Special Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), that involve risks and uncertainties, including statements regarding future events, our business, financial condition, results of operations and prospects, economic conditions, our sources of liquidity, our plans and expectations regarding regulatory approvals, and commercial launch of our products, the addressable market of our products, our industry and the regulatory environment in which we operate. Any statements contained herein that are not statements of historical or current facts are forward-looking statements. In some cases, you can identify forward-looking statements by terms such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “should,” “will,” “would” or the negative of those terms, or other comparable terms intended to identify statements about the future. These statements include, among other things, statements relating to our expectations regarding our business, operations and market conditions, including our expectations regarding the market size and opportunity of our products. The forward-looking statements included herein are based on our current expectations, assumptions, estimates and projections, which we believe to be reasonable, and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements. These risks and uncertainties, all of which are difficult or impossible to predict accurately and many of which are beyond our control, include, but are not limited to, those made below under “Summary of Risk Factors” and in Item 1A. “Risk Factors” in this Quarterly Report on Form 10-Q.

You should carefully consider these risks, as well as the additional risks described in other documents we file with the U.S. Securities and Exchange Commission (“SEC”) in the future, including subsequent Annual Reports on Form 10-K and Quarterly Reports on Form 10-Q, which may from time to time amend, supplement or supersede the risks and uncertainties we disclose. We also operate in a very competitive and rapidly changing environment. New risks emerge from time to time and it is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in, or implied by, any forward-looking statements.

In light of the significant risks and uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by us or any other person that such results will be achieved, and readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof. Except as required by law, we undertake no obligation to revise the forward-looking statements contained herein to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. You should read this Quarterly Report on Form 10-Q and the other documents we file with the SEC with the understanding that our actual future results, levels of activity, performance and achievements may be materially different from what we expect. We qualify all of our forward-looking statements by the cautionary statements referenced above.

Summary of Risk Factors

An investment in our securities involves various risks and you are urged to carefully consider the risks discussed under Item 1A. “Risk Factors,” in this Quarterly Report on Form 10-Q prior to making an investment in our securities. If any of the risks below or in Item 1A. “Risk Factors” occurs, our business could be materially and adversely affected. As more fully described in Item 1A. “Risk Factors,” the principal risks and uncertainties that may affect our business, financial condition and results of operations include, but are not limited to, the following:

- We have incurred significant losses since our inception, and we may continue to incur losses, which could adversely affect the market price of our common stock and our ability to raise additional capital.
- Our products face, and any of our future product candidates will face, significant competition and our failure to effectively compete may prevent us from maintaining our market share or achieving further expansion.
- Our products may fail to achieve the broad degree of aesthetic practitioner adoption and use or consumer demand necessary for continued commercial success.
- Our products rely on consumer discretionary spending and the purchasing decisions of our customers, both of which are sensitive to global economic conditions, including the imposition of tariffs, or changes in consumer or customer sentiment.

- Our business is subject to trade policy risks, including tariffs and regulatory actions on imports which may have a material adverse impact on our results of operations and financial condition.
- We are reliant on Symatase S.A.S. (“Symatase”) to achieve and maintain regulatory approval for the Evolysse® product line. Failure to obtain approval, maintain approval, or obtain approval on our estimated time frame for additional Evolysse® products would negatively affect our ability to sell these products.
- We may require additional financing to fund our future operations or execute corporate development activities, and a failure to obtain additional capital when so needed on acceptable terms, or at all, could force us to delay, limit, reduce or terminate our operations.
- If we or our counterparties do not comply with the terms of our settlement agreements (the “Medytox Settlement Agreements”) with Medytox, Inc. (“Medytox”), we may face litigation or lose our ability to market and sell Jeuveau®, which would materially and adversely affect our ability to carry out our business and our financial condition and ability to continue as a going concern.
- We rely on our licensing agreements with Daewoong Pharmaceutical Co. Ltd (“Daewoong”), and Symatase and any termination or loss of significant rights, including exclusivity, under these agreements would materially and adversely affect our business.
- Our failure to successfully in-license, acquire, develop and market additional product candidates or approved products would impair our ability to grow our business.
- Our ability to market our products is limited to their approved indications, and if we want to expand the indications for which we market our products, we will need to obtain additional regulatory approvals, which will be expensive and may not be granted.
- Third party claims of intellectual property infringement may prevent or delay our commercialization efforts and interrupt our supply of products.
- If we or any of our current or future licensors, including Daewoong and Symatase, are unable to maintain, obtain or protect intellectual property rights related to our products or any of our future product candidates, we may not be able to compete effectively in our market.
- We rely on our digital technology and applications and our business and operations would suffer in the event of information system failures or a cybersecurity incident.
- We are subject to extensive government regulation, and we may face delays in or not obtain regulatory approval of our product candidates and our compliance with ongoing regulatory requirements may result in significant additional expense, limit or delay regulatory approval or subject us to penalties if we fail to comply.

Additional Information

Unless the context indicates otherwise, as used in this Quarterly Report on Form 10-Q, the terms “Evolus,” “Company,” “we,” “us” and “our” refer to Evolus, Inc., a Delaware corporation, and our subsidiaries taken as a whole, unless otherwise noted.

EVOLUS®, Jeuveau®, Evolux® and Evolysse® are trademarks of ours that are used in this Quarterly Report on Form 10-Q. Jeuveau® is the trade name in the United States for our approved product with non-proprietary name, prabotulinumtoxinA-xvfs. This product has different trade names outside of the United States, including Nuceiva® in Canada, Europe and Australia, but is referred to throughout this Quarterly Report on Form 10-Q as Jeuveau®. Our injectable hyaluronic acid (“HA”) gel products have different trade names outside of the United States, including Estyme® in Europe, but are referred to throughout this Quarterly Report on Form 10-Q as Evolysse®. This Quarterly Report on Form 10-Q also includes trademarks, trade names and service marks that are the property of other organizations, such as BOTOX® and BOTOX® Cosmetic, which we refer to throughout this Quarterly Report on Form 10-Q as BOTOX. Solely for convenience, trademarks and trade names referred to in this Quarterly Report on Form 10-Q may appear without the ® and ™ symbols, but those references are not intended to indicate that we will not assert, to the fullest extent under applicable law, our rights, or that the applicable owner will not assert its rights, to these trademarks and trade names. We do not intend our use or display of other companies’ trade names or trademarks to imply a relationship with, or endorsement or sponsorship of us by, any other companies.

Note 1. Description of Business

Description of Business

Evolus, Inc., (“Evolus” or the “Company”) is a global performance beauty company focused on delivering products in the cash-pay aesthetic market. The Company’s portfolio includes Jeuveau® (prabotulinumtoxinA-xvfs), a proprietary 900 kDa purified botulinum toxin type A formulation indicated for the temporary improvement in the appearance of moderate to severe glabellar lines, also known as “frown lines,” in adults and Evolysse®, a collection of injectable hyaluronic acid (“HA”) gels. Evolysse® Form and Evolysse® Smooth were launched in the United States in April 2025 and are indicated for wrinkles and folds, such as nasolabial folds, in adults. The Company anticipates two additional Evolysse® products, Evolysse® Sculpt and Evolysse® Lips, to be approved in the United States in the fourth quarter of 2026 and 2027, respectively. In May 2026, the Company launched four Evolysse® products in Europe. The Company is headquartered in Newport Beach, California.

Liquidity and Financial Condition

The accompanying unaudited condensed consolidated financial statements have been prepared on a basis that assumes that the Company will continue as a going concern. This basis of accounting contemplates the recovery of the Company’s assets and the satisfaction of the Company’s liabilities and commitments in the normal course of business and does not include any adjustments to reflect the possible future effects of the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

Since inception, the Company has incurred recurring net operating losses and negative cash flows from operating activities. In the three and six months ended June 30, 2026, the Company recorded a loss from operations of \$4,543 and \$11,391, respectively, and a net loss of \$8,052 and \$18,726, respectively. The Company used \$13,539 of cash from operations during the six months ended June 30, 2026. As of June 30, 2026, the Company had \$45,170 in cash and cash equivalents and an accumulated deficit of \$679,766.

The Company believes that its current capital resources, which consist of cash and cash equivalents, future cash generated from operations, availability of liquidity under both the New Pharmakon Term Loans and the Revolving Credit Facility (as defined in *Note 7. Long-Term Debt* and below, respectively) and other existing liquidity, will be sufficient to fund its operations through at least the next twelve months from the date the accompanying condensed consolidated financial statements are issued based on its expected cash needs. On March 3, 2026, the Company entered into a Loan and Security Agreement (the “Loan Agreement”) with the Company, as borrower, and Eclipse Business Capital LLC as administrative agent and the lenders party thereto. Pursuant to the Loan Agreement, the lenders party provided a senior secured asset-based revolving credit facility (the “Revolving Credit Facility”) with a \$30,000 commitment and an uncommitted accordion feature of up to \$10,000, which is exercisable, subject to lenders party consent and other conditions, in \$5,000 increments or in its entirety. The Revolving Credit Facility has a minimum utilization requirement of \$10,000 and matures on March 3, 2029 with outstanding principal and interest fully due and payable at such time. See *Note 7. Long-Term Debt* for additional information.

On May 5, 2025, the Company entered into an Amended and Restated Loan Agreement (the “A&R Loan Agreement”) with Pharmakon (as defined in *Note 7. Long-Term Debt*), pursuant to which Pharmakon agreed to provide the Company with a senior secured term loan of up to \$250,000 in aggregate principal. The term loan is to be funded in three tranches comprised of an initial \$150,000 tranche funded upon the execution of the A&R Loan Agreement and two additional tranches of up to \$50,000 each, available at the Company’s election no later than December 31, 2026. In addition, under the terms of the A&R Loan Agreement, the Company is permitted to incur additional indebtedness in the form of a working capital or revolving loan facility with a maximum credit line of no more than \$40,000 at any time, subject to Pharmakon’s consent and certain terms and conditions customary for credit facilities of similar size and type.

On May 1, 2026, the Company terminated the At-the-Market Sales Agreement (the “ATM Sales Agreement”) with Leerink Partners LLC, which the Company had entered into in March 2023. The ATM Sales Agreement provided for the offer and sale, from time to time, of shares of the Company’s common stock for an aggregate gross proceeds of up to \$50,000. The Company had not sold any shares under the ATM Sales Agreement prior to its termination. See *Note 10. Stock-Based Compensation and Stockholders’ Equity* for additional information.

Note 2. Basis of Presentation and Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The accompanying interim unaudited condensed consolidated financial statements have been prepared on a consistent basis with the annual financial statements and in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and the requirements of the SEC for interim reporting. Pursuant to these SEC rules and regulations, the Company has condensed or omitted certain financial information and disclosures normally included in annual financial statements prepared in accordance with GAAP. The interim unaudited condensed consolidated financial statements include the Company’s accounts and those of the Company’s wholly owned subsidiaries, and, in the opinion of management, reflect all adjustments, which include only normal recurring adjustments, necessary to state fairly the Company’s consolidated financial position as of June 30, 2026, results of operations, comprehensive income (loss), stockholders’ equity (deficit) for the three and six months ended June 30, 2026 and 2025, and cash flows for the six months ended June 30, 2026 and 2025. All intercompany accounts and transactions have been eliminated in consolidation. The interim results presented herein are not necessarily indicative of the results of operations to be expected for the full year ending December 31, 2026 or for any other interim period or any future year.

The accompanying unaudited condensed consolidated financial statements and related disclosures should be read in conjunction with the consolidated financial statements and notes as of and for the year ended December 31, 2025 that are included in the Company’s Annual Report on Form 10-K filed with the SEC on March 3, 2026.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the accompanying condensed consolidated financial statements and notes thereto. These estimates include, but are not limited to net revenues, allowance for doubtful accounts, fair value measurements and stock-based compensation, among others. Management bases estimates on historical experience and on assumptions that management believes are reasonable. The Company’s actual results could differ materially from those estimates and may result in material effects on the Company’s operating results and financial position.

Risks and Uncertainties

The Company is party to an agreement (as amended, the “Daewoong Agreement”) with Daewoong Pharmaceutical Co. Ltd. (“Daewoong”), pursuant to which the Company received an exclusive distribution license to Jeuveau® from Daewoong for aesthetic indications in the United States, the European Union, United Kingdom, members of the European Economic Area, Switzerland, Canada, Australia, New Zealand, and South Africa, as well as co-exclusive distribution rights with Daewoong in Japan. Jeuveau® is manufactured by Daewoong in a facility in South Korea. The Company also has the option to negotiate first with Daewoong to secure a distribution license for any product that Daewoong directly or indirectly develops or commercializes that is classified as an injectable botulinum toxin (other than Jeuveau®) in a territory covered by the Daewoong Agreement. The Company relies on Daewoong, its exclusive and sole supplier, to manufacture Jeuveau®. Any termination or loss of significant rights, including exclusivity, under the Daewoong Agreement would materially and adversely affect the Company’s commercialization of Jeuveau®. See *Note 9. Commitments and Contingencies* and *Note 11. Medytox Settlement Agreements* for additional information.

The Company commercially launched Jeuveau® in the United States in May 2019 and in Canada through its distribution partner in October 2019. The Company also began commercially launching Jeuveau® in Europe in 2022 and Australia in 2024 and, as such, has a limited history of sales in those markets. If any previously granted approval to market and sell Jeuveau® is retracted or the Company is denied approval or approval is delayed by regulators in any other jurisdictions, it may have a material adverse impact on the Company’s business and its consolidated financial statements.

The Company is party to an agreement with Symatase, pursuant to which Symatase granted to the Company an exclusive right to commercialize and distribute Symatase’s injectable HA gel products in the United States for use in the aesthetics and dermatological field of use. In April 2025, the Company launched Evolysse® Form and Evolysse® Smooth in the United States. In addition, beginning on December 20, 2023, the Company is party to an agreement with Symatase, pursuant to which Symatase granted to the Company an exclusive right to commercialize and distribute Symatase’s injectable HA gel product line in 50 countries in Europe for use in the aesthetics and dermatological fields. In May 2026, the Company

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

launched four Evolysse® products in Europe. The Company relies on Symatase, its sole supplier, to manufacture Evolysse®. Any termination or loss of significant rights, including exclusivity, would materially and adversely affect the Company's commercialization of Evolysse®.

The Company is also subject to risks common to companies in the pharmaceutical industry including, but not limited to, dependency on the commercial success of Jeuveau® and Evolysse®, the Company's approved products, significant competition within the medical aesthetics industry, its ability to maintain regulatory approval of Jeuveau® and Evolysse®, third party litigation and challenges to its intellectual property, uncertainty of broad adoption of its product by aesthetic practitioners and patients, its ability to in-license, acquire or develop additional product candidates and to obtain the necessary approvals for those product candidates, and the need to scale manufacturing capabilities over time.

Any disruption and volatility in the global capital markets, including those caused by other events, such as public health crises, high inflation and interest rates, increased tariffs, and geopolitical conflicts, including military conflicts, may increase the Company's cost of capital and adversely affect its ability to access financing when and on terms that the Company desires. Any of these events could have a material adverse effect on the Company's business, financial condition, results of operations and cash flows.

Segment Reporting

The Company operates as a single operating and reportable segment focused on delivering medical aesthetic products to the cash-pay aesthetic market. Under this organizational structure, the Chief Executive Officer, serving as the Chief Operating Decision Maker ("CODM"), assesses performance and manages the Company's operations as one integrated business. The identification of a single operating and reportable segment is consistent with the management approach as the CODM regularly reviews consolidated financial information for the purpose of assessing performance and allocating resources. See *Note 12. Segment Reporting* for additional information.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist of cash and cash equivalents and accounts receivable. Substantially all of the Company's cash is held by financial institutions that management believes are of high credit quality. Such deposits may, at times, exceed federally insured limits. To date, the Company has not experienced any losses associated with this credit risk and continues to believe that this exposure is not significant. The Company invests, or plans to soon invest, its excess cash, in line with its investment policy, primarily in money market funds and debt instruments of U.S. government agencies.

The Company's accounts receivable is derived from customers located principally in the United States and Europe. Concentrations of credit risk with respect to trade receivables are limited due to the Company's credit evaluation process. The Company does not typically require collateral from its customers. The Company continuously monitors customer payments and maintains an allowance for credit losses based on its assessment of various factors including historical experience, age of the receivable balances, and other current economic conditions or other factors that may affect customers' ability to pay.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and highly liquid investments with maturities of three months or less on the date of acquisition that can be liquidated without prior notice or penalty. Cash and cash equivalents may include deposits, money market funds and debt securities. Amounts receivable from credit card issuers are typically converted to cash within two to four days of the original sales transaction and are considered to be cash equivalents.

Inventories and Cost of Goods Sold

Inventories consist of finished goods held for sale and distribution. Cost is determined using the first-in, first-out method. Inventory is measured at the lower of cost or net realizable value based on a number of factors including, but not limited to, damage, expiration, or changes in price level. The Company evaluates inventory balances for excess quantities and obsolescence and then reduces inventories to net realizable value based on this evaluation.

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

For the three and six months ended June 30, 2026, cost of goods sold consisted of inventory cost, amortization of intangible asset relating to distribution right and certain royalties on the sale of the Company's products.

Tariff Refund Receivable

In February 2026, the Supreme Court of the United States ruled that certain tariffs imposed under the International Emergency Economic Powers Act ("IEEPA") were unlawful. In March 2026, the U.S. Court of International Trade directed U.S. Customs and Border Protection ("CBP") to refund tariffs collected under IEEPA, and the Company subsequently submitted its refund claim through CBP's established claims process. The Company concluded that recovery of the previously paid IEEPA tariffs was probable and recorded a receivable of \$1,949 under the cost recovery accounting guidance as of June 30, 2026. In the three and six months ended June 30, 2026, the Company recognized a reduction in cost of goods sold of \$1,051 and in selling, general and administrative expense of \$316, and reduced the carrying value of inventory by \$582 as of June 30, 2026.

Fair Value of Financial Instruments

The Company follows the authoritative guidance for fair value measurements with respect to assets and liabilities that are measured at fair value on a recurring basis and non-recurring basis. Under the standard, fair value is defined as the exchange price that would be received for an asset or an exit price paid to transfer a liability in an orderly transaction between market participants in a principal market on the measurement date.

The standard also establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors that market participants would use in valuing the asset or liability developed based upon the best information available in the circumstances. The hierarchy consists of the following three-levels for disclosure of fair value measurement:

- Level 1—Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2—Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities in active markets; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly, or can be corroborated by observable market data for substantially the full term of the asset or liability; and
- Level 3—Prices or valuation techniques that require inputs that are unobservable, that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The categorization of a financial instrument within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Property and Equipment

Property and equipment are stated at cost. Depreciation and amortization are recognized over the estimated useful lives of the assets using the straight-line method. The estimated useful lives of depreciable assets are three years for computers, three to five years for equipment, and five years for furniture and marketing fixtures. Leasehold improvements are amortized over the shorter of the estimated useful lives of the improvements or the term of the related lease.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired in a business combination. The Company assesses goodwill for impairment annually and whenever events or changes in circumstances indicate that the carrying amount of goodwill may not be recoverable. The Company performs an annual qualitative assessment of its goodwill in the fourth quarter of each calendar year to determine if any events or circumstances

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

exist, such as an adverse change in business climate or a decline in the overall industry demand, that would indicate that it is more likely than not that the fair value of a reporting unit is below its carrying amount, including goodwill. If events or circumstances do not indicate that the fair value of a reporting unit is below its carrying amount, then goodwill is not considered to be impaired and no further testing is required. If it is determined, based upon the qualitative assessment, that it is more likely than not that the reporting unit's fair value is less than its carrying amount, then a quantitative impairment test is performed. Alternatively, the Company may bypass the qualitative assessment for a reporting unit and directly perform the quantitative goodwill impairment test. For the purpose of goodwill impairment testing, the Company has determined that it has one reporting unit. There was no impairment of goodwill for any of the periods presented.

Contingent Milestone Payment

Symatase U.S. Agreement

On May 9, 2023, the Company and Symatase entered into a License, Supply and Distribution Agreement (the "Symatase U.S. Agreement"), pursuant to which Symatase granted to the Company an exclusive right to commercialize and distribute the Evolysse® products in the United States for use in the aesthetics and dermatological field of use. The Company also has the right of first negotiation to obtain a license from Symatase to commercialize and distribute any new products developed using the same technology as the Evolysse® collection of injectable HA gels.

As consideration for the rights granted under the Symatase U.S. Agreement, the Company is required to make up to €16,200 in milestone payments to Symatase, including an initial payment of €4,100 within 30 days of execution of the Symatase U.S. Agreement. The additional annual payments of €1,600 in June 2025, €4,100 in June 2026, €3,200 in June 2027, and €3,200 in June 2028 are, in each case, subject to and contingent on three of the products gaining approval prior to the milestone payment dates. If regulatory approval of three of the products is not achieved prior to the aforementioned milestone payment dates, then the related milestone payments will be due and payable to Symatase on the date of approval. In June 2023, the Company paid \$4,441 as an upfront payment upon the signing of the Symatase U.S. Agreement and has developmental costs, ongoing milestone and royalty payment obligations. As of June 30, 2026, regulatory approval of three of the products has not been achieved, and no annual milestone payments have been made. The Company, under the Symatase U.S. Agreement, is also subject to minimum purchase requirements and failure to meet such requirements may result in a reduction or termination of the Company's exclusive rights, subject to certain exceptions. Additionally, the Company agreed to a specified cost-sharing agreement with Symatase related to the registration of the Lips and Eye products with the U.S. Food and Drug Administration ("FDA").

The initial term of the Symatase U.S. Agreement is fifteen (15) years from the first FDA approval of a product, with automatic renewals for successive five (5)-year terms subject to the terms of the Symatase U.S. Agreement.

Symatase Europe Agreement

On December 20, 2023, the Company entered into a License, Supply and Distribution Agreement (the "Symatase Europe Agreement"), pursuant to which Symatase granted to the Company an exclusive right to commercialize and distribute Symatase's injectable HA gel products in 50 countries in Europe for use in the aesthetics and dermatological fields. The initial agreement is for a term of fifteen (15) years, with automatic yearly renewal provisions.

In exchange for the rights granted under the Symatase Europe Agreement, the Company issued 610,000 shares of common stock and is required to pay two milestone payments: (i) €1,200 on the second anniversary of certain regulatory approvals, and (ii) €1,900 on the later of the third anniversary of certain regulatory approvals or December of any year in which the Company achieves US\$25,000 of net revenue in Europe; provided that if the regulatory approvals are achieved the payment shall occur no later than December 2029 regardless of the revenue condition. The Company, under the Symatase Europe Agreement, is also subject to minimum purchase requirements and failure to meet such requirements may result in a reduction or termination of the Company's exclusive rights, subject to certain exceptions.

Upon signing of the Symatase Europe Agreement and issuance of 610,000 shares, the Company recorded \$4,429 in in-process research and development expense and \$1,476 in intangible assets. The \$1,476 in intangible assets represents the value of the nasolabial fold product in Europe that was already approved at the time of signing the Symatase Europe Agreement and is amortized over its estimated useful life of 15 years. The remaining value recorded in in-process research

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

and development expense relates to the distribution rights for the three remaining products that did not yet have regulatory approval as of the execution date.

Intangible Assets

The distribution right intangible asset related to Jeuveau® is amortized over the period the asset is expected to contribute to the future cash flows of the Company. The Company determined that the pattern of this intangible asset's future cash flows could not be readily determined with a high level of precision. As a result, the distribution right intangible asset is being amortized on a straight-line basis over the estimated useful life of 20 years.

A portion of the Symatase Europe Agreement represents the license and distribution right to Evolysse® in Europe. The definite-lived distribution right intangible asset related to the Evolysse® nasolabial fold product approved in Europe is amortized on a straight-line basis over the estimated useful life of 15 years.

Pursuant to the Symatase Europe Agreement, the Company is required to pay two milestone payments: (i) €1,200 on the second anniversary of certain regulatory approvals, and (ii) €1,900 on the later of the third anniversary of certain regulatory approvals or December of any year in which the Company achieves US\$25,000 of net revenue in Europe, provided that if the regulatory approvals are achieved the payment shall occur no later than December 2029 regardless of the revenue condition.

In October 2024, the Company received European Union Medical Device Regulation ("MDR") approval for the remaining three injectable HA gel products. As a result, the two milestone payments have been triggered. The first milestone payment is payable in October 2026, the two-year anniversary of the approval. The Company anticipates the second milestone payment will be made in December 2029. Upon receiving approval, the Company recorded \$1,035 and \$1,200 in long-term liabilities for the first and second milestone payments, respectively, and \$1,035 and \$1,200 in intangible assets for the first and second milestone payments, respectively. These amounts reflect the application of a discount to account for the time value of money, which adjusts the present value of the liabilities and intangible assets based on the timing of future payments. The definite-lived distribution right intangible asset related to the Evolysse® products approved in Europe is amortized on a straight-line basis over the remaining estimated useful life of 14 years and 2 months.

The Company capitalizes certain internal-use software costs associated with the development of its mobile and web-based customer platforms. These costs include personnel expenses and external costs that are directly associated with the software projects. These costs are classified as intangible assets in the accompanying condensed consolidated balance sheets. The capitalized internal-use software costs are amortized on a straight-line basis over the estimated useful life of two years upon being placed in service.

The Company reviews long-term and identifiable definite-lived intangible assets or asset groups for impairment when events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. If the sum of the expected future undiscounted cash flows is less than the carrying amount of the asset or an asset group, then further impairment analysis is performed. An impairment loss is measured as the amount by which the carrying amount of the asset or asset groups exceeds the fair value for assets to be held and used or fair value less cost to sell for assets to be disposed of. The Company also reviews the useful lives of its assets periodically to determine whether events and circumstances warrant a revision to the remaining useful life. Changes in the useful life are adjusted prospectively by revising the remaining period over which the asset is amortized. There was no material impairment of long-lived assets for any periods presented.

Leases

At the inception of a contractual arrangement, the Company determines whether the contract contains a lease by assessing whether there is an identified asset and whether the contract conveys the right to control the use of the identified asset in exchange for consideration over a period of time. If both criteria are met, the contract contains a lease and upon lease commencement, the Company records a lease liability which represents the Company's obligation to make lease payments arising from the lease, and a corresponding right-of-use ("ROU") asset which represents the Company's right to use an underlying asset during the lease term. Operating lease assets and liabilities are included in operating lease ROU assets, current portion of operating lease liabilities and long-term portion of operating lease liabilities in the accompanying condensed consolidated balance sheets.

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

Operating lease ROU assets and lease liabilities are initially recognized based on the net present value of the future minimum lease payments over the lease term at commencement date calculated using the Company's incremental borrowing rate applicable to the underlying asset unless the implicit rate is readily determinable. The incremental borrowing rate, the ROU asset and the lease liability are reevaluated upon a lease modification. Operating lease ROU assets also include any initial direct costs and lease payments made at or before lease commencement less any lease incentives received, if any. The Company determines the lease term as the noncancellable period of the lease and may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise such options. The Company's leases do not contain any residual value guarantees. Leases with a term of 12 months or less are not recognized on the condensed consolidated balance sheets. The Company accounts for lease and non-lease components together as a single lease component for all classes of underlying assets. For operating leases, the Company recognizes rent expense on a straight-line basis over the lease term. There were no significant finance leases as of June 30, 2026.

Contingent Royalty Obligation Payable to Evolus Founders

The Company was acquired by Strathspey Crown Holdings Group, LLC in 2013 and subsequently by its subsidiary, Alphaeon Corporation ("Alphaeon"), by means of a stock purchase agreement ("Stock Purchase Agreement") pursuant to which Alphaeon assumed certain payment obligations related to the acquisition. On December 14, 2017, the Stock Purchase Agreement was amended ("Amended Stock Purchase Agreement"), and, as a result, effective upon the closing of the Company's initial public offering in February 2018, the Company assumed all of Alphaeon's payment obligations under the Amended Stock Purchase Agreement.

Payment obligations to the Evolus Founders consist of quarterly royalty payments of a low single-digit percentage of net sales of Jeuveau®. The obligations terminate in the second quarter of 2029, which is the 10-year anniversary of the first commercial sale of Jeuveau® in the United States. Under the Amended Stock Purchase Agreement, the Company recorded the fair value of all revised payment obligations owed to the Evolus Founders.

The Company measures the fair value of the contingent royalty obligation payable at each reporting period end using a discounted cash flows method with Level 3 inputs. The related changes in the fair value of the contingent royalty obligation payable are recognized in operating expenses in the accompanying condensed consolidated statements of operations and comprehensive loss with corresponding adjustments to the liability in the accompanying condensed consolidated balance sheets.

Long-Term Debt

Long-term debt consists of the New Pharmakon Term Loans and the Revolving Credit Facility. Debt issuance costs represent legal, lender and consulting costs or fees associated with debt financing. Debt discounts and issuance costs are amortized into interest expense over the term of the debt. See *Note 7. Long-Term Debt* for additional information.

Foreign Currency Translation and Transactions

The financial statements of foreign subsidiaries are measured using the local currency as the functional currency. Assets and liabilities are translated into U.S. dollars at current exchange rates as of the balance sheet date, and income and expense items are translated into U.S. dollars using the average rates of exchange prevailing during the period. Gains and losses arising from translation are recorded in "Accumulated other comprehensive loss" in stockholders' equity in the accompanying condensed consolidated balance sheets. Foreign currency gains or losses related to transactions denominated in a currency other than the Company's functional currency are recorded in "Other income (expense), net" in the accompanying condensed consolidated statements of operations and comprehensive loss.

Revenue Recognition

The Company recognizes revenue when control of the promised goods or services is transferred to its customers, in an amount that reflects the consideration to which the Company expects to be entitled in exchange for the goods or services. In order to achieve that core principle, a five-step approach is applied: (1) identify the contract with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue allocated to each performance obligation when the

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

Company satisfies the performance obligation. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer and is the unit of account for revenue recognition.

General

The Company generates product revenue from the sales of Jeuveau® and Evolysse®, and service revenue from the sales of Jeuveau® through a distribution partner in Canada.

For product revenue, the Company recognizes revenue when control of the promised goods under a contract is transferred to a customer, in an amount that reflects the consideration the Company expects to receive in exchange for those goods as specified in the customer contract. The transfer of control occurs upon receipt of the goods by the customer since that is when the customer has obtained control of the goods' economic benefits. The Company does not provide any service-type warranties and does not accept product returns except under limited circumstances such as damages in transit or ineffective product. The Company also excludes any amounts related to taxes assessed by governmental authorities from revenue measurement. Shipping and handling costs associated with outbound product freight are accounted for as fulfillment costs and are included in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations and comprehensive loss.

For service revenue, the Company evaluated the arrangement with the distribution partner in Canada and determined that it acts as an agent in the distribution of Jeuveau® in Canada as it does not control the product before control is transferred to a customer. The indicators of which party exercises control include primary responsibility over performance obligations, inventory risk before the good or service is transferred and discretion in establishing the price. Accordingly, the Company records the sale as service revenue on a net basis. Revenue from services is recognized in the period the service is performed for the amount of consideration expected to be received.

Disaggregation of Revenue

The Company's disaggregation of revenue is consistent with its operating segment as disclosed above. See *Note 12. Segment Reporting* for the Company's revenue disaggregated by revenue source.

Gross-to-Net Revenue Adjustments

The Company provides customers with discounts, such as trade and volume discounts and prompt pay discounts, that are directly reflected in the invoice price. Revenues are recorded net of sales-related adjustments, wherever applicable, primarily for the volume-based rebates, consumer loyalty programs and co-branded marketing programs.

- *Volume-Based Rebates* — Volume-based rebates are offered to customers. The rebates payable to each customer are determined based on the contract and quarterly purchase volumes.
- *Consumer Loyalty Program* — The Company's consumer loyalty program allows participating customers to earn rewards for qualifying treatments to their patients (i.e. consumers) using the Company's products and redeem the rewards for the Company's products in the future at no additional cost. The loyalty program represents a customer option that provides a material right and, accordingly, is a performance obligation. When the Company's products are sold to participating customers, the invoice price is allocated between the product sold and the material right associated with the reward ("Reward") that the customer might redeem in the future. The standalone selling price of the Reward is measured based on estimated average selling price of the Company's products at the time of redemption and the expected redemption rate by participating customers based on historical data. The portion of invoice price allocated to the Reward is initially recorded as deferred revenue. Subsequently, when participating customers redeem the Reward, the related deferred revenue is reversed and recognized in net revenues.
- *Co-Branded Marketing Programs* — The Company offers eligible customers, with certain levels of purchases, advertising co-branded with the Company. The co-branded advertising represents a performance obligation. When the products are sold to customers, the invoice price is allocated between the product sold and the advertisement. The standalone selling price of the advertisement is measured based on the estimated market value of similar advertisement adjusted for the customer's portion of the advertisement. The portion of invoice price allocated to the

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

advertisement is initially recorded as deferred revenue. Subsequently, when the advertisement airs, the deferred revenue is recognized in net revenues at that time.

Contract Balances

A contract with a customer states the terms of the sale, including the description, quantity and price of each product purchased. Amounts are recorded as accounts receivable when the Company's right to consideration becomes unconditional. The Company does not have any significant financing components in customer contracts given the expected time between transfer of the promised products and the payment of the associated consideration is less than one year. As of June 30, 2026 and December 31, 2025, all amounts included in accounts receivable, net on the accompanying condensed consolidated balance sheets are related to contracts with customers.

The Company did not have any material contract assets or unbilled receivables as of June 30, 2026 and December 31, 2025. Sales commissions are included in selling, general and administrative expenses when incurred.

Contract liabilities represent estimated amounts that the Company is obligated to pay to customers, primarily consist of customer rebates and deferred revenue arising from the consumer loyalty program and co-branded marketing programs. These contract liabilities are included in accrued expenses in the accompanying condensed consolidated balance sheets.

As of June 30, 2026 and December 31, 2025, accrued revenue contract liabilities, primarily related to volume-based rebates, consumer loyalty program and co-branded marketing programs, were \$11,586 and \$11,548, respectively. These amounts are included in accrued expenses in the accompanying condensed consolidated balance sheets. For the three and six months ended June 30, 2026, provisions for rebates, consumer loyalty program, and co-branded marketing programs were \$12,837 and \$21,879, respectively, which were offset by related payments, redemptions and adjustments of \$9,870 and \$21,842, respectively. For the three and six months ended June 30, 2025, provisions for rebates, consumer loyalty program, and co-branded marketing programs were \$10,157 and \$20,318, respectively, which were offset by related payments, redemptions and adjustments of \$8,726 and \$26,046, respectively. The provisions for rebates, consumer loyalty program and co-branded marketing programs were recorded as adjustments to gross revenues in the accompanying condensed consolidated statements of operations and comprehensive loss for the three and six months ended June 30, 2026 and 2025.

In the six months ended June 30, 2026 and 2025, the Company recognized revenue of \$9,942 and \$13,833, respectively, related to amounts included in contract liabilities at the beginning of each period. The Company did not recognize any revenue related to changes in transaction prices for contracts with customers from previous periods.

Collectability

Accounts receivables are recorded at the net estimated realizable value and do not bear interest. At the time of contract inception or new customer account set-up, the Company performs a collectability assessment of the customer's creditworthiness. The Company assesses the probability that the Company will collect the entitled consideration in exchange for the goods sold, by considering the customer's ability and intention to pay when consideration is due. The Company's expected loss allowance methodology for accounts receivable is developed using historical collection experience, current and estimated future economic and market conditions and periodic evaluation of customers' receivables balances using relevant available information from internal and external sources relating to past events, current conditions, and forecasts. Historical credit loss experience provides the basis for estimation of expected credit losses and is adjusted as necessary using the relevant information available. The Company writes off accounts receivable balances when it is determined that there is no possibility of collection. As of June 30, 2026 and December 31, 2025, allowance for credit losses was \$4,915 and \$5,289, respectively. For the three and six months ended June 30, 2026, provision for bad debts was \$652 and \$914, respectively, and write-offs, net of recoveries, were \$615 and \$1,288, respectively. For the three and six months ended June 30, 2025, provision for bad debts was \$703 and \$1,754, respectively, and write-offs, net of recoveries, were \$54 and \$936, respectively.

Practical Expedients

The Company expenses sales commissions as incurred because the amortization period is one year or less. These costs are included in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations and comprehensive loss. The Company does not adjust the promised consideration for the effects of the time value of money for contracts in which the anticipated period between the transfer of goods or services to the customer and customer

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

payment is one year or less. The Company has elected the practical expedient to not disclose the transaction price allocated to remaining performance obligations for contracts with an original expected duration of one year or less. Remaining performance obligations primarily relate to deferred revenue arising from the consumer loyalty program and co-branded marketing programs and are expected to be recognized within one year. Remaining performance obligations not subject to this practical expedient were not material as of June 30, 2026. The Company did not have material consideration that was excluded from the transaction price due to the application of the variable consideration constraint.

Research and Development Expenses

Research and development costs are expensed as incurred. Research and development expenses include personnel-related costs, costs associated with pre-clinical and clinical development activities, costs associated with and for prototype products that are manufactured prior to market approval for that prototype product, internal and external costs associated with the Company's regulatory compliance and quality assurance functions, including the costs of outside consultants and contractors that assist in the process of submitting and maintaining regulatory filings, and overhead costs, including allocated facility related expenses.

Litigation Settlement

In connection with a litigation settlement, the Company agreed to pay Medytox, Inc. ("Medytox") a mid-single digit royalty percentage on all net sales of Jeuveau® for the period from September 17, 2022 to September 16, 2032. Royalty payments are made on a quarterly basis and the associated expenses are included in cost of goods sold in the accompanying condensed consolidated statements of operations and comprehensive loss in the periods the royalties are incurred.

See *Note 11. Medytox Settlement Agreements* for the details of the litigation settlement agreements.

Stock-Based Compensation

The Company recognizes stock-based compensation expense for employees, consultants and members of the Board of Directors based on the fair value on the date of grant.

The Company uses the Black-Scholes option pricing model to value stock option grants. The Black-Scholes option pricing model requires the input of certain subjective assumptions, including the expected volatility of the Company's common stock, expected risk-free interest rate, and the option's expected life. The fair value of the Company's restricted stock units ("RSUs") is based on the closing market price of the Company's common stock on the grant date. The Company also evaluates the impact of modifications made to the original terms of equity awards when they occur.

The Company uses a Monte Carlo simulation model to determine the fair value of performance units with market conditions on the grant date. The Monte Carlo simulation model involves the generation of a large number of possible stock price outcomes for the Company's stock, which is assumed to follow a Geometric Brownian Motion. The use of the Monte Carlo simulation model requires the input of a number of assumptions including expected volatility of the Company's stock price, which is based on its historical volatility; risk-free interest rate, which is based on the treasury zero-coupon yield commensurate with the term of the performance unit as of the grant date; and expected dividends as applicable, which is zero, as the Company has never paid any cash dividends.

The fair value of stock options and RSUs with service conditions is amortized on a straight-line basis over the requisite service period. Stock-based compensation for RSUs with performance or market conditions is recorded over the requisite service period using the accelerated attribution method. The Company recognizes stock-based compensation for RSUs with performance conditions if it is probable that those performance conditions will be met. Stock-based compensation expense is recognized, net of actual forfeitures when they occur, as an increase to additional paid-in capital in the condensed consolidated balance sheets and to selling, general and administrative or research and development expenses in the condensed consolidated statements of operations and comprehensive loss.

Income Taxes

The Company applies an estimated annual effective tax rate ("ETR") approach for calculating a tax provision or benefit for interim periods, as required under GAAP. The Company recorded an income tax benefit of \$154 and income tax expense of

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

\$53 for the three months ended June 30, 2026 and 2025, respectively, and an income tax expense of \$102 and \$125 for the six months ended June 30, 2026 and 2025, respectively. The Company's ETR differs from the U.S. federal statutory tax rate of 21% for the three and six months ended June 30, 2026 and 2025 primarily as a result of the change in the valuation allowance offsetting deferred tax assets.

A valuation allowance is recorded against deferred tax assets to reduce the net carrying value when it is more likely than not that some portion or all of a deferred tax asset will not be realized. In making such a determination, the Company considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, and ongoing prudent and feasible tax planning strategies in assessing the amount of the valuation allowance. When the Company establishes or reduces the valuation allowance against its deferred tax assets, its provision for income taxes will increase or decrease, respectively, in the period such determination is made.

Additionally, the Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The tax benefit recognized in the consolidated financial statements for a particular tax position is based on the largest benefit that is more likely than not to be realized upon settlement. Accordingly, the Company establishes reserves for uncertain tax positions.

The Company monitors changes to the tax laws in the states where it conducts business and files corporate income tax returns. The Company does not expect changes to state tax laws through June 30, 2026 to materially affect its condensed consolidated financial statements. Given the fact that the Company has generated net operating losses since inception, the Company's tax returns for all years since inception are open, under the statute of limitations, for audit.

Net Loss Per Share

Basic net loss per share is computed by dividing the net loss by the weighted-average number of shares of common stock outstanding during the period including contingently issuable shares for which all necessary conditions for issuance have been satisfied. Diluted earnings per share is computed based on the treasury stock method and includes the effect from potential issuance of ordinary shares, such as shares issuable pursuant to the exercise of stock options and the vesting of restricted stock units. Because the impact of equity classified stock options and non-vested RSUs is anti-dilutive during periods of net loss, there was no difference between the weighted-average number of shares used to calculate basic and diluted net loss per common share for the periods presented. Excluded from the dilutive net loss per share computation for the three and six months ended June 30, 2026 and 2025 were stock options of 6,789,707 and 6,558,707, respectively, and non-vested RSUs of 6,729,856 and 2,931,829, respectively, because their inclusion would have been anti-dilutive. Although these securities were anti-dilutive for these periods, they could be dilutive in future periods.

Recently Adopted Accounting Pronouncements

In July 2025, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2025-05, *Financial Instruments - Credit Losses (Topic 326): Measurements of Credit Losses for Accounts Receivable and Contract Assets*. This update simplifies the application of the current expected credit loss model by providing a practical expedient and accounting policy election, permitting entities to assume that conditions as of the balance sheet date remain unchanged over the life of the asset when measuring credit losses on current accounts receivable and current contract assets. ASU No. 2025-05 is effective for interim and annual reporting periods beginning after December 15, 2025, with early adoption permitted. The Company adopted the provisions of this ASU on a prospective basis in the first quarter of 2026, electing to apply the practical expedient to estimate its allowance for credit losses by assuming current conditions as of the balance sheet date remain unchanged over the remaining life of the Company's accounts receivable balances. The Company continues to adjust historical loss information, as appropriate, to reflect current conditions in estimating the allowance for credit losses. The adoption of this ASU did not have a material effect on the Company's condensed consolidated financial statements and related disclosures.

Recently Issued Accounting Pronouncements Not Yet Adopted

In November 2024, the FASB issued ASU No. 2024-03 *Income Statement - Reporting Comprehensive Income - Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses*, which requires disaggregated disclosure of certain costs and expenses on an interim and annual basis. ASU No. 2024-03 is effective for fiscal years

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027, with early adoption permitted. The disclosure updates are required to be applied prospectively with the option for retrospective application. The Company is currently evaluating the impact of adopting ASU No. 2024-03 on its consolidated financial statements and related disclosures.

In September 2025, the FASB issued ASU No. 2025-06 *Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Targeted Improvements to the Accounting for Internal-Use Software*, which updates the threshold for when an entity is required to start capitalizing software costs. ASU No. 2025-06 is effective for fiscal years beginning after December 15, 2027, and interim periods within those annual reporting periods with early adoption permitted. The Company is currently evaluating the impact of adopting ASU No. 2025-06 on its consolidated financial statements and related disclosures.

In December 2025, the FASB issued ASU No. 2025-11 *Interim Reporting (Topic 270)*, which clarifies interim disclosure requirements and enhances clarity in the application of Topic 270. ASU No. 2025-11 is effective for fiscal years beginning after December 15, 2027, including interim periods within those fiscal years. Early adoption is permitted. The amendments of this ASU can be applied prospectively or retrospectively. The Company is currently evaluating the impact of adopting ASU No. 2025-11 on its consolidated financial statements and related disclosures.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the SEC did not, or are not believed by management to, have a material impact on the Company's present or future financial position, results of operations, cash flows or disclosures.

Note 3. Fair Value Measurements

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The Company measures and reports certain financial instruments as assets and liabilities at fair value on a recurring basis. The fair value of these instruments was as follows:

	As of June 30, 2026			
	Fair Value	Level 1	Level 2	Level 3
<i>Liabilities</i>				
Contingent royalty obligation payable to Evolus Founders	\$ 29,035	\$ —	\$ —	\$ 29,035
	As of December 31, 2025			
	Fair Value	Level 1	Level 2	Level 3
<i>Liabilities</i>				
Contingent royalty obligation payable to Evolus Founders	\$ 32,182	\$ —	\$ —	\$ 32,182

There were no transfers between Level 1, Level 2, and Level 3 of the fair value hierarchy for assets or liabilities measured at fair value on a recurring basis as of June 30, 2026 and as of December 31, 2025.

The Company determines the fair value of the contingent royalty obligation payable to Evolus Founders based on Level 3 inputs using a discounted cash flows method, in which cash flows anticipated over the term of the contract are discounted to their present value using an expected discount rate. The significant unobservable input assumptions that can significantly change the fair value include (i) projected amount and timing of Jeuveau® net revenues during the payment period, which terminate at the end of the second quarter of 2029, (ii) the discount rate, and (iii) the timing of payments. As of June 30, 2026 and December 31, 2025, the Company utilized a discount rate of 13%, reflecting the Company's market risk premium. Net revenue projections are also updated to reflect changes in the timing of expected sales. Generally, increases (decreases) to the projected net revenues are accompanied by a directionally similar change to the estimated fair value of the contingent royalty obligation, while significant increases (decreases) in the discount rate would result in a significantly lower (higher) fair value measurement, which could materially impact the fair value reported in the condensed consolidated financial statements.

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

The following table provides a reconciliation of the beginning and ending fair value measurement of the contingent royalty obligation payable, which used significant unobservable inputs (Level 3):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2026	2025	2026	2025
Fair value, beginning of period	\$ 30,275	\$ 44,551	\$ 32,182	\$ 44,765
Payments	(2,490)	(2,051)	(4,383)	(4,416)
Change in fair value recorded in operating expenses	1,250	(3,914)	1,236	(1,763)
Fair value, end of period	<u>\$ 29,035</u>	<u>\$ 38,586</u>	<u>\$ 29,035</u>	<u>\$ 38,586</u>

Other Financial Assets and Liabilities

The Company's financial instruments consist primarily of cash and cash equivalents, accounts receivable, accounts payable, accrued expenses, lease liabilities, and long-term debt. The carrying amount of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses approximates their fair value because of the short-term maturity of such instruments.

The Company estimates the fair value of long-term debt and operating lease liabilities using the discounted cash flow analysis based on the interest rates of similar rated debt securities (Level 2). As of June 30, 2026 and December 31, 2025, the fair value of long-term debt was \$155,285 and \$148,828, respectively. The fair value of operating lease liabilities as of June 30, 2026 and December 31, 2025 approximated its carrying value.

Note 4. Goodwill and Intangible Assets

The table below provides the original cost, accumulated amortization and net book value by major intangible asset classification:

	Original Cost	Accumulated Amortization	Net Book Value
<i>Definite-lived intangible assets</i>			
Distribution rights	\$ 62,787	\$ (22,420)	\$ 40,367
Capitalized software	20,298	(14,972)	5,326
Intangible assets, net	83,085	(37,392)	45,693
<i>Indefinite-lived intangible asset</i>			
Goodwill	21,208	—	21,208
Total as of June 30, 2026	<u>\$ 104,293</u>	<u>\$ (37,392)</u>	<u>\$ 66,901</u>

	Original Cost	Accumulated Amortization	Net Book Value
<i>Definite-lived intangible assets</i>			
Distribution rights	\$ 62,787	\$ (20,805)	\$ 41,982
Capitalized software	18,876	(12,818)	6,058
Intangible assets, net	81,663	(33,623)	48,040
<i>Indefinite-lived intangible asset</i>			
Goodwill	21,208	—	21,208
Total as of December 31, 2025	<u>\$ 102,871</u>	<u>\$ (33,623)</u>	<u>\$ 69,248</u>

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

The following table outlines the estimated future amortization expense related to intangible assets held as of June 30, 2026 that are subject to amortization:

Fiscal year		
Remaining in 2026	\$	4,045
2027		5,485
2028		3,821
2029		3,210
2030		3,210
Thereafter		25,922
	\$	<u>45,693</u>

Distribution rights represent the license and associated distribution rights to Jeuveau® and Evolysse® and are amortized on a straight-line basis over their estimated useful life. No costs related to distribution rights were capitalized in the six months ended June 30, 2026 and 2025.

In the three months ended June 30, 2026 and 2025, the Company capitalized \$828 and \$1,483, respectively, and in the six months ended June 30, 2026 and 2025, the Company capitalized \$1,422 and \$3,363, respectively, relating to costs of computer software developed for internal use. The software is amortized over a two-year period using the straight-line method. In the three months ended June 30, 2026 and 2025, the Company recorded amortization expense relating to intangible assets of \$1,875 and \$1,495, respectively, and in the six months ended June 30, 2026 and 2025, the Company recorded amortization expense relating to intangible assets of \$3,768 and \$2,770, respectively. These amounts were included in cost of goods sold and depreciation and amortization in the accompanying condensed consolidated statements of operations and comprehensive loss.

Note 5. Accrued Expenses

Accrued expenses as of June 30, 2026 and December 31, 2025 consisted of the following:

	June 30, 2026	December 31, 2025
Accrued revenue contract liabilities	\$ 11,586	\$ 11,548
Accrued payroll and related benefits	11,139	10,788
Accrued royalties	5,197	5,846
Other accrued expenses ⁽¹⁾	9,802	7,409
Accrued expenses	<u>\$ 37,724</u>	<u>\$ 35,591</u>

(1) No individual item in "Other accrued expenses" exceeds 5% of total current liabilities.

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

Note 6. Property and Equipment

Property and equipment as of June 30, 2026 and December 31, 2025 consisted of the following:

	June 30, 2026	December 31, 2025
Equipment	\$ 836	\$ 769
Furniture	1,244	1,030
Leasehold improvements	6,402	6,100
Computers	531	531
Marketing fixtures	1,700	1,700
Total property and equipment	10,713	10,130
Less: accumulated depreciation	(5,667)	(4,759)
Property and equipment, net	\$ 5,046	\$ 5,371

In the three months ended June 30, 2026 and 2025, depreciation expense was \$461 and \$244, respectively. In the six months ended June 30, 2026 and 2025, depreciation expense was \$914 and \$531, respectively.

Note 7. Long-Term Debt
Revolving Credit Facility

On March 3, 2026, the Company, as borrower, entered into a Loan and Security Agreement (the “Loan Agreement”) with Eclipse Business Capital LLC, as administrative agent and the lenders party thereto. Pursuant to the Loan Agreement, the lenders provided a senior secured asset-based revolving credit facility (the “Revolving Credit Facility”) with a \$30,000 commitment and an uncommitted accordion feature of up to \$10,000, which is exercisable, subject to lenders party consent and other conditions, in \$5,000 increments or in its entirety. The Revolving Credit Facility has a minimum utilization requirement of \$10,000 and matures on March 3, 2029 with outstanding principal and interest fully due and payable at such time. Borrowings under the Revolving Credit Facility bear interest at a rate equal to adjusted term secured overnight financing rate (“SOFR”) (subject to a floor of 2.0%) plus an applicable margin of 4.25%, which is subject to downward adjustments based on certain coverage ratio and excess availability. The Revolving Credit Facility is subject to a closing fee of 1.0%, and outstanding undrawn principal of the facility is subject to an unused line fee of 0.5% per annum. The Company has the option to early terminate the Revolving Credit Facility subject to the payment of prepayment fees equal to 3.0% during the first year, 2.0% during the second year, and zero percent thereafter, subject to certain exceptions. Proceeds from the Revolving Credit Facility were or will be used to pay for transaction costs related to the Loan Agreement and for working capital and other general corporate purposes. In connection with the Revolving Credit Facility, the Company is required to pay other customary facility fees for credit facilities of a similar size and type.

Upon execution of the Loan Agreement, the Company incurred a total of \$668 in lender fees and qualifying debt issuance costs, which has been deferred as an asset and amortized into interest expense on a straight-line basis over the term of the Revolving Credit Facility.

Obligations under the Revolving Credit Facility are secured by substantially all of the Company’s assets, including accounts receivable, inventory, cash and intellectual property, subject to customary exceptions and are guaranteed by the Company and its subsidiaries. The Loan Agreement contains customary affirmative and negative covenants and events of default, including limitations on capital expenditures, indebtedness, liens, investments, asset dispositions, dividends and other restricted payments, as well as a minimum excess availability covenant and a change of control provision. As of June 30, 2026, the Company was in compliance with its debt covenants under the Loan Agreement. Principal outstanding under the Revolving Credit Facility was classified as long-term in the accompanying condensed consolidated balance sheets as of June 30, 2026.

Evolus, Inc.

(Unaudited)

New Pharmakon Term Loans

On May 5, 2025, the Company entered into the A&R Loan Agreement with Pharmakon, which amended and restated the Prior Pharmakon Loan Agreement (as defined below) in its entirety. Under the A&R Loan Agreement, Pharmakon agreed to make a senior secured term loan to the Company in an aggregate principal amount of up to \$250,000 to be funded in three tranches comprised of a \$150,000 tranche, which was funded upon the execution of the A&R Loan Agreement, and two additional tranches of up to \$50,000 each, available at the Company's election no later than December 31, 2026 (collectively, the "New Pharmakon Term Loans"). The New Pharmakon Term Loans accrue interest at a per annum rate equal to the 3-month SOFR (subject to a SOFR floor of 3.5%) plus 5.0% per annum. Payments related to the New Pharmakon Term Loans are interest only with a balloon principal payment due on the maturity date, which is May 5, 2030. The initial tranche of \$150,000 was released to the Company on May 5, 2025, which includes the \$125,000 of principal amount relating to the Prior Pharmakon Term Loans and \$25,000 of incremental borrowings. Total proceeds of \$23,390 were received by the Company, net of discounts and fees paid to Pharmakon, from the funding of the initial tranche. The second and third tranches, each in the principal amount of up to \$50,000 but no less than \$25,000, have a scheduled expiration date of December 31, 2026 and are available to be advanced at the Company's election, subject to the terms and conditions of the A&R Loan Agreement including payment of additional consideration of 1.0% on drawn principal of each tranche. The Company has the option to prepay all or any portion of the amounts owed prior to the maturity date, and all prepayments of principal are subject to certain prepayment premium. Additionally, the New Pharmakon Term Loans are subject to customary mandatory prepayments clauses, and all prepayments and repayments of the New Pharmakon Term Loans are subject to an exit consideration premium equal to the amount of any principal repaid multiplied by 2.0%.

This transaction with Pharmakon and the New Pharmakon Term Loans issued under the A&R Loan Agreement are accounted for as a debt modification in accordance with Accounting Standards Codification ("ASC") 470-50, *Debt Modifications and Extinguishments*. Upon closing of the first tranche, the Company incurred a total of \$5,644 in lender fees and debt modification costs relating to the New Pharmakon Term Loans. These fees and costs have been allocated based on specific identification basis between the funded and unfunded tranches. Direct lender fees of \$1,610 allocated to the initial tranche of the New Pharmakon Term Loans have been presented as a deduction to the debt principal balance and amortized into interest expense using the effective interest method. Debt modification costs of \$1,000 associated with the unfunded second and third tranches are deferred as an asset and is amortized into interest expense on a straight-line basis until the tranches are drawn upon which the remaining asset balance would be reclassified as a deduction to the principal amount and be amortized using the effective interest method. The remaining debt modification costs of \$3,034 allocated to the first tranche were expensed as incurred.

The New Pharmakon Term Loans are secured by substantially all of the Company's assets. The New Pharmakon Term Loans contain customary affirmative and restrictive covenants and representations and warranties. The affirmative covenants include, among others, certain information delivery requirements, obligations to maintain certain insurance, and certain notice requirements. The restrictive covenants include, among others, those that limit or restrict the Company's ability to incur certain additional indebtedness, consummate certain change in control transactions, or incur any non-permitted lien or other encumbrance on the Company's assets, without Pharmakon's prior written consent. The New Pharmakon Term Loans do not contain covenants requiring the Company to maintain a minimum cash threshold or minimum revenues or earnings. As of June 30, 2026, the Company was in compliance with its debt covenants under the A&R Loan Agreement. The borrowings outstanding under the New Pharmakon Term Loans were classified as long-term in the accompanying condensed consolidated balance sheets as of June 30, 2026.

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

Long-term debt obligations as of June 30, 2026 consisted of the following:

	June 30, 2026			
	Principal Balance	Unamortized Debt Financing Costs	Exit Consideration	Balance, Net
New Pharmakon Term Loans	\$ 150,000	\$ (3,819)	\$ 563	\$ 146,744
Revolving Credit Facility	10,000	—	—	10,000
Total long-term debt as of June 30, 2026	<u>\$ 160,000</u>	<u>\$ (3,819)</u>	<u>\$ 563</u>	<u>\$ 156,744</u>

Long-term debt obligations as of December 31, 2025 consisted of the following:

	December 31, 2025			
	Principal Balance	Unamortized Debt Financing Costs	Exit Consideration	Balance, Net
New Pharmakon Term Loans	\$ 150,000	\$ (4,215)	\$ 311	\$ 146,096
Total long-term debt as of December 31, 2025	<u>\$ 150,000</u>	<u>\$ (4,215)</u>	<u>\$ 311</u>	<u>\$ 146,096</u>

As of June 30, 2026 and December 31, 2025, the effective interest rate on the Company's outstanding term loans was approximately 9.85% and 10.15%, respectively, and the corresponding cash interest rate was 8.69% and 8.99%, respectively. As of June 30, 2026, the effective interest rate and cash interest rate on the Revolving Credit Facility were approximately 7.98%.

The following table presents a summary of the principal maturities of long-term debt as of June 30, 2026:

Fiscal year	
Remainder of 2026	\$ —
2027	—
2028	—
2029	10,000
2030	150,000
Thereafter	—
Total principal payments	<u>\$ 160,000</u>

Prior Pharmakon Term Loans

On December 14, 2021, the Company entered into a loan agreement with BPCR Limited Partnership, BioPharma Credit Investments V (Master) LP, and Biopharma Credit PLC (collectively, "Pharmakon"), which was subsequently amended in December 2022 and May 2023 (as amended, the "Prior Pharmakon Loan Agreement"). Pursuant to the Prior Pharmakon Loan Agreement, Pharmakon made loans to the Company totaling \$125,000 (the "Prior Pharmakon Term Loans"). From May 2023 to the modification of the loan in May 2025, the Prior Pharmakon Term Loans accrued interest at a per annum rate equal to the 3-month SOFR (subject to a SOFR floor of 1.0%) plus 8.5% per annum.

Note 8. Operating Leases

The Company's operating leases are related to its corporate headquarters in Newport Beach, California and do not contain any residual value guarantees or material restrictive covenants. The minimum lease payments associated with lease renewal will only be included in the measurement of the lease liability and ROU assets if the exercise of the renewal option is determined to be reasonably certain. The Company considers the timing of the renewal period and other economic factors

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

such as the financial implications of a decision to extend or not to extend a lease in determining if the renewal option is reasonably certain to be exercised.

Certain of the Company's operating leases include variable lease payments that are not determinable at lease commencement. Accordingly, these variable lease payments are excluded from the measurement of ROU assets and lease liabilities and are recognized as lease expense in the period in which they are incurred.

The components of operating lease expense are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2026	2025	2026	2025
Fixed operating lease expense	\$ 559	\$ 535	\$ 1,118	\$ 1,006
Variable operating lease expense	221	53	369	102
Total operating lease expense	<u>\$ 780</u>	<u>\$ 588</u>	<u>\$ 1,487</u>	<u>\$ 1,108</u>

Supplemental information on operating leases is as follows:

	June 30, 2026	December 31, 2025
Weighted-average remaining lease term (years)	3.6	4.1
Weighted-average discount rate	9.9 %	9.9 %

Operating lease expenses are included in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations and comprehensive loss. Operating lease ROU assets and related current and long-term operating lease liabilities are presented in the accompanying condensed consolidated balance sheets.

The following table presents the future minimum lease payments under operating lease agreements with non-cancelable terms as of June 30, 2026:

Fiscal year	
Remainder of 2026	\$ 1,268
2027	2,617
2028	2,709
2029	2,805
2030	234
Thereafter	—
Total minimum lease payments	<u>\$ 9,633</u>
Less: imputed interest	<u>(1,573)</u>
Present value of operating lease liabilities	<u>\$ 8,060</u>

Note 9. Commitments and Contingencies

Daewoong Agreement

The Daewoong Agreement includes certain minimum annual purchases that the Company is required to make in order to maintain the exclusivity of the license. The Company may, however, meet these minimum purchase obligations by achieving certain market share in the licensed territories. These potential minimum purchase obligations are contingent upon the occurrence of future events, including receipt of governmental approvals and the Company's future market share in various jurisdictions.

(in thousands, except share and per share data)
(Unaudited)

Total inventory payments to Daewoong were \$31,319 and \$21,786 in the three months ended June 30, 2026 and 2025, respectively, and \$43,068 and \$38,849 in the six months ended June 30, 2026 and 2025, respectively.

Symatase U.S. Agreement and Symatase Europe Agreement

The Symatase U.S. Agreement and the Symatase Europe Agreement include certain minimum purchase requirements, and failure to meet such requirements may result in a reduction or termination of the Company's exclusive rights, subject to certain exceptions. These potential minimum purchase obligations are contingent upon the occurrence of future events, including receipt of governmental approvals and the Company's future market share in various jurisdictions.

Pursuant to the Symatase U.S. Agreement, the Company is required to make up to €16,200 in milestone payments to Symatase, including an initial payment of €4,100 within 30 days of execution of the Symatase U.S. Agreement. The additional annual payments of €1,600 in June 2025, €4,100 in June 2026, €3,200 in June 2027, and €3,200 in June 2028 are, in each case, subject to and contingent on three of the products gaining approval prior to the milestone payment dates. If regulatory approval of three of the products is not achieved prior to the aforementioned milestone payment dates, then the related milestone payments will be due and payable to Symatase on the date of approval. In June 2023, the Company paid \$4,441 as an upfront payment upon the signing of the Symatase U.S. Agreement and has developmental costs, ongoing milestone and royalty payment obligations. As of June 30, 2026, regulatory approval of three of the products has not been achieved; as such no additional annual milestone payments have been made.

Pursuant to the Symatase Europe Agreement, the Company is required to pay two milestone payments: (i) €1,200 on the second anniversary of certain regulatory approvals, and (ii) €1,900 on the later of the third anniversary of certain regulatory approvals or December of any year in which the Company achieves US\$25,000 of net revenue in Europe, provided that if the regulatory approvals are achieved the payment shall occur no later than December 2029 regardless of the revenue condition.

In October 2024, the Company received European Union MDR approval for the remaining three injectable HA gel products. As a result, the two milestone payments have been triggered. The first milestone payment is payable on the two-year anniversary of the approval, which is October 2026. For the second milestone payment, the Company expects to make the payment in December 2029. Upon receiving approval, the Company recorded \$1,035 and \$1,200 in contingent milestone payment liabilities for the first and second milestone payments, respectively, and \$1,035 and \$1,200 in intangible assets for the first and second milestone payments, respectively. These amounts reflect the application of a discount to account for the time value of money, which adjusts the present value of the liabilities and intangible assets based on the timing of future payments.

Legal Proceedings

The Company is, from time to time, involved in various litigation matters or regulatory encounters arising from the ordinary course of business that could result in unasserted or asserted claims or litigation. These other matters may raise difficult and complex legal issues and are subject to many uncertainties, including, but not limited to, the facts and circumstances of each particular case or claim, the jurisdiction in which each suit or regulatory encounter is brought, and differences in applicable laws and regulations. Except as set forth above, the Company does not believe that these other matters would have a material adverse effect on its financial position, results of operations or cash flows. However, the resolution of one or more of the other matters in any reporting period could have a material adverse impact on the Company's financial results for that period.

In the normal course of business, the Company enters into contracts and agreements that contain a variety of representations and warranties and provide for general indemnifications. The Company's exposure under these agreements is unknown because they involve claims that may be made against the Company in the future, but have not yet been made. The Company accrues a liability for such matters when it is probable that future expenditures will be made, and such expenditures can be reasonably estimated. No amounts were accrued as of June 30, 2026.

Note 10. Stock-Based Compensation and Stockholders' Equity

The following table summarizes the compensation expense related to the Company's stock-based compensation arrangements recognized in the accompanying condensed consolidated statements of operations and comprehensive loss:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2026	2025	2026	2025
Selling, general and administrative	\$ 5,226	\$ 4,346	\$ 9,976	\$ 10,095
Research and development	396	142	762	321
Total stock-based compensation expense, excluding capitalized stock-based compensation expense	\$ 5,622	\$ 4,488	\$ 10,738	\$ 10,416
Capitalized stock-based compensation expense in Intangible assets, net	15	35	20	73
Total stock-based compensation expense	<u>\$ 5,637</u>	<u>\$ 4,523</u>	<u>\$ 10,758</u>	<u>\$ 10,489</u>

As of June 30, 2026, there were \$40,410 of total unrecognized compensation costs related to unvested shares subject to outstanding service-based stock options and restricted stock units. Unrecognized compensation costs associated with these stock options and restricted stock units are expected to be expensed over a weighted-average period of 2.7 and 2.9 years, respectively. As of June 30, 2026, total unrecognized compensation costs related to unvested shares subject to outstanding performance-based restricted stock units and market-based restricted stock units were \$5,395. Unrecognized compensation costs associated with outstanding performance-based restricted stock units and market-based restricted stock units are expected to be expensed over a weighted-average period of 2.4 years.

Preferred Stock

The Company has 10,000,000 authorized shares of preferred stock with a par value of \$0.00001 per share. As of June 30, 2026 and December 31, 2025, no shares of its preferred stock were issued and outstanding.

Common Stock

The Company has 100,000,000 authorized shares of common stock with a par value of \$0.00001 per share. As of June 30, 2026 and December 31, 2025, 66,013,698 and 65,008,183 shares of its common stock were issued and outstanding, respectively.

2024 Employee Stock Purchase Plan ("2024 ESPP")

On June 6, 2024, the Company approved the adoption of the 2024 Employee Stock Purchase Plan. The 2024 ESPP provides an opportunity to purchase shares of the Company's common stock at a favorable price and upon favorable terms in consideration of the participating employees' continued services. Eligible employees will be entitled to purchase, by means of payroll deductions, limited numbers of the Company's common stock at a discount during periodic offering periods, and the first offering period under the 2024 ESPP commenced on May 1, 2025. There were 579,648 shares initially reserved for issuance under the 2024 ESPP, which shall automatically increase on March 5th of each calendar year, by an amount equal to the lesser of (i) 1.0% of the total number of shares of common stock issued and outstanding on March 4th of the year in which such increase is to occur, (ii) 579,648 shares of common stock, or (iii) such number of shares of common stock as may be established by the Board of Directors. As of June 30, 2026, the Company had issued 106,180 shares under the 2024 ESPP.

Termination of "At-the-Market" Offering Program

On March 8, 2023, the Company entered into the ATM Sales Agreement with Leerink Partners LLC (the "Sales Agent"), pursuant to which the Company could sell shares of its common stock from time to time for an aggregate gross proceeds of up to \$50,000 (the "ATM Program"). Under the ATM Sales Agreement, the Sales Agent is entitled to a commission of 3.0% of the gross proceeds from any sales of the Company's common stock under the ATM Program. On May 1, 2026, the Company terminated the ATM Sales Agreement and the related ATM Program. No shares were sold under the ATM Sales Agreement prior to its termination.

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

2017 Omnibus Incentive Plan

The Company's 2017 Omnibus Incentive Plan (the "Plan") provides for the grant of incentive options to employees of the Company and for the grant of non-statutory options, restricted stock awards, restricted stock unit awards, stock appreciation rights, performance stock awards and other forms of stock compensation to the Company's officers, directors, consultants and employees. The maximum number of shares of common stock that may be issued under the Plan is 4,361,291 shares, plus an annual increase on November 21st of each year equal to 4.0% of the total issued and outstanding shares of the Company's common stock as of such anniversary (or such lesser number of shares as may be determined by the Company's Board of Directors). As of June 30, 2026, the Company had an aggregate of 1,066,508 shares of its common stock available for future issuance under the Plan.

2023 Inducement Incentive Plan

In September 2023, the Company's Board of Directors adopted the Company's 2023 Inducement Incentive Plan (the "Inducement Plan") in accordance with Nasdaq Listing Rule 5635(c)(4). The Inducement Plan provides for the grant of equity awards to selected individuals in connection with their commencing employment with the Company as an inducement material to their accepting such employment. The Board of Directors had reserved a total of 2,000,000 shares of common stock for issuance under the Inducement Plan. As of June 30, 2026, the Company had an aggregate of 495,824 shares of its common stock available for future issuance under the Inducement Plan.

Inducement Grants

From time to time, the Company has granted equity awards to its newly hired employees, including executives, in accordance with Nasdaq Listing Rule 5635(c)(4) and outside of the Plan and Inducement Plan. Such grants were made pursuant to a stand-alone nonstatutory stock option agreement and a stand-alone RSU agreement, which were approved by the Compensation Committee of the Board of Directors. Any shares underlying the inducement grants are not, upon forfeiture, cancellation or expiration, returned to a pool of shares reserved for future issuance.

Stock Options

Options to purchase the Company's stock are granted at exercise prices based on the Company's common stock price on the date of grant. The option grants generally vest over a one- to four-year period. The options have a contractual term of ten years. The fair value of options is estimated using the Black-Scholes option pricing model, which has various inputs, including the grant date common share price, exercise price, risk-free interest rate, volatility, expected life and dividend yield. The change of any of these inputs could significantly impact the determination of the fair value of the Company's options as well as significantly impact its results of operations. The Company records stock-based compensation expense net of actual forfeitures when they occur.

The significant assumptions used in the Black-Scholes option-pricing model are as follows:

- *Expected Volatility.* The expected volatility of common stock is estimated based on the historical volatility of the Company's common stock over the most recent period commensurate with the estimated expected term of the stock options.
- *Expected Term.* The expected term represents the period of time in which the options granted are expected to be outstanding. The Company estimates the expected term of options with consideration of vesting date, contractual term, and historical experience. The expected term of "plain vanilla" options is estimated based on the midpoint between the vesting date and the end of the contractual term under the simplified method permitted by the SEC implementation guidance. The weighted-average expected term of the Company's options is approximately six years.
- *Risk-Free Rate.* The risk-free interest rate is selected based upon the implied yields in effect at the time of the option grant of U.S. Treasury zero-coupon issues with a term approximately equal to the expected life of the option being valued.

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

- *Dividends.* The Company does not anticipate paying cash dividends in the foreseeable future. Consequently, the Company uses an expected dividend yield rate of zero.

Service-Based Restricted Stock Units

Service-based RSU grants generally vest over a one- to four-year period. The fair value of service-based RSU grants is determined based on the closing market price of the Company's common stock on the grant date.

Performance-Based Restricted Stock Units

Under the Plan, the Company's Board of Directors has granted performance restricted stock units ("PRSUs") with various performance-based vesting terms to certain executive officers. The PRSUs function in the same manner as service-based restricted stock units except that vesting terms are based on the achievement of certain pre-established performance measures, if the grantee is in service to the Company upon the achievement of such performance hurdles. Compensation expense related to PRSUs is recognized when attainment of the performance milestones is deemed to be probable and over a period in which the Company estimates the performance hurdles will be achieved.

Market-Based Restricted Stock Units

For RSUs granted to employees that vest based on market conditions, such as the trading price of the Company's common stock exceeding certain price targets or the total shareholder return ("TSR") of the Company's common stock relative to the Russell 2000 index, the Company uses Monte Carlo Simulation to estimate the fair value on the date of grant and recognizes compensation cost over the requisite service period. Compensation expense is recorded if the requisite service period is satisfied regardless of whether the market condition is met.

Note 11. Medytox Settlement Agreements

Medytox Settlement Agreement

In February 2021, the Company settled certain litigation with Medytox, Inc. ("Medytox") related to Jeuveau® by means of settlement and license agreements (the "Medytox Settlement Agreements"). From September 17, 2022 to September 16, 2032, the Company has paid and will pay Medytox a quarterly, mid-single digit royalty percentage on net sales of Jeuveau® sold in the United States and other Evolus territories pursuant to the Medytox Settlement Agreements.

As of June 30, 2026 and December 31, 2025, the Company accrued \$4,501 and \$4,985, respectively, for royalties under the Medytox Settlement Agreements.

Note 12. Segment Reporting

The Company conducts business as a single operating and reportable segment, focusing on the business of performance beauty by delivering breakthrough products to the cash-pay aesthetic market. Under this organizational structure, the Chief Executive Officer, serving as the CODM, assesses performance and manages the Company's operations as one integrated business. The identification of a single operating and reportable segment is consistent with the management approach in that the CODM regularly reviews consolidated financial information for the purpose of assessing performance and allocating resources.

The CODM regularly reviews (i) net revenues, (ii) gross profit, (iii) operating profit or loss and (iv) net income or loss and uses net income or loss as the key measure of segment profit or loss when allocating resources and assessing performance. The CODM compares net income or loss in prior periods with that of the current period, evaluates actual results against budget and forecast, identifies relevant business factors and trends, and evaluates the achievements of the Company's established strategic goals. In April 2025, the Company launched Evolysse® Form and Evolysse® Smooth in the United States, and, in May 2026, the Company launched four Evolysse® products in Europe. As such, segment product net revenue has been recast in connection with the launch of Evolysse®. The table below presents selected financial information of the

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

Company's single reportable segment regularly provided to and reviewed by the CODM and a reconciliation of segment net loss to consolidated net loss as computed under U.S. GAAP:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2026	2025	2026	2025
Revenue:				
Jeuveau®	\$ 74,456	\$ 58,968	\$ 140,477	\$ 127,042

Other segment items ⁽¹⁾	1,037	(3,763)	903	(1,669)
Segment net loss	\$ (8,052)	\$ (17,142)	\$ (18,726)	\$ (36,034)
Reconciliation of profit and loss (Segment net loss/profit):				
Adjustments and reconciling items	—	—	—	—
Consolidated net loss	\$ (8,052)	\$ (17,142)	\$ (18,726)	\$ (36,034)

(1) Other segment items include revaluation of contingent royalty obligation payable to Evolus Founders and Other (income) expense, net.

Information regarding segment assets provided to the CODM is consistent with that reported in the accompanying condensed consolidated balance sheets with particular emphasis on the Company's available liquidity and working capital, including its cash and cash equivalents, accounts receivables, inventory and current liabilities.

Note 13. Subsequent Events

IBSA License Agreement - Profhilo®

On July 7, 2026, the Company entered into a License, Supply and Distribution Agreement (the "IBSA Agreement") with IBSA Institut Biochimique SA ("IBSA"). Under the IBSA Agreement, IBSA granted to the Company an exclusive right and license to develop, commercialize and distribute Profhilo®, an injectable hyaluronic acid product for skin-quality applications, in the United States for use in the aesthetics and dermatological fields (the "Field"). The IBSA Agreement also provides the Company with the right to negotiate for certain additional products in the Profhilo® brand family and related line extensions in the Field within the United States.

Under the terms of the IBSA Agreement, the Company will be responsible for development activities required to obtain U.S. regulatory approval for Profhilo®, as well as commercialization activities following approval. The IBSA Agreement does not require the Company to make any upfront payment or milestone payments to IBSA. Beginning in the fourth year following the commercial launch of Profhilo® in the United States, the Company will be subject to certain minimum purchase requirements. Failure to satisfy such requirements may result in the conversion of the Company's exclusive rights to non-exclusive rights or termination of the IBSA Agreement, subject to certain exceptions. Because the timing of regulatory

Evolus, Inc.
Notes to Condensed Consolidated Financial Statements
(in thousands, except share and per share data)
(Unaudited)

approval and commercial launch is uncertain, the Company cannot reasonably estimate the future financial impact of its development and commercialization activities related to Profhilo[®], including any potential obligations under the minimum purchase requirements.

The initial term of the IBSA Agreement is fifteen (15) years from the date of the first U.S. Food and Drug Administration approval of Profhilo[®]. The IBSA Agreement may be renewed for successive five (5)-year terms, subject to the terms set forth in the IBSA Agreement.

Symatase EU Amendments

On August 3, 2026, the Company and Symatase entered into a series of agreements (collectively, the “Symatase EU Amendments”) that amended and expanded the Company’s commercialization rights under the Symatase Europe Agreement. As a result of the Symatase EU Amendments, the Company has exclusive rights to commercialize and distribute the full line of Evolysse[®] injectable HA gel products in each of (i) Europe, (ii) Canada and (iii) Australia and New Zealand (each, a “Sub-Territory” and collectively, the “Sub-Territories”) for use in the aesthetics and dermatological fields. Symatase is responsible, at its sole expense, for obtaining and maintaining regulatory approvals for the products in the Sub-Territories.

Under the Symatase EU Amendments, the Company is required to make aggregate upfront payments of €1,420 and may be required to make additional payments of up to €2,880 upon receipt of certain regulatory approvals and completion of certain registration processes.

The Company is subject to minimum purchase requirements under the Symatase Europe Agreement, as amended. Failure to satisfy the purchase requirements may result in a reduction or termination of the Company’s exclusive rights in the applicable Sub-Territory, subject to certain exceptions. The initial term for each Sub-Territory is 15 years from the first applicable regulatory approval in such Sub-Territory and will automatically renew for successive five-year terms, subject to the terms of the Symatase Europe Agreement.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion contains management’s discussion and analysis of our financial condition and consolidated results of operations and should be read together with the unaudited condensed consolidated financial statements and the related notes thereto included in Part I, Item 1 of this Quarterly Report on Form 10-Q and in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2025 and other documents previously filed with the SEC. This discussion contains forward-looking statements that reflect our plans, estimates and beliefs and involve numerous risks and uncertainties, including but not limited to those described in Item 1A “Risk Factors” in Part II of this Quarterly Report on Form 10-Q. Actual results may differ materially from those contained in any forward-looking statements. You should carefully read “Special Note Regarding Forward-Looking Statements” and Item 1A “Risk Factors” in Part II of this Quarterly Report on Form 10-Q.

Overview

We are a global performance beauty company delivering breakthrough products with a customer-centric approach in the cash-pay aesthetic market. Our current commercial product portfolio includes Jeuneau® (prabotulinumtoxinA-xvfs) and Evolysse®, a collection of injectable hyaluronic acid, or HA, gels. We currently sell Jeuneau® in the United States, Canada, certain European countries and Australia. We currently sell Evolysse® Form and Evolysse® Smooth in the United States and four Evolysse® products in Europe. We anticipate two additional Evolysse® products, Evolysse® Sculpt and Evolysse® Lips, to be approved in the United States in 2026 and 2027, respectively.

Our primary market is the cash-pay aesthetic market, which consists of medical products that consumers pay for directly out of pocket. Our customers are aesthetic practitioners who are properly licensed to deliver our products. By avoiding the regulatory burdens that accompany reimbursed products and pursuing an aesthetic-only non-reimbursed product strategy, we create flexibility to deliver a unique value proposition to our customers. We utilize this flexibility to drive customer adoption through programs such as our consumer loyalty program, co-branded marketing programs, portfolio bundles, promotional events and pricing strategies.

Recent Key Developments

On July 7, 2026, we entered into a License, Supply and Distribution Agreement, or the IBSA Agreement, with IBSA Institut Biochimique SA, or IBSA. Under the IBSA Agreement, IBSA granted us an exclusive right and license to develop, commercialize and distribute Profhilo®, an injectable hyaluronic acid product for skin-quality applications, in the United States for use in the aesthetics and dermatological fields. The IBSA Agreement does not require us to make any upfront payment or milestone payments to IBSA. We anticipate commercialization of Profhilo® in the United States in 2030, subject to regulatory approval.

On August 3, 2026, we entered into a series of agreements with Symatase that amended and expanded our commercialization rights under our agreements with Symatase. Under these agreements, we have added exclusive rights to commercialize the full line of Evolysse® injectable HA gel products in Europe, and in the new territories of Canada, Australia and New Zealand. As a result, we now hold exclusive rights to commercialize Evolysse® in every market where we have commercialized Jeuneau®. Under these agreements, we are required to make aggregate upfront payments of €1.4 million and may be required to make additional payments of up to €2.9 million upon receipt of certain regulatory approvals and completion of certain registration processes. We anticipate commercialization in these new territories in 2028, subject to applicable regulatory approvals.

Market Trends and Uncertainties

Macroeconomic conditions in the United States remain mixed and uncertain, with moderating inflation and continued economic expansion offset by muted job growth, weaker consumer confidence, and evolving tariff and trade policy developments. Geopolitical tensions, including ongoing conflicts in the Middle East, add further uncertainty through potential disruptions to global energy markets, supply chains, and transportation networks, which could contribute to energy price volatility and heightened inflationary pressures. Collectively, these conditions may reduce discretionary spending by consumers and purchasing decisions by our customers, and, if they persist or worsen, could adversely affect the demand for our products.

U.S. tariff policy remains fluid and subject to change. Tariffs applicable to our products will increase our costs and, absent mitigation, adversely affect our gross margin and operating results. However, the ultimate impact remains uncertain given the volatility and evolving scope of U.S. and foreign trade policies. During the second quarter of 2026, Evolysse®, which we

import from the European Union, was subject to a temporary 10% tariff. On July 24, 2026 those tariffs expired, and were replaced by a new 10% tariff on Evolysse® under Section 301 of the Trade Act of 1974.

Separately, beginning September 29, 2026, Jevueu®, a biologic that is manufactured in South Korea, could be subject to a 15% tariff under Section 232 of the Trade Expansion Act of 1962, depending on how the applicable rules are interpreted and applied. We have increased inventory purchases in advance of the potential Jevueu® tariff and are evaluating other mitigation measures while we monitor additional guidance on the scope and implementation of the tariffs, including the availability and conditions of exemptions.

Following the U.S. Supreme Court's invalidation of tariffs previously imposed under the International Emergency Economic Powers Act, or IEEPA, we submitted claims for refunds of certain tariffs previously paid. The amount and timing of any refunds remain uncertain.

As of June 30, 2026, the majority of our debt outstanding represents a long-term loan bearing variable rates of interest (see *Note 7. Long-Term Debt* in the Notes to the Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q for additional information). Changes in market interest rates will affect the interest expense incurred from this outstanding debt instrument, increasing or decreasing our interest expense in future periods. Additionally, changes in market interest rates may affect the interest rate and corresponding interest expense on any new issuance of short-term and long-term debt securities. See Part I, Item 3 of this Quarterly Report on Form 10-Q for more information.

Results of Operations

Comparison of the Three Months Ended June 30, 2026 and 2025

The following table summarizes our consolidated results of operations for the periods indicated:

(in thousands)	Three Months Ended June 30,	
	2026	2025
Revenue:		
Product revenue, net	\$ 83,350	\$ 68,699
Service revenue	734	688
Total net revenues	84,084	69,387
Cost of goods sold	26,904	24,067
Gross profit	57,180	45,320
Gross profit margin	68.0 %	65.3 %
Operating expenses:		
Selling, general and administrative	57,052	56,675
Research and development	1,892	1,837
Revaluation of contingent royalty obligation payable to Evolus Founders	1,250	(3,914)
Depreciation and amortization	1,529	932
Total operating expenses	61,723	55,530
Loss from operations	(4,543)	(10,210)
Other income (expense):		
Interest expense, net	(3,876)	(6,728)
Other income (expense), net	213	(151)
Loss before income taxes	(8,206)	(17,089)
Income tax benefit (expense)	154	(53)
Net loss	\$ (8,052)	\$ (17,142)
Currency translation adjustment	(251)	240
Comprehensive loss	\$ (8,303)	\$ (16,902)

Net Revenues

We currently operate one reportable segment, and our net product revenues are derived from the sale of Jeuveau® and Evolysse®. Net revenues consist of gross revenues, net of adjustments primarily relating to customer rebates, rewards associated with consumer loyalty program, and co-branded marketing programs. Revenues are recognized when the control of the promised goods is transferred to the customer in an amount that reflects the consideration allocated to the related performance obligations and to which we expect to be entitled in exchange for those products or services.

Net revenues increased by \$14.7 million, or 21.2%, to \$84.1 million in the three months ended June 30, 2026 from \$69.4 million in the three months ended June 30, 2025, primarily due to higher Jeuveau® sales. Net revenues in the three months ended June 30, 2026 and 2025 each contained \$0.7 million of service revenue from sales of Jeuveau® through a distribution partner in Canada. We anticipate our continued sales growth will depend on (i) our ability to grow our customer base and to increase purchases by our current customers in the competitive aesthetic market, (ii) the continued success of Evolysse® Form and Evolysse® Smooth products in the United States, (iii) the success of the commercial launch of Evolysse® injectable HA gel collection in Europe and (iv) the regulatory approval for the Evolysse® Sculpt and Evolysse® Lips products in the United States.

Cost of Goods Sold

Cost of goods sold primarily consists of inventory cost, amortization of intangible asset relating to distribution right and certain royalties. Cost of goods sold increased by \$2.8 million, or 11.8%, to \$26.9 million in the three months ended June 30, 2026 from \$24.1 million in the three months ended June 30, 2025, primarily attributable to higher volumes of products shipped to customers, partially offset by a reduction in cost of goods sold of \$1.1 million resulting from the recognition of IEEPA tariff refunds. We anticipate that our cost of goods sold will fluctuate due to changes in product and geographic mix and the impact of current and threatened tariffs.

Gross Profit Margin

Our gross profit margin was 68.0% and 65.3% in the three months ended June 30, 2026 and 2025, respectively. The recognition of IEEPA tariff refunds provided a 1.2 percentage point increase in gross profit margin in the three months ended June 30, 2026. We anticipate that our gross profit margin will fluctuate due to changes in product and geographic mix, the effect of current and threatened tariffs, and the impact of promotional and incentive programs on our average selling prices.

Selling, General and Administrative

Selling, general and administrative expenses increased by \$0.4 million, or 0.7%, to \$57.1 million in the three months ended June 30, 2026 from \$56.7 million in the three months ended June 30, 2025, primarily resulting from increased personnel-related costs. Selling, general and administrative expenses may fluctuate in the future primarily driven by potential changes in marketing strategies, launches of new products and international expansion.

Research and Development

Research and development expenses were \$1.9 million in the three months ended June 30, 2026 and remained relatively consistent with that in the three months ended June 30, 2025. We expect our research and development expenses to increase, if and when, we develop additional product candidates and pursue regulatory approvals.

Revaluation of Contingent Royalty Obligation Payable to Evolus Founders

The change in the fair value of the contingent royalty obligation payable to the Evolus Founders is recorded in operating expenses in each reporting period. In the three months ended June 30, 2026 and 2025, we recognized a net revaluation charge of \$1.3 million and an unrealized gain of \$3.9 million, respectively. Changes to the fair value of the contingent royalty obligation payable to Evolus Founders are driven by changes in management assumptions relating to revenue forecasts, the discount rate used and the timing of cash flows.

Depreciation and Amortization

Depreciation and amortization increased by \$0.6 million, or 64.1%, to \$1.5 million in the three months ended June 30, 2026 from \$0.9 million in the three months ended June 30, 2025, primarily due to an increase in amortization of internal-use software and depreciation of leasehold improvements.

Interest Expense, Net

Interest expense, net, decreased by \$2.9 million, or 42.4%, to \$3.9 million in the three months ended June 30, 2026 from \$6.7 million in the three months ended June 30, 2025, primarily due to \$3.0 million of debt modification fees recognized in connection with the New Pharmakon Loans in the three months ended June 30, 2025. Interest on the Revolving Credit Facility and the New Pharmakon Term Loans (as defined below) is based on variable interest rates, which we expect will continue to fluctuate with the market. See “Liquidity and Capital Resources—*The Pharmakon Term Loans*” and “Liquidity and Capital Resources—*The Revolving Credit Facility*” for further information.

Income Tax Benefit (Expense)

There was minimal income tax benefit in the three months ended June 30, 2026 and minimal income tax expense in the three months ended June 30, 2025.

Comparison of the Six Months Ended June 30, 2026 and 2025

The following table summarizes our consolidated results of operations for the periods indicated:

(in thousands)	Six Months Ended June 30,	
	2026	2025
Revenue:		
Product revenue, net	\$ 156,097	\$ 136,773
Service revenue	1,124	1,136
Total net revenues	157,221	137,909
Cost of goods sold	51,144	45,934
Gross profit	106,077	91,975
<i>Gross profit margin</i>	<i>67.5 %</i>	<i>66.7 %</i>
Operating expenses:		
Selling, general and administrative	109,033	113,315
Research and development	4,132	4,049
Revaluation of contingent royalty obligation payable to Evolus Founders	1,236	(1,763)
Depreciation and amortization	3,067	1,756
Total operating expenses	117,468	117,357
Loss from operations	(11,391)	(25,382)
Other income (expense):		
Interest expense, net	(7,566)	(10,433)
Other income (expense), net	333	(94)
Loss before income taxes	(18,624)	(35,909)
Income tax expense	(102)	(125)
Net loss	\$ (18,726)	\$ (36,034)
Currency translation adjustment	(373)	306
Comprehensive loss	\$ (19,099)	\$ (35,728)

Net Revenues

We currently operate one reportable segment, and our net product revenues are derived from the sale of Jeuveau® and Evolysse®. Net revenues consist of gross revenues, net of adjustments primarily relating to customer rebates, rewards associated with consumer loyalty program, and co-branded marketing programs. Revenues are recognized when the control of the promised goods is transferred to the customer in an amount that reflects the consideration allocated to the related performance obligations and to which we expect to be entitled in exchange for those products or services.

Net revenues increased by \$19.3 million, or 14.0%, to \$157.2 million in the six months ended June 30, 2026 from \$137.9 million in the six months ended June 30, 2025, due to higher Jeuveau® and Evolysse® sales. Net revenues in the six months ended June 30, 2026 and 2025 each contained \$1.1 million of service revenue from sales of Jeuveau® through a distribution partner in Canada. We anticipate our continued sales growth will depend on (i) our ability to grow our customer base and to increase purchases by our current customers in the competitive aesthetic market, (ii) the continued success of Evolysse® Form and Evolysse® Smooth products in the United States, (iii) the success of the commercial launch of Evolysse® injectable HA gel collection in Europe and (iv) the regulatory approval for the Evolysse® Sculpt and Evolysse® Lips products in the United States.

Cost of Goods Sold

Cost of goods sold primarily consists of inventory cost, amortization of intangible asset relating to distribution right and certain royalties. Cost of goods sold increased by \$5.2 million, or 11.3%, to \$51.1 million in the six months ended June 30, 2026 from \$45.9 million in the six months ended June 30, 2025, primarily attributable to higher volumes of products shipped to customers, partially offset by a reduction in cost of goods sold of \$1.1 million resulting from the recognition of IEEPA tariff refunds. We anticipate that our cost of goods sold will fluctuate due to changes in product and geographic mix and the impact of current and threatened tariffs.

Gross Profit Margin

Our gross profit margin was 67.5% and 66.7% in the six months ended June 30, 2026 and 2025, respectively. The recognition of IEEPA tariff refunds provided a 0.7 percentage point increase in gross profit margin in the six months ended June 30, 2026. We anticipate that our gross profit margin will fluctuate due to changes in product and geographic mix, the effect of current and threatened tariffs, and the impact of promotional and incentive programs on our average selling prices.

Selling, General and Administrative

Selling, general and administrative expenses decreased by \$4.3 million, or 3.8%, to \$109.0 million in the six months ended June 30, 2026 from \$113.3 million in the six months ended June 30, 2025, primarily attributable to lower marketing and sales expenses, as the prior year period included costs associated with the launch of Evolysse®, partially offset by higher personnel-related costs. Selling, general and administrative expenses may fluctuate in the future primarily driven by potential changes in marketing strategies, launches of new products and international expansion.

Research and Development

Research and development expenses were \$4.1 million in the six months ended June 30, 2026 and remained relatively consistent with that in the six months ended June 30, 2025. We expect our research and development expenses to increase, if and when, we develop additional product candidates and pursue regulatory approvals.

Revaluation of Contingent Royalty Obligation Payable to Evolus Founders

The change in the fair value of the contingent royalty obligation payable to the Evolus Founders is recorded in operating expenses in each reporting period. In the six months ended June 30, 2026 and 2025, we recognized a net revaluation charge of \$1.2 million and an unrealized gain of \$1.8 million, respectively. Changes to the fair value of the contingent royalty obligation payable to Evolus Founders are driven by changes in management assumptions relating to revenue forecasts, the discount rate used and the timing of cash flows.

Depreciation and Amortization

Depreciation and amortization increased by \$1.3 million, or 74.7%, to \$3.1 million in the six months ended June 30, 2026 from \$1.8 million in the six months ended June 30, 2025, primarily due to an increase in amortization of internal-use software and depreciation of leasehold improvements.

Interest Expense, Net

Interest expense, net, decreased by \$2.9 million, or 27.5%, to \$7.6 million in the six months ended June 30, 2026 from \$10.4 million in the six months ended June 30, 2025, primarily due to \$3.0 million of debt modification fees recognized in connection with the New Pharmakon Term Loans in the six months ended June 30, 2025. Interest on the Revolving Credit Facility and the New Pharmakon Term Loans (as defined below) is based on variable interest rates, which we expect will

continue to fluctuate with the market. See “Liquidity and Capital Resources—*The Pharmakon Term Loans*” and “Liquidity and Capital Resources—*The Revolving Credit Facility*” for further information.

Income Tax Expense

There was minimal income tax expense in each of the six months ended June 30, 2026 and 2025.

Liquidity and Capital Resources

Liquidity is the ability to meet present and future financial obligations through operating cash flows, the sale or maturity of investments or the acquisition of additional funds through capital management. Our financial position and liquidity are, and will continue to be, influenced by a variety of factors, including the level of our outstanding indebtedness and the related principal and interest we are obligated to pay on our indebtedness; the amount and timing of any additional debt or equity financing we may pursue; our capital expenditure requirements; any merger, divestiture or acquisition activity; and our ability to generate cash flows from our operations. We expect cash provided by our operating activities to fluctuate as a result of a number of factors, including the amount and timing of our billing, collections and liability payments and our operating results and the factors that affect these results, including the amount and timing of our product sales; promotions, rebates and incentives; and changes in consumer sentiment and discretionary spending.

As of June 30, 2026, we had cash and cash equivalents of \$45.2 million, positive working capital of \$68.8 million and stockholders’ deficit of \$30.9 million.

Since inception, we have incurred recurring net operating losses and have an accumulated deficit of \$679.8 million as of June 30, 2026 as a result of ongoing efforts to develop and commercialize our products, including providing selling, general and administrative support for our operations. We had net loss of \$18.7 million and \$36.0 million in the six months ended June 30, 2026 and 2025, respectively. We had a loss from operations of \$11.4 million and \$25.4 million in the six months ended June 30, 2026 and 2025, respectively. We used net cash of \$13.5 million and \$40.4 million for operating activities in the six months ended June 30, 2026 and 2025, respectively. We expect to continue to incur significant expenses for the foreseeable future as we continue the commercialization efforts for our products, including supporting the growth of Evolysse® Form, Evolysse® Smooth, Evolysse® Sculpt and Evolysse® Lips injectable HA gel products in Europe following their launch in May 2026, and pursue regulatory approvals of Evolysse® Sculpt and Evolysse® Lips in the United States.

In response to a potential future tariff on certain patented pharmaceutical products imported from South Korea, we accelerated the importation of certain Jeuveau® inventory during the three months ended June 30, 2026. These purchases increased inventory and accounts payable by \$17.6 million as of June 30, 2026. Under agreed payment terms with Daewoong, payments for the accelerated purchases are generally deferred until the periods in which the inventory otherwise would have been purchased under our existing demand forecast. Therefore, these purchases did not result in a commensurate use of cash during the three months ended June 30, 2026. We expect additional accelerated purchases will further increase inventory and accounts payable during the remainder of 2026, but we do not expect the related cash outflows during this period to increase proportionately. We estimate such outflows to remain generally aligned with our original demand forecast. These arrangements defer our payment obligations and are expected to preserve our near-term liquidity. Although these actions may reduce our near-term tariff exposure, they do not eliminate potential exposure on future imports after this inventory is consumed. The ultimate effects on our results of operations and liquidity will depend on the applicability and duration of the tariff with respect to Jeuveau®, the timing and volume of future imports, and the availability of any exceptions, exclusions or reduced rates.

The Revolving Credit Facility

On March 3, 2026, we, as borrower, entered into a Loan and Security Agreement (the “Loan Agreement”) with Eclipse Business Capital LLC, as administrative agent and the lenders party thereto. Pursuant to the Loan Agreement, the lenders party provided a senior secured asset-based revolving credit facility (the “Revolving Credit Facility”) with a \$30.0 million commitment and an uncommitted accordion feature of up to \$10.0 million, which is exercisable, subject to lenders party consent and other conditions, in \$5.0 million increments or in its entirety. The Revolving Credit Facility has a minimum utilization requirement of \$10.0 million and matures on March 3, 2029 with outstanding principal and interest fully due and payable at such time. Borrowings under the Revolving Credit Facility bear interest at a rate equal to adjusted term secured overnight financing rate (“SOFR”) (subject to a floor of 2.0%) plus an applicable margin of 4.25%, which is subject to downward adjustments based on certain coverage ratio and excess availability. See *Note 7. Long-Term Debt* in the Notes to the Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q for additional information.

The Pharmakon Term Loans

On May 5, 2025, we entered into an Amended and Restated Loan Agreement (the “A&R Loan Agreement”) with Pharmakon, which amended and restated the Prior Pharmakon Loan Agreement (as defined below). Under the A&R Loan Agreement, Pharmakon (as defined below) agreed to make a senior secured term loan to us of an aggregate principal amount of up to \$250.0 million to be funded in three tranches, comprised of an initial \$150.0 million tranche funded upon the execution of the A&R Loan Agreement and two additional tranches of up to \$50.0 million each, available at our election until December 31, 2026 (collectively, the “New Pharmakon Term Loans”). The initial tranche of \$150.0 million was released on May 5, 2025, which includes the \$125.0 million of outstanding principal amount related to the Prior Pharmakon Term Loans and \$25.0 million of incremental borrowings. Total net proceeds of \$23.4 million were received by us, net of discounts and fees paid to the lender, from the funding of the initial tranche. The New Pharmakon Term Loans accrue interest at a per annum rate equal to the 3-month SOFR (subject to a SOFR floor of 3.5%) plus 5.0% per annum. In addition, under the terms of the A&R Loan Agreement, we are permitted to incur additional indebtedness in the form of a working capital or revolving loan facility with a maximum credit line of no more than \$40.0 million at any time, subject to Pharmakon’s consent and certain terms and conditions customary for credit facilities of similar size and type. See *Note 7. Long-Term Debt* in the Notes to the Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q for additional information.

In December 2021, we entered into a loan agreement with BPCR Limited Partnership, BioPharma Credit Investments V (Master) LP, and Biopharma Credit PLC (collectively, “Pharmakon”), which was subsequently amended in December 2022 and in May 2023 (as amended, the “Prior Pharmakon Loan Agreement”). Pursuant to the terms of the Prior Pharmakon Loan Agreement, Pharmakon made loans to us totaling \$125.0 million (the “Prior Pharmakon Term Loans”). The Prior Pharmakon Term Loans bore an annual interest rate equal to the 3-month SOFR (subject to a SOFR floor of 1.0%) plus 8.5% per annum.

Contingent Royalties to Evolus Founders

We are obligated to make quarterly royalty payments based on a low single-digit percentage of net sales of Jeuveau® to the Evolus Founders. These obligations terminate at the end of the second quarter of 2029, the 10-year anniversary of the first commercial sale of Jeuveau® in the United States. The fair value of the obligations is valued quarterly and is referred to in our condensed consolidated financial statements as the contingent royalty obligation.

As of June 30, 2026, we recorded an aggregate balance of \$29.0 million in our condensed consolidated balance sheet for the future royalty payment obligation to the Evolus Founders.

Litigation Settlement

In February 2021, we settled litigation claims through settlement agreements with Medytox, Inc. which we refer to collectively as the “Medytox Settlement Agreements.” From September 17, 2022 to September 16, 2032, we have paid and will pay to Medytox a quarterly, mid-single digit royalty on net sales of Jeuveau® sold in the United States and other Evolus territories.

Daewoong Agreement

Our agreement (as amended, the “Daewoong Agreement”) with Daewoong Pharmaceutical Co. Ltd. (“Daewoong”) provides us with an exclusive distribution license to Jeuveau® for aesthetic indications in the United States, the European Union, United Kingdom, members of the European Economic Area, Switzerland, Canada, Australia, New Zealand, and South Africa, as well as co-exclusive distribution rights with Daewoong in Japan. The Daewoong Agreement includes certain minimum annual purchases which we are required to make in order to maintain the exclusivity of the license. We may, however, meet these minimum purchase obligations by achieving certain market share in our licensed territories. These potential minimum purchase obligations are contingent upon the occurrence of future events, including receipt of governmental approvals and our future market share in various jurisdictions.

Symatase U.S. Agreement

Our agreement (the “Symatase U.S. Agreement”) with Symatase Aesthetics S.A.S. (“Symatase”) provides us with an exclusive right to commercialize and distribute five injectable HA gel product candidates, Form, Smooth, Sculpt, Lips and Eye in the United States for use in the aesthetics and dermatological field of use. We also have the right of first negotiation to obtain a license from Symatase to commercialize and distribute any new products developed using the same technology as the Evolysse® collection of injectable HA gels. The Symatase U.S. Agreement includes certain milestone payments,

development cost-sharing arrangements, and minimum annual purchases that we are required to make in order to maintain the exclusivity of the license. We may, however, meet these minimum purchase obligations by achieving certain market share in our licensed territory. These potential minimum purchase obligations are contingent upon the occurrence of future events, including receipt of governmental approvals and our future market share.

Symatase Europe Agreement

Our agreement (the “Symatase Europe Agreement”) with Symatase provides us with an exclusive right to commercialize and distribute Symatase’s injectable HA gel products in 50 countries in Europe for use in the aesthetics and dermatological fields. The Symatase Europe Agreement includes certain milestone payments and minimum annual purchases which we are required to make in order to maintain the exclusivity of the license. We may, however, meet these minimum purchase obligations by achieving certain market share in our licensed territory. On August 3, 2026, we and Symatase entered into a series of agreements (collectively, the “Symatase EU Amendments”) that amended and expanded our commercialization rights under the Symatase Europe Agreement. Pursuant to the terms of the Symatase EU Amendments, we have exclusive rights to commercialize and distribute the full line of Evolyse® injectable HA gel products in each of (i) Europe, (ii) Canada, and (iii) Australia and New Zealand. Under the Symatase EU Amendments, we are required to make aggregate upfront payments of €1.4 million and may be required to make additional payments of up to €2.9 million upon receipt of certain regulatory approvals and completion of certain registration processes.

IBSA License Agreement

The IBSA Agreement provides us with an exclusive right and license to develop, commercialize and distribute Prophil®[®], an injectable hyaluronic acid product for skin-quality applications, in the United States for use in the aesthetics and dermatological fields. Under the terms of the IBSA Agreement, we will be responsible for development activities required to obtain U.S. regulatory approval for Prophil®[®] and commercialization activities following approval. In addition, beginning in the fourth year following the commercial launch of Prophil®[®] in the United States, we will be subject to certain minimum purchase requirements in order to maintain our exclusive right and license, subject to certain exceptions. The amount and timing of expenditures for development activities and subsequent commercialization activities are contingent upon the occurrence of future events and will depend on, among other things, the design, scope, timing and results of clinical activities, FDA requirements, the timing of regulatory submissions and approvals and other factors.

Operating Leases

Our corporate headquarters in Newport Beach, California is under a non-cancelable operating lease, which expires on January 31, 2030 with an option to extend the term for an additional 60 months. Lease payments increase based on an annual rent escalation clause that occurs on February 1st of each year during the lease term.

Current and Future Capital Requirements

We believe that our current capital resources, which consist of cash and cash equivalents, future cash generated from operations, availability of an additional \$100.0 million in liquidity under the New Pharmakon Term Loans, and the Revolving Credit Facility, will be sufficient to satisfy our cash requirements for at least the next twelve months with respect to working capital that supports our daily operations and to meeting commitments under our contractual obligations with third parties, although we may wish to access the debt and equity markets or other sources of financing to satisfy our long-term cash requirements as further discussed below.

We have based our projections of capital requirements on assumptions that may prove to be incorrect, and we may use all our available capital resources, which consist of cash and cash equivalents, cash generated from operations, and availability of liquidity under both the New Pharmakon Term Loans and the Revolving Credit Facility, sooner than we expect. Our cash requirements depend on numerous factors, including but not limited to, the impact of any potential disruptions to our supply chain, inflation or other economic conditions, and other long-term commitments and contingencies. Because of the numerous risks and uncertainties associated with research, development and commercialization of our products, we are unable to estimate the exact amount of our operating capital requirements, including our requirements beyond the next twelve months. In such case, we may be required to raise additional capital to fund future operations through the incurrence of debt, the entry into licensing or collaboration agreements with partners, sale of equity securities, grants or other sources of financing. However, there can be no assurance such financing or other alternatives will be available to us on acceptable terms, or at all. The global economy, including the financial and credit markets, has recently experienced significant volatility and disruptions, volatility in inflation and interest rates, new and threatened tariffs, declines in consumer confidence and

uncertainty about economic stability. These conditions may adversely impact our ability to raise additional capital on acceptable terms, or at all.

Our future funding requirements will depend on many factors, including:

- the rate of revenue growth for our products in the markets in which they are commercialized;
- our ability to increase operating leverage and achieve sustainable profitability on our anticipated timelines;
- the costs of commercializing our products and product candidates, including marketing, sales and distribution costs, and the costs of maintaining an appropriately sized and productive sales force and attracting and retaining skilled personnel;
- the timing, cost and outcome of regulatory, development and clinical activities for our current and future products and product candidates;
- the timing and amount of milestone, royalty, minimum purchase and other payments under our contractual arrangements;
- our ability to forecast demand and manage product purchases, inventory, supply and related working capital, including manufacturing, freight, tariff and other supply-chain costs; and
- the timing, structure and financial terms of any acquisitions, licenses, collaborations or other corporate development activities.

Cash Flows

The following table summarizes our cash flows for the periods indicated:

(in thousands)	Six Months Ended June 30,	
	2026	2025
Net cash provided by (used in):		
Operating activities	\$ (13,539)	\$ (40,423)
Investing activities	(2,191)	(4,128)
Financing activities	7,254	19,032
Effect of exchange rates on cash and cash equivalents	(180)	305
Net decrease in cash and cash equivalents	(8,656)	(25,214)
Cash and cash equivalents, beginning of period	53,826	86,952
Cash and cash equivalents, end of period	<u>\$ 45,170</u>	<u>\$ 61,738</u>

Operating Activities

Net cash used in operating activities was \$13.5 million in the six months ended June 30, 2026, compared with \$40.4 million in the six months ended June 30, 2025. The decrease was primarily attributable to improved operating results, including higher Jeuneau® and Evolysse® sales, lower selling, general and administrative expenses following the completion of our strategic cost structure optimization initiatives at the end of the third quarter of 2025, as well as a more favorable net impact from changes in operating assets and liabilities. The favorable working capital impact primarily reflected the timing and volume of inventory purchases and a lower net use of cash related to vendor payments and settlements of other accrued obligations, partially offset by increased accounts receivable resulting primarily from higher Jeuneau® and Evolysse® sales and the timing of customer collections.

Investing Activities

Net cash used in investing activities was \$2.2 million in the six months ended June 30, 2026, compared with \$4.1 million in the six months ended June 30, 2025. The decrease was primarily attributable to lower additions to capitalized internal-use software and lower purchases of property and equipment.

Financing Activities

Net cash provided by financing activities was \$7.3 million in the six months ended June 30, 2026, compared with \$19.0 million in the six months ended June 30, 2025. The decrease was primarily attributable to lower net proceeds from debt financing activities, which were \$9.4 million in the six months ended June 30, 2026, compared with \$22.4 million in the six months ended June 30, 2025.

Indebtedness

See “Liquidity and Capital Resources—The Pharmakon Term Loans” for a description of our New Pharmakon Term Loans and “Liquidity and Capital Resources—The Revolving Credit Facility” for a description of our Revolving Credit Facility.

Material Cash Requirements

Our material cash requirements from known contractual and other obligations, including commitments for capital expenditures, primarily consist of debt service; royalties, minimum purchase obligations and other payments under our product license and supply agreements; milestone payments; and operating lease obligations. As of June 30, 2026, our outstanding debt included \$160.0 million of principal, due in 2029 and 2030, and approximately \$53.0 million of estimated future interest payments, including \$14.0 million due within the next twelve months. Other than the Revolving Credit Facility entered into in March 2026, there were no material changes during the six months ended June 30, 2026 to the material cash requirements as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2025. For additional information regarding the amount and timing of these obligations, see Notes 7 through 9 in the Notes to the Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Subsequent to June 30, 2026, we entered into the Symatse EU Amendments, which require aggregate upfront payments of €1.4 million and additional payments of up to €2.9 million contingent upon receipt of certain regulatory approvals and completion of certain registration processes. We expect to fund our material cash requirements through cash on hand, cash provided by our operating activities, and available borrowing capacity.

Critical Accounting Policies and Estimates

Management’s discussion and analysis of our financial condition and results of operations are based on our condensed consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and related disclosure of contingent assets and liabilities, revenue and expenses at the date of the condensed consolidated financial statements as well as the revenue and expenses incurred during the reporting period. Generally, we base our estimates on historical experience and on various other assumptions in accordance with GAAP that we believe to be reasonable under the circumstances. Actual results may differ materially from these estimates and such differences could be material to the financial position and results of operations. On an ongoing basis, we evaluate our estimates and assumptions in light of changes in circumstances, facts and experience.

There have been no material changes to our critical accounting policies and estimates as discussed in our Annual Report on Form 10-K filed for the year ended December 31, 2025.

Recently Issued Accounting Pronouncements and Recently Adopted Accounting Pronouncements

We describe the recently issued accounting pronouncements and recently adopted accounting pronouncements that apply to us in *Note 2. Basis of Presentation and Summary of Significant Accounting Policies-Recently Adopted Accounting Pronouncements and Recently Issued Accounting Pronouncements Not Yet Adopted* in the Notes to the Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to various market risks in the ordinary course of our business. Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our exposure to market risks primarily arises from fluctuations in interest rates and foreign currency exchange rates.

For financial market risks relating to changes in interest rates and foreign currency exchange rates, reference is made to the “*Quantitative and Qualitative Disclosures About Market Risk*” section in Part II, Item 7A. of our Annual Report on Form 10-

K filed for the year ended December 31, 2025 and to the notes to the consolidated financial statements included therein. As of the date of this report, there were no material changes to our financial market risks from those disclosed in our Annual Report on Form 10-K filed for the year ended December 31, 2025.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

As of June 30, 2026, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, who serve as our principal executive officer and principal financial officer, respectively, performed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Our disclosure controls and procedures are designed to ensure (a) that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (b) that information required to be disclosed by us in reports filed or submitted under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2026, our disclosure controls and procedures were effective at a reasonable assurance level.

Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objective, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Changes in Internal Control over Financial Reporting

During the three months ended June 30, 2026, there were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred with respect to the quarter ended June 30, 2026 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II—Other Information

Item 1. Legal Proceedings

See “Legal Proceedings” in Note 9. *Commitments and Contingencies* for information regarding legal proceedings.

Item 1A. Risk Factors

The risks and uncertainties discussed below update, supersede and replace the risks and uncertainties previously disclosed in Part I, Item 1A. of our Annual Report on Form 10-K for the year ended December 31, 2025, which was filed with the SEC on March 3, 2026. We do not believe any of the changes constitute material changes from the risk factors previously disclosed in such prior Annual Report on Form 10-K.

An investment in our company involves a high degree of risk. You should carefully consider the risks and uncertainties described below together with all the other information in this Quarterly Report on Form 10-Q, including Part I, Item 2 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the condensed consolidated financial statements and the notes thereto included in Part I, Item 1. If any of the following risks actually occurs, our business, reputation, financial condition, results of operations, revenue, and future prospects could be seriously harmed. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that we are unaware of, or that we currently believe are not material, may also become important factors that adversely affect our business. Unless otherwise indicated, references to our business being seriously harmed in these risk factors will include harm to our business, reputation, financial condition, results of operations, revenue and future prospects. In that event, the market price of our common stock could decline, and you could lose part or all of your investment. These disclosures reflect the Company’s beliefs and opinions as to factors that could materially and adversely affect the Company and its securities in the future. References to past events are provided by way of example only and are not intended to be a complete listing or a representation as to whether or not such factors have occurred in the past or their likelihood of occurring in the future.

Risks Related to Our Business and Strategy

We have incurred significant losses since our inception, and we may continue to incur losses, which could adversely affect the market price of our common stock and our ability to raise additional capital.

We are a global performance beauty company with a history of significant losses. To date, we have invested substantially all of our efforts and financial resources in the clinical development, regulatory approval, and commercial launch of Jeuveau® and Evolysse®. We began generating revenue in May 2019 and have incurred losses in each year since our inception in 2012. Consequently, any predictions about our future success, performance or viability may not be as accurate as they could be if we had a longer operating history of profitability. We recorded net loss of \$18.7 million for the six months ended June 30, 2026, and we recorded net losses of \$51.6 million and \$50.4 million for the years ended December 31, 2025 and 2024, respectively. We had an accumulated deficit of \$679.8 million as of June 30, 2026. Our ability to achieve profitability is dependent on our ability to successfully market and sell our commercial products and maintain cost controls. While we strive to achieve profitability in the future, we may not be able to sustain profitability in subsequent periods. Our prior losses, combined with expected future losses, may adversely affect the market price of our common stock and, if needed, our ability to raise capital to continue operations.

Our products face significant competition and our failure to effectively compete may prevent us from achieving significant market penetration and expansion.

Both Jeuveau® and Evolysse® compete within the medical aesthetics market. The medical aesthetic market is highly competitive and dynamic and is characterized by rapid and substantial technological development and product innovations. Our products face, and we anticipate that our future products will face, significant competition from other facial aesthetic products, such as other injectable toxins and dermal fillers. Our products may also compete with unapproved and off-label treatments. Many of our potential competitors, including AbbVie, who first launched BOTOX for cosmetic uses in 2002 and has since maintained the highest market share position in the aesthetic neurotoxin market with its BOTOX product, are large, experienced companies that enjoy significant competitive advantages, such as substantially greater financial resources enabling them to, among other things, market and discount aggressively. Within the dermal filler market we will also face large, experienced competitors such as AbbVie and Galderma S.A. Competitors may also have greater brand recognition for their products, larger sales forces and larger aesthetic product portfolios allowing the companies to bundle products to provide customers more choices and to further discount their products. Additionally, our competitors have greater existing

market share in the medical aesthetic market and long-standing customer loyalty programs and sales contracts with large customers, which creates established business and financial relationships with customers, aesthetic societies and universities.

These competitors may also try to compete with our aesthetic products on price both directly, through rebates and promotional programs to high volume customers and coupons to consumers, and indirectly, through attractive product bundling with complimentary products, such as injectable HA gels that offer convenience and an effectively lower price compared to the total price of purchasing each product separately. These companies may also seek to compete based on their longer operating history. Larger companies may be better capitalized than us and, accordingly, are able to offer greater customer loyalty benefits to encourage repeat use of their products and finance a sustained global advertising campaign to compete with our commercialization efforts at launch. A number of our larger competitors also have access to a significant number of studies and publications that they could use to compete with us.

In the long term, we expect to expand our focus to the broader cash-pay healthcare market. Competitors and other parties may seek to impact regulatory approval of our future product applications through the filing of citizen petitions or other similar documents, which could require costly and time-consuming responses to the regulatory agencies. Larger competitors could seek to prevent or delay our commercialization efforts via costly litigation which can be lengthy and expensive and serve to distract our management team's attention. We could face competition from other sources as well, including academic institutions, governmental agencies and public and private research institutions. In addition, we are aware of other companies also developing and/or marketing products in one or more of our target markets. The introduction of new products into our key markets will increase competition. We would face similar risks with respect to any future product candidates that we may seek to develop or commercialize in the broader cash-pay healthcare market. Successful competitors in that market have the ability to effectively discover, obtain patents, develop, test and obtain regulatory approvals for products, as well as the ability to effectively commercialize, market and promote approved products, including communicating the effectiveness, safety and value of products to actual and prospective customers and medical staff.

Our strategy of competing in the aesthetic neurotoxin market is dependent on the marketing and pricing flexibility that we believe is afforded to a company with a portfolio limited to cash-pay healthcare, comprised of products and procedures that are not reimbursed by third-party payors. In the event that regulations applicable to reimbursed products are changed to apply to cash-pay healthcare products, we would no longer have this flexibility and we may not be able to compete as effectively with our competitors which may have a material effect on our business, financial condition and results of operations. Additionally, as a result of the royalty payments that we are required to pay under the Medytox Settlement Agreements, we may not be able to discount Jeuveau® to the extent that we previously provided discounts to customers without impacting our gross profit margins. If we increase prices for any customers, their volume of purchases may decrease which would have a material and adverse effect on our business and results of operations.

In addition, competitors may develop new technologies within the medical aesthetic market that may be superior in safety and efficacy to our products or offer alternatives to the use of toxins or injectable HA gels, including surgical and radio frequency techniques. To compete successfully in the medical aesthetic market, we will have to demonstrate that our products are at least as safe and effective as current products sold by our competitors. Our products also compete with other medical aesthetic products or non-urgent aesthetic services. For example, consumers have recently prioritized spending on weight loss drugs or other beauty products which may impact the amount of discretionary income they have to spend on our products. Competition in the medical aesthetic market could result in price-cutting and reduced profit margins, any of which would harm our business, financial condition and results of operations.

Due to less stringent regulatory requirements, there are many more aesthetic products and procedures available for use in international markets than are approved for use in the United States. There are also fewer limitations on the claims that our competitors in international markets can make about the effectiveness of their products and the manner in which they can market them. As a result, we expect to face more competition in these markets than in the United States.

Our commercial opportunity could also be reduced or eliminated if our competitors develop and commercialize products that are safer, are more effective, have fewer or less severe side effects, are more convenient or are less expensive than our current product offerings or any other product that we may develop. Our competitors also may obtain FDA or other regulatory approval for these products more rapidly than we may obtain approval for our products, which could result in our competitors establishing a strong market position before we are able to enter the market, which may create additional barriers to successfully commercializing our current product offerings and any future product candidates and attracting practitioner and consumer demand.

Our products may fail to achieve the broad degree of aesthetic practitioner adoption and use or consumer demand necessary for continued commercial success.

Jeuveau® or the Evolysse® collection of injectable HA gels may fail to gain sufficient market acceptance by aesthetic practitioners, consumers and others in the medical aesthetics community to continue to grow our net revenues. The continued commercial success of Jeuveau®, Evolysse® and any future product candidates, including a proposed higher strength dose of Jeuveau®, the Evolysse® collection of injectable HA gels and Profhilo®, will depend significantly on the broad adoption and use of the resulting product by aesthetic practitioners for approved indications, including, in the case of Jeuveau®, the treatment of glabellar lines and other aesthetic indications that we may seek to pursue and in the case of Evolysse® Form and Evolysse® Smooth, the treatment of wrinkles and folds, such as nasolabial folds. We are aware that other companies are seeking to develop alternative products and treatments, any of which could impact the demand for our products.

The degree and rate of practitioner adoption of Jeuveau®, Evolysse®, and any future product candidates depend on a number of factors, including the cost, profitability to our customers, consumer demand, characteristics and effectiveness of the product. Our success will also depend on our ability to create compelling marketing programs, training of our customers and ability to overcome any biases aesthetic practitioners or consumers may have toward the use, safety and efficacy of existing products over our products. Moreover, our competitors may utilize negative selling efforts or offer more compelling marketing or discounting programs than we are able to offer, including by bundling multiple aesthetic products to provide a more comprehensive offering than our current approved product offerings allow.

With respect to consumer demand, the treatment with our products is an elective procedure, the cost of which must be borne by the consumer, and we do not expect costs related to the treatment to be reimbursable through any third-party payor, such as Medicaid, Medicare or commercial insurance. The decision by a consumer to undergo treatment with our products for aesthetic indications may be influenced by a number of factors, including the cost, efficacy, safety, perception, marketing programs for, and aesthetic practitioner recommendations of our products versus competitive products or procedures. Moreover, consumer demand has and may continue to fluctuate over time as a result of consumer sentiment about the benefits and risks of aesthetic procedures generally and our products in particular, changes in demographics and social trends, high inflation and general consumer confidence and consumer discretionary spending, which have been and may in the future be impacted by economic and political conditions.

If Jeuveau®, Evolysse®, or any future product candidates fail to achieve the broad degree of aesthetic practitioner adoption necessary for commercial success or the requisite consumer demand, our operating results and financial condition will be adversely affected, which may delay, prevent or limit our ability to generate revenue and continue our business.

Our products rely on consumer discretionary spending and the purchasing decisions of our customers, both of which are sensitive to difficult to predict global economic conditions, including the imposition of tariffs, or changes in consumer or customer sentiment.

Because we do not expect our products to be reimbursed by any government or third-party payor, our products will continue to be paid for directly by the consumer. As a result, demand for our products from our customers is tied to the discretionary spending levels of our targeted consumer population. We do not maintain long-term purchase commitments with most of our customers, instead, our sales depend on short-term purchasing decisions for our products made by our customers in response to consumer demand, aesthetics trends, our competitor's sales tactics, inventory management, seasonality, and other factors affecting consumer and customer purchasing behavior. Additionally, our customers' businesses are susceptible to economic conditions that have and may continue to tighten their liquidity resulting in changes in their purchasing behavior or delays in payments for our products, each of which could have an adverse effect on our business. As a result, it is difficult to forecast demand for our products and our revenues in a given period are subject to volatility based on any of these factors.

Recent macroeconomic events, including inflationary pressures and threatened and imposed tariffs have negatively impacted consumer sentiment, resulted in decreased procedural volume for cash-pay medical aesthetics treatments, especially in the United States, and have impacted our customer's liquidity and purchasing behaviors. If these or similar conditions persist or worsen, our business, financial condition, and results of operations could be materially harmed.

In addition, our business strategy was developed based on a number of important assumptions about the cash-pay healthcare market. For example, we believe that the number of cash-pay healthcare procedures will increase in the future. However, these trends are uncertain and limited sources exist to obtain reliable market data. Therefore, sales of our products or any of our future product candidates could differ materially from our projections if our assumptions are incorrect.

Our business is subject to trade policy risks, including tariffs and regulatory actions on imports which may have a material adverse impact on our results of operations and financial condition.

The current tariff environment is dynamic and uncertain, as the U.S. government has imposed, modified and paused tariffs multiple times since the beginning of 2025. Changes to tariffs and other trade restrictions can be announced at any time with little or no notice.

Changes in trade policies, including increased or proposed tariffs in the United States or retaliatory tariffs in response to such have caused an increase in our cost of goods related to our products. For example, we source our Evolysse® products, which are classified as medical devices, from France, and our Jeuveau® product, which is classified as a pharmaceutical product, from South Korea, and since 2025 they have been subject to implemented and further threatened tariffs.

For example, on April 2, 2026, the U.S. government issued a proclamation under Section 232 of the Trade Expansion Act of 1962 authorizing the imposition of significant tariffs on certain imports of patented pharmaceuticals and related ingredients, including tariffs of up to 100% (currently 15% with respect to South Korea), subject to various conditions, exceptions and potential reductions. These tariffs are expected to be implemented beginning in September 2026 and may apply to products such as Jeuveau®, although the scope, timing and applicability of such tariffs remain uncertain and subject to change based on factors including product classification, country of origin, and potential agreements or exemptions.

In addition, the U.S. Department of Commerce initiated a separate investigation under Section 232 of the Trade Expansion Act of 1962 to evaluate the national security impact of imports of medical supplies, including personal protective equipment, medical consumables and medical equipment and devices. This investigation covers a broad range of products, including diagnostic, therapeutic and imaging devices, and is assessing U.S. reliance on foreign supply chains and the potential for supply disruptions or foreign control over critical medical products. Although no trade measures have been implemented to date, the investigation may result in tariffs, quotas or other import restrictions, and the scope, timing and applicability of any such measures remain uncertain.

All of these current and threatened tariffs are subject to implementation or change with little notice. Although we have been proactively managing inventory flows into the United States to protect against such tariffs, there can be no assurance that we will be able to do so in the future. If tariffs impact global supply chains, have a negative impact on consumer sentiment or cause a significant increase in our costs and we are unable to successfully make up for these increased costs, our revenues could be harmed, which would have an adverse effect on our business.

We are reliant on Symatase to achieve and maintain regulatory approval for the Evolysse® product line. Failure to obtain approval, maintain approval, or obtain approval on our estimated time frame for additional Evolysse® products would negatively affect our ability to sell these products.

The FDA and any international regulatory process for medical devices such as Evolysse® is complex, time-consuming and subject to numerous inherent risks. Before future products within the Evolysse® collection can be marketed in the United States or elsewhere, Symatase must obtain regulatory approval for the injectable HA gels. Regulators must determine that a proposed device is safe and effective for its intended use based, in part, on extensive data, including, but not limited to, technical, pre-clinical, clinical trial, manufacturing and labeling data. In addition, modifications to products that are approved by regulatory agencies generally require approval.

We are substantially dependent on our relationship with Symatase for the regulatory approval process of the Evolysse® injectable HA gel product candidates. While we have agreed to share certain costs associated with the regulatory approval process to provide our experience to Symatase, Symatase is ultimately responsible for obtaining regulatory approval of the Evolysse® product line. If Symatase encounters difficulties or delays in obtaining regulatory approvals for these products, including Evolysse® Sculpt or Evolysse® Lips, our ability to commercialize and generate revenue from these products could be materially and adversely affected. As a result, our reliance on Symatase for the regulatory approval process exposes us to risks associated with Symatase's ability to successfully navigate the complex regulatory landscape. If we are unable to manage these risks effectively, it could have a material adverse effect on our business, financial condition, and results of operations.

In addition, if Symatase fails to maintain compliance with applicable regulatory requirements or if regulatory authorities impose new requirements, the approval process could be delayed or approvals could be denied. This may result in additional costs, reduced revenue projections, and potential harm to our business, reputation and market position.

We may require additional financing to fund our future operations or execute corporate development activities and a failure to obtain additional capital when so needed on acceptable terms, or at all, could force us to delay, limit, reduce or terminate our operations.

We have utilized substantial amounts of cash since our inception in order to conduct clinical development to support regulatory approval and launch our products in multiple markets. We expect that we will continue to expend substantial resources for the foreseeable future in order to continue to market and sell our products and for the continued clinical development of Evolysse® products and any additional product candidates we may choose to pursue. While we believe that we currently have adequate capital resources, which consist of cash and cash equivalents and cash generated from operations, to operate our business until our business generates profits and positive cash flow, this belief is based upon certain financial assumptions including net revenue, gross margin, working capital and expense assumptions. If these assumptions are incorrect, or if we experience other risks or uncertainties set forth in this Quarterly Report on Form 10-Q, we may require additional capital to operate our business.

We expect to expend resources furthering the development and continuation of our marketing programs and commercialization infrastructure in connection with commercializing our products within and outside of the United States. We have also agreed to reimburse Symatse for certain clinical trial expenses related to the Evolysse® Lip and Eye products in the United States and for certain regulatory filing fees in Europe. In the long term, our expenditures will include costs associated with the commercialization of our products, research and development, approval and commercialization of products and any of our future product candidates, including continued development of the Evolysse® collection of injectable HA gels, such as research and development, conducting preclinical studies and clinical trials and manufacturing and supplying as well as marketing and selling the products approved for sale and any products approved for sale in the future. Because the commercialization expenditures needed to meet our sales objectives are highly uncertain, we cannot reasonably estimate the actual amounts necessary to successfully market and sell our products. We may in the future, also, acquire other companies or products which may be costly and which may require additional capital to operate. In addition, other unanticipated costs may arise. Accordingly, our actual cash needs may exceed our expectations.

If we were to raise additional capital through marketing and distribution arrangements, or other collaborations, strategic alliances or licensing arrangements with third parties, we may have to relinquish certain valuable rights to our product candidates, technologies, future revenue streams or research programs or grant licenses on terms that may not be favorable to us. If we raise additional capital through public or private equity offerings or offerings of securities convertible into our equity, the ownership interest of our existing stockholders will be diluted and the terms of any such securities may have a preference over our common stock. Debt financing, receivables financing and royalty financing may also be coupled with an equity component, such as warrants to purchase our capital stock, which could also result in dilution of our existing stockholders' ownership, and such dilution may be material. Additionally, if we raise additional capital through debt financing, we will have increased fixed or variable payment obligations and may be subject to covenants limiting or restricting our ability to take specific actions, such as incurring additional debt or making capital expenditures to meet specified financial ratios, and other operational restrictions, any of which could restrict our ability to market and sell Jeuveau®, Evolysse® or any future product candidates or operate as a business and may result in liens being placed on our assets. If we were to default on any of our indebtedness, we could lose such assets.

In addition, the global economy, including the financial and credit markets, has experienced significant volatility and disruptions, including severely diminished liquidity and credit availability and high interest rates. In the event we are unable to raise sufficient capital to fund our commercialization efforts to achieve specified minimum sales targets under the Daewoong Agreement, Symatse U.S. Agreement and the Symatse Europe Agreement, we will lose exclusivity of the license that we have been granted under those respective agreements. In addition, if we are unable to raise additional capital when required or on acceptable terms, we will be required to take actions to address our liquidity needs which may include the following: significantly reduce operating expenses and delay, reduce the scope of or discontinue some of our development programs, commercialization efforts or other aspects of our business plan, out-license intellectual property rights to our product candidates and sell unsecured assets, or a combination of the above. As a result, our ability to achieve profitability or to respond to competitive pressures would be significantly limited and may have a material adverse effect on our business, results of operations, financial condition and/or our ability to fund our scheduled obligations on a timely basis or at all.

If we or our counterparties do not comply with the terms of our settlement agreement with Medytox, we may face litigation or lose our ability to market and sell Jeuveau®, which would materially and adversely affect our ability to carry out our business, our financial condition and ability to continue as a going concern.

In February 2021, we entered into the Medytox Settlement Agreements, under which we obtained (i) a license to commercialize, manufacture and to have manufactured for us certain products identified in the Medytox Settlement Agreements, including Jeuveau®, in the United States and other territories where we license Jeuveau®, (ii) the dismissal of outstanding litigation and related remedies, which we refer to together with any claims (including claims brought in Korean courts) with a common nexus of fact as the Medytox Actions, and (iii) releases of claims against us for the Medytox Actions. Under the agreement, we remain obligated to pay to Medytox a mid-single digit royalty percentage on net sales of Jeuveau® in the United States and all territories we have licensed outside the United States until September 16, 2032. In addition, under the Medytox Settlement Agreements we made certain representations and warranties and agreed to certain customary positive and negative covenants.

In the event we fail to comply with the terms of the Medytox Settlement Agreements, subject to applicable cure periods, Medytox would have the ability to terminate the Medytox Settlement Agreements and thereby cancel the licenses granted to us and re-institute litigation against us. Any litigation may result in remedies against our products, resulting in either an injunction prohibiting our sales, or with respect to our sales, an obligation on our part to pay royalties and/or other forms of compensation to third parties, any of which would materially and adversely affect our ability to generate revenue from Jeuveau®, to carry out our business, and to continue as a going concern.

Additionally, if Medytox fails to comply with the terms of the Medytox Settlement Agreements and comply with the covenants and agreements under the Medytox Settlement Agreements, it could materially and adversely affect our ability to generate revenue from Jeuveau®, to carry out our business, and to continue as a going concern. For example, as required by the Medytox Settlement Agreements, in February 2021 Medytox filed a document with the Korean court that its litigation with Daewoong would not affect our right to have Jeuveau® manufactured by Daewoong or exported to us. If Medytox were to breach the Medytox Settlement Agreements and rescind this filing and the Korean court issued a ruling against Daewoong, our supply of Jeuveau® could be hindered. We would also be required to engage in costly and time-consuming litigation in order to enforce our rights under the Medytox Settlement Agreements.

Our ability to market our products is limited to their indicated uses, and if we want to expand the indications for which we market our products, we will need to obtain additional regulatory approvals, which will be expensive and may not be granted.

Each of our approved products have specific approved indications for use. The terms of the approvals for each of our products restrict our ability to market or advertise those products for other indications, which could limit aesthetic practitioner and consumer adoption. Under the Federal Food Drug and Cosmetic Act, we may generally only market products for approved indications. Many of our competitors have received approval of multiple aesthetic and therapeutic indications for their neurotoxin and dermal filler products and may be able to market such products for use in a way we cannot. For example, we are aware that one of our competitors, AbbVie, has obtained and plans to obtain additional indications for its neurotoxin and dermal filler products within medical aesthetics and, therefore, is able to market its product across a greater number of indications than Jeuveau® and Evolysse®. If we are unable to obtain approval for indications in addition to our approved indications, our marketing efforts for Jeuveau® and Evolysse® will be severely limited. As a result, we may not generate aesthetic practitioner and consumer demand for, or approval of, our products.

We rely on our digital technology and applications and our business and operations could suffer in the event of information system failures or a cybersecurity incident.

We are reliant on our digital technology, including our Evolus Practice App, which allows customers to open a new account, order products, pay invoices and engage with our customer experience team and medical affairs representatives. In the event that our digital technology is unable to function in the manner it was designed or at all, we would experience difficulty processing customer orders and requests in a timely manner or at all which would have a material adverse effect on our business, results of operations and financial condition.

The information systems underlying our digital technology may not be adequately designed or may not operate with the reliability and redundancy necessary to avoid performance delays or outages that could be harmful to our business. If our digital technology is unavailable when customers attempt to access them, or if they do not load as quickly as expected, users may not use our technology as often in the future, or at all, and our ability to sell our products through a more limited sales

force may be disrupted and we may not realize the efficiencies of leveraging our digital technology, any of which could adversely affect our business and financial performance. As the number of users of our digital technology continues to grow we will need an increasing amount of technical infrastructure, including network capacity and computing power, to continue to satisfy our needs. It is possible that we may fail to continue to effectively scale and grow our technical infrastructure to accommodate these increased demands, which may adversely affect our customers' experience with our digital technology which may decrease our revenue and harm our results of operations.

Despite the implementation of security measures, our internal computer systems, including our information systems, and those of third parties on which we rely, are vulnerable to disruption or damage from computer viruses, malware, natural disasters, terrorism, war, telecommunication and electrical failures, cybersecurity incidents, insider threats, persons who access our information systems in an unauthorized manner, or inadvertent misconfiguration of our systems. The risk of a security incident or system disruption, particularly through cybersecurity incidents, including by computer hackers, foreign governments and cybercriminals, has generally increased as the number, intensity and sophistication of attempted attacks, including through the use of emerging technologies, such as artificial intelligence, and intrusions from around the world have increased. While none of the cybersecurity incidents that we have experienced to date have had a material adverse impact on our business, financial condition or operations, future interruptions in our operations caused by such an event could result in a material disruption of our current or future product development programs. The costs to us to mitigate network security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and while we have implemented security measures to protect our data security and information systems, our efforts to address these problems may not be successful, and these problems could result in unexpected interruptions, delays, cessation of service, government fines or penalties and other harm to our business and our competitive position. Interruptions in our operations caused by such an event could also result in a material disruption in our relationship with our customers. For example, if our Evolus Practice App were rendered inoperable, we would have to process orders by telephone or otherwise which may result in slower processing times and harm to our reputation. Our liability insurance may not be sufficient in type or amount to cover us against claims related to security breaches, cybersecurity incidents and other related security incidents.

Our use of, or failure to effectively and responsibly utilize, emerging technologies, including artificial intelligence, could materially adversely affect our business and financial results.

We use artificial intelligence and other automated or algorithmic technologies in certain aspects of our operations, including digital development, commercial activities and data analysis. In addition, certain of our vendors, logistics providers and other business partners may incorporate similar technologies into the services they provide to us. The use of these technologies may increase the risk that proprietary, confidential or personal information is inadvertently disclosed, improperly accessed, retained by third parties or otherwise misused. These technologies may also introduce software defects, security vulnerabilities or the incorporation of third-party intellectual property or open-source materials into our digital technology in a manner that could subject us to restrictive licensing terms, require disclosure of proprietary source code, impair our ability to protect or enforce our intellectual property rights, delay product or platform deployment, or result in infringement claims and related liabilities. These technologies may also produce inaccurate, incomplete or biased outputs, which could adversely affect decision-making.

Because we use digital tools to support customer onboarding, ordering, invoicing, customer engagement, marketing and data analysis, errors or misuse of artificial intelligence or automated tools in these areas could affect customer relationships, order processing, promotional activities, regulatory compliance or the security of confidential customer and business information. Any such issues, whether arising from our systems or those of third parties, could impair the reliability or functionality of systems that support key business activities, lead to flawed or biased business decisions, result in data breaches or loss of intellectual property, and expose us to litigation, regulatory investigations, fines, penalties and reputational harm, any of which could materially adversely affect our business, financial condition and results of operations.

The legal and regulatory framework governing artificial intelligence and data use is evolving and may increase compliance costs and operational complexity. If we are unable to effectively oversee the use of these technologies by our personnel and service providers, or if we fail to adopt them in a manner that maintains our competitiveness, our business, financial condition and results of operations could be adversely affected.

Failure to comply with confidentiality and data privacy obligations could have a material adverse effect on our business.

As part of our normal operations, we collect, process, transmit and, where appropriate, retain certain sensitive and confidential employee and customer information, including credit card information. As a result, we are subject to various international, federal and state privacy and security laws, including the General Data Protection Regulation, or GDPR,

HIPAA, as amended by HITECH, and its implementing rules and regulations, as well as regulations promulgated by the Federal Trade Commission and state breach notification laws. Additionally, the regulatory environment governing information, security and privacy laws is increasingly demanding and continues to evolve and a number of states have adopted laws and regulations that may affect our privacy and data security practices regarding the use, disclosure and protection of personally identifiable information (“PII”). For example, the California Consumer Privacy Act, among other things, has created individual privacy rights and imposes increased obligations on companies handling PII. We also rely on third parties to host or otherwise process some of the data we collect, process and store. In some instances, these third parties have experienced failures to protect data privacy. If we or these third parties experience a security incident that affects our information systems or results in the unauthorized access to financial information, PII, customer information or data, including credit card transaction data or other sensitive information, our reputation could be materially damaged. Our failure, or the failure of third parties, to protect PII or other sensitive information or our failure to comply with such data privacy and security laws, could expose us to litigation and potential liability, which could materially adversely affect our business, results of operations and financial condition.

If we are found to have improperly promoted off-label uses, or if customers misuse our products or use our products off-label, we may become subject to prohibitions on the sale or marketing of our products, significant fines, penalties, sanctions, or product liability claims, and our image and reputation within the industry and marketplace could be harmed.

The FDA and other regulatory agencies strictly regulate the marketing and promotional claims that are made about regulated products, such as Jeuveau® and Evolysse®. In particular, a product may not be promoted for uses or indications that are not approved by the FDA or other similar regulatory authorities as reflected in the product’s approved labeling. Customers could use our products on their patients in a manner that is inconsistent with the approved label, potentially including for the treatment of other aesthetic or therapeutic indications. Additionally, we maintain relationships with social media and celebrity influencers as part of our marketing strategy. Our use of social media and influencers for promotion and marketing of our products may increase the risk that such materials could contain problematic product or marketing claims in violation of applicable FDA regulations. For example, in recent years, the FDA has issued multiple untitled letters related to false or misleading promotion by influencers and/or using social media. Although we contract with and monitor our influencers’ posts on social media, they may fail to comply with our content-related requirements.

If we are found to have promoted such off-label uses, we may receive warning letters from and be subject to other enforcement actions by the FDA, the European Medicines Agency (“EMA”) and other regulatory agencies, and become subject to significant liability, which would materially harm our business. The federal government has levied large civil and criminal fines against companies for alleged improper promotion and has enjoined several companies from engaging in off-label promotion. If we become the target of such an investigation or prosecution based on our marketing and promotional practices, we could face similar sanctions, which would materially harm our business. In addition, management’s attention could be diverted from our business operations, significant legal expenses could be incurred, and our reputation could be damaged. The FDA has also required that companies enter into consent decrees or permanent injunctions under which specified promotional conduct is changed or curtailed in order to resolve FDA enforcement actions. If we are deemed by the FDA to have engaged in the promotion of our products for off-label use, we could be subject to the FDA prohibitions or other restrictions on the sale or marketing of our products and other operations or significant fines and penalties, and the imposition of these sanctions could also affect our reputation and position within the industry. In addition, regulatory authorities outside the United States may impose similar fines, penalties or sanctions.

Customers may also misuse Jeuveau®, Evolysse®, or any future product we offer or use improper techniques, potentially leading to adverse results, side effects or injury, which may lead to product liability claims. If Jeuveau®, Evolysse®, or any future product we offer are misused or used with improper techniques or are determined to cause or contribute to consumer harm, we may become subject to costly litigation by our customers or their patients. Product liability claims could divert management’s attention from our core business, be expensive to defend, result in sizable damage awards against us that may not be covered by insurance and subject us to negative publicity resulting in reduced sales of our products. Furthermore, the use of Jeuveau®, Evolysse®, or any future product we offer for indications other than those cleared by the FDA may not effectively treat such conditions, which could harm our reputation in the marketplace among customers and consumers. Any of these events could harm our business and results of operations and cause our stock price to decline.

Our products may cause serious or undesirable side effects or possess other unexpected properties that could delay or prevent their regulatory approval, limit the commercial profile of approved labeling, result in post-approval regulatory

action or in product liability lawsuits.

Unforeseen side effects from Jeuveau[®], Evolysse[®], or any product we may offer in the future could arise either during clinical development or after marketing such product. Undesirable side effects caused by product candidates could cause us or regulatory authorities to interrupt, modify, delay or halt clinical trials and could result in a more restrictive label or the delay or denial of regulatory approval by the FDA, the EMA or similar regulatory authorities. Results of clinical trials could reveal a high and unacceptable severity and prevalence of side effects. In such an event, trials could be suspended or terminated and the FDA, the EMA or similar regulatory authorities could order us to cease further development of or deny approval of product candidates for any or all targeted indications. The drug or device-related side effects could affect patient recruitment or the ability of enrolled patients to complete the trial or result in product liability claims. Any of these occurrences may harm our business, financial condition, operating results and prospects.

Additionally, if we or others identify undesirable side effects, or other previously unknown problems, caused by Jeuveau[®], Evolysse[®], or any of our future product candidates, after obtaining regulatory approval in the United States or other jurisdictions, a number of potentially negative consequences could result, including regulatory authorities withdrawing approval or limiting the marketing of our products, requiring a recall of the product, requiring additional warnings on our product labeling or medication guides or instituting Risk Evaluation and Mitigation Strategies (“REMS”). In order to mitigate these risks, regulatory authorities may require additional costly clinical trials or costly post-marketing testing and surveillance to monitor the safety or efficacy of the product. As a result of any of these actions our sales of the product may decrease significantly, we may be required to expend material amounts to comply with any requirements of the regulatory authorities, we could be sued in a product liability lawsuit and held liable for harm caused to patients, and our brand and reputation may suffer.

We face an inherent risk of product liability as a result of the commercialization of Jeuveau[®], Evolysse[®], and any of our future product candidates. For example, we may be sued if any product we develop allegedly causes injury or is found to be otherwise unsuitable during product testing, manufacturing, marketing or sale. Any such product liability claims may include allegations of defects in manufacturing, defects in design, a failure to warn of dangers inherent in the product, negligence, strict liability and a breach of warranties. Claims could also be asserted against us under state consumer protection acts. If we cannot successfully defend ourselves against product liability claims, we may incur substantial liabilities or be required to limit commercialization of our products. Even a successful defense would require significant financial and management resources and result in decreased demand for Jeuveau[®], Evolysse[®] or any future product candidates or products we may develop, termination of clinical trial sites or entire trial programs, injury to our reputation and significant negative media attention, withdrawal of clinical trial participants or cancellation of clinical trials and significant costs and diversion of management’s time to defend the related litigation.

Our inability to obtain and maintain sufficient product liability insurance at an acceptable cost and scope of coverage to protect against potential product liability claims could prevent or inhibit the commercialization of Jeuveau[®], Evolysse[®], or any future products that we develop. We currently carry product liability insurance covering our clinical trials. Although we maintain such insurance, any claim that may be brought against us could result in a court judgment or settlement in an amount that is not covered, in whole or in part, by our insurance or that is in excess of the limits of our insurance coverage. Our insurance policies also have various exclusions and deductibles, and we may be subject to a product liability claim for which we have no coverage. We will have to pay any amounts awarded by a court or negotiated in a settlement that exceed our coverage limitations or that are not covered by our insurance, and we may not have, or be able to obtain, sufficient capital to pay such amounts. Moreover, in the future, we may not be able to maintain insurance coverage at a reasonable cost or in sufficient amounts to protect us against losses.

Any of the above events could prevent us from achieving or maintaining market acceptance of the affected product, negatively impact our revenues and could substantially increase the costs of commercializing our products. The demand for our products could also be negatively impacted by any adverse effects of a competitor’s product or treatment.

Our failure to successfully in-license, acquire, develop and market additional product candidates or approved products would impair our ability to grow our business.

Although most of our effort is focused on the commercialization of Jeuveau[®] and Evolysse[®], a key element of our long-term strategy is to in-license, acquire, develop, market and commercialize a portfolio of products to serve the cash-pay aesthetic market. Our competitors are currently able to bundle multiple aesthetic products to provide a more comprehensive offering than we can. Because our internal research and development capabilities are limited, we may be dependent upon pharmaceutical and other companies, academic scientists and other researchers to sell or license products or technology to us.

The success of this strategy depends partly upon our ability to identify and select promising aesthetic product candidates and products, negotiate licensing or acquisition agreements with their current owners and finance these arrangements.

The process of proposing, negotiating and implementing a license or acquisition of a product candidate or approved product is lengthy and complex. Other companies, including some with substantially greater financial, marketing, sales and other resources, may compete with us for the license or acquisition of product candidates and approved products. We have limited resources to identify and execute the acquisition or in-licensing of third-party products, businesses and technologies and integrate them into our current infrastructure. Moreover, we may devote resources to potential acquisitions or licensing opportunities that are never completed, or we may fail to realize the anticipated benefits of such efforts. We may not be able to acquire the rights to additional product candidates on terms that we find acceptable, or at all.

Further, any product candidates that we acquire may require additional development efforts prior to commercial sale, including preclinical or clinical testing and approval by the FDA, the EMA and other similar regulatory authorities. All product candidates are prone to risks of failure during product development, including the possibility that a product candidate will not be shown to be sufficiently safe and effective for approval by regulatory authorities. In addition, any approved products that we acquire may not be manufactured or sold profitably or achieve market acceptance.

Our international operations will expose us to risks, and failure to manage these risks may adversely affect our operating results and financial condition.

We currently have operations in the United States, Canada, Europe and Australia. International operations are subject to a number of inherent risks, and our future results could be adversely affected by a number of factors, including differences in demand for our products due to local requirements or preferences, the difficulty of hiring and managing employees with cultural and geographic differences and the costs of complying with differing regulatory requirements. Additionally, we may experience difficulties and increased costs due to differences in laws related to enforcing contracts, protecting intellectual property, taxes, tariffs and export regulations. The current conflict between Ukraine and Russia may also impact European economies and consumer discretionary spending negatively, and the conflict in the Middle East may have similar regional impacts. We do not have significant international operations in Russia, Ukraine, Israel, Palestine or the surrounding regions that have been impacted by the conflicts directly.

Our international operations will also subject us to risks related to multiple, conflicting and changing laws and regulations such as privacy regulations, including the GDPR, tax laws, export and import restrictions, employment laws, immigration laws, labor laws, regulatory requirements and other governmental approvals, permits and licenses. Additionally, we will face heightened risk of unfair or corrupt business practices in certain geographies and of improper or fraudulent sales arrangements that may impact financial results and result in restatements of, or irregularities in, financial statements. These and other factors could harm our ability to gain future revenue and, consequently, materially impact our business, operating results and financial condition.

Fluctuations in currency exchange rates may negatively affect our financial condition and results of operations.

Exchange rate fluctuations may affect the costs that we incur in our operations. The exchange rates between these currencies and the U.S. dollar in recent years have fluctuated significantly and may continue to do so in the future. A depreciation of these currencies against the U.S. dollar will decrease the U.S. dollar equivalent of the amounts derived from foreign operations reported in our consolidated financial statements, and an appreciation of these currencies will result in a corresponding increase in such amounts. The cost of certain items, such as raw materials, manufacturing, employee salaries and transportation and freight, required by our operations may be affected by changes in the value of the relevant currencies. To the extent that we are required to pay for goods or services in foreign currencies, such as under our Symatase U.S. Agreement and Symatase Europe Agreement, which have payments denominated in euros, the appreciation of such currencies against the U.S. dollar will tend to negatively affect our business. There can be no assurance that foreign currency fluctuations will not have a material adverse effect on our business, financial condition and results of operations.

If we fail to attract and keep senior management and key personnel, we may be unable to market and sell our products successfully, or any future products we develop.

Our success depends in part on our continued ability to attract, retain and motivate highly qualified management. We believe that our future success is highly dependent upon the contributions of our senior management, particularly David Moatazedi, our President, Chief Executive Officer and member of our Board of Directors, Tatjana Mitchell, our Chief Financial Officer, and Rui Avelar, our Chief Medical Officer and Head of Research and Development, as well as other members of our senior management team. The loss of services of any of these individuals could delay or prevent the successful development of our

product pipeline, completion of our planned clinical trials or the commercialization of Jeuveau[®], Evolysse[®] or any future products we develop.

In addition, we could experience difficulties attracting and retaining qualified employees in the future. For example, competition for qualified personnel in the pharmaceuticals and medical aesthetic field is intense due to the limited number of individuals who possess the skills and experience required by our industry. We may not be able to attract and retain quality personnel on acceptable terms, or at all. In addition, to the extent we hire personnel from competitors, we may be subject to allegations that they have been improperly solicited or that they have divulged proprietary or other confidential information or that their former employers own their research output.

Our strategy of focusing exclusively on the cash-pay healthcare market may limit our ability to increase sales or achieve profitability.

Our strategy is to focus exclusively on the cash-pay healthcare market. This focus may limit our ability to increase sales or achieve profitability. For example, to maintain our business model, we have chosen not to offer products or services available in the broader healthcare market that are reimbursed by third-party payors such as Medicare, Medicaid or commercial insurance. This eliminates our ability to offer a substantial number of products and indications for Jeuveau[®] and Evolysse[®].

For example, under the Daewoong Agreement our rights to market and sell Jeuveau[®] are limited to cosmetic indications and under the Symatse U.S. Agreement and Symatse Europe Agreement our rights are limited to aesthetic and dermatologic uses. Daewoong has subsequently licensed the rights to the therapeutic indications for Jeuveau[®] to a third party. As a result, we do not have the ability to expand the permitted uses of our products for therapeutic indications.

Jeuveau[®] is the only U.S. neurotoxin without a therapeutic indication, although other companies may seek to develop a similar product in the future. We believe pursuing an aesthetic-only non-reimbursed product strategy allows for meaningful strategic advantages in the United States, including pricing and marketing flexibility. However, customers may choose to not pass any cost benefits received by them due to such pricing flexibility to their patients. In addition, companies offering aesthetic products competitive to Jeuveau[®] or Evolysse[®], whether they pursue an aesthetic-only non-reimbursed product strategy or not, may nonetheless try to compete with Jeuveau[®] or Evolysse[®] on price both directly through rebates, promotional programs and coupons and indirectly through attractive product bundling and customer loyalty programs. Our business, financial results and future prospects will be materially harmed if we cannot generate sufficient consumer demand for Jeuveau[®] or Evolysse[®].

We may need to increase the size of our organization, including our sales and marketing capabilities, in order to further market and sell our products and we may experience difficulties in managing this growth.

As of June 30, 2026, we had 353 employees, all of whom were full-time employees. Our management and personnel, systems and facilities currently in place may not be adequate to support future growth. Our need to effectively execute our growth strategy requires that we identify, recruit, retain, incentivize and integrate any additional employees to effectively manage any future clinical trials, manage our internal development efforts effectively while carrying out our contractual obligations to third parties, and continue to improve our operational, financial and management controls, reporting systems and procedures.

We face risks in expanding our sales organization whether internally or by utilizing third parties, including our ability to retain and incentivize qualified individuals, provide adequate training to sales and marketing personnel, generate sufficient sales leads, effectively manage a geographically dispersed sales and marketing team, adequately provide complementary products to be offered by sales personnel, which may otherwise put us at a competitive disadvantage relative to companies with more extensive product lines, and handle any unforeseen costs and expenses. Any failure or delay in the development of our internal sales, marketing and distribution capabilities would adversely impact the commercialization of these products. Due to our limited financial resources, we may not be able to effectively manage the expansion of our operations or recruit and train additional qualified personnel. The physical expansion of our operations may lead to significant costs and may divert our management and business development resources. Any inability to manage growth could delay the execution of our development and strategic objectives or disrupt our operations.

Our business involves the use of hazardous materials, and we and our third-party manufacturer and supplier must comply with environmental laws and regulations, which can be expensive and restrict how we do business.

Our research and development and manufacturing activities in the future may, and our licensors' manufacturing and supplying activities presently do, involve the controlled storage, use and disposal of hazardous materials, including botulinum toxin type A, a key component of Jeuveau[®], and other hazardous compounds. We and our licensors are subject to laws and

regulations governing the use, manufacture, storage, handling and disposal of these hazardous materials. In some cases, these hazardous materials and various wastes resulting from their use are stored at our licensors' facilities pending their use and disposal. We and our licensors cannot eliminate the risk of contamination, which could cause an interruption of any of our licensors' manufacturing processes, our commercialization efforts, business operations and environmental damage resulting in costly clean-up and liabilities under applicable laws and regulations governing the use, manufacture, storage, handling and disposal of these materials and specified waste products. Although we believe that the safety procedures utilized by our licensors for handling and disposing of these materials generally comply with the standards prescribed by these laws and regulations, this may not eliminate the risk of accidental contamination or injury from these materials. In such an event, we may be held liable for any resulting damages and such liability could exceed our resources, and state or federal or other applicable authorities may curtail our use of certain materials and interrupt our business operations. Furthermore, environmental laws and regulations are complex, change frequently and have tended to become more stringent.

We may use third-party collaborators to help us develop, validate or commercialize any new products, and our ability to commercialize such products could be impaired or delayed if these collaborations are unsuccessful.

We may license or selectively pursue strategic collaborations for the development, validation and commercialization of Jeuveau®, Evolysse®, and any future product candidates. In any third-party collaboration, we would be dependent upon the success of the collaborators in performing their responsibilities and their continued cooperation. Our collaborators may not cooperate with us or perform their obligations under our agreements with them. Our collaborators may choose to pursue alternative technologies in preference to those being developed in collaboration with us. The development, validation and commercialization of our product candidates will be delayed if collaborators fail to conduct their responsibilities in a timely manner or in accordance with applicable regulatory requirements or if they breach or terminate their collaboration agreements with us. Disputes with our collaborators could also impair our reputation or result in development delays, decreased revenues and litigation expenses.

In addition, we may face significant competition in seeking appropriate collaborators. Whether we reach a definitive agreement for a collaboration will depend, among other things, upon our assessment of the collaborator's resources and expertise, the terms and conditions of the proposed collaboration and the proposed collaborator's evaluation of a number of factors. Those factors may include the design or results of clinical trials, the likelihood of approval by the FDA or similar regulatory authorities outside the United States, the potential market for the subject product candidate, the costs and complexities of manufacturing and delivering such product candidate to consumers, the potential of competing products, the existence of uncertainty with respect to our ownership of technology, which can exist if there is a challenge to such ownership without regard to the merits of the challenge and industry and market conditions generally. The collaborator may also consider alternative product candidates or technologies for similar indications that may be available to collaborate on and whether such a collaboration could be more attractive than the one with us for our product candidate. Collaborations are complex and time-consuming to negotiate and document.

We may not be able to negotiate collaborations on a timely basis, on acceptable terms, or at all. If we are unable to do so, we may have to curtail the development of such product candidate, reduce or delay its development program or one or more of our other development programs, delay its potential commercialization or reduce the scope of any sales or marketing activities, or increase our expenditures and undertake development or commercialization activities at our own expense. If we elect to increase our expenditures to fund development or commercialization activities on our own, we may need to obtain additional capital, which may not be available to us on acceptable terms or at all. If we do not have sufficient funds, we may not be able to further develop our product candidates or bring them to market and generate revenue.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

We have incurred substantial losses during our history and we may never achieve profitability. We have generated taxable losses and unused losses will carry forward to offset future taxable income, if any, until such unused losses expire. Under Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"), if a corporation undergoes an "ownership change," generally defined as a greater than 50% change (by value) in its equity ownership over a three-year period, the corporation's ability to use its pre-change net operating loss carryforwards ("NOLs"), and other pre-change tax attributes, such as research tax credits, and Section 163(j) interest expense carryforwards, to offset its post-change income may be limited. As of December 31, 2025, we had \$330.5 million of federal NOLs, \$59.3 million of foreign NOLs, and \$257.8 million of state NOLs available to offset our future taxable income, if any. Additionally, we had federal and California research and development credit carryforwards of \$1.6 million and \$0.6 million, respectively, as well as \$51.2 million in federal Section 163(j) interest expense carryforwards as of December 31, 2025. These tax attributes, such as NOLs, and research and development tax credit carryforwards are set to expire at various dates beginning in 2034. We may

experience ownership changes in the future as a result of subsequent shifts in our stock ownership, which could restrict our ability to utilize our pre-change NOLs, research and development credit, and Section 163(j) interest expense carryforwards for offsetting U.S. federal taxable income, potentially leading to increased future tax liability. In addition, there may be periods during which the use of tax attributes is suspended or otherwise limited, which could accelerate or permanently increase taxes owed.

Increases in interest rates would increase the cost of servicing our debt and could reduce our profitability and limit our cash available to fund our growth strategy.

The New Pharmakon Term Loans and the Revolving Credit Facility have, and any additional debt we subsequently incur may have, a variable rate of interest. Higher interest rates could increase debt service requirements on our current variable rate indebtedness (even though the amount borrowed remains the same) and on any debt we subsequently incur, and could reduce funds available for operations, future business opportunities or other purposes and materially and adversely affect our profitability, cash flows and results of operations.

Risks Related to Our Relationship with Our Licensors

We rely on our agreements, including the Daewoong Agreement, the Symatase U.S. Agreement and the Symatase Europe Agreement and any termination or loss of significant rights, including exclusivity, under these agreements would materially and adversely affect our business.

Our ability to exclusively commercialize Jevveau® and Evolysse® is completely dependent on the Daewoong Agreement and the Symatase U.S. Agreement and Symatase Europe Agreement, respectively. Under each agreement we have numerous obligations, including minimum product purchases, milestone payments and commercialization and development obligations. If we breach any material obligation, our partners may terminate or decrease our rights under the agreements. If we were to lose rights under the Daewoong Agreement, or either of the Symatase agreements, we would experience an immediate reduction in our revenues and future business opportunities. We believe it would be difficult to find an alternative supplier of these products. In addition, to the extent the alternative supplier has not secured regulatory approvals in a jurisdiction, we would have to expend significant resources to obtain regulatory approvals that may never be obtained or require several years to obtain, which could significantly delay commercialization. We may be unable to raise additional capital to fund our operations during this extended time on terms acceptable to us or at all. Additionally, if we experience delays as a result of a dispute with either of our partners the demand for our products could be materially and adversely affected.

We currently rely solely on our third-party partners to manufacture our products, including Daewoong to manufacture Jevveau® and on Symatase to manufacture Evolysse® and as such, any production or other problems with either licensor could adversely affect us.

We depend solely upon Daewoong for the manufacturing of Jevveau®, on Symatase to manufacture Evolysse® and will rely on IBSA to manufacture Profhilo®. Although alternative sources of supply may exist, the number of third-party suppliers with the necessary manufacturing and regulatory expertise and facilities is limited, and it could be expensive and take a significant amount of time to arrange for and qualify alternative suppliers, which could have a material adverse effect on our business. Suppliers of any new product candidate would be required to qualify under applicable regulatory requirements and would need to have sufficient rights under applicable intellectual property laws to the method of manufacturing the product candidate. Obtaining the necessary FDA approvals or other qualifications under applicable regulatory requirements and ensuring non-infringement of third-party intellectual property rights could result in a significant interruption of supply and could require the new manufacturer to bear significant additional costs which may be passed on to us.

In addition, our reliance on our partners entails additional risks, including reliance on our partners for regulatory compliance and quality assurance, the possible breach of the agreements with our partners, and the possible termination or nonrenewal of either agreement at a time that is costly or inconvenient for us. Our failure, or the failure of our partners, to comply with applicable regulations could result in sanctions being imposed on us, including fines, injunctions, civil penalties, delays, suspension or withdrawal of approvals, license revocation, seizures or recalls of products, operating restrictions and criminal prosecutions, any of which could significantly and adversely affect supplies of our products. Our dependence on our partners also subjects us to all of the risks related to our partner's business, which are all generally beyond our control. Our partners' ability to perform their obligations under their respective agreements is dependent on their operational and financial health, which could be negatively impacted by several factors, including changes in the economic, political and legislative conditions in their home countries and the broader region in general and the ability of our partners to continue to successfully attract customers and compete in its market.

Additionally, we are dependent on our licensors for day-to-day compliance with cGMP for production of our products. Facilities used by our licensors to produce the drug substance, devices and materials or finished products for commercial sale must pass inspection and be approved by the FDA and other relevant regulatory authorities. If the safety of our products is compromised due to a failure to adhere to applicable laws or for other reasons, we may not be able to successfully commercialize our product and we may be held liable for injuries sustained as a result. In addition, the manufacturing facilities of certain of our suppliers are located outside of the United States. This may give rise to difficulties in importing our product into the United States or other countries as a result of, among other things, regulatory agency approval requirements, taxes, tariffs, local import requirements such as import duties or inspections, incomplete or inaccurate import documentation or defective packaging. Because we rely on Daewoong as the sole manufacturer of Jeuveau® and Symatse as the sole manufacturer of Evolysse®, supply disruptions, quality issues or regulatory failures at either licensor could materially impair our ability to sell our products. Any of these factors could adversely impact our ability to effectively market and sell our products.

Any failure or refusal by our licensors or any other third party to supply our products that we may develop could delay, prevent or impair our clinical development or commercialization efforts.

Our licensors developed the manufacturing process for our products in facilities outside the United States. If these facilities were to be damaged, destroyed or otherwise unable to operate or comply with regulatory requirements, whether due to earthquakes, fire, floods, hurricanes, storms, tornadoes, other natural disasters, public health emergencies, employee malfeasance, terrorist acts, power outages or otherwise, or if operations at the facility are disrupted for any other reason, such an event could jeopardize our licensors' ability to manufacture our products as promptly as we or our customers expect or possibly at all. If our licensors are unable to manufacture our products within a timeframe that meets our and our customers' expectations, our business, prospects, financial results and reputation could be materially harmed. Any disaster recovery and business continuity plans that we and our licensors may have in place or put in place may not be adequate in the event of a serious disaster or similar event. We may incur substantial expenses as a result of our or our licensors' lack of disaster recovery and business continuity plans, or the adequacy thereof, which could have a material adverse effect on our business.

We forecast the demand for commercial quantities of our products, and if our forecasts are inaccurate, we may experience delays in shipments, increased inventory costs or inventory levels, and reduced cash flow.

We purchase our products from our licensors and under our agreements we are obligated to submit forecasts of anticipated product orders and may, from time to time, submit purchase orders on the basis of these forecasting requirements. For a variety of reasons we may not be able to accurately predict future demand. In addition, we expect our licensors to manufacture our products for other markets in which we do not have exclusive rights. If our business significantly expands, our demand for commercial products would increase and our licensors may be unable to meet our increased demand. In addition, our products have fixed future expiration dates. If we overestimate demand for our products, we will have excess inventory, which may have to be disposed of if such inventory exceeds approved expiration dates, which would result in lost revenues and increase our expenses. These risks may be heightened during new product launches, periods of changing customer demand, or periods in which we adjust purchasing or import timing in response to tariffs or other trade restrictions. If we underestimate requirements for our products, we may have inadequate inventory, which could interrupt, delay or prevent delivery of our products to our customers. Any of these occurrences would negatively affect our financial performance.

Risks Related to Intellectual Property

Third-party claims of intellectual property infringement may prevent or delay our commercialization efforts and interrupt our supply of products.

Our commercial success depends in part on our avoiding infringement of the proprietary rights of third parties. Competitors in the field of dermatology, medical aesthetic and neurotoxins have developed large portfolios of patents and patent applications in fields relating to our business. In particular, there are patents held by third parties that relate to the treatment with neurotoxin-based products for the indication we are currently marketing. There may also be patent applications that have been filed but not published that, when issued as patents, could be asserted against us. There is a substantial amount of litigation, both within and outside the United States, involving patent and other intellectual property rights in the technology, medical device and pharmaceutical industries, including patent infringement lawsuits, interferences, oppositions and inter-party reexamination proceedings before the U.S. Patent and Trademark Office, ("USPTO"). Numerous U.S. and foreign issued patents and pending patent applications, which are owned by third parties, exist in the fields in which we are

developing Jeuveau®. As the technology, medical device and pharmaceutical industries expand and more patents are issued, the risk increases that our product candidates may be subject to claims of infringement of the patent rights of third parties.

Third parties may assert that we or any of our current or future licensors, including Daewoong or Symatase, are employing their proprietary technology without authorization. There may be third-party patents or patent applications with claims to materials, methods of manufacture or methods for treatment related to the use or manufacture of our products or any future product candidates. Because patent applications can take many years to issue, there may be currently pending patent applications that may later result in issued patents that our products or any future product candidates may infringe. In addition, third parties may obtain patents in the future and claim that use of our technologies infringes upon these patents. If any third-party patents were held by a court of competent jurisdiction to cover the manufacturing process of our products or any future product candidates, the holders of any such patents may be able to block our ability to commercialize such product candidate unless we obtain a license under the applicable patents or until such patents expire. Similarly, if any third-party patent were held by a court of competent jurisdiction to cover aspects of our methods of use, the holders of any such patent may be able to block our ability to develop and commercialize the applicable product candidate unless we obtain a license or until such patent expires. In either case, such a license may not be available on commercially reasonable terms or at all.

In addition to claims of patent infringement, third parties may bring claims against us asserting misappropriation of proprietary technology or other information in the development, manufacture and commercialization of our products or any of our future product candidates. Defense of such a claim would require dedicated time and resources, which time and resources could otherwise be used by us toward the maintenance of our own intellectual property and the development and commercialization of our products and any of our future product candidates or by any of our current or future licensors for operational upkeep and manufacturing of our products. For example, prior to entering into the Medytox Settlement Agreements, we were a defendant in a lawsuit brought by Medytox in the Superior Court of the State of California, (the “Medytox Litigation”), and a respondent in an action filed by Allergan, Inc. and Medytox in the ITC Action, each alleging, among other things, that Daewoong stole Medytox’s botulinum toxin bacterial strain, (the “BTX strain”), that Daewoong misappropriated certain trade secrets of Medytox, including the process used to manufacture Jeuveau® (which Medytox claims is similar to its biopharmaceutical drug, Meditoxin) using the BTX strain, and that Daewoong thereby interfered with Medytox’s plan to license Meditoxin to us, or the Medytox Litigation. Both the Medytox Litigation and ITC Action diverted the attention of our senior management and were costly, in terms of legal costs and the ultimate payments and royalties to be paid under the Medytox Settlement Agreements.

Additionally, we are aware that multiple entrants into the injectable HA gel market have faced litigation related to allegations of intellectual property infringement and have either expended large amounts of money to defend these claims, attempted to invalidate a third-party’s intellectual property as a defense, or have entered into settlement and license agreements in order to commercialize their injectable HA gel products. As the importer of record and commercial distributor of Evolysse®, we may be required to defend these cases, which may result in increased legal and royalty costs.

Parties making claims against us or any of our current or future licensors may request and obtain injunctive or other equitable relief, which could effectively block our ability to further develop and commercialize one or more of our product candidates. Defense of these claims, regardless of their merit, would involve substantial litigation expense and would be a substantial diversion of employee resources from our business. In the event of a successful claim of infringement, we or any of our current or future licensors may have to pay substantial damages, including treble damages and attorneys’ fees for willful infringement, obtain one or more licenses from third parties which may not be commercially available, pay royalties or redesign our infringing products or manufacturing processes, which may be impossible or require substantial time and monetary expenditure. Furthermore, even in the absence of litigation, we may need to obtain licenses from third parties to advance our research, manufacture clinical trial supplies or allow commercialization of our products or any future product candidates. We may fail to obtain any of these licenses at a reasonable cost or on reasonable terms, if at all. In that event, we would be unable to further develop and commercialize one or more of our product candidates, which could harm our business significantly. Similarly, third-party patents could exist that might be enforced against our products, resulting in either an injunction prohibiting our sales, or with respect to our sales, an obligation on our part to pay royalties and/or other forms of compensation to third parties.

If we or any of our current or future licensors, including Daewoong and Symatase, are unable to maintain, obtain or protect intellectual property rights related to our products, we may not be able to compete effectively in our market.

We and our current licensors, Daewoong and Symatase, currently rely upon a combination of trademarks, trade secret protection, confidentiality agreements and proprietary know-how. Botulinum toxin cannot be patented, as it is produced by *Clostridium botulinum*, a gram-positive, rod-shaped, anaerobic, spore-forming, motile bacterium with the ability to produce

the neurotoxin botulinum. Only the manufacturing process for botulinum toxin can be patented, for which Daewoong has obtained a U.S. patent. Our trade secrets and other confidential proprietary information and those of our licensors could be disclosed or competitors could otherwise gain access to our trade secrets or independently develop substantially equivalent information and techniques. Further, the laws of some foreign countries do not protect proprietary rights to the same extent or in the same manner as the laws of the United States. As a result, we or any of our current or future licensors may encounter significant problems in protecting and defending our or their intellectual property both in the United States and internationally. If we or any of our current or future licensors are unable to prevent material disclosure of the non-patented intellectual property related to our products to third parties, we may not be able to establish or maintain a competitive advantage in our market, which could adversely affect our business.

In addition to the protection afforded by trademarks, confidentiality agreements and proprietary know-how, we may in the future rely upon in-licensed patents for any future product offerings. The strength of patents we may in-license in the technology and healthcare fields involves complex legal and scientific questions and can be uncertain. The patent applications that we may in-license may fail to result in issued patents with claims that cover any of our future product candidates in the United States or in other foreign countries, and the issued patents that we may in-license may be declared invalid or unenforceable.

We are reliant on the ability of our licensors, to maintain their intellectual property and protect their intellectual property against misappropriation, infringement or other violation. We may not have primary control over our future licensors' patent prosecution activities. Furthermore, we may not be allowed to comment on prosecution strategies, and patent applications may be abandoned by the patent owner without our knowledge or consent. With respect to patents that are issued to our licensors, or patents that may be issued on patent applications, third parties may challenge their validity, enforceability or scope, which may result in such patents being narrowed or invalidated. As a licensee, we are reliant on Daewoong, Symatase, and our future licensors to defend any third-party claims. Our licensors may not defend or prosecute such actions as vigorously or in the manner that we would have if entitled to do so, and we will be subject to any judgment or settlement resulting from such actions. Also, a third-party may challenge the validity of our in-licensing transactions. Furthermore, even if they are unchallenged, any of our future in-licensed patents and patent applications may not adequately protect the licensors or our intellectual property or prevent others from designing around their or our claims.

We may become involved in lawsuits to protect or enforce our intellectual property or the patents and other intellectual property of our licensors, which could be expensive and time-consuming.

Competitors may infringe our intellectual property, including any future patents we may acquire, or the patents and other intellectual property of our licensors, including Daewoong or Symatase. As a result, we or any of our current or future licensors may be required to file infringement claims to stop third-party infringement or unauthorized use. This can be expensive, particularly for a company of our size, and time-consuming. In addition, in an infringement proceeding, a court may decide that a patent of ours or any of our current or future licensors is not valid or is unenforceable, or may refuse to stop the other party from using the technology at issue on the grounds that our patent claims do not cover its technology or that the factors necessary to grant an injunction against an infringer are not satisfied.

An adverse determination of any litigation or other proceedings could put one or more of such patents at risk of being invalidated or interpreted narrowly. Interference, derivation or other proceedings brought at the USPTO may be necessary to determine the priority or patentability of inventions with respect to any of our future patent applications or those of our licensors or collaborators. Litigation or USPTO proceedings brought by us or any of our current or future licensors may fail or may be invoked against us or our licensors by third parties. Even if we are successful, domestic or foreign litigation or USPTO or foreign patent office proceedings may result in substantial costs and distraction to our management or the management of any of our current or future licensors, including Daewoong or Symatase. We may not be able, alone or with any of our current or future licensors or collaborators, to prevent misappropriation of our proprietary rights, particularly in countries where the laws may not protect such rights as fully as in the United States.

Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation or other proceedings, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation or proceedings. In addition, during the course of this kind of litigation or proceedings, there could be public announcements of the results of hearings, motions or other interim proceedings or developments or public access to related documents. If investors perceive these results to be negative, the market price for our common stock could be significantly harmed.

Most of our competitors are larger than we are and have substantially greater resources. They are, therefore, likely to be able to sustain the costs of complex patent litigation longer than we could. Accordingly, despite our efforts, we may not be able to prevent third parties from infringing upon or misappropriating our intellectual property. In addition, the uncertainties associated with litigation could compromise our ability to raise the funds necessary to continue our clinical trials, continue our internal research programs, or in-license needed technology or other product candidates.

We may not be able to protect our intellectual property rights throughout the world.

Filing, prosecuting and defending patents on product candidates in all countries throughout the world would be prohibitively expensive, and our intellectual property rights in some countries outside the United States can be less extensive than those in the United States. In addition, the laws of some foreign countries do not protect intellectual property rights to the same extent as federal and state laws in the United States and in some cases may even force us to grant a compulsory license to competitors or other third parties. Consequently, we may not be able to prevent third parties from using our inventions in all countries outside the United States or from selling or importing products made using our inventions in and into the United States or other jurisdictions. Competitors may use our technologies in jurisdictions where we have not obtained patent protection to develop their own products and further, may export otherwise infringing products to territories where we have patent protection, but enforcement is not as strong as that in the United States. These products may compete with our products and our patents or other intellectual property rights may not be effective or sufficient to prevent them from competing.

Many companies have encountered significant problems in protecting and defending intellectual property rights in foreign jurisdictions. The legal systems of certain countries, particularly certain developing countries, do not favor the enforcement of patents and other intellectual property protection, particularly those relating to biopharmaceuticals, which could make it difficult for us to stop the infringement of our patents or marketing of competing products in violation of our proprietary rights generally. Proceedings to enforce our patent rights in foreign jurisdictions could result in substantial costs and divert our efforts and attention from other aspects of our business, could put our patents at risk of being invalidated or interpreted narrowly and our patent applications at risk of not issuing and could provoke third parties to assert claims against us. We may not prevail in any lawsuits that we initiate, and the damages or other remedies awarded, if any, may not be commercially meaningful. Accordingly, our efforts to enforce our intellectual property rights around the world may be inadequate to obtain a significant commercial advantage from the intellectual property that we develop or license.

In addition, our ability to protect and enforce our intellectual property rights may be adversely affected by unforeseen changes in domestic and foreign intellectual property laws.

If we are unable to protect the confidentiality of our trade secrets, our business and competitive position would be harmed.

In addition to seeking patents for our product candidates, we also rely on trade secrets, including unpatented know-how, technology and other proprietary information, to maintain our competitive position.

We seek to protect our trade secrets, in part, by entering into non-disclosure and confidentiality agreements with parties who have access to them, such as our employees, collaborators, consultants, advisors and other third parties. We expect to enter into confidentiality and invention assignment agreements with our employees and consultants. Despite these efforts, any of these parties may breach the agreements and disclose our proprietary information, including our trade secrets, and we may not be able to obtain adequate remedies for such breaches. Enforcing a claim that a party illegally disclosed or misappropriated a trade secret is difficult, expensive and time-consuming, and the outcome is unpredictable. In addition, some courts within and outside the United States are less willing or unwilling to protect trade secrets. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor, we would have no right to prevent them, or those to whom they communicate it, from using that technology or information to compete with us. If any of our trade secrets were to be disclosed to or independently developed by a competitor, our competitive position would be harmed.

We may be subject to claims that our employees, consultants or independent contractors have wrongfully used or disclosed confidential information of third parties.

We employ individuals who were previously employed at other pharmaceutical or medical aesthetic companies. We may be subject to claims that we or our employees, consultants or independent contractors have inadvertently or otherwise used or disclosed confidential information of our employees' former employers or other third parties. We may also be subject to claims that former employers or other third parties have an ownership interest in our patents. Litigation may be necessary to defend against these claims. We may not be successful in defending these claims, and even if we are successful, litigation could result in substantial cost and be a distraction to our management and other employees. Any litigation or the threat

thereof may adversely affect our ability to hire employees. A loss of key personnel or their work product could diminish or prevent our ability to commercialize product candidates, which could have an adverse effect on our business, results of operations and financial condition.

We may need to license intellectual property from third parties, and such licenses may not be available or may not be available on commercially reasonable terms.

A third party may hold intellectual property, including patent rights that are important or necessary to the development of Evolysse® or our future product candidates including certain formulations and methods of production of these products. It may be necessary for us to use the patented or proprietary technology of third parties to commercialize our product candidates, in which case we would be required to obtain a license from these third parties on commercially reasonable terms, or our business could be harmed, possibly materially.

If our trademarks and trade names are not adequately protected, then we may not be able to build name recognition in our markets of interest and our business may be adversely affected.

Our registered or unregistered trademarks or trade names may be challenged, infringed, circumvented or declared generic or determined to be infringing on other marks. We may not be able to protect our rights to these trademarks and trade names, which we need to build name recognition by potential partners or customers in our markets of interest. Over the long term, if we are unable to establish name recognition based on our trademarks and trade names, then we may not be able to compete effectively, and our business may be adversely affected.

Third parties may assert that we are using trademarks or trade names that are confusingly similar to their marks. If any third party were able to establish that our trademarks or trade names were infringing their marks, that third party may be able to block our ability to use the infringing trademark or trade name. In addition, if a third party were to bring such a claim, we would be required to dedicate time and resources to fight the claim, which time and resources could otherwise be used toward the maintenance of our own intellectual property.

Parties making claims against us may request and obtain injunctive or other equitable relief, which could prevent our ability to use the subject trademarks or trade names. Defense of these claims, regardless of their merit, would involve substantial litigation expense and would be a substantial diversion of employee resources from our business. In the event of a successful claim of infringement against us, we may have to pay substantial damages, including treble damages and attorneys' fees for willful infringement. We may be required to re-brand one or more of our products, product candidates, or services offered under the infringing trademark or trade name, which may require substantial time and monetary expenditure. Third parties could claim senior rights in marks which might be enforced against our use of trademarks or trade names, resulting in either an injunction prohibiting our sales under those trademarks or trade names.

Risks Related to Government Regulation

Our business and products are subject to extensive government regulation.

We are subject to extensive, complex, costly and evolving regulation by federal and state governmental authorities in the United States, the EU, Canada, Australia and other countries, principally by the FDA, the U.S. Drug Enforcement Administration, the Centers for Disease Control and Prevention, the EMA and other similar regulatory authorities. Our partners Daewoong and Symatase are also subject to extensive regulation by the FDA and their own country's regulatory authorities as well as other regulatory authorities. Our failure to comply with all applicable regulatory requirements, or our partner's failure to comply with applicable regulatory requirements, including those promulgated under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, and the Controlled Substances Act, may subject us to operating restrictions and criminal prosecution, monetary penalties and other enforcement or administrative actions, including, sanctions, warnings, product seizures, recalls, fines, injunctions, suspension, revocation of approvals, or exclusion from future participation in the Medicare and Medicaid programs.

Following regulatory approval, we, and our direct and indirect suppliers, including Daewoong and Symatase, remain subject to the periodic inspection of our facilities, review of production processes, and testing of our products to confirm that we are in compliance with all applicable regulations. Adverse findings during regulatory inspections may result in requirements that we implement REMS programs, requirements that we complete government mandated clinical trials, and government enforcement actions including those relating to labeling, advertising, marketing and promotion, as well as regulations governing manufacturing controls.

If we experience delays in obtaining approval, as a result of a government shutdown or otherwise, or if we fail to obtain approval of our product candidates, the commercial prospects for our product candidates may be harmed and our ability to generate revenue will be materially impaired.

We may not obtain regulatory approval for the commercialization of any future product candidates.

The research, testing, manufacturing, labeling, approval, selling, import, export, marketing and distribution of drug and biologic products, such as our neurotoxin product, and medical devices, such as our injectable HA gel product candidates, are subject to extensive regulation by the FDA and other regulatory authorities in the United States and other countries, with regulations differing from country to country. If we, our products or the manufacturing facilities for our products fail to comply with applicable regulatory requirements, a regulatory agency may:

- impose restrictions on the marketing or manufacturing of the product, suspend or withdraw product approvals or revoke necessary licenses;
- issue warning letters, show cause notices or untitled letters describing alleged violations, which may be publicly available;
- mandate modifications to promotional materials or require us to provide corrective information to aesthetic practitioners;
- require us to enter into a consent decree, which can include imposition of various fines, reimbursements for inspection costs, required due dates for specific actions and penalties for noncompliance;
- commence criminal investigations and prosecutions;
- impose injunctions;
- impose other civil or criminal penalties;
- suspend any ongoing clinical trials;
- delay or refuse to approve pending applications or supplements to approved applications filed by us;
- refuse to permit drugs or active ingredients to be imported or exported;
- suspend or impose restrictions on operations, including costly new manufacturing requirements; or
- seize or detain products or require us to initiate a product recall.

Any of the foregoing could materially harm our business and reputation. Prior to obtaining approval to commercialize a product candidate in the United States or abroad, we or our collaborators must demonstrate with substantial evidence from well-controlled clinical trials, and to the satisfaction of the FDA, the EMA or other similar foreign regulatory authorities, that such product candidates are safe and effective for their intended uses. Results from preclinical studies and clinical trials can be interpreted in different ways. Even if we and our collaborators believe the preclinical or clinical data for our product candidates are promising, such data may not be sufficient to support approval by the FDA, the EMA and other similar regulatory authorities. Administering product candidates to humans may produce undesirable side effects, which could interrupt, delay or halt clinical trials and result in the FDA, the EMA or other similar regulatory authorities delaying or denying approval of a product candidate for any or all targeted indications.

Regulatory approval of a BLA or BLA supplement, premarket approval, marketing authorization application, or other product approval is not guaranteed, and the approval process is expensive and may take several years. The FDA, the EMA and other regulatory authorities have substantial discretion in the approval process. Despite the time and expense expended, failure can occur at any stage, and we could encounter problems that cause us to abandon, modify or repeat clinical trials, or perform additional preclinical studies and clinical trials. The number of preclinical studies and clinical trials that will be required for the FDA, the EMA or other regulatory approval varies depending on the product candidate, the disease or condition that the product candidate is designed to address and the regulations applicable to any particular product candidate. The FDA, the EMA and other regulatory authorities can delay, limit or deny approval of a product candidate for many reasons, including the following:

- a product candidate may not be deemed safe, effective, pure or potent;
- the data from preclinical studies and clinical trials may not be deemed sufficient;
- the FDA or other regulatory authorities might not approve our third-party manufacturers' processes or facilities;
- deficiencies in the formulation, quality control, labeling, or specifications of a product candidate or in response to citizen petitions or similar documents filed in connection with the product candidate;
- general requirements intended to address risks associated with a class of drugs, such as a new REMS requirement for neurotoxins, injectable HA gels or other aesthetic products;
- the enactment of new laws or promulgation of new regulations that change the approval requirements; or
- the FDA or other regulatory authorities may change their approval policies or adopt new regulations.

If any future product candidates fail to demonstrate safety and efficacy in clinical trials or do not gain approval, our business and results of operations will be materially and adversely harmed.

We are subject to ongoing regulatory obligations and continued regulatory review, which may result in significant additional expense, limit or delay regulatory approval and subject us to penalties if we fail to comply with applicable regulatory requirements.

Jeuveau[®] and Evolysse[®] and any other regulated products we may offer in the future are subject to continual regulatory review by the FDA, the EMA and other similar regulatory authorities.

Any regulatory approvals that we or our collaborators receive for any future product candidates may also be subject to limitations on the approved indications for which the product may be marketed or to the conditions of approval, or contain requirements for potentially costly post-marketing testing, including Phase IV clinical trials, and surveillance to monitor the safety and efficacy of the product. In addition, the manufacturing processes, labeling, packaging, distribution, adverse event reporting, storage, advertising, promotion and recordkeeping for our products and any other future product candidates will be subject to extensive and ongoing regulatory requirements. These requirements include submissions of safety and other post-marketing information and reports, registration, as well as continued compliance with cGMP requirements and compliance with good clinical practice requirements, for any clinical trials that we conduct post-approval. Later discovery of previously unknown problems with Jeuveau[®], Evolysse[®] or any future product candidates, including adverse events of unanticipated severity or frequency, or with our third-party manufacturers or manufacturing processes, or failure to comply with regulatory requirements, may result in, among other things: restrictions on the marketing or manufacturing of the product, withdrawal of the product from the market, or voluntary or mandatory product recalls; fines, warning letters or holds on clinical trials; refusal by the FDA, the EMA or other similar regulatory authorities to approve pending applications or supplements to approved applications filed by us or our strategic collaborators or suspension or revocation of product license approvals; product seizure or detention or refusal to permit the import or export of products; and injunctions or the imposition of civil or criminal penalties.

Our ongoing regulatory requirements may also change from time to time, potentially harming or making costlier our commercialization efforts. If we are slow or unable to adapt to changes in existing requirements or the adoption of new requirements or policies, or if we are not able to maintain regulatory compliance, we may lose any marketing approval that we may have obtained and we may not achieve or sustain profitability, which would adversely affect our business.

If we fail to obtain regulatory approvals in foreign jurisdictions for our products or any future product candidates, we will be unable to market our products outside of the United States.

In addition to regulations in the United States, we are and will be subject to a variety of foreign regulations governing manufacturing, clinical trials, commercial sales and distribution of our future products. Whether or not we obtain FDA approval for a product candidate, we must obtain approval of the product by the comparable regulatory authorities of foreign countries before commencing clinical trials or marketing in those countries. The approval procedures vary among countries and can involve additional clinical testing, and the time required to obtain approval may differ from that required to obtain FDA approval. Clinical trials conducted in one country may not be accepted by regulatory authorities in other countries. Approval by the FDA does not ensure approval by regulatory authorities in other countries, and approval by one or more foreign regulatory authorities does not ensure approval by regulatory authorities in other foreign countries or by the FDA.

The foreign regulatory approval process may include all of the risks associated with obtaining FDA approval. We may not be able to file for regulatory approvals or to do so on a timely basis, and even if we do file, we may not receive necessary approvals to commercialize our products in markets outside of the United States.

Our products or any future products may cause or contribute to adverse medical events that we are required to report to regulatory agencies and if we fail to do so, we could be subject to sanctions that would materially harm our business.

Some participants in our clinical trials have reported adverse events after being treated with our products. If we are successful in commercializing our products or any other product candidate the FDA and other regulatory agency regulations require that we report certain information about adverse medical events if those products may have caused or contributed to those adverse events. The timing of our obligation to report would be triggered by the date we become aware of the adverse event as well as the nature of the event. We may fail to report adverse events that we become aware of within the prescribed timeframe. We may also fail to appreciate that we have become aware of a reportable adverse event, especially if it is not reported to us as an adverse event or if it is an adverse event that is unexpected or removed in time from the use of our products. If we fail to comply with our reporting obligations, the FDA, the EMA or other similar regulatory authorities could take action including criminal prosecution, the imposition of civil monetary penalties, seizure of our products, or delay in approval or clearance of future products.

We may in the future be subject to various U.S. federal and state laws pertaining to health care fraud and abuse, including anti-kickback, self-referral, false claims and fraud laws, and any violations by us of such laws could result in fines or other penalties.

While we do not expect that our products will subject us to the various U.S. federal and most state laws intended to prevent health care fraud and abuse, we may in the future become subject to such laws. The Anti-Kickback Statute prohibits the offer, receipt, or payment of remuneration in exchange for or to induce the referral of patients or the use of products or services that would be paid for in whole or part by Medicare, Medicaid or other federal health care programs. Remuneration has been broadly defined to include anything of value, including cash, improper discounts, and free or reduced-price items and services. Many states have similar laws that apply to their state health care programs as well as private payors. Violations of anti-kickback and other applicable laws can result in exclusion from federal health care programs and substantial civil and criminal penalties.

The federal False Claims Act (“FCA”), imposes liability on persons who, among other things, present or cause to be presented false or fraudulent claims for payment by a federal health care program. The FCA has been used to prosecute persons submitting claims for payment that are inaccurate or fraudulent, that are for services not provided as claimed, or for services that are not medically necessary. The FCA includes a whistleblower provision that allows individuals to bring actions on behalf of the federal government and share a portion of the recovery of successful claims. Some state law equivalents of the above federal laws, such as the Anti-Kickback Statute and FCA, apply to items or services regardless of whether the good or service was reimbursed by a government program, so called all-payor laws. These all-payor laws could apply to our sales and marketing activities even if the Anti-Kickback Statute and FCA laws are inapplicable.

If our marketing or other arrangements were determined to violate anti-kickback or related laws, including the FCA or an all-payor law, then we could be subject to penalties, including administrative, civil and criminal penalties, damages, fines, disgorgement, the exclusion from participation in federal and state healthcare programs, individual imprisonment or the curtailment or restructuring of our operations, any of which could materially and adversely affect our ability to operate our business and our financial results.

State and federal authorities have aggressively targeted pharmaceutical companies for alleged violations of these anti-fraud statutes, based on improper research or consulting contracts with doctors, certain marketing arrangements with pharmacies and other healthcare providers that rely on volume-based pricing, off-label marketing schemes, and other improper promotional practices. Companies targeted in such prosecutions have paid substantial fines, have been ordered to implement extensive corrective action plans, and have in many cases become subject to consent decrees severely restricting the manner in which they conduct their business, among other consequences. Additionally, federal and state regulators have brought criminal actions against individual employees responsible for alleged violations. If we become the target of such an investigation or prosecution based on our contractual relationships with providers or institutions, or our marketing and promotional practices, we could face similar sanctions, which would materially harm our business.

Also, the FCPA and similar worldwide anti-bribery laws generally prohibit companies and their intermediaries from making improper payments to non-U.S. officials for the purpose of obtaining or retaining business. Our internal control policies and procedures may not protect us from reckless or negligent acts committed by our employees, future distributors, partners,

collaborators or agents. Violations of these laws, or allegations of such violations, could result in fines, penalties or prosecution and have a negative impact on our business, results of operations and reputation.

Legislative or regulatory healthcare reforms in the United States and other countries may make it more difficult and costly for us to obtain regulatory clearance or approval of any future product candidates and to produce, market, and distribute our products after clearance or approval is obtained.

From time to time, legislation is drafted and introduced in the U.S. Congress or other countries that could significantly change the statutory provisions governing the regulatory clearance or approval, manufacture, and marketing of regulated products or the reimbursement thereof. In addition, regulations and guidance are often revised or reinterpreted by the FDA and other regulatory authorities in ways that may significantly affect our business and our products. Any new regulations or revisions or reinterpretations of existing regulations may impose additional costs or lengthen review times of any future product candidates. Such changes could, among other things, require changes to manufacturing or marketing methods, changes to product labeling or promotional materials, recall, replacement, or discontinuance of one or more of our products; and additional recordkeeping. Additionally, the ability of the FDA to review and approve new products can be affected by a variety of factors, including government budget and funding levels, the ability to hire and retain key personnel, the ability to accept the payment of user fees, statutory, regulatory and policy changes and other events that may otherwise affect the FDA's ability to perform routine functions. For example, the current administration has stated its intention to focus on decreasing government spending and has made significant staffing reductions in the federal government. Any funding or staffing reductions at the FDA could impact the FDA's ability to review and approve new products, which could make it more difficult and expensive to obtain approval of our products and/or bring our products to market.

Each of these would likely entail substantial time and cost and could materially harm our business and our financial results. In addition, delays in receipt of or failure to receive regulatory clearances or approvals for any future products would harm our business, financial condition and results of operations.

Additionally, in its June 2024 decision in *Loper Bright Enterprises v. Raimondo* ("Loper"), the U.S. Supreme Court overturned the longstanding Chevron doctrine, under which courts were required to give deference to regulatory agencies' reasonable interpretations of ambiguous federal statutes. The Loper decision could result in additional legal challenges to regulations and guidance issued by federal agencies applicable to our current or future operations, including those issued by the FDA and Centers for Medicare & Medicaid Services ("CMS"). Further, the Loper decision may result in increased regulatory uncertainty, inconsistent judicial interpretations and other impacts to the agency rulemaking process. We cannot predict which additional measures may be adopted or the impact of current and additional measures on the marketing, pricing and demand for our products, which could have a material adverse effect on our business, financial condition and results of operations.

Risks Related to Our Common Stock

The trading price of our common stock has been volatile, and purchasers of our common stock could incur substantial losses.

Our stock price is volatile. For example, the closing price of our common stock during the six months ended June 30, 2026 has ranged from a low of \$3.94 to a high of \$7.15. The stock market in general and the market for pharmaceutical and medical aesthetic companies in particular have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. The market price of our common stock may be influenced by many factors, some of which are beyond our control, including:

- actual or anticipated variations in our financial results, including our revenue, gross margin, operating expenses, profitability or cash flows;
 - changes in financial estimates or guidance, or our ability to meet financial estimates or guidance;
 - market perception of Jeuveau®, Evolysse® and any future products, including customer adoption, consumer demand, competitive positioning, pricing, procedure volumes and product demand;
 - adverse developments involving Daewoong, Symatase, the Daewoong Agreement, the Symatase U.S. Agreement, the Symatase Europe Agreement or the Medytox Settlement Agreements;
 - adverse developments in the regulatory approval process for Evolysse® or any future products;
-

- tariffs, trade restrictions, macroeconomic conditions, geopolitical conflicts, changes in consumer sentiment or other factors affecting discretionary spending or our cost of goods;
- announcements by us or our competitors regarding new products, product approvals, clinical results, acquisitions, licenses, strategic partnerships or other significant transactions;
- unanticipated safety concerns, product liability claims, intellectual property disputes, regulatory actions or litigation involving us, our products, our licensors, our competitors or our industry;
- changes in our capital structure, such as future issuances of securities and the incurrence of additional debt;
- securities analyst reports, changes in analyst recommendations, rumors, market speculation, short selling or negative commentary regarding us or our industry;
- additions or departures of key personnel;
- broad market, industry and economic conditions, including volatility affecting pharmaceutical, biotechnology, medical aesthetics or growth companies; and
- other factors described in this “Risk Factors” section.

In the past, following periods of volatility in the overall market and the market prices of a particular company’s securities, securities class action litigation has often been instituted against that company. We may become the target of this type of litigation in the future. Securities litigation, if instituted against us, could result in substantial costs and divert our management’s attention and resources from our business.

Future sales of our common stock by us or the perception that such sales may occur, could depress the market price of our common stock.

Sales by us of a substantial number of shares of our common stock in the public market, or the perception that these sales might occur, could significantly reduce the market price of our common stock and could impair our ability to raise capital through the sale of additional equity securities. We also have an effective shelf registration statement on Form S-3 that may permit us to offer and sell shares of common stock or other securities from time to time, subject to market conditions, our capital needs and applicable securities law requirements.

We have filed a registration statement with the SEC covering shares of our common stock available for future issuance under our 2017 Omnibus Incentive Plan, 2023 Inducement Incentive Plan and 2024 Employee Stock Purchase Plan, and may file future registration statements covering shares of our common stock for future issuance under any future plans. Upon effectiveness of such registration statements, any shares subsequently issued under such plans will be eligible for sale in the public market, except to the extent that they are restricted by the contractual arrangements discussed above and subject to compliance with Rule 144 in the case of our affiliates. Sales of a large number of the shares in the public market, or a perception that such sales could occur, could significantly reduce the market price of our common stock.

Anti-takeover provisions in our certificate of incorporation and bylaws, as well as Delaware law, could discourage a takeover.

Our certificate of incorporation, bylaws and Delaware law contain provisions that might enable our management to resist a takeover and might make it more difficult for an investor to acquire a substantial block of our common stock. These include the following provisions:

- permit our Board of Directors to issue shares of preferred stock, with any rights, preferences and privileges as they may designate, without stockholder approval, which could be used to dilute the ownership of a hostile bidder significantly;
 - provide that the authorized number of directors may be changed only by resolution of our Board of Directors and that a director may only be removed for cause by the affirmative vote of the holders of at least 66 2/3% of our voting stock;
 - provide that all vacancies, including newly created directorships, may, except as otherwise required by law, be filled by the affirmative vote of a majority of directors then in office, even if less than a quorum;
-

- divide our Board of Directors into three classes, with each class serving staggered three-year terms, which may delay the ability of stockholders to change the membership of a majority of our Board of Directors;
- require that any action to be taken by our stockholders must be effected at a duly called annual or special meeting of stockholders and not be taken by written consent;
- provide that stockholders seeking to present proposals before a meeting of stockholders or to nominate candidates for election as directors at a meeting of stockholders must provide notice in writing in a timely manner and also specify requirements as to the form and content of a stockholder's notice, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of our company;
- prohibit cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates; and
- provide that special meetings of our stockholders may be called only by the chairman of the Board of Directors, our Chief Executive Officer or by our Board of Directors pursuant to a resolution adopted by a majority of the total number of authorized directors, which may delay the ability of our stockholders to force consideration by our company of a take-over proposal or to take certain corporate actions, including the removal of directors.

These provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our Board of Directors, which is responsible for appointing the members of our management. In addition, we are subject to Section 203 of the General Corporation Law of the State of Delaware (the "DGCL"), which generally prohibits a Delaware corporation from engaging in any of a broad range of business combinations with an interested stockholder who owns in excess of 15% of our outstanding voting stock from merging or combining with us for a period of three years after the date of the transaction in which the person acquired in excess of 15% of our outstanding voting stock, unless the merger or combination is approved in a prescribed manner. This provision could have the effect of delaying or preventing a change-of-control, whether or not it is desired by or beneficial to our stockholders. Further, other provisions of Delaware law may also discourage, delay or prevent someone from acquiring us or merging with us.

Our certificate of incorporation designates the Court of Chancery of the State of Delaware as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, employees or agents.

Our certificate of incorporation provides that, unless we consent in writing to an alternative forum, the Court of Chancery of the State of Delaware will be the sole and exclusive forum for all "internal corporate claims." "Internal corporate claims" are claims that are based upon a violation of a duty by a current or former director, officer or stockholder in such capacity, or as to which Title 8 of the DGCL confers jurisdiction upon the Court of Chancery of the State of Delaware, or the Court of Chancery, in each case subject to the Court of Chancery having personal jurisdiction over the indispensable parties named as defendants and the claim not being one which is vested in the exclusive jurisdiction of a court or forum other than the Court of Chancery, or for which the Court of Chancery does not have subject matter jurisdiction. For example, this choice of forum provision would not apply to claims brought pursuant to the Exchange Act or the Securities Act or any other claim for which the federal courts have exclusive jurisdiction. Any person purchasing or otherwise acquiring any interest in any shares of our capital stock shall be deemed to have notice of and to have consented to this provision of our certificate of incorporation. The choice of forum provision in our certificate of incorporation will not relieve us of our duties to comply with the federal securities laws and the rules and regulations thereunder, and our stockholders will not be deemed to have waived our compliance with these laws, rules and regulations.

This choice of forum provision may limit our stockholders' ability to bring a claim in a judicial forum that they find favorable for disputes with us or our directors, officers, employees or agents, which may discourage such lawsuits against us and our directors, officers, employees and agents even though an action, if successful, might benefit our stockholders. Stockholders who do bring a claim in the Court of Chancery could face additional litigation costs in pursuing any such claim, particularly if they do not reside in or near Delaware. The Court of Chancery may also reach different judgments or results than would other courts, including courts where a stockholder considering an action may be located or would otherwise choose to bring the action, and such judgments or results may be more favorable to us than to our stockholders. Alternatively, if a court were to find this provision of our certificate of incorporation inapplicable to, or unenforceable in respect of, one or more of the

specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could have a material adverse effect on our business, financial condition or results of operations.

Claims for indemnification by our directors and officers may reduce our available funds to satisfy successful third-party claims against us and may reduce the amount of money available to us.

Our certificate of incorporation and bylaws provide that we can indemnify our directors and officers, in each case to the fullest extent permitted by Delaware law. Separate indemnity agreements have been issued with each director and executive officer.

In addition, as permitted by Section 145 of the DGCL, our bylaws and our indemnification agreements that we have entered into with our directors and officers, among other things provide that:

- We have indemnified our directors and officers for serving us in those capacities, or for serving as a director, officer, employee or agent of other business enterprises at our request, to the fullest extent permitted by Delaware law. Delaware law provides that we may indemnify such person if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to our best interest and, with respect to any criminal proceeding, had no reasonable cause to believe such person's conduct was unlawful.
- We may, in our discretion, indemnify employees and agents in those circumstances where indemnification is permitted by applicable law.
- We will be required to advance expenses, as incurred, to our directors and officers in connection with defending a proceeding, except that such directors or officers shall undertake to repay such advances if it is ultimately determined that such person is not entitled to indemnification.
- The rights conferred in our bylaws will not be exclusive. We may not retroactively amend our bylaw provisions to reduce our indemnification obligations to directors, officers, employees and agents.

As a result, claims for indemnification by our directors and officers may reduce our available funds to satisfy successful third-party claims against us and may reduce the amount of money available to us.

General Risk Factors

Our business could be negatively affected as a result of actions of activist stockholders, and such activism could impact the trading value of our securities.

Stockholders may, from time to time, engage in proxy solicitations or advance stockholder proposals, or otherwise attempt to effect changes and assert influence on our Board of Directors and management. Activist campaigns that contest or conflict with our strategic direction or seek changes in the composition of our Board of Directors could have an adverse effect on our operating results and financial condition. A proxy contest would require us to incur significant legal and advisory fees, proxy solicitation expenses and administrative and associated costs and require significant time and attention by our Board of Directors and management, diverting their attention from the pursuit of our business strategy. Any perceived uncertainties as to our future direction and control, our ability to execute on our strategy, or changes to the composition of our Board of Directors or senior management team arising from a proxy contest could lead to the perception of a change in the direction of our business or instability which may result in the loss of potential business opportunities, make it more difficult to pursue our strategic initiatives, or limit our ability to attract and retain qualified personnel and business partners, any of which could adversely affect our business and operating results. If individuals are ultimately elected to our Board of Directors with a specific agenda, it may adversely affect our ability to effectively implement our business strategy and create additional value for our stockholders. We may choose to initiate, or may become subject to, litigation as a result of the proxy contest or matters arising from the proxy contest, which would serve as a further distraction to our Board of Directors and management and would require us to incur significant additional costs. In addition, actions such as those described above could cause significant fluctuations in our stock price based upon temporary or speculative market perceptions or other factors that do not necessarily reflect the underlying fundamentals and prospects of our business.

If securities or industry analysts publish unfavorable research about our business or decrease the frequency or cease to provide coverage of our company, our stock price and trading volume could decline.

The trading market for our common stock depends in part on the research and reports that equity research analysts publish about us and our business. If one or more of the equity research analysts who cover us downgrades our common stock or

issues other unfavorable commentary or research the price of our common stock may decline. If one or more equity research analysts ceases coverage of our company or fails to publish reports on us regularly, demand for our common stock could decrease, which in turn could cause the trading price or trading volume of our common stock to decline.

We have not paid dividends in the past and do not expect to pay dividends in the future, and any return on investment may be limited to the value of our stock.

We have never paid cash dividends on our common stock and do not anticipate paying cash dividends on our common stock in the foreseeable future, and the payment of dividends is also restricted under our credit facility. The payment of dividends on our common stock will depend on our earnings, financial condition and other business and economic factors affecting us at such time as our Board of Directors may consider relevant. If we do not pay dividends, capital appreciation, if any, of our common stock will be your sole source of gain for the foreseeable future.

The requirements of being a public company may strain our resources, divert management's attention and affect our ability to attract and retain executive management and qualified Board members.

As a public company, we are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the Nasdaq Marketplace Rules and other applicable securities rules and regulations. Complying with these rules and regulations increases our legal and financial compliance costs, makes some activities more difficult, time-consuming or costly and increases demand on our systems and resources. In order to maintain and, if required, improve our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight may be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business and operating results. We may need to hire more employees in the future or engage outside consultants to assist us in complying with these requirements, which could increase our costs and expenses.

Changing laws, regulations and standards relating to corporate governance and public disclosure may also increase our compliance costs and require management attention. If we fail to comply with applicable securities laws, corporate governance requirements or public disclosure obligations, we could be subject to legal or regulatory proceedings, and our business, reputation, financial condition and results of operations could be adversely affected.

FIRST AMENDMENT TO LOAN AND SECURITY AGREEMENT

This First Amendment to Loan and Security Agreement (this “Amendment”) dated as of April 17, 2026 is by and between **EVOLUS, INC.**, a Delaware corporation (the “Borrower”), **ECLIPSE BUSINESS CAPITAL LLC**, as agent for the Lenders (in such capacity, “Agent”), and the Lenders party hereto.

BACKGROUND

A. The Borrower, Agent and the Lenders entered into that certain Loan and Security Agreement dated as of March 3, 2026 (as may be amended, modified, extended, or restated from time to time, the “Agreement”), pursuant to which Agent and the Lenders extended certain financing arrangements to the Borrower.

B. The parties hereto have agreed to modify the terms and conditions of the Agreement as more fully set forth herein.

C. Capitalized terms used but not otherwise defined herein shall have the meanings given to such terms in the Agreement.

NOW THEREFORE, in consideration of the terms, conditions and covenants set forth below, and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties, intending to be legally bound hereby, promise and agree as follows:

1. Amendment to Section 1.1 (Certain Defined Terms). Section 6.1 of the Agreement is hereby amended by deleting such section in its entirety and replacing it with the following:

6.1 Lock Boxes and Blocked Accounts. Each Loan Party hereby represents and warrants that all Deposit Accounts and all other depository and other accounts maintained by each Loan Party as of the Closing Date are described in Section 3 of the Perfection Certificate, which description includes for each such account the name of the Loan Party maintaining the account, the name of the financial institution at which the account is maintained, the account number and the purpose of the account. After the Closing Date, no Loan Party shall open any new Deposit Account or any other depository or other account (other than Restricted Accounts) without the prior written consent of Agent and without updating Section 3 of the Perfection Certificate to reflect such Deposit Account or other account. No Deposit Account or other account of any Loan Party shall at any time constitute a Restricted Account other than accounts expressly indicated on Section 3 of the Perfection Certificate as being Restricted Accounts (and each Loan Party hereby represents and warrants that each such account shall at all times meet the requirements set forth in the definition of Restricted Account to qualify as a Restricted Account). Each Loan Party will, at its expense, establish (and revise from time to time as Agent may require) procedures acceptable to Agent, in Agent's sole discretion, for the collection of checks, wire transfers and all other proceeds of all of such Loan Party's Accounts and other Collateral (“Collections”), which shall include (a) directing all Account Debtors to send all Account proceeds directly to a post office box designated by Agent either in the name of such Loan Party (but as to which Agent has exclusive access) or, at Agent's option, in the name of Agent (a “Lock Box”), (b) depositing all Collections received by such Loan Party into one or more bank accounts maintained in the name of such Loan Party (but as to which, subject to the period for compliance set forth in Schedule 7.34, Agent has exclusive access) (each, a “Blocked Account”), under an arrangement reasonably acceptable to Agent with a depository bank reasonably acceptable to Agent, pursuant to which all funds deposited into each Blocked Account are to be transferred to Agent in such manner, and with such frequency, as Agent shall specify, and/or (c) a combination of the foregoing; provided, that, so long as no Dominion Triggering Period

is continuing, no less frequently than each Business Day (and whether or not there are then any outstanding Obligations), Agent shall cause the ACH or wire transfer of the balance of the collection account that is a Blocked Account, to an operating account designated by Borrower Representative; provided further, however, that at any time after the occurrence and during the continuance of a Dominion Triggering Period, the balance of such Blocked Account, net of a minimum balance as may be required to be kept, shall be distributed and applied on a daily basis by Agent to repay outstanding Revolving Loans. Each Loan Party agrees to execute, and to cause its depository banks and other account holders to execute, such Lock Box and Blocked Account control agreements and other documentation as Agent shall reasonably require from time to time in connection with the foregoing, all in form and substance reasonably acceptable to Agent, and in any event such arrangements and documents must be in place on the date hereof with respect to accounts in existence on the date hereof, or prior to any such account being opened with respect to any such account opened after the date hereof, in each case excluding Restricted Accounts. Prior to the Closing Date, Borrowers shall deliver to Agent a complete and executed Authorized Accounts form (in the form of Exhibit D annexed hereto) regarding each Borrower's operating account(s) into which the proceeds of Loans are to be paid. Subject to Schedule 7.34, all Funding Accounts and all operating, disbursement or similar accounts of the Loan Parties (other than Restricted Accounts) shall at all times be subject to springing account control agreements in favor of, and in form and substance reasonably satisfactory to, the Agent. Notwithstanding the foregoing or anything else herein to the contrary, Borrowers shall not permit (i) the aggregate balance of funds in its [***] at any time, and (ii) the aggregate balance of funds in its [***] at any time.

2. Conditions to Effectiveness. This Amendment shall be effective upon completion of the following (each of such documents and/or actions to be in form and substance acceptable to Agent in its sole discretion):

- (a) Execution and delivery of this Amendment by all parties hereto;
- (b) Agent shall have received the Acknowledgment and Consent attached hereto executed by the Term Loan Agent; and
- (c) Such other agreements and documents related hereto as Agent may reasonably require.

3. Representations and Warranties. The Borrower represents and warrants to Agent and the Lenders:

- (a) The execution, delivery and performance by the Borrower of this Amendment and the transactions contemplated herein (i) are and will be within the powers of the Borrower, (ii) have been authorized by all necessary actions of the Borrower, (iii) are not and will not be in contravention of any order of any court or other agency of government, or of any law to which the Borrower or any property of the Borrower is bound, and (iv) are not and will not be in conflict with, or result in a breach of or constitute (with due notice and/or lapse of time) a default under the articles of organization, articles of incorporation, code of regulations, operating agreement, as applicable, or any indenture, agreement or undertaking to which the Borrower is a party or by which the Borrower or any property of the Borrower is bound;
 - (b) This Amendment and any other agreements, instruments or documents executed and/or delivered in connection herewith, shall be valid, binding and enforceable against the Borrower in accordance with their respective terms except to the extent enforceability may be limited by bankruptcy, insolvency, reorganization or similar laws affecting creditors' rights generally;
-

- (c) Each of the representations and warranties contained in, and each of the exhibits and/or schedules attached to, the Agreement, as amended hereby, and the Loan Documents are true, correct and complete in all material respects as of the date hereof except that those representations and warranties which relate to a specific date shall remain true and correct in all material respects as of such date;
- (d) No event or condition which has or is likely to have a Material Adverse Effect as to the Borrower has occurred from the Closing Date to the date hereof; and
- (e) Upon the effectiveness of this Amendment, no Default or Event of Default is outstanding under the Agreement.

4. Confirmation of Security Interests. Borrower confirms and agrees that all prior security interests and liens granted to Agent and the Lenders in all existing and future assets of Borrower remain unimpaired and in full force and effect and shall continue to cover and secure all Obligations. Borrower further confirms and represents that all of the collateral of Borrower remains free and clear of all liens other than those in favor of Agent and the Lenders or as otherwise permitted in the Agreement. Nothing contained herein is intended to in any way impair or limit the validity, priority or extent of Agent and the Lenders' security interest in and liens upon the collateral of Borrower.

5. Obligations Absolute. The Borrower covenants and agrees (a) to pay the balance of any principal, together with all accrued interest, in connection with any promissory note executed and evidencing any indebtedness incurred in connection with the Agreement, as modified by this Amendment pursuant to the terms set forth therein and (b) to perform and observe covenants, agreements, stipulations and conditions on its part to be performed hereunder or under the Agreement and all other documents executed in connection herewith or thereof.

6. No Set-Offs Etc. The Borrower hereby declares that the Borrower has no set-offs, counterclaims, defenses or other causes of action against Agent and the Lenders arising out of the Agreement or any related loan documents, and to the extent any such set-offs, counterclaims, defenses or other causes of action may exist, whether known or unknown, such items are hereby waived by the Borrower.

7. Release. THE BORROWER HEREBY RELEASES, WAIVES AND FOREVER RELINQUISHES ALL CLAIMS, DEMANDS, OBLIGATIONS, LIABILITIES AND CAUSES OF ACTION OF WHATEVER KIND OR NATURE, WHETHER KNOWN OR UNKNOWN, INCLUDING ANY SO-CALLED "LENDER LIABILITY" CLAIMS OR DEFENSES WHICH IT HAS, MAY HAVE, OR MIGHT ASSERT NOW OR IN THE FUTURE AGAINST AGENT, THE LENDERS AND/OR THEIR RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, AGENTS, ATTORNEYS, ACCOUNTANTS, CONSULTANTS, SUCCESSORS, AND ASSIGNS (INDIVIDUALLY, A "RELEASEE" AND COLLECTIVELY, THE "RELEASEES"), DIRECTLY OR INDIRECTLY, ARISING OUT OF, BASED UPON, OR IN ANY MANNER CONNECTED WITH (A) ANY TRANSACTION, EVENT, CIRCUMSTANCE, ACTION, FAILURE TO ACT, OR OCCURRENCE OF ANY SORT OR TYPE, WHETHER KNOWN OR UNKNOWN, WHICH OCCURRED, EXISTED, OR WAS TAKEN OR PERMITTED PRIOR TO THE EXECUTION OF THIS AMENDMENT WITH RESPECT TO THE OBLIGATIONS, THE AGREEMENT, THE OTHER LOAN DOCUMENTS, OR THE ADMINISTRATION THEREOF, (B) ANY DISCUSSIONS, COMMITMENTS, NEGOTIATIONS, CONVERSATIONS, OR COMMUNICATIONS WITH RESPECT TO THE OBLIGATIONS OR (C) ANY THING OR MATTER RELATED TO ANY OF THE FOREGOING PRIOR TO THE EXECUTION OF THIS AMENDMENT. THE INCLUSION OF THIS PARAGRAPH IN THIS AMENDMENT AND THE EXECUTION OF THIS AMENDMENT BY AGENT AND THE LENDERS DOES NOT CONSTITUTE AN ACKNOWLEDGMENT OR ADMISSION BY AGENT AND THE LENDERS OF LIABILITY FOR ANY MATTER, OR A PRECEDENT UPON WHICH ANY LIABILITY MAY BE ASSERTED.

8. Fees and Expenses. The Borrower shall reimburse Agent for all attorneys' fees incurred in connection with this Amendment.
9. Non-Waiver. This Amendment does not obligate Agent and the Lenders to agree to any other extension or modification of the Agreement nor does it constitute a course of conduct or dealing on behalf of Agent and the Lenders or a waiver of any other rights or remedies of Agent and the Lenders. No omission or delay by Agent or the Lenders in exercising any right or power under the Agreement, this Amendment or any related instruments, agreements or documents will impair such right or power or be construed to be a waiver of any Default or Event of Default or an acquiescence therein, and any single or partial exercise of any such right or power will not preclude other or further exercise thereof or the exercise of any other right, and no waiver will be valid unless in writing and then only to the extent specified.
10. Incorporation. This Amendment is incorporated by reference into, and made part of, the Agreement which, except as expressly modified herein, remains in full force and effect in accordance with its terms.
11. No Modification. No modification of this Amendment or of any agreement referred to herein shall be binding or enforceable unless in writing and signed on behalf of the party against whom enforcement is sought.
12. Headings. The headings of any section or paragraph of this Amendment are for convenience only and shall not be used to interpret any provision of this Amendment.
13. Successors and Assigns. This Amendment will be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.
14. Governing Law; Use of Terms Etc. Except as previously amended or as herein specifically amended, directly or by reference, all of the terms and conditions set forth in the Agreement are confirmed and ratified, and shall remain as originally written. This Amendment shall be construed in accordance with the laws of the State of New York, without regard to principles of conflict of laws. The Agreement and all other Loan Documents shall remain in full force and effect in all respects as if the unpaid balance of the principal outstanding, together with interest accrued thereon, had originally been payable and secured as provided for therein, as amended from time to time and as modified by this Amendment. Nothing herein shall affect or impair any rights and powers which Agent may have under the Agreement and any and all related Loan Documents.
15. Severability. The provisions of this Amendment are to be deemed severable, and the invalidity or unenforceability of any provision shall not affect or impair the remaining provisions which shall continue in full force and effect.
16. Counterparts, Facsimile and .pdf. This Amendment may be executed in any number of counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement. Signature by facsimile or .pdf shall have the same force and effect as an original signature hereto.
17. Jury Waiver. THE PARTIES HERETO HEREBY WAIVE ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY ACTION OR PROCEEDING RELATING TO THIS AMENDMENT, ANY OF THE LOAN DOCUMENTS, ANY DOCUMENT DELIVERED HEREUNDER OR IN CONNECTION HERewith, OR ANY TRANSACTION ARISING FROM OR CONNECTED TO ANY OF THE FOREGOING. THE PARTIES REPRESENT THAT THIS WAIVER IS KNOWINGLY, WILLINGLY AND VOLUNTARILY GIVEN.
