Ninth Consecutive Quarter of Consolidated Revenue and Adjusted EBITDA Growth

Las Vegas, NV - November 6, 2018 - Everi Holdings Inc. (NYSE:EVRI) (“Everi” or the “Company”) today reported financial results for the third quarter ended September 30, 2018.

Michael Rumbolz, President and Chief Executive Officer of Everi, commented, “Our third quarter results reflect the ongoing progress we are achieving through the execution of key initiatives, including the successful introduction of new products for our Games and Financial Technology Solutions (“FinTech”) businesses which are driving consistent growth. We generated our ninth consecutive quarter of year over year revenue and Adjusted EBITDA growth, with revenue increasing 17.3% to \$120.3 million and Adjusted EBITDA rising 9.6% to \$58.3 million. We also generated our third consecutive quarter of positive net income and earnings per share. Both business segments are contributing to this growth, with quarterly record FinTech revenue and Adjusted EBITDA of \$54.5 million and \$26.5 million, respectively, and Games revenue and Adjusted EBITDA of \$65.8 million and \$31.8 million, respectively, each reaching their second highest ever quarterly level. As a result of the continuing strength in both lines of business, we remain on track to achieve our outlook for full year Adjusted EBITDA of \$228 million to \$231 million and to deliver on our expectation for near-term acceleration in free cash flow generation.”

(1) Revenues for the three months ended September 30, 2017 are presented on a comparable basis to retrospectively reflect a net versus gross reporting of revenues under ASC 606, which primarily impacts the Company’s Financial Technology Solutions business. This has no impact on the Company’s operating income, net loss, net loss per diluted share, or Adjusted EBITDA. For further discussion, see the Net Versus Gross Impacts on Revenues and Cost of Revenues disclosure at the end of this release.

- (2) Adjusted EBITDA for the three months ended September 30, 2018 excludes the benefit of approximately \$0.6 million related to an adjustment to certain purchase accounting liabilities related to the Company's acquisition of certain compliance assets in 2015.

Mr. Rumbolz added, "Growth in our Games segment continues to be driven by the successful introduction of new products. Electronic gaming machine unit sales rose 43% to 1,165 units, our largest quarterly total since we acquired the Games business. The primary driver of the unit sales growth was success with our E43 and mechanical reel games which both achieved their highest ever level of quarterly unit sales. Our mechanical reel product remains a key driver of unit sales growth given our position as an industry-leading provider for this segment of the slot floor. Our installed base rose 901 units year over year and our emphasis on introducing new, higher-yielding premium games and form factors, including our E43, while also expanding placements beyond our historical core market continues to drive growth in our gaming operations. Quarter-end premium unit placements, including our highest ever level of wide-area progressive placements of 535 units, now represent 20.1% of our total installed base, as compared to 17.8% a year ago. Growth in premium unit placements and the increase in unit placements in higher yielding markets drove a significant improvement in daily win per unit, which rose \$2.32, or 8.6%, year over year.

"Our FinTech business continues to grow and expand on its market leading position with our focus on innovation driving further penetration of our solutions. We continue to provide our customers with a wide range of products that efficiently deliver the most cash to their gaming floor and provide them with actionable data that helps them manage their operations more proactively. Our differentiated and integrated products address all of our customers' FinTech needs and have been a critical factor in our ability to grow our market share. FinTech results in the third quarter benefited from the ongoing strength in the domestic casino market and new market wins. This drove an increase in nearly all of the segment's key performance metrics including growth in core cash access revenue, growth in transaction volumes, growth in overall dollars processed, and our highest level of kiosk sales and service revenue in twelve quarters. We also continue to work with several customers on trials of CashClub™ Wallet, our new digital wallet product. This is an important first step in the evolution of digital payments in the gaming industry, which we believe positions our FinTech business for future market success.

"It is clear that the investments we have made in our Games and FinTech portfolios have led to the creation of the new products that are helping drive consistent growth in our operating results. As we demonstrated at G2E last month, we have established a product development roadmap that will further expand the number of markets and segments of the casino floor our Games business can address, while we maintain and grow our FinTech market leadership. As a result, we continue to strengthen our foundation for growth and are confident in our ability to achieve our targets for revenue, Adjusted EBITDA and free cash flow growth going forward. We believe this will lead to significant improvements in our leverage profile. We are generating notable growth now and we are confident that we have the right plan in place to achieve even more success going forward as we continue to unlock value in the business."

Non-GAAP Financial Information

In order to enhance investor understanding of the underlying trends in our business, our cash balance and cash available for our operating needs, and to provide for better comparability between periods in different years, we are providing in this press release Adjusted EBITDA, Adjusted EBITDA Margin, net cash position and net cash available, which are not measures of our financial performance or position under United States Generally Accepted Accounting Principles ("GAAP"). Accordingly, Adjusted EBITDA and Adjusted EBITDA Margin should not be considered in isolation or as a substitute for measures prepared in accordance with GAAP. These measures should be read in conjunction with, our net earnings (loss), operating income (loss), basic or diluted earnings (loss) per share and cash flow data prepared in accordance with GAAP. With respect to net cash position and net cash available, these measures should be read in conjunction with cash and cash equivalents prepared in accordance with GAAP.

We define Adjusted EBITDA as earnings (loss) before interest, taxes, depreciation and amortization, non-cash stock compensation expense, accretion of contract rights, the adjustment to certain purchase accounting liabilities and the write-off of certain inventory and fixed assets. We present Adjusted EBITDA as we use this measure to manage our business and consider this measure to be supplemental to our operating performance. We also make certain compensation decisions based, in part, on our operating performance, as measured by Adjusted EBITDA; and our current credit facility and existing senior unsecured notes require us to comply with a consolidated secured leverage ratio that includes performance metrics substantially similar to Adjusted EBITDA. We define Adjusted EBITDA Margin as Adjusted EBITDA divided by revenues.

A reconciliation of the Company's net income (loss) per GAAP to Adjusted EBITDA and Adjusted EBITDA Margin is included in the Unaudited Reconciliation of Net Income (Loss) to EBITDA and Adjusted EBITDA and Adjusted EBITDA Margin provided at the end of this release. Additionally, a reconciliation of each segment's operating income (loss) to Adjusted EBITDA is also included. On a segment level, operating income (loss) per GAAP, rather than net earnings (loss) per GAAP, is reconciled to Adjusted EBITDA as the Company does not report net earnings (loss) by segment. In addition, Adjusted EBITDA Margin is provided on a segment level. Management believes that this presentation is meaningful to investors in evaluating the performance of the Company's segments.

We define (i) net cash position as cash and cash equivalents plus settlement receivables less settlement liabilities and (ii) net cash available as net cash position plus undrawn amounts available under our revolving credit facility. We present net cash position because our cash position, as measured by cash and cash equivalents, depends upon changes in settlement receivables and the timing of payments related to settlement liabilities. As such, our cash and cash equivalents can change substantially based upon the timing of our receipt of payments for settlement receivables and payments we make to customers for our settlement liabilities. We present net cash available as management monitors this amount in connection with its forecasting of cash flows and future cash requirements.

A reconciliation of the Company's cash and cash equivalents per GAAP to net cash position and net cash available is included in the Unaudited Reconciliation of Cash and Cash Equivalents to Net Cash Position and Net Cash Available provided at the end of this release.
