 QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2026

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-38589

COASTAL FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

Washington

(State or other jurisdiction of
incorporation or organization)

56-2392007

(I.R.S. Employer Identification No.)

5415 Evergreen Way, Everett, Washington

(Address of principal executive offices)

98203

(Zip Code)

(425) 257-9000

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading symbol(s)	Name of each exchange on which registered
Common Stock, no par value per share	CCB	Nasdaq Global Select Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and emerging growth company in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer	<input checked="" type="checkbox"/>	Accelerated Filer	<input type="checkbox"/>
Non-Accelerated Filer	<input type="checkbox"/>	Smaller Reporting Company	<input type="checkbox"/>
		Emerging Growth Company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 4, 2026, there were 15,248,808 shares of the issuer's common stock outstanding.

Forward-Looking Statements

This report may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect our current views with respect to, among other things, future events and our financial performance. Any statements about our management's expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as "anticipate," "believes," "can," "could," "may," "predicts," "potential," "should," "will," "estimate," "plans," "projects," "continuing," "ongoing," "expects," "intends" and similar words or phrases. All forward-looking statements, expressed or implied, included herewith are expressly qualified in their entirety by the cautionary statements contained or referred to herein. The inclusion of forward-looking information in this report should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs.

Factors that may affect our results are disclosed in "Item 1A. Risk Factors" in Part II of this report and in the section titled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2025 ("Form 10-K"). Some of the risks and uncertainties that may cause our actual results, performance or achievements to differ materially from those expressed include, but are not limited to, the following: the difficult market conditions and unfavorable economic conditions and uncertainties in the markets in which we operate and in which our loans are concentrated, including declines in housing markets as a result of global macroeconomic and geopolitical events, an increase in unemployment levels and slowdowns in economic growth, including as a result of the prolonged U.S. government shutdown; conflicts in the Middle East and/or changes in U.S. trade policies, including the imposition of tariffs and retaliatory tariffs, may adversely impact our business, financial condition, and results of operations; our expected future financial results; our ability to successfully execute on our strategy for our CCBX segment, CCBX partnerships and our efforts to optimize and strengthen our CCBX balance sheet; the overall health of the local and national real estate market; the impacts related to or resulting from bank failures and mergers and other economic and industry volatility, including potential increased regulatory requirements and costs and potential impacts to macroeconomic conditions; the credit risk associated with our loan portfolio, our level of nonperforming assets and the costs associated with resolving problem loans; business and economic conditions generally and in the financial services industry, nationally and within our market area, particularly in the markets in which we operate and in which our loans are concentrated; the impact on the Company's operations due to epidemic illnesses, natural or man-made disasters, such as earthquakes, tsunamis, wildfires and flooding, the effects of regional or national civil unrest, wars and acts of terrorism, and political developments that may disrupt or increase volatility in securities or otherwise affect economic conditions; our ability to maintain an adequate level of allowance for credit losses; our ability to successfully manage liquidity risk; our ability to implement our growth strategy and manage costs effectively; the composition of our senior leadership team and our ability to attract and retain key personnel; our ability to raise additional capital to implement our business plan; changes in market interest rates and impacts of such changes on our profits and business; the occurrence of fraudulent activity, breaches or failures of our information security controls or cybersecurity-related incidents; interruptions involving our information technology and telecommunications systems or third-party servicers; our ability to maintain our reputation; increased competition in the financial services industry; regulatory guidance on commercial lending concentrations; our relationship with digital financial service providers; the effectiveness of our risk management framework; the costs and obligations associated with being a publicly traded company and other unanticipated costs that we may experience; the commencement and outcome of litigation and other legal proceedings and regulatory actions against us or to which we may become subject; the extensive regulatory framework that applies to us; the impact of recent and future legislative and regulatory changes and economic stimulus programs; and other changes in banking, securities and tax laws and regulations, and their application by our regulators; the impact on our operations due to epidemic illnesses, natural or man-made disasters, such as wildfires, the effects of regional or national civil unrest, and political developments that may disrupt or increase volatility in securities or otherwise affect economic conditions; fluctuations in the value of the securities held in our securities portfolio; governmental monetary and fiscal policies; material weaknesses in our internal control over financial reporting; and our success at managing the risks involved in the foregoing items.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this report. If one or more events related to these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. You are cautioned not to place undue reliance on forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made and we undertake no obligation to update or revise any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events, except as required by law.

COASTAL FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 - Description of Business and Summary of Significant Accounting Policies

Nature of operations - Coastal Financial Corporation (“Corporation” or “Company”) is a registered bank holding company whose wholly owned subsidiaries are Coastal Community Bank (“Bank”) and Arlington Olympic LLC (“LLC”). The Company is a Washington state corporation that was organized in 2003. The Bank was incorporated and commenced operations in 1997 and is a Washington state-chartered commercial bank that is a member bank of the Federal Reserve system. The LLC was formed in 2019 and owns the Company’s Arlington branch site, which the Bank leases from the LLC.

The Company operates through the Bank and is headquartered in Everett, Washington, which by population is the largest city in Snohomish County. The Company’s business is conducted through three reportable segments: The community bank, CCBX and treasury & administration. The primary focus of the community bank is on providing a wide range of banking products and services to consumers and small to medium sized businesses in the broader Puget Sound region in the state of Washington and through the Internet and our mobile banking application. We currently operate 14 full-service banking locations, 12 of which are located in Snohomish County, where we are the largest community bank by deposit market share, and two of which are located in neighboring counties (one in King County and one in Island County). We also have a loan production office which is located in King county. The CCBX segment provides banking as a service (“BaaS”) that allows digital financial service providers, companies and brands to offer their customers banking services. The CCBX segment had a total of 30 partners, at varying stages as of March 31, 2026. The treasury & administration segment includes investments, debt and other reporting items that are not specific to the community bank or CCBX segments.

The Bank’s deposits are insured in whole or in part by the Federal Deposit Insurance Corporation (“FDIC”). The community bank’s loans and deposits are primarily within the greater Puget Sound region, while CCBX loans and deposits are dependent upon the partners' markets. The Bank’s primary funding source is deposits from customers. The Bank is subject to regulation and supervision by the Board of Governors of the Federal Reserve System and the Washington State Department of Financial Institutions Division of Banks. The Federal Reserve also has regulatory and supervisory authority over the Company.

Financial statement presentation - The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) for interim reporting requirements and with instructions to Form 10-Q and Article 10 of Regulation S-X, and therefore do not include all the information and notes included in the annual consolidated financial statements in conformity with GAAP. These interim condensed consolidated financial statements and accompanying notes should be read in conjunction with the Company’s audited consolidated financial statements and accompanying notes included in the Company’s Annual report on Form 10-K as filed with the U.S. Securities and Exchange Commission (“SEC”) on February 27, 2026. Operating results for the three months ended March 31, 2026 are not necessarily indicative of the results that may be expected for the entire year.

Amounts presented in the consolidated financial statements and footnote tables are rounded and presented in thousands of dollars except per-share amounts, which are presented in dollars. In the narrative footnote discussion, amounts are rounded to thousands and presented in dollars.

In management’s opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying consolidated financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation.

Principles of consolidation - The consolidated financial statements include the accounts of the Company, the Bank and the LLC. All significant intercompany accounts have been eliminated in consolidation.

Estimates - The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes that its critical accounting policies include determining the allowance for credit losses, the valuation

of the Company's deferred tax assets, and fair value of financial instruments. Actual results could differ significantly from those estimates.

Subsequent Events - The Company has evaluated events and transactions subsequent to March 31, 2026 for potential recognition or disclosure. Other than as described below, there were no material subsequent events requiring recognition or disclosure in the consolidated financial statements.

Subsequent to March 31, 2026, the Bank entered into a non-binding term sheet with Evolve Bank & Trust ("Evolve") to explore the potential acquisition of certain banking-as-a-service programs currently overseen and operated by Evolve. The Bank intends to conduct due diligence and, together with Evolve, may negotiate definitive agreements with respect to selected programs. Any potential transaction would be subject to, among other things, the execution of definitive agreements, receipt of required regulatory approvals, and satisfaction of customary closing conditions.

Reclassifications - Certain amounts reported in prior quarters' consolidated financial statements may have been reclassified to conform to the current presentation with no effect on stockholders' equity or net income.

Note 2 - Recent accounting standards

Recent Accounting Guidance

In November 2023, the FASB issued ASU 2023-07, *Income Statement—Reporting Comprehensive Income (Subtopic 220-40): Disaggregation of Income Statement Expenses*, which requires enhanced disclosures about the nature of expenses included in income statement line items to improve transparency and comparability. This ASU is effective for fiscal years beginning after December 15, 2026, and interim periods within those fiscal years, with early adoption permitted. The Company is evaluating the impact of this standard on its disclosures.

In December 2023, the FASB issued ASU 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*, which enhances the transparency of income tax disclosures by requiring more detailed information about income tax expense, cash taxes paid, and the effective tax rate reconciliation. This ASU is effective for fiscal years beginning after December 15, 2024, and interim periods within those fiscal years and was implemented by the Company as of the fiscal year ended December 31, 2025. The adoption of ASU 2023-09 did not have a material impact on the Company's consolidated financial statements but resulted in enhanced income tax disclosures.

In March 2025, the FASB issued ASU 2025-05, *Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses for Accounts Receivable and Contract Assets*, which simplifies the measurement of expected credit losses for certain financial assets by providing a practical expedient and additional guidance on applying CECL to short-term receivables. This ASU is effective for fiscal years beginning after December 15, 2025, and interim periods within those fiscal years, with early adoption permitted. This standard did not have a material impact on the Company's consolidated financial statements.

In September 2025, the FASB issued ASU 2025-06, *Internal-Use Software (Subtopic 350-40): Targeted Improvements to the Accounting for Internal-Use Software*, which modernizes and clarifies guidance on capitalization of internal-use software costs (including software developed using iterative methods) and related presentation/disclosure considerations. This ASU is effective for annual reporting periods beginning after December 15, 2027, and interim periods within those fiscal years, with early adoption permitted. The Company is evaluating the impact of this standard on its capitalization policies and disclosures.

In November 2025, the FASB issued ASU 2025-08, *Financial Instruments—Credit Losses (Topic 326): Purchased Loans*, which expands and clarifies acquisition-date accounting for certain purchased loans under CECL, including use of a gross-up approach for specified acquired loans. This ASU is effective for annual reporting periods beginning after December 15, 2026, and interim periods within those fiscal years, with early adoption permitted. The Company is evaluating the impact of this standard on its accounting for acquired loans and related disclosures.

In November 2025, the FASB issued ASU 2025-11, *Interim Reporting (Topic 270): Narrow-Scope Improvements*, to clarify and improve the guidance related to interim financial reporting. The ASU enhances the structure and navigability of Topic 270 by consolidating and organizing interim disclosure requirements and clarifying their applicability to entities that issue interim financial statements in accordance with U.S. GAAP. The amendments also introduce a disclosure principle requiring entities to disclose material events and changes that occur after the most recent annual reporting period. The ASU does not significantly expand existing disclosure requirements but is intended to improve transparency and consistency in interim reporting. This ASU is effective for interim reporting periods in fiscal years beginning after December 15, 2027, and early adoption is permitted. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements.

Note 3 - Investment Securities

The following tables summarize the amortized cost, fair value, and allowance for credit losses and the corresponding amounts of gross unrealized gains and losses of available-for-sale securities recognized in accumulated other comprehensive income (loss) and gross unrecognized gains and losses of held-to-maturity securities:

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Fair Value</u>	<u>Allowance for Credit Losses</u>
	(dollars in thousands; unaudited)				
March 31, 2026					
Available-for-sale					
U.S. Agency collateralized mortgage obligations	\$ 29	\$ —	\$ (1)	\$ 28	\$ —
Total available-for-sale securities	29	—	(1)	28	—
Held-to-maturity					
U.S. Agency residential mortgage-backed securities	46,141	549	(307)	46,383	—
Total investment securities	<u>\$ 46,170</u>	<u>\$ 549</u>	<u>\$ (308)</u>	<u>\$ 46,411</u>	<u>\$ —</u>
	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Fair Value</u>	<u>Allowance for Credit Losses</u>
	(dollars in thousands; unaudited)				
December 31, 2025

Held-to-maturity					
U.S. Agency residential mortgage-backed securities	48,218	710	(214)	48,713	—
Total investment securities	<u>\$ 48,248</u>	<u>\$ 710</u>	<u>\$ (215)</u>	<u>\$ 48,742</u>	<u>\$ —</u>

Accrued interest on available-for-sale securities was less than \$1,000 at March 31, 2026 and December 31, 2025, and accrued interest on held-to-maturity securities was \$210,000 and \$219,000 at March 31, 2026 and December 31, 2025, respectively. Accrued interest on securities is excluded from the balances in the preceding tables of securities receivable, and is included in accrued interest receivable on the Company's consolidated balance sheets.

The amortized cost and fair value of debt securities at March 31, 2026, by contractual maturity, are shown below. Currently, the portfolio consists of mortgage-backed securities and collateralized mortgage obligations which are not due at a single maturity date. Expected maturities will differ from contractual maturities because issuers or the underlying borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
(dollars in thousands; unaudited)				
March 31, 2026

	\$ 29	\$ 28	\$ 46,141	\$ 46,383

Investments in debt securities with an amortized cost of \$42.2 million and \$44.3 million were pledged for borrowing lines at March 31, 2026 and December 31, 2025, respectively.

During the three months ended March 31, 2026, no securities matured and no securities were purchased.

There were no sales of securities during the three months ended March 31, 2026 or 2025.

There were nine securities with a \$308,000 unrealized loss as of March 31, 2026. There were eight securities with a \$215,000 unrealized loss as of December 31, 2025. The following tables show the investments' gross unrealized losses and fair values, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position for which an allowance for credit losses has not been recorded:

	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
(dollars in thousands; unaudited)						
March 31, 2026						
Available-for-sale						
U.S. Agency collateralized mortgage obligations	\$ —	\$ —	\$ 28	\$ 1	\$ 28	\$ 1
Total available-for-sale securities	—	—	28	1	28	1
Held-to-maturity						
U.S. Agency residential mortgage-backed securities	13,759	220	737	87	14,496	307
Total investment securities	\$ 13,759	\$ 220	\$ 765	\$ 88	\$ 14,524	\$ 308

	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
(dollars in thousands; unaudited)						
December 31, 2025						
Available-for-sale						
U.S. Agency collateralized mortgage obligations	\$ —	\$ —	\$ 29	\$ 1	\$ 29	\$ 1
Total available-for-sale securities	—	—	29	1	29	1
Held-to-maturity						
U.S. Agency residential mortgage-backed securities	5,039	95	8,228	119	13,267	214
Total investment securities	\$ 5,039	\$ 95	\$ 8,257	\$ 120	\$ 13,296	\$ 215

Management has evaluated the above securities and does not believe that any individual unrealized loss as of March 31, 2026 will be recognized into income. Unrealized losses have not been recognized into income because management does not intend to sell and does not expect it will be required to sell the investments. The decline in fair value is largely due to changes in market conditions and interest rates, rather than credit quality. The fair value is expected to recover as the underlying securities in the portfolio approach maturity date and market conditions improve. Management believes there is a high probability of collecting all contractual amounts due, because all of the securities in the portfolio are backed by government agencies or government sponsored enterprises. However, a recovery in value may not occur for some time, if at all, and may be delayed for greater than the a one year time horizon or perhaps even until maturity. Based on management's analysis no allowance for credit losses was required on these securities.

Note 4 - Loans and Allowance for Credit Losses

Loans Held for Sale

During the three months ended March 31, 2026, \$3.33 billion in CCBX loans were transferred to loans held for sale, with \$3.28 billion in loans sold, \$2.63 billion of which was new activity on previously sold credit card receivables. These loans were sold back to partners at par. The Company sells CCBX loans to manage loan portfolio size by partner and by loan category. Partner loan limits are established and documented in the relevant partner agreement. There were \$124.0 million loans held for sale as of March 31, 2026 and \$71.2 million loans held for sale as of December 31, 2025.

Loans Held for Investment

The composition of the loan portfolio is as follows as of the periods indicated:

	March 31,		December 31,
	2026		2025
(dollars in thousands; unaudited)			
Community Bank			
Commercial and industrial loans	\$ 235,603	\$	224,439
Real estate loans:			
Construction, land and land development loans	234,911		222,075
Residential real estate loans	199,185		202,293
Commercial real estate loans	1,300,547		1,285,856
Consumer and other loans:			
Other consumer and other loans	11,587		14,072
Gross community bank loans receivable	1,981,833		1,948,735
CCBX			
Commercial and industrial loans:			
Capital call lines	\$ 176,384	\$	210,480
All other commercial & industrial loans	21,792		19,166
Real estate loans:			
Residential real estate loans	266,037		264,059
Consumer and other loans:			
Credit cards	693,485		622,681
Other consumer and other loans	726,943		691,708
Gross CCBX loans receivable	1,884,641		1,808,094
Total gross loans receivable	3,866,474		3,756,829
Net deferred origination fees and premiums	(7,095)		(7,298)
Loans receivable	\$ 3,859,379	\$	3,749,531

Accrued interest on loans, which is excluded from the balances in the preceding table of loans receivable, was \$18.3 million and \$17.9 million at March 31, 2026 and December 31, 2025, respectively, and was included in accrued interest receivable on the Company's consolidated balance sheets. Accrued interest on loans is net of an allowance of \$627,000 and \$616,000 at March 31, 2026 and December 31, 2025, respectively.

Included in commercial and industrial loans as of March 31, 2026 and December 31, 2025, is \$176.4 million and \$210.5 million, respectively in capital call lines, provided to venture capital firms through one of our BaaS clients. These loans are secured by the capital call rights and are individually underwritten to the Bank's credit standards by our BaaS client and the underwriting is reviewed by the Bank on every line/loan.

Consumer and other loans includes overdrafts of \$27.5 million and \$16.9 million at March 31, 2026 and December 31, 2025, respectively. Community bank overdrafts were \$9,000 and \$10,000 at March 31, 2026 and December 31, 2025, respectively and CCBX overdrafts were \$27.4 million and \$16.8 million at March 31, 2026 and December 31, 2025, respectively.

The Company, through the Bank, purchased loans from CCBX partners, at par, through agreements with those CCBX partners, and those loans had a remaining balance of \$129.4 million as of March 31, 2026 and \$134.9 million as of December 31, 2025. As of March 31, 2026, \$127.6 million is included in consumer and other loans and \$1.8 million is included in commercial and industrial loans, compared to \$132.6 million in consumer and other loans and \$2.3 million in commercial and industrial loans as of December 31, 2025.

The Company, through the Bank, at times purchases individual loans at fair value as of the acquisition date. The Company held purchased loans with remaining balances that totaled \$4.4 million as of March 31, 2026 and December 31,

2025. Unamortized premiums on these loans totaled \$83,000 and \$84,000 as of March 31, 2026 and December 31, 2025, respectively, and are amortized into interest income over the life of the loans. These loans are included in the applicable loan category depending upon the collateral and purpose of the individual loan.

The Company, through the Bank, has purchased participation loans with remaining balances totaling \$28.5 million and \$26.9 million as of March 31, 2026 and December 31, 2025, respectively. These loans are included in the applicable loan category depending upon the collateral and purpose of the individual loan and are underwritten to the Bank's credit standards.

The balance of SBA and United States Department of Agriculture ("USDA") loans and participations sold and serviced for others totaled \$2.3 million and \$2.5 million at March 31, 2026 and December 31, 2025, respectively.

The gross balance of Main Street Lending Program ("MSLP") loans participated and serviced for others, totaled \$23.1 million at March 31, 2026 and December 31, 2025, with \$1.2 million in MSLP loans on the balance sheet and included in commercial and industrial loans at March 31, 2026 and December 31, 2025. Servicing is retained on the gross balance.

The Company has pledged loans totaling \$891.4 million at March 31, 2026 and \$895.5 million at December 31, 2025, for borrowing lines at the FHLB and FRB. Loans are pledged to increase and maintain the borrowing capacity of the Bank for liquidity management purposes.

The following is a summary of the Company's loan portfolio segments:

Commercial and industrial loans – Commercial and industrial loans are secured by business assets including inventory, receivables and machinery and equipment of businesses located generally in the Company's primary market area and capital calls on venture and investment funds. Loan types include revolving lines of credit, term loans, and loans secured by liquid collateral such as cash deposits or marketable securities. Also included in commercial and industrial loans are loans to other financial institutions. Additionally, the Company issues letters of credit on behalf of its customers. Risk arises primarily due to the difference between expected and actual cash flows of the borrowers. In addition, the recoverability of the Company's investment in these loans is also dependent on other factors primarily dictated by the type of collateral securing these loans. The fair value of the collateral securing these loans may fluctuate as market conditions change. In the case of loans secured by accounts receivable, the recovery of the Company's investment is dependent upon the borrower's ability to collect amounts due from its customers.

As of March 31, 2026, \$235.6 million in community bank loans are included in commercial and industrial loans, compared to \$224.4 million at December 31, 2025.

As of March 31, 2026, \$198.2 million in loans originated through CCBX partners are included in commercial and industrial loans, compared to \$229.6 million at December 31, 2025.

As of March 31, 2026, \$176.4 million in CCBX capital call lines are included in commercial and industrial loans compared to \$210.5 million at December 31, 2025. Capital call lines are provided to venture capital firms. These loans are secured by the capital call rights and are individually underwritten to the Bank's credit standards and the underwriting is reviewed by the Bank on every line/loan.

Also included in commercial and industrial loans are \$21.8 million in unsecured loans originated through CCBX partners as of March 31, 2026, compared to \$19.2 million as of December 31, 2025.

Construction, land and land development loans – The Company originates loans for the construction of 1-4 family, multifamily, and CRE properties in the Company's market area. Construction loans are considered to have higher risks due to construction completion and timing risk, the ultimate repayment being sensitive to interest rate changes, government regulation of real property and the availability of long-term financing. Additionally, economic conditions may impact the Company's ability to recover its investment in construction loans, as adverse economic conditions may negatively impact the real estate market, which could affect the borrower's ability to complete and sell the project. Additionally, the fair value of the underlying collateral may fluctuate as market conditions change. The Company occasionally originates land loans for the purpose of facilitating the ultimate construction of a home or commercial building. The primary risks include the borrower's ability to pay and the inability of the Company to recover its investment due to a material decline in the fair value of the underlying collateral.

As of March 31, 2026, \$234.9 million in community bank loans are included in construction, land and land development loans, compared to \$222.1 million at December 31, 2025.

Residential real estate loans – Residential real estate includes various types of loans for which the Company holds real property as collateral. Included in this segment are first and second lien single family loans, occasionally purchased by the Company to diversify its loan portfolio, and rental portfolios secured by one-to-four family homes. The primary risks of residential real estate loans include the borrower’s inability to pay, material decreases in the value of the collateral, and significant increases in interest rates which may make the loan unprofitable.

As of March 31, 2026, \$266.0 million in loans originated through CCBX partners are included in residential real estate loans, compared to \$264.1 million at December 31, 2025. These home equity lines of credit are secured by residential real estate and are accessed by using a credit card. Home equity lines of credit are classified as residential real estate per regulatory guidelines.

Commercial real estate (includes owner occupied and non-owner occupied) loans – Commercial real estate loans include various types of loans for which the Company holds real property as collateral.

As of March 31, 2026, \$1.30 billion in community bank loans are included in commercial real estate loans, compared to \$1.29 billion at December 31, 2025.

We have commercial real estate loans totaling \$375.5 million that are collateralized by owner-occupied real-estate and \$552.0 million that are collateralized by non-owner-occupied real estate, as well as \$359.1 million of multi-family residential loans and \$14.0 million of farmland loans, as of March 31, 2026, compared to \$374.7 million that are collateralized by owner-occupied real-estate and \$531.1 million that are collateralized by non-owner-occupied real estate, as well as \$367.9 million of multi-family residential loans and \$12.2 million of farmland loans as of December 31, 2025. The primary risks of commercial real estate loans include the borrower’s inability to pay, material decreases in the value of the collateralized real estate and significant increases in interest rates, which may make the real estate loan unprofitable. Commercial real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy.

Consumer and other loans – The community bank originates a limited number of consumer loans, generally for banking customers only, which consist primarily of lines of credit, saving account secured loans, and auto loans. CCBX originates consumer loans including credit cards, consumer term loans and secured and unsecured lines of credit. This loan category also includes overdrafts. Repayment of these loans is dependent on the borrower’s ability to pay and the fair value of the underlying collateral.

As of March 31, 2026, \$11.6 million in community bank loans are included in consumer and other loans, compared to \$14.1 million at December 31, 2025.

As of March 31, 2026, \$1.42 billion in CCBX loans are included in consumer and other loans, compared to \$1.31 billion at December 31, 2025.

The following chart breaks out our consumer loan portfolio by segment and type of loan as of March 31, 2026. The largest portion of our consumer portfolio is comprised of CCBX installment loans and credit card loans. These loans are further divided to show the total secured and unsecured amounts in each of these categories. The average overall outstanding consumer loan balance is small at \$700.

(dollars in thousands; unaudited)	Outstanding Balance	% of Total Outstanding Balance Consumer Loans	Average Loan Balance	Number of Loans

Total consolidated	70,683	43,739	114,422	3,642,407	3,756,829	33,144
Less net deferred origination fees and premiums					(7,298)	
Loans receivable					\$ 3,749,531	

There were \$35.2 million in CCBX loans past due 90 days or more and still accruing interest as of March 31, 2026, and \$33.1 million as of December 31, 2025. This is attributed to loans originated through CCBX lending partners which continue to accrue interest up to 180 days past due. As of March 31, 2026 and December 31, 2025, \$34.2 million and \$30.9 million, respectively of loans past due 90 days or more and still accruing interest are covered by credit enhancements provided by our CCBX partners that protect the Bank against losses.

The accrual of interest on community bank loans is discontinued when, in management's opinion, the borrower may be unable to meet payments as they become due or when they are 90 days past due as to either principal or interest, unless they are well secured and in the process of collection. Installment/closed-end, and revolving/open-end consumer loans originated through CCBX lending partners typically continue to accrue interest until 120 and 180 days past due, respectively and an allowance is recorded through provision expense for these expected losses. Certain CCBX partners employ collection practices that place specific loans on nonaccrual status to enhance collectability. As of March 31, 2026, \$22.3 million of these nonaccrual CCBX loans were less than 90 days past due, compared to \$20.3 million as of December 31, 2025. For installment/closed-end and revolving/open-end consumer loans originated through CCBX lending partners with balances outstanding beyond 120 days and 180 days past due, respectively, principal and capitalized interest outstanding is charged off against the allowance and accrued interest outstanding is reversed against interest income. These consumer loans are reported as nonperforming/substandard, 90 days or more days past due and still accruing.

When loans are placed on nonaccrual status, all accrued interest is reversed from current period earnings. Payments received on nonaccrual loans are generally applied as a reduction to the loan principal balance. If the likelihood of further loss is removed, the Company will recognize interest on a cash basis only. Loans may be returned to accruing status if the Company believes that all remaining principal and interest is fully collectible and there has been at least six months of sustained repayment performance since the loan was placed on nonaccrual.

An analysis of nonaccrual loans by category consisted of the following at the periods indicated:

	March 31,			December 31,

In some circumstances, the Company modifies loans in response to borrower financial difficulty, and generally provides for a temporary modification of loan repayment terms. In order for a modified loan to be considered for accrual status, the loan’s collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow for an extended period of time, usually at least six months in duration.

There were no modified loans for community bank borrowers experiencing financial difficulty at March 31, 2026 and December 31, 2025.

The following tables present the CCBX loans at March 31, 2026 and December 31, 2025 that were both experiencing financial difficulty and were modified in the twelve months previous to the dates presented by class and by type of modification. The percentage of the loans that were modified to borrowers in financial distress as compared to the total CCBX loans of each class is also presented below.

Upon the Company's determination that a modified loan (or portion of a loan) has subsequently been deemed uncollectible, the loan (or a portion of the loan) is charged-off against the allowance for credit losses. Therefore, the loan balance is reduced by the uncollectible amount and the allowance for credit losses is adjusted by the same amount.

Credit Quality and Credit Risk

Federal regulations require that the Company periodically evaluate the risks inherent in its loan portfolio. In addition, the Company's regulatory agencies have authority to identify problem loans and, if appropriate, require them to be reclassified. The Company establishes loan grades for loans at the origination of the loan. Changes to community bank loan grades are considered at the time new information about the performance of a loan becomes available, including the receipt of updated financial information from the borrower and after loan reviews. For consumer loans, the Bank follows the Federal Financial Institutions Examination Council's Uniform Retail Credit Classification and Account Management Policy for subsequent classification in the event of payment delinquencies or default. Typically, an individual loan grade will not be changed from the prior period unless there is a specific indication of credit deterioration or improvement. Credit deterioration is evidenced by delinquency, direct communications with the borrower or other borrower information that becomes known to management. Credit improvements are evidenced by known facts regarding the borrower or the collateral property. The Company classifies some loans as Watch or Other Loans Especially Mentioned ("OLEM"). Loans classified as Watch are performing assets but have elements of risk that require more monitoring than other performing loans and are reported in the OLEM column in the following table. Loans classified as OLEM are assets that continue to perform but have shown deterioration in credit quality and require close monitoring. There are three classifications for problem loans: Substandard, Doubtful, and Loss. Substandard loans have one or more defined weaknesses and are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Revolving (open-ended loans, such as credit cards) and installment (closed end) consumer loans originated through CCBX partners typically continue to accrue interest until they are charged-off at 120 days past due for installment loans (primarily unsecured loans to consumers) and 180 days past due for revolving loans (primarily credit cards) and are classified as substandard once they are 90 days past due. CCBX partners may place certain loans on nonaccrual status prior to achieving these past due timelines. Doubtful loans have the weaknesses of loans classified as Substandard, with additional characteristics that suggest the weaknesses make collection or recovery in full after liquidation of collateral questionable on the basis of currently existing facts, conditions, and values. There is a high possibility of loss in loans classified as Doubtful. A loan classified as Loss is considered uncollectible and of such little value that continued classification of the credit as a loan is not warranted. If a loan or a portion thereof is classified as Loss, it must be charged-off, meaning the amount of the loss is charged against the allowance for credit losses, thereby reducing that reserve.

Management considers the guidance in ASC 310-20 when determining whether a modification, extension, or renewal of loan constitutes a current period origination.

The following tables show the risk category of community bank loans by year of origination for the periods indicated, based on the most recent analysis performed as of each period end:

The Company considers the performance of the CCBX loan portfolio and its impact on the allowance for credit losses. For CCBX loans, the Company also evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity. The following tables present the loans in CCBX based on payment activity for the periods indicated:

CCBX	Term Loans Amortized Cost Basis by Origination Year						Revolving Loans Amortized Cost Basis	Revolving Loans Converted To Term	Total

Allowance for Credit Losses ("ACL")

CCBX loans have a higher level of expected losses than our community bank loans, which is reflected in the factors for the allowance for credit losses. Agreements with our CCBX partners provide for a credit enhancement which protects the Bank by reimbursing most losses. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans, reclassified negative deposit accounts and accrued interest receivable on CCBX loans, while actual losses are recognized as incurred. When the provision for CCBX credit losses and provision for unfunded commitments are recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements). The credit enhancement asset is reduced when credit enhancement payments are received from the CCBX partner or taken from the partner's cash reserve account. CCBX partners provide for credit enhancements that provide protection to the Bank from credit and fraud losses by reimbursing the Bank for the losses. If the partner is unable to fulfill its contracted obligations then the Bank could be exposed to the loss of the reimbursement and credit enhancement income. In accordance with the program agreement for one CCBX partner, the Company is responsible for credit losses on approximately 5% of a \$324.0 million loan portfolio that are without credit enhancement reimbursements. At March 31, 2026, 5% of this portfolio represented \$22.0 million in loans. The partner is responsible for reimbursing credit losses on approximately 95% of this portfolio and for fraud losses on 100% of this portfolio. The Company earns 100% of the interest income on the aforementioned \$22.0 million of loans.

The following tables summarize the allocation of the ACL, as well as the activity in the ACL attributed to various segments in the loan portfolio, as of and for the three months ended March 31, 2026 and for the three months ended March 31, 2025:

	Commercial and Industrial	Construction, Land, and Land Development	Residential Real Estate	Commercial Real Estate	Consumer and Other	Total

Note 5 - Deposits

The composition of consolidated deposits consisted of the following at the periods indicated:

	<u>March 31, 2026</u>	<u>December 31, 2025</u>
	(dollars in thousands; unaudited)	
Demand, noninterest bearing	\$ 579,161	\$ 579,616
Interest bearing demand and money market	4,128,511	3,450,679
Savings	321,295	101,616
Total core deposits	5,028,967	4,131,911
Other deposits	1	1
Time deposits less than \$250,000	8,121	8,229
Time deposits \$250,000 and over	4,075	4,058
Total deposits	<u>\$ 5,041,164</u>	<u>\$ 4,144,199</u>

The following table presents the maturity distribution of time deposits as of March 31, 2026:

(dollars in thousands; unaudited)	As of March 31, 2026
Twelve months	\$ 9,235
One to two years	1,620
Two to three years	555
Three to four years	180
Four to five years	606
	<u>\$ 12,196</u>

Included in total deposits is \$462.5 million in reciprocal deposit accounts as of March 31, 2026, compared to \$460.3 million at December 31, 2025, which provides our customers with fully insured deposits through an exchange of deposits with other financial institutions.

Note 6 - Leases

The Company has committed to rent premises and equipment used in business operations under non-cancelable operating and finance leases and determines if an arrangement meets the definition of a lease upon inception.

Operating and finance lease right-of-use (“ROU”) assets represent a right to use an underlying asset for the contractual lease term. Lease liabilities represent an obligation to make lease payments arising from the lease. A lease ROU asset and lease liability will be recognized for any new leases at the commencement of the new lease.

The Company’s leases do not provide an implicit interest rate, therefore the Company used its incremental collateralized borrowing rates commensurate with the underlying lease terms to determine the present value of operating and finance lease liabilities. The weighted average discount rate as of March 31, 2026 was 4.00% for operating leases and 4.75% for finance leases and is based off the discount rate at the time the lease is originated or renewed.

The Company’s operating lease agreements contain both lease and non-lease components, which are generally accounted for separately. The Company’s lease agreements do not contain any residual value guarantees.

Leases with terms of 12 months or less are not included in ROU assets and lease liabilities recorded in the Company’s consolidated balance sheet. Operating lease terms include options to extend when it is reasonably certain that the Company will exercise such options, determined on a lease-by-lease basis. At March 31, 2026, lease expiration dates ranged from 1 year to 19 years, with additional renewal options on certain leases typically ranging from 12 months to 10 years. At March 31, 2026, the weighted average remaining lease term inclusive of renewal options that the Company is reasonably certain to renew for the Company’s operating leases was 7.2 years. The weighted average remaining lease term for the Company’s finance lease was six months. The Company had zero operating leases that had not yet commenced as of March 31, 2026.

Rental expense for operating leases is recognized on a straight-line basis over the lease term and amounted to \$350,000 for the three months ended March 31, 2026 and \$291,000 for the three months ended March 31, 2025. Variable lease components, such as inflation adjustments, are expensed as incurred and not included in ROU assets and operating lease liabilities.

Amortization expense for finance leases is recognized on a straight-line basis over the lease term and amounted to \$9,000 for each of the three months ended March 31, 2026 and 2025. Interest on finance leases was \$1,000 for each of the three months ended March 31, 2026 and 2025.

The following table presents the minimum annual lease payments under the terms of these leases, inclusive of renewal options that the Company is reasonably certain to renew, at March 31, 2026:

(dollars in thousands; unaudited)	Operating	Finance
	March 31,	March 31,
	2026	2026
April 1 to December 31, 2026	\$ 945	\$ 18
2027	1,136	—
2028	716	—
2029	459	—
2030	413	—
2031 and thereafter	1,869	—
Total lease payments	5,538	18
Less: amounts representing interest	756	—
Present value of lease liabilities	\$ 4,782	\$ 18

The following table presents the components of total lease expense, including finance lease costs and operating cash flows for the three months ended March 31, 2026 and 2025:

	Three Months Ended	
	March 31,	March 31,
	2026	2025
(dollars in thousands; unaudited)		
Lease expense:		
Operating lease expense ⁽¹⁾	\$ 310	\$ 251
Variable lease expense	109	99

⁽¹⁾ Included in net occupancy expense and in the Condensed Consolidated Statements of Income (unaudited).

⁽²⁾ Included in other expense in the Condensed Consolidated Statements of Income (unaudited).

⁽³⁾ Included in interest on borrowed funds Condensed Consolidated Statements of Income (unaudited).

Note 7 - Stock-Based Compensation

Stock Options and Restricted Stock

The 2018 Coastal Financial Corporation Omnibus Plan (the "2018 Plan") authorizes the Company to grant awards, including but not limited to, stock options, restricted stock units, and restricted stock awards, to eligible employees, directors or individuals that provide service to the Company, up to an aggregate of 500,000 shares of common stock. On May 24, 2021, the Company's shareholders approved the First Amendment to the 2018 Plan, which increased the authorized plan shares by 600,000. On May 28, 2025, the Company's shareholders approved the Second Amendment to the 2018 Plan which increased the authorized plan shares by 600,000. The 2018 Plan replaced the 2006 Plan for new awards. Existing awards will vest under the terms granted and no further awards will be granted under these prior plans. Shares available to be granted under the 2018 plan were 654,230 at March 31, 2026.

Stock Option Awards

The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. Expected volatilities are based on historical volatility of the Company's stock and other factors. The Company uses the vesting term and contractual life to determine the expected life. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. Compensation expense related to unvested stock option awards is reversed at date of forfeiture.

There were no new stock options granted in the three months ended March 31, 2026 and 2025.

A summary of stock option activity under the 2018 Plan and 2006 Plan during the three months ended March 31, 2026:

Options	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
	(dollars in thousands, except per share amounts; unaudited)			
Outstanding at December 31, 2025	118,881	\$ 10.10	2.1	\$ 12,422
Granted	—	—		
Exercised	(50,296)	9.17	\$	3,367
Expired	—	—		
Forfeited	—	—		
Outstanding at March 31, 2026	68,585	\$ 10.78	2.1	\$ 4,480
Vested at March 31, 2026	29,240	\$ 10.49	2.0	\$ 1,918
Exercisable at March 31, 2026	29,240	\$ 10.49	2.0	\$ 1,918

The total intrinsic value (which is the amount by which the stock price at the date of exercise exceeds the exercise price) of options exercised during the three months ended March 31, 2026 was \$4.0 million. The total intrinsic value of options exercised during the three months ended March 31, 2025 was \$1.8 million.

As of March 31, 2026, there was \$240,000 of total unrecognized compensation cost related to nonvested stock options granted under the 2018 Plan and 2006 Plan. Total unrecognized compensation costs are adjusted for unvested forfeitures. The Company expects to recognize that cost over a remaining weighted-average period of approximately 2.1 years. Compensation expense recorded related to stock options was \$145,000 for the three months ended March 31, 2026 and \$54,000 for the three months ended March 31, 2025.

Restricted Stock Units

In the first quarter of 2026, the Company granted 48,977 restricted stock units ("RSUs") under the 2018 Plan to employees, which vest ratably over 4 years.

RSUs provide for an interest in Company common stock to the recipient, the underlying stock is not issued until certain conditions are met. Vesting requirements include time-based, performance-based, or market-based conditions. Recipients of RSUs do not pay any cash consideration to the Company for the units and the holders of the restricted units do not have voting rights. The fair value of time-based and performance-based units is equal to the fair market value of the Company's common stock on the grant date. The fair value of market-based units is estimated on the grant date using the Monte Carlo simulation model. Compensation expense is recognized over the applicable vesting period of the awards. RSUs are nonparticipating securities.

As of March 31, 2026, there was \$20.2 million of total unrecognized compensation cost related to nonvested RSUs. The Company expects to recognize that cost over the remaining weighted-average vesting period of approximately 3.1 years. Compensation expense related to RSUs was \$1.6 million for the three months ended March 31, 2026 and \$2.3 million for the three months ended March 31, 2025. The total grant-date fair value of RSUs that vested during the three months ended March 31, 2026 and March 31, 2025 was \$2.8 million and \$2.4 million, respectively.

A summary of the Company's nonvested RSUs at March 31, 2026 and changes during the three month period is presented below:

Nonvested shares - RSUs	Number of Shares	Weighted-Average Grant Date Fair Value
	(dollars in thousands, except per share amounts; unaudited)	
Nonvested shares at December 31, 2025	476,302	\$ 51.93
Granted	48,977	\$ 82.22
Forfeited or expired	(2,749)	\$ 54.16
Vested	(66,275)	\$ 41.46
Nonvested shares at March 31, 2026	<u>456,255</u>	<u>\$ 56.77</u>

Restricted Stock Awards

Employees

There were no restricted stock awards outstanding for employees as of March 31, 2026. The fair value of restricted stock awards is equal to the fair value of the Company's stock at the date of grant. Compensation expense is recognized over the vesting period that the awards are based. Restricted stock awards are participating securities.

As of March 31, 2026, there was no unrecognized compensation cost related to nonvested restricted stock awards. Compensation expense recorded related to restricted stock awards was \$0 for the three months ended March 31, 2026 and \$2,000 for the three months ended March 31, 2025.

Director's Stock Compensation

Under the 2018 Plan, effective May 2024, eligible directors are granted stock with a total market value of approximately \$85,000, and the Board Chair is granted stock with a total market value of approximately \$125,000. Committee chairs receive additional stock in an amount that varies depending upon the nature and frequency of the committee meetings. The audit committee chair receives additional stock with a market value of approximately \$15,000, non-financial risk and compensation committee chairs receive additional stock with a market value of approximately \$12,500, and all other committee chairs receive additional stock with a market value of approximately \$10,000. Stock is granted as of each annual meeting date and vest one day prior to the next annual meeting date. During the vesting period, the grants are considered participating securities.

As of March 31, 2026, there was \$133,000 of total unrecognized compensation expense related to director restricted stock awards which the Company expects to recognize over the remaining average vesting period of approximately two months. Director compensation expense recorded related to the 2018 Plan totaled \$217,000 for the three months ended March 31, 2026 and \$180,000 for the three months ended March 31, 2025.

A summary of the Company's nonvested RSAs at March 31, 2026 and changes during the three-month period is presented below:

Nonvested shares - RSAs	Number of Shares	Weighted-Average Grant Date Fair Value
	(dollars in thousands, except per share amounts; unaudited)	
Nonvested shares at December 31, 2025	10,039	\$ 87.19
Granted	—	\$ —
Forfeited	—	\$ —
Vested	—	\$ —
Nonvested shares at March 31, 2026	10,039	\$ 87.19

Note 8 - Fair Value Measurements

The following tables present estimated fair values of the Company's financial instruments as of the period indicated, whether or not recognized or recorded in the consolidated balance sheets at the period indicated:

	March 31, 2026		Fair Value Measurements Using		
	Carrying Value	Estimated Fair Value	Level 1	Level 2	Level 3
	(dollars in thousands; unaudited)

The Company measures and discloses certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (that is, not a forced liquidation or distressed sale). GAAP establishes a consistent framework for measuring fair value and disclosure requirements about fair value measurements. Among other things, the accounting standard requires the reporting entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's estimates for market assumptions. These two types of inputs create the following fair value hierarchy:

- Level 1 – Quoted prices in active markets for identical instruments. An active market is a market in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.
- Level 2 – Observable inputs other than Level 1 including quoted prices in active markets for similar instruments, quoted prices in less active markets for identical or similar instruments, or other observable inputs that can be corroborated by observable market data.
- Level 3 – Unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation; also includes observable inputs from nonbinding single dealer quotes not corroborated by observable market data.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize at a future date. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. In addition, reasonable comparability between financial institutions may not be likely due to the wide range of permitted valuation techniques and numerous estimates that must be made given the absence of active secondary markets for certain financial instruments. This lack of uniform valuation methodologies also introduces a greater degree of subjectivity to these estimated fair values.

Items measured at fair value on a recurring basis – The following fair value hierarchy table presents information about the Company’s assets that are measured at fair value on a recurring basis at the dates indicated:

	Level 1	Level 2	Level 3	Total Fair Value
	(dollars in thousands; unaudited)			
March 31, 2026				
Available-for-sale				
U.S. Agency collateralized mortgage obligations	\$ —	\$ 28	\$ —	\$ 28
	\$ —	\$ 28	\$ —	\$ 28
December 31, 2025				
Available-for-sale				
U.S. Agency collateralized mortgage obligations	\$ —	\$ 29	\$ —	\$ 29
	\$ —	\$ 29	\$ —	\$ 29

The following methods were used to estimate the fair value of the class of financial instruments above:

Investment securities - The fair value of securities is based on quoted market prices, pricing models, quoted prices of similar securities, independent pricing sources, and discounted cash flows.

Limitations: The fair value estimates presented herein are based on pertinent information available to management as of March 31, 2026 and December 31, 2025. The factors used in the fair values estimates are subject to change subsequent to the dates the fair value estimates are completed, therefore, current estimates of fair value may differ significantly from the amounts presented herein.

Items measured at Level 3 fair value on a nonrecurring basis – The following table presents financial assets and liabilities measured at fair value on a nonrecurring basis that are classified within Level 3 of the fair value hierarchy at the dates indicated:

	Level 1	Level 2	Level 3	Total Fair Value
	(dollars in thousands; unaudited)			
March 31, 2026				
Collateral dependent loans	\$ —	\$ —	\$ —	\$ —
Equity securities	\$ —	\$ —	\$ 1,821	\$ 1,821
Total	\$ —	\$ —	\$ 1,821	\$ 1,821
December 31, 2025				
Collateral dependent loans	\$ —	\$ —	\$ 97	\$ 97
Equity securities	—	—	2,171	2,171
Total	\$ —	\$ —	\$ 2,268	\$ 2,268

The amounts disclosed above represent the fair values at the time the nonrecurring fair value measurements were made, and not necessarily the fair value as of the dates reported on.

Collateral dependent loans - Fair values for individually evaluated collateral dependent loans are estimated using the fair value of the collateral less selling costs if the loan results in a Level 3 classification. Individually evaluated loan amounts are initially valued at the lower of cost or fair value. Individually evaluated loans carried at fair value generally receive specific allocations of the allowance for credit losses. For collateral dependent real estate loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower’s financial statements, or aging reports, adjusted or discounted based on management’s historical knowledge, changes in market conditions from the time of the valuation, and management’s expertise and knowledge of the client and client’s business, resulting in a Level 3 fair value classification. Individually evaluated loans are evaluated on a quarterly basis for additional credit losses and adjusted accordingly. The estimated fair values of financial instruments disclosed above follow the guidance in ASU 2016-01 which prescribes an “exit price” approach in estimating and disclosing fair value of financial instruments incorporating discounts for credit, liquidity, and marketability factors. Valuation is measured based on the fair value of the underlying collateral or the discounted cash expected future cash flows. Subsequent changes in the value of loans are included within the provision for credit losses on loans in the same manner in which it initially was recognized or as a reduction in the provision that would otherwise be reported. Loans are evaluated quarterly to determine if valuation adjustments should be recorded. The need for valuation adjustments arises when observable market prices or current appraised values of collateral indicate a shortfall in collateral value compared to current carrying values of the related loan. If the Company determines that the value of the individually evaluated loan is less than the carrying value of the loan, the Company either establishes a reserve as a specific component of the allowance for credit losses or charges off that amount. These valuation adjustments are considered nonrecurring fair value adjustments.

Equity securities – The Company measures equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer, with price changes recognized in earnings.

Equity securities without readily determinable fair values

The following table presents the carrying value of equity securities without readily determinable fair values, as of March 31, 2026, with adjustments recorded during the periods presented for those securities with observable price changes, if applicable. These equity securities are included in other investments on the balance sheet.

- The Company had a \$1.8 million and \$2.2 million equity interest in a specialized bank technology company as of the quarters ended March 31, 2026 and 2025, respectively.
- The Company had a \$350,000 equity interest in a technology company as of the quarters ended March 31, 2026 and 2025.
- The Company had a \$500,000 equity interest in financial technology company as of the quarter ended March 31, 2026. This was a new equity investment, so there was no equity interest at March 31, 2025.
- The Company had a \$42,000 and \$47,000 equity interest in a technology company as of the quarters ended March 31, 2026 and 2025, respectively.

(dollars in thousands; unaudited)	For the Three Months Ended	
	March 31,	
	2026	2025
Carrying value, beginning of period	\$ 2,171	\$ 2,619
Purchases	500	—
Observable price change	—	—
Carrying value, end of period	\$ 2,671	\$ 2,619

The following table provides a description of the valuation technique, unobservable inputs, and qualitative information about the unobservable inputs for the Company's assets and liabilities classified as Level 3 and measured at fair value on a nonrecurring basis at the date indicated:

(unaudited)	Valuation Technique	Unobservable Inputs	March 31, 2026 Weighted Average Rate	December 31, 2025 Weighted Average Rate
Collateral dependent loans	Collateral valuations	Discount to appraised value	8.3%	8.1%

Note 9 - Earnings Per Common Share

The following is a computation of basic and diluted earnings per common share at the periods indicated:

	Three Months Ended	
	March 31, 2026	March 31, 2025
	(dollars in thousands, except earnings per share data; unaudited)	
Net Income	\$ 12,019	\$ 9,730
Basic weighted average number common shares outstanding	15,179,447	14,962,507
Dilutive effect of equity-based awards	243,375	499,534
Diluted weighted average number common shares outstanding	15,422,822	15,462,041
Basic earnings per share	\$ 0.79	\$ 0.65
Diluted earnings per share	\$ 0.78	\$ 0.63
Antidilutive stock options and restricted stock outstanding	142,553	2,269

Under the two-class method, earnings available to common shareholders for the period are allocated between common shareholders and participating securities according to dividends declared (or accumulated) and participation rights in undistributed earnings, however the difference in the two-class method was not significant.

Note 10 – Segment Reporting

As defined in ASC 280, Segment Reporting, an operating segment is a component of an enterprise that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the enterprise's chief operating decision makers ("CODM") to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. We evaluate performance based on classifications within accounting and reporting systems, which provides line of business results. This system uses various techniques to assign balance sheet and income statement amounts to the business segments, including allocations of income and expense. A primary objective of this measurement system and related internal financial reporting practices are to produce consistent results that reflect the underlying financial impact of the segments on the Company and to provide a basis of support for strategic decision making. The accounting policies applicable to our segments are those that apply to our preparation of the accompanying Consolidated Financial Statements. Based on these criteria, we have identified three segments: the community bank, CCBX, and treasury & administration. The Executive Leadership Team, which includes the CEO, Presidents, CFO and other key executive members, which the Company has designated as the CODMs, evaluates the financial performance of the Company's segments by evaluating interest income and expense, noninterest income and significant expenses. The community bank segment includes all community banking activities. A primary focus of the community bank is on providing a wide range of banking products and services to consumers and small to medium sized businesses in the broader Puget Sound region in the state of Washington and through the Internet and our mobile banking application. We currently operate 14 full-service banking locations, 12 of which are located in Snohomish County, where we are the largest community bank by deposit market share, and two of which are located in neighboring counties (one in King County and one in Island County). We also have a loan production office which is located in King county. The CCBX segment provides BaaS that allows digital financial service providers, companies and brands to offer their customers banking services. The CCBX segment has 30 partners as of March 31, 2026. The treasury & administration segment includes investments, debt and other reporting items that are not specific to the community bank or CCBX segments.

The management accounting policies and processes utilized in compiling segment financial information are highly subjective and, unlike financial accounting, are not based on authoritative guidance similar to GAAP. As a result, reported segments and the financial information of the reported segments are not necessarily comparable with similar information reported by other financial institutions. Additionally, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. Changes in management structure or allocation methodologies and procedures may result in future changes to previously reported segment financial data. Furthermore, changes in management structure or allocation methodologies and procedures may result in changes in reported segment financial data. The Company continues to evaluate its methodology on allocating items to the Company's various segments to support strategic business decisions by the Company's executive leadership. Income and expenses that are specific to a segment are directly posted to each segment. Additionally, certain indirect expenses are allocated to each segment utilizing various metrics, such as number of employees, utilization of space, and allocations based on loan and deposit balances. We have implemented a transfer pricing process that credits or charges the community bank and CCBX segments with intrabank interest income or expense for the difference in average loans and average deposits, with the treasury & administration segment as the offset for those entries.

Summarized financial information concerning the Company's reportable segments and the reconciliation to the consolidated financial results is shown in the following tables for the periods indicated:

	March 31, 2026				December 31, 2025

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a bank holding company that operates through our wholly owned subsidiaries, Coastal Community Bank (“Bank”) and Arlington Olympic LLC. We are headquartered in Everett, Washington, which by population is the largest city in, and the county seat of, Snohomish County. Our business is conducted through three reportable segments: The community bank, CCBX and treasury & administration. The community bank segment includes all community banking activities, with a primary focus on providing a wide range of banking products and services to consumers and small to medium sized businesses in the broader Puget Sound region in the state of Washington and through the Internet and our mobile banking application. We currently operate 14 full-service banking locations, 12 of which are located in Snohomish County, where we are the largest community bank by deposit market share, and two of which are located in neighboring counties (one in King County and one in Island County). The CCBX segment provides banking as a service (“BaaS”) that allows digital financial service providers, companies and brands to offer their customers banking services. The CCBX segment has 30 partners as of March 31, 2026. The treasury & administration segment includes investments, debt and other reporting items that are not specific to the community bank or CCBX segments. The Bank’s deposits are insured in whole or in part by the Federal Deposit Insurance Corporation (“FDIC”). The Bank is subject to regulation by the Federal Reserve and the Washington State Department of Financial Institutions Division of Banks. The Federal Reserve also has supervisory authority over the Company.

As of March 31, 2026, we had total assets of \$5.66 billion, total loans receivable of \$3.86 billion, total deposits of \$5.04 billion and total shareholders’ equity of \$503.8 million.

The following discussion and analysis presents our financial condition and results of operations on a consolidated basis. However, because we conduct all of our material business operations through the Bank, the discussion and analysis relate to activities primarily conducted by the Bank.

We generate most of our community bank revenue from interest on loans and CCBX revenue from BaaS fee income and interest on loans. Our primary source of funding for our loans is commercial and retail deposits from our customer relationships and from our partner deposit relationships. We place secondary reliance on wholesale funding, primarily borrowings from the Federal Home Loan Bank (“FHLB”). Less commonly used sources of funding include borrowings from the Federal Reserve System (“Federal Reserve”) discount window, draws on established federal funds lines from unaffiliated commercial banks, brokered funds, which allows us to obtain deposits from sources that do not have a relationship with the Bank and can be obtained through certificate of deposit listing services, via the internet or through other advertising methods, or a one-way buy through an insured cash sweep (“ICS”) account, which allows us to obtain funds from other institutions that have deposited funds through ICS. Our largest expenses are provision for credit losses on loans, interest on deposits and borrowings, BaaS loan expense, and salaries and employee benefits. Our principal lending products are commercial real estate loans, consumer loans, residential real estate, commercial and industrial loans and construction, land and land development loans.

Results of Operations

Net Income

Comparison of the quarter ended March 31, 2026 to the comparable quarter in the prior year

Net income for the three months ended March 31, 2026 was \$12.0 million, or \$0.78 per diluted share, compared to \$9.7 million, or \$0.63 per diluted share, for the three months ended March 31, 2025. The increase in net income over the comparable period in the prior year was primarily attributable to a \$6.8 million increase in interest income due to an increase in average loans receivable and interest earning deposits with other banks, an increase in BaaS program income of \$4.6 million and a decrease in interest expense of \$521,000, partially offset by a \$11.5 million increase in noninterest expenses combined with other less significant changes.

Additionally, BaaS credit enhancement income decreased \$2.9 million, which is directly related to and offsets the decrease in provision for credit losses of \$4.4 million for the quarter ended March 31, 2026. The lower provision is due to improvement in the performance of the CCBX portfolio, change in loan mix, and our focus on originating higher quality CCBX loans resulting in lower historical loss factors. In accordance with GAAP, we recognize as revenue (1) the right to be indemnified or reimbursed for fraud losses on CCBX customer loans and deposits and (2) the right to be indemnified for credit losses by our partners for expected credit losses related to loans they originate and unfunded commitments from such loans. CCBX customer credit losses are recognized in the allowance for credit loss and fraud loss is recognized in BaaS noninterest expense. For more information on the accounting for BaaS allowance for credit losses, reserve for unfunded commitments, credit enhancements and fraud enhancements see the section titled “*CCBX – BaaS Reporting Information.*”

Net Interest Income

Comparison of the quarter ended March 31, 2026 to the comparable quarter in the prior year

Net interest income for the three months ended March 31, 2026 was \$83.4 million, compared to \$76.1 million for the three months ended March 31, 2025, an increase of \$7.3 million, or 9.6%. The increase in net interest income compared to the quarter ended March 31, 2025 was primarily related to an increase in interest earning deposits with other banks and growth in loans receivable. The average balance of loans was \$366.9 million more and average interest earning deposits with other banks was \$338.1 million higher for the three months ended March 31, 2026 compared to the three months ended March 31, 2025.

Total interest and fees on loans were \$102.9 million for the three months ended March 31, 2026 compared to \$98.1 million for the three months ended March 31, 2025. The \$4.7 million increase in interest and fees on loans for the quarter ended March 31, 2026, compared to the quarter ended March 31, 2025, was largely due to growth in loans, primarily from CCBX. Total loans receivable was \$3.86 billion at March 31, 2026, compared to \$3.52 billion at March 31, 2025. CCBX average loans receivable was \$1.92 billion for the quarter ended March 31, 2026, compared to \$1.63 billion for the quarter ended March 31, 2025, an increase of \$292.5 million, or 17.9%. Average CCBX yield of 15.01% was earned on CCBX loans for the quarter ended March 31, 2026, compared to 16.88% for the quarter ended March 31, 2025. The lower loan yield is the result of lower rates compared to the prior year period as well as a change in the loan mix. The Federal Open Market Committee (“FOMC”) of the Federal Reserve last lowered the targeted federal funds rate by 0.25% on December 11, 2025; a reduction of 0.75% compared to March 31, 2025. Additionally, lower rate capital call lines were \$42.9 million higher compared to March 31, 2025. These loans earn a lower rate of interest, but have less credit risk due to the way the loans are structured compared to other commercial loans. CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. The tables later in this section illustrate the impact of BaaS loan expense on CCBX loan yield.

Interest income from interest earning deposits with other banks was \$8.1 million for the quarter ended March 31, 2026, an increase of \$2.1 million, or 33.9%, primarily due to an increase in balances compared to the quarter ended March 31, 2025. The average balance of interest earning deposits invested with other banks for the three months ended March 31, 2026 was \$891.5 million, compared to \$553.4 million for the three months ended March 31, 2025. The yield on these interest earning deposits with other banks decreased 0.75%, which is in line with the reduction in Fed funds compared to the prior year period, to 3.70% compared to 4.45% at March 31, 2025. Interest income on investment securities decreased \$28,000 to \$622,000 at March 31, 2026, compared to \$650,000 at March 31, 2025. Average investment securities increased \$259,000 from \$47.2 million for the three months ended March 31, 2025, to \$47.5 million for the three months ended March 31, 2026, as a result of investments purchased for CRA purposes, partially offset by principal paydowns. Average yield on investment securities decreased to 5.32% for the three months ended March 31, 2026, compared to 5.59% for the three months ended March 31, 2025.

Interest expense was \$28.3 million for the quarter ended March 31, 2026, a \$521,000 decrease from the quarter ended March 31, 2025. Interest expense on deposits was \$27.7 million for the quarter ended March 31, 2026, compared to \$28.2 million for the quarter ended March 31, 2025. The \$515,000 decrease in interest expense on deposits was largely due to lower interest rates despite an increase of \$631.9 million in average interest bearing deposits compared to the quarter ended March 31, 2025. Interest on borrowed funds was \$654,000 for the quarter ended March 31, 2026, compared to \$660,000 for the quarter ended March 31, 2025.

Cost of funds was 2.59% for the quarter ended March 31, 2026, which was a decrease of 0.52% from 3.11% for the quarter ended March 31, 2025. Cost of deposits for the quarter ended March 31, 2026 was 2.56%, which was a 0.52% decrease from 3.08% for the quarter ended March 31, 2025. These decreases were largely due to lower interest rates.

Net interest margin was 7.00% for the three months ended March 31, 2026, compared to 7.48% for the three months ended March 31, 2025. The decrease in net interest margin compared to the three months ended March 31, 2025 was largely due to a decrease in loan yield, partially offset by a decrease in cost of deposits.

Total yield on loans receivable for the quarter ended March 31, 2026 was 10.76%, compared to 11.33% for the quarter ended March 31, 2025. This decrease in yield on loans receivable is the result of lower rates compared to the prior year period as well as a change in the loan mix. Lower rate CCBX capital call lines were \$42.9 million higher compared to March 31, 2025. The composition of the loan portfolio is shifting with CCBX average loans increasing to 49.6% of the total loan portfolio for the quarter ended March 31, 2026, compared to 46.4% for the quarter ended March 31, 2025, and the average community bank loans decreasing to 50.4% of the loan portfolio for the quarter ended March 31, 2026, compared to 53.6% for the quarter ended March 31, 2025. For the quarter ended March 31, 2026, average CCBX loans increased \$292.5 million, or 17.9%, with an average CCBX yield of 15.01%, compared to 16.88% at the quarter ended March 31, 2025. CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. The tables later in this section illustrate the impact of BaaS loan expense on CCBX loan yield. Average community bank loans increased \$74.4 million, or 4.0% due to growth and normal balance fluctuations. Average yield on community bank loans for the three months ended March 31, 2026 was 6.58% compared to 6.53% for the three months ended March 31, 2025.

The following tables (1) show the average yield on loans and cost of deposits by segment and (2) illustrate how BaaS loan interest income is affected by BaaS loan expense resulting in net BaaS loan income and the associated yield for the periods indicated:

(unaudited)	For the Three Months Ended			
	March 31, 2026		March 31, 2025	
	Yield on Loans ⁽²⁾	Cost of Deposits ⁽²⁾	Yield on Loans ⁽²⁾	Cost of Deposits ⁽²⁾
Community Bank	6.58%	1.46%	6.53%	1.76%
CCBX ⁽¹⁾	15.01%	3.17%	16.88%	4.01%
Consolidated	10.76%	2.56%	11.33%	3.08%

(1) CCBX yield on loans does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. To determine net BaaS loan income earned from CCBX loan relationships, the Company takes BaaS loan interest income and deducts BaaS loan expense to arrive at net BaaS loan income which can be compared to interest income on the Company's community bank loans. See the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures" for a reconciliation of the impact of BaaS loan expense on CCBX yield on loans.

(2) Annualized calculations shown for periods presented.

Average BaaS Loans ⁽³⁾	\$ 1,922,586		\$ 1,630,088	

(1) A reconciliation of this non-GAAP measure is set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures."

(2) Annualized calculations shown for periods presented.

(3) Includes loans held for sale.

For the three months ended March 31, 2026, net interest margin (net interest income divided by the average total interest earning assets) and net interest spread (average yield on total interest earning assets minus average cost of total interest bearing liabilities) were 7.00% and 6.39%, respectively, compared to 7.48% and 6.68%, respectively, for the three months ended March 31, 2025.

The following table presents an analysis of the average balances of net interest income, net interest spread and net interest margin for the periods indicated. Loan fees, net of loan costs included in interest income totaled \$2.5 million and \$2.1 million for the three months ended March 31, 2026 and 2025, respectively. For the each of the three months ended March 31, 2026 and 2025, the amount of interest income not recognized on nonaccrual loans was not material.

(1) Yields and costs are annualized.

(2) Includes loans held for sale and nonaccrual loans.

(3) Net interest margin represents net interest income divided by the average total interest earning assets.

(4) CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. See the section titled “GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures” for a reconciliation of the impact of BaaS loan expense on CCBX loan yield.

(5) Net interest margin, net of BaaS loan expense includes the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements, and servicing CCBX loans. A reconciliation of this non-GAAP measure is set forth in the section titled “GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures.”

(6) For presentation in this table, average balances and the corresponding average rates for investment securities are based upon historical cost, adjusted for amortization of premiums and accretion of discounts.

(7) Intrabank assets and liabilities are consolidated for period calculations and presented as intrabank asset, net or intrabank liability, net in the tables above.

The following table presents information regarding the dollar amount of changes in interest income and interest expense for the periods indicated for each major component of interest earning assets and interest bearing liabilities and distinguishes between the changes attributable to changes in volume and changes attributable to changes in interest rates. The table illustrates the increase in loan interest income which is attributed to a \$9.9 million increase in loan volume, partially offset by a \$3.4 million decrease in loan rates. For purposes of this table, changes attributable to both rate and volume that cannot be segregated have been allocated to volume.

Provision for Credit Losses

The provision for credit losses on loans is an expense we incur to maintain an allowance for credit losses at a level that management deems appropriate to absorb expected losses on existing loans in accordance with GAAP. For a description of the factors taken into account by our management in determining the allowance for credit losses see “—Financial Condition—Allowance for Credit Losses.”

The macro economic environment is continuously changing, primarily due to the pace of economic growth, inflation, changing interest rates, global trade tensions, tariffs, unemployment, global unrest, the war in Ukraine, conflicts in the Middle East, political uncertainty, natural disasters, and trade issues that may impact the provision and therefore the allowance. Gross loans, excluding loans held for sale, totaled \$3.86 billion at March 31, 2026. The allowance for credit losses as a percentage of loans was 4.47% at March 31, 2026, compared to 5.21% at March 31, 2025.

Agreements with our CCBX partners provide for a credit enhancement provided by the partner which protects the Bank by indemnifying or reimbursing incurred losses. CCBX partners bear most of the responsibility for credit losses incurred which consequently gives them vested interests in the performance of the portfolio. We believe that this alignment of interests ensures that CCBX partners are motivated to implement robust risk management practices and maintain the overall health of the portfolio. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans and reclassified negative deposit accounts. When the provision for credit losses on loans and provision for unfunded commitments are recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements) in recognition of the CCBX partner's legal commitment to indemnify or reimburse losses. The credit enhancement asset is relieved as credit enhancement payments are received from the CCBX partner or taken from the partner's cash reserve account.

Comparison of the quarter ended March 31, 2026 to the comparable quarter in the prior year

The provision for credit losses for the three months ended March 31, 2026 was \$51.4 million, compared to \$55.8 million for the three months ended March 31, 2025. This includes a provision for credit losses on loans for the three months ended March 31, 2026 of \$52.5 million, compared to \$54.4 million for the three months ended March 31, 2025. The decrease in the Company's provision for credit losses on loans during the quarter ended March 31, 2026 is largely related to improvement in the performance of the CCBX portfolio and changes in the composition of CCBX loan originations. The current mix of originations includes a greater proportion of loans with attributes that have historically demonstrated lower loss experience, which contributed to lower expected losses and a lower provision during the period. During the quarter ended March 31, 2026, a \$52.6 million provision for credit losses on loans was recorded for CCBX partner loans. The factors used in management's analysis for community bank credit losses indicated that a provision recapture for credit losses on loans of \$1.4 million was needed for the quarter ended March 31, 2026, largely due to improved economic outlook, partially offset by a change in the loan mix of the community bank portfolio. Additionally, a provision recapture for unfunded commitments of \$1.3 million was recorded for the quarter ended March 31, 2026, primarily as a result of a change in the loan mix of available balance, compared to a \$613,000 provision for the three months ended March 31, 2025. An \$11,000 provision for accrued interest receivable on CCBX loans was recorded for the quarter ended March 31, 2026, compared to \$784,000 for the three months ended March 31, 2025 and a \$252,000 provision for other receivables was recorded for the quarter ended March 31, 2026 and there was no such provision for the quarter ended March 31, 2025.

The following table shows the provision expense for loans by segment for the periods indicated:

(dollars in thousands; unaudited)	Three Months Ended	
	March 31, 2026	March 31, 2025
Community bank	\$ (1,428)	\$ 65
CCBX	52,563	54,319
Total provision expense	\$ 51,135	\$ 54,384

Net charge-offs for the quarter ended March 31, 2026 totaled \$49.6 million, or 5.18% of total average loans, compared to \$48.2 million, or 5.57% of total average loans, for the quarter ended March 31, 2025. Net charge-offs as a percent of loans were down in 2026 compared to 2025, primarily due to our on-going efforts to improve the credit quality of CCBX loans. However, in general, loans originated through CCBX partners have a higher level of expected losses than our community bank loans as reflected in the factors for allowance for credit losses. In accordance with GAAP, CCBX losses are recorded as charge-offs, but CCBX partner agreements provide for a credit enhancement that indemnifies the Bank from incurred losses, and as a result CCBX partners reimburse the Bank for net-charge-offs on CCBX loans and negative deposit accounts, except in accordance with the program agreement for one partner where the Company is responsible for credit losses on approximately 5% of a \$324.0 million loan portfolio. At March 31, 2026, our portion of this portfolio represented \$22.0 million in loans. For the three months ended March 31, 2026, \$49.6 million of net charge-offs were recognized for CCBX loans and \$1,000 net recoveries were recognized on community bank loans. For the three months ended March 31, 2025, \$48.2 million of net charge-offs were recognized on CCBX loans and \$3,000 net recoveries were recognized for community bank loans.

The following table shows the total charge-off activity by segment for the periods indicated:

(dollars in thousands; unaudited)	Three Months Ended					
	March 31, 2026			March 31, 2025		
	Community Bank	CCBX	Total	Community Bank	CCBX	Total
Gross charge-offs	\$ 2	\$ 54,521	\$ 54,523	\$ 4	\$ 53,682	\$ 53,686
Gross recoveries	(3)	(4,933)	(4,936)	(7)	(5,479)	(5,486)

Net charge-offs to average loans ⁽¹⁾	0.00 %	10.46 %	5.18 %	0.00 %	11.99 %	5.57 %

⁽¹⁾ Annualized calculations shown for periods presented.

Noninterest Income

Our primary sources of recurring noninterest income are BaaS indemnification income, BaaS program income and service charges and fees. Noninterest income does not include loan origination fees, which are generally recognized over the life of the related loan as an adjustment to yield using the interest or similar method.

Comparison of the quarter ended March 31, 2026 to the comparable quarter in the prior year

For the three months ended March 31, 2026, noninterest income totaled \$66.1 million, an increase of \$2.6 million, or 4.1%, compared to \$63.5 million for the three months ended March 31, 2025. The decrease is primarily attributed to lower BaaS indemnification income which is related to lower provision for credit losses on CCBX loans based on improved credit quality, partially offset by an increase in BaaS program income.

The following table presents, for the periods indicated, the major categories of noninterest income:

(dollars in thousands; unaudited)	Three Months Ended March 31,		Increase (Decrease)	Percent Change
	2026	2025		
Service charges and fees	\$ 850	\$ 860	\$ (10)	(1.2)%
Unrealized gain (loss) on equity securities, net	126	16	110	687.5

BaaS credit enhancements	50,744	53,648	(2,904)	(5.4)
BaaS fraud enhancements	3,059	1,993	1,066	53.5
BaaS indemnification income	53,803	55,641	(1,838)	(3.3)
Total BaaS income	64,691	61,919	2,772	4.5
Total noninterest income	\$ 66,077	\$ 63,477	\$ 2,600	4.1%

Summary of significant noninterest income for the three months ended March 31, 2026 compared to the three months ended March 31, 2025

A description of our largest noninterest income categories are below:

BaaS Income. Our CCBX segment provides BaaS offerings that enable our digital financial service providers to offer their customers banking services. In exchange for providing these services, we earn fixed fees, volume-based fees and reimbursement of costs depending on the program agreement. Servicing and other BaaS fees are typically higher with new partners who have minimum contractual fees. Transaction and interchange fees increase as partner activity increases. As a result, we generally expect servicing and other fees to decrease and transaction and interchange fees to increase as partner activity grows and contracted minimum fees are replaced with recurring fees which then exceed the minimum contractual fees. Increases in BaaS reimbursement of fees offsets increases in noninterest expense from BaaS expenses covered by CCBX partners. In accordance with GAAP, we recognize the reimbursement of noncredit fraud losses on loans and deposits originated through partners and credit enhancements related to the allowance for credit losses and reserve for unfunded commitments provided by the partner as revenue in BaaS income. CCBX credit losses are recognized in the allowance for credit losses on loans, and fraud losses are expensed in noninterest expense under BaaS fraud expense. Also in accordance with GAAP, we establish a credit enhancement asset for expected future credit losses through the recognition of BaaS credit enhancement revenue at the same time we establish an allowance for those loans through a provision for credit losses on loans. For more information on the accounting for BaaS allowance for credit losses, reserve for unfunded commitments, credit enhancements and fraud enhancements see the section titled “*CCBX – BaaS Reporting Information.*”

For the three months ended March 31, 2026, we earned \$64.7 million in BaaS fees, which was an increase of \$2.8 million, or 4.5%, over the three months ended March 31, 2025, when we earned \$61.9 million in BaaS fees. The increase was primarily due to an increase of \$4.6 million in total BaaS fee program income, which was the result of increased partner activity, and an increase of \$1.1 million in BaaS fraud enhancements, partially offset by a decrease of \$2.9 million in BaaS credit enhancements related to the allowance for credit losses.

Service Charges and Fees. Service charges and fees include service charges on accounts, point-of-sale fees, merchant services fees and overdraft fees. Together they constitute the largest component of our noninterest income, outside of BaaS income.

Service charges and fees were \$850,000 for the three months ended March 31, 2026, a decrease of \$10,000, or 1.2%, from the comparable quarter in the prior year.

Unrealized gain on equity securities, net. During the three months ended March 31, 2026, we recognized an unrealized net gain on equity securities of \$126,000 compared to the three months ended March 31, 2025, when there was an unrealized gain of \$16,000 recognized. We hold \$4.4 million in total equity funds and investments, \$3.5 million of which is in equity securities of entities that are focused on providing products to the BaaS and financial services space.

Other. This category includes a variety of other income-producing activities, credit card fee income, wire transfer fees, interest earned on bank owned life insurance (“BOLI”), and SBA and USDA servicing fees.

Noninterest Expense

Generally, noninterest expense is composed of all employee expenses and costs associated with operating our facilities, obtaining and retaining customer relationships and providing bank services. The largest components of noninterest expense are BaaS loan and fraud expense combined and salaries and employee benefits. Noninterest expense also includes operational expenses, such as legal and professional expenses, data processing and software licenses, occupancy, point of sale expenses, FDIC assessments, director and staff expenses, excise taxes, marketing and other expenses.

Comparison of the quarter ended March 31, 2026 to the comparable quarter in the prior year

The \$11.5 million increase in noninterest expenses for the quarter ended March 31, 2026 compared to the quarter ended March 31, 2025 was largely due to a \$4.4 million increase in BaaS loan expense, a \$3.4 million increase in data processing and software licenses, a \$1.6 million increase in salary and employee benefits, and a \$514,000 increase in legal and professional expenses. These increases are largely due to growth and enhancements in technology all of which are related to the growth of the Company and investments in technology and risk management.

The following table presents, for the periods indicated, the major categories of noninterest expense:

(dollars in thousands; unaudited)	Three Months Ended March 31,		Increase (Decrease)	Percent Change
	2026	2025		
Salaries and employee benefits	\$ 23,122	\$ 21,532	\$ 1,590	7.4 %
Data processing and software licenses	7,643	4,232	3,411	80.6
Legal and professional expenses	7,002	6,488	514	7.9
Excise taxes	1,169	722	447	61.9
Occupancy	859	1,034	(175)	(16.9)
Director and staff expenses	668	631	37	5.9
FDIC assessments	573	755	(182)	(24.1)
Point of sale expense	445	107	338	315.9
Marketing	38	50	(12)	(24.0)
Other	1,934	1,938	(4)	(0.2)
Noninterest expense, excluding BaaS loan and BaaS fraud expense	43,453	37,489	5,964	15.9
BaaS loan expense	36,940	32,507	4,433	13.6
BaaS fraud expense	3,059	1,993	1,066	53.5
BaaS loan and fraud expense	39,999	34,500	5,499	15.9
Total noninterest expense	\$ 83,452	\$ 71,989	\$ 11,463	15.9 %

Summary of significant noninterest expense for the three months ended March 31, 2026 compared to the three months ended March 31, 2025

A description of our largest noninterest expense categories are below:

Salaries and Employee Benefits. Salaries and employee benefits are one of the largest components of noninterest expense and include payroll expense, incentive compensation costs, equity compensation, benefit plans, health insurance and payroll taxes. Salaries and employee benefits were \$23.1 million for the three months ended March 31, 2026, an increase of \$1.6 million, or 7.4%, compared to \$21.5 million for the three months ended March 31, 2025. Salaries and employee benefits expense continues to increase, primarily due to hiring staff for our CCBX segment and additional staff for our ongoing growth initiatives. As our CCBX activities grow and we invest more in technology, we expect some continued growth in number of employees to support these lines of business but are also working to automate our processes to reduce and/or slow future growth in hiring.

Data Processing and Software Licenses. Data processing and software licenses include expenses related to obtaining and maintaining software required for our various functions and additional investments in software development and the amortization of those costs. Capitalized software totaled \$16.8 million as of March 31, 2026, compared to \$15.7 million as of March 31, 2025. Data processing costs include all of our customer transaction processing and data storage, computer processing, and network costs. Data processing costs grow as we grow and add new products, customers and branches and enhance technology. Additionally, CCBX data processing expenses and software that aids in the reporting of CCBX activities and monitoring of transactions that helps to automate and create other efficiencies in reporting have resulted in increased expenses in the category. These expenses are expected to increase as we invest more in automated processing and as we grow product lines and our CCBX segment. Amortization of capitalized software totaled \$1.3 million for the three months ended March 31, 2026, compared to \$1.2 million for the three months ended March 31, 2025. Data processing costs were \$7.6 million for the three months ended March 31, 2026, compared to \$4.2 million for the three months ended March 31, 2025, an increase of \$3.4 million, or 80.6%.

Legal and Professional Expenses. Legal and professional costs include legal, audit and accounting expenses, consulting fees, and fees for recruiting and hiring employees. These expenses fluctuate with the development of contracts and products for CCBX partners, audit and accounting needs, and are impacted by our reporting cycle and timing of legal and professional services. The expenses also reflect the costs associated with our infrastructure enhancement projects to improve our processing, automate processes, reduce compliance costs and enhance our data management. Legal and

professional expenses were \$7.0 million for the three months ended March 31, 2026 compared to \$6.5 million for the three months ended March 31, 2025, an increase of \$514,000, or 7.9%.

Excise Taxes. Excise taxes are assessed on Washington state income and are based on gross income. Gross income is reduced by certain allowed deductions and income attributed to other states is also removed to arrive at the taxable base. Excise taxes increased primarily as a result of increased income subject to excise taxes. CCBX income is sourced to the state where the partner does business, and the majority of partners are located outside the state of Washington.

Occupancy. Occupancy expenses were \$859,000 for the three months ended March 31, 2026, compared to \$1.0 million for the three months ended March 31, 2025, a decrease of \$175,000, or 16.9%. This category includes building, leasehold, furniture, fixtures and equipment depreciation totaling \$153,000 for the three months ended March 31, 2026 and \$350,000 for the three months ended March 31, 2025. Occupancy expenses include rent, utilities, janitorial and other maintenance expenses, property insurances and taxes. Also included is depreciation on building, leasehold, furniture, fixtures and equipment. Our hybrid and remote workforce has increased, which helps keep some occupancy expenses down, however we do expect occupancy expenses to increase as we continue to grow.

Director and Staff Expenses. Director and staff expenses includes compensation for director service, continuing education for employees and other director and staff related expenses. Expenses will fluctuate depending upon conferences and other professional events that are attended by employees as well as expenses related to employee travel and continuing education. Director and staff expenses were \$668,000 for the three months ended March 31, 2026 compared to \$631,000 for the three months ended March 31, 2025, an increase of \$37,000, or 5.9%.

Marketing. Marketing and promotion costs were \$38,000 for the three months ended March 31, 2026, compared to \$50,000 for the three months ended March 31, 2025, a decrease of \$12,000, or 24.0%. Marketing and promotion costs will vary depending upon the deployment of branding and targeted advertising for the community bank and CCBX. We expect costs to increase as we expand our marketing plan.

Other. This category includes dues and memberships, office supplies, mail services, telephone, examination fees, internal loan expenses, services charges from banks, operational losses, directors and officer's insurance, donations, and other expenses.

BaaS loan and fraud expense. Our CCBX segment provides BaaS offerings that enable digital financial service providers, companies and brands to provide financial services to their customers through the Bank's CCBX segment. Included in BaaS loan and fraud expense is partner loan expense including overdraft balances and BaaS fraud expense. Partner loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. BaaS fraud expense represents noncredit fraud losses on loans and deposits originated through partners. Fraud losses are recorded when incurred or projected as losses in noninterest expense, and the reimbursement from the CCBX partner is recorded in noninterest income, resulting in a net impact of zero to the income statement. For more information on the accounting for BaaS loan and fraud expenses see the section titled "CCBX – BaaS Reporting Information."

The following table presents, for the periods indicated, the BaaS loan and fraud expenses:

	Three Months Ended	
	March 31, 2026	March 31, 2025
(dollars in thousands; unaudited)		
BaaS loan expense	\$ 36,940	\$ 32,507
BaaS fraud expense	3,059	1,993
Total BaaS loan and fraud expense	\$ 39,999	\$ 34,500

Income Tax Expense

The amount of income tax expense we incur is impacted by the amounts of our pre-tax income, tax-exempt income and other nondeductible expenses. Deferred tax assets and liabilities are reflected at current income tax rates in effect for the period in which the deferred tax assets and liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. Valuation allowances are established when necessary to reduce our deferred tax assets to the amount expected to be realized. The Company is subject

to various state taxes that are assessed as CCBX activities and employees expand into new states, which increases the overall tax rate used in calculating the provision for income taxes in the current and future periods.

On July 4, 2025, H.R. 1, the "One Big Beautiful Bill Act, (the "OBBBA") was signed into law. The OBBBA includes several changes to federal tax law that generally allow for more favorable deductibility of certain business expenses beginning in 2025, including the restoration of immediate expensing of domestic R&D expenditures, reinstatement of 100% bonus depreciation, and more favorable rules for determining the limitation on business interest expense. The OBBBA also made certain changes to the deductibility of the cost of meals and charitable contributions that are effective for tax years beginning after December 31, 2025. The Company is taking advantage of the immediate deductibility of R&D expenditures, which has positively impacted the tax provision and resulted in a deferred tax liability.

Comparison of the quarter ended March 31, 2026 to the comparable quarter in the prior year

For the three months ended March 31, 2026, income tax expense totaled \$2.6 million, an increase of \$526,000 compared to the three months ended March 31, 2025. The \$526,000 increase in income tax expense is the result of higher net income as well as an increase in state income tax rates. Also impacting income tax expense is the deductibility of certain equity awards. The effective tax rate was 17.6% for the three months ended March 31, 2026, compared to 17.3% for the three months ended March 31, 2025. The effective tax rate was higher for the three months ended March 31, 2026, due to the impact of stock equity award deductions which fluctuate based on employee driven equity award activity, vesting terms and stock price. Additionally, the state rate increased in the quarter ended June 30, 2025 primarily as a result of a change in California's tax laws.

Segment Information

Based on the criteria of ASC 280, Segment Reporting, we have identified three segments: the community bank, CCBX and treasury & administration. The primary focus of the community bank is on providing a wide range of banking products and services to consumers and small to medium sized businesses in the broader Puget Sound region in the state of Washington and through the Internet and our mobile banking application. We currently operate 14 full-service banking locations, 12 of which are located in Snohomish County, where we are the largest community bank by deposit market share, and two of which are located in neighboring counties (one in King County and one in Island County). We also have a loan production office which is located in King county. The CCBX segment provides BaaS that enables digital financial service providers, companies and brands to provide financial services to their customers. The CCBX segment has 30 partners in various stages as of March 31, 2026. The treasury & administration segment includes treasury management, overall administration and all other aspects of the Company.

The Company's reported segments and the financial information of the reported segments are not necessarily comparable with similar information reported by other financial institutions. Additionally, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. Changes in management structure or allocation methodologies and procedures may result in future changes to previously reported segment financial data. The Company continues to evaluate its methodology on allocating items to the Company's various segments to support strategic business decisions by the Company's executive leadership. The difference in total loans receivable and total deposits in the community bank and CCBX segments is recorded on the balance sheet of each segment as an intrabank asset or intrabank liability, with the treasury & administration segment as the offset to those entries. Income and expenses that are specific to a segment are directly posted to each segment. Additionally, certain indirect expenses are allocated to each segment utilizing various metrics, such as number of employees, utilization of space, and allocations based on loan and deposit balances. We have implemented a transfer pricing process that credits or charges the community bank and CCBX segments with intrabank interest income or expense for the difference in average loans and average deposits, with the treasury & administration segment as the offset for those entries. The accounting policies of the segments are the same as those described in "Note 1 – Description of Business and Summary of Significant Accounting Policies" in the accompanying notes to the consolidated financial statements included in the Company's most recently filed 10-K report.

The following table presents summary financial information for each segment for the periods indicated:

(dollars in thousands; unaudited)	March 31, 2026				December 31, 2025			
	Community Bank	CCBX	Treasury & Administration	Consolidated	Community Bank	CCBX	Treasury & Administration	Consolidated

All other liabilities	4,839	45,839	20,151	70,829	5,225	39,116	13,902	58,243
Total liabilities	\$ 1,991,059	\$ 3,514,061	\$ (345,053)	\$ 5,160,067	\$ 1,957,800	\$ 2,596,956	\$ (304,278)	\$ 4,250,478

Community Bank

Community bank total assets as of March 31, 2026 increased \$33.3 million, or 1.7%, to \$1.99 billion, compared to \$1.96 billion as of December 31, 2025. Loans receivable net of deferred fees for the community bank segment increased \$33.3 million, or 1.7%, to \$1.98 billion as of March 31, 2026, compared to \$1.94 billion as of December 31, 2025. The increase in community bank loans receivable is the result of loan growth and normal balance fluctuations. Total community bank deposits decreased \$13.4 million, or 0.85%, as of March 31, 2026, compared to \$1.59 billion as of December 31, 2025. Our cost of deposits for the community bank was 1.46% for the three months ended March 31, 2026.

CCBX

CCBX total assets as of March 31, 2026 increased \$917.1 million, or 35.3%, to \$3.51 billion, compared to \$2.60 billion as of December 31, 2025. During the three months ended March 31, 2026, \$3.33 billion in CCBX loans were transferred to loans held for sale, with \$3.28 billion in loans sold and \$124.0 million loans remaining in loans held for sale as of March 31, 2026, compared to \$71.2 million at December 31, 2025. We continue to reposition ourselves by managing CCBX credit and concentration levels in an effort to optimize our loan portfolio earnings and generate off balance sheet fee income. We retain a portion of the fee income for our role in processing transactions on sold credit card balances. This is expected to provide an on-going and recurring revenue stream without the additional on balance sheet risk. Total CCBX loans receivable increased \$76.6 million, or 4.2%, to \$1.88 billion as of March 31, 2026, compared to \$1.81 billion as of December 31, 2025. The increase in loans receivable is the result of increased activity with CCBX partners, net of \$3.28 billion in loan sales. As a result of an increase in the difference of average deposits compared to average loans the intrabank asset increased \$784.3 million to \$1.42 billion as of March 31, 2026, compared to \$633.6 million as of December 31, 2025. The increase is attributed to an increase in deposits as a result of onboarding a new partner for which we provide correspondent services. Management expects balances associated with this relationship to decline during the second quarter of 2026 and then normalize. The allowance for credit losses increased to \$154.3 million as of March 31, 2026, compared to \$151.3 million as of December 31, 2025. The increase in the allowance is due to loan growth; however, an improvement in the performance of the CCBX portfolio and our focus on originating higher quality CCBX loans helped moderate the level of increase. CCBX partner agreements provide for credit enhancements that cover \$48.6 million, or 97.9%, of the charge-offs on CCBX loans for the three months ended March 31, 2026. CCBX partners bear most of the responsibility for credit losses incurred which consequently gives them a vested interest in the performance of the portfolio. We believe that this alignment of interests ensures that CCBX partners are motivated to implement robust risk management practices and maintain the overall health of the portfolio. Total CCBX deposits increased \$910.4 million, or 35.6%, to \$3.47 billion, compared to \$2.56 billion as of December 31, 2025, primarily as a result of growth within the CCBX relationships and the addition of new partners. Total CCBX deposits exclude an additional \$2.81 billion that were swept off balance sheet to provide for increased FDIC insurance coverage to certain customers, compared to \$843.6 million as of December 31, 2025.

Treasury & Administration

Treasury & administration total assets as of March 31, 2026 decreased \$28.0 million, or 15.0%, to \$158.7 million, compared to \$186.7 million as of December 31, 2025, primarily due to a decrease in the intrabank asset, partially offset by an increase in cash and due from banks. Total securities decreased \$2.1 million, or 4.3%, to \$46.2 million as of March 31, 2026, compared to \$48.2 million as of December 31, 2025, primarily as a result of principal repayments on securities. Total borrowings were \$48.1 million as of both March 31, 2026 and December 31, 2025.

The following table presents summary financial information for each segment for the periods indicated:

(dollars in thousands; unaudited)	Three Months Ended March 31, 2026				Three Months Ended March 31, 2025			
	Community Bank	CCBX	Treasury & Administration	Consolidated	Community Bank	CCBX	Treasury & Administration	Consolidated

*Comparison of the quarter ended March 31, 2026 to the comparable quarter in the prior year***Community Bank**

Net interest income for the community bank was \$22.5 million for the quarter ended March 31, 2026, an increase of \$2.8 million, or 13.9%, compared to \$19.8 million for the quarter ended March 31, 2025. As a result of the community bank having higher average loans than deposits the community bank's intrabank expense allocation was \$3.6 million for the quarter ended March 31, 2026, compared to intrabank interest expense of \$3.9 million for the quarter ended March 31, 2025, which positively impacted net interest income for the current quarter. The decrease compared to the previous year period is due to a lower intrabank liability and lower interest rates. There was a provision recapture for credit losses on loans for the community bank of \$542,000 for the quarter ended March 31, 2026, compared to a provision of \$507,000 for the quarter ended March 31, 2025; the recapture in the current period was largely due to a change in the loan mix for the community bank. Net charge-offs to average loans for the community bank segment was 0.00% for the quarters ended March 31, 2026 and 2025. Noninterest income for the community bank was \$932,000, for the quarter ended March 31, 2026, a decrease of \$84,000, or 8.3%, compared to the quarter ended March 31, 2025. Noninterest expenses for the community bank increased \$1.0 million, or 9.9%, to \$11.4 million as of March 31, 2026, compared to \$10.4 million as of March 31, 2025. The increase in noninterest expense is largely due to higher legal and professional expenses and salaries and employee benefits which are related to the growth of Company and investments in risk management.

CCBX

Net interest income for CCBX was \$57.2 million for the quarter ended March 31, 2026, an increase of \$4.9 million, or 9.3%, compared to \$52.4 million for the quarter ended March 31, 2025. The increase in net interest income is primarily due to loan growth from active CCBX relationships. During the quarter ended March 31, 2026 we sold \$3.28 billion in CCBX loans as part of our strategy to optimize our CCBX portfolio and manage growth, credit quality, portfolio and partner limits. We are retaining a portion of the transaction processing fee income on sold credit card balances which provides an on-going and recurring income without balance sheet risk. As a result of CCBX having higher average deposits than loans the amount allocated to intrabank interest income for CCBX was \$8.2 million and \$6.1 million for the quarters ended March 31, 2026 and 2025, respectively. Provision for credit losses on loans was \$51.9 million for the quarter ended March 31, 2026, compared to \$55.3 million for the quarter ended March 31, 2025. The decrease in the provision is due to an improvement in the performance of the CCBX portfolio and our focus on originating higher quality CCBX loans resulting in lower historical loss factors. CCBX partner agreements provide for credit enhancements that cover \$48.6 million, or 97.9% of total gross charge-offs on CCBX loans for the quarter ended March 31, 2026. The \$52.6 million provision on CCBX loans includes \$51.6 million for partner loans with credit enhancement on them and \$918,000 on CCBX loans that the Company is responsible for. In accordance with the program agreement, the Company was responsible for credit losses on approximately 5% of a \$324.0 million loan portfolio, or \$22.0 million in partner loans at March 31, 2026. Noninterest income for CCBX was \$64.7 million for the quarter ended March 31, 2026, an increase of \$2.8 million, or 4.5%, compared to \$61.9 million for the quarter ended March 31, 2025, largely due to a decrease of \$2.9 million in BaaS credit enhancements to establish a credit enhancement asset for future credit losses due from our CCBX partners - which is directly related to the provision for credit losses, partially offset by a \$4.6 million increase in BaaS program income, which was the result of increased activity with our CCBX partners. Noninterest expenses for CCBX increased \$16.1 million, or 33.2%, to \$64.7 million as of March 31, 2026, compared to \$48.6 million as of March 31, 2025. The increase in noninterest expense is largely due to an increase in salaries and employee benefits, data processing and software licenses and legal and professional expenses, which are related to the growth of Company and investments in technology and risk management. BaaS loan expense increased \$4.4 million compared to the prior year period and is related to the increase in interest income on loans and recent program agreement and pricing changes that reflect a strategic shift toward enhanced partner economics and more sustainable, risk-adjusted returns over time. For more information on the accounting for BaaS income and expenses see the section titled "*CCBX – BaaS Reporting Information.*"

Treasury & Administration

Net interest income for treasury & administration was \$3.6 million for the quarter ended March 31, 2026, a decrease of \$315,000, or 8.0%, compared to \$3.9 million for the quarter ended March 31, 2025, primarily as a result of an increase in intrabank interest expense, partially offset by higher interest from interest earning deposits with other banks and to a lesser degree lower interest expense. Noninterest income was \$426,000 for the quarter ended March 31, 2026, compared to \$542,000 for the quarter ended March 31, 2025. Noninterest expense was \$7.3 million for the quarter ended March 31, 2026, and \$13.0 million for the quarter ended March 31, 2025, largely due to a decrease in salaries and employee benefits and legal and professional expenses as more of these expenses have been directly expensed to the other segments.

Financial Condition

Our total assets increased \$922.4 million, or 19.5%, to \$5.66 billion at March 31, 2026 from \$4.74 billion at December 31, 2025. The increase is primarily comprised of a \$109.8 million increase in loans receivable and a \$740.0 million increase in interest earning deposits with other banks.

Loans Held For Sale

During the three months ended March 31, 2026, \$3.33 billion in CCBX loans were transferred to loans held for sale, with \$3.28 billion in loans sold, \$2.63 billion of which is new activity on previously sold credit card receivables. As of March 31, 2026 there were \$124.0 million in loans held for sale and \$71.2 million as of December 31, 2025. We will continue to sell loans back to the originating partner as part of our strategy to optimize our CCBX portfolio, manage growth, credit quality, portfolio and partner limits. Additionally, we retain a portion of the fee income for our role in processing new transactions on previously sold credit card receivables, which continues to grow and is expected to provide increased and on-going revenue with no on balance sheet risk or capital requirement.

Loan Portfolio

Our primary source of income is derived through interest earned on loans. A substantial portion of our loan portfolio consists of commercial real estate loans and commercial and industrial loans in the Puget Sound region. Our consumer and other loans also represent a significant portion of our loan portfolio with the growth of our CCBX segment. Our loan portfolio represents the highest yielding component of our earning assets.

As of March 31, 2026, loans receivable totaled \$3.86 billion, an increase of \$109.8 million, or 2.9%, compared to December 31, 2025. Total loans receivable is net of \$7.1 million in net deferred origination fees. The increase includes gross CCBX loan growth of \$76.5 million, or 4.2%, and an increase in gross community bank loans of \$33.1 million, or 1.7%.

Loans as a percentage of deposits were 79.0% as of March 31, 2026, compared to 92.2% as of December 31, 2025. We remain focused on serving our communities and markets by growing loans and funding those loans with customer deposits.

The following table summarizes our loan portfolio by type of loan as of the dates indicated:

(dollars in thousands; unaudited)	As of March 31, 2026		As of December 31, 2025	
	Amount	Percent	Amount	Percent
Commercial and industrial loans:				
Capital call lines	\$ 176,384	4.6 %	\$ 210,480	5.6 %

Loans receivable	<u>\$ 1,884,124</u>		<u>\$ 1,807,552</u>	
Loan Yield - CCBX ⁽¹⁾⁽²⁾	15.01 %		14.89 %	

⁽¹⁾ CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. To determine net BaaS loan income earned from CCBX loan relationships, the Company takes BaaS loan interest income and deducts BaaS loan expense to arrive at net BaaS loan income which can be compared to interest income on the Company's community bank loans. Net BaaS loan income is a non-GAAP measure. See the reconciliation of non-GAAP measures set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures" for the impact of BaaS loan expense on CCBX yield.

⁽²⁾ Loan yield is annualized for the three months ended for each period presented and includes loans held for sale and nonaccrual loans.

Commercial and Industrial Loans. Commercial and industrial loans decreased \$20.3 million, or 4.5%, to \$433.8 million as of March 31, 2026, from \$454.1 million as of December 31, 2025. The decrease in commercial and industrial loans receivable over December 31, 2025 was largely due to a decrease of \$34.1 million in capital call lines, partially offset by a \$13.8 million increase in other commercial and industrial loans.

Commercial and industrial loans are underwritten after evaluating and understanding the borrower's ability to operate profitably and effectively. These loans are primarily made based on the borrower's ability to service the debt from income. Most commercial and industrial loans are secured by the assets being financed or other business assets, such as accounts receivable, inventory or equipment, and we generally obtain personal guarantees on these loans. Commercial and industrial

loans includes \$102.0 million and \$92.0 million in loans to financial institutions as of March 31, 2026 and December 31, 2025, respectively.

Included in the commercial and industrial loan balance is \$176.4 million and \$210.5 million in capital call lines resulting from relationships with our CCBX partners as of March 31, 2026 and December 31, 2025, respectively, and \$21.8 million and \$19.2 million in CCBX other commercial loans as of March 31, 2026 and December 31, 2025, respectively. As of March 31, 2026 there was \$235.6 million in community bank commercial and industrial loans compared to \$224.4 million at December 31, 2025.

Construction, Land and Land Development Loans. Construction, land and land development loans increased \$12.8 million, or 5.8%, to \$234.9 million as of March 31, 2026, from \$222.1 million as of December 31, 2025. The increase is attributed to some new construction and development projects.

Unfunded loan commitments for construction, land and land development loans were \$90.0 million at March 31, 2026, compared to \$98.2 million at December 31, 2025. Although we have seen a strong commercial and residential real estate market in the Puget Sound region thus far in 2026, the macro economic environment is continuously changing, primarily due to the pace of economic growth, inflation, changing interest rates, global trade tensions, tariffs, unemployment, global unrest, the war in Ukraine, conflicts in the Middle East, political uncertainty, natural disasters, and trade issues that have resulted in economic uncertainty.

Construction, land and land development loans are comprised of loans to fund construction, land acquisition and land development construction. The properties securing these loans are primarily located in the Puget Sound region and are comprised of both residential and commercial properties, including owner occupied properties and investor properties. As of March 31, 2026, construction, land and land development loans included \$138.2 million in commercial construction loans, \$34.2 million in residential construction loans, \$41.8 million in other construction, land and land development loans and \$20.6 million in undeveloped land loans, compared to \$124.9 million in commercial construction loans, \$37.4 million in residential construction loans, \$20.7 million in undeveloped land loans, and \$39.1 million in other construction, land and land development loans as of December 31, 2025.

Residential Real Estate Loans. Our one-to-four family residential real estate loans decreased \$1.1 million, or 0.2%, to \$465.2 million as of March 31, 2026, from \$466.4 million as of December 31, 2025, due to a decrease of \$3.1 million in community bank loans, partially offset by an increase of \$2.0 million in CCBX loans.

As of March 31, 2026, there were \$266.0 million in CCBX home equity loans included in residential real estate, compared to \$264.1 million at December 31, 2025. These home equity lines of credit are secured by residential real estate and are accessed by using a credit card. These are first, second and third lien residential loans and require 18 months of home ownership for non-owner occupied. Term lengths are up to 30 years and lines range from \$5,000 to \$400,000. We sold \$249.4 million in CCBX residential real estate loans year to date as of March 31, 2026.

In the past, we have purchased residential mortgages originated through other financial institutions to hold for investment for purposes of diversifying our residential mortgage loan portfolio, meeting certain regulatory requirements and increasing our interest income. We last purchased residential mortgage loans in 2018. As of March 31, 2026 and December 31, 2025, we held \$4.4 million and \$4.4 million, respectively in purchased residential real estate mortgage loans. These loans purchased typically have a fixed rate with a term of 15 to 30 years and are collateralized by one-to-four family residential real estate. We have a defined set of credit guidelines that we use when evaluating these loans. Although purchased loans were originated and underwritten by another institution, our mortgage, credit, and compliance departments conducted an independent review of each underlying loan that includes re-underwriting each of these loans to our credit and compliance standards.

Like our commercial real estate loans, our residential real estate loans are secured by real estate, the value of which may fluctuate significantly over a short period of time primarily as a result of market conditions in the area in which the real estate is located. Adverse developments affecting real estate values in our market areas could therefore increase the credit risk associated with these loans, impair the value of property pledged as collateral on loans, and affect our ability to sell the collateral upon foreclosure without a loss or additional losses.

Commercial Real Estate Loans. Commercial real estate loans increased \$14.7 million, or 1.1%, to \$1.30 billion as of March 31, 2026, from \$1.29 billion as of December 31, 2025.

We are committed to growing the community bank portfolio in the Puget Sound region. We actively seek commercial real estate loans in our markets and our lenders are experienced in competing for these loans and managing these relationships.

We make commercial mortgage loans collateralized by owner-occupied and non-owner-occupied real estate, as well as multi-family residential loans. The real estate securing our existing commercial real estate loans includes a wide variety of property types, such as manufacturing and processing facilities, business parks, warehouses, retail centers, convenience stores, hotels and motels, low rise office buildings, mixed-use residential and commercial, and other properties. We originate both fixed- and adjustable-rate loans with terms up to 20 years. Fixed-rate loans typically amortize over a 10 to 25 year period with balloon payments due at the end of five to ten years. Adjustable-rate loans are generally based on the prime rate and adjust with the prime rate or are based on term equivalent FHLB rates. At March 31, 2026, approximately 33.3% of the commercial real estate loan portfolio consisted of fixed rate loans. Commercial real estate loans represented 33.6% of our loan portfolio at March 31, 2026 and are a large source of revenue. As of March 31, 2026, we held \$15.4 million in purchased commercial real estate loans, compared to \$15.5 million at December 31, 2025. Our credit administration team has substantial experience in underwriting, managing, monitoring and working out commercial real estate loans, and remains diligent in communicating and proactively working with borrowers to help mitigate potential credit deterioration.

Consumer and Other. Consumer and other loans increased \$103.6 million, or 7.8%, to \$1.43 billion, from \$1.33 billion as of December 31, 2025, primarily as a result of growth in CCBX loans originated through our partners. We sold \$2.60 billion in CCBX credit cards loans and \$96.7 million in CCBX consumer and other loans year to date as of March 31, 2026. We expect that we will continue to sell CCBX loans as part of our on-going strategy to manage the loan portfolio and credit quality.

CCBX consumer loans totaled \$1.42 billion as of March 31, 2026, compared to \$1.31 billion at December 31, 2025. CCBX consumer loans include installment loans, credit cards, lines of credit and other loans. CCBX consumer loans include cash secured and unsecured consumer loans, loan products designed to help consumers build credit, lines of credit, credit cards, other loans and overdrafts. Consumer credit cards are open-ended and have interest rates ranging from a promotional rate of 0.00% to the maximum rate allowable by state. For short-term consumer loans, both secured and unsecured options are available and typically have fully-amortizing terms ranging from two months to six years. Interest rates can be fixed or variable up to the maximum allowable rate by state.

Our community bank consumer and other loans totaled \$11.6 million as of March 31, 2026, compared to \$14.1 million at December 31, 2025 and are comprised of personal lines of credit, automobile, boat, and recreational vehicle loans, and secured term loans.

Industry Exposure and Categories of Loans

We have a diversified loan portfolio, representing a wide variety of industries. Our major categories of loans are commercial real estate, consumer and other loans, residential real estate, commercial and industrial, and construction, land and land development loans. Together they represent \$3.87 billion in outstanding loan balances. When combined with \$2.59 billion in unused commitments the total of these categories is \$6.45 billion. However, total exposure on CCBX loans is subject to portfolio and partner maximum limits. See "Material Cash Requirements and Capital Resources" for maximum limits on CCBX loans by category.

The following table summarizes our community bank loan commitments by industry for our commercial real estate portfolio as of March 31, 2026:

(dollars in thousands; unaudited)	Outstanding Balance	Available Loan Commitments	Total Outstanding Balance & Available Commitments	% of Total Loans (Outstanding Balance & Available Commitments)	Average Loan Balance	Number of Loans
Community bank commercial real estate loans						
Apartments	\$ 357,711	\$ 13,442	\$ 371,153	5.7 %	\$ 3,726	96
Hotel/Motel	178,339	862	179,201	2.8	7,134	25
Convenience Store	143,092	3,345	146,437	2.3	2,236	64
Warehouse	100,075	250	100,325	1.5	1,853	54
Retail	97,447	427	97,874	1.5	1,071	91

Nonperforming Assets

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on nonaccrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by applicable regulations. Loans may be placed on nonaccrual status regardless of whether or not such loans are considered past due. In general, we place loans on nonaccrual status when they become 90 days past due. We also place loans on nonaccrual status if they are less than 90 days past due if the collection of principal or interest is in doubt. Consumer loans originated through CCBX lending partners may continue to accrue interest beyond 90 days past due. Installment (closed-end) loans generally continue to accrue until 120 days past due while revolving (open-end) loans generally continue to accrue until 180 days past due. These consumer loans are reported out as substandard loans, 90+ days past due and still accruing. As a result of the type of loans (primarily consumer loans) originated through our CCBX partners, we anticipate that balances 90 days past due or more and still accruing will increase as those loans grow. Additionally, some CCBX partners have instituted a collection practice that places certain loans on nonaccrual status to improve collectability. As of March 31, 2026, \$22.3 million in CCBX nonaccrual loans were less than 90 days past due.

When loans are placed on nonaccrual status, all unpaid accrued interest is reversed from income and all interest accruals are stopped. Interest income is subsequently recognized only to the extent cash payments are received in excess of principal balance. Loans are returned to accrual status if we believe that all remaining principal and interest is fully collectible and there has been at least six months of sustained repayment performance since the loan was placed on nonaccrual status. We define nonperforming loans as loans on nonaccrual status and accruing loans 90 days or more past due. Nonperforming assets also include other real estate owned and repossessed assets.

We believe our lending practices and active approach to managing nonperforming assets has resulted in sound asset quality and timely resolution of problem assets. We have procedures in place to assist us in maintaining the overall credit quality of our loan portfolio. We have established underwriting guidelines, concentration limits and we also monitor our delinquency levels for any negative or adverse trends. We actively manage problem assets to reduce our risk for loss.

We had \$67.6 million in nonperforming assets as of March 31, 2026, compared to \$64.1 million as of December 31, 2025. This includes \$35.2 million in CCBX loans more than 90 days past due and still accruing interest as of March 31, 2026, compared to \$33.1 million at December 31, 2025. All of our nonperforming assets were nonperforming loans as of March 31, 2026 and December 31, 2025. Our accruing loans past due 90 days or more increased \$2.1 million and our CCBX nonaccrual loans increased \$3.2 million primarily as a result of a collection practice employed by certain CCBX partners that places specific loans on nonaccrual status to enhance collectability, \$22.3 million of these loans are less than 90 days past due as of March 31, 2026. Additionally, there was a decrease in community bank nonaccrual loans of \$1.7

million during the three months ended March 31, 2026. Our nonperforming loans to loans receivable ratio was 1.75% at March 31, 2026, compared to 1.71% at December 31, 2025.

Our community bank credit quality remains strong, as demonstrated by the low level of community bank nonperforming loans to total loans receivable of 0.13% as of March 31, 2026. CCBX loans have a higher level of expected losses than our community bank loans, which is reflected in the factors for the allowance for credit losses. Agreements with our CCBX partners provide for a credit enhancement which protects the Bank by indemnifying or reimbursing incurred losses, when accruing consumer loans originated through CCBX partners are charged-off at 120 days past due for installment loans (primarily unsecured loans to consumers) and 180 days past due for revolving loans (primarily credit cards). CCBX partners bear most of the responsibility for credit losses incurred which consequently gives them a vested interest in the performance of the portfolio. We believe this alignment of interests ensures that CCBX partners are motivated to implement robust risk management practices and maintain the overall health of the portfolio.

The following table presents information regarding nonperforming assets at the dates indicated:

(dollars in thousands; unaudited)	March 31, 2026	December 31, 2025
Nonaccrual loans:		
Commercial and industrial loans	\$ 251	\$ 2,278

As of March 31, 2026, \$60.9 million of the \$62.8 million in nonperforming CCBX loans were covered by CCBX partner credit enhancements. Agreements with our CCBX partners provide for a credit enhancement which protects the Bank by

indemnifying or reimbursing incurred losses. Under the agreement, the CCBX partner will indemnify or reimburse the Bank for its loss/charge-off on these loans.

Allowance for credit losses

The ACL is an estimate of the expected credit losses on financial assets measured at amortized cost. The ACL is evaluated and calculated on a collective basis for those loans which share similar risk characteristics. At each reporting period, the Company evaluates whether the loans in a pool continue to exhibit similar risk characteristics as the other loans in the pool and whether it needs to evaluate the allowance on an individual basis. The Bank must estimate expected credit losses over the loans' contractual terms, adjusted for expected prepayments. In estimating the life of the loan, the Bank cannot extend the contractual term of the loan for expected extensions, renewals, and modifications, unless the extension or renewal options are included in the contract at the reporting date and are not unconditionally cancellable by the Bank. Because expected credit losses are estimated over the contractual life adjusted for estimated prepayments, determination of the life of the loan may significantly affect the ACL. The Company has chosen to segment its portfolio consistent with the manner in which it manages the risk of the type of credit.

- Community Bank Portfolio: The ACL calculation is derived for loan segments utilizing loan level information and relevant information from internal and external sources related to past events and current conditions. In addition, the Company incorporates a reasonable and supportable forecast.
- CCBX Portfolio: The Bank calculates the ACL on loans on an aggregate basis based on each partner and product level, segmenting the risk inherent in the CCBX portfolio based on qualitative and quantitative trends in the portfolio.

Also included in the ACL are qualitative reserves to cover losses that are expected, but in the Company's assessment may not be adequately represented in the quantitative method. For example, factors that the Company considers include environmental business conditions, borrower's financial condition, credit rating and the volume and severity of past due loans and nonaccrual loans. Based on this analysis, the Company records a provision for credit losses to maintain the allowance at appropriate levels.

As of March 31, 2026, the allowance for credit losses totaled \$172.4 million, or 4.47% of total loans. As of December 31, 2025, the allowance for credit losses totaled \$169.5 million, or 4.52% of total loans.

The increase in the Company's allowance for credit losses for the three months ended March 31, 2026 compared to December 31, 2025, is largely related to loan growth, however improved performance in the CCBX portfolio helped moderate the level of increase. During the three months ended March 31, 2026, a \$51.9 million provision for credit losses on loans was recorded for CCBX partner loans. In general, CCBX loans have a higher level of expected losses than our community bank loans, which is reflected in the factors for the allowance for credit losses. The factors used in management's analysis for community bank credit losses indicated that a provision recapture for credit losses on loans of \$542,000 was needed for the three months ended March 31, 2026, largely due to a change in the mix of community bank loans. The macro economic environment is continuously changing, primarily due to the pace of economic growth, inflation, changing interest rates, global trade tensions, tariffs, unemployment, global unrest, the war in Ukraine, conflicts in the Middle East, political uncertainty, natural disasters, and trade issues that have resulted in economic uncertainty. As described above, CCBX loans have a higher level of expected losses than our community bank loans, which is reflected in the factors for the allowance for credit losses.

Agreements with our CCBX partners provide for a credit enhancement provided by the partner which protects the Bank by indemnifying or reimbursing incurred losses. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans, unfunded commitments and negative deposit accounts. When the provision for credit losses - loans and provision for unfunded commitments is recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements) in recognition of the CCBX partner legal commitment to indemnify or reimburse losses. The credit enhancement asset is relieved as credit enhancement payments and recoveries are received from the CCBX partner or taken from the partner's cash reserve account. Agreements with our CCBX partners also provide protection to the Bank from fraud by indemnifying or reimbursing incurred fraud losses. BaaS fraud includes noncredit fraud losses on loans and deposits originated through partners. Fraud losses are recorded when incurred as losses in noninterest expense, and the enhancement received from the CCBX partner is recorded in noninterest income, resulting in a net impact of zero to the income statement.

The credit enhancement asset is an amount due from CCBX partners related to losses in the loan portfolio. It is determined by the provision for credit and other losses, such as fraud, and increases due to credit loss recoveries, which is ultimately reduced as partners reimburse for incurred losses. Identified below is the portion of incurred losses that are pending settlement with partners as of each period indicated. The CCBX provision for credit losses and CCBX net charge-offs include partner accounts that are not covered by credit enhancement, therefore those items are included on a separate line item to reflect the exclusion from the credit enhancement asset. At March 31, 2026 the Company was responsible for credit losses on approximately 5% of a \$324.0 million CCBX loan portfolio and represented \$22.0 million in loans. The table below shows the activity in the credit enhancement asset for the periods indicated:

(dollars in thousands)	As of or for the Three Months Ended March 31,	
	2026	2025
Credit enhancement at beginning of period	177,657	181,890
CCBX Provision for credit losses - loans	52,563	54,319
CCBX Provision for credit losses - unfunded commitments	(886)	171
Credit losses settled with partner during period	(54,521)	(53,682)
Credit recoveries settled with partner during period	4,933	5,479
Net change in pending partner settlements	1,063	(5,034)
Net (provision) charge-offs without credit enhancement	(222)	234
Credit enhancement at end of period	180,587	183,377

Many CCBX partners also pledge a cash reserve account at the Bank as collateral for loss exposure which the Bank can collect from when losses occur that is then replenished by the partner on a regular interval. Credit losses and recoveries typically flow through the cash reserve account. These cash reserve accounts are included in total deposits on the balance sheet. Although agreements with our CCBX partners provide for credit enhancements that provide protection to the Bank from credit and fraud losses by indemnifying or reimbursing incurred credit and fraud losses, if our partner is unable to fulfill their contracted obligation then the Bank would be exposed to additional loan and deposit losses if the cash flows on the loans were not sufficient to fund the reimbursement of loan losses, as a result of this counterparty risk. If a CCBX partner does not replenish their cash reserve account the Bank may consider an alternative plan for funding the cash reserve, such as adjusting the funding amounts or timelines to better align with the partner's specific situation. If a mutually agreeable funding plan is not achieved then the Bank could declare the agreement in default, take over servicing and cease paying the partner for servicing the loan and providing credit enhancements. In the event of a partner default, the Bank would evaluate any remaining credit enhancement asset associated with that partner to determine whether a write-off is appropriate. If a write-off occurs, the Bank would retain the full yield and any fee income on the loan portfolio going forward, and our BaaS loan expense would decrease once default occurs and payments to the CCBX partner are stopped.

The following table presents, as of and for the periods indicated, net charge-off information by segment:

(dollars in thousands; unaudited)	Three Months Ended					
	March 31, 2026			March 31, 2025		
	Community Bank	CCBX	Total	Community Bank	CCBX	Total

⁽¹⁾ Annualized calculations shown for periods presented.

The following table presents, as of and for the periods indicated, an analysis of the allowance for credit losses and other related data:

(dollars in thousands; unaudited)	As of or for the Three Months Ended March 31,	
	2026	2025
Allowance at beginning of period	\$ 169,530	\$ 176,994
Provision for credit losses	52,484	54,384
Charge-offs:		
Commercial and industrial loans	1,146	1,907
Residential real estate	705	1,605
Consumer and other	52,672	50,174
Total charge-offs	54,523	53,686
Recoveries:		
Commercial and industrial loans	162	356
Residential real estate	12	2
Commercial real estate	—	4
Consumer and other	4,762	5,124
Total recoveries	4,936	5,486
Net charge-offs	49,587	48,200
Allowance at end of period	\$ 172,427	\$ 183,178
Allowance for credit losses to nonaccrual loans	531.84 %	899.74 %
Allowance to nonperforming loans	254.99 %	324.97 %
Allowance to loans receivable	4.47 %	5.21 %

The allowance for credit losses to nonaccrual loans ratio decreased as of March 31, 2026, compared to March 31, 2025, primarily as a result of an increase in nonaccrual loans of \$12.1 million, largely due to an increase in CCBX nonaccrual loans as a result of a collection practice that certain CCBX partners employ that places specific loans on nonaccrual status to enhance collectability, combined with a \$4.6 million increase in nonaccrual community bank loans.

The allowance for credit losses increased \$2.9 million as of March 31, 2026 compared to December 31, 2025 largely due to lower loss historical rates and a change in loan mix. Agreements with our CCBX partners provide for a credit enhancement which protects the Bank by indemnifying or reimbursing incurred losses. CCBX partners bear most of the responsibility for credit losses incurred which consequently gives them a vested interest in the performance of the portfolio. We believe that this alignment of interests ensures that CCBX partners are motivated to implement robust risk management practices and maintain the overall health of the portfolio. Net charge-offs on CCBX loans for the three months ended March 31, 2026 that were covered by credit enhancements were \$48.6 million. At March 31, 2026, the allowance for credit losses for CCBX partner loans totaled \$154.3 million, compared to \$151.3 million at December 31, 2025.

The following table presents the loans receivable and allowance for credit losses by segment for the periods indicated:

(dollars in thousands; unaudited)	As of March 31, 2026			As of December 31, 2025		
	Community Bank	CCBX	Total	Community Bank	CCBX	Total
Loans receivable	\$ 1,975,255	\$ 1,884,124	\$ 3,859,379	\$ 1,941,979	\$ 1,807,552	\$ 3,749,531
Allowance for credit losses	(18,153)	(154,274)	(172,427)	(18,231)	(151,299)	(169,530)
Allowance for credit losses to total loans receivable	0.92 %	8.19 %	4.47 %	0.94 %	8.37 %	4.52 %

Although we believe that we have established our allowance for credit losses in accordance with GAAP and that the allowance for credit losses was adequate to provide for expected losses in the portfolio at all times shown above, future provisions for credit losses will be subject to ongoing evaluations of the risks in our loan portfolio. We continue to have a

low level of community bank charge-offs and nonperforming loans, however, the macro economic environment is continuously changing, primarily due to the pace of economic growth, inflation, changing interest rates, global trade tensions, tariffs, unemployment, global unrest, the war in Ukraine, conflicts in the Middle East, political uncertainty, natural disasters, and trade issues that have resulted in economic uncertainty. If economic conditions worsen then Washington state and Puget Sound region may experience a more severe economic downturn, and our asset quality could deteriorate, which may require material additional provisions for credit losses.

The following table shows the allocation of the allowance for credit losses among loan categories and certain other information as of the dates indicated. The allocation of the allowance for credit losses as shown in the table should neither be interpreted as an indication of future charge-offs, nor as an indication that charge-offs in future periods will necessarily occur in these amounts or in the indicated proportions. The total allowance is available to absorb losses from any loan category.

	At			
	March 31, 2026		December 31, 2025	
(dollars in thousands)	Allowance Allocated to Loan Portfolio	Loan Category as a % of Total Loans	Allowance Allocated to Loan Portfolio	Loan Category as a % of Total Loans

Securities

We use our securities portfolio primarily as a source of liquidity and collateral that can be readily sold or pledged for public deposits, for CRA purposes or other business purposes. At March 31, 2026, our securities portfolio was invested in U.S. Agency collateralized mortgage obligations and U.S. Agency residential mortgage-backed securities for Community Reinvestment Act ("CRA") purposes. Because we target a loan-to-deposit ratio in the range of 90% to 100%, we prioritize liquidity over the earnings of our securities portfolio. At March 31, 2026, our loan-to-deposit ratio was 79.0%, due to the significant deposit growth during the quarter. Securities represented 0.8% of total assets as of March 31, 2026, compared to 1.0% at December 31, 2025. When our securities portfolio represents less than 5% of assets we focus on liquid securities. To the extent our securities represent more than 5% of assets, absent an immediate need for liquidity, we may invest excess funds to provide a higher return.

As of March 31, 2026, the amortized cost of our investment securities totaled \$46.2 million, a decrease of \$2.1 million, or 4.3%, compared to \$48.2 million as of December 31, 2025. The decrease in the securities portfolio was due to principal paydowns during the three months ended March 31, 2026.

Our investment portfolio consists of only \$28,000 in securities classified as available-for-sale ("AFS") and \$46.1 million in held-to-maturity securities for CRA purposes. The carrying values of our investment securities classified as AFS are adjusted for unrealized gain or loss, and any gain or loss is reported on an after-tax basis as a component of other comprehensive income in shareholders' equity. As of March 31, 2026 and December 31, 2025 our AFS portfolio had an unrealized loss of \$1,000.

The following table summarizes the amortized cost and estimated fair value of our investment securities as of the dates shown:

(dollars in thousands; unaudited)	As of March 31, 2026		As of December 31, 2025	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Securities available-for-sale:				
U.S. Agency collateralized mortgage obligations	\$ 29	\$ 28	\$ 30	\$ 29
Total available-for-sale securities	29	28	30	29
Securities held-to-maturity:				
U.S. Agency residential mortgage-backed securities	46,141	46,383	48,218	48,713
Total held-to-maturity securities	46,141	46,383	48,218	48,713
Total investment securities	\$ 46,170	\$ 46,411	\$ 48,248	\$ 48,742

We have the following equity investments which do not have a readily determinable fair value and are held at cost minus impairment if any, plus or minus observable price changes in orderly transactions for an identical or similar investment of the same issuer. This method will be applied until the investments do not qualify for the measurement election (e.g., if the investment has a readily determinable fair value). We will reassess at each reporting period whether the equity investments without a readily determinable fair value qualifies to be measured at cost minus impairment.

- The Company had a \$1.8 million and \$2.2 million equity interest in a specialized bank technology company as of the quarters ended March 31, 2026 and 2025, respectively.
- The Company had a \$350,000 equity interest in a technology company as of the quarters ended March 31, 2026 and 2025.
- The Company had a \$500,000 equity interest in financial technology company as of the quarter ended March 31, 2026. This was a new equity investment, so there was no equity interest at March 31, 2025.
- The Company had a \$42,000 and \$47,000 equity interest in a technology company as of the quarters ended March 31, 2026 and 2025, respectively.

The following table shows the activity in equity investments without a readily determinable fair value for the dates shown:

(dollars in thousands; unaudited)	For the Three Months Ended March 31,	
	2026	2025
Carrying value, beginning of period	\$ 2,171	\$ 2,619
Purchases	500	—
Observable price change	—	—
Carrying value, end of period	\$ 2,671	\$ 2,619

We invest in investment funds that are accelerating technology adoption by banks. These equity investments are held at fair value as reported by the funds. During the three months ended March 31, 2026, we had a net capital investment of \$90,000 with investment funds designed to help accelerate technology adoption at banks, and recognized net earnings of \$110,000, resulting in an equity interest of \$1.7 million at March 31, 2026. The Company has committed up to \$1.0 million in capital for these investment funds, however, the Company is not obligated to fund these commitments prior to a capital call.

The following table shows the activity in investment funds for the dates shown:

(dollars in thousands; unaudited)	For the Three Months Ended March 31,	
	2026	2025
Carrying value, beginning of period	\$ 1,500	\$ 910
Purchases/capital calls/capital returns, net	90	12
Net change recognized in earnings	110	17
Carrying value, end of period	\$ 1,700	\$ 939

Other Assets

Deferred tax assets, net was zero as we moved to a deferred tax liability, net during 2025 largely due to the impact of the OBBBA, which permits the immediate expense of R&D costs for tax purposes. Other assets decreased \$1.6 million to \$18.7 million as of March 31, 2026, compared to December 31, 2025.

Deposits

We offer a variety of deposit products that have a wide range of interest rates and terms, including demand, money market, savings, and time accounts as well as IntraFi network sweep deposits. Sweep deposits enable us to provide an FDIC insured deposit option to customers that have balances in excess of the FDIC insurance limit. This service trades our customers' funds as certificates of deposit or interest bearing demand deposits in increments under the FDIC insured amount to other participating financial institutions and in exchange we receive time deposit or interest bearing demand investments from participating financial institutions. We rely primarily on competitive pricing policies, convenient locations, electronic delivery channels (internet and mobile), and personalized service to attract new deposits and retain existing deposits. Sweep deposits allow us to sweep excess deposits off and on our balance and provide additional flexibility in managing our liquidity. Additionally, we offer deposit products through our CCBX segment. CCBX deposits are generally classified as interest bearing demand and money market accounts. CCBX deposit products allow us to offer a broader range of partner specific products, which include products designed to reach specific under-served or under-banked populations served by our CCBX partners.

Total deposits as of March 31, 2026 were \$5.04 billion, an increase of \$897.0 million, or 21.6%, compared to \$4.14 billion as of December 31, 2025. The increase in deposits was due to an increase of \$910.4 million in CCBX deposits largely driven largely by new CCBX partner growth. Management expects the newly added deposits to moderate and level out during the second quarter of 2026. Core deposits ended the quarter at \$5.03 billion compared to \$4.13 billion at December 31, 2025. We define core deposits as all deposits except time deposits and brokered deposits. Our cost of deposits was 1.46% for the community bank and 3.17% for CCBX for the three months ended March 31, 2026. Additionally, as of March 31, 2026 there was \$2.81 billion in CCBX deposits that were swept off balance sheet for increased FDIC insurance coverage and liquidity purposes. Amounts in excess of FDIC insurance coverage are swept off-balance sheet, using a third-party facilitator/vendor sweep product, to participating financial institutions. These swept deposits generated fee income of \$710,000 for the quarter ended March 31, 2026.

Included in total deposits is \$3.47 billion in CCBX deposits, an increase of \$910.4 million, or 35.6%, compared to \$2.56 billion as of December 31, 2025. CCBX customer deposit relationships include deposits with CCBX end customers, as well as partner operating and non-operating deposit accounts. The deposits from our CCBX segment are generally classified as interest bearing demand and money market accounts.

Total noninterest bearing deposits as of March 31, 2026 were \$579.2 million, a decrease of \$455,000, or 0.1%, compared to \$579.6 million as of December 31, 2025. Noninterest bearing deposits represent 11.5% and 14.0% of total deposits for March 31, 2026 and December 31, 2025, respectively. Community bank noninterest bearing deposits totaled \$501.3 million and \$493.0 million at March 31, 2026 and December 31, 2025, respectively.

Total interest bearing balances, excluding time deposits, as of March 31, 2026 were \$4.45 billion, an increase of \$897.5 million, or 25.3%, compared to \$3.55 billion as of December 31, 2025. The \$897.5 million increase is primarily due to an increase of \$910.4 million in CCBX deposits, partially offset by a decrease in community bank interest bearing deposits of \$21.6 million. The increase in CCBX deposits is largely due to new CCBX partner relationships. The newly added deposits are expected to moderate and level out during the second quarter of 2026. The decrease in community bank deposits is a

result of deposit growth and normal balance fluctuations. Included in total deposits is \$462.5 million in IntraFi network interest bearing demand and money market sweep accounts as of March 31, 2026, which provides our customers with fully insured deposits through a sweep and exchange of deposits with other financial institutions.

Total time deposit balances as of March 31, 2026 were \$12.2 million, a decrease of \$91,000, or 0.7%, from \$12.3 million as of December 31, 2025. The decrease is largely due to our focus on core deposits and letting higher rate time deposits run off as they mature. We have seen competitors increase rates on time deposits, and have not globally matched their rates in response as we focus on growing and retaining less costly core deposits.

The following table sets forth deposit balances at the dates indicated:

	As of March 31, 2026		As of December 31, 2025	
	Amount	Percent of Total Deposits	Amount	Percent of Total Deposits
(dollars in thousands; unaudited)				
Demand, noninterest bearing	\$ 579,161	11.5 %	\$ 579,616	14.0 %
Interest bearing demand and money market	4,128,511	81.9	3,450,679	83.2
Savings	321,295	6.4	101,616	2.5

⁽¹⁾ Cost of deposits is annualized for the three months ended for each period presented.

The following table sets forth the Company's time deposits of \$250,000 or more by time remaining until maturity as of the dates indicated:

(dollars in thousands; unaudited)	As of March 31, 2026	As of December 31, 2025
Maturity Period:		
Three months or less	\$ 854	\$ 1,240
Over three through six months	—	270
Over six through twelve months	2,235	1,568
Over twelve months	986	980
Total	\$ 4,075	\$ 4,058
Weighted average maturity of all time deposits (in years)	0.90	0.77

Average deposits for the three months ended March 31, 2026 were \$4.38 billion, an increase of 18.1%, compared to \$3.71 billion for the three months ended March 31, 2025. The increase in average deposits was primarily in interest bearing deposits. We expect deposits to increase with continued growth in our primary market areas, the increase in commercial lending relationships for which we also seek deposit balances and the results of business development efforts by branch managers, treasury service personnel and lenders.

The average rate paid on total deposits was 2.56% for the three months ended March 31, 2026, compared to 3.08% for the three months ended March 31, 2025. The average rate paid on interest bearing demand and money market accounts decreased 0.77% for the three months ended March 31, 2026, compared to the three months ended March 31, 2025. The average rate paid on other deposits decreased 3.38% for the three months ended March 31, 2026, compared to the three months ended March 31, 2025. The average rate paid on time deposits of less than \$250,000 decreased 0.24% for the three months ended March 31, 2026, compared to the three months ended March 31, 2025. The average rate paid on time deposits greater than \$250,000 decreased 0.65% for the three months ended March 31, 2026 compared to the three months ended March 31, 2025. The average rate paid on savings increased 2.30% for the three months ended March 31, 2026 compared to the three months ended March 31, 2025 as a result of an increase in CCBX savings deposit products. The overall lower average rate of 2.56% paid on interest bearing accounts in the three months ended March 31, 2026 compared to 3.08% for the three months ended March 31, 2025 is due to lower interest rates.

The following table presents the average balances and average rates paid on deposits for the periods indicated:

(dollars in thousands; unaudited)	For the Three Months Ended March 31,			
	2026		2025	
	Average Balance	Average Rate ⁽¹⁾	Average Balance	Average Rate ⁽¹⁾
Demand, noninterest bearing	\$ 585,211	0.00 %	\$ 543,784	0.00 %
Interest bearing demand and money market	3,530,000	2.98	2,627,738	3.75
Savings	256,117	2.65	71,353	0.35
Other deposits	1	0.00	451,008	3.38
Time deposits less than \$250,000	8,052	0.60	10,699	0.84
Time deposits \$250,000 and over	4,065	2.49	5,586	3.14
Total deposits	\$ 4,383,446	2.56 %	\$ 3,710,168	3.08 %

⁽¹⁾ Annualized calculations shown for periods presented.

The ratio of average noninterest bearing deposits to average total deposits for the three months ended March 31, 2026 was 13.4% compared to 14.7% three months ended March 31, 2025.

Uninsured Deposits

The FDIC insures our deposits up to \$250,000 per depositor, per insured bank for each account ownership category. Deposits that exceed insurance limits are uninsured. At March 31, 2026, deposits totaled \$5.04 billion, of which total estimated uninsured deposits were \$1.77 billion, or 35.1% of total deposits, compared to \$641.3 million, or 15.5% of total deposits as of December 31, 2025. The increase in uninsured deposits is largely due to the timing of new partner deposits participating in sweep and reciprocal deposit networks. Management expects uninsured deposits to return to more typical levels in the second quarter of 2026. The Bank is using reciprocal deposits to provide many of our customers with fully insured deposits through an exchange of deposits with other financial institutions.

Estimated uninsured time deposits totaled \$1.6 million as of March 31, 2026. The table below shows the estimated uninsured time deposits, by account, for the maturity periods indicated:

(dollars in thousands; unaudited)	As of March 31, 2026
Maturity Period:	
Three months or less	\$ 104
Over three through six months	—
Over six through twelve months	1,235
Over twelve months	236
Total	\$ 1,575

Borrowings

We have the ability to utilize short-term to long-term borrowings to supplement deposits to fund our lending and investment activities, each of which is discussed below.

Federal Reserve Bank Line of Credit. The Federal Reserve allows us to borrow against our line of credit through a borrower in custody agreement utilizing the discount window, which is collateralized by certain loans. As of March 31, 2026 and 2025, total borrowing capacity of \$417.0 million and \$475.5 million, respectively, was available under this arrangement. As of March 31, 2026 and 2025, Federal Reserve advances totaled zero.

Federal Home Loan Bank Advances. The FHLB allows us to borrow against our line of credit, which is collateralized by certain loans. As of March 31, 2026 and 2025, we had borrowing capacity of \$219.6 million and \$186.8 million, respectively, with the FHLB. As of March 31, 2026 and 2025, FHLB advances totaled zero.

Junior Subordinated Debentures. In 2004, we issued \$3.6 million in junior subordinated debentures to Coastal (WA) Statutory Trust I (the “Trust”), of which we own all of the outstanding common securities. The Trust used the proceeds from the issuance of its underlying common securities and preferred securities to purchase the debentures issued by the Company. These debentures are the Trust’s only assets and the interest payments from the debentures finance the distributions paid on the preferred securities. Prior to June 30, 2023, the debentures bore interest at a rate per annum equal to the three-month LIBOR plus 2.10%. Beginning with rate adjustments subsequent to June 30, 2023, the rate is based off three-month CME Term SOFR plus a spread adjustment of 0.26% and margin of 2.10%. The effective rate as of March 31, 2026 and December 31, 2025 was 6.04% and 6.08%, respectively. We generally have the right to defer payment of interest on the debentures at any time or from time to time for a period not exceeding five years provided that no extension period may extend beyond the stated maturity of the debentures. During any such extension period, distributions on the Trust’s preferred securities will also be deferred, and our ability to pay dividends on our common stock will be restricted. The Trust’s preferred securities are mandatorily redeemable upon maturity of the debentures, or upon earlier redemption as provided in the indenture, subject to Federal Reserve approval. If the debentures are redeemed prior to maturity, the redemption price will be the principal amount and any accrued but unpaid interest. We unconditionally guarantee payment of accrued and unpaid distributions required to be paid on the Trust securities subject to certain exceptions, the redemption price with respect to any Trust securities called for redemption and amounts due if the Trust is liquidated or terminated.

Subordinated Debt. In August 2021, the Company issued a subordinated note in the amount of \$25.0 million. The note matures on September 1, 2031, and bears interest at the rate of 3.375% per year for five years and, thereafter, reprices quarterly beginning September 1, 2026, at a rate equal to the three-month SOFR plus 2.76%. The five-year 3.375% interest period ends on September 1, 2026. We may redeem the subordinated note, in whole or in part, without premium or penalty, in principal redemption multiples of \$1,000, after August 18, 2026, subject to any required regulatory approvals. Proceeds were used to repay \$10.0 million in existing 5.65% interest subordinated debt on August 9, 2021 and \$11.5 million was contributed to the Bank as capital during the quarter ended September 30, 2021.

In November 2022, the Company issued subordinated notes in the aggregate amount of \$20.0 million. The notes mature on November 1, 2032, and bear interest at the rate of 7.00% per year for five years and, thereafter, reprices quarterly beginning November 1, 2027, at a rate equal to the three-month SOFR plus 2.9%. The five-year 7.00% interest period ends on November 1, 2027. We may redeem the subordinated notes, in whole or in part, without premium or penalty, in principal redemption multiples of \$1,000, after November 1, 2027, subject to any required regulatory approvals.

Other Liabilities

Deferred tax liability, net increased to \$803,000 as of March 31, 2026, largely due to the impact of the OBBBA, which permits the immediate expense of R&D costs for tax purposes.

Liquidity and Capital Resources

Liquidity Management

Liquidity refers to our capacity to meet our cash obligations at a reasonable cost. Our cash obligations require us to have cash flow that is adequate to fund loan growth and maintain on-balance sheet liquidity while meeting present and future obligations of deposit withdrawals, borrowing maturities and other contractual cash obligations. In managing our cash flows, management regularly confronts situations that can give rise to increased liquidity risk. These include funding mismatches, market constraints in accessing sources of funds and the ability to convert assets into cash. Changes in economic conditions or exposure to credit, market, and operational, legal and reputational risks also could affect the Bank's liquidity risk profile and are considered in the assessment of liquidity management. Deposits obtained through our CCBX segment are a significant source of liquidity for us. If a relationship with a large CCBX partner terminates, the exit of those deposits could have an adverse impact on liquidity. Partner program agreements govern the relationship and are valid for a given period of time. Prior to exiting, the partner would need to provide us adequate notice as stipulated in the agreement that they were not going to renew the program agreement and intend to move the deposits. The movement to an alternate BaaS provider is cumbersome and would be over a period of time, which would allow us the opportunity to put alternate liquidity in place; those options are more fully discussed below. As of March 31, 2026, we had three partners with deposits that together represent 48.2% of total deposits. Management expects these partner balances to decline during the second quarter of 2026 and then normalize.

We continually monitor our liquidity position to ensure that our assets and liabilities are managed in a manner to meet all reasonably foreseeable short-term, long-term and strategic liquidity demands. Management has established a comprehensive process for identifying, measuring, monitoring and controlling liquidity risk. Because of its critical importance to the viability of the Bank, liquidity risk management is fully integrated into our risk management processes. Critical elements of our liquidity risk management include: effective corporate governance consisting of oversight by the board of directors and active involvement by management; appropriate strategies, policies, procedures, and limits used to manage and mitigate liquidity risk; comprehensive liquidity risk measurement and monitoring systems that are commensurate with the complexity of our business activities; active management of intraday liquidity and collateral; an appropriately diverse mix of existing and potential future funding sources; adequate levels of readily available cash, deposits and highly liquid marketable securities free of legal, regulatory, or operational impediments, that can be used to meet liquidity needs in stressful situations; contingency funding policies and plans that sufficiently address potential adverse liquidity events and emergency cash flow requirements; and internal controls and internal audit processes sufficient to determine the adequacy of the Bank's liquidity risk management process. Unlike many industrial companies, substantially all of our assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on our performance than the effects of general levels of inflation. Interest rates may not necessarily move in the same direction or in the same magnitude as the prices of goods and services. However, other operating expenses do reflect general levels of inflation.

Our liquidity position is supported by management of our liquid assets and liabilities and access to alternative sources of funds. Our liquidity requirements are met primarily through our deposits and the principal and interest payments we receive on loans and investment securities. Cash on hand, cash at third-party banks, investments available-for-sale and maturing or prepaying balances in our investment and loan portfolios are our most liquid assets. Other sources of liquidity that are routinely available to us include funds from retail, commercial, and BaaS deposits, advances from the FHLB and proceeds from the sale of loans. Less commonly used sources of funding include borrowings from the Federal Reserve discount window, draws on established federal funds lines from unaffiliated commercial banks, funds from online rate services, brokered deposits, a one-way buy through an ICS account, and the issuance of debt or equity securities. We believe we have ample liquidity resources to fund future growth and meet other cash needs as necessary and are closely monitoring liquidity in this uncertain economic environment.

The Company has pledged loans and securities totaling \$933.6 million and \$939.8 million at March 31, 2026 and December 31, 2025, respectively, for borrowing lines at the FHLB and FRB. The Bank had the ability and capacity to borrow up to \$636.6 million from FHLB and the FRB discount window at March 31, 2026. There were no borrowings taken for funding under these facilities during the three months ended March 31, 2026 so the Bank has the maximum borrowing capacity in the event of a liquidity emergency.

The Bank's current liquidity position is supported by liquid assets (cash and investments on the balance sheet), liabilities (capacity to borrow funds the same day) and alternative sources of funds including the capacity to borrow up to \$636.6 million from FHLB, the FRB discount window, on a same day basis and a \$50.0 million line of credit with a banker's bank. Cash on the balance sheet and borrowing capacity totaled \$2.18 billion and represented 43.3% of total deposits and significantly exceeded the \$1.77 billion in uninsured deposits as of March 31, 2026. The board of directors and

management is cognizant of the risk of uninsured deposits and has used fully insured IntraFi Network reciprocal deposits to reduce uninsured deposit. Fully insured IntraFi network reciprocal deposits totaled \$462.5 million and \$460.3 million at March 31, 2026 and December 31, 2025, respectively. Uninsured deposits totaled \$1.77 billion at March 31, 2026 and totaled \$641.3 million at December 31, 2025. The increase in uninsured deposits is largely due to the timing of new partner deposits participating in sweep and reciprocal deposit networks. Management expects uninsured deposits to return to more typical levels in the second quarter.

The Company is a corporation separate and apart from our Bank and, therefore, must provide for its own liquidity, including liquidity required to meet its debt service requirements on its subordinated note and junior subordinated debentures. The Company's main source of cash flow has been through equity and debt offerings. The Company has consistently retained a portion of the funds from equity and debt offerings so that it has sufficient funds for its operating and debt costs. During the quarter ended December 31, 2024, the Company completed a public offering of 1,380,000 shares of its common stock at a price to the public of \$71.00 per share. Gross proceeds from the offering of \$98.0 million, before deducting underwriting discounts and offering expenses, will be used for general corporate purposes, including, without limitation, to support investment opportunities and the Bank's growth. A total of \$50.0 million of those proceeds were contributed to the Bank in 2024, and the balance of the amount was retained in cash at the Company level. The Company currently holds \$40.2 million in cash for debt servicing and operating purposes. In addition, the Bank can declare and pay dividends to the Company to meet the Company's debt and operating expenses. There are statutory and regulatory limitations that affect the ability of the Bank to pay dividends to the Company. We believe that these limitations will not impact the ability of the Bank to pay dividends to the Company to meet ongoing operating needs.

For contingency purposes, the Company maintains a minimum level of cash to fund one year's projected operating cash flow needs and targets a minimum liquidity ratio of 15%. Both of these minimum liquidity levels are on-balance sheet sources. Per policy and the Bank's liquidity contingency plan, in event of a liquidity emergency the Bank can utilize wholesale funds in an amount up to 30% of assets. Since the Bank uses only a small portion of its borrowing or wholesale funding capacity, the Bank has access to borrow substantial funds and in excess of 15% of deposits if needed in a liquidity emergency.

Capital Adequacy

Capital management consists of providing equity and other instruments that qualify as regulatory capital to support current and future operations. Banking regulators view capital levels as important indicators of an institution's financial soundness. As a general matter, FDIC-insured depository institutions and their holding companies are required to maintain minimum capital levels relative to the amount and types of assets they hold. We are subject to regulatory capital requirements at the bank level. Because the Company's consolidated assets exceeded \$3.0 billion as of September 30, 2022, the Company is no longer eligible for the Federal Reserve's Small Bank Holding Company Policy Statement and is evaluated relative to the capital adequacy standards established by the Federal Reserve.

As of March 31, 2026, and December 31, 2025, the Company and the Bank were in compliance with all applicable regulatory capital requirements, and the Bank was classified as "well capitalized" for purposes of the Federal Reserve's prompt corrective action regulations. As we deploy capital and continue to grow operations, regulatory capital levels may decrease depending on our level of earnings; however, the capital raise completed in December 2024 strengthened our regulatory capital levels. We expect to monitor and control growth in order to remain in compliance with all regulatory capital standards applicable to us. In addition, the Company maintains an effective registration statement on Form S-3 with the Securities and Exchange Commission which allows the Company to raise additional capital in an amount up to \$102.0 million. The Company raised \$98.0 million in December 2024.

The following table presents the Company's and the Bank's regulatory capital ratios as of the dates presented, as well as the regulatory capital ratios that are required by Federal Reserve regulations to maintain "well-capitalized" status:

(dollars in thousands; unaudited)	Actual		Minimum Required for Capital Adequacy Purposes ⁽¹⁾		Required to be Well Capitalized Under the Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2026						
Tier 1 Leverage Capital (to average assets)

Bank Only	556,016	13.48 %	330,094	8.00 %	412,617	10.00 %
December 31, 2025						
Tier 1 Leverage Capital (to average assets)						
Company	\$ 489,918	10.62 %	\$ 184,550	4.00 %	N/A	N/A
Bank Only	488,585	10.60 %	184,383	4.00 %	230,478	5.00 %
Common Equity Tier 1 Capital (to risk-weighted assets)						
Company	486,418	12.43 %	176,156	4.50 %	N/A	N/A
Bank Only	488,585	12.50 %	175,886	4.50 %	254,057	6.50 %
Tier 1 Capital (to risk-weighted assets)						
Company	489,918	12.52 %	234,875	6.00 %	N/A	N/A
Bank Only	488,585	12.50 %	234,514	6.00 %	312,685	8.00 %
Total Capital (to risk-weighted assets)						
Company	585,410	14.95 %	313,166	8.00 %	N/A	N/A
Bank Only	539,004	13.79 %	312,685	8.00 %	390,857	10.00 %

⁽¹⁾ Presents the minimum capital adequacy requirements that apply to the Bank (excluding the capital conservation buffer) and the Company. The capital conservation buffer is an additional 2.5% of the amount necessary to meet the minimum risk-based capital requirements for total, tier 1, and common equity tier 1 risk-based capital.

Material Cash Requirements and Capital Resources

The following table provides the material cash requirements from known contractual and other obligations as of March 31, 2026:

(dollars in thousands; unaudited)	Total	Payments Due by Period		
		Less than 1 Year	Over 1 year	Other (1)
Cash requirements				
Time deposits	\$ 12,196	\$ 9,235	\$ 2,961	\$ —
Subordinated notes	45,000	—	45,000	—
Junior subordinated debentures	3,609	—	3,609	—
Deferred compensation plans	285	78	207	—
Operating and finance leases	5,128	1,079	4,049	—
Non-maturity deposits	5,028,967	—	—	5,028,967
Equity investment commitment	1,035	1,035	—	—

(1) Represents the undefined maturity of non-maturing deposits, including noninterest bearing demand deposits, interest bearing demand deposits, money market accounts, savings accounts and brokered deposits, which can generally be withdrawn on demand.

We maintain sufficient cash and cash equivalents and investment securities to meet short-term cash requirements and the levels of these assets are dependent on our operating, investing and financing activities during any given period. Cash on hand, cash at third-party banks, investments available-for-sale and maturing or prepaying balances in our investment and loan portfolios are our most liquid assets. Other sources of liquidity that are routinely available to us include funds from retail, commercial, and BaaS deposits, advances from the FHLB and proceeds from the sale of loans. Less commonly used sources of funding include borrowings from the Federal Reserve discount window, draws on established federal funds lines from unaffiliated commercial banks, funds from online rate services, brokered funds, a one-way buy through an ICS account, and the issuance of debt or equity securities.

In the normal course of business, we enter into various transactions, which, in accordance with GAAP, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby and commercial letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in our consolidated balance sheet.

Our commitments associated with outstanding commitments to extend credit and standby and commercial letters of credit are summarized in the following table. Since commitments associated with commitments to extend credit and letters of credit may expire unused, the amounts shown do not necessarily reflect the actual future cash funding requirements.

As of March 31, 2026 we had \$2.59 billion in commitments to extend credit, compared to \$2.31 billion as of December 31, 2025. The \$278.8 million increase is largely attributed to a \$188.7 million increase in credit cards, related to CCBX loans, a \$29.2 million increase in residential real estate commitments, related to CCBX loans, a decrease of \$2.0 million in consumer and other loan commitments, related to CCBX consumer loans, and a \$10.9 million increase in commercial construction loans, partially offset by a \$54.7 million increase in commercial and industrial capital call line commitments.

The following table presents commitments associated with outstanding commitments to extend credit, standby and commercial letters of credit and equity investment commitments as of the periods indicated:

(dollars in thousands; unaudited)	As of March 31, 2026	As of December 31, 2025
Commitments to extend credit:		
Commercial and industrial loans	\$ 99,434	\$ 90,281
Commercial and industrial loans – capital call lines	573,832	519,135
Construction – commercial real estate loans	47,691	58,562
Construction – residential real estate loans	42,321	39,676
Residential real estate loans	713,679	684,485
Commercial real estate loans	35,418	28,108
Credit cards	1,008,183	819,495
Consumer and other loans	66,323	68,302
Total commitments to extend credit	\$ 2,586,881	\$ 2,308,044
Standby letters of credit	\$ 2,224	\$ 1,042
Equity investment commitment	\$ 1,035	\$ 1,125

We have portfolio limits with each of our partners to manage loan concentration risk, liquidity risk and counter-party partner risk. For example, as of March 31, 2026, capital call lines outstanding balance totaled \$176.4 million, and while commitments totaled \$573.8 million the commitments are cancelable, and are also limited to a maximum of \$350.0 million by agreement with the partner. These limits allow us to manage portfolio concentrations with partners and by loan type.

The following table shows the CCBX maximum portfolio sizes by loan category as of March 31, 2026.

(dollars in thousands; unaudited)	Type of Lending	As of March 31, 2026	As of December 31, 2025	Maximum Portfolio Size	Increase/(decrease)
Commercial and industrial loans:					
Capital call lines	Business - Venture Capital	\$ 350,000	\$ 350,000	\$	—
All other commercial & industrial loans	Business - Small Business	512,975	515,589		(2,614)
Real estate loans:					
Home equity lines of credit	Home Equity - Secured Credit Cards	450,000	400,000		50,000
Consumer and other loans:					
Credit cards	Credit Cards - Primarily Consumer	1,125,000	900,000		225,000
Installment loans	Consumer	1,962,891	1,740,813		222,078
Other consumer and other loans	Consumer - Secured Credit Builder & Unsecured consumer	459,134	478,598		(19,464)
		\$ 4,860,000	\$ 4,385,000	\$	475,000
Total Existing Portfolio Size		\$ 1,884,124	\$ 1,603,577	\$	280,547

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being fully drawn upon, the total commitment amounts disclosed above do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if considered necessary by us, upon extension of credit, is based on management's credit evaluation of the customer. As of March 31, 2026, \$1.68 billion in commitments

to extend credit are unconditionally cancelable, compared to \$1.42 billion at December 31, 2025. The increase in unconditionally cancelable commitments is attributed to growth and a change in the mix of the CCBX loan portfolio. Commitments that are unconditionally cancelable allow us to better manage loan growth, credit concentrations and liquidity. We also limit CCBX partners to a maximum aggregate customer loan balance originated and held on our balance sheet, as shown in the table above.

Standby and commercial letters of credit are conditional commitments issued by us to guarantee the performance of a customer to a third party. In the event of nonperformance by the customer, we have rights to the underlying collateral, which can include commercial real estate, physical plant and property, inventory, receivables, cash and/or marketable securities. Our credit risk associated with issuing letters of credit is essentially the same as the risk involved in extending loan facilities to our customers.

We believe that we will be able to meet our long-term cash requirements as they come due. Adequate cash levels are generated through profitability, repayments from loans and securities, deposit gathering activity, access to borrowing sources and periodic loan sales.

Critical Accounting Policies

Our accounting policies are integral to understanding our results of operations. Our accounting policies are described in greater detail in “Note 1 - Description of Business and Summary of Significant Accounting Policies” and “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Estimates and Significant Accounting Policies” of our Form 10-K. We have procedures and processes in place to facilitate making these judgments. Actual results in these areas could differ from management’s estimates. There have been no significant changes concerning our critical accounting policies as described in our Form 10-K except as indicated in Note 1 of the condensed consolidated financial statements included elsewhere in this report.

Selected Financial Data

The following table shows the Company’s key performance ratios for the periods indicated.

(unaudited)	Three Months Ended				
	March 31, 2026	December 31, 2025	September 30, 2025	June 30, 2025	March 31, 2025
Return on average assets ⁽¹⁾	0.98 %	1.09 %	1.19 %	0.99 %	0.93 %
Return on average equity ⁽¹⁾	9.80 %	10.41 %	11.52 %	9.72 %	8.91 %
Yield on earnings assets ⁽¹⁾	9.38 %	9.55 %	9.80 %	9.92 %	10.32 %
Yield on loans receivable ⁽¹⁾	10.76 %	10.63 %	10.95 %	11.11 %	11.33 %
Cost of funds ⁽¹⁾	2.59 %	2.77 %	3.07 %	3.13 %	3.11 %
Cost of deposits ⁽¹⁾	2.56 %	2.74 %	3.04 %	3.10 %	3.08 %
Net interest margin ⁽¹⁾	7.00 %	7.03 %	7.00 %	7.06 %	7.48 %
Noninterest expense to average assets ⁽¹⁾	6.78 %	6.25 %	6.13 %	6.52 %	6.87 %
Noninterest income to average assets ⁽¹⁾	5.37 %	5.04 %	5.83 %	3.82 %	6.06 %
Efficiency ratio	55.85 %	52.75 %	48.50 %	60.98 %	51.59 %
Loans receivable to deposits ⁽²⁾	79.02 %	92.20 %	94.32 %	92.01 %	93.89 %

⁽¹⁾ Annualized calculations shown for periods presented.

⁽²⁾ Including loans held for sale.

The volatility in the efficiency ratio and noninterest income to average asset performance metrics was driven by a higher-quality CCBX loan-mix from a credit quality perspective, which effectively reduced the credit enhancement required within non-interest income due to lower net-charge off activity as a percent of total loans which lowered our provision expense. These items have a neutral impact to net income although impacted the quarter-to-quarter metrics due to lower reported noninterest income.

CCBX – BaaS Reporting Information

During the three months ended March 31, 2026 and 2025, \$50.7 million and \$53.6 million, respectively, were recognized in noninterest income BaaS credit enhancements related to the establishment of a credit enhancement asset for credit losses indemnified by our strategic partners and reserved for unfunded commitments for CCBX partner loans and deposits. Agreements with our CCBX partners provide for a credit enhancement provided by the partner which protects the Bank by indemnifying or reimbursing incurred losses. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans, unfunded commitments and negative deposit accounts. When the provision for credit losses - loans and provision for unfunded commitments is recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements) in recognition of the CCBX partner legal commitment to indemnify or reimburse losses. The credit enhancement asset is relieved as credit enhancement payments and recoveries are received from the CCBX partner or taken from the partner's cash reserve account. Agreements with our CCBX partners also provide protection to the Bank from fraud by indemnifying or reimbursing incurred fraud losses. BaaS fraud includes noncredit fraud losses on loans and deposits originated through partners. Fraud losses are recorded when incurred as losses in noninterest expense, and the enhancement received from the CCBX partner is recorded in noninterest income, resulting in a net impact of zero to the income statement. CCBX partners bear most of the responsibility for credit and fraud losses incurred which consequently gives them a vested interest in the performance of the portfolio. We believe that this alignment of interests ensures that CCBX partners are motivated to implement robust risk management practices and maintain the overall health of the portfolio.

Many CCBX partners also pledge a cash reserve account at the Bank, which the Bank can collect from when losses occur that is then replenished by the partner on a regular interval. Although agreements with our CCBX partners provide for credit enhancements that provide protection to the Bank from credit and fraud losses, if our partner is unable to fulfill their contractual obligation and if the cash flows on the loans were not sufficient to fund the reimbursement of loan losses, then the Bank would be exposed to additional loan and deposit losses as a result of this counterparty risk. If a CCBX partner does not replenish their cash reserve account, the Bank may consider an alternative plan for funding the cash reserve. This may involve the possibility of adjusting the funding amounts or timelines to better align with the partner's specific situation. If a mutually agreeable funding plan is not agreed to, the Bank could declare the agreement in default, take over servicing and cease paying the partner for servicing the loan and providing credit enhancements. In the event of a partner default, the Bank would evaluate any remaining credit enhancement asset associated with that partner to determine whether a write-off is appropriate. If a write-off occurs, the Bank would stop payments to the CCBX partner and retain the full yield and any fee income on the loan portfolio going forward, decreasing our BaaS loan expense.

For CCBX loans the Bank records contractual interest earned from the borrower on loans in interest income, adjusted for origination costs which are paid or payable to the CCBX partner. BaaS loan expense represents the amount paid or payable to partners for credit and fraud enhancements and servicing CCBX loans. To determine net BaaS loan income earned from CCBX loan relationships, the Bank takes BaaS loan interest income and deducts BaaS loan expense to arrive at net BaaS loan income which can then be compared to interest income on the Company's community bank loans.

The following table illustrates how CCBX partner loan income and expenses are recorded in the financial statements:

Loan income and related loan expense	Three Months Ended	
	March 31, 2026	March 31, 2025
(dollars in thousands; unaudited)		
BaaS loan interest income	\$ 71,153	\$ 67,855
Less: BaaS loan expense	36,940	32,507
Net BaaS loan income ⁽²⁾	34,213	35,348
Net BaaS loan income divided by average BaaS loans ⁽¹⁾⁽²⁾	7.22 %	8.79 %
Yield on loans ⁽¹⁾	15.01 %	16.88 %

⁽¹⁾ Annualized calculations shown for periods presented.

⁽²⁾ A reconciliation of this non-GAAP measure is set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures."

The increased activity of CCBX partners has resulted in increases in program fees and interest for the three months ended March 31, 2026 compared to the three months ended March 31, 2025. The following tables are a summary of the direct

fees, expenses and interest components of BaaS for the periods indicated and are not inclusive of all income and expense related to BaaS.

	Three Months Ended	
	March 31, 2026	March 31, 2025
(dollars in thousands; unaudited)		
BaaS loan interest income	\$ 71,153	\$ 67,855
Total BaaS loan interest income	\$ 71,153	\$ 67,855

	Three Months Ended	
	March 31, 2026	March 31, 2025
(dollars in thousands; unaudited)		
BaaS interest expense	\$ 22,099	\$ 21,581
Total BaaS interest expense	\$ 22,099	\$ 21,581

	Three Months Ended	
	March 31, 2026	March 31, 2025
(dollars in thousands; unaudited)		
BaaS program income:		
Servicing and other BaaS fees	\$ 2,623	\$ 1,419
Transaction and interchange fees	5,873	3,833
Reimbursement of expenses	2,392	1,026
Total BaaS program income	10,888	6,278
BaaS indemnification income:		
BaaS credit enhancements	50,744	53,648
BaaS fraud enhancements	3,059	1,993
BaaS indemnification income	53,803	55,641
Total noninterest BaaS income	\$ 64,691	\$ 61,919

Servicing and other BaaS fees increased \$1,204,000 for the three months ended March 31, 2026 compared to the three months ended March 31, 2025, while transaction and interchange fees increased \$2.0 million for the three months ended March 31, 2026 compared to the three months ended March 31, 2025. We expect servicing and other BaaS fees to decrease and transaction and interchange fees to increase as partner activity grows and contracted minimum fees are replaced with recurring fees, which exceed those minimum fees. Additionally, we expect reimbursement of expenses to increase as we continue to bill partners for incurred expenses.

	Three Months Ended	
	March 31, 2026	March 31, 2025
(dollars in thousands; unaudited)		
BaaS loan and fraud expense:		
BaaS loan expense	\$ 36,940	\$ 32,507
BaaS fraud expense	3,059	1,993
Total BaaS loan and fraud expense	\$ 39,999	\$ 34,500

GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures

The Company uses certain non-GAAP financial measures to provide meaningful supplemental information regarding the Company's operational performance and to enhance investors' overall understanding of such financial performance. However, these non-GAAP financial measures are supplemental and are not a substitute for an analysis based on GAAP measures. As other companies may use different calculations for these adjusted measures, this presentation may not be comparable to other similarly titled adjusted measures reported by other companies.

The following non-GAAP measure is presented to illustrate the impact of BaaS loan expense on net loan income and yield on CCBX loans.

Net BaaS loan income divided by average CCBX loans is a non-GAAP measure that includes the impact BaaS loan expense on net BaaS loan income and the yield on CCBX loans. The most directly comparable GAAP measure is yield on CCBX loans.

The following non-GAAP measure is presented to illustrate the impact of BaaS loan expense on net interest income and net interest margin.

Net interest income net of BaaS loan expense is a non-GAAP measure that includes the impact BaaS loan expense on net interest income. The most directly comparable GAAP measure is net interest income.

Net interest margin, net of BaaS loan expense is a non-GAAP measure that includes the impact of BaaS loan expense on net interest rate margin. The most directly comparable GAAP measure is net interest margin.

Reconciliations of the GAAP and non-GAAP measures are presented in the following table.

(dollars in thousands; unaudited)	As of and for the Three Months Ended	
	March 31, 2026	March 31, 2025
Net BaaS loan income divided by average CCBX loans:		
CCBX loan yield (GAAP) ⁽¹⁾	15.01 %	16.88 %
Total average CCBX loans receivable	\$ 1,922,586	\$ 1,630,088
Interest and earned fee income on CCBX loans (GAAP)	71,153	67,855
BaaS loan expense	(36,940)	(32,507)
Net BaaS loan income	\$ 34,213	\$ 35,348
Net BaaS loan income divided by average CCBX loans ⁽¹⁾	7.22 %	8.79 %
CCBX net interest margin, net of BaaS loan expense:		
CCBX net interest margin ⁽¹⁾	8.19 %	9.72 %
CCBX earning assets	2,831,286	2,184,869
Net interest income (GAAP)	57,210	52,359
Less: BaaS loan expense	(36,940)	(32,507)
Net interest income, net of BaaS loan expense	\$ 20,270	\$ 19,852
CCBX net interest margin, net of BaaS loan expense ⁽¹⁾	2.90 %	3.68 %

⁽¹⁾ Annualized calculations for periods presented.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Quantitative and Qualitative Disclosures about Market Risk

As a financial institution, our primary component of market risk is interest rate volatility. Our asset liability and funds management policy provides management with the guidelines for effective funds management, and we have established a measurement system for monitoring our net interest rate sensitivity position. We have historically managed our sensitivity position within our established guidelines.

Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on most of our assets and liabilities, and the market value of all interest earning assets and interest bearing liabilities, other than those which have a short term to maturity. Interest rate risk is the potential for economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a decrease in current fair market values. Our objective is to measure the effect on net interest income and to adjust the balance sheet to minimize the inherent risk while at the same time maximizing income. The FOMC lowered the Fed Funds target range of 4.25%-4.50% by 0.25% in the third quarter of 2025 and by 0.50% in the fourth quarter of 2025, bringing the top end of the target range to 3.75% as of the filing date of this Quarterly Report on Form 10-Q. The timing and magnitude of any future and potential rate changes, expected to be further rate cuts, remains uncertain but will likely be closely tied to future inflationary trends. The impact of this and any future increases or decreases will impact financial results.

We manage our exposure to interest rates by structuring our balance sheet in the ordinary course of business. We do not enter into instruments such as leveraged derivatives, financial options, financial future contracts or forward delivery contracts for the purpose of reducing interest rate risk. Based upon the nature of our operations, we are not subject to foreign exchange or commodity price risk. We do not own any trading assets.

Our exposure to interest rate risk is managed by the Asset Liability Committee (“ALCO”), of the Bank and reviewed by the Asset Liability and Investment Committee of our board of directors in accordance with policies approved by our board of directors. ALCO formulates strategies based on appropriate levels of interest rate risk. In determining the appropriate level of interest rate risk, ALCO considers the impact on earnings and capital on the current outlook on interest rates, potential changes in interest rates, regional economies, liquidity, business strategies and other factors. ALCO meets regularly to review, among other things, the sensitivity of assets and liabilities to interest rate changes, the book and market values of assets and liabilities, unrealized gains and losses, purchase and sale activities, commitments to originate loans and the maturities of investments and borrowings. Additionally, ALCO reviews liquidity, cash flows, maturities of deposits and consumer and commercial deposit activity. Management employs various methodologies to manage interest rate risk including an analysis of relationships between interest earning assets and interest bearing liabilities and interest rate simulations using a model. The Asset Liability and Investment Committee of our board of directors meets regularly to review the Bank’s interest rate risk profile, liquidity position, including contingent liquidity, and investment portfolio.

We use interest rate risk simulation models to test interest rate sensitivity of net interest income and fair value of equity, and the impact of changes in interest rates on other financial metrics. Contractual maturities and re-pricing opportunities of loans are incorporated in the model, as are prepayment assumptions, maturity data and call options within the investment portfolio. Average life of non-maturity deposit accounts are based on historical decay rates and assumptions and are incorporated into the model. The assumptions used are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model’s simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and the application and timing of various management strategies. To help ensure the accuracy of the model, we perform a quarterly back test against our actual results.

On a quarterly basis, we run multiple simulations under two different premises of which one is a static balance sheet and the other is a dynamic growth balance sheet. The static balance sheet approach produces results that show the interest risk currently inherent in our balance sheet at that point in time. The dynamic balance sheet includes our projected growth levels going forward and produces results that shows how net income, net interest income, and interest risk change based on our projected growth. These simulations test the impact on net interest income and fair value of equity from changes in market interest rates under various scenarios. Under the static and dynamic approaches, rates are shocked instantaneously and ramped over a 12-month horizon assuming parallel yield curve shifts. Parallel shock scenarios assume instantaneous parallel movements in the yield curve compared to a flat yield curve scenario. Non-parallel simulations are also conducted and involve analysis of interest income and expense under various changes in the shape of the yield curve including a forward curve, flat curve, steepening curve, and an inverted curve. Our internal policy regarding internal rate risk

simulations currently specifies that for instantaneous parallel shifts of the yield curve, estimated net income at risk for the subsequent one- and two-year period should not decline by more than 10% for a 100 basis point shift, 15% for a 200 basis point shift, 20% for a 300 basis point shift, and 25% for a 400 basis point shift.

The following table summarizes the simulated change in net interest income over a 12-month horizon as of the dates indicated:

(unaudited)

Change in Market Interest Rates	Twelve Month Projection As of March 31, 2026	Twelve Month Projection As of December 31, 2025
Static Balance Sheet and Rate Shifts		
+400 basis points	5.2%	5.5%
+300 basis points	3.7%	3.9%
+200 basis points	2.5%	2.6%
+100 basis points	1.3%	1.3%
-100 basis points	(1.3)%	(1.2)%
-200 basis points	(3.2)%	(3.2)%
-300 basis points	(5.6)%	(5.5)%
-400 basis points	(14.0)%	(12.8)%
Dynamic Balance Sheet and Rate Shifts		
+400 basis points	8.8%	7.4%
+300 basis points	6.3%	5.3%
+200 basis points	4.2%	3.5%
+100 basis points	2.1%	1.8%
-100 basis points	(2.0)%	(1.7)%
-200 basis points	(4.7)%	(3.7)%
-300 basis points	(8.0)%	(6.4)%
-400 basis points	(19.6)%	(17.7)%

The results illustrate that the Company's static balance sheet continues to be asset sensitive, with the dynamic balance sheet displaying slightly more asset sensitivity due to most of the loan growth assumptions coming from fully adjustable-rate CCBX products. The community bank segment remains asset sensitive and performs better in an increasing interest rate environment. For the community bank, the loan portfolio is only approximately 20-25% adjustable rate, meaning the asset sensitivity is driven by the lower level of deposit repricing in rising rate environments. We have found that, historically, offering rates on these community bank deposits change more slowly than changes in short-term market rates. For the CCBX segment, the offering rates on the loan portfolio are modeled using partner contractual net yields which mostly adjust immediately with market shifts. For this CCBX portfolio, the offering rates on approximately 97% of loans and the majority of deposits fully reprice with changes in market rates. During 2025, one of the material CCBX lending partners contractual yields converted to an adjustable-rate product, causing the Company's balance sheet to become slightly asset sensitive. As of March 31, 2026, the Company's overall funding mix continues to be more heavily weighted towards the CCBX deposits, which are primarily adjustable-rate deposits and work to partially offset some of the asset sensitivity in the static model. The assumptions incorporated into the simulation model are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact that fluctuations in market interest rates have on net interest income. Actual results will differ from the model's simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions, the shape of the interest yield curve, and the application and timing of various assumptions and strategies.

Item 4. Controls and Procedures

Disclosure Controls and Procedures. An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on that evaluation, the Company's Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the SEC (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure.

Change in Internal Control over Financial Reporting. There were no changes in the Company's internal control over financial reporting that occurred during the three months ended March 31, 2026, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are a party to various litigation matters incidental to the conduct of our business. We do not believe that any currently pending legal proceedings will have a material adverse effect on our business, financial condition or earnings.

Item 1A. Risk Factors

For information regarding the Company's risk factors, see "Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2025, which are incorporated by reference herein. As of March 31, 2026, the risk factors of the Company have not changed materially from those disclosed in the Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of the Company's equity securities during the three months ended March 31, 2026.

The Company did not repurchase any of its equity securities during the three months ended March 31, 2026 and does not have any authorized share repurchase programs.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

During the three months ended March 31, 2026, no director or officer of the Company adopted, modified or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408(a) of Regulation S-K.

Item 6. Exhibits

- 31.1 [Certification of the Chief Executive Officer pursuant to Rule 13a-14\(a\)/15d-14\(a\) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.](#)
- 31.2 [Certification of the Chief Financial Officer pursuant to Rule 13a-14\(a\)/15d-14\(a\) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.](#)
- 32.1 [Certifications of the Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.](#)
- 32.2 [Certifications of the Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.](#)
- 101 The following materials from the Company’s Quarterly Report on Form 10-Q for the quarter months ended March 31, 2026, formatted in inline XBRL (Extensible Business Reporting Language): (i) the Consolidated Balance Sheets, (ii) the Consolidated Statements of Income, (iii) the Consolidated Statements of Comprehensive Income, (iv) the Consolidated Statement of Changes in Shareholders’ Equity, (v) the Consolidated Statements of Cash Flows and (vi) the Notes to the Consolidated Financial Statements. Pursuant to Rule 406T of Regulation S-T, these interactive data files are deemed not filed or part of a registration statement or prospectus for purposes of Sections 11 or 12 of the Securities Act of 1933, as amended, or Section 18 of the Securities Exchange Act of 1934, as amended, and otherwise are not subject to liability under those sections.
- 104 Cover Page Interactive Data (formatted as Inline XBRL and contained in Exhibit 101 filed herewith)

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Chief Financial Officer
(Principal Financial Officer)

**CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES EXCHANGE ACT OF 1934,
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Eric M. Sprink, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Coastal Financial Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of Coastal Financial Corporation (the "Company") on Form 10-Q for the period ending March 31, 2026, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of the Company.
