Explanation and Reconciliation of the Company’s Use of Non-GAAP Financial Measures

The Company’s results in this press release are presented in accordance with U.S. GAAP except where otherwise noted. In certain circumstances, results have been presented that are not generally accepted accounting principles measures (“Non-GAAP”). These Non-GAAP measures are Adjusted Operating income, Adjusted Operating income margin, Adjusted Net earnings, Adjusted earnings per share, Free cash flow, Free cash flow conversion and Recurring revenue growth constant currency. These Non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the Company’s reported results.

The Company believes our Non-GAAP financial measures help investors understand how management plans, measures and evaluates the Company’s business performance. Management believes that Non-GAAP measures provide consistency in its financial reporting and facilitates investors’ understanding of the Company’s operating

results and trends by providing an additional basis for comparison. Management uses these Non-GAAP financial measures to, among other things, evaluate our ongoing operations, and for internal planning and forecasting purposes. In addition, and as a consequence of the importance of these Non-GAAP financial measures in managing our business, the Company's Compensation Committee of the Board of Directors incorporates Non-GAAP financial measures in the evaluation process for determining management compensation.

Adjusted Operating Income, Adjusted Operating Income Margin, Adjusted Net Earnings and Adjusted Earnings Per Share

These Non-GAAP measures reflect Operating income, Operating income margin, Net earnings, and Diluted earnings per share, as adjusted to exclude the impact of certain costs, expenses, gains and losses and other specified items the exclusion of which management believes provides insight regarding our ongoing operating performance. Depending on the period presented, these adjusted measures exclude the impact of certain of the following items:

- (i) Amortization of Acquired Intangibles and Purchased Intellectual Property, which represent non-cash amortization expenses associated with the Company's acquisition activities.
- (ii) Acquisition and Integration Costs, which represent certain transaction and integration costs associated with the Company's acquisition activities.
- (iii) Restructuring and Other Related Costs, which represent costs associated with the Company's Corporate Restructuring Initiative to exit and/or realign some of our businesses, streamline the Company's management structure, reallocate work to lower cost locations, and reduce headcount in deprioritized areas, in addition to other restructuring activities.
- (iv) Litigation Settlement Charges, which represent reserves established during the third and fourth quarter of 2024 related to the settlement of claims.

We exclude Acquisition and Integration Costs, Restructuring and Other Related Costs, and Litigation Settlement Charges from our Adjusted Operating income (as applicable) and other adjusted earnings measures because excluding such information provides us with an understanding of the results from the primary operations of our business and enhances comparability across fiscal reporting periods, as these items are not reflective of our underlying operations or performance.

We also exclude the impact of Amortization of Acquired Intangibles and Purchased Intellectual Property, as these non-cash amounts are significantly impacted by the timing and size of individual acquisitions and do not factor into the Company's capital allocation decisions, management compensation metrics or multi-year objectives. Furthermore, management believes that this adjustment enables better comparison of our results as Amortization of Acquired Intangibles and Purchased Intellectual Property will not recur in future periods once such intangible assets have been fully amortized. Although we exclude Amortization of Acquired Intangibles and Purchased Intellectual Property from our adjusted earnings measures, our management believes that it is important for investors to understand that these intangible assets contribute to revenue generation. Amortization of intangible assets that relate to past acquisitions will recur in future periods until such intangible assets have been fully amortized. Any future acquisitions may result in the amortization of additional intangible assets.

Free Cash Flow and Free Cash Flow Conversion

In addition to the Non-GAAP financial measures discussed above, we provide Free cash flow information because we consider Free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated that could be used for dividends, share repurchases, strategic acquisitions, other investments, as well as debt servicing. Free cash flow is a Non-GAAP financial measure and is defined by the Company as Net cash flows provided by operating activities less Capital expenditures as well as Software purchases and capitalized internal use software. Free cash flow conversion is calculated as Free cash flow divided by Adjusted Net earnings for the given period.

Recurring revenue growth constant currency

As a multi-national company, we are subject to variability of our reported U.S. dollar results due to changes in foreign currency exchange rates. The exclusion of the impact of foreign currency exchange fluctuations from our

Recurring revenue growth, or what we refer to as amounts expressed “on a constant currency basis,” is a Non-GAAP measure. We believe that excluding the impact of foreign currency exchange fluctuations from our Recurring revenue growth provides additional information that enables enhanced comparison to prior periods.

Changes in Recurring revenue growth expressed on a constant currency basis are presented excluding the impact of foreign currency exchange fluctuations. To present this information, current period results for entities reporting in currencies other than the U.S. dollar are translated into U.S. dollars at the average exchange rates in effect during the corresponding period of the comparative year, rather than at the actual average exchange rates in effect during the current fiscal year.

Reconciliations of such Non-GAAP measures to the most directly comparable financial measures presented in accordance with GAAP can be found in the tables that are part of this press release.

Equity revenue position growth excludes small or fractional equity positions for which the Company does not recognize revenue ("non-revenue positions"). Prior-year period comparative information for this metric is not available. Foreign Exchange Rates

Beginning with the first quarter of fiscal year 2023, the Company changed reporting for segment revenues, segment earnings (loss) before income taxes, segment amortization of acquired intangibles and purchased intellectual property, and Closed sales to reflect the impact of actual foreign exchange rates applicable to the individual periods presented. The presentation of these metrics for the prior periods has been changed to conform to the current period presentation. Total consolidated revenues and earnings before income taxes were not impacted.

Explanation of Non-GAAP Measures and Reconciliation of GAAP to Non- GAAP Measures

Non-GAAP Measures

Explanation and Reconciliation of the Company's Use of Non-GAAP Financial Measures

The Company's results in this presentation are presented in accordance with U.S. generally accepted accounting principles ("GAAP") except where otherwise noted. In certain circumstances, results have been presented that are not generally accepted accounting principles measures ("Non-GAAP"). These Non-GAAP measures are Adjusted Operating income, Adjusted Operating income margin, Adjusted Net earnings, Adjusted earnings per share, Adjusted EBITDA, Adjusted EBITDAR, Adjusted Debt, Free cash flow, Free cash flow conversion, and Recurring revenue growth constant currency. These Non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the Company's reported results.

The Company believes our Non-GAAP financial measures help investors understand how management plans, measures and evaluates the Company's business performance. Management believes that Non-GAAP measures provide consistency in its financial reporting and facilitates investors' understanding of the Company's operating results and trends by providing an additional basis for comparison. Management uses these Non-GAAP financial measures to, among other things, evaluate our ongoing operations, and for internal planning and forecasting purposes. In addition, and as a consequence of the importance of these Non-GAAP financial measures in managing our business, the Company's Compensation Committee of the Board of Directors incorporates Non-GAAP financial measures in the evaluation process for determining management compensation.

Reconciliations Non-GAAP measures to the most directly comparable financial measures presented in accordance with GAAP can be found in the tables that are part of this presentation.

Adjusted Operating Income, Adjusted Operating Income Margin, Adjusted Net Earnings, Adjusted Earnings Per Share, Adjusted EBITDA, Adjusted EBITDAR, Adjusted Debt, Free cash flow, Free cash flow conversion, Recurring revenue growth constant currency

These Non-GAAP measures are adjusted to exclude the impact of certain costs, expenses, gains and losses and other specified items the exclusion of which management believes provides insight regarding our ongoing operating performance. Depending on the period presented, these adjusted measures exclude the impact of certain of the following items:

- (i) Amortization of Acquired Intangibles and Purchased Intellectual Property, which represent non-cash amortization expenses associated with the Company's acquisition activities.
- (ii) Acquisition and Integration Costs, which represent certain transaction and integration costs associated with the Company's acquisition activities.
- (iii) Restructuring and Other Related Costs, which represent costs associated with the Company's Corporate Restructuring Initiative to exit and/or realign some of our businesses, streamline the Company's management structure, reallocate work to lower cost locations, and reduce headcount in deprioritized areas, in addition to other restructuring activities.
- (iv) Litigation Settlement Charges, which represent the reserve established during the third and fourth quarter of fiscal year 2024 related to the settlement of claims.
- (v) Russia-Related Exit Costs, which are direct and incremental costs associated with the Company's wind down of business activities in Russia in response to Russia's invasion of Ukraine, including relocation-related expenses of impacted associates.
- (vi) Real Estate Realignment and Covid-19 Related Expenses. Real Estate Realignment Expenses are expenses associated with the exit of certain of the Company's leased facilities in response to the Covid-19 pandemic, which consist of the impairment of certain right of use assets, leasehold improvements and equipment, as well as other related facility exit expenses directly resulting from, and attributable to, the exit of these leased facilities. Covid-19 Related Expense are direct and incremental expenses incurred by the Company to protect the health and safety of Broadridge associates during the Covid-19 outbreak, including expenses associated with monitoring the temperatures for associates entering our facilities, enhancing the safety of our office environment in preparation for workers to return to Company facilities on a more regular basis, ensuring proper social distancing in our production facilities, personal protective equipment, enhanced cleaning measures in our facilities, and other safety related expenses.
- (vii) Investment Gains, which represent non-operating, non-cash gains on privately held investments.
- (viii) Software Charge, which represents a charge related to an internal use software product that is no longer expected to be used; and
- (ix) Gain on Acquisition-Related Financial Instrument, which represents a non-operating gain on a financial instrument designed to minimize the Company's foreign exchange risk associated with the Itiviti acquisition, as well as certain other non-operating financing costs associated with the Itiviti acquisition.

Non-GAAP Measures

We exclude Acquisition and Integration Costs, Restructuring and Other Related Costs, Litigation Settlement Charges, Russia-Related Exit Costs, Real Estate Realignment and Covid-19 Related Expenses, Investment Gains, the Software Charge, and the Gain on Acquisition-Related Financial Instrument from our Adjusted Operating income (as applicable) and other adjusted earnings measures because excluding such information provides us with an understanding of the results from the primary operations of our business and enhances comparability across fiscal reporting periods, as these items are not reflective of our underlying operations or performance. We also exclude the impact of Amortization of Acquired Intangibles and Purchased Intellectual Property, as these non-cash amounts are significantly impacted by the timing and size of individual acquisitions and do not factor into the Company's capital allocation decisions, management compensation metrics or multi-year objectives. Furthermore, management believes that this adjustment enables better comparison of our results as Amortization of Acquired Intangibles and Purchased Intellectual Property will not recur in future periods once such intangible assets have been fully amortized. Although we exclude Amortization of Acquired Intangibles and Purchased Intellectual Property from our adjusted earnings measures, our management believes that it is important for investors to understand that these intangible assets contribute to revenue generation. Amortization of intangible assets that relate to past acquisitions will recur in future periods until such intangible assets have been fully amortized. Any future acquisitions may result in the amortization of additional intangible assets.

Free cash flow and Free cash flow conversion

In addition to the Non-GAAP financial measures discussed above, we provide Free cash flow information because we consider Free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated that could be used for dividends, share repurchases, strategic acquisitions, other investments, as well as debt servicing. Free cash flow is a Non-GAAP financial measure and is defined by the Company as New cash flows provided by operating activities plus Proceeds from asset sales, less Capital expenditures as well as Software purchases and capitalized internal use software. Free cash flow conversion is calculated as Free cash flow divided by Adjusted Net earnings for the given period.

Recurring revenue growth constant currency

As a multi-national company, we are subject to variability of our reported U.S. dollar results due to changes in foreign currency exchange rates. The exclusion of the impact of foreign currency exchange fluctuations from our Recurring revenue growth, or what we refer to as amounts expressed "on a constant currency basis", is a Non-GAAP measure. We believe that excluding the impact of foreign currency exchange fluctuations from our Recurring revenue growth provides additional information that enables enhanced comparison to prior periods.

Changes in Recurring revenue growth expressed on a constant currency basis are presented excluding the impact of foreign currency exchange fluctuations. To present this information, current period results for entities reporting in currencies other than the U.S. dollar are translated into U.S. dollars at the average exchange rates in effect during the corresponding period of the comparative year, rather than at the actual average exchange rates in effect during the current fiscal year.

Reconciliations of such Non-GAAP measures to the most directly comparable financial measures presented in accordance with GAAP can be found in the tables that are part of this presentation.
