Key Operational Highlights

- **Total unique Residential customer relationships** grew +1.1% YoY in Q2 2021 including acquired subscribers. Unique Residential customer organic net losses were -12k in Q2 2021 (or a net gain of +23k total Residential customers when including 35k Morris Broadband subscribers acquired inorganically), compared to +53k Residential customer net additions in Q2 2020 (vs. -1k in Q2 2019 and -4k in Q2 2018). This customer performance reflects usual seasonality in the second quarter, elevated move activity as consumers return to home locations, and the protracted impact of several pandemic-related regulatory programs and storms.
- **Residential Broadband RGUs:** Quarterly Residential broadband net additions were flat at +0k in Q2 2021 (or +30k when including Morris Broadband subscribers acquired inorganically), compared to +70k broadband net additions in Q2 2020 (vs. +13k in Q2 2019 and +10k in Q2 2018).
- **Residential Video RGUs:** Reported quarterly video net losses were -48k in Q2 2021 (or -36k when including 12k Morris Broadband video subscribers acquired inorganically) compared to -35k video net losses in Q2 2020 (vs. -21k in Q2 2019 and -24k in Q2 2018).
- **Residential revenue** was flat (-0.1%) YoY in Q2 2021 at \$1.99 billion:
 - **Residential revenue per customer relationship** in Q2 2021 was down -1.5% YoY to \$142.24 but flat sequentially (vs. \$142.24 in Q1 2021).
- **Business Services revenue** grew +1.8% YoY in Q2 2021 driven by Lightpath growth of +2.7% and SMB / Other revenue growth of +1.4% YoY. Business reopening activity has been accelerating as vaccination rates increase and operational restrictions relax, supporting the best SMB customer quarterly net additions in four years. During the quarter, Lightpath announced the expansion of its network into Boston, MA, and Queens, NY.
- **News and Advertising** revenue was up +36.4% YoY in Q2 2021, supported by strong recovery in local, regional, and national advertising plus additional political advertising revenue from the NY mayoral and NJ gubernatorial races.
- **Altice Mobile rebranded as Optimum Mobile** as of July 2021 as the first step in the Company's plan to align all its connectivity brands under one national Optimum brand. Optimum Mobile has approximately 180k mobile lines as of June 30, 2021 (+5k in net additions in Q2 2021), generating revenue of \$20.7 million for the quarter (up +4.0% YoY), and reaching 3.8% penetration of Altice USA's Residential customer base. Since the beginning of 2021, all active Optimum Mobile customers have migrated onto the T-Mobile network from the Sprint network.
- **Increased network usage and demand for higher broadband speeds:** Broadband-only customer usage averaged 558 GB per month in Q2 2021, which is 26% higher than the average usage of the entire customer base. The average broadband speed taken by Altice USA's customer base has nearly doubled in the past three years to 316 Mbps at the end of Q2 2021. Over 50% of our broadband customers remain on plans with download speeds of 200 Mbps or less, representing a sizable opportunity to continue to upgrade speeds.
- **Increase in 1 Gig broadband sell-in:** In Q2 2021, 1 Gig sell-in to new customers, where 1 Gig services are available, was in line with the prior quarter at 42%. 11.3% of the total customer base currently takes Gigabit speeds, representing a significant growth opportunity for the Company.
- **FTTH strategy and update:** At the end of Q2 2021, Altice USA covered approximately 1.1 million homes with FTTH technology available for service, with FTTH sell-in to new customers at approximately two-thirds of net additions in areas where FTTH is available in Q2. Penetration of FTTH passings grew to 4.3% compared to 1.0% in Q2 2020. The Company remains positive on the future of its FTTH deployment initiatives and confident in delivering a better customer experience, as well as both capex and opex efficiencies, following the completion of its FTTH build.

- **Increase in new-builds:** Altice USA has been accelerating the pace of its network edge-outs, adding 127k homes passed in Q2 2021 (39k homes passed excluding Morris Broadband) and a total of 315k homes passed in the last twelve months (160k homes passed LTM on an organic basis excluding the acquisitions of Morris Broadband and Service Electric Cable T.V. of New Jersey). The Company continues to see strong momentum in growing customer penetration, typically reaching approximately 40% within a year of rollout in new-build areas, and this remains a focus area for growth.
- **Suddenlink network upgrade:** Altice USA is upgrading its network to deliver higher speeds in certain Suddenlink markets that do not currently offer up to 1 Gbps download speeds. In FY 2021 the Company is on track to upgrade 250-300k homes through RF upgrades and equipment upgrades to enable higher speeds. These markets have previously only offered up to 150 Mbps download speeds and will be upgraded to offer up to 400 Mbps or 1 Gbps.

Lightpath Entry into the Boston Connectivity Market Accelerated by Three Acquisitions

On June 16, 2021, Lightpath announced it had become the first all-fiber, enterprise-grade connectivity provider to enter the Boston market since industry consolidation began over a decade ago. Lightpath announced three acquisitions in the region: Cambridge Network Solutions (CNS), a second area connectivity provider, and the purchase of fiber network assets from Hub Fiber.

Combined, Lightpath acquired over 80 route miles of in-place, high-count fiber network, which currently serve over 100 locations, including 12 area data centers. Additionally, Lightpath's network in the region will be connected to its New York Metro network, expanding on the company's existing 18,000 route miles of fiber serving over 12,000 locations.

Lightpath Extends Fiber Network in Queens, NYC Market with New Network Builds

This expansion adds to the already robust Lightpath footprint in the greater New York City metropolitan area and will bring the network to thousands of new businesses and other organizations in the area.

The Queens expansion includes over 100 miles of new, high-count fiber throughout the market, planned in two phases. Phase 1 of the build will be completed in Q1 of 2022, while the additional proposed routes are targeted for mid-2022. The build will dramatically strengthen Lightpath's density in Queens, an area that is rich with organizations that require enterprise-grade connectivity solutions.

Reconciliation of Non-GAAP Financial Measures:

We define Adjusted EBITDA, which is a non-GAAP financial measure, as net income (loss) excluding income taxes, non-operating income or expenses, loss on extinguishment of debt and write-off of deferred financing costs, gain (loss) on interest rate swap contracts, gain (loss) on derivative contracts, gain (loss) on investments and sale of affiliate interests, interest expense, interest income, depreciation and amortization (including impairments), share-based compensation expense or benefit, restructuring expense or credits and transaction expenses.

We believe Adjusted EBITDA is an appropriate measure for evaluating the operating performance of the Company. Adjusted EBITDA and similar measures with similar titles are common performance measures used by investors, analysts and peers to compare performance in our industry. Internally, we use revenue and Adjusted EBITDA measures as important indicators of our business performance, and evaluate management's effectiveness with specific reference to these indicators. We believe Adjusted EBITDA provides management and investors a useful measure for period-to-period comparisons of our core business and operating results by excluding items that are not comparable across reporting periods or that do not otherwise relate to the Company's ongoing operating results. Adjusted EBITDA should be viewed as a supplement to and not a substitute for operating income (loss), net income (loss), and other measures of performance presented in accordance with GAAP. Since Adjusted EBITDA is not a measure of performance calculated in accordance with GAAP, this measure may not be comparable to similar measures with similar titles used by other companies.

We also use Operating Free Cash Flow (defined as Adjusted EBITDA less cash capital expenditures), and Free Cash Flow (defined as net cash flows from operating activities less cash capital expenditures) as indicators of the Company's financial performance. We believe these measures are two of several benchmarks used by investors, analysts and peers for comparison of performance in the Company's industry, although they may not be directly comparable to similar measures reported by other companies.

- (1) See "Reconciliation of Non-GAAP Financial Measures" on page 7 of this release. Operating Free Cash Flow defined as Adjusted EBITDA less cash capital expenditures, and Free Cash Flow defined as net cash flows from operating activities less cash capital expenditures.
- (2) Q2 2021 Adjusted EBITDA ex-mobile and margin of 44.8% excludes approximately \$13.3m of losses related to Altice USA's mobile business in the current period and \$18.8m of losses in Q2 2020.
- (3) Q3-20 and FY-20 figures include Service Electric Cable T.V. of New Jersey ("Service Electric") acquired subscribers. Q3-20 Service Electric subscribers added 34.4k residential customer relationships, 29.7k broadband, 18.6k video, and 5.9k voice.
- (4) Q2-21 figures include Morris Broadband, LLC ("Morris Broadband") acquired subscribers. Q2-21 Morris Broadband subscribers added 35.1k residential customer relationships, 30.3k broadband, 12.2k video, and 2.2k voice.
- (5) Customer metrics as of June 30, 2021 include approximately 7k residential customers that were not disconnected pursuant to the New York legislation enacted in May 2021 that required us to maintain broadband, video and voice services for non-paying customers and offer deferred payment plans to customers experiencing financial difficulty. The NY Order was lifted at the end of June 2021, coinciding with the end of the declared COVID-19 State of Emergency in New York, and we have subsequently resumed normal disconnect policies. Customer metrics as of June 30, 2021 also include approximately 3.7k residential customers impacted by storms in Louisiana in 2020 that have not been disconnected pursuant to our normal disconnect policies.
- (6) Net debt, defined as the principal amount of debt less cash, and excluding finance leases and other notes.
- (7) Homes passed represents the estimated number of single residence homes, apartments and condominium units passed by the broadband network in areas serviceable without further extending the transmission lines. In addition, it includes commercial establishments that have connected to our broadband network. Broadband services were not available to approximately 30 thousand homes passed and telephony services were not available to approximately 500 thousand homes passed. Homes passed include approximately 67k homes passed acquired in the Service Electric Cable T.V. of New Jersey acquisition in Q3-20 and FY-20 and include approximately 89k homes passed acquired in the Morris Broadband acquisition in Q2-21.
- (8) Total Unique Customer Relationships represent the number of households/businesses that receive at least one of the Company's fixed-line services. Customers represent each customer account (set up and segregated by customer name and address), weighted equally and counted as one customer, regardless of size, revenue generated, or number of boxes, units, or outlets. Free accounts are included in the customer counts along with all active accounts, but they are limited to a prescribed group. Most of these accounts are also not entirely free, as they typically generate revenue through pay-per-view or other pay services and certain equipment fees. Free status is not granted to regular customers as a promotion. In counting bulk Residential customers, such as an apartment building, we count each subscribing family unit within the building as one customer, but do not count the master account for the entire building as a customer. We count a bulk commercial customer, such as a hotel, as one customer, and do not count individual room units at that hotel.
- (9) ARPU is calculated by dividing the average monthly revenue for the respective quarter (fourth quarter for annual periods) derived from the sale of broadband, video and telephony services to Residential customers by the average number of total Residential customers for the same period.
- (10) Customer metrics do not include Optimum Mobile customers.
- (11) Principal amount of debt excluding finance leases and other notes.
- (12) CSC Holdings, LLC Restricted Group excludes the unrestricted subsidiaries, primarily Cablevision Lightpath LLC and NY Interconnect, LLC.
