Distributable Earnings

- Distributable Earnings is a non-GAAP measure defined as GAAP net income (loss) attributable to our common stockholders, including realized gains and losses, regardless of whether such items are included in other comprehensive income or loss, or in GAAP net income (loss), and excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization expense, (iii) unrealized gains (losses), and (iv) certain non-cash or income and expense items. The exclusion of depreciation and amortization expense from the calculation of Distributable Earnings only applies to debt investments related to real estate to the extent we foreclose upon the property or properties underlying such debt investments.
- We believe that Distributable Earnings provides meaningful information to consider in addition to our net income (loss) and cash flow from operating activities determined in accordance with GAAP. We generally must distribute at least 90% of our net taxable income annually, subject to certain adjustments and excluding any net capital gains, for us to continue to qualify as a REIT for U.S. federal income tax purposes. We believe that one of the primary reasons investors purchase our common stock is to receive our dividends. Because of our investors' continued focus on our ability to pay dividends, Distributable Earnings is an important measure for us to consider when determining our distribution policy and dividends per common share. Further, Distributable Earnings helps us to evaluate our performance excluding the effects of certain transactions and GAAP adjustments that we believe are not necessarily indicative of our current loan investment and operating activities.
- Distributable Earnings excludes the impact of our credit loss provision or reversals of our credit loss provision, but only to the extent that our credit loss provision exceeds any realized credit losses during the applicable reporting period.
- A loan will be written off as a realized loss when it is deemed non-recoverable, or upon a realization event. Such a realized loss would generally be recognized at the time the loan receivable is settled, transferred or exchanged, or in the case of foreclosure, when the underlying property is foreclosed upon or sold. Non-recoverability may also be concluded by us if, in our determination, it is nearly certain that all amounts due will not be collected. A realized loss may equal the difference between the cash or consideration received or expected to be received, and the net book value of the loan, reflecting our economics as it relates to the ultimate realization of the asset.
- Distributable Earnings does not represent net income (loss) or cash generated from operating activities and should not be considered as an alternative to GAAP net income (loss), an indication of our GAAP cash flows from operations, a measure of our liquidity, or an indication of funds available for our cash needs. In addition, our methodology for calculating Distributable Earnings may differ from the methodologies employed by other companies to calculate the same or similar supplemental performance measures, and accordingly, our reported Distributable Earnings may not be comparable to the Distributable Earnings reported by other companies.

Deferred Fundings

- Fundings to borrowers that are made under existing loan commitments after a loan closing date

Geographic Diversity

- TRTX divides the South region into separate Southeast and Southwest regions using definitions established by The National Council of Real Estate Investment Fiduciaries (NCREIF). A reconciliation to TRTX's Form 10-Q at June 30, 2022 follows (dollars in millions):

Region	Form 10-Q	Reclassification	Supplemental	% Total Commitment

Various	70.0	(70.0)	-	-
Total	\$5,186.5	\$-	\$5,186.5	100.0%

Note: Totals may not sum due to rounding

Leverage

- Debt-to-Equity Ratio - Represents (i) total outstanding borrowings under secured financing arrangements, including collateralized loan obligations, secured credit agreements, asset-specific financing arrangements, a secured revolving credit facility, and mortgage loans payable (if any), less cash, to (ii) total stockholders' equity, at period end
- Total Leverage Ratio - Represents (i) total outstanding borrowings under secured financing arrangements, including collateralized loan obligations, secured credit agreements, asset-specific financing arrangements, a secured revolving credit facility, and mortgage loans payable (if any), plus nonconsolidated senior interests sold or co-originated (if any), less cash, to (ii) total stockholders' equity, at period end

Loan-to-Value (LTV)

- Except for construction loans, LTV is calculated for loan originations and existing loans as the total outstanding principal balance of the loan or participation interest in a loan (plus any financing that is pari passu with or senior to such loan or participation interest), divided by the as-is appraised value of our collateral at the time of origination or acquisition of such loan or participation interest. For construction loans only, LTV is calculated as the total commitment amount of the loan divided by the as-stabilized value of the real estate securing the loan. The as-is or as-stabilized (as applicable) value reflects our Manager's estimates, at the time of origination or acquisition of the loan or participation interest in a loan, of the real estate value underlying such loan or participation interest determined in accordance with our Manager's underwriting standards and consistent with third-party appraisals obtained by our Manager

Loan Category

- Bridge Loan - A loan with limited deferred fundings, generally less than 10% of the total loan commitment, which fundings are commonly conditioned on the borrower's satisfaction of certain collateral performance tests. The related business plan generally involves little or no capital expenditure related to base building work (e.g., building mechanical systems, lobbies, elevators, common areas, or other amenities), with most deferred fundings related to leasing activity. The primary focus is on maintaining or improving current operating cash flow, or addressing minimal lease expirations or existing tenant vacancies
- Light Transitional Loan - A transitional loan with deferred fundings ranging from 10% to 20% of the total loan commitment, which fundings are commonly conditioned on the borrower's completion of specified improvements to the property or satisfaction of certain collateral performance tests. The related business plan is to lease existing or forecasted tenant vacancy to achieve stabilized occupancy and cash flow. Capital expenditure is primarily to fund leasing commissions and tenant improvements for new tenant leases, and capital expenditure allocated to base building work generally does not exceed 20%. Deferred fundings may also be budgeted to fund operating deficits, or interest expense, during the period prior to stabilized occupancy
- Moderate Transitional Loan - A transitional loan with deferred fundings greater than 20% of the total loan commitment, which fundings are commonly conditioned on the borrower's completion of specified improvements to the property or satisfaction of certain collateral performance tests. The related business plan generally involves capital expenditure for base building work needed before substantial leasing activity can be achieved, followed by capital expenditure for tenant improvements and leasing commissions to achieve stabilized occupancy and cash flow. Deferred fundings may also be budgeted to fund operating deficits, or interest expense, during the period prior to stabilized occupancy
- Construction Loan - A loan made to a borrower to fund the ground-up construction of a commercial real estate property, or the horizontal development of commercial land

Non-Consolidated Senior Interest

- TRTX creates structural leverage through the co-origination or non-recourse syndication of a senior loan interest to a third-party. In either case, the senior mortgage loan (i.e., the non-consolidated senior interest) is not included on our balance sheet. When we create structural leverage through the co-origination or non-recourse syndication of a senior loan interest to a third-party, we retain on our balance sheet a mezzanine loan

Definitions (cont.)

Property Types

- **Mixed-Use:** TRTX classifies a loan as mixed-use if the property securing TRTX's loan (a) involves more than one use; and (b) no single use represents more than 60% of the collateral property's total value. In certain instances, TRTX's classification may be determined by its assessment of which use is the principal driver of the property's aggregate net operating income
- **Life Science:** TRTX classifies a loan as life science if more than 60% of the gross leasable area is leased to, or will be converted to, life science-related space. Life science-related space includes laboratory space, office space, or allied light manufacturing space used in support of biotechnology, pharmaceuticals, biomedical technologies, life systems technologies, and the design and manufacture of biomedical technology.

 - 2 - Meets or Exceeds Expectations—Collateral performance meets or exceeds substantially all performance metrics included in original or current underwriting / business plan;
 - 3 - Satisfactory—Collateral performance meets or is on track to meet underwriting; business plan is met or can reasonably be achieved;
 - 4 - Underperformance—Collateral performance falls short of original underwriting, material differences exist from business plan, or both; technical milestones have been missed; defaults may exist, or may soon occur absent material improvement; and
