SECURITIES AND EXCHANGE COMMISSION**
WASHINGTON, DC 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2026
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from to
Commission File Number: 001-39593

Shattuck Labs, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

81-2575858
(I.R.S. Employer
Identification Number)

500 W. 5th Street, Suite 1200
Austin, TX 78701
(512) 900-4690

(Address of principal executive offices including zip code)

Former name, former address and former fiscal year, if changed since last report: N/A

Securities registered pursuant to Section 12(b) of the Exchange Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.0001 per share	STTK	The Nasdaq Global Select Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Non-accelerated filer

Accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2026 the registrant had 76,680,517 shares of common stock, \$0.0001 par value per share, outstanding.

CAUTIONARY NOTE ABOUT FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of the federal securities laws, which statements are subject to substantial risks and uncertainties and are based on estimates and assumptions. All statements, other than statements of historical facts, including statements concerning our plans, objectives, goals, strategies, future events, future revenues or performance, financing needs, plans or intentions relating to products and markets, and business trends and other information referred to under the sections entitled “Risk Factors,” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” are forward-looking statements. In some cases, you can identify forward-looking statements by terms such as “may,” “might,” “will,” “objective,” “intend,” “should,” “could,” “can,” “would,” “expect,” “believe,” “design,” “estimate,” “predict,” “potential,” “plan,” “develop,” or the negative of these terms, and similar expressions intended to identify forward-looking statements. Forward-looking statements are not historical facts, and reflect our current views with respect to future events, outcomes or results. Given the significant risks and uncertainties, you should not place undue reliance on these forward-looking statements.

There are a number of risks, uncertainties and other factors that could cause our actual results or outcomes, or the timing of our results or outcomes, to differ materially from the forward-looking statements expressed or implied in this Quarterly Report on Form 10-Q. Such risks, uncertainties and other factors include, among others, the following:

- the timing of the initiation, progress, and expected results of our nonclinical studies, our clinical trials, and our research and development programs;
 - our ability to enroll patients in our clinical trials;
 - the costs related to our nonclinical studies, our clinical trials, our research and development programs, and the impact of inflationary pressures on such costs;
 - our ability to retain the continued service of our key executives and to identify, hire, and retain additional qualified professionals;
 - our ability to advance product candidates into, and successfully complete, nonclinical studies and clinical trials;
 - the timing or likelihood of regulatory filings and approvals;
 - the commercialization of our product candidates, if approved;
 - our ability and the potential to successfully manufacture and supply our product candidates for clinical trials and for commercial use, if approved;
 - the pricing, coverage, and reimbursement of our product candidates, if approved;
 - the implementation of our business model, strategic plans for our business, and product candidates;
 - the scope of protection we are able to establish and maintain for intellectual property rights covering our technology;
 - our potential need to obtain additional licenses of third-party technology that may not be available to us or are available only on commercially unreasonable terms, and which may cause us to operate our business in a more costly or otherwise adverse manner that was not anticipated;
 - our ability to enter into strategic arrangements and/or collaborations and to realize the potential benefits of such arrangements;
 - our ability to contract with third-party suppliers and manufacturers and their ability to perform adequately;
 - our estimates regarding the market opportunity for our product candidates, if approved;
 - our estimates regarding expenses, capital requirements, and needs for additional financing and our ability to obtain additional capital;
 - our financial performance;
-

- developments relating to our competitors and our industry, including competing product candidates and therapies; and
- economic downturns, inflation, fluctuating interest rates, changes in trade policies, including tariffs or other trade restrictions or the threat of such actions, natural disasters, public health crises, such as pandemics, political crises, government shutdowns, geopolitical events, or other macroeconomic conditions.

There may be other risks, uncertainties, and other factors that may cause our actual results or outcomes, or the timing of our results or outcomes, to differ materially from the forward-looking statements expressed or implied in this Quarterly Report on Form 10-Q, including factors disclosed in “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations”. You should evaluate all forward-looking statements made in this Quarterly Report on Form 10-Q in the context of these risks, uncertainties and other factors.

We caution you that the risks, uncertainties, and other factors referred to above and elsewhere in this Quarterly Report on Form 10-Q may not contain all of the risks, uncertainties and other factors that may affect our future results and operations. Moreover, new risks will emerge from time to time. It is not possible for our management to predict all risks. In addition, we cannot assure you that we will realize the results, outcomes, benefits or developments that we expect or anticipate or, even if substantially realized, that they will result in the consequences or affect us or our business in the way we expect.

Any forward-looking statements contained in this Quarterly Report on Form 10-Q speak only as of the date hereof and not of any future date, and we expressly disclaim any intent to update any forward-looking statements, whether as a result of new information, future developments, future events, changes in assumptions or otherwise.

SHATTUCK LABS, INC.
NOTES TO THE UNAUDITED INTERIM CONDENSED FINANCIAL STATEMENTS

1. Organization and Description of Business

Shattuck Labs, Inc. (the "Company") was incorporated in 2016 in the State of Delaware and is a biotechnology company specializing in the development of potential treatments for inflammatory and immune-mediated diseases. Shattuck is developing a potentially first-in-class antibody for the treatment of inflammatory bowel disease and other inflammatory and immune-mediated diseases. Shattuck's expertise in protein engineering and the development of novel tumor necrosis factor receptor agonist and antagonist therapeutics come together in its lead program, SL-325, which it believes could be a first-in-class death receptor 3 ("DR3") antagonist antibody designed to achieve best-in-class clinical remission rates due to a more complete and durable blockade of the clinically validated tumor necrosis factor like ligand 1A ("TL1A")/DR3 pathway.

Liquidity

The Company has incurred losses and negative cash flows from operations since inception and has an accumulated deficit of \$445.3 million as of March 31, 2026. The Company anticipates incurring additional losses and negative cash flows from operations until such time, if ever, that it can generate significant sales of its product candidates currently in development, and is highly dependent on its ability to find additional sources of funding in the form of licensing of its technology, collaboration agreements and/or public and private debt and equity financings. Adequate additional funding may not be available to the Company on acceptable terms, or at all. The failure to raise funds as and when needed could have a negative impact on the Company's financial condition and ability to pursue its clinical operations, research and development and commercialization of its product candidates. Management believes that the Company's cash and cash equivalents of \$90.4 million as of March 31, 2026 are sufficient to fund projected operations of the Company for at least the next twelve months following the date these financial statements are issued.

Global Economic Considerations

The global macroeconomic environment is uncertain and could be negatively affected by, among other things, inflation, slower growth or recession, changes in trade policies, including tariffs or other trade restrictions or the threat of such actions, instability, or volatility in the global capital and credit markets, supply chain weaknesses, financial institution instability, changes to fiscal and monetary policy or government budget dynamics, and instability in the geopolitical environment. Such challenges have caused, and may continue to cause, recession fears, high interest rates, foreign exchange volatility, and inflationary pressures. At this time, the Company is unable to quantify the potential effects of this economic instability on its future operations.

2. Basis of Presentation and Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited interim condensed financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP").

Unaudited Interim Condensed Financial Statements

In the opinion of management, the accompanying interim financial statements include all normal and recurring adjustments (which consist primarily of accruals, estimates and assumptions that impact the financial statements) considered necessary to present fairly the Company's financial position, its results of operations, statements of changes in stockholders' equity and cash flows for the interim periods presented. Operating results for interim periods presented are not necessarily indicative of the results that may be expected for the year ending December 31, 2026. The interim financial statements presented herein do not contain all required disclosures under GAAP for annual financial statements. The accompanying unaudited interim condensed financial statements should be read in conjunction with the annual audited financial statements and related notes in the Company's Annual Report on Form 10-K for the year ended December 31, 2025.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Significant estimates and assumptions reflected in these financial statements include, but are not limited to, revenue recognition, the accrual of research and development expenses, and the valuation of stock-based awards. Estimates are periodically reviewed in light of changes in circumstances, facts and experience. Changes in estimates, if any, are recorded in the period in which they become known and actual results could differ from management's estimates.

Fair Value of Financial Instruments

Fair value is defined as the price that would be received upon the sale of an asset or paid upon the transfer of a liability in an orderly transaction between market participants at the measurement date and in the principal or most advantageous market for that asset or liability. Fair value measurements are classified and disclosed in one of the following categories:

- Level 1: Observable inputs such as quoted prices in active markets for identical assets the reporting entity has the ability to access as of the measurement date;
- Level 2: Inputs, other than quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Fair value measurements are classified based on the lowest level of input that is significant to the measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, which may affect the valuation of the assets and liabilities and their placement within the fair value hierarchy levels. The determination of the fair values takes into account the market for its financial assets and liabilities, the associated credit risk and other factors as required. The Company considers active markets as those in which transactions for the assets or liabilities occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Management believes that the carrying amounts of the Company's financial instruments, including short-term investments and accounts payable, approximate fair value due to the short-term nature of those instruments.

Concentration of Risk

Financial instruments that potentially subject the Company to concentrations of credit risk primarily consist of cash, cash equivalents and short-term investments. The Company maintains its cash and cash equivalents at an accredited financial institution in amounts that exceed federally-insured limits. The Company does not believe that it is subject to unusual credit risk beyond the normal credit risk associated with commercial banking relationships. The Company's short term investments consist of U.S. Treasury securities that management believes protects the Company from risk of default and impairment of value.

The Company is highly dependent on a limited number of contract development and manufacturing organizations ("CDMOs") to supply drug products for its research and development activities of its programs, including nonclinical studies. The Company is highly dependent on a single CDMO for the supply of cGMP drug product for its clinical trials. These programs could be adversely affected by a significant interruption in the supply of such drug products.

The Company is highly dependent on a limited number of contract research organizations ("CROs") and third-party service providers to manage and support its clinical trials. These programs could be adversely affected by a significant disruption in services provided by these CROs and third parties.

Cash and Cash Equivalents

The Company considers all demand deposits with financial institutions and all highly liquid investments with original maturities of 90 days or less at the date of purchase to be cash and cash equivalents. Cash and cash equivalents consisted of \$1.6 million held in operating accounts and \$88.9 million held in money market funds as of March 31, 2026, and \$1.9 million held in operating accounts and \$52.3 million held in money market funds as of December 31, 2025.

Investments

The Company's short-term investments consist of highly-rated U.S. Treasury securities and have been classified as available-for-sale and are carried at estimated fair value as determined based upon quoted market prices. Management determines the appropriate classification of its investment securities at the time of purchase. The Company may hold securities with stated maturities greater than one year. All available-for-sale securities are considered available to support current operations and are classified as current assets. Credit impairments for available-for-sale securities are recorded through an allowance rather than a direct write-down of the security and are recorded through a charge to the statements of operations and comprehensive loss. Unrealized gains or losses not related to credit impairments are recorded in accumulated other comprehensive income, a component of stockholders' equity, until realized. The Company reviews available-for-sale debt securities for impairments related to credit losses and other factors each quarter.

The Company has a long-term related party investment in preferred stock of a privately held company. The investment is accounted for under Accounting Standards Codification ("ASC") 321, *Investments in Equity Securities* and is classified as a long-term asset in the accompanying balance sheet as it is not expected to be liquidated within one year. For investments that do not have a readily determinable fair value, the Company applies the measurement alternative, whereby the investment is carried at cost, adjusted for observable price changes in orderly transactions for identical or similar securities of the same issuer and impairment losses, if any.

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets include prepaid expenses for general business purposes and services used in research projects, which are stated at cost and amortized on a straight-line basis over the related period of benefit. Supplies and materials that have multiple applications for alternative future use are expensed as they are consumed.

Property and Equipment

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation expense is recognized using the straight-line method over the estimated useful life of the asset. Expenditures for repairs and maintenance that do not extend the estimated useful life or improve an asset are expensed as incurred. Upon retirement or sale, the cost and related accumulated depreciation and amortization of assets disposed of are removed from the accounts, and any resulting gain or loss is included in the statement of operations and comprehensive loss.

Depreciation periods are as follows:

Office equipment	3 years
Furniture and fixtures	5 to 10 years
Lab equipment	5 years
Leasehold improvements	Shorter of lease term or 15 years

Impairment of Long-Lived Assets

Long-lived assets are reviewed for indications of possible impairment whenever events or changes in circumstance indicate that the carrying amount of an asset may not be recoverable. Recoverability is measured by comparison of the carrying amounts to the future undiscounted cash flows attributable to these assets. An impairment loss is recognized to the extent an asset group is not recoverable and the carrying amount exceeds the projected discounted future cash flows arising from these assets. There were no impairments of long-lived assets for the three months ended March 31, 2026 and 2025.

Leases

The Company determines if an arrangement is a lease at inception. Right-of-use ("ROU") assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. The classification of the Company's leases as operating or finance leases, along with the initial measurement and recognition of the associated ROU assets and lease liabilities, are performed at the lease commencement date. The measurement of lease liabilities is based on the present value of future lease payments over the lease term. As the Company's leases do not provide an implicit rate, the Company

uses its incremental borrowing rate based on the information available at the lease commencement date in determining the present value of future lease payments. The ROU asset is based on the measurement of the lease liability and also includes any lease payments made prior to or on lease commencement and excludes lease incentives and initial direct costs incurred, as applicable. The lease terms may include options to extend or terminate the lease when it is reasonably certain the Company will exercise any such options. Rent expense for the Company's operating leases is recognized on a straight-line basis over the lease term. Operating lease ROU assets and long-term operating lease liabilities are presented separately and operating lease liabilities payable in the next 12 months are recorded in accrued expenses and other current liabilities. The Company has elected to not apply the recognition requirement of ASC 842, *Leases* of the Financial Accounting Standards Board ("FASB") to leases with a term of 12 months or less for all classes of assets.

Commitments and Contingencies

The Company follows ASC 450-20, *Contingencies* to report accounting for contingencies. Certain conditions may exist as of the date the condensed financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's condensed financial statements. If the assessment indicates that a potential material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, and an estimate of the range of possible losses, if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the guarantees would be disclosed.

Revenue Recognition

Collaboration revenue is recognized in accordance with ASC 606, *Revenue from Contracts with Customers* ("ASC 606"). Arrangements with collaborators may include licenses to intellectual property, research and development services, manufacturing services for clinical and commercial supply, and participation on joint steering committees. The Company evaluates the promised goods or services in the contract to determine which promises, or group of promises, represent performance obligations. In contemplation of whether a promised good or service meets the criteria required of a performance obligation, the Company considers the stage of development of the underlying intellectual property, the capabilities and expertise of the customer relative to the underlying intellectual property and whether the promised goods or services are integral to or dependent on other promises in the contract. When accounting for an arrangement that contains multiple performance obligations, the Company must develop judgmental assumptions, which may include market conditions, reimbursement rates for personnel costs, development timelines and probabilities of regulatory success to determine the stand-alone selling price for each performance obligation identified in the contract.

Upon the amendment of an existing agreement, the Company evaluates whether the amendment represents a modification to an existing contract that would be recorded through a cumulative catch-up to revenue, prospective modification, or a separate contract. If it is determined that it is a separate contract, the Company will evaluate the necessary revenue recognition through the five-step process described below.

When the Company concludes that a contract should be accounted for as a combined performance obligation and recognized over time, the Company must then determine the period over which revenue should be recognized and the method by which to measure revenue. The Company generally recognizes revenue using a cost-based input method.

The Company recognizes collaboration revenue in an amount that reflects the consideration that the Company expects to receive in exchange for those goods or services when its customer or collaborator obtains control of

promised goods or services. To determine revenue recognition for arrangements that the Company determines are within the scope of ASC 606, the following five steps are performed:

- i. identify the contract(s) with a customer;
- ii. identify the performance obligations in the contract;
- iii. determine the transaction price;
- iv. allocate the transaction price to the performance obligations within the contract; and
- v. recognize revenue when (or as) the entity satisfies a performance obligation.

The Company only applies the five-step model to contracts when it determines that it is probable it will collect the consideration it is entitled to in exchange for the goods or services it transfers to the customer.

At contract inception, once the contract is determined to be within the scope of ASC 606, the Company assesses the goods or services promised within the contract to determine whether each promised good or service is a performance obligation. The promised goods or services in the Company's arrangements may consist of a license of, or options to license, the Company's intellectual property and research, development and manufacturing services. The Company may provide options to additional items in such arrangements, which are accounted for as separate contracts when the customer elects to exercise such options, unless the option provides a material right to the customer. Performance obligations are promises in a contract to transfer a distinct good or service to the customer that (i) the customer can benefit from on its own or together with other readily available resources and (ii) are separately identifiable from other promises in the contract. Goods or services that are not individually distinct performance obligations are combined with other promised goods or services until such combined group of promises meet the requirements of a performance obligation.

The Company determines transaction price based on the amount of consideration the Company expects to receive for transferring the promised goods or services in the contract. Consideration may be fixed, variable or a combination of both. At contract inception for arrangements that include variable consideration, the Company estimates the probability and extent of consideration it expects to receive under the contract utilizing either the most-likely amount method or expected amount method, whichever best estimates the amount expected to be received. The Company then considers any constraints on the variable consideration and includes variable consideration in the transaction price to the extent it is deemed probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

The Company then allocates the transaction price to each performance obligation based on the relative standalone selling price and recognizes as revenue the amount of the transaction price that is allocated to the respective performance obligation when (or as) control is transferred to the customer and the performance obligation is satisfied. For performance obligations that consist of licenses and other promises, the Company utilizes judgment to assess the nature of the combined performance obligation to determine whether the combined performance obligation is satisfied over time or at a point in time and, if over time, the appropriate method of measuring progress. The Company evaluates the measure of progress each reporting period and, if necessary, adjusts the measure of performance and related revenue recognition.

The Company records amounts as accounts receivable when the right to consideration is deemed unconditional. When consideration is received, or such consideration is unconditionally due, from a customer prior to transferring goods or services to the customer under the terms of a contract, a contract liability is recorded as deferred revenue.

Amounts received prior to satisfying the revenue recognition criteria are recognized as deferred revenue in the Company's accompanying balance sheet. Deferred revenues expected to be recognized as revenue within the 12 months following the balance sheet date are classified as a current liability. Deferred revenues not expected to be recognized as revenue within the 12 months following the balance sheet date are classified as non-current liabilities.

The Company's collaboration revenue arrangements may include the following:

Up-front License Fees: If a license is determined to be distinct from the other performance obligations identified in the arrangement, the Company recognizes revenues from nonrefundable, up-front fees allocated to the

license when the license is transferred to the licensee and the licensee is able to use and benefit from the license. For licenses that are bundled with other promises, the Company utilizes judgment to assess the nature of the combined performance obligation to determine whether the combined performance obligation is satisfied over time or at a point in time and, if over time, the appropriate method of measuring progress for purposes of recognizing revenue from non-refundable, up-front fees. The Company evaluates the measure of progress each reporting period and, if necessary, adjusts the measure of performance and related revenue recognition.

Milestone Payments: At the inception of an agreement that includes research and development milestone payments, the Company evaluates each milestone to determine when and how much of the milestone to include in the transaction price. The Company first estimates the amount of the milestone payment that the Company could receive using either the expected value or the most-likely amount approach. The Company primarily uses the most-likely amount approach as that approach is generally most predictive for milestone payments with a binary outcome. The Company then considers whether any portion of that estimated amount is subject to the variable consideration constraint (that is, whether it is probable that a significant reversal of cumulative revenue would not occur upon resolution of the uncertainty). The Company updates the estimate of variable consideration included in the transaction price at each reporting date which includes updating the assessment of the likely amount of consideration and the application of the constraint to reflect current facts and circumstances.

Royalties: For arrangements that include sales-based royalties, including milestone payments based on a level of sales, and the license is deemed to be the predominant item to which the royalties relate, the Company will recognize revenue at the later of (i) when the related sales occur, or (ii) when the performance obligation to which some or all of the royalty has been allocated has been satisfied (or partially satisfied).

To date, the Company has not granted a development and commercialization license nor recognized any revenue related to sales-based royalties or milestone payments based on the level of sales.

Research and Development Services: The Company will record costs associated with development and process optimization activities as research and development expenses in the statements of operations and comprehensive loss consistent with ASC 730, *Research and Development*. The Company considered the guidance in ASC 808, *Collaborative Arrangements* ("ASC 808") and will recognize the payments received from these agreements as revenue when the related costs are incurred.

License Revenue: License revenue is generated from granting third parties rights to certain of the Company's intellectual property, including research, development, and commercialization of specified product candidates. The Company evaluates each licensing arrangement to determine whether the license is distinct from other promised goods or services and whether the arrangement includes multiple performance obligations. If an arrangement includes multiple performance obligations, the transaction price is allocated to each performance obligation based on relative standalone selling prices. Upfront payments, including nonrefundable license fees, are recognized as revenue when the underlying performance obligation is satisfied. Milestone payments that are contingent on the occurrence of a future event are included in the transaction price only when it is probable that a significant reversal of cumulative revenue will not occur. Sales-based royalties, including milestone payments based on a level of sales, are recognized as revenue when the subsequent sales occur.

The Company may also enter into arrangements that include non-cash consideration, such as equity instruments. In such cases, the Company measures the transaction price at the estimated fair value of the non-cash consideration received at contract inception and recognizes revenue when the performance obligation is satisfied.

Research and Development Costs

Research and development costs are expensed as incurred, and include salaries, stock-based compensation and other personnel-related costs, equipment and supplies, depreciation, nonclinical studies, clinical trials and manufacturing development activities.

A substantial portion of the Company's ongoing research and development activities are conducted by third-party service providers, including CROs and CDMOs. The Company accrues for expenses resulting from obligations under agreements with CROs, CDMOs and other outside service providers for which payment flows do not match the periods over which materials or services are provided to the Company. Accruals are recorded based on estimates of services received and efforts expended pursuant to agreements established with CROs, CDMOs and other outside

service providers. These estimates are typically based on contracted amounts applied to the proportion of work performed and determined through an evaluation of the progress or stage of completion of the services. In the event advance payments are made to a CRO, CDMO or outside service provider, the payments will be recorded as a prepaid asset which will be amortized as the contracted services are performed. As actual costs become known, the Company adjusts its accruals and prepaid assets accordingly. Inputs, such as the services performed, the number of patients enrolled or the study duration, may vary from the Company's estimates, resulting in adjustments to research and development expenses in future periods. The Company makes significant judgments and estimates in determining the accrual and/or prepaid balance in each reporting period and changes in these estimates may result in material changes to the Company's accruals that could materially affect the Company's results of operations.

Common Stock Warrants and Pre-Funded Warrants

The Company's common stock warrants and pre-funded warrants are classified as a component of permanent stockholders' equity within additional paid-in capital. The common stock warrants and pre-funded warrants are equity classified because they, (i) are freestanding financial instruments, (ii) are immediately exercisable, (iii) do not embody an obligation for the Company to repurchase its shares, (iv) permit the holders to receive a fixed number of shares of common stock upon exercise, (v) are indexed to the Company's common stock and, (vi) meet the equity classification criteria. In addition, such common stock warrants and pre-funded warrants do not provide any guarantee of value or return.

Stock-Based Compensation

The Company recognizes the cost of stock-based awards issued to employees and nonemployees as compensation expense on a straight-line basis over the vesting period of the award, net of estimated forfeitures. Forfeiture estimates are based on historical cancellation data. The Company uses the Black-Scholes option pricing model to determine the grant-date fair value of stock options. The fair values of restricted stock units ("RSUs") are based on the fair value of the Company's common stock on the date of the grant. The Company also grants stock options that vest upon achievement of certain market-based conditions. The Company uses the Monte Carlo pricing model to estimate the fair value of options that have market-based conditions. The Company adjusts expense for forfeitures in the periods they occur.

Income Taxes

The Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial statements and the tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities will be recognized in the period that includes the enactment date. Additionally, any changes in income tax laws are immediately recognized in the year of enactment.

A valuation allowance is established against the deferred tax assets to reduce their carrying value to an amount that is more likely than not to be realized. The deferred tax assets and liabilities are classified as noncurrent along with the related valuation allowance. Due to a lack of earnings history, the net deferred tax assets have been fully offset by a valuation allowance.

The Company recognizes benefits of uncertain tax positions if it is more likely than not that such positions will be sustained upon examination based solely on the technical merits, as the largest amount of benefits that is more likely than not to be realized upon the ultimate settlement. The Company's policy is to recognize interest and penalties related to the unrecognized tax benefits as a component of income tax expense.

Net Loss Per Share

Basic loss per share of common stock is computed by dividing net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding during each period. Basic shares outstanding includes the weighted average effect of the Company's outstanding 38,448,034 pre-funded warrants as of March 31, 2026, the exercise of which requires nominal consideration for the delivery of an equal number of shares of common stock. Diluted loss per share of common stock includes the effect, if any, from the potential exercise or conversion of securities, such as redeemable convertible preferred stock or convertible notes, if any.

stock options and unvested shares of restricted stock, which would result in the issuance of incremental shares of common stock. For diluted net loss per share, the weighted-average number of shares of common stock is the same for basic net loss per share due to the fact that when a net loss exists, dilutive securities are not included in the calculation as the impact is anti-dilutive.

The following potentially dilutive securities have been excluded from the computation of diluted weighted-average shares of common stock outstanding as they would be anti-dilutive:

	As of March 31,	
	2026	2025
Common stock warrants	47,487,573	—
Stock options	13,064,499	8,458,834
Unvested restricted stock units	589,803	527,453
	<u>61,141,875</u>	<u>8,986,287</u>

Other Comprehensive Income (Loss)

Other comprehensive income (loss) is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. Other comprehensive income (loss) is comprised of unrealized gains and losses on short-term investments.

Recently Adopted Accounting Pronouncements

In December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures. The amendments in this update are intended to enhance the transparency and decision usefulness of income tax disclosures primarily through changes to the rate reconciliation and income taxes paid information. This update is effective for annual periods beginning after December 15, 2024, and may be applied prospectively or retrospectively. The Company has retrospectively adopted this ASU in the financial statements for the year ending December 31, 2025.

Recently Issued Accounting Pronouncements

In November 2024, the FASB issued ASU 2024-03, Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses (“ASU 2024-03”), which is intended to provide more detailed information about specified categories of expenses (employee compensation, depreciation, and amortization) included in certain expense captions presented on the statement of operations. The guidance in this ASU is effective for fiscal years beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027. Early adoption is permitted. The amendments may be applied either, (i) prospectively to financial statements issued for periods after the effective date of this ASU or, (ii) retrospectively to all prior periods presented in the financial statements. The Company is currently evaluating the impact that the adoption of ASU 2024-03 will have on its financial statements and disclosures.

3. Investments

The following table represents the Company’s investments by major security type (amounts in thousands):

	March 31, 2026		
	Amortized Cost	Gross Unrealized Gain	Total Fair Value
Cash equivalents:			
Money market fund	\$ 88,860	\$ —	\$ 88,860
Total	<u>\$ 88,860</u>	<u>\$ —</u>	<u>\$ 88,860</u>

	December 31, 2025		
	Amortized Cost	Gross Unrealized Gain	Total Fair Value
Investments:			
U.S. government securities	\$ 23,867	\$ 6	\$ 23,873
Cash equivalents:			
Money market fund	52,270	—	52,270
Total	\$ 76,137	\$ 6	\$ 76,143

The Company's money market funds are calculated using level 1 inputs and the Company's U.S. government securities are valued using level 2 inputs. U.S. government securities outstanding as of December 31, 2025 matured in January 2026. There were no impairments of U.S. government securities or money market funds for the three months ended March 31, 2026 and the year ended December 31, 2025.

The Company has a related party investment in a private company's preferred stock. The Company did not identify any impairment indicators or observable price changes for this investment as of March 31, 2026. The Company had no other investments held at March 31, 2026 other than those included in the table above.

4. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consisted of the following (amounts in thousands):

	March 31, 2026	December 31, 2025
Research and development contract costs	\$ 1,057	\$ 1,111
Operating lease liabilities	852	837
Compensation and related benefits	752	2,767
Other	335	236
Total accrued expenses and other current liabilities	\$ 2,996	\$ 4,951

5. Commitments and Contingencies

Operating Leases

The Company leases certain office space, laboratory facilities, and equipment. These leases require monthly lease payments that may be subject to annual increases throughout the lease term. Certain of these leases also include renewal options at the election of the Company to renew or extend the lease. These optional periods have not been considered in the determination of the ROU assets or lease liabilities associated with these leases as the Company did not consider it reasonably certain it would exercise the options. The Company performed evaluations of its contracts and determined it has operating leases.

In February 2026, the Company entered into an amendment to extend the term of its lease for the Austin, Texas office location. The amendment extended the non-cancelable lease term to December 31, 2029 and increased the total contractual lease payments due over the revised lease term. In accordance with ASC 842, *Leases*, the Company remeasured the existing lease liability as of the modification date and as a result, recorded an increase to the ROU asset and liability of approximately \$0.7 million during the three months ended March 31, 2026.

There have been no other material changes in the Company's operating leases as compared to the operating leases disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2025.

Litigation

From time to time, the Company may become involved in various legal actions arising in the ordinary course of business. As of March 31, 2026, the Company was not aware of any existing, pending, or threatened legal actions that would have a material impact on the financial position, results of operations, or cash flows of the Company.

Contractual Obligations

Contractual obligations represent future cash commitments and liabilities under agreements with third parties, and exclude contingent liabilities for which the Company cannot reasonably predict future payment. The Company's contractual obligations result primarily from obligations for various CDMOs and CROs, which include potential payments that may be required under its agreements. The contracts also contain variable costs and milestones that are hard to predict, as they are based on such things as patients enrolled and clinical trial sites. The timing of payments and actual amounts paid under CDMO and CRO agreements may be different depending on the timing of receipt of goods or services or changes to agreed-upon terms or amounts for some obligations. Such agreements are cancellable upon written notice by the Company and, therefore, are not long-term liabilities.

6. Related Party License Revenue

In August 2025, the Company granted Kayak Therapeutics, Inc. ("Kayak") an exclusive license (the "Kayak Agreement") to its oncology-focused TRIM7 program. Pursuant to the Kayak Agreement, as the upfront consideration, the Company received preferred stock in Kayak with a fair market value of \$1.0 million and recognized that consideration as license revenue. The Company also subleases certain lab space, office space, and lab equipment to Kayak for one year for total consideration of \$0.3 million. In November 2025, an officer of the Company was elected to the board of directors of Kayak and as a result, Kayak became a related party. Payments received pursuant to the sublease for the three months ended March 31, 2026 were \$0.1 million and recorded as a reduction to research and development expenses.

Pursuant to the Kayak Agreement, the Company is also eligible to receive future payments contingent upon the achievement of specified development, regulatory, and commercial milestones of up to \$86.0 million, and tiered royalties on net sales of any commercialized products subject to the Kayak Agreement in the low single digits. Such future payments are considered variable consideration and will be recognized as revenue only when the underlying contingencies are resolved and it is probable that a significant reversal of revenue will not occur.

7. Equity

The Company is authorized to issue up to 300,000,000 shares of common stock and 10,000,000 shares of preferred stock, all with a par value of \$0.0001 per share. The holders of the Company's common stock are entitled to one vote per share on all matters submitted to a vote of stockholders. The Company's common stock is not entitled to preemptive rights, and is not subject to conversion, redemption or sinking fund provisions. Subject to preferences that may apply to any shares of preferred stock outstanding at the time, the holders of the Company's common stock will receive ratably any dividends declared by the Company's board of directors (the "Board") out of funds legally available. In the event of the Company's liquidation, dissolution or winding-up, the holders of the Company's common stock will be entitled to share ratably in all assets remaining after payment of or provision for any liabilities. As of the periods presented, no common stock dividends had been declared by the Board. As of March 31, 2026, none of the 10,000,000 shares of preferred stock were outstanding, and the Company has no present plans to issue any shares of preferred stock.

In December 2023, the Company sold 4,651,163 shares of common stock through an underwritten public offering, and concurrently completed a private placement of 3,100,823 pre-funded warrants. The purchase price per share of common stock was \$6.45, and the purchase price per pre-funded warrant was \$6.4499, which was the purchase price per share of common stock minus the \$0.0001 per share exercise price of the pre-funded warrant. Each pre-funded warrant may be exercised for one share of common stock, is immediately exercisable, does not expire, and is subject to a beneficial ownership limitation of 9.99% on a post-exercise basis.

In August 2025, the Company issued and sold 15,225,158 shares of common stock, pre-funded warrants to purchase up to 37,410,188 shares of common stock, and accompanying common stock warrants to purchase up to 52,635,346 shares of common stock or pre-funded warrants in a private placement offering with certain institutional accredited investors. The purchase price of each share of common stock and accompanying common stock warrant was \$0.8677, and the purchase price of each pre-funded warrant and accompanying common stock warrant was \$0.8676, which was the purchase price per share of common stock and accompanying common stock warrant, minus the \$0.0001 per share exercise price of the pre-funded warrants. Each pre-funded warrant may be exercised for one share of common stock, is immediately exercisable, does not expire, and is subject to a beneficial ownership

limitations of up to 9.99% on a post-exercise basis. Two beneficial owners of 10% or more of our common stock participated in the private placement offering with the same terms as all other participants in the offering. Together, the beneficial owners purchased 8,963,785 pre-funded warrants in lieu of common stock and received accompanying common stock warrants to purchase an additional 8,963,785 shares of common stock.

During the three months ended March 31, 2026, 6,929,032 pre-funded warrants were exercised and as of March 31, 2026, 38,448,034 pre-funded warrants remain outstanding.

Each common stock warrant has an exercise price of \$1.0846 and is exercisable at any time after the date of issuance for one share of common stock or pre-funded warrant in lieu thereof. The common stock warrants will expire on the 30th day following the date on which the data from the single ascending dose and multiple ascending dose portions of the Company's Phase 1 clinical trial of SL-325, including receptor occupancy and safety data, and the design of the planned Phase 2 clinical trial(s) have been announced publicly.

During the three months ended March 31, 2026, 5,019,719 common stock warrants were exercised for gross proceeds of \$5.4 million in exchange for 4,866,055 pre-funded warrants with an exercise price of \$0.0001 and 153,664 shares of common stock. As of March 31, 2026, 47,487,573 common stock warrants remain outstanding.

In January 2026, the Company entered into a sales agreement (the "Sales Agreement") with Leerink Partners, LLC (the "Sales Agent"), pursuant to which it may offer and sell up to \$75.0 million of shares of its common stock from time to time through an at the market offering facility (the "ATM Facility"). The Sales Agent is generally entitled to compensation at a commission equal to up to 3% of the aggregate gross sales price per share sold under the Sales Agreement. For the three months ended March 31, 2026, the Company sold 5,000,000 shares of common stock for \$4.28 per share for gross proceeds of \$21.4 million through the ATM Facility.

8. Stock-Based Compensation and Employee Benefit Plans

2020 Equity Incentive Plan

In September 2020, the Company adopted the 2020 Stock Incentive Plan (the "2020 Plan") which, as of the adoption date, replaced the 2016 Stock Incentive Plan. Under the 2020 Plan, the share reserve automatically increases on January 1st of each year beginning in 2021 and ending with a final increase on January 1, 2030 in an amount equal to 4% of the Company's outstanding shares of common stock on December 31st of the preceding calendar year. The Board may provide that there will be no increase in the share reserve for any such year or that the increase in the share reserve may be smaller than would otherwise occur. On January 1, 2026, the share reserve automatically increased by 2,531,194 shares. As of March 31, 2026, there were 1,559,581 shares available for future grants. The 2020 Plan permits the granting of options, stock appreciation rights, restricted stock units ("RSUs"), performance stock and performance cash awards. The terms of the agreements under the 2020 Plan are determined by the Board. The Company's awards generally vest over four years and have a term of 10 years. Periodically, the Company also grants awards that vest based on the Company's stock achieving certain closing share prices for a specified number of consecutive trading days.

2020 Employee Stock Purchase Plan

The 2020 Employee Stock Purchase Plan (the "2020 ESPP") became effective in October 2020. Eligible employees may purchase shares of common stock under the 2020 ESPP at 85% of the lower of the fair market value of the Company's common stock as of the first or the last day of each offering period. Employees are limited to contributing 15% of the employee's eligible compensation and may not purchase more than \$25,000 of stock during any calendar year or more than 2,000 shares during any one purchase period. The 2020 ESPP share reserve automatically increases on January 1st of each calendar year, for ten years, commencing on January 1, 2021, in an amount equal to 1% of the total number of shares of common stock outstanding on December 31st of the preceding calendar year. The Board may act prior to January 1st of a given year to provide that there will be no January 1st increase of the share reserve for such year or that the increase in the share reserve for such year will be a smaller number of shares of common stock than would otherwise occur pursuant to the preceding sentence. The Board elected not to increase the share reserve for the ESPP on January 1, 2026. As of March 31, 2026, there were 1,660,870 shares available for future purchases. There were 30,916 and 6,859 shares issued under the Company's 2020 ESPP during the three months ended March 31, 2026 and 2025, respectively, in each case for aggregate proceeds of less than \$0.1 million.

Summary of Stock-Based Compensation Expense

The Company recorded stock-based compensation expense in the following expense categories of its accompanying unaudited interim condensed statements of operations and comprehensive loss (in thousands):

	Three Months Ended March 31,	
	2026	2025
Research and development	\$ 1,036	\$ 687
General and administrative	1,379	1,034
Total stock-based compensation	\$ 2,415	\$ 1,721

Stock Options

The following table summarizes option activity under the 2020 Plan for the three months ended March 31, 2026:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Life (Years)
Balance at December 31, 2025	8,648,715	\$ 5.25	7.06
Granted	4,642,400	4.75	
Exercised	(38,000)	0.86	
Forfeited	(188,616)	7.15	
Balance at March 31, 2026	13,064,499	\$ 5.05	7.89
Vested and expected to vest	7,106,588	\$ 3.95	9.29
Exercisable at the end of the period	5,096,229	\$ 6.76	5.67

Options granted during the three months ended March 31, 2026 and 2025 had weighted-average grant-date fair values of \$4.02 and \$0.96 per share, respectively. As of March 31, 2026, the unrecognized compensation cost for options issued was \$24.6 million and will be recognized over an estimated weighted-average amortization period of 1.69 years. The total intrinsic value of options exercised during the three months ended March 31, 2026 was \$0.2 million. There were no options exercised during the three months ended March 31, 2025. The aggregate intrinsic value of options outstanding and exercisable as of March 31, 2026 was \$11.7 million.

Restricted Stock Units

The following table summarizes employee RSU activity for the three months ended March 31, 2026:

	Awards	Weighted Average Grant Date Fair Value
Balance at December 31, 2025	481,177	\$ 8.15
Granted	316,000	4.75
Released	(206,513)	7.69
Forfeited	(861)	8.67
Balance at March 31, 2026	589,803	\$ 6.49

The Company recognized \$0.4 million and \$0.3 million of stock-based compensation cost related to RSUs for the three months ended March 31, 2026 and 2025, respectively. As of March 31, 2026, the unrecognized compensation cost for RSUs issued was \$3.5 million and will be recognized over an estimated weighted-average amortization period of 2.60 years. The fair values of RSUs are based on the fair value of the Company's common stock on the date of the grant.

Fair Value of Stock Options and Shares Issued

The Company accounts for stock-based compensation by measuring and recognizing as compensation expense the fair value of all share-based payment awards made to employees, including employee stock options and restricted stock awards. The Company uses the Black-Scholes option pricing model to estimate the fair value of employee stock options that only have service or performance conditions. The inputs to the Black-Scholes option pricing model require a number of management estimates such as the expected term, volatility, risk-free interest rate and dividend yield. The fair value of stock options was determined using the methods and assumptions discussed below.

- The expected term of employee stock options with service-based vesting is determined using the “simplified” method, whereby the expected life equals the arithmetic average of the vesting term and the original contractual term of the option due to the Company’s lack of sufficient historical data.
- The expected stock price volatility assumption is based on the historical volatilities of the common stock of a peer group of publicly traded companies as well as the historical volatility of the Company’s common stock since the Company began trading subsequent to the Company’s initial public offering (“IPO”) in October 2020 over the period corresponding to the expected life as of the grant date. The historical volatility data was computed using the daily closing prices during the equivalent period of the calculated expected term of the stock-based awards. The Company will continue to apply this process until a sufficient amount of historical information regarding the volatility of the Company’s stock price becomes available, or until circumstances change, such that the identified entities are no longer comparable companies. In the latter case, other suitable, similar entities whose share prices are publicly available would be utilized in the calculation.
- The risk-free interest rate is based on the interest rate payable on U.S. Treasury securities in effect at the time of grant for a period that is commensurate with the expected term.
- The expected dividend yield is 0% because the Company has not historically paid, and does not expect, for the foreseeable future, to pay dividends on its common stock.
- Prior to the Company’s IPO, the Board periodically estimated the fair value of the Company’s common stock considering, among other things, contemporaneous valuations of its common stock prepared by an unrelated third-party valuation firm. Subsequent to the Company’s IPO, options are issued with a strike price no less than the market price on date of grant.

The grant-date fair value of options calculated using the Black-Scholes option pricing model granted under the Company’s 2020 Plan were estimated using the following weighted-average assumptions:

	Three Months Ended March 31,	
	2026	2025
2020 Plan		
Expected term - years	6.08	6.00
Expected volatility	110.4 %	101.4 %
Risk-free interest rate	3.8 %	4.4 %
Expected dividends	—	—

The grant-date fair value of shares issued calculated using the Black-Scholes option pricing model under the Company's 2020 ESPP were estimated using the following weighted-average assumptions:

	Three Months Ended March 31,	
	2026	2025
2020 ESPP		
Expected term - years	0.50	0.50
Expected volatility	109.7 %	107.8 %
Risk-free interest rate	3.92 %	4.70 %
Expected dividends	—	—

9. Segment Reporting

The Company has one reportable and operating segment, which is engaged in the business of drug discovery and development. The Company's chief operating decision maker ("CODM") is the Company's chief executive officer. The CODM uses the Company's net loss to monitor actual results versus the budget in assessing segment performance and the allocation of resources. The measure of segment assets is reported on the balance sheets as total assets. Accounting policies for segment reporting are the same as the accounting policies disclosed in Note 2.

The following table sets forth information about the Company's single reportable segment and the significant expenses reviewed by the CODM, including a reconciliation to net loss (in thousands):

	Three Months Ended March 31,	
	2026	2025
Revenue	\$ —	\$ —
Operating expenses:		
Research and development:		
SL-325 ¹	2,861	2,229
Other research and development ^{2,3}	4,667	4,606
Research and development non-equity compensation	2,382	2,397
Research and development equity compensation	1,036	687
Total research and development	10,946	9,919
General and administrative expenses:		
General and administrative non-equity compensation	1,427	1,353
General and administrative equity compensation	1,379	1,033
Other general and administrative including legal and accounting fees, facilities, insurance, travel and depreciation	1,793	2,084
Total general and administrative	4,599	4,470
Expense from operations	15,545	14,389
Loss from operations	(15,545)	(14,389)
Other Income	778	687
Net Loss	\$ (14,767)	\$ (13,702)

¹ Expenses for SL-325 that were incurred prior to it being nominated a product candidate are included in "other research and development".

² Other research and development expense includes technical operations expense of \$1.9 million and \$2.4 million, research activities for other pipeline compounds and facility expenses of \$1.9 million and \$1.3 million and depreciation expense of \$0.9 million and \$0.9 million for the three months ended March 31, 2026 and 2025, respectively.

³ Other research and development expense includes a gain of \$0.7 million due to a change in estimate and expense of \$2.0 million for the three months ended March 31, 2026 and 2025, respectively, related to SL-172154 which was discontinued in October 2024.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with our unaudited condensed financial statements and related notes appearing in this Quarterly Report on Form 10-Q, as well as the audited financial statements, notes and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2025. This discussion and other parts of this Quarterly Report on Form 10-Q contain forward-looking statements that involve risks and uncertainties, such as statements of our plans, objectives, expectations and intentions. Our actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in the "Risk Factors" section of this Quarterly Report on Form 10-Q. You should carefully read the "Cautionary Note About Forward-Looking Statements" of this Quarterly Report on Form 10-Q and the "Risk Factors" section of our Annual Report on Form 10-K for the year ended December 31, 2025 to gain an understanding of the important factors that could cause actual results to differ materially from the results described below.

Overview

We are a clinical-stage biotechnology company pioneering the development of potentially first-in-class monoclonal and bispecific Death Receptor 3 ("DR3") blocking antibodies for the treatment of patients with inflammatory and immune-mediated diseases. Our expertise in protein engineering and the development of novel tumor necrosis factor ("TNF") receptor therapeutics come together in our lead program, SL-325, a potentially first-in-class DR3 blocking antibody designed to achieve a more complete blockade of the clinically validated DR3/TL1A pathway than TL1A blocking antibodies.

SL-325 is a high-affinity DR3 blocking monoclonal antibody. DR3 is the sole known receptor for tumor necrosis factor like ligand 1A ("TL1A"). In our head-to-head preclinical studies, SL-325 blocked TL1A binding to DR3 better than sequence equivalents of leading TL1A blocking antibodies. We believe that the underlying biological differences in the expression of DR3 and TL1A, and the design characteristics of SL-325, may allow SL-325 to achieve best-in-class clinical remission rates in patients with inflammatory bowel disease ("IBD") due to a more complete and durable blockade of the clinically validated DR3/TL1A pathway. Additionally, we expect that SL-325 has the potential to demonstrate a superior immunogenicity profile in comparison to TL1A blocking antibodies. By targeting DR3 instead of TL1A, we expect to avoid the formation of immune complexes, which we believe are the primary source of immunogenicity for all TL1A blocking antibodies, and lead to high rates of anti-drug antibody ("ADA") formation toward TL1A targeting antibodies. ADA to TL1A targeting antibodies has been shown to reduce efficacy in IBD patients. We are currently conducting a single ascending dose ("SAD") and multiple ascending dose ("MAD") Phase 1 clinical trial evaluating SL-325 in healthy volunteers. We expect this Phase 1 clinical trial to be completed in the second quarter of 2026. We expect to initiate a randomized, placebo-controlled Phase 2 clinical trial evaluating SL-325 in patients with Crohn's Disease ("CD") in the third quarter of 2026.

TL1A is the sole known signaling ligand for DR3, and TL1A does not signal through any other receptors. Thus, we believe that the clinical safety profile of TL1A blocking antibodies generated to date in clinical trials conducted by other parties derisks the clinical safety profile for DR3 blockade. The lack of toxicity of SL-325 in our recently completed non-human primate ("NHP") acute toxicology study also suggests a potentially favorable clinical safety profile. We engineered SL-325 to lack any Fc gamma receptor binding function, and SL-325 has not shown any evidence in our preclinical studies to date of antibody dependent cellular cytotoxicity or cellular phagocytosis, which further supports a potentially derisked safety profile. We have demonstrated that SL-325 binds an epitope on DR3 that does not trigger receptor-mediated endocytosis, and the binding of SL-325 to DR3 was shown to be highly durable in our preclinical assays and in our NHP studies. Because DR3 is expressed on circulating, peripheral blood lymphocytes, we are able to directly measure DR3 receptor occupancy ("RO"), and our nonclinical studies suggest that blockade is durable for at least two months as a result of the properties of SL-325 and the stable expression of DR3. In our preclinical studies, including our acute NHP toxicology study, the RO and pharmacokinetic ("PK") profile of SL-325 suggest extended dosing intervals, which are being further characterized in our ongoing Phase 1 clinical trial.

DR3 has a distinct expression pattern from TL1A, and, consequently, blocking the receptor may allow a more complete and durable blockade of the axis, which we believe will translate to improved efficacy in patients with IBD. DR3 and TL1A have distinct expression patterns within the gastrointestinal tract (“GI”) of patients with IBD, including both ulcerative colitis (“UC”) and Crohn’s disease (“CD”). The cells within the GI tract that are capable of expressing TL1A include tissue resident antigen presenting cells and other non-hematopoietic cells. While TL1A is not usually expressed, when antigen presenting cells are exposed to inflammatory signals, a wave of TL1A mRNA expression begins, which peaks within 12 hours and ceases within 24 hours. In contrast, DR3 is stably expressed, primarily by lymphocytes both in the peripheral blood and in tissues. Direct comparison of TL1A and DR3 expression in the GI tracts of patients with IBD shows that TL1A is only upregulated in the actively inflamed areas of the GI tract. In contrast, DR3 is more abundant than TL1A and is upregulated in both actively inflamed parts of the GI tissue and in the adjacent non-inflamed tissue. The absence of TL1A in the non-inflamed areas of the bowel eliminates the mechanism through which TL1A blocking antibodies would be retained in non-inflamed areas of the GI tract. Because inflammation observed in UC and CD can wax and wane in different areas of the bowel over time, stable blockade of DR3 may reduce the spread of inflammation and may contribute to higher rates of clinical and endoscopic remission than what TL1A blocking antibodies have achieved to date.

A source of immunogenicity shared by all TL1A blocking antibodies is the formation of immune complexes between soluble TL1A in the blood and the anti-TL1A antibodies. Binding of soluble TL1A in the blood by anti-TL1A antibodies leads to a significant increase in the concentration of total TL1A in the blood. These immune complexes have contributed to ADA formation in more than 64% of subjects treated with afimkibart, tulisokibart, or duvakitug in third-party clinical trials. A third-party Phase 2 trial testing the efficacy of afimkibart in CD patients demonstrated that ADA caused accelerated clearance of afimkibart, which reduced efficacy in an ADA titer dependent manner. Because DR3 is a membrane-restricted receptor, and SL-325 was engineered to bind an epitope on DR3 that is not found on DcR3, immune complex formation is not expected with SL-325. Data generated from our GLP acute NHP toxicology study, along with *in silico* assessment of immunogenicity risk, consistently suggest that SL-325 may have single digit ADA rates in humans. Thus, we expect that SL-325 has the potential to demonstrate a best-in-mechanism immunogenicity profile, and we expect that this superior immunogenicity profile alone will lead to improved efficacy as a monotherapy, at both the induction and maintenance time points.

Additionally, there is a high degree of sequence identity between certain third-party anti-TL1A antibodies, including tulisokibart, afimkibart, and duvakitug, and potential third-party combination agents, including vedolizumab, risankizumab, mirikizumab, and guselkumab. This overlap in sequence identity introduces a risk that ADAs generated against TL1A antibodies may cross-bind to these potential combination agents and could cause accelerated clearance of both the anti-TL1A antibody and other antibodies included in a coformulation, and that this may impact the efficacy of each agent. Because of this, we believe that SL-325 may allow for improved efficacy in combination with other agents, compared to TL1A targeting antibodies.

We are planning initial clinical development of SL-325 in patients with CD. The clinical success of several TL1A blocking antibodies to date suggests that SL-325 may have monotherapy disease modifying activity early in clinical development. As described above, we believe that targeting DR3 may be more efficacious than targeting TL1A in patients with IBD. We have completed enrollment in the ongoing Phase 1 clinical trial for SL-325 in healthy volunteers in the second quarter of 2026, with participant follow-up, data collection, and data analysis ongoing. We expect to initiate our Phase 2 clinical trial in patients with CD in the third quarter of 2026.

We also plan to evaluate SL-325 in other inflammatory and immune-mediated diseases where the DR3/TL1A axis is implicated.

In addition to SL-325 and SL-425 (a half-life extended version of SL-325), we are developing bispecific antibodies which co-target DR3 and other clinically validated targets in immune mediated and inflammatory diseases. Inhibition of the TL1A/DR3 axis may be mechanistically distinct from the IL-23/IL-23R, IL-17/IL-17R, TSLP/TSLP-R or $\alpha\beta7$ /MADCAM-1 axes (as examples). Thus, dual inhibition of the TL1A/DR3 axis with coformulated or bispecific antibodies may provide additive clinical benefit in a variety of immune mediated and inflammatory diseases. As seen with TL1A directed antibodies, two third-party TL1A-directed bispecific antibodies, AMG966 and RO7837195, have also demonstrated nearly 100% ADA formation following a single dose in Phase 1 clinical trials. The mechanism of ADA formation was reported to be secondary to large immune complex formation for AMG966, which we believe is also true for RO7837195. The emerging clinical data from TL1A-directed

bispecific antibodies is similar to the prior failure of TNF α -directed bispecific antibodies, which we believe is because both TNF α and TL1A are soluble trimeric proteins found in the blood, and cause immunogenicity secondary to large immune complex formation. We expect that our DR3-directed bispecific antibodies to be less immunogenic than TL1A-directed bispecifics. DR3 may thus provide a differentiated target in a bispecific antibody format, providing advantages over TL1A-directed bispecific antibodies. Additionally, development of bispecific antibodies may enable more efficient clinical development than is expected for multi-antibody coformulations, and may avoid some of the challenges associated with potential immunogenicity in certain coformulations, as described above.

Research Programs

We maintain a strong research organization that has developed a diverse pipeline of preclinical compounds. One of our guiding principles for considering additional pipeline candidates is a preference for compounds that we expect to have monotherapy activity early in clinical development.

DR3 Bispecific Antibodies

In addition to SL-325 and SL-425, we are developing a series of bispecific antibodies targeting DR3 and other clinically validated targets. The future of biologic therapy for both UC and CD is widely believed to include blockade of multiple inflammatory pathways, and the mechanism of DR3/TL1A inhibition is known to be non-redundant with the mechanism of other clinically validated targets.

Several attempts have been made to develop bispecific antibodies targeting TL1A, including a TL1A and TNF α blocking antibody known as AMG966. As discussed above, TL1A blocking antibodies stabilize serum TL1A as a result of immune complex formation between soluble TL1A and anti-TL1A antibodies. These immune complexes are believed to contribute to the high rates of ADA formation with TL1A blocking monoclonal antibodies. In the case of AMG966, the bispecific antibody was shown to stabilize both soluble TL1A and TNF α , which led to large immune complex formation and the rapid development of high-titer neutralizing ADA responses in patients treated in a third-party Phase 1 clinical trial. AMG966 was discontinued as a result of this immunogenicity. A second TL1A directed bispecific antibody, RO7837195, targets TL1A and IL-23 p40. This antibody was also tested in a third-party Phase 1 clinical trial in healthy volunteers. Like AMG966, RO7837195 also induced ADA in nearly 100% of treated subjects after a single dose, and most of these ADA were also neutralizing. These two clinical trials suggest high rates of ADA may be unavoidable for TL1A-directed bispecific antibodies. The emerging clinical data for TL1A-directed bispecific antibodies is similar to the prior failure of multiple TNF α -directed bispecific antibodies. Both TNF α and TL1A are soluble trimeric proteins, and binding of bispecific antibodies to these proteins is known to cause large immune complex formation which results in the formation of ADA in nearly all treated subjects. Because DR3 is a membrane-restricted target, immune complex formation is not expected either for SL-325, SL-425, or DR3 directed bispecific antibodies.

Overview of Operations

For the three months ended March 31, 2026 and 2025, our net loss was \$14.8 million and \$13.7 million, respectively. We have not been profitable since inception, and as of March 31, 2026, we had an accumulated deficit of \$445.3 million and \$90.4 million in cash and cash equivalents. We expect to continue to incur significant expenses and operating losses in the near term in connection with our ongoing activities, as we:

- continue Phase 1 clinical development of our lead product candidate, SL-325;
- initiate nonclinical studies and clinical trials for additional product candidates that we may identify in the future, including potential DR3 based bispecific antibodies targeting DR3 together with another biologically relevant target;
- manufacture sufficient quantities of bulk drug substance and drug product to support our ongoing and planned nonclinical studies and clinical trials;
- maintain our operational, financial, and management systems;
- retain key personnel and infrastructure to support our nonclinical development, research and manufacturing, and future clinical development efforts;

- utilize our in-house process development and manufacturing capabilities;
- continue to develop, perfect, and defend our intellectual property portfolio; and
- incur additional legal, accounting, or other expenses in operating our business, including the additional costs associated with operating as a public company and expenses incurred in connection with ongoing and future litigation, if any.

We do not expect to generate significant product revenue unless and until we successfully complete development and obtain regulatory and marketing approval of, and begin to sell, one or more of our product candidates, if ever, which we expect will take several years. We expect to spend a significant amount in development and marketing costs prior to such time. We may never succeed in achieving regulatory and marketing approval for our product candidates. We may obtain unexpected results from our nonclinical studies and clinical trials. We may elect to discontinue, delay, or modify nonclinical studies and clinical trials of our product candidates. We may be adversely affected by inflationary pressures and the macroeconomic environment, which are beyond our control. A change in the outcome of any of these variables with respect to the development of a product candidate could mean a significant change in the costs and timing associated with the development of that product candidate. Accordingly, until such time as we can generate significant product revenue, if ever, we expect to continue to seek private or public equity and debt financing, and/or additional collaborations with third parties, to meet our capital requirements. There can be no assurance that such funding may be available to us on acceptable terms, or at all, or that we will be able to commercialize our product candidates. In addition, we may not be profitable even if we commercialize any of our product candidates.

Global Economic Considerations

The global macroeconomic environment is uncertain, and could be negatively affected by, among other things, inflation, slower growth or recession, changes in trade policies, including tariffs or other trade restrictions or the threat of such actions, instability or volatility in the global capital and credit markets, supply chain weaknesses, financial institution instability, changes to fiscal and monetary policy or government budget dynamics and instability in the geopolitical environment. Such challenges have caused, and may continue to cause, recession fears, high interest rates, foreign exchange volatility, and inflationary pressures. At this time, we are unable to quantify the potential effects of this economic instability on our future operations.

Components of our Results of Operations

Related Party License Revenue

Revenue recognized in 2025 was a result of an exclusive license agreement (the "Kayak Agreement") with Kayak Therapeutics, Inc. ("Kayak") for our oncology-focused TRIM7 program, which we entered into in August 2025. Pursuant to the Kayak Agreement, we received preferred stock of Kayak with a fair market value of \$1.0 million as upfront consideration for entering into the agreement and recognized the consideration as license revenue.

Operating Expense

Research and Development Expenses

Our research and development expenses consist primarily of costs incurred in connection with the discovery and development of our current and potential future product candidates. These expenses include:

- expenses incurred to conduct our clinical trials, including expenses associated with clinical trials of SL-325 and any potential product candidates we may advance in the future;
- costs of manufacturing nonclinical study and clinical trial materials, including the costs of raw materials required for manufacturing;
- process development activities to optimize manufacturing processes, including the development and validation of Phase 3 and commercial manufacturing processes and analytical methods;
- expenses incurred to conduct our nonclinical studies;
- employee-related expenses, including salaries, benefits, and stock-based compensation;

- laboratory materials and supplies used to support our research activities;
- fees paid to third parties who assist with research and development activities;
- expenses relating to regulatory activities, including filing fees paid to regulatory agencies; and
- allocated expenses for facility-related costs.

The following table summarizes our research and development expenses by product candidate:

<i>(in thousands)</i>	Three Months Ended March 31,	
	2026	2025
	<i>(unaudited)</i>	
SL-325 ¹	\$ 2,861	\$ 2,229
Other pipeline compounds	2,977	3,240
Internal costs, including personnel related benefits, facilities and depreciation	5,108	4,450
Total research and development costs	<u>\$ 10,946</u>	<u>\$ 9,919</u>

¹ Expenses for SL-325 that were incurred prior to it being nominated as a product candidate are included in "other pipeline compounds" in the table above.

Research and development activities are central to our business model. We are focused on the preclinical and clinical development of SL-325 and other DR3 targeted assets, and conducting additional research on other potential product candidates. Product candidates in earlier stages of development generally have lower development costs than those in later stages of development. In 2026, we anticipate initiating Phase 2 clinical trial(s) for SL-325. Accordingly, we expect an increase in research and development and expense year-over-year, as we incur incremental clinical trial expenses and additional costs associated with commensurate increases in our workforce to support these efforts.

The process of conducting the necessary nonclinical and clinical research to obtain regulatory approval is costly and time consuming. The actual probability of success for our product candidates may be affected by a variety of factors including:

- the safety and efficacy of our product candidates;
- nonclinical data for our product candidates;
- investment in our pipeline;
- competition;
- manufacturing capability; and
- commercial viability.

We may never succeed in achieving regulatory approval for any of our product candidates due to the uncertainties discussed above. We are unable to determine the duration and completion costs of our research and development projects or when and to what extent we will generate revenue from the commercialization and sale of our product candidates, if ever.

General and Administrative Expense

General and administrative expense consists primarily of personnel expenses, including salaries, benefits, and stock-based compensation expense, for employees and consultants in executive, finance, accounting, legal, information technology, business development, and human resource functions. General and administrative expense also includes corporate facility costs, including rent, utilities, depreciation, and maintenance, not otherwise included in research and development expenses, as well as legal fees related to intellectual property, corporate, and litigation matters and fees for accounting and tax services.

If any of our current or future product candidates, including SL-325, continues to advance through clinical development, or obtains regulatory approval, we expect that we would incur increased expenses associated with

building the appropriate general and administrative support for our increased research and development activities, or building a sales and marketing team.

Other Income

Other income consists of interest earned on our cash, cash equivalents and short-term investments, which consists of amounts held in a money market fund and government obligations as well as investment fees and realized gain or losses on short-term investments (if any).

Income Taxes

Since our inception, we have not recorded any income tax benefits for the net operating losses ("NOLs") we have incurred or for our research and development tax credits, as we believe, based upon the weight of available evidence, that it is more likely than not that all of our NOLs and tax credits will not be realized. Our capital loss and tax credit carryforwards as of December 31, 2025 began to expire in 2026. We have recorded a full valuation allowance against our deferred tax assets at each balance sheet date.

Results of Operations

Comparison of the Three Months Ended March 31, 2026 and 2025

The following table sets forth our results of operations for the three months ended March 31, 2026 and 2025:

<i>(in thousands)</i>	Three Months Ended March 31,		Change	
	2026	2025	Dollar	Percentage
	(unaudited)			
Revenue	\$ —	\$ —	\$ —	— %
Operating expenses:				
Research and development	10,946	9,919	1,027	10.4 %
General and administrative	4,599	4,470	129	2.9 %
Loss from operations	(15,545)	(14,389)	(1,156)	8.0 %
Other income:				
Other	778	687	91	13.2 %
Net loss	\$ (14,767)	\$ (13,702)	\$ (1,065)	7.8 %

Research and Development Expenses

Research and development expenses increased by \$1.0 million, or 10.4%, to \$10.9 million for the three months ended March 31, 2026 from \$9.9 million for the three months ended March 31, 2025. The increase in research and development expenses was primarily due to an increase of \$0.6 million in SL-325 expenses primarily as a result of moving SL-325 into clinical development in 2025, an increase in personnel related costs of \$0.7 million partially offset by a decrease of \$0.3 million in other pipeline compounds cost.

General and Administrative Expense

General and administrative expenses remained relatively unchanged for the three months ended March 31, 2026 as compared to the three months ended March 31, 2025.

Other income increased by \$0.1 million, or 13.2%, to \$0.8 million for the three months ended March 31, 2026 from \$0.7 million for the three months ended March 31, 2025 primarily as a result of an increase in our average investment balance.

Liquidity and Capital Resources

Since our inception, our primary sources of liquidity have been generated by sales of our common stock, pre-funded warrants, common stock warrants, convertible preferred stock, and convertible notes, and through

collaboration agreements. As of March 31, 2026, we had an accumulated deficit of \$445.3 million and \$90.4 million of cash and cash equivalents.

In August 2025, we issued and sold 15,225,158 shares of common stock, pre-funded warrants to purchase up to 37,410,188 shares of common stock, and accompanying common stock warrants to purchase up to 52,635,346 shares of common stock for gross proceeds of \$45.7 million. In 2026, 5,019,719 common stock warrants have been exercised for gross proceeds of \$5.4 million and we may receive an additional \$51.5 million in gross proceeds if the remaining common stock warrants are exercised.

In January 2026, we entered into a sales agreement (the "Sales Agreement") with Leerink Partners LLC (the "Sales Agent"), pursuant to which we may offer and sell up to \$75.0 million of shares of our common stock from time to time through our ATM Facility. The Sales Agent is generally entitled to compensation at a commission equal to up to 3.0% of the aggregate gross sales price per share sold under the Sales Agreement. For the three months ended March 31, 2026, we sold 5,000,000 shares of common stock at \$4.28 per share for gross proceeds of \$21.4 million.

Capital Resources and Funding Requirements

Our primary uses of cash, cash equivalents and short-term investments are to fund our operations, which consist primarily of research and development expenditures related to our programs, product development costs, research expenses, administrative support, capital expenditures related to bringing in-house certain process development and manufacturing capabilities, and working capital requirements. We anticipate incurring additional net losses and negative cash flows from operations in the near future until such time, if ever, that we can generate significant sales of our product candidates currently in development. Our future funding requirements will depend on many factors, including:

- the scope, timing, progress and results of discovery, nonclinical development, laboratory testing, and clinical trials for our product candidates;
- the costs of process development and scale up of a commercially ready manufacturing process to support registrational clinical trials;
- the costs of manufacturing our product candidates for clinical trials and in preparation for marketing approval and commercialization;
- the extent to which we enter into collaborations or other arrangements with additional third parties in order to further develop our product candidates;
- the costs of preparing, filing and prosecuting patent applications, maintaining and enforcing our intellectual property rights, and defending other intellectual property-related claims;
- the costs and fees associated with the discovery, acquisition or in-license of additional product candidates or technologies;
- the costs of future commercialization activities, if any, including establishing sales, marketing, manufacturing, distribution and storage capabilities, for any of our product candidates for which we receive marketing approval; and
- revenue, if any, received from commercial sales of our product candidates, should any of our product candidates receive marketing approval.

Until we obtain regulatory approval to market our product candidates, if ever, we cannot generate revenues from sales of our products. Even if we are able to sell our products, we may not generate a sufficient amount of product revenues to finance our cash requirements. Accordingly, it will be necessary for us to seek to raise additional capital through equity offerings and/or debt financings or from other potential sources of liquidity, which may include new collaborations, licensing or other commercial agreements for one or more of our development programs or patent portfolios. There can be no assurance that such funding may be available to us on acceptable terms, or at all. The issuance of equity securities may result in dilution to stockholders and the issuance of debt securities may have rights, preferences and privileges senior to those of our common stock and the terms of any such debt securities could impose significant restrictions on our operations. The failure to raise funds as and when needed

could have a negative impact on our financial condition and ability to pursue our business strategies. Additionally, if additional funding is not secured when required, we may need to delay or curtail our operations until such funding is received, which would have a material and adverse impact on our business prospects and results of operations.

We believe that our cash and cash equivalents as of March 31, 2026, and assuming the full exercise of the outstanding common stock warrants, are sufficient to fund projected operations into 2029.

Cash Flows

The following table shows a summary of our cash flows for the periods indicated:

<i>(in thousands)</i>	Three Months Ended March 31,	
	2026	2025
	<i>(unaudited)</i>	
Net cash used in operating activities	\$ (13,424)	\$ (12,032)
Net cash provided by investing activities	23,848	15,600
Net cash provided by (used in) financing activities	25,803	(57)
Net increase in cash and cash equivalents	\$ 36,227	\$ 3,511

Net Cash Used in Operating Activities

During the three months ended March 31, 2026, net cash used in operating activities was \$13.4 million and primarily reflected our net loss of \$14.8 million and a \$2.0 million decrease in our operating assets and liabilities partially offset by net non-cash operating charges of \$3.4 million for stock-based compensation, depreciation expense, accretion of investments and non-cash operating lease expense. We expect to continue to use cash in our operating activities as we conduct our clinical trials and nonclinical studies, incur costs of manufacturing clinical trial and nonclinical study materials and continue process development activities to optimize our manufacturing processes.

During the three months ended March 31, 2025, net cash used in operating activities was \$12.0 million and primarily reflected our net loss of \$13.7 million and a \$1.1 million decrease in our operating assets and liabilities partially offset by non-cash operating charges of \$2.8 million for stock-based compensation, depreciation expense, accretion of investments and non-cash operating lease expense.

Net Cash Provided by Investing Activities

During the three months ended March 31, 2026, net cash provided by investing activities was \$23.8 million as a result of investment maturities.

During the three months ended March 31, 2025, net cash provided by investing activities was \$15.6 million, as a result of investment maturities.

Net Cash Provided by (Used in) Financing Activities

During the three months ended March 31, 2026, net cash provided by financing activities was \$25.8 million and was primarily a result of proceeds from the sale of common stock and exercise of common stock warrants for \$26.0 million.

During the three months ended March 31, 2025, minimal cash was used in financing activities.

Contractual Obligations and Other Commitments

See Note 5 to our condensed financial statements found elsewhere in this Quarterly Report on Form 10-Q for additional disclosures. There have been no other material changes from the Contractual Obligations and Other Commitments disclosed in Note 6 and 7 of our Annual Report on Form 10-K for the year ended December 31, 2025.

Critical Accounting Policies

Our management's discussion and analysis of our financial condition and results of operations are based on our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these condensed financial statements requires us to make estimates

and judgments that affect the reported amounts of assets, liabilities, and expenses and the disclosure of contingent assets and liabilities in our financial statements. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, the accrual for research and development expenses, and the valuation of stock-based awards. We base our estimates on historical experience, known trends and events, and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Our critical accounting policies are those policies which require the most significant judgments and estimates in the preparation of our financial statements. We believe that the assumptions and estimates associated with our most critical accounting policies are those relating to revenue, accrued research and development costs and stock-based compensation.

There have been no material changes in our critical accounting policies and estimates as compared to the critical accounting policies and estimates disclosed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2025.

Recent Accounting Pronouncements

See Note 2 to our condensed financial statements found elsewhere in this Quarterly Report on Form 10-Q for a description of recent accounting pronouncements applicable to our financial statements.

Emerging Growth Company and Smaller Reporting Company Status

We were previously an "emerging growth company" as defined in the Jumpstart Our Business Startups Act of 2012, as amended ("JOBS Act"). The JOBS Act provides that an emerging growth company can take advantage of an extended transition period for complying with new or revised accounting standards. Thus, an emerging growth company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies.

As of December 31, 2025, we ceased to qualify as an emerging growth company. We continue to qualify as a "smaller reporting company" as defined in Rule 12b-2 under the 1934 Securities and Exchange Act (the "Exchange Act") and thus will continue to be permitted to make certain reduced disclosures in the Annual Report on Form 10-K and other periodic reports.

We will continue to be a smaller reporting company so long as (i) the market value of our stock held by non-affiliates is less than \$250.0 million or (ii) our annual revenue is less than \$100.0 million during the most recently completed fiscal year and the market value of our stock held by non-affiliates is less than \$700.0 million. As long as we remain a smaller reporting company we may continue to rely on exemptions from certain disclosure requirements that are available to smaller reporting companies. Specifically, as a smaller reporting company we may choose to present only the two most recent fiscal years of financial statements in our Annual Report on Form 10-K and, similar to emerging growth companies, smaller reporting companies have reduced disclosure obligations regarding executive compensation.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are a smaller reporting company, as defined by Rule 12b-2 under the Exchange Act and in Item 10(f)(1) of Regulation S-K, and are not required to provide the information under this item.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and our principal financial officer, evaluated, as of the end of the period covered by this Quarterly Report on Form 10-Q, the effectiveness of our disclosure controls and procedures. Based on this evaluation of our disclosure controls and procedures as of March 31, 2026, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures as of such date are effective at the reasonable assurance level. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act means controls and other

procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and our management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the first quarter of the year ending December 31, 2026 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

Our business is subject to various risks, including those described in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2025. There have been no material changes from the risk factors disclosed in Item 1A of our Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not Applicable.

Item 5. Other Information

On February 2, 2026, Arunthathy Nirmalini (Lini) Pandite, M.B.Ch.B., the Company's Chief Medical Officer, adopted a trading plan intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) under the Exchange Act (a "10b5-1 Plan"). Dr. Pandite's 10b5-1 Plan provides for the potential sale of up to 83,514 shares of the Company's common stock and will expire on the earlier of June 30, 2027 or the date when all shares under Dr. Pandite's 10b5-1 Plan are sold.

On February 2, 2026, Abhinav Shukla, PhD., the Company's Chief Technical Officer, adopted a trading plan intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) under the Exchange Act. Dr. Shukla's 10b5-1 Plan provides for the potential exercise of stock options to purchase up to 168,659 shares of the Company's common stock and subsequent sale of a portion of the exercised options to cover the exercise price and estimated income taxes associated with the exercise. The 10b5-1 Plan will expire on the earlier of January 29, 2027 or the date when all shares under Dr. Shukla's 10b5-1 Plan are exercised.

The adoption of Dr. Pandite and Dr. Shukla's 10b5-1 plans were in accordance with both the Company's insider trading policy and SEC rules and regulations, on the date of adoption.

Other than as described above, during the three months ended March 31, 2026, none of our directors or Section 16 officers (as defined in Rule 16a-1(f) under the Exchange Act) adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408(a) of Regulation S-K.

Item 6. Exhibits

The exhibits filed or furnished as part of this Quarterly Report on Form 10-Q are set forth below.

Exhibit Number	Description of Exhibit
3.1	Amended and Restated Certificate of Incorporation of Shattuck Labs, Inc. (incorporated by reference from Exhibit 3.1 to Shattuck's Current Report on Form 8-K filed on October 14, 2020 (Commission File No. 001-39593))

FIRST AMENDMENT TO OFFICE LEASE
(IBC / Shattuck Labs)

THIS FIRST AMENDMENT TO COMMERCIAL LEASE (this "Amendment") is made and entered into to be effective August 4, 2025 (the "Effective Date"), by and between INTERNATIONAL BANK OF COMMERCE, LAREDO, TEXAS, a Texas state bank ("Landlord"), and SHATTUCK LABS, INC., a Delaware corporation ("Tenant").

RECITALS:

A. Landlord and Tenant entered into that certain Office Lease made effective January 8, 2021 (the "Lease"), for the lease of 8,042 rentable square feet, known as Suite 1200 of the office building known as "IBC Bank Plaza" located at 500 W 5th Street, Ausitn, Texas (the "Building"), as more particularly described in the Lease (the "Original Leased Premises").

B. Landlord and Tenant desire to amend the Lease to: (i) provide for a reduction of the Original Leased Premises by 2,601 RSF, as shown and described on Exhibit A attached hereto and incorporated herein by reference, and (ii) make such other amendments as are reflected herein.

AGREEMENTS:

In consideration of these premises, the agreements made herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Landlord and Tenant amend the Lease and agree as follows:

1. Defined Terms. Unless defined differently herein or the context clearly requires otherwise, all capitalized terms used in this Amendment shall have the meaning ascribed to them under the Lease.
2. Recitals. The above recitals are incorporated herein for all purposes.
3. Reduction of Lease Leased Premises. As of the Effective Date herein, Landlord and Tenant hereby agree that the Lease and the Lease Term shall terminate with respect to that certain approximately 2,601 RSF portion of the Original Leased Premises depicted on Exhibit A (the "Give Back Space"), and, except as otherwise expressly set forth herein, all references in the Lease to the "Leased Premises" shall mean only that certain 5,441 RSF space depicted on Exhibit A (the "Reduced Lease Premises").
4. Rentable Square Feet. As of the Effective Date herein, for all purposes provided for in the Lease, excluding calculation of the Base Rent, Monthly Base Rent, and Additional Rent, Tenant's RSF basis shall be amended to 5,441 RSF, reflecting the reduction of the addition of the Give Back Space. For calculation of the Base Rent, Monthly Base Rent, and Additional Rent, Tenant's RSF basis shall remain 8,042 RSF through and including September 30, 2025. Effective on October 1, 2025, Tenant's RSF basis shall be 5,441 RSF.

5. Tenant's Pro Rata Share. For purposes of calculating Tenant's Proportionate Share of Operating Costs, Tenant's Operating Expense Proportionate Share shall remain 4.13% through and including October 31, 2025. Effective on November 1, 2025, Tenant's Operating Expense Proportionate Share shall be 2.793%.

6. Surrender and Access. On or before the twenty first (21st) day after the Effective Date (the "Give-Back Date"), Tenant shall vacate, surrender and deliver to Landlord the Give Back Space in the same condition that Tenant is required to deliver the Leased Premises to Landlord at the expiration of the Lease Term in accordance with the Lease. Upon the Give-Back Date, Landlord shall have access to the Give Back Space and Reduced Lease Premises, subject to the terms of Section 7 herein, to perform the Demising Work (defined below).

7. Segregation of Premises. At the sole cost and expense to Landlord, Landlord shall (i) cause the Reduced Lease Premises to be demised with a new demising wall (the "Demising Wall") installed to segregate the Give Back Space from the Reduced Lease Premises, (ii) finish the Demising Wall to appear consistent with those of the Reduced Lease Premises, and (iii) ensure all MEP components are segregated between the Give Back Space and Reduced Lease Premises and in good working order once segregation is completed (collectively, the "Demising Work"). Any construction, alteration, or renovation required to complete the Demising Work shall occur during weekends and / or after normal business hours to ensure such construction or alteration does not interfere with Tenant's quiet enjoyment of the Reduced Lease Premises during normal business hours.

8. Renewal Option. The Renewal Option provided for by the Lease is hereby amended such that (i) the time to exercise the Renewal Option is extended such that Tenant may exercise the Renewal Option at any time before February 1, 2026, and (ii) the Renewal Term is reduced from a five year period to a two year period.

9. Right of First Offer: The ROFR provided for by the Lease is hereby terminated and all right and obligations thereunder of Landlord and Tenant are no longer enforceable.

10. Other. Except as expressly set forth in this Amendment, the Lease has not been modified or amended. The Lease, as amended by this Amendment, is in full force and effect. The parties hereto hereby ratify, confirm and approve in all respects the Lease as amended by this Amendment. The Lease, as amended by this Amendment, constitutes the entire agreement between the parties hereto with respect to the subject matter hereof and supersedes and replaces for all purposes all prior and contemporaneous agreements and understandings, whether oral or written, between the parties hereto and their respective successors and permitted assigns. The Lease, as amended by this Amendment, cannot be modified or amended, except in writing executed by both parties hereto. The Lease, as amended by this Amendment, is governed by and will be construed and enforced in accordance with the laws of the State of Texas. Time is of the essence in the performance by each party of its obligations under the Lease, as amended by this Amendment.

11. Authority. Each party hereto represents and warrants that the agent, partner or officer executing this Amendment on its behalf is fully authorized, directed and empowered to

execute and deliver this Amendment in such capacity as the act and deed of the party on whose behalf he or she is executing this Amendment and that all partnership, corporate or company action requisite to such execution and delivery has been taken by such party.

12. Multiple Counterparts; Facsimile Signatures. Multiple copies of this Amendment may be executed by the parties hereto. Each such executed copy shall have the full force and effect of an original executed instrument. To facilitate the execution of this Amendment, the parties may execute and exchange facsimile counterparts of the signature pages by e-mail or fax transmission, and such facsimile signatures shall be deemed original.

[Signature Pages to Follow]

IN WITNESS WHEREOF, Landlord and Tenant have executed this Amendment as of the Effective Date.

Name: Taylor Schreiber, MD, PhD

Title: Chief Executive Officer

EXHIBIT A

SECOND AMENDMENT TO OFFICE LEASE
(IBC / Shattuck Labs)

THIS SECOND AMENDMENT TO COMMERCIAL LEASE (this "Second Amendment") is made and entered into to be effective February ~~23~~, 2026 (the "Effective Date"), by and between INTERNATIONAL BANK OF COMMERCE, LAREDO, TEXAS, a Texas state bank ("Landlord"), and SHATTUCK LABS, INC., a Delaware corporation ("Tenant").

RECITALS:

A. Landlord and Tenant entered into that certain Office Lease, dated effective January 8, 2021 (the "Original Lease"), for the lease of Suite 1200 of the office building known as "IBC Bank Plaza" located at 500 W 5th Street, Ausitn, Texas (the "Building"), as amended by that certain First Amendment to Office Lease ("First Amendment," together with the Original Lease, the "Lease"), dated effective August 4, 2025.

B. Pursuant to the Lease, the Term is set to expire on October 31, 2026.

C. Landlord and Tenant desire to extend the term of the Lease and modify certain other provisions thereof as more specifically set forth herein.

AGREEMENTS:

In consideration of these premises, the agreements made herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Landlord and Tenant amend the Lease and agree as follows:

1. Defined Terms. Unless defined differently herein or the context clearly requires otherwise, all capitalized terms used in this Second Amendment shall have the meaning ascribed to them under the Lease.

2. Recitals. The above recitals are incorporated herein for all purposes.

3. Extended Term. The Lease Term is hereby extended, upon and subject to the terms, covenants and conditions of the Lease, except as otherwise set forth herein, for an additional period of thirty-eight (38) months ("First Extended Term"), commencing on November 1, 2026 ("First Extended Commencement Date") and expiring on December 31, 2029 (the "First Extended Expiration Date").

4. Base Rental Rate. Commencing on the First Extended Commencement Date and continuing throughout the First Extended Term, Tenant shall pay Landlord the Base Rent as follows:

First Extended Term Period	Monthly Base Rent	Annual Base Rent
Months 1 – 2	\$0.00*	\$44.50/RSF*
Months 3 – 12	\$20,177.04	\$44.50/RSF
Months 13 – 24	\$20,680.33	\$45.61/RSF
Months 25 – 36	\$21,197.23	\$46.75/RSF
Months 37 – 38	\$21,727.73	\$47.92/RSF

*Base Rent for months 1 and 2 of the First Extended Term are abated, subject to the terms and conditions of Section 2.C(1) of the Lease.

5. Operating Expenses. The estimated Operating Cost Share Rent for the 2026 rental year is \$24.06 per RSF.

6. Parking. Commencing on the First Extended Commencement Date and continuing throughout the First Extended Term, Tenant (i) shall be provided six (6) non-reserved parking spaces on a “must take and pay” basis at \$225/space/month *plus* sales tax, and (ii) shall be entitled to lease three (3) reserved parking spaces at \$275/space/month *plus* sales tax.

7. Other. Except as expressly set forth in this Second Amendment, the Lease has not been modified or amended. The Lease, as amended by this Second Amendment, is in full force and effect. The parties hereto hereby ratify, confirm and approve in all respects the Lease as amended by this Second Amendment. The Lease, as amended by this Second Amendment, constitutes the entire agreement between the parties hereto with respect to the subject matter hereof and supersedes and replaces for all purposes all prior and contemporaneous agreements and understandings, whether oral or written, between the parties hereto and their respective successors and permitted assigns. The Lease, as amended by this Second Amendment, cannot be modified or amended, except in writing executed by both parties hereto. The Lease, as amended by this Second Amendment, is governed by and will be construed and enforced in accordance with the laws of the State of Texas. Time is of the essence in the performance by each party of its obligations under the Lease, as amended by this Second Amendment.

8. Brokers. Tenant represents to Landlord and Landlord represents to Tenant that each has not dealt with any real estate broker with respect to this Second Amendment except for Endeavor Real Estate Group, and no other broker is in any way entitled to any broker’s fee or other payment in connection with this Second Amendment. Each of Landlord and Tenant shall indemnify and defend the other against any claims by any other broker or third party claiming under the indemnifying party (other than Endeavor Real Estate Group) for any payment of any kind in connection with this Lease.

9. Authority. Each party hereto represents and warrants that the agent, partner or officer executing this Second Amendment on its behalf is fully authorized, directed and empowered to execute and deliver this Second Amendment in such capacity as the act and deed of the party on whose behalf he or she is executing this Second Amendment and that all partnership, corporate or company action requisite to such execution and delivery has been taken by such party.

10. Multiple Counterparts; Facsimile Signatures. Multiple copies of this Second Amendment may be executed by the parties hereto. Each such executed copy shall have the full force and effect of an original executed instrument. To facilitate the execution of this Second Amendment, the parties may execute and exchange facsimile counterparts of the signature pages by e-mail or fax transmission, and such facsimile signatures shall be deemed original.

[Signature Pages to Follow]

IN WITNESS WHEREOF, Landlord and Tenant have executed this Amendment as of the Effective Date.
