliged to) complete the

Binary Plant and/or arrange for any other entities to do so. Owner and these entities may use for this purpose any Contractor's Equipment, Plant, Temporary Works, documents and information made by or on behalf of Contractor; and

- (d) on completion of the Binary Plant Owner shall give notice that the Contractor's Equipment and Temporary Works will be released to Contractor at or near the Site. Contractor shall promptly arrange their removal, at the risk and cost of Contractor.

21.1.4 PAYMENT AFTER TERMINATION

After termination under SECTION 21.1.2 (Termination for

cause):

- (a) Owner may withhold any further payments to Contractor until any costs of design, execution, completion of the Works and remedying of any defects, losses and general damages arising from

100

Contractor's breach (including for delay in completion), and all other costs incurred by Owner, have been established; and

- (b) Owner shall be entitled to recover from Contractor Owner's costs and general damages arising from Contractor's breach (including for delay in completion and costs of completing the Works (subject to the limitations of this EPC Contract).

21.1.5 TERMINATION FOR CONVENIENCE

- (a) In addition to Owner's rights to terminate under SUBSECTION 21.1.2 (Termination for cause), Owner shall be entitled to terminate this EPC Contract at any time, by giving notice of such termination to Contractor. The termination shall take effect on the date on which Contractor receives notice.
- (b) Upon termination under SUBSECTION 21.1.5(A):
 - (i) the provisions of SUBSECTION 21.1.3(A) TO (D) (Consequences of termination) shall apply except that Contractor shall be entitled to remove the Contractor's Equipment upon leaving the Site;
 - (ii) the parties shall co-operate to achieve an equitable wash-up of debits and credits between them in relation to this EPC Contract and Contractor shall be entitled to payment of the following:
 - (1) such proportion of the EPC Contract Price that is equivalent to the proportion of the Works completed in accordance with this EPC Contract by

Contractor (including on account of Milestones achieved by reference to the Milestone Payment Schedule or if equitable in the circumstances a fair and just pro rata payment on account of Milestones partly achieved),

101

less any amounts previously paid to Contractor for such work, any liquidated damages due under ARTICLE 12 (Remedies) and any other undisputed amount then due to Owner from Contractor in connection with any breaches of this EPC Contract by Contractor;

- (2) actual cancellation charges due to Subcontractors as a result of the termination;
- (3) reasonable costs incurred by Contractor for its own efforts to implement termination and demobilisation (subject to Contractor using reasonable endeavours to minimise such costs), and
- (4) a cancellation fee calculated in accordance with SCHEDULE I,

but shall not be entitled to payment for any other consequential costs of any kind or to payment on account of its overhead or anticipated profit in respect of the unfinished work.

- (c) Prior to exercising the right of termination under SUBSECTION 21.1.5(a), Owner shall be entitled to require Contractor to advise of the Subcontractor cancellation charges Contractor would incur in the event of such termination. Contractor shall use its Best Endeavors to provide such information within 7 days or as soon thereafter as reasonably practicable. Provided Owner exercises the right of cancellation within 14 days after receipt of such information, the amount due under SUBSECTION 21.1.5(b)(ii)(2) shall not exceed the figure advised by Contractor under this SUBSECTION 21.1.5(c).

102

- (d) Owner's election to terminate this EPC Contract under SUBSECTION 21.1.5(A) shall not prejudice any other rights of Owner or Contractor under this EPC Contract or otherwise.

In addition to its other rights and remedies under law or otherwise, Contractor shall be entitled to terminate this EPC Contract on 5 days notice only if one of the following defaults occur and continue for 30 days (20 days in the event of payment default) following a notice by Contractor to cure such default or (except in the case of a default in any payment obligation) if cure cannot be effected within such period, without promptly commencing and diligently pursuing a cure thereof:

- (a) Contractor does not receive a payment when such payment was due (except for any amount disputed in good faith by Owner);
- (b) an extended suspension affects the whole of the Works as described in SECTION 20.3 (Extended suspension);
- (c) Owner becomes bankrupt or insolvent, goes into liquidation, has a receivership or administration order made against it, compounds with its creditors, or carries on business under a receiver, trustee or manager for the benefit of its creditors, or if any act is done or event occurs which under any Law has a similar effect to any of these acts or events.

Each of (a) to (c) of this SUBSECTION 21.2 is a "Default". Contractor's election to terminate this EPC Contract under this SUBSECTION 21.2 shall not prejudice any other rights or remedies of the Contractor, under this EPC Contract or otherwise.

21.3 PAYMENT ON TERMINATION

After termination under SECTION 21.2 (Termination by Contractor) Contractor's remedy shall be an entitlement to payment in accordance with SECTION 21.1.5

103

(Termination for convenience) and to termination, without draw, of the performance bonds and parent company guaranty furnished by Contractor under this EPC Contract.

ARTICLE 22 - FORCE MAJEURE

22.1 FORCE MAJEURE

(a) Force Majeure as used in this EPC Contract shall be an exceptional event or circumstance which is beyond the control of Owner, Contractor or Supplier, such party could not reasonably have provided against before entering into this EPC Contract or the Supply Contract as appropriate, and which having arisen, either Owner or Contractor (for purposes of this SECTION 22.1, the "affected party") could not reasonably have avoided or overcome and which materially affects the affected party's performance of its obligations under this EPC Contract, and shall include, but not be limited to, the following events:

war, declared or not, or hostilities, or belligerence, blockade, revolution, insurrection, riot, expropriation, requisition, confiscation, or nationalization, export or import restrictions by any authorities, closing of harbours, docks, canals, or other assistances to or adjuncts of the shipping or navigation of or within any place, rationing or allocation, whether imposed by law, decree or regulation by, or by compliance of industry at the insistence of any governmental authority, or fire, unusual flood, earthquake, hydrothermal eruption, volcanic eruption, storm, lightning, tidal wave, perils of the sea,

accidents of navigation or breakdown or injury of vessels, accidents to harbours, docks, canals or other assistance to or adjuncts of the shipping or navigation, epidemic, quarantine, strikes or combination of workmen, lockouts or other labour disturbances (except for strike or other labour disturbances by Contractor's employees), or governmental acts and decrees that in fact delay the Work or increase the cost of the Works but excluding failures of plant and equipment, non-availability of labour, goods, materials, equipment or other resources, strikes or other employee disputes, adverse weather not identified above, or lack of financial resources.

104

(b) To the extent that the affected party is prevented from or delayed in complying with any of its obligations under this EPC Contract by reason of an event of Force Majeure, such obligation shall be suspended for the duration of the impact of such event upon the affected party. The burden of proving the Force Majeure event shall be on the party claiming Force Majeure.

(c) Non-performance of a Subcontractor is a Force Majeure event, provided the Subcontractor's non-performance is due to an exceptional event or circumstance in terms of paragraph (a) and the Subcontractor uses its best endeavours to continue to perform its obligations under the subcontract, to minimise any delay, to correct or cure the circumstances preventing performance and otherwise to remedy its inability to perform.

22.2 NOTICE

If either party's ability to perform its obligations under this EPC Contract is or is likely to be affected by Force Majeure, such party shall promptly give notice to the other party stating the nature of the circumstances or anticipated circumstances, their effect or anticipated effect upon the performance of such party's obligations, the anticipated duration of the circumstances and any action being taken to avoid or minimise the effect of the circumstances.

22.3 CONTINUED PERFORMANCE

The suspension or delay of performance due to Force Majeure shall be of no greater scope and no longer duration than is required. The excused party shall use its Best Endeavours to continue to perform its obligations under this EPC Contract, to minimise any delay, to correct or cure the circumstance preventing performance and otherwise to remedy its inability to perform.

22.4 ACCRUED OBLIGATIONS

No obligations of either party which arose before the occurrence of Force Majeure shall be excused as a result of such occurrence.

105

22.5 EXTENDED FORCE MAJEURE

If circumstances of Force Majeure have occurred and shall continue for a period of 180 days then, notwithstanding that Contractor may by reason thereof have been granted an extension of time for completion of the Work, either party shall be entitled to serve upon the other party 28 days written notice to terminate this EPC Contract. If at the expiry of the period of 28 days the Force Majeure event shall still continue then this EPC Contract shall terminate and Contractor shall be entitled to the payments contained in SUBSECTION 21.1.5

except for the cancellation fee.

ARTICLE 23 - CONFIDENTIALITY

The contents of this EPC Contract and the Supply Contract and any other information that is in or comes into the possession of either party ("the Transferee"), its employees, Subcontractors or other third parties for which it is responsible relating to the other party is disclosed in confidence and the Transferee shall restrict its use of such information solely to uses:

- (a) required for the purpose of giving effect to performance of this EPC Contract;
- (b) required for the purpose of giving effect to or the conditions of any Consent;
- (c) required by law or any stock exchange listing rules (provided that prior to disclosure the Transferee must advise the other party and must only disclose such information as the Transferee's legal advisors reasonably believe is necessary to disclose by law); or
- (d) in relation to information that is in the public domain (other than as a result of a breach of this ARTICLE 23).

Contractor and Owner shall treat all such information as private and confidential and neither of them shall transfer, copy, list or disclose the same or any particulars thereof without the previous written consent of the other, provided that nothing in this Article

106

shall prevent the publication or disclosure of any such information that has come within the public domain otherwise than by breach of this Article.

ARTICLE 24 - NOTICES

All notices and other communications required or permitted by this EPC Contract shall be in writing and shall become effective (a) if by hand delivery, upon receipt thereof, (b) if by official government mail, three (3) days after deposit in the mail, postage prepaid, certified or registered mail, return receipt requested or (c) if by next day delivery service, upon such delivery, at the addresses set forth below or at such other addresses as the party receiving notice shall subsequently designate by written notice to the other party. Notwithstanding the foregoing, the parties may communicate via email at such email addresses designated by each party in the manner provided above with regard to communications other than notices of breach, default, termination or other similar material matters. Without obviating the obligation to timely provide such notice to both Owner or Contractor addressees set forth below, a notice or communication to Owner or Contractor hereunder shall become effective upon the first date of delivery to or receipt of such notice by either Owner or Contractor addressee set forth below.

If to Owner:

Perkins Coie LLP
1201 Third Avenue
48th Floor
Seattle, WA 98101-3099

ARTICLE 25 - MISCELLANEOUS

25.1 APPLICABLE LAW

Throughout the course of performance of this EPC Contract, the parties shall comply with all applicable Laws relating to this EPC Contract and its performance. This EPC Contract shall be interpreted under and governed by the laws of New Zealand.

25.2 SEVERABILITY

In the event that any of the provisions or portions, or applications thereof, of this EPC Contract are held to be unenforceable or invalid by any court of competent jurisdiction, Owner and Contractor shall negotiate an equitable adjustment in the provisions of this EPC Contract with a view toward effecting the purpose of this EPC Contract, and the validity and enforceability of the remaining provisions or portions, or applications thereof, shall not be affected thereby.

25.3 AMENDMENTS AND WAIVERS

This EPC Contract may not be changed or amended orally, and no waiver hereunder may be oral, but any change or amendment hereto or any waiver hereunder must be in writing and signed by the party or parties against whom such change, amendment, or waiver is sought to be enforced.

108

25.4 COUNTERPARTS

This EPC Contract may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

25.5 ENTIRE CONTRACT

This EPC Contract constitutes the entire agreement between the parties hereto relating to the subject matter hereof, and supersedes any previous agreements or understandings between the parties.

25.6 EFFECT OF WAIVERS

Either party's waiver of any breach or failure to enforce any of the terms, covenants, conditions or other provisions of this EPC Contract at any time shall not in any way affect, limit, modify or waive that party's right thereafter to enforce or compel strict compliance with every term, covenant, condition or other provision hereof, any course of dealing or custom of the trade notwithstanding. The waiver by Supplier or Owner of any breach or failure to enforce any of the terms, covenants, conditions or other provisions of the Supply Contract at any time shall not in any way affect, limit, modify or waive Owner's or Contractor's right thereafter to enforce or compel strict compliance with every term, covenant, condition or other provision of this EPC Contract, any course of dealing or custom of the trade notwithstanding.

25.7 REPRESENTATIONS

By their execution hereof, the parties warrant that they are authorized to enter into this EPC Contract, that it does not conflict with any agreement, lease, instrument or other obligation to which either is a party or by which either is bound, and that it represents their valid and binding obligation, enforceable in accordance with its terms.

25.8 HEADINGS

The headings contained herein are not part of this Contract and are included solely for the convenience of the parties.

109

25.9 PUBLICITY

Without limiting ARTICLE 23 (Confidentiality), Contractor shall not release public or media statements or publish material related to this EPC Contract, the Works or Owner's business activities or interests without Owner's approval, which approval will not be unreasonably withheld or delayed. Owner shall as and when it considers it appropriate to do so give consideration to acknowledging the role of Contractor as the contractor of the Binary Plant and the use of the ORMAT equipment in the Binary Plant in the press releases and other publications issued by Owner about the Binary Plant.

25.10 COUNTERPARTS; TRANSMITTED COPIES

This EPC Contract may be executed in any number of counterparts, each of which will be deemed an original, but all of which taken together will constitute one and the same instrument. To expedite the process of entering into this EPC Contract, the parties acknowledge that Transmitted Copies of this EPC Contract will be equivalent to original documents until such time (if any) as original documents are completely executed and delivered. "TRANSMITTED COPIES" mean copies that are reproduced or transmitted via facsimile or another process of complete and accurate reproduction and transmission.

25.11 FURTHER ASSURANCES

[The rest of this page is intentionally left blank. The next page is the signature page.]

IN WITNESS WHEREOF, the parties have caused this EPC Contract to be executed as of the date first above written.

Owner: Contact Energy Limited

LICENSE AGREEMENT
ENTERED INTO THIS 15TH DAY OF JULY 2004

THIS LICENSE AGREEMENT (this "AGREEMENT") is made and entered into as of the 1st day of July, 2004 (the "EFFECTIVE DATE") by and among Ormat Industries Ltd., an Israeli public corporation with principal place of business at the Industrial Area of Yavne ("OIL"), and Ormat Systems Ltd., an Israeli corporation with principal place of business at the Industrial Area of Yavne ("OSL"). OIL and OSL may be referred to individually as a "PARTY" or collectively as "PARTIES".

WHEREAS, Concurrently with the execution and delivery of this Agreement, the Parties have entered into an Asset Purchase Agreement (the "PURCHASE AGREEMENT") dated as of the date hereof, pursuant to which OIL will transfer to OSL, and OSL will acquire, among other things, the Purchased Business as defined in the Purchase Agreement;

WHEREAS, In connection with the Purchase Agreement and the transfers and acquisitions under the Purchase Agreement, effective as of the Effective Date, OIL wishes to grant OSL: I) an exclusive, perpetual, fully paid license to the Patents and Trademarks set forth in ANNEX A attached hereto (the "PATENTS" and the "EXCLUSIVE TRADEMARKS"); and a non-exclusive perpetual, fully paid license to the trademarks set forth in Annex B attached hereto (the "Non-Exclusive Trademarks"). (the Non-Exclusive Trademarks and the Exclusive Trademarks together, the "Trademarks").

NOW, THEREFORE, in consideration of the mutual representations, covenants and warranties contained herein, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, OIL and OSL intending to legally bound hereby, mutually agree as follows:

1. DEFINITIONS

Unless otherwise expressly defined in this Agreement, any capitalized term used herein shall bear the meaning ascribed to it in the Purchase Agreement.

2

2. LICENSE

- 2.1 Effective as of the Effective Date, and subject to the terms hereof, OIL hereby grants OSL, only with respect to the Patents, for the duration of the term specified in Section 6.1, a fully-paid, royalty-free, irrevocable, perpetual exclusive license, without the right to grant sublicenses except as specified in Section 2.5, to make, have made, use, sell, offer to sell, import and create derivatives of (including without limitation modifications, improvements, fixes, enhancements, and upgrades) the inventions claimed in the Patents.
- 2.2 Effective as of the Effective Date, and subject to the terms hereof, OIL hereby grants OSL, for the duration of the term specified in Section 6.1, a fully-paid, royalty-free, irrevocable, perpetual exclusive license, without the right to grant sublicenses except as specified in Section 2.5, to use and display the Exclusive Trademarks in connection with the goods and services for which they are described in ANNEX A.
- 2.3 Effective as of the Effective Date, and subject to the terms

hereof, OIL hereby grants OSL, for the duration of the term specified in Section 6.1, a fully-paid, royalty-free, irrevocable, perpetual non-exclusive license, without the right to grant sublicenses except as specified in Section 2.5, to use and display the Non-Exclusive Trademarks in connection with the goods and services for which they are described in ANNEX B.

2.4 Any sale and/or transfer by OIL of Patents or Trademarks licensed hereunder, in any way whatsoever, to any third party, shall be subject to all rights granted to OSL pursuant to this Agreement.

2.5 OSL may grant: i) to any third party sublicenses of OSL's rights to the Patents or the Exclusive Trademarks; and ii) to OTI a sublicense of OSL's rights to the Non-Exclusive Trademarks, provided that such sublicense shall provide that OTI may not further sublicense such rights except to OTI's direct and indirect subsidiaries who sign a sublicense agreement in the form acceptable to OIL.

3. DERIVATIVES AND RESERVATION OF RIGHTS

3.1 Rights to Derivatives.

As between the Parties, OSL shall own all derivatives created by or for OSL from the Patents licensed herein or any part thereto ("OSL DERIVATIVES"); provided,

3

however, that OSL shall only have such rights to such derivatives which are derived from Patents expressly licensed herein.

3.2 Reservation of Rights.

Except as expressly provided herein, no license or immunity is granted under this Agreement by OIL, directly or by implication, estoppel or otherwise to OSL, OTI, OR any third parties acquiring items or services therefrom, whether singly or for the combination of such acquired items or services with other items or for the use of such combination.

4. TRADEMARK QUALITY CONTROL

4.1 OSL acknowledges that OIL is the owner of the Trademarks and the goodwill associated with the Trademarks, and agrees that all goodwill, including any increase in the value of the Trademarks as a result of this Agreement, will inure solely to OIL's benefit. OSL will not claim any title or any proprietary right to the Trademarks or in any derivation, adaptation, or variation thereof. OSL agrees that nothing in this Agreement shall give OSL any right, title or interest in the Trademarks other than the right to use the Trademarks in accordance with this Agreement. OSL agrees not to challenge the Trademarks, or to register or attempt to register the Trademarks as a trademark, service mark, Internet domain name, trade name, or any similar trademarks or name, with any domestic or foreign governmental or quasi-governmental authority or otherwise.

4.2 OSL may use the Trademarks in accordance with the

specifications, directions, and processes furnished to OSL by OIL from time to time. OSL shall not make any use of the Trademarks that impair or are likely to impair the goodwill associated therewith. The quality of the products manufactured and services offered by OSL shall be satisfactory to OIL or as specified by or approved by OIL. OIL shall have the right to review OSL's use of the Trademarks and the goods and services offered thereunder upon reasonable notice to verify that is in accordance with such specifications, directions, processes and quality.

5. INFRINGEMENT

Each party shall notify the other in writing within seven (7) days of becoming aware of any infringements or imitations by others of Patents or Trademarks. OSL may, only with OIL's prior written approval, institute legal proceedings at its own expense against any third party

4

that OSL reasonably believes to be infringing a Patent or Trademark in order to eliminate such infringement. OIL may, at its option, join as a party plaintiff in such action at its own expense. After OSL has recovered and distributed its own and OIL's reasonable attorney's fees and direct costs expenses in litigation related to the infringement of the Patents or Trademarks, or, if litigation is not initiated, in the investigation and analysis related to the potential litigation, all remaining recovery shall be for the account of OSL unless OIL has participated in such action, in which case all remaining recovery shall be shared equally between OSL and OIL; provided, however, that OSL may not settle or compromise any such action without the prior written consent of OIL, which consent shall not be unreasonably withheld or delayed. With the exception of litigation already commenced by filing appropriate pleadings in court, upon expiration or termination of this Agreement, any and all rights or obligations of OSL in resolving any possible infringement claim hereunder shall revert to OIL.

6. TERM AND TERMINATION

6.1 TERM. This Agreement is effective as of the Effective Date and continues in perpetuity thereafter, unless terminated earlier in accordance with this Section 6. The term of all Patent licenses granted hereunder shall continue until the earlier of (i) expiration of such Patents; (ii) the termination of this Agreement or (iii) the assignment of the Patents to OSL. The term of all Exclusive Trademark licenses granted hereunder continues until the earlier of: (i) the termination of this Agreement; or (ii) the assignment of the Exclusive Trademarks to OSL. The term of all Non-Exclusive Trademark licenses shall continue until the termination of this Agreement.

6.2 Termination for Insolvency. Either party may cancel the Agreement forthwith by written notice to the other, and may regard the other party as in default under this Agreement, if the other party becomes insolvent, makes a general assignment for the benefit of creditors, files a voluntary petition of bankruptcy, suffers or permits the appointment of a receiver for its business or assets, or becomes subject to any proceedings under any bankruptcy or insolvency law, voluntarily or otherwise. In the event that any of the above events occur, the effected party shall immediately notify the

other party of its occurrence. Notwithstanding the foregoing, OSL can elect to retain all of its rights under this Agreement despite OIL's bankruptcy or insolvency.

5

- 6.3 Termination for Material Breach. Either party may terminate this Agreement in writing for the material breach of this Agreement by the other party that remains uncured thirty (30) days following receipt of a written notice of such breach.
- 6.4 Effect of Termination. Upon termination of this Agreement, the licenses granted hereunder, and all sublicenses of those rights shall terminate, and neither OSL nor its sublicensees or any further sublicensees shall have any further right to use the Patents or Trademarks.

7. WARRANTY DISCLAIMERS

THE PATENTS AND TRADEMARKS ARE LICENSED ON AN "AS IS" BASIS, AND OIL MAKES NO WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, WITH RESPECT TO THE LICENSED PATENTS, THE LICENSED TRADEMARKS AND/OR THE LICENSES GRANTED IN THIS AGREEMENT. OIL HEREBY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING WARRANTIES OF NONINFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE. NEITHER PARTY WILL BE LIABLE FOR INDIRECT, SPECIAL, EXEMPLARY, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGES, ARISING IN CONNECTION WITH THIS AGREEMENT.

8. MISCELLANEOUS PROVISIONS

- 8.1 Binding Effect; Successors and Assigns; Assignment. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective heirs, successors, assigns and legal representatives. Without derogating from the provisions of Section 2.5 above, neither party may assign this Agreement in any manner, including without limitation by change in control, merger or reorganization, in whole or in part without the prior written consent of the other party. Any assignment in violation of the foregoing shall be void.
- 8.2 Counterparts; Signatures; Titles and Headings. This Agreement may be executed in counterparts, each of which shall be deemed an original agreement, but all of which together shall constitute one and the same instrument. This Agreement shall be deemed executed and delivered upon the delivery of original signed copies, or facsimile copies containing telecopied signatures, to each other party hereto. The

6

headings in this Agreement are for reference purposes only and shall not in any way affect the meaning or interpretation of this Agreement.

- 8.3 Governing Law; Jurisdiction and Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of Israel, without reference to choice of law principles thereof, and the parties agree to submit to the exclusive jurisdiction and venue of Israel and the courts of Tel-Aviv-Jaffa, Israel.

It is hereby clarified that in case the first paragraph of this Section 8 is found, by a court of competent jurisdiction, to be unenforceable or otherwise invalid, each party hereto waives its right to trial of any issue by jury.

- 8.4 Severability. If any provision of this Agreement shall be determined by any court of competent jurisdiction (or any other agreed-upon dispute resolving body) to be unenforceable or otherwise invalid as written, the same shall be enforced and validated to the fullest extent permitted by law. All provisions of this Agreement are severable, and the unenforceability or invalidity of any single provision hereof shall not affect the remaining provisions.
- 8.5 Notices. Except as otherwise provided herein, all notices shall be in writing and shall be effective upon receipt, if delivered personally or if mailed by overnight courier, postage prepaid, or upon generation of a confirmation if sent by facsimile (provided that such transmission is followed by mailing of a conforming copy) to the parties at their addresses set forth in the first paragraph of this Agreement or such other address as subsequently may be specified in writing by a party to the other parties.
- 8.6 No Strict Construction; Interpretation. The parties hereto acknowledge that this Agreement has been prepared jointly by the parties hereto and their respective legal counsel, and shall not be strictly construed against any party as a result of the party drafting any given provision hereof. Unless otherwise indicated to the contrary herein by the context or use thereof, (a) the words "herein," "hereto," "hereof," and words of similar import refer to this Agreement as a whole and not to any particular Section, subsection or paragraph hereof, (b) words importing the masculine gender shall include the feminine and neutral genders and vice versa, and (c) words importing the singular shall include the plural and vice versa.
- 7
- 8.7 Entire Agreement; Modification and Waiver. Except for the agreements specifically referenced in or contemplated by this Agreement, this Agreement constitutes the entire agreement between the parties with respect to the matters covered hereby and supersedes all previous written, oral or implied understandings between them with respect to such matters. This Agreement may be amended or modified only by a writing signed by the party against whom enforcement of such amendment or modification is sought. Any of the terms or conditions of this Agreement may be waived at any time by the party or parties entitled to the benefit thereof, but only by a writing signed by the party or parties waiving such terms or conditions. No waiver of any provisions of this Agreement or of any rights or benefits arising hereunder shall be deemed to constitute or shall constitute a waiver of any other provisions of this Agreement (whether or not similar) nor shall such waiver constitute a continuing waiver unless otherwise expressly provided in writing.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their duly authorized representatives as of the day first above written.
